.214 The EBSA continues to encourage auditors and plan filers to call its Division of Accounting Services at (202) 693-8360 with ERISA-related accounting and auditing questions. Questions concerning the filing requirements and preparation of Form 5500 should be directed to the EBSA's EFAST Help Desk at its toll-free number, (866) 463-3278.

.215 In addition to handling technical telephone inquiries, the EBSA is involved in numerous outreach efforts designed to provide information to practitioners to help their clients comply with ERISA's reporting and disclosure requirements. The DOL's outreach efforts continue to focus on plan audit quality, the current Form 5500, the EFAST processing system, and other DOL-related developments. Questions regarding these outreach efforts should be directed to the OCA at (202) 693-8360. Practitioners and other members of the public may also wish to contact the EBSA at its Web site at www.dol.gov/dol/ebsa. The Web site also provides information on EBSA's organizational structure, current regulatory activities, and customer service and public outreach efforts.

Timeliness of Remittance of Participant Contributions Remains an Enforcement Initiative for the EBSA

.216 The EBSA continues to focus on the timeliness of remittance of participant contributions in contributory employee benefit plans. Participant contributions are plan assets on the earliest date that they can reasonably be segregated from the employer's general assets, but in no event later than (1) the 15th business day of the month following the month in which the participant contributions are withheld or received by the employer (for pension plans), and (2) 90 days from the date on which such amounts are withheld or received by the employer (for welfare plans).

Reporting of Late Remittances

.217 Failure to remit or untimely remittance of participant contributions constitutes a prohibited transaction under ERISA section 406, regardless of materiality. Such transactions constitute either a use of plan assets for the benefit of the employer or a prohibited extension of credit. In certain circumstances, such transactions may even be considered an embezzlement of plan assets.

.218 Information on all delinquent participant contributions should be reported on line 4a of either Schedule H, "Financial Information" or Schedule I, "Financial Information—Small Plan," of the Form 5500, regardless of the manner in which they have been corrected. In addition, plan administrators should correct the prohibited transaction with the IRS by filing a Form 5330 and paying any applicable excise taxes.

.219 For large plans that are subject to the audit requirement

- Delinquent participant contributions reported on line 4a that constitute prohibited transactions [excluding those that have been corrected under the VFCP and for which the conditions of Prohibited

Transaction Exemption (PTE) 2002-51 have been satisfied, as described below] may be reported on a separate supplemental schedule to be attached to the Form 5500 and reported on by the IQPA.

- ERISA and DOL regulations require additional information to be disclosed in supplemental schedules. Some of this information is required to be covered by the auditor's report. AU section 551 (SAS No. 29), *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1), as amended, provides guidance on the form and content of reporting when the auditor submits a document containing information accompanying the basic financial statements. If the auditor concludes that the plan has entered into a prohibited transaction and the transaction has not been properly disclosed in the required supplemental schedule, the auditor should (1) express a qualified opinion or an adverse opinion on the supplemental schedule if the transaction is material to the financial statements or (2) modify his or her report on the supplemental schedule by adding a paragraph to disclose the omitted transaction if the transaction is not material to the financial statements. See chapter 11, "Party in Interest Transactions," of Audit and Accounting Guide *Employee Benefit Plans* for further discussion of prohibited transactions.

.220 Plan officials faced with remitting delinquent participant contributions should consider applying to the DOL's VFCP. Plans that fully comply with the program, including satisfaction of the conditions of PTE 2002-51

- will receive a no-action letter issued by the DOL that provides for no imposition of section 502(l) penalties;
- will receive relief from the excise tax provisions of the IRC;
- will continue to report the occurrence and amount of the corrected delinquent remittances on line 4a of either Schedule H or Schedule I (but not on line 4d or Schedule G); and
- are not required to report such transactions as supplemental information if the plan is required to be audited because the transactions are not considered to be prohibited transactions

.221 The EBSA's Web site, www.dol.gov/ebsa, contains useful information about the VFCP, including a fact sheet, an FAQ section, and a sample no-action letter.

Reporting of Delinquent Loan Repayments

.222 Generally speaking, participant loan repayments are not subject to the DOL's participant contribution regulation (29 CFR 2510.3-102). Accordingly, their delinquent remittance is not reported on line 4a of either Schedule H or Schedule I. However, delinquent remittance of participant loan repayments is a prohibited transaction.

.223 In Advisory Opinion 2002-2A, the DOL concluded that, although not subject to the participant contribution regulation, participant loan repayments paid to or withheld by an employer for purposes of transmittal to an employee benefit plan are sufficiently similar to participant contributions to justify, in the absence of regulations providing otherwise, the application of principles similar to those underlying the final participant contribution regulation for purposes of determining when such repayments become assets of the plan. Specifically, Advisory Opinion 2002-2A concluded that participant loan repayments paid to or withheld by an employer for purposes of transmittal to the plan become plan assets as of the earliest date on which such repayments can reasonably be segregated from the employer's general assets.

.224 Accordingly, the DOL will not reject a Form 5500 report based solely on the fact that delinquent forwarding of participant loan repayments is included on line 4a of the Schedule H or Schedule I. Filers that choose to include such participant loan repayments on line 4a must apply the same supplemental schedule and IQPA disclosure requirements to the loan repayments as apply to delinquent transmittals of participant contributions.

.225 Delinquent forwarding of participant loan repayments is eligible for correction under the VFCP and PTE 2002-51 on terms similar to those that apply to delinquent participant contributions.

Help Desk—For questions or further information, contact the Office of Regulations and Interpretations at the DOL at (202) 693-8500 or the EBSA's Web site at www.dol.gov/ebsa.

Proposed Safe Harbor for Employee Contributions to Small Pension and Welfare Plans

.226 On February 29, 2008, the DOL announced a proposed rule to provide greater protection for employee contributions deposited to pension and welfare benefit plans with fewer than 100 participants by proposing a safe harbor period of 7 business days following receipt or withholding by employers. The proposal is designed to protect workers by encouraging employers to deposit participant contributions to small plans in a timely manner. It also will provide employers with a higher degree of compliance certainty.

.227 Under the current rules, employers of all sizes must transmit employee contributions to pension plans as soon as they can reasonably be segregated from the general assets of the employer, but no later than the 15th business day of the month following the month in which contributions are received or withheld by the employer. The latest date for forwarding participant contributions to health plans is 90 days from the date on which such amounts are received or withheld by the employer.

.228 The proposed rule would amend the participant contribution rules for plans with fewer than 100 participants by creating a safe harbor period under which participant contributions to a small plan will be deemed to be made in compliance with the law if those amounts are deposited with the plan within seven 7 business days of receipt or withholding.

.229 Before the effective date of the final regulation, the DOL will not assert a violation regarding participant contributions where such contributions are deposited with small plans within the seven business day safe harbor period. In addition, the DOL is requesting information and data regarding a possible safe harbor for plans with 100 or more participants to enable it to evaluate the current contribution practices of these large employers.

.230 The proposed regulation may be viewed at the DOL's Web site at www.dol.gov/ebsa.

Electronic Filing of the Form 5500 and Changes to the 2009 Form 5500

.231 On November 16, 2007, the EBSA, the IRS, and the PBGC published in the Federal Register revisions to the Form 5500 annual return/report for plan year 2009, including a deferral for 1 year of the move to the wholly electronic filing system.

.232 Originally proposed to take effect for plan year 2008, plans and service providers now will have additional time to comply with changes to the 2009 Form 5500 and the change to the wholly electronic filing system. Plans and service providers will not be required to comply with these changes until the due date for the plan's 2009 Form 5500.

.233 Other highlights of the changes include the following:

- A new simplified annual reporting form for small plans with secure, easy to value investments with regulated financial institutions. The DOL estimates that approximately 594,000 of the 629,000 small plans required to file an annual report will be eligible to use the new Form 5500-SF, or *short form*.

- Removal of the IRS-only schedules (Schedules E and SSA) from the Form 5500 annual return/report as a result of the move to the wholly electronic filing system.

- Revision of Schedule C to clarify the reporting requirements and improve the information plan officials receive regarding amounts being received by plan service providers.
- Replacement of Schedule B with Schedule SB and Schedule MB to reflect the changes in reporting and funding requirements for single and multiemployer defined benefit pension plans under the PPA effective for the 2008 plan year.
- Modification of Schedule R to add questions required by the PPA to gather information on pension plan funding and compliance with minimum funding requirements effective for the 2008 plan year but filed as an attachment rather than as actual schedules. These modifications will be effective in standard format for the 2009 plan year.
- Modification of Schedule R to collect data needed by the PBGC to properly monitor the plans it insures effective for the 2008 plan year but filed as an attachment rather than as an actual schedule. These modifications will be effective in standard format for the 2009 plan year.
- Miscellaneous changes to the schedules and instructions to improve and clarify reporting effective for the 2009 plan year.
- Improved financial disclosure by the approximately 16,000 tax sheltered 403(b) annuity plans subject to Title I of ERISA by making the reporting rules for those 403(b) plans on par with 401(k) plans. This will involve the completion of the Form 5500 as a small or large pension plan, depending on the number of participants eligible to participate in the plan as of the beginning of the plan year. The DOL anticipates that most small 403(b) plans will be eligible to use the new Form 5500-SF, and thus will only have to meet that limited filing obligation. See the section "New Filing and Audit Requirements for ERISA-Covered 403(b) Employee Benefit Plans" in this alert for further guidance.

Help Desk—The 2009 Form 5500 package and the related Federal Register notices are available on the EBSA's Web site at www.dol.gov/ebsa.

DOL Abandoned Individual Account Plan Final Regulations and Class Exemption

.234 On April 21, 2006, the DOL published in the Federal Register three regulations to facilitate the termination of, and distribution of benefits from, individual account pension plans that have been abandoned by their sponsoring employers. Significant business events such as bankruptcies, mergers, acquisitions, and other similar transactions affecting the status of an employer too often result in employers, particularly small employers, abandoning their individual account pension plans (for example, 401(k) plans). When this happens, custodians such as banks, insurers, and mutual fund companies are left holding the assets of these abandoned plans but do not have the authority to terminate such plans and make benefit distributions, even in response to participant demands. In these situations, participants and beneficiaries have great difficulty accessing the benefits they have earned.

Overview of Regulations

.235 The regulations establish standards for determining when a plan is abandoned, establish simplified procedures for winding up the plan and distributing benefits to participants and beneficiaries, and provide guidance on who may initiate and carry out the winding-up process.

Plan Abandonment

.236 A plan generally will be considered abandoned if no contributions to or distributions from the plan have been made for a period of at least 12 consecutive months and, following reasonable efforts to locate the plan sponsor, it is determined that the sponsor no longer exists, cannot be located, or is unable to maintain the plan.

Determinations of Abandonment

.237 Only a qualified termination administrator (QTA) may determine whether a plan is abandoned under the regulations. To be a QTA, an entity must hold the plan's assets and be eligible as a trustee or issuer of an individual retirement plan under the IRC (for example, bank, trust company, mutual fund family, or insurance company).

Termination and Winding-Up Process

.238 The regulations establish specific procedures that QTAs must follow, including

- notifying the EBSA prior to and after terminating and winding up a plan;
- locating and updating plan records;
- calculating benefits payable to participants and beneficiaries;
- notifying participants and beneficiaries of the termination and their rights and options;
- distributing benefits to participants and beneficiaries; and
- filing a summary terminal report.

.239 A QTA is not required to amend a plan to accommodate the termination, and the rules include model notices that the QTA may use.

Rollover Safe Harbor for Missing Participants

.240 The regulations establish a fiduciary safe harbor for the investment of rollover distributions from terminated plans to individual retirement accounts (IRAs) for missing participants.

Fiduciary Liability and Annual Reporting Relief

.241 QTAs that follow the regulation will be considered to have satisfied the prudence requirements of ERISA with respect to winding-up activities.

.242 The regulations provide annual reporting relief, under which QTAs are not responsible for filing a Form 5500 annual report on behalf of an abandoned plan, either in the terminating year or any previous plan years. However, the QTA must complete and file a summary terminal report at the end of the winding-up process.

Class Exemption

.243 The exemption would cover transactions where the QTA selects and pays itself

- for services rendered prior to becoming a QTA;
- to provide services in connection with terminating and winding up an abandoned plan; and
- for distributions from abandoned plans to IRAs or other accounts maintained by the QTA resulting from a participant's failure to provide direction.

Administration

.244 The Abandoned Plan Program is administered by the EBSA's national and regional offices. Notifications under the program should be sent by e-mail to qtanotices@dol.gov or by mail to

Abandoned Plan Coordinator
U.S. Department of Labor
Employee Benefits Security Administration
Office of Enforcement
200 Constitution Avenue, NW, Suite 600
Washington, DC 20210
Tel. (202) 693-8466

Contact Information

.245 For information regarding the Abandoned Plan Program, contact the DOL at (866) 444-EBSA (3272). For questions about the regulations, contact the EBSA's Office of Regulations and Interpretations at (202) 693-8500. For questions about the class exemption, contact the EBSA's Office of Exemption Determinations at (202) 693-8540.

DOL Consultant Advisor Program

.246 The EBSA's Consultant Advisor Program is an enforcement initiative that is among the DOL's national priorities for 2008. It focuses on the receipt of improper, undisclosed compensation by pension consultants and other investment advisers. The EBSA's investigations will seek to determine whether the receipt of such compensation violates ERISA because the adviser or consultant used its position with a benefit plan to generate additional fees for itself or its affiliates. The DOL may also need to investigate individual plans to address such potential violations as failure to adhere to investment guidelines and improper selection or monitoring of the consultant or adviser. The Consultant Advisor Program will also seek to identify potential criminal violations, such as kickbacks or fraud.

Independence Request for Information

.247 On September 11, 2006, the EBSA published in the Federal Register a Request for Information (RFI) concerning whether the DOL should amend its guidelines on the independence of accountants who audit employee benefit plans. The RFI contained a list of 15 specific questions. Recognizing that these questions may not address all issues relevant to the independence of accountants who audit employee benefit plans, interested parties were invited to submit comments on other issues that they believe are pertinent to the DOL's consideration of new or additional independence guidelines.

.248 The DOL comment period for the RFI closed on December 11, 2006, and the DOL received 27 comments. The DOL continues to evaluate the comments to identify common themes, and the project remains an important DOL initiative.

DOL Issues Rules on Selecting Annuity Providers for Benefit Distributions From Pension Plans

.249 The PPA required the DOL to issue regulations clarifying that the selection of an annuity contract as an optional form of distribution from an individual account plan is not subject to the "safest available" standard under Interpretive Bulletin 95-1, "Interpretive bulletin relating to the fiduciary standard under ERISA when selecting an annuity provider" (29 CFR 2509.95-1), but is subject to all otherwise applicable fiduciary standards. On September 12, 2007, the DOL published an interim final rule that amends Interpretative Bulletin 95-1 to limit the application of the bulletin to the selection of annuity providers for benefit distributions from defined benefit plans.

.250 In addition, the DOL announced a proposed rule to provide guidance, in the form of a safe harbor, to help fiduciaries prudently choose annuity providers for benefit distributions from individual account plans, such as 401(k) plans.

.251 Under the proposed safe harbor, fiduciaries must

- conduct an objective, thorough, and analytical search to identify and select providers;
- consider the need to engage an expert to assist in its evaluation of providers; and
- appropriately conclude that the annuity provider would be financially able to make all future payments under the contract and that the cost of the contract is reasonable in relation to the benefits and services to be provided under the contract.

.252 A copy of both the interim final and proposed rules may be found at the DOL's Web site at www.dol.gov/ebsa.

New Disclosure Civil Penalty Rules Under ERISA Section 502(c)(7)

.253 On August 10, 2007, the DOL published a direct final rule amending the civil penalty regulation under ERISA section 502(c)(7) to reflect amendments to this section in the PPA. The final regulation implements the DOL's authority to assess civil penalties against plan administrators that fail to give employees notice of the right to sell company stock in their pension plan accounts.

.254 The PPA established rights of plan participants and beneficiaries to sell the company stock in their accounts and reinvest the proceeds into other investments available under a plan. It also required plan administrators to notify participants and beneficiaries of this new right and of the importance of diversifying the investment of retirement account assets.

.255 The amendments authorize the DOL to assess civil monetary penalties against plan administrators that fail to give employees notice of the right to sell company stock in their pension plan accounts. These penalties may range as high as $100 per day against plan administrators for each violation of the new notice requirement.

.256 The new rule may be found at the DOL's Web site at www.dol.gov/ebsa.

EBSA's Interim Final Rule for Distributions to Missing Nonspouse Beneficiaries

.257 On February 15, 2007, the DOL issued an interim final rule requiring the distribution of 401(k)-type benefits for missing nonspouse beneficiaries from terminated plans to be rolled into IRAs.

.258 The PPA amended the IRC to allow the rollover of certain retirement benefits of a deceased participant into a tax-favored inherited IRA created on behalf of a nonspouse beneficiary.

.259 The new rule, and a related proposed class exemption, conforms to the PPA by amending existing distribution requirements for terminated DC plans, including abandoned plans, to require rollovers into inherited IRAs for missing nonspouse beneficiaries.

.260 The interim final rule and model notices for notifying participants or beneficiaries of the plan's termination and distribution options may be found at the DOL's Web site at www.dol.gov/ebsa.

EBSA's Interim Final Rule on Cross-Trading

.261 On February 12, 2007, the DOL published an interim final rule regarding the new statutory exemption on cross-trading in the PPA.

.262 The rule implements a key provision of the PPA that allows plans to benefit from cross-trading while ensuring that fair and equitable procedures are in place to protect workers' retirement assets. Cross-trading is a transaction in which an investment manager uses its authority to sell a security on behalf of one client and to buy that same security on behalf of another client.

.263 The statutory exemption allows investment managers of plans governed by ERISA to execute cross-trades if certain conditions are met, including the adoption of written cross-trading policies and procedures. The interim rule establishes the requirements for the policies and procedures that investment managers must adopt to engage in cross-trades.

.264 The interim final rule may be found at the DOL's Web site at www.dol.gov/ebsa.

Multiemployer Plan Notice

.265 Sections 202 and 212 of the PPA established new funding requirements for multiemployer plans deemed to be in an endangered or critical status. No later than the 90th day of each plan year, an actuary is required to certify to treasury and the plan sponsor

- whether a plan is in endangered status for the plan year and whether the plan is or will be in critical status for the plan year, and
- in the case of a plan that is in a funding improvement or rehabilitation period, whether the plan is making the scheduled progress in meeting the requirements of its funding improvement or rehabilitation plan.

.266 Plans in critical status must include in the notice additional explanations regarding possible reduction of adjustable benefits.

.267 No later than 30 days after a multiemployer plan is certified to be in endangered or critical status, the plan sponsor must provide notice of the endangered or critical status to participants and beneficiaries, the bargaining parties, the PBGC, the IRS, and the DOL.

.268 An actuary's failure to timely certify a plan's status is equivalent to the plan sponsor having failed to file a Form 5500. This subjects the plan administrator to penalties of up to $1,100 per day pursuant to ERISA section 502(c)(2). Also, pursuant to ERISA section 502(c)(8), the plan administrator is subject to penalties of up to $1,100 per day for not adopting a funding or rehabilitation plan.

.269 This requirement is effective for plan years beginning after 2007.

Proposed Disclosure Rules for Multiemployer Pension Plans

.270 On September 14, 2007, the DOL published proposed rules giving participants in multiemployer pension plans, their union representatives, and contributing employers the right to request and receive copies of certain actuarial, financial, and other funding-related documents from their plans.

.271 The new disclosure rules implement provisions of the PPA that require plan administrators of multiemployer plans to furnish upon the written request of participants, beneficiaries, employee representatives, and contributing employers copies of actuarial, financial, and funding-related documents. The plan has 30 days after a request to furnish the documents, which are limited to 1 copy per report within a 12-month period.

.272 The proposed regulation may be found at the DOL's Web site at www.dol.gov/ebsa.

Proposed Civil Penalty Rules Under ERISA Section 502(c)(4)

.273 On December 19, 2007, the DOL published in the Federal Register a proposed regulation for assessing civil penalties against plan administrators that fail to disclose certain documents to participants, beneficiaries, and others as required by ERISA, as amended by the PPA.

.274 The PPA established new disclosure provisions relating to funding-based limits on benefit accruals and certain forms of benefit distributions; plan actuarial and financial reports; withdrawal liability of contributing employers; and participants' rights and obligations under automatic contribution arrangements. The PPA gives the DOL authority to assess civil monetary penalties of up to $1,000 per day against plan administrators for violations of the new disclosure requirements. The proposed regulation sets forth the administrative procedures for assessing and contesting such penalties and does not address substantive provisions of the new disclosure requirements.

.275 The text of the proposal is available on the EBSA's Web site at www.dol.gov/ebsa.

On the Horizon

.276 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.277 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Readers should refer to information provided by the various standard-setting bodies for information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
Financial Accounting Standards Board (FASB)	www.fasb.org
Governmental Accounting Standards Board (GASB)	www.gasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Overhaul Project—AICPA Audit and Accounting Guide *Employee Benefit Plans*

.278 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Employee Benefit Plans*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1991. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Proposed FASB EITFs and FSPs

.279 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.280 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

AICPA Employee Benefit Plan Audit Quality Center

.281 The AICPA Employee Benefit Plan Audit Quality Center is a firm-based, voluntary membership center created in March 2003 with the goal of promoting quality employee benefit plan audits. The center now has over 1,500 members in all 50 states, the District of Columbia, the U.S. Virgin Islands, and Puerto Rico.

.282 Reviews performed by the DOL's EBSA continue to show a difference in the quality of ERISA audits performed by center member firms compared with those performed by nonmember firms. As members of the center, firms have available to them tools and resources that are not available from any other source. In addition to providing periodic E-Alerts with information about recent developments affecting employee benefit plan audits, the center has recently made available to its members

- accounting and auditing resource centers in the areas of 403(b) plan audits, SAS No.103, SAS No. 112, the risk assessment standards (SAS Nos. 104–111), stable value investments, and the PPA.
- "Live Forum" and "Roundtable Discussion" member-only conference calls to share important information and answer participant questions on a wide range of technical and practice topics. As an added benefit, the center now offers a CPE option for most calls.
- two new "Topix" primers on cash balance plans and 403(b) plans to help members gain a general understanding of these types of plans.
- three new "Plan Advisories" for members to share with plan stakeholders regarding issues of importance to plan auditors, including the plan sponsor's and trustees' responsibility for monitoring their TPAs, the importance of internal controls, and the plan sponsor's responsibility for valuing their plan investments.

.283 Visit the center Web site at www.aicpa.org/ebpaqc to see a complete list of center members and to preview center benefits. For more information, contact the center at ebpaqc@aicpa.org.

Employee Benefit Plan Resources

.284 The following are various resources that practitioners engaged in the employee benefit plan industry may find beneficial.

Publications

.285 Practitioners may find the following publications useful with respect to employee benefit plans:

- Audit and Accounting Guide *Employee Benefit Plans* with conforming changes as of March 1, 2008) (product no. 012598kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments*, *Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2008) (product no. 012778kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)

- *Checklists and Illustrative Financial Statements for Defined Benefit Pension Plans* (product no. 008997kk) (2008 product no. 008998kk)
- *Checklists and Illustrative Financial Statements for Defined Contribution Pension Plans* (product no. 009007kk) (2008 product no. 009008kk)
- *Checklists and Illustrative Financial Statements for Health and Welfare Benefit Plans* (product no. 009017kk) (2008 product no. 009018kk)
- AICPA Audit Practice Aid *SAS No. 70 Reports and Employee Benefit Plans* (product no. 061061kk)
- *Accounting Trends & Techniques—Employee Benefit Plans* (product no. 006651kk)

AICPA reSOURCE: Accounting and Auditing Literature

.286 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.287 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Among the many courses, the following are specifically related to employee benefit plans:

- Audits of 401(k) Plans
- Employee Benefit Plans Audit and Accounting Essentials
- Form 5500: Prepare It Fast—File It Right...The 1st Time
- SAS No. 70 Auditing Guidance

.288 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.289 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.290 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, 2-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM. So far in 2008, *Employee Benefit Plans Strategic Briefing* has been archived and is available on CD-ROM. This webcast, held on April 23, 2008, was a live interactive AICPA webcast covering all the hot issues currently affecting employee benefit plans. Participants learned about current accounting, auditing, and regulatory developments, including the effect of recently issued pronouncements on both preparers and auditors of employee benefit plans. Speakers included Marcus J. Aron, CPA; Marilee Lau, CPA; and Michele Weldon, CPA.

Member Service Center

.291 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.292 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9am to 8pm on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.293 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conferences

.294 The AICPA sponsors an annual Employee Benefit Plans Accounting, Auditing and Regulatory Update Conference in the late fall. This conference is a 2-day high level forum that lets you interact with expert auditors and members of the DOL. The 2008 conference will be held December 11–12, 2008, in Washington DC.

.295 The AICPA also sponsors an annual National Conference on Employee Benefit Plans each spring. This conference is designed to update attendees on recent developments related to employee benefit plans. The 2009 National Conference on Employee Benefit Plans will be held in May 2009. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

Appendix A—IRS Limits

	2008	*2007*	*2006*
Defined benefit			
Maximum annual pension	$185,000	$180,000	$175,000
Defined contribution			
Maximum annual addition	46,000	45,000	44,000
401(k) plan			
Maximum elective deferral	15,500	15,500	15,000
403(b) plan			
Maximum elective deferral	15,500	15,500	15,000
457 plans	15,500	15,500	15,000
SIMPLE plans	10,500	10,500	10,000
Qualified plans			
Maximum compensation limits	230,000	225,000	220,000
Highly compensated limits	105,000	100,000	100,000
Officer limits (key employee)	150,000	145,000	140,000
FICA taxable wage base	102,000	97,500	94,200
Employer and employee social security tax	6.20%	6.20%	6.20%

Appendix B—Evaluating Control Deficiencies in an Employee Benefit Plan Audit (Applying SAS No. 112)

Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), provides guidance to enhance your ability to identify and evaluate control deficiencies during an audit and then communicate to management and those charged with governance those deficiencies that you believe are significant deficiencies or material weaknesses. The nature of the employee benefit plan environment is likely to give rise to the written communications required by SAS No. 112.

The standard has two unconditional requirements:

- The auditor must evaluate identified control deficiencies and determine whether those deficiencies, individually or in combination, are significant deficiencies or material weaknesses.
- The auditor must communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

When conducting an audit of historical financial statements, you are not required to perform procedures to identify control deficiencies. However, during the course of the audit, you may become aware of deficiencies in the design or operation of the entity's internal control. Your awareness of control deficiencies will vary with each audit and will be influenced by the nature, timing, and extent of audit procedures performed, as well as other factors. The results of your substantive procedures may cause you to reevaluate your earlier assessment of internal control.

Evaluating Internal Control Deficiencies

A control deficiency may be considered just a deficiency. More severe deficiencies are significant deficiencies, and the most severe deficiencies are material weaknesses.

Definitions of Significant Deficiency and Material Weakness

A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles (GAAP) such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

> **Help Desk**—SAS No. 112 includes a list of areas in which control deficiencies ordinarily are at least significant deficiencies and a list of indicators that a control deficiency should be regarded as at least a significant deficiency and a strong indicator of a material weakness. A material financial statement misstatement that was not identified by management is a strong indicator of a material weakness. SAS No. 112 also contains an appendix that provides examples of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

The Evaluation Process

You must evaluate the control deficiencies that you have identified and determine whether these deficiencies, individually or in combination with other control deficiencies, rise to the level of significant deficiencies or material weaknesses.

The factors that you should consider when evaluating control deficiencies are likelihood and magnitude. *Likelihood* refers to the probability that a control, or combination of controls, could have failed to prevent or detect a misstatement in the financial statements being audited. *Magnitude* refers to the extent of the misstatement that could have occurred or that actually occurred because misstatements include both potential and actual misstatements.

The following table summarizes how you consider the significance of a deficiency to determine whether it is a control deficiency, a significant deficiency, or a material weakness.

Magnitude of misstatement that occurred, or could have occurred	***Likelihood of misstatement***	
	More than Remote	***Remote***
Quantitatively or qualitatively material	Material weakness	Control deficiency but not a significant deficiency or a material weakness
More than inconsequential but less than material	Significant deficiency but not a material weakness	Control deficiency but not a significant deficiency or a material weakness
Inconsequential (in other words, clearly immaterial)	Control deficiency but not a significant deficiency or a material weakness	Control deficiency but not a significant deficiency or a material weakness

The Prudent Official Test

When you evaluate the significance of a deficiency, the last step in your evaluation is to conclude whether a prudent official, having knowledge of the same facts and circumstances, would agree with your classification of the deficiency.

> **Help Desk—**See the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist you in the implementation of this standard and to provide additional guidance on communication requirements including the form, content, and timing of the communication and the discussion with management and others.

SAS No. 112 includes examples of factors that affect the consideration of likelihood and magnitude.

Likelihood

In addition to the factors listed in SAS No. 112 and Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies*, the following are examples of factors for employee benefit plans that may affect the likelihood that a control or combination of controls could fail to prevent or detect a misstatement:

- The nature of the financial statements' accounts, disclosures, and assertions involved. For example, related party transactions may be prohibited transactions and involve greater risk.
- The susceptibility of the related assets or liability to loss or fraud. Investments and benefits paid have a higher susceptibility to loss or fraud.

- The subjectivity and complexity of the amount involved and the extent of judgment necessary to determine that amount. For example, the calculation of the present value of accumulated plans' benefits.
- The cause and frequency of any known or detected exceptions relating to the operating effectiveness of a control. Health benefit payments have a higher likelihood of fraud or irregularity. Operational deficiencies such as nontimely contributions.
- The interaction or relationship of the control with other controls. Effective monitoring controls at the plan sponsor level and how they interact with the service provider (as outlined in the SAS No. 70 report).

Magnitude

Factors that may affect the magnitude of a misstatement that could result in a deficiency or deficiencies in controls include but are not limited to the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity in the account balance or class of transactions exposed to the deficiency in the current period or expected in future periods

For employee benefit plans, areas to consider include contributions, claim payments, benefit payments, and investments. When incorrectly used, the application of the definition of *compensation* can result in a higher magnitude (for example, the exclusion of a certain earnings code in error over a period of years could have a material impact).

Generally, the recorded amount is the maximum amount by which an account balance or total of transactions can be overstated. However, because of the potential for unrecorded amounts, there is no upper limit on the amount of potential understatement.

Control Deficiencies, Significant Deficiencies, or Material Weaknesses

Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* provides a general list of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

In addition to the items listed in the alert, the following paragraphs describe circumstances for employee benefit plans that may be control deficiencies, significant deficiencies, or material weaknesses depending upon the likelihood and magnitude of the deficiency.

> **Help Desk—**The items listed here may be used to supplement but not replace those listed in Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies*. This is a companion to, but not a substitute for, the guidance in SAS No. 112 and the alert. Also, when a control deficiency has been identified, management and the auditor should also evaluate the possible mitigating effects of compensating controls. See the SAS for further guidance.

Significant Deficiencies

Deficiencies in the following areas are ordinarily at least significant deficiencies in internal control:

- *Controls over the selection and application of accounting principles that are in conformity with GAAP (having sufficient expertise in selecting and applying accounting principles is an aspect of such controls)*
  - — Improper valuation of investments, especially alternative investments
  - — Plan management must have the ability (methodology and process) to determine reasonableness of actuarial assumptions

- *Controls over nonroutine and nonsystematic transactions*
  - — Lack of controls over plan mergers and spin-offs
  - — Lack of controls over plan terminations and liquidation accounting
  - — Lack of controls over accounting for plan amendments
  - — Lack of controls when changing service providers and ensuring proper information has been transferred to the new service provider

Material Weaknesses

Each of the following circumstances is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

- *Ineffective oversight by those charged with governance of the entity's financial reporting and internal control, or an ineffective overall governance structure:*
  - — Plan sponsor has outsourced the administrative functions of the plan with no oversight by management
  - — Plan sponsor does not have the ability to prepare or review the financial statements
  - — Health and welfare plan utilizes a cash account only for the activity of the plan and neither the outside service provider nor the plan sponsor can prepare the financial statements
  - — Ineffective communication of plan changes between plan management and human resources or payroll department, resulting in significant GAAP deficiencies such as not adjusting the plan financial statements for plan merger or other significant transactions
  - — Lack of documentation of meetings held by those charged with governance (making decisions without documentation)
  - — Appropriateness of plan expenses (if material)
- *Restatement of previously issued financial statements to reflect the correction of a material misstatement*. The correction of a misstatement includes misstatements due to error or fraud but not restatements to reflect a change in accounting principle to comply with a new accounting principle or a voluntary change from one GAAP to another. For employee benefit plans, the following situations may cause restatement of the financial statements if material:
  - — For health and welfare plans, auditing and reporting only on the trust activity rather than the plan
  - — Expenses incurred but not reported (IBNR) not accurately calculated or recorded
  - — Failure to record discretionary employer contributions, especially in profit-sharing plans
  - — Errors in census data that result in a material misstatement of obligation information
  - — Benefit payments not calculated in accordance with plan documents
  - — Not recording demutualizations of insurance companies in the proper period
  - — Failure to properly present and disclose investments (such as securities lending activities, master trusts, and alternative investments)
  - — Incorrect income and expense allocations within a master trust
  - — Cash held on deposit by service providers and not recorded for a health and welfare plan
  - — Inappropriate accounting and disclosure for allocated and unallocated contracts
  - — Improper expenses paid by the plan
  - — Medicare subsidy not properly reflected in the financial statements
  - — Incorrect reporting of 401(k) accounts

- — Use of incorrect actuarial information in the plan financial statements, for example, the use of FASB Statement No. 87, *Employers' Accounting for Pensions*, rather than FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, or using FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, rather than FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits—an amendment of FASB Statements No. 5 and 43*
- — Inappropriate expense allocation between multiemployer plans or the sponsoring union
- — Improper booking of premium stabilization reserves

- *Identification by the auditor of a material misstatement in the financial statements for the period under audit that was not initially identified by the entity's internal control.* This includes misstatements involving estimation and judgment for which the auditor identifies likely material adjustments and corrections of the recorded amounts, which is a strong indicator of a material weakness even if management subsequently corrects the misstatement. For employee benefit plans, these are often due to changes in plan design or the implementation of new pronouncements:
  - — IBNR not accurately calculated or recorded
  - — Not reflecting securities lending in the financial statements due to the lack of understanding of such activity and or the lack of understanding of GAAP requirements surrounding such investments
  - — Lack of having the financial expertise in the financial reporting process
  - — For plan mergers, the recording of net appreciation and transfer amounts may be incorrect due to timing of the accounting of the merger

- *An ineffective internal audit function or risk assessment function at an entity for which such functions are important to the monitoring or risk assessment component of internal control, such as for very large or highly complex entities.* For employee benefit plans, this may include the following:
  - — Investing in alternative or complex investments without proper due diligence or consideration for the accounting, reporting, or regulatory requirements
  - — No oversight for monitoring claims paid in a health and welfare plan
  - — For multiemployer plans, improper monitoring of cash received from contributing employers
  - — Ineffective IT controls
  - — For plans with multiple payroll locations, failure to understand the components of eligible compensation or failure to understand the procedures related to timeliness of participant contributions
  - — Failure to understand the complex nature of the relationships between the plan's systems and the service provider's systems (for example, payroll systems to actuary or recordkeeper systems)
  - — SAS No. 70 report with significant testing exceptions that are not mitigated by controls at the plan sponsor

- *For complex entities in highly regulated industries, an ineffective regulatory compliance function.* This relates solely to those aspects of the ineffective regulatory compliance function for which associated violations of laws and regulations could have a material effect on the reliability of financial reporting. When evaluating the severity of such control deficiencies, the auditor should consider whether the entity has controls in place to monitor the impact on the financial statements of laws and regulations relevant to the conduct of the entity's business and should evaluate the severity of the absence of such controls based on the entity's potential to misstate obligations that may arise from such laws or regulations. For employee benefit plans, this may include the following:
  - — Lack of performance of tax compliance testing such as discrimination testing or lack of taking appropriate corrective action when errors are found in such testing

  - — Prohibited transactions such as timeliness of employee contributions or improper transactions with parties-in-interest and fiduciaries
  - — Lack of timely reporting to regulatory agencies (such as the IRS, Department of Labor, and Pension Benefit Guaranty Corporation)

- *Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected (see paragraph 23 of SAS No. 112 for communication requirements in these circumstances).* This could occur if, for example, one individual is primarily responsible for the accounting and internal controls over all cash receipt and cash disbursement transactions. Having one individual with access to the receipt and disbursement of monies does not provide adequate protection over the plan's assets. Management should consider hiring additional staff or reassign some responsibilities to others to ensure proper segregation of duties is maintained. Given the limited nature of accounting procedures necessary on a monthly basis, management may not feel it is cost effective to add staff to these functions.

- *An ineffective control environment.* Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment. For employee benefit plans, this may include the following:
  - — Lack of oversight by the plan sponsor of the service provider, including not obtaining and reviewing a SAS No. 70 report if available
  - — For service providers with no SAS No. 70 reports, no procedures in place at the plan sponsor to monitor and assess control risk at the service provider

Evaluation Questions

In evaluating the severity of a control deficiency, the first step is to determine whether the deficiency is at least a significant deficiency. Some questions to ask yourself when making this determination include the following:

- Is the likelihood that a misstatement of any magnitude could occur and not be detected by the client's controls at least reasonably possible?
- Is the magnitude of a potential misstatement inconsequential or less than inconsequential to the financial statements? A misstatement is inconsequential if a reasonable person would conclude, after considering the possibility of further undetected misstatements, that the misstatement, either individually or when aggregated with other misstatements, would clearly be immaterial to the financial statements.
- Are there complementary or redundant controls that were tested and evaluated that achieve the same control objective?
- Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to inconsequential?

If the answers to these questions are all no, then the deficiency is at least a significant deficiency. If the answer to any question is yes, before concluding that the control deficiency is not at least a significant deficiency, ask yourself if prudent officials, having your knowledge of the facts and circumstances, would agree with your conclusion that the deficiency is not at least a significant deficiency.

If a prudent official would consider the control deficiency to be at least a significant deficiency, then you would conclude that the deficiency is at least a significant deficiency.

The next step is to assess whether the deficiency is a material weakness. Some questions to ask yourself in making this determination include the following:

- Is the magnitude of the potential misstatement less than material to the financial statements?
- Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to less than material but more than inconsequential?
- Does additional evaluation result in a judgment that the likelihood of a material misstatement of the financial statements is remote?

If the answers to these questions are all no, then the deficiency is a material weakness. If the answer to any question is yes, before concluding that the deficiency is not a material weakness, ask yourself if prudent officials, having your knowledge of the facts and circumstances, would agree with your conclusion that the deficiency is a significant deficiency and not a material weakness, considering the financial statements.

If a prudent official would consider the control deficiency to be a material weakness, then you would conclude that the deficiency is a material weakness.

Illustrative Letter

The following is an illustrative letter for ABC 401(k) Plan with significant deficiencies and material weaknesses. This letter is for illustrative purposes only and should be modified for the individual circumstances of each engagement. The auditor should evaluate the control deficiencies that have been identified to determine whether they rise to the level of a significant deficiency or material weakness. For guidance, see Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies*.

[Firm letterhead]

[Date]

[Addressee]

[Address]

Ladies and Gentlemen:

In planning and performing our audit of the financial statements of ABC 401(k) Plan (the Plan) as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, (US GAAS) we considered the plan's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the plan's internal control. Accordingly, we do not express an opinion on the effectiveness of the plan's internal control.

Our Responsibilities

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

Definitions Related to Internal Control Deficiencies

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects a plan's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the plan's financial statements that is more than inconsequential will not be prevented or detected by the plan's internal control. A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the plan's internal control.

Identified Deficiencies in Internal Control

We consider the following deficiencies to be significant deficiencies in internal control.

Employer Matching Contributions

During our audit procedures, we noted that the plan sponsor, ABC Company, incorrectly calculated the employer match for one participant, causing the participant to receive an excess match for the plan year. Upon further investigation, it was determined that the entire XYZ division was affected by this error. The plan sponsor intends to correct these errors by reducing the next employer match calculation for the affected participants by the amount of the excess match and earnings thereon. We recommend the plan sponsor develop and execute policies and procedures to ensure the proper calculation of employer matching contributions and that these calculations are reviewed by someone other than the individual performing the calculation.

Employee Deferral Contributions

During our audit procedures, we noted that 401(k) deferrals were not withheld from several participants' paychecks during the year due to the timing of the paycheck, setup of pay types in the ADP payroll software, or because the check was a manual check. The plan sponsor will correct these errors by increasing the participant's next deferral by the missed contribution amount along with remitting the missed employer match and lost earnings in the next monthly remittance. We recommend that the plan sponsor develop and execute policies and procedures to ensure the proper calculation of employee deferrals and that these calculations are reviewed by a knowledgeable individual at the plan sponsor because the calculations are performed by a third-party payroll service provider.

It was also noted during our audit procedures that there is some inconsistency in the application of the terms in the plan document relating to the definition of eligible compensation for the purposes of calculating the employee's contribution and the employer's contribution. One participant in our sample made and received contributions based on his compensation including fringe benefits, although fringe benefits are not included in the definition of compensation in the plan document. We noted that this error existed on all participants receiving fringe benefits at that location. The plan sponsor will correct this error by reducing the participant's next deferral by the excess contributions along with reducing the next match for the excess match and earnings thereon. We recommend that the plan sponsor review the setup of the payroll system to ensure all locations are operating in the same manner and are consistent with the plan document.

It was also noted during audit procedures that the rules for hardship distributions were not applied appropriately as required by the plan document. One participant in our contribution sample was required to stop making contributions for the next twelve months after receiving a hardship distribution but then was allowed to continue making contributions when the plan switched recordkeepers. Upon further investigation, it was determined that a control feature at the recordkeeper had not been put in place to stop the deferral contributions where a hardship distribution had been taken. This is not allowable because the plan document states a participant must cease making contributions for twelve months after a hardship distribution is made. We recommend that the plan sponsor review the policies and procedures surrounding the hardship distribution process to ensure all appropriate controls are in place and are operating in accordance with the plan document.

We believe the following deficiencies constitute material weaknesses.

Investments

During our audit, we noted that the client personnel (such as the assistant controller or human resource supervisor) who prepares the financial statements is not knowledgeable regarding the various investment arrangements entered into on behalf of the plan and the financial statement implications of those arrangements. The treasury department has significant knowledge regarding the types of investment arrangements but is not involved in the accounting and reporting functions for the plan. As a result, the plan financial statements prepared did not contain the proper accounting for plan investments and required disclosures under generally accepted accounting principles. For example, it was necessary for the auditor to propose adjustments to the statement of net assets and revisions to the footnote disclosures relating to the plan's security lending arrangement with the trustee.

It is recommended that either (1) the client personnel increase his or her knowledge of the investment arrangements by working with the treasury department or (2) the treasurer become more involved in the financial statement preparation process. In addition, those individuals responsible for preparing the plan's financial statements should increase their knowledge of employee benefit plan accounting and reporting specifically surrounding investments through the use of the AICPA Audit and Accounting Guide *Employee Benefit Plans* or taking outside learning and education courses surrounding employee benefit plan accounting and reporting.

Lack of Financial Statement Knowledge

During our audit, we noted that the client personnel (such as the assistant controller or human resource supervisor) prepares the financial statements using the year-end trial balance provided by the record keeper. However, the trial balance prepared by the record keeper is not prepared on the accrual basis, and it was therefore necessary for the auditor to propose adjusting journal entries to record the contributions receivable and expenses payable at year-end. In addition, it was necessary for the auditor to propose a number of revisions to the footnotes to the financial statements (for example, disclosure of effect of significant plan amendments) to enable the disclosures to be in accordance with generally accepted accounting principles. The client personnel does not appear to have the necessary knowledge and skill to prepare employee benefit plan financial statements in accordance with generally accepted accounting principles.

We recommend that the company utilizes individuals from the corporate finance department with the requisite knowledge and skill in employee benefit plan generally accepted accounting principles to prepare the financial statements. In addition, we recommend that a current disclosure checklist from the AICPA be used to ensure propriety and completeness of the footnotes.

Review of Information Prepared by Third-Party Service Providers

During our audit procedures, we noted that the plan sponsor, ABC Company, did not perform timely reviews of certain information prepared or provided by its third-party service providers. ABC Company is responsible for the prudent oversight and review of all services provided by third parties to the plan. We recommend that the plan sponsor perform various periodic reviews and reconciliations of information provided by your third-party service providers, including (*a*) reconciling total plan assets per the participant detail (the sum of the individual participant account balances) provided by the plan recordkeeper to total plan assets reported by the plan trustee, (*b*) reconcile total contributions made to the plan per ABC Company's general ledger or payroll register to total contributions received by the plan per the trustee, and (*c*) agree individual demographic data included in new employee personnel files to the corresponding information included in the participant detail provided by the plan recordkeeper.

Securities Lending

During our audit procedures, we noted that there was ineffective design and operation of the financial closing and reporting process, resulting in the misapplication of the accounting and disclosure requirements related to securities lending transactions, as governed by FASB Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. We recommend that the plan sponsor review all security lending transactions to ensure that they are properly presented in the plan's financial statements and accompanying footnotes in accordance with FASB Statement No. 140.

We further consider the following matters to be control deficiencies that are of a lesser magnitude than significant deficiencies.

Disbursements

During our audit procedures, we noted one participant in our sample who was paid a distribution based on the account valuation prior to all earnings and contributions being credited to a participant's account and another participant had an error in the calculation of his forfeited balance. The plan sponsor will correct the first error by distributing the remaining balance in the participant's account to him, but the sponsor is not required to make a further distribution related to the second error due to the immateriality of the underpayment. We recommend that the plan sponsor review all distribution requests for accuracy and periodically spot-check reports received from the third-party recordkeeper for any distribution errors.

Plan Management Response

[Insert "Plan Management Response" section if management issues a written response to this communication and such response will be included in a document containing this communication. If this section is included, the following sentence should also be included: "Plan management's written response to the control deficiencies identified herein has not been subjected to our audit procedures, and, accordingly, we express no opinion on it."]

* * *

We have previously discussed our observations and suggestions with the plan sponsor personnel and would be pleased to discuss them in further detail at your convenience to perform any additional study of the matter or to assist you in implementing the recommendations to the extent our independence is not impaired.

This communication is intended solely for the information and use of management, those charged with governance, and others within the plan sponsor [and if applicable, identify any specified regulatory agency] and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

[Firm name]

.300

Appendix C—Definitions of Certain Investments

The following list includes certain investments as defined by the instructions to the Form 5500.

Master trust. A trust for which a regulated financial institution (bank, trust company, or similar financial institution that is regulated, supervised, and subject to periodic examination by a state or federal agency) serves as trustee or custodian and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held.

Common/collective trust (CCT). A trust maintained by a bank, trust company, or similar institution that is regulated, supervised, and subject to periodic examination by a state or federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer of a controlled group of corporations.

Pooled separate account (PSA). An account maintained by an insurance carrier, which is regulated; supervised; and subject to periodic examination by a state agency, for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer of a controlled group of corporations.

103-12 Entity. An entity that is not a master trust, CCT, or PSA whose underlying assets include plan assets within the meaning of 29 CFR 2510.3-101 of 2 or more plans that are not members of a related group of employee benefit plans.

Registered investment company. An investment firm that is registered with the Securities and Exchange Commission and complies with certain stated legal requirements for the collective investment and reinvestment of assets contributed thereto from investors (employee benefit plans and nonemployee benefit plans).

.301

Appendix D—Illustrative Financial Statements

The following 2 illustrative financial statements are for

- the hypothetical XYZ Company 401(k) plan that invests in a common/collective trust (CCT), modified to reflect the reporting and disclosure provisions of FSP AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*.
- the hypothetical XYZ Company 401(k) plan that invests in a master trust, modified to reflect the reporting and disclosure provisions of FSP AAG INV-1 and SOP 94-4-1.

These illustrations do not illustrate other provisions that might apply in circumstances other than those assumed in this example. They also do not illustrate all disclosures required for a fair presentation in conformity with generally accepted accounting principles (GAAP). The presented formats and the wording of accompanying notes are only illustrative and are not necessarily the only possible presentations.

Although GAAP does not require comparative financial statements, Employee Retirement Income Security Act (ERISA) requires a comparative statement of net assets available for benefits. The illustrative financial statements are intended to comply with the requirements of ERISA.

> **Help Desk**—This is not a set of full financial statements but rather just those portions of the financial statements impacted by FSP AAG INV-1 and SOP 94-4-1. For this example, the following items are presented: (1) the statement of net assets available for benefits, (2) the summary of accounting policies note, and (3) the investment contract with insurance company note.

XYZ Company 401(k) Plan—Statement of Net Assets Available for Benefits (CCT)

	December 31,	
	20X1	*20X2*
Assets:		
Investments, at fair value (see Note C)	$9,192,000	$8,005,000
Receivables:		
Employer contribution	14,000	10,000
Participant contributions	52,000	50,000
Total receivables	66,000	60,000
Total assets	9,258,000	8,065,000
Liabilities:		
Accounts payable	10,000	20,000
Accrued expenses	15,000	—
Total liabilities	25,000	20,000
Net assets available for benefits at fair value	9,233,000	8,045,000
Adjustment from fair value to contract value for interest in collective trust relating to fully benefit-responsive investment contracts	(15,000)	(10,000)
Net assets available for benefits	$9,218,000	$8,035,000

See accompanying notes to the financial statements.

Notes to Financial Statements

B. Summary of Accounting Policies Use of Estimates and Basis of Accounting

Use of Estimates and Basis of Accounting

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the financial statements and accompanying notes. Actual results could differ from those estimates.

As described in Financial Accounting Standards Board Staff Position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans* (the FSP), investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The plan invests in investment contracts through a collective trust. As required by the FSP, the statement of net assets available for benefits presents the fair value of the investment in the collective trust as well as the adjustment of the investment in the collective trust from fair value to contract value relating to the investment contracts. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Investment Valuation and Income Recognition

The plan's investments are stated at fair value. Quoted market prices are used to value investments. Shares of mutual funds are valued at the net asset value of shares held by the plan at year-end. Participant loans are valued at their outstanding balances, which approximate fair value. The plan's interest in the collective trust is valued based on information reported by the investment advisor using the audited financial statements of the collective trust at year-end.

Purchases and sales of securities are recorded on a trade date basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

XYZ Company 401(k) Plan—Statement of Net Assets Available for Benefits (Master Trust)

	December 31,	
	20X1	*20X2*
Assets:		
Investments in XYZ Company master trust, at fair value (See note C)	$9,192,000	$8,005,000
Receivables:		
Employer contribution	14,000	10,000
Participant contributions	52,000	50,000
Total receivables	66,000	60,000
Total assets	9,258,000	8,065,000
Liabilities:		
Accounts payable	10,000	20,000
Accrued expenses	15,000	—
Total liabilities	25,000	20,000
Net assets available for benefits at fair value	9,233,000	8,045,000
Adjustment from fair value to contract value for interest in XYZ Company master trust relating to fully benefit-responsive investment contracts	(15,000)	(10,000)
Net assets available for benefits	$9,218,000	$8,035,000

See accompanying notes to the financial statements.

Notes to Financial Statements

B. Summary of Accounting Policies

Use of Estimates and Basis of Accounting

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the financial statements and accompanying notes. Actual results could differ from those estimates.

As described in FSP AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans* (the FSP), investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The plan invests in investment contracts through the XYZ Company master trust. The statement of net assets available for benefits presents the fair value of the investment in the master trust as well as the adjustment of the investment in the master trust from fair value to contract value relating to investment contracts. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Investment Valuation and Income Recognition

The plan's investments are stated at fair value. The fair value of the plan's interest in the master trust is based on the specific interest that each plan has in the underlying participant directed investment options. The investments held by the master trust are valued as follows.

Shares of mutual funds are valued at the net asset value of shares held at year-end. Participant loans are valued at their outstanding balances, which approximate fair value. The fair value of the guaranteed investment contract (GIC) is calculated by discounting the related cash flows based on current yields of similar instruments with comparable durations. Individual assets of the synthetic investment contract (synthetic GIC) are valued at representative quoted market prices. The fair value of the wrap contract for the synthetic GIC is determined using the market approach discounting methodology that incorporates the difference between current market level rates for contract level wrap fees and the wrap fee being charged. The difference is calculated as a dollar value and discounted by the prevailing interpolated swap rate as of period end.

Purchases and sales of securities are recorded on a trade date basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

E. Investment Contracts

In 20X0, the plan entered into a benefit-responsive investment contract with National Insurance Company (National), held by the master trust. National maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The GIC issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the plan. There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on a formula agreed upon with the issuer, but may not be less than 4 percent. Such interest rates are reviewed on a quarterly basis for resetting.

The plan also entered into a synthetic investment contract (synthetic GIC) in 20X1, held by the master trust. A synthetic GIC is a wrap contract paired with an underlying investment or investments, usually a portfolio, owned by the plan, of high quality, intermediate term fixed income securities. The plan purchases a wrapper contract from financial services institution. A synthetic GIC credits a stated interest rate for a specified period of time. Investment gains and losses are amortized over the expected duration through the calculation of the interest rate applicable to the plan on a prospective basis. Synthetic GICs provide for a variable crediting rate, which typically resets at least quarterly, and the issuer of the wrap contract provides assurance that future adjustments to the crediting rate can not result in a crediting rate less than zero. The crediting rate is primarily based on the current yield-to-maturity of the covered investments, plus or minus amortization of the difference between the market value and contract value of the covered investments over the duration of the covered investments at the time of computation. The crediting rate is most affected by the change in the annual effective yield to maturity of the underlying securities, but is also affected by the differential between the contract value and the market value of the covered investments. This difference is amortized over the duration of the covered investments. Depending on the change in duration from reset period to reset period, the magnitude of the impact to the crediting rate of the contract to market difference is heightened or lessened. The crediting rate can be adjusted periodically and is usually adjusted either monthly or quarterly, but in no event is the crediting rate less than zero percent.

Certain events limit the ability of the plan to transact at contract value with the insurance company and the financial institution issuer. Such events include (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The plan administrator does not believe that the occurrence of any such value event that would limit the plan's ability to transact at contract value with participants is probable.

The GIC does not permit the insurance company to terminate the agreement prior to the scheduled maturity date; however, the synthetic GICs generally impose conditions on both the plan and the issuer. If an event of default occurs and is not cured, the nondefaulting party may terminate the contract. The following may cause the plan to be in default:

- A breach of material obligation under the contract
- A material misrepresentation
- A material amendment to the plan agreement

The issuer may be in default if it breaches a material obligation under the investment contract, makes a material misrepresentation, has a decline in its long term credit rating below a threshold set forth in the contract, or is acquired or reorganized and the successor issuer does not satisfy the investment or credit guidelines applicable to issuers. If, in the event of default of an issuer, the plan were unable to obtain a replacement investment contract, withdrawing plans may experience losses if the value of the plan's assets no longer covered by the contract is below contract value. The plan may seek to add additional issuers over time to diversify the plan's exposure to such risk, but there is no assurance the plan may be able to do so. The combination of the default of an issuer and an inability to obtain a replacement agreement could render the plan unable to achieve its objective of maintaining a stable contract value. The terms of an investment contract generally provide for settlement of payments only upon termination of the contract or total liquidation of the covered investments. Generally, payments will be made pro-rata, based on the percentage of investments covered by each issuer. Contract termination occurs whenever the contract value or market value of the covered investments reaches zero or upon certain events of default. If the contract terminates due to issuer default (other than a default occurring because of a decline in its rating), the issuer will generally be required to pay to the plan the excess, if any, of contract value over market value on the date of termination. If a synthetic GIC terminates due to a decline in the ratings of the issuer, the issuer may be required to pay to the plan the cost of acquiring a replacement contract (that is, replacement cost) within the meaning of the contract. If the contract terminates when the market value equals zero, the issuer will pay the excess of contract value over market value to the plan to the extent necessary for the plan to satisfy outstanding contract value withdrawal requests. Contract termination also may occur by either party upon election and notice.

As described in note B, because the GICs and synthetic GICs are fully benefit responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the GICs and synthetic GICs. Contract value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

Average yields for GICs and synthetic GICs	***20X1***	***20X0***
Based on actual earnings	4.6%	4.9%
Based on interest rate credited to participants	4.7%	5.0%

Appendix E—Employee Benefits Security Administration Field Assistance Bulletins

In the course of audits and investigations by Employee Benefits Security Administration (EBSA) field enforcement staff, difficult legal issues often arise. In an effort to provide the regional office staff with prompt guidance, EBSA has developed a vehicle for communicating technical guidance from the national office. Field Assistance Bulletins (FABs) ensure that the law is applied consistently across the various regions. They also provide the regulated community with an important source of information about the EBSA's views on technical applications of the Employee Retirement Income Security Act (ERISA). All FABs are posted on EBSA's Web site and available to the public.

Help Desk—FABs are available at www.dol.gov/ebsa under "Compliance Assistance."

The following is a listing and brief description of the FABs.

FAB 2002-1	Addresses the fiduciary considerations involved with the refinancing of an employee stock ownership plan loan under section 408(b)(3) of ERISA.
FAB 2002-2	Addresses whether the trustees of two related multiemployer plans were subject to ERISA' fiduciary standards when they amended the plan's trust agreements.
FAB 2002-3	Addresses the fiduciary considerations regarding the use of agreements in which the service provider retains the "float" on plan assets.
FAB 2003-1	Addresses the issue of whether corporate directors and officers may be denied participant loans that might violate securities laws when ERISA requires that such loans be made available to all participants on a reasonably equivalent basis.
FAB 2003-2	Considers the application of EBSA's participant contribution requirements to multiemployer defined contribution pension plans.
FAB 2003-3	Addresses the rules that apply to how expenses are allocated among plan participants in a defined contribution pension plan.
FAB 2004-1	Addresses whether health savings accounts (HSAs) established in connection with employment based group health plans constitute "employee welfare benefit plans" for purposes of Title I of ERISA.
FAB 2004-2	Addresses a fiduciary's duties with respect to missing participants in a terminated defined contribution plan.
FAB 2004-3	Addresses the fiduciary responsibilities of a directed trustee in the context of publicly traded securities.

FAB 2006-1	Addresses the distribution to plans of settlement proceeds relating to late trading and market timing.
FAB 2006-2	Addresses recurring questions about ERISA coverage of HSAs and evolving practices in the offering of HSAs in the workplace.
FAB 2006-3	Addresses interim guidance relating to individual benefit statements and notices of freedom to divest employer securities pursuant to the Pension Protection Act of 2006.
FAB 2007-1	Addresses guidance relating to the investment advice provisions of the Pension Protection Act of 2006.
FAB 2007-2	Addresses how IRS regulations governing 403(b) tax sheltered annuity programs affect the status of such programs under the Department of Labor's (DOL's) safe harbor regulation at 29 C.F.R. § 2510.3 2(f).
FAB 2007-3	Addresses guidance to EBSA's national and regional offices relating to the timeframe for furnishing pension benefit statements by certain individual account plans.
FAB 2007-4	Addresses the circumstances under which supplemental health insurance coverage satisfies the requirements for excepted benefits under sections 732(c)(3) and 733(c)(4) of ERISA.
FAB 2008-1	Addresses the responsibilities of named fiduciaries and trustees of ERISA covered plans for the collection of delinquent employer and employee contributions.
FAB 2008-2	Addresses which types of health promotion or disease prevention programs offered by a group health plan must comply with the DOL's final wellness program regulations and how a plan determines whether such a program is in compliance with the regulations.

.303

Appendix F—Payroll Auditing

Payroll Auditing

AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), states that the auditor should assume that revenue recognition is an area where fraud could occur in any entity. For employee benefit plans, the primary sources of revenue are income from investments and employer and employee contributions. AICPA Audit and Accounting Guide *Employee Benefit Plans*, with conforming changes as of March 1, 2008, contains chapters detailing audit procedures for investments and employer and employee contributions.

In single-employer employee benefit plans, the auditor can test payroll audits directly. Often, the auditor performs the audit for both the employer and the employee benefit plan, and this enables the auditor to do the testing of the employer's payroll without a great deal of difficulty.

For multiemployer benefit plans, employers contribute to an employee benefit plan based on the provisions of a collective bargaining agreement (CBA) negotiated between a union representing employees in a specified trade or industry and their employers. A multiemployer plan may be local, regional, or national in scope and may bind a few employers or several thousand employers.

What Is a Payroll Audit?

A payroll or compliance audit is an audit of a contributing employer to determine whether the employer has contributed the amount specified by the CBA to a multiemployer plan. Although they are called payroll audits, these examinations are actually agreed-upon procedure engagements. When a plan uses a CPA to perform payroll audits, the plan trustees will agree with the auditor about the records to examine and the steps to perform. The CPA will perform the agreed-upon procedures specified and will write a report addressed to the trustees of the multiemployer plan detailing the findings of the engagement. The agreed-upon procedures report issued will typically be in accordance with AT sections 101–701 (AICPA, *Professional Standards*, vol. 1), as amended.

Purpose of a Payroll Audit

There are two primary purposes of a payroll audit. First is to determine that the employer is complying with the CBA. Only those employees covered by the CBA should be reported. The payroll audit helps ensure that all wages and hours for all covered employees are reported.

The second purpose of a payroll audit is to determine the accuracy of employer contributions. Only by having a payroll audit program of contributing employers can an independent auditor gain assurance that the completeness objective has been fulfilled for employer contributions to the multiemployer plan.

Who Should Perform the Payroll Audits?

Payroll audits can be performed internally by the staff of the multiemployer plan or externally by the auditors performing the audit of the plan, another CPA firm, or another entity specializing in payroll auditing. It does not matter who performs the payroll audits if the CPA firm conducting the audit of the plan has the opportunity to review the working papers of the payroll audits performed to the extent necessary to gain assurance regarding the completeness of employer contributions.

Payroll auditing done in-house can be less expensive if the plan can use its own employees to do the audits. In-house auditors can also be used effectively to educate contributing employers regarding their reporting responsibilities in complying with the CBA.

Other plans prefer to hire outsiders to perform payroll audits. These plans prefer to have someone else handle the employment and training issues of payroll auditors.

Are Payroll Audits Required?

Paragraph 10.09 of Audit and Accounting Guide *Employee Benefit Plans* states that in a multiemployer environment "plan sponsors or trustees may engage the employer's auditor, other outsider auditors, in-house compliance personnel, or others to perform agreed upon procedures to test the completeness of employer contributions." The Department of Labor has suggested that it is difficult to ensure the completeness objective over employer contributions without performing payroll audits and that without an effective payroll audit program, the plan auditor may consider issuing a qualified opinion on the plan's financial statements.

There may be some limited circumstances where payroll audits are not necessary. For example, some plans cover only a few contributing employers and the control system for those employers is effective and can give the external auditor confidence that all employer contributions are being collected.

How Often Should Payroll Audits Be Performed?

Paragraph 10.09 of Audit and Accounting Guide *Employee Benefit Plans* states that "a representative group of contributing employers would be tested each year." Does this mean that every contributing employer will be audited within a 3- or 4-year cycle? While a 3- or 4-year cycle might be acceptable in a small plan, a national plan with thousands of contributing employers would have difficulty in auditing all contributing employers. A random sample program may be utilized in selecting at least some of the employers for audit. In that way, every employer would have the opportunity of being audited.

It is important that plans monitor from year to year the effectiveness of its payroll auditing program. The payroll audit program helps ensure the completeness objective in measuring employer contributions. The plan itself may also be able to conclude that the payroll audit program is operating on a cost-effective basis. If revenue from employer contributions generated as a result of the payroll audit program increases from year to year as a percentage of the costs of the program, then consider increasing the number of audits performed. If revenue is declining as a percentage of costs, then consider reducing the number of payroll audits being performed.

State and Local Governmental Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of state and local governments with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole, CPA, CFE
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Michael A. Crawford, CPA	Donald L. Rahn, CPA
Marcia Buchanan, CPA	Brian Schebler, CPA
Martha Haines	Caroline Walsh, CPA
Edward Chait, CPA	

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your state and local government audits. This alert can also be used by a government's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). Further, if your state or local government audit is performed under *Government Auditing Standards* issued by the Comptroller General of the United States of America (also referred to as the Yellow Book or generally accepted government auditing standards [GAGAS]) or Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, you should refer to AICPA Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2008/09* (product no. 022458kk). These alerts can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 State and local governments may be subject to specific risks of material misstatement arising from the nature of their activities, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related operational or business risks that may result in material misstatement of the financial statements. These risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the government's operations is also dynamic, and the entity's strategies and objectives change over time. An understanding of operational or business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all such risks. Most operational or business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all such risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the governmental entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the opinion unit level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the National Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007, compared with an increase of 2.9 percent in 2006. According to 2008 first-quarter preliminary estimates, real GDP increased at an annual rate of 0.9 percent, which is up slightly from the 0.6 percent rate in the fourth quarter of 2007.

.11 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. As of April 2008, the unemployment rate was 5.0 percent, representing approximately 7.6 million people.

.12 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 3.25 percent to 2.00 percent as of the end of April 2008. The Federal Reserve noted in its April press release that financial markets continue to experience considerable stress and credit continues to tighten for some businesses and households. The housing contraction continues to deepen and labor markets soften. As such, the policy actions taken to decrease rates are meant to promote moderate growth over time and mitigate risks to economic activity while moderating inflation.

The State of the States' Economy

.13 The Nelson A. Rockefeller Institute of Government (institute) publishes frequent updates on state fiscal conditions. The institute's fiscal report dated January 30, 2008, at www.rockinst.org/WorkArea/showcontent.aspx?id=13894, focuses on concerns over a recessionary economy and the likely impact on state government finances, and includes these highlights:

- State government finances are linked inextricably to the economy; and, after six years of expansion, the national economy has weakened, and many believe the country is, or will soon be, in recession.
- The status of the national financial markets turmoil, the crisis in the housing markets, and employment issues are affecting state economies.
- State finances are showing the effects of the weakening economy. The institute's most recent State Revenue Report showed that state tax revenue declined by 0.6 percent, after adjustment for inflation, the first such decline in more than four years.
- While revenues from personal income taxes have remained healthy, growth in sales tax revenues has slowed and revenue from corporate income taxes has fallen.
- States that rely heavily on income tax from capital gains will likely be more affected as a result of the typical decline in this income during a recessionary period. States that rely on a portfolio of different taxes are likely to have less volatility.
- According to the Center on Budget and Policy Priorities, 16 states have announced budget gaps resulting from revenue shortfalls totaling more than $30 billion and another 8 states have announced gaps yet to be quantified.

.14 The report concludes that during recessionary periods, states may be forced to spend more on social welfare programs, but overall spending increases will likely be constrained by limited revenues. The deeper the economic downturn, the more states will be forced to consider spending cuts and staff reductions. This belt-tightening by state governments will likely further dampen the national economy considering that state and local governments account for nearly 9 percent of national GDP.

Fiscal Sustainability Challenges for All Levels of Government

.15 The U.S. Government Accountability Office (GAO) has released a series of reports alerting the public of the fiscal sustainability challenges facing all levels of government and issuing a nationwide call for stewardship. Over the past two years, the U.S. Comptroller General has participated in a series of town hall-style forums around the country, called the "Fiscal Wake-Up Tour," discussing the federal government's current deficit and the challenges posed by the long-term trends facing our nation. In addition to this Fiscal Wake-Up Tour, a number of related reports have been issued by the GAO over the past several months dealing with the fiscal challenges to the federal government and state and local governments. These reports include the following:

- *A Call for Stewardship: Enhancing the Federal Government's Ability to Address Key Fiscal and Other 21st Century Challenges* (GAO-08-93SP)
- *State and Local Governments: Growing Fiscal Challenges Will Emerge during the Next 10 Years* (GAO-08-317)

.16 In his letter introducing the Call for Stewardship report, former Comptroller General David M. Walker stated, "our nation faces a range of forces and key sustainability challenges that will require action by elected officials in order to keep America great for current and future generations." The report cites the tremendous growth of the U.S. Government since its beginnings in the eighteenth century and concludes that the fiscal sustainability of the federal government is in question and that without meaningful action by 2040 the federal government could only have the resources to do little more than mail out social security checks and pay interest on the federal debt. The report indicates that budget experts agree that the growing entitlement costs for "mandatory spending programs" such as Social Security, Medicare, and Medicaid, absent fundamental reforms, are fiscally unsustainable. In addition, a range of current and emerging issues are requiring significant federal government attention and resources, including health care, energy dependence, environmental protection, and homeland security. In summary, the report concludes that the American government and its citizens will need to conduct a top-to-bottom review of all federal programs and policies and make tough decisions on which federal activities remain priorities and which should be overhauled or even eliminated. Clearly, these issues at the federal level affect the fiscal health of state and local governments.

.17 In its report on state and local governments, the GAO calls our attention to the fact that the growing fiscal challenges and the risks those challenges pose are more pervasive than the national level. The GAO wants individuals of all ages to understand that these growing fiscal challenges go deeper than just at the national level. According to Walker,

> Fiscal sustainability presents a national challenge shared by all levels of government. The federal government and state and local governments share in the responsibility of fulfilling important national goals, and these sub-national governments rely on the federal government for a significant portion of their revenues. As happens at the federal level, these sub-national governments may also face serious fiscal stress in the future.

.18 According to the GAO report, the state and local government sector consists of 50 state governments and 87,525 local governments. These local governments include 3,034 county governments, 19,429 municipal governments, 16,504 townships, 13,506 school districts, and 35,052 special districts. State and local governments provide vital services to citizens, such as law enforcement, public education, and water and sewage treatment. Local governments derive their authority from the states, and the powers and responsibilities granted to local governments vary considerably. For example, while states generally provide authority to local governments to tax real property, local governments vary in their authority to levy other types of taxes, such as personal income or sales taxes. It is easy to see how many individuals' livelihoods are touched by not only the national fiscal challenges, but the trickle down impact found at the state and local level.

.19 The full reports can be found on the GAO Web site under the report numbers previously noted at www.gao.gov.

Other Industry Trends and Conditions

Subprime Mortgage Crisis and Government Entities

.20 The financial crisis surrounding subprime mortgages has made its way to the steps of state capitols and city halls. Over the years, many state and local governments and their investment pools have turned to investments in mortgage-backed commercial paper and other mortgage-backed securities to broaden their investment portfolio and improve investment returns. However, the recent turmoil in the subprime mortgage market and the downgrading of certain investment funds, such as those with assets concentrated in mortgages, have caused many state and local governments to reevaluate their investment portfolio risks; certain governments have halted their purchases of such investment funds. One example of the effect of the subprime mortgage crisis on local governments is a situation where a county government was informed that credit-rating agencies had downgraded two investments totaling more than $100 million held within their investment pool. This county government not only invests its own resources, but also serves as an investment pool manager for other governmental entities or jurisdictions within the county. In response to the crisis, county officials have temporarily halted purchases of mortgaged-backed commercial paper and have commissioned a study of its other investments to assess the level of risk. The downgraded investment may result in losses in the millions of dollars to the county that has elected to purchase the investment from the pool.

.21 It is important for both entities participating in these pools and their auditors to gain a thorough understanding of the valuation methodology that the pool applies to its investments, the underlying risks involved with each investment type, and the likelihood that the value of the investments will be impaired.

Housing Downturn Effects

.22 Local governments across the country are beginning to feel the revenue shortfall effects from a slumping real estate market. Coupled with the effects of the subprime mortgage crisis, this economic downturn is likely to result in tough times ahead for cities and counties. Flattening or declining property assessments on which property taxes are based, as well as the mounting number of mortgage foreclosures, are reflecting poorly on local government revenue collections. In a report by the National League of Cities (NLC), local government budget officials surveyed indicated that the direct effects of the housing downturn could have a lag time of several years when it comes to their revenue. The report, based on responses from finance and budget officers in 359 cities, all with populations of 10,000 or more, found that 70.0 percent believed their cities were better able to meet fiscal needs in 2007 than in 2006; however, many were very pessimistic about the years ahead. Those surveyed stated that for the 2008 fiscal year, they were, on the average, predicting only a 0.4 percent increase in inflation-adjusted revenue, while expenditures were anticipated to increase by 3.5 percent, or a 3.1 percent budget deficit. To handle revenue shortfalls and budget deficits, cities and towns are looking to a number of alternatives, including increasing fees for services, raising property and sales taxes, and using rainy days funds. The NLC report entitled *City Fiscal Conditions in 2007* is available at www.nlc.org/ASSETS/6F3B16AE550F47D1B8C7CF7C48B1A454/07_FiscalSurveyBrief.pdf.

.23 The property tax revenue shortfall created by the housing issues discussed above could result in governments that are unable to meet financial obligations on bonds or unable to pay for the services that they are responsible to provide to residents. Some governments may find that filing for bankruptcy is the best option for them. Auditors should be alert to risks related to going concern issues and to events that occur subsequent to the balance sheet date and how these areas will affect the audit.

Retiree Health Care and Postemployment Benefits Other Than Pensions

.24 Retiree health care costs and other postemployment benefits other than pensions continue to be an economic issue of major concern for most state and local governments. In its recent report *Promises with a Price*, the Pew Charitable Trusts conservatively estimated that state governments will spend approximately $2.73 trillion on pensions, health care, and other postemployment benefits during the next 30 years, of which $381 billion is the price tag for retiree health care and other nonpension benefits. The report cites 8 states whose unfunded actuarial liability for other postemployment benefits other than pensions (OPEB) is greater than its unfunded actuarial liability for its pension plans. The reports indicate that in the state of California alone, annual state and local government retiree health care costs were $4 billion in 2006 and are expected to escalate to $10 billion in 2012 and $27 billion in 2019. With people living longer, the rising cost of health care, and few governments funding these costs as incurred through irrevocable trusts, the unfunded liabilities are likely to grow at an ever-increasing pace. The Pew report is available at www.pewcenteronthestates.org/uploadedfiles/Promises%20with%20a%20Price.pdf.

.25 As the required implementation dates for Governmental Accounting Standards Board (GASB) Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, have arrived for some and are approaching for others, the focus on OPEB, including retiree health benefits, for state and local government employees has been increasing. Because many governments previously have not measured or disclosed in their financial statements their obligations to pay OPEB costs, the media, the bond market, and state and local government legislative bodies are starting to focus on the potentially significant sum of those obligations, sometimes in the billions of dollars for an individual state. In addition, a government that does not manage its OPEB liability on a go-forward basis, especially the growth in its liability, could find itself explaining its OPEB and funding policies or lack of a funding policy to credit rating agencies when issuing bonded debt.

.26 Public employee unions and retirement benefit administrators across the country are concerned that a change from the pay-as-you-go accounting approach might lead to a reduction in benefits. Many predict significant changes in OPEB as governing bodies become better informed through actuarial or similar valuations about the amount of the obligations and the effects of not managing them. Some governments have formed task forces to help them identify solutions. Auditors might consider working with the actuarial firms retained by the auditee or, if necessary, retaining actuarial specialists to evaluate auditee valuations and might also be prepared to answer their auditees' questions about managing those obligations.

.27 Common solutions that have been discussed for managing the OPEB obligation and its growth include restricting new entrants into the plan, raising the employee cost share, lengthening the vesting period, restricting ad hoc benefit increases, and converting a defined benefit plan to a defined contribution plan. Another common solution is to begin to advance fund the obligation as normally is done with pension obligations, which is a long-term solution that will take years with a well-managed funding program to fully fund the accrued liability. Some governments may even consider discontinuing or reducing benefits for current and retired employees, although that may not be possible because of legal, contractual, or other restraints. Whichever solutions are chosen by the entity, they likely will be difficult to implement.

.28 A recent study and report by the GAO looked into both the current status of state and local government retiree benefit structures and the fiscal outlook for funding their future costs. The report noted that a heightened sense of concern has been raised questioning whether state and local governments offering such benefits will be able to continue to provide the current level of benefits to retirees in the future.

.29 State and local government employees make up approximately 12 percent of the nation's workforce and are generally provided retiree benefits in two components: pensions and retiree health care. The GAO report found that there were significant differences between how these two benefit components were structured, managed, and funded.

Differences Between Pension and Retiree Health Care Systems		
	Pensions	*Retiree Health Care*
How Structured	Mostly as a defined benefit based on a formula; once accrued, cannot be diminished	Varied sharing of premium costs between the government and retiree; benefit plans can change for current and future retirees
How Managed	As trusts, with board of trustees oversight	As operating expenses managed with other employee benefits
How Funded	Prefunded, with monies set aside and invested	Pay-as-you-go funded, with annual operating funds used as costs are required to be paid

.30 The GAO study results simulated the outlook for the state and local government sector as a whole, and concluded that

- estimated future pension costs (currently about 9 percent of employee pay) would require an increase in annual government contribution rates of less than 0.5 percent; and
- estimated future retiree health care costs (currently about 2 percent of employee pay) would more than double by the year 2050 if they continue to be funded on a pay-as-you-go basis.

.31 The GAO did recognize the sensitivity of its estimates to assumed rates of return and projected inflation rates; however, it also recognized that if rates of return were to fall below historical averages, the funding requirement could become even higher. The GAO report concluded that while state and local governments have strategies to manage future pension costs, similar strategies were not in place to manage the escalating costs of retiree health care. The GAO suggested that in future debates on retiree benefits, policy makers, voters, and beneficiaries will need to decide how to control costs, the appropriate level of benefits, and who should pay the costs.

.32 The entire GAO report is available from the GAO Web site as report no. GAO-07-1156 at www.gao.gov.

Tax Exempt Bonds Compliance Issues

Tax Exempt Debt Issues

.33 The current credit environment has affected the market for debt securities. While all debt securities may be affected, particular issues affect municipalities, states, cities, and other governments (such as redevelopment agencies, school districts, public universities, airports, and seaports) issuing tax exempt debt. Some examples of these tax exempt debt securities are auction rate securities (ARSs) and variable rate demand obligations (VRDOs).

.34 While each situation is different and should be evaluated based on its own specific facts and circumstances, the current situation may raise various accounting and auditing issues pertaining to tax exempt debt, including, but not limited to, the following:

- Bond restructurings
- Derivative and hedge accounting implications
- Potential violation of debt covenants

- Classification of the debt on the balance sheet as either a current or noncurrent liability
- Subsequent event disclosures
- Going concern issues

.35 For further information, refer to a nonauthoritative article that the AICPA has posted to its Web site, authored by an ad hoc group of AICPA members, *Tax-Exempt Bonds—Accounting and Auditing Considerations in the Current Environment*. The article can be accessed at www.aicpa.org/download/acctstd/ARS_article14.pdf.

GAO Report to Congress

.36 In February 2008, the GAO issued a report to the Committee on Finance of the U.S. Senate titled Tax-Exempt Status of Certain Bonds Merits Reconsideration, and Apparent Noncompliance with Issuance Cost Limitations Should Be Addressed (GAO-08-364).

.37 In the report, the GAO addresses the following areas of concern:

- Trends in the use of tax exempt bonds
- Questions regarding the appropriateness of certain types of facilities financed with tax exempt bonds
- Questions regarding the issuance costs paid from tax exempt bond proceeds as they can divert funds from the funded projects

.38 For federal tax purposes, municipal bonds are classified as either governmental bonds or private activity bonds. Tax exempt governmental and private activity bonds are used to finance a wide range of projects and activities, such as schools, fire stations, roads, airports, docks, golf courses, hotels, sports stadiums, and economic development. The Internal Revenue Code does not specifically define governmental bonds; rather, all municipal bonds that do not meet the criteria to be classified as private activity bonds are governmental bonds. If more than 10 percent of the governmental bonds' proceeds are used for private business purposes and secured by payments from property used for private business use, the bonds are classified as private activity bonds. Such private activity bonds can be taxable bonds. Private activity bonds that receive tax exempt status are considered *qualified private activity bonds*. Nonprofit organizations are generally the largest issuers of qualified private activity bonds. Although state and local governments and nonprofit organizations can use tax exempt bonds to subsidize activities of private entities, Congress has previously placed limitations on the use of funding for specific private activities, such as professional sports stadiums, hotels, and private golf courses.

.39 Generally, qualified private activity bonds are subject to various restrictions, including a 2 percent limitation on use of the proceeds to pay issuance costs. The GAO report found that a number of qualified private activity bond issues paid for issuance costs from the bond proceeds that exceeded these statutory limitations.

.40 Since 2002, the dollar amount of long-term tax exempt bonds issued annually has reached historically high levels. Congressional interest in the use of tax exempt bonds has heightened because of the large dollar amounts of bonds outstanding coupled with the large amounts of forgone federal tax revenues. The interest earned by investors who purchase tax exempt bonds is generally excluded from federal income taxes, which makes them very attractive and popular with investors; however, the federal revenue losses from this tax exemption amount to billions of dollars annually. Because the federal government does forgo these billions in tax revenues annually by excluding the bonds' interest from investors' federal gross income, Congress has become very interested in determining whether these bonds are being used for appropriate tax exempt purposes.

.41 The GAO, in its opening letter to Congress, made the following analysis:

The outstanding volume of state and local government tax exempt bond debt grew significantly from about $1.4 trillion in 2000 to over $2.1 trillion in 2006 in constant 2007 dollars. Because the tax exemption allows taxpayers to generally exclude the bond interest from their federal gross income, the federal government forgoes tax revenue. According to our analysis of the Department of the Treasury's estimates, forgone federal tax revenues were about $32 billion in 2000 and were projected to be about $37 billion in 2007.

.42 The GAO issued the following conclusions and recommendations to Congress and the IRS:

- State and local governments have broad discretion in deciding which activities and facilities to finance using tax exempt bonds. In particular, the broad discretion afforded to state and local governments allows them to use tax exempt governmental bonds to finance facilities and activities that cannot be financed with private activity bonds. Recently, the dollar amount of tax exempt governmental bonds reached peak levels as municipal governments issued bonds for a wide variety of purposes ranging from traditionally public facilities, such as schools, fire stations, and roads, to facilities that are essentially private in nature, such as sports stadiums. As Congress considers whether tax exempt governmental bonds should be used for professional sports stadiums that are generally privately used, it will also consider whether other facilities, including hotels and golf courses, that are privately used should continue to be financed with tax exempt governmental bonds.
- To better ensure that the IRS can routinely and cost effectively determine whether issuers of qualified private activity bonds are complying with the statutory limits on using bond proceeds for issuance costs, the GAO recommended that the Commissioner of Internal Revenue take the following two actions based on the GAO report to Congress:
    - — Clarify the IRS's forms and instructions for reporting issuance costs paid from bond proceeds to require that bond issuers clearly designate on the form instances when bond proceeds were not used to pay issuance costs.
    - — Develop cost-effective methods to address apparent noncompliance with the statutory limits on using bond proceeds for issuance costs in such a manner that it would not preclude the IRS from examining the bonds for more substantive compliance issues in the future.

.43 To review this GAO report in full length, please refer to report no. GAO-08-364 at www.gao.gov.

IRS Interest in Tax Exempt Bonds Compliance

.44 Within the past year, the IRS has stepped up its efforts to monitor the tax exempt bond financing market. Most recently, the IRS has conducted post-issuance compliance for bonds issued by nonprofit organizations and has expressed the interest in expanding the postissuance compliance monitoring to state and local governments. The IRS has indicated that it will be monitoring the governmental bonds area in an effort to better learn what issuers are doing, draw some conclusions, and determine whether more bond issuance guidance and education are needed.

Legislative and Regulatory Developments

Securities and Exchange Commission Developments

Recent Accounting and Disclosure Initiatives

.45 The municipal securities market is a top priority for the Securities and Exchange Commission (SEC). In July 2007, SEC Chairman Christopher Cox gave a town hall speech on "Integrity in the Municipal Market," and also delivered a white paper to Congress calling for improvements in accounting and disclosure in the municipal securities market. The white paper notes that the SEC staff believes that Congress should consider revisions to the current disclosure and accounting requirements for municipal issuers to provide investors and other participants in the municipal securities market with information and protections comparable to those available in many other U.S. capital markets, while giving deference where appropriate to the special disclosure and accounting aspects of municipal issuers. The SEC staff identified a variety of steps that should be taken that would improve for investors the extent, quality, and availability of municipal issuer information. These steps include the following:

- Making available to investors, without charge, municipal issuer offering documents and periodic reports on a timely basis through an easily accessible venue, such as a system similar to the EDGAR database
- Mandating municipal issuer use of GAGAS
- Encouraging and supporting timely development of high-quality governmental accounting standards by, for example, providing an independent funding mechanism for GASB and requiring or permitting SEC oversight of GASB, as is now provided by Sections 108–109 of the Sarbanes-Oxley Act for the Financial Accounting Standards Board (FASB)

.46 The SEC feels it is important that the independence of accounting standard setters and the perception of their independence by investors be maintained, and that universal use of consistent generally accepted accounting principles (GAAP) by all issuers of municipal securities promotes transparency, accuracy, consistency, and comparability of the financial statements of state and local governments to investors and other participants in the municipal market, as well as to taxpayers and other traditional governmental constituencies.

.47 The SEC staff is now taking a comprehensive look at the disclosure requirements for the municipal market. They plan to consider a wide array of options to improve the disclosure and accounting rules for municipal bond offerings as they analyze whether the current municipal regulatory structure is achieving its objectives as initially contemplated and as markets have evolved. On March 31, 2008, the Municipal Securities Rulemaking Board (MSRB) launched a pilot version of its Electronic Municipal Market Access (EMMA) system, a free, centralized online portal that initially will provide free access to official statements and advance refunding documents received by the MSRB under its Rule G-36. The MSRB is currently developing a proposal to establish an expanded permanent public access system.

Auditor Responsibility for Disclosure

.48 A number of SEC enforcement actions have suggested a need for improvement in the quality of accounting and disclosures made by state and local governments. Auditors are subject to the antifraud provisions of the federal securities laws and may be held liable for material misstatements or omissions in documents containing audited financial statements, such as preliminary or final official statements with which they are associated. Disclosures that are unclear or difficult to understand may increase an auditor's exposure to liability. When associated with the official statements, auditors should remember their responsibilities under AU section 550, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1). As described in chapter 16 of the AICPA Audit and Accounting Guide *State and Local Governments*, the following are situations in which the auditor becomes associated with the official statement:

- Assisting in preparing the financial information included in the official statement
- Reviewing a draft of the official statement at the government's request
- Signing (either manually or electronically) the independent auditor's report for inclusion in a specific official statement[1]
- Providing written agreement (for example, through a consent letter or signed authorization form) for the use of the independent auditor's report in a specific official statement

[1] This situation involves an original manual or electronic signature on the auditor's report, not a reproduction of an auditor's report that was manually or electronically signed. For example, the underwriter or bond counsel may require a copy of the auditor's report with an original manual or electronic signature to file with the official closing documents for the offering.

- Providing a revised independent auditor's report for inclusion in a specific official statement
- Issuing a comfort letter, the letter described in AU section 634, *Letters for Underwriters and Certain Other Requesting Parties* (AICPA, *Professional Standards*, vol. 1), paragraph .09, or an attestation engagement report in lieu of a comfort or similar letter on information included in the official statement
- Issuing a report on an attestation engagement relating to the debt offering

.49 If the auditor is associated with an official statement, the guidance in AU section 550 paragraphs .04–.06 provides that the auditor has no obligation to perform any procedures to corroborate other information[2] contained in those documents. However, the auditor should read the other information and consider whether that information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. AU section 550 provides guidance if the auditor concludes there is a material inconsistency or a material misstatement of fact that is not a material inconsistency. This responsibility includes reading the other information and considering whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. Accordingly, when audited financial statements are included in an official statement, and the auditors are associated with the official statement, auditors should take a "big picture" approach and consider whether any other information in that official statement is materially inconsistent with the audited financial statements.

Consents

.50 In some cases, issuers of municipal securities include audit opinions and audited financial information in disclosure documents without obtaining the consent of the auditor. Because consents must be obtained from auditors in the corporate market before an audit opinion may be included in an offering document, investors in municipal securities may not be aware that this is not always the case in a municipal offering. Auditors may want to consider working with their governmental clients to advise them in making appropriate disclosures to investors in situations where governmental clients intend to use the audit opinion or audited financial information without the auditor's consent. Chapter 16 of the AICPA Audit and Accounting Guide *State and Local Governments* provides additional guidance on auditor association with municipal securities filings.

Plain English

.51 In 1998, the SEC adopted rules requiring all securities registrants to use *plain English* in writing prospectuses and in the organization, language, and design of the front parts of prospectuses. These plain English rules do not apply to the municipal market, but the SEC encourages their voluntary use. Municipal disclosures often abound in legalistic or overly complex presentations that make the substance of the disclosure difficult to understand. Vague boilerplate explanations are readily subject to differing interpretations. The SEC encourages those involved with municipal security issuances to remember that most investors who read official statements are not accountants and may have limited accounting backgrounds.

Stale Disclosure

.52 Stale and incomplete accounting information is at the core of many of the cases the SEC has brought against municipal market participants. Many of the auditors' reports on the financial statements used in primary offering disclosure documents and in continuing disclosure filings made pursuant to SEC Rule 15c2-12, *Municipal Securities Disclosure*, are many months old at the time of the offering, raising the risk of an antifraud violation if there have been material changes since the audit was completed. Efficient markets require timely and reliable information to function properly. As a client service, auditors may work with their governmental auditees to try to improve the timeliness of their audited financial statements. Auditors

[2] *Other information* is a term used in AU section 550, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), and is defined therein as information in addition to audited financial statements and the independent auditor's report thereon.

should also remember their obligations under AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), regarding subsequent events, including in circumstances where a governmental auditee requests the auditor's consent to the inclusion of its audit opinions in disclosure documents.

IRS Developments

.53 IRS activities may affect the financial statement audits of state and local government auditees. Noncompliance with federal tax requirements could have a direct and material effect on the determination of financial statement amounts. In addition, changes in U.S. Department of the Treasury and IRS regulations might result in changes in a government's activities.

.54 There is a wealth of information on the IRS Web site (www.irs.gov). The site provides separate pages for state and local governments (www.irs.gov/govts), Indian tribal governments (www.irs.gov/tribes), tax exempt bonds (www.irs.gov/taxexemptbond/index.html), and employee retirement plans (www.irs.gov/ep). These pages provide the opportunity to access and subscribe to various newsletters or e-mail alerts, such as the IRS Office of Federal, State, and Local Governments' (FSLG) *FSLG Newsletter* and the *Tax Exempt Bond Community Update*, which will keep auditors updated about relevant IRS activities.

Tax Exempt Debt Auction Failures and IRS Notice 2008-27

.55 In response to a growing number of auction and remarketing failures regarding variable rate tax exempt debt, the IRS published Notice 2008-27 to address requests for relief from *reissuance* treatment of restructurings of tax exempt obligations by issuers seeking to replace, wrap, or remove damaged credit facilities and convert tender options (variable rate remarketed) bonds to more marketable interest modes of debt.

.56 The effect of avoiding the reissuance classification is that the debt restructuring could avoid certain tax consequences and requirements associated with typical refundings, including accelerated rebate payments, truncated yield calculation periods, and other tax requirements.

.57 Generally, the notice clears the way for most debt restructurings that are made to convert tax exempt debt from a short-term interest mode to a long-term interest mode to avoid interest rate spikes and other negative consequences from auction or remarketing failures as a debt restructuring that will not be considered a reissuance for federal tax purposes. The notice also provides relief to certain tax exempt bonds undergoing a change in security or credit enhancement.

.58 Notice 2008-27 may be found in its entirety at the IRS Web site for tax exempt bonds at www.irs.gov/taxexemptbond/index.html.

IRS Focus on Tax Compliance

.59 The FSLG has indicated that it will focus on tax compliance issues in 2008 in regards to state and local governments after completing an examination of community colleges and initiating another examination on housing authorities. FSLG's customer base, with assets of more than $16 trillion employs more than 23 million people or approximately 20 percent of the American workforce, and annually pays wages of more than $775 billion and employment taxes of more than $200 billion. Attention will be paid to abusive tax avoidance transactions, such as certain health reimbursement arrangements.

Sales Tax on Internet Sales

.60 For years, this alert has discussed the ongoing debate about the taxation of Internet sales. As discussed in the 2006 and 2007 alerts, the Internet Tax Nondiscrimination Act (Public Law [P.L.] 108-357, December 3, 2004) bans new Internet access taxes and new, multiple, and discriminatory taxes on electronic commerce (e-commerce; that is, Internet sales) until November 1, 2007. On October 31, 2007, President Bush signed a bill that provided an extension of the moratorium for another seven years. P.L. 110-108, the Internet

Tax Freedom Act Amendments Act of 2007, extended the moratorium to November 1, 2014, makes some changes to the grandfather clause in the original legislation that protects state and local taxes imposed on Internet access prior to 1998, and clarifies the definition of *Internet access*. Some legislators support a permanent ban and, in January 2007, introduced a resolution entitled Permanent Internet Tax Freedom Act (H.R. 743).

Audit and Attestation Issues and Developments

Government Auditing Standards Developments

July 2007 Revisions to Government Auditing Standards

.61 In July 2007, the GAO issued the 2007 revision to *Government Auditing Standards* (GAO-07-731G). The revisions supersede the 2003 revision, are wide-ranging, and will affect your *Government Auditing Standards* financial statement audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Early implementation is encouraged. The printed version of the 2007 revision is available and can be ordered from information provided on GAO's Yellow Book Web page (www.gao.gov/govaud/ybk01.htm).

.62 Certain standards issued by the AICPA incorporated by reference into the 2007 revision have earlier effective dates (see the "Summary of Recent Auditing and Attestation Pronouncements and Related Guidance" section of this alert). The GAO has indicated that for financial statement audits conducted under *Government Auditing Standards*, the effective dates of those AICPA standards will apply.

.63 Additionally, the GAO states that the 2007 revision should be used in conjunction with the following guidance documents, which are also available at www.gao.gov/govaud/ybk01.htm:

- Government Auditing Standards: *Answers to Independence Questions* (GAO-02-870G, July 2002)
- Government Auditing Standards: *Guidance on GAGAS Requirements for Continuing Professional Education* (GAO-05-568G, April 2005)

> **Help Desk—**The 2007 revision of *Government Auditing Standards* is available for download at no charge at www.gao.gov/govaud/ybk01.htm. That site also has a summary of major changes and a slide presentation on the revision (GAO-07-162G). Another document of interest describes the technical changes made by the GAO from the January 2007 revision (which had been issued by the GAO in advance of it finalizing the quality control and peer review sections in chapter 3) to the July 2007 revision. It can be found at www.gao.gov/govaud/ltc0707.pdf.

Government Auditing Standards: Implementation Tool

.64 The GAO has issued a guidance document, Government Auditing Standards: Implementation Tool—Professional Requirements Tool for Use in Implementing Requirements Identified by "Must" and "Should" in the July 2007 Revision of Government Auditing Standards. The professional requirements tool lists the requirements for audit organizations and auditors included in the 2007 revision of Government Auditing Standards.

.65 The tool is divided into four sections. The general requirements section contains entity-wide requirements for the audit organization and is intended for use in addition to the specific sections for financial audits, attestation engagements, and performance audits, which contain engagement-specific requirements for the auditors conducting the engagement. Audit organizations and auditors should also refer to the complete text of the 2007 revision of *Government Auditing Standards* to understand the context for those requirements along with related guidance.

.66 The tool was prepared by the GAO's *Government Auditing Standards* staff to facilitate audit organizations' and auditors' implementation of the standards and to assist auditors with documenting compliance with *Government Auditing Standards*, and does not represent additional standards or requirements.

.67 The tool is available in an electronic PDF format at www.gao.gov/new.items/d08210g.pdf (GAO-08-210G, December 2007). The tool should help auditors quickly identify standards and requirements, and make decisions about those standards applicable to their audits.

Results of Federal Study on Single Audit Quality

.68 The long-awaited federal study on the quality of audits performed under OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (also referred to as single audits) was issued on June 22, 2007. This section presents a summary of findings, a listing of some deficiencies noted, and the report recommendations. The section also highlights the AICPA and its Governmental Audit Quality Center's (GAQC) next steps to responding to the report.

Summary of Findings

.69 The issues and deficiencies identified in each QCR were compiled, and each engagement was then classified into one of three groupings. The groupings are defined as follows:

Acceptable. No deficiencies were noted, or one or two insignificant deficiencies were noted. In some cases, the acceptable audits had deficiencies with applicable auditing criteria noted, which did not require corrective action, but should be corrected going forward.

Limited Reliability. Significant deficiencies with applicable auditing criteria were noted and require corrective action to afford unquestioned reliance upon the entire audit.

Unacceptable. Deficiencies were so serious that the auditor's opinion on at least one major program cannot be relied upon, or a material reporting error was noted requiring that the report be reissued in order to be relied upon by users, or both.

.70 The President's Council on Integrity and Efficiency (PCIE) report clearly shows that improvements are needed in many areas. The tables that follow summarize the overall results and results by stratum. In addition to providing results by the number of audits reviewed, the OIGs also analyzed the results in relation to the dollar amounts of federal awards reported in the audits reviewed. Results in relation to dollar amounts reported in the audits reviewed show a much higher percentage of acceptability. The following tables show the results for both strata combined and then the results of Stratum I and Stratum II individually.[3]

TOTAL SAMPLE (STRATA I and II)				
	Acceptable	*Limited Reliability*	*Unacceptable*	*Total*
Sampled Audits	115	30	63	208
Percent of Audits	49%	16%	35%	100%
Percent of Federal Dollars	93%	2%	5%	100%
STRATUM I (>$50 Million in Federal Expenditures)				
	Acceptable	*Limited Reliability*	*Unacceptable*	*Total*

[3] The report indicates the confidence parameter was 90 percent, and the precision parameters ranged between plus or minus 2.1 percentage points and 7.9 percentage points.

Sampled Audits	61	12	23	96
Percent of Audits	64%	12%	24%	100%
Percent of Federal Dollars	93%	2%	5%	100%
STRATUM II ($500 Thousand–$50 Million in Federal Expenditures)				
	Acceptable	*Limited Reliability*	*Unacceptable*	*Total*
Sampled Audits	54	18	40	112
Percent of Audits	48%	16%	36%	100%
Percent of Federal Dollars	56%	10%	34%	100%

Deficiencies Identified

.71 The PCIE report goes into detail regarding the deficiencies noted on the audits reviewed. The following presents a brief summary of deficiencies identified:

- Misreporting of audit coverage of major federal programs
- Unreported audit findings
- Compliance testing not documented as performed or not applicable
- Deficiencies in understanding and testing of internal control over compliance
- Deficiencies in risk assessments as part of major program determination
- Missing audit finding information
- Deficiencies in presentation and auditing of the Schedule of Expenditures of Federal Awards
- Management representations related to federal awards missing or misdated
- Consideration of audit materiality at the major federal program level not documented
- Other kinds of deficiencies (described in appendix A of the report)

PCIE Report Recommendations

.72 The PCIE report proposes a three-pronged approach for reducing the deficiencies noted and to improve the quality of single audits. The recommendations in the report are directed to various organizations, including the OMB and other federal agencies, the AICPA, and other single audit stakeholders. A summary of the recommendations is as follows:

- Revise and improve single audit criteria, standards, and guidance to address deficiencies noted in the report. Specific recommendations are described throughout part II and the "Other Matters" sections of the PCIE report and include recommendations for revisions to Circular A-133 and, in some cases, additions or clarifications to AICPA auditing standards and the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits*.
- Establish minimum requirements for completing comprehensive single audit training as a prerequisite for conducting such audits (the report suggests at least 16–24 hours) and, thereafter, require single audit update training for continued performance of single audits.
- Review and enhance processes to address unacceptable audits and not meeting established training and continuing professional education (CPE) requirements. This includes (*a*) reviewing the process

of suspension and debarment; (*b*) identifying ways that the AICPA and state boards of accountancy can further the quality of single audits and address due professional care issues; and (*c*) identifying, reviewing, and evaluating the potential effectiveness of other ways to address unacceptable audits (these other ways could include sanctions to be applied to auditors, fines, or both).

Next Steps

.73 The AICPA shares the commitment of the federal agencies involved in the project to improving the quality of single audits. Many of the audits reviewed were performed 4–5 years ago, and the AICPA is hopeful that many endeavors over the last several years (for example, the launch of the GAQC) have already begun to address some of the issues raised in the PCIE report.

.74 However, auditors should take this report very seriously and read the PCIE report in its entirety to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices.

.75 The AICPA and the GAQC Executive Committee and GAQC staff have established several task forces and are working closely with the federal government to address the PCIE report recommendations. During the course of the next year, auditors should watch the GAQC Web site at www.aicpa.org/GAQC for updates on initiatives undertaken by the AICPA and others in response to the PCIE report.

> **Help Desk—**To access the PCIE report go to the following Web site: www.ignet.gov/pande/audit/NatSamProjRptFINAL2.pdf.

AICPA Audit Committee Toolkit for Government Entities

.76 Taxpayers and citizens of governmental entities expect a government to be publicly accountable for the services it provides and for how it utilizes its resources to provide those services. An audit committee has the opportunity to assist the governing body with fiscal accountability demonstrated through strong internal controls, budgetary and other legal compliance, accurate and timely financial reporting, sound business practices, and a culture of strong moral and ethical behavior. More specifically, an audit committee with a government organization can help the government achieve the following:

- Improve financial practices and reporting. An audit committee can periodically meet with the government's chief executive and financial officers to review, monitor, and direct activities and results related to the government's maintenance of internal controls and preparation of financial reports.
- Enhance the internal audit function. When an internal audit team reports directly to the audit committee, the internal audit team can provide information to the audit committee about whether the government is meeting its financial and compliance responsibilities, and recommend changes in practices and internal controls when necessary.
- Enhance the external audit function. An audit committee can meet with the external auditors to get independent observations about management's efforts to maintain strong internal controls, appropriate financial reporting, and sound business practices.

.77 For governments interested in establishing or enhancing an audit committee, the AICPA *Audit Committee Toolkit: Government Organizations* (toolkit) provides valuable information and tools that will help a governing body and its officials create an effective audit committee function to help improve fiscal accountability.

.78 These tools inform and educate audit committees about changes in government reporting standards and the government environment as a whole. For governments who already have an audit committee, the toolkit may improve the efficiency and effectiveness of the audit committee. In either situation, the toolkit's easy-to-use set of checklists, questionnaires, and other useful information can make the audit committee's job easier to accomplish. The goal of the toolkit is to assist government audit committees in taking a much greater role in providing information to and assisting the governing body with meeting their fiduciary responsibilities. The audit committee tools are available for download from Audit Committee Effectiveness Center of the AICPA Web site at www.aicpa.org/Audcommctr/toolkitsgovt/homepage.htm.

Other Governmental Audit Issues and Developments

Structured Investment Vehicles

.79 Many state and local governments have found themselves invested in structured investment vehicles (SIVs) without a sufficient understanding of their function and risks. A SIV is a fund that borrows money by issuing short-term securities at low interest and then lends that money by buying long-term securities at higher interest, making a profit for investors from the difference. A SIV is a type of relatively large structured credit product and invests in a range of asset-backed securities, as well as some financial corporate bonds. A SIV has an open-ended structure in that it plans to stay in business indefinitely by buying new assets as the old ones mature, and the SIV generally exchanges investments without providing investors transparency.

.80 The risk that arises from the transaction is twofold. First, the solvency of the SIV may be at risk if the value of the long-term security that the SIV has bought falls below that of the short-term securities that the SIV has sold. Second, there is liquidity risk, as the SIV borrows short term and invests long term; that is, pay-outs become due before the pay-ins are collected. Unless a governmental borrower can refinance short-term at favorable rates, it may be forced to sell the asset into a depressed market.

.81 The subprime mortgage crisis has caused a widespread liquidity crunch in the markets. Investors have become reluctant to invest as the crisis spreads. A number of SIVs have fallen victim to the lack of liquidity, while others received support from a sponsoring bank.

.82 Auditors of state and local government-holding investments in SIVs should obtain a thorough understanding of the investment vehicle and place a particular audit focus on the risks associated with the investment (collateral). Because of the complexity of these investment instruments, auditors should give due consideration to involving specialists in the audit engagement to assist in this evaluation.

Pensions, OPEB, and the Use of Specialists

.83 Upon the effective dates of GASB Statement No. 43; No. 45; and No. 50, *Pension Disclosures—An Amendment of GASB Statements No. 25 and No. 27*, defined benefit OPEB plans, defined benefit pension plans, and certain government employers are required to disclose, among other things, information about the funded status and funding progress of the plans as of the most recent actuarial valuation date in the notes to the financial statements. Such information includes, but is not limited to, the actuarial valuation date, actuarial assumptions, actuarial value of assets, the actuarial accrued liability, the total unfunded actuarial accrued liability, and the annual covered payroll. Most of these governments will use the services of an actuary in the valuation of the OPEB plan and determination of annual required contributions and annual OPEB costs and liabilities. Prior to these new standards, the funded status and funding progress of defined benefit pension plans was reported solely in required supplementary information (RSI). Under professional standards, the auditor has a greater responsibility for information disclosed in the notes to the financial statements than for information reported in RSI. Because auditors may not have actuarial knowledge, they may rely on information provided by plan actuaries. As a result, AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), will have particular importance to the auditor of state and local government financial statements when such government provides pensions and OPEBs and uses actuarial services for determination of financial statement amounts and disclosures. Paragraph .12 of AU section 336 states that, while determining the appropriateness and reasonableness of the methods and assumptions used and their application is the responsibility of the actuary, the auditor should (*a*) obtain an understanding of the methods and assumptions used by the specialist, (*b*) make appropriate tests of data (such as census data) provided to the specialist, and (*c*) evaluate whether the specialist's findings support the related assertions in the financial statements.

.84 The auditor might consider it necessary to retain a specialist to assist in evaluating the work of the plan actuary.

.85 Some example procedures for the auditor's consideration in meeting the requirements of paragraph .12 of AU section 336 regarding the entity's use of an actuary should include the following:

- Obtaining an understanding of the actuary's objectives, scope of work, actuarial methods, actuarial assumptions, and source and calculation methodology of health care cost trends within the acceptable parameters of the GASB statements
- Making appropriate tests of data provided to the actuary by considering the reliability and completeness of the plan census data and source of discount rates used
- Evaluating whether the actuary's findings support the related assertions in the financial statements by understanding what benefits are included in the substantive plan, the policy for contributions, and how plan investments are valued

Credit Markets and Insurance

.86 The crisis in the credit markets has claimed a number of victims including municipal bond insurers. Early in 2008, the credit ratings of some bond insurers were either downgraded or put on review for possible downgrade because of concerns over exposure to collateralized debt obligation backed by subprime and residential mortgages.

.87 In addition to concerns over the impact of this crisis on typical insured municipal bonds, especially those that require remarketing, auditors should also be aware that certain lease/leaseback arrangements typically contain insurance provisions that can result in lessee financial consequences when insurance ratings are downgraded or there is an absence of insurance. Further, the government entity could be required to provide appropriate collateral and often the original asset is no longer sufficient to meet the collateral needs. When these circumstances arise, the auditor should consider and evaluate the liability as well as disclosures surrounding the potential for deterioration of the insurer's rating and the condition of the collateral.

Component Units

.88 Questions regarding the appropriate reporting treatment for component units pursuant to GASB Statement No. 14, *The Financial Reporting Entity*, and No. 39, *Determining Whether Certain Organizations Are Component Units—an amendment of GASB Statement No. 14*, continue to be a leading area of inquiry for GASB staff and the GAQC. Auditors should consider annually revisiting and reevaluating component unit treatment within the reporting entity's financial statements, especially in light of potential amendments or other changes to bylaws, trust indentures, or legal arrangements between separate legal entities.

Pollution Remediation

.89 GASB Statement No. 49, *Accounting and Reporting for Pollution Remediation Obligations*, addresses accounting and financial reporting standards for pollution remediation obligations, which are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. It is effective for financial statements for periods beginning after December 15, 2007, with measurement of pollution remediation liabilities required as of the beginning of the period so that the beginning balance of net assets can be restated. Of particular concern to auditors of state and local government financial statements are the assertions of existence, completeness, and valuation. Because of the difficulty in obtaining sufficient legal letter representations regarding these potential obligations, the auditor should generally consider the existence, completeness, and valuations assertions as possessing a relatively high inherent risk of misstatement when performing risk assessment procedures. See additional discussion of GASB Statement No. 49 in the "Accounting Issues and Developments" section of this alert.

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

.90 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Statement on Auditing Standards (SAS) No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees*. The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards*, to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120). • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks. • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report.* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 9325 par. .01–.04) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 9330 par. .01–.06) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) sections 8200.05–.16 (AICPA, *Technical Practice Aids*) Issue Dates: April and May 2008 (Nonauthoritative)	These questions and answers in TIS section 8200, *Internal Control*, were developed in response to common questions received from members regarding the implementation of SAS Nos. 104–111, referred to as the risk assessment standards.
TIS section 9120.08, "Part of an Audit Performed in Accordance With International Standards on Auditing" (AICPA, *Technical Practice Aids*) Issue Date: April 2008 (Nonauthoritative)	This question and answer discusses the implications to the principal auditor's report when part of an audit is conducted by other independent auditors in accordance with International Standards on Auditing or another country's auditing standards.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force Practice Alert 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice aid is a response to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.

The Auditor's Communication With Those Charged With Governance

.91 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees*. This SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and became effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers including state and local governments, regardless of size, ownership, or organizational structure.

.92 SAS No. 114 provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires that significant matters communicated with those charged with governance be documented.

Identifying Those Charged With Governance

.93 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.94 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and other organizational characteristics. In addition, for state and local governments, auditor judgment may be required to determine the appropriate parties or individuals with whom to communicate when the financial reporting entity is comprised of a primary government and component units with different governing bodies and governance structures.

.95 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some financial reporting entities that comprise the primary government and discretely presented component units. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Issues Regarding Two-Way Communications

.96 SAS No. 114 paragraphs 7–8 discuss the role of communication between the auditor and those charged with governance. Paragraph 8 indicates that SAS No. 114 focuses primarily on communications "from the auditor to those charged with governance," but also states that effective two-way communication is important.

.97 The GAQC staff has received a number of inquiries regarding the appropriate method to establish two-way communication. Auditors should consider the following:

- The objectives of the communication are to ensure that those charged with governance understand the auditor's responsibilities, to obtain from those charged with governance information relevant to the audit, and to provide those charged with governance information relevant to their responsibilities.
- The standard has no authority to require the client or those charged with governance to communicate with the auditor. It merely emphasizes the benefits of two-way communication and provides guidance for such communications.
- If the client and those charged with governance are unwilling to engage in requested two-way dialogue, this may be an indication of an unsatisfactory control environment and could be considered as a significant deficiency or material weakness to be communicated pursuant to SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325).

Communicating Internal Control Related Matters Identified in an Audit

.98 The ASB issued SAS No. 112, which became effective for audits of financial statements for periods ending on or after December 15, 2006. SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. This SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion). Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

Discussions With Management and Others

.99 The requirements of SAS No. 112 have changed perceptions regarding the auditor's role in the client's internal control in some circumstances. Auditors may have to continue to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm, other than the auditor, that does not provide attest services for the client can be part of a client's internal control. This may continue to raise questions regarding the role of outsourcing in achieving management's internal control objectives.

.100 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include in written communication significant deficiencies and material weaknesses that were identified and communicated in previous years until these deficiencies have been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.101 Auditors may also need to hold discussions with management and those charged with governance who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented or detected and corrected, by the client.

Issues for Audits of Smaller Entities

.102 An issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. A strong indication that a material weakness in internal control exists is that a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, or detecting and correcting, material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[4] How an auditor responds to a client's internal control deficiency, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control deficiency. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control deficiency by assisting in drafting the financial statements does not change that control deficiency.

.103 The requirements of SAS No. 112 will continue to introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing. Auditors should watch the GAQC Web site at www.aicpa.org/gaqc for updates on developments in this area and how those developments will affect state and local government audits.

.104 The AICPA published Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control deficiencies would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Audits Performed Under Government Auditing Standards

.105 Because many state and local government financial statement audits are also performed under *Government Auditing Standards*, auditors should be aware that the required *Government Auditing Standards* reporting is also affected by the issuance of SAS No. 112. As noted by the GAO upon issuance of the 2007 revision to the Yellow Book (see further discussion in the section titled "*Government Auditing Standards* Developments"), auditors should adopt the terminology and definitions in SAS No. 112 when reporting on internal control deficiencies. Updated Yellow Book report illustrations have been posted to the GAQC Web site at http://gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports. In the event your auditees are also subject to OMB Circular A-133, the GAQC Web site also includes updated internal control reporting for those audits.

AICPA Risk Assessment Standards

.106 The eight SASs referred to as the risk assessment standards (SAS Nos. 104–111) became effective for audits of financial statements for periods beginning on or after December 15, 2006, (earlier application was permitted), which means they are effective for 2007 calendar year audits. Although the SASs include many of the underlying concepts and detailed performance requirements contained in the standards they amend or supersede, they do create significant new requirements for the auditor. The risk assessment standards

[4] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions.

Key Provisions of the Risk Assessment Standards

.107 Whether due to error or fraud, the risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework at www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs should have already been completed and has likely resulted in significant changes to firm audit methodologies and personnel training.

Unique Aspects of Applying the Risk Assessment Standards for State and Local Government Audits

.108 As discussed in more detail in chapter 4 of the AICPA Audit and Accounting Guide *State and Local Governments*, in considering risks of material misstatement at the overall financial statement level (the financial statements taken as a whole), in a governmental audit, the term *taken as a whole* means considering each *opinion unit* separately. Opinion units could include: governmental activities; business-type activities; aggregate discretely presented component units, each major governmental and enterprise fund, and the remaining fund information—nonmajor governmental and enterprise funds, internal service funds, and fiduciary funds. In addition, risks of a pervasive nature often relate to the government entity's control environment and are not necessarily identifiable with specific relevant assertions at the class of transactions, account balance, disclosure level, or opinion unit. Such risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control.

Risk Assessment Standards Technical Practice Aids

.109 To assist auditors in implementing the risk assessment standards in their audits, the AICPA has issued a series of nonauthoritative Technical Practice Aid (TPA) Technical Questions and Answers (TIS) relating to internal control. TIS sections 8200.05–.16 (AICPA, *Technical Practice Aids*), have been developed in response to common questions received from auditors. Topics include testing the operating effectiveness of internal control, obtaining an understanding of the control environment, use of walkthroughs, documenting internal control, and several others.

Companion Audit Guide

.110 In December 2006, the AICPA published Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors further understand the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Accounting Issues and Developments

GASB Accounting Standards Upcoming Implementation Dates

.111 A number of GASB pronouncements issued prior to 2007 have provisions with effective dates for fiscal periods ending in 2008 and 2009. These pronouncements and applicable implementation provisions are highlighted as follows.

GASB Statement No. 27, Accounting for Pensions by State and Local Governmental Employers—Reduction in Maximum Amortization Period for Unfunded Actuarial Liability

.112 This statement established standards for the measurement, recognition, and display of pension expenditures and related liabilities, assets, note disclosures, and RSI in the financial statements of state and local government employers. Paragraph 10.f.1 of GASB Statement No. 27 provided that, for purposes of calculating the annual required contribution, the maximum acceptable amortization period for the total unfunded actuarial liability (UAL) was 40 years for a term of not more than 10 years from the effective date of GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*. After that 10-year term, the maximum acceptable amortization period is 30 years.

.113 While GASB Statement No. 27 became effective for periods beginning after June 15, 1997, its companion statement GASB Statement No. 25 became effective for periods beginning after June 15, 1996. Therefore, the maximum UAL amortization period of 30 years is effective for periods beginning after June 15, 2006.

GASB Statement No. 34, Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments—Retroactive General Infrastructure Reporting—Phase 2 Governments

.114 Included among the many provisions of GASB Statement No. 34 was the requirement for the reporting of general infrastructure assets. Paragraph 148 of GASB Statement No. 34 required prospective reporting of general infrastructure assets in the statement of net assets based on the phased-in dates as noted in the following:

- Phase 1 governments—with total annual revenues of $100 million or more—should apply the requirements of this statement in financial statements for periods beginning after June 15, 2001.
- Phase 2 governments—with total annual revenues of $10 million or more, but less than $100 million—should apply the requirements of this statement in financial statements for periods beginning after June 15, 2002.
- Phase 3 governments—with total annual revenues of less than $10 million—should apply the requirements of this statement in financial statements for periods beginning after June 15, 2003.

.115 However, retroactive reporting of all major general infrastructure assets was only encouraged at the above dates. GASB indicated that, effective at later dates, Phase 1 and 2 governments would be required to retroactively report all major general infrastructure assets, while Phase 3 governments were encouraged but not required to report major general infrastructure assets retroactively.

.116 Phase 1 governments, as described in the preceding summary, were required to retroactively report all major general infrastructure assets for fiscal years beginning after June 15, 2005. Phase 2 governments will now be required to retroactively report all major general infrastructure assets for fiscal years beginning after June 15, 2006.

.117 As we discussed in previous alerts, we have been asked whether that retroactive reporting of infrastructure is a change in accounting principle that requires the auditor to include an explanatory paragraph in the auditor's report on the financial statements in the year of retroactive reporting. The answer is no because the change in accounting principle occurred in the year that the entity adopted GASB Statement No. 34. Because the retroactive reporting would result in a restatement of beginning net assets, the matter would likely be disclosed in the notes to the financial statements. The auditor should consider whether appropriate disclosure has been made in the year of retroactive reporting. Further, while the retroactive reporting is not a change in accounting principle, the auditor may add an explanatory paragraph to the auditor's report to emphasize the matter as provided in AU section 508 paragraph .19, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1).

GASB Statement No. 43, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans

.118 This statement establishes standardized financial reporting standards for OPEB plans. The standards in this statement apply for OPEB trust funds included in the financial statements of plan employers, as well as for the outside financial statements of OPEB plans or the employee retirement systems, or other third parties that oversee them. Requirements for reporting of OPEB funds by administrators of multiple-employer OPEB plans is also described in this statement when the fund used to accumulate assets and pay benefits or premiums when due is not a trust fund.

.119 The requirements of GASB Statement No. 43 for an OPEB plan are effective one year prior to the effective date of the related GASB Statement No. 45 for the employer (single-employer plan) or for the largest participating employer in the plan (multiple-employer plan). The requirements of GASB Statement No. 45 are effective in three phases based on a government's implementation phase for the purpose of GASB Statement No. 34. (See preceding explanation of Phase 1, 2, and 3 governments in the GASB Statement No. 34 discussion.) Plans in which the sole or largest participating employer was a Phase 1 government, for the purpose of implementation of GASB Statement No. 34, were required to apply the requirements of GASB Statement No. 43 in financial statements for periods beginning after December 15, 2005. Plans in which the sole or largest participating employer was a Phase 2 government, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 43 in financial statements for periods beginning after December 15, 2006. Plans in which the sole or largest participating employer was a Phase 3 government, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 43 in financial statements for periods beginning after December 15, 2007. Early implementation of GASB Statement No. 43 is encouraged.

GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions

.120 This statement establishes standards of accounting and financial reporting for OPEB expense/expenditures and related liabilities or assets, note disclosures, and RSI in the financial statements of state and local governmental employers.

.121 The requirements of GASB Statement No. 45 are effective in three phases. Governments that were Phase 1 governments, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 45 in financial statements for periods beginning after December 15, 2006. Governments that were Phase 2 governments, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 45 in financial statements for periods beginning after December 15, 2007. Governments that were Phase 3 governments, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 45 in financial statements for periods beginning after December 15, 2008. All component units are required to implement the requirements of GASB Statement No. 45 no later than the same year as their primary government.

GASB Statement No. 47, Accounting for Termination Benefits

.122 This statement provides for the accounting and reporting of all forms of employment termination benefits for state and local governments, such as early-retirement incentives, severance pay, and other voluntary or involuntary benefits.

.123 The requirements of this statement are effective for financial statements in two parts. For termination benefits provided through an existing defined benefit OPEB plan, the provisions of GASB Statement No. 47 should be implemented simultaneously with the requirements of GASB Statement No. 45 (see the preceding discussion of GASB Statement No. 45 implementation). For all other termination benefits, GASB Statement No. 47 was effective for financial statements for periods beginning after June 15, 2005.

GASB Statement No. 48, Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues

.124 This statement establishes criteria that governments will use to ascertain whether the proceeds received from an exchange of an interest in their expected cash flows from collecting specific receivables or specific future revenues for immediate cash payments should be reported as revenue or as a liability. This statement also provides additional guidance for sales of receivables and future revenues within the same financial reporting entity. In addition, this statement includes a provision that stipulates that governments should not revalue assets that are transferred between financial reporting entity components. Therefore, any assets (or future revenues) sold or donated within the same financial reporting entity should continue to be reported at their current carrying value when those assets or future revenues are transferred. GASB Statement No. 48 is effective for periods beginning after December 15, 2006.

GASB Statement No. 49, Accounting and Financial Reporting for Pollution Remediation Obligations

.125 This statement addresses accounting and financial reporting standards for pollution remediation obligations, which are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities, such as site assessments and cleanups. The scope of the statement excludes pollution prevention or control obligations with respect to current operations and future pollution remediation activities that are required upon retirement of an asset, such as landfill closure and postclosure care and nuclear power plant decommissioning.

.126 GASB Statement No. 49 is effective for financial statements for periods beginning after December 15, 2007, with measurement of pollution remediation liabilities required at the beginning of that period so that beginning net assets can be restated. However, governments that have sufficient objective and verifiable information to apply the expected cash flow technique to measure the liability in prior periods are required to apply the provisions retroactively for all such prior periods presented.

Changes to the Financial Accounting Foundation, FASB, and GASB

.127 In February 2008, the Board of Trustees of the Financial Accounting Foundation (FAF) voted to approve major changes to the oversight, structure, and operations of the FAF and its two standard-setting boards, FASB and GASB.

.128 Specifically, the FAF Board of Trustees approved the following key changes:

- FAF changes include
  - — expanding the number and breadth of investors, accounting, business, financial, and government organizations and entities invited to nominate FAF trustees with the understanding that the final authority for all appointments rests solely with the discretion of the board of trustees;

— changing the current term of trustees from one three-year term with a possible second three-year term to one five-year term;

— changing the size of the board of trustees from a fixed 16 trustees to a flexible range of 14–18 trustees; and

— increasing the trustee governance activities, including its level of formal review, analysis, and oversight of the data and materials regularly provided by FASB, Financial Accounting Standards Advisory Council (FASAC), GASB, and Governmental Accounting Standards Advisory Council (GASAC).

- FASB changes include
    - — reducing the size of FASB from seven members to five, effective July 1, 2008;
    - — retaining FASB simple majority voting requirements;
    - — affirming the need for investor participation on FASB by broadening the current bylaw requirement that FASB members possess investment experience; and
    - — changing FASB's agenda-setting process whereby the FASB chair is vested with the authority, following appropriate consultation, to set FASB project plans, agenda, and priority of projects.
- GASB changes include
    - — securing a stable and permanent funding source for GASB;
    - — retaining the current size, term length, and composition of GASB; and
    - — changing GASB's agenda-setting process whereby the GASB chair is vested with the authority, following appropriate consultation, to set GASB project plans, agenda, and priority of projects.

FASB Accounting Standards Codification™

.129 State and local government auditors should take note of the FASB project to codify its accounting standards. GASB Statement No. 34 paragraph 93, states that proprietary funds should be reported based on all applicable GASB pronouncements as well as FASB Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins of the Committee on Accounting Procedure issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements. As a result, financial statement preparers have the responsibility to identify which provisions within the FASB pronouncements are applicable to them, while disregarding any amendments to such pronouncements made after that date.

.130 On January 15, 2008, FASB launched the one-year verification period of the *FASB Accounting Standards Codification™* (codification). The codification is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. The codification includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. The codification also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.131 The purpose of the codification is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. Therefore, the one-year verification period is not to debate the underlying requirements of GAAP, but rather to verify that the codification appropriately captures them and accurately reflects existing U.S. GAAP for nongovernmental entities. The verification period is also a period for constituents to acquaint themselves with the new structure and submit feedback regarding any issues before the codification content becomes authoritative. At the end of the one-year verification period, FASB is expected to formally approve the codification as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve the codification in April 2009.

.132 The codification of the FASB standards will make the GASB Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, identification process more difficult and will likely result in the original FASB pronouncements becoming nonauthoritative. In response to this concern, the GASB is considering adding a project to its current technical agenda to codify these pre-November 30, 1989 FASB pronouncements as part of GASB's GAAP.

Summary of Recent Accounting Pronouncements and Related Guidance

.133 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the GASB Web site at www.gasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance

GASB Statement No. 52 (November 2007)	*Land and Other Real Estate Held as Investments by Endowments*
GASB Statement No. 51 (June 2007)	*Accounting and Financial Reporting for Intangible Assets*
GASB Statement No. 50 (May 2007)	*Pension Disclosures—an Amendment of GASB Statements No. 25 and 27*

.134 The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent nongovernmental accounting pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

GASB Statement No. 52

.135 In November 2007, GASB issued GASB Statement No. 52, *Land and Other Real Estate Held as Investments by Endowments*. This statement establishes consistent accounting and financial reporting standards for land and other real estate held as investment by endowments, including permanent funds. These investments will likely be encountered more often in colleges and universities and their related foundations than general-purpose governments. Endowments generally exist to invest resources for the purpose of generating income.

.136 This statement requires that land and other real estate held as investments by endowments be reported at fair value and the changes in fair value reported as investment income.

.137 This statement is effective for financial statements for periods beginning after June 15, 2008. Earlier application is encouraged.

GASB Statement No. 51

.138 GASB Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*, was issued in June 2007 to provide guidance regarding how to identify, account for, and report intangible assets.

.139 This statement requires that all intangible assets not specifically excluded by its scope provisions be classified as capital assets. Accordingly, existing authoritative guidance related to the accounting and financial reporting for capital assets should be applied to these intangible assets, as applicable. This statement also provides authoritative guidance that specifically addresses the nature of these intangible assets. Such guidance should be applied in addition to the existing authoritative guidance for capital assets.

.140 The guidance specific to intangible assets referred to in the preceding includes guidance on recognition. This statement requires that an intangible asset be recognized in the statement of net assets only if it is considered identifiable. Additionally, this statement establishes a specified-conditions approach to recognizing intangible assets that are internally generated. Effectively, outlays associated with the development of such assets should not begin to be capitalized until certain criteria are met. Outlays incurred prior to meeting these criteria should be expensed as incurred. This statement also provides guidance on recognizing internally generated computer software as an intangible asset. This guidance serves as an application of the specified-conditions approach described in the preceding to the development cycle of computer software.

.141 This statement also establishes guidance specific to intangible assets related to amortization. This statement provides guidance on determining the useful life of intangible assets when the length of their life is limited by contractual or legal provisions. If there are no factors that limit the useful life of an intangible asset, the statement provides that the intangible asset be considered to have an indefinite useful life. Intangible assets with indefinite useful lives should not be amortized unless their useful life is subsequently determined to no longer be indefinite due to a change in circumstances.

.142 The requirements of this statement are effective for financial statements for periods beginning after June 15, 2009; early implementation is encouraged. The provisions of this statement generally are required to be applied retroactively. For governments that were classified as Phase 1 or Phase 2 governments for the purpose of implementing GASB Statement No. 34, retroactive reporting is required for intangible assets acquired in fiscal years ended after June 30, 1980, except for those considered to have indefinite useful lives as of the effective date of this statement and those that would be considered internally generated. Retroactive reporting of intangible assets by Phase 3 governments is encouraged but not required. Retroactive reporting is not required but is permitted for intangible assets considered to have indefinite useful lives as of the effective date of this statement and those considered to be internally generated.

GASB Statement No. 50

.143 GASB Statement No. 50 was issued in May 2007. This statement more closely aligns the financial reporting requirements for pensions with those for OPEB and, in doing so, enhances information disclosed in notes to financial statements or presented as RSI by pension plans and by employers that provide pension benefits. The reporting changes required by this statement amend applicable note disclosure and RSI requirements of GASB Statement Nos. 25 and 27, to conform with the requirements of GASB Statement Nos. 43 and 45.

.144 This statement amends GASB Statement Nos. 25 and 27 to require defined benefit pension plans and sole and agent employers to present the following information related to note disclosures or RSI:

- Notes to financial statements should disclose the funded status of the plan as of the most recent actuarial valuation date. Defined benefit pension plans also should disclose actuarial methods and significant assumptions used in the most recent actuarial valuation in notes to financial statements instead of in notes to RSI.
- If the aggregate actuarial cost method is used to determine the annual required contribution of the employer (ARC), notes to financial statements should disclose the funded status of the plan and a schedule of funding progress should be presented as RSI, using the entry age actuarial cost method. Plans and employers also should disclose that the purpose of doing so is to provide information that serves as a surrogate for the funded status and funding progress of the plan.

- Notes to financial statements should include a reference linking the funded status disclosure in the notes to financial statements to the required schedule of funding progress in RSI.
- If applicable, notes to financial statements should disclose legal or contractual maximum contribution rates. In addition, if relevant, they should disclose that the maximum contribution rates have not been explicitly taken into consideration in the projection of pension benefits for financial accounting measurement purposes.
- If an actuarial assumption is different for successive years, notes to financial statements should disclose the initial and ultimate rates.

.145 This statement amends GASB Statement No. 25 to require defined benefit pension plans and defined contribution plans to disclose in the notes to financial statements the methods and assumptions used to determine the fair value of investments, if the fair value is based on other than quoted market prices.

.146 This statement amends GASB Statement No. 27 to require cost-sharing employers to include, in the note disclosure of the required contribution rates of the employer(s) in dollars and the percentage of that amount contributed for the current year and each of the two preceding years, how the contractually required contribution rate is determined (for example, by statute, by contract, or on an actuarially determined basis) or that the cost-sharing plan is financed on a pay-as-you-go basis.

.147 This statement also amends GASB Statement No. 27 to require that if a cost-sharing plan does not issue a publicly available stand-alone plan financial report prepared in accordance with the requirements of GASB Statement No. 25, as amended, and the plan is not included in the financial report of another entity, each employer in that plan should present, as RSI, the schedules of funding progress and employer contributions for the plan (and notes to these schedules). Each employer also should disclose that the information presented relates to the cost-sharing plan as a whole, of which the employer is one participating employer, and should provide information helpful for understanding the scale of the information presented relative to the employer.

.148 This statement is effective for periods beginning after June 15, 2007, except for requirements related to the use of the entry age actuarial cost method for the purpose of reporting a surrogate funded status and funding progress of plans that use the aggregate actuarial cost method, which are effective for periods for which the financial statements and RSI contain information resulting from actuarial valuations as of June 15, 2007 or later. Early implementation is encouraged. In the initial year of implementation, defined benefit pension plans and sole and agent employers that use the aggregate actuarial cost method to determine the ARC are required to present elements of information in the schedule of funding progress using the entry age actuarial cost method as of the most recent actuarial valuation date. In subsequent years, plans and employers should add to that schedule information as of subsequent actuarial valuation dates until the requirements of GASB Statement Nos. 25 and 27, as amended, with regard to the minimum number of years or actuarial valuations to be included, have been met.

Recent AICPA Independence and Ethics Pronouncements

.149 AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

On the Horizon

.150 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to state and local governments or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.151 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
Governmental Accounting Standards Board (GASB)	www.gasb.org
Financial Accounting Standards Board (FASB)	www.fasb.org
U.S. Government Accountability Office (GAO)	www.gao.gov
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline

ASB Clarity Project

.152 The ASB formed a Clarity Task Force to address concerns over the clarity, length, and complexity of GAAS. In March 2007, the ASB approved for exposure a discussion paper, *Improving the Clarity of ASB Standards*. In response to the feedback received on the discussion paper and subsequent discussions with interested parties, the ASB has established clarity drafting conventions. The clarity drafting conventions include the following:

- Establishing objectives for each of the standards
- Including a definitions section, where relevant, in each standard
- Separating requirements from application and other explanatory material
- Numbering application and other explanatory material paragraphs using an *A*-prefix and presenting them in a separate section that follows the requirement section

- Using formatting techniques, such as bullet lists, to enhance readability
- Including, where appropriate, special considerations relevant to audits of smaller, less complex entities within the text of the standard
- Including, where appropriate, special considerations relevant to audits of governmental entities within the text of the standard

.153 The drafting conventions previously listed will be applied to all standards issued by the ASB after January 2008. In addition, over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections to *Professional Standards*), to apply the clarity drafting conventions and to converge with the International Standards on Auditing (ISAs) issued by the International Auditing and Assurance Standards Board (IAASB). The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needed to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the *Clarity Project Explanatory Memorandum* and the discussion paper *Improving the Clarity of ASB Standards* at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

Convergence With International Standards

.154 The ASB has created a number of task forces charged with monitoring specific activities of the IAASB and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of ISAs. The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Accounting Pipeline

.155 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

GASB Exposure Drafts

.156 The GASB has three exposure drafts of statements that it plans to finalize in 2008.

Service Efforts and Accomplishments

.157 In April 2008, the GASB issued an exposure draft of proposed changes to GASB Concepts Statement No. 2, *Service Efforts and Accomplishments Reporting*. This exposure draft proposes to update GASB Concepts Statement No. 2 to reflect knowledge gathered by GASB through 14 years of research and monitoring of such reporting. The proposed amendment would clarify the role of GASB in service efforts and accomplishments (SEA) reporting and to bring the conceptual framework up to date on the advances made by governments in reporting SEA information.

Fund Balance Reporting

.158 The exposure draft *Fund Balance Reporting and Governmental Fund Type Definitions* issued in February 2008, proposes to improve financial reporting and fund balance understanding by clarifying the definitions of governmental funds and establishing a hierarchy of fund balance classifications based on the extent to which a government is bound to observe spending constraints imposed on the use of resources reported in governmental funds. The exposure draft proposes that the requirements be effective for periods beginning after June 15, 2010.

Accounting for Derivatives

.159 The exposure draft *Accounting for Financial Reporting for Derivative Instruments*, issued in June 2007, addresses recognition and measurement of derivative instruments and disclosure of information about derivative instruments by state and local governments. A key provision in this proposed statement and a major change from current practice is that most derivative instruments covered in the scope of this proposed statement would be reported at fair value. Currently, most derivative instruments are recognized at historical prices in a government's statement of net assets. The disclosures of GASB Technical Bulletin No. 2003-1, *Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets*, generally have been incorporated into this proposal for hedging derivative instruments. The exposure draft proposes that the requirements would be effective for financial statements for periods beginning after June 15, 2009.

Upcoming GASB Due Process Documents

.160 GASB expects to release documents relating to a proposed accounting and financial reporting standard addressing the conceptual framework on recognition and measurement attributes in 2009.

> **Help Desk—**To track the progress of GASB's projects, go to the GASB's Web site at www.gasb.org. GASB generally posts exposure drafts on that site during the exposure period. It also posts its current technical plan listing and describes its projects and timetable.

Comprehensive Implementation Guide Update

.161 Annually, GASB publishes the annual update to its *Comprehensive Implementation Guide*. The *Comprehensive Implementation Guide* consolidates and updates previously issued guides for individual standards and provides current guidance on standards for which no standalone guides have been published.

> **Help Desk—**The *Comprehensive Implementation Guide* can be ordered through the GASB's order department at (800) 748-0659 or via its Web site at www.gasb.org.

Resource Central

.162 The following are various resources that practitioners engaged in the state and local government environment may find beneficial.

AICPA Governmental Audit Quality Center

.163 The GAQC is a firm-based, voluntary membership Center designed to improve the quality of governmental audits and the value of such audits to purchasers of governmental audit services. Governmental audits are audits and attestation engagements performed under *Government Auditing Standards* of federal, state, or local governments; not-for-profit organizations; and certain for-profit organizations, such as housing projects and colleges and universities that participate in governmental programs or receive governmental financial assistance. The GAQC keeps member firms informed about the latest developments, as well as provides tools and information to help them better manage their audit practice. Firms that join demonstrate their commitment to audit quality by agreeing to adhere to certain membership requirements.

.164 The GAQC has been in existence since September 2004. Since its launch, Center membership has grown to over 980 firms from 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The membership accounts for approximately 81 percent of the total federal expenditures covered in single audits performed by CPA firms in the Federal Audit Clearinghouse database (http://harvester.census.gov/sac/) for the year 2006 (the latest year with complete submission data).

.165 The Center's focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information they need, when they need it, to maximize quality and practice success. Center resources include the following:

- E-mail news alerts on current audit and regulatory developments that keep member firms informed about the latest developments
- Dedicated Center Web site at www.aicpa.org/GAQC with resources, community, events and products, and a complete listing of GAQC members in each state
- Online member discussion forums for sharing best practices and discussing issues firms are facing
- Webcasts, Web seminars, and teleconferences updating members on a variety of technical, legislative, regulatory, and practice management subjects (note that these activities are archived on the GAQC Web site)

> **Help Desk—**With all of the quality issues being noted in governmental audits (see further discussion in the "Legislative and Regulatory Developments" and "Audit and Attestation Issues and Developments" sections), your firm should consider joining the Center. To enroll or learn more about the GAQC, including details on the membership requirements and fees for membership, go to www.aicpa.org/GAQC or e-mail GAQC staff at GAQC@aicpa.org. To preview member benefits, go to http://gaqc.aicpa.org/Memberships/.

AICPA Industry Expert Panel—State and Local Governments

.166 The State and Local Government Expert Panel is an AICPA volunteer group whose purpose it is to identify state and local government financial reporting and auditing issues and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the GASB, regulators such as the GAO and OMB, and applicable industry associations; and to advise and assist in the development of AICPA products and services related to state and local government audits. For information about the activities of the State and Local Government Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_government.htm.

Publications

.167 Practitioners may find the following publications useful with respect to state and local governments:

- Audit and Accounting Guide *State and Local Governments* (2008) (product no. 012668kk)
- Audit Guide Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit and Accounting Guide *Health Care Organizations* (2007) (product no. 012617kk)
- Audit Guide *Audit Sampling* (2008) (product no. 012538kk)
- Audit Guide *Analytical Procedures* (2008) (product no. 012558kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)

- Audit Guide *Auditing Derivative Instruments,Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2008) (product no. 012518kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2008) (product no. 012778kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- AICPA Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2007/08* (product no. 022457kk)
- AICPA Audit Risk Alert *Health Care Industry Developments—2007/08* (product no. 022348kk)
- Audit Risk Alert *Compilation and Review—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *State and Local Governments: Checklists and Illustrative Financial Statements* (2007) (product no. 009037kk)
- Audit and Accounting Practice Aid *Applying OCBOA in State and Local Governmental Financial Statements* (product no. 006614kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627kk)

AICPA reSOURCE: Accounting and Auditing Literature

.168 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.169 The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's AnnualAccounting and Auditing Update Workshop* (2008–2009 Edition) (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Internal Control Deficiencies: Assessment and Reporting Under SAS 112* (product no. 733291kk [text] or 183291kk [DVD]). This course focuses on compliance with the standard's requirement by examining each stage of the decision making framework using numerous illustrations and practice exercises. The course also applies to managers of nonpublic companies to enable them to decide whether a control deficiency exists and how to correct it.

.170 Among the many courses, the following are specifically related to state and local governments:

- *State & Local Government Strategic Briefing—2007/2008* (product no. 780100HSkk [CD-ROM]). This course, based on a webcast, provides participants with a strategic look at what's important in the governmental accounting and auditing area. The program addresses recently issued GASB pronouncements affecting both preparers and auditors and feature highlights of recently issued GAAS, and the latest updates to the AICPA Audit and Accounting Guide *State and Local Governments*.
- *Foundations in Governmental Accounting* (product no. 731645kk). This course features the fundamental tenets of governmental accounting and reporting in the post-GASB Statement No. 34 environment. Learn more than the buzz words—learn the underlying concepts and how they are applied.
- *Governmental Accounting and Auditing Update (2008/2009 Edition)* (product no. 736478kk [text] or 186484kk [DVD]). This timely, up-to-the-minute course is designed to provide you with a comprehensive understanding of new developments, so you can provide better services to both clients and the public. For 2008–09, the course includes coverage of the new Yellow Book, the risk assessment SASs, SAS No. 112, and more.
- *Workpaper Techniques for Government and Nonprofit Organizations* (product no. 732637kk). Learn to prepare workpapers needed to complete a government or nonprofit audit. Increase your performance with practical and timesaving techniques. Avoid common preparation problems by applying proven, effective strategies.
- *Government Accounting and Reporting: Putting It All Together* (product no. 732803kk). This course goes deep into the accounting and reporting issues for state and local governments. Learn how to navigate the complexities of government accounting and reporting in the post-GASB Statement No. 34 environment.
- *Audits of HUD-Assisted Projects* (product no. 730299kk). Gain in-depth, hands-on information regarding Housing and Urban Development (HUD) organization, programs, policies, and procedures. Review the professional standards affecting specific federal programs.

.171 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.172 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to state and local government accountants and auditors include the following:

- *Government Accounting and Reporting: Preparing the Government-Wide Financial Statements*
- *Yellow Book: An Overview*
- *2007 Annual Update—Government: GASB Activities*
- *Governmental and NPO Workpaper Preparation Techniques Overall Approach*
- *Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments*

.173 To register or learn more, visit www.cpa2biz.com.

Webcasts

.174 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

Member Service Center

.175 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.176 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9am to 8pm on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.177 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conferences

.178 The AICPA sponsors three annual Governmental Accounting and Auditing Conferences in the late summer and fall.

.179 *Governmental Accounting and Auditing Update Conference (GAAC) EAST* is held in late summer in Washington, D.C., and its counterpart *Governmental Accounting and Auditing Update Conference (GAAC) WEST* takes place in Denver, Colorado in early fall. These conferences are designed for CPAs working in federal, state, and local government; public practitioners with government auditees; and regulators who need to be aware of emerging developments; these CPAs should attend this conference to remain current on the issues. Attending one of these conferences is a great way to receive timely guidance along with practical advice on how to handle new legislation and standards from key government officials and representatives of the accounting profession—including the standard setters themselves.

.180 *AICPA National Governmental and Not-for-Profit Training* is held in Las Vegas, Nevada. If you need hands-on training and are a CPA in public practice—or a governmental or not-for-profit staffer—then this conference is for you. You'll hear directly from the standards setters and industry leaders on a variety of topics including developments in governmental accounting and auditing, the latest in proposed regulations and laws on the local, state, and federal government levels, as well as those affecting the not-for-profit sector and more.

.181 For further information about these conferences, call (888) 777-7077 or visit www.cpa2biz.com.

Industry Web Sites

.182 The Internet covers a vast amount of information that may be valuable to auditors of state and local government entities, including current industry trends and developments. Some of the more relevant sites for auditors with governmental clients include those shown in the following table:

Organization	*Web Site*
Association of Governmental Accountants (AGA)	www.agacgfm.org
Catalog of Federal Domestic Assistance (CFDA)	www.cfda.gov
Federal Audit Clearinghouse (FAC)	http://harvester.census.gov/sac
U.S. Government Accountability Office (GAO)	www.gao.gov
Government Auditing Standards (Yellow Book)	www.gao.gov/govaud/ybk01.htm
Governmental Accounting Standards Board (GASB)	www.gasb.org
Financial Accounting Standards Board (FASB)	www.fasb.org
Securities and Exchange Commission Information for Municipal Markets	www.sec.gov/info/municipal.shtml
Government Finance Officers Association (GFOA)	www.gfoa.org
National Association of Local Government Auditors (NALGA)	www.governmentauditors.org
National Association of State Auditors, Comptrollers, and Treasurers (NASACT)	www.nasact.org
Offices of Inspectors General (OIG)	www.ignet.gov
Office of Management and Budget (OMB)	www.whitehouse.gov/OMB
President's Council on Integrity and Efficiency (PCIE)	www.ignet.gov/pcieecie1.html

.183 The state and local government practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

Common Interest Realty Associations Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
COMMON INTEREST REALTY ASSOCIATIONS
INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert, prepared by the AICPA staff, is intended to provide auditors of financial statements of common interest realty associations with an overview of recent economic, technical, industry, regulatory, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in Statement on Auditing Standards (SAS) No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA, and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Lori A. West, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff wishes to thank Gayle L. Cagianut, CPA, Jeffrey L. Ducker, CPA, Candido Fernandez, CPA, Mitchell Frumkin, RS, PE, Monte Kane, CPA, Douglas M. Kleine, CAE, Annette Murray, CPA, Gary A. Porter, CPA, Gary Rosen, CPA, and Clifford J. Treese, CPCU, CIRMS, for their assistance and contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your common interest realty association (CIRA) audits, reviews, and compilations. The information delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 ***References to Professional Standards***. When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54 is referred to as AU section 317 of the AICPA *Professional Standards*.

Help Desk—See the AICPA Audit Risk Alert *Independence and Ethics Alert—2006/07* (product no. 022477kk) for a thorough discussion of recent developments and key issues in the area of independence and ethics.

Help Desk—See the AICPA Audit Risk Alert *Compilation and Review Alert—2006/07* (product no. 022307kk) for a thorough discussion of recent developments and key issues in the area of compilations and reviews.

.03 If you understand what is happening in the CIRA industry, and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry information.

Understanding the Organization and Its Environment and Assessing Risks

.04 An auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include the following:

- Industry conditions
- The regulatory environment encompassing, among other matters, relevant accounting pronouncements
- The legal and political environment
- Other external factors, such as general economic conditions

.05 The CIRA industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive).

.06 The auditor should obtain an understanding of the CIRA's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the organization's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. An understanding of business risks increases the likelihood of identifying risks of material misstatement, although the auditor does not have a responsibility to identify or assess all business risks. Many business risks could eventually have financial consequences and, therefore, affect the financial statements; obviously, however, not all business risks give rise to risks of material misstatement.

.07 After gaining an understanding of the organization and its environment, the auditor needs to make risk assessments at the financial statement and relevant assertion levels based on that understanding.

.08 Presented in this Alert are current business, economic, regulatory, accounting, and auditing matters that may affect your clients. Reading about these matters and properly addressing them as necessary will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and ultimately strengthen the integrity of your audits.

Current Economic and Industry Developments

.09 For a complete overview of the current economic environment in the United States, see the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk).

Residential Community Association Demographics

.10 In 1970, there were approximately 700,000 homes in 10,000 community associations. As part of a mid-1970 report, the U.S. Department of Housing and Urban Development (HUD) projected that 50 percent of American homes would be living in community associations by the late 1980s. Although premature, the HUD prediction was not that wrong. Today, it is estimated that 85 percent to 90 percent of all *new for-sale housing* is located in one of the three basic types of community associations. Somewhere between 40 percent and 60 percent of CIRAs are contract managed by specialized community association management (CAM) companies while the other 40 percent to 60 percent are self-managed either solely by volunteers or with association-hired staff. Regardless of management structure, all associations are governed by a volunteer board of directors elected by the membership.

Quick Facts About Residential Community Associations

	2000	*2001*	*2002*	*2003*	*2004*	*2005*	*2006*
No. of CIRAs	222,500	231,000	240,000	249,000	260,000	273,600	286,000
No. of CIRA housing units	17,800,000	18,480,000	19,200,000	19,920,000	20,800,000	22,160,000	23,100,000
CIRA population	45,200,000		48,000,000		51,800,000	54,600,000	57,000,000
U.S. population	281,001,000		287,123,000		295,084,000		306,100,000

.11 Housing cooperatives represent approximately 5 percent to 7 percent of all association units. Condominium associations represent from 38 percent to 42 percent while planned communities constitute the balance. Condominium associations, in the last two to three years, have definitely increased in acceptability and popularity.

Boards of Directors—Value of Service

.12 Over 1.7 million volunteers serve on the boards of directors of residential community associations with another 375,000 participating as committee members. There are 286,000 annual association meetings with democratically conducted elections and another nearly 2,600,000 board of directors meetings during the year in which owners debate and shape their housing community's future. To assist the board, there are over 900,000 committee meetings during each fiscal year. The estimated value of these governance services is about $370,000,000. In general, about 28 percent of the eligible U.S. population volunteers at some point during a year—association leaders volunteer continuously during a year.

.13 When planning an audit the auditor of a CIRA should assess the board members' level of experience or whether there is a small group of homeowners who control the CIRA and have done so for years. Since a CIRA's environment is unique in that volunteers help manage large assets with little or no experience and minimal oversight, the auditor's approach will vary depending on which situation is relevant.

Annual Assessments

.14 These boards supervise the collection of over $41 billion in annual assessments and maintain investment accounts of another $36 billion to $37 billion for the long-term maintenance and replacement of commonly held property.

Reserves for Major Repairs

.15 During the course of any given year, associations probably spend in excess of $20 billion from accumulated reserves and operating funds for the repair, replacement, and enhancement of commonly owned property. According to a recent survey by the National Association of Housing Cooperatives, the average cooperative (which is about 25 years older than the typical condominium) plans to spend $1 million on repairs in the next five years.

Regulatory and Legislative Developments

.16 The operations of CIRAs, especially condominium associations, are regulated by the individual states and not by the federal government. Alternatively, planned communities (that is, homeowners associations [HOAs], property owners associations [POAs], and cooperatives), may not be regulated by the states. However, federal regulations, court cases, Internal Revenue Service (IRS) revenue rulings, and federal legislation apply to the income tax treatment of CIRAs. Also, two federal agencies, the Federal Housing Administration (FHA) and the Department of Veterans Affairs, as well as two government-sponsored enterprises (GSEs), the Freddie Mac and the Fannie Mae, have regulations and underwriting guidelines to guide developers, mortgage lenders, and others in establishing CIRAs as well as in selling and financing units. Although compliance with such regulations may not be mandatory, compliance with their guidelines and underwriting requirements facilitates the development, sale, and resale of units within CIRAs. This section discusses recent developments in federal regulations as they relate to CIRAs, including HUD requirements, IRS private letter rulings, and bankruptcy legislation. Readers should be aware that some states, especially three states—California, Florida, and Nevada—have active state agencies and a fourth state, New York, has a long history of involvement by the attorney general.

> **Help Desk**—To obtain copies of the HUD handbooks, notices, and other documents, go to www.hudclips.org, where they are available for printing or viewing. Printed handbooks can be ordered online through the Direct Distribution System or by telephone at (800) 767-7468.

Internal Revenue Service Activities

IRS Revenue Rulings

.17 A revenue ruling is an official interpretation by the IRS of the Internal Revenue Code (IRC), related statutes, tax treaties, and regulations. It is the conclusion of the IRS on how the law is applied to a specific set of facts. Revenue rulings are published in the Internal Revenue Bulletin for the information of and guidance to taxpayers, IRS personnel, and tax professionals. They can be used as guidance if your client encounters a similar situation. Readers should periodically review IRS revenue rulings as they may affect CIRAs.

> **Help Desk**—For more information, go to www.irs.gov/businesses/article/0,,id=107937,00.html for complete revenue ruling and memorandums issued to examiners. The Industry Issue Resolution (IIR) Program is aimed at establishing consistent IRS positions on complicated or controversial tax issues.

Technical Advice Memoranda (TAMs)

.18 Technical Advice Memoranda (TAMs) are written determinations issued by the National Office of the Internal Revenue Service that interpret and apply tax law to a taxpayer's specific set of facts. TAMs are not legally binding and may not be used as precedent in other cases. TAMs only address a particular factual situation, and different facts could change the advice given. However, TAMs can indicate IRS thinking on an issue. Below are some TAMs that have been issued that may be helpful to CIRAs.

.19 ***TAM 9539001—National Office Technical Advice Memorandum Letter Ruling 9539001.*** (Note: This involved a time-share association.)

.20 Conclusions (as shown in the TAM):

1. Amount received as annual assessments from taxpayer's members in excess of annual expenses are includible in taxable income.
2. Prepaid member assessments collected in one year but allocable to the next budget year are includible in gross income in the year of receipt.
3. Member assessments allocated to various repair and replacement reserve accounts are includible in gross income in the year of receipt.

.21 The conclusions were based on the fact that the association did not have as its sole activity the management and maintenance of the common areas, but had maid service and furnished individual units. Also, the members-owners were not given the opportunity to vote on the 70-604 election. Furthermore, no separate reserve bank account was set up for reserves.

.22 ***TAM 9637007—National Office Technical Advice Memorandum Letter Ruling 9637007.*** (The Association developed a portion of its unused property with condominiums which were offered for sale to members and to nonmembers on the condition that nonmembers become members prior to purchase.)

.23 Conclusions (as shown in the TAM):

> Section 277(a) applied to the taxpayer and income from the condominium sales is income from transactions with members. Accordingly, any condominium sale income can only be offset by expenses of providing goods and services to members. Expenses of development and sale of the condominium project, to the extent of the deductible, can only be deducted with respect to member income.

Special Tax Issue Related to Mixed-Use Projects

.25 The residential real estate industry continues to see the development of numerous mixed-use projects. Mixed-use development is the result of land planning that combines space for residential and commercial use. Many of these mixed-use projects contain for-sale units and therefore involve a CIRA component. The following tax issue which will need to be addressed in the annual audit is the CIRA taxation for mixed-use projects. There are several tests that a CIRA must meet in order to file IRS Form 1120-H. One key test for a mixed-use CIRA is the substantially residential test. Treasury Regulation 1.528-4 states the following:

> In general, in order for an organization to be considered a condominium management association or a residential real estate management association (and therefore in order for it to be considered a homeowners association), substantially all of its units, lots or buildings must be used by individuals for residences. For the purposes of applying paragraph (a) or (b), an organization which has attributes of both a condominium management association and a residential real estate management association shall be considered that association which, based on all the facts and circumstances, it more closely resembles. In addition, those paragraphs shall be applied based on conditions existing on the last day of the organization's taxable year.
>
> **Treasury Regulation § 1.528-4. Substantially Residential Test.**
>
> (a) *Condominium Management Associations*. Substantially all of the units of a condominium management association will be considered as used by individuals for residences if at least 85% of the total square footage of all units within the project is used by individuals for residential purposes. If a completed unit has never been occupied, it

will nonetheless be considered as used for residential purposes if, based on all the facts and circumstances, it appears to have been constructed for use as a residence. Similarly, a unit which is not occupied but which has been in the past will be considered as used for residential purposes if, based on all the facts and circumstances, it appears that it was constructed for use as a residence, and the last individual to occupy it did in fact use it as a residence. Units which are used for purposes auxiliary to residential use (such as laundry areas, swimming pools, tennis courts, storage rooms and areas used by maintenance personnel) shall be considered used for residential purposes.

(b) *Residential Real Estate Management Associations*. Substantially all of the lots or buildings of a residential real estate management association (including unimproved lots) will be considered as used by individuals as residences if at least 85% of the lots are zoned for residential purposes. Lots shall be treated as zoned for residential purposes even if under such zoning lots may be used for parking spaces, swimming pools, tennis courts, schools, fire stations, libraries, churches and other similar purposes which are auxiliary to residential use. However, commercial shopping areas (and their auxiliary parking areas) are not lots zoned for residential purposes.

(c) *Exception.* Notwithstanding any other provision of this section, a unit, or building will not be considered used for residential purposes, if for more than one-half the days in the association's taxable year, such unit, or building is occupied by a person or series of persons, each of whom so occupies such unit, or building for less than 30 days. Such an example would be timeshares.

.26 See the following link to the Tax Almanac for the further guidance: www.taxalmanac.org/index.php/Treasury_Regulations%2C_Subchapter_A%2C_Sec._1.528-4.

Compilation and Review Issues

Consideration of Fraud and Illegal Acts in a Compilation or Review Engagement

.27 Fraud is a broad legal concept and accountants do not make legal determinations of whether an act is, in fact, fraudulent. Rather, the accountant's interest specifically relates to acts that result in a material misstatement of the financial statements. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. Fraud is an intentional act that results in a material misstatement in financial statements.

.28 Guidance in AR section 100.05, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), states that the accountant should, among other things, establish an understanding with the entity that provides that the accountant will inform the appropriate level of management of any fraud or illegal acts that come to his or her attention, unless they are clearly inconsequential. This amendment revises AR section 100 by requiring the accountant to:

1. Establish an understanding with the client, preferably in writing, that the accountant will inform the appropriate level of management of any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.
2. Report, to the appropriate level of management, any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.

.29 The accountant need not report matters regarding illegal acts that are clearly inconsequential and may reach agreement in advance with the entity on the nature of such items to be communicated.

.30 Statement on Standards for Accounting and Review Services (SSARS) No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (AICPA, *Professional Standards*, vol. 2), does not add additional procedures to those normally performed in a compilation or review engagement. In other words, there is no requirement in a compilation or review engagement to search for fraud or illegal acts.

.31 However, during the performance of compilation or review procedures, if any evidence or information comes to the accountant's attention regarding fraud or an illegal act that may have occurred, the accountant should request that management consider the effect of the matter on the financial statements. Additionally, the accountant should consider the effect of the matter on his or her compilation or review report. When compiling financial statements and circumstances arise where the accountant believes that the financial statements are materially misstated, the accountant should obtain additional or revised information. When reviewing financial statements and circumstances arise where the accountant believes that the financial statements are materially misstated, the accountant should perform the additional procedures deemed necessary to achieve limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with generally accepted accounting principles (GAAP) or an other comprehensive basis of accounting (OCBOA).

> **Help Desk—**See the AICPA Audit Risk Alert *Compilation and Review Alert—2006/07* (product no. 022307kk) for a thorough discussion of recent developments and key issues in the area of compilations and reviews.

Engagement Issues

Reserve Study Concerns

.32 One of the critical components of the overall operating budget for a CIRA is the reserve study. Annual contributions to the replacement fund may be based on a reserve study which is developed to determine the timing and costs for future major repairs and replacements. While CIRAs often fund these costs through contributions over the lives of the common area components, CIRAs also fund the costs by assessing owners when funds are needed, or by borrowing. A CIRA should disclose information in its financial statements about its funding for future major repairs and replacements. The boards of directors need to be aware that the goal of whatever policies they set should be to enable them to meet their fiduciary duties to maintain and preserve the common property as stated in paragraph 3.05 of the AICPA Audit and Accounting Guide *Common Interest Realty Associations* (the CIRA Guide) as of May 1, 2006. The auditor should review the reserve study and compare it to the actual occurrences to determine if further procedures should be performed in assessing the reasonableness of the estimates and assumptions utilized (see the discussion of those procedures under the "Aging Communities" subhead below). The study also provides the CIRA with a funding strategy which is based upon its specific circumstances.

.33 The most critical times for the CIRA with regard to the development of the reserve study and the funding strategies occur when:

- The budget is first established for the new community which is either new construction or a conversion.
- The budget is reviewed while the replacements are becoming necessary.
- Each year the CIRA reviews its study and makes a decision regarding the funding plan to be implemented.

.34 In order to develop the reserve study, a number of variables needs to be defined. The auditor should understand the reserve study process, even though they may not be responsible for the generation of the study. They are as follows:

- *Common area components.* The first and most important is the selection of components, individual line items found in the physical analysis which encompass the common elements, to be included within the study. The CIRA is responsible for the maintenance and replacement of its common elements, which are described in the governing documents. Common elements vary based upon the type of CIRA. For example, when dealing with a condominium association, the common elements typically comprise not only the exteriors of the building but also the site-related items such as the driveways and other paved roadways, sidewalks, lobbies, and any other amenities. When dealing with a homeowners association (also known as a planned unit development and other terminology nationally), the common elements typically do not include the residential buildings, although they still include the site work and amenities such as the clubhouse, roads, and lighting. For this reason, it is important to understand the descriptions of the common elements as defined in the governing documents.

- *Replacement cost.* This is the estimated cost for performing the replacement when it becomes necessary. Generally, this is expressed as a unit cost and is multiplied by the overall quantity of that component. For example, the roadways comprise 1,000 square yards of area with a replacement cost of $7.00 per square yard thus yielding a total replacement cost of $7,000.

- *Beginning balance.* This is the amount of money which has been accumulated prior to the preparation of the study. This amount is distributed to each of the components within the study based upon a weighting factor. In the table in Example 1, this amount is $9,000.

- *Estimated useful life.* This is the amount of time in which a component can adequately operate before 100 percent replacement is required. In Example 1, for the pavement this would be 20 years. Depending on the state and/or the practice in a given area, components with 30 or more years may be treated as having an unlimited useful life and, hence, no replacement fund is created for that component. Domestic water piping, electric lines, and structural supports are examples.

- *Estimated remaining useful life.* This is based upon the condition and age of the component inspected at the time the study is performed. In Example 1, for the pavement this would be 10 years.

.35 While the fundamental information regarding reserve studies is essentially the same for all circumstances, the risks involved at the different times in the life of the CIRA are significantly different and are discussed below.

Background

.36 The concept of a reserve study is relatively simple and includes two parts, the physical analysis and the financial analysis. The physical analysis contains information about the physical status and replacement cost of major common area components the CIRA is obligated to maintain. It comprises component inventory, condition assessment, and life estimates. The financial analysis includes the evaluation of the CIRA's reserve balance, income, and expenses. It involves assessing the current replacement fund status and an appropriate funding plan.

.37 The physical analysis is based upon a calculation in which the replacement cost of a particular component is amortized over the life of that component. Thus, when it is time for the replacement to occur, the CIRA should have theoretically accumulated adequate funds for that replacement. An example would be the necessity to replace the roadways within the community. If the replacement cost of the roadways is $7,000, $1,750 has already been accumulated, and the estimated time period before replacement is required is 10 years, the CIRA would need to accumulate $525 per year so that the $7,000 is available when needed ($7,000 minus $1,750 = $5,250 divided by 10 years = $525 per year). This scenario can be seen in the table in Example 1.

.38 The financial analysis is based upon the creation of a cash flow projection of the amount of funds to be set aside each year, for all components which make up the physical analysis. Based upon this cash flow, the annual contributions are sought to be minimized while simultaneously allowing for sufficient funds to exist over the cash flow period such that a deficit does not occur. The resulting cash flow becomes the funding plan for the CIRA. There are four types of funding plans, three of which can be seen in the graph in Example 2. It is recommended that the CIRA review its funding plan on a yearly basis to determine if it still reflects its current financial situation.

.39 The four types of funding plans are described below:

- *Full/proportional funding*. In this funding plan each of the individual components is funded fully. This is generally considered to be the most conservative plan as excess funds may accumulate. It does not account for the cash flow projections. An example of full/proportional funding can be seen as the top line in Example 2. Note that over the cash flow period a significant amount of money continuously exists in the fund.

- *Baseline funding*. In this funding plan, the annual contributions are lowered so that at some point in the cash flow projection the replacement fund balance is equal to $0. This is the least conservative method because a budget deficit can occur if replacement costs are underestimated or if a component requires replacement before its estimated useful life is realized. An example of baseline funding can be seen as the bottom line in Example 2.

- *Threshold funding*. In this funding plan, the annual contributions are adjusted so that the minimum point in the cash flow is something other than full/proportional funding or baseline funding. Typically this point is somewhere between the two and will provide adequate funding over the cash flow period without fear of either a deficit or overfunding. Annual contributions are reduced so the cash flow projection is lowered but is never $0. The level of the threshold varies with each CIRA and is typically based on the cost of the most expensive component to be replaced and the size of the CIRA's overall budget. An example of threshold funding can be seen as the middle line in Example 2.

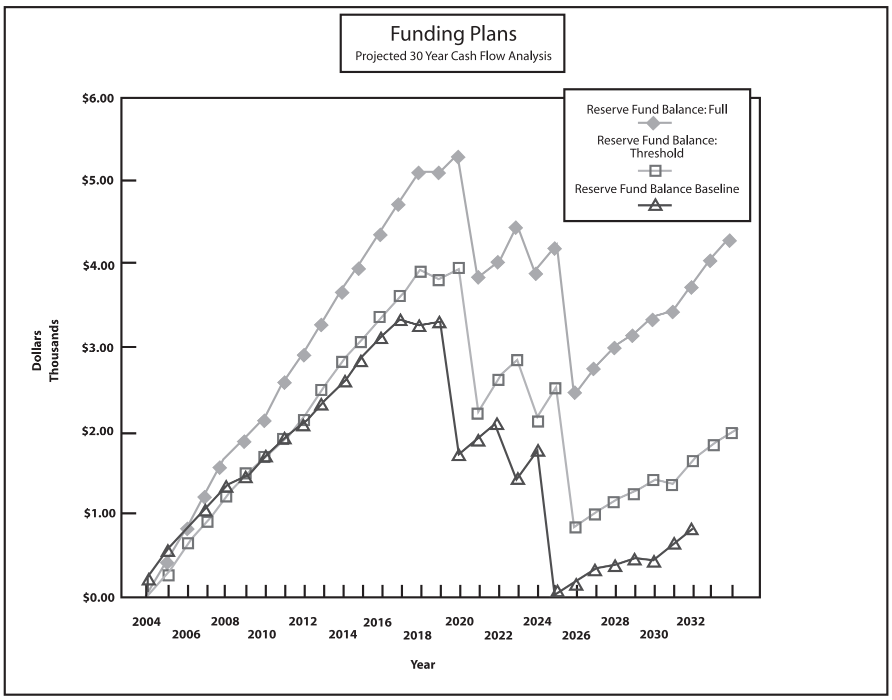
- *Statutory funding*. Although not discussed in detail, in some states governmental regulations exist which require certain levels of reserves to be accumulated. The original governing documents should comply with these regulations.

.40 The risks associated with the selection of the CIRA's funding plan are twofold. The reserves can either be overfunded, resulting in an excess amount of inactive assets, or underfunded, resulting in a deficit at the time of component replacement. In order to minimize these risks, the CIRA should review its reserve study each year regarding the type of funding plan and the respective risks. It should balance the potential for a deficit against the cost of regular updates of the study which will incorporate current replacement costs and estimated remaining lives. The auditor may consider using the management representation letter as a way for the CIRA and its management to acknowledge the funding plan that is being utilized. In the case of baseline funding, yearly updates are prudent as expenditures may exceed estimates or may be required earlier in the respective component's useful life than expected, which can trigger a cash flow hurdle for the CIRA. In contrast, in the case of full/proportional funding, three to four years between updates may be acceptable. In terms of overfunding reserves, it should be recognized that while full/proportional funding is the most conservative method, it may provide for more than adequate funding and the imprudent use of CIRA funds. CIRAs that assess owners annually for portions of future major repairs and replacements should report those assessed amounts separately from amounts assessed for normal operations. If a CIRA uses fund reporting, which is more informative to users, as stated in paragraph 4.02 of the CIRA Guide, amounts assessed for future major repairs and replacements should be reported in the major repair and replacement fund separately from transactions in the operating fund. Note this is the assessed/budgeted amount, not the actual monies transferred. Transfers between funds that are not part of the current-period operating revenues should be presented only in a statement of changes in fund balances or in a statement of changes in members' equity, if a nonfund reporting approach is used. This would include when a board chooses not to fund in accordance with its budget, as well as other decisions related to monies between funds. Readers should refer to paragraphs 4.27 and 4.33 of the CIRA Guide for recommended disclosures.

Example 1: The Physical Analysis

Common Area Component	Quantity	Unit Cost	Reserve Requirement (Present Dollars)	Beginning Balance	Estimated Useful Life	Estimated Remaining Useful Life	Annual Reserve Funding Required
Pavement overlay	1000 SY	$7.00	$7,000	$1,750	20	10	$525
Concrete sidewalks	1500 SF	$6.00	$9,000	$2,250	30	15	$450
Roofs	200 SQ	$100	$20,000	$5,000	22	11	$1,364
Total			**$36,000**	**$9,000**			**$2,339**

Example 2: The Financial Analysis



Concerns at Inception of the CIRA

.41 CIRAs may be required by state statutes, mortgage documents, or their governing documents to set aside funds on a systematic basis for future major repairs and replacements. The auditor should review the CIRA's governing documents and relevant state statutes to determine whether such requirements exist. The auditor should also review the CIRA's policy for accumulating the required funds.

.42 Generally, when a developer/builder plans a CIRA, whether it is new construction or a conversion, governing documents are prepared for the CIRA—including the type of CIRA and descriptions of the community, and the initial operating budget, which may also contain the initial reserve study. There may also be an engineer's report and a detailed public offering statement (POS). These governing documents also include a description of the common elements which will be the responsibility of the CIRA to maintain and replace as opposed to those components which are the responsibility of the individual unit owners. At this stage, a number of concerns must be taken into account. When the document is prepared for new construction, in many cases the construction has not yet been completed or even commenced. As is typical with most construction, field changes may occur such that the as-built community does not match the design drawings. Since the reserve study was based on the design drawings, it too will no longer match the as-built community. This may result in underfunding of the project. To minimize this concern, it is recommended that the study included within the governing documents be updated to reflect the as-built community either by the new homeowners or by the developer/builder, depending upon the time for the build-out of the entire community.

.43 Another concern at this time is that in some instances the governing documents are being prepared at the same time as the reserve study. Concerns are triggered if inconsistencies arise. To minimize these concerns, it is necessary that the coordinator of the reserve study be in contact with the creator of the documents so the reserve study reflects the descriptions of common elements consistently.

.44 Once the components are selected, a determination of the quantities of each of the components is taken from the design documents, which typically include the architectural drawings for the buildings and the engineering drawings for the site. Based upon a review of these documents and an understanding of the materials of construction, the estimated lives are determined. In the case of new construction, since the community has not yet been constructed, the estimated remaining life and the estimated full useful life are the same. Also, execution of the project may differ from already established plans, thereby creating risk through inconsistencies. To minimize this concern, and as discussed above, it is recommended again that either the developer or the CIRA have the original reserve study included within the governing documents updated to reflect both the quantities of the actual as-built construction as well as the materials. The replacement costs should also be updated. If this type of update is not performed and there are discrepancies between the design documents and the as-built construction, the adequate funding may not exist and will become more and more critical since this potential underfunding is cumulative as time progresses. This type of concern in some instances may affect the smooth transfer of control from the developer/builder to the new unit owners as they take control of the CIRA during the period known as transition.

.45 In the situation in which the newly formed CIRA is a conversion from another use and not a new construction, another concern arises. This concern is based upon the fact that the components which constitute the common elements are not new and have reduced useful lives. While with both new construction and conversions the beginning balance in the reserve account is $0, in the case of the conversion and the reduced useful lives, the replacement costs must be amortized over this reduced life which subsequently will result in higher annual contributions. In many instances the reduced useful lives are not accounted for in the reserve study, resulting in unanticipated replacements and inadequate funds at the time of these replacements. To minimize this concern, it is recommended that particular attention be paid to the condition of all of the components and that the reduced useful lives are reflected in the study.

Aging Communities

.46 For an aging community, the result of an underfunding of the replacement fund portion of the budget becomes especially critical if the CIRA has not been performing regular updates of the reserve study from the initial governing documents. In many instances the CIRA has also neglected the necessary ongoing maintenance of the common elements, which becomes more obvious as the CIRA ages. This lack of maintenance can have a significant impact on the estimated useful lives. If the study has not been updated, this can compound the problem since the reduction in useful lives is not recognized until the replacements are required. In order to minimize the risk associated with an aging community, it is recommended that as CIRAs age, the studies be updated on a more frequent basis and in some cases yearly. These updates should include a field inspection to reflect the actual condition of the components. At the same time a thorough review should be made of the funding plan selected to determine if it is still appropriate for the CIRA.

.47 A complete description of the requirements for the preparation of a reserve study can be found in the publication titled "National Reserve Study Standards of the Community Associations Institute" which is published by the Community Associations Institute (CAIOnline.org).

.48 The auditor should apply certain limited procedures to the required supplementary information referred to in paragraph 4.33 of the CIRA Guide. Auditors should also refer to and comply with the requirements of AU section 558.07, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1). Specifically, as stated in paragraph 7.59 of the CIRA Guide, procedures that the auditor should consider include the following:

- Determine by physical inspection of the property or review of the CIRA's legal or governing documents whether the disclosure includes all major property components.
- Compare estimates of the costs of major repairs and replacements with current period expenditures and with the annual budget, if any.
- Inquire of management about whether the CIRA's property maintenance records, which reflect each component's replacement history, if any, were considered in determining the information to be disclosed.
- Inquire of management about whether the age and condition of the components were considered in determining the information and amounts to be disclosed.
- Check the mathematical accuracy of amounts disclosed.
- Inquire of management about whether the study was prepared by the board or a professional engineer (reserve specialist [RS]) and whether the methods and bases for estimating the amounts disclosed are documented. Consider whether those methods and bases are reasonable. If the study was conducted by the board, consider whether the source of the information used to estimate the useful lives and current or future repair and replacement costs, for example, bids from contractors or technical manuals on useful lives of various components, are reasonable. Also, the auditor may consider determining whether or not the preparer has their RS designation as a way of confirming that the study was completed in conformance with the National Reserve Study Standards which are referenced in Chapter 3 of the CIRA Guide.
- Inquire if interest is a factor in the reserve study. If it is the auditor should ensure that the interest is retained in the remaining replacement fund.
- Inquire if inflation is a factor in the reserve study. If it is *not* the auditor should recommend an annual review of the replacement costs.
- Inquire of management as to the age of the study.

Audit and Attestation Issues and Developments

Specific Audit Considerations

.49 As the residential real estate market continues to cool, auditors of CIRAs must be conscious of the various financial impacts a cooldown may have on the CIRA's financial situation.

.50 For those CIRAs still under declarant control, the auditor should determine whether the current annual budget is sufficient to meet all of the CIRA's operating needs and still provide for the future replacement of its common elements. The annual budget should be reviewed and compared to the services that the CIRA is currently receiving as stated in paragraph 5.04 of the CIRA Guide regarding the budget process. A declarant of a CIRA may try to continue to operate under a budget which is not adequate so that it will not have to raise the maintenance assessments, which could result in a reduction in sales of units.

.51 The notes to a CIRA's financial statements should include the following disclosures:

- The number of units (shares for cooperative housing corporations and weeks for time-share associations) owned by the developer as stated in paragraph 4.22 of the CIRA Guide.

- The developer or other parties may provide the CIRA with some of its revenues. If 10 percent or more of a CIRA's revenues are derived from any one source, that fact and the amount of revenue from each source should be disclosed as stated in paragraph 4.25 of the CIRA Guide.
- Whether the CIRA's board of directors is controlled by the developer (declarant) as stated in paragraph 7.20 of the CIRA Guide.

.52 The auditor engaged by a CIRA should consider the effects, if any, of the declarant's influence on the CIRA's financial condition as discussed in paragraph 1.26 of the CIRA Guide.

.53 The auditor should make sure that the boards of all CIRAs carefully monitor their cash disbursements by reviewing all invoices to ensure that all expenses incurred by the CIRAs are for valid expenses of the CIRA and not those of the declarant or any one else that may be seeking unapproved personal payments.

.54 The auditor of a CIRA which utilizes a CIRA board that is managed by an outside management company should consider having the board approve all invoices prior to their being processed for payment, which may be more reasonable for unusual, nonrecurring types of expenses. If a management company manages similar-named entities or multiple communities at a similar location, the CIRA board should have a policy instituted to carefully review the invoices noting the date of the service, the service provided, the location of the service, and the quantity, if it is on a per unit or some other type of quantified basis. The auditor should consider the instituted policy and the extent to which the board of directors monitors and controls the managing agents' activities related to the CIRA to insure proper authorization and payment procedures. Since the managing agent provides the CIRA with bookkeeping and accounting services, the auditor should consider AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1), which provides guidance on the factors an independent auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain organizations. When the CIRA uses a managing agent during less than favorable economic times the auditor may also consider the following as discussed in paragraph 7.17 of the CIRA Guide:

- The manner in which the managing agent is compensated, such as the use of fixed fees or otherwise.
- Whether the CIRA maintains separate records for transactions initiated by the managing agent, if any.
- The policy or board review of managing agent reports.
- The control program used by the agent with respect to its client, the association.

.55 The auditor of a CIRA should recommend that the CIRA board review on a monthly basis the budget versus actual financial statements and balance sheet. Since the operations of most CIRAs are based on budgets, the auditor may consider a CIRA's budgeting procedures during the audit. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits. The auditor should consider comparing actual results with budgeted amounts and investigating significant variances as an analytical procedure in the audit of a CIRA. It is preferred that these statements be prepared on an accrual basis following generally accepted accounting principles (GAAP), however, if the board agrees, the cash method, which is not in conformity with GAAP, can be used. Readers should refer to SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623), as amended, for guidance on auditors' reports on financial statements prepared on a comprehensive basis of accounting other than GAAP. Note that it is not unusual for the monthly financial statements to be prepared on the cash or modified cash basis, and converted to accrual basis at the end of the year. The budget should be seasonalized so the proper expenses appear in the proper period and all major variances should be investigated. The maintenance assessments (more commonly referred to as just "assessment") delinquency report should be monitored carefully as there may be increasing delinquencies if the economy weakens.

Initial Operating Period

.56 During the startup of operations of a condominium or homeowners association, the developer has a majority of the members of the board of directors, and therefore, the CIRA is considered to be under developer control. An auditor engaged by a CIRA should consider the effects, if any, of the declarant's influence on the CIRA's financial condition during the initial operating period in which the developer (declarant) generally controls the CIRA's management, policy setting, and finances. (The initial operating period is discussed further in paragraph 7.20 of the CIRA Guide.) Since the interests of the developer and the homeowners may be divergent, this period of the CIRA's life deserves special attention.

.57 In Florida, for example, the condominium statutes require that after turnover of control an audit must be conducted covering the period from the association's inception through the date of turnover. If none of the fiscal years during the developer-controlled period have been audited, the full cost of such an audit must be borne by the developer. (Readers should refer to state statutes on developer transition with respect to homeowners associations that are not condominiums.) The auditor should keep in mind that, although the developer may pay for the audit, the CIRA is nevertheless the client. Therefore, since the developer's interests may be adverse to those of the CIRA, the auditor should take into consideration that the developer is in control in addressing the risk factors. For example, auditors should consider focusing in on the following areas of an initial operating period:

1. Developer assessments on unsold units.
2. Expenses, particularly in connection with potential payment of developer's obligations.
3. If the developer is guaranteeing that the common expenses will not exceed amounts assessed to unit owners other than the developer, care should be exercised as to the following:
   a. The determination of the proper expiration date of the deficit guarantee period.
   b. The calculation of assessments to unit owners other than the developer.
   c. The proper cutoff of accounts payable and accrued expenses at the end of the deficit guarantee period.
   d. That the rate of assessment is unchanged during the deficit guarantee period.
4. Whether there is a proper utilization, in accordance with the state statutes and condominium documents, of capital contributions collected from initial unit owners.
5. Whether funding for capital replacement and deferred maintenance ("reserves") have been properly funded, or, if funding was waived, that the waiver complied with the state statutes or the CIRA's governing documents.
6. Related party transactions, for example a master association under developer control, or management and maintenance companies owned by the developer.

.58 When making the selection of auditors to conduct the "turnover" audit, oftentimes the developer selects the same accounting firm that services the developer. Although there may not be any independence rulings prohibiting that accounting firm from accepting the CIRA as a client, the accounting firm should evaluate whether there will be any questions of perceived lack of independence. A member of the AICPA who is engaged to audit a CIRA in accordance with generally accepted auditing standards (GAAS) must be independent. In making a judgment about whether he or she is independent, the member should be guided by Rule 101, *Independence*, of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101), its interpretations, and the Ethics Rulings under it.[1] In assessing their independence, auditors

[1] Revised Ethics Ruling No. 31 under Rule 101, "Performance of Services for Common Interest Realty Associations (CIRAs), Including Cooperatives, Condominium Associations, Planned Unit Developments, Homeowners Associations, and Timeshare Developments" (AICPA, *Professional Standards*, vol. 2, ET sec. 191.061–.062), states that an auditor's independence would not be considered to be impaired if certain conditions are met with respect to an engagement to perform services for a CIRA if the member or member's firm is associated with, or is a member of, the CIRA as the result of ownership or lease of real estate.

should also consider the guidance set forth under Ethics Ruling No. 31 under Rule 101 (AICPA, *Professional Standards*, vol. 2, ET sec. 191.061–.062). Also, auditors performing audits of CIRAs should be familiar with condominium, homeowners association, and cooperative housing corporation's statutes in the states and/or jurisdictions in which the CIRA is located.

.59 For instance, under Florida statutes, the turnover audit must include the following procedure: "The auditor performing the audit shall examine to the extent necessary supporting documents and records, including the cash disbursements and related paid invoices to determine if expenditures were for CIRA purposes and the billings, cash receipts, and related records to determine that the developer was charged and paid the proper amounts of assessments."

.60 After the turnover audit is released, boards of directors, now controlled by unit owners other than the developer, frequently engage another accounting firm to evaluate the turnover audit. Procedures for this evaluation can be agreed upon with the board, and an engagement letter entered into in accordance with agreed upon procedures set forth in the AICPA attestation standards, AT section 201, *Agreed-Upon Procedures Engagements* (AICPA, *Professional Standards*, vol. 1). The accountant applying agreed-upon procedures should obtain evidential matter from applying agreed-upon procedures to provide a reasonable basis for the finding or findings expressed in his or her report (AICPA, *Professional Standards*, vol. 1, AT sec. 201.16). Examples of some procedures that the accountant may consider are as follows:

1. Ascertain whether the charges to the developer (assessments and/or deficit contributions) are in compliance with the CIRA's documents and the state statutes.
2. Obtain or prepare a summary of the components comprising the amount due from (to) the developer.
3. Ascertain whether the predecessor auditor performed procedures to determine if any CIRA disbursements were for developer-related obligations. If not, perform such procedures.
4. Determine if capital contributions were received on all initial unit purchases and whether such funds were utilized for their intended purposes.
5. Determine if amounts for future major repairs and replacements ("reserves") were properly funded or waived.

.61 Other considerations for accountants during the initial operating period and for the periods thereafter include:

1. Numbers of units that are in control of the developer or other groups. Readers should refer to paragraph 4.22 of the CIRA Guide for related disclosures.
2. Instances where maintenance fees are kept artificially low in order to induce sales. In such cases, how will the CIRA make up for prior deficits, while at the same time, be able to fund the CIRA's future operations at a significantly higher assessment level?
3. Developers often have their associations enter into lease arrangements for office and maintenance equipment. Such leases could be capital in nature. In those cases, the accountant should raise the question as to whether those assets should be expensed as they generally are under prevalent industry practice, as noted in paragraphs 2.08 through 2.10 of the CIRA Guide.

.62 During a period in which many CIRAs have suffered significant casualty losses from natural disasters, the boards need to address the responsibilities of the developer for funding shortfalls in insurance proceeds. The auditor should consider whether a CIRA's insurance coverage complies with statutory or other documentary requirements.

Special Audit Issue Related to Mixed-Use Projects

.63 Expense allocations between the various members and unit types of a CIRA that are in a mixed-use project must be carefully considered during the audit process. The auditor should consider the appropriate auditing procedures to determine if the expenses are being properly allocated on a reasonable and consistent basis. The expenses should be allocated in compliance with the CIRA's governing documents and the budget included in the offering statement. Furthermore the expense allocations may affect the surplus/deficit for a particular member and unit type and therefore future maintenance assessments for the different members and unit types. Audit procedures applied to assessment revenues should include testing whether amounts assessed to individual owners have been computed in accordance with the CIRA's documents.

Interest Rate Risk for CIRAs That Borrowed Money a Few Years Ago

.64 Banks have found a lending niche in the CIRA market. In the past few years, there has been an increase in associations taking out large dollar amount loans for major repair and replacement projects. The terms of those loans vary; however, quite often, the interest rates are adjustable. Some of these loans were originally taken out several years ago when interest rates were much lower than they are currently. For these adjustable rate loans, payments periodically adjust to market rates. This may occur as often as quarterly or annually, while other loans adjust after three to five years. If the association has a loan that is several years old and is just now adjusting, the association will be making a much larger loan payment, and the impact may be as much as 25 percent to 30 percent higher.

.65 The loans are generally secured by future assessments. If the association has included the loan payment as part of its annual budget and increased the members' assessments, these loan increases will have to be part of the annual budgeting process. The association needs to look into the future budgeting period to determine when the adjustment will take place and estimate the impact on the budget.

.66 If the loan payment is secured by special assessments from the members, those special assessment amounts will need to be adjusted according to the rate increase. Quite often, the members are given the option of paying the special assessment in full at the time of the loan, at the time of resale of their unit, or at any chosen time. Those payments that were received for payment of their portion of the special assessment should have been applied to the principal of the loan, leaving a loan balance that approximates the remaining receivable balances. Thus, only those homeowners who chose to finance their portion of the special assessment will be affected by the interest rate increase. The overall affect of this may be that these owners are also affected by rate increases in their own home mortgages and may be more at risk for default. If the association is unable to collect that portion of the special assessment, due to bankruptcy or foreclosure of the unit, the amount of the remaining loan payment will have to be paid from the general budget. Also, if the association was neglectful and did not pay down the loan as special assessment payoffs were received, the association will be affected by the increased loan payment for the shortfall between what is being received by the remaining owners and the actual payment amount.

Bad Debt Allowances

.67 Housing prices showed annualized double-digit gains for the last three years. Due to these increases in real estate prices, most accountants have seen minimal bad debt write-offs as there has been "built in" equity in a unit, even just a few months after the purchase of a unit, due to the economy. Thus, if the association has been diligent in its collection measures and has filed liens and foreclosures, they have been able to collect the past due assessments, fees, and charges. Most housing markets in many areas of the country are now seeing a leveling off, or at the most a slight increase or slight decrease, in housing prices. Predictions are for this flattening off to continue through 2006 and 2007.

.68 Added to this issue is the fact that there has been an increase in adjustable rate and nonconforming mortgages used by owners to purchase their homes. In the climate of increased interest rates, as those loan payments are adjusted to the current rates, some homeowners will find payment of the monthly mortgage payment difficult. Roughly $137.5 billion in residential mortgages will face payment resets in 2006 and another $524 billion will reset in the next four years (according to an analysis by the Union Bank of Switzerland, UBS AG). These loans are found in all income brackets.

.69 With the softening of the housing market in some areas, and the increased home mortgage payments, it is probable that write-off of assessments to bad debt will increase in the future. It is the auditor's job to determine whether management's estimate of the allowance for bad debts is reasonable. Auditors should follow AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), which provides guidance on obtaining and evaluating sufficient, competent evidential matter in support of accounting estimates included in the financial statements. The bad debts should be presented in the statement of revenues and expenses which presents information about all assessments, other revenues, and expenses.

.70 Management must make careful judgments about collectibility and estimates of allowances for bad debts. In the current economic climate, you cannot use prior history as a model for analysis. Some management companies and boards of directors do not understand the requirement for the allowance and may not want "bad debts" on their financial statements. The auditor needs to educate them in the importance of not overstating assets or revenues by including receivables or assessment income that is uncollectible.

Ensuring Management Has Expertise to Accept Adjusting Journal Entries

.71 The accountant's definition of "management" includes those within an organization who have some type of responsibility with regards to the proper presentation of the financial statements. The auditor would generally include in that definition paid management (such as a portfolio manager or on-site manager), as well as the board of directors.

.72 For non-accountants within the CIRA industry, the definition of "management" is generally more strictly defined to mean paid management. The auditor needs to ensure that the board of directors understands that they are included in this definition and, in fact, are the primary members of the "management" team.

.73 AU section 333.03, *Management Representations* (AICPA, *Professional Standards*, vol. 1), states that during an audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries or through the financial statements. Such representations from management are part of the evidential matter the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit. Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations.

.74 Written representations from management should be obtained for all financial statements and periods covered by the auditor's report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.

.75 The representation letter ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry. AU section 333.17 (Appendix B, "Additional Illustrative Representations") provides examples of additional representations that may be appropriate. Also see Appendix B of the CIRA Guide for illustrative representation letters. Generally the representation letter is signed by representatives from paid management and the board of directors.

.76 Practitioners must assure themselves that management is taking responsibility for the adjusting journal entries presented at the time of the year end engagement. Auditors may consider as a good practice including the following representation in the letter signed by management, as illustrated in the representation letter found in Appendix F, "Review of Financial Statements—Illustrative Representation Letter," of AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100.79).

We are in agreement with the adjusting journal entries you have recommended, and they have been posted to the company's accounts. (if applicable)

.77 In many instances, the CIRA's accounting department may not be sufficiently sophisticated to understand accrual adjustments. Also, the CIRA may be run by a volunteer board of directors with little or no financial expertise. Even professional managers may not have a proficiency in accounting matters.

.78 While the client does not have to be a financial expert, the practitioner must be able to assure himself or herself that the client has some rudimentary understanding of the adjustments and their impact on the financial statements. Identifying the person(s) and educating that (those) person(s) during the year end audit or review should be part of the accountant's planning process.

.79 In instances in which a management company prepares the CIRA's financial statements, the auditor should consider having a representative of the management company (for example, controller, association accountant, or its equivalent) sign the representation letter. Frequently, the management company will limit its representations to certain items. The auditor should assess the adequacy of these representations (which may have been agreed upon with the management company in advance).

.80 In obtaining representations in connection with a turnover audit, the auditor should consider the representations of each of the boards of directors, both prior to and after the turnover. Of course, the periods of time to which the representations apply should be indicated on the letter.

The Importance of Performing Monthly Bank Reconciliations and Fraud

.81 Discovering one type of fraudulent scheme before more monies are stolen can be halted by management performing monthly bank reconciliations on a timely basis. A fairly simple accounting function can provide good controls if done on a consistent basis. One such fraud committed against an association would be where the perpetrators forged checks by gaining unlawful access to a "real" check from the association and then duplicating that information onto blank check stock.

.82 The simple lesson is that associations need to be diligent in performing monthly bank reconciliations in a timely manner. This fraud was not found by the bank, but by the manager at the time of the reconciliation. Many associations do not reconcile their bank accounts for months resulting in greater difficulty tracing and more monies stolen.

.83 Other examples of recent frauds committed against CIRAs:

- Altering association records relating to costs and presenting false work reports to the board.
- At one Upper East Side New York cooperative, $4.7 million was repaid, but the looting of its funds by a trusted treasurer offers lessons for all co-ops and their volunteer boards.
- Manager, in conjunction with husband, who was a printer by trade, produces almost perfect bank statements used to loot the reserves. "Almost" perfect because the husband forgot to include the watermark which can be added with most software programs.
- Manager is allowed discretion with expenses under $1,000. Manager has associations with busy financials. The manager has work done on personal residence, splitting invoices on that residence (with the unwitting aid of vendors) into increments of less than $1,000.
- Manager in a cold climate has utility bills placed on a payment plan, but bills the association with the real-time usage and pockets the difference.

- Manager in a resort environment has work performed on personal residence by association staff during slow time.
- Maintenance staff person, with part-time duty of showing vacant units for owners and for association-owned units, rents the units (short term) and keeps the rents.

.84 Most such losses never get reported to anyone—the police, the owners, the fidelity insurers, and so on—because the board does not want the adverse publicity.

.85 Readers should be aware that for any of the above examples the CIRA has to demonstrate the perpetrator's "manifest intent" to cause harm in order to obtain recovery from the fidelity insurer.

Practice Implications Related to the Revisions Made by SAS No. 112

.86 In May 2006, the AICPA Auditing Standards Board (ASB) issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006.

How the Revisions Will Affect Practice

.87 As you gain a better understanding of what needs to be communicated to management and those charged with governance, you may find that there will be more control deficiencies that you:

- Identify as significant deficiencies and material weaknesses, and
- Communicate to management and those charged with governance.

You may emphasize and therefore spend more time evaluating identified control deficiencies than you did in the past.

.88 ***Discussions With Management and Others***. The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. You may have to explain to your clients that you, the auditor, *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.89 You may wish to be called upon to hold discussions with management and other users of your written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the definitions have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of *material weaknesses*. Another reason is that you have to include significant deficiencies and material weaknesses identified and communicated in previous years in your written communication as long as these deficiencies have not been remediated. You may need to explain to management and other users that you are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.90 You may also need to hold discussions with management and other users who ask how you were able to express a clean opinion on the financial statements when material weaknesses in internal control were present. You may wish to explain that your audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control. You can express a clean opinion on the financial statements even though material weaknesses in internal control are present, because you performed sufficient procedures and obtained appropriate audit evidence to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented or detected by the client.

Issues for Audits of Smaller Entities

.91 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.92 Another issue that may cause concern is the extent to which you (as the auditor) may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if your client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing or detecting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[2] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a control weakness by assisting in drafting the financial statements does not change the control weakness.

.93 ***Possible Opportunities.*** The new requirements of SAS No. 112 introduce possible opportunities for you. You can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. You can also teach your clients how to develop a risk assessment approach to designing internal control.

> **Help Desk**—See the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies—A Companion to SAS No. 112* (product no. 022536kk) for a thorough discussion of SAS No. 112.

Audit Documentation

.94 In December 2005, the AICPA ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). SAS No. 103 supersedes SAS No. 96, *Audit Documentation*, and amends SAS No. 1, *Codification of Auditing Standards and Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 530, "Dating of the Independent Auditor's Report"), as amended. SAS No. 103 establishes standards and provides guidance to auditors of nonissuers on audit documentation. The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed); the audit evidence obtained and its source; and the conclusions reached. Audit documentation:

1. Provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards (GAAS).
2. Provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

---

[2] See Ethics Ruling 101-3, "Performance of Nonattest Services," of AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

.95 Audit documentation is an essential element of audit quality. Although documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate documentation contributes to the quality of an audit.

.96 Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached. Audit documentation, also known as working papers or workpapers, may be recorded on paper or on electronic or other media. When transferring or copying paper documentation to another media, the auditor should apply procedures to generate a copy that is faithful in form and content to the original paper document.[3]

.97 Audit documentation includes, for example, audit programs,[4] analyses, issues memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail) concerning significant findings or issues, and schedules of the work the auditor performed. Abstracts or copies of the organization's records (for example, significant and specific contracts and agreements) should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. The audit documentation for a specific engagement is assembled in an audit file.[5]

.98 The auditor need not retain in audit documentation superseded drafts of working papers or financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

In addition to the objectives set out in paragraph 3 of SAS No. 103, audit documentation serves a number of other purposes, including:

- Assisting the audit team to plan and perform the audit;
- Assisting auditors who are new to an engagement by being able to review the prior year's documentation, allowing them to understand the work performed as an aid in planning and performing the current engagement;
- Assisting members of the audit team responsible for supervision to direct and supervise the audit work, and to review the quality of work performed;
- Demonstrating the accountability of the audit team for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached;
- Retaining a record of matters of continuing significance to future audits of the same organization;
- Assisting quality control reviewers (for example, internal inspectors) who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions;
- Enabling an experienced auditor to conduct inspections or peer reviews in accordance with applicable legal, regulatory, or other requirements; and
- Assisting a successor auditor who reviews a predecessor auditor's audit documentation.

.99 For the purposes of SAS No. 103, *experienced auditor* means an individual (whether internal or external to the firm) who possesses the competencies and skills that would have enabled him or her to perform the

[3] There may be legal, regulatory, or other reasons to retain the original paper document.

[4] See Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A.05), as amended, for guidance regarding preparation of audit programs.

[5] The audit documentation contained within the audit file may consist of cross-references to documentation for audit engagements with related entities.

audit. These competencies and skills include an understanding of (1) audit processes, (2) the SASs and applicable legal and regulatory requirements, (3) the business environment in which the entity operates, and (4) auditing and financial reporting issues relevant to the organization's industry.

.100 SAS No. 103 provides guidance on the form, content, and extent of audit documentation. It also discusses how to document significant findings or issues including documenting audit evidence that is identified as being contradictory or inconsistent with the final conclusions, and how the auditor addressed the contradiction or inconsistency. This SAS requires the identification of the preparer and reviewer of the audit work. In addition, it provides guidance on audit documentation of the specific items tested, documentation if there is a departure from a SAS, revisions to audit documentation made after the date of the auditor's report, and the ownership and confidentiality of audit documentation. See SAS No. 103 for specific guidance.

.101 Another key provision of this standard is the amendment of paragraphs .01 and .05 of AU section 530. AU section 530.01 now requires that "the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion" and the footnote to this paragraph describes sufficient appropriate audit evidence as "evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them." Application of the rules may require revising the process used by your firm at the end of fieldwork to include a field review of audit workpapers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.102 Furthermore, the auditor should complete the assembly of the final audit file on a timely basis, but within 60 days following the report release date (documentation completion date). Statutes, regulations, or the audit firm's quality control policies may specify a shorter period of time in which this assembly process should be completed.

Retention of Working Papers

.103 SAS No. 103 says that the auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than five years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period.

The SAS is effective for audits of financial statements for periods ending on or after December 15, 2006.

Accounting Issues and Developments

CIRA Note Disclosures

.104 Many CIRAs rely on the accountant for guidance in the preparation of the financial statements. The financial statements should include any disclosures that would be appropriate to assist the reader to better understand them. The homeowners, who are the ultimate users of the financial statements, quite often have their biggest investments in their homes within the association. However, in most instances, these "investors" do not know how to read the financial statements. Note disclosures can assist in overcoming this hurdle.

Mold Remediation Disclosure

.105 When mold is found and remediated within an association, the total financial impact may be unknown for various reasons. First, there may be little or no insurance coverage for the event. Next, the association may not have a clear policy as to the association's responsibility versus the homeowner. Last, it is a hidden problem, so the extent is not known until exposed or a period of time passes. Thus, the CPA should consider including some type of contingency note to the financial statements explaining that the condition exists, remediation is (or is not) ongoing, and that the total financial impact cannot be determined at this time.

.106 Auditors should review the minutes from the board of directors meetings for such matters as approvals for mold remediation expenditures. Also, review of large unusual repair expenses or replacement fund expenses can uncover mold remediation. Furthermore, the auditor should consider whether the CIRA's insurance coverage complies with statutory or other documentary requirements. Although Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies,* does not require the disclosure of noninsured or underinsured risks, it states specifically that it does not discourage such disclosures.

Related Party Transactions Disclosure

.107 The most common related party transactions in CIRAs involve the developer or management companies. Developer transactions are easy to find and research, as it is general knowledge when a developer is still involved with the association. However, when a management company performs duties outside the basic management contract it may not be readily known. Care needs to be taken by the accountant to inquire as to whether the management company or board of directors (and their immediate families) provides goods and services to the association. Examples include the following:

- A board member is the broker at the brokerage firm in charge of the association's investments.
- A board member is the association's insurance agent.
- The management company has a separate landscape company (sometimes under a different name) that services the association.

.108 Such services may require disclosure in conformity with FASB Statement No. 57, *Related Party Disclosures.* If the related party transactions mentioned above exist, there is a requirement to disclose such transactions to the membership. The accountant may also want to inquire if the conflict of interest was disclosed to the membership at the time the contract was entered into and if proper conflict-of-interest procedures were followed, such as the board member abstaining from voting on the contract. Additionally, when a related party is involved the CIRA should exercise due diligence by getting other bids or reviewing the contract on an annual basis.

.109 CIRAs often enter into agreements or contracts with agents or others not directly managed by the CIRA to provide services to unit owners, such as operation of recreational facilities or garages. The auditor may find it necessary to review provisions of such contracts or agreements and consider whether the board was authorized to enter into the contracts and transactions pursuant to the contracts and whether related account balances are appropriately recorded and disclosed in the financial statements. The auditor should also consider whether commitments for long-term contracts have been disclosed when appropriate.

.110 The auditor should refer to the guidance in AU section 334, *Related Parties* (AICPA, *Professional Standards*, vol. 1), to determine the existence of related-party relationships and transactions with such parties as some individual board members, officers, or developers which may provide CIRAs with insurance, maintenance, or management services. For example, the auditor of a CIRA may consider recommending that the CIRA board have each member sign a document stating that neither they, their immediate family, nor any other lineal ancestor, has an ownership interest in any entity which provides a service to the CIRA, other than those vendors which are disclosed on the signed form. This procedure would help document all related parties and inform all board members of such related parties. Additional procedures such as having the board member abstain from voting on a contract with a related party or using a closed bid process may also be considered.

.111 Furthermore, AU section 334 states that, in auditing related-party transactions that are identified during the course of the audit, the independent accountant should be aware that the substance of a particular transaction could be significantly different from its form and that financial statements should recognize the substance of particular transactions rather than merely their legal form. Except for routine transactions, it will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related, or, assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a related-party transaction was consummated on terms equivalent to those that prevail in arm's-length transactions.

Special Assessment Disclosures

.112 Special assessments are enacted for a variety of reasons with a variety of repayment plans. The footnotes should adequately explain the reason for the special assessment, the timing of the assessment and the repayment terms. Also, the summary of significant accounting policies should include the special assessments revenue recognition policy. At the end of the year, the remaining special assessments should be summarized, including the amount of deferred revenue.

.113 Below are a few examples of special assessment disclosures:

> The Association established three special assessments in a prior year. Beginning February 1, 2001, there was a special assessment of $4,892.24 per unit which could be paid at the rate of $72.86 per month. The monthly payment amount in 2005 was $62.95. The stated purpose for the assessment was reserves and settlement. Beginning October 1, 2001, there was a special assessment of $3,428.57 per unit which could be paid at the rate of $54.29 per month. The monthly payment amount in 2005 was $46.87. The stated purpose for the assessment was for streets. Beginning February 1, 2002, there was a special assessment of $2,253.86 per unit which could be paid at the rate of $16.85 per month. The monthly payment amount in 2005 was $12.72. The stated purpose for the assessment was for fireplaces. Homeowners were given the option of paying any or all of the assessments in full or paying on a monthly basis over a period of eight years. Monthly payments were to be adjusted to coincide with the prevailing interest rate. This did not occur in 2005. The payments were still at the 2004 interest rate.
>
> In a prior year, the membership approved a special assessment in the amount of $3,100.00 per unit (total $623,100.00) to be used solely for payment of the costs of applying a barrier coating material to the common area potable hot and cold water pipes and related costs. The members had the option of paying the amount in full by September 1, 2003 or paying $60.00 per month for 40 months beginning September 1, 2003. Twenty-five homeowners were making payments at year end.
>
> There was an emergency special assessment in the current year to install caissons and underpinning in one of the buildings due to slope failure. The Association's board of directors received a report from an engineer stating that a building was experiencing serious signs of failure due to slope subsistence. The special assessment was $4,000 per unit for a total of $408,000. The unit owners had the option of making four payments of $1,000 each for the months of July through October 2005. At the end of the year, the outstanding special assessments receivable was approximately $12,000.

.114 As discussed in paragraph 7.53 of the CIRA Guide, when auditing special assessments receivable, the auditor should design tests to provide reasonable assurance that—

- All assessments receivable owed to the CIRA at the balance-sheet date are recorded.
- Recorded assessments receivable represent amounts owed to the CIRA at the balance-sheet date.
- Assessments receivable are properly described and classified in the financial statements.

.115 The auditor may achieve these objectives by performing substantive tests or a combination of substantive tests and tests of control activities. Substantive tests for determining the existence and accuracy of receivables include confirmation of the amount receivable by direct communication with parties owing amounts to the entity being audited and tests of subsequent receipts. SAS No. 67, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 330), provides guidance about the confirmation process in audits performed in accordance with GAAS. If replies to confirmation requests are not received or if the replies are not satisfactory, the auditor should obtain satisfaction about the existence and accuracy of assessment receivable balances by alternative procedures such as examining subsequent cash receipts and the existence of liens filed against units, although such liens do not assure the collectibility of assessments receivable.

.116 In practice, confirming assessments receivable may not be an effective procedure because members generally do not return the confirmation or return inadequate replies, thus requiring alternative procedures. Further, alternative procedures may be the most effective method of substantiating assessments receivable balances because these are normally collected shortly after assessment. The balances that are uncollected normally require the auditor to consult with management, legal counsel, or both regarding collectibility. In accordance with SAS No. 67, auditors who omit confirmation procedures must document the reasons why those procedures were omitted.

Replacement Fund Disclosures

.117 The CIRA Guide gives some examples of the basic replacement fund disclosures. Since the replacement fund is a critical part of the association and is not found in other industries, the accountant should consider whether additional disclosures are appropriate to assist the reader of the financial statements. Some examples include the following:

- The most recent reserve study recommends a special assessment of $X,XXX for each homeowner in the upcoming year. This has/has not been adopted by the board/members.
- The board chose to use replacement fund monies for mold remediation, which is not a component of the reserve study. The reserve study will be re-computed to calculate the impact on future funding.
- The association is X percent funded according to the latest reserve study.
- The association is funding for components with a life of 30 years or less. There are additional components with lives of over 30 years which are not included in this calculation.
- The association budgeted $XX,XXX to be transferred to the replacement fund. No monies were actually deposited into the replacement fund for the year, and the association has no plans on repaying these unfunded amounts.
- In order to save finance charges, the board has chosen to borrow the earthquake insurance premium from the replacement fund. This will be repaid in twelve equal monthly payments from the operating fund. At the end of the year, there were five months remaining for a total of $X,XXX.

.118 If the disclosures about a CIRA's funding for future major repairs and replacements required by paragraph 4.27 of the CIRA Guide are absent or inadequate, the auditor should consider modifying his or her report, as discussed in AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1).

Deficit Equities and Net Losses

.119 In some areas of the country, there is more resistance by boards of directors against increasing their assessments to adequately cover operating expenses and the funding of the replacement fund. This appears to be related to the fact that homeowners' budgets are tightened due to increased mortgage payments, higher fuel prices, and the general debt level of homeowners. Additionally, in associations where the vast majority of owners are on a fixed income, there is the same resistance. Thus, the decision is being made to leave association assessment amounts the same as the prior year, or with a minimal increase. This is not reasonable in relation to the same economic conditions causing association expenses to increase.

.120 Due to lack of knowledge as to how to read a financial statement, boards of directors and managers may not be aware that the association is operating at a loss or that the operating fund (members' equity) is running a deficit balance. This is especially true if monies are being borrowed from reserves so that there is sufficient cash flow to pay the bills, or if the manager or accounting personnel is holding the payments to vendors. This is further enhanced in that the financial statements are prepared on the cash basis of accounting or not on a fund balance which would show the amount due between the funds. Co-ops have significant depreciation so they usually show net operating losses and deficit equity. The test the auditor and financial statement users should make is whether the deficit equity is less than accumulated depreciation. If no, the co-op is in trouble.

.121 In order to function effectively, the board of directors should make a valid attempt to understand the issues associated with CIRA governance and the evolving accounting and auditing regulatory environment. The resources available in the "Improving the Audit Committee" section of the AICPA Web site address these issues, and help audit committee members understand how to develop efficient committee processes and engage in active and effective oversight to achieve financial literacy. Readers may refer the boards of directors of their CIRA clients to www.aicpa.org/audcommctr/homepage.htm for guidance to achieve financial literacy.

.122 The Community Associations Institute (CAI) recommends in its M-206 Financial Management course, which is required to become a Professional Community Association Manager (PCAM), that an association have a minimum of 2 percent to 5 percent of the annual budget as a balance in the operating fund for contingencies, with 10 percent to 15 percent being "very good." CAI considers this to be a good rule of thumb. Additionally, the CAI course recommends one month of operating expenses to be in the operating cash account. These are just recommendations and may differ based on the CIRA's circumstances.

.123 The practitioner may want to consider either meeting with the board of directors or discussing the issue in a management letter to ensure that the board is aware of the current financial condition.

Staff Accounting Bulletin No. 108

.124 On September 13, 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements." The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.125 There have been two common approaches used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.126 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.127 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in SAB No. 108. While the guidance outlined in the SAB only specifically applies to public companies and other entities whose financial information is filed with the SEC, non-issuers may also consider this guidance when quantifying financial statement misstatements. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

Technical Practice Aids on Guidance for Losses From Natural Disasters

.128 The AICPA recently issued an accounting Technical Practice Aid (TPA), section 5400.05, "Accounting and Disclosures Guidance for Losses From Natural Disasters—Nongovernmental Entities," regarding the accounting and disclosures for losses from natural disasters for nongovernmental entities.

.129 In 2005, hurricanes devastated several states along the Gulf Coast of the United States, took many lives, and caused considerable damage to entities. In its effort to provide financial reporting guidance on accounting and disclosures of losses from natural disasters, AICPA staff identified certain accounting issues and provided a road map reference to relevant accounting literature for nongovernmental entities to assist preparers and practitioners. For a more detailed discussion, readers should refer to the TPA at www.aicpa.org/download/acctstd/Natural_disaster_TPA_5400.05.pdf.

.130 The AICPA has also issued the following auditing TPAs in response to the hurricanes. Auditors whose clients are affected by the hurricanes or other natural disasters should follow the guidance in these TPAs, as appropriate.

- TPA section 9070.05, "Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor's Report But Before Issuance of the Auditor's Report and Related Financial Statements"
- TPA section 8345.01, "Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster"
- TPA section 8345.02, "Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster"

Disaster Response Checklist for CFOs and Controllers

.131 The AICPA has developed a checklist to help financial executives navigate through the complicated task of disaster recovery. When a company faces a disaster, whether it is a local or regional situation, it must address a variety of issues in a timely manner. This checklist helps walk the finance executive through disaster response in a series of phases, outlining issues that need to be addressed to understand damage and minimize ongoing risks, including ensuring employee safety, maintaining operations, and evaluating the company's financial situation. To access the checklist, visit www.aicpa.org/news/2005/disaster_response.htm.

Online Disaster Recovery Resource Center

.132 The AICPA has established a central online Disaster Recovery Resource Center. Visit this site frequently for up-to-date information, useful links to other Web sites, and a wide range of practical tools on this topic. It includes resources for members to use to assist their employers and clients, as well as practice management guidance for firms directly affected by Hurricane Katrina. The site will be updated regularly; check back often.

EITF Issues and FASB Staff Positions

.133 The FASB is very active in issuing Emerging Issues Task Force (EITF) Issues and FASB Staff Positions (FSPs). Auditors should visit the FASB Web site to stay abreast of these many issues and understand those accounting requirements that may pertain to their clients' financial statements. In the AICPA general *Audit Risk Alert—2006/07* you will find a list of selected EITF Issues and FSPs that have been issued recently and have broad interest.

FSP No. FAS 13-1, "Accounting for Rental Costs Incurred during a Construction Period"

.134 Accounting guidance for leasing arrangements is provided in FASB Statement No. 13, *Accounting for Leases*, as amended and interpreted. This FSP was issued in response to questions as to whether lessees can capitalize rental costs associated with ground and building operating leases that are incurred during a construction period. FSP No. FAS 13-1 states that there is no distinction between the right to use a leased asset during the construction period and the right to use that asset after the construction period. Rental costs associated with ground or building operating leases and incurred during a construction period are therefore recognized as rental expense and included in income from continuing operations. FASB Statement No. 13 and FASB Technical Bulletin 85-3, *Accounting for Operating Leases with Scheduled Rent Increases*, provide guidance to determine how to allocate rental costs over the lease term.

.135 FSP No. FAS 13-1 should be applied to the first reporting period beginning after December 15, 2005. Earlier adoption is permitted for financial statements or interim financial statements that have not been issued. Lessees are required to cease capitalizing rental costs as of the effective date of FSP No. FAS 13-1 for operating lease arrangements entered into prior to the FSP's effective date.

Recent Auditing, Attestation, and Quality Control Pronouncements and Related Guidance

.136 Presented below is a list of the most recent auditing, attestation, quality control, and related guidance issued. For information on auditing and attestation standards, quality control standards, and related guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm.

.137 You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA's Auditing Standards team and available at www.aicpa.org/members/div/auditstd/opinion/index.htm.

> ***Note:*** SAS No. 104 through No. 111 were issued together and are known as the "risk assessment" standards. They apply to audits conducted in accordance with GAAS.

Statement on Auditing Standards (SAS) No. 114 (November 2006) (Applicable to audits conducted in accordance with GAAS)	*The Auditor's Communication With Those Charged With Governance*
SAS No. 113 (November 2006) (Applicable to audits conducted in accordance with GAAS)	*Omnibus—2006*
SAS No. 112 (May 2006) (Applicable to audits conducted in accordance with GAAS)	*Communicating Internal Control Related Matters Identified in an Audit*
SAS No. 111 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Amendment to Statement on Auditing Standards No. 39,* Audit Sampling
SAS No. 110 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
SAS No. 109 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
SAS No. 108 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Planning and Supervision*
SAS No. 107 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Audit Risk and Materiality in Conducting an Audit*

(continued)

SAS No. 106 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Audit Evidence*
SAS No. 105 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards
SAS No. 104 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*
SAS No. 103 (December 2005) (Applicable to audits conducted in accordance with GAAS)	*Audit Documentation*. This SAS supersedes SAS No. 96 of the same name. This SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation. Audit documentation is an essential element of audit quality. Although audit documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate audit documentation contributes to the quality of an audit.
SAS No. 102 and Statement on Standards for Attestation Engagements (SSAE) No. 13 (December 2005) (Applicable to audits conducted in accordance with GAAS)	*Defining Professional Requirements in Statements on Auditing Standards* and *Defining Professional Requirements in Statements on Standards for Attestation Engagements* These Statements define the terminology the ASB will use to describe the degrees of responsibility that the requirements impose on the auditor or the practitioner.
AICPA Auditing Interpretation No. 1 of AU section 328, *Auditing Fair Value Measurements and Disclosures* and AICPA Auditing Interpretation No. 1 of AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*	"Auditing Interests in Trusts Held by a Third-Party Trustee and Reported at Fair Value" and "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist" These Interpretations clarify that simply receiving a confirmation from a third party (including a trustee) does not in and of itself constitute adequate audit evidence with respect to the valuation assertion of interests in trusts or investments in securities. The Interpretations also reiterate the responsibility of management to institute accounting and financial reporting processes for the determination of fair value measurements. According to the Interpretations, if the auditor is unable to *(continued)*

(July 2005) (Applicable to audits conducted in accordance with GAAS)	audit the existence or measurement of interests in investments in securities at the financial statement date, the auditor should consider whether that scope limitation requires the auditor to qualify his or her opinion or disclaim an opinion.
AICPA Technical Practice Aid 9070.05 (August 2005) (nonauthoritative)	"Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor's Report But Before Issuance of the Auditor's Report and Related Financial Statements"
AICPA Technical Practice Aid 8345.01 (September 2005) (nonauthoritative)	"Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster"
AICPA Technical Practice Aid 8345.02 (September 2005) (nonauthoritative)	"Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster"
AICPA Practice Alert 2005-1 (September 2005) (nonauthoritative)	*Auditing Procedures With Respect to Variable Interest Entities* The purpose of this Practice Alert is to provide guidance to auditors in planning and performing auditing procedures with respect to variable interest entities.
AICPA Audit and Accounting Practice Aid (nonauthoritative)	*SAS No. 70 Reports and Employee Benefit Plans* This publication provides guidance on the use of SAS No. 70 reports in audits performed in accordance with GAAS. In addition, this publication includes checklists and forms to help implement the guidance.
Guidance on Management Override of Internal Controls (nonauthoritative)	*Management Override of Internal Controls: The Achilles' Heel of Fraud Prevention? The Audit Committee and Oversight of Financial Reporting* This guidance is available through the AICPA Audit Committee Effectiveness Center at www.aicpa.org/audcommctr (go to "Spotlight Area").

.138 As necessary, auditors should obtain and understand the complete text of the applicable standards and other guidance. You should visit the applicable Web site for complete information.

Auditing Standards Available on AICPA Web Site

.139 The standards and interpretations promulgated by the AICPA ASB are available free of charge by visiting the AICPA Audit and Attest Standards Team's page at www.aicpa.org/members/div/auditstd/Auth_Lit_for_NonIssuers.htm. Members and nonmembers alike can download the auditing, attestation, and quality control standards by either choosing a section of the codification or an individual statement number. You can also obtain copies of AICPA standards and other guidance by contacting the AICPA at (888) 777-7077 or online at www.cpa2biz.com.

Recent AICPA Independence and Ethics Pronouncements

.140 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this Alert to be aware of independence and ethics matters that will affect their practice.

.141 In addition to the other matters discussed in *Independence and Ethics Alert—2006/07*, auditors should be aware of these recent issuances by the AICPA Professional Ethics Executive Committee (PEEC):

- Revised Interpretation No. 501-1, "Retention of Clients Records" (AICPA, *Professional Standards*, vol. 2, ET sec. 501.02), to provide guidance to members on their ethical responsibilities when a client or former client makes a request for client records, supporting records, or other documents that are in the custody or control of the member. The revised interpretation defines key terms and requires that client provided records be returned to the client upon request but that client records prepared by the member and supporting records may be withheld if the engagement is incomplete or there are fees due to the member for the specific engagement. In addition, the committee has deleted Ethics Rulings No. 182 of ET section 591, "Ethics Rulings on Other Responsibilities and Practices" (AICPA, *Professional Standards*, vol. 2, ET sec. 591.363–.364), because the substance of this ethics ruling has been incorporated into the revised Interpretation No. 501-1.
- New Interpretation No. 101-15, "Financial Relationships" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.17), defines financial interest, direct financial interest, and indirect financial interest as used in Interpretation No. 101-1, and provides guidance to members in determining whether financial interests should be considered direct or indirect financial interests. Readers should refer to the AICPA Web site at www.aicpa.org/download/ethics/interp101_1.pdf for further information.
- Ethics Rulings No. 113, "Acceptance or Offering of Gifts or Entertainment," and No. 114, "Acceptance or Offering of Gifts and Entertainment to or From an Attest Client," under Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.226–.227 and 191.228–.229, respectively), provide guidance on how a member's offer or acceptance of gifts or entertainment, to or from a client (both attest and nonattest), or a customer or vendor of the member's employer, affects a member's independence or objectivity. Readers should refer to the AICPA Web site at www.aicpa.org/download/ethics/Gifts_and_Entertainment_Rulings.pdf for further information.
- The PEEC has approved the release of "Conceptual Framework for AICPA Independence Standards" (AICPA, *Professional Standards*, ET sec. 100.01), and a related revision to "Other Considerations" of Interpretation No. 101-1, "Interpretation of Rule 101" (AICPA, *Professional Standards*, ET sec. 101.02) of the Code of Professional Conduct. Readers should refer to the AICPA Web site at www.aicpa.org/download/ethics/Ethics_Interpretation_101-1_and_Conceptual_Framework.pdf for further information, including the effective date.

.142 Readers should be aware of the following guidance on understanding and implementing Interpretation No. 101-3:

- Interpretation No. 101-3, "Performance of Nonattest Services" (as revised and adopted on January 27, 2005), can be found online at www.aicpa.org/members/div/ethics/intr_101-3.htm.
- *AICPA Interpretation 101-3, Performance of Nonattest Services—Understanding General Requirement No. 2: Client Responsibilities* provides detailed answers to the most frequently asked questions regarding this important provision of Interpretation No. 101-3. Topics covered include what is meant by having suitable skill, knowledge, and/or experience for purposes of the rule, underlying concepts supporting the requirement, how suitable skill, knowledge, and/or experience can be assessed, and which client personnel or other individuals can serve in this capacity. In addition, this document contains

a new FAQ as approved by the PEEC on May 19, 2005, related to "routine activities" as referenced in the Interpretation. This document can be found online at www.aicpa.org/download/ethics/101-3_Competency_Guidance.pdf.

- *AICPA Interpretation 101-3, Performance of Nonattest Services—Requirement to Document Understanding With an Attest Client* provides clarification and guidance regarding the requirement to document certain elements of a nonattest services engagement as required by Interpretation No. 101-3. Topics covered include affected clients and services, form of documentation, failing to document, and illustrative sample documentation language. In addition, this document contains a new FAQ as approved by the PEEC on May 19, 2005, related to "routine activities" as referenced in the interpretation. This document can be found online at www.aicpa.org/download/ethics/Int._101-3_documentation_guidance.pdf.
- *Bookkeeping and General Requirement Q&As (Revised January 27, 2005)* are based on responses of the AICPA professional ethics division staff to members' inquiries and recent changes to the independence guidance of the PEEC. The Q&As can be found online at www.aicpa.org/download/ethics/nonattest_q_a.pdf.

Recent Accounting Pronouncements and Related Guidance

.143 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Statement No. 156 (March 2006)	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*
FASB Statement No. 155 (February 2006)	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.
FASB Staff Positions (various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FASB Staff Positions (FSPs). Some of the recently issued FSPs address issues relating to FASB Statements No. 13, No. 115, No. 123(R), No. 124, and No. 143, among others.
AICPA Statement of Position 06-1 (April 2006)	*Reporting Pursuant to the Global Investment Performance Standards*

(continued)

AICPA Technical Practice Aid section 1200.06–.15 (February 2005) (nonauthoritative)	"Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk"
AICPA Technical Practice Aid section 2130.09–.35 (December 2005) (nonauthoritative)	"Application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer,* to Debt Securities"
AICPA Technical Practice Aid section 5400.05 (September 2005) (nonauthoritative)	"Accounting and Disclosures Guidance for Losses From Natural Disasters—Nongovernmental Entities"
AICPA Technical Practice Aid section 5600.07–.17 (November 2005) (nonauthoritative)	"Determining a Lease Term for Accounting Purposes"
AICPA Technical Practice Aid section 6910.16–.20 (January 2006) (nonauthoritative)	"Presentation of Boxed Investment Positions in the Condensed Schedule of Investments of Nonregistered Investment Partnerships"
AICPA Technical Practice Aid section 6930.09 (August 2005) (nonauthoritative)	"Accounting and Disclosure Requirements for *Single-Employer Employee Benefit Plans* Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003"
AICPA Technical Practice Aid section 6930.10 (August 2005) (nonauthoritative)	"Accounting and Disclosure Requirements for *Multiemployer Employee Benefit Plans* Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003"
Statement on Standards for Accounting and Review Services (SSARS) No. 14 (July 2005)	*Compilation of Pro Forma Financial Information*. This SSARS expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on pro forma financial information.
SSARS No. 13 (July 2005)	*Compilation of Specified Elements, Accounts, or Items of a Financial Statement*. This SSARS expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement.

SSARS No. 12 (July 2005)	*Omnibus Statement on Standards for Accounting and Review Services—2005.* This SSARS amends SSARS No. 1, C*ompilation and Review of Financial Statements*, and SSARS No. 2, *Reporting on Comparative Financial Statements*. The SSARS also rescinds Interpretation No. 26, "Communicating Possible Fraud and Illegal Acts to Management and Others," of SSARS No. 1.
Interpretation No. 27 of AR section 100	"Applicability of Statements on Standards for Accounting and Review Services to Reviews of Nonissuers Who Are Owned by or Controlled by an Issuer"

On the Horizon

.144 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all accounting and auditing projects in progress. Presented below is brief information about some ongoing projects that are especially relevant to the CIRA industry. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.145 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB) (Note that for audits of public companies, the PCAOB sets auditing standards.)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.fasb.org
Governmental Accounting Standards Board (GASB)	www.gasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message.

Auditing Pipeline—Nonpublic Companies

.146 The proposed standards discussed in this section would not apply to the audits of public companies and other audits conducted under the standards of the Public Company Accounting Oversight Board (PCAOB). Readers should keep abreast of the status of the following projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Proposed Statement on Standards for Attestation Engagements, Reporting on an Entity's Internal Control Over Financial Reporting

.147 This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). Specifically, guidance is provided regarding the following:

- Conditions that must be met for a practitioner to accept an engagement to examine the effectiveness of an entity's internal control and the prohibition of acceptance of an engagement to review such subject matter
- Engagements to examine the design and operating effectiveness of an entity's internal control
- Engagements to examine the design and operating effectiveness of a portion of an entity's internal control (for example, internal control over financial reporting of an entity's operating division or its accounts receivable)
- Engagements to examine only the suitability of design of an entity's internal control (no assertion is made about the operating effectiveness of internal control)
- Engagements to examine the design and operating effectiveness of an entity's internal control based on criteria established by a regulatory agency

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.148 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles.* The FASB proposal would move responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69) to the accounting literature. The proposed SAS would delete the GAAP hierarchy for nongovernmental entities from SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1, AU sec. 411), as amended. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www.fasb.org.

Accounting Pipeline

Proposed FASB Statement, Qualifying Special-Purpose Entities and Isolation of Transferred Assets—an amendment of FASB Statement No. 140

.149 This proposed Statement would amend and clarify FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, in several ways. The objectives of this project are to amend FASB Statement No. 140 to (1) specify the conditions under which a qualifying special-purpose entity (SPE) is required to achieve sale accounting, (2) eliminate inconsistent application of the principles FASB Statement No. 140 is based on, and (3) address other issues related to transfers of financial assets that arose during redeliberations on the amendment of FASB Statement No. 140 in order to improve the comparability of financial statements.

.150 Readers should be alert for the issuance of a final statement, which is expected to occur in the second quarter of 2007. Refer to the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.151 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA and the PCAOB in order to ensure that each of the documents has a uniform effective date.

Proposed FASB Statements, Business Combinations, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.152 The primary objective of applying the acquisition method project is to develop a single high-quality standard of accounting for business combinations that can be used for both domestic and cross-border financial reporting. The goal is to develop a standard that includes a common set of principles and related guidance that produces decision-useful information and minimizes exceptions to those principles. The standard should improve the completeness, relevance, and comparability of financial information about business combinations by:

1. Clarifying which assets and liabilities should be recognized in the initial accounting for the business combination.
2. Requiring that the assets acquired and the liabilities assumed be consistently measured at a relevant attribute.
3. Defining the scope of the standard in a way that ensures that similar economic events are accounted for similarly. (That means, by requiring that all transactions or other events in which an acquirer obtains control of a business be accounted for by applying the acquisition method).

.153 The exposure drafts on business combinations, purchase method procedures, and noncontrolling interests were published on June 30, 2005. The FASB's goal is to issue the two final Statements in the first half of 2007. The target effective date for the two proposed Statements will be reviewed near the end of redeliberations.

AICPA Audit and Accounting Products and Services

AICPA

Web Site

.154 AICPA Online (www.aicpa.org) is the AICPA's Web site on the Internet. The site offers users the opportunity to stay abreast of developments in accounting and auditing. Online resources include professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, exposure drafts, and a list of links to other accounting- and finance-related sites. The AICPA Web site also features a "Talk to Us" section, allowing users to send e-mail messages directly to AICPA representatives or teams. The AICPA Web site includes a separate section that deals with Circular A-133 audit issues, including a document that provides unofficial answers to frequently asked questions, at www.aicpa.org/belt/a133main.htm.

Order Department (Service Center Operations)

.155 To order AICPA products, call the AICPA Member Service Center at (888) 777-7077 or fax to (800) 362-5066. The best times to call are 8:30 A.M. to 11:30 A.M. and 2:00 P.M. to 7:30 P.M., Eastern Standard Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Publications

.156 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements (product numbers appear in parentheses).

- *Checklists and Illustrative Financial Statements for Common Interest Realty Associations* (product no. 008907kk). This publication is designed to help those preparing reports and financial statements of CIRAs by providing a checklist of applicable GAAP disclosures.
- Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide (product no. 006615kk)
- *Analytical Procedures* Audit Guide (product no. 012551kk)
- *Auditing Estimates and Other Soft Accounting Information* Practice Aid
- *Accounting Trends and Techniques—2006* (product no. 009898kk)
- *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* Practice Aid (product no. 006701kk)
- *Understanding and Implementing SSARS No. 8* (product no. 006612kk)
- *Audit and Accounting Manual* (product no. 005133kk). This manual is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs, auditors' reports, checklists and engagement letters, management representation letters, and confirmation letters.

Accounting and Auditing Technical Hotline

.157 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.158 The AICPA Professional Ethics Team answers inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Online CPE

.159 AICPA *CPExpress*, offered exclusively through CPA2Biz.com, is the AICPA's flagship online learning product with enhancements such as a new user interface and improved functionality. AICPA *CPExpress* now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 (nonmembers pay $369) for a new subscription and $119 (nonmembers pay $319) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA *CPExpress* offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Technical Practice Aids

.160 *AICPA Technical Practice Aids* includes questions received by the AICPA Technical Hotline on various subjects and the responses to those questions. TPA section 6990 includes a question and answer specifically pertaining to CIRAs. *Technical Practice Aids* is available both as a subscription service and in paperback form (product no. 005146kk).

Help Desk—AICPA publications can be obtained by calling AICPA Member Service Center at (888) 777-7077 or faxing a request to (800) 362-5066.

Guidance for Audit Committees on the Risk of Fraud From Management Override of Internal Control

.161 The AICPA Antifraud Programs and Controls Task Force has issued a document entitled *Management Override of Internal Controls: The Achilles' Heel of Fraud Prevention—The Audit Committee and Oversight of Financial Reporting*. The document offers assistance to audit committees in addressing the risk of fraud arising from management override of internal control over financial reporting. The guidance contains the following major sections:

- Management Override and the Audit Committee's Responsibilities
- Actions to Address the Risk of Management Override of Internal Controls
- Suggested Audit Committee Procedures: Strengthening Knowledge of the Business and Related Financial Statement Risks (Appendix)

.162 The following are some of the topics related to audit committees that are covered in the document:

- Maintaining an appropriate level of skepticism.
- Strengthening the audit committee's understanding of the business.
- Brainstorming to identify fraud risks.
- Using the code of conduct to assess financial reporting culture.
- Cultivating a vigorous whistle-blower program.
- Developing a broad information and feedback network including communications with internal auditors, independent auditors, compensation committee, and key employees.

.163 The document can be downloaded from the "Spotlight Area" on the AICPA's Audit Committee Effectiveness Center Web page at www.aicpa.org/audcommctr/homepage.htm.

References for Additional Guidance

.164 Auditors should also be aware of the economic, regulatory, and professional developments that may affect the audits they perform, as described in the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) and the AICPA *Compilation and Review Alert—2006/07* (product no. 022307kk). These Alerts may be obtained by calling AICPA Member Service Center at (888) 777-7077 or faxing a request to (800) 362-5066. Obtaining product information and placing online orders can be done at www.cpa2biz.com.

.165 Copies of FASB publications referred to in this document may be obtained directly from the FASB by calling the FASB Order Department at (800) 748-0659.

.166 The Audit Risk Alert *Common Interest Realty Associations Industry Developments* is published as warranted. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would be appreciated. You may e-mail these comments to lwest@aicpa.org or write to:

Appendix

Useful Internet Web Sites

.167 If used properly, the Internet can be a valuable tool for auditors. Through the Internet, auditors can access a wide variety of global business information. For example, information is available relating to industry statistics, resources for common interest realty associations (CIRAs) and their finance professionals, professional news, state CPA society information, Internal Revenue Service (IRS) information, software downloads, university research materials, currency exchange rates, stock prices, annual reports, and legislative and regulatory initiatives. Not only are such materials accessible from the computer, but they are available at any time, often free of charge.

.168 A number of resources provide direct information, whereas others may simply point to information inside and outside of the Internet. Auditors can use the Internet to:

- Obtain audit and accounting research information
- Obtain texts, such as audit programs
- Discuss audit issues with peers
- Communicate with audit clients
- Obtain information from a client's Web site
- Obtain information on professional associations

.169 There are caveats to keep in mind when using the Internet. Reliability varies considerably. Some information on the Internet has not been reviewed or checked for accuracy; caution is advised when accessing data from unknown or questionable sources. Although a vast amount of information is available on the Internet, much of it may be of little or no value to auditors. Accordingly, auditors should learn to use search engines effectively to minimize the amount of time browsing through useless information. The Internet is best used in tandem with other research tools, because it is unlikely that all desired research can be conducted solely from Internet sources.

.170 The following listing summarizes the various Web sites of many of the organizations referred to in this Audit Risk Alert, as well as others that auditors of CIRAs may find useful.

Construction Contractors Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS

CONSTRUCTION CONTRACTORS INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of construction contractors with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole, CPA CFE
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to J. Russell Madray, CPA, who developed and wrote this alert.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your construction contractor audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The construction industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 basis points to 5.25 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

Industry Trends and Conditions

.13 Despite continued weakness in the residential sector, there have been solid gains in most nonresidential construction sectors so far, and robust conditions are expected to continue for the remainder of the year. The American Institute of Architects (AIA) Consensus Construction Forecast Panel projects growth of 7.2 percent in nonresidential construction activity (after inflation adjustments) for 2007, with an almost 9 percent jump in commercial activity, and a healthy 5.4 percent increase in institutional facilities. They are projecting to see much slower gains in 2008, but gains nonetheless. Commercial construction is expected to edge up another 1.1 percent, with institutional activity growing by 4.5 percent, producing an almost 3 percent gain in total activity for 2008.

.14 However, there is a growing list of concerns in the economic outlook. The housing market continues to deteriorate and is not only slowing the economy directly, but may cause consumers to decrease spending as a result of their anxiety about falling home prices. Also, there is growing concern that inflation may begin to accelerate in our economy. High oil prices continue to add pressure to inflation, and long-term interest rates have begun to trend up recently. Inflation in building commodity prices has been a major source of disruption to the construction industry in recent years, but fluctuations in commodity prices have fortunately begun to moderate recently.

.15 Though most members of the AIA Consensus Construction Panel were expecting a good year for nonresidential construction in 2007, so far this year activity has largely exceeded even the most optimistic outlooks. Although total construction spending slipped 0.4 percent in July (seasonally adjusted) and residential fell 1.4 percent, nonresidential spending climbed 0.6 percent (the tenth consecutive monthly gain). For the first seven months of 2007 combined, total construction was down 3.4 percent, and residential plummeted 18 percent compared to the same period in 2006. Those figures obscure the 15 percent jump in nonresidential spending.

Construction Put in Place

.16 One of the most widely used measures of construction activity is construction put in place, which is tracked monthly by the Bureau of Statistics at the U.S. Department of Commerce. The value of construction put in place is a measure of the value of construction installed or erected at the site during a given period. For an individual project, this includes the following:

- New buildings and structures
- Additions, alterations, major replacements, and so on to existing buildings and structures
- Installed mechanical and electrical equipment
- Installed industrial equipment, such as boilers and blast furnaces
- Site preparation and outside construction, such as streets, sidewalks, parking lots, utility connections, and so on
- Cost of labor and materials (including owner-supplied)
- Cost of construction equipment rental
- Profit and overhead costs
- Cost of architectural and engineering work
- Any miscellaneous costs of the project that are on the owner's books

.17 The total value of construction put in place for a given period is the sum of the value of work done on all projects underway during this period, regardless of when work on each individual project was started or when payment was made to the contractors. For some categories, estimates are derived by distributing the total construction cost of the project by means of historic construction progress patterns.

.18 The following table presents details of construction put in place for various market segments. Note that the amounts are in billions of dollars and represent seasonally adjusted annual rates.

New Construction Put in Place
(Billions of Dollars—Seasonally Adjusted Annual Rate, in Current Dollars)

	July 2007	*July 2006*
Private construction	$ 880.1	$ 930.9
Public construction	289.0	269.1
Total construction	**$1,169.1**	**$1,200.0**
Nonresidential building		
Office	$ 53.9	$ 45.1
Power	37.7	34.7
Commercial	82.4	77.2
Lodging	29.3	21.0
Other nonresidential	142.7	125.5
Total nonresidential	346.0	303.5
Residential building	534.1	627.4
Total private construction	$ 880.1	$ 930.9

	July 2007	July 2006
Highways and streets	$ 74.3	$ 76.6
Infrastructure	39.7	36.9
Educational	83.0	69.9
Other public buildings	33.8	24.6
Other public construction	58.2	61.1
Total public construction	$ 289.0	$ 269.1

.19 The U.S. Census Bureau of the Department of Commerce announced that construction spending during July 2007 was estimated at a seasonally adjusted annual rate of $1,169.1 billion (0.4 percent below the revised June 2007 estimate of $1,173.2 billion). The July figure is 2.0 percent below the July 2006 estimate of $1,192.9 billion. During the first seven months of this year, construction spending amounted to $657.7 billion (3.4 percent below the $680.9 billion for the same period in 2006).

.20 Spending on private construction was at a seasonally adjusted annual rate of $880.1 billion (0.7 percent below the revised June 2007 estimate of $886.3 billion). Residential construction was at a seasonally adjusted annual rate of $534.0 billion in July (1.4 percent below the revised June estimate of $541.8 billion). Nonresidential construction was at a seasonally adjusted annual rate of $346.0 billion in July (0.4 percent above the revised June estimate of $344.5 billion).

.21 In July 2007, the estimated seasonally adjusted annual rate of public construction spending was $289.0 billion (0.7 percent above the revised June estimate of $287.0 billion). Educational construction was at a seasonally adjusted annual rate of $83.0 billion (1.9 percent above the revised June estimate of $81.5 billion). Highway construction was at a seasonally adjusted annual rate of $74.3 billion (0.8 percent below the revised June estimate of $74.9 billion).

> **Help Desk**—You can access current statistics of construction put in place and other construction industry information at www.census.gov.

Private Construction

Residential Building

.22 The residential building segment of the construction industry includes new single- and multifamily housing as well as residential repairs and improvements. Conditions that have the most effect on the demand for residential construction include the following:

- *Housing affordability.* Housing affordability is the extent to which potential buyers have the means to purchase a home. Affordability can be measured in several ways by considering average home prices and income levels. For example, some analysts create an "affordability index" by comparing median home prices to household income levels. As income levels get closer to housing prices, the average home becomes affordable to more local residents.

- *Interest rates.* Most homes are financed, and interest rates therefore have a tremendous effect on the affordability of housing. As interest rates rise, the cost of home financing increases; as they fall, the cost of financing decreases. However, interest rate changes do not have an immediate impact on home-buying markets—usually rates must be in effect for several quarters to reverse home-buying trends.

- *Land availability and pricing.* Because land is one of the major costs of residential building, land availability and pricing have a major effect on the affordability of housing. Housing prices will be affected as land suitable for residential building becomes scarce in certain parts of the country.

- *Demographics*. Shifts in demographics can have a significant effect on housing demand. For example, the aging of the U.S. population has increased demand for low-maintenance and multifamily housing. A large number of baby boomers are now entering their peak earning years, which is expected to affect the affordability and demand for single-family homes.
- *Market velocity*. According to industry sources, more than half of all home improvements occur within 18 months after a new owner moves in, or within 12 months before the home is sold. Thus, during times when new and used home markets are active, residential remodeling and improvement activity also increases.

.23 Housing starts have stabilized so far in 2007 at just below 1.5 million units, but job-site spending has declined about 1 percent per month, reflecting slower completion of homes and cutbacks in home size and amenities in a depressed sales market. Some industry analysts believe housing starts are near the bottom for this cycle, although one or two lower monthly starts reports are possible. Further, some believe recovery will be slow, held back by an oppressive overhang of inventory of homes for sale, which are mostly existing homes.

.24 All of the other usual drivers in the housing market are neutral to slightly positive and are expected to improve through 2008. A leading business information firm, Reed Construction Data, forecasts that about 40 percent of the 2006–2007 drop in housing starts will be recovered by the end of next year. This would still leave starts well below the underlying demographic trend demand (that is, population and household growth and shifts). Such an anticipated recovery requires the forecasted return to 3.0 percent real GDP growth, so that the inventory surplus is absorbed almost as quickly as it appeared. However, other housing forecasts are generally less optimistic.

Nonresidential Building

.25 The boom in nonresidential building construction continues but is showing signs of peaking. Construction spending is now 15 percent higher for the first 7 months of 2007 than for the same period in 2006, and the value of starts is up 22 percent. Over that period, starts are up 29 percent for commercial buildings, 10 percent for institutional buildings, and have doubled for manufacturing facilities.

.26 For-lease buildings remain the construction market with the fastest growth. Year-to-date starts are up 55 percent for hotels, 46 percent for offices, 27 percent for stores, and 25 percent for warehouses. Job-site construction spending for these buildings is up 24 percent year-to-date, and analysts expect continued growth at about this pace or perhaps a little faster. These investment buildings continue to be attractive to the financial market, although analysts expect their relative attractiveness to ebb over the next year as completions rise and restrain increases in rents and occupancy rates.

Public Construction

.27 Public construction was up 0.7 percent in July 2007 and 11 percent year-to-date. The biggest component, education, rose 1.9 percent in July 2007 and 12 percent year-to-date. However, highway and street construction, which received a big boost in late 2005 and early 2006, was down 0.8 percent for the month of July 2007 and was only 5 percent higher year-to-date. That partly reflects lower prices for diesel and asphalt, but it also shows that states are running short of highway funds as gas tax receipts slow. Accordingly, highway spending could drop sharply in late 2008. In August 2007, the Congressional Budget Office projected a $5 billion deficit in the federal Highway Trust Fund's Highway Account in fiscal year 2009. Congress will need to bridge that gap to keep road spending from plunging.

.28 The growth pace for institutional contracts has slowed due to the sharp decline in tax-receipt growth over the last several quarters and the accompanying drop in public budget reserves. The tax situation is now reversing in a stronger economy, so no further drop in the growth of institutional starts is expected. Healthcare is the strongest area of the institutional sector because it is less dependent on tax receipts.

Surety Industry Trends

.29 The surety industry is critical to the well-being of the construction industry. Nearly half of all work performed by construction contractors is bonded, so any change in the surety market will have a significant effect on the construction industry. The surety bond market is continuing to make a slow recovery. As the economy improves, bonding companies are loosening up on the self-preservation safeguards imposed when the reinsurance market plummeted.

.30 Reinsurance allows a bonding company to spread its risk among special reinsurance markets, lessening the effect of claims on any one company. That market still has not fully recovered, leaving fewer reinsurance companies available for bonding companies to spread risks. As a result, sureties offering performance and payment bonds are more selective in allocating their capacity and have less tolerance for underperforming or risky clients.

.31 Bonding companies are more judicious in that they are choosing clients with stronger financial margins and high quality accounting presentations in both internal and external reporting. Coming out of a "hard" market, sureties are still cautious, which means contractors often feel the consequences.

.32 Construction contractors that work for private sector owners may often secure a job on a handshake, but contractors doing hard-bid work for public agencies are required by law to be bonded. Larger contractors may have trouble bonding projects over $100 million due to the reinsurance market. Contractors sometimes find that the bonding capacity just is not available for larger sized projects. In these cases, it may take the involvement of several surety companies to secure the required bonding.

.33 In an attempt to avoid high bond premiums and potentially time-consuming and expensive investigations, some contractors are turning to an alternative form of protection against subcontractor default. Contractor default insurance (CDI) is a policy that replaces traditional subcontractor bonds. A construction contractor purchases the policy, which obligates the insurer to reimburse the contractor for costs related to subcontractor default. The subcontractors are added to the contractor's policy instead of requiring them to post bonds.

.34 The advantages of an insurance policy over traditional bonds are lower premium costs and a greater flexibility in addressing and resolving subcontractor defaults. Because a surety is entitled to conduct a routine and often time-consuming investigation in the case of a default, a CDI may bring a more timely response to the problem. A contractor can remedy a situation by using its own forces or by hiring a new subcontractor as soon as a subcontractor defaults and then immediately submitting the costs for later reimbursement.

.35 On the other hand, there is no contractual obligation under a CDI policy for an insurer to step in and complete a subcontractor's work, unlike a bonding company. The CDI underwriter also has no payment obligation to a subcontractor or its suppliers the way a bonding firm would. The construction manager assumes these risks and is held to the terms and conditions of the insurance policy. When a loss is reimbursed, the payout is subject to typically large deductibles, copayments by the insured, and strict project-specific and overall loss limits.

Construction Cost Trends

.36 From early 2004 to mid-2006, the construction industry was plagued by runaway materials cost increases. Many of these price increases have slowed or even reversed course modestly in recent months. Unfortunately, it seems likely that the current calm is only a lull between storms and not a return to the inflation-free period of 2001–2003. However, economists at the Associated General Contractors of America (AGC) and McGraw-Hill Construction say contractors can expect a better year for most materials, despite uncertainties about fuel prices. However, unknowns include how much pressure on materials and prices will be eased by the housing slowdown, how the tighter immigration policies in some states will affect the labor market, and what will happen in Congress.

Asphalt

.37 According to AGC, the biggest concern in materials for 2007 and beyond is probably asphalt. Asphalt was in short supply in 2006, and prices spiked as high as 30 percent in some areas. Colorado, Hawaii, and Wyoming experienced some of the worst shortages. This same scenario could play out again because many refineries are planning to install new cokers and eliminate the residual that has been sold as asphalt. Construction contractors need to work closely with their asphalt suppliers regarding upcoming changes in the source and availability of the supply and be prepared to look further afield. This will be an evolving situation even beyond 2007. Other refineries might decide to supply markets they had not been serving before as they adjust their product lines to maximize profit levels.

Copper

.38 Economists at both AGC and McGraw-Hill expect copper prices to remain elevated. Construction contractors buying pipe or wire can expect only slight fluctuations in prices. Contractors must also be mindful of widespread thefts and vandalism of copper products from storage and building sites. There is some potential for a price decrease as a result of the lower demand in the housing market. Overall, copper prices will continue to be high in 2007.

Steel

.39 Steel should be widely available this year; however, concern over the demand from China continues to exist. There have been some impressive increases in China's own industrial capacity, and contractors should monitor this situation to gauge the effect on the steel market in 2007 and beyond.

Cement

.40 Cement supply has been a troublesome area in the past but will probably be less so in the future. There has been an expansion of the domestic supply, which should continue, as well as continued increase in supply from Mexico. Price increases should be moderate, perhaps somewhere around 3 percent to 5 percent.

Gypsum

.41 According to economists at AGC and McGraw-Hill, the sharp decline in housing and remodeling construction will make for significantly lower demand for gypsum. Gypsum prices were up approximately 20 percent in 2006 but only 3 percent to 4 percent in 2007. The further good news is that prices for gypsum should actually decrease in the future, maybe even as much as 10 percent to 20 percent, as demand drops.

Fuel

.42 According to McGraw-Hill, the price pressures will not be as extreme in the future as in the current environment. The likelihood of any sharp decline in prices is remote. A slowing U.S. economy and less demand could affect prices this year, but the fuel market is a difficult market to predict. There is significant volatility and a multitude of factors that affect fuel supply and consequently pricing, including strikes, weather, wars, and political instability.

Construction Plastics

.43 The supply of PVC pipe was very tight after the hurricanes in late 2005, and prices increased 5 percent in 2006. However, prices should be flat or even slightly lower for construction plastics in 2007 and beyond, according to AGC. In addition, there is ample supply, primarily because the decrease in home building is reducing demand pressures on existing suppliers.

Legislative and Regulatory Developments

Three Percent Withholding Tax

.44 In 2012, a new law will require federal, state, and local governments to withhold 3 percent from all payments for goods and services as a guard against possible business tax evasion. This far-reaching new requirement was inserted as a last-minute revenue raiser into the Tax Reconciliation Act of 2005 that was signed by the President in May 2006. The law does the following:

- Requires withholding of 3 percent on all government payments for products and services made by the federal, state, and local governments with total expenditures of $100 million or more
- Affects payments for goods and services under government contracts as well as payments to any person for a service or product provided to a government entity (for example, Medicare and certain grants)

.45 According to a 2006 Construction Financial Management Association Survey, construction companies make, on average, 2.2 percent per contract. If this law is implemented, the government may withhold more than the profit from every contract, in theory to pay for business taxes. This over-withholding may result in severe cash flow deficiencies, increased costs for bonding and lowered bonding capacity, and possibly bankruptcies.

.46 For example, if a small business contractor holds one government contract estimated to be completed in one year for $10 million, this law requires withholding of $300,000 on that contract. Meanwhile, the contractor expects to net approximately 2.5 percent, or $250,000, after paying for supplies, services, subcontractors, and other ordinary business expenses. The tax on the revenue generated is at most 35 percent of the revenue, which means the maximum tax owed on the $10 million project is $87,500 (35 percent of $250,000). Ultimately, the government has withheld $300,000 for $87,500 in tax liability.

.47 A number of construction-related organizations are working to have this section of the Tax Reconciliation Act of 2005 repealed.

Audit and Attestation Issues and Developments

Auditing Construction Contracts

.48 As we mentioned in the first part of this alert, in the construction industry, business conditions vary greatly across construction sectors and from region to region. Risks associated with erecting schools are different from those faced by a homebuilder. Likewise, a contractor in the Northwest may face different issues than a similar contractor on the Gulf Coast. For this reason, auditors must be knowledgeable about the types of construction contracts that contractors use and the regions in which the entity operates.

.49 The financial statements of a contractor are built from the financial results of individual contracts. Therefore, an effective audit approach focuses on the terms, financial estimates, and results of individual contracts rather than on the contract-related balance sheet that accounts for the entity as a whole.

.50 To obtain a general understanding of the nature of a construction contractor's operations, you should review the terms of a representative sample of the contractor's contracts, including significant contracts that are currently in force. This sample should include both contracts with customers and contracts with subcontractors. Information that you would expect to find in the contracts includes the following:

- Job number
- Type of contract
- Contract price
- Original cost estimate and related gross profit
- Billing and retention terms
- Provisions for changes in contract prices and terms, such as escalation, cancellation, and renegotiation
- Penalty or bonus features relating to completion dates and other performance criteria
- Bonding and insurance requirements
- Location and description of project

.51 The authoritative guidance on auditing contractors is contained in the AICPA Audit and Accounting Guide *Construction Contractors* (product no. 012587kk). Included in this Audit and Accounting Guide is Statement of Position (SOP) 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, (AICPA, *Technical Practice Aids*, ACC sec. 10,330), which is the primary authoritative accounting guidance for construction contractors.

Fixed-Price Contracts

.52 A fixed-price contract is generally considered the riskiest for both the contractor and the auditor. As the riskiest contract type in an audit, you must employ all of your available audit tools to verify the total contract amount, the collectibility and likelihood of contract changes, and the status of the contract as of the balance sheet date. Auditing procedures related to revenue for this type of contract may consist of the following:

- Confirming contract terms and status
- Testing the contractor's business functions over estimating, billing, collection, project management, and generally all controls that influence the contractor's ability to manage estimates
- Testing the contractor's subsequent performance
- Measuring the contract job gain or fade trends by comparing the contractor's ability to estimate by using original estimated contract revenues and costs and comparing these figures to period end amounts and final contract amounts for a period of several years
- Using other analytical procedures

Cost-Type Contracts

.53 Cost-type contracts present a lower level of risk. With this type of contract, the audit procedures should be focused on the contract provisions concerning the definition of contract costs and the associated revenue entitlements of the contractor. If the contract clearly defines allowable costs, overhead calculations and allocations, agreed-upon profit, and payment terms, the auditor's job is easier and can then be focused on the realization of collection and the creditworthiness of the owner. There are many variations of the cost-type contracts that present various degrees of concern and additional audit requirements for the auditor.

Time and Material Contracts

.54 Time and material contracts also present lower risk revenue issues for the auditor as long as the contractor has identified all of its costs, including its overhead costs, and has defined its required gross profit.

The audit focus in this type of contract comes back to the contractor's internal controls and the ability to fully identify and capture its costs—direct, indirect, and overhead. Auditing procedures that can be employed could include internal controls testing and subsequent billings and collections of the outstanding time and material costs as of the period end.

Unit-Price Contracts

.55 Unit-price contracts are often variations of fixed-price contracts. Under a unit-price contract, the contractor knows the amounts that will be due as each unit is performed. Audit procedures in this area may consist of the following:

- Verifying the work performed with outside parties through the use of confirmations, including the terms of the contract
- Verifying the terms of the contract concerning the provisions for unit prices, their amounts, and contract billing terms by examining the contract
- Determining the revenue balance available to be performed and billed under the contract

.56 Other procedures to be applied may be similar to the procedures applied to fixed-price contracts.

Service Contracts

.57 Service contracts can include a blend of other contract types, such as time and material. You should separate these other contract type elements and perform the appropriate testing under those categories. A service contract can consist of labor only or labor and material. The terms of the contract should be reviewed for the risks that the contract presents to the contractor and the audit. For example, does the contract cover maintenance only with breakdowns covered at fixed time and material rates and costs? The risk of loss on such a contract would be minimal. On the other hand, does the service contract provide for the provision of a guaranteed service, such as uninterrupted power (which may be necessary for the function of a hospital)? This type of contract would require more extensive auditing procedures that would involve auditing the contractor's ability to produce reliable estimates similar to a fixed-price contract. If a service contract has only provisions for maintenance and the minimal supply of parts, the revenue auditing procedures may consist of the following:

- Scheduling the earned and unearned parts of the contract and recording the unearned part as deferred revenue.
- Examining the contractor's system that tracks the performance of the required or contractual provision of periodic services, if any, to see that they have been performed. This could result in a liability that would need to be measured.
- Determining whether the contractor has the ability to cost each service contract to determine whether the service contract requires a loss reserve.
- Testing the service revenues and costs analytically to see if the gross profit earned is typical compared to industry averages.
- Testing the contractor's prior ability to estimate with reasonable certainty. Service contracts that have provisions that require estimates should be tested in a manner similar to a fixed-price contract.

Construction Management Contracts

.58 Construction management contracts can also be a blend of the various types of contracts described and defined in the previous sections. The particular attributes or details of the contract should be examined to see if these other attributes exist. For example, the contract may call for the contractor to act as agent under a fee arrangement but permit it to perform certain parts of the construction if it deems that it can perform the work for five percent less than the lowest bidder. The construction part will need to be tested and audited as a construction contractor. The audit risk that a construction management contract presents will depend on the contract terms. If a construction management contract calls for a fee based upon a percentage of costs, audit risk is lower. On the other hand, if the construction management contract fee is a fixed price, you will need to examine the revenue recognition methods and test the progress to date. For example, if a contractor estimates that it will take 1,000 man-hours to earn the construction management fee of $500,000 over an 18-month period, you can examine the hours performed to date and the estimate of the hours to complete. In addition, the calculation of hours to date to total estimated hours can be compared to the physical estimate of percentage of completion for reasonableness. Testing of the contractor's internal controls and prior ability to estimate with reasonable certainty can also be used to gather audit evidence.

Design-Build

.59 The design-build contract is a new type of contract and is continuing to be an increasingly popular vehicle for contract performance. The audit risk involved in this type of contract focuses on the detail of the contract terms. Is the contractor going to be reimbursed for its costs under a cost-type arrangement? Is the contract broken out into various pieces where the contractor bids separately on the design and construction work in different phases? The answers to these questions and other facts and circumstances may lead you to make judgment calls about the appropriateness of the use of audit procedures described under the contract types listed in the previous sections. If a design-build contract outcome is uncertain, you should consider whether the contract should be accounted for under alternative revenue recognition methods such as zero profit or the completed-contract method until measurements are reliable and more certain.

Contracts With Incentive Provisions

.60 All the contract types described in the previous sections may have provisions for incentives. The audit of a contract that includes incentive provisions may consist of the following procedures:

- An examination of the contract terms to determine the conditions for incentive achievement
- A test to see if the conditions for achievement have been met
- Confirmation of incentive earnings
- Subsequent billing and collection of incentive revenues
- Analysis of whether incentive provisions can be earned incrementally or are under "all or none" terms
- A determination of whether the incentive should be considered a gain contingency properly accounted for under Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*

Using Hedging Transactions to Manage Risk

.61 Many construction contractors enter into hedging transactions to manage various risks. The most common risks that lend themselves to hedging strategies include those related to interest rate or foreign currency exposures. Construction contractors may also enter into weather derivative contracts (that is, contracts indexed to climatic or geological variables). FASB Emerging Issues Task Force (EITF) Issue No. 99-2, "Accounting for Weather Derivatives," prescribes the accounting treatment for weather derivatives.

.62 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, provides the primary guidance on accounting for hedging transactions. In addition, you should be familiar with AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1), and the AICPA's Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012527kk), which provides practical guidance to accompany AU section 332. The guide includes an overview of derivatives and securities and how various entities use them, a summary of accounting guidance, and a discussion of the three elements of the auditing framework: inherent risk, control risk, and substantive procedures. Additionally, the guide includes practical illustrations and case studies.

.63 If your client holds derivative instruments or engages in hedging transactions, you should become thoroughly familiar with the authoritative accounting and auditing literature relating to derivatives.

Debt Covenants

.64 Loan terms, including covenants, are worthy of special attention for audits of construction contractors. Violation of a loan covenant can have a material effect on the financial statements and on the organization's ability to continue operations. You should carefully review loan agreements and test for compliance with loan covenants. In this regard, consider any "cross default" provisions, which are violations of one loan covenant that affect other loan covenants. Keep in mind that any debt with covenant violations that are not waived by the lender for a period of more than one year from the balance sheet date may need to be classified in the balance sheet as a current liability.

.65 As always, review the debt payment schedules and consider whether the company has the ability to pay current debt installments or to refinance the debt if necessary. When making an evaluation, it is important to remember that it is quite possible that the company may not generate as much cash flow as it did in previous years due to current economic and industry conditions.

Auditing Estimates

.66 Remember that the audit of a construction contractor's financial statements is essentially an audit of the contractor's ability to estimate. Therefore, it is critical that you gain an understanding of the contractor's significant estimates and assumptions that are used in operating the business. AU section 342, *Auditing Accounting Estimates* (AICPA *Professional Standards*, vol. 1), provides a list of procedures that serve as a good basis for auditing the estimates found in a construction contractor's financial statements.

.67 In many situations, the auditor assesses the reasonableness of an accounting estimate by performing procedures to test the process used by management to make the estimate. The following are procedures the auditor may consider performing when using this approach:

a. Identify whether there are controls over the preparation of accounting estimates and supporting data that may be useful in the evaluation.

b. Identify the sources of data and factors that management used in forming the assumptions, and consider whether such data and factors are relevant, reliable, and sufficient for the purpose based on information gathered in other audit tests.

c. Consider whether there are additional key factors or alternative assumptions about the factors.

d. Evaluate whether the assumptions are consistent with each other, the supporting data, relevant historical data, and industry data.

e. Analyze historical data used in developing the assumptions to assess whether the data is comparable and consistent with data of the period under audit, and consider whether such data is sufficiently reliable for the purpose.

f. Consider whether changes in the business or industry may cause other factors to become significant to the assumptions.

g. Review available documentation of the assumptions used in developing the accounting estimates and inquire about any other plans, goals, and objectives of the entity, as well as consider their relationship to the assumptions.

h. Consider using the work of a specialist regarding certain assumptions (AU section 336, *Using the Work of a Specialist* [AICPA, *Professional Standards*, vol. 1]).

i. Test the calculations used by management to translate the assumptions and key factors into the accounting estimate.

.68 Based on the auditor's understanding of the facts and circumstances, he may independently develop an expectation as to the estimate by using other key factors or alternative assumptions about those factors.

.69 Events or transactions sometimes occur subsequent to the date of the balance sheet, but prior to the date of the auditor's report, that are important in identifying and evaluating the reasonableness of accounting estimates or key factors or assumptions used in the preparation of the estimate. In such circumstances, an evaluation of the estimate or of a key factor or assumption may be minimized or unnecessary as the event or transaction can be used by the auditor in evaluating their reasonableness.

Using the Work of a Specialist

.70 It may be necessary to use a specialist (such as construction engineer) to perform or assist in job site visits or other audit procedures. The specialist may help you gain assurance as to the percent complete, identify problems on the job, and identify possible uninstalled materials or inventoriable items. In addition, the specialist will generally be able to communicate effectively with job site personnel.

.71 Engaging a specialist for gaining an understanding of internal controls, tests of controls, substantive tests, and analytical procedures requires awareness of guidelines available in the authoritative literature. According to paragraph .06 of AU section 336, specialized assistance is advisable for auditors who

> . . . may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skills or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate audit evidence.

.72 Involvement of a specialist should be considered during audit planning because of the lead time necessary to contract for a specialist's services and the time required for you to obtain the minimum knowledge necessary to supervise the specialist. According to paragraph .10 of AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1),

> If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should have sufficient computer-related knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified procedures will meet the auditor's objectives; and to evaluate the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The auditor's responsibilities with respect to using such a professional are equivalent to those for other assistants.

.73 The use of a specialist is an excellent way to learn the construction contractor's business and can be helpful from initial planning through site visits and fieldwork.

Going Concern

.74 Business failure among construction contractors is common for many reasons. The construction industry is complex and requires a great deal of planning and organization, especially when dealing with long-term contracts and labor and materials issues that are dictated by forces external to the entity. The volatility of the housing market has compounded that problem over the past year and will continue to be an issue in the coming years. Some examples of indicators that there could be substantial doubt about the ability of the entity to continue as a going concern include the following:

- Negative trends such as recurring operating losses, working capital deficiencies, or negative cash flows from operating activities
- Other indications of possible financial difficulties such as loan covenant violations or denial of usual trade credit from suppliers and denial of surety credit
- Internal matters such as labor difficulties; turnover in key positions such as CFO, controller, or project managers; or substantial dependence on the success of a particular project
- Lack of significant backlog to cover overhead
- External matters such as legal proceedings or an uninsured catastrophe

.75 In addition to these matters, the current uncertain economic situation may cause you to have a heightened sense of awareness of a company's ability to continue as a going concern. AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), addresses the auditor's responsibilities to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern.

.76 Consider testing to see if the gross profit in the backlog will be sufficient to carry the company through the remainder of the next fiscal year. You should be careful in this evaluation if the client's history indicates significant gross profit fade. If this is the case, the analysis should be discounted when making an overall evaluation of the entity's ability to continue as a going concern.

.77 Many contractors are seeing very large increases in their insurance rates. Some contractors cannot obtain commercial general liability insurance or find that it is available from only one or a few carriers. Such situations will affect the contractor that has a long-term contract bid initiated when insurance rates were lower and could call into question the going-concern assumption for a contractor that cannot obtain insurance.

.78 Also be aware of other issues that may affect the entity's ability to continue as a going concern, such as the following:

- *Inadequate capitalization.* Although many construction contractors have an understanding of the amount of capital that is required to start their businesses, some fail to take into account the funds that will be required to sustain the new companies until cash begins to flow in. Adequate working capital, typically 5 percent to 10 percent, and the ability to obtain additional bank financing when needed are signs that a contractor has sufficient resources to support operations. Additionally, the use of short-term financing affects working capital calculations. Using this type of financing to purchase assets with long cost recovery periods, such as construction equipment, might absorb cash needed for current operations and can result in reduced surety bonding capacity.
- *High employee turnover.* A construction company cannot succeed without experienced estimators, project managers, and superintendents. Familiarity with the company's strengths and resources improves the accuracy of bids and improves the likelihood of completing projects within budget

and profit projections. Turnover in these positions can result in underbidding of jobs and lower job profitability through inefficient use of resources.

- *New types of projects.* In the same way that you would not expect a cardiologist to perform brain surgery, each construction specialty area requires a skill set that is specific to that type of project. When contractors venture into new areas (for example, a highway contractor decides to build an office building), new business risks and issues arise that may affect performance and profitability.
- *Increase in job size.* New risks and challenges arise when contractors bid on jobs that are substantially larger than their normal jobs. A $5 million project is much more complex than a $500,000 job in terms of the resources, knowledge, and project management skills required.
- *New geographic areas.* A contractor in South Carolina faces different issues than a contractor in Montana. It is more difficult to manage a contract in a region of the country that you are not familiar with. In addition, there may be issues with finding an adequate labor supply; assessing the quality of subcontractors available in that area; establishing relationships with new suppliers; learning and complying with local codes and regulations, lien laws, and tax laws; and becoming familiar with differences in weather and site conditions.
- *Rapid growth.* Taking on too many projects at one time can stretch a contractor's resources past the point of job quality and profitability. If a contractor does not have access to the appropriate number of experienced project managers, existing managers may be spread too thin or additional managers may be hired who do not have the necessary experience. Additionally, if controls or administrative staffing levels are inadequate, billings may not be accurate or timely, which could negatively affect cash flows and result in subcontractors, suppliers, and employees not being paid in a timely manner or even result in loss of job profit.

.79 In summary, when evaluating management's plans to continue as a going concern, an appropriate level of professional skepticism is important. The company's assumptions about its ability to continue as a going concern should be scrutinized to assess whether they are based on overly optimistic or "once in a lifetime" occurrences.

Cost Shifting

.80 Cost shifting is an accidental or deliberate misstatement in a contractor's job cost system that can have a substantial effect on the contractor's balance sheet and income statement. The most dangerous type of cost shifting involves moving or misdirecting job costs from an unprofitable job to a profitable job. Cost shifting occurs most frequently when field-level managers attempt to manipulate contract profitability.

.81 The effect on the balance sheet from cost shifting is that underbillings (costs and estimated billings in excess of billings) increase and overbillings (billings in excess of costs and estimated earnings) decrease. However, if a loss contract is involved, the accrued liability for loss will be affected, which in turn will affect deferred taxes if an entity is a C-corporation. Underbillings should be rare, especially on contracts that are over 50 percent complete. You should look at underbillings skeptically and investigate each underbilling carefully.

.82 Certain standard audit procedures may not detect cost shifting. Tests designed to search for unrecorded liabilities or to detect improper cutoff will only provide assurance that all costs have been reported in the proper period. Tests designed to locate improperly booked billings or receivables will detect no exceptions. Audit test work for cost shifting must focus on the accuracy of job costing procedures as well as on the cost classification and coding process.

.83 Intentional cost shifting constitutes fraud. An audit is designed to provide reasonable assurance that the statements are free of material misstatement caused by fraud; therefore, consider the following steps in this regard:

- *Test job costs for accuracy.* An audit of a construction contractor should include tests of contract costs and related cost coding.
- *Compare job costs to bid documents.* Because contractors should estimate contract costs in the same manner in which they record job costs, you should test job costs for significant contracts by comparing each item of job cost to the original cost estimate. In addition, field personnel can shift costs by directing a subcontractor to invoice the wrong contract. Audit tests that compare subcontract costs to original bid documents are designed to detect this type of cost shifting.
- *Test revised profitability estimates to bid documents.* Often, cost shifting is accompanied by an upward revision in contract profitability. Consider testing revised profitability estimates in the same manner in which job costs are compared to bid documents.
- *Perform analytics on job cost components.* Contractors who perform similar types of work should have comparable costs from job to job. For example, a grading contractor with equipment-related costs equal to 40 percent of overall direct costs should have a similar relationship on other jobs.
- *Review allocations of indirect job costs.* Cost shifting is often hidden in the allocation of indirect costs, such as internally owned equipment costs, shop costs, insurance, and labor burden. Perform periodic tests to ensure that indirect costs are allocated properly to each job.
- *Perform a fade analysis.* Consider preparing two fade schedules. One schedule compares each job's prior period profitability estimate to the current estimate or actual results. The second schedule restates prior period uncompleted contract schedules using revised profitability figures. Each of these schedules will help you determine which contracts have had unusual fluctuations in profit.
- *Examine bid spreads.* You should compare your client's bid to the second place bidder and to the average bid of all of the bidders. If a contractor is more than 5 percent to 10 percent below other bidders, the contractor may realize little or no profit. Such a job is a prime candidate for cost shifting.
- *Compare profitability estimates to historical results.* A contactor may attempt to hide cost shifting by increasing profit estimates on uncompleted jobs. When this occurs, the gross profit percentages on uncompleted jobs will often exceed the contractor's historical results. You should also consider comparing uncompleted contract gross profit percentages to completed contract percentages.

Accounting Issues and Developments

Revenue Recognition

.84 As noted previously in this alert, SOP 81-1 provides guidance on revenue recognition for construction contractors. SOP 81-1 requires a contractor to use the percentage-of-completion method for recognizing revenue whenever it can produce reasonably dependable estimates. There is a rebuttable presumption that the percentage-of-completion method will produce reasonably dependable estimates.

.85 The completed-contract method should be used only in instances in which reasonable, dependable estimates of construction costs cannot be made. The completed-contract method may also be used if there are no material differences between that method and the percentage-of-completion method. Situations in which there are no material differences may occur when a contractor performs primarily short-term contracts, for example, a small plumbing contractor whose projects are completed in such a short time span that the work is somewhat analogous to the manufacture of shelf production items for sale.

.86 The revenue recognition method should be disclosed in the financial statements. If the percentage-of-completion method is used, the financial statements should disclose the method of computing percentage-of-completion (for example, cost-to-cost). If the completed contract method is used, the reason for selecting the method should be indicated.

.87 In December 1999, the Securities and Exchange Commission (SEC), in an attempt to fill the gap in general revenue recognition guidance, released Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements.* SAB No. 101 was superseded by SAB No. 104, *Revenue Recognition*, in December 2003. Financial statement preparers and auditors of public construction companies are most directly affected by SAB No. 104. However, auditors of nonpublic companies may also find the information contained in SAB No. 104 useful. The issuance of SAB No. 104 did not affect the guidance for revenue recognition contained in SOP 81-1.

Recent Auditing and Attestation Pronouncements and Related Guidance

.88 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.89 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review AICPA Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120);

Recent Auditing and Attestation Pronouncements and Related Guidance	
	• Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks; • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See "AICPA Risk Assessment Standards" in this alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue Date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue Date: December 2005	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective for periods ending on or after December 15, 2006.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA TPA TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Recent Auditing and Attestation Pronouncements and Related Guidance	
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice alert responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice alert provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.90 In December 2006, the Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.91 SAS No. 114 recognizes the importance to the audit of effective two-way communication. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.92 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.93 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.94 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.95 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320). However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the PCAOB redefined these terms, which now differ from SAS No. 112 does the following.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.

- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.96 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses and that are then communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.97 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.98 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.99 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.100 One issue that has arisen in audits of smaller entities is the increase in costs as a result of the time the auditor spends documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.101 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[1] How an auditor responds to a client's internal control weakness, in terms of designing and

---

[1] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.102 The requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.103 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.104 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.105 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.106 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.107 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation*, (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.108 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.109 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.110 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.111 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.112 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information that it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.113 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scalable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.114 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.115 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.116 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

(continued)

Recent Accounting Pronouncements and Related Guidance	
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*, vol. 1) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.117 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the construction industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

Fair Value Measurements

FASB Statement No. 157

.118 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.119 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying generally accepted accounting principles (GAAP). FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

FASB Statement No. 159

.120 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value.

The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.121 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

On the Horizon

.122 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the construction industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.123 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.124 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.125 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.126 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.127 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the

PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.128 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.129 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.130 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.131 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.132 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*

- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*

- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.133 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.134 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.135 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.136 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.137 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB and IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.138 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.139 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, which is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.140 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.141 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.142 The following are various resources that practitioners engaged in the construction industry may find beneficial.

Publications

.143 Practitioners may find the following publications useful with respect to the construction industry:

- Audit and Accounting Guide *Construction Contractors* (2007) (product no. 012587kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)

- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Compilation and Review—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist Supplement and Illustrative Financial Statements for Construction Contractors* (product no. 008928kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.144 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.145 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.146 Among the many courses, the following are specifically related to the construction industry:

- *Construction Contractors: Accounting Auditing and Tax* (product no. 736431kk). Master the fundamentals of the construction industry with this highly effective course. An outstanding value, it provides a thorough industry overview and includes AICPA authoritative publications. Content is tailored to the needs of both practitioners and industry financial professionals.

- *Construction Contractors Advanced Issues* (product no. 731993kk). Get hands-on advice on the accounting, audit, and tax issues that make the construction industry a high risk client. Address difficult issues such as look back calculations, measuring progress of construction contracts, and overhead allocations. Enhance your skills today to reduce the risk of your next construction engagement.

.147 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.148 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the construction industry include the following:

- *Construction Contractors: Audit Risks in the Construction Industry*
- *Construction Contractors: The Industry and Its Accounting*
- *Construction Contractors: Sureties, Audit Planning and Preliminary Analytical Procedures*

.149 To register or learn more, visit www.cpa2biz.com.

Webcasts

.150 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.151 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.152 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.153 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.154 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.155 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.156 The National Construction Industry Conference is held in early winter in Las Vegas, NV. This conference is a two-day event for CPAs, CFOs, controllers, and members of the surety industry who serve the construction industry. It provides a national perspective from industry leaders about the latest construction industry trends and recent compliance issues. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA CAQ

.157 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.158 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

Industry Web Sites

.159 The Internet covers a vast amount of information that may be valuable to auditors of construction companies, including current industry trends and developments. Some of the more relevant sites for auditors with construction clients include those shown in the appendix of this alert. The construction practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.160 This Audit Risk Alert replaces Construction Contractors Industry *Developments—2006/07*.

.161 The Audit Risk Alert *Construction Contractors Industry Developments—2007/08* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to ccole@aicpa.org or write to:

Investment Companies Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
INVESTMENT COMPANIES INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of investment companies with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Kenneth R. Biser, CPA, MBA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Stephan Callahan, KPMG LLP
Rajan Chari, Deloitte & Touche LLP
Jamie Eichen, Ernst &Young LLP
Robert Fabio, Deloitte & Touche LLP
Brian Gallagher, Deloitte & Touche LLP
Joseph Grainger, Ernst &Young LLP
Richard Grueter, PricewaterhouseCoopers LLP
Gregory Levy, Kaufman, Rossin & Co., PA
Michael Maher, U.S. Venture Partners
Aaron Masek, BISYS Fund Service
Brent Oswald, KPMG LLP
Irina Portnoy, AICPA
Maryna P. Tully, Deloitte & Touche LLP

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your investment company audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The investment companies industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter final estimates, GDP increased at an annual rate of 3.8 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then, at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points (bp) to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 bp to 5.25 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 bp. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

Industry Trends and Conditions

Subprime Trends and Events

.13 On May 17, 2007, Ben S. Bernanke, chairman of the Board of Governors of the Federal Reserve System, commented that the rise in delinquencies among subprime adjustable rate mortgages was due to several causes. These causes include rising interest rates, moderate economic growth, decline in the housing market, and regional economic problems.

.14 Bernanke noted that the practices of several mortgage originators to loosen underwriting standards contributed to the problems in the subprime market. As the underlying pace of mortgage originations slowed, the demand for securities with high-yield rates strengthened and some lenders loosened underwriting standards. The loosened standards undoubtedly contributed to defaults occurring within a few months of origination. Bernanke explained that mortgages sold generally pass a large amount of risk to the investor, rather than being borne primarily by the company that originated the loan, which may have contributed to the loosening of underwriting standards. In addition to weakened standards, incentive structures that tied originator revenue to the number of loans finalized, rather than the quality of loans made, are also a cause for concern.

.15 Despite subprime woes, Bernanke indicated that the market had shown signs of self-correction. While credit spreads on new subprime securities have risen, the volume of subprime-mortgage-backed securities issued has slowed. That does not mean, however, that the subprime market has evaporated. While some subprime lenders have gone out of business, other entities, such as hedge funds and investment banks, have started to purchase subprime-mortgage-backed securities. Importantly, Bernanke pointed out that the majority of troubled lenders have not been institutions with federally maintained deposits.

.16 The repercussions of these events continue to be felt in the financial markets. Liquidity in the market for subprime-mortgage-backed securities has deteriorated significantly since early July, when the major rating agencies began to downgrade subprime mortgage ratings on a number of issues, including the increased numbers of delinquencies and foreclosures. Additionally, a number of highly leveraged hedge funds (and other investment vehicles) breached various borrowing and margin covenants, which resulted in portfolio liquidations both of subprime-asset-backed securities and, at times, other unrelated investments. Price quotations for subprime-asset-backed securities have become increasingly difficult to obtain and, when obtained, exhibit wide, bid-asked spreads. Further, actual transactions periodically occur at values significantly different from quoted prices, due both to the general market illiquidity and the presence of distressed sellers.

.17 One major spillover effect of these events has been in the market for short-term commercial paper, particularly securities backed by various financial assets. Some of this paper, issued by structured investment vehicles (SIVs), other *conduit* structures, and hedge funds, was supported, in part, by subprime mortgage securities. The paper was rated investment grade because the value of the collateralizing securities was significantly higher than the outstanding debt. In some cases, the deterioration in the subprime market caused this *overcollateralization* to be reduced below the levels permitted under the commercial paper issuance program, resulting in the unexpected extension of maturities or the repayment of maturing paper through drawdowns on bank lines of credit because the issuers could not sell new paper on the market. The resulting uncertainty about these issuers' outstanding commercial paper, and the potential for other issuers to encounter the same difficulties, caused the market for asset-backed commercial paper to exhibit many of the same signs of illiquidity apparent in the subprime market. In some cases, issuers who had not breached covenants, but were perceived as having some of the same risk characteristics of troubled issuers, had difficulty selling commercial paper. (This broader market illiquidity was one reason for the decrease in the discount rate mentioned earlier.)

.18 Various money market funds (both registered and unregistered) have acknowledged investments in troubled paper. They have enhanced their monitoring procedures of differences between net asset value as determined using amortized cost and market values of securities, as required by Rule 2a-7 under the Investment Company Act of 1940 or other equivalent regulations.

.19 More generally, these events have caused what has been termed a *repricing of risk* in the financial markets. The spreads over riskless rates on high-yield bonds and loans have increased and there have been reports that proposed leveraged buyouts of industrial companies have had to accept higher borrowing costs and stricter financial covenants in order to bring the transactions to completion. Further, it has been reported that several major investment banks have had significant difficulty selling to third-party interests to complete recent transactions that had lower yields and more generous financial covenants.

.20 Auditors should be aware of the increased risk posed by current market conditions and develop or modify audit procedures accordingly. Among other things, auditors may consider:

- The overall effect on risk of an entity's portfolio of subprime mortgages and related investments (for example, asset-backed commercial paper or high-yield debt or loans). The auditor may consider the entity's internal controls, as well as policies that affect the management and monitoring of these investments. In particular, the auditor may consider the extent to which the entity analyzes the collateral supporting various asset-backed securities and whether the entity has enhanced its monitoring procedures in light of the deterioration in collateral that has been exhibited.

- The increased difficulty of obtaining reliable valuations for certain types of asset-backed securities, given the decrease in market liquidity. Again, the auditor may consider the entity's internal controls over valuation, in particular the extent to which it monitors valuations obtained from brokers and external pricing services for consistency with its own observations of market conditions, as well as the involvement of valuation committees or other internal review groups independent of portfolio managers in assessing the day-to-day reasonableness of security valuations and overriding quotations that appear to be unrepresentative. This is of equal importance for money market funds that are permitted to use the amortized cost valuation method only if the results are not materially different from those obtained by valuing securities using current market quotations.
- The existence of financial covenants within the vehicle and its compliance with those covenants to the extent an investment vehicle has employed leverage. The auditor may obtain an understanding of management's ongoing compliance monitoring process. If the vehicle is no longer in compliance with the covenants, the auditor should assess the appropriate accounting and reporting implications, including AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1).

.21 In certain instances, the auditor may need special skills or knowledge to plan and perform auditing procedures for institutions that deal with subprime-mortgage-backed securities. AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1), states that for some derivatives and securities, generally accepted accounting principles (GAAP) may prescribe presentation and disclosure requirements. Furthermore, AU section 332 advises the auditor to consider the form, arrangement, and content of the financial statements (including the notes) when evaluating the adequacy of presentation and disclosure. Auditors may also consider using a specialist when determining how to audit an entity that deals in derivatives. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance on the use of a specialist during an engagement.

Impact on Investment Companies

.22 As a result of the conditions in the subprime markets, several business and accounting issues arise, many of which relate to the measurement of the fair value of securities in the current illiquid market and the devaluation of commercial paper or other securities in money market funds or held as collateral for security lending transactions. Moreover, pricing services, such as Interactive Data Pricing and Reference Data, have issued press releases to inform users that they are experiencing difficulties in obtaining a typical amount of consistent market information in the production of valuations of subprime-related securities. Therefore, certain investment companies have enhanced their procedures to respond to these issues including, among other things, more frequent shadow pricing in money market funds and close monitoring of the portfolios for exposure to these markets and the associated valuations of these securities.

.23 Accordingly, auditors should consider the procedures and controls put in place by management to identify problem credits and pricing concerns; validate the reliability of pricing or institute fair-value procedures, or both, if necessary; monitor the collectibility of accrued income; and modify reporting and disclosures based on the exposure of these markets in their funds. Auditors should also consider the need to enhance audit procedures to ensure prices obtained from pricing services are reasonable, including the use of multiple pricing sources or valuation experts to review any pricing models or fair value methodologies put in place, or both. Auditors' procedures need to be flexible to respond to changes in the market conditions.

Beyond Subprime

.24 There is growing speculation that the problems and risks associated with subprime mortgages may spread to other financial transactions. According to a June 25, 2007 article in the *Wall Street Journal*, entitled

"Beyond Subprime, Risks Abound," the bond market is one industry that is already feeling the pressure from subprime mortgages. According to Emerging Portfolio Fund Research Global, investors pulled more than $1 billion out of high-yield bond funds in the two weeks leading up to the June 2007 article. Another concern is the way adjustable rate mortgages will react as subprime woes continue to trickle down the mortgage industry.

Legislative and Regulatory Developments

SEC Division of Investment Management Responds to Fund's Use of Rule 22c-2 Information for Marketing Purposes

.25 The Securities and Exchange Commission (SEC) Division of Investment Management recently responded to funds use of Rule 22c-2 information for marketing purposes. Rule 22c-2, adopted by the SEC in 2005 and amended in 2006, requires financial intermediaries to provide certain shareholder identity and trading information to investment companies for the purpose of monitoring prohibited market-timing trading activity. The rule became effective October 16, 2007. In general, the privacy rules under the Gramm-Leach-Bliley Act require financial institutions, including investment companies, to provide consumers with notice and an option to opt out before institutions are permitted to share nonpublic consumer information with intermediaries. There are two exceptions to the rule: processing and servicing transactions made at the consumers' request and complying with applicable legal requirements. The use of any Rule 22c-2 information obtained by investment companies under an exception is limited to the specified purpose. The SEC reminded investment companies that use of the information for other purposes is expressly forbidden under the Gramm-Leach-Bliley Act's privacy rules, unless the intermediaries' consumers have been given notice and the opportunity to opt out of the information sharing process. The SEC's statement is available at www.sec.gov/divisions/investment/guidance/ici082107.pdf.

SEC Adopts New Fund of Funds Rules Under the Investment Company Act of 1940

.26 In June 2006, the SEC issued final amendments to rules adopted under Section 12(d) of the Investment Company Act of 1940 (the 1940 Act). New Rules 12d1-1, 12d1-2, and 12d1-3 became effective July 31, 2006 and, among other things, permit the adoption of cash-sweep arrangements in which a fund may invest available cash in a money market fund, permit a fund investing in other affiliated funds also to hold direct investments in any other securities, and broaden limits on sales loads charged by a registered fund investing in shares of other funds that themselves are subject to sales loads. The SEC also adopted amendments to Forms N-1A, N-2, N-3, N-4, and N-6, effective with new registration statements filed on or after July 31, 2006 and annual updates to registration statements filed on or after January 1, 2007, to require disclosure of expenses of acquired funds that investors in an acquiring fund will bear indirectly. See SEC Release No. 33-8713 under the Securities Act of 1933 and Release No. IC-27399 under the 1940 Act for more information. The required registration statement expense disclosures do not affect the presentation of expenses or expense ratios in financial statements.

.27 In May 2007, the SEC Division of Investment Management staff released guidance, in a question-and-answer format, about certain issues raised in connection with the disclosure amendments referred to above. These responses can be obtained from the SEC's Web site at www.sec.gov/divisions/investment/guidance/fundfundfaq.htm.

New Rules Permitting SEC Enforcement Action for Fraud by Advisers to Unregistered Investment Vehicles

.28 In August 2007, the SEC adopted a new rule under the Investment Advisers Act of 1940 prohibiting advisers for pooled investment vehicles from making false or misleading statements to, or otherwise defrauding, investors or prospective investors in those vehicles. The SEC would be able to bring action under these rules even if the adviser or the pool was not registered with the SEC. The intent of the rule was to clarify the SEC's ability to bring enforcement actions against advisers for defrauding investors or prospective investors in light of a 2006 court decision overturning rules that would have required registration with the SEC of certain advisers to unregistered investment pools. In that decision, the court ruled that, for purposes of the Investment Advisers Act, the term *client* referred to the pool, not the investors in the pool, making it unclear whether the SEC's jurisdiction extended to fraud against pool investors.

Data Tagging of Prospectus Risk/Return Summary Information

.29 In July 2007, the SEC adopted rule amendments to extend its current program to voluntarily submit financial information tagged in eXtensible Business Reporting Language (XBRL) format to the risk/return information contained in mutual fund prospectuses. The risk/return summary data may be filed by any mutual fund without SEC preapproval simply by submitting the information in the required manner as an attachment to the related filing on the SEC's Electronic Data Gathering, Analysis, and Retrieval (EDGAR) system. The goal of this amendment was, as stated in the SEC's adopting release, to "help to streamline the delivery of mutual fund information and provide investors, analysts, and others with improved tools to compare funds based upon, among other things, costs, investment objectives, strategies, and risks." The amendments became effective August 20, 2007. The release is available from the SEC's Web site at www.sec.gov/rules/final/2007/33-8823.pdf.

Short Selling Amendments

.30 In August 2007, the SEC issued a final rule *Amendments to Regulation SHO*, (Release No. 34-56212), which amends the regulation of the same name. The amendments are intended to reduce the number of persistent fails to deliver certain equity securities by eliminating the grandfather provision of Regulation SRO. Additionally, the SEC is also amending the close-out requirement of the regulation that a seller is "deemed to own" (related principally to securities at one time subject to SEC Rule 144). Lastly, the amendments update the market decline limitation referenced in the regulation. This final rule became effective October 15, 2007.

.31 During the same time, the SEC adopted amendments to Regulation M (Release No. 34-56206) to further safeguard the integrity of the capital-raising process and protect issuers from manipulative activity that can reduce an issuer's offering proceeds and dilute security-holder value. The amendments are designed to eliminate the covering element of the former rule in order to prevent strategies designed to conceal the covering of short sales with offered securities in the restricted period surrounding an offering. This final rule became effective October 9, 2007.

Reporting Emphasis-of-a-Matter Paragraph

.32 As a general rule, the more complex or illiquid the investments, the greater the inherent uncertainty in their fair value and the more likely fair values are to be based on management's estimates. As the inherent uncertainty in the estimate increases, as well as the significance of such investments to the financial statements, auditors may consider inclusion of an emphasis-of-a-matter paragraph in the auditors' report, such as the following example provided in *Alternative Investments Audit Considerations: A Practice Aid for Auditors*, issued by the AICPA in 2006, tailored for the specific facts and circumstances:

> "As explained in note X, the financial statements include investments valued at $ _______ (____ percent of net assets), whose fair values have been estimated by management in the absence of readily determinable fair values. Management's estimates are based on information provided by the fund managers or the general partners."

.33 As noted in the practice aid, "An emphasis of matter paragraph is not used to introduce information to the financial statements and neither replaces any required financial statement note disclosure nor reduces the required audit evidence needed to support an unqualified opinion. Such paragraphs are never required and are included solely at the auditor's discretion. The above emphasis of matter paragraph would be consistent with GAAP disclosures made in the financial statements."

.34 A question has arisen as to the extent the auditor could include an emphasis-of-a-matter paragraph in a filing with the SEC when a registrant had invested in alternative investments subject to the practice aid's scope. The SEC has confirmed that they will emphasis-of-a-matter paragraph paragraph as an element of an unqualified opinion on financial statements. An emphasis of matter paragraph is considered unqualified and should not be used in circumstances where a qualified opinion, or disclaimer of opinion due to a scope limitation, is otherwise appropriate. SEC Accounting Series Release No. 118 (Financial Reporting Practices No. 404.03.e) appeared to permit the use of such an emphasis paragraph, at least for filings with the SEC's Division of Investment Management; however, this release, issued in 1970, presented the emphasis paragraph as a *subject to* opinion, which was subsequently prohibited under generally accepted auditing standards (GAAS).

Financial Industry Regulatory Authority—A New Regulatory Organization

.35 Effective July 30, 2007, the regulatory arms of the National Association of Securities Dealers (NASD) and the New York Stock Exchange (NYSE) have merged into an agency named Financial Industry Regulatory Authority (FINRA). The creation of FINRA affects many different aspects of the securities industry, such as education, examinations, and registration of securities. FINRA is also dedicated to investor protection and market integrity through effective and efficient regulation and complementary compliance and technology-based services. For more information on FINRA, please visit their Web site at www.finra.org.

Agencies Release Revised Bank Secrecy Act/Anti-Money Laundering Examination Manual

.36 On August 24, 2007, the Federal Financial Examination Council released the revised Bank Secrecy Act/Anti-Money Laundering (BSA/AML) Examination Manual (manual). The revised manual reflects the commitment of federal and state banking agencies and the Financial Crimes Enforcement Network to provide consistent guidance on risk-based policies, procedures, and processes for banking organizations to comply with the BSA and safeguard operations from money laundering and terrorist financing. The 2007 edition clarifies supervisory expectations since the July 28, 2006 update.

Concept Release on Allowing U.S. Issuers to Prepare Financial Statements in Accordance with International Financial Reporting Standards

.37 In August 2007, the SEC published the *Concept Release on Allowing U.S. Issuers to Prepare Financial Statements in Accordance with International Financial Reporting Standards* (available at www.sec.gov/rules/concept/2007/33-8831fr.pdf) to obtain information about the extent and nature of the public's interest in allowing U.S. issuers of financial statements, including investment companies subject to the Investment Company Act of 1940, to prepare financial statements in accordance with International Financial Reporting Standards (IFRS) as published by the International Accounting Standards Board (IASB), while still complying with the rules and regulations of the SEC.

.38 Currently, U.S. issuers prepare their financial statements in accordance with GAAP. Under GAAP, there are some unique disclosure requirements for investment company financial statements. For example, Regulation S-X contains specific disclosure requirements for investment companies that have investments in unaffiliated issuers, investments in affiliates, securities sold short, open option contracts written, and investments other than securities.[1] Rule 6-05 of Regulation S-X permits investment companies to include a Statement of Net Assets in lieu of the balance sheet if at least 95 percent of the investment company's total assets are represented by investments in securities of unaffiliated issuers. The nonfinancial statement portion of an investment company's shareholder report may require disclosures that are based on financial statement information. For example, investment companies must include an expense table and a graphical

[1] See Rules 12-12 through 12-14 of Regulation S-X [17 CFR 210.12-12, 12-12A, 12-12B, 12-12C, 12-13 and 12-14].

representation of holdings.[2] Differences between IFRS and GAAP often result in different financial statement presentations. For example, IFRS do not require a schedule of investments or financial highlights; however, GAAP requires this information as part of an investment company's financial statements. Another example, the IFRS do not provide an exemption from consolidation of subsidiaries in an investment company, whereas GAAP provides exemptions from consolidating subsidiaries in certain areas, which could result in different treatment for master-feeder funds.[3]

.39 In July 2007, the SEC proposed to accept financial statements from foreign private issuers prepared in accordance with IFRS as published by the IASB without reconciliation to GAAP. To implement this, the SEC proposed to amend Form 20-F and change Regulation S-X to accept financial statements prepared in accordance with the English language version of IFRS, as published by the IASB without reconciliation to GAAP. In light of the ongoing convergence efforts of the IASB and the Financial Accounting Standards Board (FASB) and the movement outside the United States towards accepting financial statements prepared in accordance with IFRS, the SEC was seeking input on the concept release regarding the role of IFRS as published by the IASB as a basis of financial reporting in the U.S. public capital market by U.S. issuers. Comments were due November 13, 2007.

SEC Staff Reviews of Financial Statements

.40 **Disclaimer:** A summary of financial statement review comments issued by the SEC staff (the staff) to investment company registrants and other guidance related to issues encountered by SEC registrants follows. These comments were compiled by the AICPA Investment Companies Expert Panel and have not been approved or endorsed by the SEC or its staff.

.41 *Receivables from advisors*. The staff noted instances when amounts due to the fund from its investment advisor or other related party are not settled in a timely manner. The staff expects the receivable balance to settle with the same frequency as the advisor receives its fees (typically monthly). The staff also expects receivable balances from other related parties to settle in a similar manner. The staff expressed concern that some advisors may not have the ability to settle large outstanding receivable balances on the fund's books. The fund should not consider the receivable balance collectible to the extent that collection of some of the amount may be in doubt.

.42 *Fund marketing materials*. The staff expressed concern about instances when fund marketing materials on the registrant's Web site are not consistent with information submitted in SEC filings, such as registration or financial statements.

.43 *Expense recaptures and investment companies registered under the Investment Company Act of 1940*. The staff noted some instances when registered funds inappropriately recaptured expenses that were previously waived or reimbursed. For example, assume a fund with a December 31 fiscal period establishes an expense cap of 50 bp for the period from January 1 through June 30. Effective July 1, the fund increases it expense cap to 100 bp and applies the revised cap through December 31. It would be inappropriate for a fund to record expenses during the period from July 1 to December 31, that relate to the period prior to June 30 as a result of the rate of actual expenses being incurred being less than 100 bp, but greater than 50 bp. The staff believes that all expenses and waivers need to be tracked separately. The staff also believes that recapture between different expense cap thresholds is inappropriate.

.44 *Overaccrual of distribution fees*. Distribution fees (otherwise known as 12b-1 fees) are fees paid by the fund out of fund assets to cover the costs of distribution and shareholder service expenses. The term 12b-1 fees is derived from the SEC rule that permits such payments. A 12b-1 plan may be established as a fee

---

[2] See Items 22(d)(1) and (2) of Form N-1A.

[3] A master-feeder fund is a two-tiered arrangement in which one or more *feeder* funds hold shares of a single "master" fund in accordance with Section 12(d)(1)(E) of the Investment Company Act of 1940.

payable by the fund, based on an annual percentage of the fund's average net assets (a compensation plan) or based on an annual percentage of the fund's average net assets limited to actual costs incurred, after deducting contingent deferred sales loads received by the distributor (a reimbursement plan). Therefore, a compensation plan differs from a reimbursement plan because the latter provides for annual or cumulative limits on fees paid. Fees for both kinds of plans are treated as expenses in a fund's statement of operations.

.45 During an examination by the Office of Compliance Inspections and Examinations, the staff noted that a registrant had implemented a reimbursement 12b-1 plan, but had recorded distribution expenses in excess of the amount required to reimburse the distributor for the costs of distribution. As a result of this accrual, the net asset value per share was understated by the amount in excess of the amount required for reimbursement. It is incumbent on the fund and its distributor to have sufficient controls and procedures established to ensure the fund would not be charged an amount in excess of that due under the plan.

.46 *Failure to keep books and records and support investment valuations.* The SEC took enforcement action against a closed-end management investment company for violation of record keeping and internal control provisions of federal securities laws. The enforcement action was brought against the company because of failure to value certain securities in its private finance portfolio for which market quotations were not readily available. Because the company did not make or maintain books, records, and accounts in reasonable detail, they could not support or fairly reflect portfolio valuations. In addition, the company's internal controls failed to provide a reasonable assurance that the company valued these securities in accordance with GAAP.

.47 The company did not provide its board of directors with sufficient contemporaneous valuation documentation during the quarterly valuation processes. In some circumstances, investment values were listed on worksheets without explanation of necessary inputs or calculations. In other instances, the company changed key assumptions, valuation methods, or both when compared to prior periods without any documentation supporting such change. Finally, the company did not maintain, in reasonable detail, written documentation to support the value of certain portfolio investments that had gone into bankruptcy.

.48 Registrants should devise and maintain a system of internal controls sufficient to provide a reasonable assurance that recorded valuations comply with applicable securities laws and are consistent with GAAP. This includes periodically providing an entity's board of directors with appropriate documentary evidence to facilitate the determination of fair value of portfolio securities.

.49 *Expense tables and capitalization tables in the multifund mergers involving two or more target funds.* Item 3 of Form N-14 requires the registration statement of merging investment companies to include a table showing the current fees for the registrant and the company being acquired and any pro forma fees, if different, for the registrant after giving effect to the transaction. Item 4 of Form N-14 requires that the registrant furnish existing and pro forma capitalization amounts. Historically, registrants have disclosed multiple fee tables and capitalization tables for all combinations. Disclosing every combination of pro forma fee tables and capitalization tables may be voluminous and difficult for shareholders to understand. If registrants believe that alternative presentations of fee tables and capitalization tables are warranted, the staff recommends that registrants consult their examiner.

.50 *Periods presented for depositors filing financial statements prepared in accordance with statutory accounting principles contained in insurance product registration statements.* Items 23, 24, and 28 of Forms N-3, N-4, and N-6 permit depositors to file financial statements prepared in accordance with statutory accounting principles in lieu of GAAP if the depositor has no other reason to prepare GAAP financial statements except for use in its registration statement (the Statutory Exception). The instructions pertaining to depositor financial statements require depositors to include financial statements and schedules required by Regulation S-X. Rule 3-02, *Consolidated Statements of Income and Changes in Financial Position of Regulation S-X*, requires, among other things, audited consolidated statements of income and cash flows for each of the last three fiscal years. However, the staff discovered that some depositors, relying on the Statutory Exception, presented these statements and the statements of changes in capital and surplus for two years in their annual updates to the insurance products registration statement. The staff reminds registrants that Rule 3-02 of Regulation S-X applies equally to all depositors, regardless of the basis of accounting used to prepare the depositor's financial statements. Depositors relying on the Statutory Exception are required to include statements of income, cash flows, and changes in capital and surplus for the last three years when updating their registration statements.

Audit and Attestation Issues and Developments

Report on Internal Control Required by the SEC Under Form N-SAR

.51 The Public Company Accounting Oversight Board (PCAOB) adopted Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), which was then approved by the SEC on July 25, 2007. Aspects of guidance in this standard also apply to the consideration of internal controls in financial-statement-only audits of issuers subject to PCAOB standards. Such consideration should include the review, study, and evaluation of the financial reporting information system and internal control over financial reporting, including control activities for safeguarding securities, as required by the instructions for Form N-SAR. Among other things, Auditing Standard No. 5 modified the definitions of *material weakness* and *significant deficiency* to be used in the audits of issuers' financial statements under PCAOB standards. The Form N-SAR report should reflect any material weaknesses present as of the fiscal year-end date. Although Auditing Standard No. 5 is effective for reports issued for fiscal years ending after November 15, 2007, independent registered public accounting firms are encouraged to apply it immediately because Auditing Standard No. 5 guidance can be used for reports due on or after August 27, 2007. A copy of the N-SAR letter is posted at the following Web site: thecaq.aicpa.org/Resources/Auditing/Investment+Companies+Expert+Panel+Issues+Revised+N-SAR+Letter.

Investment Company Technical Practice Aids

.52 Recently, the AICPA issued four Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to investment companies. TIS section 6910, "Investment Companies" (AICPA, *Technical Practice Aids*, TIS sec. 6910.21-.24), present answers to various questions that auditors may have when conducting an audit of financial statements of investment companies. Recognition of premiums and discounts on short positions in fixed-income securities, presentation of reverse repurchase agreements, accounting treatment of offering costs incurred by investment partnerships, and the meaning of "continually offer interests" are covered in these questions and answers. Additional information is available at www.aicpa.org/download/acctstd/final_IC_TPAs.pdf.

Alternative Investments—Audit Considerations

.53 Due to the risk of misstatement inherent with alternative investments, the Audit Issues Task Force of the Auditing Standards Board (ASB) established the Alternative Investments Task Force. This task force was charged with providing additional guidance to auditors of investor entities as to how the auditor may obtain sufficient and appropriate audit evidence in order to conclude that financial statements are free of material misstatement. The Alternative Investments Task Force developed and issued a technical practice aid, entitled *Alternative Investments Audit Considerations: A Practice Aid for Auditors*, which provides guidance on:

- General considerations pertaining to auditing alternative investments
- Addressing management's financial statement existence assertion
- Addressing management's financial statement valuation assertion
- Management representations

Accounting Issues and Developments

Fair Value Measurements

Financial Accounting Standards Board Statement No. 157

.55 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.56 Prior to this statement, there were different definitions of fair value and guidance for applying those definitions was dispersed among many accounting pronouncements. Differences in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

.57 Some of the issues faced by investment companies for implementing FASB Statement No. 157 are that:

- Investment companies must obtain necessary information from pricing services and dealers to understand the inputs used in determining fair values, so that the investment company may properly categorize such valuations in Level 1, 2, or 3.
- Investment companies may no longer use block discounts upon the adoption of FASB Statement No. 157.
- The preparer must determine whether restrictions are entity- or security-specific for purposes of determining whether a related discount is appropriate (discounts are only appropriate if the restriction is an attribute of the security).
- An investor's proportionate share of the net asset value of an investment company may not represent fair value under the guidance in FASB Statement No. 157. An investor may need to consider other rights or obligations attached to his or her investment in the investment company (for example, liquidity restrictions) that may impact a market participant's determination of fair value in a negotiated transaction.

.58 Once an entity adopts FASB Statement No. 157, the SEC staff believes that N-Q filings made by registered investment companies should include disclosures required by FASB Statement No. 157. Inclusion of the disclosures in fund N-Q filings will enhance the ability of financial statement readers to compare the liquidity of the fund investments from quarter to quarter and will provide meaningful background information about fund holdings.

FASB Statement No. 159

.59 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159

allows entities to choose to measure many financial instruments and certain other items at fair value. The statement permits an entity to elect the fair value option on an instrument-by-instrument basis and, once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.60 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, with early adoption permitted, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice for early adoption should be made within 120 days of the beginning of the fiscal year of adoption (by April 2007 for calendar-year-end entities), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically, the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

Statement of Position 07-1, *Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*

.61 In June 2007, the Accounting Standards Executive Committee (AcSEC) issued Statement of Position (SOP) 07-01, *Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* (AICPA, *Technical Practice Aids*, ACC sec. 10,930). This SOP provides guidance for auditors when trying to determine whether an entity is within the scope of the AICPA Audit and Accounting Guide, *Investment Companies*. In addition, the SOP also modifies FASB Emerging Issues Task Force (EITF) Issue No. 85-12 by establishing conditions for the retention of investment company accounting by parent companies in consolidation with equity-method investors and requiring various disclosures if investment company accounting is retained. The SOP is effective for fiscal years beginning on or after December 15, 2007, with earlier application encouraged. (**Note:** Readers should be advised that FASB is considering delaying the effective date of SOP 07-01. Readers should consult the FASB Web site for further information.)

.62 AcSEC has proposed a set of nonauthoritative TPAs intended to clarify various issues found in SOP 07-01. Readers should monitor the progress of these practice aids as they are expected to be finalized prior to the effective date of the SOP.

FASB Interpretation No. 48

.63 FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.64 The evaluation of a tax position in accordance with this interpretation is a two-step process. The first step is recognition. The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.65 Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one of the following:

a. An increase in a liability for income taxes payable or a reduction of an income tax refund receivable

b. A reduction in a deferred tax asset or an increase in a deferred tax liability

c. Both (a) and (b)

.66 An enterprise that presents a classified statement of financial position should classify a liability for unrecognized tax benefits as current to the extent that the enterprise anticipates making a payment within one year or the operating cycle, if longer. An income tax liability should not be classified as a deferred tax liability unless it results from a taxable temporary difference (that is, a difference between the tax basis of an asset or a liability as calculated using this interpretation and its reported amount in the statement of financial position). This interpretation does not change the classification requirements for deferred taxes.

.67 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109 is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this interpretation.

FASB Staff Position FIN 48-1, Definition of Settlement in FIN 48

.68 On May 2, 2007, the FASB issued FASB Staff Position (FSP) FIN 48-1, *Definition of Settlement in FIN 48*. This FSP amends FIN 48 to provide guidance on how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits.

.69 The FSP amends FIN 48 to clarify that a specific tax position could be considered *effectively settled* for a particular tax year upon conclusion of an examination by a taxing authority, the entity does not intend to challenge any aspect of a position included in the examination, and it is remote that the authority would examine or re-examine any aspect of the tax position, even if the particular tax position was not examined in that year. Assessing whether a tax position is effectively settled is a matter of judgment. When making a settlement determination, an enterprise should make a position-by-position assessment for all positions in a particular tax year. The FSP, however, makes it clear that effective settlement of a position in a year that has been examined does not result in effective settlement of similar or identical positions in periods that have not been examined.

.70 The guidance outlined in the FSP shall be applied upon the initial adoption of FIN 48. An enterprise that applied FIN 48 in a manner consistent with the provisions of this FSP would continue to apply the provisions in this FSP from the date of initial adoption of FIN 48. An enterprise that did not apply FIN 48 in a manner consistent with this FSP is required to retrospectively apply the provisions in this FSP to the date of the initial adoption of FIN 48.

SEC Division of Investment Management Staff FIN 48 Implementation Guidance

.71 On December 22, 2006, the staff of the SEC's Division of Investment Management issued a letter to the Investment Company Institute on the implementation of FIN 48 by registered investment companies. In that letter, the staff made the following observations:

- The staff expressed its belief that FIN 48 "places [no] limits on the type of evidence that an enterprise can look to in making its determination of the technical merits of a tax position," and that a registered investment company may consider "less formal forms of guidance from [a] taxing authority," weighing "all available forms of evidence based on their persuasiveness."

- The staff also observed that "the administrative practices and precedents of [a] taxing authority should be considered in the fund's analysis" as to whether a tax position meets FIN 48's recognition threshold, including any practice, to the extent such exists, of addressing industry taxation issues on a prospective basis.

- The staff further stated that it would not object to a registered investment company implementing FIN 48 for purposes of its computation of net asset value (NAV) "as late as its last NAV calculation in the first required financial statement reporting period for its fiscal year beginning after December 15, 2006." For example, the staff noted that a fund with a December 31 fiscal year end could implement FIN 48 no later than its June 29, 2007 NAV calculation, which is the last calculation immediately preceding the first semiannual period for which the fund would be required to file complete financial statements on Form N-CSR. This deferral relates only to NAV computations and does not affect the financial statement implementation date prescribed by FIN 48.

.72 Separately, on June 28, 2007, the Division of Investment Management staff responded to a request for two specific additional clarifications submitted by several investment company complexes as follows:

- The staff expects the guidance of FIN 48, not the standard for recognizing contingent liabilities stated in FASB Statement No. 5, *Accounting for Contingencies,* to be applied in the determination of daily net asset values for purposes of share transactions. The staff further noted that, while it would not expect an issue to be fully evaluated within a single business day, it also would not establish a "safe harbor" minimum number of days for evaluation. Rather, it expects investment companies to apply "reasonable diligence" in gathering information and subsequently evaluating uncertain tax positions that may be identified, with interim net asset value determinations to be based on management's best judgment based on information available at the time.

- In certain instances, advisers or other third parties have indemnified funds for exposures to tax uncertainties that have been or may be asserted by taxing authorities. The staff stated that a past practice of indemnification alone was an insufficient basis to record a potential reimbursement for uncertainties that may be identified under FIN 48; rather, a written reimbursement agreement was required. However, the staff also observed that the indemnification may be recognized (and derecognized upon "effective settlement") to the same amount and extent as a liability related to the uncertain tax position is recorded under FIN 48.

.73 To help financial statement preparers, auditors, and tax advisers meet this new requirement, the AICPA developed a *Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48*. Tax positions can only be recognized if they meet a more-likely-than-not threshold of being realized if challenged by a taxing authority with full knowledge of the facts. If this level of certainty is not met, no tax benefit can be recorded and, even if it is met, only the amount that has a greater than 50 percent chance of being sustained may be booked. Specific financial statement disclosures are required with respect to uncertain tax positions. The practice guide includes highlights of FIN 48 and its implications for in-house accountants, auditors, and tax advisers. It is not authoritative, but intended to assist members in quickly understanding the requirements of FIN 48. The practice guide is available without charge to all AICPA members. For more information please visit the AICPA Web site at tax.aicpa.org/Resources/Professional+Standards+and+Ethics/Practice+Guide+on+Accounting+for+Uncertain+Tax+Positions+Under+FIN+48.htm.

Employee Benefit Plan-Related Technical Practice Aids

.74 The AICPA Staff and Employee Benefit Plan Expert Panel issued three employee-benefit-plan-related TPAs to provide guidance in implementing FASB FSP AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*. The TPAs are:

- TIS section 6931.08, "Types of Investments Subject to SOP 94-4, as Amended by FSP AAG INV-1 and SOP 94-4-1" (AICPA, *Technical Practice Aids*)
- TIS section 6931.09, "Financial Statement Presentation When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts" (AICPA, *Technical Practice Aids*)
- TIS section 6931.10, "Financial Statement Disclosure Requirements When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts" (AICPA, *Technical Practice Aids*)

.75 The TPAs address the types of investments covered by the FSP, financial statement presentation of investments in common collective trust funds and master trusts, and related disclosure requirements. The TPAs are available on the AICPA's Web site at www.aicpa.org/download/acctstd/TIS6931.08.pdf.

Recent Auditing and Attestation Pronouncements and Related Guidance

.76 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.77 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit, and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.

(continued)

Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA TPA TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.

TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to: describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit

(continued)

	committee. These requirements parallel the auditor's responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.
PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 300—Report on the Initial Implementation of Auditing Standard No. 2") Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction

	• Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates, and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.78 In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers, regardless of size, ownership, or organizational structure.

.79 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61 . However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.80 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.81 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.82 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.83 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.84 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses, and that are then communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

.85 Some examples of potential control deficiencies that you might find in investment companies are:

- Inadequate monitoring of the financial accounting and reporting process to detect deficiencies in the preparation of financial highlight disclosures or errors in net asset value calculations.
- Lack of management oversight or review of the preparation of financial statements, or both.
- Inadequate procedures to reconcile investment accounts to custodian records to support the existence assertion.
- Inadequate client expertise in regulatory reporting requirements resulting in the filing of erroneous information or the use of the incorrect form for regulatory filings.
- Inadequate procedures to monitor the determination of fair values of investments.
- Deficiencies in determining a registered investment company's qualification under Subchapter M of the Internal Revenue Code.

Discussions With Management and Others

.86 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.87 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of *material weaknesses*. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.88 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.89 One issue that has arisen in audits of smaller entities is the increase in costs as a result of the time the auditor spends documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.90 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[4] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.91 A weakness in monitoring ongoing activities when an auditor is performing these nonattest services may also raise independence issues. If the auditor is effectively placed in the position of monitoring the ongoing activities related to the subject matter of its own services, it might be considered to have become an element of the client's internal control structure or to have assumed responsibility for functions that are the responsibility of client management, either of which is incompatible with independence. Thus, the auditor may require the client to rectify the control weaknesses before it can provide further nonattest services.

.92 The requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.93 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This audit risk alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; the alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.94 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier application permitted. The following table lists the eight SASs and their effects on existing standards.

---

[4] See Ethics Interpretation No. 101-3, "Performance of nonattest services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.95 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations (COSO) of the Treadway Commission's framework at www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.96 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.97 In May 2007, the ASB issued two technical questions and answers related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.98 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.99 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.100 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.101 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.102 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information that it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.103 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scaleable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB chairman, stated "The new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.104 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.105 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.106 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statement Nos. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.
FSPs (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA SOP 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations' fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts.*
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.107 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the investment companies industry were discussed in the "Accounting Issues and Developments" section of this alert. The AICPA general *Audit Risk Alert—2007/08* (product no. 022338kk) and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed in this alert. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

On the Horizon

.108 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the investment companies industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.109 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code +of+Professional +Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.110 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.111 The discussion paper's comment period ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.112 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.113 In January 2006, the ASB issued a revised exposure draft of a proposed Statements on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT sec. 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of **Present Fairly in Conformity With Generally Accepted Accounting Principles**

.114 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS concurrently with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.115 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.116 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year's alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.117 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and IASB accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially, all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.118 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.119 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.120 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.121 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure draft ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133, including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.122 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

.123 In August 2007, the FASB issued an exposure draft of FSP FAS 140-d, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions." The FSP provides implementation guidance on the circumstances that would permit a transferor and a transferee to evaluate the accounting for a transfer of a financial asset separately from a repurchase financing of that asset. The comment period for this FSP closed on September 14, 2007. See the FASB Web site for the current status of this issue.

Earnings Per Share

.124 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.125 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and SEC). The codification will have a three-layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information, but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.126 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor that is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.127 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.128 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.129 The following are various resources that practitioners engaged in the investment companies industry may find beneficial.

Publications

.130 Practitioners may find the following publications useful with respect to the investment companies industry:

- Audit and Accounting Guide *Investment Companies* (2007) (product no. 012627kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics Alert—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist Supplement and Illustrative Financial Statements for Investment Companies*(product no. 008948kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.131 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, audit and accounting guides (more than 20), audit risk alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.132 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.133 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.134 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1- and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.135 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.136 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.137 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.138 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.139 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.140 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.141 The AICPA sponsors the National Conference on the Securities Industry annually in the winter. The National Conference on the Securities Industry is a two-day conference designed to update attendees on recent developments related to the securities industry. Co-sponsored by the AICPA and the Financial Management Division of the Securities Industry & Financial Markets Association, it's the most comprehensive update in accounting, tax and regulatory matters delivered by key individuals and regulators of the SEC, NYSE, NASD, and FASB. This conference is an ideal opportunity to engage in questions and answers with leading industry experts, and offers a powerful way to network with peers, speakers and officials from government agencies. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA CAQ

.142 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.143 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Investment Companies

.144 For information about the activities of the Investment Companies Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_investco.htm.

Industry Web Sites

.145 The Internet covers a vast amount of information that may be valuable to auditors of investment companies, including current industry trends and developments. Some of the more relevant sites for auditors with investment company clients include those shown in the following table:

Organization	*Web Site*
Securities and Exchange Commission	www.sec.gov/divisions/investment
Financial Accounting Standards Board	www.fasb.org/
The Financial Industry Regulatory Authority	www.finra.org/index
Investment Company Institute	www.ici.org
Commodity Futures Trading Commission	www.cftc.org
Mutual Fund Director's Forum	www.mfdf.com
Independent Director's Council	www.idc1.org

.146 The investment company practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.147 This Audit Risk Alert replaces *Investment Companies Industry Developments—2006/07*.

.148 The Audit Risk Alert *Investment Companies Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to KBiser@aicpa.org or write to:

Kenneth R. Biser, CPA, MBA

AAM Section 8110

Securities Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
SECURITIES INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of broker-dealers in securities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. Because securities broker-dealers often deal in commodity futures or function as commodity pool operators, the Audit Risk Alert expands the discussion of recent developments to include matters that may affect the audits of commodity entities as well.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an *other auditing publication*, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Susan M. Reed, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgements

The AICPA staff wishes to thank various members of the securities industry and the Stockbrokerage and Investment Banking Expert Panel for their essential contributions in creating this publication: Ronald Carletta, Al Goll, Dipti Gulati, G. Victor Johnson, Andrew Labadie, Anthony Lucarelli, Paul Nockels, Irina Portnoy, Marie Stewart, and Stephen Zammitti.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your securities industry audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The securities industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal funds rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting, and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated, and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then, at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate by 50 basis points to 4.75 percent, citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate by 50 basis points to 5.25 percent, to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

.13 Although 2007 to date (up through early October) has been a year of records for the stock market, it is also a year that has seen the mortgage markets begin to unravel. Subprime mortgages have been blamed as one of the sources of the credit market problems, and the resultant illiquid (or less liquid) credit market conditions. And as the housing market weakens, it remains to be seen what effect this has on the stock market and the economy in general. The consensus at the time of this writing is that economic growth in the near future will slow down due to the increase in the cost of credit.

Industry Trends and Conditions

The Securities Industry

.14 The year 2006 was a record year for the U.S. securities industry. Pretax profits reached $33.1 billion for 2006. That is 88.2 percent above the $17.6 billion pretax profit that was earned in 2005 and 4.7 percent above the previous record of $31.6 billion pretax profit set in 2000. In the first quarter of 2007, the industry reported pretax profits of $7.7 billion. This 2007 first quarter figure was down 28.7 percent from the immediately preceding quarter and 1.6 percent below the same period in the preceding year. Despite the decrease, first quarter 2007 profits were the third best first quarter results on record.

.15 The markets this year have hit record high levels with significant declines in between. The Dow Jones Industrial Average (DJIA or Dow), NASDAQ Stock Market, Inc. (NASDAQ), and the Standard & Poor's 500 Index (S&P 500) rose from the beginning of the year, but hit significant lows in March and August of 2007. Despite the declines, all three markets hit record highs in July and again on October 1, 2007 (the last date considered at the time of this writing).

.16 The Dow started the year at 12,459.54. At the end of the second quarter of 2007, it was up 20.3 percent from a year earlier. The third quarter of 2007 has been a tumultuous period. In July 2007, the Dow closed above 14,000 for the first time ever, closing at 14,000.41 on July 19, 2007. It should be noted that it took only 59 days to go from the previous record of 13,000 to 14,000. Then, in August, the Dow dropped below 13,000 again—closing at 12,861.47 on August 15, 2007 (taking less than a month to decrease 1,000 points). By October 2007, the Dow again closed above 14,000—closing at 14,087.55 on October 1, 2007 (the last day considered at the time of this writing).

.17 The NASDAQ opened 2007 at 2,445.07. Its path during 2007 has been similar to the Dow in that it hit a high close of 2,720.04 on July 19, 2007, and then hit another high close of 2,740.99 on October 1, 2007. It also experienced a couple of large declines, closing at 2,340.6799 on March 5, 2007, and 2,451.07 on August 16, 2007.

.18 The S&P 500 closed above 1,400 for the first time in 6 years on November 17, 2006. After rising for several months, it fell below 1,400 again on March 5, 2007—closing at 1,374.12. After a volatile period, it closed above the 1,500 mark, closing at 1,547.04 on October 1, 2007.

.19 How 2007 will finish is as uncertain as the economy is currently. For more information on the markets, please refer to the Securities Industry and Financial Markets Association (SIFMA) Research Reports, which can be accessed at www.sifma.org/research/research_reports.html.

The Commodities Industry

.20 Global futures and options contract volume has continued to increase through 2006 and into 2007. In the first 8 months of 2007, volume on U.S. futures exchanges reached 4 billion contracts, a 33 percent increase from the same period in 2006. The volume of contracts traded on foreign exchanges increased 23 percent compared to the first 8 months of 2006. Trading volume in interest rate and equity products continued to account for more than half of worldwide trading volume.

.21 The growth in futures volume and markets is further reflected in increased customer funds held by entities registered with the Commodity Futures Trading Commission (CFTC) as futures commission merchants (FCMs) for trading on U.S. and foreign futures and options exchanges. The total amounts required under CFTC regulations to be held in segregated or secured accounts on behalf of FCM customers increased by $9 billion from approximately $139 billion as of August 31, 2006, to approximately $148 billion as of August 31, 2007.

.22 The U.S. futures industry, in addition to the increasing volume and customer participation, also has experienced other significant changes through 2006 and into 2007. In 2007, the Chicago Mercantile Exchange (CME) and the Chicago Board of Trade (CBOT), the two largest contract markets designated by the CFTC, completed their merger. The new CME/CBOT combined organization, U.S.-based CME Group, Inc., is devoted to derivatives trading and clearing. Also, in 2007, InterContinental Exchange (ICE) acquired the New York Board of Trade (NYBOT) (now known as ICE Futures U.S.), and the Winnipeg Commodities Exchange.

Legislative and Regulatory Developments[1]

.23 Chapter 5, "Auditing Considerations," of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* (the Broker-Dealer Guide), discusses auditing considerations for an audit of the financial statements of a broker-dealer. The Broker-Dealer Guide notes that the regulatory environment of a broker-dealer has a major effect on the audit of a broker-dealer because of the requirements that auditors report on the adequacy of the broker-dealer's internal control and on its compliance with the specific rules addressing financial responsibility and recordkeeping. Accordingly, certain tests of controls are performed even if the auditor would not otherwise choose to do so.

.24 The audit and reporting requirements for securities broker-dealers are regulated by Rule 17a-5 under the Securities Exchange Act of 1934 (the Exchange Act). Qualifications and reports of independent accountants of FCMs and introducing brokers (IBs) are specified by Regulation 1.16 of the Commodity Exchange Act (CEA). Alternative regulatory frameworks have been created for consolidated supervised entities and over-the-counter derivatives dealers. Further, registered broker-dealers in U.S. government securities are regulated by Section 405.02 of the regulations pursuant to Section 15C of the Exchange Act.

.25 Before undertaking the audit of a regulated entity, auditors should read the applicable rules and understand the prescribed scope of the audit and the related reporting requirements.

.26 Certain regulatory activities and developments relevant to entities operating in the securities industry are presented in the following section. Presented first are developments arranged by subject, followed by developments by regulatory authority. Included are summaries of some rules the Securities and Exchange Commission (SEC), CFTC, and Self-Regulatory Organizations (SROs) have issued since the writing of last year's alert. In addition to reading the following regulatory matters, see the AICPA *Audit Risk Alert—2007/08*, the Audit Risk Alert *Independence and Ethics—2007/08*, and the Audit Risk Alert *SEC and PCAOB Alert—2007/08* for a discussion of current issues.

NASD and NYSE Regulation Combine Operations

.27 In November 2006, it was announced that the National Association of Securities Dealers (NASD) and the member regulation, enforcement, and arbitration operations of the New York Stock Exchange (NYSE or the Exchange) planned to combine operations. This consolidation occurred and created the largest nongovernmental regulatory organization for brokers and dealers of securities in the United States. The new organization has been named the Financial Industry Regulatory Authority (FINRA).

.28 The consolidation was approved by the SEC on July 26, 2007, and became effective July 30, 2007. According to the FINRA news release announcing the consolidation, the organization will conduct the regulatory oversight of 5,000 securities firms and 666,000 registered representatives. The organization will be responsible for rule writing, firm examination, enforcement and arbitration, and mediation functions, along with all functions that were previously overseen solely by NASD. This includes market regulation under contract for NASDAQ, the American Stock Exchange, the International Securities Exchange, and the Chicago Climate Exchange.

.29 The new organization, FINRA, emphasized that investor protection and market integrity are primary objectives. The organization will be investor-focused and more streamlined so that it will be better suited to

[1] Readers should be alert for updates, amendments, or other changes to the rules discussed in this section and for other recent developments related to regulatory activities. The brief summaries provided in this section of the alert are for informational purposes. Readers should refer to the full text of the regulations. In addition, not all regulatory activity is included in this publication. The complete text of Securities and Exchange Commission (SEC) rules, including those rules adopted subsequent to the publication of this alert, can be obtained from the SEC Web site at www.sec.gov; Commodity Futures Trading Commission (CFTC) rules at www.cftc.gov; Financial Industry Regulatory Authority (FINRA) rules at www.finra.org; and National Futures Association (NFA) rules at www.nfa.futures.org. See the "Industry Web Sites" table at the end of this alert for a list of Internet sources.

the complexity and competitiveness of today's global capital markets. Furthermore, FINRA asserted that by eliminating overlapping regulation, establishing a uniform set of rules, and having oversight responsibility in a single organization, investor protection will be enhanced while increasing the competitiveness of the financial markets. For more information on FINRA, visit www.finra.org.

Portfolio Margin Expanded Pilot Program Extended

.30 NYSE Rule 431, *Margin Requirements*, generally prescribes minimum initial and maintenance margin requirements. On July 14, 2005, the SEC approved, on a pilot basis expiring July 31, 2007, amendments to Rule 431 to permit the application of a risk-based margin requirement (portfolio margining) to certain eligible products (including listed broad-based securities index options, warrants, futures, futures options, and related exchange traded funds) as an alternative to strategy-based margin requirements. Amendments to Rule 726, *Delivery of Options Disclosure Document and Prospectus*, were also approved, requiring disclosure to and written acknowledgment from customers in connection with the use of portfolio margining. For more information, please refer to SEC Release No. 34-52031 and NYSE Information Memo No. 05-56. By separate orders, the SEC also approved a parallel rule filing by the Chicago Board Options Exchange (CBOE), and a related rule filing by the Options Clearing Corporation. See SEC Releases No. 34-52032 and No. 34-52030.

.31 On July 11, 2006, the SEC approved additional amendments to Rule 431 that:

1. Expanded the scope of products eligible for portfolio margining and cross-margining;
2. Conformed customer disclosure requirements under Rule 726 to comply with this expansion; and
3. Modified certain net capital requirements in connection with the maintenance of portfolio margin accounts.

.32 Collectively, these amendments are referred to as the Expanded Pilot. The Expanded Pilot broadened the scope of products eligible for portfolio margining and cross-margining to include listed security futures and listed single stock options. Further, the Expanded Pilot permitted customers of pilot participants to effect transactions solely in security futures and listed single stock options without maintaining the $5 million equity requirement applicable to effecting transactions in all other eligible products. See SEC Release No. 34-54125 and NYSE Information Memo No. 06-57 for more information.

.33 On December 12, 2006, the SEC approved additional amendments to NYSE Rule 431, which permit the application of portfolio margining to an expanded universe of eligible products. In addition, amendments to NYSE Rule 726 eliminate the sample portfolio margining risk disclosure statement from the rule. However, the rule will continue to require member organizations to provide customers with a written disclosure statement in a form prescribed by the NYSE, as well as to receive from customers a signed acknowledgement (see Information Memo 07-27, *Sample Portfolio Margining Risk Disclosure and Acknowledgment Statements*, issued 03/17/2007). The amendments are effective April 2, 2007. See SEC Release No. 34-54918 and NYSE Information Memo No. 06-86 for more information.

.34 Also, on December 12, 2006, the SEC approved a rule change proposed by the CBOE, as amended, to broaden its Rule 12.4, *Portfolio Margin and Cross-Margin for Index Options*, to expand the scope of products that are eligible for treatment as part of CBOE's approved portfolio margin pilot program and to eliminate the requirement for a separate cross-margin account. The scope of eligible products in the pilot is expanded to include margin equity securities, unlisted derivatives, listed options, and securities futures. See SEC Release No. 34-54919 for more information.

.35 On March 14, 2007, the SEC approved a Portfolio Margin Pilot Program for the NASD in SEC release 34-55471. The portfolio margin pilot program is substantially similar to margin rule amendments by the NYSE and CBOE. NASD provided the required disclosures and written acknowledgements in NASD Notice to Members 07-14 released in March 2007.

.36 On July 19, 2007, the SEC release 34-56107 extended the existing NYSE expanded pilot program until July 31, 2008. The CBOE expanded pilot program (SEC Release 34-56109) and the NASD Portfolio Margin Pilot Program (SEC Release 34-56108) were also extended to July 31, 2008.

.37 Portfolio margining is a margin methodology that sets margin requirements for an account based on the greatest projected net loss of all positions in a "security class" or "product group" as determined by a theoretical pricing model using multiple pricing scenarios. The goal of portfolio margining is to set levels of margin that more precisely reflect actual net risk. The eligible participant benefits from portfolio margining in that margin requirements calculated on net risk are generally lower than those that apply to specific positions or strategies. Accordingly, customers eligible to use portfolio margining will gain additional leverage. Broker-dealers will benefit from portfolio margining because it permits them to offer a more competitive financing to customers seeking to implement sophisticated equity trading strategies. As a trade-off, broker-dealers will be required to expend additional efforts to manage the higher credit and market exposures emanating from portfolio margining activities.

.38 As specified in NYSE Information Memo 06-86, member organizations, for which the NYSE is the Designated Examining Authority (DEA), seeking to participate in portfolio margining must provide written notification and receive approval from the NYSE prior to establishing a portfolio margining methodology. In this regard, member organizations are expected to establish written procedures for monitoring the risk associated with portfolio margin accounts; such procedures must incorporate a methodology for assessing any potential risk to the member organization's capital. Readers should refer to NYSE Information Memo 06-57, which contains the procedures that must be fully documented.

Anti-Money Laundering Update

.39 The SEC has added the Anti-Money Laundering (AML) Source Tool on its Web site to assist broker-dealers in complying with applicable laws and regulations. The tool is a compilation of key AML laws, rules, and guidance that assist broker-dealers in meeting their obligations. In addition, it contains a list of useful telephone numbers and Web sites. To access the AML Source Tool, go to www.sec.gov/about/offices/ocie/amlsourcetool.htm.

.40 On a related note, the Financial Crimes Enforcement Network (FinCEN) has delayed the implementation of a revised Suspicious Activity Report (SAR). The form was originally scheduled to become effective on June 30, 2007, and become mandatory on December 31, 2007. FinCEN will establish new effective and mandatory compliance dates for using the revised SAR form in a future notice. FinCEN has also issued guidance "Suspicious Activity Report Supporting Documentation" (FIN-2007-G003) that clarifies items related to supporting documentation required under SAR regulations. This guidance can be accessed at the SEC AML Web site at the address listed previously.

Proposed Amendments to Financial Responsibility Rules for Broker-Dealers

.41 The SEC has proposed amendments to its customer protection, books and records, notification, and net capital rules for broker-dealers under the Exchange Act. In March 2007, the SEC released "Amendments to Financial Responsibility Rules for Broker-Dealers." The proposed rule changes address several areas of emerging concern regarding financial requirements for broker-dealers, including updating the financial responsibility rules and making certain technical amendments. The following explanations are intended to briefly summarize the proposed amendments, which in some cases are very technical. Please refer to SEC Release 34-55431 for a complete description of these amendments. The release can be accessed at www.sec.gov/rules/proposed/2007/34-55431.pdf.

Proprietary Accounts of Broker-Dealers

.42 This proposed amendment would require broker-dealers to treat accounts they carry for domestic and foreign broker-dealers in the same manner as customer accounts for purposes of the reserve formula of

Rule 15c3-3. Because broker-dealers are not considered to be *customers* as defined in Rule 15c3-3, this amendment would require a separate reserve computation for proprietary accounts of other domestic and foreign broker-dealers in addition to the reserve computation currently required for customers. Also, a separate reserve account for the benefit of the domestic and foreign broker-dealers must be established by the carrying firm. See section II.A.1 of the release for details.

Banks Where Special Reserve Deposits May Be Held

.43 The proposed amendment would not allow cash deposits to be held at affiliate banks for the purpose of meeting reserve requirements with respect to customers or other broker-dealers. In addition, the proposal contains limits on the amount of cash reserves that may be maintained at any one nonaffiliated bank. The limitations would prevent a broker-dealer from maintaining a reserve deposit in the form of cash at a single unaffiliated bank that exceeds a percentage of the broker-dealer's or the bank's capital. The exclusion and limitation does not apply to deposits of securities. See section II.A.2 of the release for details.

Expansion of the Definition of Qualified Securities to Include Certain Money Market Funds

.44 Under the proposed amendment, certain money market funds (those that only invest in securities meeting the definition of *qualified security* in Rule 15c3-3) that also meet several other requirements may be used to replace cash held in the customer reserve account. This should decrease the burdens on those broker-dealers that would be impacted by the proposed amendment related to customer reserve account cash deposits into affiliate and nonaffiliate banks, as discussed previously.

Allocation of Customers' Fully Paid and Excess Margin Securities to Short Positions

.45 The proposed amendment would require a broker-dealer to take prompt steps to obtain physical possession or control over securities of the same issue and class as those included on the broker-dealer's books as a proprietary short position or as a short position for another person. The result will be that the broker-dealer will no longer be able to monetize the value of the security and use the cash for proprietary activities. The action would be required when the short position has aged more than 10 business days (or more than 30 calendar days, if the broker or dealer is a market maker in the securities).

Treatment of Free Credit Balances

.46 The proposed amendment would make it unlawful for a broker-dealer to convert, invest, or otherwise transfer free credit balances unless the broker-dealer has obtained a specific order, authorization, or draft from the customer and only under the terms and conditions specified by the customer. With respect to situations where a broker-dealer is recommending a sweep of free credit balances to either a money market fund or a bank deposit account, the broker-dealer would need to first obtain a customer's permission to initiate or change a sweep option to or from a money market fund or a bank deposit account. Second, the broker-dealer would need to provide the customer with all notices and disclosures required by the self-regulatory organizations, which the broker-dealer is a member of, regarding the selected investment option and the deposit of free credit balances. Third, the broker-dealer would need to provide the customer with notice in the customer's quarterly statement that the money market fund or bank deposit account can be liquidated on the customer's demand and converted back into a free credit balance held in the customer's securities account. Fourth, the broker-dealer would need to provide the customer with notice of at least 30 calendar days before changing the product (for example, from one money market fund to another), the product type (for example, from a money market fund to a bank account), or the terms and conditions under which free credit balances are swept.

Importation of Rule 15c3-2 into Rule 15c3-3

.47 Due to the fact that the majority of Rule 15c3-2 is obsolete, the relevant portion would be merged into Rule 15c3-3, and the former Rule 15c3-2 would be deleted. Under this proposal, the requirement that the clearing firm inform customers of the amounts due to them and that such amounts are payable on demand would be added to Rule 15c3-3.

Aggregate Debit Items Charge

.48 According to the proposed amendment, if a broker-dealer computes its net capital pursuant to the "alternative method," the broker-dealer is currently required to reduce its total debits by three percent of debit balances in customer cash and margin accounts when computing its reserve requirement. The SEC proposes to change the required reduction from three percent to one percent of debit balances in customer cash and margin accounts for broker-dealers using the *alternative method*.

Proprietary Accounts Under the Commodity Exchange Act

.49 An amendment to Rule 15c3-3 would clarify that funds held in a commodity account meeting the definition of a *proprietary account* under CEA regulations are not to be included as *free credit balances* in the customer reserve formula.

Holding Futures Positions in a Securities Portfolio Margin Account

.50 The CBOE, the NYSE, and (more recently) the NASD have amended their margin rules to permit broker-dealer members to compute customer margin requirements using a portfolio margining methodology. Under these rules, a broker-dealer can combine securities and futures positions into the portfolio margin account. The SEC proposes to amend Rule 15c3-3 to provide Securities Investor Protection Act (SIPA) protection to futures-related cash and options on futures in a portfolio margin account. This is done mainly by amending the definition of "free credit balance" in Rule 15c3-3 to include the market value of the options on futures so that it is included in SIPA liquidation.

Documentation of Risk Management Procedures

.51 Under the proposed amendment, broker-dealers that have more than (1) $1 million in aggregate credit items as computed under the customer reserve formula, or (2) $20 million in total capital including subordinated debt would be required to make and keep current records documenting their implemented systems of internal risk management control. The proposal also would require the broker-dealer to maintain these records for three years after the date the broker-dealer ceases to use the system of controls. It is noted that the proposed changes do not require any minimum elements that would be required to be included in a firm's internal controls, or any particular issues that need to be addressed. Instead, the amendment is designed to ensure that broker-dealers clearly identify the procedures (if any) they use to manage the risks in their business.

Amendments With Respect to Securities Lending and Borrowing and Repurchase/Reverse Repurchase Transactions

.52 The SEC is proposing two amendments designed to improve the regulatory oversight of securities lending and repurchase (repo) transactions. The first would clarify that a broker-dealer providing securities lending and borrowing services is assumed to be acting as a principal and is, therefore, subject to the applicable capital deductions. The only way a broker-dealer can be considered an agent (and not a principal) is if certain steps are taken to disclaim principal liability. The broker-dealer must disclose the identities of the borrower and the lender to each other and obtain written agreements from each stating that the broker-dealer is acting as agent and, therefore, assumes no principal liability in connection with the transaction.

.53 The second proposal would require broker-dealers to notify regulators whenever the amount of money payable against all securities loaned or subject to a repurchase agreement, or the total contract value of all securities borrowed or subject to a reverse repurchase agreement, exceeds 25 times tentative net capital.

For purposes of this calculation, transactions involving government securities (as defined in Section 3(a)(42) of the Exchange Act) are excluded. This would allow regulators to be able to respond more quickly in the event a firm is approaching insolvency.

Requirement to Subtract From Net Worth Certain Liabilities or Expenses Assumed by Third Parties and Nonpermanent Capital Contributions

.54 Under this proposed amendment, in computing net capital, a broker-dealer would be required to reduce net worth by the full amount of any liabilities related to its activities that have been assumed by a third party, if the broker-dealer cannot demonstrate that the third party has the resources independent of the broker-dealer's income and assets to pay such liabilities. Items that would evidence the third party's financial capacity are current audited financial statements, tax returns, or regulatory filings containing financial reports.

.55 In addition, capital that is contributed under an agreement giving an investor the opportunity to withdraw the contribution, or capital that is intended to be withdrawn within one year, would have to be recognized by the broker-dealer as a liability.

Requirement to Deduct the Amount a Fidelity Bond Deductible Exceeds Self-Regulatory Organizations Limits

.56 According to the proposed amendment, a broker-dealer must deduct, with regard to fidelity bonding requirements prescribed by a broker-dealer's examining authority, the excess of any deductible amount over the maximum deductible amount permitted by that authority.

Broker-Dealer Solvency Requirement

.57 Under the proposed amendment, a broker-dealer would be required to cease its securities business activities if it is insolvent. *Insolvent* would be defined as, among other things, a broker-dealer's placement in a voluntary or involuntary bankruptcy or similar proceeding; the appointment of a trustee, receiver, or similar official; a general assignment by the broker-dealer for the benefit of its creditors; an admission of insolvency; or the inability to make computations necessary to establish compliance with the Net Capital Rule. In addition, a proposed amendment would require a broker-dealer meeting the definition of *insolvent* to provide immediate notice to the SEC, the broker-dealer's DEA and, if applicable, the CFTC.

Amendment to Rule Governing Orders Restricting Withdrawal of Capital From a Broker-Dealer

.58 Currently Rule 15c3-1(e) provides that broker-dealers must notify the SEC upon certain withdrawals of capital. The SEC may also issue an order temporarily restricting a broker-dealer from withdrawing capital or making loans or advances to certain parties under certain circumstances. One of the circumstances is when withdrawals, advances, or loans (when aggregated with all other withdrawals, advances, or loans on a net basis during a 30 calendar-day period) exceed 30 percent of the firm's excess net capital. Due to the difficulty of calculating whether the 30 percent of excess net capital threshold has been met, the SEC proposes to remove the 30 percent of excess net capital limitation. All other conditions in Rule 15c3-1(e) would remain unchanged.

Amendment to Appendix A of Rule 15c3-1

.59 The SEC previously adopted a temporary amendment which permits broker-dealers to employ theoretical option pricing models to calculate haircuts for listed options and related hedge positions. The SEC now proposes to make this temporary amendment permanent.

Money Market Funds

.60 The haircut of 2 percent that broker-dealers must apply under Rule 15c3-1 for money market funds would be reduced to 1 percent under the SEC proposal.

Technical Amendments to the Financial Responsibility Rules

.61 A number of technical amendments are proposed to remove superfluous or redundant text.

Regulatory Update—SEC

.62 In addition to reading the following SEC regulatory matters, readers should also visit the SEC Web site at www.sec.gov to keep informed about recent SEC rulemaking activities and for further information.

Final Rules to Implement the Bank Broker Provisions of the Gramm-Leach-Bliley Act (SEC Releases 34-56501 and 34-56502)

.63 The SEC and the Board of Governors of the Federal Reserve System announced the adoption of final joint rules to implement the bank broker provisions (and related rules and rule amendments) of the Gramm-Leach-Bliley (GLB) Act. This will essentially allow customers to obtain a wide variety of financial products through their bank. The rules define the scope of securities activities that a bank may conduct without registering with the SEC as a securities broker and implement the most important *broker* exceptions for banks adopted by the GLB Act. The rules implement the statutory exceptions that allow a bank (subject to certain conditions) to continue to conduct securities transactions for its customers as part of the bank's functions and to refer customers to a securities broker-dealer pursuant to a networking arrangement with the broker-dealer. These rules are designed to accommodate the business practices of banks and to protect investors. Banks are exempt from complying with the rules until the first day of their first fiscal year that commences after September 30, 2008.

Adoption of Updated EDGAR Filer Manual (SEC Release 33-8834—see release for list of other applicable releases)

.64 The Electronic Data Gathering, Analysis, and Retrieval System (EDGAR) Filer Manual was updated to incorporate a number of changes in the rules and in the function of the system. Effective date is August 20, 2007.

Regulation SHO and Rule 10a-1 and amendments (SEC Releases 34-55970 and 34-56212)

.65 The SEC amended the short sale price test under the Exchange Act to remove restrictions on the execution prices of short sales (price tests) and prohibit any SRO from having a price test. Regulation SHO was also amended to remove the requirement that a broker-dealer mark a sell order of an equity security as *short exempt* if the seller is relying on an exception from a price test. The second amendment eliminates the grandfather provision of Regulation SHO, amends the close-out requirement of Regulation SHO for certain securities that a seller is *deemed to own*, and updates the market decline limitation referenced in the regulation. Effective dates are July 3, 2007, and October 15, 2007.

Technical Amendments to Form BD and Form BDW (SEC Release 34-55643)

.66 The uniform broker-dealer registration form and the uniform request for withdrawal from broker-dealer registration have been updated. Effective date is April 23, 2007.

Revisions to Non-Public Broker-Dealer Financial Statement Requirements (SEC Release 34-54920)

.67 Broker-dealers who are not issuers may file with the SEC a balance sheet and income statement and may send to their customers a balance sheet certified by an independent public accountant instead of by a Public Company Accounting Oversight Board (PCAOB) registered public accounting firm for fiscal years ending before January 1, 2009. A 2005 extension was set to expire on January 1, 2007, but was extended for 2 additional years.

Interagency Statement on Sound Practices Concerning Elevated Risk Complex Structured Finance Activities

.68 The Office of the Comptroller of the Currency, the Office of Thrift Supervision, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the SEC have issued a statement related to complex structured finance transactions (CSFT). The use of this type of product is considered to be an essential part of capital markets, and there is a broad array of products with varying levels of complexity. Therefore the agencies have issued this statement to describe the types of risk management principles that they believe may help a financial institution to identify CSFTs that may pose heightened legal or other risks to the institution and to evaluate, manage, and address those risks within the entity's internal control framework. A copy of this interagency statement can be found online at www.sec.gov/rules/policy/2007/34-55043.pdf.

Internal Control Over Financial Reporting Developments

.69 The SEC has finalized several rules related to its required report on internal control over financial reporting. More information regarding SEC developments can be found in the *SEC and PCAOB Alert—2007/08* (product no. 022498kk). See also the SEC Web site at www.sec.gov for complete information.

Definition of a Significant Deficiency

.70 On August 3, 2007, the SEC posted a final rule whereby it defined the term *significant deficiency* for purpose of implementing Section 302 and Section 404 of the Sarbanes-Oxley Act of 2002. The term is defined as "a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting." The full text of this rule can be found online at www.sec.gov/rules/final/2007/33-8829.pdf. This definition of significant deficiency applies to issuers and auditors of issuers. Auditors of nonissuers must use the SAS No. 112 definition in AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1).

Commission Guidance Regarding Management's Report on Internal Control Over Financial Reporting Under Section 13(a) or 15(d) of the Securities Exchange Act of 1934

.71 The SEC posted Interpretive Release No. 33-8810 and No. 34-55929 on June 20, 2007, to provide guidance for management regarding its evaluation and assessment of internal control over financial reporting. This guidance is organized around two broad principles. The first principle is that management should evaluate whether it has implemented controls that adequately address the risk that a material misstatement of the financial statements would not be prevented or detected in a timely manner. The guidance describes a top-down, risk-based approach to this principle. The second principle is that management's evaluation of evidence about the operation of its controls should be based on its assessment of risk. The guidance provides an approach for making risk-based judgments about the evidence needed for the evaluation. More specifically, this interpretive guidance:

- Explains how to vary evaluation approaches for gathering evidence based on risk assessments.
- Explains the use of "daily interaction," self-assessment, and other ongoing monitoring activities as evidence in the evaluation.

- Explains the purpose of documentation and how management has flexibility in documenting support for its assessment.
- Provides management significant flexibility in making judgments regarding what constitutes adequate evidence in low-risk areas.
- Allows for management and the auditor to have different testing approaches.

.72 The text of the full interpretation can be found online at www.sec.gov/rules/interp/2007/33-8810.pdf.

Amendments to Rules Regarding Management's Report on Internal Control Over Financial Reporting

.73 On June 20, 2007, the SEC posted an amendment to its rules to clarify several issues related to management's Report on Internal Control over Financial Reporting. One clarification is that an evaluation of internal control over financial reporting that complies with the SEC's interpretive guidance published in Release No. 34-55929 is one way to satisfy the requirement for management to evaluate the effectiveness of the issuer's internal control over financial reporting. However, the use of this guidance is voluntary. The SEC has also amended its rules to define the term *material weakness* as "a deficiency or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the registrant's annual or interim financial statements will not be prevented or detected on a timely basis." Lastly, the SEC clarified that an auditor is required to express a single opinion directly on the effectiveness of internal control over financial reporting in its attestation report on internal control over financial reporting (the auditor does not have to report on management's assessment of internal control over financial reporting). The amendments are intended to facilitate more effective and efficient evaluations of internal control over financial reporting by management and auditors. Access www.sec.gov/rules/final/2007/33-8809.pdf for the entire release.

Regulatory Update—CFTC

.74 The following summarizes certain amendments to regulations and interpretations of the CFTC and other regulatory guidance issued or that became effective in the latter part of 2006 and in 2007. The amendments affected the financial reporting requirements of registered FCMs, and also of IBs that are not guaranteed by FCMs. The amendments were published in the Federal Register, and they and the other items discussed in the following paragraphs can be accessed electronically at the CFTC Web site at www.cftc.gov.

Amendment to Regulation 3.10 to Require Certain Registrants to Conduct Annual Review of Registration Information

.75 Effective August 1, 2007, the CFTC amended Regulation 3.10 to require each registered FCM, IB, commodity trading advisor, commodity pool operator (CPO), and leverage transaction merchant to conduct an online annual review of the firm's registration information maintained by the National Futures Association (NFA). The amendment is intended to enhance the accuracy of the registration information maintained in the NFA's registration database. The CFTC also adopted a technical and conforming amendment to CFTC Regulation 3.33(f).

CFTC Staff and FinCEN Issue Guidance on Application of CIP Rules to Give-Up Arrangements

.76 In April 2007, the staffs of the CFTC and the FinCEN jointly issued guidance on the application of the customer identification program (CIP) regulation to give-up arrangements in the futures industry. The guidance is in response to a request from the Futures Industry Association, a futures industry trade association, about whether FCMs acting solely as executing brokers in give-up arrangements are required to comply with CIP requirements.

.77 The guidance clarifies the CIP regulation for FCMs that was issued in 2003 by stating that clearing brokers in give-up arrangements are required to comply with CIP requirements because they establish a formal relationship with a futures and options customer when they open an account. The guidance explains that, subject to a limited exception, executing brokers, who in a give-up arrangement facilitate trades, do not establish a formal relationship requiring them to apply their CIPs to such futures and options customers.

.78 The guidance also reminds FCMs that they must have an AML program that contains risk-based policies, procedures, and controls for assessing money laundering risk posed by all of its operations, including its execution brokerage activities; for monitoring and mitigating that risk; and for detecting and reporting suspicious activity.

CFTC Adopts Rule Requiring FCMs to Become Members of a Registered Futures Association

.79 Effective February 21, 2007, the CFTC adopted an amendment to Regulation 170.15(a) that requires a person that is registered as an FCM, regardless of whether he or she is required to be so registered, to become members of a registered futures association (RFA). The action will further the goals of industry self-regulation and CFTC oversight, a cornerstone of the Commodity Futures Modernization Act of 2000, by ensuring that an RFA, and not the CFTC, will be responsible for monitoring the activities of FCMs in the first instance.

Regulatory Update—Self-Regulatory Organizations

.80 Under the Exchange Act, all broker-dealers are required to be members of an SRO such as FINRA, or some other organization that is designated to perform routine surveillance and monitoring of its members. Likewise, CFTC regulations require FCMs to designate a self-regulatory organization (DSRO). During the past year, a number of significant regulations were issued by SROs and DSROs, some of which are described in the following sections. Please refer to the Web sites of the respective SROs and DSROs for a complete listing of recently issued rules and regulations.

.81 On July 31, 2007, the consolidation of the NASD and the member regulation, enforcement, and arbitration operations of the NYSE became effective. The consolidated entity has been named the FINRA. Please see the section titled "NASD and NYSE Regulation Combine Operations" earlier in this alert for more information. To date, the rules of these two organizations have not yet been merged together. Therefore, we will list new regulatory developments separately for the NASD and the NYSE in this year's alert.

NASD Rulemaking

Notice to Members 06-23—NASD Reminds FINOPs of their Obligations under NASD Rule 1022 and Issues Guidance to FINOPS Who Work Part-Time, Work Off-Site, or Hold Multiple Registrations

.82 NASD issued this notice to members to remind member firms and registered financial and operations principals (FINOPs) of a FINOP's duties and responsibilities under Rule 1022 (Categories of Principal Registration). These duties are applicable to all FINOPs, regardless of whether they are employed full-time or part-time, perform such duties on-site or off-site of the member firm, or hold registrations with more than one firm. This notice also provides additional guidance to assist FINOPs who are employed part-time, operate off-site, or hold multiple registrations in fulfilling their duties. Additionally, NASD reminds members and FINOPs that their failure to meet their responsibilities can result in disciplinary actions against both the FINOP and the member firm employing the FINOP.

Notice to Members 06-48—SEC approves Amendments to NASD Rules 2210 and 2211 to Require Disclosure of Fees and Expenses in Mutual Fund Performance Sales Material; Effective Date: April 1, 2007

.83 This notice sets forth the disclosure and presentation requirements on certain member communications with the public that presents non–money market mutual fund performance data. Such communication must disclose the standardized performance information mandated by Rule 482 under the Securities Act of 1933 and, to the extent applicable, the fund's maximum front-end or back-end sales charge and annual operating expense ratio. The rule states that the required information is to be presented prominently, and in any print advertisement, in a prominent text box.

Notice to Members 07-16—Frequently Asked NASD Financial and Operational Questions

.84 This notice provides member firms with answers to many frequently asked questions.

Notice to Members 07-32—NASD Amends Rule 3013 and Interpretive Material 3013 to Permit Members to Designate Co-Chief Executive Officers and Multiple Chief Compliance Officers

.85 Beginning July 16, 2007, the compliance date, NASD member firms may designate co-chief executive officers and multiple chief compliance officers to discharge the requirements of Rule 3013 (Annual Certification of Compliance and Supervisory Processes).

Notice to Members 07-45—Amendments to NASD Rule 3210 to Conform with Amendments to the SEC's Regulation SHO Delivery Requirements

.86 Beginning on the effective date, October 15, 2007, firms are required to close out within 35 consecutive settlement days any previously "grand-fathered" fail-to-deliver positions in a nonreporting threshold that is on the Rule 3210 threshold list on that date. New fails in a nonreporting threshold security after October 15, 2007, will be subject to a 13 consecutive settlement day close-out requirement. Please see the notice for information regarding an exception to this rule for closing out fails to deliver resulting from sales of nonreporting threshold securities pursuant to SEC Rule 144. The rules are available at the Rules and Regulations tab at the FINRA Web site at www.finra.org.

NYSE Rulemaking

Information Memo 06-80, Permitting DVP/RVP Customers to Opt Out of Receiving Statements, Issued November 30, 2006

.87 The SEC has approved amendments to NYSE Rule 409, "Statements of Accounts to Customers," permitting institutional customers doing business solely on a deliver versus payment/receive versus payment basis (DVP/RVP) to opt out of receiving statements as otherwise required by the rule, subject to prescribed requirements.

Information Memo 06-87, SIPC Information for Customers, Issued December 22, 2006

.88 The SEC has approved amendments to NYSE Rule 409, "Statements of Accounts to Customers" requiring member organizations to add a legend to customer statements of account advising customers to report promptly any inaccuracy or discrepancy in that person's account to his or her brokerage firm, and a new Rule 409A requiring that member organizations advise customers, in writing, of the availability of information regarding the Securities Investor Protection Corporation (SIPC). The SEC recently approved comparable amendments to NASD Rule 2340, "Customer Account Statements."

Information Memo 07-37, Amendments to NYSE Net Capital Rules, Issued April 25, 2007

.89 The SEC approved amendments to NYSE Rules 325 and Rule 326 to reflect CFTC amendments under the Exchange Act, including amendments to Exchange Act Rule 15c3-1, which established an alternative method of computing net capital for broker-dealers. The NYSE amendments also reflect amendments to CFTC rules under the Commodities Exchange Act with respect to minimum net capital requirements for FCMs.

Information Memo 07-76, SEC and NYSE Amendments Concerning Short Sale Rules, Issued July 23, 2007

.90 The SEC issued a release adopting amendments to its rules governing short sales. Specifically, the SEC amendments eliminate Rule 10a-1 under the Exchange Act. Additionally, the amendments add Rule 201 of Regulation SHO to provide that no price test, including any price test by any SRO, shall apply to short selling in any security. Rule 200(g) of Regulation SHO, as amended, removes the requirement that a broker-dealer mark a sell order of an equity security as *short exempt* if the seller is relying on an exception from Rule 10a-1, or any price test of any exchange or national securities association as this rule is no longer necessary with the elimination of the price test requirements.

Information Memo 07-79, Changes to Disciplinary Proceedings at NYSE Regulation as a Result of the Regulatory Consolidation with NASD, Issued July 30, 2007

.91 The purpose of this information memo is to advise members and member organizations of changes to disciplinary procedures at NYSE regulation that will be implemented in connection with the regulatory consolidation of NASD and certain member firm functions from NYSE regulation.

National Futures Association

.92 The NFA amended several of its rules governing Forex Dealer Members (FDMs). These amended requirements include the following:

- Effective March 31, 2007, the NFA replaced an FDM capital requirement calculation that had been based on 1 percent of the total net notional value of retail customer positions with a new capital requirement calculation based on 5 percent of liabilities to retail off-exchange foreign currency (forex) customers.
- Effective July 1, 2007, FDMs must calculate the amount owed to U.S. customers for forex transactions and hold assets equal to or in excess of that amount at a qualifying institution in the United States or in a money center country (as defined in CFTC Regulation 1.49).
- Effective December 21, 2007, the minimum net capital requirement for FDMs will increase from $1 million to $5 million. Other NFA amendments effective on December 21, 2007, will eliminate concentration charges for FDMs and will be replaced by restrictions on the types of firms with which an FDM may maintain assets and cover its exposure for purposes of the haircuts specified in CFTC Regulation 1.17.

Recent Concerns of Regulators

.93 Over the past several years during examinations of broker-dealers and FCMs, regulators encountered a number of issues, some of which are discussed in the following paragraphs.

SEC Compliance Alert

.94 The SEC released a compliance alert in June 2007 that identifies areas that have been of concern during recent compliance examinations. Listed in the following paragraphs in summary form are compliance issues found in broker-dealer firms. Also included in the compliance alert are issues found at investment advisers. Readers can view the full text of the compliance alert for complete information by accessing www.sec.gov/about/offices/ocie/complialert.htm.

Sales of Section 529 College Savings Plans

.95 Many firms appeared to lack adequate written supervisory procedures or supervisory processes to review the 529 plan transactions in customer accounts. Also, it did not appear that the firms had incorporated training for registered representatives or supervisors with respect to the specific factors that could impact the suitability of the firm's recommendations with respect to 529 plans.

Sales of Collateralized Mortgage Obligations

.96 Examiners found deficiencies in the disclosures provided to customers in connection with Collateralized Mortgage Obligation (CMO) transactions. These deficiencies were in both content and type of materials provided to customers. They also found a lack of supervisory procedures to review the adequacy of disclosures made to investors in connection with the sale of CMOs, indications that CMOs were sold to unsuitable customers, and some instances of undisclosed markups that appeared to be excessive.

Sales of Real Estate Investment Trusts

.97 Inadequate and potentially misleading disclosures to investors were found concerning the risk of the investments, the possible future public trading market for the real estate investment trusts (REITs), and their liquidity. Deficiencies were also noted relating to the valuation of the investments in REITs, the source of dividend payments, sales of the securities prior to registration, lack of supervision over registered representatives selling REITs, and potential conflicts of interest arising from excessive noncash compensation paid by sponsors of the REIT.

Supervisory Procedures to Ensure Compliance with Regulation SHO

.98 Many firms were found to have inadequate written supervisory procedures to ensure compliance with regulation SHO. Consequently, the firms were not in compliance with various requirements.

Charges in Separately Managed Accounts

.99 Examinations found instances where customers had been overcharged for separately managed account fees. It appeared that control procedures were lacking to ensure that the fees assessed to customers were consistent with the charges outlined in customer agreements and offering documents.

Part-Time Financial and Operations Principles

.100 During examinations of broker-dealers employing a part-time FINOP, examiners found that some firms appeared to have inaccurate books and records that resulted in erroneous financial reports to regulators. Instances were found where the part-time FINOP had no role in the actual supervision or creation and maintenance of various books and records, as required by NASD.

Expense Sharing Arrangements

.101 Targeted examinations of broker-dealers that utilized expense sharing arrangements revealed various deficiencies, including indications that certain firms operated while failing to maintain the required minimum net capital. The deficiencies were caused by the inappropriate shifting of a liability from the broker-dealer to an affiliate. Also, some firms failed to maintain adequate expense-sharing agreements.

CFTC Concerns

Letters of Credit

.102 Although exchange or clearinghouse rules may permit letters of credit to be accepted as performance bond or margin, letters of credit cannot be used to offset or secure any FCM customer deficit. The risk of improperly including letters of credit in regulatory reporting may be increased by the use of back office applications that are provided by third party service providers. All FCMs are reminded that:

- Letters of credit are not to be reported as segregated assets under CFTC Regulation 1.20 or as set-aside assets under Part 30 of the regulations of the CFTC. When computing the amount of customer funds required to be held in segregated or secured accounts, letters of credit must be excluded and cannot be used to offset any customer deficit.
- Letters of credit are not satisfactory collateral under CFTC Regulation 1.17 for securing any form of receivable owed to the FCM, including a receivable arising from a deficit in the account of a customer or noncustomer.

Maintenance of Minimum Financial Requirements and Notification Requirements

.103 CFTC Regulation 1.17 specifies minimum capital requirements, and CFTC Regulation 1.12 specifies the conditions requiring FCMs to give notice of certain events occurring in a firm's financial or operational condition, changes or anticipated changes in capital balances, and how and when such notices are to be given.

.104 For example, Regulation 1.12(g) requires that an FCM provide written notice of a substantial reduction in capital as compared to that last reported in a financial report filed with the CFTC pursuant to Regulation 1.10. If such reduction would be caused by a withdrawal of equity capital of 30 percent or more, notice must be provided at least 2 days prior to the withdrawal. For any reduction in net capital of 20 percent or more, notice must be provided within 2 days after the reduction.

.105 FCMs should establish procedures to ensure that the notices required by CFTC regulations are filed with the CFTC within the established time frames set forth in the regulations. In particular, it is a violation of CFTC rules for an FCM to not file a notice of a withdrawal of equity capital of 30 percent or more at least 2 days prior to such withdrawal. FCMs should not provide the notice after the filing of the financial statements in which the withdrawal is reflected. Failure to make a timely filing negates the purpose of the rule, which is designed to alert the CFTC to a possible change in an FCM's financial condition. Notices should be filed promptly when due and provide an explanation for the decrease in net capital.

.106 FCMs also should consider including details in the comments section of the electronically filed financial report affected by reporting when they have made or intend to make the filing required by Regulation 1.12(g).

Segregation of Customer Funds in Multiple Currencies

.107 FCMs must maintain compliance with CFTC recordkeeping, computation, and segregation requirements applicable to customer funds held in multiple currencies. Regulation 1.20 requires that all customer funds be separately accounted for and segregated as belonging to commodity customers and deposited in an account that clearly identifies those funds as such. Regulation 1.32 requires each FCM to compute as of the close of each business day, on a currency-by-currency basis:

1. The total amount of customer funds on deposit in segregated accounts on behalf of commodity and commodity option customers;
2. The amount of such customer funds required to be on deposit in segregated accounts; and
3. The amount of the FCM's residual interest in such customer funds.

.108 CFTC Regulation 1.49 specifies the conditions under which the FCM's obligations to a customer may be denominated in currencies other than the U.S. dollar. The regulation also specifies the geographic locations in which customer funds may be held and the required qualifications for permissible depositories in those locations.

.109 Some areas of recent focus in regard to these regulations include the treatment of customer-owned securities that are denominated in non-U.S. currencies, and which are held in depositories outside of the United States. All FCMs should take steps to ensure that such depositories satisfy all of the required criteria set forth in Regulation 1.49(d)(3). FCMs should also ensure that such customer owned securities are included in the segregation computation for the currency in which they are denominated.

.110 Furthermore, FCMs should ensure that offsets to customer account deficits that are denominated in multiple currencies are computed in accordance with Rule 1.49(e). At the close of each business day, Rule 1.49(e) requires the FCM to maintain in segregated accounts sufficient U.S. dollars, held in the United States, to meet all U.S. dollar obligations, and also sufficient funds in each other currency to meet obligations in such currency, with certain permitted substitutions:

1. U.S. dollars held in the United States may be used to meet obligations denominated in any other currency.

2. "Money center" currencies and U.S. dollars held in money center countries may be held to meet obligations denominated in currencies other than the U.S. dollar.

Foreign Currency Exchange Transactions (Forex)

.111 CFTC staff issued an advisory on August 30, 2007, concerning retail off-exchange foreign currency (forex) futures or option transactions.

.112 The advisory addresses the following issues: (1) registration requirements for associated persons of firms registered as IBs, commodity trading advisors, and CPOs that are involved in forex transactions; (2) the permissibility of certain unregistered affiliates of an FCM to act as proper counterparties in forex transactions; (3) claims that forex customer funds are segregated; (4) introducing entities acting as FCMs; (5) the applicability of the IB guarantee agreement to forex transactions and prohibiting guaranteed IBs from introducing forex transactions to an FCM that is not its guarantor FCM; (6) prohibiting forex account statements of an FCM's unregistered affiliate from being included in the FCM's account statements to its customers; and (7) prohibiting retail customers from acting as counterparties to each other in forex transactions.

.113 In addition, on May 7, 2007, the CFTC and the North American Securities Administrators Association issued a joint investor alert to warn of the dangers facing retail investors who are lured into forex trading frauds.

.114 The regulators cautioned investors that off-exchange forex trading by retail investors is at best extremely risky, and at worst, plagued by outright fraud.

CFTC Annual "Dear CPO" Letter

.115 On January 31, 2007, CFTC staff issued its annual letter to CPOs outlining key reporting issues and common reporting deficiencies found in annual financial reports for commodity pools. The letter emphasized the CFTC staff's concerns and, accordingly, may alert the auditor to high-risk issues that could affect assertions contained in the financial statements of commodity pools. CFTC staff suggested that CPOs share the letter with their independent auditors.

.116 The following are major concerns addressed in the letter:

- Due dates of commodity pool financial filings—late filings
- Other filings by CPOs regarding:
  - — Replacement of an accountant, election of fiscal year, and
  - — Regulation 4.13 exemptions
- Compliance with U.S. generally accepted accounting principles (GAAP)
- Requests for limited relief from U.S. GAAP compliance for certain offshore commodity pools
- Initial annual reports and final annual reports
- Accounting developments:
  - — Financial Accounting Standards Board (FASB) Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity,* implementation and its impact on participants' redemptions
  - — Alternative investments, audit considerations
  - — AICPA technical guidance regarding offering costs
  - — FASB Statement No. 157, *Fair Value Measurements*
- Requests for confidential treatment of commodity pool annual reports

.117 The letter also noted that the CFTC's Division of Clearing and Intermediary Oversight issued similar letters in prior years, which are available on the CFTC's Web site at www.cftc.gov. Those letters should be consulted with respect to commodity pool annual financial statements and reporting. In addition, CFTC interpretations and staff letters providing guidance from 1995 forward are also available there. In particular, CFTC Interpretive Letter 94-3, "Special Allocations of Investment Partnership Equity," addresses how a CPO should report such allocations to the general partner in a commodity pool's financial statements.

CFTC "Dear FCM" Letter

.118 On February 8, 2007, CFTC staff issued a letter to FCMs outlining key reporting issues and common reporting deficiencies found in annual audited financial reports for FCMs. The letter emphasized the CFTC staff's concerns and, accordingly, may alert the auditor to high-risk issues that could affect assertions contained in the financial statements of FCMs. CFTC staff suggested that FCMs share the letter with their independent auditors.

.119 Issues addressed in the letter include the following:

- Filing deadline: CFTC Regulation 1.10(b)(1)(ii)
- Accountant's report on material inadequacies: CFTC Regulation 1.16(c)(5)
- Paper versus electronic filing: CFTC Regulation 1.10(b)(2)(iii)
- Reporting material differences between unaudited and audited financial reports: CFTC Regulation 1.10(d)(2)(vi)
- Exchange memberships excluded from current assets: CFTC Regulation 1.17(c)(2)(x)
- Required oath or affirmation: CFTC Regulation 1.10(d)(4)
- Replacement of Accountants: CFTC Regulation 1.16(g)

.120 The letter is available on the CFTC's Web site at www.cftc.gov.

Audit and Attestation Issues and Developments

.121 Authoritative audit guidance issued during the past year that affects a wide variety of entities can be found in this alert in the section titled "Recent Auditing and Attestation Pronouncements and Related Guidance." Guidance issued this year that is of specific interest to the securities industry can be found in the following paragraphs. The following summary is for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable rule or release.

AICPA Practice Aid, *Alternative Investments—Audit Considerations*

.122 Over the past several years, many companies have dramatically increased their investment in financial instruments that do not have a readily determinable market value (that is, investments not listed on national exchanges or on over-the-counter markets, or for which quoted market prices are not available from sources such as financial publications, the exchanges, or the NASDAQ System). This practice aid addresses challenges associated with auditing such investments. These investments include private investment funds meeting the definition of an investment company under the provisions of the AICPA Audit and Accounting Guide *Investment Companies*, such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity pools, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds. Collectively, these types of investment funds are commonly referred to as alternative investments. Alternative investments may be structured as limited partnerships, limited liability corporations, trusts, or corporations.

.123 This practice aid was developed to provide additional guidance to auditors of investor entities as to how the auditor may obtain sufficient appropriate audit evidence in order to conclude that the financial statements are free of material misstatement. This nonauthoritative practice aid will assist auditors in auditing alternative investments. The practice aid includes guidance on the following:

- General considerations pertaining to auditing alternative investments
- Addressing management's financial statement existence assertion
- Addressing management's financial statement valuation assertion
- Management representations
- Disclosure of certain significant risks and uncertainties
- Reporting

.124 The practice aid also includes the following appendixes:

- Appendix 1, "Example Confirmation for Alternative Investments"
- Appendix 2, "Illustrative Examples of Due Diligence, Ongoing Monitoring, and Financial Reporting Control"

.125 You can download the practice aid at www.aicpa.org/download/members/div/auditstd/Alternative_Investments_Practice_Aid.pdf.

Accounting Issues and Developments

.126 Authoritative guidance issued in the past year that affects a wide range of entities is located in the section titled "Recent Accounting Pronouncements and Related Guidance," found in this alert. Guidance that is of special interest to the securities industry can be found below. While some of this guidance was issued in 2006, its full effect is now being felt. Therefore, it is being included again in this year's alert.

Fair Value Measurements

FASB Statement No. 157

.127 On September 15, 2006, the FASB issued FASB Statement No. 157 which provides enhanced guidance for using fair value to measure assets and liabilities. FASB Statement No. 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value and does not expand the use of fair value in any new circumstances. The following is a brief discussion of some of the provisions of FASB Statement No. 157 that should be of interest to broker-dealers and their auditors.

.128 FASB Statement No. 157 clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market in which the reporting entity would transact for the asset or liability, that is, the principal or most advantageous market for the asset or liability. The transaction to sell the asset or transfer the liability is a hypothetical transaction at the measurement date, considered from the perspective of a market participant that holds the asset or owes the liability. Therefore, the definition focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price).

.129 FASB Statement No. 157 establishes the fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs should be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

.130 Among other matters, FASB Statement No. 157 precludes the use of a blockage factor. Paragraph 27 of FASB Statement No. 157 provides that:

> "If the reporting entity holds a position in a single financial instrument (including a block) and the instrument is traded in an active market, the fair value of the position shall be measured within Level 1 as the product of the quoted price for the individual instrument times the quantity held. The quoted price shall not be adjusted because of the size of the position relative to trading volume (blockage factor). The use of a blockage factor is prohibited, even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price."

.131 Footnote 11 to this paragraph states that, "The guidance in this Statement applies for positions in financial instruments (including blocks) held by all entities, including broker-dealers and investment companies within the scope of the AICPA Audit and Accounting Guides for those industries."

.132 The guidance in FASB Statement No. 157 applies for derivatives and other financial instruments measured at fair value under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, at initial recognition and in all subsequent periods. Therefore, FASB Statement No. 157 nullifies the guidance in footnote 3 of Emerging Issues Task Force (EITF) Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities," which applied for derivatives (and other) instruments measured at fair value at initial recognition under FASB Statement No. 133. That guidance precluded immediate recognition in earnings of an unrealized gain or loss, measured as the difference between the transaction price and the fair value of the instrument at initial recognition, if the fair value of the instrument was determined using significant unobservable inputs. FASB Statement No. 157 provides, however, that for unobservable inputs, the fair value measurement objective remains the same, that is, an exit price from the perspective of a market participant that holds the asset or owes the liability. Consistent with that objective, FASB Statement No. 157 clarifies that the fair value measurements should be adjusted for risk, that is, the amount market participants would demand because of the risk (uncertainty) inherent in a particular valuation technique used to measure fair value (such as a pricing model) or the risk inherent in the inputs to the valuation technique (a risk premium notion), or both. Accordingly, a measurement (for example, a "mark-to-model" measurement) that does not include an adjustment for risk would not represent a fair value measurement if market participants would include one in pricing the related asset or liability.

.133 FASB Statement No. 157 also amends FASB Statement No. 133 to remove the similar guidance to that in EITF Issue No. 02-3, which was added by FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments*.

.134 FASB Statement No. 157 provides that if an input used to measure fair value is based on bid and ask prices (for example, in a dealer market), the price within the bid-ask spread that is most representative of fair value in the circumstances should be used to measure fair value, regardless of where in the fair value hierarchy the input falls (Level 1, 2, or 3). FASB Statement No. 157 does not preclude the use of mid-market pricing or other pricing conventions as a practical expedient for fair value measurements within a bid-ask spread.

.135 FASB Statement No. 157 clarifies that market participant assumptions also include assumptions about the effect of a restriction on the sale or use of an asset. It provides that a fair value measurement for a restricted asset should consider the effect of the restriction if market participants would consider the effect of the restriction in pricing the asset.

.136 FASB Statement No. 157 also clarifies that a fair value measurement for a liability reflects its nonperformance risk (the risk that the obligation will not be fulfilled). Because nonperformance risk includes the reporting entity's credit risk, the reporting entity should consider the effect of its credit risk (credit standing) on the fair value of the liability in all periods in which the liability is measured at fair value under other accounting pronouncements, including FASB Statement No. 133.

.137 FASB Statement No. 157 also expands disclosures about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition. The disclosures focus on the inputs used to measure fair value and for recurring fair value measurements using significant unobservable inputs (within Level 3 of the fair value hierarchy), the effect of the measurements on earnings (or changes in net assets) for the period. FASB Statement No. 157 encourages entities to combine the fair value information disclosed under FASB Statement No. 157 with the fair value information disclosed under other accounting pronouncements, including FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, where practicable.

.138 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007,[2] and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year. You can access FASB Statement No. 157 online at www.fasb.org/pdf/fas157.pdf.

Fair Value Measurement—Practical Guidance

.139 As companies implement the fair value guidance, they may encounter unanticipated issues. One of these issues has arisen due to the current conditions in the credit markets. The AICPA Center for Audit Quality

---

[2] FASB is proposing a 1 year deferral for the implementation of FASB Statement No. 157 for certain nonfinancial assets and liabilities. This delay is not yet approved and readers should be alert for further developments.

(CAQ) issued a White Paper on FASB Statement No. 157 entitled "Measurements of Fair Value in Illiquid (or Less Liquid) Markets" in October 2007. The purpose of the white paper is to discuss issues associated with the measurement of fair value under existing GAAP in the context of illiquid (or less liquid) market conditions that currently exist in many segments of the credit markets. The paper can be accessed online at www.thecaq.org/members/alerts/CAQAlert2007_51_10032007.pdf.

FASB Statement No. 159

.140 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.141 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as long as the entity also elects to apply the provisions of FASB Statement No. 157 and has not yet issued financial statement, including required notes to those financial statements, for any interim period for the fiscal year of adoption. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007). The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA CAQ issued an alert on this development in April, 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed online at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109*

.142 In June 2006, the FASB issued FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109*. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The standard also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.143 FIN 48 was issued to reduce the significant diversity in practice. A company's tax positions can change over time from a myriad of variables, for example, IRS developments, state taxing authorities, or tax court cases. Companies were recording uncertainties in different ways. Some companies had been assessing a position being supported under a tax audit, some had also included the probability of an audit, and some companies simply recorded tax assets and liabilities based on what was filed on their returns. Additionally, some companies recorded tax reserves for contingent tax liabilities.

.144 The scope of FIN 48 applies to all tax positions. The interpretation assumes that a company cannot factor in the probability of being audited. Therefore, for purposes of determining the likelihood of being sustained, the taxpayer has to presume the position will be examined by taxing authorities. Consequently, the tax benefit of a position that would not be sustained under audit cannot be recorded.

.145 Prior to the issuance of FIN 48, management's common approach was to create an inventory of uncertain tax positions and evaluate them under FASB Statement No. 5, *Accounting for Contingencies*. Because FIN 48 now provides guidance, FASB Statement No. 5 no longer applies to uncertain tax positions. However, for clarification, FIN 48 does not in any way alter the requirement in FASB Statement No. 109, *Accounting for Income Taxes*, to assess the need for a valuation allowance for deferred tax assets.

.146 Only tax positions that meet the more likely than not recognition threshold, as defined, may be recognized or continue to be recognized upon adoption of FIN 48. The cumulative effect of applying the interpretation for the first time is reported as an adjustment to the opening balance of retained earnings for that fiscal year, presented separately. This interpretation is effective for fiscal years beginning after December 15, 2006.[3]

.147 For calendar year corporations, the new rules would seem to initially take effect with first quarter 2007 results. However, the new rules require calendar year corporations to have a "clean" starting point for their tax accounts at January 1, 2007. In other words, the deferred tax asset and deferred tax liability accounts on that date must be determined in accordance with the standards of FIN 48. Note that companies that do not file quarterly reports may be able to put compliance off for a year.

.148 The IRS has recognized that some taxpayers may wish to request a greatly accelerated examination and resolution before the end of their current fiscal year of "uncertain tax positions" taken in filed returns or expected to be taken in tax returns yet to be filed, or both. According to information received by the AICPA, the IRS has put procedures in place to quickly respond to taxpayer requests to resolve some uncertain tax positions prior to the end of their current fiscal year. The IRS has provided guidance and direction to field teams for taxpayers under examination which can be viewed online at www.irs.gov/businesses/corporations/article/0,,id=163496,00.html. The IRS has also established procedures for taxpayers whose returns are not under examination as well as for taxpayers whose returns have not yet been filed.

.149 Practitioners may find it helpful to refer to the recently issued AICPA *Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48*, which includes highlights of the interpretation and its implications for in-house accountants, auditors, and tax advisers. It is not authoritative, but is intended to assist practitioners in quickly understanding the requirements of FIN 48. The practice guide can be accessed online at www.tax.aicpa.org/Resources/Professional+Standards+and+Ethics/Practice+Guide+on+Accounting+for+Uncertain+Tax+Positions+Under+FIN+48.htm.

Other Guidance

Statement of Position 07-1, Clarification of the Scope of the Audit and Accounting Guide *Investment Companies* and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies

.150 This Statement of Position (SOP) provides guidance for determining whether an entity is within the scope of the AICPA Audit and Accounting Guide *Investment Companies* (guide). For those entities that are investment companies under this SOP:

- The provisions of the guide should be used in presenting the financial statements.

[3] FASB has proposed a 1 year deferral of the effective date of FIN 48 for nonpublic entities, including nonprofit organizations, to fiscal years beginning after December 15, 2007. Readers should be alert for further developments.

- The guide should be utilized to determine whether the accounting principles of the guide should be retained by a parent company in consolidation or by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity (equity method investor).
- Certain disclosures are required by parent companies and equity method investors in investment companies that retain investment company accounting in the parent company consolidated financial statements or the financial statements of an equity method investor.

.151 This guidance was to be effective for years beginning on or after December 15, 2007. However, at its October 17, 2007 Board meeting, FASB proposed to indefinitely defer the effective date of SOP 07-1 to enable FASB staff to address certain implementation issues that have been brought to their attention. In addition, for entities that have not yet adopted the provisions of SOP 07-1, early adoption will be prohibited. These decisions will be documented in a proposed FASB Staff Position that will have a 30 day comment period. Readers should be alert for further developments.

FASB Staff Position FIN 39-1

.152 FASB Staff Position (FSP) FIN 39-1, *Amendment of FASB Interpretation No. 39*, is effective for fiscal years beginning after November 15, 2007. This FSP amends paragraph 3 of Interpretation 39, *Offsetting of Amounts Related to Certain Contracts*, to replace the terms *conditional contracts* and *exchange contracts* with the term *derivative instruments*, as defined in FASB Statement No. 133. It also amends paragraph 10 of Interpretation 39 to permit an entity to offset fair value amounts recognized for the right to reclaim cash collateral, or the obligation to return cash collateral, against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. See www.fasb.org/pdf/fsp_fin39-1.pdf.

FASB Staff Position EITF 00-19-2

.153 FSP EITF 00-19-2, *Accounting for Registration Payment Arrangements*, is effective for financial statements issued for fiscal years beginning after December 15, 2006, and interim periods within those fiscal years. This FSP clarifies that a contingent obligation to make future payments, or otherwise transfer consideration under a registration payment arrangement, should be separately recognized and measured in accordance with FASB Statement No. 5. This accounting treatment applies in situations where the registration payment arrangement is issued as a separate agreement and also in situations where the arrangement is included as a provision of a financial instrument or other agreement. See www.fasb.org/pdf/fsp_eitf00-19-2.pdf.

Statement 133 Implementation Issue No. B40

.154 Statement 133 Implementation Issue No. B40, *Embedded Derivatives: Application of Paragraph 13(b) to Securitized Interest in Prepayable Financial Assets*, sets forth the circumstances where a securitized interest in prepayable financial assets would not be subject to the conditions in paragraph 13(b) of FASB Statement No. 133. The objective of the guidance is to provide a narrow scope exception from paragraph 13(b) for securitized interests that contain only an embedded derivative that is tied to the prepayment risk of the underlying prepayable financial assets and that meet the criteria set forth. See the full text of the guidance online at www.fasb.org/derivatives/issueb40.shtml for complete information.

Statement 133 Implementation Issue No. G26

.155 Statement 133 Implementation Issue No. G26, *Cash Flow Hedges: Hedging Interest Cash Flows on Variable-Rate Assets and Liabilities That are not Based on a Benchmark Interest Rate*, clarifies two situations related to variable-rate financial assets or liabilities for which the interest rate is not based solely on an index. The issue addressed relates to situations where the interest rate is set through an auction process. Please see the full text of the guidance online at www.fasb.org/derivatives/issueg26.shtml for complete information.

AICPA Technical Practice Aid, Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments*, working draft as of December 1, 2006*

.156 This working draft was prepared by the Analyzing Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments Task Force and the staff of the AICPA. Its content reflects what the authors believe is existing authoritative literature as of December 1, 2006. Readers are reminded that there are several projects currently in process at the FASB that may affect the contents of this Technical Practice Aid draft, and they must be alert to any changes. This draft has not been approved, disapproved, or otherwise acted on by any senior technical committee of the AICPA, the FASB, or the staff of the SEC and has no official or authoritative status.

.157 This Technical Practice Aid draft is not intended to provide practitioners with interpretative guidance or to describe the accounting for specific instruments. Rather, it is intended to assist practitioners in identifying the scope of and the interrelationships between the various relevant accounting pronouncements. To accomplish that goal, the practice aid is a roadmap addressing the accounting considerations that should be considered in analyzing freestanding and embedded derivative financial instruments at issuance and on an ongoing basis.

.158 This working draft is available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/Working+Draft+of+Convertible+Debt+Convertible+Preferred+Shares+Warrants+and+Other+Equi.htm.

Recent Auditing and Attestation Pronouncements and Related Guidance

.159 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.160 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, Select SEC-approved PCAOB Releases) Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
	• Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.161 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.162 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.163 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.164 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.165 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases, the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.166 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the report release date.
- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.167 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses, and that are then communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.168 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.169 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.170 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.171 One issue that has arisen in audits of smaller entities is the increase in costs as a result of the time the auditor spends documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.172 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of a material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[4] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.173 The new requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.174 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or by going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.175 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier application permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).

(continued)

[4] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.176 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's [COSO] framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or by going online at www.cpa2biz.com.

Companion Audit Guide

.177 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or by going online at www.cpa2biz.com.

Other Audit Developments

Audit Documentation Technical Practice Aids

.178 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.179 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.180 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, Dating of the Auditor's Report and Related Practical Guidance

.181 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.182 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.183 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf.

PCAOB Auditing Standard No. 5

.184 On May 24, 2007, the PCAOB adopted Auditing Standard No. 5, which supersedes its Auditing Standard No. 2. Also adopted was an independence rule relating to the auditor's provision of internal control related nonaudit services and conforming amendment resulting from the issuance of PCAOB Auditing Standard No. 5. The SEC approved the standard on July 25, 2007.

.185 The PCAOB has closely monitored the implementation of Auditing Standard No. 2 and came to two conclusions:

1. The audit of internal control over financial reporting has produced significant benefits related to corporate processes and controls.
2. These benefits have come at a significant and higher than anticipated cost, and at times, the effort has appeared greater than necessary to conduct an effective audit of internal control over financial reporting.

.186 The PCAOB adopted the new Auditing Standard No. 5 to replace Auditing Standard No. 2 with the primary objective of focusing the auditor on matters most important to internal control. Goals of this new standard are to eliminate unnecessary procedures, to simplify and shorten the standard by reducing detail and specificity, and to make the audit more scalable for smaller and less complex companies. The following are some examples of important differences between Auditing Standard No. 5 and Auditing Standard No. 2:

- The new standard is less prescriptive, with fewer mandatory requirements and more reliance on auditor judgment.
- The new standard makes the audit scalable so it can change to fit the size and complexity of any company.
- The new standard directs the auditor to focus on what matters most and eliminates unnecessary procedures from the audit.
- The new standard includes a principles-based approach to determining when and to what extent the auditor can use the work of others.

.187 The adopted standard will do the following, among other things:

- Direct the auditor to the most important controls and emphasize the importance of risk assessment using a top-down approach
- Emphasize fraud controls, with an emphasis on assessing fraud risk in the planning process and additional guidance on the types of controls that may address fraud risk
- Identify management fraud as an area of higher risk, directing the auditor to focus more attention in this area
- Recalibrate the walkthrough requirement
- Permit consideration of knowledge obtained during prior audits
- Revise the definitions of significant deficiency and material weakness, as well as the "strong indicators" of a material weakness
- Adopt communication requirements, which require, among other things, that the auditor communicate, in writing, any material weaknesses identified to management and the audit committee, and to communicate any identified significant deficiencies, in writing, to the audit committee
- Direct the auditor to tailor the audit to reflect attributes of smaller and less complex companies

- Remove the requirement to evaluate management's process, which the PCAOB believes could contribute to a checklist approach to compliance by the auditors
- Provide auditors with further guidance regarding scoping decisions for multiple location audits

.188 Auditing Standard No. 5 is effective for audits of internal control over financial reporting required by Section 404(b) of the Sarbanes-Oxley Act of 2002 for fiscal years ending on or after November 15, 2007. Early adoption is permitted and encouraged. Please see www.pcaob.org/Standards/Standards_and_Related_Rules/Auditing_Standard_No.5.aspx for the full release document.

.189 Upon approval of the new standard by the SEC on July 25, 2007, the PCAOB announced that it is undertaking several initiatives to support the successful implementation of the standard. These initiatives include working closely with the audit firms early in their process as they evaluate how the new standard will affect their firms' audits of internal control. Other initiatives include continued outreach to public companies and smaller audit firms regarding the new standard. See full text of the press release at www.pcaob.org/News_and_Events/News/2007/07-25.aspx.

Rule 3525, Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

.190 The PCAOB also adopted a new rule related to the auditor's responsibilities when seeking audit committee pre-approval of internal control related nonaudit services. The rule is intended to ensure that audit committees are provided relevant information for them to make an informed decision on how the performance of internal control-related services may affect independence. Specifically, the public accounting firm shall describe, in writing, the scope of the service and submit to the audit committee, as well as discuss with the audit committee, the potential effects of the service on the firm's independence. Registered firms are also required to document the substance of such discussions in writing. This rule is effective for audits of fiscal years ending on or after November 15, 2007 (the same effective date as Auditing Standard No. 5). The full text of this rule can be found online at www.pcaob.org/Rules/Rules_of_the_Board/Rule_3525.pdf.

Conforming Amendments to Interim Auditing Standards

.191 In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments due to the issuance of Auditing Standard No. 5 can be found online at www.pcaob.org/Rules/Rules_of_the_Board/Conforming_Amendments_AS5.pdf#page=1.

.192 For more information on PCAOB proposed rules and standards, please see *SEC and PCAOB Alert—2007/08*, which is available at www.cpa2biz.com.

Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud

.193 On January 22, 2007, the PCAOB issued a report that addresses the auditors' responsibility as it relates to fraud, principally as it relates to AU Section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). The PCAOB has identified areas (noted during the course of inspections) that auditors should focus on during the audit. The report is not changing any existing standards, but is focusing on areas that need special attention during an audit as it relates to fraud. Major topics discussed include the following:

- Auditors' overall approach to the detection of fraud
- Brainstorming sessions and fraud-related inquiries
- Auditors' response to fraud risk factors

- Financial statement misstatements
- Risk of management override of controls
- Other areas to improve fraud detection

.194 The full report can be accessed online at www.pcaob.org/Inspections/Other/2007/01-22_Release_2007-001.pdf.

Recent AICPA Independence and Ethics Pronouncements

.195 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.196 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. As indicated below, some of these items are described more fully in a prior section of this alert titled, "Accounting Issues and Developments." For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115* See the information in "Fair Value Measurements" in the "Accounting Issues and Development" section of the alert.
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements* See the information in "Fair Value Measurements" in the "Accounting Issues and Development" section of the alert.
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* See the information the "Accounting Issues and Development" section of the alert.
FASB Emerging Issues Task Force (EITF) Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.

Recent Accounting Pronouncements and Related Guidance	
FASB Staff Positions (FSPs) (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA Statement of Position (SOP) 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* See the information in "Other Guidance" in the "Accounting Issues and Development" section of the alert.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.197 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the securities industry were briefly explained in the section of this alert titled "Accounting Issues and Developments."

On the Horizon

.198 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the securities industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.199 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

Revision of AICPA Practice Aid, Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools

.200 The Commodity Practice Aid Task Force of the AICPA is in the process of revamping this practice aid to reflect changes in accounting and auditing guidance and regulatory rules that have occurred since the original issuance of this publication. The revised practice aid will provide practitioners with nonauthoritative, practical guidance on auditing financial statements of FCMs, IBs, and commodity pools. Organized to complement the Audit and Accounting Guide *Brokers and Dealers in Securities*, this practice aid includes an overview of the commodity industry; discussions of regulatory considerations, auditing considerations, and accounting standards; and illustrative financial statements of FCMs, IBs, and commodity pools. Readers should be alert to further developments.

ASB Clarity Project

.201 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including the following:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of governmental entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.202 The period to comment ended June 15, 2007. The discussion paper can be accessed online at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.203 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.204 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments, and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www .aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of **Present Fairly in Conformity With Generally Accepted Accounting Principles**

.205 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles,* for Nongovernmental Entities. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69, The Meaning *of Present Fairly in Conformity With Generally Accepted Accounting Principles* [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.206 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.207 The following are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.208 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations

.209 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.210 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.211 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.212 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133, including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.213 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued the exposure draft *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.214 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.215 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.216 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, which is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.217 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Proposed EITF issues that are closely related to the securities industry are listed in summary form. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

EITF Issue No. 07-1, Accounting for Collaborative Arrangements

.218 EITF Issue No. 07-1 seeks to determine what type of arrangement constitutes a collaborative arrangement subject to these rules, how costs incurred and revenues generated on sales to third parties should be reported in the case of joint agreements, how sharing payments made to, or received by, a partner pursuant to a Collaboration Agreement should be presented in the Income Statement and what disclosures should be required by the parties to the arrangement. The text is available at www.fasb.org/eitf/0701DA.pdf.

.219 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Proposed FSPs that are closely related to the securities industry are listed in summary form. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

FSP APB 14-a

.220 This proposed FSP would clarify that convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) are not addressed by paragraph 12 of Accounting Principles Board (APB) Opinion No. 14, *Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants.* It would require that instruments within its scope be separated into their liability and equity components at initial recognition, and provides guidance on the attribution of proceeds at initial recognition and at settlement. Please see the full text of FSP APB 14-a at www.fasb.org/fasb_staff_positions/prop_fsp_apb14-a.pdf.

FSP FAS 140-d

.221 This proposed FSP states that a transfer of a financial asset and a repurchase agreement involving the transferred financial asset should be considered part of the same arrangement in situations where the counterparties to the two transactions are the same unless certain criteria are met. This FSP focuses on the circumstances that would permit the transferor and transferee to separately evaluate the accounting for a transfer of a financial asset and a repurchase financing under FASB Statement No. 140, *Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.* Please see the full text of FSP FAS 140-d at www.fasb.org/fasb_staff_positions/prop_fsp_fas140-d.pdf.

SEC Concept Release on Allowing U.S. Issuers to Prepare Financial Statements in Accordance with International Financial Reporting Standards

.222 The SEC published a release to obtain information about the public's interest in allowing U.S. issuers, including investment companies subject to the Investment Company Act of 1940, to prepare financial statements in accordance with International Financial Reporting Standards as published by the International Accounting Standards Board. See Release No. 34-56217 for complete information.

Internal Control Pipeline

COSO Internal Control—Integrated Framework, Guidance on Monitoring Internal Control Systems

.223 COSO released a discussion document, *Guidance on Monitoring Internal Control Systems*, in September 2007 as part of their monitoring project. The document is intended to improve the understanding of the building blocks of effective monitoring, thereby improving both the efficiency and effectiveness of the entire system of internal control. The discussion document can be accessed online at www.coso.org/Publications/COSO_Monitoring_discussiondoc.pdf.

Resource Central

.224 The following are various resources that practitioners engaged in the securities industry may find beneficial.

Publications

.225 Practitioners may find the following publications useful with respect to the securities industry:

- Audit and Accounting Guide *Brokers and Dealers in Securities* (2007) (product no. 012707kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Independence and Ethics Alert—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.226 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.227 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.228 Among the many courses, the following are specifically related to the securities industry:

- *Implementing SOX 404: An Advanced Analysis* (product no. 737177kk). Provides information on understanding the requirements and how to effectively implement the provisions of SOX 404.
- *Management's Assessment of Internal Control* (product no. 181428kk). Based on hard-earned lessons leaned by companies that already have had to comply, this course will take management of both large and smaller public companies through the requirements of each major phase of the internal control assessment project.

.229 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.230 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the securities industry include modules related to varying aspects of internal controls, PCAOB rules and regulations, and SEC reporting.

.231 To register or learn more, visit www.cpa2biz.com.

Industry Conference

.232 Co-sponsored by the AICPA and the Financial Management Division of the SIFMA, The National Conference on the Securities Industry is designed to update attendees on significant accounting, legal, financial, and tax developments affecting the securities industry. This two-day conference is held in late fall. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

Webcasts

.233 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.234 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.235 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.236 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.237 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (877) 242-7212.

Ethics Hotline

.238 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

AICPA CAQ

.239 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.240 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit www.thecaq.aicpa.org.

AICPA Industry Expert Panel—Stockbrokerage and Investment Banking Expert Panel

.241 For information about the activities of the Stockbrokerage and Investment Banking Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_stockbroker_investbank.htm.

Industry Web Sites

.242 The Internet covers a vast amount of information that may be valuable to auditors of securities entities, including current industry trends and developments. Some of the more relevant sites for auditors with securities clients include those shown in the following table.

Organization	*Web Site*
Commodity Futures Trading Commission (CFTC)	www.cftc.gov
Financial Crimes Enforcement Network (FinCEN)	www.fincen.gov/
Financial Industry Regulatory Authority (FINRA)	www.finra.org/
Futures Industry Association	www.futuresindustry.org/
National Futures Association	www.nfa.futures.org/
New York Stock Exchange, Inc. (NYSE)	www.nyse.com
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Securities and Exchange Commission (SEC)	www.sec.gov
Securities Industry and Financial Markets Association (SIFMA)	www.sifma.org/

AAM Section 8120

Not-for-Profit Organizations Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of not-for-profit organizations with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole, CPA, CFE
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Julie Floch; Eisner LLP

Betsy Krisher; Maher Duessel

Richard Larkin; BDO Seidman, LLP

James S. Remis; Federman, Lally & Remis LLC

Nancy E. Shelmon; PricewaterhouseCoopers LLP

Stephen Kattell; Kattell and Company, P.L.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your not-for-profit organization audits. This alert can also be used by an organization's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The not-for-profit industry may be subject to specific risks of material misstatement arising from the nature of its activities, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the organization's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the organization's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the organization's activities is also dynamic, and the organization's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the organization and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the organization's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007, compared with an increase of 2.9 percent in 2006. According to 2007 fourth-quarter final estimates, real GDP increased at an annual rate of just 0.6 percent, down from third quarter real GDP growth of 4.9 percent.

.11 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. As of February 2008, the unemployment rate was 4.8 percent, representing approximately 7.4 million people.

.12 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 3.00 percentage points to 2.25 percent as of the end of March 2008. The Federal Reserve noted in its March press release that financial markets continue to experience considerable stress and credit continues to tighten for some businesses and households. The housing contraction continues to deepen and labor markets soften. As such, the policy actions taken to decrease rates are meant to promote moderate growth over time and mitigate risks to economic activity while moderating inflation.

The State of Not-for-Profits

.13 The not-for-profit sector is a growth industry. According to a study by the National Center for Charitable Statistics at the Urban Institute that covered the period from 1996 to 2006, the total number of not-for-profits recognized by the IRS increased by 36 percent. Contributions to these organizations in 2006 exceeded $295 billion while total revenues in the sector approached $1.6 trillion and assets held topped $4.3 trillion. According to U.S. Department of Labor (DOL) statistics, 27 percent of the population, or 61 million people in the United States, did volunteer work for not-for-profit organizations. As of January 1, 2007, there were 1.5 million not-for-profit organizations registered with the IRS.

.14 The Philanthropic Giving Index (PGI), established by The Center on Philanthropy at Indiana University, measures trends and expectations in United States charitable giving. The index showed a 1.5 percent increase during 2007, which indicates that the overall climate remained stable during that period.

.15 Not-for-profit organizations continue to face challenges, including continuing demands for accountability from the public and the legislative community. The ongoing demands for accountability have led to the voluntary implementation of Sarbanes-Oxley or similar regulations by some not-for-profit organizations and further discussion of future expansion of those or similar regulations to not-for-profits.

.16 The U.S. economy has shown signs of decline during the first quarter of 2008 and auditors should continue to monitor the impact of economic trends on audit risk throughout the year. The auditor should be aware of regional conditions as well as national conditions when establishing expectations for financial results. This is especially true for the not-for-profit sector in that 70 percent to 80 percent of charitable contributions are for local causes. The health of the local labor market can also have a substantial impact on donations.

Governance and Accountability

.17 Since 2002, when the Sarbanes-Oxley law was enacted, a number of accounting fraud cases have come to light. Many attribute the increase to improved detection as a result of the stringent internal control testing requirements and other provisions of the law, such as whistle-blower hotlines. While the whistle-blower and document retention provisions currently apply to both publicly held companies and not-for-profits, discussion about expanding other provisions of the law to include not-for-profit organizations has occurred. Some not-for-profit organizations have voluntarily adopted some of the provisions of Sarbanes-Oxley, including formation of an audit committee and CFO and CEO certification of the financial statements, either as a result of expectations from their corporate board members or in an effort to improve governance and accountability practices.

.18 Grant Thorton recently issued a survey, conducted in 2007, of 603 top level representatives of religious, social and human services, cultural, and healthcare organizations; educational institutions; and trade and professional associations in 47 states and the District of Columbia. According to the survey, 87 percent of not-for-profit organizations that participated in the survey have made changes to their policies with the goal of improving governance and accountability. The policies that the majority are rewriting or establishing include conflict of interest, investment, code of ethics, records-retention, whistleblower, gift acceptance, review of tax filings, and new board member policies. Nearly two-thirds of those surveyed have also developed an accounting policies and procedures manual, established an audit committee to oversee the financial statement audit and monitor internal controls, and included a CPA on their governing board or audit committee.

Corporate Sponsors

.19 Corporate giving declined by almost 7.0 percent in 2006, although it represents only 4.3 percent of the total giving for a total of $13 billion. However, in-kind giving continues to increase. More than one-third of corporate giving is in-kind. In some circumstances, resources received from corporations are advertising or sponsorship arrangements rather than straightforward monetary contributions and often strings are attached to the transfer. Specifically, the corporation may require goods or services in exchange for those funds, such as naming rights, discounted access to services, and advertisement of the company, among others. Because these transactions may be considered exchange transactions, contributions, or both, not-for-profits must be sure that the transactions are properly recorded in their books.

Embedded Giving

.20 Embedded giving, which builds a gift to a not-for-profit organization into an ordinary consumer purchase, has become a fast growing fundraising practice and an area that is drawing some attention from the U.S. Senate. Although this practice is effective at raising funds on behalf of charities, there are issues regarding accountability for those funds. Not-for-profit organizations may not be aware that money is being solicited in their name. In addition, they may not know what portion of the collected funds to which they are entitled or when they will receive the funds. Consumers may find it difficult to determine whether the money is going to the designated not-for-profit organization. A bill, S. 2529, was introduced in December 2007 in the U.S. Senate to improve disclosures for charitable giving, protect not-for-profit organizations, and inform consumers. The full text of this bill can be found at http://thomas.loc.gov/cgi-bin/query/z?c110:S.2529:.

Funding Administrative Costs

.21 Foundations, corporations, and individuals may have different priorities when it comes to selecting a not-for-profit organization to support. Some may consider the organization's mission, its reputation, the number of people served, or even who else supports it. One factor that frequently receives significant consideration is the percentage of each dollar that is spent on programs. Many donors have the perception that the biggest impact they can make with their contribution is by supporting only programmatic activities. Accordingly, operating expenses such as the accounting department, maintenance and utilities, and the executive management staff often must be supported by unrestricted dollars. Some organizations follow policies for cost allocations, charges, assessments, or assignments that result in some amount of program restricted contributions used for operating expenses. Organizations and their auditors should be careful to understand the administrative allocation process, and whether overhead costs can be paid for with restricted contributions. In addition, some not-for-profit organizations are more frequently requesting funding for organizational administration either as a component of or in addition to their requests for program funding. Auditors should develop a full understanding of the terms of these agreements, including whether they result in restrictions on the use of the funds.

Changing Face of Donors

.22 There has been an increase in the desire for control and "a say in" the direction of the mission of organizations by young donors. Though no statistics are available, a general belief is that the younger affluent donors want to participate as donors and volunteers to the organizations they support more than their older counterparts. They are more likely to want elements of control as conditions of their gifts. Anonymous giving is also increasing. A study conducted by Indiana University reveals that anonymous gifts greater than $5 million increased from 13 gifts in 2005 to 27 gifts in 2006 and 37 gifts in 2007. Possible reasons for the increase are safety concerns of the donors, adherence to religious principles, a desire to avoid solicitations from other organizations, and avoidance of family conflicts. Issues of donor privacy may present unusual problems for auditors as they attempt to confirm the amount and terms of these substantial gifts.

Retiring Work Force

.23 The demographic shift in the workplace, as baby boomers near retirement, is affecting the not-for-profit sector. Surveys indicate that 50 percent to 70 percent of executive directors plan to leave within 5 years. Many are founders and leaders, closely identified with their organizations.

.24 As the sector already suffers from fragile infrastructures, the transitions are expected to be hugely disruptive. Many organizations devote resources to programmatic functions, and do not have executives in training to replace these positions. Succession planning is not seen as a priority.

.25 Auditors may want to consider how the retirement of a key employee, such as the executive director, will affect the organization's internal control procedures and its ability to generate revenues and how the organization will address these issues when they arise.

Cyber Donations

.26 The Internet has become the quick and easy means of providing and accessing information. It has also become a tool to expand the audience of not-for-profit organizations in a way that appeals to younger and more technologically savvy donors. As you surf the net you will find Web sites for thousands of not-for-profits and on most of them will be the opportunity to contribute. Many of these organizations make use of services such as PayPal to permit donors to charge online donations to credit or debit cards. The money is then placed in an account similar to a bank account in the organization's name and a fee is deducted. At some future time the money is then electronically transferred to another bank account as specified by the not-for-profit organization. This may be an area that auditors find worthy of attention in that the not-for-profit organization's internal controls that are required for these accounts may be different from those for deposit accounts at brick and mortar banks. For example, the organization may have controls regarding who is authorized to sign checks but does the organization have controls in place to safeguard usernames and passwords for accounts that allow transactions to be initiated through the Internet. One recent twist on both online and embedded giving is the advent of charity gift cards. The recipient of the gift card goes to the card's Web site and designates which of the listed charities is to receive the donations. Some sites charge an administrative fee at the time of purchase, others when the card is redeemed.

Ethics Rules Overhaul

.27 Lawmakers cannot accept gifts from groups that employ lobbyists. Currently, it is still unclear whether certain not-for-profit organizations are considered to be groups that employ lobbyists pursuant to these new rules. This has led to confusion around charitable events, as lawmakers and charities are unclear whether hand-outs provided by not-for-profit organizations such as meals, gift bags, or free of charge spousal attendance at events violates these rules.

The Independent Sector

.28 In October 2007, the Panel on the Nonprofit Sector, convened by the Independent Sector, released a document titled *Principles for Good Governance and Ethical Practice: A Guide for Charities and Foundations*.

.29 Convened in October 2004, at the encouragement of the leaders of the Senate Finance Committee, the Panel on the Nonprofit Sector is an independent group of not-for-profit leaders who recommend actions to strengthen the governance, ethical conduct, and accountability of charitable organizations. The panel's members represent a wide range of the not-for-profit community, such as organizations large and small; charities, foundations, and corporate giving programs; and organizations that operate worldwide or in a single community.

.30 The stated purpose of the panel is to preserve the soundness and integrity of the not-for-profit community by striking a careful balance between prudent legal mandates to ensure that organizations do not abuse the privilege of their exempt status and well-informed self-governance and mutual awareness among not-for-profit organizations.

.31 Not-for-profit organizations have long embraced the need for standards of ethical practice that preserve and strengthen the public's confidence. Many such systems in fact already exist, though none have applied to the entire range of American charitable organizations. The guide outlines 33 practices designed to support board members and staff leaders of every charitable organization as they work to improve their own operations. The 33 principles are organized under 4 main categories:

- Legal Compliance and Public Disclosure
- Effective Governance
- Strong Financial Oversight
- Responsible Fundraising

.32 The panel strongly recommends that an organization's board conduct a thorough discussion of the complete set of principles, and determine how the organization should apply each to its operations. It is possible that after this review, a board may conclude certain principles do not apply to its organization. Developing a transparent process for communicating how the organization has addressed the principles, including the reasons that any of the principles are not relevant, is likely to foster a greater appreciation of the diverse nature of the sector and deeper respect for the board's good stewardship.

.33 The complete guide can be accessed at www.nonprofitpanel.org/report/principles/Principles_Guide.pdf.

Legislative and Regulatory Developments

Results of Federal Study on Single Audit Quality

.34 The long-awaited federal study on the quality of audits performed under Office of Management and Budget (OMB) Circular A-133 was issued on June 22, 2007. This section presents a background of the study, a summary of findings, a listing of some deficiencies noted, and the report recommendations. The section also highlights the AICPA and its Governmental Audit Quality Center's (GAQC) next steps to responding to the report.

Background

.35 Several years ago, a group of federal Offices of Inspectors General (OIGs), along with three state auditor's offices, decided to work together to develop a statistically based measure of single audit quality (the project). The U.S. Department of Education served as the project leader. The project had two primary goals:

- Determine the quality of single audits and establish a statistically based measure of audit quality
- Recommend changes in single audit requirements, standards, and procedures to improve the quality of single audits

.36 To accomplish these goals, the OIGs conducted quality control reviews (QCRs) of a statistical sample of 208 audits randomly selected from approximately 38,000 audits submitted to and accepted by the Federal Audit Clearinghouse (FAC) between April 1, 2003 and March 31, 2004. Generally, the audits reviewed were from the 2002–2003 timeframe and, in some cases, earlier. The sample was split into two strata. Stratum I included audits of entities with $50 million or more of total federal expenditures. Stratum II included audits of entities with at least $500,000 but less than $50 million of total federal expenditures.

.37 The scope of the project covered portions of the single audit relating to the planning, conduct, and reporting of audit work related to the review and testing of internal controls and compliance testing pertaining to compliance requirements for selected major federal programs. Documentation of audit work for up to three major programs for each audit was reviewed. Further, the review included audit work performed on the Schedule of Expenditure of Federal Awards (SEFA) and the content of all of the auditors' reports on the federal programs. The scope did not include a review of the content of, or the audit work performed, related to the general-purpose financial statements, the auditor's opinion on those statements, or the auditors' review of internal control over financial reporting.

Summary of Findings

.38 The issues and deficiencies identified in each QCR were compiled, and each engagement was then classified into one of three groupings. The groupings are defined as follows:

- **Acceptable.** No deficiencies were noted, or one or two insignificant deficiencies were noted. In some cases, the acceptable audits had deficiencies with applicable auditing criteria noted, which did not require corrective action, but should be corrected going forward.
- **Limited reliability.** Significant deficiencies with applicable auditing criteria were noted and require corrective action to afford unquestioned reliance upon the entire audit.
- **Unacceptable.** Deficiencies were so serious that the auditor's opinion on at least one major program cannot be relied upon, or a material reporting error was noted requiring that the report be reissued in order to be relied upon by users, or both.

.39 The President's Council on Integrity and Efficiency (PCIE) report clearly shows that improvements are needed in many areas. The tables shown below summarize the overall results and results by stratum. In addition to providing results by the number of audits reviewed, the OIGs also analyzed the results in relation to the dollar amounts of federal awards reported in the audits reviewed. Results in relation to dollar amounts reported in the audits reviewed show a much higher percentage of acceptability. The following tables show the results for both strata combined and then the results of Stratum I and Stratum II individually.[1]

---

[1] The report indicates the confidence parameter was 90 percent, and the precision parameters ranged between plus or minus 2.1 and 7.9 percentage points.

TOTAL SAMPLE (STRATA I & II)				
	Acceptable	*Limited Reliability*	*Unacceptable*	*Total*
Sampled Audits	115	30	63	208
Percent of Audits	49%	16%	35%	100%
Percent of Federal Dollars	93%	2%	5%	100%
STRATUM I (>$50 Million in Federal Expenditures)				
	Acceptable	*Limited Reliability*	*Unacceptable*	*Total*
Sampled Audits	61	12	23	96
Percent of Audits	64%	12%	24%	100%
Percent of Federal Dollars	93%	2%	5%	100%
STRATUM II ($500 Thousand–$50 Million in Federal Expenditures)				
	Acceptable	*Limited Reliability*	*Unacceptable*	*Total*
Sampled Audits	54	18	40	112
Percent of Audits	48%	16%	36%	100%
Percent of Federal Dollars	56%	10%	34%	100%

Deficiencies Identified

.40 The PCIE report goes into detail regarding the deficiencies noted on the audits reviewed. The following presents a brief summary of deficiencies identified:

- Misreporting of audit coverage of major federal programs
- Unreported audit findings
- Compliance testing not documented as performed or not applicable
- Deficiencies in understanding and testing of internal control over compliance
- Deficiencies in risk assessments as part of major program determination
- Missing audit finding information
- Deficiencies in presentation and auditing of the SEFA
- Management representations related to federal awards missing or misdated
- Consideration of audit materiality at the major federal program level not documented
- Other kinds of deficiencies (described in appendix A of the report)

PCIE Report Recommendations

.41 The PCIE report proposes a three-pronged approach for reducing the deficiencies noted and to improve the quality of single audits. The recommendations in the report are directed to various organizations, including the OMB and other federal agencies, the AICPA, and other single audit stakeholders. A summary of the recommendations is as follows:

- Revise and improve single audit criteria, standards, and guidance to address deficiencies noted in the report. Specific recommendations are described throughout Part II and the "Other Matters" sections of the PCIE report and include recommendations for revisions to Circular A-133 and, in some cases, additions or clarifications to AICPA auditing standards and the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits*.
- Establish minimum requirements for completing comprehensive single audit training as a prerequisite for conducting such audits (the report suggests at least 16–24 hours) and thereafter, require single audit update training for continued performance of single audits.
- Review and enhance processes to address unacceptable audits and not meeting established training and continuing professional education requirements. This includes (*a*) reviewing the process of suspension and debarment; (*b*) identifying ways that the AICPA and State Boards of Accountancy can further the quality of single audits and address due professional care issues; and (*c*) identifying, reviewing, and evaluating the potential effectiveness of other ways to address unacceptable audits (these other ways could include sanctions to be applied to auditors or fines, or both).

Next Steps

.42 The AICPA shares the commitment of the federal agencies involved in the project to improving the quality of single audits. Many of the audits reviewed were performed 4–5 years ago, and the AICPA is hopeful that many endeavors over the last several years (for example, the launch of the GAQC) have already begun to address some of the issues raised in the PCIE report.

.43 However, auditors should take this report very seriously and read the PCIE report in its entirety to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices.

.44 The AICPA and the GAQC Executive Committee and GAQC staff will be working closely with the federal government on a go-forward basis to address the PCIE report recommendations. During the course of the next year, auditors should watch the GAQC Web site at www.aicpa.org/GAQC for updates on initiatives undertaken by the AICPA and others in response to the PCIE report.

Help Desk—To access the PCIE report go to the following Web site: www.ignet.gov/pande/audit/NatSamProjRptFINAL2.pdf.

Government Auditing Standards Developments

.45 In July 2007, the U.S. Government Accountability Office (GAO) issued the July 2007 revision to *Government Auditing Standards* (Yellow Book or GAO Report No. GAO-07-731G). The July 2007 revision supersedes the 2003 revision and updates the January 2007 revision. The July 2007 revision contains the final 2007 revisions, including the quality control and peer review sections in chapter 3, which the GAO had exposed for comment in January 2007. The July 2007 revision represents the completed 2007 revision of *Government Auditing Standards* and is the version that should be used until further revisions or updates are made. It will be effective for financial audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Early implementation is encouraged. A downloadable version of the complete July 2007 revision is available on the GAO's Yellow Book Web page at www.gao.gov/govaud/ybk01.htm. You will also find ordering information for the printed version on the GAO's Yellow Book Web page.

.46 The GAO has also issued a summary document titled *Major Changes: July 2007 Revision to* Government Auditing Standards on its Web site at www.gao.gov/govaud/somc0707.pdf. This document highlights key revisions to the standards including those specifically related to ethics and independence, professional judgment and competence, all types of audits and attestation engagements performed under the Yellow Book, and financial and performance audits. The listing of changes is intended to assist practitioners in updating their related policies and procedures for conducting government audits.

IRS Activities

E-Postcard Required for Small Exempt Organizations

.47 Beginning in 2008, exempt organizations with gross receipts under $25,000 must make an annual electronic filing with the IRS using Form 990-N, *Electronic Notification (e-Postcard) For Tax-Exempt Organizations Not Required to File Form 990 or 990–EZ*. The e-Postcard is due in 2008 for tax years beginning on or after December 31, 2006. If an organization that is required to file fails to do so for three consecutive years, it will lose its tax exempt status. For more information and a link to the e-Postcard go to www.irs.gov/charities/article/0,,id=169250,00.html.

Form 990 Redesigned for Tax Year 2008

.48 In December 2007, the IRS issued an updated version of Form 990 for tax year 2008 (which will be filed in 2009). The stated goals of the IRS in redesigning Form 990 are enhancing transparency, promoting tax compliance, and minimizing the burden on the filing organization. The basic structure of the new form consists of an 11 page core form, which is to be completed by all filers, and 16 schedules designed by topic (lobbying, related parties, compensation, and so on). There is a transition period for smaller organizations, which may allow them to use Form 990-EZ and for certain schedules pertaining to hospitals and tax-exempt bonds. There have also been substantial changes to the amount and type of information that is required on the new Form 990. Some of the more significant changes include the following:

- More questions regarding organizational governance practices
- Disclosure of information from the organization's audited financial statements
- Expansion of compensation information disclosures
- Expansion of disclosures regarding programs and activities of the organization

.49 The IRS issued preliminary instructions and a glossary for use with Form 990 in April 2008. More information, including drafts of the form and schedules, is available at www.irs.gov/charities/article/0,,id=176613,00.html.

Department of Treasury and IRS Issue Priority Guidance Plan for 2008

.50 Fiscal year 2008 priorities are addressed through a flexible and interdisciplinary array of new tools to focus on enforcement of the tax law and to improve customer service. Priorities include the following:

- Implementing a voluntary compliance program for delinquent filers
- Addressing the issue of donor control and noncash contributions
- Continuing a variety of compliance projects that focus on areas such as political activity, executive compensation, community foundations, and colleges and universities
- Implementing Tax Exempt Determination System (TEDS) to improve processing of exempt organization applications
- Developing a new compliance guide, a *cyber assistant*, and formal guidance on hot topics such as Form 990 revisions

.51 Additional information on these and other topics is available at www.irs.gov/pub/irs-tege/fy08_implementing_guidelines.pdf.

Exempt Organization Abusive Tax Avoidance Transactions

.52 Tax-exempt organizations, by definition, are exempt from federal income tax under various provisions of the Internal Revenue Code (IRC). However, some are directly involved in Abusive Tax Avoidance Transactions (ATATs). In addition, because they are tax-indifferent, tax-exempt organizations are, at times, used by for-profit entities as accommodation parties in these transactions. Identifying and responding to ATATs involving tax-exempt organizations is critical to the IRS objective of discouraging and deterring noncompliance within tax-exempt and government entities.

.53 As a result of provisions included in the Tax Increase Prevention and Reconciliation Act (TIPRA) of 2005, the Treasury Department and IRS have issued proposed and temporary regulations under IRC Section 4965, which imposes excise taxes and disclosure requirements with respect to prohibited tax shelter transactions to which tax-exempt entities are parties. The new regulations provide (1) rules regarding the form, manner, and timing of disclosure obligations and (2) return requirements accompanying payment of excise taxes. The deadline for submitting comments on the proposed regulations has passed. IRS guidance addresses the following issues under this legislation:

- Which entities and individuals are subject to excise tax under the new provisions and which taxes and penalties may apply
- Who is a party subject to the new provisions, and the treatment of proceeds of transactions received before the effective date of the new provisions
- Disclosure and filing requirements

.54 Additional information is available at www.irs.gov/charities/article/0,,id=172158,00.html.

Certain Charitable Contributions Designated as Transactions of Interest Under New Reportable Transaction Regulations

.55 In September 2007, the IRS issued Notice 2007-72, designating certain transactions as having the potential for tax avoidance or evasion and alerting participants to required disclosures and potential penalties. In the transactions, a taxpayer transfers a membership interest in a limited liability company that directly or indirectly owns real property to a Section 501(c)(3) charitable organization or government entity, claiming a charitable contribution deduction for an amount significantly higher than the original purchase price paid by the taxpayer to acquire the interest. Charitable organizations that receive property in these transactions after August 14, 2007 are participants in these transactions for the first year in which their tax returns reflect the acquired interest, which is generally the year of receipt of the interest. For that year, the charity must disclose certain information to the IRS required by the reportable transaction regulations or be subject to penalties as described in the notice. The IRS has begun notifying organizations that have participated in these transactions that they have been selected for examination.

Prohibition Against Political Activities

.56 The prohibition against political campaign activity has been in effect for more than half a century and bars certain tax-exempt organizations from engaging on behalf of or in opposition to political candidates. However, these organizations can engage in advocating for or against issues and, to a limited extent, ballot initiatives or other legislative activities.

.57 "The political contests, especially for president, are starting earlier than usual. The IRS, as it has in the past, wants to remind charities and churches of the ban on political campaign activity. We also want to urge nonprofit and religious organizations to review the guidance we have issued to help them avoid any problems," said Steven T. Miller, Commissioner of IRS Tax Exempt and Government Entities Division.

.58 The IRS's goal is to educate the leadership of these organizations to help them stay within the legal boundaries. In this regard, IRS Revenue Ruling 2007-41 outlines a number of scenarios to help charities and churches understand the ban on political campaign activity and actions that may arise.

.59 In addition to the revenue ruling, the IRS has other helpful information for churches and charities on its Web site at www.irs.gov/eo. For example, IRS Publication 1828, "Tax Guide for Churches and Religious Organizations," contains a discussion of the law affecting political campaign activity by churches and religious institutions.

.60 Violation of the law can result in imposition of an excise tax or, in extreme cases, a loss of tax exempt status.

.61 In June 2007, the IRS released its report on the Political Activity Compliance Initiative (PACI) for the 2006 election cycle. This report, *PACI 2006*, follows the report on prohibited political campaign intervention in the 2004 election cycle, which was issued in February 2006.

Employment Taxes and Classifying Workers

.62 In December 2007, the IRS issued Fact Sheet (FS) 2007-27 to help organizations better understand their responsibilities regarding employment taxes and classifying workers. To access this guidance, which provides criteria to better understand the regulations, go to www.irs.gov/newsroom/article/0,,id=177092,00.html.

.63 Additionally, in November 2007, FS 2007-25 was issued, which outlines the IRS initiative regarding compliance with employer tax regulations. This initiative includes both IRS and various state workforce agencies that will work together and exchange information to improve taxpayer compliance in this complicated area.

Internet-Based Workshop for Exempt Organizations

.64 The IRS has a Web based version of its popular Exempt Organizations Workshop covering tax compliance issues confronted by small and mid-sized tax exempt organizations.

.65 The free online workshop, *Stay Exempt—Tax Basics for 501(c)(3)s*, consists of five interactive modules on tax compliance topics for exempt organizations:

- *Tax-Exempt Status*—How can you keep your 501(c)(3) exempt?
- *Unrelated Business Income*—Does your organization generate taxable income?
- *Employment Issues*—How should you treat your workers for tax purposes?
- *Form 990*—Would you like to file an error-free return?
- *Required Disclosures*—To whom do you have to show your records?

.66 Users can access this new training program at www.stayexempt.org. Users can complete the modules in any order and repeat them as many times as they like. The online training Web site does not require registration and its visitors will remain anonymous.

Resource Materials—Compliance Initiatives for Tax-Exempt Organizations

.67 The Exempt Organization Division of the IRS has made materials available that were used in or which discuss its compliance initiatives including LLC projects, community foundations, bond compliance, hospitals, and executive compensation. You can find this material at www.irs.gov/charities/article/0,,id=162493,00.html.

Listing of Published Guidance—2008

.68 Readers should be aware that the IRS Web site contains a digest of exempt organizations' published guidance issued in 2008 at www.irs.gov/charities/content/0,,id=177153,00.html. The published guidance includes treasury regulations, revenue rulings, revenue procedures and notices, and announcements of recently published issues of interest to tax-exempt organizations.

.69 Additionally, the IRS Web site also contains an archive that presents digests of IRS published guidance items of interest to tax-exempt organizations. The archived guidance can be found at www.irs.gov/charities/article/0,,id=151053,00.html.

Tax Preparer Penalties

.70 In December 2007, the IRS issued Notice 2008-13, which implements a May 2007 law that expanded the tax return preparer penalty and heightened the standards of conduct that must be met by tax return preparers in order to avoid a penalty.

.71 For undisclosed positions on a tax return, the new law replaced the *realistic possibility standard* with a requirement that there be a reasonable belief that the tax treatment of the position would more likely than not be sustained on its merits. In cases in which the taxpayer discloses the position on the tax return, the notice implements the new law that states there must be a reasonable basis for the tax treatment of the position taken on the tax return.

.72 The notice provides interim rules to implement and interpret these heightened standards. The interim rules will be in effect until the overhaul of the current return preparer penalty regulations is complete. The interim rules emphasize the importance to preparers of understanding the legal basis for positions taken on tax returns, the requirement for taxpayers to disclose certain positions, and the need for preparers to advise taxpayers on the various penalties that can apply when a position is taken on a return that may not be supported by existing law.

.73 Under the notice, preparers generally can continue to rely on taxpayer representations in preparing returns and can also generally rely on representations of third parties, unless the preparer has reason to know they are wrong.

.74 The new law also expanded the return preparer penalty to cover all tax return preparers, not just income tax return preparers. Under the notice, preparers of many information returns, however, will not be subject to the new penalty provision unless they willfully understate tax or act in reckless or intentional disregard of the law. The notice also includes examples illustrating how the new standards would apply.

.75 Notice 2008-13 also solicits input from the tax return preparer community on a planned overhaul of the tax return preparer penalty regime anticipated to be completed by the end of 2008. The notice can be found at www.irs.gov/pub/irs-drop/n-08-13.pdf.

.76 In addition to Notice 2008-13, additional guidance has been provided in Notice 2008-12 with respect to the implementation of the tax return preparer signature requirement, and in Notice 2008-11, which clarifies the transition relief provided in Notice 2007-54, issued earlier this year.

Uniform Prudent Management of Institutional Funds Act

.77 In February 2008, the Financial Accounting Standards Board (FASB) released for public comment proposed FASB Staff Position (FSP) FAS 117-a, *Endowments of Not-for-Profit Organizations: Net Asset Classification of Funds Subject to an Enacted Version of the Uniform Prudent Management of Institutional Funds Act*, *and Enhanced Disclosures*. If approved as proposed, the FSP would

- provide guidance on the net asset classification of donor-restricted endowment funds for not-for-profit organizations that are subject to an enacted version of the Uniform Prudent Management of Institutional Funds Act (UPMIFA). (As of February 1, 2008, 13 states and the District of Columbia had enacted a version of UPMIFA, with legislation pending in several other states.)
- improve disclosures about an organization's endowment funds (both donor-restricted and funds functioning as endowment), whether or not the organization is subject to UPMIFA.

.78 The FSP would be effective for fiscal years ending after June 15, 2008, with earlier application permitted.

.79 The first, and perhaps most significant question the proposed FSP addresses is how UPMIFA's elimination of the historic-dollar-value threshold—the amount below which an organization could not spend under the Uniform Management of Institutional Funds Act (UMIFA)—affects net asset classification. The proposed FSP would require an organization to classify a portion of a donor-restricted endowment fund (other than a term endowment) as permanently restricted net assets. That portion would be equal to the amount of the fund (*a*) that must be retained permanently in accordance with explicit donor stipulations, or (*b*) that in the absence of such stipulations, the organization's governing board determines must be retained permanently, if any, under the relevant law. The organization would be required to disclose its interpretation of the law. We anticipate that discussions among organizations, accountants, attorneys, and regulators in the various individual states may lead to consensus in those states determining what must be retained permanently under the law. If a governing board determines that the law requires maintenance of purchasing power of a donor's gift, the organization would increase permanently restricted net assets to the extent that the purchasing power of a dollar decreases or decrease permanently restricted net assets to the extent that the purchasing power of a dollar increases. (This would typically be done by adjusting permanently restricted net assets by an appropriate inflationary factor, such as the consumer price index [CPI] or higher education price index [HEPI].)

.80 In contrast, an organization would not subsequently decrease permanently restricted net assets because of investment losses or organizational spending from the endowment, but would instead decrease temporarily restricted net assets, if available, or unrestricted net assets. The guidance on investment losses and spending is consistent with the guidance previously provided on investment losses in FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*, paragraph 12. FASB considered but decided not to change that guidance, noting that permanently restricted net assets should reflect the amount for which an organization has a permanent fiduciary duty and not the amount that it has on hand at a financial statement date because of cumulative investment and spending decisions.

.81 The proposed FSP also addresses whether two other provisions in UPMIFA's endowment spending guidelines impose temporary (time) restrictions on the portion of a donor-restricted endowment fund that would otherwise be considered unrestricted net assets:

- A provision that "[u]nless stated otherwise in the gift instrument, the assets in an endowment fund are donor-restricted assets until appropriated for expenditure by the institution"
- An optional provision for a rebuttable presumption that spending more than 7 percent of endowment market value is imprudent (Some states have included this provision, while others have not.)

.82 The FSP would require organizations to apply the guidance previously provided in Emerging Issues Task Force (EITF) Topic No. D-49, "Classifying Net Appreciation on Investments of a Donor-Restricted Endowment Fund," included as an appendix to the FSP. EITF Topic No. D-49 stresses that not all legal restrictions on the use of particular assets result in restricted net assets for accounting purposes, only those that extend donor restrictions. An example of the latter would be a requirement to maintain the purchasing power of a donor's endowment gift. Laws that refer to actions entirely within the purview of a governing board, such as acting to appropriate funds or exercising prudence do not, in and of themselves, extend donor imposed restrictions. The FSP contains the important caveat that, in applying the guidance in EITF Topic

No. D-49, an organization would need to look at the actual wording in the specific version of UPMIFA (and other relevant law) to which the organization is subject.

.83 The other key provisions of the proposed FSP focus on improving endowment disclosures, both donor restricted and board designated. Aiming to improve transparency about endowments in an era of increased public scrutiny, the proposed FSP focuses on disclosures in four areas:

- Net asset classification (especially how that is affected by a governing board's interpretation of relevant law)
- Spending policies
- Investment policies (especially their relationship with spending policies)
- Net asset composition and changes therein (especially the relationship of endowment spending to endowment size and growth)

.84 Auditors should look for a final FSP in June 2008.

New Filing and Audit Requirements for ERISA-Covered 403(b) Employee Benefit Plans

.85 Beginning in 2009, employee benefit plans sponsored by charitable organizations and schools under IRC Section 403(b) and covered under the Employee Retirement Income Security Act (ERISA) will be subject to the same reporting and audit requirements that currently exist for Section 401(k) plans. Section 403(b) plans are also commonly known as *tax-shelter annuity plans*. Under new U.S. DOL regulations issued in November 2007 amending the filing requirements for Form 5500, *Annual Return/Report of Employee Benefit Plan*, ERISA-covered 403(b) plans with 100 or more participants generally will be required to file audited financial statements beginning with their 2009 Form 5500 filing. 403(b) plans with fewer than 100 participants will be eligible to use abbreviated reporting forms without audited financial statements. The DOL estimates that approximately 7,000 403(b) plans will be subject to the new audit requirements and another 9,000 403(b) plans will be eligible for the waiver. The DOL regulations were published in the November 16, 2007 *Federal Register* and are available at www.dol.gov/ebsa/regs/fedreg/final/20071116.pdf. The AICPA's Employee Benefit Plan Audit Quality Center (EBPAQC) (www.aicpa.org/EBPAQC) and Expert Panel have formed a joint task force to develop resources to help members with these new audit requirements.

Other Regulatory Activities

.86 Listed below are links to documents of interest for not-for-profit organizations not discussed elsewhere in this alert. Readers should continue to monitor all activity involving the not-for-profit sector:

- *U.S. Department of the Treasury Anti-Terrorist Financing Guidelines: Voluntary Best Practices for U.S.-Based Charities* at www.ustreas.gov/offices/enforcement/key-issues/protecting/charities-intro.shtml. This link also contains the Treasury's response to comments submitted on the original guidelines. The Treasury has also issued a risk matrix to further assist in understanding and implementing these guidelines. The matrix can be found at www.ustreas.gov/offices/enforcement/ofac/policy/charity_risk_matrix.pdf.
- Political Activity and Disclosure Requirements (March 2006) Congressional Research Library Report RL-33377 at www.ncseonline.org/NLE/CRSreports/06May/RL33377.pdf.
- *Tax Relief and Health Care Act of 2006* (December 20, 2006) at www.thomas.gov/cgi-bin/query/z?c109:H.R.6111.ENR:, which contains provisions regarding the tax-exempt status of charitable remainder trusts in relation to unrelated business taxable income.
- IRS Charitable Rollover Clarification by the IRS (January 2007) Notice 2007-05 www.irs.gov/irb/2007-05_IRB/ar11.html. There is also guidance on other provisions of the *Pension Protection Act of 2006*.

- The *Honest Leadership and Open Government Act of 2007* (September 2007) requires disclosures related to lobbying and earmarks. The full text of the bill can be found at www.thomas.gov/cgi-bin/bdquery/z?d110:s.00001:.

Audit and Attestation Issues and Developments

Guidance on Alternative Investments, Such as Hedge Funds and Investments Related to Subprime Loans

.87 Over the past several years, certain not-for-profit organizations, healthcare entities, pension plans, and investment companies—including some hedge funds and funds of funds—have dramatically increased their investment in financial instruments that do not have a readily determinable market value. These investments are commonly referred to as alternative investments. Many entities report alternative investments at fair value; developing valuations, as well as obtaining sufficient appropriate audit evidence in support of the valuation assertion, can present challenges because of the lack of readily determinable fair value and the limited investment information generally provided by the fund managers. For example, the value of investments related to subprime loans (which may be either direct holdings of subprime loans or ownership of entities or investment vehicles, such as tranches, whose value is affected by the value of subprime loans) have reportedly declined significantly based on recent developments, including but not limited to decreased liquidity for such investments. However, the existence of investments related to subprime loans within an alternative investment portfolio and the basis for their valuation may not be obvious.

.88 To address the auditing challenges associated with all alternative investments, the Alternative Investments Task Force developed and issued a practice aid for auditors in 2006, *Alternative Investments—Audit Considerations*. The practice aid clarifies the responsibility of the client to have appropriate controls in place in order for management to adequately address valuation assertions and for the auditor to obtain comfort over the valuation of investments. Specifically, the practice aid includes guidance on the following:

- General considerations pertaining to auditing alternative investments
- Addressing management's financial statement existence assertion
- Addressing management's financial statement valuation assertion
- Management representations
- Disclosure of certain significant risks and uncertainties
- Reporting

.89 The practice aid also includes appendixes on confirmations for alternative investments and illustrative examples of due diligence, ongoing monitoring, and financial reporting controls.

.90 Download the document from: www.aicpa.org/members/div/auditstd/alternative_investments.htm.

.91 Many of the elements of the practice aid may assist auditors in addressing the audit issues related to recent market developments including subprime related matters.

.92 In addition, auditors should consider AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), to determine the appropriate period in which to recognize any identified declines in value. Due to current market conditions, even the financial statements of organizations that do not hold alternative investments may suffer significant declines that merit application of the guidance in AU section 560.

Bond Insurance Company Issues

.93 The current credit environment has affected the market for debt securities. For example, several entities that insure tax exempt debt have been downgraded by rating agencies and some investors have avoided certain debt securities. While each situation is different and should be evaluated based on its own specific facts and circumstances, the current situation may raise various accounting and auditing issues pertaining to tax exempt debt, including, but not limited to, the following:

- Bond restructurings
- Derivative and hedge accounting implications
- Potential violation of debt covenants
- Classification of the debt on the balance sheet as either a current or noncurrent liability
- Subsequent event disclosures
- Going concern issues

.94 At the time this alert went to press, an ad hoc AICPA task force was drafting a nonauthoritative article to address these issues in more detail. When completed, that article will be posted at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_notforprofit.htm.

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

.95 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard supersedes SAS No. 61, *Communication With Audit Committees*. The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards*, to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on*

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
(Applicable to audits conducted in accordance with GAAS)	*Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120). • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks. • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report.* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325 par. .01–.04), of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330 par. .01–.06), of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
Statement of Position (SOP) 07-2, *Attestation Engagements That Address Specified Compliance Control Objectives and Related Controls at Entities That Provide Services to Investment Companies, Investment Advisors, or Other Service Providers* (AICPA, *Technical Practice Aids*, AUD sec. 14,430) Issue Date: October 2007 (Interpretive publication)	This statement addresses the application of SSAEs primarily to examination engagements in which a practitioner reports on the suitability of the design and operating effectiveness of a service provider's controls in achieving specified compliance control objectives. Examples of the service providers addressed by this SOP are investment advisers, custodians, transfer agents, administrators, and principal underwriters that provide services to investment companies, investment advisers, or other service providers.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditors report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice aid is a response to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice aid provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.96 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees*. This SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and became effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.97 SAS No. 114 provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires that significant matters communicated with those charged with governance be documented.

Identifying Those Charged With Governance

.98 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the organization and obligations related to the accountability of the organization, including overseeing the organization's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.99 The auditor should determine the appropriate person(s) within the organization's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by organization, reflecting influences such as size and ownership characteristics.

.100 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the organization's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the organization's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.101 The ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which became effective for audits of financial statements for periods ending on or after December 15, 2006. SAS No. 112 establishes standards and provides guidance on communicating matters related to an organization's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. This SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion). Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This also includes significant

deficiencies and material weaknesses that were communicated in previous audits if they have not been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

Discussions With Management and Others

.102 The requirements of SAS No. 112 have changed perceptions regarding the auditor's role in the client's internal control in some circumstances. Auditors may have to continue to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm, other than the auditor, that does not provide attest services for the client can be part of a client's internal control. This may continue to raise questions regarding the role of outsourcing in achieving management's internal control objectives.

.103 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include in written communication significant deficiencies and material weaknesses that were identified and communicated in previous years, for as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.104 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented or detected and corrected, by the client.

Issues for Audits of Smaller Entities

.105 An issue that has caused concern is the extent to which the auditor may be involved in the drafting of an organization's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, or detecting and correcting, material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[2] How an auditor responds to a client's internal control weakness, in terms of designing and

---

[2] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05).

carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditors response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.106 The requirements of SAS No. 112 will continue to introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.107 The AICPA published Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

AICPA Risk Assessment Standards

.108 The 8 SASs referred to as the risk assessment standards (SAS Nos. 104–111) became effective for audits of financial statements for periods beginning on or after December 15, 2006, (earlier application was permitted), which means they are effective for 2007 calendar year audits. Although the SASs include many of the underlying concepts and detailed performance requirements contained in the standards they amend or supersede, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions.

Key Provisions of the Risk Assessment Standards

.109 The following tables list the key provisions of the eight risk assessment standards and provide summaries of how these standards differ from previous AICPA generally accepted auditing standards (GAAS).

SAS No. 104, Amendment to Statement on Auditing Standards No. 1, *Codification of Auditing Standards and Procedures* ("Due Professional Care in the Performance of Work")

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 104 defines *reasonable assurance* as a "high level of assurance."	• SAS No. 104 clarifies the meaning of reasonable assurance.

SAS No. 105, Amendment to Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 105 expands the scope of the understanding that the auditor must obtain in the second standard of field work from "internal control" to "the entity and its environment, including its internal control."	• Previous guidance considered the understanding of the entity to be a part of audit planning, and emphasized that the understanding of internal control also was primarily part of audit planning.

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
• Previous guidance considered the understanding of the entity to be a part of audit planning, and emphasized that the understanding of internal control also was primarily part of audit planning.	• By stating that the purpose of your understanding of the entity and its internal control is part of assessing the risk of material misstatement, SAS No. 105 essentially considers this understanding to provide audit evidence that ultimately supports your opinion on the financial statements. • The new standard emphasizes the link between understanding the entity, assessing risks, and the design of further audit procedures. It is anticipated that "generic" audit programs will not be an appropriate response for all engagements because risks vary between entities. • The term *further audit procedures*, which consists of test of controls and substantive tests, replaces the term *tests to be performed* in recognition that risk assessment procedures are also performed. • The term *audit evidence* replaces the term *evidential matter*.

SAS No. 106, Audit Evidence

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 106 defines *audit evidence* as "all the information used by the auditor in arriving at the conclusions on which the audit opinion is based."	• Previous guidance did not define audit evidence. • SAS No. 106 also describes basic concepts of audit evidence. • The term *sufficient, appropriate audit evidence*, defined in SAS No. 106, replaces the term *sufficient, competent evidence.*
• SAS No. 106 recategorizes assertions by classes of transactions, account balances, and presentation and disclosure; expands the guidance related to presentation and disclosure; and describes how the auditor uses relevant assertions to assess risk and design audit procedures.	• SAS No. 106 recategorizes assertions to add clarity. • *Assertion relating to presentation and disclosure* has been expanded and includes a new assertion that information in disclosures should be "expressed clearly" (understandability).
• SAS No. 106 defines *relevant assertions* as those assertions that have a meaningful bearing on whether the account is fairly stated.	• The term *relevant assertions* is new, and it is used repeatedly throughout SAS No. 106.
• SAS No. 106 provides additional guidance on the reliability of various kinds of audit evidence.	• The previous standard included a discussion of the competence of evidential matter and how different types of audit evidence may provide more or less valid evidence. SAS No. 106 expands on this guidance.

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 106 identifies *risk assessment procedures* as audit procedures performed on all audits to obtain an understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement at the financial statement and relevant assertion levels. • SAS No. 106 provides that evidence obtained by performing risk assessment procedures, as well as that obtained by performing tests of controls and substantive procedures, is part of the evidence the auditor obtains to draw reasonable conclusions on which to base the audit opinion, although such evidence is not sufficient in and of itself to support the audit opinion.	• SAS No. 106 introduces the concept of risk assessment procedures, which are necessary to provide a basis for assessing the risk of material misstatement. The results of risk assessment procedures, along with the results of further audit procedures, provide audit evidence that ultimately support the auditor's opinion on the financial statements.
• SAS No. 106 describes the types of audit procedures that the auditor may use alone or in combination as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor.	• Risk assessment procedures include — inquiries of management and others within the entity. — analytical procedures. — observation and inspection.
• SAS No. 106 includes guidance on the uses and limitations of inquiry as an audit procedure.	• Inquiry alone is not sufficient to evaluate the design of internal control and to determine whether it has been implemented.

SAS No. 107, Audit Risk and Materiality in Conducting an Audit

Key Provisions	*How the SAS Differs From Current Standards*
• The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of 1. determining the extent and nature of risk assessment procedures. 2. identifying and assessing the risk of material misstatement. 3. determining the nature, timing, and extent of further audit procedures. 4. evaluating whether the financial statements taken as a whole are presented fairly, in conformity with generally accepted accounting principles.	• Previous guidance said that auditors "should consider" audit risk and materiality for certain specified purposes. SASs state that the auditor "must" consider. • New guidance explicitly states that audit risk and materiality are used to identify and assess the risk of material misstatement.

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
• Combined assessment of inherent and control *risks* is termed the *risk of material misstatement*.	• SAS No. 107 consistently uses the term *risks of material misstatement*, which often is described as a combined assessment of inherent and control risk. However, auditors may make separate assessment of inherent risk and control risks.
• The auditor should assess the risk of material misstatement as a basis for further audit procedures. Although that risk assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. • Assessed risks and the basis for those assessments should be documented.	• SAS No. 107 states that the auditor should have and document an appropriate basis for the audit approach. • These two provisions of the risk assessment standards effectively eliminate the ability of the auditor to assess control risk "at the maximum" without having a basis for that assessment. In other words, you can no longer "default" to maximum control risk.
• The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial, and communicate them to the appropriate level of management.	• SAS No. 107 provides additional guidance on communicating misstatements to management. • The concept of not accumulating misstatements below a certain threshold is included in the previous standards, but SAS No. 107 provides additional, specific guidance on how to determine this threshold.
• The auditor should request management to respond appropriately when misstatements (known or likely) are identified during the audit.	• SAS No. 107 provides specific guidance regarding the appropriate auditor's responses to the types of misstatements (known or likely) identified by the auditor.

SAS No. 108, Planning and Supervision

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 108 provides guidance on — appointment of the independent auditor. — establishing an understanding with the client. — preliminary engagement activities. — the overall audit strategy. — the audit plan. — determining the extent of involvement of professionals possessing specialized skills.	• Much of the guidance provided in SAS No. 108 has been consolidated from several existing standards. • However, SAS No. 108 provides new guidance on preliminary engagement activities, including the development of an overall audit strategy and an audit plan. — The overall audit strategy is what previously was commonly referred to as the audit approach. It is a broad approach to how the audit will be conducted, considering factors such as the scope of the engagement, deadlines for performing the audit and issuing the report, and recent financial reporting developments.

Key Provisions	*How the SAS Differs From Current Standards*
— using a professional possessing IT skills to understand the effect of IT on the audit. — additional considerations in initial audit engagements. — supervision of assistants.	— The audit plan is more detailed than the audit strategy and is commonly referred to as the audit program. The audit plan describes in detail the nature, timing, and extent of risk assessment and further audit procedures you perform in an audit. • SAS No. 108 states that you should obtain a written understanding with your client.

SAS No. 109, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 109 describes audit procedures that the auditor should perform to obtain the understanding of the entity and its environment, including its internal control.	• The auditor should perform *risk assessment procedures* to gather information and gain an understanding of the entity and its environment. These procedures include inquiries, observation, inspection, and analytical procedures. Previous standards did not describe the procedures that should be performed to gain an understanding of the client. • Information about the entity may be provided by a variety of sources, including knowledge about the entity gathered in previous audits (provided certain conditions are met), and the results of client acceptance and continuance procedures. • SAS No. 109 also directs the auditor to perform a variety of risk assessment procedures, and it describes the limitations of inquiry.
• The audit team should discuss the susceptibility of the entity's financial statements to material misstatement.	• Previous standards did not require a "brainstorming" session to discuss the risk of material misstatements. SAS No. 109 requires such a brainstorming session, which is similar (and may be performed together with) the brainstorming session to discuss fraud.
• The purpose of obtaining an understanding of the entity and its environment, including its internal control, is to identify and assess "the risk of material misstatement" and design and perform further audit procedures responsive to the assessed risk.	• SAS No. 109 directly links the understanding of the entity and its internal control with the assessment of risk and design of further audit procedures. Thus, the understanding of the entity and its environment, including its internal control, provides the audit evidence necessary to support the auditor's assessment of risk.
• SAS No. 109 states the auditor should assess the risk of material misstatement at both the financial statement and relevant assertion levels.	• The previous standard included the concept of assessing risk at the financial statement level, but SAS No. 109 provides expanded and more explicit guidance. • SAS No. 109 also directs the auditor to determine how risks at the financial statement level may result in risks at the assertion level.

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 109 provides directions on how to evaluate the design of the entity's controls and determine whether the controls are adequate and have been implemented.	• Under the previous standard, the primary purpose of gaining an understanding of internal control was to plan the audit. Under SAS No. 109, your understanding of internal control is used to assess risks. Thus, the understanding of internal control provides audit evidence that ultimately supports the auditor's opinion on the financial statements. • The previous standard directs the auditor to obtain an understanding of internal control as part of obtaining an understanding of the entity and its environment. SAS No. 109 requires auditors to evaluate the design of controls and determine whether they been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. It is anticipated that this phase of the audit will require more work than simply gaining understanding of internal control.
• SAS No. 109 directs the auditor to consider whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence.	• Previous standard did not include the concept of "significant risks." • Significant risks exist on most engagements. • The auditor should gain an understanding of internal control and also perform substantive procedures for all identified significant risks. Substantive analytical procedures alone are not sufficient to test significant risks.
• SAS No. 109 provides extensive guidance on the matters that should be documented.	• The guidance provided by SAS No. 109 relating to documentation is significantly greater than that provided by previous standards.

SAS No. 110, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 110 provides guidance on determining overall responses to address the risk of material misstatement at the financial statement level and the nature of those responses.	• The concept of addressing the risk of material misstatement at the financial statement level and developing an appropriate overall response is similar to the requirement in previous standards relating to the consideration of audit risk at the financial statement level. However, that guidance was placed in the context of audit planning. SAS No. 110 "repositions" your consideration of risk at the financial statement level so you make this assessment as a result of and in conjunction

Key Provisions	*How the SAS Differs From Current Standards*
	with your performance of risk assessment procedures. In some cases, this assessment may not be able to be made during audit planning. • SAS No. 110 requires you to consider how your assessment of risks at the financial statement level affect individual financial statement assertions, so that you may design and perform tailored further audit procedures (substantive tests or tests of controls). • The list of possible overall responses to the risk of material misstatement at the financial statement level also has been expanded.
• Further audit procedures, which may include tests of controls, or substantive procedures should be responsive to the assessed risk of material misstatement at the relevant assertion level.	• Although the previous standards included the concept that audit procedures should be responsive to assessed risks, this idea was embedded in the discussion of the audit risk model. The SASs repeatedly emphasize the need to provide a clear linkage between the auditor's understanding of the entity, the auditor's risk assessments, and the design of further audit procedures. • SAS No. 110 requires you to document the linkage between assessed risks and further audit procedures, which was not a requirement under the previous standards.
• SAS No. 110 provides guidance on matters the auditor should consider in determining the nature, timing, and extent of such audit procedures.	• The new guidance on determining the nature, timing, and extent of tests of controls and substantive tests has been expanded greatly and addresses issues that previously were not included in the authoritative literature. • SAS No. 110 states that the nature of further audit procedures is of most importance in responding to your assessed risk of material misstatement. That is, increasing the extent of your audit procedures will not compensate for procedures that do not address the specifically identified risks of misstatement. • SAS No. 110 states that you should perform certain substantive procedures on all engagements. These procedures include: — performing substantive tests for all relevant assertions related to each material class of transactions, account balance, and disclosure regardless of the assessment of the risk of material misstatements.

(continued)

Key Provisions	How the SAS Differs From Current Standards
	— agreeing the financial statements, including their accompanying notes, to the underlying accounting records. — examining material journal entries and other adjustments made during the course of preparing the financial statements.

SAS No. 111, Amendment to Statement on Auditing Standards No. 39, *Audit Sampling*

Key Provisions	How the SAS Differs From Current Standards
• SAS No. 111 provides guidance relating to the auditor's judgment about establishing tolerable misstatement for a specific audit procedure and on the application of sampling to tests of controls.	• SAS No. 111 provides enhanced guidance on tolerable misstatement. In general, tolerable misstatement in an account should be less than materiality to allow for aggregation in final assessment. • SAS No. 111 revises AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), to state that sample sizes determined using either statistical or nonstatistical methods would ordinarily be comparable in size.

.110 Whether due to error or fraud, the risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework at www.coso.org/key.htm). These standards may significantly affect the formality of the auditor's risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs should have already been completed and has likely resulted in significant changes to firm audit methodologies and personnel training.

.111 The AICPA issued Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk), which can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. The AICPA has also issued a number of questions and answers based upon member inquiries in the fall edition of the *In Our Opinion* newsletter. That newsletter can be accessed at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion/.

Companion Audit Guide

.112 In December 2006, the AICPA published Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors further understand the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.113 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.114 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.115 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of AU section 339 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that AU section 339 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.116 A key provision of AU section 339 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the organization's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.117 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.118 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf.

Accounting Issues and Developments

FASB Accounting Standards Codification™

.119 On January 15, 2008, FASB launched the 1-year verification period of the *FASB Accounting Standards Codification*™ (codification). The codification is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. The codification includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, EITF, and related literature. The codification also includes relevant authoritative content issued by the Securities Exchange Commission (SEC), as well as selected SEC staff interpretations and administrative guidance.

.120 The codification does not change GAAP, but rather it reorganizes thousands of GAAP pronouncements into approximately 90 topics. Therefore, the one-year verification period is not to debate the underlying requirements of GAAP, but rather to verify that the codification appropriately captures them and accurately reflects existing U.S. GAAP for nongovernmental entities. The verification period is also a period for constituents to acquaint themselves with the new structure and submit feedback regarding any issues before the codification content becomes authoritative. At the end of the one-year verification period, FASB is expected to formally approve the codification as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve the codification in April 2009.

.121 The codification uses a topical structure in which topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard-setter or standard from which the content was derived. The topics of the codification reside in four main areas: presentation, financial statement accounts, broad transactions, and industry guidance. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. For example, topics in this area include income statement, balance sheet, and earnings per share. The financial statement account area presents topics in financial statement order including assets, liabilities, equity, revenue, and expenses. The broad transactions area includes topics related to multiple financial statement accounts that are transaction oriented, such as derivatives and business combinations. The industry area includes guidance unique to an industry or type of activity such as airlines, software, and real estate.

.122 Constituents are encouraged to use FASB's online Codification Research System free of charge and provide feedback to FASB on the codification. The Codification Research System includes general information on how to use the online research system and special features such as Cross Reference Reports, which show where current standards reside in the codification. Readers are encouraged to register and access the codification at www.fasb.org/project/codification&retrieval_project.shtml. Special attention should be paid to where the FASB reconciled conflicts in existing GAAP and to identify any unintentional changes to GAAP.

Changes to the Financial Accounting Foundation, FASB, and Governmental Accounting Standards Board

.123 In February 2008, the Board of Trustees of the Financial Accounting Foundation (FAF) voted to approve major changes to the oversight, structure, and operations of the FAF and its two standard-setting boards, FASB and the Governmental Accounting Standards Board (GASB).

.124 Specifically, the FAF Board of Trustees approved the following key changes:

- FAF changes include
  - — expanding the number and breadth of investors, accounting, business, financial, and government organizations and entities invited to nominate FAF trustees with the understanding that the final authority for all appointments rests solely with the discretion of the Board of Trustees;
  - — changing the current term of trustees from one three-year term with a possible second three-year term to one five-year term;
  - — changing the size of the Board of Trustees from a fixed 16 trustees to a flexible range of 14–18 trustees; and
  - — increasing the trustee governance activities, including its level of formal review, analysis and oversight of the data and materials regularly provided by FASB, Financial Accounting Standards Advisory Council (FASAC), GASB, and Governmental Accounting Standards Advisory Council (GASAC).
- FASB changes include
  - — reducing the size of FASB from seven members to five, effective July 1, 2008;
  - — retaining the FASB simple majority voting requirements;
  - — affirming the need for investor participation on FASB by broadening the current bylaw requirement that FASB members possess investment experience; and
  - — changing FASB's agenda-setting process whereby the FASB chair is vested with the authority, following appropriate consultation, to set the FASB project plans, agenda, and priority of projects.
- GASB changes include
  - — securing a stable and permanent funding source for GASB;
  - — retaining the current size, term length, and composition of GASB; and
  - — changing GASB's agenda-setting process whereby the GASB chair is vested with the authority, following appropriate consultation, to set the GASB project plans, agenda, and priority of projects.

Convergence With International Financial Reporting Standards

.125 Since their joint meeting in September 2002, FASB and the International Accounting Standards Board (IASB) have had a common goal—one set of accounting standards for international use. At the 2002 meeting, FASB and the IASB signed "The Norwalk Agreement," a memorandum of understanding between the two rule-setting bodies. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. At that meeting, FASB and the IASB pledged to use their best efforts to make their existing financial reporting standards fully compatible as soon as is practicable and to coordinate their future work programs to ensure that once achieved, compatibility is maintained. At their meetings in April and October 2005, FASB and the IASB reaffirmed their commitment to the convergence of U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS). A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

.126 There has been progress toward this goal. FASB Statement No. 157, *Fair Value Measurements*, and FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*, take U.S. GAAP in the direction of IFRS with respect to reporting at fair value. The goal of FASB and the IASB is to reach a conclusion in 2008 about whether major differences in a few focused areas should be eliminated through one or more short-term standard-setting projects and, if so, complete or substantially complete work in those areas. Those areas include impairment, income taxes, investment properties, government grants, research and development, joint ventures, subsequent events, and segment reporting. For more information on the status of this project go to www.fasb.org and www.iasb.org.

XBRL Initiative

.127 eXtensible Business Reporting Language (XBRL) is an XML-based markup language used to communicate financial and business data electronically. XBRL is being developed by an international not-for-profit consortium with more than 450 member organizations, including accounting firms, software providers, financial intermediaries, academics, and technologists.

.128 XBRL is used to "tag" financial statements so that the information in those statements is machine readable, thereby allowing users to analyze financial information more easily and quickly. To assist with the tagging process, XBRL US has currently developed over 11,000 financial concepts, which essentially represent a dictionary of U.S. GAAP and other financial reporting requirements.

.129 On January 11, 2008, the SEC Advisory Committee on Improvement to Financial Reporting proposed that the SEC adopt a mandatory phase-in of XBRL for a specified time period, starting with the largest 500 domestic public reporting companies. As of the date of this alert, that mandatory phase-in period had not yet been determined. Be sure to check the SEC's Interactive Data link at www.sec.gov to view the current status of the project.

.130 For more information on XBRL, visit the XBRL site at www.xbrl.org.

Summary of Recent Accounting Pronouncements and Related Guidance

.131 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 161 (March 2008)	*Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*
FASB Statement No. 160 (December 2007)	*Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*
FASB Statement No. 141 (revised 2007) (December 2007)	*Business Combinations*
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*

Recent Accounting Pronouncements and Related Guidance	
FASB Interpretation No. (FIN) 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* FASB Staff Position (FSP) FIN 48-2, *Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises*, issued in February 2008, defers the effective date of FIN 48 for certain nonpublic enterprises, as defined in the FSP, to the annual financial statements for fiscal years beginning after December 15, 2007.
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.
FASB Staff Positions (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA SOP 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* In February 2008, FASB issued FSP SOP 07-1-1, *Effective Date of AICPA Statement of Position 07-1*, which indefinitely defers the effective date of SOP 07-1 and prohibits adoption of the SOP for an entity that has not early adopted the SOP before issuance of this FSP. An entity that early adopted the SOP before issuance of this FSP, is permitted, but not required to continue to apply the provisions of the SOP. Entities that elect to retain their adoption of the guidance must apply it to all consolidated entities going forward, including those formed or acquired after the adoption of SOP 07-1.
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.132 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the not-for-profit industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

Disclosures About Derivative Instruments and Hedging Activities

.133 In March 2008, FASB issued FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows.

.134 The new standard improves transparency about the location and amounts of derivative instruments in an entity's financial statements; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*; and how derivative instruments and related hedged items affect its financial position, financial performance, and cash flows.

.135 FASB Statement No. 161 achieves these improvements by requiring disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also provides more information about an entity's liquidity by requiring disclosure of derivative features that are credit risk related. Finally, it requires cross referencing within footnotes to enable financial statement users to locate important information about derivative instruments.

.136 It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged.

Business Combinations

.137 In December 2007, FASB issued FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51,* which establishes accounting and reporting standards for the noncontrolling interest in a subsidiary (sometimes called *minority interests*) and for the deconsolidation of a subsidiary. None of the following apply to not-for-profit organizations: FASB Statement No. 160 nor its amendments to Accounting Research Bulletin (ARB) No. 51; Accounting Principles Board (APB) Opinion Nos. 18 and 29; FASB Statement Nos. 60, 89, 128, 130, and 142; FASB Interpretation Nos. (FINs) 37 and 46(R); AICPA Accounting Interpretation No. 1; Statement of Position (SOP) 04-2, *Accounting for Real Estate Time-Sharing Transactions* (AICPA, *Technical Practice Aids*, ACC sec. 10,910); and several EITF issues. Not-for-profit organizations should continue to apply the guidance in Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, before the amendments made by FASB Statement No. 160, SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations* (AICPA, *Technical Practice Aids*, ACC sec. 10,610), and other applicable standards until FASB issues interpretative guidance. FASB Statement No. 160 is effective for fiscal years beginning on or after December 15, 2006. Earlier adoption is prohibited.

.138 Also in December 2007, FASB issued FASB Statement No. 141 (revised 2007), *Business Combinations*, which replaces FASB Statement No. 141, *Business Combinations.* Like its predecessor, FASB Statement No. 141(R) is not applicable to combinations between not-for-profit organizations or the acquisition of a for-profit business by a not-for-profit organization. The nullifications or amendments to other standards made by FASB Statement No. 141(R) also are not applicable to not-for-profit organizations. Thus, not-for-profit organizations should continue to apply FASB Statement Nos. 72 and 147 and FINs 4 and 9, as indicated in paragraphs 1.24–.28 of AICPA Audit and Accounting Guide *Not-For-Profit Organizations*. Not-for-profit organizations also should continue to apply the following standards as indicated in paragraphs 1.24–.28 of AICPA Audit and Accounting Guide *Not-For-Profit Organizations* without regard to the amendments made by FASB Statement No. 141(R): ARB No. 43; APB Opinion Nos. 14, 18, 28, 29, and 30; FASB Statement Nos. 2, 5, 15, 45, 52, 60, 68, 86, 87, 97, 106, 109, 113, 120, 123(R), 133, 142, 144, 146, 150, and 154; and FINs 21, 26, 46(R), and 48. In addition, the amendments made by FASB Statement No. 141(R) to FASB Technical Bulletin (TB) 84-1; AICPA Statement of Position Nos. 78-9, 90-7, 93-6, 96-1, 00-3, 01-6, 03-3, and 05-1; and AICPA Practice Bulletin (PB) Nos. 4, 6, and 14 do not apply to not-for-profit organizations, nor do the changes made by FASB Statement No. 141(R) to FASB TB 85-5; FSP Nos. 141-1 and 142-1; AICPA PB No. 11, many EITF issue consensuses, and several responses in the FASB Staff Q&A on FASB Statement No. 109, *Accounting for Income Taxes*.

Fair Value Measurements

FASB Statement No. 157

.139 In September 2006, FASB issued Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.140 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

.141 In February 2008, the FASB issued FSP FAS 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13*, which amends FASB Statement No. 157, to exclude FASB Statement No. 13, *Accounting for Leases*, and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under FASB Statement No. 13. However, this scope exception does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under FASB Statement No. 141 or FASB Statement No. 141(R), regardless of whether those assets and liabilities are related to leases. This FSP is effective upon the initial adoption of FASB Statement No. 157.

.142 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. However, in February 2008, FASB also issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which is effective upon issuance. This FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow the FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

.143 The following paragraphs summarize FASB Statement No. 157, but are not intended as a substitute for the reading of the statement itself.

Definition of Fair Value

.144 Paragraph 5 of FASB Statement No. 157 defines *fair value* as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date." That definition retains the exchange price notion in earlier definitions of fair value, but clarifies that the exchange price is the price in a hypothetical transaction at the measurement date in the market in which the reporting entity would transact for the asset or liability. The hypothetical transaction to sell the asset or transfer the liability is considered from the perspective of a market participant that holds the asset or owes the liability. Therefore, the definition of fair value focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price).

.145 A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the *principal market*—defined as the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity for the asset or liability—or, in the absence of a principal market, the most advantageous market for the asset or liability.

.146 A fair value measurement of an asset assumes the highest and best use of the asset by market participants, considering the use of the asset that is physically possible, legally permissible, and financially feasible at the measurement date. Highest and best use for an asset is established by one of two valuation premises: *value in-use* or *value in-exchange*. The highest and best use of the asset is in-use if the asset would provide maximum value to market participants principally through its use in combination with other assets as a group (as installed or otherwise configured for use). For example, value in-use might be appropriate for certain nonfinancial assets. An asset's value in-use should be based on the price that would be received in a current transaction to sell the asset assuming that the asset would be used with other assets as a group and that those other assets would be available to market participants. The highest and best use of the asset is in-exchange if the asset would provide maximum value to market participants principally on a standalone basis. For example, value in-exchange might be appropriate for a financial asset. An asset's value in-exchange is determined based on the price that would be received in a current transaction to sell the asset standalone.

.147 A fair value measurement for a liability reflects its *nonperformance risk* (the risk that the obligation will not be fulfilled). Because nonperformance risk includes the reporting entity's credit risk, the reporting entity should consider the effect of its *credit risk* (credit standing) on the fair value of the liability in all periods in which the liability is measured at fair value.

Valuation Techniques

.148 As described in FASB Statement No. 157, valuation techniques, which are consistent with the market approach, income approach, cost approach, or some combination of these approaches, should be used to measure fair value:

- The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach include matrix pricing and often use market multiples derived from a set of comparables.
- The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Valuation techniques consistent with the income approach include present value techniques, option-pricing models, and the multiperiod excess earnings method.
- The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (often referred to as *current replacement cost*). Fair value is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility, adjusted for obsolescence.

.149 Valuation techniques that are appropriate in the circumstances and for which sufficient data are available should be used to measure fair value. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate and the respective indications of fair value should be evaluated and weighted, as appropriate.

Present Value Techniques

.150 Appendix B of FASB Statement No. 157 provides guidance on present value techniques. Present value techniques differ in how they adjust for risk and in the type of cash flows they use. For example, the *discount rate adjustment technique* (also called the *traditional present value technique*) uses a risk-adjusted discount rate and contractual, promised, or most likely cash flows. In contrast, expected present value techniques use the probability-weighted average of all possible cash flows (referred to as *expected cash flows*). The traditional present value technique and two methods of expected present value techniques are discussed more fully in appendix B of FASB Statement No. 157.

The Fair Value Hierarchy

.151 FASB Statement No. 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability (referred to in the statement as inputs). Paragraphs 21–31 establish a fair value hierarchy that distinguishes between (*a*) market participant assumptions developed based on market data obtained from sources independent of the reporting entity (*observable inputs*) and (*b*) the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (*unobservable inputs*). Valuation techniques used to measure fair value should maximize the use of observable inputs and minimize the use of unobservable inputs.

.152 The fair value hierarchy in FASB Statement No. 157 prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available, except as discussed in paragraphs 25–26 of FASB Statement No. 157.
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Adjustments to Level 2 inputs will vary depending on factors specific to the asset or liability. An adjustment that is significant to the fair value measurement in its entirety might render the measurement a Level 3 measurement, depending on the level in the fair value hierarchy within which the inputs used to determine the adjustment fall. Level 2 inputs include the following:
  - — Quoted prices for similar assets or liabilities in active markets
  - — Quoted prices for identical or similar assets or liabilities in markets that are not active
  - — Inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates)
  - — Inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs)
- Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs should be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. In developing unobservable inputs, the reporting entity need not undertake all possible efforts to obtain information about market participant assumptions. Unobservable inputs should reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

Disclosures

.153 Paragraphs 32–35 of FASB Statement No. 157 expand the disclosures required for assets and liabilities measured at fair value. For assets and liabilities that are measured at fair value on a recurring basis in periods subsequent to initial recognition or that are measured on a nonrecurring basis in periods subsequent to initial recognition, the statement requires the reporting entity to disclose certain information that enables users of its financial statements to assess the inputs used to develop those measurements. For recurring fair value measurements using significant unobservable inputs (Level 3), the reporting entity is required to disclose certain information to help users assess the effect of the measurements on earnings (or changes in net assets) for the period.

FASB Statement No. 159

.154 Subsequent to the issuance of FASB Statement No. 157, FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an organization to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.155 FASB Statement No. 159 is effective as of the beginning of an organization's first fiscal year that begins after November 15, 2007. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an organization proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

Deferral of FIN 48 for Certain Nonpublic Entities

.156 FIN 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109,* was issued in June 2006 and is effective for fiscal years beginning after December 15, 2006. However, subsequent to its issuance the FASB issued FSP FIN 48-2, *Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises*, which defers the effective date of FIN 48 for nonpublic enterprises included in the FSP's scope to the annual financial statements for fiscal years beginning after December 15, 2007. For the full text of FIN 48 and its associated FSPs visit the FASB Web site.

Recent AICPA Independence and Ethics Pronouncements

.157 AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

On the Horizon

.158 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the not-for-profit industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.159 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
Financial Accounting Standards Board (FASB)	www.fasb.org
Governmental Accounting Standards Board (GASB)	www.gasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Overhaul Project—AICPA Audit and Accounting Guide *Not-For-Profit Organizations*

.160 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Not-For-Profit Organizations*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.161 The ASB formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB issued a discussion paper titled *Improving the Clarity of ASB Standards,* seeking feedback on proposals to "clarify" its standards. In response to the feedback received on the discussion paper and subsequent discussions with interested parties, the ASB has established clarity drafting conventions and has undertaken to revise all of its SASs in accordance with those conventions. The clarity drafting conventions include:

- Establishing objectives for each of the standards, thereby providing a framework for the application of professional judgment
- Presenting application and other explanatory material in a separate section that follows the requirements
- Numbering application and other explanatory material paragraphs using an "A" prefix
- Cross-referencing introductory, objective, and requirement paragraphs to related application and other explanatory material paragraphs
- Using formatting techniques to enhance the readability of the SASs
- Including, where necessary, special considerations relevant to the audit of smaller, less complex entities within the text of the SAS
- Including, where necessary, any special considerations in the audit of governmental entities within the text of the SAS
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

Convergence With International Standards

.162 The ASB is working toward convergence with international auditing standards, whereby projects are developed concurrently with those of the International Auditing and Assurance Standards Board (IAASB). The ASB has created a number of task forces charged with monitoring specific activities of the IAASB, assisting the ASB in commenting on exposure drafts of International Standards on Auditing (ISA), and drafting proposed SASs using the ISA, including the international convention for wording, as the base standard. The status of ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.163 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an organization's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer the issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of **Present Fairly in Conformity With Generally Accepted Accounting Principles**

.164 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to FASB's proposed Statement of Financial Accounting Standards *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal places responsibility for the

GAAP hierarchy for nongovernmental entities in the accounting literature. Accordingly, the proposed SAS deletes the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]). The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with FASB's issuance of its final standards. As noted earlier in this alert, the PCAOB has already adopted its proposal to remove the GAAP hierarchy from its standards.

Accounting Pipeline

.165 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Fair Value

.166 During phase one of FASB's fair value option project, FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the first quarter of 2008. Readers should remain alert to developments by visiting the FASB Web site.

Transfers of Financial Assets

.167 FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, FASB issued the exposure draft *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During the second quarter of 2008, FASB expects to issue an amended exposure draft. See the FASB Web site for complete information.

Income Taxes

.168 The objective of this project is to improve the accounting for income taxes and reduce the application differences between FASB Statement No. 109, *Accounting for Income Taxes*, and IAS Statement No. 12, *Income Taxes*. FASB plans to issue an exposure draft during the second quarter of 2008. Readers can track the project's progress on the FASB Web site.

GAAP Hierarchy

.169 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, FASB believes the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, which is responsible for selecting its accounting principles for financial statements. Accordingly, FASB concluded that the GAAP hierarchy should reside in the accounting literature established by FASB. FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the statements has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.170 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.171 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.172 The following are various resources that practitioners engaged in the not-for-profit industry may find beneficial.

Publications

.173 Practitioners may find the following publications useful with respect to the not-for-profit industry:

- Audit and Accounting Guide *Not-For-Profit Organizations* (2008) (product no. 012648kk)
- Audit Guide Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit and Accounting Guide *State and Local Governments* (2008) (product no. 012668kk)
- Audit and Accounting Guide *Health Care Organizations* (2007) (product no. 012617kk)
- Audit Guide *Analytical Procedures* (2008) (product no. 012558kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2008) (product no. 012518kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2008) (product no. 012778kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *State and Local Governmental Developments—2007* (product no. 022437kk)
- Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2007/08* (product no. 022457kk)
- Audit Risk Alert *Health Care Industry Developments—2007/08* (product no. 022348kk)
- Audit Risk Alert *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics Alert—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- Financial Reporting Alert *Current Accounting Issues and Risks—2008* (product no. 029208kk)
- *Checklists and Illustrative Financial Statements* for *Not-for-Profit Organizations* (product no. 008988kk)
- *Accounting Trends & Techniques—Not-for-Profit Organizations* (2005) (product no. 006616kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.174 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.175 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Internal Control Deficiencies: Assessment and Reporting Under SAS 112* (product no. 733290kk [text] or 183290kk [DVD]). This course focuses on compliance with the standard's requirement by examining each stage of the decision making framework using numerous illustrations and practice exercises. The course also applies to managers of nonpublic companies to enable them to decide whether a control deficiency exists and how to correct it.

.176 Among the many courses, the following are specifically related to the not-for-profit industry:

- *Auditing Nonprofits: Tips and Traps* (product no. 731524kk [text]). This course will help you better understand essential aspects of auditing in this industry to conduct audits in the most effective manner, and offer practical tips to guide you through possible traps encountered in auditing a not-for-profit.
- *Nonprofit Auditing and Accounting Update (2007–2008 Edition)* (product no. 732093kk [text] or 182074kk [DVD]). Covering all the latest auditing and accounting developments affecting not-for-profit entities, this course will give you a complete understanding of changes in the not-for-profit environment. For 2007–2008, the course will include coverage of the new Yellow Book, the risk assessment SASs, SAS No. 112, and more.
- *Accounting and Reporting Practices of Not-for-Profit Organizations* (product no. 743275kk [text]). Understand and apply the requirements of FASB and AICPA pronouncements to your not-for-profit clients. Consider real-world financial statements, cases and problems faced by CPAs with not-for-profit clients and by executives of not-for-profit organizations.
- *Frequent Frauds Found in Governments and Not-For-Profits* (product no. 733310kk [text]). Through an informative case study approach, this course illustrates common frauds that make headlines and damage the reputations of government and not-for-profit organizations.

.177 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.178 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.179 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.180 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

Member Service Center

.181 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.182 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9am to 8pm on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.183 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.184 The AICPA offers its annual not-for-profit conference in June. The National Not-For-Profit Industry Conference is a comprehensive forum that deals with the challenges facing not-for-profit practitioners and financial executives today. It's where you'll find out the latest information on the impact of tax, management, auditing, and accounting issues pertaining to not-for-profit organizations. You'll also receive training in operational strategies that are crucial to the well-being of a not-for-profit organization. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.185 The GAQC is a firm-based voluntary membership Center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC's primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm's governmental audits.

.186 The mission of the GAQC is to do the following:

- Raise awareness about the importance of governmental audits.
- Serve as a comprehensive resource provider on governmental audits for member firms.
- Create a community of firms that demonstrates a commitment to governmental audit quality.
- Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues.
- List member firms to enable purchasers of governmental audit services to identify firms that are members.
- Provide information about the center's activities to other governmental audit stakeholders.

.187 For more information about the GAQC, visit http://gaqc.aicpa.org.

AICPA Industry Expert Panel—Not-for-Profit Organizations

.188 For information about the activities of the AICPA's Not-for-Profit Organizations Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_notforprofit.htm.

Industry Web Sites

.189 The Internet covers a vast amount of information that may be valuable to auditors of not-for-profit organizations, including current industry trends and developments. Some of the more relevant sites for auditors with not-for-profit clients include those shown in the appendix of this alert.

.190 The Not-for-Profit industry practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.191 This Audit Risk Alert replaces *Not-for-Profit Organizations Industry Developments—2007*.

.192 The Audit Risk Alert *Not-for-Profit Organizations Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to ccole@aicpa.org or write to

High-Technology Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of high-technology entities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Zachary T. Donahue, CPA
Senior Technical Manager
Accounting and Auditing Publications

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your high-technology entity audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The high-technology industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007, compared with an increase of 2.9 percent in 2006. According to 2007 fourth-quarter advance estimates, real GDP increased at an annual rate of just 0.6 percent, down from third quarter real GDP growth of 4.9 percent.

.11 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. As of January 2008, the unemployment rate was 4.9 percent, representing approximately 7.6 million people.

.12 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 2.25 percent to 3.00 percent as of the end of January 2008. The Federal Reserve noted in its January press release that financial markets continue to experience considerable stress, and credit continues to tighten for some businesses and households. The housing contraction continues to deepen and labor markets soften. As such, the policy actions taken to decrease rates are meant to promote moderate growth over time and mitigate risks to economic activity while moderating inflation.

Industry Trends and Conditions

.13 Worldwide IT spending is expected to continue to increase in 2008. Gartner Inc. predicts that 2008 spending will grow 5.5 percent to $3.3 trillion. A Harris poll performed in July and October 2007 revealed that 80 percent of Americans now go online, spending an average of 11 hours per week on the Internet. Thus, IT continues to increasingly become a part of more Americans' daily way of life.

.14 According to a September 2007 Forrester Research Inc. report, 2007 investment and purchases data show a modest revival in growth after the slowdown in the second half of 2006. With Department of Commerce data revisions lowering IT investment levels in 2006, the technology industry is expected to build on the moderate second quarter 2007 growth in the fourth quarter of 2007, with growth rates approaching 8 percent. Software continues to lead the industry, with nearly an 8 percent growth rate. Computer equipment investment is starting to improve, but communications equipment investment is decreasing.

.15 It is difficult to find common ground on the precise definition of the high-technology industry. According to the AeA (formerly known as the American Electronics Association), the high-technology industry is made up of 45 Standard Industrial Classification codes. These sectors fall into three broad categories, namely, high-technology manufacturing, communications services, and software and computer-related services.

.16 Because the high-technology industry is not easily defined, its definition varies greatly depending on the combination of products and services selected to define the industry. For the purposes of this alert, we will use a definition that segments the industry into five classifications, namely, personal computers (PC); semiconductors; mainframes, servers, and storage; networking and telecommunications equipment; and software and services.

Personal Computers

.17 According to Gartner Inc. preliminary results, worldwide PC shipments totaled 271.2 million units in 2007, a 13.4 percent increase over 2006. The industry ended 2007 with fourth quarter PC shipments of 75.9 million units, a 13.1 percent increase over fourth quarter 2006. Worldwide PC shipments were projected to total 257.1 million units in 2007; however, actual shipments exceeded projection by over 5 percent.

.18 The Europe, Middle East, and Africa (EMEA) region continued to be the largest PC market in 2007 with PC shipments of 92 million during the year, a 14.7 percent increase over 2006. Asia and South Pacific took over as the second largest market during the fourth quarter of 2007. PC shipments totaled 70.7 million in the Asia and South Pacific region during 2007, an 18 percent increase over 2006. The U.S. PC market grew 5.3 percent in 2007 with PC shipments of 64.2 million. These results characterize well the worldwide PC market landscape: continued strong growth in emerging regions and slower growth in markets such as the United States.

.19 PC shipments are expected to grow by 11 percent in 2008, although recent turmoil in global financial markets may cause the growth rate to be lower. Much of the growth in emerging markets is being driven by new users of PCs and not replacement purchases. While PC manufacturers have found growth opportunities in emerging markets, they face increasing challenges for new sales in established markets, including weak desktop PC replacement and narrowing penetration opportunities. Mobile PC shipments continue to be one of the PC market's primary drivers of growth, whereas desktop PC sales were weaker in some regions. Forrester Research Inc.'s 2007 worldwide PC adoption forecast predicts more than 1 billion PC units will be in use by the end of 2008, and over 2 billion by 2015, which would reflect more than 12 percent annual growth from 2003 to 2015.

Semiconductors

.20 Worldwide semiconductor revenue totaled $270.3 billion in 2007, a 2.9 percent increase from 2006, according to preliminary results by Gartner Inc. Strong performance had been expected for 2007, largely due to a strong demand for electronic equipment and stabilization in the chip average selling prices (ASP). However, according to the Semiconductor Industry Association (SIA), sharp declines in ASP in some segments—microprocessors, dynamic random access memory (DRAM), and NAND flash—will contribute to slower growth in worldwide sales than had been expected. Price declines in some segments, such as DRAM, are a result of oversupply. According to SIA, worldwide sales are expected to hit $252 billion in 2007 and $306 billion in 2010. The SIA revised its projection in 2007 to project 5.4 percent compound annual growth for year-end 2006 through 2010. Price competition is a major contributor to price eroding more quickly than had been historically noted.

.21 As the semiconductor industry attempts to remedy its oversupply in the memory market, which led to sharp ASP declines, worldwide semiconductor equipment spending is forecast to decrease 9.9 percent in 2008 to $40.3 billion, according to Gartner Inc. All major segments of the capital equipment market are projected for negative spending in 2008, including a weak first half of the year for DRAM spending as DRAM companies slow their capital investments to help correct the supply and demand situation.

Mainframes, Servers, and Storage

.22 Worldwide server shipments for the third quarter of 2007 (the latest available data) grew 8.7 percent over the third quarter of 2006, according to Gartner Inc. Worldwide server revenue totaled $13.4 billion for the third quarter of 2007, and server shipments totaled over 2.2 million units. According to Gartner Inc., the blade server segment continued to drive the growth in the third quarter of 2007. Worldwide blade server shipments grew 13.8 percent, which was 10 percent of the overall server shipments. The server blade market increased for the fourth consecutive quarter, including factory revenue growing at 41.4 percent year over year. Also, blade servers passed the $1.0 billion revenue mark for the first time ever in one quarter.

.23 According to International Data Corporation's (IDC) Worldwide Quarterly Server Tracker, although the third quarter of 2007 was the sixth consecutive quarter of positive revenue growth and the highest third quarter server revenue since 2000, it was the slowest growth rate since the first quarter of 2006. The most significant growth area is in volume systems, with revenue growth of 8.1 percent year over year in the third quarter of 2007, which is the second highest growth rate over the past 8 quarters. Despite growth in Windows, Linux, and Unix servers, revenue for midrange enterprise servers declined 2.2 percent year over year, which marks the second consecutive quarterly decrease for that segment. High-end enterprise server revenue decreased 14.5 percent year over year, which is the largest decline in over 5 years. According to IDC, we are in the early stages of a market-wide transition, which will require significant IT investment in a more flexible IT fabric, although concern about an economic slowdown could slow investment into new systems.

.24 Worldwide external controller-based disk storage revenue totaled $3.9 billion in the third quarter of 2007, a 3.4 percent increase over the third quarter of 2006 according to Gartner Inc. The Asia and South Pacific region increased its revenue by 22.7 percent year over year. This growth is distributed primarily among India, Australia, Taiwan, and China. As the cost of media storage continues to drop, there will likely be a focus on hidden or indirect costs of storage. Some of the indirect costs result from the rapidly increasing volume of data being stored, as well as new legal challenges and higher insurance costs to ensure these data are properly kept and not damaged or lost. The growing demand for such services is an opportunity for high-technology companies.

Networking and Telecommunications Equipment

.25 Demand for mobile phones in emerging markets such as the Middle East, Africa, China, and India has increased in recent years after being viewed for several years as expensive and unprofitable. In addition, in more mature markets such as North America and Western Europe, there is a strong upgrade rate as operators continue to offer attractive new devices to replace customers' outdated devices. Strong performance was experienced in the EMEA and Asia and South Pacific regions, which experienced growth rates of 3.5 percent and 26 percent over the prior year period, respectively. Strong growth in the North America market continued, reaching 45 million units by the end of the third quarter of 2007, a 10.3 percent increase over the same period in the prior year. Competition has continued to drive prices down at the low end of the market; at the same time, competition has also spurred new designs and features at the high end of the market, including the highly anticipated release of Apple's iPhone in the second quarter of 2007. In the third quarter of 2007, mobile phone sales totaled 289.1 million units, which was a 15 percent increase from the same period in 2006, according to Gartner Inc.

.26 *Convergence* seems to be the new buzzword for the wireless telecommunications industry. Cell phones now have multiple increased functionalities and can now function in sync with, or in place of, PCs and TVs. Apple's introduction of the iPhone is expected to spur even faster development of other similar products. As various wireless technologies converge on a single mobile device, their use is expected to increase dramatically.

.27 Gartner Inc. forecasts 2.3 trillion messages will be sent across the major networks worldwide in 2008, which would represent a 19.6 percent increase from the 1.9 trillion messages in 2007. Also, mobile messaging revenue is expected to grow at 15.7 percent in 2008 to $60.2 billion, up from $52 billion in 2007. Even though the volume of messaging will continue to increase, operator margins on messaging services are declining, largely seen as a result of competition and market saturation, according to Gartner Inc. The compound annual growth rate for short message service revenue in major markets worldwide from 2002 to 2006 was 29.8 percent; it is forecast at only 9.9 percent from 2007 to 2011.

.28 Broadband services continue to gain traction, particularly for the wireless technology known as WiMAX (worldwide interoperability for microwave access). Many municipalities have already implemented WiMAX systems to provide blanket coverage, and it is expected to become increasingly pervasive throughout 2008 as more equipment and networks are developed.

Software and Services

.29 An emerging trend within software and services is software as a service (SaaS). A September 2007 IDC-ITPartner.net survey indicates that SaaS is a key area of opportunity that may significantly affect the software partnering environment. The survey revealed that this area was a positive long-term option due to the high revenue annuity potential. Highlights from the survey include the following:

- Seventy-six percent of respondents believe SaaS will dramatically affect the partnering landscape.
- More than 70 percent of respondents view SaaS as an opportunity.
- Many of the surveyed firms are already engaged in SaaS-related activities.

- Implementation services and business services related to SaaS deployments are considered the most profitable opportunities associated with SaaS.
- To be successful, organizations must effectively target their partner messaging.

.30 IDC further highlighted this area in its "10 mega-trends for IT in 2008" forecast released in December 2007. They indicated online delivery, led primarily by SaaS, will have a significant impact on the high-technology industry. Other software-related items expected to have an impact in 2008 include the proliferation and influence of Web 2.0 applications, as well as solutions packaging.

Environmental Impact

.31 The increased importance on environmentally friendly products and producing products in an environmentally conscious way is affecting segments within the high-technology industry in various ways. High-technology companies are continually expected to produce more applications and products with increased computing power, which requires more energy consumption. On the other hand, other companies look to high-technology companies to provide technological solutions to environmental issues. As companies in all industries focus on making products that are more energy efficient and often make product comparisons and decisions based on responsible energy use, they may seek the assistance of high-technology companies. This may lead to new revenue opportunities as technology companies strive to create products and services to assist companies in other industries in becoming more environmentally friendly. To further demonstrate the industry's efforts, Gartner Inc. outlined three key steps to reduce organizational environmental footprints, defined as the combination of the energy consumed by the equipment, the environmental impact of its production, and the impact of its disposal. The three steps Gartner Inc. outlined to help organizations reduce their network environmental footprints are

1. don't overbuy,
2. minimize the number of layers and devices, and
3. consider power consumption of networking devices during product selection.

Audit and Attestation Issues and Developments

Audit Considerations for High-Technology Clients

.32 As discussed previously in this alert, auditors must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements. For audits of high-technology companies, an auditor may consider the following:

- Market and competition, including demand, capacity, and price competition, especially due to the fast rate at which these change in the high-technology industry
- Types of products and services being developed and marketed as well as corresponding life cycles
- Whether products are relatively standard or require significant customization
- Whether the entity has a practice of allowing customers to return products for new or upgraded models
- Whether the entity sells stand-alone products or a bundle of products and services (that is, multiple-element arrangements)
- Current marketing programs, for example, pricing incentives and the nature of any incentives that may affect the timing of revenue recognition

- Whether the entity uses a standard form of sales agreement (if standard sales agreements are not used, the processes by which sales agreements are evaluated for propriety of revenue recognition)
- Compensation plans for management and sales personnel that may provide an incentive to misstate revenue
- The general terms of the entity's arrangements with distributors and value-added resellers (VARs), if the entity uses them
- The kind of arrangements and warranty provisions the entity typically enters into with its end-user customers
- If sales are made internationally, the laws of the local jurisdiction relating to billing, transfer of title, or other items that may affect revenue recognition

The Competitive Environment

.33 The high-technology industry continues to be competitive. The industry uses a variety of pricing mechanisms and other product offerings to gain market share and increase customer base. A number of segments of the industry sell what is considered a commodity. If a product is considered a commodity, the primary means of differentiation is price, and it is not unusual for participants in the industry to engage in aggressive pricing practices or offer generous sales concessions to gain or retain market share.

.34 Rapid innovation and substantial technological change also continue to characterize the industry. New industry players and products continually emerge, and companies are under constant pressure to enhance the capabilities and quality of their products and services. Clients whose products become technologically inferior become vulnerable to customer demands for price or other concessions.

.35 Constant technological advancement affects the industry in many ways, including the following:

- The threat of imminent product obsolescence provides an additional incentive for high-technology manufacturers to offer discounts or provide other incentives and concessions as a way to make sales and move inventory. Many concessions raise questions about the propriety or timing of revenue recognition.
- Rapid technological change has resulted in the creation of even more complex high-technology products. In some instances, it may be difficult to determine whether the product will perform as required at the time of shipment. To overcome customer resistance in those situations, manufacturers may engage in a number of practices that have revenue recognition implications, including
  — delivering products to customers for demonstration purposes;
  — providing liberal evaluation, acceptance, or cancellation clauses in the sales contract;
  — offering separately priced extended warranties or maintenance agreements; or
  — promising the delivery of future products (before these products are complete, the entity will ship current products to the customer).
- The quick pace of innovation can force companies to speed new products to the market. The constant introduction of new products may raise questions about an entity's ability to estimate product returns.
- The rapid pace of changes results in companies constantly evaluating and modifying their business model and how their products are brought to market. For example, as products near the end of their life cycle, an entity may offer sales incentives or introduce other strategies for extending the sales life of the product.

.36 The pressure to meet quarterly or annual earnings targets creates a strong incentive for entities to complete transactions by the end of the reporting period. Customers can take advantage of this desire to meet revenue expectations by forcing companies to lower prices or provide more liberal sales terms in contracts negotiated near the end of a reporting period. For this reason, it is not uncommon for high-technology companies to report a proportionately higher number of sales near the end of a reporting period. This situation can lead to a greater risk of material misstatement to the financial statements.

Outsourcing

.37 A 2007 employment study by the AeA shows that the U.S. high-technology industry added 118,500 jobs between January and June of 2007. This is the third straight year that the U.S. high-technology industry has added jobs, and it is the first year since 2001 that each of 4 sectors the AeA considers within the industry (high-technology manufacturing, communications services, software services, and engineering and technology services) has increased the number of jobs. The industry added almost 150,000 jobs in 2006 according to the AeA, which was the largest gain since 2001. These results counter the thought that high-technology jobs are increasingly being outsourced. While many companies have outsourced positions such as software development and call centers to locations such as India and Russia, there is such demand for employees that outsourcing cannot meet all of the U.S. needs.

Expanding Into Nontraditional Areas

.38 High-technology companies that add or expand products, services, and businesses may generate audit risks and risks to themselves. You may consider the following factors if your client is adding or expanding products, services, or businesses:

- Management may lack expertise in the new areas. For example, cable companies may not possess the knowledge and skills needed to manage the business and risk of providing Internet-based phone services. This lack of expertise may contribute to financial statement misstatements and internal control weaknesses.
- Management may not properly implement industry-specific accounting principles related to the new areas resulting in material misstatements of the financial statements.
- The accounting, operations, and other systems related to the new areas may lack adequate testing and proper integration with core systems. Thus, these new systems may have inadequate internal control, which may result in unreliable accounting data and lead to material misstatements of the financial statements.
- The entity may fail to comply with regulations attendant to the new area of business (such as Federal Communications Commission regulations) because of unfamiliarity with the regulations and a lack of expertise in the new area. AU section 317 describes an auditor's responsibilities regarding violations of laws or governmental regulations.

Increased Merger and Acquisition Activity

.39 Because mergers and acquisitions of high-technology companies have become more frequent, the following sections are included to summarize some considerations relating to mergers and acquisitions.

Applicable Accounting Guidance

.40 Financial Accounting Standards Board (FASB) Statement No. 141(R), *Business Combinations*, and FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*, were issued in December 2007 and are discussed subsequently in this alert.

Possible Internal Control Weaknesses

.41 Subsequent to a merger, management typically reduces personnel and eliminates positions and functions in hopes of saving money and gaining efficiencies. Management may shift personnel to different positions and alter standard operating procedures. By making these changes, however, management may risk creating deficiencies in internal control and in business operations. Such deficiencies in internal control may represent significant deficiencies or material weaknesses. Auditors must consider the guidance in AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and AU section 380, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1), with regard to what communication is required when significant deficiencies or material weaknesses are identified in an audit.

Increased Fraud Risks

.42 Employees may have an increased opportunity to commit fraud when entities merge. With major changes in the entity's operations, there may be breakdowns in internal control, including the poor segregation of duties and a lack of supervisory reviews, which employees can take advantage of by committing fraud. Furthermore, the bitterness that can follow a merger may trigger some employees to rationalize that the commission of fraud is justified. Auditors must consider the guidance in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1).

Spring Loading and Premerger Outlays

.43 An entity acquiring another entity may try to worsen the reported financial performance of the purchased entity during the period immediately preceding the acquisition date (the stub period). By worsening the financial performance of the acquired entity before the acquisition, management will find it much easier to report improved performance after the acquisition, thus demonstrating the positive effects of the business combination and providing an increase in reported earnings. This practice is often referred to as spring loading. Generally, the practice involves accelerating the purchased entity's payment of payables and other obligations and writing down investments and other assets on the purchased entity's books. Some of these practices, such as paying down payables, may not necessarily violate generally accepted accounting principles (GAAP); however, other financial engineering techniques do violate GAAP because they may involve the deliberate inflation of reserves and allowances recorded on the acquired entity's books. These inflated reserves are then reversed in the period following the acquisition, providing a generous burst of earnings growth. Accounts that can be manipulated in this manner include, among others:

- Reserves for merger costs
- Inventory obsolescence allowance
- Pension allowances
- Restructuring reserves
- Reserves for worker's compensation and medical insurance

.44 AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1), says the successor auditor must obtain sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements he or she has been engaged to audit, including evaluating the consistency of the application of accounting principles. The audit evidence used in analyzing the impact of the opening balances on the current-year financial statements and consistency of accounting principles is a matter professional judgment. Auditors must consider guidance in AU section 315.

Compliance With the Sarbanes-Oxley Act

.45 Management of public companies may fail to consider the effect of the Sarbanes-Oxley Act of 2002 and related Securities and Exchange Commission (SEC) regulations on the merger. For example, an entity may encounter a serious challenge if it acquires a privately held entity that has not had to comply with the act. Effective controls may not be in place at the acquired entity. When performing an integrated audit of financial statements and internal control over financial reporting, auditors must consider the guidance contained in Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which replaced Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*.

Revenue Recognition

.46 Revenue recognition continues to pose significant audit risk for auditors, and the high-technology industry is one of the more challenging industries when it comes to the topic of revenue recognition. The SEC sought to fill the gap in the accounting literature with Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, which was issued in December 1999, and the companion document, *Revenue Recognition in Financial Statements—Frequently Asked Questions and Answers*, which was issued in October 2000. SAB No. 101 was superseded by SAB No. 104, *Revenue Recognition*, in December 2003. SAB No. 104 states that if a transaction falls within the scope of specific authoritative literature on revenue recognition, that guidance should be followed; in the absence of such guidance, the revenue recognition criteria in FASB Statement of Financial Accounting Concepts No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, should be applied. Specifically, the criteria that revenue should not be recognized until it is (*a*) realized or realizable and (*b*) earned should be followed. However, SAB No. 104 is more specific, stating additional requirements for meeting those criteria, and reflects the SEC staff's view that the 4 basic criteria for revenue recognition in AICPA Statement of Position (SOP) 97-2, *Software Revenue Recognition* (AICPA, *Technical Practice Aids*, ACC sec. 10,700), should be a foundation for all basic revenue recognition principles. Those criteria are as follows:

- Persuasive evidence of an arrangement exists.
- Delivery has occurred.
- The vendor's fee is fixed or determinable.
- Collectibility is probable.

.47 The SEC has seen a number of instances of questionable and inappropriate revenue recognition practices. Significant issues encountered include

- complex arrangements that provide for separate, multiple deliverables (for example, multiple products or services, or both), at different points in time during the contract term.
- nonmonetary (for example, barter) transactions in which fair values are not readily determinable with a sufficient degree of reliability.

.48 The SEC requested that the Emerging Issues Task Force (EITF) address certain of these issues to clarify the application of GAAP in these transactions. However, the SEC staff generally believes that the existing accounting literature provides analogous guidance for a number of these issues, including SOP 97-2; APB Opinion No. 29, *Accounting for Nonmonetary Transactions*; SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts* (AICPA, *Technical Practice Aids*, ACC sec. 10,330); FASB Concept Statement No. 5; and FASB Concept Statement No. 6, *Elements of Financial Statements*.

.49 In an industry as varied as high technology, invariably there will be significant differences among companies regarding the types of products and services sold and how they are sold. Characteristics of high-technology revenue transactions that may affect revenue recognition include the following:

- *Bundled sales.* The bundling of installation or other services with product sales can complicate the revenue recognition process.

- *Indirect versus direct selling.* Many high-technology companies use a combination of direct sales with a network of VARs and distributors to sell their products to end users. Sales made through distributors, as well as significant single sales, often can have unique, nonstandard terms. It is common for high-technology companies to provide incentives or sales concessions to their VARs and distributors that go beyond the rights of return granted to end users. Many of the incentives and concessions raise revenue recognition issues.

- *Bill-and-hold sales.* It is not uncommon for high-technology companies to enter into bill-and-hold transactions. In a bill-and-hold transaction, a customer agrees to purchase the goods, but the seller retains physical possession until the customer requests shipment. Normally, such an arrangement does not qualify as a sale because delivery has not occurred.

- *International sales.* High-technology companies may make sales in non-U.S. legal jurisdictions. The laws in these jurisdictions relating to product sales can vary significantly from U.S. laws. For example, some countries may prohibit the billing for goods until delivery occurs or may have rules regarding transfer of title that may be significantly different from U.S. rules.

AICPA's Audit Guide on Revenue Recognition

.50 AICPA Audit Guide *Auditing Revenue in Certain Industries* assists auditors in auditing assertions about revenue in selected industries not covered by other AICPA Audit and Accounting Guides. Included in this guide are descriptions and explanations of auditing standards, procedures, and practices as they relate to auditing assertions about revenue in both the computer software and high-technology manufacturing industries.

.51 This guide, updated as of May 1, 2007, does the following:

- Discusses the responsibilities of management, boards of directors, and audit committees for reliable financial reporting

- Summarizes key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP

- Identifies circumstances and transactions that may signal improper revenue recognition

- Summarizes key aspects of the auditor's responsibility to plan and perform an audit under generally accepted auditing standards (GAAS)

- Describes procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition

- Reflects the issuance of SAS Nos. 104–111, the "risk assessment standards," and has been conformed to the new risk assessments standards to indicate, at a minimum, where these standards need to be applied

.52 You can order the AICPA Audit Guide *Auditing Revenue in Certain Industries* (product no. 012517kk) from the AICPA at (877) 777-7077 or visit www.cpa2biz.com.

Foreign Currency Hedges

.53 The multinational nature of the computer hardware industry means that companies within this industry can be greatly affected by changes in the dollar's value versus other currencies. Revenues can be affected if the entity generates a significant portion of its sales from outside the United States, and expenses can also be affected if the entity has a significant operating presence in international markets. The increasing level of global exposure can often cause wide variations in these companies' operating results. To limit the financial risk associated with these currency fluctuations, companies are therefore increasing their usage of hedging techniques, according to Standard & Poor's. However, it is still important to understand both the net impact of currency swings on reported financial statements and the actual level of business activity on a constant currency basis.

Accounting Issues and Developments

Revenue Recognition

.54 High-technology manufacturing companies can be involved in a variety of revenue transactions. Certain of these transactions fall within the scope of specific authoritative literature. For other transactions, only the broad revenue recognition criteria specified in the FASB's conceptual framework exists.

.55 To assess whether the client's revenue recognition policies are consistent with the applicable accounting literature, auditors may consider identifying and understanding the terms of the entity's revenue transactions and whether these terms are consistent for all customer types.

Income Statement Classification

.56 The appropriate classification of amounts within the income statement or balance sheet can be as important as the appropriate measurement or recognition of such amounts. In the current environment, an auditor may consider income statement misclassifications designed to increase reported revenue (for example, reporting agency transactions on a gross basis and showing sales discounts as a marketing expense rather than a revenue reduction). Several EITF consensus provisions provide guidance on the proper classification of certain revenue and expense items. Some recently issued EITF consensus provisions include

- EITF Issue No. 06-1, "Accounting for Consideration Given by a Service Provider to Manufacturers or Resellers of Equipment Necessary for an End-Customer to Receive Service from the Service Provider"
- EITF Issue No. 07-3, "Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities"

.57 SEC registrants apply the guidance provided in SEC Regulation S-X regarding classification of amounts in financial statements.

Research and Development Costs

.58 As noted in last year's alert, ongoing innovation is the heart of competition in the high-technology industry and is required for survival. Consequently, most high-technology companies devote a substantial portion of their resources to research and development (R&D) activity. According to paragraphs 8*a* and 8*b* of FASB Statement No. 2, *Accounting for Research and Development Costs*

- research is planned search or critical investigation aimed at discovery of new knowledge with the hope that such knowledge will be useful in developing a new product or service.
- development is the translation of research findings or other knowledge into a plan or design for a new product or process . . . whether intended for sale or use.

.59 High-technology management may reduce net loss or increase earnings by capitalizing R&D costs, which are significant for many companies in the high-technology industry. However, FASB Statement No. 2, as interpreted by FASB Interpretation No. (FIN) 4, *Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method*, prohibits capitalization and requires R&D to be expensed when incurred, except for acquired R&D with alternative future uses purchased from others. In addition to the requirement to expense internal R&D, FASB Statement No. 2 requires disclosure in the financial statements regarding the total amount of R&D costs charged to expense.

.60 Some high-technology companies acquire their assets through mergers and acquisitions. One purpose of these business combinations is to acquire in-process R&D. You may need to hire a technology specialist to determine which acquired technology objects have alternative future uses. For clients with technology with alternative future uses, you may consider verifying that they are properly valued and capitalized.

Convergence With International Financial Reporting Standards

.61 Since their joint meeting in September 2002, the FASB and International Accounting Standards Board (IASB) have had a common goal—one set of accounting standards for international use. At that time, The Norwalk Agreement, a memorandum of understanding between the two rule-setting bodies, was signed. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. At that meeting, the FASB and the IASB pledged to use their best efforts to make their existing financial reporting standards fully compatible as soon as is practicable and to coordinate their future work programs to ensure that once achieved, compatibility is maintained. At their meetings in April and October 2005, the FASB and IASB reaffirmed their commitment to the convergence of U.S. GAAP and International Financial Reporting Standards (IFRS). A common set of high quality global standards remains the long-term strategic priority of both the FASB and the IASB.

.62 There has been progress towards this goal. FASB Statement No. 157, *Fair Value Measurements*, and FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*, take U.S. GAAP in the direction of IFRS with respect to reporting at fair value. The goal of the FASB and the IASB is to reach a conclusion in 2008 about whether major differences in a few focused areas should be eliminated through one or more short-term standard-setting projects and, if so, complete or substantially complete work in those areas. Those areas include impairment, income taxes, investment properties, government grants, research and development, joint ventures, subsequent events, and segment reporting. For more information on the status of this project go to www.fasb.org and www.iasb.org.

SEC Eases Acceptance of IFRS Financial Statements

.63 On December 21, 2007, the SEC adopted rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally-accepted accounting standards. This rule was effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.64 Over 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and other countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase, from a relative few in 2005 to approximately 110 in 2006, of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB. The SEC expects to see this number continue to increase in the future, particularly pursuant to Canada's announced move to IFRS, as there currently are approximately 500 foreign private issuers from Canada.

.65 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries' financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

FASB Accounting Standards Codification™

.66 On January 15, 2008, FASB launched the one-year verification period of the *FASB Accounting Standards Codification™* (codification). The codification is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. The codification includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, EITF, and related literature. The codification also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.67 The codification does not change GAAP, but rather it reorganizes thousands of GAAP pronouncements into approximately 90 topics. Therefore, the one-year verification period is not to debate the underlying requirements of GAAP, but rather to verify that the codification appropriately captures them and accurately reflects existing U.S. GAAP for nongovernmental entities. The verification period is also a period for constituents to acquaint themselves with the new structure and submit feedback regarding any issues before the codification content becomes authoritative. At the end of the one-year verification period, FASB is expected to formally approve the codification as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve the codification in April 2009.

.68 The codification uses a topical structure in which topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard-setter or standard from which the content was derived. The topics of the codification reside in four main areas: presentation, financial statement accounts, broad transactions, and industry guidance. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. For example, topics in this area include income statement, balance sheet, and earnings per share. The financial statement account area presents topics in financial statement order including assets, liabilities, equity, revenue, and expenses. The broad transactions area includes topics related to multiple financial statement accounts that are transaction-oriented such as derivatives and business combinations. The industry area includes guidance unique to an industry or type of activity such as airlines, software, and real estate.

.69 Constituents are encouraged to use FASB's online Codification Research System free of charge and provide feedback to FASB on the codification. The Codification Research System includes general information on how to use the online research system and special features such as Cross Reference Reports, which show where current standards reside in the codification. Readers are encouraged to register and access the codification at www.fasb.org/project/codification&retrieval_project.shtml.

XBRL Initiative

.70 eXtensible Business Reporting Language (XBRL) is an XML-based markup language used to communicate financial and business data electronically. XBRL is being developed by an international nonprofit consortium with over 450 member organizations, including accounting firms, software providers, financial intermediaries, academics, and technologists.

.71 XBRL is used to "tag" financial statements so that the information in those statements is machine readable, thereby allowing users to analyze financial information more easily and quickly. To assist with the tagging process, XBRL US has currently developed over 11,000 financial concepts, which essentially represent a dictionary of U.S. GAAP and other financial reporting requirements.

.72 On January 11, 2008, the SEC Advisory Committee on Improvement to Financial Reporting proposed that the SEC adopt a mandatory phase-in of XBRL for a specified time period, starting with the largest 500 domestic public reporting companies. As of the date of this alert, that mandatory phase-in period had not yet been determined. Be sure to check the SEC's Interactive Data link at www.sec.gov to view the current status of the project.

.73 For more information on XBRL, visit the XBRL site at www.xbrl.org.

Recent Auditing and Attestation Pronouncements and Related Guidance

.74 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.75 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with GAAS)	This standard replaces SAS No. 61, *Communication With Audit Committees*. The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards*, to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120). • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
	• Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report.* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325 par. .01–.04), of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325 (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330 par .01–.06), of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
Statement of Position (SOP) 07-2, *Attestation Engagements That Address Specified Compliance Control Objectives and Related Controls at Entities That Provide Services to Investment Companies, Investment Advisors, or Other Service Providers* (AICPA, *Technical Practice Aids*, AUD sec. 14,430) Issue Date: October 2007 (Interpretive publication)	This statement addresses the application of SSAEs primarily to examination engagements in which a practitioner reports on the suitability of the design and operating effectiveness of a service provider's controls in achieving specified compliance control objectives. Examples of the service providers addressed by this SOP are investment advisers, custodians, transfer agents, administrators, and principal underwriters that provide services to investment companies, investment advisers, or other service providers.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice aid is a response to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice aid provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards") Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Preapproval of Nonaudit Services Related to Internal Control Over Financial Reporting* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Rules") Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Conforming Amendments to the Interim Auditing Standards (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards") Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, "Selected SEC-Approved PCAOB Releases") Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction • Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)

(continued)

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 400—Staff Audit Practice Alerts") Issue Date: December 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This practice alert highlights certain requirements in the auditing standards related to fair value measurements and disclosures in the financial statements and certain aspects of GAAP that are particularly relevant to the current economic environment.

The Auditor's Communication With Those Charged With Governance

.76 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees*. This SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and became effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.77 SAS No. 114 provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires that significant matters communicated with those charged with governance be documented.

Identifying Those Charged With Governance

.78 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.79 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.80 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.81 The ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which became effective for audits of financial statements for periods ending on or after December 15, 2006. SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. This SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion). Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2. However, with the adoption of PCAOB Auditing Standard No. 5 the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

Discussions With Management and Others

.82 The requirements of SAS No. 112 have changed perceptions regarding the auditor's role in the client's internal control in some circumstances. Auditors may have to continue to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm, other than the auditor, that does not provide attest services for the client can be part of a client's internal control. This may continue to raise questions regarding the role of outsourcing in achieving management's internal control objectives.

.83 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include in written communication significant deficiencies and material weaknesses that were identified and communicated in previous years, for as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.84 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented or detected and corrected, by the client.

Issues for Audits of Smaller Entities

.85 One issue that may arise in audits of smaller entities is the increase in time and costs the auditor may spend documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.86 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, or detecting and correcting, material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[1] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.87 The requirements of SAS No. 112 will continue to introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.88 The AICPA published Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides

[1] See Ethics Interpretation No. 101-3, "Performance of nonattest services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

AICPA Risk Assessment Standards

.89 The eight SASs referred to as the risk assessment standards (SAS Nos. 104–111) became effective for audits of financial statements for periods beginning on or after December 15, 2006, (earlier application was permitted), which means they are effective for 2007 calendar year audits. Although the SASs include many of the underlying concepts and detailed performance requirements contained in the standards they amend or supersede, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions.

Key Provisions of the Risk Assessment Standards

.90 Whether due to error or fraud, the risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs should have already been completed and has likely resulted in significant changes to firm audit methodologies and personnel training.

.91 The AICPA issued Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk), which can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. The AICPA has also issued a number of questions and answers based upon member inquiries in the fall edition of the *In Our Opinion* newsletter. That newsletter can be accessed at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion/.

Companion Audit Guide

.92 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors further understand the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.93 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.94 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.95 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.96 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.97 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.98 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf.

PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*

.99 In January 2008, the PCAOB adopted Auditing Standard No. 6, which will become effective 60 days after SEC approval. This standard and its related amendments update the auditor's responsibilities to evaluate and report on the consistency of a company's financial statements and align the auditor's responsibilities with FASB Statement No. 154, *Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3*. This standard also improves the auditor reporting requirements by clarifying that the auditor's report should indicate whether an adjustment to previously issued financial statements results from a change in accounting principle or the correction of a misstatement.

.100 In the same release, the PCAOB adopted several amendments to its interim standards relating to standards and interpretations of AU section 328, the AU 400 sections, AU section 508, and AU section 561 of the PCAOB's standards. In these amendments the PCAOB removed the GAAP hierarchy from its standards as it believes the hierarchy is more appropriately located in the accounting standards. FASB intends to incorporate the hierarchy into the accounting standards. For more information on the status of this adopted standard and its associated amendments, please visit www.pcaob.org.

PCAOB Auditing Standard No. 5

.101 The SEC approved Auditing Standard No. 5 on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scaleable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.102 This standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. For more information, readers may refer to *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.103 AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.104 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 160 (December 2007)	*Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*
FASB Statement No. 141 (revised 2007) (December 2007)	*Business Combinations*
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*

(continued)

Recent Accounting Pronouncements and Related Guidance	
FASB Interpretation No. (FIN) 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* FASB Staff Position (FSP) FIN 48-2, *Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises*, issued in February 2008, defers the effective date of FIN 48 for certain nonpublic enterprises, as defined in the FSP, to the annual financial statements for fiscal years beginning after December 15, 2007.
FASB Emerging Issues Task Force (EITF) Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF issues.
FASB Staff Positions (FSPs) (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA Statement of Position (SOP) 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* In February 2008, FASB issued FSP SOP 07-1-1, *Effective Date of AICPA Statement of Position 07-1*, which indefinitely defers the effective date of SOP 07-1 and prohibits adoption of the SOP for an entity that has not early adopted the SOP before issuance of this FSP. An entity that early adopted the SOP before issuance of this FSP, is permitted, but not required to continue to apply the provisions of the SOP. Entities that elect to retain their adoption of the guidance must all apply it to all consolidated entities going forward, including those formed or acquired after the adoption of SOP 07-1.
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.105 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the high-technology industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

Business Combinations

.106 In December 2007, FASB issued FASB Statement No. 141(R) and FASB Statement No. 160. These standards strive not only to improve and simplify the accounting for business combinations and the reporting of noncontrolling interests in consolidated financial statements, but also to converge with international standards. The issuance of these standards marks the completion of FASB's first major joint project with the IASB.

.107 FASB Statement No. 141(R) requires the acquiring entity in a business combination to recognize all the assets acquired and liability assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. FASB states that FASB Statement No. 141(R) will also decrease the complexity of existing GAAP because the new standard includes both core principles and application guidance, eliminating the need for other interpretive guidance. FASB Statement No. 141(R) is to be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply the standard before this date.

.108 FASB Statement No. 160 improves the relevance, comparability, and transparency of financial information by requiring all entities to report noncontrolling (minority) interests in subsidiaries in the same way—as equity in the consolidated financial statements. FASB Statement No. 160 also eliminates the diversity in accounting for transactions between an entity and noncontrolling interests by requiring they be treated as equity transactions. FASB Statement No. 160 is effective for fiscal years and interim periods within those fiscal years, beginning on or after December 15, 2008 (for calendar year end companies January 1, 2009). Earlier adoption is prohibited. The standard is applied prospectively as of the beginning of the fiscal year in which the statement is initially applied, except for the presentation and disclosure requirements. Presentation and disclosure requirements shall be applied retrospectively for all periods presented.

Fair Value Measurements

FASB Statement No. 157

.109 In September 2006, FASB issued Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.110 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

.111 In February 2008, the FASB issued FASB Staff Position (FSP) FAS 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13*, which amends FASB Statement No. 157, to exclude FASB Statement No. 13, *Accounting for Leases*, and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under FASB Statement No. 13. However, this scope exception does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under FASB Statement No. 141 or FASB Statement

No. 141(R), regardless of whether those assets and liabilities are related to leases. This FSP is effective upon the initial adoption of FASB Statement No. 157.

.112 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. However, in February 2008, FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which is effective upon issuance. This FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow the FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

FASB Statement No. 159

.113 Subsequent to the issuance of FASB Statement No. 157, FASB issued Statement No. 159. This statement is expected to expand the use of fair value measurement, which is consistent with FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.114 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

Deferral of FIN 48 for Certain Nonpublic Entities

.115 FIN 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, was issued in June 2006 and is effective for fiscal years beginning after December 15, 2006. However, subsequent to its issuance the FASB issued FSP FIN 48-2, *Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises*, which defers the effective date of FIN 48 for nonpublic enterprises included in the FSP's scope to the annual financial statements for fiscal years beginning after December 15, 2007. For the full text of FIN 48 and its associated FSPs visit the FASB's Web site.

On the Horizon

.116 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the high-technology industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.117 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.118 The ASB formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB issued a discussion paper titled *Improving the Clarity of ASB Standards*, seeking feedback on proposals to "clarify" its standards. In response to the feedback received on the discussion paper and subsequent discussions with interested parties, the ASB has established clarity drafting conventions and has undertaken to revise all of its SASs in accordance with those conventions. The clarity drafting conventions include the following:

- Establishing objectives for each of the standards, thereby providing a framework for the application of professional judgment
- Presenting application and other explanatory material in a separate section that follows the requirements
- Numbering application and other explanatory material paragraphs using an "A" prefix

- Cross-referencing introductory, objective, and requirement paragraphs to related application and other explanatory material paragraphs
- Using formatting techniques to enhance the readability of the SASs
- Including, where necessary, special considerations relevant to the audit of smaller, less complex entities within the text of the SAS
- Including, where necessary, any special considerations in the audit of governmental entities within the text of the SAS
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

Convergence With International Standards

.119 The ASB is working toward convergence with international auditing standards, whereby projects are developed concurrently with those of the International Auditing and Assurance Standards Board (IAASB). The ASB has created a number of task forces charged with monitoring specific activities of the IAASB, assisting the ASB in commenting on exposure drafts of International Standards on Auditing (ISA), and drafting proposed SASs using the ISA, including the international convention for wording, as the base standard. The status of ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.120 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer the issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of **Present Fairly in Conformity With Generally Accepted Accounting Principles**

.121 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to FASB's proposed Statement of Financial Accounting Standards *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal places responsibility for the GAAP hierarchy for nongovernmental entities in the accounting literature. Accordingly, the proposed SAS deletes the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]). The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with FASB's issuance of its final standards. As noted earlier in this alert, the PCAOB has already adopted its proposal to remove the GAAP hierarchy from its standards.

Auditing Pipeline—Issuers

.122 Guidance issued by the PCAOB is included in the section of this alert titled, "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.123 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Fair Value

.124 During phase one of FASB's fair value option project, FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the first quarter of 2008. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.125 In December 2006, FASB issued an exposure draft titled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and FASB completed its redeliberations of the exposure draft in December 2007. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133, including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. FASB expects to issue a final statement during the first quarter of 2008. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.126 FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, FASB issued the exposure draft *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During the second quarter of 2008, FASB expects to issue an amended exposure draft. See the FASB Web site for complete information.

Earnings Per Share

.127 FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and International Accounting Standard (IAS) Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB statements. Currently, FASB and IASB expect to issue an exposure draft for public comment during the first quarter of 2008. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

Income Taxes

.128 The objective of this project is to improve the accounting for income taxes and reduce the application differences between FASB Statement No. 109, *Accounting for Income Taxes*, and IAS Statement No. 12, *Income Taxes*. FASB plans to issue an exposure draft during the second quarter of 2008. Readers can track the project's progress on the FASB Web site.

GAAP Hierarchy

.129 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, FASB believes the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, which is responsible for selecting its accounting principles for financial statements. Accordingly, FASB concluded that the GAAP hierarchy should reside in the accounting literature established by FASB. FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.130 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.131 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.132 The following are various resources that practitioners engaged in the high-technology industry may find beneficial.

Publications

.133 Practitioners may find the following publications useful with respect to the high-technology industry:

- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2008) (product no. 012778kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics Alert—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)

- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.134 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.135 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.136 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.137 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.138 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.139 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.140 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.141 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.142 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9am to 8pm on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.143 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

AICPA CAQ

.144 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.145 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

Industry Web Sites

.146 The Internet covers a vast amount of information that may be valuable to auditors of high-technology enterprises, including current industry trends and developments. Some of the more relevant sites for auditors with high-technology clients include those shown in the following table:

Organization	*Web Site*
Semiconductor Industry Association	www.sia-online.org
Interactive Data Corporation (IDC)	www.idc.com
Forrester Research	www.forrester.com
Gartner Research	www.gartner.com
American Electronics Association	www.aeanet.org

.147 The high-technology practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.148 This Audit Risk Alert replaces *High-Technology Industry Developments—2006/07*.

.149 The Audit Risk Alert *High-Technology Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to zdonahue@aicpa.org or write to

Real Estate Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
REAL ESTATE INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of real estate organizations with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Kristy L. Illuzzi, CPA
Technical Manager
Accounting and Auditing Publications

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your real estate industry audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The real estate industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 basis points to 5.25 percent to consistently keep the spread between the primary credit rate and the federal funds rate at 50 basis points. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

Industry Trends and Conditions

.13 According to the Real Estate Roundtable,[1] more than 25 percent of inputs to GDP are generated by residential and commercial real estate. Real estate encompasses about $5 trillion worth of income-producing property and $15 trillion in owned-occupied housing and is a vitally important source of economic activity and tax revenue for government at all levels.

.14 As of the writing of this alert, the office, industrial, retail, and hospitality sectors are all showing signs of growth. In the office market, vacancy rates continue to fall, net absorption remains strong, and rents are on the rise in most areas. In the industrial sector, the market rebounded in the second quarter, and construction grew by 23 percent since 2006, which means demand is strong, especially for research and development (R&D) and flex space. The retail sector has seen some record breaking growth in 2007, although that is expected to decline in the later part of 2007.

.15 The residential market, however, is quite a different story, mainly due to the downturn in the housing market and ripple effect of the subprime lending crisis. The housing market continues to deteriorate and is not only slowing the economy directly, but may also cause consumers to decrease spending as a result of their anxiety about falling home prices. Also, there is growing concern that inflation may begin to accelerate

---

[1] The Real Estate Roundtable is an organization that brings together leaders of the nation's top public and privately held real estate ownership, development, lending, and management firms with the leaders of major national real estate trade associations to jointly address key national policy issues relating to real estate and the overall economy. For further information, visit their Web site at www.rer.org.

in our economy. High oil prices continue to add pressure to inflation, and long-term interest rates have begun to trend up recently. In addition, 2007 may be the first year in the last eight that Real Estate Investment Trusts (REITs) do not outperform other stock groups and indexes.

Industry Segment Conditions

Office Market Conditions

.16 The office market continues to recover from its downturn in the early 2000s. Vacancy rates continue to fall, net absorption remains strong, and rents are increasing in most markets. According to the commercial real estate services firm Grubb & Ellis Company, the U.S. office vacancy rate ended the second quarter of 2007 at 13 percent, its 13th consecutive quarterly decline. Net absorption of 21.2 million square feet was the highest since the fourth quarter of 2005, signaling that the expansion cycle is still in high gear.

.17 The average asking rent rose an impressive 12 percent for Class A space over the past 4 quarters and 8 percent for Class B space. The acceleration of Class A rates over the past year is a function of several forces, including tenant demand, the addition of new Class A properties that typically charge premium rates, and aggressive landlords who need to increase cash flow in order to meet their proformas for recently purchased properties. While Class A properties typically get the most attention, the acceleration of Class B rates over the past year is perhaps even more impressive because it shows that the current expansion cycle has filtered down to lesser quality (but still functional) properties.

.18 Markets with rent gains of more than 25 percent over the past four quarters include San Mateo, New York, Austin, Boston, San Francisco, and Houston. On the other hand, Class A rates fell 6.6 percent in Detroit, although the city did have several large lease transactions and positive net absorption in the second quarter of 2007.

.19 According to Grubb & Ellis Company, the outlook for the office market appears brighter now, in 2007, than it did just one year ago. The economy has continued to generate jobs, the primary driver of demand for office space, while corporate profits continue to exceed expectations. They predict the office vacancy rate will continue to fall over the next few quarters, while rental rates will continue to increase. The construction pipeline will slowly expand as developers and lenders tap into a landlord's market that is growing broader by the month.

Industrial Market Conditions

.20 According to Grubb & Ellis Company, the industrial market rebounded during the second quarter of 2007. Net absorption exceeded space completions by approximately 14 million square feet, enough to push the vacancy rate down another 10 basis points to 7.6 percent. Space under construction has increased 23 percent since year-end 2006 to 141 million square feet, suggesting that vacancy is unlikely to fall much further. In addition, asking rental rates were flat year-over-year for warehouse and distribution space and up by 10.3 percent for R&D and flex space.

.21 Among the major U.S. markets, second quarter vacancy was lowest in Los Angeles at a low 1.8 percent and the highest in Raleigh-Durham at 15.7 percent. Los Angeles has experienced a two percent or less vacancy rate for over one year thanks to exploding trade through the ports of Los Angeles and Long Beach and a very small supply of developable land. Although the Raleigh-Durham market has tightened in seven of the past eight quarters, vacancy remains high from the technology downturn several years ago.

.22 The average asking rental rate for warehouse and distribution space remains flat even though the industrial market is in an expansion cycle. There are several likely reasons for this: the massive construction pipeline; the migration of development farther from urban areas; and the fact that large distribution centers, which typically command lower per-square-foot rates than smaller properties, dominate the construction pipeline. The average asking rate for warehouse and distribution space available at mid-year was $4.47 per square foot per year, down 6 cents over the prior 4 quarters. Despite this overall decrease, there were some markets with net growth, including South Florida's Broward and Palm Beach counties and San Jose and Silicon Valley, California.

.23 Rental rates for R&D and flex space have risen consistently over the past 4 quarters, with the average asking rate rising to $10.33 as of June 2007, up 10.3 percent from a year ago. As office space rents continue to rise, more tenants are looking into R&D and flex space for lower rates.

.24 According to Grubb & Ellis Company, demand for distribution space will remain high, particularly around seaports, airports, and "inland ports" (multimodal logistics hubs). Even in smaller markets beyond the logistics hot spots, demand for industrial space should remain very strong.

Retail Market Conditions

.25 The last 12 months have seen record-setting retail sales and solid retail leasing activity. Retailers continue to expand, and shopping center construction is robust, particularly lifestyle centers, power centers, and mixed-use infill projects with a retail component. However, due to the economic downturn (which includes high gasoline prices, the slump in the housing market, and the related mortgage crisis), retail sales growth is expected to decline in the second half of 2007.

.26 Markets that continue to grow include Texas, Arizona, Nevada, New Mexico, and Southern California. Markets in Florida and the Southeast have been strong over the last five years and continue to expand. The struggling domestic auto industry is limiting the growth of consumer spending in the Great Lakes states.

.27 Overall, construction remains modest, leaving the national vacancy rate at just above seven percent. According to Colliers International, rents continue to increase at three percent to four percent per year, although certain prime retail strips registered rental increases well into the double digits. With this positive backdrop, investors have been rewarded with above average returns ranging from 10 percent to 30 percent for the past several years.

Residential Market Conditions

.28 The residential real estate market has probably experienced the most dramatic changes over the prior year. In 2006, after five years of record sales and growth, the market slowed, and since then the outlook for the residential housing market has appeared bleaker than ever. The market has been plagued with a drop in housing prices coupled with increased foreclosures and the subprime lending crisis.

.29 The number of foreclosure filings reported in the United States in August 2007 more than doubled the number in August 2006 and jumped 36 percent from July 2007. This trend signals that many homeowners are increasingly unable to make timely payments on their mortgages. According to RealtyTrac Inc., a total of 243,947 foreclosure filings were reported in August 2007, up 115 percent from 113,300 in the same month a year ago. The August 2007 total represents the highest number of foreclosure filings reported in a single month since the company began tracking monthly filings two years ago. There was one foreclosure filing for every 134 U.S. households during the first half of the year according to RealtyTrac's midyear report. Nevada, California, and Florida had the highest foreclosure rates in the country in August. The Mortgage Bankers Association reports that 550,000 homeowners with subprime loans began a foreclosure process over the last year, and specialists say that number could double in the next couple of years. In October 2007 alone, more than $50 billion in adjustable rates mortgages (ARMs) will reset.

.30 To provide further insight as to how dramatic these interest rate changes could be on these ARMs, consider the following example. A buyer in 2005 with poor credit and limited means might have signed on for a $200,000 2/28 hybrid ARM, locking in a fixed rate of 4 percent for a period of 2 years. After paying $955 a month, his or her monthly mortgage would now be set to spike to $1,331, a 39 percent increase.

.31 To better understand the dramatic increase in foreclosure activity, it is important to reflect back a couple of years to when the problems began. During the height of the housing boom in 2005 and 2006, lending institutions were offering subprime loans and ARMs that initially have low "teaser" interest rates but then adjust upward. In addition, many lending institutions had loosened their lending policies, and recently some have been charged with falsification of loan documents or lack of support for borrower's income. Builders have also been blamed for some of the foreclosures, mainly due to their increased involvement in the mortgage business. In a rush to fill vacancies for new construction, builders were offering loans that were more than potential homeowners could afford. Several construction companies have also recently been accused of falsifying mortgage documents or not having proper support for homeowner's income. This has led to the closing of many financial institutions and construction companies and has forced some financial institutions to borrow from the Federal Reserve.

.32 More than half a dozen residential lenders have declared bankruptcy in 2007 as defaults spilled over from subprime borrowers with the worst repayment records to those with more reliable payment histories. For the year, the widely followed KBW Bank Index of the 24 largest lenders has fallen 10 percent and has caused a shakeup in the S&P 500 Index. Subprime mortgage industry shares make up 20 percent of the S&P 500 stock index. Without those shares, through July the S&P 500 would have been up by 5.6 percent in 2007. Instead, it has only grown by 2.6 percent.

.33 Since the start of the year, more than 40,000 workers have lost their jobs at mortgage lending institutions according to recent company layoff announcements and data compiled by global outplacement firm Challenger, Gray & Christmas, Inc. Meanwhile, construction companies have announced nearly 20,000 job cuts this year, and the National Association of Realtors (NAR) expects membership rolls to decline this year for the first time in a decade.

.34 To add more fuel to the real estate fire, U.S. home prices are on the decline. In the second quarter of 2007, prices fell at a faster rate than in the first quarter (down 3.2 percent from the same period in 2006), as reported by Standard and Poor's in August 2007. This marked the largest year-over-year decline ever recorded in the 20-year history of the Case-Shiller home price index. The Case-Shiller index, which tracks multiple sales of the same homes, is considered by many observers to be the best gauge of national and metro real estate values. Falling prices make it more difficult for homeowners to tap into their home equity or refinance their mortgages.

.35 The housing crisis has also taken its toll in the multifamily arena. According to the latest results of the Multifamily Condo Market Index, builder confidence in the condominium housing market eroded significantly in the first half of 2007. In many areas, buildings constructed as condos are being turned into rentals because the slow housing market is forcing some owners to rent. In addition, many single family homes are now available for rent, which is also affecting the multifamily market.

.36 In the multifamily rental market, vacancy rates are projected to average 5.8 percent in the fourth quarter of 2007, almost unchanged from 2006. According to NAR, average rent should increase 2.1 percent in 2007 after a 4.1 percent increase in 2006.

.37 In summary, the residential real estate market is in a period of uncertainty, leaving some with the feeling that we have yet to hit bottom. If you have clients involved in the residential market or with significant residential holdings, pay particular attention to the information included in this alert and how these economic and industry conditions may affect your client and your audit. In addition, if you have clients that are also involved in construction, you should consult the Audit Risk Alert *Construction Contractors Industry Developments—2007/08* (product no. 022318kk).

Hospitality Market Conditions

.38 According to Lodging Econometrics (LE), the industry authority for hotel real estate, for the first half of 2007, the total pipeline has grown by 643 projects, which represents a 15 percent increase. Projects under construction and those scheduled to start in the next 12 months are also at cyclical highs. Small imbalances are already visible in some resort locations and in a number of the top 25 markets. For the first 5 months of 2007, 14 of the top 25 markets show supply growth exceeding demand growth. Eleven of those markets also show 2007 room occupancy less than 2006 for the comparable period. LE predicts that when the pipeline begins to unfold this fall, first with smaller mid-market properties, supply and demand imbalances will initially surface at highway and outer suburban locations in smaller cities. Late in 2008, imbalances are likely to appear in the inner suburbs due to an influx of larger, select-service hotels. In addition, 2008 may usher in a number of new mega casino projects, particularly in Las Vegas.

.39 According to Smith Travel Research, a leader in lodging industry tracking and analysis, industry occupancy reached 66.8 percent in the 3 months ending June 2007, up 0.4 percent compared with the second quarter of 2006. The second quarter average room rate gained 5.4 percent to $103.07, and revenue per available room (the combination of occupancy and average room rate and a key industry productivity measure) increased 5.7 percent to $68.90.

REIT

.40 The year 2007 could end up being the first year out of the last eight that REITs do not outperform all other stock groups and indexes. Year-to-date through September 30, 2007, the FTSE National Association of Real Estate Investment Trust (NAREIT) All REIT Index[2] fell by 1.63 percent. Naturally, the mortgage sector has been the hardest hit, posting losses of 41.52 percent year-to-date according to the FTSE NAREIT Mortgage REIT Index. However, some economists seem to think the REIT Index will pick back up in the second half of 2007 and still end up outperforming stocks for the year.

.41 The privatization of REITs is a trend that has continued in 2007. Globally, the United States has seen approximately $1.9 billion in property transactions since 2003. In 2004, privatizations accounted for approximately 2 percent of all transactions; in 2006, that figure rose to 57 percent. One of the largest acquisitions of the year was the purchase of Equity Office Properties Trust by the Blackstone Group for $39 billion. Equity Office Properties Trust was the largest publicly traded owner and manager of office properties in the United States by square footage. Interestingly enough, Blackstone has announced its plans to go public with a $4 billion offering in 2007. This initial public offering would be the first of the major private equity firms to go public. It will be interesting to see if any other private equity firms follow suit. In the past, private equity firms have stayed away from going public due to the additional regulations and disclosures required by the Securities and Exchange Commission (SEC).

Legislative and Regulatory Developments

The Federal Government in Real Estate

.42 In August 2007, the federal government stepped in with a plan to expand federal backing of mortgages in hopes of helping homeowners avoid foreclosure. The bill, which passed the House 348 to 72, would allow the Federal Housing Administration, which insures mortgages for low- and middle-income

[2] The FTSE National Association of Real Estate Investment Trust (NAREIT) All REIT index includes all tax-qualified REITs listed on the New York Stock Exchange, American Stock Exchange, and NASDAQ National Market List.

borrowers, to back refinanced loans for tens of thousands of borrowers who are delinquent on payments because their mortgages are resetting to sharply higher rates from the low initial "teaser" rates mentioned previously in this alert. The measure is Congress' first stand-alone bill in response to the mortgage market crisis. In September, the Senate also passed spending legislation that includes $200 million to provide aid to nonprofits and other groups that offer counseling and information to help homeowners avoid foreclosure.

.43 In September 2007, the Office of Federal Housing Enterprise Oversight, which oversees Fannie Mae and Freddie Mac, agreed to allow both companies to buy more subprime loans, which will result in more loans being available to borrowers and homeowners who are having problems refinancing their mortgage. The NAR President predicts that "with reduced housing prices and increased housing inventory, interest rates that are near historic lows, and now with Fannie's and Freddie's increased ability to lend, we may see positive movement in the housing market."

Audit and Attestation Issues and Developments

Going Concern Considerations

.44 The concept that financial statements are prepared on the basis of a going concern is one of the basis tenants of financial accounting. Some examples of indicators that there could be substantial doubt about the ability of the entity to continue as a going concern would include the following:

- Negative trends such as recurring operating losses, working capital deficiencies, or negative cash flows from operating activities
- Other indications of financial difficulties such as loan covenant violations or denial of usual trade credit from suppliers and denial of surety credit
- Internal matters such as turnover in key positions such as CFO, controller, or other key management or substantial dependence on the success of a particular investment or project
- External matters such as legal matters or an uninsured catastrophe

.45 In addition to these matters, the current uncertain economic situation, especially as it relates to residential real estate, may cause you to have a heightened sense of awareness of a company's ability to continue as a going concern. AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), addresses your responsibilities to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern.

Using the Work of a Specialist

.46 It may be necessary to use a specialist (such as a real estate appraiser) to perform or assist in valuing properties or other audit procedures. Engaging a specialist for gaining an understanding of internal controls, tests of controls, substantive tests, and analytical procedures requires awareness of guidelines available in the authoritative literature. According to paragraph .06 of AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), specialized assistance is advisable for auditors who "may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate audit evidence."

.47 However, use of an outside specialist does not absolve you from a certain level of understanding about the real estate appraiser or other specialist. Use of a specialist must be considered during audit planning because of, among other reasons, the lead time necessary to contract for a specialist's services and the time required for you to obtain the knowledge necessary to supervise the specialist.

.48 The use of a specialist is an excellent way to learn the real estate company's business and can be helpful in initial planning through site visits and fieldwork.

Accounting Issues and Developments

SEC Staff Position on Subprime Loans

.49 In a letter issued on July 24, 2007, the SEC Chairman responded to Congressman Frank's inquiry about the potential impact of Financial Accounting Standards Board (FASB) Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125,* on the mortgagor's ability to make loan modifications to forbear foreclosure. The letter provides the SEC staff position that, "consistent with general agreement in practice, such loan modifications would not result in a requirement for entities to account for those securitized assets on their balance sheets. In this case, modifications undertaken when loan default is reasonably foreseeable should be consistent with the nature of modification activities that would have been permitted if a default had occurred." More specifically, Congressman Frank and other members of Congress asked SEC Chairman Cox to answer the following question.

> *Does FASB Statement No. 140 clearly address whether a loan held in trust can be modified when default is reasonably foreseeable or only once a delinquency or default has already occurred? If not, can it be clarified in a way that will benefit both borrowers and investors?*

.50 In the reply to Congressman Frank, SEC Chairman Cox included an SEC staff memorandum prepared by the SEC's Office of the Chief Accountant that addresses the issue and describes a June 22, 2007, educational forum that the FASB hosted at the request of SEC staff. There was general agreement among participants at the forum that, subject to certain constraints, the ability to restructure mortgages when default is reasonably foreseeable is an activity that is not inconsistent with the notion of continued off-balance sheet accounting treatment. The SEC staff memorandum also provides the staff's current view that additional interpretive guidance is not necessary to clarify the application of FASB Statement No. 140 to the contemplated types of securitized mortgage loan work-out activities.

.51 Congressman Frank's letter of inquiry can be found at www.house.gov/apps/list/press/financialsvcs_dem/061507_frank_letter_to_cox_re_fas_140.pdf, and the SEC response can be accessed on the United States House of Representatives Web site at www.house.gov/apps/list/press/financialsvcs_dem/sec_response072507.pdf.

.52 In response, Senator Schumer wrote a letter addressed to the Big Four auditing firms urging them to advise their clients on the SEC's and FASB's recent guidance on subprime loans. He stressed how serious the damage from this crisis can be and how important it is to find effective solutions. He noted that the number of national foreclosures is up 93 percent from last year, and in certain struggling regional housing markets, "increased foreclosures will put additional downward pressure on housing prices, which if continued, could contribute to severe price declines and disclosures." He cites that while the SEC's and FASB's positions on FASB Statement No. 140 as it applies to loan modifications should now be clear, he is concerned that many of the investors holding securitized mortgage assets are continuing to cite FASB Statement No. 140 as a reason to avoid loan modifications and refinancing. Senator Schumer's letter can be accessed at the Center for Audit Quality (CAQ) Web site at www.thecaq.org/newsroom/pdfs/Schumer_082307.pdf.

Buy-Sell Clauses

.53 In October 2007, the FASB ratified and published for public comment a draft abstract, Emerging Issues Task Force (EITF) Issue No. 07-6, *Accounting for the Sale of Real Estate Subject to the Requirements of FASB Statement No. 66,* Accounting for Sales of Real Estate*, When the Agreement Includes a Buy-Sell Clause*. A buy-sell clause is designed to incorporate into the transaction price the natural tension between the interests of both investors in a buy-sell situation and thereby achieve an acceptable outcome for both investors without protracted negotiations over fair value and the need for binding arbitration to resolve disputes. Furthermore, the buy-sell clause provides investors with an exit strategy for closely held investments. The issue is whether an irrevocable buy-sell clause represents a prohibited form of continuing involvement that would preclude partial sale and profit recognition pursuant to FASB Statement No. 66.

.54 The draft abstract can be found on the FASB Web site at www.fasb.org/eitf/eitfissu.shtml#07-6. Comments were due back by October 22, 2007. Readers should remain alert to developments relative to this exposure draft.

Accounting for Leases

.55 Many have wondered how the new fair value standards issued by the FASB may affect lease accounting. At its September 26, 2007, meeting, the FASB made the following decision related to the impact of FASB Statement No. 157, *Fair Value Measurements,* on leases.

.56 The FASB added a project to its agenda to address issues related to the interaction between FASB Statement No. 13, *Accounting for Leases*, and FASB Statement No. 157. The FASB discussed the initial fair value measurements used for determining lease classification when the lessor is not a manufacturer or dealer and how to apply the fair value measurement objective in FASB Statement No. 157 to estimated residual values. The FASB directed its staff to proceed to a draft of a proposed FASB Staff Position (FSP) for vote by written ballot that would amend the scope of FASB Statement No. 157 to exclude FASB Statement No. 13 and its related interpretive accounting pronouncements. Readers should remain alert to developments.

Recent Auditing and Attestation Pronouncements and Related Guidance

.57 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.58 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit, and also establishes standards and provides guidance on which matters should be communicated, who they

(Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50)	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends

(continued)

Issue Date: November 2006	the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive

Revised: June 2007 (Nonauthoritative)	confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.
PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.

(continued)

PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 300—Report on the Initial Implementation of Auditing Standard No. 2") Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction • Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)
PCAOB Staff Questions and Answers, *Auditing the Fair Value*	The guidance provides direction for auditing a company's estimation of the fair value of stock

of Share Options Granted to Employees (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.59 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.60 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.61 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.62 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.63 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol.

1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.64 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.

- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.65 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses and that are then communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.66 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.67 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.68 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.69 One issue that has arisen in audits of smaller entities is the increase in costs as a result of time the auditor spends documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.70 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[3] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.71 The requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their

---

[3] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.72 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.73 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).

SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.74 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.75 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.76 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.77 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.78 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.79 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.80 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.81 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information that it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.82 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scaleable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "the new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.83 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.84 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.85 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*

TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.86 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the real estate industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

Fair Value Measurements

FASB Statement No. 157

.87 In September 2006, the FASB issued FASB Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.88 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying generally accepted accounting principles (GAAP). FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

FASB Statement No. 159

.89 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159

allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.90 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA CAQ issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

On the Horizon

.91 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the real estate industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.92 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.93 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.94 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.95 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.96 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the

PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.97 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.98 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.99 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.100 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.101 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.102 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.103 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.104 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.105 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.106 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.107 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.108 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, which is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.109 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.110 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.111 The following are various resources that practitioners engaged in the real estate industry may find beneficial.

Publications

.112 Practitioners may find the following publications useful with respect to the real estate industry:

- Audit and Accounting Guide *Common Interest Realty Associations* (2007) (product no. 012577kk)
- Audit and Accounting Guide *Construction Contractors* (2007) (product no. 012587kk)

- Audit and Accounting Guide *Use of Real Estate Appraisal Information* (1997) (product no. 013159kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Construction Contractors Industry Developments—2007/08* (product no. 022318kk)
- Audit Risk Alert *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics Alert—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist Supplement and Illustrative Financial Statements—Real Estate Ventures* (product no. 008977kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.113 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz. com.

Continuing Professional Education

.114 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.115 Among the many courses, *Real Estate Accounting and Auditing* (product no. 730607kk) is specifically related to the real estate industry. This course provides an in-depth study of the unique requirements that apply at each stage of the real estate life cycle.

.116 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.117 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the real estate industry include the following:

- *Auditing Real Estate Transactions*
- *Accounting for the Impairment of Completed Real Estate Projects*
- *Accounting for the Sale of Real Estate Assets*
- *Introduction to the Real Estate Valuation Process*
- *Planning the Audit of a Real Estate Entity's Financial Statements*
- *Real Estate Accounting and Auditing*

.118 To register or learn more, visit www.cpa2biz.com.

Webcasts

.119 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.120 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.121 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.122 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.123 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (877) 242-7212.

Ethics Hotline

.124 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.125 The AICPA sponsors an annual National Real Estate Conference in the fall. The National Real Estate Conference is a two-day conference designed to update attendees on recent developments related to current hot issues in real estate. It is designed to update attendees on recent developments related to real estate accounting and auditing, tax, and management issues. It delivers solid news about the emerging trends in the real estate market while offering new ideas for the accounting and financial management of the real estate industry. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA CAQ

.126 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.127 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

Industry Web Sites

.128 The Internet covers a vast amount of information that may be valuable to auditors of real estate entities, including current industry trends and developments. Some of the more relevant sites for auditors with real estate clients include those shown in the following table.

Organization	Web Site
Colliers International	www.colliers.com
Grubb & Ellis Company	www.grubb-ellis.com
Hospitality Trends	www.htrends.com
Institute of Real Estate Management	www.irem.org

Organization	**Web Site**
Lodging Econo*metrics*	www.lodging-econometrics.com
National Association of Realtors	www.realtor.org
National Association of Real Estate Investment Trusts	www.nareit.com
National Multi Housing Council	www.nmhc.org
Reis, Inc.	www.reis.com
The Real Estate Roundtable	www.rer.org
Torto Wheaton Research	www.twr.com
Urban Land Institute	www.uli.org

.129 The real estate practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

Government Auditing Standards *and Circular A-133 Audits—2007*

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
***GOVERNMENT AUDITING STANDARDS* AND CIRCULAR A-133 AUDITS—2007**

This Audit Risk Alert is intended to provide auditors who perform audits under *Government Auditing Standards* or Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, with an overview of recent industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

AICPA Staff

Christopher Cole, CPA CFE
Technical Manager
Accounting and Auditing Publications

Susan Reed

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits conducted in accordance with *Government Auditing Standards* (GAS or the Yellow Book) or Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133). Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 It is important that you understand what is happening in the *Government Auditing Standards* and OMB Circular A-133 arena if you perform Yellow Book or Circular A-133 audits. This alert assists you in making considerable strides in gaining an understanding of key developments regarding those audits.

.03 Readers of this alert may also find the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk) useful. Further, if you are also performing a financial statement audit of a state, local government, or not-for-profit organization, you should also refer to the following Audit Risk Alerts:

- AICPA Audit Risk Alert *State and Local Governmental Developments* (2007) (product no. 022437kk)
- AICPA Audit Risk Alert *Not-For-Profit Organizations Industry Developments* (2007) (product no. 022427kk)
- AICPA Audit Risk Alert *Health Care Industry Developments* (2007/08) (product no. 022346kk)

.04 These alerts can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in these alerts.

.05 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity, Its Federal Programs, and Assessing the Risks of Material Noncompliance

.06 As noted in SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), an auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. The Audit Risk Alerts titled, *State and Local Governmental Developments* (2007), *Not-For-Profit Organizations Industry Developments* (2007/08), and *Health Care Industry Developments* (2007/08), further discuss the auditor's responsibilities in this area for a financial statement audit.

.07 In a Circular A-133 audit it is also important to understand the entity subject to single audit and its federal programs, including its internal control over compliance with those programs, to assess the risk of material noncompliance, and to design the nature, timing, and extent of further audit procedures. One of the auditor's initial tasks in the planning process of as single audit is determining whether management has properly defined the entity to be audited. Paragraph 6.11 of the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* (GAS/A-133 Guide) provides additional information on defining the entity to be audited, including the option for auditees to meet the requirements of the circular through a series of audits that cover an auditee's departments, agencies, and other organizational units that expended or otherwise administered federal awards during a fiscal year.

.08 Further, Circular A-133 requires the auditee to maintain internal control over compliance for federal programs that provides reasonable assurance that the auditee is managing federal awards in compliance with laws, regulations, and the provisions of contracts or grant agreements that could have a material effect on each of its federal programs. The auditor is required to perform procedures to obtain an understanding of internal control over compliance that is sufficient to plan the audit to support a low assessed level of control risk for major programs. The auditor needs to understand the assertions relevant to the compliance requirements for each major program. In obtaining the understanding, the procedures performed should provide sufficient knowledge of both the design of the relevant controls pertaining to each of the five internal control components (that is, control environment, risk assessment, control activities, information and communication, and monitoring) and whether they have been placed in operation. The auditor ordinarily obtains this knowledge through previous experience with the entity and through such procedures as inquiries of appropriate management, supervisory, or staff personnel; an inspection of the entity's documents and records; and his or her observation of the entity's activities and operations. Chapter 10 of the GAS/A-133 Guide further discusses the auditor's consideration and testing of internal control over compliance for major programs.

.09 Finally, because Circular A-133 requires the auditor to determine whether the auditee has complied with laws, regulations, and the provisions of contracts or grant agreements that may have a direct and material effect on each of its major federal programs, the auditor should assess not only the risk that noncompliance may cause the financial statements to contain a material misstatement, but also the risk that noncompliance may have a material effect on each of its major programs. Chapter 8 of the GAS/A-133 Guide discusses audit risk as it relates to the compliance auditing of major programs.

Industry Developments

.10 From the standpoint of the federal user, audits conducted under Circular A-133 are a key accountability mechanism for the expenditure of taxpayer dollars. Recently, the results of a federal study on single audit quality were issued by the President's Council on Integrity and Efficiency (PCIE) and Executive Council on Integrity and Efficiency. The report titled, *Report on National Single Audit Sampling Project* (the PCIE report), identifies single audit quality deficiencies and shows that improvements are needed. The types of audit quality issues identified in the PCIE report are also consistent with the types of issues found in peer reviews of firms doing single audits and in investigations performed by the AICPA Professional Ethics Division (see "Other Reviews Indicate Continued Problems in GAS and Single Audits" in this alert).

.11 Consequently, as an auditor that performs single audits, you should review the PCIE report in detail to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices. Further discussion of the results of the federal study is included in, "Results of Federal Study on Single Audit Quality" in this alert.

Legislative and Regulatory Developments

.12 This section sets forth recent changes to relevant regulatory, legislative, and other guidance affecting GAS and Circular A-133 audits. In addition, it provides information on other legislative and regulatory developments.

Results of Federal Study on Single Audit Quality

.13 The long-awaited federal study on the quality of audits performed under OMB Circular A-133 was issued on June 22, 2007. This section presents a background of the study, a summary of findings, a listing of some deficiencies noted, report recommendations, and highlights the AICPA and its Governmental Audit Quality Center's (GAQC) next steps to responding to the report.

.14 *Background.* Several years ago, a group of federal Offices of Inspectors General (OIGs), along with three state auditor's offices, decided to work together to develop a statistically based measure of single audit quality (the Project). The U.S. Department of Education served as the project leader. The project had two primary goals:

- Determine the quality of single audits and establish a statistically based measure of audit quality
- Recommend changes in single audit requirements, standards, and procedures to improve the quality of single audits

.15 To accomplish these goals, the OIGs conducted quality control reviews (QCRs) of a statistical sample of 208 audits randomly selected from approximately 38,000 audits submitted to and accepted by the Federal Audit Clearinghouse (FAC) between April 1, 2003 and March 31, 2004. Generally, the audits reviewed were from the 2002–2003 timeframe and, in some cases, earlier. The sample was split into two strata. Stratum I included audits of entities with $50 million or more of total federal expenditures. Stratum II included audits of entities with at least $500,000 but less than $50 million of total federal expenditures.

.16 The scope of the project covered portions of the single audit relating to the planning, conduct, and reporting of audit work related to the review and testing of internal controls and compliance testing pertaining to compliance requirements for selected major federal programs. Documentation of audit work for up to three major programs for each audit was reviewed. Further, the review included audit work performed on the Schedule of Expenditure of Federal Awards (SEFA) and the content of all of the auditors' reports on the federal programs. The scope did not include a review of the content of, or the audit work performed, related to the general-purpose financial statements, the auditor's opinion on those statements, or the auditors' review of internal control over financial reporting.

.17 *Summary of Findings.* The issues and deficiencies identified in each QCR were compiled, and each engagement was then classified into one of three groupings. The groupings are defined as follows:

- Acceptable: No deficiencies were noted, or one or two insignificant deficiencies were noted. In some cases, the acceptable audits had deficiencies with applicable auditing criteria noted, which did not require corrective action, but should be corrected going forward.
- Limited Reliability: Significant deficiencies with applicable auditing criteria were noted and require corrective action to afford unquestioned reliance upon the entire audit.
- Unacceptable: Deficiencies were so serious that the auditor's opinion on at least one major program cannot be relied upon or a material reporting error was noted requiring that the report be reissued in order to be relied upon by users, or both.

.18 The PCIE report clearly shows that improvements are needed in many areas. The tables shown below summarize the overall results and results by stratum. In addition to providing results by the number of audits reviewed, the OIGs also analyzed the results in relation to the dollar amounts of federal awards reported in the audits reviewed. Results in relation to dollar amounts reported in the audits reviewed show a much higher percentage of acceptability. The following tables show the results for both strata combined and then the results of Stratum I and Stratum II individually.[1]

TOTAL SAMPLE (STRATA I & II)				
	Acceptable	***Limited Reliability***	***Unacceptable***	***Total***
Sampled Audits	115	30	63	208
% of Audits	49%	16%	35%	100%
% of Federal $	93%	2%	5%	100%
STRATUM I (>$50 Million in Federal Expenditures)				
	Acceptable	***Limited Reliability***	***Unacceptable***	***Total***
Sampled Audits	61	12	23	96
% of Audits	64%	12%	24%	100%
% of Federal $	93%	2%	5%	100%

[1] The report indicates the confidence parameter was 90 percent, and the precision parameters ranged between plus or minus 2.1 and 7.9 percentage points.

STRATUM II ($500 Thousand–$50 Million in Federal Expenditures)				
	Acceptable	***Limited Reliability***	***Unacceptable***	***Total***
Sampled Audits	54	18	40	112
% of Audits	48%	16%	36%	100%
% of Federal $	56%	10%	34%	100%

.19 *Deficiencies Identified.* The PCIE report goes into detail regarding the deficiencies noted on the audits reviewed. The following presents a brief summary of deficiencies identified:

- Misreporting of audit coverage of major federal programs
- Unreported audit findings
- Compliance testing not documented as performed or not applicable
- Deficiencies in understanding and testing of internal control over compliance
- Deficiencies in risk assessments as part of major program determination
- Missing audit finding information
- Deficiencies in presentation and auditing of the SEFA
- Management representations related to federal awards missing or misdated
- Consideration of audit materiality at the major federal program level not documented
- Other kinds of deficiencies (described in Appendix A of the report)

.20 *PCIE Report Recommendations.* The PCIE report proposes a three-pronged approach for reducing the deficiencies noted and to improve the quality of single audits. The recommendations in the report are directed to various organizations including the OMB and other federal agencies, the AICPA, and other single audit stakeholders. A summary of the recommendations is as follows:

- Revise and improve single audit criteria, standards, and guidance to address deficiencies noted in the report. Specific recommendations are described throughout Part II and the "Other Matters" sections of the PCIE report and include recommendations for revisions to Circular A-133 and, in some cases, additions or clarifications to AICPA auditing standards and the GAS/A-133 Guide.
- Establish minimum requirements for completing comprehensive single audit training as a prerequisite for conducting such audits (the report suggests at least 16–24 hours) and thereafter, require single audit update training for continued performance of single audits.
- Review and enhance processes to address unacceptable audits and not meeting established training and continuing professional education requirements. This includes (*a*) reviewing the process of suspension and debarment; (*b*) identifying ways that the AICPA and State Boards of Accountancy can further the quality of single audits and address due professional care issues; and (*c*) identifying, reviewing, and evaluating the potential effectiveness of other ways to address unacceptable audits (these other ways could include sanctions to be applied to auditors or fines, or both).

.21 *Next Steps.* The AICPA shares the commitment of the federal agencies involved in the project to improving the quality of single audits. Many of the audits reviewed were performed 4–5 years ago, and the AICPA is hopeful that many endeavors over the last several years (for example, the launch of the GAQC) have already begun to address some of the issues raised in the PCIE report.

.22 However, auditors should take this report very seriously and read the PCIE report in its entirety to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices.

.23 The AICPA and the GAQC Executive Committee and GAQC staff will be working closely with the federal government on a go-forward basis to address the PCIE report recommendations. During the course of the next year, auditors should watch the GAQC Web site at www.aicpa.org/GAQC for updates on initiatives undertaken by the AICPA and others in response to the PCIE report.

> **Help Desk—**To access the PCIE report go to the following Web site: www.ignet.gov/pande/audit/NatSamProjRptFINAL2.pdf.

Other Reviews Indicate Continued Problems in GAS and Single Audits

.24 In addition to the PCIE report, the GAQC Web site contains a summary of common deficiencies noted in audits conducted in accordance with GAS and Circular A-133 and found during recent peer reviews and AICPA Professional Ethics Division investigations of CPA firms. A sampling of those deficiencies is included below. You should consider reviewing your firm's policies and procedures to determine whether your GAS and Circular A-133 audits might have these types of issues.

- Audit organizations did not submit their peer review report to required parties.
- The engagement team did not meet the *Government Auditing Standards* or state licensing board continuing professional education (CPE) requirements.
- The auditor used inadequate or outdated reference material related to the engagement performed. Be sure to be familiar with new SASs and accounting standards that are issued. Further, you should ensure that you are using the most up-to-date versions of the *Compliance Supplement*, Yellow Book, and the GAS/A-133 Guide.
- The auditor did not use written audit programs or failed to tailor the audit programs for specialized industries or for specific transactions or balances (such as significant inventory and receivable balances).
- Audit documentation did not evidence when appropriate (1) the auditor's consideration of the existence of an internal audit function or the use of service organizations; (2) the auditor's reliance on the work of other auditors or of specialists; (3) the auditor's consideration of the client's internal control structure, the effect of the use of information technology on internal control, or the effect of internal control on substantive procedures; (4) the required communications between predecessor and successor auditors; and (5) adequate or complete documentation regarding engagement planning.
- In Circular A-133 audits, internal control and compliance tests were not always adequately documented to support the reports issued. In some cases the auditor did not document that an auditee was considered a low-risk auditee (to support the reduced testing that was performed). Further, in a few other cases, items such as the subsequent events review and litigation follow-up were not documented. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), provides guidance on the content, retention, and confidentiality of audit documentation as required by generally accepted auditing standards (GAAS). Among other things, AU section 339 requires audit documentation to be sufficient to enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent, and results of auditing procedures performed and the evidence obtained. *Government Auditing Standards* includes an additional standard that requires audit documentation to contain sufficient information to enable an experienced auditor having no previous connection with the audit to ascertain the evidence that supports the auditor's significant conclusions and judgments. You should keep these AU section 339 and *Government Auditing Standards* requirements in mind when you are preparing your audit documentation. It is possible that problems with audit documentation could be the root of many of the other problems discussed in this section.

- The auditor did not assess the level of materiality or control risk.
- The auditor did not perform or document risk assessments for each of the five components of internal control or at the assertion level for major account balances or transaction classes.
- The auditor did not assess or document the risk of fraud, did not make appropriate inquiries, or did not adequately consider fraud risks in designing audit procedures.
- The auditor did not apply proper sampling techniques.
- Audit documentation did not indicate the disposition of prior audit findings and proper consideration of current potential significant deficiencies and other findings.
- The auditor failed to identify or address the client's incorrect application of generally accepted accounting principles (GAAP) or inadequate financial statement disclosure.
- The auditor did not request a legal representation letter when the client consulted an attorney and, in some cases, did not obtain a client management representation letter or did not include appropriate engagement-specific representations within the letter.
- The engagement letter did not include proper references to Circular A-133 requirements or record retention policies or include a copy of the latest peer review report.
- The auditor's reports did not conform to reporting requirements. For example, the reports omitted required wording or did not appropriately address other information accompanying the basic financial statements.
- Not all auditors are including all of the required finding elements in describing their findings for both GAS and Circular A-133 purposes. Among the required elements being left out of findings with respect to Circular A-133 are the Catalog of Federal Domestic Assistance (CFDA) number, federal award number, and year for each federal program. Chapter 5 of *Government Auditing Standards* and section 510(b) of Circular A-133 describes each of the elements that should be included in your findings. You should ensure that each of your findings contain the required elements.
- The auditor failed to audit as major programs type A programs not qualifying as low risk. Circular A-133 requires a type A program to be audited as a major program unless it qualifies as a low-risk program. For a program to be considered low risk, it must, among other criteria, have been audited as a major program in at least one of the two most recent audit periods. Auditors have made errors in applying this criterion. No auditor judgment is permitted in evaluating this historical two-year look-back criterion, and the reason a type A program was not audited in the prior two audit periods is irrelevant. Errors often occurred when a type A program was not audited in the first year it became a type A program (for example, a new program or a program that had previously been type B).
- The auditor failed to audit type A programs as major because of errors made in determining the type A/type B program dollar threshold.
- The auditor failed to audit all programs included in a cluster of programs. *Clusters* are defined in Part 5 of the supplement "Clusters of Programs," and should be considered as one program in determining major programs. Auditors made errors in identifying programs as part of a program cluster.
- The auditor failed to meet the percentage-of-coverage requirement in Circular A-133, section 520(f). The percentage-of-coverage requirement is applied as the last step in the risk-based approach and must always be met. At least one program must always be audited as a major program. In some cases, there were errors in the reviewed audits' compliance with the percentage-of-coverage requirement.
- Sometimes the Circular A-133 report was not modified when it appeared that it should be. In other words, an unqualified opinion was provided when there were material instances of noncompliance. When the audit of an auditee's compliance with requirements applicable to a major program detects material instances of noncompliance with those requirements, you should express a qualified or adverse opinion. You should also consider whether the noncompliance is the result of a related reportable condition or material weakness and, if so, report it in the Circular A-133 reports.

- In some cases, the required compliance testing was not performed, sometimes because the auditor did not follow the guidance in Part 7 of the Compliance Supplement titled, "Guidance for Auditing Programs Not Included in This Compliance Supplement," for identifying the applicable compliance requirements to test and report on. In other cases, internal control and compliance tests were not adequately designed or documented to support the reports issued. In performing compliance tests, be sure that you have identified which of the applicable compliance requirements may have a direct and material effect on each major program. It is imperative that you use the most recent version of the supplement to make this identification. If the program you are auditing is not included in the supplement, you should follow the guidance in Part 7 of the supplement for identifying the applicable compliance requirements. Further, in performing compliance tests, be sure to consider relevant portions of the entity's internal control over compliance. Remember that you must test controls (to support a low assessed level of control risk for the assertions relevant to the compliance requirements for each major program) unless they are likely to be ineffective in preventing or detecting noncompliance.

Help Desk—The AICPA's GAQC (as discussed in "Governmental Audit Quality Center" in this alert) is the source of the above listing of common engagement deficiencies. Look under the "Resources" tab (gaqc.aicpa.org/Resources/) and select either the "Audits Performed Under *Government Auditing Standards*" or "OMB Circular A-133" links.

Office of Management and Budget Developments

OMB Revises Circular A-133

.25 Auditor reporting required under OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, has been affected by the issuance of SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). On June 26, 2007, the OMB issued a Federal Register Notice titled Revisions to OMB Circular A-133 (the OMB Notice) revising the circular to, among other things, adopt updated terminology consistent with SAS No. 112 requirements.

.26 The OMB Notice has two main purposes: (1) to update the internal control terminology and related definitions used in Circular A-133; and (2) to simplify the auditee reporting package submission requirement to the FAC. With regard to terminology changes, the OMB Notice first states that to be consistent with professional auditing standards, when reporting on *internal control over financial reporting* in a financial statement audit required by Circular A-133, the references to *reportable conditions* and *material weaknesses* in the circular are replaced with the terms *significant deficiency* and *material weakness* as those terms are defined in SAS No. 112 and the 2007 revision to *Government Auditing Standards*. As for the auditor's reporting on internal control over compliance in a single audit, the OMB Notice states that the terms *reportable condition* and *material weakness* are replaced with the updated terminology and definitions in an AICPA Auditing Interpretation of SAS No. 112. These changes are effective for single audits of periods ending on or after December 15, 2006. Further discussion of the AICPA auditing interpretation and related illustrative auditor reports are included in "AICPA Issues Auditing Interpretation to Address SAS No. 112 Implications on Single Audits" in this alert. Further discussion of the 2007 revision to *Government Auditing Standards* is included in "*Government Auditing Standards* Developments" in this alert.

.27 The OMB Notice acknowledges that the change in terminology and related definitions may result in the reporting of additional internal control matters and that the reporting of such additional matters may affect the scope of future single audits, particularly as it relates to the determination of major programs and the auditee's low-risk status.

.28 Further, the OMB Notice also provided instructions on how to address the new internal control terminology in Form SF-SAC, "Data Collection Form for Reporting on Audits of States, Local Governments, and Non-Profit Organizations" (DCF or Data Collection Form) and an important change in the reporting package submission process. See "Data Collection Form and Reporting Package Submission Changes" in this alert for further information on these changes.

Impact on Illustrative Schedule of Findings and Questioned Costs

.29 The illustrative Schedule of Findings and Questioned Costs (Example 12-5 in the GAS/A-133 Guide) should also be modified by auditors to replace the term *reportable condition* throughout the example with the term *significant deficiency* as it is updated in the 2007 edition of the GAS/A-133 Guide.

> **Help Desk—**A PDF of the *Federal Register* notice is available at www.whitehouse.gov/omb/grants/grants_docs.html. As of the date of this alert, OMB has not yet incorporated the changes in the OMB Notice to the version of Circular A-133 on its Web site at www.whitehouse.gov/omb/grants/grants_circulars.html. However, it is expected to do so soon.

OMB Circular A-133 Compliance Supplement Update

.30 The Circular A-133 *Compliance Supplement*, issued annually by OMB, identifies existing important compliance requirements that the federal government expects to be considered as part of an audit required by the Single Audit Act. For the programs it includes, the *Compliance Supplement* provides you with a source of information to understand the federal program's objectives, procedures, and compliance requirements relevant to the audit, as well as the audit objectives and suggested audit procedures for determining compliance with these requirements. For programs not listed in the *Compliance Supplement*, you should follow its Part 7, "Guidance for Auditing Programs Not Included in This Compliance Supplement," which instructs you to use the types of compliance requirements contained in the *Compliance Supplement* as guidance for identifying the types of compliance requirements to test, and to determine the requirements governing the federal program by reviewing the provisions of contracts and grant agreements and the laws and regulations referred to in such contracts and grant agreements.

> **Help Desk—**The 2007 *Compliance Supplement* and two previous years' versions can be found on the OMB Web site at www.whitehouse.gov/omb/grants/grants_circulars.html.

.31 The OMB issued the 2007 *Compliance Supplement* dated March 2007. The 2007 *Compliance Supplement* is effective for audits of fiscal years beginning after June 30, 2006 and supersedes the *Compliance Supplement* issued in April 2006. Appendix V of the supplement, "List of Changes for the 2007 Compliance Supplement," is a key piece of information to identify all of the changes the OMB is making to the supplement.

.32 Some of the more significant changes in the 2007 *Compliance Supplement* include the following:

- New programs were added as follows:
  - — CFDA 14.169, Housing Counseling Assistance Program
  - — CFDA 16.738 replaced 16.579, Byrne Formula Grant
  - — CFDA 20.609, 20.610, 20.611, 20.612, and 20.613 were added to the Highway Safety Cluster
  - — CFDA 84.032 covers the lender portion of 81.032, the Federal Family Education Loans (FFEL) program
- Two programs were deleted as follows:
  - — CFDA 14.854, Public and Indian Housing Drug Elimination
  - — CFDA 16.579 (see CFDA 16.738 above)
- In Part 2, "Matrix of Compliance Requirements," CFDA 10.500 added "subrecipient monitoring," and programs 10.665 and 10.666 removed the "Davis Bacon Act."
- Part 3, "Compliance Requirements," amended references to the various costs principles due to amendments effective in June 2004.

- There were extensive changes made to various programs in Part 4, "Agency Program Requirements."
- In Part 5, various changes were made to the Student Financial Assistance Cluster, including adding two programs, CFDA 84.375, Academic Competitiveness Grant, and CFDA 84.376, National Science and Mathematics Access to Retain Talent Grant. As noted above, five programs were added to the Highway Safety Cluster. Finally, the National Farmworker Jobs Cluster was removed.
- Appendix VI, which discusses special provisions related to Hurricanes Katrina and Rita, was revised.

OMB Clarifies Compliance Supplement Guidance for Research and Development Cluster

.33 If you have clients that participate in federal Research and Development (R&D) programs, you should be aware that the OMB made a correction to the guidance in the 2007 *Compliance Supplement* for the R&D cluster relating to cost transfers after the *Compliance Supplement* had already been issued and posted for several months. The language that appeared in the 2006 *Compliance Supplement* on this topic should have been carried forward to the 2007 *Compliance Supplement.* However, due to an administrative error, it was changed. Upon being notified of the error, OMB corrected the language that originally was included in the 2007 supplement. The revised guidance appears in Part 5, *Clusters of Programs*, in the R&D cluster section on "Allowable Costs/Cost Principles" and reads as follows:

> "Transfers of costs between cost centers or research projects are often used to correct the financial records (such as transfers of costs between projects when costs were initially charged to the wrong project and the institutions control system found the error) and for other valid reasons.
>
> Cost transfers should be reviewed for allowability. A cost transfer from one project to another project may appear to be an unallowable charge to the second project. However, these costs may be allowable costs of the second project because of the closely linked nature of the research, and the costs would be allowable charges to either project. Alternatively, the transfers would not be allowable under the second project if the costs are not allowable under the terms and conditions of that project.
>
> The auditor should determine if journal entries and transfers of costs were made to federal R&D projects. If so, the auditor should select a separate sample of these R&D cost transfers and test the sampled items to determine the allowability of the costs transferred using the applicable federal regulations and award requirements for the project to which the costs were transferred. If the number of cost transfers between unrelated projects is significant, this could be an indication of poor internal control and might result in a noncompliance finding."

.34 If you are auditing R&D clusters as part of your single audits, check the *Compliance Supplement* section that you are using to be sure that the cost transfers guidance is the correct version (that is, that it includes the language above).

OMB Leading Development of Web Site to Provide Data on Grants, Contracts, and Other Spending

.35 OMB has created an interim Web site at www.federalspending.gov to provide data on federal grants, contracts, and other spending in a searchable format. The purpose of this temporary Web site is to solicit feedback from the public on how to develop a search engine for the official Web site, which will be launched in January 2008. This entire effort is geared to satisfying the provisions of the Federal Funding Accountability and Transparency Act, which became law in 2006. Besides providing an opportunity for public comment and feedback, the site offers information and links to the Federal Funding Act (FFA), FFA task force implementation plan, answers to frequently asked questions, and links to information on federal spending.

Federal Audit Clearinghouse Topics

.36 The FAC operates on behalf of the OMB. Its primary purpose is to collect single audit and program-specific audit information and disseminate it to federal agencies and the public. Your clients are responsible for submitting the required reporting packages to the FAC, including the audit reports and the DCF. Auditors are required to complete Part I, Item 7, Part II, and Part III of the form before it is submitted with the reporting package.

.37 Auditors can fill out and print the DCF on the FAC Web site at harvester.census.gov/fac. This site also contains the form's instructions. The FAC encourages online completion and submission because the system provides edit checks that will increase the likelihood that the form will be accepted without errors.

.38 There are separate forms for audits of fiscal periods ending in 2001–2003, and 2004–2006. Submissions covering fiscal periods with end dates before January 1, 2004 should use the prior version of the DCF. As noted in the following section, the 2004–2006 form should be used for audits covering fiscal periods ending in 2004, 2005, 2006, and 2007.

Data Collection Form and Reporting Package Submission Changes

.39 As noted in "Office of Management and Budget Developments" in this alert, the OMB revised Circular A-133 primarily for needed revisions as a result of SAS No. 112. However, the OMB Notice that revised the circular also identified important information and updates relating to the DCF. The OMB Notice states that for single audits of periods ending December 15, 2006 through December 31, 2006, the approved DCF for fiscal years ending 2004, 2005, and 2006 should be used when filing with the FAC. The OMB Notice goes on to say that since the DCF has not yet been updated for the new internal control terminology, any *significant deficiency* should be recorded under the term *reportable condition* on the following items: Part II - items 3 and 4, Part III - items 4 and 5, and Part 3, item 10 (a). The OMB Notice states that the DCF approved for audits with fiscal period end dates in 2004, 2005, and 2006 has now also been extended to apply to audits with fiscal period end dates in 2007. All submissions with fiscal period end dates in 2007 must use the 2004–2006 version of the DCF. The DCF terminology will be updated in an upcoming revision to the form scheduled for January 1, 2008.

.40 The OMB Notice also communicates a change relating to an auditee's submission of the reporting package to the FAC. Per the OMB, due to technology advances, starting January 1, 2007, the auditee is no longer required to submit multiple copies of the reporting package to the FAC, in accordance with Section 320(d) of Circular A-133. Instead, only one copy of the reporting package is necessary. However, Part III, item 8, of the DCF should continue to be completed noting all agencies required to receive a copy of the reporting package.

Data Collection Form and Reporting Package Submission Not Appropriate in Compliance Audits of For-Profits

.41 Some for-profit entities are required by granting agencies through either a grant clause or contract to have a Circular A-133 audit (or an audit that is very similar to a Circular A-133 audit). The FAC has asked that auditors remind their for-profit clients that must undergo such an audit that they are ***not*** to send the DCF and the audit reporting package to the FAC. The package should be sent, however, to the requesting federal or state agency.

Preparing the Data Collection Form

Basic Reporting Requirements

.42 Your client is required to submit both the DCF and one complete copy of the reporting package FAC within 30 days of receipt of the auditor's reports, but no later than nine months after the end of its fiscal year.

The DCF requires information regarding the period under audit, the client, the auditor, a summary of the client's federal expenditures, and a summary of the results of the audit.

.43 To take advantage of the online editing feature, the client is encouraged to use the Internet to enter the DCF data electronically. However, until the FAC receives an acceptable reporting package and the signed DCF, the client does not receive credit for meeting the submission requirement.

.44 The FAC has on its Web site frequently asked questions, which provide additional guidance on completing the form. The FAC also maintains an online database of audit submissions. See the following sections of this alert for additional discussion of the FAC, DCF, and how you can use the FAC database to help lessen the chance that your organization's audits have quality issues.

> **Help Desk**—For questions about submitting the DCF and reporting packages, auditors may contact the FAC by e-mail at govs.fac@census.gov, by phone at (800) 253-0696, or by fax at (301) 457-1592. For questions regarding previous submissions, please call the FAC processing unit at (888) 222-9907.

Data Universal Numbering System Number Questions

.45 The Data Universal Numbering System (DUNS) number field is one area of the 2004–2006 DCF that generates a lot of questions. A DUNS number is a nine-digit identification sequence assigned by Dun & Bradstreet. The instructions to the 2004–2006 DCF state that if your clients are considered to be a direct applicant (that is, the entity that made the grant application to the federal government, including state, local, and tribal governments, and other entities receiving block or other mandatory grants) they are requested to enter their DUNS number(s) for submissions effective starting with submissions for fiscal periods ending in 2005. Questions have arisen as a result of a question and answer that appears in the "Frequently Asked Questions and Answers" document on the FAC's Web site. Question 21 addresses the issue of whether DUNS numbers are required. The answer states that the OMB requests, but does not require, a DUNS number to be entered for all entities submitting a DCF.

Subrecipient Reporting Requirements

.46 The DCF provides information on the results of the Circular A-133 audit and is entered into a database maintained by the FAC. Although both auditors and clients are required to complete parts of the DCF, the client is responsible for submitting both the DCF and the reporting package to the FAC. If your client is a subrecipient, it is also required to forward a copy of a reporting package to the pass-through entity (PTE) when the schedule of findings and questioned costs contains audit findings relating to federal awards provided by the PTE or when the summary schedule of prior audit findings reports the status of any audit findings relating to such awards. If the report contains no such findings, a subrecipient is required only to provide the affected PTEs with a notification that the audit was completed and that neither the schedule of findings and questioned costs nor the summary schedule of prior audit findings contained findings relating to the federal awards provided by the PTE.

Common Reasons for Form Rejection

.47 FAC representatives have identified a number of common faults that would cause the FAC to reject a filing. Most form errors are detected by edits and can be avoided when entering the data on the FAC Web site. Among these are the following:

- Part III, Item 8, "Federal Agency Distribution," is incorrect: A reporting package is distributed to federal agencies only if there are current year findings on directly funded programs, if the program is listed in the Schedule of Prior Year Findings, or they meet the threshold for coverage by a federal cognizant agency not covered by findings on direct funding.

- Part III, Item 9c, "Research and Development," is invalid (either blank or more than one box is checked).
- Part III, Item 9f, "Direct award," is invalid (either blank or more than one box is checked).
- Part III, Item 9a and 9b "CFDA Number," Multiple CFDA Numbers appear on one program line or an extra '.' is included before the CFDA Extension.
- Missing audit components, especially a Corrective Action Plan (when required) from the auditee.
- Missing form signatures or signature dates.

Tips on Reviewing Forms Before Submission

.48 To avoid a DCF rejection, it is important for the form to be carefully reviewed by the auditor prior to its submission. Here are a few tips you can use within your practice to review the DCF before it is submitted to the FAC, and some "red flags" that can raise questions with federal OIGs.

.49 *Part II: Financial Statements.* Part II refers to the financial statement report and the report issued under *Government Auditing Standards*, not the reporting on internal control and compliance relating to federal programs. A tip for the person reviewing Part II is to simultaneously read the final auditor reports and the form to ensure this section is prepared using the final versions of the auditor reports and that the entries on the form are consistent with those reports.

.50 *Part III: Federal Programs.* In reviewing this section of the form, it is good practice to read the instructions to the DCF for Part III. Those instructions include useful information. Again, simultaneously reviewing the final Circular A-133 reporting and the form is good practice to ensure that the entries on the form are consistent with the results of the audit. Other tips for reviewing various items in this part follow.

- Item 7: This should be answered "no" if the summary schedule of prior audit findings indicates there were no prior audit findings.
- Item 8: It is important to ensure that all agencies affected by a cross-cutting finding are included. Also, the line "and, if not marked above, the federal cognizant agency" should not be checked if the client is too small to have a cognizant agency. Finally, it is important that the finding write-ups include all of the required elements, including the CFDA number, to ensure that Item 8 is properly completed.
- For Item 9 in this part, Column B should include the award number when the award does not have a three-digit CFDA extension.
- In Item 9: The programs should be listed in the same level of detail as in the SEFA. For instance, if the SEFA lists 10 Department of Health and Human Services (DHHS) awards within one or more CFDA numbers, Item 9 should list 10 DHHS awards; there should not be one total HHS line.
- Good practice is to prepare a written reconciliation between the total of Item 9(e) to the total of the schedule of federal award expenditures included in the Circular A-133 report. Common reconciling items include amounts that may be reported in the footnotes to the schedule of expenditures of federal awards. The following are examples:
  - — Student loan outstanding balances
  - — Administrative cost allowances
  - — Commodities
  - — Donated property
  - — Interest subsidies
  - — Insurance

- For Item 9, another good practice is for the reviewer to independently verify that Columns C, F, and G have been completed correctly. That is particularly true for very lengthy DCFs, as it is easy to inadvertently mark the wrong box.
- Item 10, Column A, should not include response P ("Other") very often. Sometimes, form preparers will tend to use "P" rather than take the time to properly match a finding to the appropriate compliance requirement. If a "P" is noted as a response, extra attention may be needed to assure that the response is correct.
- Item 10, Column B, "Audit finding reference numbers," should reconcile to Item 8 in Part III, allowing only for differences relating to prior year findings covered in Item 8, but not in Item 10.

Red Flags Raised by Incorrect Data Collection Forms

.51 Federal OIGs sometimes review specific DCF data or use the FAC database to determine potential problems or issues with single audits that have been performed. Once potential problems are identified, the OIGs will likely contact the auditor for additional information or may decide to perform a quality control review of the engagement in question. For this reason, it is even more important that the DCF be completed correctly. The following are some of the red flags that incorrect DCF submissions might raise with federal reviewers:

- If the wrong box is checked in Part II, federal reviewers might conclude that the preparer did not understand the nature of the auditor's report that was issued.
- If the wrong boxes are checked in Part III, Items 1–8, federal reviewers might conclude that the auditor did not understand one or more of the following concepts: low risk auditee, type of report issued, or what belongs on the summary of prior audit findings.
- If Part III, Item 9, is not completed properly, the federal reviewer might conclude that the auditor did not understand the concept of "major programs," or that the auditor audited the incorrect major programs. Further, he or she might conclude that the auditor does not understand the nature of the findings reported.

Revising a Data Collection Form Submission

.52 For one reason or another, your client may need to revise a submission that has been made to the FAC. If this is the case, keep the following in mind:

- You must use a paper copy of the form (available at harvester.census.gov/fac/collect/formoptions.html).
- You should write "Revision" at the top of Page 1 and fill out Page 1 completely.
- You and the client should sign and date the form again.
- The client should fill out corrections/additions/deletions only.
- The client should retotal total federal awards expended (if needed).
- The client should send the paper form to FAC along with a cover letter summarizing the nature of the revision(s).
- The FAC Web site has instructions for such revisions.

Using the FAC Database

.53 You may find it worthwhile to investigate the FAC database. You can find instructions for its use on the FAC Web site at harvester.census.gov/fac. The FAC expects that the major users of its database will be federal sponsoring agencies. A number of agencies report that they have found it useful, for example, to compare the results of their own programmatic audits with those Circular A-133 audits performed by independent auditors and filed on the database. FAC officials also point out that you, as an auditor, can benefit from the database. For example, consider the following benefits:

- You and your clients can check on the status of submissions.
- You and your clients can ascertain the status of their subrecipients' submissions.
- You can perform overall analytical assessments of your organization's audits to determine, for example, whether there are any problems with the two-year look-back rule and major program determination. Although this is true, the FAC should not be the ones making this point.
- You can look at reports or findings related to programs you are auditing to supplement staff training.

Government Auditing Standards Developments

.54 In July 2007, the U.S. Government Accountability Office (GAO) issued the July 2007 revision to *Government Auditing Standards* (GAO-07-731G). The July 2007 revision supersedes the 2003 revision and updates the January 2007 revision. The July 2007 revision contains the final 2007 revisions, including the quality control and peer review sections in Chapter 3, which GAO had exposed for comment in January 2007. The July 2007 revision represents the completed 2007 revision of *Government Auditing Standards* and is the version that should be used until further revisions or updates are made. It will be effective for financial audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Early implementation is encouraged. A downloadable version of the complete July 2007 revision is available on the GAO's Yellow Book webpage at www.gao.gov/govaud/ybk01.htm. You will also find ordering information for the printed version on the GAO's Yellow Book webpage at www.gao.gov/govaud/ybk01.htm.

.55 GAO has also issued a summary document titled, *Major Changes: July 2007 Revision to Government Auditing Standards* on its Web site at www.gao.gov/govaud/somc0707.pdf. This document highlights key revisions to the standards including those specifically related to ethics and independence, professional judgment and competence, all types of audits and attestation engagements performed under the Yellow Book, and financial and performance audits. The listing of changes is intended to assist practitioners in updating their related policies and procedures for conducting government audits. Among the significant changes in the July 2007 revision of *Government Auditing Standards* are the following:

Overall Changes

.56 The July 2007 revision accomplished the following:

- Reinforced the key role of auditing in maintaining accountability and providing information for making improvements in government operations
- Clarified the standards through standardized language to define the auditor's level of responsibility and distinguish between auditor requirements and guidance/explanatory material. This approach is consistent with that being used by other auditing standard-setters
- Clarified and expanded the standards to recognize that other sets of professional standards, such as those issued by the Public Company Accounting Oversight Board (PCAOB), the International Auditing and Assurance Standards Board (IAASB), and the Institute of Internal Auditors (IIA) can be used in conjunction with generally accepted government auditing standards (GAGAS)

Changes Related to Ethics and Independence

.57 The July 2007 revision also made changes related to ethics and independence:

- Heightened emphasis on ethical principles as the foundation, discipline, and structure behind the implementation of the standards, including a description of five key ethical principles that guide the work of those who conduct audits in accordance with GAGAS (Chapter 2 is devoted entirely to ethical principles.)
- Clarified and streamlined the discussion of professional services other than audit and attestation engagements (nonaudit services) and their impact on auditor independence by reorganizing the discussion and related examples into three distinct categories of nonaudit services
- Added guidance on actions required if an impairment to independence is identified after the audit report is issued

Changes Related to Professional Judgment and Competence

.58 The July 2007 revision also includes changes related to professional judgment and competence:

- It stressed the critical role of professional judgment in all aspects of GAGAS audits, in considering risk, and in complying with GAGAS overall.
- It expanded the description of competence to emphasize its importance and relate it to key steps in performing an audit and reporting the findings and conclusions.
- It incorporated the revised CPE requirements that were issued by GAO in April 2005 (GAO-05-568G).
- It clarified the CPE requirement to include internal specialists who are part of the audit organization and perform as a member of the team.

Changes Related to Quality Control and Assurance

.59 The July 2007 revision made changes related to quality control and assurance:

- It clarified that an audit organization's noncompliance with the peer review requirements result in a modified GAGAS statement, while the audit organization's compliance (or noncompliance) with the requirements for a system of quality control are tested and reported on as part of the peer review process and do not affect the GAGAS compliance statement.
- It clarified that an audit organization's system of quality control should also provide reasonable assurance that the organization and its personnel comply with professional standards and applicable legal and regulatory requirements.
- It clarified that the GAGAS requirements for a system of quality control are consistent with the AICPA proposed Statement on Quality Control Standards (SQCS), except that the GAGAS requirements state that reviews of the work and the report that are performed as part of supervision are not monitoring controls when used alone.
- It added a requirement for an audit organization to include policies and procedures in its system of quality control that collectively address (*a*) leadership responsibilities for quality within the audit organization; (*b*) independence, legal, and ethical requirements; (*c*) initiation, acceptance, and continuance of audit and attestation engagements; (*d*) human resources; (*e*) audit and attestation engagement performance, documentation, and reporting; and (*f*) monitoring of quality.
- It added a requirement for audit organizations to analyze and summarize the results of its monitoring procedures at least annually, with identification of any systemic issues needing improvement, along with recommendations for corrective action.
- It added a requirement for external audit organizations to make peer review reports publicly available and for internal audit organizations to provide a copy to those charged with governance.

Changes Related to All Types of GAGAS Audits and Attestation Engagements

.60 The July 2007 revision also accomplished the following:

- It added guidance on citing GAGAS in the audit report.
- It defined those charged with governance consistent with SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380).
- It added a requirement that the audit organization establish information systems controls concerning accessing and updating electronically maintained audit documentation.
- It clarified reporting requirements for internal control deficiencies, fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse.
- It clarified and streamlined several other areas relating to audit and attestation engagements, one of which is requirements and guidance for developing elements of a finding.

Changes Related to Internal Auditors

.61 The July 2007 revision also included the following:

- Several changes to the guidance for internal auditors and encourages internal auditors to use IIA standards in conjunction with GAGAS

Changes Related to Financial Audits

.62 The July 2007 revision further provided the following:

- It updated the financial auditing standards based on recent developments in financial auditing and internal control including SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), and SAS No. 112.
- It clarified that professional judgment is used in determining whether and how to communicate deficiencies in internal control that are not significant deficiencies.
- It added requirements for reporting on the restatement of previously-issued financial statements.
- It encouraged communicating in the audit report significant concerns, uncertainties, or other unusual or catastrophic events that could have a significant impact on the financial condition or operations of a government entity or program for financial audits.

Changes Related to Attestation Engagements

.63 The July 2007 revision made the following changes as they relate to attestation engagements:

- It clarified and revised the description of attestation engagements and included additional examples of types of attestation engagements.
- It conformed attestation engagements standards and guidance for consistency with changes in financial audits.

Changes Related to Performance Audits

.64 The July 2007 revision further provided the following:

- It clarified and revised the definition of performance audits and included additional examples of types of performance audits.

- It enhanced performance auditing standards to elaborate on the overall framework for high-quality performance audits and clarified and expanded information on other performance auditing issues.

Changes Related to Guidance Material

.65 The July 2007 revision also accomplished the following:

- It added an appendix to provide supplemental guidance to assist auditors in the implementation of GAGAS. This guidance does not establish additional GAGAS requirements but is intended to assist auditors in their work.

Effective Dates

.66 As noted above, the 2007 revision is effective for financial statement audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Certain standards issued by the AICPA incorporated by reference into the 2007 revision have earlier effective dates. The GAO has indicated that for financial statement audits conducted under *Government Auditing Standards*, the effective dates of those AICPA standards will apply.

.67 The GAO has indicated that until the 2007 revisions become effective, auditors should adopt the terminology and definitions contained in SAS No. 112 when reporting on internal control deficiencies and include in their reports material weaknesses and significant deficiencies. GAO is also encouraging auditors to implement relevant sections of the 2007 revision for financial audits concurrent with the implementation of the related Auditing Standards Board (ASB) standards.

.68 Additionally, GAO states that the 2007 revision should be used in conjunction with the following guidance documents, which are also available on the Yellow Book webpage at www.gao.gov/govaud/ybk01.htm:

- Government Auditing Standards: Answers to Independence Questions (GAO-02-870G, July 2002)
- Government Auditing Standards: Guidance on GAGAS Requirements for Continuing Professional Education (GAO-05-568G, April 2005)

> **Help Desk**—Two examples of the report on internal control over financial reporting and on compliance and other matters using language as defined in SAS No. 112 are available on the GAQC's Web site.

.69 The GAO also plans to issue on its Web site a Professional Requirements Tool. The tool will provide a listing of the professional responsibilities from the 2007 revision that are specifically identified in the standards by the words "must" and "should."

U.S. Department of Housing and Urban Development Update

HUD Consolidated Audit Guide Revisions

.70 The U.S. Department of Housing and Urban Development (HUD) continues its chapter-by-chapter process to update the Consolidated Audit Guide for Audits of HUD Programs, Handbook 2000.04 REV-2 CHG-1 (HUD audit guide). Presented below is a summary of the changes issued through the date of this writing.

Chapter	*Date Issued*	*Effective for Audits With Fiscal Years Ending On or After*
Chapter 2, "Report Requirements and Sample Reports," Example B	March 14, 2007	March 31, 2007
Chapter 2 Example B-1	March 14, 2007	March 31, 2007
Chapter 5, "Insured Development Cost Certification Audit Guidance"	March 23, 2007	June 30, 2007
Chapter 6, "Ginnie Mae Issuers of Mortgage-Backed Securities Audit Guidance"	April 3, 2007	June 30, 2007
Chapter 7, "HUD-Approved Title II"	April 27, 2007	June 30, 2007
Chapter 8, "HUD-Approved Title I"	September 1, 2006	December 31, 2006

.71 Auditors should review the transmittals announcing the issuance of each of the above chapters on the HUD OIG Web site at www.hud.gov/offices/oig/reports/auditguide/ for a summary of the revisions made to each chapter.

.72 The following chapters have yet to be revised or written.

Chapter	*Comment*
Chapter 1, "General Audit Guidance"	Revision in process.
Chapter 2, "Reporting Requirements and Sample Reports" (excluding Example B and B-1 which have already been revised (see table above)	Revision in process.
Chapter 3, "HUD Multifamily Housing Programs"	In the current guide, Chapter 3 is in reserve, and multifamily housing programs are covered in Chapter 4. HUD plans to move the multifamily housing program guidance to Chapter 3. Chapter 3 is in the process of being revised.
Chapter 4	This chapter is reserved to provide guidance on insured hospitals to address the many questions and concerns regularly received from auditors and managers on hospital audits. Development of this chapter has not been started.

.73 Auditors should periodically check HUD's Web site at www.hud.gov/offices/oig/reports/auditguide/ to make certain that they identify and follow the relevant audit guidance. The GAQC Web site will also provide status updates on future HUD revisions to the HUD audit guide.

HUD's Consolidated Audit Guide Incorrectly Used for Circular A-133 Purposes

.74 According to the HUD OIG's office, some auditors have been incorrectly using the HUD audit guide to satisfy OMB Circular A-133 audits requirements of not-for-profit entities participating in Federal Housing Administration (FHA)/HUD's multifamily housing programs. The HUD audit guide is in the process of being updated (see previous section) and is not intended to be a program-specific audit guide that would satisfy Circular A-133 requirements by itself. Although Circular A-133, section 235(a) states that the auditor should contact the OIG to determine whether a current guide exists, HUD reports that no such contacts have been made. HUD indicates that if auditors use the HUD audit guide, it is their responsibility to assure that all Circular A-133 requirements as contained in the Circular and in the *Compliance Supplement* are covered.

Multifamily Audits Where Agents/Owners Manage Multiple Insured Projects

.75 For situations where audit management agents and owners (not-for-profit and for-profit) manage many multifamily insured projects, auditors should be aware that the HUD audit guide is intended to cover the activities of a single project/entity and not the activities of the owner or the management agent. Some auditors have reviewed internal controls of the owner/agent and not of the project. Also, some auditors have not covered compliance requirements of each project but tested requirements of some projects and (1) if acceptable, accepted the results for all projects without disclosure in the projects' audit reports that certain projects were not tested, and (2) if deficiencies were found in the projects tested, those deficiencies were reported only in the tested projects' audit reports and not in all reports that were to be represented by the testing performed. HUD OIG has concluded that insufficient audit work was performed to support the opinion of many of the projects managed by the owner/agent. When HUD completes its revision to Chapter 3 of the HUD audit guide, it will prohibit this type of testing application. However, as part of that revision, HUD is also reviewing areas that can be tested at the owner/agent level if certain operating conditions exist. Also, HUD is reviewing various methods of sampling applications for inclusion in the revision to Chapter 3 to assure that the opinions upon which HUD relies are supportable.

Deficiencies in HUD Audits

.76 In some cases, for-profit organizations, not-for-profits, and public housing authorities (PHAs) and their auditors have not followed the requirements outlined in HUD's *Guidelines on Reporting and Attestation Requirements of Uniform Financial Reporting Standards (UFRS) for Public Housing Authorities, Not-for-Profit Multifamily Program Participants, For-Profit Multifamily Program Participants, and Their Independent Accountants*. This HUD document provides guidance to PHAs and multifamily participants receiving HUD financial assistance and their auditors in meeting HUD audit reporting requirements and requirements for filing financial information electronically with the HUD Real Estate Assessment Center. Specific problems identified include the omission of the required supplemental schedules and omission of required AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1), reporting on these schedules.

.77 HUD's settlements with six firms since 2003 reinforce the federal government's strong emphasis on ensuring financial accountability and the importance of firms taking appropriate steps to ensure that they do not have any quality issues. Other steps HUD has taken in this regard include the following:

- Referrals to state boards of accountancy and the AICPA
- New methods of audit verification (that is, HUD staff reperforms a portion of the Circular A-133 audit at PHAs to determine whether the PHAs' audit firms identified all material instances of noncompliance with federal laws, regulations, and contract provisions occurring at the agency.)

Other Regulatory Activity

USDA Rural Rental Housing and Rural Labor Housing Programs

.78 The USDA Office of Rural Development (RD) recently issued a letter to its state directors informing them that the financial reporting and audit requirements for the Rural Rental Housing (RRH) Program and the Rural Labor Housing (RLH) Program are changing effective for projects with December 31, 2007 year-ends. You can access the letter issued August 29, 2007, at the following Web site: www.rurdev.usda.gov/regs/ul/ulaugust07.pdf. If your firm has clients that participate in these programs, you should pay close attention to the new requirements.

.79 Those firms having clients that participate in the previously described programs know that it was not that long ago that the USDA Office of Inspector General (OIG) issued audit guidance titled, *Audit Program, USDA Rural Rental Housing Program*, which can be accessed at www.usda.gov/oig/webdocs/FINALAUDPROG050414.pdf, that deleted the financial statement audit requirement and, instead, required an agreed-upon procedures engagement for the RRH program. For that reason, the GAQC staff verified the authoritative status of the new USDA RD audit guidance with the USDA OIG. The OIG stated that although it has not approved or sanctioned the new guidance, they will not impede its implementation at this time. Therefore, you should use the new guidance in lieu of the previous RRH Audit Program. However, you should also note that the OIG cautioned that the guidance in the previously issued Audit Program for Construction Cost Engagements continues to be effective.

.80 Among other things, the new RD guidance will reinstate a financial statement audit requirement to be performed under *Government Auditing Standards* for borrowers with projects of 24 or more units. Further, borrowers with projects of 16 units or more will be required to undergo an additional agreed-upon procedures engagement. The RD guidance identifies three agreed-upon procedures that must be performed and promises additional guidance on testing criteria and procedures, sampling methodology and sample size, and standard reporting requirements. Borrowers with projects of 15 or fewer units are not subject to either the financial statement audit or agreed-upon procedures requirement. Finally, all borrowers will have additional reporting requirements directly to USDA (for example, borrower certification of performance standards). The following table (which is excerpted from the guidance) summarizes the new requirements:

Rural Development MFH Year End Financial Reporting Requirements				
Type of Property	***Forms RD 3560-7 and 3560-10?***	***Borrower Certification of Performance Standards?***	***Agreed-Upon Procedures and Determinations****	***Audited Financial Statements? (In Accordance With Yellow Book Standards)***
Rural Development Project (1–15 units)	Yes	Yes	No	No
Rural Development Project (16–23 units)	Yes	Yes	Yes	No
Rural Development Project (24+ units)	Yes	Yes	Yes	Yes*
State and local governments, Indian tribes, and Non-profit Organizations (subject to OMB Circular A-133)	Yes	Yes	No	No**

* Must be completed by a CPA.

** This Audit is in Accordance with OMB Circular A-133 and submitted to the Agency as **part** of the Financial Reporting Requirements.

.81 The guidance also provides several examples to further illustrate the above requirements as follows:

- A project of 36 units owned by a limited partnership must provide the self-certification, the budget and balance sheet forms, the agreed-upon procedures, and the financial audit.
- A for-profit borrower with an 8-unit project must provide the self-certification and the two forms.
- A for-profit borrower with a 20-unit property will provide the self-certification, the two forms, and the agreed-upon procedures.
- A nonprofit housing authority, subject to OMB Circular A-133, with a 24-unit property, will provide a copy of that report, the self-certification, and the two forms.
- A nonprofit borrower not subject to A-133 with a 16-unit property will provide the self-certification, the two forms, and the agreed-upon procedures.

.82 You should periodically check the RD "regulations" section of the USDA Web site for updates at www.rurdev.usda.gov/regs/.

Department of Education Amends Student Financial Assistance Guide to Reflect Two New Programs

.83 If your firm audits for-profit postsecondary institutions or servicers, you should be aware that in September, the U.S. Department of Education (ED) issued interim guidance to amend the January 2000 Audit Guide *Audits of Federal Student Financial Assistance Programs at Participating Institutions and Institution Servicers* (SFA Guide). The guide can be found at www.ed.gov/about/offices/list/oig/nonfed/sfgd2000.pdf. The purpose of the guidance is to recognize two new financial aid programs—the Academic Competitiveness Grant (ACG) Program and the National Science and Mathematics Access to Retain Talent Grant (National SMART Grant) Program.

.84 The guidance was issued in the form of a "Dear CPA Letter" and can be accessed at www.ed.gov/about/offices/list/oig/nonfed/dearcpa0701.pdf. ED issued the guidance in this interim format because it is in the process of working on a more comprehensive revision to the SFA Guide to reflect changes in the Federal Student Aid programs. In the meantime, ED wants to ensure audit coverage of the ACG Program and the National SMART Grant Program before the complete revised SFA Guide is issued.

.85 The ED guidance provides background information on each of the new programs. It also includes required procedures for each program that are mandatory for all audits conducted using the SFA Guide for audits with field work starting on or after (or still being conducted) 15 calendar days after the date of the issuance of the amendment (that is, 15 calendar days after issuance date of August 30, 2007), if the client institution participated, or should have participated, in either of the new programs in audit periods ending after June 30, 2006. Two of the required procedures are also applicable for audits of servicers who service schools participating in the two new programs.

.86 Watch the GAQC Web site for updates and information on the more comprehensive revision to the SFA Guide.

Recent Auditing and Attestation Pronouncements and Related Guidance

.87 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. Although some do not specifically address issues associated with your single audits, you should still be aware of them as they could affect the work you do on the financial statement audit portion of the single audit. You can look to the Audit Risk Alerts *State and Local Governmental Developments* (2007), *Not-For-Profit Organizations Industry Developments* (2007/08), and *Health Care Industry Developments* (2007/08) for further discussion of the financial statement audit implications of these standards. We are only describing in more detail below those standards that may have some impact on your single audits.

.88 For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. The GAQC Web site at www.aicpa.org/GAQC is also a useful Web site to look for updates. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report

(continued)

SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See "AICPA Risk Assessment Standards" in this alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue date: December 2005	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective for periods ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.

Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA TPA TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice alert responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice alert provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.89 In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.90 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.91 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.92 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.93 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. Examples for state and local governmental entities might include governing boards, city councils, audit committees, mayors, governors, legislators, university/college presidents, and chancellors. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.94 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable

whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

.95 The AICPA has also published the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS in a financial statement audit. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

> **Help Desk—**The GAQC has provided a public link on its Web site to an archived conference call discussing SAS No. 112 and its impact on practice. You can find the link to the call at gaqc.aicpa.org/Resources/Impact+of+SAS+112+on+Governmental+Financial+Audits+Conference+Call.htm.

AICPA Issues Illustrative Yellow Book Reports With SAS No. 112 Terminology

.96 The required *Government Auditing Standards* reporting is also affected by the issuance of SAS No. 112. As noted by GAO upon issuance of the 2007 revision to the Yellow Book, auditors should adopt the terminology and definitions in SAS No. 112 when reporting on internal control deficiencies (see also, "*Government Auditing Standards* Developments" in this alert). The GAQC has developed updated Yellow Book report illustrations that reflect the new SAS No. 112 terminology that can be found at gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports/#YB. Those reports have been reviewed by GAO staff. The illustrative report examples, which update two illustrations that appear in the GAS/A-133 Guide, will ultimately be incorporated into the 2007 edition of the GAS/A-133 Guide when it is updated later this year. Further, two other reports in the GAS/A-133 Guide (Example 4-4 and 4-6) will be updated in the 2007 edition to reflect similar SAS No. 112.

AICPA Issues Auditing Interpretation to Address SAS No. 112 Implications on Single Audits

.97 The ASB has issued a final related audit interpretation to SAS No. 112 (AU section 9325.01–.03) titled, Auditing Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1). As mentioned previously in "OMB Revises Circular A-133," in this alert, the issuance of this interpretation coincides with the issuance by OMB of a revision to Circular A-133 for the implications of SAS No. 112. The interpretation establishes definitions for the terms *control deficiency*, *significant deficiency*, and *material weakness* when the auditor is reporting control deficiencies that relate to internal control over compliance in a Circular A-133 audit. The terms and definitions included in the interpretation are as follows:

- A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect on a timely basis noncompliance with a type of compliance requirement of a federal program.
- A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected.
- A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected.

Updated Circular A-133 Illustrative Single Audit Reports Issued to Incorporate SAS No. 112 Language

.98 The three Circular A-133 reports listed below have been updated for SAS No. 112 and are incorporated into the 2007 update to the GAS/A-133 Guide which is expected to be available in late 2007. GAS/A-133 Guide also includes other illustrative reports illustrating various compliance reporting situations that were also updated for SAS No. 112.

- Example 12-1. Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance With OMB Circular A-133 (*Unqualified Opinion on Compliance and No Material Weaknesses [No Significant Deficiencies in Internal Control Over Compliance Identified*]).
- Example 12-2. Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance With OMB Circular A-133 (*Unqualified Opinion on Compliance and Significant Deficiencies in Internal Control Over Compliance Identified*) [Note that this is a new report to reflect the most common situation for the reporting of significant deficiencies—that is, when the report on compliance is unqualified].
- Example 12-3. Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance With OMB Circular A-133 (*Qualified Opinion on Compliance and Material Weaknesses in Internal Control Over Compliance Identified*) [Note that this report has been revised to reflect the most common situation for the reporting of material weaknesses—that is, when the report on compliance is qualified].

  Help Desk—The GAQC has provided updated illustrative single audit reports that incorporate the new SAS No. 112 language on its Web site at gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports/#OMB

Guidance on Evaluating Control Deficiencies in a Single Audit

.99 As noted in SAS No. 112, the auditor must evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses. However, the guidance in SAS No. 112 for evaluating control deficiencies is written from the perspective of a financial statement audit. The following guidance is intended to emulate the guidance in SAS No. 112 for your consideration when evaluating control deficiencies in a single audit.

.100 In a single audit, the significance of a control deficiency depends on the potential for noncompliance, not on whether noncompliance actually has occurred. Accordingly, the absence of identified noncompliance does not provide evidence that identified control deficiencies are not significant deficiencies or material weaknesses. When evaluating whether control deficiencies, individually or in combination, are significant deficiencies or material weaknesses, the auditor should consider the likelihood and magnitude of actual or potential noncompliance.

.101 The following are examples of factors that may affect the likelihood that a control, or combination of controls, could fail to prevent or detect noncompliance:

- The nature of the type of compliance requirement involved. For example, a specific special test or provision may involve greater risk because it is unique to the program and may require unique controls.
- The susceptibility of the program and related types of compliance requirements to fraud.
- The subjectivity and complexity involved in meeting the compliance requirement and the extent of judgment allowed.
- The cause and frequency of any known or detected exceptions related to the operating effectiveness of a control.
- The interaction or relationship of the control with other controls.
- The interaction of the control deficiency with other control deficiencies.
- The possible future consequences of the deficiency.

.102 The evaluation of control deficiencies includes the magnitude of noncompliance. Several factors affect the magnitude of noncompliance that could result from a deficiency or deficiencies in controls. The factors may include, but are not limited to, the following:

- The program amounts or total of transactions exposed to the deficiency in relation to the type of compliance requirement
- The volume of activity related to the compliance requirement exposed to the deficiency in the current period or expected in future periods
- Adverse publicity or other qualitative factors

.103 Multiple control deficiencies that affect the same type of compliance requirement increase the likelihood of noncompliance and may, in combination, constitute a significant deficiency or material weakness, even though such deficiencies are individually insignificant. Therefore, the auditor should evaluate individual control deficiencies that affect the type of compliance requirement, or component of internal control, to determine whether they collectively result in a significant deficiency or material weakness.

.104 In determining whether a control deficiency or combination of control deficiencies is a significant deficiency or material weakness, the auditor also should evaluate the possible mitigating effects of effective compensating controls that have been tested and evaluated as part of the audit of the major program. A compensating control is a control that limits the severity of a control deficiency and prevents it from rising to the level of a significant deficiency or, in some cases, a material weakness. Compensating controls operate at a level of precision, considering the possibility of further undetected noncompliance, which would result in the prevention or detection of noncompliance that is more than inconsequential or material to the type of compliance requirement. Although compensating controls mitigate the effects of a control deficiency, they do not eliminate the control deficiency. The auditor could evaluate and test the effectiveness of a compensating control and determine whether it operates effectively for the purpose of mitigating the effects of the control deficiency in the type of compliance requirement.

.105 The auditor may encounter deviations in the operating effectiveness of controls. A control that has an observed nonnegligible deviation rate is at least a control deficiency regardless of the reason for the deviation, and could be, based upon further evaluation, a significant deficiency or material weakness. For example, if the auditor designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a nonnegligible deviation rate because based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

.106 The auditor should conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency. Although the term *prudent official* is not defined in the standard, the concept is that an auditor should "stand back" and take another objective look at the severity of the deficiency much as would a regulator or someone from an oversight agency.

.107 For purposes of deficiencies in a single audit, the following areas ordinarily are at least significant deficiencies in internal control:

- Policies and procedures that are incomplete, inadequate, or outdated for the activities subject to a type of compliance requirement.
- Inadequate segregation of duties over a type of compliance requirement.
- Controls over complex types of compliance requirements.
- IT controls relating to the activity subject to the type of compliance requirement.

.108 Each of the following is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

- Lack of operating policies and procedures for the activities subject to a type of compliance requirement.
- Ineffective oversight of a major federal program by those charged with governance over compliance with those program requirements where the activity is subject to the type of compliance requirement, for example, lack of adequate review of federal financial reports prior to submission to the grantor.
- Identification by the auditor of material noncompliance for the period under audit that was not initially identified by the entity's internal control. (This is a strong indicator of a material weakness even if management subsequently corrects the noncompliance.)
- An ineffective internal audit function or risk assessment function for a major program for which such functions are important to the monitoring or risk assessment component of internal control for a type of compliance requirement.
- Identification of fraud in the major program of any magnitude on the part of senior program management. For the purposes of evaluating and communicating deficiencies in internal control, the auditor should evaluate fraud of any magnitude—including fraud resulting in immaterial noncompliance—on the part of senior program management, of which he or she is aware.
- Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected.
- An ineffective control environment. Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment over compliance with major program requirements.

AICPA Risk Assessment Standards

.109 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111) that are described in the following table. They are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The risk assessment standards were written from the perspective of a financial statement audit. The AICPA will be evaluating the new SASs and any potential implications for audits performed under Circular A-133. Watch the GAQC Web site for further updates over the course of the next year.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Audit Documentation

.110 SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), provides guidance on the form, content, retention, extent, and confidentiality of audit documentation as required by

GAAS. Among other things, SAS No. 103 requires audit documentation to be sufficient to enable an experienced auditor, having no previous connection to the audit, to understand the nature, timing, extent, results, and conclusions of auditing procedures performed, and that the accounting records agree or reconcile with the audited financial statements or other audited financial information. SAS No. 103 contains guidance on documenting significant findings or issues; identifying the preparer and reviewer of audit documentation; documenting specific items tested; documenting departures from relevant SASs; revising audit documentation after the date of the auditor's report; and ownership and confidentiality of audit documentation.

.111 It requires you to assemble, within 60 days following the delivery of the auditor's report to the entity, the audit documentation that forms the final audit engagement file. (Some states may require that this be done within a shorter period.) After that date, SAS No. 103 precludes you from deleting or discarding existing audit documentation, and requires that you appropriately document any subsequent additions or changes.

.112 In developing this SAS, the ASB considered the documentation requirements of the PCAOB, the International Auditing and Assurance Standards Board, the GAO's *Government Auditing Standards*, and suggestions received from the National Association of State Boards of Accountancy. The SAS establishes standards and provides guidance to an auditor of a nonissuer regarding the audit documentation for audits of financial statements or other financial information being reported on. Audit reviewers consider audit documentation to be an essential element of determining audit quality, including the quality of audits conducted under GAS and Circular A-133. Evidence from quality control reviews and peer reviews clearly shows that problems with audit documentation may be the root of many quality problems. Therefore, you may want to consider spending some time considering the new requirements and your firm's policies and procedures relating to documentation. Some additional key areas of the SAS are as follows:

- It requires the auditor, when preparing audit documentation, to consider the needs of an "experienced auditor" having no previous connection with the audit, to understand the procedures performed, the evidence obtained, and the specific conclusions reached. That concept is likely to be familiar to you because GAS contains a similar requirement.
- It provides enhanced guidance concerning matters that should be documented and the retention of documentation.
- It requires you to document audit evidence that is contradictory or inconsistent with the final conclusions and how you addressed the contradiction or inconsistency.

.113 We suggest that you consider this requirement as you develop your firm internal policies with regard to documentation. You should keep in mind that, in situations in which a single audit is performed later, after the completion of the financial statement audit, questions have arisen about how the 60-day requirement would apply to single audit documentation. While no authoritative guidance has been issued on this question yet, some are interpreting this to mean that the auditor would assemble, within 60 days following the delivery of the auditor's Circular A-133 report to the entity, the single audit documentation that forms the final single audit engagement file.

.114 It specifies a minimum file retention period of five years from the date of the auditor's report. Some states have their own separate retention requirements that may extend beyond five years for auditors that practice within the state. This SAS is effective for audits of financial statements for periods ending on or after December 15, 2006.

Dating the Auditor's Reports

.115 SAS No. 103 also includes amendments to SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530.01 and .05). The amendment requires that your report not be dated earlier than the date on which you have obtained sufficient competent audit evidence to support the opinion on the financial statements.

.116 The AICPA has issued Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*, providing information that may help practitioners interpret this requirement. See the discussion in the next section of this alert.

.117 The auditor's report on compliance and on internal control over compliance related to major programs, as required by Circular A-133, ordinarily should have the same date as that of the other reports, but may carry a later date because some of the audit work to satisfy Circular A-133 requirements may be done subsequent to the work on the financial statements. When this is the case, the reporting required by Circular A-133 should be dated at the later date (that is, when the auditor has obtained sufficient appropriate audit evidence to support the report on the audit of compliance).

Audit Documentation Technical Practice Aids

.118 In May 2007, the ASB issued two practice aids related to SAS No. 103, which was issued in December 2005.

.119 Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because, since management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.120 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.121 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.122 The Professional Issues Task Force (PITF) issued Practice Alert No. 07–1 to provide guidance to auditors of nonissuers regarding the following:

- The audit report date

- Evidence supporting financial statement amounts and disclosures—specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.123 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information which it plans to issue during the third quarter of 2007.

AICPA Peer Review Checklists—A Tool to Help Improve Audit Quality

.124 In performing peer reviews, review teams must complete all relevant programs and checklists issued by the AICPA Peer Review Board. The AICPA updates its *Peer Review Checklists* annually; the 2007 versions of those checklists (which include checklists on state and local government, health care, and not-for-profit audits; GAS audits; single audits; and HUD audits) are now available. While intended for use in peer reviews, the various relevant checklists may be a helpful tool for your firm or audit organization to use as a memory jogger to ensure you have not overlooked anything significant before issuing your audit reports. Taking this step may help you improve your audit quality. The various relevant checklists can be accessed through the GAQC at gaqc.aicpa.org/Resources/Research+Tools+and+Aids/Peer+Review+Checklists.htm.

Recent AICPA Independence and Ethics Pronouncements

.125 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Independence Requirements Under AICPA Rules, GAS, and Circular A-133

.126 If you perform audits under GAS (including Circular A-133 audits), then you should be aware of the independence rules in those standards and regulations, as well as the independence rules of the AICPA. The AICPA's Professional Ethics Executive Committee (PEEC) proposes and issues ethics interpretations and rulings relating to independence and other ethics matters. You can download recent proposals and rulings from the AICPA Web site at www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/.

.127 In a GAAS audit, AICPA members are required to comply with the AICPA's Code of Professional Conduct Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01). Ethics Interpretation 101-3, "Performance of Nonattest Services" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05), establishes requirements that members should meet to perform nonattest services for an attest client without impairing independence with regard to that client.

> **Help Desk**—In July 2006, the AICPA published a Practice Aid, *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627kk). This valuable tool contains a series of checklists to help auditors determine their compliance with applicable independence rules. The publication can be obtained at www.cpa2biz.com or by calling the AICPA at (888) 777-7077.

.128 For audits conducted in accordance with GAS, auditors and audit organizations also are subject to the GAS independence rules. Those rules, which are, in some cases, very similar to the AICPA independence rules and in other cases more restrictive, address when auditors and their organizations are independent from the organizations they audit by defining when personal, external, and organizational impairments to independence exist.

.129 To comply with the GAS provisions governing nonaudit services to audit clients, audit organizations are required to meet two overarching principles. First, audit organizations are barred from performing management functions or making management decisions for their clients. Second, audit organizations are prohibited from auditing their own work or providing nonaudit services if the services are material or significant to the subject matter of the audit. Paragraphs 3.24–.30 of GAS discuss various types of nonaudit services and the affect that they have on auditor independence. The GAO has issued a question and answer document, *Answers to Independence Standard Questions*, to address its independence standard.

> **Help Desk—***Answers to Independence Standard Questions* is available on the Web at www.gao.gov/govaud/ybk01.htm. The AICPA Web site provides a useful discussion of the AICPA and GAO independence rules at www.aicpa.org/audcommctr/spotlight/Govt_21_Independence_and_Related_Topics.htm.

.130 Finally, you should note that Section 305(b) of Circular A-133 contains an additional independence requirement. Under Circular A-133, an auditor who prepares the indirect cost proposal or cost allocation plan may not also perform the single audit when indirect costs recovered by the auditee during the prior year, as defined, exceeded $1 million.

On the Horizon

.131 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to *Government Auditing Standards* or Circular A-133 audits or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.132 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+ Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code +of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline

ASB Clarity Project

.133 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper, *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including the following:

- Establishing objectives for each of the standards and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.134 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.135 The ASB has created a number of task forces charged with monitoring specific activities of the IAASB and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Response to Single Audit Quality Issues

.136 With the increased focus on single audit quality (see "Results of Federal Study on Single Audit Quality" in this alert), there are likely to be many new projects taken on over the course of the next year and into the future to address the audit deficiencies cited in the PCIE report. These projects could result in revisions to AU section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1), the GAS/A-133 Guide, and other standards, regulations, and guidance. The best way to keep informed of developments over the next year is to watch the GAQC Web site at www.aicpa.org/GAQC for updates and news items.

Resource Central

.137 The following are various resources that practitioners engaged in *Government Auditing Standards* and Circular A-133 audits may find beneficial.

Publications

.138 Practitioners may find the following publications useful with respect to *Government Auditing Standards* and Circular A-133 audits.

- Audit Guide Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit and Accounting Guide *State and Local Governments* (2007) (product no. 012667kk)
- Audit and Accounting Guide *Not-for-Profit Organizations* (2007) (product no. 012647kk)
- Audit and Accounting Guide *Health Care Organizations* (2007/08) (product no. 012617kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist and Illustrative Financial Statements for State and Local Governments* (product no. 009037kk)
- *Checklist and Illustrative Financial Statements forNot-For-Profit Organizations* (product no. 008987kk)
- *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627kk)
- *Accounting Trends and Techniques—Not-For-Profit Organizations* (product no. 006616kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)

AICPA reSOURCE: Accounting and Auditing Literature

.139 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.140 The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry. Among the many courses, the following may be of specific interest to auditors of organizations subject to *Government Auditing Standards* and Circular A-133 audits.

- *State & Local Government Strategic Briefing—2006/2007*
- *Foundations in Governmental Accounting*

- *Governmental Accounting and Auditing Update—2006/2007 Edition*
- *Workpaper Techniques for Government and Nonprofit Organizations*
- *Government Accounting and Reporting: Putting It All Together*
- *Audits of HUD-Assisted Projects*

.141 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.142 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for both. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to auditors of organizations subject to *Government Auditing Standards* and Circular A-133 audits are:

- *Yellow Book: An Overview*
- *2007 Annual Update-Government: GASB Activities*
- *Governmental and NPO Workpaper Preparation Techniques Overall Approach*
- *Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments*

.143 To register or learn more, visit www.cpa2biz.com.

Webcasts

.144 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

Member Service Center

.145 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.146 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.147 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.148 The AICPA sponsors four annual conferences that focus on GAS and Circular A-133 topics in the summer and fall of each year.

.149 *Governmental Accounting and Auditing Update Conference (GAAC) EAST* is held in late summer in Washington, D.C., and its counterpart, *Governmental Accounting and Auditing Update Conference (GAAC) WEST*, takes place in Tempe, AZ in early fall. They are designed for CPAs working in federal, state, and local government; public practitioners with government clients; and regulators who need to be aware of emerging developments should attend this conference to remain current on the issues. Attending one of these conferences is a great way to receive timely guidance along with practical advice on how to handle new legislation and standards from key government officials and representatives of the accounting profession—including the standard setters themselves.

.150 *AICPA National Governmental and Not-for-Profit Training* is held in Lake Buena Vista, FL. If you need hands on training and are a CPA in public practice—or a governmental or not-for-profit staffer—then this conference is for you. You'll hear directly from the standards setters and industry leaders on a variety of topics including developments in governmental accounting and auditing, the latest in proposed regulations and laws on the local, state, and federal government levels, as well as those affecting the not-for-profit sector and more.

.151 *Not-for-Profit Industry Conference* is held in early summer in Washington, D.C. The conference offers a wide range of topics geared to NPO professionals at every level: tax, management, audit and accounting issues, fundraising, and regulatory issues.

.152 For further information about the conferences, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.153 The GAQC is a firm-based, voluntary membership center designed to improve the quality of governmental audits and the value of such audits to purchasers of governmental audit services. Governmental audits are audits and attestation engagements performed under *Government Auditing Standards* of federal, state, or local governments; not-for-profit organizations; and certain for-profit organizations, such as housing projects and colleges and universities that participate in governmental programs or receive governmental financial assistance. The GAQC keeps member firms informed about the latest developments, as well as provides tools and information to help them better manage their audit practice. Firms that join demonstrate their commitment to audit quality by agreeing to adhere to certain membership requirements.

.154 The GAQC has been in existence since September 2004. Since its launch, center membership has grown to over 850 firms from 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The membership accounts for approximately 82 percent of the total federal expenditures covered in single audits performed by CPA firms in the Federal Audit Clearinghouse database (harvester.census.gov/sac/) for the year 2004 (the latest year with complete submission data).

.155 The Center's focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information they need, when they need it, to maximize quality and practice success. Center resources include the following:

- E-mail news alerts on current audit and regulatory developments that keep member firms informed about the latest developments
- Dedicated center Web site at www.aicpa.org/GAQC with Resources, Community, Events and Products, and a complete listing of GAQC members in each state

- Online Member Discussion Forums for sharing best practices and discussing issues firms are facing
- Webcasts, Web seminars, and teleconferences updating members on a variety of technical, legislative, regulatory, and practice management subjects (note that these activities are archived on the GAQC Web site)

Help Desk—With all of the quality issues being noted in governmental audits, as discussed in this alert, your firm should consider joining the center. To enroll or learn more about the GAQC, including details on the membership requirements and fees for membership, go to www.aicpa.org/GAQC or e-mail GAQC staff at GAQC@aicpa.org. To preview member benefits, go to gaqc.aicpa.org/Memberships/.

AICPA State and Local Government Expert Panel

.156 The State and Local Government Expert Panel is an AICPA volunteer group whose purpose it is to identify state and local government financial reporting and auditing issues and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the GASB, regulators such as the GAO and the OMB, and applicable industry associations; and to advise and assist in the development of AICPA products and services related to state and local government audits. For information about the activities of the State and Local Government Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_government.htm.

AICPA Not-For-Profit Organization Expert Panel

.157 The Not-For-Profit Organization Expert Panel is an AICPA volunteer group whose purpose it is to identify financial reporting and auditing issues unique to not-for-profit organizations and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the AICPA Accounting Standards Executive Committee (AcSEC) and Financial Accounting Standards Board (FASB); and to advise and assist in the development of AICPA products and services related to not-for-profit organizations. For information about the activities of the Not-For-Profit Organization Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_notforprofit.htm.

Industry Web Sites

.158 The Internet covers a vast amount of information that may be valuable to auditors of organizations that are subject to *Government Auditing Standards* or OMB Circular A-133 Audits, including current industry trends and developments. Some of the more relevant sites are shown in the appendix of this alert. The governmental or not-for-profit audit practice sections of some of the larger CPA firms may also contain specific auditing and accounting information that is helpful to auditors.

.159 This Audit Risk Alert replaces Government Auditing Standards *and Circular A-133 Audits—2006.*

.160 The Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to sreed@aicpa.org or write to:

Susan Reed, CPA

AAM Section 8240

Independence and Ethics Alert—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Written by Catherine Allen, CPA
Edited by Christopher Cole, CPA CFE
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to Lisa Snyder, CPA, and Ellen Goria, AICPA Professional Ethics Division, for their significant and valuable contributions to the development of this alert.

Our special thanks to Catherine Allen who developed and wrote this alert.

How This Alert Helps You

.01 This Audit Risk Alert (alert) informs you of recent developments in the areas of independence and ethics for accountants—areas receiving increasing attention from regulators, investors, the news media, and others. Moreover, this alert helps you understand your independence requirements under the AICPA *Code of Professional Conduct* (Code) and, if applicable, certain other rule-making and standard-setting bodies. We present a section entitled "Digest of the AICPA Independence Rules" in plain English at the end of this alert so you can understand and apply the independence rules with greater confidence.

AICPA Independence and Ethics Developments

New and Revised AICPA Independence Rules

Performance of Nonattest Services

.02 On December 1, 2006, the Professional Ethics Executive Committee (PEEC) adopted revisions to Ethics Interpretation No. 101-3, "Performance of nonattest services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05). The revisions relate to two types of services: tax compliance and forensic accounting services.

.03 The new rule applies to the following tax-related services:

- Preparing a tax return
- Transmitting a tax return
- Transmitting a tax payment
- Signing and filing tax returns
- Authorized representation of a client in an administrative proceeding before a taxing authority

.04 Among other things, the guidance on tax compliance services:

- Describes the criteria a member should meet to avoid independence impairment when participating in electronic filing and fund transfer programs authorized or required by taxing authorities.
- Provides that to sign and file a tax return on behalf of an attest client, the member should be duly authorized under the law and either (*a*) the relevant tax authority has prescribed procedures for such filing or (*b*) client management provides the member with a signed statement that authorizes the member to file and sign the return and the individual signing the statement has the authority to sign and file the return and has reviewed the return and accompany schedules and believes it is true, correct, and complete to the best of his or her knowledge.
- Permits a member to officially represent a client in an administrative proceeding before a taxing authority if the member first obtains the client's agreement to acceptable terms of resolution with the authority prior to making any commitments on the client's behalf.

.05 Forensic Accounting Services are litigation and investigative services that involve:

- Application of special skills in accounting, auditing, finance, quantitative methods, and certain areas of law
- Collection, analysis, and evaluation of evidential matter, and interpretation and communication of findings

.06 The new rules on forensic accounting services differentiate between activities that are considered to impair independence because they give the appearance of advocacy of a client's position (for example, serving as an expert witness), versus those that would not (for example, serving as a fact witness). The interpretation of expert witness as a service that impairs independence is more restrictive than the previous rule, Ethics Ruling No. 101, "Client Advocacy and Expert Witness Services" (AICPA, *Professional Standards*, vol. 2, ET sec. 191.202–203); that ruling has been deleted to conform to the revised interpretation.

.07 The revised standard became effective February 28, 2007. The following transition periods apply to tax and forensic accounting services engagements subject to the new rules:

- **Tax Services—**Independence would not be impaired as a result of the more restrictive requirements of the tax compliance services provisions, provided such services are pursuant to engagements commenced prior to February 28, 2007 and completed prior to January 1, 2008, and the member complied with all applicable independence interpretations and rulings in effect on February 28, 2007.
- **Forensic Accounting Services—**Independence would not be impaired as a result of the more restrictive requirements of the forensic accounting services provisions, provided such services are pursuant to engagements commenced prior to February 28, 2007, and the member complied with all applicable independence interpretations and rulings in existence on February 28, 2007.

.08 On April 26, 2007, the PEEC approved editorial revisions to Interpretation 101-3, which were intended to clarify that a member's independence would be impaired if the member established or maintained internal controls (including performing monitoring activities) for a client. Thus, the PEEC struck General Requirement 2e, which stated that the client must agree to establish and maintain internal controls, and moved the requirement to the "General Activities" section of the rule, which provides examples of activities that impair independence if performed by a member. Conforming edits were also made to the footnotes appearing in the section of Interpretation 101-3 entitled, "Internal Audit Assistance Services."

.09 The revised standard is available on the AICPA Web site at www.aicpa.org/about/code/et_101.html#et_101.05.

.10 The PEEC has updated the basis for conclusions to describe both the additional guidance for tax compliance and forensic accounting services and the editorial revisions to the standard. The document, titled *Background and Basis for Conclusions: Revisions to Interpretations and Rulings Under Rule 101—Independence,* is available at www.aicpa.org/download/ethics/Basis_for_Conclusions_Non_Attest_Services.pdf.

New Independence Guidance (Independence Impact of Providing FIN 48 Services to an Attest Client)

.11 In August 2007, the staff of the Professional Ethics Division issued nonauthoritative guidance (in the form of a frequently asked question, or FAQ) on the question of whether, under Interpretation 101-3, "Performance of nonattest services," members could assist an attest client in applying Financial Accounting Standards Board (FASB) Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, while maintaining independence. The staff of the Professional Ethics Division issued an FAQ that addresses whether independence is affected when a member helps an attest client apply FIN 48. The FAQ indicates that such services could be provided if the member met all of the requirements of Interpretation 101-3 and is satisfied that the client will be able to make informed judgments on the results of FIN 48 services. For example, to make an informed judgment, the client should understand why tax positions do or do not meet the "more likely than not" threshold and the basis for any unrecognized tax benefit. In this way, the client may take responsibility for the amounts reported in the financial statements as a result of FIN 48.

.12 The FAQ was incorporated as Question 23 into an existing FAQ document that is available on the Professional Ethics Division's Web site at www.aicpa.org/download/ethics/nonattest_q_a.pdf.

Compliance Reminder Regarding Other Authoritative Bodies

.13 The independence and ethics rules under the Code apply to all members of the AICPA. However, other rule-making and standard-setting bodies, such as the U.S. Securities and Exchange Commission (SEC or Commission), the Public Company Accounting Oversight Board (PCAOB), the Government Accountability Office (GAO), the U.S. Department of Labor (DOL), state boards of accountancy, and state CPA societies, also have independence and ethics rules with which members must comply, if applicable, in addition to the AICPA rules. The rules of the SEC, PCAOB, and GAO are discussed briefly in this alert. You should refer to the original text of each organization's rules for full guidance.

SEC Independence Rules

.14 Rule 2-01, *Qualifications of Accountants*, of Regulation S-X sets forth the SEC's independence rules. The rule is designed to ensure that auditors are qualified and independent of their audit clients both in fact and in appearance. Accordingly, the rule establishes restrictions on financial, employment, and business relationships between an accountant and an audit client and the provision of certain nonaudit services to an audit client.

.15 Rule 2-01(b) begins with a general standard of auditor independence, which states:

> "The Commission will not recognize an accountant as independent, with respect to an audit client, if the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. In determining whether an accountant is independent, the Commission will consider all relevant circumstances, including all relationships between the accountant and the audit client, and not just those relating to reports filed with the Commission."

.16 The succeeding paragraphs reflect the application of the general standard to particular circumstances. In addition, Rule 2-01(b) states:

> "The rule does not purport to, and the Commission could not, consider all circumstances that raise independence concerns, and these are subject to the general standard in paragraph 2-01(b). In considering this standard, the Commission looks in the first instance to whether a relationship or the provision of a service: (*a*) creates a mutual or conflicting interest between the accountant and the audit client; (*b*) places the accountant in the position of auditing his or her own work; (*c*) results in the accountant acting as management or an employee of the audit client; or (*d*) places the accountant in a position of being an advocate for the audit client."

.17 The rule indicates that the above factors are general guidance only and their application may depend on particular facts and circumstances. Thus, Rule 2-01 also provides that:

> ". . . in determining whether an accountant is independent, the Commission will consider all relevant facts and circumstances. For the same reason, registrants and accountants are encouraged to consult with the Commission's Office of the Chief Accountant before entering into relationships, including relationships involving the provision of services, that are not explicitly described in the Rule."

.18 The staff of the SEC Office of the Chief Accountant periodically updates a document entitled *Application of the Commission's Rules on Auditor Independence: Frequently Asked Questions* (available at www.sec.gov/info/accountants/ocafaqaudind080607.htm). The staff updated the document in August 2007 to address the following questions:

- Do second mortgages, home improvement loans, equity lines of credit, and similar obligations collateralized by a primary residence qualify for "grandfather" status?
- Is independence impaired if a successor auditor performed certain prohibited nonaudit services (for example, bookkeeping) during the period of the financial statements audited by a predecessor auditor?
- Is independence impaired if an auditor translates its client's documents that are filed with the Commission?
- Is independence impaired if the auditor of an employee benefit plan that files Form 11-K provides prohibited nonaudit services to the nonaudit client sponsor of the plan?
- Must auditors of a parent company's financial statements be independent of entities consolidated solely due to the application of FIN 46(R), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*?
- Should the audit committee of the sponsor of an employee benefit plan preapprove audit services provided to the plan?

- Should audit committees preapprove services provided by an issuer's principal accountant to variable interest entities that are consolidated under FIN 46(R)?
- Should an issuer's proxy disclosures include amounts paid to the principal auditor for the audit of the issuer's employee benefit plan?
- Do "cooling off" rules apply to all audited periods included in an initial public offering filed with the SEC?

PCAOB Rules Regarding Independence and Ethics

.19 The PCAOB has the authority to establish ethics and independence standards in accordance with sections 103(a), "Auditing, Quality Control, and Ethics Standards," and 103(b), "Independence Standards and Rules," of the Sarbanes-Oxley Act (SOX). Firms that issue audit reports on public companies are required to register with the PCAOB. Failure to do so may result in disciplinary action. Additionally, any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105 of SOX. Under Section 107 of SOX, PCAOB rules become effective only after they are approved by the SEC. The PCAOB rules pertaining to independence and ethics also include PCAOB Rule 3100, *Compliance with Auditing and Related Professional Practice Standards*; PCAOB Rule 3500T, *Interim Ethics Standards*; and PCAOB Rule 3600T, *Interim Independence Standards* (AICPA, *PCAOB Standards and Related Rules*). These rules are summarized in this alert, as is the new independence rule approved by the PCAOB in 2007. The full text of these rules can be found at www.pcaobus.org/Rules/Rules_of_the_Board/Section_3.pdf.

New PCAOB Independence Rule

.20 In May 2007, the PCAOB adopted Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting*, which addresses the manner in which auditors must obtain preapproval of internal control-related services from audit committees. This would include, for example, advisory services to help a client improve internal controls in a particular financial reporting area, perhaps in connection with the design of a new information system. Specifically, the rules require a registered public accounting firm seeking preapproval to (1) describe proposed internal control-related engagements, in writing, for the audit committee; (2) discuss with the audit committee the potential effects of the services on the firm's independence; and (3) document the substance of that discussion. The new rule is intended to enhance the quality of information provided to the audit committee and discussion between the auditor and committee of the potential effect of internal control-related services on independence. The SEC approved the rule in July 2007; it becomes effective for audits of fiscal years ending on or after November 15, 2007. Earlier adoption is permitted.

Compliance With Auditing and Related Professional Practice Standards

.21 PCAOB Rule 3100 generally requires all registered public accounting firms to adhere to the PCAOB's auditing and related professional practice standards, which encompass auditing, attestation, quality control, ethics, and independence standards, in connection with the preparation or issuance of any audit report for an issuer and in its auditing and related attestation practices. This rule also requires registered public accounting firms and their associated persons to comply with all *applicable* standards. Accordingly, if the PCAOB's standards do not apply to an engagement or other activity of the firm, PCAOB Rule 3100, by its own terms, does not apply to that engagement or activity.

Interim Ethics Standards

.22 PCAOB Rule 3500T designates the provisions of the Code on integrity and objectivity as "Interim Ethics Standards." Accordingly, in connection with the preparation or issuance of any audit report, a registered public accounting firm and its associated persons should comply with ethics standards as described in Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 102.01), and interpretations and rulings thereunder, as in existence as of April 16, 2003, to the extent not superseded or amended by the PCAOB.

Interim Independence Standards

.23 PCAOB Rule 3600T designates the provisions of the Code regarding independence and existing standards and interpretations of the Independence Standards Board (ISB) as "Interim Independence Standards." This rule states that, in connection with the preparation or issuance of any audit report, a registered public accounting firm and its associated persons shall comply with the following independence standards, to the extent not superseded or amended by the PCAOB:

- Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01), and interpretations and rulings thereunder, as in existence on April 16, 2003
- ISB Standards No. 1, *Independence Discussions with Audit Committees*; No. 2, *Certain Independence Implications of Audits of Mutual Funds and Related Entities*; and No. 3, *Employment with Audit Clients*
- ISB Interpretations No. 99-1, *Impact on Auditor Independence of Assisting Clients in the Implementation of FAS 133 (Derivatives)*; No. 00-1, *The Applicability of ISB Standard No. 1: When "Secondary Auditors" Are Involved in the Audit of a Registrant*; and No. 00-2, *The Applicability of ISB Standard No. 1: When "Secondary Auditors" Are Involved in the Audit of a Registrant—An Amendment of Interpretation 00-1*

.24 To the extent that the SEC's rules are more or less restrictive than the PCAOB's Interim Independence Standards, registered public accounting firms must comply with the more restrictive requirements.

GAO Independence Standard

.25 CPAs, non-CPAs, government financial auditors, and performance auditors who audit federal, state, and local governments as well as not-for-profit and for-profit recipients of federal (and some state) grant and loan assistance should be familiar with the ethics and independence requirements of the *Government Auditing Standards* (GAS, also referred to as the Yellow Book). The GAO independence rules are in some cases very similar to the AICPA independence rules; however, in other cases, the GAO independence rules are more restrictive.

.26 In July 2007, the Comptroller General of the United States issued the 2007 revision of the Yellow Book, which supersedes the 2003 edition. (It also updates the version released in January 2007.) Changes reflected in Chapters 2 and 3 of the Yellow Book, which address professional ethics and independence, include:

- Increased emphasis on ethical principles as the foundation, discipline, and structure behind the implementation of the government auditing standards.
- Five ethical principles that should guide auditors' work, which are presented in Chapter 2 (previously, references to ethics were scattered throughout the document).
- Reorganization of nonaudit services independence rules into three categories for easier reference.
- New guidance on the auditor's responsibilities if the auditor discovers an impairment of independence after the audit report has been issued.

.27 Note: Though not an ethics requirement, the 2007 version of the Yellow Book incorporates a new requirement that an accounting firm include policies and procedures in its system of quality control that address, among other things, independence and ethical requirements.

.28 The five ethical principles found in Chapter 2, which is devoted exclusively to ethical conduct, are:

1. The public interest
2. Integrity
3. Objectivity
4. Proper use of government information, resources, and position
5. Professional behavior

.29 The independence rules, in substance, are unchanged. For nonaudit services, they continue to require the auditor to observe two overarching principles to enable performance of such services. The revised Yellow Book has summarized the guidance into three distinct categories of nonaudit services. The categories and examples of each follow:

1. ***Nonaudit services that do not impair auditor independence and, therefore, do not require compliance with the supplemental safeguards.*** For example, routine activities performed in connection with the financial statement audit, such as providing technical advice and periodic training.
2. ***Nonaudit services that would not impair independence if supplemental safeguards are implemented.*** The Yellow Book requires accounting firms to apply seven supplemental safeguards, some of which include the use of separate personnel on audit and nonaudit engagement teams and documentation of the firm's understanding with the client regarding the scope of the engagement and respective responsibilities of the client and the firm. Examples include: helping the client evaluate potential employment candidates and preparing routine tax filings.
3. ***Nonaudit services that impair independence.*** These are services that, due to their nature, are inconsistent with one or both of the overarching principles. Therefore, adherence to the safeguards does not mitigate the independence concerns. Examples include: maintaining or preparing an audit client's basic accounting records, posting client-coded entries to the general ledger, and providing payroll services to the client when the results of those services are material to the financial statements.

.30 The revised Yellow Book is available at www.gao.gov/govaud/ybk01.htm. For further guidance on applying the GAO independence rules, refer to guidance the GAO issued in 2002 entitled, *Answers to Independence Standard Questions*, which can be found at www.gao.gov/govaud/d02870g.pdf. An updated version of this guidance, which will change only the paragraph references to those of the revised Yellow Book, is expected. Additional information about the GAO independence standard is available at www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/Resources+and+Tools/GAO+Independence+Rules.htm.

On the Horizon

Proposed AICPA Ethics Interpretations and Rulings

.31 On August 13, 2007, the PEEC issued proposed Interpretation 101-17, a proposal addressing the concept of a "network firm." Under the proposal, an association of accounting firms is a network (and the firms within the network are "network firms") if the firms in the association share one or more specified characteristics, such as profit-sharing, common control, or the use of a common brand name in the firm name. Under a proposed, related interpretation, network firms would be required to maintain independence of certain attest clients of all firms in the network. The proposal is the PEEC's latest effort to harmonize its ethics rules with those of the International Federation of Accountants (IFAC), which adopted a similar definition in 2006. Comments are due November 15, 2007. The exposure draft may be obtained at www.aicpa.org/download/ethics/August_13_2007_Exposure_Draft.pdf.

.32 On May 15, 2007, the PEEC proposed Interpretation 102-7 under Rule 102: Other Considerations: Meeting the Objectives of the Fundamental Principles. In connection with that proposal, the PEEC also issued *Proposed Framework for Meeting the Objectives of the Fundamental Principles*. The proposed framework provides guidance to all AICPA members who encounter ethical matters that are not explicitly addressed by the Code. The framework is consistent with the IFAC Code of Ethics for Professional Accountants (the IFAC Code) and it brings the AICPA Code closer to convergence with international ethics standards. Similar to the "Conceptual Framework for AICPA Independence Standards," (AICPA, *Professional Standards*, vol. 2, ET sec. 100.01) this framework would require members to consider specific threats to meeting the Code's fundamental principles, such as integrity and due care. Where threats are identified, appropriate safeguards may be applied to eliminate or reduce those threats. Comments on the proposal were due August 15, 2007. The PEEC is expected to discuss the comments and consider whether to issue a final interpretation or framework or both at its November 2007 open meeting.

Other AICPA Projects

International Ethics Convergence and Monitoring

.33 The AICPA is a member body of IFAC, the global organization for the accounting profession. IFAC consists of approximately 163 member bodies, including most of the major accounting associations around the world. The International Ethics Standards Board for Accountants (IESBA), which includes AICPA representation, develops ethical standards and guidance for professional accountants for use around the world, which is published in the IFAC Code. The PEEC has formed a task force to monitor the activities of the IESBA and consider how the AICPA and IFAC codes differ. Where appropriate, the task force will recommend changes to the AICPA Code to harmonize it with the IFAC guidance. Any proposed changes are exposed to membership for comment prior to adoption by the PEEC. For example, the IFAC Code is drafted primarily in a threats and safeguards framework approach. The "Conceptual Framework for AICPA Independence Standards" is consistent with the framework used in the IFAC Code. As indicated above, this past year, the PEEC proposed expanding the conceptual framework approach to all of the fundamental principles underlying the AICPA Code and a definition and interpretation of "network firm."

.34 The IFAC Code may affect U.S. CPAs in a number of ways. For example:

- A firm whose attest client is acquired by a foreign entity could become subject to standards that are based on the IFAC Code.
- A firm belonging to an international network and meeting the IFAC definition of "network firm" would be subject to the independence rules regarding all audit clients being served by the network.
- A firm that acquires a new attest client from another (typically larger) firm may need to conform to the IFAC Code due to the client's international activities (at the parent or subsidiary level) or the expectations of the client's non-U.S. vendors, customers, lenders, or affiliates.

.35 Currently, the IESBA has two exposure drafts pending:

- *Proposed Revised Section 290 of the Code of Ethics for Professional Accountants, Independence—Audit and Review Engagements, and Proposed Section 291, Independence—Other Assurance Engagements*, issued December 2006, proposed several significant changes to the independence rules (sections 290 and 291 of the IFAC Code) addressing, among other things, partner rotation, public interest entities, and partner compensation. The IESBA considered revisions to these sections at its October 24–26, 2007 meeting.
- *Proposed Revised Section 290 of the Code of Ethics for Professional Accountants, Independence—Audit and Review Engagements, and Proposed Section 291, Independence—Other Assurance Engagements, issued July 2007,* proposed three additional amendments to sections 290 and 291 of the IFAC Code by expanding

the guidance on internal audit services, the impact of significant fees to an accounting firm, and contingent fees. Comments on the second proposal were due October 15, 2007.

Changes to Independence Rules on Auditor Indemnification Pending Further Research

.36 Changes to independence rules regarding auditor indemnification and related issues are still pending. Two separate proposals have been exposed to date and the feedback has been diverse. The PEEC has initiated research to better understand the various rules and laws on the use of auditor indemnification and similar provisions in the United States and abroad. The PEEC is also monitoring auditor liability reform initiatives that are currently pending throughout the world.

Potential Guidance on Contingent Fees

.37 The PEEC appointed the Contingent Fee Task Force to consider the appropriateness of Rule 302, *Contingent Fees* (AICPA, *Professional Standards*, vol. 2, ET sec. 302.01), and the related Interpretation No. 302-1, "Contingent fees in tax matters," (AICPA, *Professional Standards*, vol. 2, ET sec. 302.02). Among other things, the Contingent Fee Task Force is considering the clarity of the existing guidance that permits a member to accept a fee in tax matters if the member can "demonstrate a reasonable expectation, at the time of the fee arrangement, of substantive consideration by an agency with respect to the member's client."

Three-Year Project Agenda

.38 The AICPA Professional Ethics Division maintains a three-year project agenda on its Web site that lists all current and future PEEC projects. The agenda can be found at www.aicpa.org/download/ethics/PEEC_TF.pdf.

Proposed PCAOB Independence Rules

.39 On July 24, 2007, the PCAOB proposed a revision to Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles* (AICPA, *PCAOB Standards and Related Rules*). That rule states that independence is impaired if auditors (or their affiliates) provide tax services to company managers in financial reporting oversight roles during the audit and professional engagement period. The term *audit and professional engagement period* has two components. The professional engagement period starts when an auditor is initially engaged to perform audit, review, or other attestation services (or begins performing any of these attest services, if earlier) and lasts until the auditor or client terminates the relationship by notifying the SEC. The audit period is the period covered by the financial statements or other information under audit. Under the proposed revision, the rule would no longer apply to the portion of the audit period that precedes the professional engagement period. Thus, an auditor could cease performing tax services for persons associated with a prospective audit client (that would normally be proscribed under PCAOB Rule 3523) prior to the beginning of the professional engagement period and still be considered independent. Certain allowances for tax services provided to persons associated with an existing audit client filing an initial public offering would also be provided. The proposed change would help ease difficulties companies have experienced when attempting to change audit firms. The proposal also extended the implementation period for this aspect of the rule. On or before April 30, 2008, the PCAOB will not apply Rule 3523 to tax services provided by an auditor during the audit period if the services are completed before the professional engagement period begins.

.40 The PCAOB is also proposing a new independence rule. PCAOB Rule 3526, *Communication with Audit Committees Concerning Independence*, addresses communications between auditors and audit committees and would supersede the PCAOB's existing interim standard (ISB Standard No. 1, *Independence Discussions with Audit Committees*) and two related interpretations. Compliance with the new rule, which is intended to build upon the interim standard, would be required prior to accepting a new audit engagement and at least annually thereafter. It would require the auditor to describe in writing to the audit committee all relationships between the auditor (and its affiliates) and the client (or potential client) that could reasonably be thought to bear on independence. The auditor would be required to discuss these matters with the audit committee and document the substance of that discussion.

.41 Comment periods for both PCAOB proposed rules ended September 7, 2007. More information about these proposals can be found at www.pcaob.org/Rules/Docket_017/2007-07-23_Release_2007-008.pdf.

Status of DOL Request for Comments on Independence Rules Pertaining to Employee Benefit Plan Audits

.42 On September 11, 2006, the DOL issued a request for information (RFI) seeking public comment on the advisability of the DOL amending the auditor independence rules for employee benefit plan audits subject to the Employee Retirement Income Security Act of 1974 (ERISA). This is the first time the DOL has considered its independence requirements since DOL Interpretive Bulletin 75-9 (29 CFR 2509.75-9) was issued in 1975. The DOL RFI notes that the current DOL requirements conflict with AICPA and SEC independence requirements and have caused confusion among practitioners. The comment period closed on December 11, 2006. To date, the DOL has not issued a response to the feedback it received regarding its RFI.

.43 The DOL's RFI can be found at http://ebpaqc.aicpa.org/Resources/Independence/. The comment letters received by the DOL can be found at www.dol.gov/ebsa/regs/cmt-IndPlanAccountants.html.

Digest of the AICPA Independence Rules

.44 A plain-English description of the AICPA independence rules follows. The purpose of this section is to help you to understand independence requirements under the Code and, if applicable, other rule-making and standard-setting bodies. Independence generally implies one's ability to act with integrity and exercise objectivity and professional skepticism. The AICPA and other rule-making bodies have developed rules that establish and interpret independence requirements for the accounting profession. We use the term *rules* broadly to also mean standards, interpretations, rulings, laws, regulations, opinions, policies, or positions. This guide discusses in plain English the independence requirements of the principal rule-making bodies in the United States so you can understand and apply them with greater confidence and ease.

.45 This section of the alert is intentionally concise, so it does not cover all the rules, some of which are complex, nor does it cover every aspect of the rules herein. Nonetheless, this guide should help you identify independence issues that may require further consideration. Therefore, you should always refer to the rules directly, in addition to your firm's policies on independence, for complete information.

Conventions and Key Terms Used

.46 Here are some of the conventions used in this section of the alert:

- The word ***Note*** in boldface italics emphasizes important points, highlights applicable government regulations, or indicates that a rule change may soon occur.

> We describe the rules of the SEC and PCAOB—that is, those that apply to audits of public companies—in boxed text (like this one) and provide citations to specific rules. Generally, we provide these descriptions where the SEC or PCAOB has a rule that differs from in some manner or is presented somewhat differently than the corresponding AICPA rule.

.47 This section uses the following key terms:

- *Client* (or *attest client*). An entity with respect to which independence is required.
- *Firm*. A form of organization permitted by law or regulation (whose characteristics conform to the resolutions of AICPA Council) that is engaged in the practice of public accounting.

What Is Independence?

.48 Independence is defined in the "Conceptual Framework for AICPA Independence Standards," referred to herein as the Conceptual Framework, as:

a. *Independence of mind*. The state of mind that permits the performance of an attest service without being affected by influences that compromise professional judgment, thereby allowing an individual to act with integrity and exercise objectivity and professional skepticism.

b. *Independence in appearance*. The avoidance of circumstances that would cause a reasonable and informed third party, having knowledge of all relevant information, including safeguards applied, to reasonably conclude that the integrity, objectivity, or professional skepticism of a firm or a member of the attest engagement team had been compromised.

.49 These definitions reflect the longstanding professional requirement that members who provide services to entities for which independence is required be independent both in fact (that is, "of mind") and in appearance.

When Is Independence Required, and Who Sets the Rules?

.50 AICPA professional standards require your firm, including the firm's partners and professional employees, to be independent in accordance with Rule 101, *Independence*, of the Code whenever your firm performs an attest service for a client. Attest services include:

- Financial statement audits
- Financial statement reviews
- Other attest services as defined in the Statements on Standards for Attestation Engagements (SSAEs)

.51 Performing a compilation of a client's financial statements does not require independence. However, if a nonindependent firm issues such a compilation report, the report must state, "I am (we are) not independent with respect to XYZ Company."[1]

.52 You and your firm are not required to be independent to perform services that are not attest services (for example, tax preparation or advice, or consulting services, such as personal financial planning) if they are the only services your firm provides to a particular client.

> ***Note:*** You should familiarize yourself with your firm's independence policies, quality control systems, and list or database of attest clients.

In Addition to the AICPA, Who Else Sets Independence Rules?

.53 Many clients are subject to oversight and regulation by governmental agencies. For example, the GAO sets independence rules that apply to entities audited under *Governmental Auditing Standards*. For these clients (and others, such as those subject to regulation by the SEC or DOL), you and your firm must also comply with the independence rules established by those agencies.

---

[1] See AICPA *Professional Standards*, vol. 2, AR sec. 100.19.

.54 The SEC regulates public companies[2] and establishes the qualifications of independent auditors. This section refers to these independence rules as *SEC rules*.

.55 The PCAOB, a private standards-setting body whose activities are overseen by the SEC, is authorized to set auditing, attestation, quality control, ethics, and independence standards for accounting firms that audit public companies. The PCAOB adopted interim ethics standards based on the provisions of the Code, Rule 102, *Integrity and Objectivity*, and Rule 101, *Independence*, and interpretations and rulings under those rules, as of April 16, 2003. It also adopted ISB Standards. To the extent that the SEC's rules are more or less restrictive than the PCAOB's interim independence standards, registered public accounting firms must comply with the more restrictive requirements.

> In addition to its detailed rules, the SEC looks to its general standard of independence and four basic principles to determine whether independence is impaired. The general standard is an appearance standard that considers whether a reasonable investor with knowledge of all relevant facts and circumstances would conclude that an accountant is independent.
>
> Under the four basic principles, an auditor cannot:
>
> 1. Function in the role of management
> 2. Audit his or her own work
> 3. Serve in an advocacy role for the client
> 4. Have a mutual or conflicting role with the client

> ***Note:*** The SEC has recently voted to approve PCAOB Rule 3525, *Audit Committee Preapproval of Non-audit Services Related to Internal Control Over Financial Reporting*, which addresses the manner in which auditors must obtain preapproval of internal control-related services from audit committees.

.56 Other organizations that have established independence requirements that may be applicable to you and your firm include:

- State boards of accountancy
- State CPA societies
- Federal and state agencies

.57 You should contact these organizations directly for further information.

> ***Note:*** Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule.

.58 Once you determine that your firm provides attest services to a client and which rules apply, the next step is to determine how the rules apply to you.

Applying the Rules—Covered Members and Other Firm Professionals

How Do the Independence Rules Apply to Me?

.59 Whenever you are a *covered member*, you become subject to the full range of independence rules with regards to a specific client. You are a covered member if you are:

---

[2] This includes companies that are registered with or are otherwise regulated by the U.S. Securities and Exchange Commission (SEC) or companies that file audited financial statements with the SEC, including foreign filers.

1. An individual on the client's attest engagement team;
2. An individual in a position to influence the client's attest engagement;
3. A partner or manager who provides more than 10 hours of nonattest services to that attest client;
4. A partner in the office in which the lead attest engagement partner primarily practices in connection with the client's attest engagement;
5. The firm, including the firm's employee benefit plans; or
6. An entity whose operating, financial, or accounting policies can be controlled[3] by any of the individuals or entities described in items 1–5 or by two or more such individuals or entities if they act together.

The SEC uses the term *covered person*[4] to describe the individuals in a firm who are subject to SEC independence rules. This term is largely consistent with the AICPA's term *covered member*. The only difference between the two definitions is that of classification. The AICPA considers consultants to be in a position to influence the engagement (SEC uses the term *chain of command*), whereas the SEC considers these persons to be on the attest engagement team. Overall, the definitions are the same.

Note: This alert uses the term *covered member* (and *covered person* with respect to SEC rules) extensively in explaining the *personal* independence rules (for example, rules that apply to you and your family's loans, investments, and employment). Therefore, it is important that you understand these terms before proceeding. Also, remember to check with your firm to determine whether its independence policies are more restrictive than the AICPA or SEC rules.

Do Any of the Rules Apply to Me If I Am Not a Covered Member?

.60 Yes; there are two categories of relationships with a client that, due to their magnitude, impair independence even if you are not a covered member. These relationships are:

- Director, officer, or employee (or in any capacity equivalent to a member of management), promoter, underwriter, voting trustee of the client, or trustee of any of the client's employee benefit plans
- Ownership of more than five percent of an attest client's outstanding equity securities (or other ownership interests)

.61 The independence rules prohibit these relationships if you are a partner or professional employee in a public accounting firm.

What If I Was Formerly Employed by a Client or I Was a Member of the Client's Board of Directors?

.62 There are a number of things you must be aware of, as follows:

1. You may not participate in the client's attest engagement, or be in a position to influence the engagement, for any periods covering the time that you were associated with the client. So, for example, if you worked for the client in 2007, you would be prohibited from serving on the client's

[3] As defined by generally accepted accounting principles (GAAP) for consolidation purposes.

[4] See Rule 2-01(f)(11). Also see *Discussion of Rule 2-01, Covered persons in the firm*, in the SEC's Final Rule Release [Section IV (H)(9)].

audit engagement for the 2007 fiscal year financial statements. You also could not serve in a position that would allow you to influence the 2007 fiscal engagement. For example, you could not directly or indirectly supervise the audit engagement partner.

2. Before becoming a covered member, you must:
   - — Terminate any relationships with the client as described in Interpretation No. 101-1C, "Interpretation of Rule 101," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02).[5]
   - — Dispose of all financial interests[6] in the client.
   - — Collect and repay all loans to or from the client (except those specifically permitted or grandfathered).[7]
   - — Cease active participation in the client's employee benefit plans (except for benefits under the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA)).
   - — Liquidate or transfer any vested benefits in the client's retirement plans.

What Rules Apply If I Am Considering Employment With an Attest Client?

.63 If an attest client offers you employment, or you seek employment with an attest client, you may need to take certain actions. If you are on that client's attest engagement team or can otherwise influence the engagement, you must promptly report any employment negotiations with the client to the appropriate person in your firm. You cannot participate in the engagement until your negotiations with the client end.

What If I Accept Employment or a Board Position With an Attest Client?

.64 Being employed by a client or a member of the client's board of directors impairs independence. However, even if you leave your firm to take a position with a client, independence may still be affected. This would be the case if you accept a "key position" with the client, which means that you prepare financial statements or accounting records or are otherwise able to influence the client's statements or records. A few examples of "key positions" are controller, chief financial officer, or treasurer. Remember the substance, and not only the position title, determines whether a position is "key" or not.

.65 If you meet the following conditions, having a key position with a client will not impair your firm's independence:

- The amounts the firm owes you (capital balance or retirement benefits) are based on a fixed formula and are not material to the firm.
- You cannot influence the firm's operations or financial policies.
- You do not participate or appear to participate in the firm's business or professional activities.

.66 Your firm must consider whether it should apply additional procedures to ensure that your transition to the client has not compromised the firm's independence and that independence will be maintained going forward. Some things the firm should consider are:

- Whether you served on the engagement team and for how long
- Positions you held with the firm and your status

---

[5] This includes the director, officer, or employee, or in any capacity equivalent to that of a member of management, promoter, underwriter, or voting trustee, or trustee for the entity's pension and profit-sharing trust.

[6] See the "When Do My Financial Interests—or My Family's—Impair Independence?" section.

[7] Also see AICPA Ethics Interpretation No. 101-5, "Loans from financial institution clients and related terminology," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.07).

- Your position and status with the client
- The amount of time that has passed since you left the firm

.67 Based on these factors, the firm may decide to:

- Adjust the audit plan to reduce the risk that your knowledge of the plan could lessen the audit's effectiveness
- Reconsider the successor engagement team to ensure it has sufficient stature and experience to deal effectively with you in your new position, if you will interact significantly with the engagement team
- Perform an internal technical review of the next attest engagement to determine whether engagement personnel exercised the appropriate level of professional skepticism in evaluating your work and representations[8]

> Under SEC rules, if a former partner will be in an "accounting role" or "financial reporting oversight role" with an SEC audit client, he or she may not have:
>
> - A capital balance with the firm
> - A financial arrangement with the firm (for example, retirement benefits) that is not fully funded by the firm
> - Influence over the firm's operations or financial policies
>
> The SEC uses the terms *accounting role* and *financial reporting oversight role* in its rules; taken together, these terms are consistent with the AICPA term *key position*. The SEC also requires a one-year "cooling-off period" for members of the audit engagement team who assume a *financial reporting oversight role* with that client. In other words, if an engagement team member who participated on the audit of the current (or immediately preceding) fiscal year goes to work for a client, the firm's independence would be impaired.
>
> Only members who have provided fewer than 10 hours of audit, review, or other attest services to the client (and did not serve as either the lead or concurring partner for the client) are *not* considered to be members of the audit engagement team for purposes of this rule.
>
> This rule applies to the audit client and its consolidated entities.

Applying the Rules—Family Members

When Is My Family Subject to the Rules?

.68 If you are a covered member with respect to a client, members of your immediate family (your spouse—or equivalent—and your dependents) generally must follow the same rules as you. For example, your spouse's investments must be investments that you could own under the rules. This rule applies even if your spouse keeps the investments in his or her own name or with a different broker.

.69 There are two exceptions to this general rule:

1. Your immediate family member's employment with a client would not impair your firm's independence, provided he or she is not in a key position.
2. Immediate family members of *certain* covered members may invest in a client through an employee benefit plan (for example, retirement or savings account), provided the plan is offered equitably to all similar employees. The covered members whose families may invest in this way are:

---

[8] An objective professional with the appropriate stature and expertise should perform this review and the firm should take any recommendation(s) that result from the review.

— Partners and managers who provide only nonattest services to the client

— Partners who are covered members *only* because they practice in the same office where the client's lead attest partner practices in connection with the engagement

.70 In other words, immediate family of individuals on the attest engagement team *or* of those who can influence the attest engagement team *may not* invest in a client under any circumstances.

> Under SEC rules, the immediate family of certain covered persons may have financial interests in SEC audit clients only if such interests are an *unavoidable consequence* of their participation in an employee compensation or benefit plan. This means that if nonclient investments are available through the plan, the immediate family member must choose those investments.

What About My Other Close Relatives?

.71 The close relatives (siblings, parents, and nondependent children) of covered members are subject to some employment and financial restrictions. Your close relative's employment by a client *in a key position* impairs independence. (An exception to this rule is provided to persons who are covered members *solely* because they provide nonattest services to a client.)

.72 Rules pertaining to your close relatives' financial interests depend on whether you participate on the client's attest engagement as follows:

- If you participate on the client's attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either:
  - — Was material to your relative's net worth; or
  - — Enables the relative to exercise significant influence over the client.
- If you are able to influence the client's attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence would be impaired if you are aware that your close relative has a financial interest in the client that:
  - — Is material to your relative's net worth; and
  - — Enables your relative to exercise significant influence over the client.

> Under SEC rules, your close family members include your spouse (or equivalent), dependents, parents, nondependent children, and siblings. If you are a covered person, your independence is affected if your close family member:
>
> - Has an *accounting role* or *financial reporting oversight role* with the client. For example, the family member is a treasurer, chief financial officer, accounting supervisor, or controller.
> - Owns more than five percent of a client's equity securities or controls the client.
>
> In addition, independence is considered to be impaired if any partner's close family member controls a client.

Financial Relationships

When Do My Financial Interests—or My Family's—Impair Independence?

.73 This section discusses various types of financial relationships and how they affect independence. Although this section focuses on how these rules apply to you and your family, keep in mind that your firm is also subject to the financial relationship rules (since firms are included in the definition of *covered member*).

.74 As a covered member, you (and your spouse and dependents) are not permitted to have a:

- Direct financial interest in that client, regardless of how immaterial it would be to your net worth.
- Material indirect financial interest in that client.

  Note: The Code does not define or otherwise provide guidance on determining materiality. In determining materiality, you should apply professional judgment to all relevant facts and circumstances and refer to applicable guidance in the professional literature. Both qualitative and quantitative factors should be considered.

.75 In addition, if you commit to acquire a direct financial interest in a client, your independence would be impaired. For example, if you sign a stock subscription agreement with the client, your independence would be considered impaired as soon as you sign the agreement.

.76 Examples of financial interests include shares of stock, mutual fund shares, partnership units, stock rights, options or warrants to acquire an interest in a client, or rights of participation, such as puts, calls, or straddles.

.77 Direct financial interests are financial interests that are:

1. Owned by you directly; or
2. Under your control; or
3. Beneficially owned[9] by you through an investment vehicle, estate, trust, or other intermediary if you can either:
   a. Control the intermediary; or
   b. Have the authority to supervise or participate in the intermediary's investment decisions.

.78 For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest in the investments held in your account.

.79 You also have a direct financial interest in a client if you have a financial interest in a client through one of the following:

- A partnership, if you are a general partner
- A Section 529 savings plan, if you are the account owner
- An estate, if you serve as an executor and meet certain other criteria
- A trust, if you serve as the trustee and meet certain other criteria

.80 For example, suppose you are a covered member with respect to ABC Co. and you are also a general partner of XYZ Partnership. XYZ Partnership owns shares in ABC Co. Under the independence rules, you would be deemed to have a direct financial interest in ABC, which would impair your independence, regardless of materiality.

---

[9] A financial interest is beneficially owned if an individual or entity is not the record owner of the interest, but has a right to some or all of the underlying benefits of ownership. These benefits include the authority to direct the voting or the disposition of the interest or to receive the economic benefits of the ownership of the interest.

.81 An indirect financial interest arises if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary, when you can neither control the intermediary nor have the authority to supervise or participate in the intermediary's investment decisions.

.82 For example, if you invest in a defined contribution plan that is not participant-directed and you have no authority to supervise or participate in the plan's investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments.

> ***Note:*** Interpretation No. 101-15, "Financial Relationships," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.17), of the Code provides extensive examples of various types of financial interests and whether they should be considered to be direct or indirect financial interests, including investments in mutual funds, retirement and savings plans, Section 529 plans, trusts, partnerships, and insurance products.

> The SEC classifies your investment in a client held through another entity (the intermediary) as *direct* if either of the following is true:
>
> - You participate in the intermediary's investment decisions or have control over them.
> - The investment in the client by the intermediary, which is not a diversified mutual fund, represents 20 percent or more of the value of its total investments.
>
> If neither of the above applies, your investment in a client through another entity would normally be considered to be an indirect financial interest in that client.

What If My Immediate Family or I Receive a Financial Interest as a Result of an Inheritance or a Gift?

.83 If, due to an unexpected event, you or members of your immediate family receive a financial interest in an attest client that would impair your independence, you may qualify under an exemption in the rules if you meet the following criteria:

- The financial interest was unsolicited.
- You dispose of the interest as soon as practicable—but no later than 30 days after you become aware of it and have the right to dispose.
- If you do not have the right to dispose of the interest (for example, as in the case of stock options or restricted stock), you do not participate in the attest engagement for the client.

What Are the Rules That Apply to My Mutual Fund Investments—and Those of My Family—If My Firm Audits Those Mutual Funds?

.84 If you are a covered member with respect to a mutual fund attest client of your firm, and you or your immediate family own shares in the fund, you have a direct financial interest in the fund client.

> The SEC rules also prohibit the firm and covered persons and their immediate family members from having any financial interest in an entity (even one that is not a client) that is part of an *investment company complex* that includes an audit client.

Which Rules Pertain to My Mutual Fund Investments—and Those of My Family—If My Firm Audits Companies Held in Those Mutual Funds?

.85 Financial interests that you and your immediate family have in clients through a mutual fund are considered to be indirect financial interests in those clients unless the fund is a diversified mutual fund.

.86 If a mutual fund is diversified, and you or your immediate family own five or fewer percent of its outstanding shares, the fund's holdings in clients for which you are a covered person will *not* be considered material indirect financial interests in those clients. Thus, you would be relieved of the burden of having to monitor whether, and to what degree, the fund invests in audit clients for which you are a covered person.

.87 If the fund is *not* diversified, or you or your family own more than five percent of the fund's equity, you should treat the fund's holdings as indirect financial interests. Here is an illustration.

.88 Suppose ABC Mutual Fund, a nondiversified mutual fund, owns shares in a client, XYZ:

- ABC's net assets are $10,000,000.
- Your shares in ABC Mutual Fund are worth $50,000.
- ABC has 10 percent of its assets invested in XYZ.
- Your indirect financial interest in XYZ is $5,000 ($50,000 x .10).

If $5,000 is material to your net worth, independence would be considered to be impaired.

May I Have a Joint Closely Held Investment With a Client?

.89 As a covered member, if you or the client, individually or collectively, control an investment, that investment is considered to be a joint closely held investment. If this joint closely held investment is material to your net worth, independence would be considered to be impaired. In this rule, *client* includes certain persons associated with the client, such as officers, directors, or owners who are able to exercise significant influence over the client.

> The SEC rules prohibit you and your immediate family from having a joint-business venture with a client or with persons associated with the client in a decision-making capacity—meaning officers, directors, or substantial shareholders, whether or not the venture is material to your net worth. The SEC believes that these joint ventures, whether material or not, cause the client and the audit firm to have mutuality of interests, which impairs independence.

May My Family or I Borrow Money From or Lend Money to a Client?

.90 If you are a covered member with respect to an attest client, you and your immediate family may not have a loan to or from the client or:

- An officer or director of the client
- An individual holding 10 percent or more of the client's outstanding equity securities (or other ownership interests)

Investments in a client's bonds are considered a direct financial interest in that client.

.91 There are certain exceptions to this rule. First, there are specific loans that covered members are permitted to have from financial institution attest clients. They are:

- Car loans and leases collateralized by the vehicle
- Credit card and overdraft reserve account balances not exceeding $10,000 (that is, by payment due date, including any grace period)

- Passbook loans fully collateralized by cash deposits at the same financial institution
- Loans fully collateralized by an insurance policy

.92 In addition, if you have a loan from a client financial institution (a bank, for example) that meets certain criteria, your loan *may* be "grandfathered" (that is, you may be allowed to keep it). For your loan to be grandfathered, you must have obtained it under normal lending procedures, terms, and requirements. The following loans *may* be grandfathered:

- Home mortgages
- Other secured loans
- Unsecured loans that are immaterial to your net worth

.93 Generally speaking, a loan may be grandfathered if you obtained it before:

1. You became a covered member with respect to the client.
2. The financial institution became a client.
3. The client acquired the loan.

.94 To maintain your loan's grandfathered status, you must keep the loan current (make timely payments according to the loan agreement). Also, you cannot renew or renegotiate the terms of the loan (for example, the interest rate or formula) unless the change was part of the original agreement (for example, an adjustable rate mortgage).

> The SEC rules differ from the AICPA rules in that secured loans (other than a mortgage on your primary residence) and immaterial unsecured loans may not be grandfathered.

May I Have a Brokerage Account With a Client?

.95

> Under the SEC rules, you may have a brokerage account with a client if your account (1) only holds cash or securities and (2) is fully insured by the Securities Investor Protection Corporation (SIPC).

May I Have a Bank Account With a Client?

.96 As a covered member, you may have a bank account with a client financial institution (for example, checking, savings, or money market accounts and certificates of deposit) if your deposits are fully insured by state or federal deposit insurance agencies or uninsured amounts are not material to your net worth.[10]

> The SEC prohibits covered persons and their immediate families from having bank account balances in excess of Federal Deposit Insurance Corporation (FDIC) insurance limits; that is, deposits in excess of FDIC limits are considered to impair independence, even if immaterial to you and your family.[11]

---

[10] Both AICPA and SEC rules permit a practical exception for firms that maintain deposits exceeding insured limits when the likelihood of the financial institution experiencing financial difficulties is considered remote.

[11] The SEC treats money market *funds* (as opposed to money market *accounts*) as mutual funds for the purposes of their rules. Also, see Rule 2-01(c)(1)(B).

May I Have an Insurance Policy With a Client?

.97 The AICPA rules indicate that in order to maintain independence, a covered member must not receive any preferential treatment or terms when purchasing an insurance policy from a client. If the policy has an investment option, the financial interest rules must be applied.

> The SEC prohibits covered persons and their immediate family members from owning an individual insurance policy issued by a client unless both of the following criteria are met:
>
> - He or she obtained the policy before the professional became a covered person.
> - The likelihood of the insurer becoming insolvent is remote.

May I Give or Accept Gifts or Entertainment From a Client?

.98 An ethics ruling[12] addresses the exchange of gifts and entertainment between covered members, the client, and certain persons associated with the client (for example, persons in key positions and persons who are 10 percent or more stockholders of the client).

.99 Independence is impaired if the firm, a member of the attest engagement team, or a person able to influence the engagement accepts a gift that is not clearly insignificant.

.100 A covered member may give a gift to persons associated with the client and not impair independence if the gift is reasonable in the circumstances. In addition, covered members may give or receive entertainment, provided it was reasonable in the circumstances.

.101 Another ethics ruling[13] addresses the broader issue of integrity and objectivity when partners, professionals, or their firms exchange gifts or entertainment with clients or persons associated with clients. Generally, gifts are differentiated from entertainment by whether the client participates in the activity with the firm member (for example, giving tickets to a sporting event for the client to use would be considered a gift versus attending the event with the client, which would be considered entertainment).[14]

.102 Relevant factors in determining *reasonableness* include the event or occasion (if any) giving rise to the gift or entertainment, cost or value, frequency, whether business was conducted, and who participated.

Business Relationships

Which Business Relationships With a Client Impair Independence?

.103 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as:

- Employee, director, officer, or in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent

---

[12] See Ethics Ruling No. 114, "Acceptance or Offering of Gifts and Entertainment to or From an Attest Client," of ET section 191.228–.229, *Ethics Rulings on Independence, Integrity, and Objectivity* (AICPA, *Professional Standards*, vol. 2).

[13] See Ethics Ruling No. 113, "Acceptance or Offering of Gifts or Entertainment" of ET section 191.226–.227, *Ethics Rulings on Independence, Integrity, and Objectivity* (AICPA, *Professional Standards*, vol. 2).

[14] See www.aicpa.org/download/ethics/Gifts_Basis_Document.pdf.

- General counsel (or equivalent)
- Trustee for a client's pension or profit-sharing trust

.104 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client's operations or business affairs, independence is impaired.

.105 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client's governing body and, therefore, would be able to participate in the client's management decisions.

.106 There are two possible exceptions to this rule:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may serve that client without impairing your independence if:
   a. Your position is purely honorary.
   b. You do not vote or participate in managing the organization.
   c. Your position is clearly identified as honorary in any internal and external correspondence.
2. In addition, you are also permitted to serve on a client's advisory board, provided all of the following criteria are met:
   a. The advisory board's function is purely advisory.
   b. The advisory board does not appear to make decisions for the client.
   c. The advisory board and any decision-making boards are separate and distinct bodies.
   d. Common membership between the advisory board and any decision-making groups is minimal.

.107 When evaluating your independence under this rule, you should examine the applicable board or committee charter to determine whether it is consistent with this ethics ruling.

> The SEC prohibits direct or material indirect business relationships with a client (or persons associated with a client), except when the firm is acting as a consumer in the ordinary course of business (for example, purchasing goods or services from a client at normal commercial terms where these goods or services will be consumed by the firm). Examples of prohibited business relationships are joint business ventures, limited partnership agreements, and certain leasing interests.

Nonattest Services

Which Rules Describe the Nonattest Services That My Firm and I May or May Not Provide to Attest Clients?

.108 The term *nonattest services* includes accounting and consulting services that are not part of an attest engagement.[15] Nonattest services specifically addressed in the rules are:

---

[15] Defined in the AICPA *Code of Professional Conduct*, an attest engagement is one that requires independence under AICPA professional standards; for example, audits and reviews of financial statements or agreed-upon procedures performed under the attestation standards are considered attest engagements.

- Bookkeeping services
- Non-tax disbursement
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Tax compliance services
- Corporate finance consulting or advisory services
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration
- Forensic accounting services

> In addition to considering the general standard and four guiding principals, the SEC rules prohibit or significantly restrict an accounting firm from providing the following services to an issuer contemporaneously with an audit:
>
> - Bookkeeping and other services related to the client's accounting records or financial statements
> - Financial information systems design and implementation
> - Appraisal or valuation services
> - Actuarial services
> - Internal audit outsourcing
> - Management functions
> - Human resources
> - Broker-dealer, investment adviser, or investment banking
> - Legal services
> - Expert services unrelated to the audit
> - Aggressive or confidential tax transactions (PCAOB)
> - Personal tax services provided to persons in financial reporting oversight roles (PCAOB)

.109 If your firm performs nonattest services for an attest client, the independence rules impose limits on the nature and scope of the services your firm may provide. In other words, the extent to which your firm may perform certain activities for the client may be limited by the rules. Further, certain services will be prohibited in total (for example, serving as a client's general counsel).

.110 This section does not discuss each of these services, but rather focuses on a few for purposes of illustration. To see the full context of the rules, see "Resource Central" at the end of this alert.

.111 The AICPA rules require a member to comply with more restrictive independence provisions, if applicable, of certain regulators, such as state boards of accountancy, the SEC, GAO, and DOL.

SEC and PCAOB rules require independence of the client and various affiliated entities.[16]

Note: SEC rules also require a client's audit committee (or equivalent) to preapprove all audit and nonaudit services provided by the firm to the audit client and the client's consolidated entities. Proposals to provide tax or internal control-related services are subject to more extensive audit committee preapproval requirements under PCAOB rules 3524, *Audit Committee Pre-approval of Certain Tax Services* (AICPA, *PCAOB Standards and Related Rules*), and 3525, respectively. (PCAOB Rule 3524 is currently effective; PCAOB Rule 3525 becomes effective for audits of fiscal years on or after November 15, 2007.)

AICPA General Requirements

.112 *General Requirement 1.* One of the key principles underlying the AICPA rules on nonattest services is: You may not serve—or even appear to serve—as a member of a client's management. For example, you may not:

- Make operational or financial decisions for the client.
- Perform management functions for the client.
- Report to the board of directors on behalf of management.

.113 In addition, the following are examples of the types of activities that impair independence:

- Authorizing or executing a transaction on behalf of a client
- Preparing the client's source documents (for example, purchase orders)
- Having custody of a client's assets
- Establishing or maintaining internal controls, including monitoring ongoing activities.

.114 *General Requirement 2.* To help ensure compliance with General Requirement 1, the second requirement states that the client must agree to assume certain responsibilities related to the nonattest services engagement. So, prior to agreeing to perform any nonattest services for the client, the firm must obtain the client's agreement to:

1. Make all management decisions and perform all management functions.
2. Designate an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services.
3. Evaluate the adequacy and results of the services performed.
4. Accept responsibility for the results of the services.

.115 With regards to Item 2 above, the firm should be satisfied that the client's designee understands the services to be performed sufficiently to oversee them. This does not mean that the individual must be able to perform or reperform the services, but he or she should be able to understand and agree to the nature, objectives, and scope of the services, make all significant judgments, evaluate the adequacy and results of the service, accept responsibility for the service results, and ensure that the resulting work product meets the agreed-upon specifications. The client must also be willing to commit the time and resources needed for the designee to fulfill these duties.

.116 *General Requirement 3.* Before performing nonattest services, the firm should establish and document its understanding with the client regarding the following:

[16] See Rule 2-01(f)(4) and (6).

1. Objectives of the engagement
2. Services to be performed
3. Client's acceptance of its responsibilities
4. Member's responsibilities
5. Any limitations of the engagement

.117 The firm should document the understanding in the engagement letter, audit planning memo, or other internal firm file.

> ***Note:*** Routine activities (for example, assisting clients with technical accounting questions, advising on internal controls, or providing periodic training on new pronouncements) that are part of the normal auditor-client relationship are exempt from the second and third general requirements.

What Are the Rules on Performing Bookkeeping Services for a Client?

.118 The AICPA independence rules prohibit members from acting as client management in all circumstances. Accordingly, a member may provide bookkeeping services, provided the client oversees the services and, among other things, performs all management functions and makes all management decisions in connection with the services. For example, if a member is engaged to provide bookkeeping services that will result in a set of financial statements, the client must:

- Approve all account classifications.
- Provide source documents to the member so that the member can prepare journal entries.
- Take responsibility for the results of the member's services (for example, financial statements).

> ***Note:*** Proposing adjusting entries to financial statements as a part of the member's audit, review, or compilation services is a normal part of those engagements and would not be considered the performance of a nonattest service subject to the general provisions of Interpretation No. 101-3. However, the client should review these entries, understand the impact on the financial statements, and, if they agree that they are appropriate, record the adjustments identified by the member.

> Because of self-audit concerns, performing any type of bookkeeping service for a client (or affiliate of a client) is considered to impair independence under SEC rules, unless it is reasonable to expect that the results of the auditor's services will not be subject to the firm's audit procedures. The SEC considers there to be a rebuttable presumption that the results of these services would be subject to audit procedures and, therefore, the firm must overcome the presumption to perform the service.
>
> This presumption of self-audit also applies to (1) financial information design and implementation; (2) appraisals, valuations, fairness opinions, or contribution-in-kind reports; (3) actuarial-related advisory services; and (4) internal audit outsourcing.
>
> In August 2007, the SEC staff updated its FAQ document entitled, *Office of the Chief Accountant: Application of the Commission's Rules on Auditor Independence Frequently Asked Questions*. FAQ 7 under "Prohibited and Non-audit Services" addressed the question of whether a successor auditor who performed one of the above services during the audit period (that is, period covered by the financial statements) would be independent of the client. The FAQ states that if the services (*a*) relate solely to the prior period audited by the predecessor auditor and (*b*) were performed before the successor auditor was engaged to audit the current audit period, independence would not be impaired.

May My Firm Provide Internal Audit Assistance to a Client?

.119 To perform internal audit assistance for a client and maintain independence, your firm may not act—or appear to act—as a member of the client's management. For example, you and your firm may not:

- Make decisions on the client's behalf.
- Report to the client's governing body.

.120 To maintain independence, the client must:

- Designate an individual or individuals who possess suitable skill, knowledge, and experience to oversee the internal audit function.
- Determine the scope, risk, and frequency of internal audit activities.
- Evaluate the findings and results of internal audit activities.
- Evaluate the adequacy of the audit procedures performed and related findings.

> Internal audit services impair independence under SEC rules unless it is reasonable to expect that the results of the auditor's services would not be subject to the firm's audit procedures.

Note: For entities regulated by the FDIC or other banking agencies, see www.fdic.gov/news/news/financial/2003/fil0321.html.

May My Firm Provide Valuation, Appraisal, or Actuarial Services to a Client?

.121 Your firm may not provide valuation, appraisal, or actuarial services for a client if:

- The results of the service would be material to the client's financial statements; and
- The service involves a significant amount of subjectivity.

.122 For instance, your firm may not perform a valuation in connection with a business combination that would have a material effect on a client's financial statements because that service generally involves significant subjectivity (for example, setting the assumptions and selecting and applying the valuation methodology).

.123 There are two limited exceptions to this rule. Valuation, appraisal, or actuarial services performed for *nonfinancial statement purposes* may be provided if they otherwise meet the rule's general requirements (for example, the client assigns an individual to oversee the service who is in a position to make an informed judgment on and accept responsibility for the results of the service). Also, your firm may provide an actuarial valuation of a client's pension or postretirement liabilities because the results of the valuation would be reasonably consistent regardless of who performs the valuation.

> The SEC prohibits your firm from providing valuation, appraisal, or *any* service involving a fairness opinion or contribution-in-kind report[17] to clients *unless* it is reasonable to expect that your firm would not audit the results of those services.

May My Firm Provide Investment Advisory Services to a Client?

.124 Here are examples of what you and your firm may do under the AICPA rules:

---

[17] Per the SEC, fairness opinions and contribution-in-kind reports are opinions and reports in which your firm provides its opinion on the adequacy of consideration in a transaction.

- Make recommendations to a client about the allocation of funds to various asset classes.
- Analyze investment performance.

.125 However, the AICPA rules also indicate that you and your firm may not:

- Make investment decisions for the client.
- Execute investment transactions.
- Take custody of a client's assets.

May My Firm Design or Implement an Information System for a Client?

.126 Your firm may not design or develop a client's financial information system or make more than insignificant modifications to the source code underlying such a system. In addition, operating a client's local area network (LAN) is prohibited.

.127 Your firm may install an accounting software package for a client, including helping the client set up a chart of accounts and financial statement format. Your firm may also provide training to the client's employees on how to use an information system. Your firm may not, however, supervise the client's employees in their day-to-day use of the system, since that activity is a management function.

.128 Your firm is not precluded from designing, implementing, integrating, or installing an information system that is unrelated to the client's financial reporting process.[18]

> SEC rules prohibit your firm from providing any service related to a client's financial information system design or implementation *unless* the results of your firm's services would *not* be subject to audit procedures during an audit of the client's financial statements. Your firm may either:
>
> - Evaluate internal controls underlying the client's financial information system as it is being designed, implemented, or operated for the client by another service provider.
> - Make recommendations on internal control matters to management in connection with a system design and implementation project being performed by another service provider.
>
> ***Note:*** Effective for audits of fiscal years ending on or after November 15, 2007, your firm must obtain preapproval for these and other internal control-related services in accordance with Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting*.

Fee Issues

What Types of Fee Arrangements Between My Firm and a Client Are Prohibited?

.129 Two types of fee arrangements, contingent fees and commissions, are prohibited if the arrangement involves certain attest clients, even though the fee is not related to an attest service.

.130 A contingent fee is an arrangement whereby (1) no fee is charged unless a specified result is attained or (2) the amount of the fee depends on the results of your firm's services. Some examples of contingent fees are:

[18] An FAQ to assist members in understanding and implementing the new information technology services provisions may be obtained at www.aicpa.org/download/ethics/QA_IT.pdf.

- Your firm receives a finder's fee for helping a client locate a buyer for one of the client's assets.
- Your firm performs a consulting engagement to decrease a client's operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

.131 Exceptions are:

- Fees fixed by a court or other public authority
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies

.132 A commission is any compensation paid to you or your firm for (1) recommending or referring a third party's product or service to a client or (2) recommending or referring a client's product or service to a third party.

.133 For example, you or your firm:

- Refers a client to a financial planning firm that pays you a commission for the referral.
- Sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- Refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

.134 Commissions or contingent fee arrangements with a client are not allowed if your firm also provides one of the following services to a client:

- An audit of financial statements
- A review of financial statements
- A compilation of financial statements if a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence
- An examination of prospective financial statements

.135 You may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not an attest client). For example, you may receive a commission from a nonclient insurer if you refer an officer of an attest client to the insurer and the officer purchases a policy. Even though this situation is permitted, you are still required to tell the officer that you received a commission for making the referral.

> ***Note:*** State boards of accountancy and state societies may also have more restrictive regulations regarding fee arrangements, as well as specific disclosure requirements.

PCAOB Rule 3521, *Contingent Fees*, (AICPA, *PCAOB Standards and Related Rules*) prohibits you and your firm from providing any service or product to an audit client for a contingent fee or a commission, or receiving from the audit client, directly or indirectly, a contingent fee or commission. Although the PCAOB's definition of contingent fees was adapted from the SEC's definition, the PCAOB rule eliminated the exception for fees in tax matters, if determined based on the results of judicial proceedings or the findings of governmental agencies. In addition, the PCAOB rule specifically indicates that the contingent fees cannot be received directly or indirectly from the audit client. PCAOB Rule 3521 does not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.

.136 If a client owes your firm fees for services rendered more than one year ago, your firm's independence is considered impaired. It does not matter whether or not the services were for attest services; what matters is that the client has an outstanding debt with the firm. This is the case even if the client has given you a note receivable for these fees.

> The SEC generally expects payment of past-due fees before an engagement has begun, although a short-term payment plan may be accepted if the client has committed to pay the balance in full before the current year report is issued.[19]

When Are Referral Fees Permitted?

.137 The AICPA rule provides that a CPA who (1) accepts a referral fee for recommending or referring any service of a CPA to any person or entity or (2) pays a referral fee to obtain a client shall disclose such acceptance or payment to the client receiving the referral.

Does Being Compensated for Selling Certain Services to Clients Affect My Independence?

.138 The AICPA rules do not specifically address this issue.

> The SEC prohibits audit partners from being *directly* compensated for selling nonattest services to audit clients. The SEC believes that such financial incentives could threaten an audit partner's objectivity and that the appearance of independence could be affected by such compensation arrangements.[20]
>
> The rule does not prevent an audit partner from sharing in profits of the audit practice or the overall firm. Nor does it preclude the firm from evaluating a partner based on factors *related* to the sale of nonaudit services to clients (for example, the complexity of engagements or overall management of audit or nonaudit engagements).

Does It Matter If a Significant Proportion of My Firm's Fees Come From a Particular Client?

.139 The "Conceptual Framework for AICPA Independence Standards" states that a financial self-interest threat may exist due to "excessive reliance on revenue from a single attest client." In addition, Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 102), and Rule 55, *Article IV—Objectivity and Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 55), discuss in broad terms that members should be alert for relationships that could diminish their objectivity and independence in performing attest services. The significance of a client to a member (or his or her firm)—measured in terms of fees, status, or other factors—may diminish a member's ability to be objective and maintain independence when performing attest services.

.140 To address this issue, firms should consider implementing policies and procedures to identify and monitor significant clients to help mitigate possible threats to a member's objectivity and independence:

1. Policies and procedures for identifying and monitoring significant client relationships include:
   — Considering client significance in the planning stage of the engagement

---

[19] The exception has generally been applied only to engagements to audit a client's financial statements included in its annual report, not in a registration statement.

[20] Accounting firms with 10 or fewer partners and 5 or fewer audit clients that are *issuers*, as defined by the SEC, are exempt from this rule.

— Basing the consideration of client significance on firm-specific criteria or factors that are applied on a facts and circumstances basis (see the following section entitled "Factors to Consider in Identifying Significant Clients")

— Periodically monitoring the relationship

What constitutes *periodic* is a matter of judgment but assessments of client significance that are performed at least annually can be effective in monitoring the relationship. During the course of such a review, a client previously deemed to be significant may cease to be significant. Likewise, clients *not* identified as significant could become significant whenever factors the firm considers relevant for identifying significant clients arise (for example, additional services are contemplated).

2. Policies and procedures to help mitigate possible threats to independence and objectivity by:

— Assigning a second (or concurring) review partner who is not otherwise associated with the engagement and practices in an office other than that which performs the attest engagement

— Subjecting the assignment of engagement personnel to approval by another partner or manager

— Periodically rotating engagement partners

— Subjecting significant client attest engagements to internal firm monitoring procedures

— Subjecting significant client attest engagements to preissuance or postissuance reviews or to the firm's external peer review process

.141 The most effective safeguards a firm can employ will vary significantly depending on the size of the firm, the way the firm is structured (for example, whether highly centralized or departmentalized), and other factors. For example, smaller firms (particularly those with one office) tend to be simpler and less departmentalized than larger firms. Generally, their processes will be less formal and involve fewer people than larger firms. Further, their firms' managing partners may engage in frequent and direct communications with the firms' partners and professional staff on client matters and be personally involved in staff assignments. Larger firms draw from a sizeable and diverse talent pool. In those firms, partners who are not affiliated with the engagement (or the client service office or business unit) can choose second (or concurring) review partners from outside the office performing the attest engagement. Mid-sized—or regional—firms may have aspects of both their smaller and larger counterparts (for example, combining the ability to choose second-review partners from an office other than the client service office, while maintaining a relatively close connection to specific client relationships).

Factors to Consider in Identifying Significant Clients

.142 Both qualitative and quantitative factors can reveal a significant client, including:

- The size of the client in terms of the percentage of fees or the dollar amount of fees versus total revenue of the engagement partner, office, practice unit,[21] or the firm
- The significance of the client to the engagement partner, office, or practice unit of the firm in light of the:

— Amount of time the partner, office, or practice unit devotes to the engagement

— Effect on the partner's stature within the firm due to his or her's servicing of the client

— Manner in which the partner, office, or practice unit is compensated

— Effect that losing the client would have on the partner, office, or practice unit

[21] Assessing client significance at the business or practice unit level may be a more meaningful measure for firms that structure their practices along industry lines (such as health care or financial services).

- The importance of the client to the firm's growth strategies (for example, the firm is trying to gain entry into a particular industry)
- The stature of the client, which may enhance the firm's stature (for example, the client is a company of distinction within its industry, or in the local, regional, national, or international business community)
- Whether the firm also provides services to related parties (for example, also provides professional services to affiliates or owners of the client)
- Whether the engagement is recurring or not

.143 Judgment is necessary to determine whether a client is significant to the firm, office, practice unit, or partner of the firm. Firms will vary considerably in terms of the degree to which they consider some factors to be more pertinent than others. Gauges that relate to each relevant level within a firm (for example, firm, geographic region, office, practice unit, or partner), may be useful, but will likely be different for various levels within the firm.

> According to SEC guidance, in general, if a firm derives more than 15 percent of its total revenues from one client or group of related clients, independence may be impaired because this may cause the firm to be overly dependent on the client or group of related clients.

Other Guidance

Where Can I Find Further Assistance With My Independence and Ethics Questions?

.144 This section of the alert does not address many subjects included in the AICPA rules. Readers are encouraged to view the online version of the *Code of Professional Conduct* at www.aicpa.org/about/code/index.html.

What Should I Do If No Specific Guidance Exists on My Particular Independence Issue?

.145 The "Other Considerations" section of Interpretation No. 101-1, "Interpretation of Rule 101" under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02), recognizes that it is impossible for the Code to identify all circumstances in which the appearance of independence might be questioned. The Conceptual Framework is referred to in the "Other Considerations" of Interpretation No. 101-1 of the Code.

.146 Specifically, Interpretation No. 101-1 requires that members use the risk-based approach described in the Conceptual Framework when making independence decisions involving matters that are not specifically addressed in the independence interpretations and rulings in the Code. Where threats to independence are not at an acceptable level, safeguards must be applied to eliminate the threats or reduce them to an acceptable level. In cases where threats to independence are not at an acceptable level, thereby requiring the application of safeguards, the threats identified and the safeguards applied to eliminate the threats or reduce them to an acceptable level must be documented.

.147 The Conceptual Framework provides a valuable tool to help you in complying with the requirement in the "Other Considerations" section to evaluate whether a specific circumstance that is not addressed in the Code would pose an unacceptable threat to your independence. These new provisions became effective for all independence decisions made after April 30, 2007.

Resource Central

Independence and Ethics Contact List

.148 As specific services and situations arise in practice, refer to the independence literature and consult with those responsible for independence in your firm. If you need further assistance researching your question, contact one of the following organizations for guidance:

AICPA

.149 The AICPA has a variety of resources for practitioners:

- The Web site address for information about the AICPA's ethics standard-setting activities is www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/Exposure+Drafts+-+Standard+Setting/.
- For resources related to understanding and applying nonattest services rules, see www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/Resources+and+Tools/Guidance+on+Understanding+and+Implementing+Rule+101-3+Independence+and+Non-Attest+Services.htm.
- The Code is available at www.aicpa.org/about/code/index.html.
- For independence inquiries by phone, call (888) 777-7077. Send e-mail inquiries to ethics@aicpa.org.

SEC

.150 The SEC provides guidance on requirements for issuers:

- The SEC's January 2003 rules release is available at www.sec.gov/rules/final/33-8183.htm.
- SEC information for accountants and auditors, including independence, may be found at www.sec.gov/about/offices/oca/ocaprof.htm.
- U.S. Securities and Exchange Commission, Office of the Chief Accountant, 100 F Street NE, Washington, DC 20549; (202) 551-5300 (phone); (202) 772-9252 (fax).

PCAOB

.151 The PCAOB has established a Web site at www.pcaob.org, which provides information about its activities. The standards and rules of the PCAOB, including those on independence, can be found at www.pcaob.org/Standards/Standards_and_Related_Rules/index.aspx.

GAO

.152 The GAO provides guidance for audits conducted in accordance with *Government Auditing Standards*, including:

- Yellow Book Independence Standard (see www.gao.gov/govaud/ybk01.htm)
- Answers to frequently asked independence questions (see www.gao.gov/govaud/d02870g.pdf)
- Slide presentation on independence standard (www.gao.gov/govaud/niaf021025.pdf)
- Direct inquiries to Michael Hrapsky, Senior Project Manager—Government Auditing Standards at (202) 512-9535 or e-mail yellowbook@gao.gov

DOL

.153 See DOL Regulation 2509.75-9, Interpretive Bulletin Relating to Guidelines on Independence of Accountant Retained by Employee Benefit Plan. You may direct inquiries to the DOL at (866) 4-USA-DOL.

Federal Deposit Insurance Corporation

.154 You can obtain Federal Deposit Insurance Corporation regulations (12 CFR Part 363), *Annual Independent Audits and Reporting Requirements*, at www.fdic.gov/regulations/laws/rules/2000-8500.html. A 2006 advisory regarding the use of limitation of liability provisions in engagement letters with public and nonpublic financial institutions is available at www.federalreserve.gov/boarddocs/srletters/2006/SR0604a1.pdf.

Continuing Professional Education

.155 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs. Among the available titles, the following self-study courses pertain to independence and ethics:

- *Independence* (product no. 739177HSkk)
- *Selected Topics in Professional Ethics* (product no. 738382HSkk)
- *Professional Ethics: AICPA's Comprehensive Course* (product no. 732310kk)
- *Ethics: Non-Attest Services, Integrity and Objectivity* (product no. 739411HSkk)
- *Ethics for Tax Practice Professionals: Circular 230 and the SSTSs* (product no. 738700HSkk)
- *Professional Ethics for CPAs in Business & Industry* (product no. 738900kk)
- *Real World Business Ethics for CPAs in A&A: How Will You React?* (product no. 733600kk)
- *Real World Business Ethics for CPAs in Business & Industry: How Will You React?* (product no. 733590kk)

Online CPE

.156 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into one- and two-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics that address ethics and independence issues are:

- *2007 Annual Update-A&A: Issues for Audits of Public Entities on the Horizon*
- *In a CPA's Professionalism We Must Trust*
- *Ethics: Pointer Electronics, Inc.—You Are the Audit Partner*
- *Ethics: Superlative Software, Corp. —You Are the CFO*
- *Yellow Book: Ethical Principles and General Standards*

.157 To register or learn more, visit www.cpa2biz.com.

Publications

.158 Practitioners may find the following publications useful when considering independence and ethics issues:

- *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627kk)
- *Independence Compliance: Checklists and Tools for Complying with AICPA, SEC, and PCAOB Independence Requirements* (product no. 006630kk)

Webcasts

.159 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM. Additional information can be found at www.cpa2biz.com.

CFO Quarterly Roundtable Series

.160 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.161 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.162 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.163 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.164 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA *Code of Professional Conduct*. You can reach the Ethics Hotline at (888) 777-7077.

AICPA Governmental Audit Quality Center

.165 The Governmental Audit Quality Center (GAQC) is a firm-based, voluntary membership Center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC's primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm's governmental audits.

.166 The mission of the Governmental Audit Quality Center is to:

- Raise awareness about the importance of governmental audits.
- Serve as a comprehensive resource provider on governmental audits for member firms.
- Create a community of firms that demonstrates a commitment to governmental audit quality.
- Provide center members with an online forum tool for sharing best practices as well as discussions on audit, accounting, and regulatory issues.
- List member firms to enable purchasers of governmental audit services to identify firms that are members.
- Provide information about the center's activities to other governmental audit stakeholders.

.167 For more information about the GAQC visit gaqc.aicpa.org.

AICPA Center for Audit Quality

.168 The CAQ (formerly the Center for Public Company Audit Firms [CPCAF]) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.169 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ visit thecaq.aicpa.org.

AICPA Employee Benefit Plan Audit Quality Center

.170 The Employee Benefit Plan Audit Quality Center (EBPAQC) is a voluntary membership organization for firms that perform or are interested in performing ERISA employee benefit plan audits. The EBPAQC was established to promote the quality of employee benefit plan audits.

.171 To achieve this goal, the EBPAQC has created a community of firms that demonstrate a commitment to employee benefit audit quality, and supports those firms by:

- Providing members with timely communication of regulatory developments, best practices guidance, and technical updates.
- Providing members with an online community forum for sharing best practices as well as discussions on audit, accounting, and regulatory issues.

- Maintaining relationships with, and acting as a liaison to, the DOL on behalf of member firms.
- Providing center members with a marketing toolkit to facilitate promotion of their membership in the center.
- Providing information about the center's activities to other employee benefit plan stakeholders.

.172 The increasing complexity of employee benefit plan auditing and increased scrutiny by the DOL have resulted in a significant number of changes and issues for auditing firms and CPAs in general. Firms and CPAs will benefit from the assistance of the Center as a resource for improving employee benefit plan audit quality.

.173 For more information about the EBPAQC, visit http://ebpaqc.aicpa.org.

AAM Section 8260
SEC and PCAOB Alert—2007/08

A ROUNDUP OF RECENT SEC AND PCAOB RULES AND DEVELOPMENTS OCCURRING DURING 2007, THROUGH THE DATE OF THIS PUBLICATION, AND DURING THE FOURTH QUARTER OF 2006

Kristy L. Illuzzi, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA Accounting and Auditing Publications staff wishes to thank Kellie Sclafani, CPA, for her indispensable review of this publication.

Securities and Exchange Commission Developments

.01 The summaries below are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable rule or development. In addition, the information presented below does not encompass all of the recent issuances and activities of the U.S. Securities and Exchange Commission (SEC). See the SEC Web site at www.sec.gov for complete information.

SEC Final Rules

Definition of a Significant Deficiency

.02 On August 3, 2007, the SEC posted a final rule whereby it defined the term *significant deficiency* for the purpose of implementing Section 302 and Section 404 of the Sarbanes-Oxley Act of 2002. The term is defined as "a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting." The full text of this rule can be found at www.sec.gov/rules/final/2007/33-8829.pdf.

Executive Compensation Disclosure

.03 The SEC issued Release Nos. 33-8765 and 34-55009 on December 22, 2006, in which they adopted, as interim final rules, amendments to the disclosure requirements for executive and director compensation. The amendments to Item 402 of Regulation S-K and S-B revise the Summary Compensation Table and Director Compensation Table disclosure with respect to stock awards and option rewards to provide disclosure of the compensation cost of awards over the requisite service period, as described in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 123R, *Share-Based Payment*. The amendments revise the Grants of Plan-Based Awards Table to include information concerning repriced or materially modified options, stock appreciation rights, and similar option-like instruments, disclosing the incremental fair value computed as of the repricing or modification date. The amendments to the Director Compensation Table require footnote disclosure corresponding to the new Grants of Plan-Based Awards Table fair value disclosures. The amendments are intended to provide investors with more complete and useful disclosure about executive compensation. These releases are effective December 29, 2006. The complete text of the final releases can be found at www.sec.gov/rules/final/2006/33-8765.pdf.

Internal Control Over Financial Reporting in Securities Exchange Act of 1934 Periodic Reports of Nonaccelerated Filers or Newly Public Companies

.04 The SEC issued a final rule on December 15, 2006, further extending the dates for which smaller public companies and newly public companies must comply with internal control reporting requirements mandated under Section 404 of the Sarbanes Oxley Act of 2002. Under this new rule, a nonaccelerated filer is not required to provide management's report on internal control over financial reporting until it files an annual report for its first fiscal year ending on or after December 15, 2007. A nonaccelerated filer is also not required to file the auditor's attestation report on internal control over financial reporting until it files an annual report for its first fiscal year ending on or after December 15, 2008. In response to inquiries from the SEC commissioners regarding the possibility of further extensions of compliance dates for small businesses, the staff indicated that they do not believe there is a need to extend the compliance date for management's assessment required by Section 404(a). With respect to Section 404(b), the SEC staff stated that while no extension is planned at this time, they will continue to monitor compliance by larger companies to determine whether further extensions are warranted. The SEC is also adopting amendments that provide for a transition period for a newly public company before it becomes subject to the internal control over financial reporting requirements. The complete text of the rule can be found at www.sec.gov/rules/final/2006/33-8760.pdf.

Amendments to Rules Regarding Management's Report on Internal Control Over Financial Reporting (Technical Amendment, Corrected)

.05 On June 20, 2007, the SEC posted an amendment to its rules to clarify that an evaluation of internal control over financial reporting that complies with the SEC's interpretive guidance published in Release No. 34-55929 is one way to satisfy the requirement for management to evaluate the effectiveness of the issuer's internal control over financial reporting. The SEC has also amended its rules to define the term *material weakness* and to revise the requirements regarding the auditor's attestation report on the effectiveness of internal control over financial reporting. The amendments are intended to facilitate more effective and efficient evaluations of internal control over financial reporting by management and auditors. Access www.sec.gov/rules/final/2007/33-8809.pdf for the entire release. See the "PCAOB Approved Rules and Standards" section of this alert (paragraphs .49–.58) for more information on Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), which was approved by the SEC in July 2007.

SEC Interpretive Releases

Commission Guidance Regarding Management's Report on Internal Control Over Financial Reporting

.06 The SEC posted Interpretive Release No. 33-8810 and 34-55929 on June 20, 2007, to provide guidance for management regarding its evaluation and assessment of internal control over financial reporting. This guidance is organized around two broad principles. The first principle is that management should evaluate whether it has implemented controls that adequately address the risk that a material misstatement of the financial statements would not be prevented or detected in a timely manner. This guidance describes a top-down, risk-based approach to this principle. The second principle is that management's evaluation of evidence about the operation of its controls should be based on its assessment of risk. This guidance provides an approach for making risk-based judgments about the evidence needed for the evaluation. More specifically, this interpretive guidance does the following:

- Explains how to vary evaluation approaches for gathering evidence based on risk assessments
- Explains the use of "daily interaction," self-assessment, and other ongoing monitoring activities as evidence in the evaluation
- Explains the purpose of documentation and how management has flexibility in documenting support for its assessment
- Provides management significant flexibility in making judgments regarding what constitutes adequate evidence in low-risk areas
- Allows for management and the auditor to have different testing approaches

.07 The text of the full interpretation can be found at www.sec.gov/rules/interp/2007/33-8810.pdf.

SEC No-Action and Exemptive Orders

.08 The SEC issues Securities Exchange Act of 1934 no-action and exemptive orders, both of which are typically in response to an inquiry from a public company. Exemptive orders are similar to no-action letters in that they provide a green light from the SEC to move forward on a new initiative. However, exemptive orders apply only to the situation for which they are granted. No-action letters may be relied upon by other firms as precedent. Recently issued no-action and exemptive orders can be found at www.sec.gov/interps/noaction.shtml.

SEC Proposed Rules

Smaller Reporting Company Regulatory Relief and Simplification

.09 On July 5, 2007, the SEC proposed rule amendments relating to disclosure and reporting requirements for smaller companies under the Securities Act of 1933 and the Securities Exchange Act of 1934. Further details regarding this proposed rule can be found in the "SEC Small Business Initiatives" section of this alert (paragraphs .34–.40).

Acceptance From Foreign Private Issuers of Financial Statements Prepared in Accordance With International Financial Reporting Standards Without Reconciliation to U.S. Generally Accepted Accounting Principles

.10 On July 2, 2007, the SEC proposed to accept from foreign private issuers their financial statements prepared in accordance with International Financial Reporting Standards (IFRS) without reconciliation to

U.S. generally accepted accounting principles (GAAP). To implement this, the SEC has proposed amendments to Form 20-F and conforming changes to Regulation S-X to accept financial statements prepared in accordance with the English language version of IFRS as published by the International Accounting Standards Board (IASB) without reconciliation to U.S. GAAP when contained in the filings of foreign private issuers with the SEC. Current requirements regarding the reconciliation to U.S. GAAP will not change for foreign private issuers that use a basis of accounting other than the English language version of IFRS. The full text of this release can be viewed at www.sec.gov/rules/proposed/2007/33-8818.pdf.

Revisions to Rules 144 and 145 to Shorten Holding Period for Affiliates and Nonaffiliates

.11 On June 22, 2007, the SEC proposed a 6-month holding period under Rule 144 (the "safe harbor" rule) for restricted securities of companies that are subject to the reporting requirements of the Securities Exchange Act of 1934. Additional information regarding this proposal can be found in the "SEC Small Business Initiatives" section of this alert (paragraphs .34–.40).

SEC Concept Releases

Allowing U.S. Issuers to Prepare Financial Statements in Accordance With IFRS Standards

.12 On August 7, 2007, the SEC published a concept release to obtain information about the extent and nature of the public's interest in allowing U.S. issuers, including investment companies subject to the Investment Company Act of 1940, to prepare financial statements in accordance with IFRS. Comments are due by November 13, 2007. The full text of this release, as well as information on where to submit comments, can be found at www.sec.gov/rules/concept/2007/33-8831.pdf.

SEC Staff Accounting Bulletins

.13 A Staff Accounting Bulletin (SAB) reflects the SEC staff's views regarding accounting-related disclosure practices. They represent interpretations and policies followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the federal securities laws. There have been no additional SAB's issued since the last publication of this Audit Risk Alert. The most recent SAB issued was SAB No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*, on September 13, 2006. For a listing of the most recent SAB issuances, see www.sec.gov/interps/account.shtml.

SEC Office of the Chief Accountant: Staff Letters to Industry

.14 Readers should be aware of the following staff letters to industry that provide helpful guidance and clarification regarding the SEC staff's interpretation of certain accounting issues and their application under U.S. GAAP.

Letter From SEC Chief Accountant to Council of Institutional Investors Concerning the Use of Market Instruments for the Purpose of Valuing Employee Share-Based Payment Awards Under FASB Statement No. 123R (February 23, 2007)

.15 This letter points out that while the best evidence of fair value for employee stock options is observable market prices of identical or similar instruments in active markets, the FASB did not provide detailed guidance on how one might comply with this principles-based objective. The SEC staff noted that factors to consider when applying FASB Statement No. 123R include the size of the offering relative to market demand, the number and characteristics of bidders, the functionality of the technology, and purchaser perceptions concerning costs of holding, hedging, or trading the instrument. The full text of the letter can be found at www.sec.gov/info/accountants/staffletters/cii022307.htm.

Letter From SEC Chief Accountant to Zions Bancorporation Concerning Its Proposal to Issue Employee Stock Option Appreciation Rights Securities for the Purpose of Valuing Employee Share-Based Payment Awards Under FASB Statement No. 123R (January 25, 2007)

.16 This letter provides guidance regarding Employee Stock Option Appreciation Rights Securities instruments and whether they are sufficiently designed to be used as a market-based approach under FASB Statement No.123R. The full text of the letter can be accessed at www.sec.gov/info/accountants/staffletters/zions012507.pdf.

Recent Guidance Provided by the SEC's Division of Corporation Finance

.17 Readers should be aware of the current accounting and disclosure issues document prepared by the staff of the Division of Corporate Finance available at www.sec.gov/divisions/corpfin/cfacctdisclosureissues.pdf, which was last updated on November 30, 2006. The updated document contains references to new and updated items that were recently incorporated into the document. The items recently incorporated as new (as opposed to updated) current accounting and disclosure items are in the following areas:

- Final rules regarding executive compensation
- Accounting for employee stock options
- Quantifying misstatements
- Final rule regarding tender offer-best price rule
- Rule proposal related to Foreign Private Issuer deregistration
- Electronic access to comment and response letters and electronic notifications of effectiveness
- Five recent enforcement actions involving U.S. GAAP
- Adoption of a new accounting standard in an interim period
- Statement of cash flows (discontinued operations and insurance proceeds)
- Discussion in Management's Discussion and Analysis of contingencies, loss reserves, and uncertain tax positions
- Segment disclosure (operating segments and goodwill impairment)
- Shortcut method of assessing hedge effectiveness
- Disclosure of off-balance sheet arrangements
- Disclosure of liability for unpaid claims and claims adjustment expenses and reinsurance recoverables on paid and unpaid claims

.18 The items incorporated as updated (as opposed to new) current accounting and disclosure issues are in the following areas:

- Final rules regarding use of Form S-8, Form 8-K, and Form 20-F by public shell companies
- Rules and concept release regarding the use of tagged data and incentives to voluntarily submit Extensible Business Reporting Language (XBRL) information
- Accelerated filer definitions and deadlines for filing periodic reports
- Management's report on internal control over financial reporting and certification of disclosure in Securities Exchange Act of 1934 periodic reports

- One recent enforcement action involving U.S. GAAP
- Classification and measurement of warrants and embedded conversion features
- Statement of Cash Flows
- Oil and gas industry issues
- Revenue (buy/sell arrangements)
- Investments and other-than-temporary declines in value
- Contingencies, loss reserves, and uncertain tax positions
- Segment disclosure (aggregation of operating segments)
- Financial statement presentation and disclosure under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*
- Corporation finance staffing and phone numbers
- Division employment opportunities (professional academic fellowships)

Updated Frequently Asked Questions Regarding Management's Report on Internal Control Over Financial Reporting

.19 On September 24, 2007, the SEC revised their frequently asked questions (FAQs) document related to management's report on internal control over financial reporting and certification of disclosure in Securities Exchange Act of 1934 periodic reports. The SEC noted that these revisions were made to eliminate FAQs that the staff believed were no longer relevant, necessary, or were addressed by the SEC's issuance of Interpretive Guidance for Management on May 23, 2007 (Release No. 33-8810).

.20 The specific changes that were made resulted in the elimination of previously existing FAQs numbered 5, 7, 10–13, and 15–20. The remaining FAQs are substantially the same and have been renumbered as a result of the elimination of the 12 previously referenced FAQs. In addition, four new FAQs have been added pertaining to foreign private issuers. Please note that these FAQs represent the views of the staffs of the Office of the Chief Accountant and the Division of Corporation Finance. They are not rules, regulations, or statements of the SEC. Further, the SEC has neither approved nor disapproved them.

.21 The updated FAQs can be found at www.sec.gov/info/accountants/controlfaq.htm.

Accounting Guidance to Certain Registrants in the Form of Sample Letters

.22 In February 2005, the staff of the Division of Corporation Finance publicly posted sample letters sent to certain registrants to promote widespread awareness of certain accounting issues and to provide examples of comments that other registrants should consider as they prepare future SEC filings, as applicable. A number of letters have been posted. Below is one letter related to stock options. There are other letters posted related specifically to oil and gas, coal mining, and banking industries. Readers who are involved in those industries may want to review this additional guidance, which can be found at www.sec.gov/divisions/corpfin/cfreportingguidance.shtml.

.23 *Sample letter sent in response to inquiries related to filing restated financial statements for errors in accounting for stock option grants*. In December 2006, the Division of Corporation Finance responded to inquiries from several public companies requesting filing guidance as they prepare to restate previously issued financial statements for errors in accounting for stock option grants. The full text of the sample letter can be found at www.sec.gov/divisions/corpfin/guidance/oilgasltr012007.htm.

Staff Observations in the Review of IFRS Financial Statements and on Annual Reports Containing Financial Statements Prepared for the First Time on the Basis of IFRS Standards

.24 In 2006, the SEC staff reviewed the annual reports of more than 100 foreign private issuers containing financial statements prepared for the first time on the basis of IFRS. The staff comments include the following topics:

- Assertion of compliance with IFRS
- Manner of presentation
- Topical areas, including revenue recognition, intangible assets and goodwill, impairment of long-lived assets, leases, contingent liabilities, and financial instruments

.25 The full text of the staff observations along with other IFRS information can be found at www.sec.gov/divisions/corpfin/cfreportingguidance.shtml.

Recent Guidance Provided by the SEC's Division of Investment Management

.26 The SEC's Division of Investment Management regulates investment companies, such as mutual funds, closed-end funds, unit investment trusts, exchange-traded funds, and interval funds, including variable insurance products, and federally registered investment advisors. It has recently issued the guidance discussed in the following paragraph.

Staff Interpretive Guidance on Implementation of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109

.27 The Division of Investment Management staff has issued a letter, dated June 28, 2007, in response to a request for additional guidance regarding interpretive guidance on FASB Interpretation No. 48. The letter specifically addresses how to deal with provisions for adequate time to allow for proper accruals, as well as the impact of accruals on net asset values of investments. The letter can be accessed at www.sec.gov/divisions/investment/fin48_letter_062807.htm.

.28 In addition, the staff issued a letter dated December 22, 2006, regarding the application of FASB Interpretation No. 48 to the fund industry and specific challenges to this industry. For further guidance and a copy of the letter, see www.sec.gov/divisions/investment/letter_mutual_fund_fin_48.htm.

.29 Other Division of Investment Management guidance can be accessed at www.sec.gov/divisions/investment/guidance.shtml.

SEC Independence Initiatives

SEC Updates FAQs on Auditor Independence

.30 On August 6, 2007, the SEC updated its FAQs guidance related to the application of the SEC's rules on auditor independence. Specifically, the SEC issued new FAQs on the following topics:

- Prohibited and nonaudit services
- Audit committee preapproval
- Fee disclosures
- "Cooling off" period

.31 The complete set of updated FAQs can be accessed at www.sec.gov/info/accountants/ocafaqaudind080607.htm.

SEC Brochure on Audit Committees and Auditor Independence

.32 The SEC recently posted to its Web site a useful document related to audit committees and auditor independence. The purpose of this brochure is to highlight certain SEC rules and other authoritative pronouncements relevant to audit committee oversight responsibilities regarding the auditor's independence. The brochure specifically highlights the following:

- General standard of auditor independence
- Specific prohibited nonaudit services
- Preapproval of permitted services
- Prohibited relationships
- Communications between the audit committee and the independent auditor
- Change of independent auditors
- Addressing independence issues
- Guidance on consulting with the Office of the Chief Accountant

.33 More information on the topic of independence is available on the SEC Web site at www.sec.gov/about/offices/oca/ocaprof.htm.

SEC Small Business Initiatives

SEC Proposals Related to Small Businesses

.34 The SEC has issued six rule proposals related to small businesses' capital raising and disclosure requirements. Such proposals are trying to make reporting easier for small companies. The six most recently issued proposals are discussed in the following paragraphs.

.35 *Release No. 33-8812, "Revisions to the Eligibility Requirements for Primary Securities Offerings on Form S-3 and F-3."* The SEC is proposing to amend the eligibility requirements of Form S-3 and Form F-3 to allow domestic and foreign private issuers to conduct primary securities offerings on these forms without regard to the size of their public float or the rating of debt they are offering as long as they satisfy the other eligibility conditions of the respective form and do not sell more than the equivalent of 20 percent of their public float in primary offerings pursuant to the instructions on these forms over any period of 12 calendar months. More information can be found at www.sec.gov/rules/proposed/2007/33-8812.pdf.

.36 *Release Nos. 33-8819, 34-56013, and 39-2447, "Smaller Reporting Company Regulatory Relief and Simplification."* On July 5, 2007, the SEC proposed extending the benefits of the current optional disclosures and reporting requirements for smaller companies to a much larger group of companies. This proposal would allow companies with a public float of less than $75 million to qualify for smaller company requirements, up from $25 million for most companies today. The proposals also would combine for most purposes the small business issuer and nonaccelerated filer categories of smaller companies into a single category of smaller reporting companies. The full text of this release can be viewed at www.sec.gov/rules/proposed/2007/33-8819.pdf.

.37 *Release No. 33-8813, "Revisions to Rule 144 and Rule 145 to Shorten Holding Period for Affiliates and Non-Affiliates."* Under this release, the proposed holding period of six months would be extended for up to an additional six months, by the amount of time during which the security holder has engaged in hedging transactions. Restricted securities of companies that are not subject to the Securities Exchange Act of 1934 reporting requirements would continue to be subject to a one-year holding period prior to any public resale. They also propose to substantially reduce the restrictions on the resale of securities by nonaffiliates. This proposal will also simplify the Preliminary Note to Rule 144 in order to eliminate the manner of sale restrictions with respect to debt securities, increase Form 144 filing thresholds, and codify several staff interpretation positions that relate to Rule 144. In addition, the SEC proposes amendments to Securities Act Rule 145, which establishes resale limitations on certain persons who acquire securities in business combination transactions. The full text of this release can be found at www.sec.gov/rules/proposed/2007/33-8813.pdf.

.38 *Release No. 34-56010, "Exemption of Compensatory Employee Stock Options From Registration Under Section 12(g) of the Securities Exchange Act of 1934."* The SEC is proposing two exemptions from the registration requirements of the Securities Exchange Act of 1934 for compensatory employee stock options. The first exemption would be available to issuers that are not required to file periodic reports under the Securities Exchange Act of 1934. The proposed exemption would apply only to the issuer's compensatory employee stock options and would not extend to the class of securities underlying those options. The second exemption would be available to issuers that are required to file those reports because they have registered under Securities Exchange Act of 1934 Section 12 the class of securities underlying the compensatory employee stock options. The full text of this proposal can be found at www.sec.gov/rules/proposed/2007/34-56010.pdf.

.39 *Release No. 33-8828, "Revisions of Limited Offering Exemptions in Regulation D."* The SEC is proposing revision to Regulation D to provide additional flexibility to issuers and to clarify and improve the application of the rules. It proposes to create a new exemption from the registration provisions of the Securities Act of 1933 for offers and sales of securities to large accredited investors. The exemption would permit limited advertising in an exempt offering where each purchaser meets the definition of *large accredited investor*. They also propose revision to the term *accredited investor* in Regulation D to clarify the definition and reflect developments since its adoption. In addition, it proposes to shorten the timing required by the integration safe harbor in Regulation D and to apply uniform disqualification provisions to all offerings seeking to rely on Regulation D. It is soliciting comments on possible revisions to Rule 504 and on the definition of *accredited natural person* for certain pooled investment vehicles in Securities Act Rules 216 and 509 that it proposed in December 2006. The full text of this proposal can be found at www.sec.gov/rules/proposed/2007/33-8828.pdf.

.40 *Release Nos. 33-8814, 34-55980, and 39-2446, "Electronic Filing and Simplification of Form D."* The SEC has published for comment proposals that would mandate the electronic filing of information required by Securities Act of 1933 Form D. It is also proposing revisions to Form D and to Regulation D to simplify and restructure Form D and update and revise its information requirements. Additional information can be found at www.sec.gov/rules/proposed/2007/33-8814.pdf.

Other SEC Initiatives

IFRS "Roadmap"

.41 The SEC has outlined several initiatives concerning the proposed acceptance of foreign private issuers of financial statements prepared in accordance with IFRS without reconciliation to U.S. GAAP in the "Spotlight" section of its Web site. This section provides information regarding the SEC Roundtable on IFRS "Roadmap," SEC press releases on the issue, staff reviews of IFRS financial statements, and SEC speeches and public statements on the issue. This information can be accessed at www.sec.gov/spotlight/ifrsroadmap.htm.

Interactive Data and XBRL Initiatives

.42 On March 6, 2006, the SEC announced a series of roundtables to be conducted that will focus on speeding the implementation of new Internet tools that will help provide investors and analysts with better financial information about companies and funds. Interactive data permit Internet users to search for and use individual items of information from financial reports, such as net income and executive compensation. In July 2007, the SEC expanded the interactive data voluntary program to include mutual fund information. The most recent roundtable on this topic was held on March 19, 2007, in which they discussed using interactive data to create better disclosure documents and preparation of financial reports using interactive data, with a focus on mutual funds and public companies.

.43 On September 25, 2007, SEC Chairman Christopher Cox held a news conference regarding XBRL, where he announced the completion of all work on developing data tags for the entire system of U.S. GAAP. The project team has managed to map "every unique concept of U.S. GAAP to its own unique data tag," said Cox. He also remarked that a review for U.S. GAAP compliance by the Financial Accounting Foundation is nearing completion, and critical stakeholder groups including analysts, public company preparers, and software providers will be reviewing the draft taxonomies first, before a broad-based public view is initiated.

.44 If all goes according to plan, Cox said that the SEC staff would prepare recommendations on proposed rulemaking concerning XBRL and submit them to the SEC commissioners in the spring of 2008. Provided no major problems are uncovered, the SEC may be ready to adopt a final rule in the fall of 2008 that would mandate the use of XBRL in regulatory filings. For further information on interactive data and XBRL initiatives, as well as project updates, see www.sec.gov/spotlight/xbrl.htm.

SEC Advisory Committee

.45 In June 2006, the SEC established the Advisory Committee on Improvements to Financial Reporting. This committee held its first meeting on August 2, 2007. The SEC has appointed 17 members representing investors, companies, and various other entities within the securities markets. Five others will serve as official observers of the advisory committee, representing the FASB, Public Company Accounting Oversight Board (PCAOB), Department of the Treasury, IASB, and federal banking regulators. The advisory committee will examine the U.S. financial reporting system and provide recommendations about how to improve its usefulness for investors and reduce unnecessary complexity for U.S. companies. More specifically, the advisory committee will explore ways to redesign the financial reporting system to take advantage of interactive data and the XBRL computer language for financial reporting.

.46 The SEC's charter identifies the following more specific areas of inquiry for the advisory committee:

- The current approach to setting financial accounting and reporting standards, including (*a*) the principles-based versus rules-based standards; (*b*) the inclusion within standards of exceptions, bright lines, and safe harbors; and (*c*) the process for providing timely guidance on implementation issues and emerging issues
- The current process of regulating compliance with accounting and reporting standards
- The current system for delivering financial information to investors and accessing that information
- Other environmental factors that drive unnecessary complexity, including the possibility of being second-guessed, the structuring of transactions to achieve an accounting result, and whether there is hesitation by professionals to exercise professional judgment in the absence of detailed rules
- Whether there are current accounting and reporting standards that do not result in useful information to investors or impose costs that outweigh the resulting benefits

- Whether the growing use of international accounting standards has an impact on the relevant issues relating to complexity of U.S. accounting and reporting standards and the usefulness of the U.S. financial reporting system

.47 Additional information on this advisory committee can be found at www.sec.gov/about/offices/oca/acifr.shtml.

PCAOB Developments

.48 The summaries that follow are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable rule or development. In addition, the information presented in this section does not encompass all of the recent issuances and activities of the PCAOB. See the PCAOB Web site at www.pcaob.org for complete information.

PCAOB Approved Rules and Standards

Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements

.49 On May 24, 2007, the PCAOB adopted Auditing Standard No. 5 that supersedes its Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), and an independence rule relating to the auditor's provision of internal control-related nonaudit services. It also adopted certain amendments to its interim standards. The SEC approved the standard on July 25, 2007.

.50 The PCAOB has closely monitored the implementation of Auditing Standard No. 2, and came to two conclusions:

1. The audit of internal control over financial reporting has produced significant benefits related to corporate processes and controls.
2. These benefits have come at a significant, higher than anticipated cost, and at times, the effort has appeared greater than necessary to conduct an effective audit of internal control over financial reporting.

.51 The PCAOB adopted the new Auditing Standard No. 5 to replace Auditing Standard No. 2 with the primary objective of focusing the auditor on matters most important to internal control. Goals of this new standard are to eliminate unnecessary procedures, to simplify and shorten the standard by reducing detail and specificity, and to make the audit more scalable for smaller and less complex companies. Some examples of important differences between Auditing Standard No. 5 and Auditing Standard No. 2 follow:

- The new standard is less prescriptive, with fewer mandatory requirements and more reliance on auditor judgment.
- The new standard makes the audit scalable so it can change to fit the size and complexity of any company.
- The new standard directs the auditor to focus on what matters most and eliminates unnecessary procedures from the audit.
- The new standard includes a principles-based approach to determining when and to what extent the auditor can use the work of others.

.52 The adopted standard will do the following, among other things:

- Direct the auditor to the most important controls and emphasize the importance of risk assessment using a top-down approach.
- Emphasize fraud controls, with an emphasis on assessing fraud risk in the planning process and additional guidance on the types of controls that may address fraud risk.
- Identify management fraud as an area of higher risk, directing the auditor to focus more attention in this area.
- Recalibrate the walkthrough requirement.
- Permit consideration of knowledge obtained during prior audits.
- Revise the definitions of significant deficiency and material weakness, as well as the "strong indicators" of a material weakness.
- Adopt communication requirements, which require, among other things, that the auditor consider and communicate any identified significant deficiencies to the audit committee.
- Direct the auditor to tailor the audit to reflect attributes of smaller and less complex companies.
- Remove the requirement to evaluate management's process, which the PCAOB believes could contribute to a checklist approach to compliance by the auditors.
- Provide auditors with further guidance regarding scoping decisions for multiple location audits.

.53 Auditing Standard No. 5 is effective for audits of internal control over financial reporting required by Section 404(b) of the Sarbanes-Oxley Act of 2002 for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted at any point after SEC approval, which occurred on July 25, 2007. Auditors who elect to comply with Auditing Standard No. 5 after July 25, 2007, but before its effective date must also comply, at the same time, with Rule 3525 and other PCAOB standards as amended by Auditing Standard No. 5. Auditors who elect to comply with Auditing Standard No. 5 before its effective date should use the definition of *material weakness* contained in Auditing Standard No. 5. See www.pcaob.org/Standards/Standards_and_Related_Rules/Auditing_Standard_No.5.aspx for the full release document.

.54 Upon approval of the new standard by the SEC on July 25, 2007, the PCAOB announced that it is undertaking several initiatives to support the successful implementation of the standard. These initiatives include working closely with the audit firms, early in their process, as they evaluate how the new standard will affect their firms' audits of internal control. Other initiatives include continued outreach to public companies and smaller audit firms regarding the new standard. See full text of the press release at www.pcaob.org/News_and_Events/News/2007/07-25.aspx.

Considering and Using the Work of Others

.55 At the time the PCAOB proposed Auditing Standard No. 5 for public comment, the PCAOB also proposed an auditing standard titled *Considering and Using the Work of Others*, which would have superseded AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*). However, after considering all comments, the PCAOB decided to retain AU section 322 for both the financial statement audit and audit of internal control over financial reporting and incorporate language into Auditing Standard No. 5 that establishes integration concepts rather than adopting the proposed standard. Some of the key concepts in Auditing Standard No. 5 as they relate to using the work of others are as follows:

- Allows the auditor to use the work of others to obtain evidence about the design and operating effectiveness of controls for both the internal control audit and the financial statement audit, eliminating a barrier to integration of the two audits

- Eliminates the principal evidence provision
- Allows the auditor to use the work of company personnel other than internal auditors, as well as third parties working under the direction of management or the audit committee
- Requires the auditor to use a risk-based approach to the extent that the auditor can use the work of others

.56 For additional information, see paragraphs 16–19 of Auditing Standard No. 5 at www.pcaob.org/Rules/Rules_of_the_Board/Auditing_Standard_5.pdf.

Rule 3525, Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

.57 The PCAOB also adopted a new rule related to the auditor's responsibilities when seeking audit committee preapproval of internal control related nonaudit services. The rule is intended to ensure that audit committees are provided relevant information for them to make an informed decision on how the performance of internal control-related services may affect independence. Specifically, the public accounting firm shall describe, in writing, the scope of the service and submit to the audit committee, as well as discuss with the audit committee, the potential effects of the service on the firm's independence. Registered firms are also required to document the substance of such discussions in writing. This rule is effective for audits of fiscal years ending on or after November 15, 2007 (the same effective date as Auditing Standard No. 5). The full text of this rule can be found at www.pcaob.org/Rules/Rules_of_the_Board/Rule_3525.pdf.

Conforming Amendments to Interim Auditing Standards

.58 In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments due to the issuance of Auditing Standard No. 5 can be found at www.pcaob.org/Rules/Rules_of_the_Board/Conforming_Amendments_AS5.pdf.

PCAOB Proposed Rules and Standards

Proposed Ethics and Independence Rule 3526, Communication with Audit Committees Concerning Independence *and Proposed Amendment to Rule 3523,* Tax Services for Persons in Financial Reporting Oversight Roles

.59 On July 24, 2007, the PCAOB proposed an ethics and independence rule, Rule 3526, that would supersede the PCAOB's interim independence requirement, Independence Standards Board (ISB) Standard No. 1, *Independence Discussions with Audit Committees*, and two related interpretations (ISB Interpretation 00-1 and ISB Interpretation 00-2). As part of the proposal, the PCAOB also proposed an amendment to Rule 3523 and further adjusted the implementation schedule for Rule 3523. See the "PCAOB Independence Initiatives" section of this alert (paragraphs .74–.79) for more information.

Proposed Auditing Standard Evaluating Consistency of Financial Statements and Proposed Amendments to Interim Auditing Standards

.60 On April 3, 2007, the PCAOB proposed changes to its auditing standards in light of the issuance of FASB Statement No. 154, *Accounting Changes and Error Corrections*, and the proposed FASB Statement *The Hierarchy of Generally Accepted Accounting Principles*. This proposal, if adopted and approved by the SEC, would do the following:

- Supersede AU section 420, *Consistency of Application of Generally Accepted Accounting Principles* (AICPA, *PCAOB Standards and Related Rules*), with a new auditing standard.

- Remove the U.S. GAAP hierarchy from the PCAOB's interim audit standards.
- Make conforming amendments to the PCAOB's interim auditing standards.

.61 For the full text of the proposal, see www.pcaob.org/Rules/Docket_023/2007-04-03_Release_No._2007-003.pdf.

PCAOB Standing Advisory Group

.62 The PCAOB Standing Advisory Group (SAG) is a 31-person panel representing the auditing profession, public companies, investors, and others charged with advising the PCAOB on the establishment of auditing and related professional practice standards. The SAG was established in April 2004 and meets approximately three times a year. Six organizations have been granted observer status at these meetings and include the:

- FASB
- Government Accountability Office (GAO)
- International Auditing and Assurance Standards Board
- SEC
- Department of Labor
- Auditing Standards Board of the AICPA

.63 The meetings can be heard via Webcast, and briefing papers can be accessed at www.pcaob.org/Standards/Standing_Advisory_Group/index.aspx.

June 2007 SAG Meeting

.64 On June 21, 2007, the SAG met to discuss auditing accounting estimates and fair value measurements, the PCAOB's interim standard on related parties, and engagement team performance. Additional details on each topic are noted in the following list:

- Accounting estimates, fair value measurements, and, more specifically, auditing procedures used for accounting estimates and fair value measurements were addressed. The SAG also discussed whether there is still a need for two separate PCAOB standards, one for accounting estimates and one for fair value measurements. The briefing paper from the meeting also discusses some of the similarities and differences in the auditing procedures required pursuant to the respective auditing standards.
- Engagement team performance was also a focus of the group, with the panel discussing whether more direction should be included in the PCAOB auditing and related professional practice standards about which members of the engagement team are responsible for performing the auditing procedures during an audit engagement. More specifically, they discussed the audit partner's involvement in the planning and supervision of the audit engagement and higher risk areas or areas that involve high risk and extensive use of professional judgment.
- A new project undertaken by the group is related parties, and a discussion of the interim auditing standard on related parties took place. The discussion focused mainly on the auditor's role in assessing risks relevant to related party transactions and performing sufficient audit procedures in identifying related parties and auditing transactions with those parties.

February 2007 SAG Meeting

.65 On February 22, 2007, the SAG met specifically to discuss proposed changes to Auditing Standard No. 2. In particular, they discussed the following:

- Whether the proposed standard for an audit of internal control allows for appropriate use of auditor judgment while sufficiently safeguarding the quality of the audit
- Whether the proposed standard for an audit of internal control adequately emphasizes the importance of company-level controls and the effect they may have on the auditor's testing
- Whether the direction in the standard on scaling the audit sufficiently addresses differences in company size and complexity
- Whether the standard would result in audit implementation issues

.66 In addition, the SAG discussed whether the proposed auditing standard on considering and using the work of others would meet the objective of removing unnecessary barriers to using the work of others and promote better integration of audits.

.67 The next SAG meeting will be held in October 2007, which will also be the PCAOB's annual meeting. Updated information related to this meeting, including an agenda, will be available at www.pcaob.org/Standards/Standing_Advisory_Group/index.aspx.

PCAOB Inspections

.68 Section 404 of Sarbanes-Oxley requires the PCAOB to conduct inspections of registered public accounting firms. In the inspections, the PCAOB assesses compliance with Sarbanes-Oxley, the rules of the PCAOB, and the rules of the SEC and professional standards in connection with the firm's performance of audits, issuance of audit reports, and related matters involving issuers. Sarbanes-Oxley requires the PCAOB to conduct those inspections annually for firms that provide audit reports for more than 100 issuers and at least triennially for firms that provide audit reports for fewer than 100 issuers. The PCAOB makes portions of the inspection reports public, and they can be accessed at www.pcaob.org/Inspections/Public_Reports/index.aspx.

.69 On May 24, 2007, the PCAOB held an open meeting and approved the PCAOB Inspection Frequency Rule. This rule eliminates the June 30, 2007, tentative sunset date for Rule 4003(d). Rule 4003(d) extends the time period during which the PCAOB must conduct the first and second inspections of firms that registered in 2003 and 2004. The PCAOB's action allows the rule to remain in place to provide ongoing, albeit limited, flexibility concerning the timing of the first two inspections of firms that registered in 2003 and 2004. That flexibility allows the PCAOB to make scheduling adjustments that will result in a mix of inspected firms (in terms of the size and nature of audit practices) that is relatively consistent from year to year, while avoiding significant year to year fluctuations in inspection resource requirements. The PCAOB has previously submitted Rule 4003(d) to the SEC for approval, and that submission is pending. In this meeting, the PCAOB also proposed for public comment an amendment to Rule 4003 that would remove the rule's requirement that the PCAOB regularly inspect certain firms that do not regularly issue audit reports, including firms that play a substantial role in audits but do not issue audit reports. Additional information regarding this meeting can be found at www.pcaob.org/news_and_events/news/2007/05-24.aspx.

Report on the Second Year Implementation of Auditing Standard No. 2

.70 On April 18, 2007, the PCAOB issued a report regarding issues identified in the implementation of Auditing Standard No. 2, which partly came about due to inspections that occurred during 2006. During 2006, the PCAOB reviewed portions of approximately 275 audits of internal control over financial reporting. These inspections revealed that progress was made in improving the efficiency of internal control audits. Many of these improvements resulted from the easing of time constraints that auditors and issuers faced in the first year, issuers' and auditors' additional experience, and changes that auditors made in their methodologies and staff training. However, the PCAOB also noted several areas where auditors can further improve their implementation of Auditing Standard No. 2. The PCAOB considered these areas of improvement when they introduced the new Auditing Standard No. 5. The full text of this release can be found at www.pcaob.org/Inspections/Other/2007/04-18_Release_2007-004.pdf.

PCAOB Accounting and Support Fee and Funding Process

.71 On April 18, 2007, the PCAOB staff published updated FAQs regarding the accounting support fee and funding process. The statements contained in these FAQs are not rules of the PCAOB, nor have they been approved by the PCAOB. The entire release can be accessed at www.pcaob.org/Support_Fees/SupportFeeFAQ.pdf.

.72 In May 2006, the PCAOB exposed for public comment rules for annual and special reporting of information in *Proposed Rules on Periodic Reporting by Registered Public Accounting Firms.* Under the proposed rules, all registered firms would be required to file an annual report with the PCAOB on Form 2. According to the proposed rules, the annual reports on Form 2 would be due on July 31st of each year. Recently, the PCAOB has clarified that because the rules have not yet been finalized, the first annual reports and annual fees will not be due by the June 30, 2007, and July 31, 2007, dates. The PCAOB stated that when it adopts final rules, it will set deadlines with reasonably sufficient lead time to allow firms to be able to comply. The PCAOB's statement on this matter can be found at www.pcaob.org/rules/docket_019/asr.pdf.

.73 On December 4, 2006, the SEC approved the PCAOB's 2007 annual budget and accounting fee. For more information, visit www.pcaob.org/news_and_events/news/2006/11-30.aspx. In addition, the PCAOB also posted its 2006 Annual Report, *Strengthening Investor Confidence*, to its Web site. A copy of the report can be found at www.pcaob.org/about_the_pcaob/annual_reports/2006.pdf.

PCAOB Independence Initiatives

Proposed Ethics and Independence Rule 3526 and Proposed Amendment to Rule 3523

.74 Proposed Rule 3526 would require a registered public accounting firm to communicate to an issuer's audit committee about any relationships between the firm and the issuer that may reasonably be thought to bear on the firm's independence. These communications would be required both before the firm accepts a new engagement pursuant to the standards of the PCAOB and at least annually for continuing engagements.

.75 As part of the same proposal, the PCAOB also proposed an amendment to Rule 3523 and further adjusted the implementation schedule for Rule 3523 as it applies to tax services provided during the audit period. Specifically, Rule 3523 will not apply to tax services provided on or before April 30, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins. In addition, if the PCAOB does amend Rule 3523 as described, registered firms would remain responsible for considering the relevant facts and circumstances of a specific tax engagement and determining whether their independence is impaired under the SEC's general standard of independence.

.76 Lastly, the PCAOB also proposed to add a note to Rule 3523 with respect to an initial public offering (IPO). The note would state that in the context of an IPO, the provision of tax services to a person covered by Rule 3523 before the date that the firm either (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB or (2) began procedures to do so (whichever date is earlier) does not impair a registered public accounting firm's independence under Rule 3523. Comments on this proposal were due back by September 7, 2007.

.77 The full text of the release can be found at www.pcaob.org/Rules/Docket_017/2007-07-24_Release_2007-008.pdf.

Staff Questions and Answers on Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees

.78 On April 3, 2007, the PCAOB issued staff questions and answers on ethics and independence rules as they relate to tax services and contingent fees. Topics covered include the following:

- The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm
- Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction
- Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b)
- Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself
- Clarification of the term *other change in employment event* as it relates to Rule 3522(c)

.79 The full text of the staff questions and answers can be found at www.pcaob.org/Standards/Staff_Questions_and_Answers/2007/Tax_Services.pdf.

PCAOB Small Business Initiatives

Forum on Auditing in the Small Business Environment

.80 The series of forums on Auditing in the Small Business Environment is a program for registered accounting firms and public companies in the small business community to learn more about the work of the PCAOB. The PCAOB began holding small business forums in 2004. To date, the forums have enabled board members and staff to meet with more than 1,600 representatives of small registered public accounting firms and small public companies to provide insight to the work of the PCAOB, particularly the inspections process and impact of the new auditing standards. The next forum will be held on October 22nd and 23rd in New York, NY. For more information regarding the small business forums, readers can access www.pcaob.org/News_and_Events/News/2007/01-03a.aspx.

Recent Speeches From the PCAOB Regarding Small Business Issues

.81 PCAOB Chairman Olson testified before the Committee on Small Business on June 5, 2007, regarding small business initiatives. Mr. Olson focused his remarks on the PCAOB's oversight and interaction with small firms. He described various PCAOB activities and initiatives, including the following:

- Outreach efforts involving discussion sessions that are designed to assist small registered firms become better equipped with information to address the challenges of the regulatory environment
- The PCAOB's supervisory inspection program that helps small firms focus on audit quality necessary to compete in the market to provide public company audit services
- The PCAOB standard setting activities that are performed with the needs and challenges of smaller firms in mind

.82 With respect to smaller firm activity in the SEC audit marketplace, he noted that smaller CPA firms are gaining ground in the market for SEC audits. He noted that while the Big Four firms have reduced their public company audit client bases by more than 1,000 clients since 2002, he said that "the next 4 and even smaller firms have increased the number of public companies that they audit: the next 4 have added more than 250 audit clients among them, and smaller firms have taken on more than 580 audit clients." Mr. Olson expressed confidence that smaller firms will continue to seize opportunities to grow in the marketplace. You can find further information regarding this testimony at www.pcaobus.org/news_and_events/events/2007/testimony/06-05_olson.aspx.

Other PCAOB Initiatives

Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud

.83 On January 22, 2007, the PCAOB issued a report that addresses the auditors' responsibility as it relates to fraud, principally as it relates to AU Section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). Major topics discussed include the following:

- Auditors' overall approach to the detection of fraud
- Brainstorming sessions and fraud-related inquiries
- Auditors' response to fraud risk factors
- Financial statement misstatements
- Risk of management override of controls
- Other areas to improve fraud detection

.84 The full report can be accessed at www.pcaob.org/Inspections/Other/2007/01-22_Release_2007-001.pdf.

Other Related Developments and Resources

Committee for Sponsoring Organizations of the Treadway Commission Developments

.85 On January 8, 2007, the Committee for Sponsoring Organizations of the Treadway Commission (COSO) announced the selection of Grant Thornton LLP to develop guidance designed to help organizations monitor the quality of their internal control systems. The end product will serve as a tool for effectively monitoring internal controls and complying with the Sarbanes-Oxley Act of 2002.

.86 On September 17, 2007, COSO released for public comment a Discussion Document titled "Guidance on Monitoring Internal Control Systems." The second phase of the monitoring project, scheduled for release after comments are received on this Discussion Document, will provide examples, case studies, and tools to assist all organizations in implementing effective and efficient monitoring. Then COSO plans to release an exposure draft of the full implementation guidance later this year and to release the final guidance in the first quarter of 2008.

.87 In addition to the COSO project team, COSO has assembled an oversight task force consisting of representatives from its five sponsoring organizations as well as other experts. It will also have observers from the SEC, PCAOB, the U.S. GAO, and representatives from Europe, as well as both small and large companies. Updates on COSO's monitoring project will be posted to www.coso.org as available.

Resource Central

.88 The following are various resources that practitioners may find beneficial.

Publications

.89 Practitioners may find the following publications useful with respect to accounting and auditing of public companies:

- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment*(product no. 022526kk)
- AICPA *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)
- *PCAOB Standards and Related Rules* (product no. 057207kk)

AICPA reSOURCE: Accounting and Auditing Literature

.90 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.91 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.92 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.93 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 for nonmembers) for a new subscription and $119 ($369 for nonmembers) for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some courses currently available related to SEC and PCAOB developments follow:

- *SEC Reporting* (product no. 736774)
- *Annual Public Company Update: SEC, PCAOB, and Other Developments* (product no. 731883)
- *PCAOB Standards and Related Rules* (product no. 057207 [text] or WPC-BX [online subscription])
- *SEC Quarterly Update Webcast Series* (product no. SEC-XX)

.94 To register or learn more, visit www.cpa2biz.com.

Webcasts

.95 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.96 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of *hot topics* that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.97 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is *hot* at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you *plugged in* to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.98 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.99 Do you have a complex technical question about U.S. GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.100 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Annual Conference

.101 The AICPA sponsors an annual National Conference on Current SEC and PCAOB Developments in December each year. The National Conference on Current SEC and PCAOB Developments is a three-day conference designed to provide comprehensive SEC and PCAOB updates directly from the regulators. For more information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

SEC Research

.102 The SEC has posted two useful guides to its Web site. The first guide provides an overview of how to research the federal securities laws through the SEC Web site and has been provided by the SEC as a service to investors and members of the public. This guide can be accessed at www.sec.gov/investor/pubs/securitieslaws.htm. The second guide provides information on how to research public companies through EDGAR on the SEC Web site by providing tips and answers to FAQs. EDGAR provides free public access to corporate information and SEC filings. The guide states that to use EDGAR effectively, you should know which categories of information appear in which SEC filings and which search methods would work best. In addition, you should also understand the limitations of EDGAR. The guide will help you achieve this. This guide can be accessed at www.sec.gov/investor/pubs/edgarguide.htm.

Center for Audit Quality

.103 The Center for Audit Quality (CAQ) (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.104 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit www.thecaq.org or the members-only site at http://thecaq.aicpa.org.

SEC Regulations Committee

.105 The SEC Regulations Committee meets periodically with the staff of the SEC to discuss emerging technical accounting and reporting issues relating to SEC rules and regulations. The mission of the SEC Regulations Committee is to protect investors by improving the quality of public-company financial reporting by identifying, discussing, and facilitating resolution of issues relating to the promulgation, interpretation, and application of SEC rules, regulations, and policies with the assistance of SEC staff and communicating those matters publicly on a timely basis. To view highlights of issues discussed at the SEC Regulations Committee joint meetings with SEC staff, go to the CAQ Web page at http://thecaq.aicpa.org/Resources/SEC+Regulations+Committee/SEC+Regulations+Committee+Highlights.htm.

.106 The International Practices Task Force (IPTF) is a task force of the SEC Regulations Committee. IPTF also meets periodically with the staff of the SEC to discuss and focus on international emerging technical accounting and reporting issues relating to SEC rules and regulations. The mission of the IPTF is to protect investors by improving the quality of public-company financial reporting by identifying, discussing, and facilitating resolution of issues relating to the promulgation, interpretation, and application of SEC rules, regulations, and policies with the assistance of the SEC staff and communicating those matters publicly on a timely basis. You can visit the IPTF Web page at http://thecaq.aicpa.org/Resources/International+Practices+Task+Force/ for more information.

* * * *

.107 This Audit Risk Alert replaces the *SEC and PCAOB Alert—2006/07*.

.108 The *SEC and PCAOB Alert* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to killuzzi@aicpa.org or write to:

AAM Section 8290

Understanding the New Auditing Standards Related to Risk Assessment

NOTICE TO READERS
UNDERSTANDING THE NEW AUDITING STANDARDS RELATED TO RISK ASSESSMENT

This Audit Risk Alert is intended to provide auditors with an overview of the new risk assessment standards to be used in the planning and performance of a financial statement audit.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Written by Michael J. Ramos, CPA

Edited by Lori L. Pombo, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA Accounting and Auditing Publications staff express our special thanks to Hiram Hasty, CPA, who made extensive contributions to this publication. His knowledge of the risk assessment standards and auditing in general was invaluable. In addition, the staff expresses our thanks to Chuck Landes, CPA, for his indispensable review of this publication and to Lyn Graham, CPA, for working closely with the author on key aspects of the risk assessment standards.

Introduction

.01 This audit Alert provides a summary of eight Statements on Auditing Standards (SASs) that provide extensive guidance on how you should apply the audit risk model in the planning and performance of a financial statement audit. These SASs were issued in March 2006 and become effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted. While the time period between the issuance and effective date of the standards may seem long, you should not underestimate the standards' significance and the far-reaching effect they will have on your audits.

.02 The eight SASs[1] consist of:

---

[1] Statements on Auditing Standards issued by the Auditing Standard Board are applicable to audits of privately held entities and other *nonissuers*. The term *issuer* means entities that are subject to the rules and regulations of the U.S. Securities and Exchange Commission and the Sarbanes-Oxley Act of 2002.

- SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*
- SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards
- SAS No. 106, *Audit Evidence*
- SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*
- SAS No. 108, *Planning and Supervision*
- SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
- SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
- SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling

.03 The Auditing Standards Board (ASB) believes that the SASs represent a significant strengthening of auditing standards that will improve the quality and effectiveness of audits. The primary objective of the SASs is to enhance your application of the audit risk model in practice by requiring, among other things:

- A more in-depth understanding of your audit client and its environment, including its internal control. This knowledge will be used to identify the risk of material misstatement in the financial statements (whether caused by error or fraud) and what the client is doing to mitigate them.
- A more rigorous assessment of the risk of material misstatement of the financial statements based on that understanding.
- Improved linkage between the assessed risks and the nature, timing, and extent of audit procedures performed in response to those risks.

.04 The development of these SASs was undertaken in response to recommendations to the ASB made by the former Public Oversight Board's Panel on Audit Effectiveness. In addition, the major corporate failures of the past several years have undermined the public's confidence in the effectiveness of audits and led to an intense scrutiny of the work of auditors, and the development of the SASs also have been influenced by these events.

How the Risk Assessment Standards Affect Current Practice

.05 The SASs incorporate many of the underlying concepts and detailed performance requirements that exist in the current standards. However, the SASs do create significant new requirements for auditors.

.06 In most cases, implementation of the SASs will result in an overall increased work effort by the audit team. It also is anticipated that, to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. To ease the implementation process, it is recommended that firms adopt at least some of the provisions of the standards in advance of the required implementation date.

How This Alert Is Organized

.07 This Alert is organized into three different parts.

- *Part One: Key Provisions of the SASs and How They Differ From Current Standards*. This part provides a summary of some of the key provisions of the SASs and how they differ, if at all, from current audit standards.

- *Part Two: Fundamental Concepts*. This part summarizes the guidance in the SASs relating to fundamental audit concepts such as materiality, financial statement assertions, and audit evidence.
- *Part Three: Applying the Audit Risk Model*. This part of the Alert provides a summary of the application of the audit risk model as described by the SASs.

Part One: Key Provisions of the SASs and How They Differ From Current Standards

.08 This section discusses the key provisions of each of the SASs and provides a summary of how each of the SASs differs, if at all, from the current AICPA generally accepted audit standards.

SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*

.09

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 104 defines *reasonable assurance* as a "high level of assurance."	• SAS No. 104 clarifies the meaning of reasonable assurance.

SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards

.10

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 105 expands the scope of the understanding that the auditor must obtain in the second standard of field work from "internal control" to "the entity and its environment, including its internal control." • The quality and depth of the understanding to be obtained is emphasized by amending its purpose from "planning the audit" to "assessing the risk of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures."	• Previous guidance considered the understanding of the entity to be a part of audit planning, and emphasized that the understanding of internal control also was primarily part of audit planning. • By stating that the purpose of your understanding of the entity and its internal control is part of assessing the risk of material misstatement, SAS No. 105 essentially considers this understanding to provide audit evidence that ultimately supports your opinion on the financial statements. • The new standard emphasizes the link between understanding the entity, assessing risks, and the design of further audit procedures. It is anticipated that "generic" audit programs will not be an appropriate response for all engagements because risks vary between entities.

(continued)

Key Provisions	How the SAS Differs From Current Standards
	• The term *further audit procedures*, which consists of test of controls and substantive tests, replaces the term *tests to be performed* in recognition that risk assessment procedures are also performed. • The term *audit evidence* replaces the term *evidential matter.*

SAS No. 106, *Audit Evidence*

.11

Key Provisions	How the SAS Differs From Current Standards
• SAS No. 106 defines *audit evidence* as "all the information used by the auditor in arriving at the conclusions on which the audit opinion is based."	• Previous guidance did not define audit evidence. • SAS No. 106 also describes basic concepts of audit evidence. • The term *sufficient, appropriate audit evidence,* defined in SAS No. 106, replaces the term *sufficient, competent evidence.*
• SAS No. 106 recategorizes assertions by classes of transactions, account balances, and presentation and disclosure; expands the guidance related to presentation and disclosure; and describes how the auditor uses relevant assertions to assess risk and design audit procedures.	• SAS No. 106 recategorizes assertions to add clarity. • *Assertion relating to presentation and disclosure* has been expanded and includes a new assertion that information in disclosures should be "expressed clearly" (understandability).
• SAS No. 106 defines *relevant* assertions as those assertions that have a meaningful bearing on whether the account is fairly stated.	• The term *relevant assertions* is new, and it is used repeatedly throughout SAS No. 106.
• SAS No. 106 provides additional guidance on the reliability of various kinds of audit evidence.	• The previous standard included a discussion of the competence of evidential matter and how different types of audit evidence may provide more or less valid evidence. SAS No. 106 expands on this guidance.
• SAS No. 106 identifies "risk assessment procedures" as audit procedures performed on all audits to obtain an understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement at the financial statement and relevant assertion levels.	• SAS No. 106 introduces the concept of risk assessment procedures, which are necessary to provide a basis for assessing the risk of material misstatement. The results of risk assessment procedures, along with the results of further audit procedures, provide audit evidence that ultimately supports the auditor's opinion on the financial statements.
• SAS No. 106 provides that evidence obtained by performing risk assessment procedures, as well as that obtained by performing tests of controls and substantive procedures, is part of the	

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
evidence the auditor obtains to draw reasonable conclusions on which to base the audit opinion, although such evidence is not sufficient in and of itself to support the audit opinion.	
• SAS No. 106 describes the types of audit procedures that the auditor may use alone or in combination as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor.	• Risk assessment procedures include: — Inquiries of management and others within the entity — Analytical procedures — Observation and inspection
• SAS No. 106 includes guidance on the uses and limitations of inquiry as an audit procedure.	• Inquiry alone is not sufficient to evaluate the design of internal control and to determine whether it has been implemented.

SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*

.12

Key Provisions	*How the SAS Differs From Current Standards*
• The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of: 1. Determining the extent and nature of risk assessment procedures. 2. Identifying and assessing the risk of material misstatement. 3. Determining the nature, timing, and extent of further audit procedures. 4. Evaluating whether the financial statements taken as a whole are presented fairly, in conformity with generally accepted accounting principles.	• Previous guidance said that auditors "should consider" audit risk and materiality for certain specified purposes. SASs state that the auditor "must" consider. • New guidance explicitly states that audit risk and materiality are used to identify and assess the risk of material misstatement.
• Combined assessment of inherent and control *risks* is termed the *risk of material misstatement*.	• SAS No. 107 consistently uses the term *risks of material misstatement*, which often is described as a combined assessment of inherent and control risk. However, auditors may make separate assessment of inherent risk and control risks.
• The auditor should assess the risk of material misstatement as a basis for further audit procedures. Although that risk assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment.	• SAS No. 107 states that the auditor should have and document an appropriate basis for the audit approach. • These two provisions of the risk assessment standards effectively eliminate the ability of the auditor to assess control risk "at the maximum"

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
• Assessed risks and the basis for those assessments should be documented.	without having a basis for that assessment. In other words, you can no longer "default" to maximum control risk.
• The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial, and communicate them to the appropriate level of management.	• SAS No. 107 provides additional guidance on communicating misstatements to management. • The concept of not accumulating misstatements below a certain threshold is included in the previous standards, but the SAS No. 107 provides additional specific guidance on how to determine this threshold.
• The auditor should request management to respond appropriately when misstatements (known or likely) are identified during the audit.	• SAS No. 107 provides specific guidance regarding the appropriate auditor's responses to the types of misstatements (known or likely) identified by the auditor.

SAS No. 108, *Planning and Supervision*

.13

Key Provisions	*How the SAS Differs From Current Standards*
SAS No. 108 provides guidance on: • Appointment of the independent auditor. • Establishing an understanding with the client. • Preliminary engagement activities. • The overall audit strategy. • The audit plan. • Determining the extent of involvement of professionals possessing specialized skills. • Using a professional possessing information technology (IT) skills to understand the effect of IT on the audit. • Additional considerations in initial audit engagements. • Supervision of assistants.	• Much of the guidance provided in SAS No. 108 has been consolidated from several existing standards. • However, SAS No. 108 provides new guidance on preliminary engagement activities, including the development of an overall audit strategy and an audit plan. — The overall audit strategy is what previously was commonly referred to as the audit approach. It is a broad approach to how the audit will be conducted, considering factors such as the scope of the engagement, deadlines for performing the audit and issuing the report, and recent financial reporting developments. — The audit plan is more detailed than the audit strategy and is commonly referred to as the audit program. The audit plan describes in detail the nature, timing, and extent of risk assessment and further audit procedures you perform in an audit. • SAS No. 108 states that you should obtain a written understanding with your client.

SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

.14

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 109 describes audit procedures that the auditor should perform to obtain the understanding of the entity and its environment, including its internal control.	• The auditor should perform "risk assessment procedures" to gather information and gain an understanding of the entity and its environment. These procedures include inquiries, observation, inspection, and analytical procedures. Previous standards did not describe the procedures that should be performed to gain an understanding of the client. • Information about the entity may be provided by a variety of sources, including knowledge about the entity gathered in previous audits (provided certain conditions are met), and the results of client acceptance and continuance procedures. • SAS No. 109 also directs the auditor to perform a variety of risk assessment procedures, and it describes the limitations of inquiry.
• The audit team should discuss the susceptibility of the entity's financial statements to material misstatement.	• Previous standards did not require a "brainstorming" session to discuss the risk of material misstatements. SAS No. 109 requires such a brainstorming session, which is similar (and may be performed together with) the brainstorming session to discuss fraud.
• The purpose of obtaining an understanding of the entity and its environment, including its internal control, is to identify and assess "the risk of material misstatement" and design and perform further audit procedures responsive to the assessed risk.	• SAS No. 109 directly links the understanding of the entity and its internal control with the assessment of risk and design of further audit procedures. Thus, the understanding of the entity and its environment, including its internal control, provides the audit evidence necessary to support the auditor's assessment of risk.
• SAS No. 109 states the auditor should assess the risk of material misstatement at both the financial statement and relevant assertion levels.	• The previous standard included the concept of assessing risk at the financial statement level, but SAS No. 109 provides expanded and more explicit guidance. • SAS No. 109 also directs the auditor to determine how risks at the financial statement level may result in risks at the assertion level.
• SAS No. 109 provides directions on how to evaluate the design of the entity's controls and determine whether the controls are adequate and have been implemented.	• Under the previous standard, the primary purpose of gaining an understanding of internal control was to plan the audit. Under SAS No. 109, your understanding of internal control is used to assess risks. Thus, the

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
	understanding of internal control provides audit evidence that ultimately supports the auditor's opinion on the financial statements. • The previous standard directs the auditor to obtain an understanding of internal control as part of obtaining an understanding of the entity and its environment. SAS No. 109 requires auditors to evaluate the design of controls and determine whether they been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. It is anticipated that this phase of the audit will require more work than simply gaining understanding of internal control.
• SAS No. 109 directs the auditor to consider whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence.	• Previous standard did not include the concept of "significant risks." • Significant risks exist on most engagements. • The auditor should gain an understanding of internal control and also perform substantive procedures for all identified significant risks. Substantive analytical procedures alone are not sufficient to test significant risks.
• SAS No. 109 provides extensive guidance on the matters that should be documented.	• The guidance provided by SAS No. 109 relating to documentation is significantly greater than that provided by previous standards. • Part three of this Alert lists the documentation requirements of the SASs.

SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*

.15

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 110 provides guidance on determining overall responses to address the risk of material misstatement at the financial statement level and the nature of those responses.	• The concept of addressing the risk of material misstatement at the financial statement level and developing an appropriate overall response is similar to the requirement in previous standards relating to the consideration of audit risk at the financial statement level. However, that guidance was placed in the context of audit planning. SAS No. 110 "repositions" your consideration of risk at the financial statement level so you make this assessment as a result of and in

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
	conjunction with your performance of risk assessment procedures. In some cases, this assessment may not be able to be made during audit planning. • SAS No. 110 requires you to consider how your assessment of risks at the financial statement level affect individual financial statement assertions, so that you may design and perform tailored further audit procedures (substantive tests or tests of controls). • The list of possible overall responses to the risk of material misstatement at the financial statement level also has been expanded.
• Further audit procedures, which may include tests of controls, or substantive procedures should be responsive to the assessed risk of material misstatement at the relevant assertion level.	• Although the previous standards included the concept that audit procedures should be responsive to assessed risks, this idea was embedded in the discussion of the audit risk model. The SASs repeatedly emphasize the need to provide a clear linkage between your understanding of the entity, your risk assessments, and the design of further audit procedures. • SAS No. 110 requires you to document the linkage between assessed risks and further audit procedures, which was not a requirement under the previous standards.
• SAS No. 110 provides guidance on matters the auditor should consider in determining the nature, timing, and extent of such audit procedures.	• The new guidance on determining the nature, timing, and extent of tests of controls and substantive tests has been expanded greatly and addresses issues that previously were not included in the authoritative literature. • SAS No. 110 states that the nature of further audit procedures is of most importance in responding to your assessed risk of material misstatement. That is, increasing the extent of your audit procedures will not compensate for procedures that do not address the specifically identified risks of misstatement. • SAS No. 110 states that you should perform certain substantive procedures on all engagements. These procedures include: — Performing substantive tests for all relevant assertion related to each material class of transactions, account balance, and disclosure regardless of the assessment of the risk of material misstatements.

(continued)

Key Provisions	How the SAS Differs From Current Standards
	— Agreeing the financial statements, including their accompanying notes, to the underlying accounting records — Examining material journal entries and other adjustments made during the course of preparing the financial statements

SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling

.16

Key Provisions	How the SAS Differs from Current Standards
• SAS No. 111 provides guidance relating to the auditor's judgment about establishing tolerable misstatement for a specific audit procedure and on the application of sampling to tests of controls.	• SAS No. 111 provides enhanced guidance on tolerable misstatement. In general, tolerable misstatement in an account should be less than materiality to allow for aggregation in final assessment.

Part Two: Fundamental Concepts

.17 The SASs describe a process for applying the audit risk model to gather audit evidence and form an opinion about your client's financial statements. To apply this process appropriately, you will need to have a working knowledge of the key concepts upon which it is built. Those concepts include the following.

- The meaning of *reasonable assurance*
- Audit risk and the risk of material misstatement
- Materiality and tolerable misstatement
- Financial statement assertions
- Internal control
- Information technology
- Audit evidence

.18 This part of the Alert provides a summary of these key concepts and a description of how they are used.

Reasonable Assurance

.19 The auditing standards make numerous references to your responsibility for obtaining "reasonable assurance." For example, your audit opinion states that generally accepted auditing standards require you to "obtain reasonable assurance about whether the financial statements are free of material misstatement." "Reasonable assurance" is the fundamental threshold you use to design and perform your audit procedures. For this reason, it is important that you have a working knowledge of the term.

.20 SAS No. 104 clarifies that reasonable assurance is a high, but not absolute, level of assurance. Put another way, you must plan and perform your audit in such a way to obtain sufficient appropriate audit evidence to reduce audit risk to a low level. Although "reasonable assurance" is a high level of assurance, it is not absolute assurance. Absolute level of assurance is not attainable because an auditor does not examine 100 percent of the entity's transactions or events and because of the limitations of the entity's internal control.

Audit Risk and the Risk of Material Misstatement

.21 Audit risk (AR) is the risk that the financial statements are materially misstated and you fail to detect such a misstatement or appropriately modify your opinion. You should perform your audit to reduce audit risk to a low level. You need to consider audit risk at all stages of your audit.

.22 Audit risk is a function of two components:

1. *Risk of material misstatement (RMM)*, which is the risk that an account or disclosure item contains a material misstatement. The risk of material misstatement is a combination of inherent and control risk.

2. *Detection risk*, which is the risk that you will not detect such misstatements in an account or disclosure item.

.23 Reducing audit risk to a low level requires you to:

1. Assess the risk of material misstatement.

2. Based on that assessment, design and perform further audit procedures to reduce audit risk to an appropriate low level.

Assessing the Risk of Material Misstatement

.24 The risk of material misstatement exists independently of detection risk. Many factors affect the risk of material misstatement, including the following.

- The client's industry, its regulatory environment, and other external factors
- The nature of the entity, for example, its operations, ownership, and financing
- The client's objectives, strategies, and related business risks
- How client management measures and reviews the company's financial performance
- The client's internal control, which includes the selection and application of accounting policies

Thus, the first step in assessing the risk of material misstatement is to gather information and gain an understanding of these and other items that create risks. Part Three of this Alert describes an audit process that begins with your gaining an understanding of these matters.

.25 The risk of material misstatement may reside at either the financial statement level or the assertion level.

- *Financial statement-level risks* potentially affect many different assertions. For example, a lack of qualified personnel in financial reporting roles (an element of the client's control environment) may affect many different accounts and several assertions.

- *Assertion-level risks* are limited to a single assertion, for example, the valuation of inventory or the occurrence of sales.

.26 Your response to assessed risks will differ depending on whether they reside at the financial statement or assertion level.

- Financial statement-level risks typically require an overall response, such as providing more supervision to the engagement team or incorporating additional elements of unpredictability in the selection of your audit procedures.
- Assertion-level risks are addressed by the nature, timing, and extent of further audit procedures.

For this reason, you should assess the risk of material misstatement at both the financial statement and the assertion level.

.27 Your assessment of the risk of material misstatement (at both the financial statement and the assertion level) should be directly linked to the design and performance of further audit procedures. For example, if your understanding of the client, its environment, and its internal control lead you to assess that there is a high inherent risk that inventory quantities could be misstated, you would design tailored further audit procedures to specifically respond to that risk.

.28 To perform audit procedures that are appropriately responsive to your assessed risks, you should define these risks in a way that incorporates the unique circumstances at the client. Generic checklists and standard audit programs may serve as a starting point for helping you to understand and assess risk, but to be truly effective, these generic audit tools need to be tailored to the specific circumstances of your client.

.29 The process for applying the audit risk model, which is summarized in Part Three of this Alert, describes in more detail how you should link your assessment of risk to the design and performance of further audit procedures.

.30 ***Risks of Material Misstatement at the Assertion Level.*** At the assertion level, the risk of material misstatement consists of two components:

- *Inherent risk (IR),* which is the susceptibility of an assertion to a material misstatement, assuming that there are no related controls. Inherent risk is greater for some assertions and related account balances, classes of transactions, and disclosures than for others.
- *Control risk (CR)*, which is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the client's internal control. Control risk is a function of the effectiveness of the design and operation of the client's internal control.

Detection Risk

.31 Detection risk is the risk that you will not detect a material misstatement that exists in an assertion. It is a function of the nature, timing, and effectiveness of audit procedures and how you apply them.

.32 Detection risk relates to your substantive audit procedures and is managed by how you respond to the risk of material misstatement at both the financial statement and the assertion level.

- *Financial statement-level risks.* Your responses to financial statement-level risks may include assignment of more experienced personnel to the engagement team, emphasizing of the application of professional skepticism, and providing more supervision and review of the audit work performed. Appropriate choices related to these matters will help you mitigate the risks that you might select an inappropriate audit procedure, misapply audit procedures, or misinterpret the results.
- *Assertion-level risks.* In response to assertion-level risks you will determine the nature, timing, and extent of your further audit procedures that are appropriate to respond to the assessed risk.

Thus, the effectiveness of further audit procedures depends on whether you have:

1. Acquired a sufficient depth and breadth of understanding of your client to make an informed assessment of the risk of material misstatements.

2. Used your assessment of the risks of material misstatement to drive the nature, timing, and extent of your further audit procedures.

.33 ***An Inverse Relationship Between the Risk of Material Misstatement and Detection Risk.*** At the assertion level, detection risk has an inverse relationship to the risk of material misstatement. The greater the risk of material misstatement, the less the detection risk that you should be willing to accept. Put another way, the greater the risk of material misstatement, the more reliable your substantive tests should be.

.34 Conversely, when the risk of material misstatement is low, you can accept a greater level of detection risk. However, you are always required to perform substantive tests on all relevant assertions related to each material account balance, class of transactions, and disclosure, regardless of your assessment of the risk of material misstatement.

.35 The model AR = RMM x DR expresses the general relationship of audit risk and its components. You may find this model useful when planning appropriate risk levels for your audit procedures, keeping in mind your overall desire to reduce audit risk to an appropriate low level.

Materiality and Tolerable Misstatement

The Concept of Materiality

.36 The concept of materiality recognizes that some matters are more important for the fair presentation of the financial statements than are others. In performing your audit, you are concerned with matters that could be material to the financial statements. Your responsibility is to plan and perform the audit to obtain reasonable assurance that material misstatements, whether caused by error or fraud, are detected.

.37 Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*, defines *materiality* as "the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed by the omission or misstatement." Thus, materiality is influenced by your perception of the needs of financial statement users who will rely on the financial statements to make judgments about your client's financial position and results of operations.

How Materiality Is Used in Your Audit

.38 Though defined by the accounting literature, materiality also is an audit concept of critical importance. Audit materiality represents the maximum amount that you believe the financial statements could be misstated and still fairly present the client's financial position and results of operations. Audit materiality affects:

1. *The nature, timing, and extent of audit procedures.* During audit planning, you should determine a materiality level for the financial statements taken as a whole. This initial determination of materiality will help you:

   — Make judgments when identifying and assessing the risk of material misstatement

   — Determine the nature, timing, and extent of your further audit procedures

2. *The evaluation of audit findings.* To form an opinion about the financial statements, you must evaluate audit findings and determine whether the misstatements that are not corrected by the client, individually or in the aggregate, are material to the financial statements.

Quantitative and Qualitative Considerations

.39 Although materiality commonly is expressed in quantitative terms, your determination of materiality is a matter of professional judgment that includes both quantitative and qualitative considerations. During the course of your audit, you should be alert for misstatements that could be qualitatively material. However, it ordinarily is not practical to design audit procedures to detect misstatements that qualitatively are material, and for that reason, materiality used for planning purposes considers primarily quantitative matters.

Tolerable Misstatement

.40 During audit planning you must determine an initial level of materiality for the purposes of designing and performing your audit procedures. This initial determination of materiality is determined for the financial statements taken as a whole. However, in designing your audit procedures, you should take into account the possibility that several misstatements of amounts less than financial statement materiality could—in the aggregate—result in a material misstatement of the financial statements. That is, errors in an account or disclosure may still exist and your audit procedures may fail to detect them. For that reason, you need to allow for these undetected misstatements that may exist. You build this allowance into the overall audit strategy process by setting tolerable misstatement.

.41 Tolerable misstatement (also referred to as tolerable error) is defined as the maximum error in a population (for example, the class of transactions or account balance) that you are willing to accept. Tolerable misstatement normally is lower than materiality for the financial statements as a whole. For each class of transactions, account balance, and disclosure, you should determine at least one level of tolerable misstatement.

.42 For example, if for planning purposes you determined materiality to be $100,000, you could set tolerable misstatement at $60,000. Then, you would use this tolerable misstatement level to determine the nature, timing, and extent of your further audit procedures. You could use different levels of tolerable misstatement for other account balances, classes of transactions, or assertions. See AU section 350, *Audit Sampling*, of volume 1 of the AICPA *Professional Standards* for more guidance about tolerable misstatement.

Financial Statement Assertions

Why Financial Statement Assertions Are Important

.43 Your audit results in an opinion of the financial statements taken as a whole. However, to reach this opinion of the financial statements, most of your audit procedures should be directed at a much more detailed level, the assertion level.

.44 Assertions are management's implicit or explicit representations regarding the recognition, measurement, presentation, and disclosure of information in the financial statements and related disclosures. Assertions fall into three categories: (1) classes of transactions, (2) account balances, and (3) presentation and disclosure.

.45 For example, by presenting the information "Cash . . . .$XXX" in the financial statements, management implies that:

- The cash truly exists and company has the right to use it.
- The amount presented represents all the company's cash.
- The amount presented is accurate.

.46 Many of your audit procedures are performed not on the financial statements taken as a whole nor even at the account or disclosure level, but rather, they are directed at individual assertions.

.47 Relating identified risks of material misstatement to misstatements that might occur at the assertion level is necessary for you to properly link assessed risks to further audit procedures.

.48 The table titled "Categories of Assertions" provides a summary of how assertions might be grouped into various categories. You may express these assertions differently, as long as your descriptions encompass all the aspects described in the table.

Categories of Assertions

	Description of Assertions		
	Classes of Transactions and Events During the Period	*Account Balances at the End of the Period*	*Presentation and Disclosure*
Occurrence/Existence	Transactions and events that have been recorded have occurred and pertain to the entity.	Assets, liabilities, and equity interests exist.	Disclosed events and transactions have occurred and pertain to the entity.
Rights and Obligations	—	The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.	
Completeness	All transactions and events that should have been recorded have been recorded.	All assets, liabilities, and equity interests that should have been recorded have been recorded.	All disclosures that should have been included in the financial statements have been included.
Accuracy/Valuation and Allocation	Amounts and other data relating to recorded transactions and events have been recorded appropriately.	Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are recorded appropriately.	Financial and other information is disclosed fairly and at appropriate amounts.
Cut-off	Transactions and events have been recorded in the correct accounting period.	—	—
Classification and Understandability	Transactions and events have been recorded in the proper accounts.	—	Financial information is appropriately presented and described and information in disclosures is expressed clearly.

How You Use Assertions in Your Audit

.49 Most of your tests of controls and substantive audit procedures are directed at specific assertions. For example, confirmation of receivables provides strong, direct evidence about the existence of those receivables and it may provide some evidence about accuracy of the gross balance. However, confirmations alone are not sufficient appropriate audit evidence to test the valuation of receivables, and the auditor should perform other appropriate procedures, such as looking at subsequent cash receipts and applying analytical procedures in testing the allowance for doubtful accounts. For this reason, to establish a clear link between your assessment of the risk of material misstatement and further audit procedures, your risk assessment procedures should be performed at the assertion level as well.

Internal Control

Definition and Description of Internal Control

.50 Internal control is a process—effected by those charged with governance, management, and other personnel—designed to provide reasonable assurance about the achievement of the entity's objectives. These objectives fall into three categories: financial reporting, operations, and compliance with laws and regulations. In general, when performing a financial statement audit, you are most concerned with the client's financial reporting objectives, which relate to the preparation of audited financial statements.

.51 In trying to achieve its objectives, your client faces certain risks. Internal control helps the entity achieve its objectives by mitigating the risk of "what can go wrong" in the pursuit of its objectives. Thus, there is a direct link between the entity's objectives, the risks to achieving those objectives, and internal control. Your assessment of internal control is a consideration of whether the controls mitigate financial reporting risks.

.52 Internal control consists of five interrelated components:

1. *Control environment* sets the tone of an organization, influencing the control-consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

2. Entity's *risk assessment* is the entity's identification and analysis of relevant risks to achievement of its objectives, forming a basis for determining how the risks should be managed.

3. *Information and communication systems* support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.

4. *Control activities* are the policies and procedures that help ensure that management directives are carried out.

5. *Monitoring* is a process that assesses the quality of internal control performance over time.

.53 This division of internal control into five components provides a useful framework for you to consider how different aspects of your client's internal control may affect your audit. You are not required to classify controls into a particular component. Rather, your understanding of internal control involves determining whether and how a specific control may prevent or detect and correct material misstatements.

Controls May Be Pervasive to the Entity or Restricted to an Account or Assertion

.54 Your client's financial reporting risks (and therefore its controls) may relate to one of the following:

1. To specific classes of transactions, account balances, and disclosures

2. More pervasively to the financial statements taken as a whole (And potentially the risks may affect many assertions.)

.55 For example, a weak control environment potentially affects many assertions and therefore is considered to operate at the financial statement level. In contrast, a control to ensure that all valid purchases are captured and recorded is restricted to specific accounts and classes of transactions and thus operates at the assertion level.

.56 Understanding whether a control is restricted to specific classes of transactions, account balances, or disclosures or pertains pervasively to the financial statements will help you:

1. Design appropriate audit procedures to obtain information about the design of the control and whether it has been placed in operation

2. Assess the risk of material misstatement in the financial statements

3. Design substantive audit procedures

4. Assess the results of the tests of operating effectiveness of controls, if any

Control Design

.57 The evaluation of internal control design involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements.

.58 On every audit you should evaluate the design of internal control and determine whether controls have been implemented over all relevant assertions related to each material account balance, class of transactions, or disclosures.

Control Operations

.59 The concept of the effective operation of controls is different from their design and implementation. The operating effectiveness of controls involves the consideration of:

— How controls were applied during the audit period

— The consistency with which they were applied

— By whom they were applied

.60 To assess the operating effectiveness of controls, you should perform tests of controls. Unlike the evaluation of control design, tests of controls are not required on every audit, only on those audits where the auditor's risk assessment procedures includes an expectation that the controls will be effective or when substantive procedures alone do not provide sufficient audit evidence at the assertion level.

Information Technology

.61 Your understanding of the client and its environment, including its internal control, includes an understanding of how it uses information technology (IT). A client's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, compliance objectives, and its operating units or business functions. Examples in which IT affects the entity and its environment are as follows.

- *External factors.* For example, technological innovations may have lowered the barriers to entry into the client's industry, which in turn increases competition not only for customers, but perhaps also for raw materials or qualified personnel.

- *Client operations.* For example, your client's manufacturing process may rely more on manual processes and less on technology than its competitors. Consequently, your client's financial and nonfinancial ratios will differ from others in the industry.
- *Objectives, strategies, and business risks.* For example, your not-for-profit client's innovative use of technology may allow it to raise contributions from groups of supporters who otherwise would not contribute to the organization.
- *Measurement and review of the client's financial performance.* For example, management frequently relies on information produced by the company's IT processing system to measure and review the company's financial performance. Management's ability to make decisions appropriately may rely on the accuracy, availability, and timeliness of the information processed by the IT system.

.62 The way in which IT is deployed may vary among entities. For example, your client may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, other entities in the same industry may have complex, highly integrated systems that share data and that are used to support all aspects of the company.

Implications of IT on Your Understanding of Internal Control

.63 The nature and characteristics of your client's use of IT in its financial information system affect its internal control. For example:

- Multiple users may access a common database of information. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data.
- When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This breakdown could result in unauthorized transactions or changes to programs or data that affect the financial statements.

.64 ***General vs. IT Application Controls.*** IT general computer controls are polices and procedures that relate to many applications and support the effective functioning and continued proper operation of information systems. For example, your client's administration of passwords can potentially affect many applications. If passwords for a given user can be stored on that person's computer, the effectiveness of internal control may be compromised because anyone who gained access to the computer could inappropriately gain access to the application, the related data, or both.

.65 Other IT controls are applied only to specific applications, for example accounts payable, payroll, or the general accounting application. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and performing manual follow-ups of exception reports.

How the Client's Use of IT Affects Audit Planning

.66 The use of professionals possessing IT skills is a significant aspect of many audit engagements. An IT professional may help:

- Determine the effect of IT on the audit
- Identify and assess IT risks

- Understand IT controls
- Design and perform tests of IT controls or substantive procedures

.67 In determining whether an IT professional is needed on the audit team, you should consider factors such as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

.68 Audit procedures that you may assign to a professional possessing IT skills include:

- Inquiring of the client's IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed
- Inspecting systems documentation
- Observing the operation of IT controls
- Planning and performing tests of IT controls

.69 If the use of an IT professional is planned, you should determine whether that professional is effectively functioning as a member of the audit team. If such a professional is part of your audit team, your responsibilities with respect to that professional are equivalent to those for other assistants. In such circumstances, you should have sufficient knowledge of IT matters to:

1. Communicate the objectives of the IT professional's work
2. Evaluate whether the specified audit procedures will meet your objectives
3. Evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures

Audit Evidence

The Nature of Audit Evidence

.70 Audit evidence is all the information you use to arrive at the conclusions that support your audit opinion. Audit evidence is cumulative in nature. For example, your evidence regarding payables begins with you performing risk assessment procedures relating to the client and its environment, including its internal control. These risk assessment procedures provide audit evidence to support your conclusion about the risk of material misstatement for payables. Based on this risk assessment, you then perform further audit procedures, which include substantive tests and may include tests of controls. The results of these further audit procedures provide audit evidence that, when considered in conjunction with the evidence from risk assessment procedures, allow you to form a supportable conclusion about payables. You then repeat this process for other accounts, classes of transactions, and disclosures, and the aggregation of your conclusions provides a basis for your opinion on the financial statements taken as a whole.

.71 The procedures that you perform on your audit provide audit evidence, but they are not the only source of audit evidence. For example, previous audits and your firm's client acceptance and continuance procedures also may be sources of audit evidence.

.72 To determine whether you have obtained persuasive audit evidence, you should consider:

- The consistency of that evidence
- Whether the evidence was obtained from different sources or the performance of procedures that were of a different nature

.73 A lack of consistency among individual items of audit evidence may indicate that one of the items is not reliable. For example, in a not-for-profit entity, the board of trustees' minutes reported that all of the contributions received during the year were unrestricted, but some of the donor agreements examined by you stated that the contributions are temporarily restricted. When audit evidence obtained from one source is inconsistent with that obtained from another, you should determine what additional audit procedures are necessary to resolve the inconsistency.

.74 Ordinarily, you obtain more assurance from consistent audit evidence obtained from different sources or of a different nature than from items of evidence considered individually. For example, reading minutes of the board and other documentation and making inquiries of several individuals about matters included in disclosures usually provide more reliable evidence than does making inquiries of one individual.

The Sufficiency and Appropriateness of Audit Evidence

.75 ***Sufficiency of Audit Evidence.*** The sufficiency of audit evidence relates to its quantity. For example, the auditor who tests eight of the twelve monthly reconciliations between a general ledger control account and the related subsidiary ledger will obtain more evidence about the operating effectiveness of the control than the auditor who tests only two of the twelve reconciliations.

.76 The sufficiency of audit evidence you need to support your conclusion is affected by:

- *The risk of misstatement.* The greater the risk, the more audit evidence likely to be required to support a conclusion
- *The quality of the audit evidence obtained.* The higher the quality of the evidence, the less that will be required.

.77 ***Appropriateness of Audit Evidence.*** The appropriateness of audit evidence relates to its quality. The quality of audit evidence is a function of its relevance and its reliability in providing support, or detecting misstatements, in the accounts, classes of transactions, or assertions.

- *Relevance of audit evidence.* The results of your audit procedures may provide audit evidence that is relevant to certain assertions but not others. For example, tests of controls related to the proper authorization of a transaction will provide evidence about the occurrence assertion but not about the completeness assertion. Obtaining audit evidence relating to a particular assertion, in this example, the occurrence of a transaction, is not a substitute for obtaining audit evidence regarding another assertion, in this example, completeness.
- *Reliability of audit evidence.* The reliability of audit evidence is influenced by its source and by its nature. Reliability also depends on the individual circumstances under which it is obtained, including its timing.

.78 Generalizations about the reliability of various kinds of audit evidence can be made; however, when considering such generalizations keep in mind that they are subject to important exceptions. Even when audit evidence is obtained from sources external to the client, circumstances may exist that could affect the reliability of the information obtained. For example, audit evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. While recognizing that exceptions may exist, the following generalizations about the reliability of audit evidence may be useful.

- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence is more reliable when it exists in documentary form (whether paper, electronic, or other medium). For example, minutes of an audit committee meeting are more reliable than a subsequent oral representation of the matters discussed at the meeting.
- Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies or facsimiles.

.79 Typically, you obtain more assurance from consistent audit evidence obtained from different sources or of a different nature than from items of audit evidence considered individually. For example, if the company lacks documentation to support its intent with regard to equity securities (which affect how those securities are classified and presented in the financial statements), you may have no choice but to rely on management's representations regarding their intent. Management's representations may be less reliable than a written record, but if you obtain representations from several sources (for example, from different members of management) and these representations are consistent with the client's past history of selling equity investments, then you may find the consistency of the evidence from different sources to be persuasive.

.80 An increased quantity of audit evidence may compensate for less reliable audit evidence, it cannot compensate for audit evidence that lacks relevancy. For example, a confirmation of an accounts receivable balance is not relevant to the valuation of the allowance account. Increasing the number of receivables confirmations will not provide you with any additional evidence relating to the allowance for doubtful accounts.

.81 ***Determining Whether You Have Obtained Sufficient, Appropriate Audit Evidence.*** You may find it necessary to rely on audit evidence that is persuasive rather than conclusive. However, to obtain the reasonable assurance required to support an opinion about the financial statements, you must not be satisfied with audit evidence that is less than persuasive.

Part Three: Applying the Audit Risk Model

.82 This part of the Alert provides a summary of the audit process. Even though some requirements and guidance are presented in a way that suggests a sequential process, audit fieldwork involves a continuous process of gathering, updating, and analyzing information throughout the audit.

.83 The following is an overview of how an auditor should apply the audit risk model in practice.

- *Gather information about the entity and its environment, including internal control.* Your first step in the process is to gather information about those aspects of the client and its environment that will allow you to identify and assess risks. Evaluating the design of the client's controls and determining whether they have been implemented are an integral part of this process.

- *Understand the entity and its environment, including its internal control.* Based on the information gathered, you should be able to identify what could go wrong in specific relevant assertions related to each account balance, class of transactions, or disclosures.

- *Assess the risk of material misstatement.* Next, you will use your understanding of the client and its environment, including its internal control, to assess the risk of material misstatement that relate to both financial statement level and specific assertions. To assess risks you will need to:

  — Identify the risk of material misstatement

  — Describe the identified risks in terms of what can go wrong in specific assertions

  — Consider the significance and likelihood of material misstatement for each identified risk

- *Design overall responses and further audit procedures.* You should address the risk of material misstatement at both the financial statement and the relevant assertion level.

  — The risk of material misstatement at the financial statement level has a more pervasive effect on the financial statements and affects many assertions. In addition to developing assertion-specific responses, financial statement-level risks may require you to develop an overall, audit-wide response, such as assigning more experienced audit team members.

  — Assertion-level risks pertain to a single assertion and should be considered when you design and subsequently perform further audit procedures. Depending on the results of your risk assessment procedures, further audit procedures may encompass a combined approach using both tests of controls and substantive procedures or a substantive audit approach. Either approach is directed at relevant assertions related to each material account balance, class of transactions, and disclosures. However, regardless of your assessment of risks, you need to perform substantive audit procedures on all relevant assertions related to each material account balance, class of transaction, or disclosure.

Information Gathering

Information Needed About the Client and Its Environment to Identify and Assess the Risk of Material Misstatement

.84 Obtaining an understanding of your client and its environment is an essential part of every audit. Not only does this understanding allow you to identify and assess the risk of material misstatement, it also allows you to exercise informed judgment about other audit matters such as:

- Materiality
- Whether the client's selection and application of accounting policies are appropriate and financial statement disclosures are adequate
- Areas where special audit consideration may be necessary, for example, related party transactions
- The expectation of recorded amounts that you develop for performing analytical procedures
- The design and performance of further audit procedures
- The evaluation of audit evidence

.85 Not all information about a client or its environment is relevant for your audit. In general, the information you should gather about your client is that which allows you to assess the risk that specific assertions could be materially misstated. The following table summarizes the various categories of information you should obtain about your client.

Understanding the Client and Its Environment

On every audit you are required to gather information and obtain an understanding of the client and its environment. This understanding consists of the following aspects.

- *External factors*, including
  - — Industry factors such as the competitive environment, supplier and customer relationships, and technological developments.
  - — The regulatory environment, which includes relevant accounting pronouncements, the legal and political environment, and environmental requirements that affect the industry.
  - — Other matters such as general economic conditions.
- *Nature of the client*, which includes its operations, its ownership, governance, the types of investments it makes and plans to make, how it isfinanced, and how it is structured.
- *Objectives and strategies and related business risks*, which may result in material misstatement of the financial statements taken as a whole or individual assertions.
- *Measurement and review of the client's financial performance*, which tells you which aspects of the client's performance that management considers to be important.
- *Internal control*, which consists of five components: the control environment, risk assessment, information and communication, control activities, and monitoring. These components may operate at the entity level or the individual transaction level. To obtain an appropriate understanding of internal control will require you to understand and evaluate the design of all five components of internal control and to determine whether the controls are in use by the client.

Risk Assessment Procedures

.86 The audit procedures you perform to obtain an understanding of the entity and its internal control are referred to as *risk assessment procedures*. Some of the information you obtain by performing risk assessment procedures you will use to support your assessments of the risks of material misstatement. Risk assessment procedures include:

1. Inquiries of management and others at the client

2. Analytical procedures

3. Observation and inspection

.87 You need to gather audit evidence to support your assessment of the risk of material misstatement. It is not acceptable to simply deem control risk to be "at the maximum" without support. Your risk assessment procedures provide the audit evidence necessary to support your risk assessments, which in turn, support your determination of the nature, timing, and extent of further audit procedures. Thus, the results of your risk assessment procedures are an integral part of the audit evidence you obtain to support your opinion on the financial statements.

.88 ***A Mix of Procedures.*** Except for internal control, you are not required to perform all the procedures for each of the five aspects of the client and its environment discussed previously. However, in the course of gathering information about the client, you should perform all the risk assessment procedures.

.89 With regard to obtaining an understanding about the design of internal control and determining whether they have been implemented, inquiry alone is not sufficient. Thus, for these purposes, you should supplement your inquiries with other risk assessment procedures.

.90 ***Other Procedures That Provide Relevant Information About the Client.*** Following include some procedures you might consider.

- *Assessing the Risk of Material Misstatement Due to Fraud.* AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), directs you to perform certain audit procedures to assess the risk of material misstatement due to fraud. Some of these procedures also may help gather information about the entity and its environment, particularly its internal control. For this reason, you should:
  - — Coordinate the procedures you perform to assess the risk of material misstatement due to fraud with your other risk assessment procedures
  - — Consider the results of your assessment of fraud risk when identifying the risk of material misstatement
- *Other Information.* When relevant to the audit, you also should consider other knowledge you have of the client that can help you assess risk. This other information may include:
  - — Information obtained from your client acceptance or continuance process
  - — Experience gained on other engagements performed for the entity

.91 ***Updating Information From Prior Periods.*** If certain conditions are met, you may use information about the client you obtained in prior periods as audit evidence in the current period audit. However, when you intend to use information from prior periods in the current period audit, you should determine whether changes have occurred that may affect the relevance of the information for the current audit. To make this determination, you should make inquiries and perform other appropriate audit procedures, such as walk-throughs of systems.

Gaining an Understanding of the Client and Its Environment

.92 The gathering of information, by itself, does not provide you with the understanding of the client that is necessary for you to assess risk. For you to assess the risk of material misstatement and perform further audit procedures, you need to synthesize the information gathered to determine how it might affect the financial statements. For example:

- Information about the client's industry may allow you to identify characteristics of the industry that could give rise to specific misstatements. For example, if your client is a construction contractor that uses long-term contract accounting, your understanding of the client should be sufficient to allow you to recognize that the significant estimates of revenues and costs create a risk of material misstatement.
- Information about the ownership of your client, how it is structured, and other elements of its nature will help you identify related party transactions that, if not properly accounted for and adequately disclosed, could lead to a material misstatement.
- Your identification and understanding of the business risks facing your client increase the chance that you will identify financial reporting risks. For example, your client may face a risk that a new company may enter its market, and that new entrant could have certain business advantages (for example, economies of scale or greater brand recognition). The potential risk of material misstatement of the financial statements related to this business risk might be obsolescence or overproduction of inventory that could only be sold at a discount.
- Information about the performance measures used by client management may lead you to identify pressures or incentives that could motivate client personnel to misstate the financial statements.
- Information about the design and implementation of internal control may lead you to identify deficiencies in control design, which increase the risk of material misstatement.

Evaluating the Design of Internal Control

.93 A sufficient understanding of internal control is one that allows you to evaluate the design of internal control and to determine whether controls have been placed in operation. This threshold describes a substantial understanding of internal control.

Requirements for Evaluating Control Design

.94 On every audit, you should obtain an understanding of internal control that is of sufficient depth to enable you to:

1. Assess the risks of material misstatement of the financial statements, whether due to error or fraud

2. Design the nature, timing, and extent of further audit procedures

.95 To meet this threshold of sufficiency, at both the entity and relevant assertion level, you should:

1. Evaluate the design of controls that are relevant to the audit and determine whether the control—either individually or in combination—is capable of effectively preventing or detecting and correcting material misstatements.

2. Determine that the control has been implemented, that is, that the control exists and that the entity is using it.

.96 Your evaluation of internal control design and the determination of whether controls have been implemented are critical to your assessment of the risks of material misstatement. It is not possible to develop a reliable assessment of the risk of material misstatement absent a sufficient understanding of internal control. For this reason, you are required to perform risk assessment procedures to gather information and form an understanding of internal control on every audit. Even if your initial audit strategy contemplates performing only substantive procedures for all relevant assertions related to material transactions, account balances, and disclosures, you still need to evaluate the design of your client's internal control.

.97 ***How to Evaluate Control Design.*** In evaluating control design, it is helpful to consider:

- Whether control objectives that are specific to the unique circumstances of the client have been considered for all relevant assertions for all significant accounts and disclosures

- Whether the control or combination of controls would—if operated as designed—meet the control objective

- Whether all controls necessary to meet the control objective are in place

Determining If the Control Has Been Implemented

.98 It may be possible that the way in which a control is applied by an entity differs from the description of the control in a policy manual or from one individual's understanding of how the control is applied. For example, your client's accounting policy manual may state that physical inventory accounts are performed annually. However, because of increases in the volume of transactions, the client deviates from this stated policy and counts some inventory items twice a year. This practice is not reflected in the policy manual and is not known by all individuals in the company. Determining whether a control has been implemented is important because it confirms your understanding of control design.

.99 The determination of whether a control has been put in place and is in use involves obtaining evidence about whether those individuals responsible for performing the prescribed procedures have:

- An awareness of the existence of the procedure and their responsibility for its performance
- A working knowledge of how the procedure should be performed

.100 Determining whether the control has been implemented does not require you to determine whether the control was performed properly throughout the audit period.

.101 ***Distinguishing Between Evaluation of Design and Tests of Controls.*** Obtaining an understanding of the design and implementation of internal control is different from testing its operating effectiveness.

- *Understanding design and implementation* is required on every audit as part of the process of assessing the risks of material misstatement.
- *Testing the operating effectiveness* builds on your understanding of internal control design and implementation and is necessary only where the auditor's risk assessment procedures include an expectation that the controls will be effective or when substantive procedures alone do not provide you with sufficient audit evidence at the assertion level.

.102 The procedures necessary to understand the design and implementation of controls do provide some limited evidence regarding the operation of the control.[2]

.103 However, the procedures necessary to understand the design and implementation of controls generally are not sufficient to serve as a test of their operating effectiveness for the purpose of placing significant reliance on their operation. For example, obtaining audit evidence about the implementation of a manually operated control at a point in time does not provide audit evidence about the operating effectiveness of control at other times during the period under audit.

.104 Examples of situations where the procedures you perform to understand the design and implementation of controls may provide sufficient audit evidence about their operating effectiveness include:

- Controls that are automated to the degree that they can be performed consistently provided that IT general controls over those automated controls operated effectively during the period.
- Controls that operate only at a point in time rather than continuously throughout the period. For example, if the client performs an annual physical inventory count, your observation of that count and other procedures to evaluate its design and implementation provide you with evidence that you consider in the design of your substantive procedures.

.105 ***Evaluating Design and Implementation in the Absence of Control Documentation.*** For smaller companies, the company's evidence supporting the design and implementation of some elements of internal control may not be available in documentary form. For example, the entity may lack:

- A written code of conduct that describes management's commitment to ethical values
- A formal risk assessment process

.106 Without adequate documentation of controls, the risk assessment procedures available to you to understand control design are limited to inquiry and observation. As risk assessment procedures, both inquiry and observation have limitations, and accordingly, absent adequate documentation, you should consider whether the information you have gathered about internal control is sufficient to evaluate its design.

---

[2] For example, a walkthrough that traces a transaction from its inception through its recording is considered a test of one transaction. Examination of several documents evidencing the operation of a control at a key control point may also be considered as a test. Generally, the evidence required to rely on the operation of the control will be greater than that required to simply assess whether it has been placed in operation.

.107 Inadequate documentation of the components of internal control also may be a control deficiency. For example, the lack of appropriate documentation may impair management's ability to communicate control procedures to those responsible for their performance or to monitor control performance effectively.

Discussion Among the Audit Team

.108 The members of the audit team should discuss the susceptibility of the client's financial statements to material misstatement. This discussion will allow team members to exchange information and create a shared understanding of the client and its environment, which in turn will enable each team member to:

- Gain a better understanding of the potential for material misstatement resulting from fraud or error in the assertions that are relevant to the areas assigned to them
- Understand how the results of the audit procedures that they perform may affect other aspects of the audit.

This discussion among the audit team could be held at the same time as the discussion among the team related to fraud, which is required by AU section 316.

Assessing the Risk of Material Misstatement

Considerations at the Financial Statement Level

.109 You should use your understanding of the client and its environment—which includes your evaluation of the design and implementation of internal control—to assess the risk of material misstatement. To make this assessment, you should:

1. Identify risks throughout the process of obtaining an understanding of the entity, its internal control, and its environment.
2. Relate the identified risks to what can go wrong at the relevant assertion level.
3. Consider whether the risks could result in a material misstatement to the financial statements.
4. Consider the likelihood that the risks could result in a material misstatement of the financial statements.

.110 ***Financial Statement-Level and Assertion-Level Risks.*** You should identify and assess the risks of material misstatement at both the financial statement level and the relevant assertion level.

1. *Financial statement-level risks.* Some risks of material misstatement relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. These risks at the financial statement level may be identifiable with specific assertions at the class of transaction, account balance, or disclosure level.
2. *Relevant assertion-level risks.* Other risks of material misstatement relate to specific classes of transactions, account balances, and disclosures at the assertion level. Your assessment of risks at the assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures.

.111 Risks that exist at the financial statement level, for example, those that pertain to a weak control environment or to management's process for making significant accounting estimates, should be related to specific assertions. For example, risks related to the client's process for making accounting estimates would affect those assertions where an accounting estimate was necessary (for example, the valuation of assets).

.112 In other instances, it may not be possible for you to relate your financial statement-level risks to a particular assertion or group of assertions. For example, it may not be possible for you to determine which assertions will or will not be affected by a weak control environment. Financial statement-level assertions that can not be related to specific assertions will require you to make an overall response, such as the way in which the audit is staffed or supervised.

.113 ***How to Consider Internal Control When Assessing Risks.*** Your evaluation of internal control design and the determination of whether controls have been implemented are integral components of the risk assessment process. When making risk assessments, you should identify the controls that are likely to either prevent or detect and correct material misstatements in specific assertions. For example, procedures relating to the client's physical inventory count may relate specifically to the existence or completeness of inventory.

.114 Individual controls often do not address a risk completely in themselves. Often, only multiple control activities, together with other components of internal control (for example, the control environment, risk assessment, information and communication, or monitoring), will be sufficient to address a risk. For this reason, when determining whether identified controls are likely to prevent or detect and correct material misstatements, you generally organize your risk assessment procedures according to significant transactions and accounting processes (for example, sales, cash receipts, or payroll), rather than general ledger accounts.

.115 ***Identification of Significant Risks.*** As part of your risk assessment, you should identify significant risks, which are defined as those risks that require special audit consideration. For example, if your client is named as a defendant in a patent infringement lawsuit that may threaten the viability of its principal product, you could consider as significant risks, the risks that the lawsuit (1) would not be appropriately recorded or disclosed in accordance with generally accepted accounting principles or (2) may affect the entity's ability to continue as a going concern.

.116 Significant risks arise on most audits. When you determine that a risk is a significant risk, your audit procedures should include (but not be limited to):

- Obtaining an understanding of internal control, including relevant control activities, related specifically to those significant risks.
- If you plan to rely on the operating effectiveness of controls related to significant risks, testing the operating effectiveness of those controls in the current period. That is, using evidence about operating effectiveness that you obtained in prior periods is not appropriate.
- Substantive procedures specifically designed to address the significant risk.

.117 Significant risks should be distinguished from transactions or events that have a high inherent risk, which could be mitigated by the client's internal controls. For example, because of the nature of your client and the industry in which it operates, you might assess a high inherent risk on revenue recognition. However, the client may have controls over revenue recognition; you would then obtain an understanding of such controls and determine whether they are implemented and, if appropriate, test their operating effectiveness. This circumstance may not warrant special audit consideration and thus may not be a significant risk.

.118 The determination of whether a transaction or event is a significant risk is a matter for your professional judgment.

Considerations at the Assertion Level

.119 Part Two of this Alert provides a definition of audit risk (AR) in which:

AR = RMM x DR

where RMM is the risk of material misstatement and DR is detection risk

The risk of material misstatement is described as "the entity's risk," which means that it is independent of your audit. You can control detection risk by changing the nature, timing, and extent of your audit procedures. For example, to decrease the planned level of detection risk, you could perform more extensive substantive tests.

.120 You cannot control the risk of material misstatement as you can detection risk because RMM exists independently from your audit procedures. However, to properly gauge the detection risk you are willing to accept, you need to assess the risks of material misstatement. The risk assessment process described in the SASs is designed to allow you to gather information and assess the risks of material misstatement so you can design further audit procedures that reduce audit risk to an acceptably low level.

Determining Materiality and Tolerable Misstatement

.121 You should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit. The determination of materiality will assist you in (1) making judgments when identifying and assessing the risk of material misstatement and (2) determining the nature, timing, and extent of your further audit procedures. In determining financial statement materiality, you will often apply percentages to benchmarks. The determination of materiality, including the selection of the appropriate benchmark and percentages, is a matter of your professional judgment and depends on the nature and circumstances of your audit.

.122 In addition to the quantitative considerations, you should be alert for misstatements that could be qualitatively material, for example, misstatements that may change a loss into income or vice versa, may potentially affect loan covenants, or may increase management's compensation.

.123 After you determine the financial statement materiality, you should set a tolerable misstatement, which is the adjustment of the financial statement materiality to the assertion level. Tolerable misstatement will assist you in assessing the risk of material misstatement and in designing and performing further audit procedures.

.124 Because the entity's circumstances may change as the audit progresses, you should reassess the financial statement materiality and tolerable misstatement levels initially determined. Failure to do so may result in you failing to obtain sufficient audit evidence to support your opinion.

Responding to Assessed Risks

Linking Assessed Risks to Further Audit Procedures

.125 The risk assessment process culminates with your articulation of the account balances, classes of transactions, or disclosures where material misstatements are most likely to occur. This assessment of risk relates identified risks to what can go wrong at the assertion level and the way in which misstatements are likely to occur. Your risk assessment provides the basis for designing and performing further audit procedures.

.126 You can think of your assessment of risks as having two dimensions: direction and amplitude. Direction relates to where misstatements can occur, that is, the specific assertions related to an account, class of transactions, or disclosure. Amplitude relates to the possible magnitude of the misstatement that could occur. Magnitude is a function of two variables: the potential significance of the misstatement (for example, whether it is material) and the likelihood of a misstatement occurring (for example, remote, likely). Your evaluation of the design and implementation of internal control affects all elements of your risk assessment process.

Further Audit Procedures

.127 You perform further audit procedures to obtain the audit evidence necessary to support your audit opinion. Further audit procedures consist of either tests of controls or substantive tests. Often, a combined approach using both tests of controls and substantive procedures is an effective approach. You are not precluded from adapting a substantive audit approach provided that you have and document an appropriate basis for this approach.

.128 In determining the nature, timing, and extent of further audit procedures, you should design and perform further procedures whose nature, timing, and extent are responsive to the assessed risk of material misstatement at the relevant assertion level. You should provide and document a clear linkage between your assessment of the risk of material misstatement and the nature, timing, and extent of the further audit procedures.

.129 Audit procedures performed in previous audits and example procedures provided by illustrative audit programs may help you understand the types of further audit procedures that are possible for you to perform. However, prior year procedures and example audit programs do not provide a sufficient basis for determining the nature, timing, and extent of audit procedures to perform in the current audit. Your assessment of the risk of material misstatement in the current period is the primary basis for designing further audit procedures in the current period.

Evaluating Audit Findings

.130 In evaluating whether the financial statements are presented fairly, you must consider the effects, both individually and in the aggregate, of misstatements (known and likely) identified by you that are not corrected by the client.

.131 Your consideration and aggregation of misstatements should include both of the following:

- Known misstatements, which are the amount of misstatements specifically identified
- Likely misstatements, which include (1) projected misstatements in the account balances or classes of transactions that you have examined and (2) differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate.

.132 Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.

.133 Before considering the aggregate effect of identified uncorrected misstatements, the auditor should consider each misstatement separately to evaluate:

1. Its effect in relation to the relevant individual classes of transactions, account balances, or disclosures, including qualitative considerations.
2. Whether, in considering the effect of the individual misstatement on the financial statements taken as a whole, it is appropriate to offset misstatements. For example, it may be appropriate to offset misstatements of items within the same account balance in the financial statements.
3. The effect of misstatements related to prior periods. In prior periods, misstatements may not have been corrected by the entity because they did not cause the financial statements for those periods to be materially misstated. Those misstatements might also affect the current period's financial statements.

.134 In aggregating misstatements, you should include the effect on the current period's financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, you should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

.135 There are quantitative and qualitative materiality considerations, and you should consider both when evaluating audit results. Because of qualitative considerations, misstatements of relatively small amounts could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

Evaluating Whether the Financial Statements Taken as a Whole Are Free of Material Misstatement

.136 You must evaluate whether the financial statements taken as a whole are free of material misstatement. In making this evaluation, you should consider the evaluation of the uncorrected (known and likely) misstatements you identified during the audit. When concluding about whether the effect of misstatements, individually or in the aggregate, is material, you should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit. For example, an amount that is material to the financial statements of one entity may not be material to the financial statements of another entity of a different size or nature. Also, what is material to the financial statements of a particular entity might change from one period to another.

.137 If you believe that the financial statements taken as a whole are materially misstated, you should request management to make the necessary corrections. If management refuses to make the corrections, you must determine the implications for the auditor's report.

.138 If you conclude that the effects of uncorrected misstatements are not material, you should consider that the financial statements themselves could still be materially misstated because of additional misstatements that you did not detect. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases. Accordingly, you should consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

The Iterative Nature of Auditing

.139 An audit of financial statements is a cumulative and iterative process. As you perform planned audit procedures—whether they be risk assessment procedures, substantive tests, or tests of controls—the audit evidence you obtain may cause you to modify the nature, timing, or extent of other planned audit procedures. Information may come to your attention that differs significantly from the information on which the risk assessments were based.

.140 For example, the extent of misstatements that you detect by performing substantive procedures may alter your judgment about the risk assessments and may indicate a material weakness in internal control. Or, analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognized risk of material misstatement. In such circumstances, you should reevaluate the planned audit procedures based on the revised consideration of assessed risks.

Audit Documentation

General Documentation Requirements

.141 In general, you should document certain matters pertaining to each step in the risk assessment process. This audit documentation should provide a clear understanding of the work performed, the source of the information, and the conclusions reached.

.142 The form and content of audit documentation are for you to determine using professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), provides general guidance regarding the purpose, content, ownership, and confidentiality of audit documentation. Examples of common documentation techniques include narrative descriptions, questionnaires, checklists, and flowcharts. These techniques may be used alone or in combination.

.143 The form and extent of your documentation are influenced by the following:

- The nature, size, and complexity of the entity and its environment
- The availability of information from the entity
- The specific audit methodology and technology used in the course of the audit

.144 For example, documentation of the understanding of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed, documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity and its environment, and the more extensive the audit procedures performed by the auditor, the more extensive your documentation should be. The specific audit methodology and technology used in the course of the audit will also affect the form and extent of documentation.

Specific Documentation Requirements

.145 The SASs require you to document the following matters.

- The levels of materiality and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined.
- The discussion among the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, including how and when the discussion occurred, the subject matter discussed, the audit team members who participated, and significant decisions reached concerning planned responses at the financial statement and relevant assertion levels.
- Key elements of the understanding obtained regarding each of the aspects of the entity and its environment, including each of the components of internal control, to assess the risks of material misstatement of the financial statements, the sources of information from which the understanding was obtained, and the risk assessment procedures.
- The assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level and the basis for the assessment.
- The significant risks identified and related controls evaluated.
- The overall responses to address the assessed risks of misstatement at the financial statement level.
- The nature, timing, and extent of the further audit procedures.
- The linkage of those procedures with the assessed risks at the relevant assertion level.
- The results of the audit procedures.
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit.
- A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements.
- Your conclusion about whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion.

.146 Uncorrected misstatements should be documented in a manner that allows the auditor to:

- Separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods.
- Consider the aggregate effect of misstatements on the financial statements.
- Consider the qualitative factors that are relevant to the auditor's consideration of whether misstatements are material.

Resource Central

.147 The AICPA will offer continuing professional education courses, including a self-study course as well as a group study course. In addition, the new risk assessment standards will be a topic of discussion in various AICPA conferences in which AICPA presenters will further explain the standards.

On the Bookshelf

Future AICPA Audit Guide on Risk Assessment and Internal Control

.148 The AICPA is currently developing an Audit Guide to aid in implementing the new risk assessment standards. In addition, the AICPA is revamping its existing Audit Guide titled *Consideration of Internal Control in a Financial Statement Audit*. The current development plan envisions combining these two guides into one audit guide. This audit guide should be available by mid-2006 and can be purchased by contacting the AICPA/CPA2Biz Service Center at (888) 777-7077 or online at www.cpa2biz.com.

AICPA's reSOURCE Online Accounting and Auditing Literature

.149 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides*, Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential service, go to www.cpa2biz.com.

reSOURCE CD-ROM

.150 The AICPA is currently offering a CD-ROM product entitled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to AICPA Professional Literature products in a Windows format, namely, *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

AICPA/CPA2Biz Service Center

.151 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA/CPA2Biz Service Center at (888) 777-7077. The best times to call are 8:30 A.M. to 11:30 A.M. and 2:00 P.M. to 7:30 P.M., Eastern Standard Time. You can also order AICPA products from the Service Center by fax at (800) 362-5066 or visit www.cpa2biz.com to obtain product information and place online orders.

Hotlines

Accounting and Auditing Technical Hotline

.152 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.153 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.154 AICPA Online (www.aicpa.org) offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the *Audit and Accounting Guides*, *Professional Standards*, CPE courses, Practice Aids, and Audit Risk Alerts.

AAM Section 8300

Understanding SAS No. 112 and Evaluating Control Deficiencies

COMPANION TO SAS N0. 112, COMMUNICATING INTERNAL CONTROL RELATED MATTERS IDENTIFIED IN AN AUDIT

NOTICE TO READERS
UNDERSTANDING SAS NO. 112 AND EVALUATING CONTROL DEFICIENCIES

This Audit Risk Alert, prepared by the AICPA staff, is intended to help you understand and implement the requirements of Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325).

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards*. Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply SASs.

If an auditor applies the auditing guidance included in an *Other Auditing Publication*, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

The author gratefully acknowledges the contributions of the AICPA Technical Issues Committee in the development of this Audit Risk Alert.

Ahava Goldman, CPA
Technical Manager
Audit and Attest Standards

Introduction

.01 In May 2006, the AICPA Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended.

.02 The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. This Audit Risk Alert provides an overview of the requirements of SAS No. 112 as well as case studies that illustrate how control deficiencies may be evaluated for severity.

Why SAS No. 112 Was Issued

.03 The Sarbanes-Oxley Act of 2002 and the issuance of Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320), created considerable interest in management's responsibility for internal control and the auditor's responsibility for bringing certain internal control related matters to management's attention in an audit of financial statements. Auditing Standard No. 2 only applies to audits conducted in accordance with PCAOB standards. Generally, this means that Auditing Standard No. 2 applies to audits of public companies (issuers[1]). However, the issuance of Auditing Standard No. 2 created a desire on the part of nonissuers to better understand and evaluate control deficiencies.

.04 The ASB revised SAS No. 60 because it believed there was a need to reconsider and clarify the internal control matters that auditors must communicate to their audit clients. The ASB recognized that auditors were perceived to be inconsistent in communicating the significant deficiencies and material weaknesses identified in prior audits that had not yet been remediated. The ASB also concluded that generally accepted auditing standards (GAAS) should require auditors to communicate these matters in writing, rather than continue to provide auditors with the option of communicating them orally. To achieve greater consistency with Auditing Standard No. 2, the ASB decided that certain terms and definitions in SAS No. 60 should be replaced with the corresponding terms and definitions in Auditing Standard No. 2. Finally, the ASB concluded that it would be beneficial to incorporate some of the guidance in Auditing Standard No. 2 on evaluating control deficiencies that would be applicable to audits of nonissuers.

Overview of the Standard

.05 In general, SAS No. 112 provides guidance to enhance your ability to identify and evaluate control deficiencies during an audit, and then communicate to management and those charged with governance those deficiencies that you believe are *significant deficiencies* or *material weaknesses*.

.06 The standard has two unconditional requirements:

- The auditor must evaluate identified control deficiencies and determine whether those deficiencies, individually or in combination, are significant deficiencies or material weaknesses.
- The auditor must communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

Change From SAS No. 60

Your communication to management and those charged with governance must be in writing.

Even if you communicated specific significant deficiencies and material weaknesses in previous years, as long as those deficiencies continue to exist, you must continue to communicate them.

The new standard provides guidance on evaluating the severity of control deficiencies identified in an audit.

Identifying Control Deficiencies

.07 A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis:

[1] An *issuer* is an entity subject to the provisions of the Sarbanes-Oxley Act of 2002 or the rules of the Security and Exchange Commission (SEC). Nothing in the PCAOB's rules precludes a CPA from conducting an audit of a nonissuer in accordance with PCAOB standards and stating so in the auditor's report.

- A deficiency in *design* exists when (*a*) a control necessary to meet the control objective is missing or (*b*) an existing control is not properly designed so that, even if it operates as designed, the control objective is not always met.

- A deficiency in *operation* exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or qualifications to perform the control effectively.

The Auditor's Responsibility for Identifying Control Deficiencies

.08 When conducting an audit of historical financial statements, you are not required to perform procedures to identify control deficiencies. However, during the course of the audit, you may become aware of deficiencies in the design or operation of the entity's internal control. You may identify control deficiencies at any point in your audit, for example, when you are:

- Obtaining an understanding of the entity's internal control,
- Assessing the risks of material misstatement of the financial statements, due to error or fraud,
- Performing further audit procedures to respond to assessed risk, or
- Communicating with management or others (for example, internal auditors or governmental authorities).

.09 Your awareness of control deficiencies will vary with each audit and will be influenced by the nature, timing, and extent of audit procedures performed, as well as other factors. The results of your substantive procedures may cause you to reevaluate your earlier assessment of internal control.

Evaluating Control Deficiencies

Change From SAS No. 60

The term *reportable condition* is no longer used. The terms *significant deficiency* and *material weakness* are used to describe control deficiencies that must be communicated to management and those charged with governance.

.10 A control deficiency may be considered just a deficiency. More severe deficiencies are *significant deficiencies*, and the most severe deficiencies are *material weaknesses*.

Definitions of Significant Deficiency and Material Weakness

.11 A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles (GAAP) such that there is more than a remote[2] likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected.

---

[2] The term *remote likelihood* as used in the definitions of the terms *significant deficiency* and *material weakness* has the same meaning as the term *remote* as used in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*. Paragraph 3 of FASB Statement No. 5 states:

> When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms *probable*, *reasonably possible*, and *remote* to identify three areas within that range, as follows:
> a. *Probable*. The future event or events are likely to occur.
> b. *Reasonably possible*. The chance of the future event or events occurring is more than remote but less than likely.
> c. *Remote*. The chance of the future event or events occurring is slight.

Therefore, the likelihood of an event is "more than remote" when it is at least reasonably possible.

.12 A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

The Evaluation Process

Change From SAS No. 60

You must evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses. In making your evaluation, you link identified control deficiencies to actual or potential financial statement misstatements.

Additional guidance is provided in SAS No. 112 on evaluating control deficiencies to determine whether they are significant deficiencies or material weaknesses.

.13 You must evaluate the control deficiencies that you have identified and determine whether these deficiencies, individually or in combination with other control deficiencies, rise to the level of significant deficiencies or material weaknesses. The significance of a deficiency in internal control depends on the *potential* for misstatement in the financial statements being audited, not just on whether a misstatement has actually occurred. If you identify a control deficiency but you have not identified an actual misstatement related to that deficiency, you cannot automatically conclude that the deficiency is not a significant deficiency or a material weakness. If you have identified a misstatement, you should consider the potential for further misstatement in the financial statements being audited.

Factors to Consider

.14 The factors that you should consider when evaluating control deficiencies are:

- Likelihood, and
- Magnitude

.15 *Likelihood* refers to the probability that a control, or combination of controls, could have failed to prevent or detect a misstatement in the financial statements being audited. If, in your professional judgment, it is at least reasonably possible that a misstatement could have occurred because of a missing control, or because of the failure of a control or combination of controls, then the likelihood is *more than remote*. The existence of a design weakness, in and of itself, is sufficient to conclude that there is more than a remote likelihood that the control would not have been effective. Likewise, if a deficiency resulted in an actual misstatement, you will be better able to determine the likelihood, because it actually happened.

.16 *Magnitude* refers to the extent of the misstatement that could have occurred, or that actually occurred, since misstatements include both potential and actual misstatements. The magnitude of a misstatement may be inconsequential, more than inconsequential but less than material, or material, as shown in the following:

Inconsequential ⟶ More than Inconsequential ⟶ Material

.17 A misstatement is *inconsequential* if a reasonable person would conclude, after considering the possibility of further undetected misstatements, that the misstatement, either individually or when aggregated with other misstatements, would clearly be immaterial to the financial statements. If a reasonable person would not reach such a conclusion regarding a particular misstatement, that misstatement is more than inconsequential.

.18 The difference between a significant deficiency and a material weakness is the magnitude of the misstatement that could have occurred because of the failure of the control to prevent or detect a misstatement. If the magnitude of the actual or potential misstatement is less than material but more than inconsequential, the control deficiency is a significant deficiency. If the misstatement would have been material to the financial statements, the control deficiency is a material weakness. In this evaluation, it does not matter if a misstatement did not actually occur; what is relevant is the potential for misstatement.

.19 You should consider qualitative and quantitative factors in determining whether a misstatement or potential misstatement is more than inconsequential. For example, for the purpose of evaluating control deficiencies, a potential misstatement that is less than 20 percent of overall financial statement materiality may be considered inconsequential, before considering qualitative factors. However, a potential misstatement that is less than 20 percent of overall financial statement materiality may be considered more than inconsequential as a result of qualitative factors; for example, a potential misstatement that would change a loss into income, or result in violation of a loan covenant.

.20 The following table summarizes how you consider the significance of a deficiency to determine whether it is a control deficiency, a significant deficiency, or a material weakness.

Magnitude of misstatement that occurred, or could have occurred	***Likelihood of misstatement***	
	More Than Remote	*Remote*
Quantitatively or qualitatively material	Material weakness	Control deficiency but not a significant deficiency or a material weakness
More than inconsequential but less than material	Significant deficiency but not a material weakness	Control deficiency but not a significant deficiency or a material weakness
Inconsequential (i.e., clearly immaterial)	Control deficiency but not a significant deficiency or a material weakness	Control deficiency but not a significant deficiency or a material weakness

Multiple Control Deficiencies

.21 Multiple control deficiencies that affect the same financial statement account balance or disclosure increase the likelihood of misstatement and may, in combination, constitute a significant deficiency or material weakness, even though such deficiencies are individually insignificant. Accordingly, you should evaluate individual control deficiencies that affect the same account balance, disclosure, relevant assertion, or component of internal control to determine whether they collectively result in a significant deficiency or material weakness.

Mitigating Effects of Compensating Controls

.22 When a control deficiency has been identified, management and the auditor should also evaluate the possible mitigating effects of compensating controls. Only those compensating controls that you have tested and evaluated as part of the financial statement audit can be considered for mitigation. A compensating control is a control that limits the severity of a control deficiency and prevents it from rising to the level of a significant deficiency or, in some cases, a material weakness. Compensating controls operate at a level of precision, considering the possibility of further undetected misstatements, which would result in the prevention or detection of a misstatement that is more than inconsequential or material to the financial statements. Although compensating controls mitigate the effects of a control deficiency, they do not eliminate the control deficiency.

.23 For example, consider a situation in which there is a lack of segregation of duties within the accounts payable function in an owner-managed entity. As a compensating control, the owner reviews the supporting documentation for all disbursements exceeding one thousand dollars. As part of your audit, you could test this compensating control and determine whether it operates effectively for the purpose of mitigating the effects of the control deficiency (lack of segregation of duties) in the accounts payable function. Although the control deficiency still exists—the review does not eliminate the lack of segregation of duties—the significance of the deficiency may be mitigated by the compensating control so that it is not a significant deficiency or a material weakness.

The Prudent Official Test

.24 When you evaluate the significance of a deficiency, the last step in your evaluation is to conclude whether a prudent official having knowledge of the same facts and circumstances, would agree with your classification of the deficiency. Although the term *prudent official* is not defined in the standard, the concept is that an auditor should "stand back" and take another objective look at the severity of the deficiency much as would a regulator or someone from an oversight agency. You are being asked to consider whether a *prudent official* (knowing what you know about the facts and circumstances, the likelihood and magnitude of the potential misstatement, and the other controls that you tested) would agree with your conclusion that a deficiency is not a significant deficiency or that a significant deficiency is not a material weakness. Would you be comfortable defending your conclusion? If not, you should reconsider your evaluation of the significance of the deficiency looking through the skeptical lens of a prudent official. Because a prudent official is cautious, the prudent official test is used only to increase the severity of a control deficiency and not to justify a decrease in the severity.

.25 SAS No. 112 includes (1) a list of areas in which control deficiencies ordinarily are at least significant deficiencies, and (2) a list of indicators that a control deficiency should be regarded as at least a significant deficiency and a strong indicator of a material weakness. A material financial statement misstatement that was not identified by management is a strong indicator of a material weakness.

.26 SAS No. 112 also contains an Appendix [AU section 325.32] that provides examples of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses. This Appendix [AU section 325.32] revises and expands on the examples contained in the Appendix to SAS No. 60. The following are some of the items included in the Appendix [AU section 325.32]:

- Inadequate design of internal control over the preparation of the financial statements being audited
- Employees or management who lack the qualifications and training to fulfill their assigned functions; for example, the corporate controller lacks the knowledge and skill to apply GAAP in recording the entity's financial transactions or preparing its financial statements
- Inadequate design of information technology (IT) general and application controls
- Inadequate documentation of the components of internal control
- Inadequate design of monitoring controls that assess the design and operating effectiveness of the entity's internal control over time

Communication Requirements

Change From SAS No. 60

Significant deficiencies and material weaknesses must be communicated in writing to management and those charged with governance as part of each audit. This communication includes significant deficiencies and material weaknesses that were communicated to management and those charged with governance that have not yet been remediated.

The communication is best made by the report release date, but should be made no later than 60 days following the report release date.

The illustrative written communications in SAS No. 60 have been revised.

Form of Communication

.27 You must communicate *in writing* to management and those charged with governance.

Content of Communication

.28 You must communicate all control deficiencies that you evaluated as significant deficiencies and material weaknesses. If you communicated significant deficiencies and material weaknesses in previous audits and those deficiencies have not yet been remediated, you must communicate them again. Management and those charged with governance may already know about certain deficiencies and may have made a conscious decision to accept that degree of risk because of cost or other considerations. Management is responsible for that decision. You are responsible for communicating significant deficiencies and material weaknesses, regardless of management's decision. As long as the significant deficiencies and material weaknesses exist, you must continue to communicate them.

.29 You should not issue a written communication stating that no significant deficiencies were identified during the audit because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

.30 SAS No. 112 contains an illustrative communication that encompasses the requirements of the standard. In addition, SAS No. 112 contains an illustrative communication that may be used when the auditor has been requested to advise management and those charged with governance of the fact that no material weaknesses were identified. Also illustrated is a paragraph to be added to the auditor's communication if, for the benefit of a regulator, management's response to the auditor's communication of significant deficiencies and material weaknesses is included in a document with the auditor's written communication.

Timing of Communication

.31 Best practice is to issue your written communication by the report release date. You should issue your communication no later than 60 days following the report release date.

.32 For some matters, early communication to management or those charged with governance may be important. If you decide to communicate certain identified significant deficiencies and material weaknesses during the audit, the communication may be oral. However, all significant deficiencies and material weaknesses that you communicated orally during the audit must be communicated in writing to management and those charged with governance.

How the Revisions Will Affect Practice

.33 As you gain a better understanding of what needs to be communicated to management and those charged with governance, you may find that there will be more control deficiencies that you:

- Identify as significant deficiencies and material weaknesses, and
- Communicate to management and those charged with governance.

.34 You may emphasize and therefore spend more time evaluating identified control deficiencies than you did in the past.

Discussions With Management and Others

.35 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. You may have to explain to your clients that you, the auditor, *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.36 You may wish or be called upon to hold discussions with management and other users of your written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of *material weaknesses*. Another reason is that you have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in your written communication as long as these deficiencies have not been remediated. You may need to explain to management and other users that you are required to inform them of the significant deficiencies and material weaknesses every year as long as the deficiencies still exist.

.37 You may also need to hold discussions with management and other users who ask how you were able to express a clean opinion on the financial statements when material weaknesses in internal control were present. You may wish to explain that your audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control. You can express a clean opinion on the financial statements even though material weaknesses in internal control are present, because you performed sufficient procedures and obtained appropriate audit evidence to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented or detected by the client.

Issues for Audits of Smaller Entities

.38 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor's time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.39 Another issue that may cause concern is the extent to which you (as the auditor) may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if your client has ineffective controls over the preparation of their financial statements such that client controls are absent or controls are not effective in preventing or detecting material misstatements in the preparation of financial statements, including the related footnotes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[3] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a control weakness does not change the control weakness.

.40 ***Possible Opportunities.*** The new requirements of SAS No. 112 introduce possible opportunities for you. You can help clients evaluate the cost/benefit implications of improving their internal control, including training their personnel to be more knowledgeable. You can also teach your clients how to develop a risk assessment approach to designing internal control.

---

Examples

.41 SAS No. 112 includes examples of factors that impact on the consideration of likelihood and magnitude.

Likelihood

.42 The following are examples of factors that may affect the likelihood that a control, or combination of controls, could fail to prevent or detect a misstatement:

- The nature of the financial statement accounts, disclosures, and assertions involved. For example, suspense accounts and related party transactions involve greater risk
- The susceptibility of the related assets or liability to loss or fraud
- The subjectivity and complexity of the amount involved and the extent of judgment necessary to determine that amount
- The cause and frequency of any known or detected exceptions relating to the operating effectiveness of a control
- The interaction or relationship of the control with other controls
- The interaction of the control deficiency with other control deficiencies
- The possible future consequences of the deficiency

Magnitude

.43 Factors that may affect the magnitude of a misstatement that could result in a deficiency or deficiencies in controls include but are not limited to the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity in the account balance or class of transactions exposed to the deficiency in the current period or expected in future periods

.44 Generally, the recorded amount is the maximum amount by which an account balance or total of transactions can be overstated. However, because of the potential for unrecorded amounts, there is no upper limit on the amount of potential understatement. For example, if there is a control deficiency over the completeness of accounts payable, and the recorded amount is $200,000, the most the amount could be overstated is $200,000. But the most the amount could be understated cannot be known.

.45 The following are examples of control deficiencies and how their likelihood and magnitude might be considered:

- *Failure to obtain required authorization for a valid disbursement*. In this case, you may consider the likelihood of misstatement that could result from recording an unauthorized disbursement, using the factors listed above.
- *A deficiency in controls over revenue transactions that results in a financial statement misstatement*. In this case, the likelihood of misstatement is more than remote because a misstatement actually occurred. You may consider the potential for misstatement in amounts greater than the identified misstatement.

Control Deficiencies, Significant Deficiencies, or Material Weaknesses

.46 The following paragraphs describe circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

.47 Deficiencies in the design of controls may include the following:

- Inadequate design of internal control over the preparation of the financial statements being audited
- Inadequate design of internal control over a significant account or process
- Inadequate documentation of the components of internal control
- Insufficient control consciousness within the organization, for example, the tone at the top and the control environment
- Absent or inadequate segregation of duties within a significant account or process
- Absent or inadequate controls over the safeguarding of assets (This applies to controls that the auditor determines would be necessary for effective internal control over financial reporting.)
- Inadequate design of information technology (IT) general and application controls that prevent the information system from providing complete and accurate information consistent with financial reporting objectives and current needs
- Employees or management who lack the qualifications and training to fulfill their assigned functions (For example, in an entity that prepares financial statements in accordance with GAAP, the person responsible for the accounting and reporting function lacks the skills and knowledge to apply GAAP in recording the entity's financial transactions or preparing its financial statements.)
- Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity's internal control over time
- The absence of an internal process to report deficiencies in internal control to management on a timely basis

.48 Failures in the operation of internal control may include the following:

- Failure in the operation of effectively designed controls over a significant account or process; for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy; for example, the failure to obtain timely and accurately consolidating information from remote locations that is needed to prepare the financial statements
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation
- Failure to perform reconciliations of significant accounts; for example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner
- Undue bias or lack of objectivity by those responsible for accounting decisions; for example, consistent understatement of expenses or overstatement of allowances at the direction of management
- Misrepresentation by client personnel to the auditor (an indicator of fraud)

- Management override of controls
- Failure of an application control caused by a deficiency in the design or operation of an IT general control

.49 Note that the third circumstance in the preceding list, failure of controls designed to safeguard assets from loss, damage, or misappropriation, may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely. Therefore, given that the definitions of material weakness and significant deficiency relate to the likelihood of misstatement of the financial statements, the failure of a preventive control such as inventory tags will not result in a significant deficiency or material weakness if the detective control (physical inventory) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent or detect a material misstatement of the financial statements.

Significant Deficiencies

.50 Deficiencies in the following areas ordinarily are at least significant deficiencies in internal control:

- Controls over the selection and application of accounting principles that are in conformity with GAAP; having sufficient expertise in selecting and applying accounting principles is an aspect of such controls
- Antifraud programs and controls
- Controls over nonroutine and nonsystematic transactions
- Controls over the period-end financial reporting process, including controls over procedures used to enter transaction totals into the general ledger; initiate, authorize, record, and process journal entries into the general ledger; and record recurring and nonrecurring adjustments to the financial statements.

Material Weaknesses

.51 Each of the following circumstances is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

- Ineffective oversight by those charged with governance of the entity's financial reporting and internal control, or an ineffective overall governance structure
- Restatement of previously issued financial statements to reflect the correction of a material misstatement (The correction of a misstatement includes misstatements due to error or fraud but not restatements to reflect a change in accounting principle to comply with a new accounting principle or a voluntary change from one GAAP to another.)
- Identification by the auditor of a material misstatement in the financial statements for the period under audit that was not initially identified by the entity's internal control (This includes misstatements involving estimation and judgment for which the auditor identifies likely material adjustments and corrections of the recorded amounts, which is a strong indicator of a material weakness even if management subsequently corrects the misstatement.)

- An ineffective internal audit function or risk assessment function at an entity for which such functions are important to the monitoring or risk assessment component of internal control, such as for very large or highly complex entities
- For complex entities in highly regulated industries, an ineffective regulatory compliance function (This relates solely to those aspects of the ineffective regulatory compliance function for which associated violations of laws and regulations could have a material effect on the reliability of financial reporting. When evaluating the severity of such control deficiencies, the auditor should consider whether the entity has controls in place to monitor the impact on the financial statements of laws and regulations relevant to the conduct of the entity's business, and should evaluate the severity of the absence of such controls based on the entity's potential to misstate obligations that may arise from such laws or regulations.)
- Identification of fraud of any magnitude on the part of senior management (The auditor has a responsibility to plan and perform procedures to obtain reasonable assurance about whether the financial statements are free of material misstatement caused by error or fraud.[4] However, for the purposes of evaluating and communicating deficiencies in internal control, the auditor should evaluate fraud of any magnitude—including fraud resulting in immaterial misstatements—on the part of senior management, of which he or she is aware.)
- Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected (See paragraph .23 of SAS No. 112 for communication requirements in these circumstances.)
- An ineffective control environment (Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment.)

Evaluation Questions

.52 In evaluating the severity of a control deficiency, the first step is to determine whether the deficiency is at least a significant deficiency. Some questions to ask yourself when making this determination include:

- Is the likelihood that a misstatement of any magnitude could occur and not be detected by the client's controls considered remote?
- Is the magnitude of a potential misstatement inconsequential or less than inconsequential to the financial statements? A misstatement is inconsequential if a reasonable person would conclude, after considering the possibility of further undetected misstatements, that the misstatement, either individually or when aggregated with other misstatements, would clearly be immaterial to the financial statements.
- Are there complementary or redundant controls that were tested and evaluated that achieve the same control objective?
- Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to inconsequential?

.53 If the answers to these questions are all *no*, then the deficiency is at least a significant deficiency. If the answer to any question is *yes*, before concluding that the control deficiency is *not* at least a significant deficiency ask yourself: Would prudent officials, having my knowledge of the facts and circumstances, agree with my conclusion that the deficiency is *not* at least a significant deficiency?

---

[4] AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), provides guidance on the auditor's responsibilities for planning and performing the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement whether caused by error or fraud.

.54 If a prudent official would consider the control deficiency to be at least a significant deficiency, then you would conclude that the deficiency is at least a significant deficiency.

.55 The next step is to assess whether the deficiency is a material weakness. Some questions to ask yourself in making this determination include:

- Is the magnitude of the potential misstatement less than material to the financial statements?
- Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to less than material but more than inconsequential?
- Does additional evaluation result in a judgment that the likelihood of a material misstatement of the financial statements is remote?

.56 If the answers to these questions are all *no*, then the deficiency is a material weakness. If the answer to any question is *yes*, before concluding that the deficiency is *not* a material weakness, ask yourself, Would prudent officials, having my knowledge of the facts and circumstances, agree with my conclusion that the deficiency is a significant deficiency and not a material weakness, considering the financial statements?

.57 If a prudent official would consider the control deficiency to be a material weakness, then you would conclude that the deficiency is a material weakness.

Case Studies

.58 This section contains case studies that each highlight a particular control deficiency. Each case study contains a description of the control deficiencies, and an analysis of the assessment of the severity of the control deficiency. The control deficiencies discussed are:

- Lack of segregation of duties
- Lack of client expertise in financial accounting and reporting
- Inventory-related control deficiencies
- Failure to review modifications of standard sales contracts to evaluate their effect on the timing and amount of revenue recognition
- Fraud involving cash
- Control testing exceptions

Control Deficiency 1: Lack of Segregation of Duties

Situation 1

.59 Your client is a small nonprofit organization that has only one person in charge of the accounting and reporting functions. Through your understanding of controls over cash disbursements, you observe a lack of segregation of duties, which is a control deficiency. In assessing the severity of the control deficiency, you consider whether there are complementary, redundant, or compensating controls.

.60 ***Additional Facts.*** Through obtaining your understanding of internal control, you've learned that a board member signs all checks, reviewing invoices that support the disbursement before signing. The signed checks are returned to the client to be mailed. The bank sends the bank statement directly to the board member, who reviews the bank statement and returned checks. The bank statement is then given to the client for reconciliation.

.61 ***Discussion.*** Your assessment of the severity of this control deficiency would be based on the effectiveness of the compensating controls performed by the board members. The compensating controls do not eliminate the deficiency but may mitigate the effects of the control deficiency.

.62 If the board member does not perform a review of the bank statement and the returned checks, verifying that all the checks have the appropriate signature and that the check payee and amount have not been altered, you might determine that the compensating control over disbursements is not effective in achieving the control objective and, therefore, there is a material weakness.

.63 If the board member reviews only returned checks over a certain dollar amount, you might conclude that the compensating control is effective in preventing or detecting a material misstatement of cash and, therefore, this may be considered a significant deficiency because the magnitude of the reasonably possible misstatement is less than material but more than inconsequential.

.64 However, if the board member examines the returned checks for the appropriate signature and alterations, you might conclude that the compensating control is effective in preventing or detecting an unauthorized disbursement, making the likelihood of a misstatement remote; therefore, this is only a control deficiency and not a significant deficiency or material weakness.

Situation 2

.65 Your client is a small business that has only one person in charge of the accounting and reporting functions. The bookkeeper has been with the company for many years. It is common for the owner to leave signed, blank checks with the bookkeeper, "in case of emergencies" when the owner is gone. The owner does not perform any oversight procedures. The owner has you, the auditor, perform quarterly interim procedures. The owner believes the auditors are a substitute for his lack of oversight. One of the auditor's quarterly procedures is to review the bank reconciliation, which is prepared by the bookkeeper.

.66 ***Discussion.*** Because the auditor cannot be part of the client's internal control, your interim procedures, including your review of the bank reconciliations, are not compensating controls. Should the bookkeeper betray the owner's trust, the magnitude of a potential misstatement could reasonably be expected to be material. In your judgment, you believe that a reasonable person would conclude that there is more than a remote possibility that a misstatement could occur and not be caught by the owner. Thus, the lack of segregation of duties and the lack of oversight would be considered material weaknesses.

Control Deficiency 2: Lack of Client Expertise in Financial Accounting and Reporting

.67 In situations 3, 4, and 5, you provide assistance to your client in the drafting of the financial statements but, as the auditor, remain independent under Ethics Interpretation 101-3, *Performance of Nonattest Services*, under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05). That is, you post client-approved adjusting entries to the trial balance and assist in the drafting of the financial statements from the trial balance. You are not responsible for preparing and approving adjusting entries.

Situation 3

.68 Your client's controller is fairly skilled and is able to perform most of the functions necessary to prepare the financial statements. However, the company does not maintain a fixed asset ledger. Rather, you maintain a fixed asset ledger for them on your computer using "off-the-shelf" fixed asset software. From this software package, you are able to print for the controller a projected depreciation schedule, a gain and loss calculation report based on cost, and sales information provided to you by the controller and a final depreciation and fixed asset listing at year-end. The controller provides adequate supervision of the depreciation calculation so there is no conflict with Interpretation 101-3. The book and tax depreciation calculation affects depreciation expense for book purposes and also the calculation of deferred taxes. The client could purchase a depreciation program but has concluded it is more cost effective to rely on you for these records.

.69 In most years, the controller provides you with a year-end adjustment if adjustments hadn't already been made to the general ledger. However, in this particular year, the controller has been preoccupied with other tasks and asks you to calculate the year-end depreciation adjustment and gain or loss on sale adjustment. The adjustment is a material adjustment. Because you propose the adjustment, you need to consider whether there is a control deficiency.

.70 ***Discussion.*** In this situation, you would begin by considering the likelihood that a misstatement would not be detected. Because the auditor cannot be part of a client's internal controls, the controls that exist in your CPA firm to perform the calculations cannot be taken into account in considering whether the client has a control deficiency. Instead, you must consider what controls the client has to detect a misstatement. Based on only these facts, your judgment is that the client has the competency to perform the accounting function but has chosen to outsource the depreciation closing function this year. Therefore, as long as the client is reviewing and taking responsibility for the depreciation and related calculations, and possesses the skills and competencies to prevent, detect, and correct potential misstatements, you would determine that there is not a control deficiency. If the client is not able to prevent, detect, and correct a misstatement, then you would determine that there is a control deficiency.

Situation 4

.71 This client has an accounting manager who requests that you assist in drafting the financial statements and notes to the financial statements. However, prior to signing the representation letter, the accounting manager obtains the financial statement grouping schedules and the schedules documenting the calculation of amounts included in the notes to the financial statements, and reviews and approves these schedules. In addition, the accounting manager obtains a current disclosure checklist from the AICPA and reviews and answers the checklist to ensure propriety and completeness of the footnotes. The financial statements are also read, revised, and approved by both the accounting manager and the owner.

.72 ***Discussion.*** Based only on the facts presented, there is not an observed control deficiency. You would need to further understand whether the client's controls are designed appropriately and operating effectively, and that would be dependent on the competence and expertise of the client's accounting manager. In assessing this situation, you would first consider the likelihood of a material misstatement in the presentation and disclosure of the financial statements, including the related footnotes, occurring and not being detected by the accounting manager. If you determine that the accounting manager and owner lack the necessary accounting expertise to detect a misstatement, then that would represent a control deficiency that would need to be evaluated. However, you might conclude that, despite the accounting manager asking you to assist in drafting the financial statements and footnotes, they (the accounting manger and owner) do possess the necessary accounting expertise to prevent, detect, and correct a potential misstatement in the financial statements or notes; therefore, you would not have a control deficiency.

Situation 5

.73 At this client, you taught the bookkeeper to record cash receipts and disbursements as well as the adjusting journal entries needed to record accounts receivable and payable at year-end. The bookkeeper follows your directions and prepares a draft of the year-end financial statements from a format you provided, including relevant recurring disclosures.

.74 During your audit, you notice that the owner acquired a new delivery truck that cost $50,000—an amount that is material to the company's financial statements—and financed the acquisition through the dealer's finance company. You determine that the financing lease should be capitalized. The bookkeeper has recorded the monthly cash payments for the truck to the dealership but has not recorded the initial fixed asset and related liability (the owner had told her that he was leasing the truck). In discussing the new truck with the bookkeeper, you further discover that the owner was involved in a collision on the last day of the year while driving the truck and the company's insurance covered only a small portion of the damages. The financial statements do not reflect the capital lease and the related liability, nor does it reflect the expense and liability for the damages in excess of the company's insurance.

.75 ***Discussion.*** Based only on these facts, you determine that there is a control deficiency that did not detect, prevent, or correct the misstatements in the client's drafted financial statements. Because you caught this error, your judgment is that the likelihood that the financial statements would be misstated is more than remote, and the magnitude of the misstatement is material. You are not an employee of the company and cannot be part of the company's internal control. The company did not have anyone on staff with sufficient expertise to properly analyze the lease and record the fixed asset acquisition, and the bookkeeper was not sufficiently knowledgeable to know that she needed help in recording these events. In this case, the quality of the financial statements was not a result of the company's internal control. As such, you determine that the entity has a material weakness.

.76 If the bookkeeper had called you for guidance about how to account for these events, before recording them, your conclusion most likely would have been different. A discussion with the client about a technical issue is not, in and of itself, an indication of a weakness in the company's internal control. The client's ability to detect a potential misstatement, and ability to gain the necessary competence, are factors you would consider in your understanding of the entity's internal control.

Control Deficiency 3: Inventory-Related Control Deficiencies

Situation 6

.77 Your client is a large car dealership. There is a lack of good controls over tracking inventory quantities of dealership parts, but a physical inventory is taken at the end of every quarter. A parts manager was selling dealership parts, not recording the sales, and keeping the receipts. Although the amount of the writedown needed to reflect actual inventory was not material to the financial statements, management became aware of the fraud when the parts manager confessed under questioning.

.78 ***Discussion.*** The purpose of your evaluation is to assess the likelihood and potential magnitude of a financial statement misstatement, not the likelihood and potential magnitude of a loss due to fraud. Because the preventive controls tracking inventory quantities are weak, the client is relying on detective controls—physical inventory—to catch any potential misstatement. From a design perspective, detective controls are seldom as effective as preventive controls, as evidenced by the fact that the client suffered a loss as a result of the weak preventive controls. However, the physical inventory was effective at detecting the loss, so that the financial statements were not materially misstated. Because you would consider the effect of compensating controls in your assessment of the severity of the control deficiency, you would conclude that the preventive control weakness is mitigated by the detection control to the extent that there is not a significant deficiency or material weakness in internal control over financial reporting.

.79 Although the fraud did not result in a *material* misstatement of the financial statements, the fraud is evidence of a control deficiency in internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition. AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), requires that whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Therefore, you may wish to include this misappropriation (and other risks of fraud that you have identified) in your written communication of significant deficiencies and material weaknesses.

Control Deficiency 4: Failure to Review Modifications of Standard Sales Contracts to Evaluate Their Effect on the Timing and Amount of Revenue Recognition

Situation 7

.80 Your client uses a standard sales contract for most transactions. Individual sales transactions are not material. Sales personnel are permitted to modify the terms of the sales contract, including shipping terms. Accounting personnel review the terms of the sales contracts for significant or unusual modifications but do not review changes in the standard shipping terms. The changes in the standard shipping terms could cause a delay in the timing of revenue recognition. Management reviews gross margins on a monthly basis and investigates any significant or unusual relationships. In addition, management reviews the reasonableness of inventory levels at the end of each accounting period. There have been a limited number of instances in which revenue was inappropriately recorded, but the related amounts have not been material.

.81 ***Discussion.*** Based on only these facts, you determine that a control deficiency exists in the design of the entity's controls because there are no controls over a sales person's ability to modify the standard sales contract. In evaluating the severity of this control deficiency, you consider the likelihood and potential magnitude of a financial statement misstatement resulting from this deficiency. The magnitude could reasonably be expected to be more than inconsequential. However, the magnitude would be expected to be less than material, because individual sales transactions are not material and the compensating controls that mitigate the deficiency, which operate monthly and at the end of each financial reporting period, increase the likelihood that a material misstatement will be detected. Furthermore, the risk of material misstatement is limited to revenue recognition errors related to shipping terms, as opposed to broader sources of error in revenue recognition. However, the compensating controls are designed to detect only material misstatements. The controls do not effectively address the detection of misstatements that are more than inconsequential but less than material, as evidenced by situations in which transactions that were not material were improperly recorded. Therefore, there is a more than remote likelihood that a misstatement that is more than inconsequential but less than material could occur. Based on only these facts, you would conclude that this deficiency is a significant deficiency.

Situation 8

.82 Your client has a standard sales contract, but sales personnel frequently modify the terms of the contract. Certain modifications can affect the timing and amount of revenue recognized. Individual sales transactions frequently are material to the entity, and the gross margin can vary significantly for each transaction.

.83 Through your understanding of internal control necessary to plan the audit, you determine that the entity has a design deficiency in that the entity does not have procedures in place for accounting personnel to regularly review modifications to the terms of sales contracts. Although management reviews gross margins on a monthly basis, the significant differences in gross margins for individual transactions make it difficult for management to identify potential misstatements. Improper revenue recognition has occurred in the past, and the amounts have been material.

.84 ***Discussion.*** The magnitude of a financial statement misstatement resulting from this control deficiency would reasonably be expected to be material because individual sales transactions are frequently material, and gross margin can vary significantly with each transaction (which would make compensating controls based on a reasonableness review ineffective). Additionally, improper revenue recognition has occurred, and the amounts have been material. Therefore, the likelihood of material misstatements occurring is more than remote. Because, taken together, the magnitude and likelihood of misstatement of the financial statements resulting from this internal control deficiency is material, you determine that this deficiency is a material weakness.

Situation 9

.85 The entity has a standard sales contract; however, sales personnel frequently modify the terms of the contract. Sales personnel frequently grant unauthorized and unrecorded sales discounts to customers without the knowledge of the accounting department. These discounts are taken by customers, deducted from the amount paid, and recorded as outstanding balances in the accounts receivable aging. Although the amounts of these discounts are individually insignificant, they are material in the aggregate and have occurred consistently during the past few years.

.86 ***Discussion.*** The magnitude of a financial statement misstatement resulting from this deficiency would reasonably be expected to be material, because the frequency of occurrence allows insignificant amounts to become material in the aggregate. The likelihood of a material misstatement of the financial statements resulting from this internal control deficiency is more than remote (even if the client fully reserved for the uncollectible accounts) due to the likelihood of material misstatement of the gross accounts receivable balance. Therefore, your judgment is that this deficiency represents a material weakness.

Control Deficiency 5: Fraud Involving Cash

Situation 10

.87 Your client is a small not-for-profit organization that receives most donations by check from corporate donors. Some donations are made in cash. Cash donations are not material to the financial statements. As a result of your understanding of internal control, you notice that there are no controls over cash receipts. In planning your audit, you identify this as a fraud risk and you perform additional auditing procedures relative to cash receipts. Through inquiry, you learn that someone may be stealing cash. You notify management and as a result of performing certain audit tests you discover evidence that indicates that an employee was pocketing the cash and that cash donations were not being recorded.

.88 ***Discussion.*** Your judgment is that the likelihood of a misstatement is more than remote, as the fraud has occurred. The magnitude of the potential financial statement misstatement resulting from this deficiency would reasonably be expected to be more than inconsequential but less than material, as total cash sales are less than material. Thus, this deficiency is at least a significant deficiency. However, because your client is a not-for-profit organization, because cash is a sensitive area, and because fraud is involved, you step back and try to look at this situation from a prudent official's perspective. You consider how a regulator may view this, how a donor may view this, and how others in the nonprofit community may view this. In doing that, your judgment is that a prudent official would probably view an absence of controls over cash receipts as a material weakness. Therefore, you conclude that this is a material weakness.

Control Deficiency 6: Control Testing Exceptions

Situation 11

.89 In performing tests of controls during the audit, you identify an exception. You determined that the exception was one of numerous internal control exceptions that occurred during the two weeks that the controller was on vacation. Controls operated effectively before he left and after he returned to work. No misstatements in the financial statements were identified relating to that period of time.

.90 *Discussion.* You first need to determine whether the control testing exception is a control deficiency before considering the severity of that control deficiency. Effective internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting. Because effective internal control over financial reporting cannot and does not provide absolute assurance of achieving financial reporting objectives, any individual control does not necessarily have to operate perfectly, all the time, to be considered effective. You may want to gather additional evidence, beyond what you had initially planned and beyond inquiry, to support your conclusion that the exception does not represent a control deficiency. You cannot use the lack of actual misstatements to lessen the severity of the control deficiency in your determination, because you have to consider *potential* misstatements of any magnitude. Factors to consider in making your determination would include complementary, redundant, or compensating controls, which could include the monitoring activities undertaken by the controller upon returning from vacation.

Resource Central

Publications

.91 The following publications deliver valuable guidance and practical assistance related to internal control:

- *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk) (expected to be available in December 2006), a cornerstone AICPA Audit Guide encompassing and updating the existing AICPA Audit Guide, *Consideration of Internal Control in a Financial Statement Audit*, and encompassing the new "Risk Assessment" Standards (SASs No. 104–No. 111). This Guide illustrates how to gather the information needed to assess risk, evaluate that information to assess risks at the assertion level, and design and perform further audit procedures based on those assessed risks, evaluate the results, and reach conclusions.
- *Internal Control—Integrated Framework* (product no. 990012kk), a paperbound version of the COSO report that established a common definition of internal control different parties can use to assess and improve their control systems. It also includes information on how to prepare external reports and five tools for evaluating each of the components identified in the framework.
- *Financial Reporting Fraud: A Practical Guide to Detection and Internal Control* (product no. 029879kk), a paperbound publication for CPAs in both public practice and industry. It uses case studies to provide information necessary to minimize fraud exposure for CPAs, employers, and clients.
- *Audit Committee Toolkit* (product no. 991001kk), a practice aid that brings you checklists, matrixes, questionnaires, and other materials that are designed to help the audit committee do the job it needs to do.

Guidance for Audit Committees on the Risk of Fraud From Management Override of Internal Control

.92 The AICPA Antifraud Programs and Controls Task Force has issued a document entitled *Management Override of Internal Controls: The Achilles' Heel of Fraud Prevention—The Audit Committee and Oversight of Financial Reporting*. The document offers assistance to audit committees in addressing the risk of fraud arising from management override of internal control over financial reporting. The guidance contains the following major sections:

- "Management Override and the Audit Committee's Responsibilities"
- "Actions to Address the Risk of Management Override of Internal Controls"
- "Suggested Audit Committee Procedures: Strengthening Knowledge of the Business and Related Financial Statement Risks" (Appendix)

.93 The following are some of the topics related to audit committees that are covered in the document:

- Maintaining an appropriate level of skepticism
- Strengthening the audit committee's understanding of the business
- Brainstorming to identify fraud risks
- Using the code of conduct to assess financial reporting culture
- Cultivating a vigorous whistle-blower program
- Developing a broad information and feedback network including communications with internal auditors, independent auditors, compensation committee, and key employees

.94 The document can be downloaded from the "Spotlight Area" on the AICPA's Audit Committee Effectiveness Center Web page at www.aicpa.org/audcommctr/homepage.htm.

AICPA's reSOURCE Online Accounting and Auditing Literature

.95 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides*, Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential service, go to www.cpa2biz.com.

reSOURCE CD-ROM

.96 The AICPA offers a CD-ROM product entitled *reSource: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to AICPA Professional Literature products in a Windows format, namely, *Professional Standards*, Technical Practice Aids, and Audit and Accounting Guides (available for purchase as a set or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Educational Courses and Training

.97 Among its numerous continuing professional education (CPE) courses about internal control, the AICPA offers the following products. Information about additional AICPA internal control-related CPE courses can be obtained at www.cpa2biz.com:

- *Internal Control and IT: Reliable Reporting and Fraud Prevention*, a CPE course that provides an overview of the key auditing standards, conceptual frameworks, IT infrastructures and auditing issues you are likely to face on medium to small company engagements. (product no. 732551kk)
- *Internal Controls: Design and Documentation*, a basic course that explains what makes up an effective system and provides a toolkit of today's current techniques for creating useful documentation. This course will benefit controllers, managers, and internal auditors in businesses as well as auditors and consultants to public and private companies who need a review. (product no. 731852kk)

Online CPE

.98 AICPA *CPExpress*, offered exclusively through CPA2Biz.com, is the AICPA's flagship online learning product with enhancements such as a new user interface and improved functionality. AICPA *CPExpress* now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA *CPExpress* offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

AICPA's Antifraud & Corporate Responsibility Resource Center

.99 The AICPA's Antifraud & Corporate Responsibility Resource Center (www.aicpa.org/antifraud/) allows you to select optional ways to learn about fraud. The Center spotlights the new Web-based fraud and ethics case studies and commentaries recently issued; the AICPA antifraud Webcast series; the interactive CPA course *Fraud and the CPA*; and a competency model that allows you to assess your overall skills and proficiencies as they relate to fraud prevention, detection, and investigation, among other topics. In addition, the site offers press releases and newsworthy items on other AICPA courses related to prevention and detection and an overview of the AICPA Antifraud & Corporate Responsibility Program.

AICPA Audit Committee Effectiveness Center

.100 Located at www.aicpa.org/audcommctr/homepage.htm, the AICPA Audit Committee Effectiveness Center presents the guidance and tools necessary to make audit committee best practices actionable. Available at the center is the AICPA Audit Committee Toolkit, the Audit Committee Matching System, Audit Committee e-Alerts, and other guidance and resources.

AICPA Audit Quality Centers

Governmental Audit Quality Center (GAQC)

.101 The GAQC, which is designed to improve the quality of governmental audits, provides firm members with a set of best practices and tools in the specialized area of governmental auditing, including Yellow Book and Circular A-133 audits. It also includes a comprehensive Web site at www.aicpa.org/GAQC.

Employee Benefit Plan Audit Quality Center

.102 The AICPA Employee Benefit Plan Audit Quality Center is intended to provide a forum that spurs CPA firms performing audits to make immediate quality improvements to employee benefit audits under the Employee Retirement Income Security Act of 1974 (ERISA), including pension, health and welfare, and 401(k) plans. In addition to gaining access to best practices, guidelines, and tools focused around quality improvement, members of the Center are subject to membership requirements that demonstrate the firm's commitment to audit quality in this area. Additional information about the Center can be found at www.aicpa.org/ebpaqc.

Order Department (Service Center Operations)

.103 To order AICPA products, call the AICPA Member Service Center at (888) 777-7077 or fax to (800) 362-5066. The best times to call are 8:30 A.M. to 11:30 A.M. and 2:00 P.M. to 7:30 P.M., Eastern Standard Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Hotlines

Accounting and Auditing Technical Hotline

.104 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.105 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.106 AICPA Online (www.aicpa.org) offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit and Accounting Guides, the professional standards, CPE courses, practice aids, and alerts.

Accountants' Reports

These examples are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of departure when drafting reports to meet their individual needs. This manual is a nonauthoritative kit of practice aids and, accordingly, does not include extensive explanation or discussion of authoritative pronouncements. Please refer directly to applicable authoritative pronouncements when appropriate.

These examples illustrate the body of various reports. For comment on addressing and dating of the report, see AAM section 9100.

Examples that are assembled from illustrative reporting language set forth in Statements on Auditing Standards (SASs) and Statements on Standards for Accounting and Review Services include citation of the particular source and its location in AICPA *Professional Standards.*

References to Professional Standards. When referring to the professional standards, this manual cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, SAS No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*. All references to AU sections may be found in AICPA *Professional Standards*, volume 1.

AAM Section 9100

Format of Accountants' Reports

Report Preparation

.01 Firms usually develop standard policies and procedures for preparing and issuing reports. The following are some suggested report preparation policies that the auditor may consider:

- *Letterhead.* The report is typically presented on firm letterhead.
- *Addressee.* The report may be addressed to the board of directors, stockholders, partners, general partners, proprietors, or to the company whose financial statements are being audited. If the firm was engaged by others, the report may be addressed thereto.

  The Board of Directors
  XYZ Credit Union
  City, State Zip Code

- *Salutation.* A salutation is not typically included on the report.
- *Report signing.* The firm name is usually manually signed by the engagement partner. The words "Certified Public Accountants" may be excluded from the signature if they are a normal part of the firm's letterhead.
- *Report dating.* Audit reports should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion.
  - The date is typically presented at the bottom of the page along with the city and state, if it is not included in firm letterhead, as follows:

    City, State
    April 5, 20XX

  - When a subsequent event disclosed in the financial statements occurs after the original date of the auditor's report but before the issuance of the related financial statements, the auditor may use dual dating or date the report as of the later date. The following illustrates dual dating:

    City, State
    February 26, 20XX, except for Note X as to which the date is
    April 5, 20XX

- *Level of service.* The level of service performed and the nature of the report are typically outlined in the engagement letter. The letter should be revised for any significant changes from the original understanding with the client, such as, in the event of a step-up or step-down in the level of service.
  - The partner typically approves any step-up or step-down in level of service. A step-up in level of service may occur after obtaining a revised understanding with the client. The auditor may wish to consider a step-down in level of service only after carefully evaluating the reasons for the change because the reasons for the change may also affect the report on lower levels of service. Limitations on the scope of an audit, for example, may also preclude issuing a review or compilation report.
  - If more than one level of service is performed for financial statements of the same period (for example, compilation and audit), the financial statements need only be accompanied by the report on the highest level of service performed.

Reports on Audited Financial Statements

.02 Generally accepted auditing standards (GAAS) establish reporting responsibilities. Following are the four standards of reporting[1] stated in paragraph .02 of AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1):

a. The auditor must state in the auditor's report whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).[2]

b. The auditor must identify in the auditor's report those circumstances in which GAAP has not been consistently applied in the current period in relation to the preceding period.

c. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.

d. The auditor must either express an opinion regarding the financial statements taken as a whole or state that an opinion cannot be expressed in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking in the auditor's report.

Standard Report

.03 The standard auditor's report prescribed by AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), may be used when the auditor has formed an opinion, based on the application of GAAS,[3] that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in accordance with GAAP. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. GAAP). It should state that the financial statements identified in the report were audited. A standard auditor's report for the presentation of comparative financial statements is illustrated in paragraph .01 of AAM section 9210.

Modifications of the Standard Auditor's Report

.04 AU section 508 describes situations that may require auditors to modify the standard report and also provides illustrations of the appropriate modifying language. These modifications, which are discussed in greater depth subsequently, are as follows:

- *Explanatory language.* A wide variety of situations may arise that require a modification of the standard auditor's report, without affecting the expression of an unqualified opinion. Some of the more common of such situations are going-concern problems, part of the financial statements have been audited by another auditor, or a significant change in accounting principles. The explanatory paragraph for situations that do not affect the auditor's opinion may proceed or follow the opinion paragraph, unless otherwise required by AU section 508.
- *Qualified opinion.* Qualified opinions result from two general categories of situations: scope limitations and departures from GAAP. A scope limitation arises when the auditor has been unable to

[1] The reporting standards apply only when the auditor issues a report.

[2] When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles (GAAP), the first standard of reporting is satisfied by stating in the auditor's report that the basis of presentation is a comprehensive basis of accounting other than GAAP and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used.

[3] Paragraph .08 of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), indicates that one of the basic elements of the standard report is an identification of the United States of America as the country of origin of those standards (for example, auditing standards generally accepted in the United States of America or U.S. generally accepted auditing standards [GAAS]).

perform all of the auditing procedures he or she believes are necessary to express an unqualified opinion on the financial statements. Financial statements containing a material departure from GAAP, including inadequate disclosures in the financial statements, may lead the auditor to qualify his or her opinion. Both situations require an explanatory paragraph to be included, preceding the opinion paragraph, that describes the nature of the scope limitation or the departure from GAAP.

- *Disclaimer of opinion.* A disclaimer of opinion may be appropriate when
  - — the scope of the audit has been restricted so significantly that the auditor does not have a basis for forming an opinion on the financial statements. In this case, an explanatory paragraph, preceding the disclaimer paragraph, should be included in the auditor's report to explain all significant reasons for the disclaimer.
  - — the auditor is not independent, in which case a one paragraph disclaimer is issued (applies for publicly held entities only). A compilation report with a lack of independence noted should be issued for nonpublic entities.
- *Adverse opinion.* An adverse opinion may be expressed on financial statements that do not present fairly the entity's financial position, results of operations, or cash flows in conformity with GAAP. In other words, the auditor concludes that the financial statements are *not* fairly presented in accordance with GAAP. When the auditor expresses an adverse opinion, he or she should disclose in a separate explanatory paragraph, preceding the opinion paragraph, all of the substantive reasons for the adverse opinion and, if practical, the effects of the subject matter of the adverse opinion on the financial statements.

Scope Limitations

.05 Restrictions on the scope of an audit, whether imposed by the client or by circumstances such as the timing of the auditor's work, the inability to obtain sufficient competent audit evidence, or an inadequacy in the client's accounting records, may require a qualified opinion or a disclaimer of opinion. Deciding whether to qualify or disclaim is a matter of judgment, and generally the primary factor in this decision is the materiality of the financial statement items affected. However, other factors may be considered, such as the pervasiveness of the effects of the omitted auditing procedures and the nature of the financial statement items affected.

Departures From GAAP

.06 *Unacceptable Principles.* When financial statements are materially affected by a departure from GAAP, the auditor should express either a qualified or adverse opinion. Choosing between a qualified or adverse opinion depends on the magnitude of the departure. While the materiality of the effects of the departure is a primary consideration, the auditor may also consider the pervasiveness of the departure (such as the number of financial statement items affected), the importance of the departure to the organization's activities and its ability to obtain funding, and the dollar effect of the departure on individual financial statement items as well as the statements as a whole.

.07 For both qualified and adverse opinions, an explanatory paragraph should be included, preceding the opinion paragraph, that describes all of the substantive reasons for the auditor's opinion and the effects on the financial statements, if readily determinable. If it is not practical to determine the effects of the departure, the explanatory paragraph should contain a statement to that effect. If information about the effects of the departure is described in the notes, the explanatory paragraph may be shortened by referring to the note.

.08 *Inadequate Disclosure.* Departures from GAAP include not just inappropriate application of accounting principles, but also omitted or inadequate disclosures in the financial statements. In such situations, the auditor should add an explanatory paragraph, preceding the opinion paragraph, that describes the nature of the inadequate or omitted disclosure and, if practical, the information that should have been disclosed.

The significance of the omitted or inadequate disclosure will determine whether a qualified or adverse opinion is appropriate.

.09 *Report Modification.* The opinion paragraph for a qualified opinion due to a departure from GAAP should include the words *except* or *exception* and a reference to the explanatory paragraph that describes that departure. Adverse opinions should include language such as "do not present fairly" and should also include a reference to the explanatory paragraph. A qualified opinion indicating a departure from GAAP is presented in paragraph .02 of AAM section 9240. An adverse opinion indicating a departure from GAAP is presented in paragraph .01 of AAM section 9220.

Errors, Fraud, and Illegal Acts

.10 If the financial statements are materially affected by an error, fraud, or illegal act that has not been properly accounted for and disclosed, a qualified or adverse opinion may be considered. If the auditor is precluded from applying necessary procedures or from obtaining sufficient information to conclude whether an error, fraud, or illegal act that could be material to the financial statements has occurred, a qualified or disclaimer of opinion may be issued. All such matters could be discussed immediately with the engagement partner.

.11 If a client will not accept modification of the report under the circumstances above, the firm may wish to consider withdrawing from the engagement and consulting with legal counsel.

Consistency Exceptions

.12 Accounting changes affecting consistency include the following:

- A change from one generally accepted accounting principle to another method, practice or principle that is different from the one previously used
- A change from an unacceptable to an acceptable principle (correction of an error)
- A change in financial statement classification that significantly affects financial position or results of operations (for example, classification of an item in earnings from operations as other income or expense)
- A change in reporting entity

.13 Accounting changes that do not normally affect consistency include the following:

- Initial adoption of an existing accounting principle for a new event or transaction
- Insignificant reclassification
- Correction of errors not involving a principle
- Changes in accounting estimates

.14 The nature of the accounting change will determine whether prior periods should be restated or a cumulative adjustment should be included in current activities. In either event, the change should be disclosed in the notes to the financial statements and in the auditor's report in a separate paragraph following the opinion paragraph. The auditor's concurrence with a change is implicit unless he or she takes exception to the change. The opinion paragraph would be standard unless the change is to an unacceptable principle or method, the change is not justified, or a prospective change of a principle requiring retroactive adjustment is not discussed. In such situations, either a qualified or adverse opinion should be issued.

Uncertainties

.15 Uncertainties are significant circumstances, events, or transactions affecting the financial statements, the outcome of which cannot be reasonably estimated. Uncertainties are a particularly complex area because they can result in a qualified or adverse opinion due to a departure from GAAP, a qualified opinion, or disclaimer due to a scope limitation. Uncertainties include, but are not limited to, contingencies covered by FASB Statement No. 5, *Accounting for Contingencies*, and matters related to estimates covered by Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (AICPA, *Technical Practice Aids*, ACC sec. 10,640).

.16 *Uncertainties Not Requiring Modification of the Opinion.* Paragraph .30 of AU section 508 states that when the auditor has concluded that sufficient audit evidence supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate.

.17 *Scope Limitations.* If the auditor is unable to obtain sufficient audit evidence to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. In some ways, information about uncertainties may always be considered insufficient because it is dependent on future, unknown events. However, if the auditor determines that audit evidence did or does exist, but it is unavailable to him or her (for example, because the information was destroyed or management will not allow the auditor to have access to it), the auditor may consider modifying the report for a scope limitation.

.18 *Departures From GAAP.* Paragraph .45 of AU section 508 describes three categories of departures from GAAP involving risks or uncertainties:

- Inadequate disclosure
- Inappropriate accounting principles
- Unreasonable accounting estimates

.19 If the auditor concludes that a matter involving a risk or uncertainty is not adequately disclosed in the financial statements in conformity with GAAP, the auditor should express a qualified or adverse opinion.

.20 Also, a departure from GAAP may exist if management has made inappropriate estimates of future events in applying accounting principles (such as the use of unreasonable expected lives of depreciable assets for calculating depreciation) or in making other accounting estimates.

.21 *Going-Concern Uncertainties.* If the auditor concludes that there is substantial doubt about the organization's ability to continue as a going concern, the situation should be described in an explanatory paragraph, following the opinion paragraph. The explanatory paragraph may describe the principal events and conditions related to the going concern, their possible effects on the financial statements, management's plans for corrective actions, and the auditor's conclusion that substantial doubt exists. Paragraphs .12–.13 of AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), imposes the additional requirement that the explanatory paragraph include the terms *substantial doubt* and *going concern*. The auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern in the going concern explanatory paragraph.

.22 If financial statement disclosures about the uncertainty are inadequate, a departure from GAAP exists and either a qualified or adverse opinion may be necessary.

Reporting on Supplementary Information

.23 Supplementary information includes detailed schedules of other data that are not necessary for a fair presentation of the basic financial statements. Whenever supplementary information is included in an auditor submitted document, the auditor has a responsibility to report on all of the information included in the document. A separate report on the supplementary information or a separate paragraph in the report on the basic financial statements may be used to report on supplementary information. If a separate report is issued, it may be on the firm's letterhead and should be signed. The report date should be the same as for the basic financial statements.

.24 Reports on supplementary information should express or disclaim audit assurance. The nature of the engagement and the extent and results of testing of supplementary information will determine the firm's responsibility in each circumstance. If a separate report on the supplemental information is issued, the first sentence of that report may refer to the report on the basic financial statements.

Reporting on a Single Statement

.25 In certain circumstances, an engagement to audit a single financial statement may be accepted. Generally these engagements, called *limited reporting engagements*, are a result of the client needing a single financial statement to fulfill a contractual requirement, such as an organization that must provide its landlord with an audited income statement for purposes of calculating rent. Also, entities that have never been audited often request an audit of the statement of financial position only for the first year, with the intention of having audits of the entire financial statements in the future. Generally such engagements are accepted as long as there is a legitimate reason for the limited engagement and provided that there are no restrictions on access to information underlying the financial statements or on the scope of the procedures the auditor needs to perform. In such engagements, an unqualified opinion may be expressed on the financial statement the auditor was engaged to audit. If the other financial statements are presented, a disclaimer of opinion may be issued on those statements. An unqualified opinion on a single statement audit is presented in paragraph .03 of AAM section 9210.

Relying on the Work of a Specialist

.26 The firm may engage specialists to perform certain work supporting representations in the financial statements. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), says if a review of the specialist's work finds it satisfactory, and if no report modification is necessary because of the specialist's findings, there is no need to refer to the specialist's work.

.27 If the specialist's work is not adequate to support the financial statement representations, a qualification or disclaimer of opinion because of a scope limitation may be appropriate. Findings of the specialist that indicate the financial statements are not in accordance with GAAP may necessitate a qualified or adverse opinion.

Lack of Independence

.28 For public entities, whenever the auditor is not independent with respect to a client whose financial statements have been audited, a disclaimer of opinion should be issued. The Public Company Accounting Oversight Board (PCAOB), through PCAOB Rule 3600T, has provisionally designated Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01), of the AICPA Code of Professional Conduct, and interpretations and rulings thereunder, as they existed on April 16, 2003, as well as Standard Nos. 1–3 and Interpretations 99-1, 00-1, and 00-2 of the Independence Standards Board as interim independence standards to be followed by registered public accounting firms in connection with the audits of public companies and other issuers. The PCAOB's interim independence rules do not supersede the independence rules of the Securities and Exchange Commission (SEC). Therefore, to the extent that a provision of the SEC's rule or policy is more restrictive—or less restrictive—than the PCAOB's interim independence standards, a registered public accounting firm must comply with the more restrictive requirement. For nonpublic entities, the firm may only issue a compilation report that includes a statement that the firm is not independent.[*]

Reissuance of Audit Reports as Predecessors

.29 If the auditor is asked by a former client to reissue its report on prior-period financial statements, he or she should inform the client of the procedures necessary to comply with that request. If the client agrees to perform these procedures, and pay the fee for these services, the auditor would ordinarily agree to reissue the report.

.30 Before reissuing a report, the auditor should consider whether the previous opinion on those prior period statements is still appropriate. Differences in the current form and presentation of the financial statements for the prior period, or the possibility of material subsequent events affecting those financial statements, could make the previous opinion inappropriate. The auditor should perform at least the following procedures:

- Read the financial statements of the current period.
- Compare the prior-period financial statements with the financial statements to be presented in comparative format by the successor.
- Obtain a letter of representation from the management of the former client and successor auditor. The representation letter from management of the former client should state (*a*) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (*b*) whether any events have occurred subsequent to the balance sheet date of the latest prior period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements.[4] The successor should represent that his or her audit has not revealed any matters that may have a material effect on the prior period financial statements.

.31 If the firm reissues its report without change, the previous report date should be used. If the financial statements or the report of the prior period are revised, the report should be dual dated as to the event or matter causing the revision. There should be no reference to the report or the work of the successor auditor.

Reissuance of the Audit Report Subsequent to the Date of Original Issue[5]

.32 Occasionally the firm may be requested by a client to furnish additional copies of a previously issued report. Approval of the engagement partner may be necessary to reissue a previously issued report. In such situations, the engagement partner may prepare a memo stating the reasons for the reissuance and that he or she is not aware of any circumstances occurring since the original report date that would require adjustment to or disclosure in the financial statements.

---

[*] The Public Company Accounting Oversight Board (PCAOB) also adopted a new rule related to the auditor's responsibilities when seeking audit committee preapproval of internal control related nonaudit services. The rule is intended to ensure that audit committees are provided relevant information for them to make an informed decision on how the performance of internal control-relates services may affect independence. Specifically, the public accounting firm shall describe, in writing, the scope of the service and submit to the audit committee, as well as discuss with the audit committee the potential effects of the service on the firm's independence. Public firms are also required to document the substance of such discussions in writing. This rule is effective for audits of fiscal years ending on or after November 15, 2007 (the same effective date as Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* [AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"]). The full text of this rule can be found at www.pcaob.org/Rules/Rules_of_the_Board/Rule_3525.pdf.

[4] See appendix C, "Illustrative Updating Management Representation Letter," paragraph .18 of AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1).

[5] The AICPA Auditing Standards Board Auditing Interpretation, "Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report," of AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 9341 par. .01–.02), deals with situations where a previously issued report contains a going-concern explanatory paragraph, and the situation that gave rise to the going-concern has been resolved.

.33 Use of the original report date removes any implication that records, transactions, or events after that date have been audited or reviewed. Although the auditor has no responsibility to make further investigation or inquiry as to subsequent events, the engagement partner may consider a brief discussion with the client's chief financial or executive officer before reissuing his or her report.

Subsequent Discovery of Facts Existing at Report Date

.34 Although the auditor has no obligation to make any continuing inquiries or perform other procedures after issuing his or her report, the auditor may become aware of information that affects the financial statements upon which he or she has previously reported. When becoming aware of such information, the auditor should determine the reliability of the information and whether such information existed at the date of the report. The auditor should make inquiries of client management in this regard.

.35 If the information is reliable and did exist at the date of the report, if the report would have been affected if the information had been known at the report date, and if there are persons relying on the financial statements who would attach importance to the information, the auditor should take action to prevent future reliance on the report. If the engagement partner concludes that action should be taken to prevent future reliance on the report, he or she should advise the client to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to the persons known to be, or likely to be, relying on the financial statements and related report. Disclosures may be made in one of the following ways:

- If the effects of subsequent facts can be promptly determined, disclosure should include reissuing revised financial statements and a revised report. The reasons for the revision usually should be described in a note to the financial statements and referred to in the auditor's report.
- If the current financial statements have not been released, appropriate disclosure of the revision of the prior period financial statements can be included therein.
- When the effects of subsequent facts cannot be readily determined, revisions of financial statements and reports may be delayed. In this case, persons known to be, or likely to be, relying on the financial statements should be notified by the client that the financial statements and related reports should not be relied on, and that revised financial statements and report will be forthcoming.

.36 If the client refuses to make the disclosures discussed in the preceding paragraph, the auditor may wish to contact legal counsel. He or she should also notify all members of the board of directors of such refusal. The firm will take the following steps to prevent future reliance on its report:

- Notify the client that the auditor's report must no longer be associated with the financial statements.
- Notify any applicable regulatory agencies that the report should no longer be relied upon.
- Notify each person known to be relying on the financial statements that the report should no longer be relied upon.

.37 If the auditor's investigation of the subsequently discovered information is satisfactory, and he or she has determined that the information is reliable, the notifications in paragraph .36 should include a description of the effects of the information on the financial statements. If the client has not cooperated and, as a result, the auditor has been unable to conduct a satisfactory investigation, the auditor does not need to indicate the details of the information. Instead, the auditor can merely indicate that information has come to his or her attention that his or her client has not cooperated in attempting to substantiate, and that, if the information is true, the auditor believes that his or her report must no longer be relied upon nor should the auditor be associated with the financial statements.

AAM Section 9210

Unqualified Opinions

.01 Auditor's Standard Report—Comparative Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.02 Auditor's Standard Report—Single Year Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

.03 Report on a Single Statement Audit (Balance Sheet Only Presented) [Assuming the auditor is able to satisfy himself or herself regarding the consistency of application of accounting principles]

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .34]

Note: If reporting on a single statement (for example, balance sheet only) when other financial statements are also presented, the following paragraph may be added after the opinion paragraph:

Because we were not engaged to audit the statements of income, retained earnings, and cash flows, we did not extend our auditing procedures to enable us to express an opinion on the results of operations and cash flows for the year ended December 31, 20XX. Accordingly, we express no opinion on them.

.04 Reference to Other Auditors—Successor Auditor's Report When Predecessor's Report (Unqualified) Is Not Presented

Independent Auditor's Report

Addressee:

We have audited the balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

[*Same second paragraph as the standard report*]

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[*If the predecessor auditor's report was other than a standard report, the successor auditor should describe the nature of and reasons for the explanatory paragraph added to the predecessor's report or the opinion qualification. Following is an illustration of the wording that may be included in the successor auditor's report*:]

...were audited by other auditors whose report dated March 1, 20X2, on those statements included an explanatory paragraph that described the change in the Company's method of computing depreciation discussed in Note X to the financial statements.

[*If the financial statements have been restated, the introductory paragraph should indicate that a predecessor auditor reported on the financial statements of the prior period before restatement. In addition, if the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, he or she may also include the following paragraph in his report*:]

We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.

[*Signature*]

[*Date*]

Practice Tips

(1) The successor auditor should not name the predecessor auditor in his report; however, the successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with that of the successor auditor.

[Source: AU section 508 paragraph .74, footnote 29]

.05 Reference to Other Auditors in Report

Independent Auditor's Report

Addressee:

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of $_______ and $________ as of December 31, 20X2 and 20X1, respectively, and total revenues of $_______ and $_______ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.07 Reference to Other Auditors—Successor Auditor's Report When Prior Year Financial Statements Have Been Restated Following Issuance of the Predecessor's Report

Independent Auditor's Report

Addressee:

We have audited the balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, before the restatement described in Note X, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.[1]

[Source: AU section 508 paragraph .74]

[1] This paragraph may be added to the report when the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself as to the appropriateness of the restatement adjustment.

.08 Reference to Other Auditors—Prior Year Financial Statements Restated Following a Pooling of Interests

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated balance sheet of XYZ Company as of December 31, 20X2, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of XYZ Company as of [at] December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We previously audited and reported upon the consolidated statements of income and cash flows of XYZ Company and subsidiaries for the year ended December 31, 20X1, prior to their restatement for the 20X2 pooling of interests. The contribution of XYZ Company and subsidiaries to revenues and net income represented _______ percent and _______ percent of the respective restated totals. Separate financial statements of the other companies included in the 20X1 restated consolidated statements of income and cash flows were audited and reported upon separately by other auditors. We also audited the combination of the accompanying consolidated statements of income and cash flows for the year ended December 31, 20X1, after restatement for the 20X2 pooling of interests; in our opinion, such consolidated statements have been properly combined on the basis described in Note A of notes to consolidated financial statements.

Note: This report is used when the auditor concludes that he or she cannot serve as principal auditor for the restated financial statements.

.09 Reference to Other Auditors—Successor Auditor Report When Prior Period Financial Statements Were Audited by a Predecessor Auditor Who Has Ceased Operations

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated March 31, 20X2.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

.10 Reference to Other Auditors—Successor Auditor Report When Prior Period Financial Statements Were Audited By a Predecessor Auditor Who Has Ceased Operations Have Been Restated

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, and for the year then ended, before the restatement described in Note X, were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated March 31, 20X2.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.[2]

.13 Change in Accounting Principles or Method of Accounting

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentations. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note X to the financial statements, the Company changed its method of computing depreciation in 20XX.

.14 Going Concern—Uncertainty

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

[*Date*]

[Source: AU section 341 paragraph .13, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1)]

Note: In a going-concern explanatory paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern.

.15 Liquidation Basis of Accounting—Single Year Financial Statements

Independent Auditor's Report

Addressee:

We have audited the statement of net assets in liquidation of XYZ Company as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2. In addition, we have audited the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2, from the going-concern basis to a liquidation basis.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets in liquidation of XYZ Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph.

.16 Liquidation Basis of Accounting—Comparative Financial Statements

Independent Auditor's Report

Addressee:

We have audited the balance sheet of XYZ Company as of December 31, 20X1, the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2. In addition, we have audited the statement of net assets in liquidation as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph.

.17 Comparative Financial Statements—Unqualified Opinion on the Current Year's Financial Statements With Disclaimer of Opinion on the Prior Year's Statements of Income, Retained Earnings, and Cash Flows

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We did not observe the taking of the physical inventory as of December 31, 20X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.

Because of the matter discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 20X1.

In our opinion, the balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .67]

Note: This report assumes that the independent auditor has been able to satisfy himself as to the consistency of application of generally accepted accounting principles.

.18 Comparative Financial Statements—Subsequent Restatement of Prior-Period Financial Statements to Conform With Generally Accepted Accounting Principles

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our report dated March 1, 20X2, we expressed an opinion that the 20X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X1 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the 20X1 financial statements, as presented herein, is different from that expressed in our previous report.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.19 Comparative Financial Statements—Current Year's Statements Audited and Prior Year's Statements Reviewed

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The 20X1 financial statements were reviewed by us (other accountants) and our (their) report thereon, dated March 1, 20X2, stated we (they) were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

[*Signature*]

[*Date*]

[Source: AU section 504 paragraph .17, *Association With Financial Statements* (AICPA, *Professional Standards*, vol. 1)]

Notes: When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.

When the financial statements are those of a public entity, the separate paragraph should include a disclaimer of opinion or a description of a review. (A sample of a disclaimer of opinion is provided in paragraph .21.)

.20 Comparative Financial Statements—Current Year's Statements Audited and Prior Year's Statements Compiled

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The 20X1 financial statements were compiled by us (other accountants) and our (their) report thereon, dated March 1, 20X2, stated we (they) did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

Note: When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.

.21 Comparative Financial Statements—Current Year's Statements Audited and Disclaimer on Prior Year's Unaudited Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The 20X1 financial statements were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: AU section 504 paragraph .17]

Notes: The above report illustrates a disclaimer of opinion as described in AU section 504 paragraph .17 when the financial statements are those of a public entity. For a nonpublic entity, see paragraphs .19 and .20.

When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.

.22 U.S.-Style Report Modified to Report on Financial Statements Prepared in Conformity With Accounting Principles Generally Accepted in Another Country That Are Intended for Use Only Outside the United States

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of International Company as of December 31, 20XX and the related statements of income, retained earnings, and cash flows for the year then ended which, as described in Note X, have been prepared on the basis of accounting principles generally accepted in [*name of country*]. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (and in [*name of country*]). U.S. standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of International Company as of [*at*] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in [*name of country*].

[*Signature*]

[*Date*]

[Source: AU section 534 paragraph .10, *Reporting on Financial Statements Prepared for Use in Other Countries* (AICPA, *Professional Standards*, vol. 1)]

.23 Report on Financial Statements Prepared in Conformity With the Accounting Principles Generally Accepted in Another Country That Will Have More Than Limited Distribution in the United States

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of International Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in Note X to the financial statements, the Company has recorded fixed assets in excess of historical cost using appraised value as the basis for adjustment in accordance with accounting principles generally accepted in [*name of country*]. If the fixed assets had been recorded at historical cost, fixed assets and retained earnings would be decreased by $XXX,XXX and $XXX,XXX respectively, as of December 31, 20XX, and net income and earnings per share would be increased by $X,XXX and $X.XX respectively for the year then ended.

In our opinion, except for the effects of recording the fixed assets in excess of historical costs, discussed in the preceding paragraph, the financial statements present fairly, in all material respects, the financial position of International Company as of December 31, 20XX, and the results of its operations and its cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

(Optional Paragraph)

In our opinion, the financial statements referred to above present fairly the financial position of the International Company at December 31, 20XX, and the results of its operations and its cash flows for the year then ended, in conformity with accounting principles generally accepted in [*name of country*].

[*Signature*]

[*Date*]

Note: The above illustrates a report as described in AU section 534 paragraphs .14–.15. This report does not apply to reports on financial statements of U.S. subsidiaries of foreign registrants presented in SEC filings of foreign parent companies where the subsidiaries' financial statements have been prepared on the basis of accounting used by the parent company.

.24 Correction of an Error, Not Involving an Accounting Principle

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note X to the financial statements, certain errors resulting in an understatement of previously reported expenses for the years ended December 31, 20X1 and 20X0 were discovered by the Company's management during the current year. Accordingly, the 20X1 financial statements have been restated and an adjustment has been made to retained earnings as of January 1, 20X1 to correct the errors.

Note: This report would be used when the issuance of financial statements accompanied by the auditor's report for a subsequent period is imminent so that disclosure is not delayed (AU section 561 paragraph .06*b*, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* [AICPA, *Professional Standards*, vol. 1]).

.25 Subsequent Event Prior to Issuance of Auditor's Report

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note X to the financial statements, on March 1, 20X3, the Company entered into an agreement to sell Subsidiary A. This Subsidiary represents X percent of the Company's total assets and X percent of its revenues.

.26 Reissued Report Due to Subsequent Discovery of Facts Existing at the Date of the Auditor's Report

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 10 to the financial statements, the Company's 20X2 [*specify account corrected*] previously reported as $XX,XXX should have been $X,XXX. This discovery was made subsequent to the issuance of the financial statements. The financial statements have been restated to reflect this correction.

.27 Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of XYZ Company as of December 31, 20X4, and the related statements of income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. *An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.* An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 9508 paragraphs .85–.88]

Note: The additional language related to internal control should not be used when reporting on the audit of financial statements of a nonissuer that engages its auditor to examine (or audit) and report on the effectiveness of internal control over financial reporting either voluntarily or to comply with regulatory requirements.

.28 Reference to PCAOB Standards in an Audit Report on a Nonissuer

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of XYZ Company as of December 31, 20X4, and the related statements of income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with *generally accepted auditing standards as established by the Auditing Standards Board (United States) and in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States).* Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. *The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting.Accordingly we express no such opinion.* An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 9508 paragraphs .89–.92]

Note: This example includes the illustrative language from AU section 9508 paragraph .88. Because the PCAOB's Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting that is Integrated With An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), requires an audit of internal control for those entities that are subject to Section 404(a) of the act, an audit of a nonissuer performed under PCAOB auditing standards does not require an audit of internal control unless otherwise required by a regulator with jurisdiction over the nonissuer. The additional language related to internal control should not be used when reporting on the audit of financial statements of a nonissuer that engages its auditor to examine (or audit) and report on the effectiveness of internal control over financial reporting either voluntarily or to comply with regulatory requirements.

[*The next page is 9271.*]

AAM Section 9220

Adverse Opinions

.01 Departures from GAAP

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note X to the financial statements, the Company carries its property, plant and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Accounting principles generally accepted in the United States of America require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided.

Because of the departures from accounting principles generally accepted in the United States of America identified above, as of December 31, 20X2 and 20X1, inventories have been increased $_______ and $_______ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant and equipment, less accumulated depreciation, is carried at $_______ and $_______ in excess of an amount based on the cost to the Company; and deferred income taxes of $_______ and $_______ have not been recorded; resulting in an increase of $_______ and $_______ in retained earnings and in appraisal surplus of $_______ and $_______, respectively. For the years ended December 31, 20X2 and 20X1, cost of goods sold has been increased $_______ and $_______, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of $_______ and $_______ have not been provided, resulting in an increase in net income of $_______ and $_______, respectively.

In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows for the years then ended.

AAM Section 9230

Disclaimers of Opinion

.01 Beginning Inventory Not Observed (First Examination)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.[1]

Except as discussed in the following paragraph, we conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Because we were not engaged as auditors until after December 31, 20X1, we were not present to observe the physical inventory taken at that date and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities. Accordingly, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the accompanying statements of income, retained earnings and cash flows for the year ended December 31, 20X2.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .26]

---

[1] Although the introductory paragraph of the standard disclaimer of opinion begins with "We were engaged to audit ..." and the scope paragraph of the report is omitted, AU section 508 paragraph .67, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), shows that the introductory paragraph does not need to be modified nor does the scope paragraph need to be omitted when the disclaimed financial statements are with audited financial statements.

.02 Inability to Obtain Sufficient Competent Evidential Matter Due to a Scope Limitation

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.[2]

[*Second paragraph of standard report should be omitted*]

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $_______ as of December 31, 20X2, and at $________ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .63]

[2] The wording in the first paragraph of the auditor's standard report is changed in a disclaimer of opinion because of a scope limitation. The first sentence now states that "we were engaged to audit" rather than "we have audited" since, because of the scope limitation, the auditor was not able to perform an audit in accordance with generally accepted auditing standards. In addition, the last sentence of the first paragraph is also deleted, because of the scope limitation, to eliminate the reference to the auditor's responsibility to express an opinion.

.03 Scope Limitation—Inventory and Generally Accepted Accounting Principles Departure—Capitalized Lease Obligations

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_____ and $_____, long-term debt by $_____ and $_____, and retained earnings by $_____ and $_____ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_____ and $_____ and earnings per share would be increased (decreased) by $_____ and $_____, respectively, for the years then ended.

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $_____ as of December 31, 20X2, and at $_____ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraphs .39 and .63]

Note: This report would be used if the generally accepted accounting principles departure is not so material to require an adverse opinion. See paragraph .01 of AAM section 9220 for an example of an adverse opinion.

[*The next page is 9371.*]

AAM Section 9240

Qualified Opinions

.01 Scope Limitation—Investment in Foreign Affiliate (Assuming Effects Are Such That Qualification Rather Than Disclaimer Is Appropriate)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as discussed in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

.02 Departure From GAAP—Leases Not Capitalized—Role

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

.03 Departure From GAAP—Leases Not Capitalized—Pertinent Facts Disclosed in Note

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, accounting principles generally accepted in the United States of America require that such obligations be included in the balance sheets.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.04 Inadequate Disclosure—Omission of Disclosures

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The Company's financial statements do not disclose [*describe the nature of the omitted disclosures*]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .42]

Note: This report assumes the effects are such that the auditor has concluded an adverse opinion is not appropriate.

.05 Inadequate Disclosure—Omission of Statement of Cash Flows

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income and retained earnings for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company declined to present a statement of cash flows for the years ended December 31, 20X2 and 20X1. Presentation of such statement summarizing the Company's operating, investing, and financing activities is required by accounting principles generally accepted in the United States of America.

In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .44]

.06 Change in Accounting Principle Without Reasonable Justification

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As disclosed in Note X to the financial statements, the Company adopted, in 20X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with accounting principles generally accepted in the United States of America, in our opinion the Company has not provided reasonable justification for making this change as required by those principles.

In our opinion, except for the change in accounting principle discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .52]

Note: If the change was from an accounting principle that is not generally accepted to one that is generally accepted it would be a correction of an error and would require recognition in the auditor's report as to consistency. However, because the middle paragraph contains all of the information required in an explanatory paragraph (following the opinion paragraph) as required by AU section 508 paragraph .16–.18, an explanatory paragraph is not required in this instance.

.07 Change to an Accounting Principle Not in Conformity With Generally Accepted Accounting Principles

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The company previously recorded its land at cost but adjusted the amounts to appraised values during the year, with a corresponding increase in stockholders' equity in the amount of $_____. In our opinion, the new basis on which land is recorded is not in conformity with accounting principles generally accepted in the United States of America.

In our opinion, except for the change to recording appraised values as described above, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 508 paragraph .55]

.08 More than One Reason—Qualified Opinion on Prior Year's Financial Statements With the Current Year Qualified for the Same Reason and an Additional Reason

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as discussed in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_____ and $_____ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_____ and $_____, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

The Company has excluded, from property and debt in the accompanying 20X2 balance sheet, certain lease obligations that were entered into in 20X2, which in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_____, long-term debt by $_____, and retained earnings by $_____, as of December 31, 20X2. Additionally, net income would be increased (decreased) by $_____ and earnings per share would be increased (decreased) by $_____ for the year then ended.

In our opinion, except for the effects on the 20X2 and 20X1 financial statements of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, and except for the effects of the 20X2 financial statements of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

AAM Section 9245

Information Accompanying Audited Financial Statements

.01 Omission of Supplementary Information Required by the Financial Accounting Standards Board

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company has not presented [*describe the supplementary information required by generally accepted accounting principles (GAAP)*[1]] that accounting principles generally accepted in the United States has determined is necessary to supplement, although not required to be part of, the basic financial statements.

[*Signature*]

[*Date*]

[Source: AU section 558 paragraph .08, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1)]

[1] The auditor may identify the body requiring the information, such as the Financial Accounting Standards Board (FASB) in this example.

.02 Omission of Supplementary Information Required by the Governmental Accounting Standards Board

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over financial reporting. Accordingly, we express no such opinion.*][2] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The City of Example, Any State, has not presented [*describe the supplementary information required by GAAP*[3]] that accounting principles generally accepted in the United States of America require to supplement, although not to be part of, the basic financial statements.

.05 Prescribed Procedures Not Completed Regarding Supplementary Information Required by the FASB

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [*specifically identify the supplementary information*] on page XX is not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. Further, we were unable to apply to the information certain procedures prescribed by professional standards because [*state the reasons*].

[*Signature*]

[*Date*]

[Source: AU section 558 paragraph .08]

Notes: Even though the auditor is unable to complete the prescribed procedures, if, on a basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report. [Source: AU section 558 paragraph .08]

Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by GAAP. However, management may choose not to place the required supplementary information outside of the basic financial statements. In such circumstances, unless it is audited as part of the basic financial statements, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor's report should be expanded to include a disclaimer on the supplementary information. [Source: AU section 558 paragraph .11] (See paragraph .10.)

.06 Prescribed Procedures Not Completed Regarding Supplementary Information Required by the GASB

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over financial reporting. Accordingly, we express no such opinion.*][7] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The [*specifically identify the supplementary information*] on pages XX through XX and XX through XX are not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. Further, we were unable to apply to the information certain procedures prescribed by professional standards because [*state the reasons*].

[*Signature*]

[*Date*]

[Sources: AU section 558 paragraph .08; AICPA Audit and Accounting Guide *State and Local Governments*, updated as of March 1, 2008, paragraph 14.79, (appendix A, example A-1)]

Notes: Even though the auditor is unable to complete the prescribed procedures, if, on the basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report. [Source: AU section 558 paragraph .08]

GASB standards require the management's discussion and analysis, which is RSI, to precede the basic financial statements and most other RSI to be presented immediately following the notes to

[7] This optional wording may be added in accordance with Auditing Interpretation No. 17, of AU section 508, which provides reporting guidance for audits of nonissuers. If this optional wording is added, the remainder of the paragraph should read as follows:

"An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions."

the financial statements. Although AU section 558 paragraph .11 discusses alternative placement of RSI provided it is clearly marked as unaudited, that alternative is not available for GASB-required supplementary information given the GASB's specific requirements for placement. If a government does not place GASB-required supplementary information in its financial report as required by GASB standards, the auditor should consider the effect of the placement on his or her report. Specifically, the auditor should consider whether to report that the RSI placement constitutes a presentation that departs materially from prescribed guidelines. [Source: AICPA Audit and Accounting Guide *State and Local Governments*, updated as of March 1, 2008, paragraph 2.59]

.07 Unresolved Doubts About Adherence to Guidelines Regarding Supplementary Information Required by FASB

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [*specifically identify the supplementary information*] on page XX is not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures prescribed by professional standards that raised doubts that we were unable to resolve regarding whether material modifications should be made to the information for it to conform with guidelines established by accounting principles generally accepted in the United States. [*The auditor should consider including in the report the reason(s) he or she was unable to resolve his or her substantial doubts.*]

[*Signature*]

[*Date*]

[Source: AU section 558 paragraph .08]

Notes: Even though the auditor is unable to complete the prescribed procedures, if, on the basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report.

[Source: AU section 558 paragraph .08]

Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by GAAP. However, management may choose not to place the required supplementary information outside of the basic financial statements. In such circumstances, unless it is audited as part of the basic financial statements, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor's report should be expanded to include a disclaimer on the supplementary information.

.08 Unresolved Doubts About Adherence to Guidelines Regarding Supplementary Information Required by GASB

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over financial reporting. Accordingly, we express no such opinion.*][8] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The [*specifically identify the supplementary information*] on pages XX through XX and XX through XX are not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures prescribed by professional standards that raised doubts that we were unable to resolve regarding whether material modifications should be made to the information for it to conform with guidelines established by accounting principles generally accepted in the United States. [*The auditor should consider including in the report the reason(s) he or she was unable to resolve his or her substantial doubts.*]

[*Signature*]

[*Date*]

[Sources: AU section 558 paragraph .08; AICPA Audit and Accounting Guide *State and Local Governments*, updated as of March 1, 2008, paragraph 14.79 (appendix A, example A-1)]

Notes: Even though the auditor is unable to complete the prescribed procedures, if, on the basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report. [Source: AU section 558 paragraph .08]

---

[8] This optional wording may be added in accordance with Auditing Interpretation No. 17, of AU section 508, which provides reporting guidance for audits of nonissuers. If this optional wording is added, the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions."

GASB standards require the management's discussion and analysis, which is RSI, to precede the basic financial statements and most other RSI to be presented immediately following the notes to the financial statements. Although AU section 558 paragraph .11 discusses alternative placement of RSI provided it is clearly marked as unaudited, that alternative is not available for GASB-required supplementary information given the GASB's specific requirements for placement. If a government does not place GASB-required supplementary information in its financial report as required by GASB standards, the auditor should consider the effect of the placement on his or her report. Specifically, the auditor should consider whether to report that the RSI placement constitutes a presentation that departs materially from prescribed guidelines.

.09 Report on Accompanying Information

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The (identify accompanying information) is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

When the auditor disclaims an opinion on all or part of the accompanying information in a document that he or she submits to his or her client or to others, such information should either be marked as unaudited or should include a reference to the auditor's disclaimer of opinion. The wording of the disclaimer will vary according to the circumstances.

.12 Qualification on Basic Financial Statements and Accompanying Information (Departure From GAAP)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_____ and $_____, long-term debt by $_____ and $_____, and retained earnings by $_____ and $_____ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_____ and $_____ and earnings per share would be increased (decreased) by $_____ and $_____, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules of property and related depreciation (page X), and long-term debt with related interest (page Y), as of December 31, 20X2, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The information in such schedules has been subjected to the auditing procedures applied in the audit of the basic financial statements; and, in our opinion, except for the effects on the schedule of property of not capitalizing certain lease obligations as explained in the third paragraph of this report, such information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.13 Supplementary Information Required by the FASB Included in Auditor-Submitted Document

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [*identify the supplementary information*] on page XX is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document. [Source: AU section 551 paragraph .06]

When supplementary information required by GAAP is presented outside the basic financial statements in an auditor-submitted document, the auditor should (*a*) express an opinion on the information if the auditor has been engaged to examine the information, (*b*) report on the information using the guidance in AU section 551 paragraphs .12 and .14, provided such information has been subjected to the auditing procedures applied in the audit of the basic financial statements, or (*c*) disclaim an opinion on the information.[9] [Source: AU section 551 paragraph .15]

In certain circumstances, the auditor's report should be expanded in accordance with AU section 558 paragraph .08–.09. The illustrative reports at paragraphs .01–.08 are assembled from illustrative reporting language in AU section 558 paragraph .08.

---

[9] The auditor may identify the body requiring the information, such as the FASB in this example.

.14 Supplementary Information Required by the GASB Included in Auditor-Submitted Documents

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over financial reporting. Accordingly, we express no such opinion.*][10] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The [*identify accompanying required supplementary information*] on pages XX through XX and XX through XX are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America.[11] We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in auditor-submitted documents. [Source: AU section 551 paragraph .06]

When supplementary information required by GAAP is presented outside the basic financial statements in an auditor-submitted document, the auditor should (*a*) express an opinion on the

[10] This optional wording may be added in accordance with Auditing Interpretation No. 17 of AU section 508, which provides reporting guidance for audits of nonissuers. If this optional wording is added, the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions."

[11] The auditor may identify the body requiring the information, such as the GASB in this example.

information if the auditor has been engaged to examine the information, (*b*) report on the information using the guidance in AU section 551 paragraphs .12 and .14), provided such information has been subjected to the auditing procedures applied in the audit of the basic financial statements, or (*c*) disclaim an opinion on the information.

In certain circumstances, the auditor's report should be expanded in accordance with AU section 558 paragraphs .08 and .09. The illustrative reports at paragraphs .01–.08 are assembled from illustrative reporting language in AU section 558 paragraph .08 and the AICPA Audit and Accounting Guide *State and Local Governments*, updated as of March 1, 2008.

.15 Consolidating Information Not Separately Audited

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated balance sheets of X Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of X Company and subsidiaries as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations, and cash flows of the individual companies. The consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

[*Signature*]

[*Date*]

[Source: AU section 551 paragraph .18]

Notes: The report on the consolidating information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document.

When the auditor is engaged to express an opinion only on the consolidated financial statements and consolidating information is also included, the auditor should be satisfied that the consolidating information is suitably identified. For example, when the consolidated financial statements include columns of information about the components of the consolidated group, the balance sheets might be titled, "Consolidated Balance Sheet-December 31, 20X1, with Consolidating Information," and the columns including the consolidating information might be marked, "Consolidating Information." When the consolidating information is presented in separate schedules, the schedules presenting balance sheet information of the components might be titled, for example, "Consolidating Schedule, Balance Sheet Information, December 31, 20X1."

.16 Unqualified Opinion on Selected Financial Data in a Client-Prepared Document That Includes Audited Financial Statements

Independent Auditor's Report

Addressee:

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provided a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the ABC Company and subsidiaries as of December 31, 20X5 and 20X4, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 20X5, in conformity with accounting principles generally accepted in the United States of America.

We have also previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheets as of December 31, 20X3, 20X2, and 20X1, and the related statements of income, retained earnings, and cash flows for the years ended December 31, 20X2, and 20X1 (none of which are presented herein); and we expressed unqualified opinions on those consolidated financial statements. In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 20X5, appearing on page xx, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

AAM Section 9250

Engagements to Report on Internal Control

.01 Accountant's Report When Expressing an Opinion Directly on the Effectiveness of an Entity's Internal Control as of a Specified Date

Independent Accountant's Report

We have examined the effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of internal control based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*].[1]

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .56, *Reporting on an Entity's Internal Control Over Financial Reporting* (AICPA, *Professional Standards*, vol. 1)]

.02 Accountant's Report When Expressing an Opinion on a Written Assertion About the Effectiveness of an Entity's Internal Control as of a Specified Date

Independent Accountant's Report

We have examined management's assertion, included in the accompanying [*title of management report*], that W Company maintained effective internal control over financial reporting as of December 31, 20XX based on [*identify criteria*].[2] W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion that W Company maintained effective internal control over financial reporting as of December 31, 20XX is fairly stated, in all material respects, based on [*identify criteria*].[3]

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .58]

Note: Nothing precludes the practitioner from examining an assertion but opining directly on the effectiveness of internal control. (See AT section 501 paragraph .59.)

---

[2] The practitioner should identify the responsible party's report examined by referring to the title used by the responsible party in its report. Further, he or she should use the same description of the entity's internal control as the responsible party uses in its reports, including the kinds of controls (that is, control over the preparation of annual financial statements, interim financial statements, or both) on which the responsible party is reporting. If the presentation of the assertion does not accompany the practitioner's report, the phrase "included in the accompanying [*title of responsible party's report*]" would be omitted.

[3] For example, "criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

.03 Modified Report With Explanatory Language, That a Practitioner Should Use When There Is a Material Weakness in an Entity's Internal Control and, Based on Its Significance and Its Effect on the Achievement of the Objectives of the Control Criteria, the Practitioner Concludes That a Qualified Opinion Is Appropriate

Independent Accountant's Report

We have examined the effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of internal control based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a significant deficiency or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected. A significant deficiency is a control deficiency or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected. The following material weakness has been identified.

[*Include a description of the material weakness and its effect on the achievement of the objectives of the control criteria.*]

In our opinion, except for the effect of the material weakness described in the preceding paragraph on the achievement of the objectives of the control criteria, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*].

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .63]

Note: If the practitioner's report on his or her examination of the effectiveness of the entity's internal control is included within the same document that includes his or her audit report on the entity's financial statements, the following sentence should be included in the paragraph of the examination report that describes the material weakness:

> These conditions were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 20XX financial statements, and this report does not affect our report dated [*date of report*] on these financial statements.[4]

[Source: AT section 501 paragraphs .63 and .66]

---

[4] The practitioner may also include the preceding sentence in situations where the two reports are not included within the same document.

.04 Adverse Opinion on When a Material Weakness in Internal Control Exists and, in the Practitioner's Judgment, the Material Weakness(es) Is (Are) So Pervasive That the Entity's Internal Control Over Financial Reporting Does Not Achieve the Control Objectives

Independent Accountant's Report

We have examined the effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of internal control based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a significant deficiency or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected. A significant deficiency is a control deficiency or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected. The following material weakness has been identified.

[*Include a description of the material weakness and its effect on the achievement of the objectives of the control criteria.*]

In our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, W Company has not maintained effective internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*].

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .64]

Note: If the practitioner's report on his or her examination of the effectiveness of the entity's internal control is included within the same document that includes his or her audit report on the entity's financial statements, the following sentence should be included in the paragraph of the examination report that describes the material weakness:

> These conditions were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 20XX financial statements, and this report does not affect our report dated [*date of report*] on these financial statements.[5]

[Source: AT section 501 paragraphs .64 and .66]

[5] The practitioner may also include the preceding sentence in situations where the two reports are not included within the same document.

.05 Qualified Opinion on the Effectiveness of an Entity's Internal Control, or Written Assertion Thereon, Due to a Scope Limitation

Independent Accountant's Report

We have examined the effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of internal control based on our examination.

Except as described below, our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

A material weakness is a significant deficiency or a combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected. A significant deficiency is a control deficiency or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected. The following material weakness has been identified. Prior to December 20, 20XX, W Company had an inadequate system for recording cash receipts, which could have prevented the Company from recording cash receipts on accounts receivable completely and properly. Therefore, cash received could have been diverted for unauthorized use, lost, or otherwise not properly recorded to accounts receivable. We believe this condition was a material weakness in the design or operation of the internal control of W Company in effect prior to December 20, 20XX. Although the Company implemented a new cash receipts system on December 20, 20XX, the system has not been in operation for a sufficient period of time to enable us to obtain sufficient evidence about its operating effectiveness.

Because of the inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, except for the effect of matters we may have discovered had we been able to examine evidence about the effectiveness of the new cash receipts system, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX based on [*identify criteria*].

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .68]

.06 Disclaimer of Opinion When Restrictions That Significantly Limit the Scope of the Examination Are Imposed by the Client or the Responsible Party

Independent Accountant's Report

We were engaged to examine the effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting.

[*Scope paragraph should be omitted.*]

[*Explanatory paragraph.*]

[*Include paragraph to describe scope restrictions.*]

Since management [*describe scope restrictions*] and we were unable to apply other procedures to satisfy ourselves as to the entity's internal control over financial reporting, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the effectiveness of the entity's internal control over financial reporting.

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .70]

.07 Unqualified Opinion When the Practitioner Decides to Make Reference to the Report of Another Practitioner as a Basis, in Part, for the Practitioner's Opinion

[*In these circumstances, the practitioner should disclose this fact when describing the scope of the examination and should refer to the report of the other practitioner when expressing the opinion.*[6]]

Independent Accountant's Report

We have examined the effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of internal control based on our examination. We did not examine the effectiveness of internal control over financial reporting of B Company, a wholly owned subsidiary, whose financial statements reflect total assets and revenues constituting 20 and 30 percent, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 20XX. The effectiveness of B Company's internal control over financial reporting was examined by other accountants whose report has been furnished to us, and our opinion, insofar as it relates to the effectiveness of B Company's internal control over financial reporting, is based solely on the report of the other accountants.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control and performing such other procedures as we considered necessary in the circumstances. We believe that our examination and the report of the other accountants provide a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, based on our examination and the report of the other accountants, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX, based on [*identify criteria*].

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .72]

---

[6] Whether the other practitioner's opinion is expressed on the responsible party's assertion or on the effectiveness of internal control does not affect the determination of whether the principal practitioner's opinion is expressed on the assertion or on the subject matter itself.

.08 Unqualified Opinion on the Effectiveness of Only a Segment of an Entity's Internal Control

[*For example, internal control over financial reporting of an entity's operating division or its accounts receivable*]

Independent Accountant's Report

We have examined the effectiveness of W Company's internal control over financial reporting for its retail division as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on the effectiveness of internal control based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of the inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, W Company's retail division maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX based on [*identify criteria*].

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .77]

.09 Unqualified Opinion About the Suitability of Design of the Entity's Internal Control

Independent Accountant's Report

We have examined the suitability of W Company's design of internal control over financial reporting to prevent or detect material misstatements in the financial statements on a timely basis as of December 31, 20XX, based on [*identify criteria*]. W Company's management is responsible for the suitable design of internal control over financial reporting. Our responsibility is to express an opinion on the design of internal control based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, evaluating the design of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, W Company's internal control over financial reporting is suitably designed, in all material respects, to prevent or detect material misstatements in the financial statements on a timely basis as of December 31, 20XX, based on [*identify criteria*].

[*Signature*]

[*Date*]

[Source: AT section 501 paragraph .79]

Notes: This report assumes that the control criteria of the regulatory agency are both suitable and available to users as discussed in AT section 101 paragraphs .23–.34, *Attest Engagements* (AICPA, *Professional Standards*, vol. 1). Therefore, there is no restriction on the use of this report.

When reporting on the suitability of design of the entity's internal control that has already been placed in operation, the report should be modified by adding the following to the scope paragraph:

> We were not engaged to examine and report on the operating effectiveness of W Company's internal control over financial reporting as of December 31, 20XX, and, accordingly, we express no opinion on operating effectiveness.

.10 Unqualified Opinion Based on an Examination on the Adequacy of an Entity's Internal Control Over Financial Reporting Based on Criteria Established by a Regulatory Agency That Are Not Suitable for General Use

Independent Accountant's Report

We have examined the adequacy of W Company's internal control over financial reporting as of December 31, 20XX, based on the criteria established by __________ agency, as set forth in its audit guide dated __________. W Company's management is responsible for maintaining adequate internal control over financial reporting. Our responsibility is to express an opinion on whether the internal control is adequate to meet such criteria based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We understand that the agency considers the controls over financial reporting that meet the criteria referred to in the first paragraph of this report adequate for its purpose. In our opinion, based on this understanding and on our examination, W Company's internal control over financial reporting is adequate, in all material respects, based on the criteria established by __________ agency.

This report is intended solely for the information and use of the board of directors and management of W Company and [*agency*] and is not intended to be and should not be used by anyone other than these specified parties.

.11 Communication of Internal Control Matters Noted in an Audit

Addressee:

In planning and performing our audit of the financial statements of ABC Company as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered ABC Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies [*and other deficiencies that we consider to be material weaknesses*].

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the following deficiencies to be significant deficiencies in internal control:

[*Describe the significant deficiencies that were identified.*]

[*A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. We believe that the following deficiencies constitute material weaknesses.*]

[*Describe the material weaknesses that were identified.*]

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any specified governmental authorities*] and is not intended to be and should not be used by anyone other than these specified parties.

[*Signature*]

[*Date*]

The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

[Source: AU section 325 paragraphs .26 and .29, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1)]

.12 Communication of Internal Control Related Matters Noted in an Audit When the Auditor Has Not Identified Any Material Weaknesses and Wishes to Communicate That to Management and Those Charged With Governance

Addressee:

In planning and performing our audit of the financial statements of ABC Company as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered ABC Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any specified governmental authorities*] and is not intended to be and should not be used by anyone other than these specified parties.

[*Signature*]

[*Date*]

The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

[Source: AU section 325 paragraphs .28–.29]

Notes: If one or more significant deficiencies have been identified, the auditor may add the following sentence to the fourth paragraph of the communication:

> However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [*date*].

.13 Report on Controls Placed in Operation at a Service Organization

To XYZ Service Organization:

We have examined the accompanying description of controls related to the ___application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,[7] and (3) such controls had been placed in operation as of __. The control objectives were specified by __. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of XYZ Service Organization's controls, individually or in the aggregate.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of ____. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

The description of controls at XYZ Service Organization is as of ___and any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers ___.

[Source: AU section 324 paragraph .38, *Service Organizations* (AICPA, *Professional Standards*, vol. 1)]

Notes: This report should have an attachment containing a description of the service organization's controls that may be relevant to a user organization's internal control.

This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

See AU section 324 paragraph .39, for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors.

See AU section 324 paragraph .40, for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that there are sufficient deficiencies in the design or operation of the service organization's controls.

---

[7] If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

.14 Report on Controls Placed in Operation at a Service Organization and Tests of Operating Effectiveness

To XYZ Service Organization:

We have examined the accompanying description of controls related to the ___application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,[8] and (3) such controls had been placed in operation as of __. The control objectives were specified by __. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of ____. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X, to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from ___to ___. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of XYZ Service Organization and to their auditors to be taken into consideration, along with information about the internal control at user organizations, when making assessments of control risk for user organizations. In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from __to __. [However, the scope of our engagement did not include tests to determine whether control objectives not listed in Schedule X were achieved; accordingly, we express no opinion on the achievement of control objectives not included in Schedule X.][9]

The relative effectiveness and significance of specific controls at XYZ Service Organization and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at XYZ Service Organization is as of ____, and information about tests of the operating effectiveness of specific controls covers the period from ____to ____. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

---

[8] If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

[9] This sentence should be added when all of the control objectives listed in the description of controls placed in operation are not covered by the tests of operating effectiveness. This sentence would be omitted when all of the control objectives listed in the description of controls placed in operation are included in the tests of operating effectiveness.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

[Source: AU section 324 paragraph .54]

Notes: This report should have two attachments: (*a*) a description of the service organization's controls that may be relevant to a user organization's controls and (*b*) a description of controls for which tests of operating effectiveness were performed, the control objectives the controls were intended to achieve, the tests applied, and the results of these tests.

This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

See AU section 324 paragraph .55, for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors.

See AU section 324 paragraph .56, for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that there are sufficient deficiencies in the design or operation of the service organization's controls.

.15 Reports on Internal Control Required by SEC Rule 17a-5

The following is an illustration of the independent auditor's report on internal control required by Securities Exchange Commission (SEC) rule 17a-5(g)(1):[*]

Board of Directors

Standard Stockbrokerage Co., Inc.

In planning and performing our audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] (the Company), as of and for the year ended December 31, 20X7, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the [*consolidated*] financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Also, as required by rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study of the practices and procedures followed by the Company, including consideration of control activities for safeguarding securities. This study included tests of compliance with such practices and procedures that we considered relevant to the objectives stated in rule 17a-5(g), in the following:

1. Making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under rule 17a-3(a)(11) and the reserve required by rule 15c3-3(e)
2. Making the quarterly securities examinations, counts, verifications, and comparisons, and the recordation of differences required by rule 17a-13
3. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System
4. Obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by rule 15c3-3

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls, and of the practices and procedures referred to in the preceding paragraph, and to assess whether those practices and procedures can be expected to achieve the SEC's above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity

[*] For audits conducted in accordance with Public Company Accounting Oversight Board (PCAOB) standards, PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), replaces this sentence with the following sentence: "We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States)." On May 14, 2004, the Securities and Exchange Commission (SEC) issued an interpretive release to help with the implementation of PCAOB Auditing Standard No. 1. See Release No. 33-8422 for more information. The release specifies that effective May 14, 2004, references in SEC rules and staff guidance and in the federal securities laws to GAAS or to specific standards under GAAS, as they relate to issuers, should be understood to mean the standards of the PCAOB, plus any applicable rules of the SEC. The guidance in this release is applicable only to auditors' engagements that are governed by PCAOB rules. The PCAOB, for example, has not established particular auditing standards for nonissuer broker-dealers or investment advisers. This release is not applicable to such engagements and related filings.

The staff of the PCAOB published a series of questions and answers on PCAOB Auditing Standard No. 1. See the PCAOB Web site at www.pcaobus.org for more information.

In June 2004, the Auditing Standards Board (ASB) issued Interpretation No. 18, "Reference to PCAOB Standards in an Audit Report of a Nonissuer" of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), which provides reporting guidance for audits of nonissuers. Interpretation No. 18 in AU section 9508 provides guidance on the appropriate referencing of PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance with both GAAS and PCAOB auditing standards. The ASB also is revising AU section 508 (AICPA, *Professional Standards*, vol. 1) in light of the International Auditing and Assurance Standards Board's recently exposed International Standard on Auditing, The Independent Auditor's Report on a Complete Set of General Purpose Financial Statements, and PCAOB Auditing Standard No. 1. See the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards for more information.

with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A *significant deficiency*[10] is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first and second paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We did not identify any deficiencies in internal control and control activities for safeguarding securities that we consider to be material weaknesses, as defined above.[11]

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the SEC to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures, as described in the second paragraph of this report, were adequate at December 31, 20X7, to meet the SEC's objectives.[12]

---

[10] On May 24, 2007 the PCAOB approved PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements* (*PCAOB Standards and Related Rules*, Rules of the Board, "Standards"). The Securities and Exchange Commission (SEC) approved Auditing Standard No. 5 on July 25, 2007 and it is effective for all audits of internal control for fiscal years ending on or after November 15, 2007. Early adoption is permitted. Included in Auditing Standard No. 5 are new definitions for significant deficiency and material weakness:

> **Significant deficiency.** A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.
>
> **Material weakness.** A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

[11] If significant deficiencies are identified, this paragraph can be modified by inserting, "However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [*date*]." AU section 325 paragraph .29, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), states that the auditor should not issue a written communication stating that no significant deficiencies were identified because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of this paragraph of the report should be modified as follows:

> However, we identified the following deficiencies in [internal control or control activities for safeguarding securities] that we consider to be material weaknesses, as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures performed in our audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] as of and for the year ended December 31, 20X6, and this report does not affect our report thereon dated February 15, 20X7. [*A description of the material weaknesses that have come to the auditor's attention and corrective action.*]

[12] Whenever inadequacies are described, the last sentence of this paragraph should be modified as per footnote 11. The report should also describe material inadequacies that the auditor becomes aware of that existed during the period but were corrected prior to the end of the period, unless management already has reported them to the SEC.

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*Designated self-regulatory organization*], and other regulatory agencies that rely on rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and is not intended to be and should not be used by anyone other than these specified parties.

.16 Report on Internal Control Required by SEC Rule 17a-5 (g) (1) for a Broker-Dealer Claiming an Exemption From SEC Rule 15c3-3

The following is an illustration of an independent auditor's report on internal control required by SEC Rule 17a-5(g)(1) for a broker-dealer claiming an exemption from Securities and Exchange Commission (SEC) rule 15c3-3.[13]

Board of Directors

Standard Stockbrokerage Co., Inc.:

In planning and performing our audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] (the Company), as of and for the year ended December 31, 20X7 in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the [*consolidated*] financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Also, as required by rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study of the practices and procedures followed by the Company including consideration of control activities for safeguarding securities. This study included tests of such practices and procedures that we considered relevant to the objectives stated in rule 17a-5(g) in making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under rule 17a-3(a)(11) and for determining compliance with the exemptive provisions of rule 15c3-3. Because the Company does not carry securities accounts for customers or perform custodial functions relating to customer securities, we did not review the practices and procedures followed by the Company in any of the following:

1. Making quarterly securities examinations, counts, verifications, and comparisons and recordation of differences required by rule 17a-13

2. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls and of the practices and procedures referred to in the preceding paragraph and to assess whether those practices and procedures can be expected to achieve the SEC's above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements

---

[13] There are different types of exemptions under SEC Rule 15c3-3—k(1), k(2)(i), and k(2)(ii). Other formats of this letter will be required depending on the type of the exemption filed.

on a timely basis. A *significant deficiency*[14] is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first and second paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We did not identify any deficiencies in internal control and control activities for safeguarding securities that we consider to be material weaknesses, as defined above.[15]

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the SEC to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures, as described in the second paragraph of this report, were adequate at December 31, 20X7, to meet the SEC's objectives.[16]

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*Designated self-regulatory organization*], and other regulatory agencies that rely on rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and is not intended to be and should not be used by anyone other than these specified parties.

Note: AAM section 9650 illustrates the auditor's reports on the financial statements of brokers and dealers in securities.

---

[14] On May 24, 2007 the PCAOB approved Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements*. The SEC approved Auditing Standard No. 5 on July 25, 2007 and it is effective for all audits of internal control for fiscal years ending on or after November 15, 2007. Early adoption is permitted. Included in Auditing Standard No. 5 are new definitions for *significant deficiency* and *material weakness*:

> **Significant deficiency.** A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.
>
> **Material weakness.** A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

[15] If significant deficiencies are identified, this paragraph can be modified by inserting " However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [*date*]." AU section 325 paragraph .29 (AICPA, *Professional Standards*, vol. 1) states that the auditor should not issue a written communication stating that no significant deficiencies were identified because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of this paragraph of the report should be modified as follows:

> However, we identified the following deficiencies in [internal control or control activities for safeguarding securities] that we consider to be material weaknesses, as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures performed in our audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] as of and for the year ended December 31, 20X7, and this report does not affect our report thereon dated February 15, 20X8. [*A description of the material weaknesses that have come to the auditor's attention and corrective action.*]

[16] Whenever inadequacies are described, the last sentence of this paragraph should be modified as per footnote 15. The report should also describe material inadequacies that the auditor becomes aware of that existed during the period but were corrected prior to the end of the period, unless management already has reported them to the SEC.

.17 Letter to SEC When the Broker-Dealer Has Not Made the Required Notification

The following report is appropriate if the broker-dealer has not made the required notification of material inadequacy or if the auditor does not agree with the statements therein. Modification of this letter may be required based on the facts and circumstances of the particular situation.

Securities and Exchange Commission
Washington D.C., and [*Appropriate regional office*]
Designated Examining Authority

Dear Sirs:

Our most recent audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] (the Company), was as of December 31, 20X6, and for the year then ended, which we reported on under date of February 15, 20X7. We have not audited any financial statements of the Company as of any date or for any period subsequent to December 31, 20X6. Although we are presently performing certain procedures as part of our audit of the [*consolidated*] financial statements of the Company as of December 31, 20X7, and for the year then ending, these procedures do not constitute all the procedures necessary in an audit conducted in accordance with auditing standards generally accepted in the United States of America or all the procedures necessary to (1) consider the Company's internal control as required by generally accepted auditing standards or (2) study the Company's practices and procedures relevant to the objectives stated in rule 17a-5(g) of the Securities and Exchange Commission as required by rule 17a-5.

The management of the Company is responsible for establishing and maintaining internal control. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls. The objectives of internal control are to provide management with reasonable but not absolute assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and are recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles.

Because of inherent limitations in internal control, error or fraud may occur and not be detected. Also, projection of any evaluation of internal control to future periods is subject to the risk that controls may become inadequate because of changes in conditions or that the effectiveness of the design and operation of controls may deteriorate.

The purpose of performing certain procedures prior to the date of the financial statements is to facilitate the expression of an opinion on the Company's financial statements. It must be understood that the procedures performed would not necessarily identify all material weaknesses in internal control and control activities for safeguarding securities.

However, pursuant to the requirements of rule 17a-5(h)(2), we are to call to the attention of the chief financial officer any weaknesses that we believe to be material and that were disclosed during the course of interim work. We have made such notification to the chief financial officer of Standard Stockbrokerage Co., Inc., and we believe the following additional information is required pursuant to the requirements of the rule.

[*List and describe all instances where the independent auditor did not agree with the notification of the broker or dealer or where the required notification was not made.*]

Note: AAM section 9650 illustrates the auditor's reports on the financial statements of brokers and dealers in securities.

.18 Report on Internal Control Required by CFTC Regulation 1.16 and SEC Rule 17a-5(g)(1)

The following is an illustration of the independent auditor's report on internal control required by CFTC Regulation 1.16 and SEC Rule 17a-5(g)(1).

Board of Directors
Standard Stockbrokerage Co., Inc.:

In planning and performing our audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] (the Company) as of and for the year ended December 31, 20X7, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the [*consolidated*] financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study of the practices and procedures followed by the Company, including consideration of control activities for safeguarding securities. This study included tests of compliance with such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g), in the following:

1. Making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under Rule 17a-3(a)(11) and the reserve required by Rule 15c3-3(e)

2. Making the quarterly securities examinations, counts, verifications, and comparisons, and the recordation of differences required by Rule 17a-13

3. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System

4. Obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by Rule 15c3-3.

In addition, as required by Regulation 1.16 of the Commodity Futures Trading Commission (CFTC), we have made a study of the practices and procedures followed by the Company including consideration of control activities for safeguarding customer and firm assets. This study included tests of such practices and procedures that we considered relevant to the objectives stated in Regulation 1.16, in making the following:

1. The periodic computations of minimum financial requirements pursuant to Regulation 1.17

2. The daily computations of the segregation requirements of Section 4d(a)(2) of the Commodity Exchange Act and the regulations thereunder, and the segregation of funds based on such computations

3. The daily computations of the foreign futures and foreign options secured amount requirements pursuant to Regulation 30.7 of the CFTC.

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraphs. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls and of the practices and procedures referred to in the preceding paragraphs and to assess whether those practices and procedures can be expected to achieve the SEC's and the CFTC's above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) and Regulation 1.16(d)(2) list additional objectives of the practices and procedures listed in the preceding paragraphs.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A *significant deficiency*[17] is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first, second and third paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We did not identify any deficiencies in internal control and control activities for safeguarding securities and certain regulated commodity customer and firm assets that we consider to be material weaknesses, as defined above.[18]

We understand that practices and procedures that accomplish the objectives referred to in the second and third paragraphs of this report are considered by the SEC and CFTC to be adequate for their purposes in accordance with the Securities Exchange Act of 1934, the Commodity Exchange Act, and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures, as described in the second and third paragraphs of this report, were adequate at December 31, 20X7, to meet the SEC's and CFTC's objectives.[19]

---

[17] On May 24, 2007 the PCAOB approved Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements*. The SEC approved Auditing Standard No. 5 on July 25, 2007 and it is effective for all audits of internal control for fiscal years ending on or after November 15, 2007. Early adoption is permitted. Included in Auditing Standard No. 5 are new definitions for significant deficiency and material weakness:

> **Significant deficiency.** A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.
>
> **Material weakness.** A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

[18] If significant deficiencies are identified, this paragraph can be modified by inserting " However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [*date*]." AU section 325 paragraph .29 (AICPA, *Professional Standards*, vol.1) states that the auditor should not issue a written communication stating that no significant deficiencies were identified because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of this paragraph of the report should be modified as follows:

> However, we identified the following deficiencies in [internal control or control activities for safeguarding securities and certain regulated commodity customer and firm assets] that we consider to be material weaknesses, as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures performed in our audit of the [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] as of and for the year ended December 31, 20X7, and this report does not affect our report thereon dated February 15, 20X8. [*A description of the material weaknesses that have come to the auditor's attention and corrective action*.]

[19] Whenever inadequacies are described, the last sentence of this paragraph should be modified as per footnote 18. The report should also describe material inadequacies that the auditor becomes aware of that existed during the period but were corrected prior to the end of the period, unless management already has reported them to the SEC and the CFTC.

This report is intended solely for the information and use of the Board of Directors, management, the SEC, the CFTC, [*Designated Self-Regulatory Organization*] and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 or Regulation 1.16 of the CFTC or both in their regulation of registered broker-dealers and futures commission merchants, and is not intended to be and should not be used by anyone other than these specified parties.

Special Reports

.01 Cash Basis Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of assets and liabilities arising from cash transactions of XYZ Company as of December 31, 20X2 and 20X1, and the related statements of revenue collected and expenses paid for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared on the basis of cash receipts and disbursements, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities arising from cash transactions of XYZ Company as of December 31, 20X2 and 20X1, and its revenue collected and expenses paid during the years then ended, on the basis of accounting described in Note X.

Note: See the AICPA publication *Cash and Tax Basis Financial Statements—Checklists and Illustrative Financial Statements* for further guidance on the unique recognition, measurement, and disclosure issues for other comprehensive basis of accounting (OCBOA) financial statements, including illustrative financial statements and notes. Call the AICPA at (888) 777-7077 and ask for product number WTX-CL to order.

.02 Income Tax Basis Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of assets, liabilities, and capital—income tax basis of ABC Partnership as of December 31, 20X2 and 20X1, and the related statements of revenue and expenses—income tax basis and of changes in partners' capital accounts—income tax basis for the years then ended. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared on the basis of accounting the Partnership uses for income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and capital of ABC Partnership as of [*at*] December 31, 20X2 and 20X1, and its revenue and expenses and changes in partners' capital accounts for the years then ended, on the basis of accounting described in Note X.

.03 Regulatory (Statutory) Basis Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of admitted assets, liabilities, and surplus—statutory basis of XYZ Insurance Company as of December 31, 20X2 and 20X1, and the related statements of income and cash flows—statutory basis and changes in surplus—statutory basis for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared in conformity with the accounting practices prescribed or permitted by the Insurance Department of [*State*], which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and surplus of XYZ Insurance Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended, on the basis of accounting described in Note X.

This report is intended solely for the information and use of the board of directors and management of XYZ Insurance Company and [*name of regulatory agency*] and is not intended to be and should not be used by anyone other than these specified parties.

.04 Report Relating to Amount of Sales for the Purpose of Computing Rental

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited the accompanying schedule of gross sales (as defined in the lease agreement dated March 4, 20XX, between ABC Company, as lessor, and XYZ Stores Corporation, as lessee) of XYZ Stores Corporation at its Main Street store, [*City*], [*State*], for the year ended December 31, 20X2. This schedule is the responsibility of XYZ Stores Corporation's management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of gross sales is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule of gross sales. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the schedule of gross sales referred to above presents fairly, in all material respects, the gross sales of XYZ Stores Corporation at its Main Street store, [*City*], [*State*], for the year ended December 31, 20X2, as defined in the lease agreement referred to in the first paragraph.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Stores Corporation and ABC Company and is not intended to be and should not be used by anyone other than these specified parties.

[*Signature*]

[*Date*]

[Source: AU section 623 paragraph .18]

.05 Royalties

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited the accompanying schedule of royalties applicable to engine production of the Q Division of XYZ Corporation for the year ended December 31, 20X2, under the terms of a license agreement dated May 14, 20XX, between ABC Company and XYZ Corporation. This schedule is the responsibility of XYZ Corporation's management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of royalties is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule of royalties. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

We have been informed that, under XYZ Corporation's interpretation of the agreement referred to in the first paragraph, royalties were based on the number of engines produced after giving effect to a reduction for production retirements that were scrapped, but without a reduction for field returns that were scrapped, even though the field returns were replaced with new engines without charge to customers.

In our opinion, the schedule of royalties referred to above presents fairly, in all material respects, the number of engines produced by the Q Division of XYZ Corporation during the year ended December 31, 20X2, and the amount of royalties applicable thereto, under the license agreement referred to above.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Corporation and ABC Company and is not intended to be and should not be used by anyone other than these specified parties.

.06 Profit Participation

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company for the year ended December 31, 20X1, and have issued our report thereon dated March 10, 20X2. We have also audited XYZ Company's schedule of John Smith's profit participation for the year ended December 31, 20X1. This schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit of the schedule in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of profit participation is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

We have been informed that the documents that govern the determination of John Smith's profit participation are (*a*) the employment agreement between John Smith and XYZ Company dated February 1, 20X0, (*b*) the production and distribution agreement between XYZ Company and Television Network Incorporated dated March 1, 20X0, and (*c*) the studio facilities agreement between XYZ Company and QRX Studios dated April 1, 20X0, as amended November 1, 20X0.

In our opinion, the schedule of profit participation referred to above presents fairly, in all material respects, John Smith's participation in the profits of XYZ Company for the year ended December 31, 20X1, in accordance with the provisions of the agreements referred to above.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Company and John Smith and is not intended to be and should not be used by anyone other than these specified parties.

.07 Report on Federal and State Income Taxes in Financial Statements

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company, Inc., for the year ended June 30, 20XX, and have issued our report thereon dated August 15, 20XX. We have also audited the current and deferred provision for the Company's federal and state income taxes for the year ended June 30, 20XX, included in those financial statements, and the related asset and liability tax accounts as of June 30, 20XX. This income tax information is the responsibility of the Company's management. Our responsibility is to express an opinion on it based on our audit.

We conducted our audit of the income tax information in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the federal and state income tax accounts are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures related to the federal and state income tax accounts. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the federal and state income tax accounts. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the Company has paid or, in all material respects, made adequate provision in the financial statements referred to above for the payment of all federal and state income taxes and for related deferred income taxes that could be reasonably estimated at the time of our audit of the financial statements of XYZ Company, Inc., for the year ended June 30, 20XX.

.08 Proposed Acquisition

Independent Accountant's Report on Applying Agreed-Upon Procedures

To the Board of Directors and Management of X Company:

We have performed the procedures enumerated below, which were agreed to by the Board of Directors and Management of X Company, solely to assist you in connection with the proposed acquisition of Y Company as of December 31, 20XX. Y Company is responsible for its cash and accounts receivable records. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and the associated findings are as follows:

Cash

1. We obtained confirmation of the cash on deposit from the following banks, and we agreed the confirmed balance to the amount shown on the bank reconciliations maintained by Y Company. We mathematically checked the bank reconciliations and compared the resultant cash balances per book to the respective general ledger account balances.

Bank	*General Ledger Account Balances as of December 31, 20XX*
ABC National Bank	$ 5,000
DEF State Bank	3,776
XYZ Trust Company regular account	86,912
XYZ Trust Company payroll account	5,000
	$110,688

We found no exceptions as a result of the procedures.

Accounts Receivable

2. We added the individual customer account balances shown in an aged trial balance of accounts receivable (identified as exhibit A) and compared the resultant total with the balance in the general ledger account.

   We found no difference.

3. We compared the individual customer account balances shown in the aged trial balance of accounts receivable (exhibit A) as of December 31, 19XX, to the balances shown in the accounts receivable subsidiary ledger.

   We found no exceptions as a result of the comparisons.

4. We traced the aging (according to invoice dates) for 50 customer account balances shown in exhibit A to the details of outstanding invoices in the accounts receivable subsidiary ledger. The balances selected for tracing were determined by starting at the eighth item and selecting every fifteenth item thereafter.

   We found no exceptions in the aging of the amounts of the 50 customer account balances selected. The sample size traced was 9.8 percent of the aggregate amount of the customer account balances.

5. We mailed confirmations directly to the customers representing the 150 largest customer account balances selected from the accounts receivable trial balance, and we received responses as indicated below. We also traced the items constituting the outstanding customer account balance to invoices and supporting shipping documents for customers from which there was no reply. As agreed, any individual differences in a customer account balance of less than $300 were to be considered minor, and no further procedures were performed.

   Of the 150 customer balances confirmed, we received responses from 140 customers; 10 customers did not reply. No exceptions were identified in 120 of the confirmations received. The differences disclosed in the remaining 20 confirmation replies were either minor in amount (as defined above) or were reconciled to the customer account balance without proposed adjustment thereto. A summary of the confirmation results according to the respective aging categories is as follows.

	Accounts Receivable December 31, 20XX		
Aging Categories	*Customer Account Balances*	*Confirmations Requested*	*Confirmations Received*
Current	$156,000	$ 76,000	$ 65,000
Past due:			
Less than one month	60,000	30,000	19,000
One to three months	36,000	18,000	10,000
Over three months	48,000	48,000	8,000
	$300,000	$172,000	$102,000

We were not engaged to and did not conduct an audit, the objective of which would be the expression of an opinion on cash and accounts receivable. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the board of directors and management of X Company and is not intended to be and should not be used by anyone other than these specified parties.

.09 Claims of Creditors

Independent Accountant's Report on Applying Agreed-Upon Procedures

To the Trustee of XYZ Company:

We have performed the procedures described below, which were agreed to by the Trustee of XYZ Company, with respect to the claims of creditors solely to assist you in determining the validity of claims of XYZ Company as of May 31, 20XX, as set forth in the accompanying Schedule A. XYZ Company is responsible for maintaining records of claims submitted by creditors of XYZ Company. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the party specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and associated findings are as follows:

1. Compare the total of the trial balance of accounts payable at May 31, 20XX, prepared by XYZ Company, to the balance in the related general ledger account.

   The total of the accounts payable trial balance agreed with the balance in the related general ledger account.

2. Compare the amounts for claims received from creditors (as shown in claim documents provided by XYZ Company) to the respective amounts shown in the trial balance of accounts payable. Using the data included in the claims documents and in XYZ Company's accounts payable detail records, reconcile any differences found to the accounts payable trial balance.

   All differences noted are presented in column 3 of Schedule A. Except for those amounts shown in column 4 of Schedule A, all such differences were reconciled.

3. Obtain the documentation submitted by creditors in support of the amounts claimed and compare it to the following documentation in XYZ Company's files: invoices, receiving reports, and other evidence of receipt of goods or services.

   No exceptions were found as a result of these comparisons.

   We were not engaged to and did not conduct an audit, the objective of which would be the expression of an opinion on the claims of creditors set forth in the accompanying Schedule A. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

   This report is intended solely for the information and use of the Trustee of XYZ Company and is not intended to be and should not be used by anyone other than this specified party.

.10 Reporting on the Subject Matter

Independent Accountants Report
on Attest Engagements on Financial Information[1]
Included in XBRL Instance Documents

We have examined the accompanying XBRL Instance Document of XYZ Company, which reflects the data presented in the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended [*optional to include the location of the financial statements, such as "included in the Company's Form 10-K for the year ended December 31, 20XX"*]. XYZ Company's management is responsible for the XBRL Instance Document. Our responsibility is to express an opinion based on our examination.

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended, and in our report dated [*Month*] XX, 20XX, we expressed an unqualified opinion on those financial statements.[2] [3]

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the XBRL Instance Document and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, the XBRL Instance Document of XYZ Company referred to above accurately reflects, in all material respects, the data presented in the financial statements in conformity with [*identify the criteria—for example, specific XBRL taxonomy, such as the "XBRL U.S. Consumer and Industrial Taxonomy," and where applicable, the company extension taxonomy, such as "XYZ Company's extension taxonomy," and the XBRL International Technical Specifications 2.0*].

---

[1] Financial information includes data presented in audited or reviewed financial statements or other financial information (for example, Management Discussion and Analysis).

[2] If the financial statements have been reviewed, the sentence would read: "We have also reviewed, in accordance with [*standards established by the American Institute of Certified Public Accountants*] [*Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants*], the financial statements of XYZ Company as of March 31, 20XX, and for the three months then ended, the objective of which was the expression of limited assurance on such financial statements, and issued our report thereon dated [*Month*] XX, 20XX, [*describe any modifications of such report*]."

If the financial information has not been audited or reviewed, no reference to a report is required. The sentence would read: "We were not engaged to and did not conduct an audit or review of the [*identify information*], the objectives of which would have been the expression of an opinion or limited assurance on such [*identify information*]. Accordingly, we do not express an opinion or any other assurance on [*it*] [*them*]."

[3] If the audit opinion on the related financial statements is other than unqualified, the practitioner should disclose that fact, and any substantive reasons therefore.

.11 Reporting on Management's Assertions

Independent Accountants Report on
Attest Engagements on Financial Information[4]
Included in XBRL Instance Documents

We have examined management's assertion that [*identify the assertion—for example, the accompanying XBRL Instance Document accurately reflects the data presented in the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended in conformity with (identify the criteria—for example, specific XBRL taxonomy, such as the "XBRL U.S. Consumer and Industrial Taxonomy," and where applicable, the company extension taxonomy, such as "XYZ Company's extension taxonomy," and the XBRL International Technical Specifications 2.0)*]. XYZ Company's management is responsible for the assertion. Our responsibility is to express an opinion on the assertion based on our examination.

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended, and in our report dated [*Month*] XX, 20XX, we expressed an unqualified opinion on those financial statements.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the XBRL Instance Document and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, management's assertion referred to above is fairly stated, in all material respects, in conformity with [*identify the criteria—for example, specific XBRL taxonomy, such as the "XBRL U.S. Consumer and Industrial Taxonomy," and where applicable, the company extension taxonomy, such as "XYZ Company's extension taxonomy," and the XBRL International Technical Specifications 2.0*].

[4] Financial information includes data presented in audited or reviewed financial statements or other financial information (for example, Management Discussion and Analysis).

.12 Compliance With Contractual Provisions (Separate Report)

Independent Auditor's Report

We have audited, in accordance with auditing standards generally accepted in the United States of America, the balance sheet of XYZ Company as of December 31, 20X2, and the related statement of income, retained earnings, and cash flows for the year then ended, and have issued our report thereon dated February 16, 20X3.

In connection with our audit, nothing came to our attention that caused us to believe that the Company failed to comply with the terms, covenants, provisions, or conditions of sections XX to XX, inclusive, of the Indenture dated July 21, 20X0, with ABC Bank insofar as they relate to accounting matters. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance.

This report is intended solely for the information and use of the boards of directors and management of XYZ Company and ABC Bank and is not intended to be and should not be used by anyone other than these specified parties.

[Source: AU section 623 paragraph .21]

Note: When this report is included in the auditor's standard report accompanying financial statements, the last two paragraphs are examples of the paragraphs that should follow the opinion paragraph of the auditor's report on the financial statements.

.13 Report on Financial Statements Prepared Pursuant to Loan Agreements That Results in a Presentation Not in Conformity With Generally Accepted Accounting Principles or an Other Comprehensive Basis of Accounting

Independent Auditor's Report

Addressee:

We have audited the special-purpose statement of assets and liabilities of ABC Company as of December 31, 20X2 and 20X1, and the related special-purpose statements of revenues and expenses and of cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of complying with Section 4 of a loan agreement between DEF Bank and the Company as discussed in Note X, and are not intended to be a presentation in conformity with generally accepted accounting principles.

In our opinion, the special-purpose financial statements referred to above present fairly, in all material respects, the assets and liabilities of ABC Company at December 31, 20X2 and 20X1, and the revenues, expenses and cash flows for the years then ended, on the basis of accounting described in Note X.

This report is intended solely for the information and use of the boards of directors and management of ABC Company and DEF Bank and is not intended to be and should not be used by anyone other than these specified parties.

.14 Report on a Schedule of Gross Income and Certain Expenses to Meet Regulatory Requirements and to be Included in a Document Distributed to the General Public

Independent Auditor's Report

Addressee:

We have audited the accompanying Historical Summaries of Gross Income and Direct Operating Expenses of ABC Apartments, City, State (Historical Summaries), for each of the three years in the period ended December 31, 20XX. These Historical Summaries are the responsibility of the Apartments' management. Our responsibility is to express an opinion on the Historical Summaries based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Historical Summaries are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Historical Summaries. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Historical Summaries. We believe that our audits provide a reasonable basis for our opinion.

The accompanying Historical Summaries were prepared for the purpose of complying with the rules and regulations of the Securities and Exchange Commission (for inclusion in the registration statement on Form S-11 of DEF Corporation) as described in Note X and are not intended to be a complete presentation of the Apartments' revenues and expenses.

In our opinion, the Historical Summaries referred to above present fairly, in all material respects, the gross income and direct operating expenses described in Note X of ABC Apartments for each of the three years in the period ended December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

.15 Report on a Statement of Assets Sold and Liabilities Transferred to Comply With a Contractual Agreement

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets sold of ABC Company as of June 8, 20XX. This statement of net assets sold is the responsibility of ABC Company's management. Our responsibility is to express an opinion on the statement of net assets sold based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of net assets sold is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the statement of net assets sold. We believe that our audit provides a reasonable basis for our opinion.

The accompanying statement was prepared to present the net assets of ABC Company sold to XYZ Corporation pursuant to the purchase agreement described in Note X, and is not intended to be a complete presentation of ABC Company's assets and liabilities.

In our opinion, the accompanying statement of net assets sold presents fairly, in all material respects, the net assets of ABC Company as of June 8, 20XX sold pursuant to the purchase agreement referred to in Note X, in conformity with accounting principles generally accepted in the United States of America.

This report is intended solely for the information and use of the boards of directors and managements of ABC Company and XYZ Corporation and is not intended to be and should not be used by anyone other than these specified parties.

[Source: AU section 623 paragraph .26]

.16 Report on the Application of Accounting Principles

Introduction

We have been engaged to report on the appropriate application of accounting principles generally accepted in [*country of origin of such principles*] to the specific transaction described below. This report is being issued to ABC Company for assistance in evaluating accounting principles for the described specific transaction. Our engagement has been conducted in accordance with standards established by the American Institute of Certified Public Accountants.

Description of Transaction

The facts, circumstances, and assumptions relevant to the specific transaction as provided to us by the management of ABC Company are as follows:

Appropriate Accounting Principles

[*Text discussing generally accepted accounting principles*]

Concluding Comments

The ultimate responsibility for the decision on the appropriate application of accounting principles generally accepted in [*country of origin of such principles*] for an actual transaction rests with the preparers of financial statements, who should consult with their continuing accountant. Our judgment on the appropriate application of accounting principles generally accepted in [*country of origin of such principles*] for the described specific transaction is based solely on the facts provided to us as described above; should these facts and circumstances differ, our conclusion may change.

Restricted Use

This report is intended solely for the information and use of the board of directors and management of ABC Company and is not intended to be and should not be used by anyone other than these specified parties.

[Source: AU section 625 paragraph .11, *Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1)]

Notes: This illustrative report is intended for a reporting accountant either in connection with a proposal to obtain a new client or otherwise, should apply when preparing a written report on (1) The application of accounting principles to specified transactions, either completed or proposed, involving facts and circumstances of a specific entity ("specific transactions"), or (2) The type of opinion that may be rendered on a specific entity's financial statements.

[Source: AU section 625 paragraph .03]

Because of the nature of a transaction not involving facts or circumstances of a specific entity ("hypothetical transaction"), a reporting accountant cannot know, for example, whether the continuing accountant has reached a different conclusion on the application of accounting principles for the same or similar transaction, or how the specific entity has accounted for similar transactions in the past. Therefore an accountant should not undertake an engagement to provide a written report on the application of accounting principles to a hypothetical transaction.

[Source: AU section 625 paragraph .04]

.17 Report on Financial Statements Presented in Conformity With a Prescribed Basis of Accounting (Property and Liability Insurance Company)

Independent Auditor's Report

To the Board of Directors
ABC Property and Liability Company

We have audited the accompanying statutory statements of admitted assets, liabilities, and surplus of ABC Property and Liability Company as of December 31, 20X2 and 20X1, and the related statutory statements of income and changes in surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America.[5] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described more fully in Note X to the financial statements, the Company prepared these financial statements using accounting practices prescribed or permitted by the Insurance Department of the State of [*State of domicile*], which practices differ from generally accepted accounting principles. The effects on the financial statements of the variances between statutory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

In our opinion, because of the effects of the matter discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of ABC Property and Liability Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows[6] for the years then ended.

In our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and surplus of ABC Property and Liability Company as of December 31, 20X2 and 20X1,

---

[5] For audits conducted in accordance with PCAOB standards, PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), replaces this sentence with the following sentence: "We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States)." On May 14, 2004, the SEC issued an interpretive release to help with the implementation of PCAOB Auditing Standard No. 1. See Release No. 33-8422 for more information. The release specifies that effective May 24, 2004, references in SEC rules and staff guidance and in federal securities laws to GAAS or to specific standards under GAAS, as they relate to issuers, should be understood to mean the standards of the PCAOB, plus any applicable rules of the SEC. The staff of the PCAOB published a series of questions and answers (Q&A) on PCAOB Auditing Standard No. 1. See the PCAOB Web site at www.pcaobus.org for more information.

In June 2004, the Auditing Standards Board (ASB) issued Interpretation No. 18 in AU section 9508, "Reference to PCAOB Standards in an Audit Report of a Nonissuer" (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .89–.92), which provides reporting guidance for audits of nonissuers. Interpretation No. 18 provides guidance on the appropriate referencing of PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance with both GAAS and PCAOB auditing standards. The ASB also has undertaken a project to determine what amendments, if any, should be made to AU section 508. See the AICPA Web site at www.aicpa.org/members/div/auditstd/index.htm for more information.

This optional wording may be added in accordance with Interpretation No. 17 in AU section 9508, "Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards" (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .85–.88), which was issued by the ASB in June 2004 and provides reporting guidance for audits of nonissuers. Auditing Interpretation No. 17 addresses how auditors may expand their independent audit report to explain that their consideration of internal control was sufficient to provide the auditor sufficient understanding to plan the audit and determine the nature, timing and extent of tests to be performed, but was not sufficient to express an opinion on the effectiveness of the internal control. If this optional language is added, then the remainder of the paragraph should read as follows:

> An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

[6] Reference to cash flows would not be needed if the entity, under generally accepted accounting principles, is not required to present a statement of cash flows.

and the results of its operations and its cash flows for the years then ended, on the basis of accounting described in Note X.

Unaudited Financial Statements of a Public Entity

.01 Disclaimer

(When an accountant is associated with the financial statements but has not audited or reviewed such statements)

Addressee:

The accompanying balance sheet of X Company as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: AU section 504 paragraph .05, *Association With Financial Statements* (AICPA, *Professional Standards*, vol. 1)]

Notes: The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2610 and 2620.

.02 Current Period Financial Statements Unaudited—Prior Period Financial Statements Audited

Addressee:

The accompanying balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

The financial statements for the year ended December 31, 20X1, were audited by us (other accountants) and we (they) expressed an unqualified opinion on them in our (their) report dated March 1, 20X2, but we (they) have not performed any auditing procedures since that date.

[*Date*]

[Source: AU section 504 paragraphs .05 and .16]

Notes: The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2610 and 2620.

.03 Disclaimer—Cash Basis Statements

(When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles)

Addressee:

The accompanying statement of assets and liabilities resulting from cash transactions of XYZ Corporation as of December 31, 19X1, and the related statement of revenues collected and expenses paid during the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: AU section 504 paragraph .07]

Notes: A note to the financial statements should describe how the basis of presentation differs from generally accepted accounting principles, but the monetary effect of such differences need not be stated.

The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2610 and 2620.

.04 Disclaimer—Regulatory (Statutory) Basis Statements

(When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles)

Addressee:

The accompanying statement of admitted assets, liabilities, and surplus—statutory basis of XYZ Insurance Company as of December 31, 20XX, and the related statements of income—statutory basis, cash flows—statutory basis, and changes in surplus—statutory basis for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: AU section 504 paragraph .07]

Notes: A note to the financial statements should describe how the basis of presentation differs from generally accepted accounting principles, but the monetary effect of such differences need not be stated.

The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2610 and 2620.

[*The next page is 9621.*]

AAM Section 9280

Lack of Independence

.01 Disclaimer

Addressee:

We are not independent with respect to XYZ Company, and the accompanying balance sheet as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: AU section 504 paragraph .10, *Association With Financial Statements* (AICPA, *Professional Standards*, vol. 1)]

Notes: When an accountant is not independent, any procedures he or she might perform would not be in accordance with generally accepted auditing standards and he or she would be precluded from expressing an opinion on the financial statements. Accordingly, he or she should disclaim an opinion with respect to the financial statements and state specifically that he or she is not independent. The accountant should not include in his or her disclaimer the reasons for the lack of independence or any description of the procedures he or she has performed; including such matters might confuse readers concerning the importance of the lack of independence.

If the financial statements are those of a nonpublic entity, the accountant must consider the guidance in Statements on Standards for Accounting and Review Services (SSARS). (See AAM section 2610 paragraph .03.)

[*The next page is 9671.*]

AAM Section 9300

Review of Interim Financial Information

.01 Independent Accountant's Report

Independent Accountant's Report

Addressee:

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of ABC Company and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended. This (These) interim financial information (statements) is (are) the responsibility of the company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AU section 722 paragraph .38, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1)]

Note: AU section 722 provides guidance on the nature, timing, and extent of the procedures to be performed by an independent accountant when conducting a review of interim financial information, as that term is defined in AU section 722 paragraph .02.

[*The next page is 9701.*]

AAM Section 9400

Accountants' Reports on Condensed Financial Statements and Selected Financial Data

.01 Unqualified Opinion on Condensed Financial Statements

Independent Auditor's Report

Addressee:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

[*Signature*]

[*Date*]

[Source: AU section 552 paragraph .06, *Reporting on Condensed Financial Statements and Selected Financial Data* (AICPA, *Professional Standards*, vol. 1)]

.02 Adverse Opinion on Condensed Financial Statements Due to Inadequate Disclosure

Independent Auditor's Report

Addressee:

We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related earnings, and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The condensed consolidated balance sheet as of December 31, 20X0, and the related condensed statements of income, retained earnings, and cash flows for the year then ended, presented on pages xx-xx, are presented as a summary and therefore do not include all of the disclosures required by accounting principles generally accepted in the United States of America.

In our opinion, because of the significance of the omission of the information referred to in the preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company and subsidiaries as of December 31, 20X0, or the results of its operations or its cash flows for the year then ended.

[*Signature*]

[*Date*]

[Source: AU section 552 paragraph .07]

.03 Review Report on Condensed Financial Statements

Independent Auditor's Report

Addressee:

We have reviewed the condensed consolidated balance sheet of ABC Company and subsidiaries as of March 31, 20X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0. These financial statements are the responsibility of the company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of ABC Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 20X0, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

[*Signature*]

[*Date*]

[Source: AU section 722 paragraph .39, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1)]

Note: This is an illustrative review report on a condensed balance sheet as of March 31, 20X1, and the related condensed statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0, and a condensed balance sheet derived from audited financial statements as of December 31, 20X0, included in Form 10-Q.

.02 Audit Report—Statement of Financial Condition Only

Independent Auditor's Report

Addressee:

I (We) have audited the statement of financial condition of James and Jane Person as of [*date*]. This financial statement is the responsibility of James and Jane Person. My (our) responsibility is to express an opinion on this financial statement based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting amounts and disclosures in the statements of financial condition. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall presentation of the statement of financial condition. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

In my (our) opinion, the financial statement referred to above presents fairly, in all material respects, the financial condition of James and Jane Person as of [*date*] in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.21]

.03 Audit Report—Departure From GAAP—Inappropriate Valuation Methods—Adverse Opinion

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As discussed in Note X to the financial statements, assets amounting to $XX,XXX (XX percent of total assets) as of [*date*] have been valued at estimated current value as determined by James Person. I (We) have reviewed the procedures applied by James Person in valuing the assets and have inspected the underlying documentation. In my (our) opinion those procedures are not appropriate to determine the estimated current values of the assets in conformity with generally accepted accounting principles. The effects on the financial statements of not applying appropriate procedures to determine the estimated current values of the assets are not reasonably determinable.

In my (our) opinion, because of the effects of the matters discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial condition of James and Jane Person as of [*date*], or the changes in their net worth for the [*period*] then ended.

.04 Audit Report—Departure From GAAP—Inappropriate Valuation Methods—Qualified Opinion

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As discussed in Note X to the financial statements, assets amounting to $XX,XXX (XX percent of total assets) as of [*date*] have been valued at estimated current value as determined by James Person. I (We) have reviewed the procedures applied by James Person in valuing the assets and have inspected the underlying documentation. In my (our) opinion, these procedures are not appropriate to determine the estimated current values of the assets in conformity with generally accepted accounting principles. The effects on the financial statements of not applying appropriate procedures to determine the estimated current values of the assets are not reasonably determinable.

In my (our) opinion, except for the effects of the valuation of assets determined by James Person as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial condition of James and Jane Person as of [*date*], and the changes in their net worth for the [*period*] then ended in conformity with accounting principles generally accepted in the United States of America.

.05 Audit Report—Disclaim Opinion Because of Scope Limitation—Inadequate Records

Independent Auditor's Report

Addressee:

I (We) were engaged to audit the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person.

James and Jane Person do not maintain accounting records sufficient to assure that all transactions are recorded. Accordingly, it was not practicable for me (us) to extend my (our) auditing procedures sufficiently to determine that all of their assets and liabilities and the changes in their net worth are recorded in the financial statements referred to above.

Since James and Jane Person do not maintain certain accounting records and supporting documentation and I was (we were) unable to apply adequate auditing procedures regarding the recording of transactions, the scope of my (our) work was not sufficient to enable me (us) to express, and I (we) do not express, an opinion on these financial statements.

.06 Audit Report—Scope Limitation—Inadequate Records

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

Except as discussed in the following paragraph, I (we) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

James and Jane Person do not maintain accounting records sufficient to assure that all transactions are recorded. Accordingly, it was not practicable for me (us) to extend my (our) auditing procedures sufficiently to determine that all of their assets and liabilities and the changes in their net worth are recorded in the financial statements referred to above.

In my (our) opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had I (we) been able to determine that all assets and liabilities and changes in net worth were recorded in the financial statements, the financial statements referred to above present fairly, in all material respects, the financial condition of James and Jane Person as of [*date*], and the changes in their net worth for the [*period*] then ended in conformity with accounting principles generally accepted in the United States of America.

[*Signature*]

[*Date*]

.07 Audit Report—Income Tax Basis

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of assets and liabilities—income tax basis of James and Jane Person as of [*date*], and the related statement of changes in net worth—income tax basis for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As described in Note X, these financial statements were prepared on the basis of accounting James and Jane Person use for income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In my (our) opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities of James and Jane Person as of [*date*], and the changes in their net worth for the [*period*] then ended on the basis of accounting described in Note X.

.08 Accountant's Standard Compilation Report

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.04]

.09 Compilation Report—Statement of Financial Condition Only

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying statement of financial condition and, accordingly, do not express an opinion or any other form of assurance on it.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.21]

.10 Compilation Report—Omission of Substantially All Disclosures

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

James and Jane Person have elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the financial condition of James and Jane Person and changes in their net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.05]

Note: When personal financial statements omit substantially all disclosures and do not disclose that the assets are presented at their estimated current values and that the liabilities are presented at their estimated current amounts, the accountant should include the following sentence at the end of the first paragraph of his or her report:

> The financial statements are intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.06]

.11 Compilation Report—GAAP Departure—Material Assets at Cost

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that assets be presented at their estimated current values and that liabilities be presented at their estimated current amounts. James and Jane Person have informed me (us) that their investment in ABC Company is stated in the accompanying financial statements at cost and that the effects of this departure from generally accepted accounting principles on their financial condition and the changes in their net worth have not been determined.

.12 Compilation Report—Income Tax Basis

Addressee:

I (We) have compiled the accompanying statement of assets and liabilities—income tax basis of James and Jane Person as of [*date*], and the related statement of changes in net assets—income tax basis for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.20]

.13 Compilation Report—Financial Statements Included in a Prescribed Form

Addressee:

I (We) have compiled the [*identification of financial statements, including period covered and name of individual(s)*] included in the accompanying prescribed form, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form prescribed by [*name of body*] information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of [name of body], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.09]

.14 Accountant's Standard Review Report

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James and Jane Person.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.11]

.15 Review Report—Statement of Financial Condition Only

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James and Jane Person as of [*date*], in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in this financial statement is the representation of James and Jane Person.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying statement of financial condition in order for it to be in conformity with generally accepted accounting principles.

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.21]

.16 Review Report—GAAP Departure—Failure to Include a Provision for Estimated Income Taxes on the Differences Between the Estimated Current Values of Assets and the Estimated Current Amounts of Liabilities and Their Tax Bases

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James Person.

A review of personal financial statements consists principally of inquiries of the individual whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

Generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases. The accompanying financial statements do not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, updated as of May 1, 2007, paragraph 5.13]

.17 Review Report—Historical Cost Basis

Addressee:

I (We) have reviewed the accompanying statement of assets and liabilities—historical cost basis of James and Jane Person as of [*date*], and the related statement of changes in net worth—historical cost basis for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James and Jane Person.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the historical cost basis of accounting described in Note X.

AAM Section 9600

Reports on Employee Benefit Plans

Practice Tip
Audits of 11-K Filers—Performance and Reporting Requirements

SEC Requirements

The Securities and Exchange Commission (SEC) requires employee stock purchase, savings and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to Section 15(d) of the Securities Exchange Act of 1934. Reports on Form 11-K must be filed with the SEC within 90 days after the end of the fiscal year of the plan, provided that plans subject to the Employee Retirement Income Security Act of 1974 (ERISA) file the plan financial statements within 180 days after the plan's fiscal year end.

Applicable Audit Standards

Plans that are required to file Form 11-Ks are deemed to be *issuers* under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the Public Company Accounting Oversight Board (PCAOB).

Performance and Reporting Requirements

Based on AICPA staff discussions with the SEC and PCAOB staff to seek clarification of the performance and reporting requirements for audits of 11-K filers, firms will need to conduct their audits of these 11-K plans in accordance with two sets of standards and prepare two separate audit reports; an audit report referencing PCAOB standards for Form 11-K filings with the SEC and a separate audit report referencing generally accepted auditing standards (GAAS) for Department of Labor (DOL) filings. The PCAOB and SEC staff believe that an opinion issued in accordance with PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), does not allow a reference to GAAS, hence a "dual" standard report is not appropriate and will not be accepted by the SEC.

Any questions regarding performance and reporting requirements of audits of financial statements of Form 11-K filers should be directed to the SEC Division of Corporation Finance, Office of the Chief Accountant at (202) 942-2960.

.01 Unqualified Opinion—Defined Benefit Plan Assuming End-of-Year Benefit Information Date

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits and of accumulated plan benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*][1] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan as of December 31, 20X2 and 20X1, and the changes in its financial status for the year ended December 31, 20X2 in conformity with accounting principles generally accepted in the United States of America.

[*Signature of Firm*]

[*City and State*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, updated as of March 1, 2008, paragraph 13.04]

Note: Department of Labor Regulations section 2520.103-1 requires the accountant's report to be dated, manually signed, indicate the city and state where issued and identify the financial statements and schedules covered by the report.

[1] This optional language may be added to the auditor's standard report to clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the Sarbanes-Oxley Act is applicable. If this optional language is added then the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion."

See Auditing Interpretation No. 17, "Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards," of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .85–.88).

.02 Unqualified Opinion—Defined Benefit Plan Assuming Beginning-of-Year Benefit Information Date

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits for the years then ended and the statement of accumulated plan benefits as of December 31, 20X1, and the related statement of changes in accumulated plan benefits for the year then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*][2] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 20X2, and changes therein for the year then ended and its financial status as of December 31, 20X1, and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America.

---

[2] This optional language may be added to the auditor's standard report to clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the Sarbanes-Oxley Act is applicable. If this optional language is added then the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion."

See Auditing Interpretation No. 17 of AU section 508.

.03 Unqualified Opinion—Defined Contribution Profit-Sharing Plan

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of ABC Company Profit-Sharing Plan as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*][3] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 20X2 and 20X1, and the changes in net assets available for benefits for the year ended December 31, 20X2 in conformity with accounting principles generally accepted in the United States of America.

[3] This optional language may be added to the auditor's standard report to clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the Sarbanes-Oxley Act is applicable. If this optional language is added then the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion."

See Auditing Interpretation No. 17 of AU section 508.

.04 Unqualified Opinion—Employee Health and Welfare Benefit Plans

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits and of plan benefit obligations of Allied Industries Health Care Benefit Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in benefit obligations for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*][4] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan as of December 31, 20X2 and 20X1, and the changes in financial status for the year ended December 31, 20X2 in conformity with accounting principles generally accepted in the United States of America.

See Auditing Interpretation No. 17 of AU section 508.

.05 Unqualified Opinion—Supplemental Schedules Required by ERISA and DOL Regulations

Independent Auditor's Report

Addressee:

Our audits were performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedules of (*identify title of schedules and period covered*) are presented for the purpose of additional analysis and are not a required part of the basic financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[*Signature of Firm*]

[*City and State*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, updated as of March 1, 2008, paragraph 13.11]

Notes: This paragraph can be shown separately in the auditor-submitted document or as a separate paragraph, after the opinion paragraph, of the auditor's standard report, when the auditor's report covers additional information and the auditor has applied auditing procedures and is expressing an opinion on the additional information.

Examples of paragraphs that should be added to the standard auditor's report when the report on the supplemental schedules is modified because of omitted information or an omitted schedule required by DOL regulations are presented in paragraphs .07–.08 and .18.

.06 Unqualified Opinion—Defined Benefit Pension Plan Prepared on the Modified Cash Basis

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits (modified cash basis) of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits (modified cash basis) for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*][5] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements and supplemental schedules were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits and the accumulated plan benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the changes in net assets available for benefits and changes in accumulated plan benefits for the year ended December 20X2, on the basis of accounting described in Note X.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules (modified cash basis) of (1) Schedule H, line 4i—Schedule of Assets (Held at End of Year), (2) Schedule G, Part I—Schedule of Loans or Fixed Income Obligations in Default or Classified as Uncollectible, (3) Schedule G, Part II—Schedule of Leases in Default or Classified as Uncollectible, (4) Schedule H, line 4j—Schedule of Reportable Transactions, and (5) Schedule G, Part III—Schedule of Nonexempt Transactions as of or for the year ended December 31, 20X2, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[5] This optional language may be added to the auditor's standard report to clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the Sarbanes-Oxley Act is applicable. If this optional language is added then the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion."

See Auditing Interpretation No. 17 of AU section 508.

[Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, updated as of March 1, 2008, paragraph 13.22]

Note: When reporting on financial statements prepared in conformity with a basis of accounting other than generally accepted accounting principles (OCBOA), the auditor should consider whether the financial statements and notes thereto include all informative disclosures that are appropriate for the basis of accounting used. Auditing Interpretation No. 14, "Evaluating the Adequacy of Disclosure and Presentation in Financial Statements Prepared in Conformity With an Other Comprehensive Basis of Accounting (OCBOA)" of AU section 623, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 9623 par. .90–.95), states that if cash, modified cash, or income tax basis financial statements contain elements, accounts, or items for which GAAP would require disclosure, the statements should either provide the relevant disclosure that would be required for those items in a GAAP presentation or provide information that communicates the substance of that disclosure. That may result in substituting qualitative information for some of the quantitative information required for GAAP presentations. Regardless of the basis of accounting used (GAAP or OCBOA), accumulated plan benefits disclosures should be made. If such disclosures are not made, the auditor should comment in his or her report on the lack of such disclosures and should express a qualified or adverse opinion on the financial statements. [Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, updated as of March 1, 2008, paragraph 13.23]

.07 Modified Report—Omitted Information or Omitted Schedule Required Under DOL Regulations

Following are examples of paragraphs that have been added to the auditor's report when the auditor modifies his or her report on the supplemental schedules because of omitted information or an omitted schedule which is required under DOL regulations.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See paragraphs .01–.03.]

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [*identify title of schedules and period covered*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2 that accompanies the Plan's financial statements does not disclose the historical cost of certain nonparticipant directed plan assets held by the Plan trustee [or custodian]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

or

The Plan has not presented the supplemental Schedule H, line 4j—Schedule of Reportable Transactions for the year ended December 31, 20X2. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.08 Qualified Opinion—Omitted or Incomplete Schedule or Material Inconsistency

The following are examples of paragraphs that have been added to the auditor's report when the auditor qualifies his or her opinion on the supplemental schedules because a schedule, or information thereon, was omitted (when the schedules are not covered by a trustee's certification as to completeness and accuracy), or because information in a required schedule is materially inconsistent with the financial statements.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See paragraphs .01–.03.]

The supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2 that accompanies the Plan's financial statements does not disclose that the Plan had loans to participants which are considered assets held for investment purposes. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [*identify title of schedules and period covered*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.12 Qualified Opinion—Disclosure of Material Prohibited Transaction With Party in Interest Omitted—Related-Party Transaction

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets available for benefits of XYZ Company Profit-Sharing Plan as of December 31, 20X1 and 20X0, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X1. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Plan's financial statements do not disclose that the Plan [*describe related-party transaction*]. Disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 20X1 and 20X0, and the changes in net assets available for benefits for the year ended December 31, 20X1 in conformity with accounting principles generally accepted in the United States of America.

The supplemental Schedule G, Part III—Schedule of Nonexempt Transactions that accompanies the plan's financial statements does not disclose that the plan [*describe prohibited transaction*]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [*identify title of schedules and period covered*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.13 Limited-Scope Audits Under DOL Regulations

Independent Auditor's Report

Addressee:

We were engaged to audit the financial statements and supplemental schedules of XYZ Pension Plan as of December 31, 20X1 and 20X0, and for the year ended December 31, 20X1, as listed in the accompanying index. These financial statements and supplemental schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee (or custodian) of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of December 31, 20X1 and 20X0 and for the year ended December 31, 20X1 that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules taken as a whole. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee or custodian, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Note: If the plan's financial statements are prepared on the cash basis or a modified cash basis of accounting, the auditor's report should also include a paragraph stating the basis of presentation and that cash basis is a comprehensive basis of accounting other than GAAP (see paragraph 13.21 of the AICPA Audit and Accounting Guide *Employee Benefit Plans,* for wording of such a paragraph). [Source: AICPA Audit and Accounting Guide *Employee Benefit Plans,* updated as of March 1, 2008, paragraph 13.26, footnote 6]

.14 Limited-Scope Audit in Prior Year

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the statements of accumulated plan benefits as of December 31, 20X2 and 20X1, and the related statement of changes in accumulated plan benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, investment assets held by ABC Bank, the trustee (or custodian) of the Plan, and transactions in those assets were excluded from the scope of our audit of the Plan's 20X1 financial statements, except for comparing the information provided by the trustee (or custodian), which is summarized in Note X, with the related information included in the financial statements.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the Plan's financial statements as of December 31, 20X1. The form and content of the information included in the 20X1 financial statements, other than that derived from the information certified by the trustee (or custodian), have been audited by us and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

In our opinion, the financial statements, referred to above, of XYZ Pension Plan as of December 31, 20X2, and for the year then ended present fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 20X2, and changes in its financial status for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit of the Plan's financial statements as of and for the year ended December 31, 20X2, was made for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of (1) Schedule H, line 4i—Schedule of Assets (Held at End of Year), (2) Schedule G, Part I—Schedule of Loans or Fixed Income Obligations in Default or Classified as Uncollectible, (3) Schedule G, Part II—Schedule of Leases in Default or Classified as Uncollectible, (4) Schedule H, line 4j—Schedule of Reportable Transactions, and (5) Schedule G, Part III—Nonexempt Transactions as of or for the year ended December 31, 20X2, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. The supplemental schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements for the year ended December 31, 20X2, and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.15 Limited-Scope Audit in Current Year

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying statement of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2 and the supplemental schedules of (1) Schedule H, line 4i—Schedule of Assets (Held at End of Year), (2) Schedule H, line 4j—Schedule of Reportable Transactions, and (3) Schedule G, Part I—Schedule of Loans or Fixed Income Obligations in Default or Classified as Uncollectible as of or for the year ended December 31, 20X2. These financial statements and supplemental schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee (or custodian) of the Plan, except for comparing the information with the related information included in the 20X2 financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of and for the year ended December 31, 20X2, that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Because of the significance of the information in the Plan's 20X2 financial statements that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules as of or for the year ended December 31, 20X2. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee (or custodian), have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

We have audited the statement of net assets available for benefits of XYZ Pension Plan as of December 31, 20X1 and, in our report dated May 20, 20X2, we expressed our opinion that such financial statement presents fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 20X1, in conformity with accounting principles generally accepted in the United States of America.

.16 Initial Limited-Scope Audit in Current Year, Prior Year Limited-Scope Audit Performed by Other Auditors

Report of Independent Certified Public Accountants

Addressee:

We were engaged to audit the accompanying statements of net assets available for benefits of ABC Company Profit-Sharing Plan (the "Plan") as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2 and the supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2. These financial statements and supplemental schedule are the responsibility of the Plan's management. The financial statements of the plan as of December 31, 20X1 were audited by other auditors. As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 ("ERISA"), the Plan administrator instructed the other auditors not to perform and they did not perform, any auditing procedures with respect to the information certified by the Trustee. Their report, dated May 20, 20X2, indicated that (*a*) because of the significance of the information that they did not audit, they were unable to, and did not, express an opinion on the financial statements taken as a whole and (*b*) the form and content of the information included in the financial statements other than that derived from the information certified by the Trustee, were presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in note E, which was certified by Bank & Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the 20X2 financial statements and supplemental schedule. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee as of and for the year ended December 31, 20X2, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information in the Plan's 20X2 financial statements and supplemental schedule that we did not audit, we are unable to, and do not, express an opinion on the accompanying 20X2 financial statements and supplemental schedule taken as a whole. The form and content of the information included in the 20X2 financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.17 Limited Scope Audit—Change in Trustee

Report of Independent Certified Public Accountants

Addressee:

We were engaged to audit the accompanying statements of net assets available for benefits and of accumulated plan benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2, and the supplemental schedules of (1) Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2, and (2) Schedule H, line 4j—Schedule of Reportable Transactions for the year ended December 31, 20X2. These financial statements and schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note X, which was certified by the ABC Bank and XYZ Trust Company, the trustees of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that XYZ Trust Company held the Plan's investment assets and executed investment transactions from July 1, 20X2 to December 31, 20X2, and that ABC Bank held the Plan's investment assets and executed investment transactions as of December 31, 20X1 and for the period January 1, 20X1 to June 30, 20X2. The plan administrator has obtained certifications from the trustees as of and for the years ended December 31, 20X2 and 20X1, that the information provided to the plan administrator by the trustees is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules taken as a whole. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the investment information certified by the trustees, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.18 Audit of Multiemployer Defined Benefit Pension Plan With Scope Limitation

Independent Auditor's Report

Addressee:

We were engaged to audit the statements of (*identify title of schedules and period covered*) of XYZ Multiemployer Pension Plan as of December 31, 20X2 and 20X1, and for the years then ended. These financial statements are the responsibility of the Plan's management.

The Plan's records and procedures are not adequate to assure the completeness of participants' data on which contributions and benefit payments are determined, and the Board of Trustees did not engage us to perform, and we did not perform, any other auditing procedures with respect to participants' data maintained by the sponsor companies or individual participants.

Because of the significance of the information that we did not audit, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets of ABC Pension Trust as of December 31, 20X2, and the related statement of changes in net assets and trust balance for the year then ended. These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets of ABC Pension Trust as of December 31, 20X2, and the changes in its net assets and trust balance for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying statements are those of ABC Pension Trust, which is established under XYZ Pension Plan; the statements do not purport to present the financial status of XYZ Pension Plan. The statements do not contain certain information on accumulated plan benefits and other disclosures necessary for fair presentation of the financial status of XYZ Pension Plan in conformity with accounting principles generally accepted in the United States of America. Furthermore, these statements do not purport to satisfy the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 relating to the financial statements of employee benefit plans.

.21 Defined Benefit Plan Assuming Inadequate Procedures to Value Investments

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1 and of accumulated plan benefits as of December 31, 20X2, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*][6] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note X, investments amounting to $______(______ percent of net assets available for benefits) as of December 31, 20X2, have been valued at estimated fair value as determined by the Board of Trustees. We have reviewed the procedures applied by the trustees in valuing the securities and have inspected the underlying documentation. In our opinion, those procedures are not adequate to determine the fair value of the investments in conformity with accounting principles generally accepted in the United States of America. The effect on the financial statements and supplemental schedules of not applying adequate procedures to determine the fair value of the securities is not determinable.

In our opinion, except for the effects of the procedures used by the Board of Trustees to determine the valuation of investments as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 20X2, and information regarding the plan's net assets available for benefits as of December 31, 20X1, and the changes in its financial status for the year ended in December 31, 20X2 in conformity with accounting principles generally accepted in the United States of America.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of (1) Schedule H, line 4i—Schedule of Assets (Held at End of Year), (2) Schedule G, Part I—Schedule of Loans or Fixed Income Obligations in Default or Classified as Uncollectible, (3) Schedule G, Part II—Schedule of Leases in Default or Classified as Uncollectible, (4) Schedule H, line 4j—Schedule of Reportable Transactions, and (5) Schedule G, Part III—Nonexempt Transactions as of or for the year ended December 31, 20X2, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan's management. That additional information has been subjected to the auditing procedures applied in the audit of the basic financial statements for the year ended December 31, 20X2; and in our opinion, except for the effects of the

---

[6] This optional language may be added to the auditor's standard report to clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the Sarbanes-Oxley Act is applicable. If this optional language is added then the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion."

See Auditing Interpretation No. 17 of AU section 508.

valuation of investments, as described above, the additional information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, updated as of March 1, 2008, paragraph 13.38]

.22 **Form 11-K Filing**

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the accompanying statements of net assets available for benefits of the ABC 401(k) plan (the "Plan") as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 20X2 and 20X1, and the changes in net assets available for benefits for the year ended December 31, 20X2 in conformity with U.S. generally accepted accounting principles.

[Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, updated as of March 1, 2008, paragraph 13.19]

Note: ***Reporting Considerations for Nonaccelerated Filer Audit Reports.*** In an audit of a nonaccelerated filer that has determined it is not required to obtain, nor did it request the auditor to perform, an audit of internal control over financial reporting (under Section 404(b) of the Sarbanes-Oxley Act of 2002 and Item 308(b) of SEC Regulation S-K), firms may wish to consider expanding their audit report to include a statement that the purpose and extent of the auditor's consideration of internal control over financial reporting were to determine that the nature, timing, and extent of tests to be performed are appropriate in the circumstances but were not sufficient to express an opinion on the effectiveness of internal control over financial reporting. Firms are not required to expand their audit report to include this statement. However, the SEC staff has indicated that if a firm chooses to expand its report to clarify this point, the language in Auditing Interpretation No. 18, "Reference to PCAOB Standards in an Audit Report on a Nonissuer," of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .89–.92), provides appropriate language to consider in an audit conducted in accordance with PCAOB standards. Accordingly, the scope section of the auditor's report might be modified as follows:

> We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. ***The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting.***

> ***Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion.*** An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As an alternative to the first additional sentence suggested by Auditing Interpretation 18 of AU section 508, a firm also might consider the following: A second alternative would be to use language from Auditing Interpretation No. 2, "Reports by Management on Internal Control Over Financial Reporting" of AU Section 550, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9550 par. .07–.11). Paragraph .10 of Auditing Interpretation No. 2 of AU section 550 states, "Although not required, the auditor may consider adding the following paragraph to the standard auditor's report:

> ***We were not engaged to examine management's assertion about the effectiveness of [name of entity's] internal control over financial reporting as of [date] included in the accompanying [title of manage-ment's report] and accordingly, we do not express an opinion thereon.***

[This information is from the Center for Audit Quality (CAQ)—CAQ Alert #2007-66—December 19, 2007.]

AAM Section 9650

Reports on Financial Statements of Brokers and Dealers in Securities

.01 Unqualified Opinion on Financial Statements and Supplementary Schedules Required by the SEC

Independent Auditor's Report

Addressee:

We have audited the accompanying [*consolidated*] statement of financial condition of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] (the Company) as of December 31, 20X7, and the related consolidated statements of income, changes in stockholders' equity, changes in liabilities subordinated to claims of general creditors, and cash flows for the year then ended that you are filing pursuant to rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America.[1] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [*Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.*][2] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the [*consolidated*] financial statements referred to above present fairly, in all material respects, the financial position of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] as of December 31, 20X7, and the results of its [their] operations and its [their] cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, III, and IV is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by rule 17a-5 under the Securities Exchange Act of 1934. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our

---

[1] In June 2004, the Auditing Standards Board (ASB) issued Auditing Interpretation No. 18, "Reference to PCAOB Standards in an Audit Report of a Nonissuer," of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .89–.92), which provides reporting guidance for audits of nonissuers. Auditing Interpretation No. 18 provides guidance on the appropriate referencing of PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance with both GAAS and PCAOB auditing standards.

[2] This optional wording may be added in accordance with Auditing Interpretation No. 17, "Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards," of AU section 508 (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .85–.88), which was issued by the ASB in June 2004 and provides reporting guidance for audits of nonissuers. Auditing Interpretation No. 17 addresses how auditors may expand their independent audit report to explain that their consideration of internal control was sufficient to provide the auditor sufficient understanding to plan the audit and determine the nature, timing, and extent of tests to be performed, but was not sufficient to express an opinion on the effectiveness of the internal control. If this optional language is added, then the remainder of the paragraph should read as follows:

> "An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion."

opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Notes:

SEC Regulation S-X section 210.2-02 (17 CFR 210.2–.02) requires the accountant's report to be dated, signed manually, indicate the city and state where issued, and identify without detailed enumeration the financial statements covered by the report.

AAM section 9250 paragraphs .15–.16 contain illustrative reports on internal control required by SEC Rule 17a-5.

[*] Paragraph .23 of AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), states that the auditor's report should be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements.

.02 Separate Report on Supplementary Schedules

Independent Auditor's Report on Supplementary Information
Required by Rule 17a-5 of the Securities and Exchange Commission

Addressee:

We have audited the accompanying [*consolidated*] financial statements of Standard Stockbrokerage Co., Inc. [*and Subsidiaries*] as of and for the year ended December 31, 20X7, and have issued our report thereon dated February 15, 20X8. Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, III, and IV is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by rule 17a-5 under the Securities Exchange Act of 1934. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

AAM Section 9700

Reports for Investment Companies

.01 Unqualified Opinion on the Financial Statements of a Registered Investment Company

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company, including the schedule of investments, as of December 31, 20X4, and the related statements of operations and cash flows[1] for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended.[2] These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 20X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 20X4, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Note: The reference to "and brokers" in the fourth sentence of the scope paragraph is not normally required if the investment company's financial statements do not show an amount payable for securities purchased. When broker confirmations are not received and alternative procedures are performed, the sentence may be modified to read "and brokers or by other appropriate auditing procedures

---

[1] FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Held for Resale*, amends FASB Statement No. 95, *Statement of Cash Flows*, to exempt highly liquid companies that meet specified conditions from the requirement to provide a statement of cash flows.

[2] In an open-end fund's registration statement, an auditor must opine on at least the most recent two of the five years of financial highlights presented in a registered investment company's annual report. In the fund's registration statement, the auditor must opine on all five years presented.

where replies from brokers were not received." Also, if securities were physically inspected or subject to other extended procedures for purposes of the audit, the report should be modified to state that those procedures were performed.

.02 Unqualified Opinion on the Financial Statements for a Multicolumnar Presentation of the Portfolios Constituting the Series

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of XYZ Series Investment Company comprising the Foreign, Domestic Common Stock, Long-Term Bond, and Convertible Preferred Portfolios as of December 31, 20X4, and the related statements of operations and cash flows[3] for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 20X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the portfolios constituting the XYZ Series Investment Company as of December 31, 20X4, the results of their operations and their cash flows for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

.03 Unqualified Opinion on the Financial Statements Presenting One of the Portfolios or Entities Constituting the Series

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of the Convertible Preferred Portfolio (one of the portfolios constituting the XYZ Series Investment Company [the Company]) as of December 31, 20X4, and the related statements of operations and cash flows[4] for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 20X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Convertible Preferred Portfolio of the XYZ Series Investment Company as of December 31, 20X4, and the results of its operations and cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

.04 Unqualified Opinion on the Financial Statements of a Nonregistered Investment Company

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company (the Company), including the schedule of investments, as of December 31, 20X4, and the related statements of operations, cash flows[5] and changes in net assets, and the financial highlights for the year then ended. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America.[6] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 20X4, the results of its operations, its cash flows, the changes in its net assets, and its financial highlights for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

[5] See footnote 1.

[6] AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), states that a basic element of the auditor's report is a statement that the audit was conducted in accordance with generally accepted auditing standards and an identification of the United States of America as the country of origin of those standards. Auditing Interpretation No. 14, "Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With International Standards on Auditing" of AU section 508 (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .56–.59) states that if the audit also was conducted in accordance with the International Standards on Auditing, in their entirety, the auditor may so indicate in the auditor's report. This can be done by modifying this sentence as follows (new language is shown in italics):

> We conducted our audit in accordance with auditing standards generally accepted in the United States of America *and in accordance with International Standards on Auditing*.

AAM Section 10,000
Quality Control

These sample quality control documents are presented for illustrative purposes only. They are intended as an aid for users of this manual who may want points of departure when establishing their own quality control policies and procedures. These illustrations are neither all inclusive nor are they prescribed minimums. Auditors and accountants must consider the guidance in professional standards and should rely on their individual professional judgment in determining what may be needed in individual circumstances.

TABLE OF CONTENTS

[*The next page is 10,101.*]

AAM Section 10,100

Quality Control—General

AICPA Requirements

.01 ET section 57 Article VI, *Scope and Nature of Services*, of the AICPA's "Principles of Professional Conduct" (AICPA, *Professional Standards*, vol. 2), states that "members should practice in firms that have in place internal quality-control procedures to ensure that services are competently delivered and adequately supervised." A firm must establish a system of quality control designed to provide the firm with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements and that the firm or engagement partners issue reports that are appropriate in the circumstances. A system of quality control consists of policies designed to achieve these objectives and the procedures necessary to implement and monitor compliance with those policies.

.02 The AICPA issues Statements on Quality Control Standards to establish standards and provide guidance to firms on establishing and maintaining a quality control system for their accounting and auditing practices. In October 2007, the AICPA issued Statement on Quality Control Standards (SQCS) No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, vol. 2, QC sec. 10). SQCS No. 7 is effective as of January 1, 2009, and supersedes all extant SQCSs.

.03 Presented in AAM section 10,200 is a *Practice Aid for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, updated for the issuance of SQCS No. 7. Following the practice aid in AAM section 10,300 are sample quality control forms to aid practitioners in implementing a quality control system.

[*The next page is 10,201.*]

AAM Section 10,200

Practice Aid for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice—Revised for the Issuance of Statement on Quality Control Standards No. 7, A Firm's System of Quality Control

NOTICE TO READERS

This AICPA Audit and Accounting Practice Aid updates *Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, which was issued in 2004. This practice aid is intended to help practitioners better understand and apply Statement on Quality Control Standards (SQCS) No. 7 issued by the AICPA. That standard is included in appendix A of this practice aid. This version of the practice aid, prepared by the Quality Control Standards Task Force, has been revised to incorporate new policies and procedures that a firm should consider including in its system of quality control to be responsive to the issuance of SQCS No. 7. The policies and procedures presented in this practice aid are illustrative, and firms are encouraged to consider them in designing and maintaining a system of quality control that is appropriate for their accounting and auditing practices. Some of the policies and procedures presented in this practice aid are not required by the SQCSs; however, they represent the views of the task force regarding best practices for a quality control system. Although this practice aid has been reviewed by the AICPA Audit and Attest Standards staff, it has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the AICPA and has no official or authoritative status.

The Sarbanes-Oxley Act of 2002 (Act) created the Public Company Accounting Oversight Board (PCAOB) and charged it with overseeing audits of issuers,[1] as defined by the act. Under the act, the PCAOB's duties include, among other things, establishing auditing, quality control, ethics, independence, and other standards relating to audits of issuers.

This practice aid does not address the quality control requirements of the act, nor does it address the quality control requirements of PCAOB standards that must be followed by auditors of issuers. Auditors of issuers should follow these other standards and make changes to their firm's quality control systems as necessary. Auditors of nonissuers who are engaged to report on audit engagements in accordance with PCAOB auditing standards also must report on those engagements in accordance with generally accepted auditing standards (GAAS). Auditing Interpretations No. 17, "Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards," and No. 18, "Reference to PCAOB Standards in an Audit Report on a Nonissuer" of AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508 par. .85–.88 and par. .89–.92, respectively), provide reporting guidance for audits of nonissuers when the auditor is asked to report in accordance with GAAS and PCAOB auditing standards.

Additional information about the PCAOB and the act can be obtained at the PCAOB Web site at www.pcaobus.org.

[1] Paragraph 7 of Section 2, "Definitions," of the Sarbanes-Oxley Act of 2002 states, "The term *issuer* means an issuer (as defined in section 3 of the Securities Exchange Act of 1934 [15 U.S.C. 78c]), the securities of which are registered under section 12 of that act [15 U.S.C. 78l], or that is required to file reports under section 15(d) [15 U.S.C. 78o(d)], or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 [15 U.S.C. 77a et seq.], and that it has not withdrawn."

Audit and Attest Standards

Chapter 1:

Overview of Statements on Quality Control Standards

1.01 The objectives of a system of quality control are to provide a CPA firm with reasonable assurance[1] that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the firm or engagement partners issue reports that are appropriate in the circumstances. SQCS No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, vol. 2, QC sec. 10), was issued by the Auditing Standards Board (ASB) of the AICPA in October 2007 and is effective for a firm's accounting and auditing practice as of January 1, 2009. This standard supersedes all previously issued SQCSs.

1.02 A system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those policies. The nature, extent, and formality of a firm's quality control policies and procedures will depend on various factors such as the firm's size; the number and operating characteristics of its offices; the degree of authority allowed to, and the knowledge and experience possessed by, firm personnel; and the nature and complexity of the firm's practice.

Communication of Quality Control Policies and Procedures

1.03 The firm should communicate its quality control policies and procedures to its personnel. Most firms will find it appropriate to communicate their policies and procedures in writing and distribute, or make available electronically, them to all professional personnel.

1.04 Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve.
- The message that each individual has a personal responsibility for quality.
- A requirement for each individual to be familiar with and to comply with these policies and procedures.

Effective communication also includes procedures for personnel to communicate their views or concerns on quality control matters to the firm's management.

Elements of a System of Quality Control

1.05 A firm's system of quality control should include policies and procedures that address each of the following elements of quality control identified in SQCS No. 7:

- Leadership responsibilities for quality within the firm (the "tone at the top")
- Relevant ethical requirements
- Acceptance and continuance of client relationships and specific engagements
- Human resources
- Engagement performance
- Monitoring

[1] The term *reasonable assurance*, which is defined as a high, but not absolute, level of assurance, is used because absolute assurance cannot be attained. Statement on Quality Control Standards (SQCS) No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, vol. 2, QC sec. 10), states, "Any system of quality control has inherent limitations that can reduce its effectiveness."

1.06 The elements of quality control are interrelated. For example, a firm continually assesses client relationships to comply with relevant ethical requirements, including independence, integrity, and objectivity, and policies and procedures related to the acceptance and continuance of client relationships and specific engagements. Similarly, the human resources element of quality control encompasses criteria related to professional development, hiring, advancement, and assignment of firm personnel to engagements, all of which affect policies and procedures related to engagement performance. In addition, policies and procedures related to the monitoring element of quality control enable a firm to evaluate whether its policies and procedures for each of the other five elements of quality control are suitably designed and effectively applied.

1.07 If a firm merges, acquires, sells, or otherwise changes a portion of its practice, the surviving firm evaluates and, as necessary, revises, implements, and maintains firm-wide quality control policies and procedures that are appropriate for the changed circumstances.

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

1.08 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. The firm should establish and maintain the following policies and procedures to satisfy this objective:

- Require the firm's leadership (managing partner, board of managing partners or CEO, or equivalent) to assume ultimate responsibility for the firm's system of quality control.
- Assign management responsibilities so that commercial considerations do not override the quality of the work performed.
- Assign operational responsibility for the firm's quality control system to personnel who have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures.
- Design policies and procedures addressing performance evaluation, compensation, and advancement (including incentive systems) with regard to personnel to demonstrate the firm's overarching commitment to the objectives of the system of quality control.
- Devote sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.

Relevant Ethical Requirements

1.09 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Establishing and maintaining policies such as the following ordinarily would satisfy this objective:

- Require that personnel adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the U.S. Government Accountability Office (GAO), and any other applicable regulators.
- Establish procedures to communicate independence requirements to firm personnel and, where applicable, others subject to them.
- Establish procedures to identify and evaluate possible threats to independence and objectivity, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards.
- Require that the firm withdraw from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied.

- Require written confirmation, at least annually, of compliance with the firm's policies and procedures on independence from all firm personnel required to be independent by relevant requirements.
- Establish procedures for confirming the independence of another firm or firm personnel in associated member firms who perform part of the engagement. This would apply to national firm personnel, foreign firm personnel, and foreign-associated firms.[2]
- Require the rotation of personnel for audit or attest engagements where regulatory or other authorities require such rotation after a specified period.

Acceptance and Continuance of Client Relationships and Specific Engagements

1.10 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm's client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client's management could reflect the reliability of the client's accounting records and financial representations and, therefore, affect the firm's reputation or involvement in litigation. A firm's policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

- has considered the integrity of the client, including the identity and business reputation of the client's principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
- is competent to perform the engagement and has the capabilities and resources to do so;
- can comply with legal and ethical requirements; and
- has reached an understanding with the client regarding the services to be performed.

1.11 This objective ordinarily should be satisfied before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client by establishing and maintaining policies such as the following:

- Evaluate factors that have a bearing on management's integrity and consider the risk associated with providing professional services in particular circumstances.[3]
- Evaluate whether the engagement can be completed with professional competence; undertake only those engagements for which the firm has the capabilities, resources, and professional competence to complete; and evaluate, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued.
- Obtain an understanding, preferably in writing, with the client regarding the services to be performed.
- Establish procedures on withdrawal from an engagement or from both the engagement and the client relationship, including procedures for dealing with information that would have caused the firm to decline an engagement if the information had been available earlier.
- Require documentation of how issues relating to acceptance or continuance of client relationships and specific engagements were resolved.

---

[2] A foreign-associated firm is a firm domiciled outside of the United States and its territories that is a member of, correspondent with, or similarly associated with an international firm or international association of firms.

[3] Such considerations would include the risk of providing professional services to significant clients or to other clients for which the practitioner's objectivity or the appearance of independence may be impaired. In broad terms, the significance of a client to a member or a firm refers to relationships that could diminish a practitioner's objectivity and independence in performing attest services. Examples of factors to consider in determining the significance of a client to an engagement partner, office, or practice unit include (*a*) the amount of time the partner, office, or practice unit devotes to the engagement, (*b*) the effect on the partner's stature within the firm as a result of his or her service to the client, (*c*) the manner in which the partner, office, or practice unit is compensated, or (*d*) the effect that losing the client would have on the partner, office, or practice unit.

Human Resources

1.12 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (*a*) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (*b*) to enable the firm to issue reports that are appropriate in the circumstances. Establishing and maintaining policies such as the following ordinarily would satisfy this objective:

- Recruit and hire personnel of integrity who possess the characteristics that enable them to perform competently.
- Determine capabilities and competencies required for an engagement, especially for the engagement partner, based on the characteristics of the particular client, industry, and kind of service being performed. Specific competencies necessary for an engagement partner are discussed in paragraph 45 of SQCS No. 7.
- Determine the capabilities and competencies possessed by personnel.
- Assign the responsibility for each engagement to an engagement partner.
- Assign personnel based on the knowledge, skills, and abilities required in the circumstances and the nature and extent of supervision needed.
- Have personnel participate in general and industry-specific continuing professional education and professional development activities that enable them to accomplish assigned responsibilities and satisfy applicable continuing professional education requirements of the AICPA, state boards of accountancy, and other regulators.
- Select for advancement only those individuals who have the qualifications necessary to fulfill the responsibilities they will be called on to assume.

Engagement Performance

1.13 The objectives of the engagement performance element of quality control are to provide the firm with reasonable assurance (*a*) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (*b*) that the firm or the engagement partner issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed.

1.14 The objectives of the engagement performance element of quality control ordinarily would be satisfied by establishing and maintaining policies such as the following:

- Plan all engagements to meet professional, regulatory, and the firm's requirements.
- Perform work and issue reports and other communications that meet professional, regulatory, and the firm's requirements.
- Require that work performed by other team members be reviewed by qualified engagement team members, which may include the engagement partner, on a timely basis.
- Require the engagement team to complete the assembly of final engagement files on a timely basis.
- Establish procedures to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.
- Require the retention of engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations.

- Require that
  - — consultation take place when appropriate (for example, when dealing with complex, unusual, unfamiliar, difficult, or contentious issues);
  - — sufficient and appropriate resources be available to enable appropriate consultation to take place;
  - — all the relevant facts known to the engagement team be provided to those consulted;
  - — the nature, scope, and conclusions of such consultations be documented; and
  - — the conclusions resulting from such consultations be implemented.
- Require that
  - — differences of opinion be dealt with and resolved;
  - — conclusions reached are documented and implemented; and
  - — the report not be released until the matter is resolved.
- Require that
  - — all engagements be evaluated against the criteria for determining whether an engagement quality control review should be performed;
  - — an engagement quality control review be performed for all engagements that meet the criteria; and
  - — the review be completed before the report is released.
- Establish procedures addressing the nature, timing, extent, and documentation of the engagement quality control review.
- Establish criteria for the eligibility of engagement quality control reviewers.

Monitoring

1.15 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm's quality control system, and a firm's compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

- Adherence to professional standards and regulatory and legal requirements
- Whether the quality control system has been appropriately designed and effectively implemented
- Whether the firm's quality control policies and procedures have been operating effectively so that reports issued by the firm are appropriate in the circumstances

1.16 The objective of the monitoring element of quality control ordinarily would be satisfied by establishing and maintaining policies such as the following:

- Assign responsibility for the monitoring process to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility.
- Assign performance of the monitoring process to competent individuals.
- Require the performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and the firm's quality control policies and procedures. Monitoring procedures consist of the following:

— Review of selected administrative and personnel records pertaining to the quality control elements

— Review of engagement working papers, reports, and clients' financial statements

— Summarization of the findings from the monitoring procedures, at least annually, and consideration of the systemic causes of findings that indicate that improvements are needed

— Determination of any corrective actions to be taken or improvements to be made with respect to the specific engagements reviewed or the firm's quality control policies and procedures

— Communication of the identified findings to appropriate firm management personnel

— Consideration of findings by appropriate firm management personnel who should also determine that any actions necessary, including necessary modifications to the quality control system, are taken on a timely basis

— Assessment of

a. The appropriateness of the firm's guidance materials and any practice aids;

b. New developments in professional standards and regulatory and legal requirements and how they are reflected in the firm's policies and procedures where appropriate;

c. Compliance with policies and procedures on independence;

d. The effectiveness of continuing professional development, including training;

e. Decisions related to acceptance and continuance of client relationships and specific engagements; and

f. Firm personnel's understanding of the firm's quality control policies and procedures and implementation thereof.

- Communicate at least annually, to relevant engagement partners and other appropriate personnel, deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action.
- Communicate the results of the monitoring of its quality control system process to relevant firm personnel at least annually.
- Establish procedures designed to provide the firm with reasonable assurance that it deals appropriately with the following. This includes establishing clearly defined channels for firm personnel to raise any concerns in a manner that enables them to come forward without fear of reprisal and documenting complaints and allegations and the responses to them:

  — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements

  — Allegations of noncompliance with the firm's system of quality control

  — Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations

- Require appropriate documentation to provide evidence of the operation of each element of its system of quality control. The form and content of documentation evidencing the operation of each of the elements of the system of quality control is a matter of judgment and depends on a number of factors, including the following, for example:

  — The size of the firm and the number of offices

  — The nature and complexity of the firm's practice and organization

- Require retention of documentation providing evidence of the operation of the system of quality control for a period of time sufficient to permit those performing monitoring procedures and peer review to evaluate the firm's compliance with its system of quality control, or for a longer period if required by law or regulation.

1.17 Some of the monitoring procedures discussed in the previous list may be accomplished through the performance of the following:

- Engagement quality control review
- Postissuance review of engagement working papers, reports, and clients' financial statements for selected engagements
- Inspection[4] procedures

Documentation of Quality Control Policies and Procedures

1.18 The firm should document each element of its system of quality control. The extent of the documentation will depend on the size, structure, and nature of the firm's practice. Documentation may be as simple as a checklist of the firm's policies and procedures or as extensive as practice manuals.

Applying the Quality Control Standards to Four Hypothetical Firms

1.19 Subsequent chapters in this practice aid present four different hypothetical firms and the quality control policies and procedures each firm implements to address each of the quality control elements. Following is a description of those firms and their characteristics:

- Multioffice CPA Firm has 10 offices in 3 states and is centrally managed. It has approximately 15 partners and 100 professionals. Its accounting and auditing practice has a concentration of financial institution clients for which it performs audit and attest services. Multioffice CPA Firm has no issuer clients. (chapter 2)
- Single office CPA Firm has 1 office, 3 partners, and 10 professionals. Its accounting and auditing practice has a concentration of employee benefit plan audits. Single office CPA Firm has no issuer clients. (chapter 3)
- Sole Practitioner, CPA, is a sole owner who has no professional staff and occasionally hires per diem professionals. Her accounting practice consists only of engagements subject to Statements on Standards for Accounting and Review Services (SSARSs). (chapter 4) (Note: Sole practitioners who perform audit and attest engagements should refer to chapter 3)
- Closely Aligned CPA Firm and Non-CPA-Owned Entity are organized in an *alternative practice structure*, which is a nontraditional structure in the practice of public accounting consisting of an attest and a nonattest portion of the practice. The attest portion is conducted through a firm, Closely Aligned CPA Firm, owned and controlled by CPAs. The nonattest portion is conducted through a separate entity, Non-CPA-owned Entity, owned and controlled by individuals who are not CPAs. (chapter 5)

1.20 The policies and procedures described in each chapter are those that a firm of a similar size and type may consider establishing and maintaining. The policies and procedures used by an actual firm need not necessarily include nor be limited to all those used by the illustrative firms.

---

[4] Inspection is a retrospective evaluation of the adequacy of the firm's quality control policies and procedures, its personnel's understanding of those policies and procedures, and the extent of the firm's compliance with them. Although monitoring procedures are meant to be ongoing, they may include inspection procedures performed at a fixed point in time. Monitoring is a broad concept; inspection is one specific type of monitoring procedure.

Chapter 2:

System of Quality Control for a CPA Firm's Accounting and Auditing Practice—Firm With Multiple Offices

2.01 This chapter describes how a CPA firm that has multiple offices (Multioffice CPA Firm) implements each element of quality control in its accounting and auditing practice. Multioffice CPA Firm is a hypothetical firm that has 10 offices in 3 states and is centrally managed. Multioffice CPA Firm has 15 partners, 100 professionals, and a concentration of financial institution clients for which it performs audit and attest services. The firm uses practice aids that have been subjected to peer review in accordance with standards established by the AICPA. These practice aids are supplemented by oral and written communications from the firm's partners. It has no issuer clients.[1]

Quality Control Policies and Procedures

2.02 The firm's system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those polices. The policies and procedures are required to be documented. Multioffice CPA Firm documents its system of quality control by preparing a document that comprehensively describes policies and procedures established and maintained for each element of quality control. Multioffice CPA Firm reviews the documentation at least annually and updates it as necessary.

2.03 The firm should communicate its quality control policies and procedures to its personnel. Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality

2.04 Multioffice CPA Firm communicates these policies and procedures in writing and makes the documentation available electronically to all professional personnel. Multioffice CPA Firm requires each individual to be familiar with and to comply with these policies and procedures. Multioffice CPA Firm also includes procedures for personnel to communicate their views or concerns on quality control matters to partners.

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

2.05 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.06–.10.

2.06 *Policy 1: The firm's managing partner assumes ultimate responsibility for the firm's system of quality control.* Multioffice CPA Firm implements this policy through the following procedures:

- Having the managing partner accept overall responsibility for the firm's system of quality control and promoting a quality-oriented culture by sending clear, consistent, and frequent messages through e-mails, letters, and recordings
- Having a mission statement that includes the firm's core values and the importance of quality
- Informing personnel that failure to adhere to the firm's policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action

[1] If Multioffice CPA Firm were to be engaged to perform audit services for an issuer, it might need to revise its quality control policies and procedures to comply with Public Company Accounting Oversight Board (PCAOB) standards and to reflect Securities and Exchange Commission (SEC) requirements applicable to audits of issuers.

2.07 *Policy 2: The firm assigns management responsibilities so that commercial considerations do not override the quality of the work performed.* Multioffice CPA Firm implements this policy through the following procedures:

- Having the managing partner continually evaluate client relationships and specific engagements so that commercial considerations do not override the objectives of the system of quality control
- Emphasizing to all personnel that fee considerations and scope of services should not infringe upon quality work

2.08 *Policy 3: The firm assigns operational responsibility for the firm's quality control system to personnel who have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures.* Multioffice CPA Firm implements this policy through the following procedures:

- Designating a quality control partner with overall operational responsibility for developing and implementing appropriate policies and procedures for the firm's quality control system
- Designating a quality control individual for each office

2.09 *Policy 4: The firm designs procedures addressing performance evaluation, compensation, and advancement (including incentive systems) with regard to personnel to demonstrate the firm's overarching commitment to the objectives of the system of quality control.* Multioffice CPA Firm implements this policy through the following procedures:

- Designing and implementing performance evaluation and advancement systems that (*a*) reward partners and staff involved in the accounting and auditing practice for the quality of their work and their compliance with professional standards and (*b*) include partner performance peer evaluations
- Establishing a compensation system that provides incentives to accounting and auditing partners and senior-level employees for the quality of their accounting and auditing work. The compensation system does the following:
  - — Takes into consideration firm feedback based on monitoring results and peer reviews of the work performed
  - — Rewards partners and personnel for timely (*a*) identification of significant and emerging accounting and auditing issues and (*b*) consultation with firm experts

2.10 *Policy 5: The firm devotes sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.* Multioffice CPA Firm implements this policy through the following procedures:

- Providing the designated quality control partner with sufficient time, authority, and resources to develop, implement, and maintain the firm's quality control policies and procedures
- Providing the firm's quality control documentation to personnel when they are initially hired and reviewing the documentation with them
- Reviewing the firm's quality control policies and procedures with personnel at firm training sessions at least annually

Relevant Ethical Requirements

2.11 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.12–.18.

2.12 *Policy 1: Personnel adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators.* Multioffice CPA Firm implements this policy through the following procedures:

- Assigning one of its partners the responsibility of responding to questions, resolving matters, and determining the circumstances for which consultation with sources outside the firm is required for matters related to independence, integrity, and objectivity
- Identifying circumstances for which documentation of the resolution of matters is appropriate
- Maintaining a current list of (*a*) all entities with which firm personnel are prohibited from having a financial or business relationship and (*b*) all activities in which the firm is prohibited[2] from engaging, as defined in the firm's independence policies
- Establishing clear and concise written independence guidance covering relationships and activities that impair independence, including but not limited to investments, loans, brokerage accounts, business relationships, employment relationships, and fee arrangements

2.13 *Policy 2: The firm establishes procedures to communicate independence requirements to firm personnel and, where applicable, others subject to them.* Multioffice CPA Firm implements this policy through the following procedures:

- Having the managing partner (through e-mails, letters, or recordings) emphasize the concepts of independence, integrity, and objectivity in the firm's professional development meetings, in the acceptance and continuance of clients and engagements, and in the performance of engagements. Because Multioffice CPA Firm has a concentration of financial institution clients, this also includes discussing the applicability of these concepts to engagements for financial institutions, such as the prohibition against any member of the engagement team having a "nongrandfathered" loan with the institution, and the types of nonattest services that could affect independence.
- Requiring periodic independence and ethics training for all professional personnel. Such training covers the firm's independence and ethics policies and the independence and ethics requirements of all applicable regulators.
- Providing frequent reminders of professional responsibilities to personnel, such as avoiding behavior that might be perceived as impairing their independence or objectivity.
- Informing personnel on a timely basis of those entities to which independence policies apply by doing the following:
    - — Preparing and maintaining a list of entities with which firm personnel are prohibited from having a financial or business relationship
    - — Making the list available to personnel so they may evaluate their independence (including personnel new to the firm or an office)
    - — Notifying personnel of changes in the list

2.14 *Policy 3: The firm establishes procedures to identify and evaluate possible threats to independence and objectivity, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards.* Multioffice CPA Firm implements this policy through the following procedures:

- Assigning a partner who is not otherwise associated with the engagement, or who practices in an office other than the office that performs the attest engagement, to review the engagement
- Requiring approval of the assignment of engagement personnel by another partner or manager
- Rotating engagement partners periodically

---

[2] Examples of prohibited activities include providing certain valuation and information technology services to an audit client. See the rules of specific standard-setters to determine the extent and relevance of any prohibition.

- Establishing additional procedures that provide safeguards when the firm performs audit or other attest work for (*a*) significant clients or (*b*) clients at which partners or other senior personnel are offered key management positions, or accept offers of employment, by utilizing the procedures contained in the AICPA Code of Professional Conduct, paragraphs .01 and .04 of ET section 100, *Conceptual Framework for AICPA Independence Standards* (AICPA, *Professional Standards*, vol. 2)
- Designating a senior-level partner to be responsible for overseeing the adequate functioning of the firm's independence policies
- Implementing a system to identify investment holdings of partners and managers that might impair independence
- Requiring all professionals to report, on a timely basis when identified, apparent violations of independence, integrity, or objectivity policies involving themselves, their spouses, or their dependents and the corrective actions taken or proposed to be taken
- Establishing a requirement for all professional personnel to notify the managing partner in each office of any potential activities that might impair independence or violate ethics rules, including services provided to entities with which firm personnel are prohibited from having a business relationship
- Establishing a program that protects professional personnel who report potential ethics or independence violations to the proper parties in compliance with firm policy
- Requiring the managing partner in each office, or a person designated by the managing partner, to periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm's independence
- Developing guidance that sets forth the consequences for professional personnel who violate the firm's independence policies and procedures, including engaging in activities with entities with which firm personnel are prohibited from having a business relationship
- Requiring all professional personnel to review the list of entities with which firm personnel are prohibited from having a business relationship before a professional or the spouse or dependent of a professional obtains a security or financial interest in an entity
- Establishing criteria that determine the need for safeguards for engagements where monitoring procedures or peer review have identified weaknesses in previous years or the same senior personnel have been used for five years or more on an audit or attestation engagement
- Documenting any safeguards applied to eliminate threats to independence or reduce them to an acceptable level
- Promptly communicating identified breaches of these policies and procedures, and the required corrective actions, to (*a*) the engagement partner who, with the firm, needs to address the breach and (*b*) other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action
- Obtaining confirmation from the engagement partner and other relevant personnel that the required corrective actions have been taken

2.15 *Policy 4: The firm withdraws from engagements if effective safeguards to reduce threats to independence to an acceptable level cannot be applied.* Multioffice CPA Firm implements this policy through the following procedures:

- Consulting within the firm and, if necessary, with legal counsel and other parties when the firm believes that effective safeguards to reduce threats to independence to an acceptable level cannot be applied
- Withdrawing from engagements when effective safeguards to reduce threats to independence to an acceptable level cannot be applied

2.16 *Policy 5: The firm obtains written confirmation, at least annually, of compliance with its policies and procedures on independence from all firm personnel required to be independent by relevant requirements.* Multioffice CPA Firm implements this policy through the following procedures:

- Obtaining written representations from personnel, upon hire and on an annual basis, stating that they have read the firm's independence, integrity, and objectivity policies, understand the applicability of those policies to their activities, and have complied with the requirements of those policies since their last representation (such written representations are accompanied by the most current list of all entities with which firm personnel are prohibited from having a financial or business relationship)
- Assigning responsibility to the firm's quality-control partner for obtaining such written representations, reviewing independence compliance files for completeness, and resolving reported exceptions
- Requiring the engagement partner to sign a step in the engagement program attesting to compliance with independence requirements that apply to the engagement

2.17 *Policy 6: The firm establishes procedures for confirming the independence of another firm or firm personnel in associated member firms who perform part of an engagement.* Multioffice CPA Firm implements this policy through the following procedures:

- Describing in its policies and procedures manual the form and content of independence representations, and frequency with which they are to be obtained
- Requiring that such representations be documented

2.18 *Policy 7: The firm rotates personnel for audit or attest engagements where regulatory or other authorities require such rotation after a specified period.* Multioffice CPA Firm implements this policy by having the quality control partner monitor regulatory requirements for financial institutions and other entities and notifying partners of the need for rotation. Multioffice CPA Firm has decided to rotate partners assigned to audit financial institutions every five years.

Acceptance and Continuance of Client Relationships and Specific Engagements

2.19 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm's client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client's management could reflect the reliability of the client's accounting records and financial representations and, therefore, affect the firm's reputation or involvement in litigation. A firm's policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

- has considered the integrity of the client, including the identity and business reputation of the client's principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
- is competent to perform the engagement and has the capabilities and resources to do so;
- can comply with legal and ethical requirements; and
- has reached an understanding with the client regarding the services to be performed.

2.20 Multioffice CPA Firm satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the policies and procedures described in paragraphs 2.21–.25.

2.21 *Policy 1: The firm evaluates factors that have a bearing on management's integrity and considers the risk associated with providing professional services in particular circumstances.* Multioffice CPA Firm implements this policy through the following procedures:

- Developing and maintaining a manual that contains policies and procedures related to the acceptance of prospective clients and the continuance of existing clients. Such policies and procedures state that the firm's clients should not present undue risks to the firm, including damage to the firm's reputation.
- Advising professional personnel that they are expected to be familiar with the firm's policies and procedures for the acceptance and continuance of clients.
- Obtaining and evaluating relevant information before accepting or continuing any client. The following are examples of such information:
  - The nature and purpose of the services to be provided and management's understanding thereof.
  - The identity of the client's principal owners, key management, related parties, and those charged with its governance.
  - The nature of the client's operations, including its business practices, from sources such as annual reports, interim financial statements, reports to regulators, enforcement actions by regulators, and income tax returns.
  - Information obtained from inquiries of third parties about the client, its principal owners, key management, and those charged with governance that may have a bearing on evaluating the client. Examples of such third parties are bankers, factors, legal counsel, credit services, investment bankers, underwriters, and other members of the financial or business community who may have applicable knowledge. Inquiries also might be made regarding management's attitude toward compliance with regulators or legislative requirements and the presence of control deficiencies, especially those that management is unwilling to correct.
- Communicating with the predecessor accountant or auditor when required or recommended by professional standards. This communication also includes inquiries regarding the nature of any disagreements and whether there is evidence of opinion shopping.
- Assessing management's commitment to implementing and maintaining effective internal control.
- Assessing management's commitment to the appropriate application of generally accepted accounting principles (GAAP).
- Conducting a background check of the business, its officers, and the person(s) in question by using an investigative firm and evaluating the information obtained regarding management's integrity. Background checks are conducted when the firm is unable to obtain sufficient information about the prospective client after completing the steps listed previously, or when there is an indication that management or someone affiliated with the prospective client may be less than reputable.
- Evaluating the risk of providing services to significant clients or to other clients for which the firm's independence or the appearance of independence may be impaired. In broad terms, the significance of a client to a firm refers to relationships that could diminish a practitioner's objectivity and independence in performing attest services. In determining the significance of a client, the firm considers (*a*) the amount of time the partner devotes to the engagement, (*b*) the effect on the partner's stature within the firm as a result of his or her service to the client, (*c*) the manner in which the partner is compensated, and (*d*) the effect that losing the client would have on the partner and the firm.

2.22 *Policy 2: The firm evaluates whether the engagement can be completed with professional competence; undertakes only those engagements for which the firm has the capabilities, resources, and professional competence to* *complete; and evaluates, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued.* Multioffice CPA Firm implements this policy through the following procedures:

- Evaluating whether the following are in place:
  - — The practice office has sufficient personnel who have obtained or can reasonably expect to obtain the knowledge and expertise necessary to perform the engagement, including relevant regulatory or reporting requirements.
  - — Specialists are available if needed, through, for example, the resources of another practice office or alternative source.
  - — The firm is able to complete the engagement within the reporting deadline.
- Defining high-risk engagements.
- Specifying conditions that trigger the requirement between annual audits to reevaluate a client or engagement. The following are examples of such conditions:
  - — Significant changes in the client, such as a major change in ownership, senior client personnel, directors, advisers, the nature of the business, or its financial stability.
  - — Changes in the nature or scope of the engagement, such as an initial public offering or a request to step down from an audit to a review engagement.
  - — Changes in the composition or strategic focus of the firm, such as the inability to replace the loss of key personnel who are particularly knowledgeable about a specialized industry or a decision by Multioffice CPA firm to discontinue services to clients in a particular industry.
  - — The existence of conditions that would have caused the firm to reject the engagement had such conditions existed at the time of the initial acceptance, such as aggressive earnings management, unreliable processes for developing accounting estimates, questionable estimates by management, questions regarding the entity's ability to continue as a going concern, and other factors that may increase the risk of being associated with the client.
  - — The client's delinquency in paying fees. (This may also affect the firm's independence.)
  - — Engagements for entities operating in highly specialized or regulated industries, such as financial institutions, governmental entities, and employee benefit plans.
  - — Engagements for entities in the development stage.
  - — Engagements in which the client has ignored prior recommendations, such as recommendations that address deficiencies in internal control.
- Obtaining relevant information to determine whether the relationship should be continued and establishing the frequency with which client continuance evaluations should be made.
- Evaluating the information obtained regarding acceptance or continuance of a client or engagement through the following activities:
  - — The engagement partner assesses the information obtained about the client or the specific engagement, including information about the significance of the client to the firm, and makes a recommendation about whether the client or engagement should be accepted or continued.
  - — The engagement partner completes a client acceptance form and submits it to the managing partner of the practice office for approval.
  - — The engagement partner signs a step in the planning program noting that he or she has considered whether the client should be continued, and if conditions exist that trigger the requirement between annual audits to reevaluate a client or engagement, prepares a form documenting his or her rationale and conclusion regarding client continuance.

— The partner responsible for the quality control function assesses and approves the recommendation made by the engagement partner. In certain defined circumstances, such as high-risk engagements, acceptance or continuance decisions also may require approval of the firm's managing partner.

- Establishing procedures for dealing with information that would have caused the firm to decline the engagement if the information had been available earlier.

2.23 *Policy 3: The firm obtains an understanding with the client regarding the services to be performed.* Multioffice CPA Firm implements this policy by requiring that for all engagements, the firm prepare a written engagement letter documenting the understanding with the client and obtain the client's signature on that letter, thus minimizing the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed.

2.24 *Policy 4: The firm establishes procedures on withdrawal from an engagement or from both the engagement and the client relationship.* Multioffice CPA Firm implements this policy through the following procedures:

- Discussing with the appropriate level of the client's management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place or for the firm to report to regulatory authorities the withdrawal from the engagement, or from both the engagement and the client relationship, together with the reasons for the withdrawal
- Discussing with the appropriate level of the client's management and those charged with its governance withdrawal from the engagement, or from both the engagement and the client relationship, if the firm determines that it is appropriate to withdraw

2.25 *Policy 5: The firm documents how issues relating to acceptance or continuance of client relationships and specific engagements were resolved.* Multioffice CPA Firm implements this policy by documenting, in a memorandum to the engagement files, significant issues, consultations, conclusions, and the basis for the conclusions relating to acceptance or continuance of client relationships and specific engagements.

Human Resources

2.26 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (*a*) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (*b*) to enable the firm to issue reports that are appropriate in the circumstances. Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.27–.33.

2.27 *Policy 1: Personnel who are hired possess the characteristics that enable them to perform competently.* Multioffice CPA Firm implements this policy by maintaining firm-wide hiring standards and evaluating the firm's personnel needs, including the following:

- Designating a partner or other qualified individual in each office to be responsible for evaluating the overall personnel needs in that practice office and establishing hiring objectives based on factors such as existing clientele, anticipated growth, personnel turnover, and individual advancement
- Developing and maintaining personnel policies and procedures that identify attributes, achievements, and experiences desired in entry-level and experienced personnel
- Establishing criteria for evaluating personal characteristics such as integrity, competence, and motivation
- Establishing guidelines for the additional procedures to be performed when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions

- Preparing budgets that identify personnel needs at all levels
- Identifying sources of employment candidates such as universities and executive recruiters
- Selecting and training the individuals who will be interviewing candidates or otherwise participating in the hiring process
- Summarizing and evaluating the results of the hiring process for each candidate, including approval by the managing partner, or a person designated by the managing partner, of all hiring decisions

2.28 *Policy 2: The firm determines capabilities and competencies required for an engagement, including those required of the engagement partner.* Multioffice CPA Firm implements this policy by specifying the competencies that the engagement partner for an accounting, auditing, or attest engagement (or other person responsible for supervising and signing or authorizing someone to sign the firm's report on such engagements) should possess. Such competencies include having an understanding of the following:

- The role of the firm's system of quality control and the AICPA Code of Professional Conduct, both of which play critical roles in ensuring the integrity of the accounting, auditing, and attest function to users of reports.
- The performance, supervision, and reporting aspects of the engagement, which ordinarily are gained through training or participation in similar engagements.
- The industry in which the client operates, including its organization and operating characteristics, sufficient to identify areas of high or unusual risk associated with the engagement and to evaluate the reasonableness of industry-specific estimates.
- The professional standards applicable to the engagement being performed and to the industry in which the client operates. Such standards include accounting, auditing, and attestation standards, as well as rules and regulations issued by applicable regulators.
- The skills that contribute to sound professional judgment, including the ability to exercise professional skepticism.
- How the organization uses information technology and the manner in which information systems are used to record and maintain financial information.

2.29 *Policy 3: The firm determines the capabilities and competencies possessed by personnel.* Multioffice CPA Firm implements this policy through the following procedures:

- Establishing criteria for evaluating personal characteristics such as integrity, competence, and motivation
- Evaluating personnel at least annually to determine their capabilities and competencies

2.30 *Policy 4: The firm assigns responsibility for each engagement to an engagement partner.* Multioffice CPA Firm implements this policy through the following procedures:

- Assigning the responsibility for each engagement to an engagement partner who has the appropriate capabilities, competence, authority, and time to perform the role
- Clearly defining and communicating the responsibilities of the partner to the engagement partner
- Communicating the identity and role of the partner to management and those charged with governance
- Developing and maintaining systems to monitor the workload and availability of engagement partners to enable these individuals to have sufficient time to adequately discharge their responsibilities

2.31 *Policy 5: The firm assigns personnel (including partners) based on the knowledge, skills, and abilities required in the circumstances and the nature and extent of supervision needed.* Multioffice CPA Firm implements this policy through the following procedures:

- Designating an appropriate person(s) in each office to be responsible for assigning personnel to engagements based on such factors as the following:
    - Engagement type, size, significance, complexity, and risk profile
    - Specialized experience or expertise required and competencies gained through previous experience or education
    - Need for and availability of staff and supervisors
    - Timing of the work to be performed
    - Continuity and rotation of personnel
    - Opportunities for on-the-job training
    - Situations for which independence or objectivity concerns exist
- Designating a partner to be responsible for partner and manager assignments
- Requiring approval of partner and manager assignments from the industry partner or the quality assurance partner in the case of high-risk or significant client engagements
- Establishing a policy for monitoring the continuation and rotation of engagement partners

2.32 *Policy 6: Personnel participate in general and industry-specific continuing professional education (CPE) and professional development activities that enable them to accomplish assigned responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state boards of accountancy, and other applicable regulators.* Multioffice CPA Firm implements this policy through the following procedures:

- Designating a partner to oversee the development of firm requirements and materials for a professional development program covering subjects relevant to the firm's clients and services. Such responsibilities include the following:
    - Encouraging personnel to pass the Uniform CPA Examination
    - Establishing guidelines for participation by personnel in professional development programs and considering the requirements of the AICPA, state boards of accountancy, and applicable regulators in establishing the firm's CPE requirements
    - Maintaining appropriate documentation evidencing that personnel have met the professional education requirements of the firm, the AICPA, state boards of accountancy, and other applicable regulators
    - Providing an orientation program and training for new personnel to inform them of their professional responsibilities and firm policies
    - Preparing and providing publications and programs to inform personnel of their responsibilities and opportunities
    - Developing in-house staff training programs that focus on general and industry-specific accounting and auditing subjects, including audits of financial institutions
- Communicating and distributing to personnel changes in accounting, auditing, attestation, and quality control standards, as well as independence, integrity, and objectivity requirements and the firm's guidance with respect to those standards and requirements
- Encouraging professional personnel at each level in the firm to participate in external professional development activities such as the following:
    - CPE courses
    - Meetings of professional organizations
    - Serving on professional committees
    - Writing for professional publications

— Speaking to professional groups

2.33 *Policy 7: Personnel selected for advancement have the qualifications necessary to fulfill the responsibilities they will be called on to assume.* Multioffice CPA Firm implements this policy through the following procedures:

- Appointing a director of human resources to identify and communicate, in the firm's policies and procedures manual, the qualifications necessary to accomplish responsibilities at each professional level in the firm. This includes the following:
  - Establishing criteria for evaluating personnel at each professional level and for advancement to the next higher level of responsibility. Such criteria give recognition and reward to the development and maintenance of competence and commitment to ethical principles.
  - Developing evaluation forms for each professional staff classification, including partners. Such forms include evaluation of performance quality and adherence to ethical principals.
  - Informing personnel that failure to adhere to the firm's policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action.
- Assigning responsibility to a partner for making advancement and termination decisions for staff and recommendations to the firm's management committee for manager and partner-level advancement and termination. Such responsibilities include the following:
  - Identifying responsibilities and requirements for evaluation at each level and indicating who will prepare these evaluations and when they will be prepared
  - Reviewing evaluations on a timely basis with the individual being evaluated
- Advising personnel regarding their progress and career opportunities through the following procedures:
  - Evaluating employees annually and at the end of each assignment exceeding three weeks to provide feedback on performance.
  - Summarizing and reviewing with personnel their performance evaluations, including assessing their progress with the firm, at least annually. Considerations include past performance, future objectives of the firm and the individual, assignment preferences, and career opportunities.
  - Evaluating partners periodically by means of performance reviews, peer evaluations, or self-appraisals, as appropriate, to provide feedback and to determine whether they continue to have the qualifications to accomplish their assigned responsibilities and to assume additional responsibilities.

Engagement Performance

2.34 The objective of the engagement performance element of quality control is to provide the firm with reasonable assurance (*a*) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (*b*) that the firm or the engagement partner issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed. Multioffice CPA Firm satisfies these objectives by establishing and maintaining the policies and procedures described in paragraphs 2.35–.45.

2.35 *Policy 1: Planning for engagements meets professional, regulatory, and the firm's requirements.* Multioffice CPA Firm implements this policy by developing, maintaining, and providing personnel with the firm's policies and procedures manual that delineates the factors the engagement team should consider in the planning process and the extent of documentation of these considerations. Planning considerations may vary depending on the size and complexity of the engagement. Planning generally includes the following activities:

- Assigning responsibility to the engagement partner for planning the engagement and assigning responsibilities to appropriate personnel during the planning phase
- Developing or updating background information about the client
- Considering client significance to the firm
- Requiring, for all initial audit clients designated as high risk by the firm, an independent review of planning considerations by either the engagement quality control reviewer or another partner
- Requiring planning documentation that includes the following:
    - Proposed work programs tailored to the specific engagement
    - Staffing requirements, including the need for personnel with specialized knowledge who may have to be obtained from other practice offices
    - Consideration of the economic conditions affecting the client and its industry and their potential effect on the conduct of the engagement
    - Consideration of risks and how they may affect the procedures to be performed
    - A budget that allocates sufficient time for the engagement to be performed in accordance with professional standards and the firm's quality control policies and procedures
    - Evidence of review of planning by an independent review partner

2.36 *Policy 2: The engagement is performed, supervised, reviewed, documented, and reported (or communicated) in accordance with the requirements of professional standards, applicable regulators, and the firm.* Multioffice CPA Firm implements this policy by requiring personnel to comply with the firm's policies and procedures manual, which prescribes the following:

- How engagement teams are supervised during the course of an engagement, including briefing the engagement team on the objectives of their work
- The form and content of documentation of the work performed and conclusions reached, including forms, checklists, and questionnaires to be used in performing engagements
- The form in which instructions are to be given to other offices or other auditors performing part of an engagement and the extent to which such work is to be reviewed and documented
- The extent of overall engagement review required, at all professional levels, to ensure that the financial statements meet professional and firm presentation and disclosure requirements
- The extent of review to be performed of required communications to management and the board of directors

2.37 *Policy 3: Qualified engagement team members review work performed by other team members on a timely basis.* Multioffice CPA Firm implements this policy through the following procedures:

- Adhering to the following firm guidelines regarding review of documentation of the work performed and conclusions reached, the financial statements, and reports and documentation of the review process:
    - All reviewers are to possess appropriate experience, competence, authority, and responsibility and are to be given access to the firm's reference material and other resources.

— For each engagement, there is to be appropriate documentation evidencing review of the documentation of the work performed and conclusions reached, the financial statements, and the report.

- Assigning responsibility for the review of all reports, financial statements, and documentation of the work performed and conclusions reached to an appropriate reviewer in accordance with procedures outlined in the firm's manual to obtain reasonable assurance of the following:
  - — The nature, timing, and extent of procedures performed are consistent with risk assessments and the approach described in the planning documentation. Exceptions are appropriately investigated. The appropriateness of planned procedures should be reconsidered if significant changes in risk factors occur or are identified between the planning phase of the engagement and the execution of procedures.
  - — Firm-prescribed forms, checklists, and questionnaires, tailored as appropriate, are used in performing and reporting on the engagement.
- Requiring a second review, by a partner or manager, of the report, financial statements, and selected documentation of the work performed and conclusions reached, as prescribed in the firm's policies and procedures manual. The extent of review varies based on the type of engagement. For example, engagements for financial institutions, high-risk engagements, and those performed for significant clients, as defined by the firm, receive an engagement quality control review.
- Reviewing engagement documentation to determine whether the following has occurred:
  - — The work has been performed in accordance with professional standards and regulatory and legal requirements.
  - — Significant findings and issues have been raised for further consideration.
  - — Appropriate consultations have taken place, and the resulting conclusions have been documented and implemented.
  - — The nature, timing, and extent of work performed are appropriate and do not need revision.
  - — The work performed supports the conclusions reached and is appropriately documented.
  - — The evidence obtained is sufficient and appropriate to support the report.
  - — The objectives of the engagement procedures have been achieved.

2.38 *Policy 4: Engagement teams complete the assembly of final engagement files on a timely basis.* Multioffice CPA Firm implements this policy by completing the assembly of final engagement files in accordance with professional standards and applicable regulatory requirements, if any.

2.39 *Policy 5: The firm maintains the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.* Multioffice CPA Firm implements this policy through the following procedures:

- Establishing and applying controls to accomplish the following:
  - — Clearly determine when and by whom engagement documentation was prepared and reviewed.
  - — Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means.
  - — Prevent unauthorized changes to the engagement documentation.
  - — Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

- Requiring the use of a password by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users
- Implementing appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement
- Implementing procedures for properly distributing engagement documentation materials to the team members at the start of the engagement, preparing engagement documentation during the engagement, and assembling final documentation at the end of the engagement
- Implementing procedures for restricting access to, and enabling proper distribution and confidential storage of, hardcopy engagement documentation
- Implementing procedures regarding original paper documents that have been electronically scanned or otherwise copied to another media that accomplish the following:
    - — Generate scanned copies that contain the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
    - — Integrate the scanned copies into the engagement files, including indexing and signing off on the copies as necessary.
    - — Enable the scanned copies to be retrieved and printed as necessary.

2.40 *Policy 6: The firm retains engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations.* Multioffice CPA Firm implements this policy through the following procedures:

- Establishing procedures that accomplish the following:
    - — Enable the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time.
    - — Provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed.
    - — Enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.
- Retaining documentation for a specific period of time as appropriate for the nature of the engagement

2.41 *Policy 7: The firm requires that consultation take place when appropriate; that sufficient and appropriate resources are available to enable appropriate consultation to take place; that all the relevant facts known to the engagement team are provided to those consulted; that the nature, scope, and conclusions of such consultations are documented; and that conclusions resulting from such consultations are implemented.* Multioffice CPA Firm implements this policy through the following procedures:

- Providing personnel with the firm's policies and procedures manual that specifies the firm's consultation policies and procedures. Areas or specialized situations for which the firm requires consultation include the following:
    - — Application of newly issued technical pronouncements.
    - — Industries with special accounting, auditing, or reporting requirements.
    - — Emerging practice problems.
    - — Choices among alternative GAAP upon initial adoption or when an accounting change is made.
    - — Reissuance of a report, consideration of omitted procedures after a report has been issued, or subsequent discovery of facts that existed at the date a report was issued.

— Filing requirements of regulators.

— Meetings with regulators at which the firm is to be called upon to support the application of GAAP or GAAS that have been questioned.

— Designating individuals within the firm as consultants in certain areas. Personnel are to consult with the designated individual when issues arise. If differences arise between the engagement partner and the consultant, the matter is to be resolved by the partner(s) responsible for the quality control function.

- Maintaining or providing access to adequate and up-to-date references, which includes materials related to specific industries, specialties, and regulatory requirements, in each office.
- Requiring that documentation of consultation include all relevant facts and circumstances, the sections of the professional literature used in making a determination, the conclusion reached, how the conclusions were implemented, and the signatures of the engagement partner and consultant. This documentation is to be retained with the engagement documentation of the work performed and conclusions reached. At the discretion of the consultant, the documentation may be entered in a retrievable database to promote efficiencies in the consultation process and consistency in the resolution of similar issues.

2.42 *Policy 8: The firm deals with and resolves differences of opinion, documents and implements conclusions reached, and does not release the report until the matter is resolved.* Multioffice CPA Firm implements this policy through the following procedures:

- Requiring that all differences of professional judgment within an engagement team be resolved by the engagement and quality control partners, and the managing partner if necessary, and that the report not be released until the matter is resolved.
- Requiring that the resolution of the differences be appropriately documented. If members of the engagement team continue to disagree with the resolution, they may disassociate themselves from the resolution of the matter and may document that a disagreement continues to exist.

2.43 *Policy 9: The firm has criteria for determining whether an engagement quality control review should be performed; evaluates all engagements against the criteria; performs an engagement quality control review for all engagements that meet the criteria; and completes the review before the report is released.* Multioffice CPA Firm implements this policy by defining high-risk engagements and requiring that an engagement quality control review be performed for all high-risk engagements, engagements for financial institutions, and engagements performed for significant clients.

2.44 *Policy 10: The firm establishes procedures addressing the nature, timing, extent, and documentation of the engagement quality control review.* Multioffice CPA Firm implements this policy through the following procedures:

- Implementing procedures addressing the timing of the review. The firm has concluded that performing an engagement quality control review is not necessary to obtain sufficient appropriate audit evidence for audit engagements; therefore, the engagement quality control review does not need to be completed before the date of the auditor's report but is required to be completed before the report is released. When the engagement quality control review results in additional audit procedures being performed, the date of the auditor's report is changed to the date by which sufficient appropriate audit evidence has been obtained.
- Implementing procedures addressing the nature and extent of the review. The firm's procedures for audit and attestation engagements require that the engagement quality control reviewer do the following:

— Discuss significant accounting, auditing, and financial reporting issues with the engagement partner, including matters for which there has been consultation.

  - Discuss with the engagement partner the engagement team's identification and audit of high-risk assertions, transactions, and account balances.
  - Review selected working papers relating to the significant judgments the engagement team made and the conclusions they reached.
  - Review documentation of the resolution of significant accounting, auditing, and financial reporting issues, including documentation of consultation with firm personnel or external sources.
  - Review the summary of uncorrected misstatements that are related to known and likely misstatements.
  - Review additional engagement documentation to the extent considered necessary.
  - Read the financial statements and report and consider whether the report is appropriate.
  - Confirm with the engagement partner that there are no significant unresolved issues.
  - Complete the review before the release of the report.
  - Determine whether the issues raised in the review indicate a need to change the auditor's report date.
- Resolving conflicting opinions between the engagement partner and the engagement quality control reviewer regarding significant matters. The policy requires documentation of the resolution of conflicting opinions before the release of the audit report.
- Implementing procedures addressing documentation by the engagement quality control reviewer. The firm's procedures require documentation of the following:
  - That the procedures required by the firm's policies on engagement quality control review have been performed
  - That the engagement quality control review has been completed before the report is released
  - That no matters have come to the attention of the engagement quality control reviewer that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate

2.45 *Policy 11: The firm establishes criteria for the eligibility of engagement quality control reviewers.* Multioffice CPA Firm implements this policy by establishing the following criteria for an engagement quality control reviewer:

- Is not selected by the engagement partner
- Has sufficient technical expertise and experience
- Carries out his or her responsibilities with objectivity and due professional care without regard to the relative positions of the engagement partner and the engagement quality control reviewer
- Does not assume any of the responsibilities of the engagement partner or have responsibility for the audit of any significant subsidiaries, divisions, benefit plans, or affiliated or related entities
- Meets the independence requirements relating to the engagements reviewed, even though the engagement quality control reviewer is not a member of the engagement team
- Does not make decisions for the engagement team or participate in the performance of the engagement, except that the engagement partner may consult the engagement quality control reviewer at any stage during the engagement

Monitoring

2.46 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm's quality control system, and a firm's compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

- Adherence to professional standards and regulatory and legal requirements
- Whether the quality control system has been appropriately designed and effectively implemented
- Whether the firm's quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

2.47 Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.48–.51.

2.48 *Policy 1: The firm assigns responsibility for the monitoring process to a partner and assigns performance of the monitoring process to competent individuals.* Multioffice CPA Firm implements this policy through the following procedures:

- Designating a partner with appropriate authority to be responsible for quality assurance, including ensuring that the firm's quality control policies and procedures and its methodologies remain relevant and adequate. Factors to be considered include the following:
  - — Mergers and divestitures of portions of the practice
  - — Changes in professional standards and other regulatory requirements applicable to the firm's practice
  - — Results of inspections and peer reviews
  - — Reviews of litigation and regulatory enforcement actions against the firm and others
  - — Changes in applicable AICPA membership requirements
- Preparing inspection checklists and guidance materials or using materials prepared by the AICPA for performing inspection procedures.
- Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm's standards of quality in performing their duties.
- Identifying the need to take the following actions:
  - — Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed
  - — Improve compliance with firm policies and procedures related to the other elements of quality control
- Assigning performance of the monitoring process to the designated quality control individual for each practice office.

2.49 *Policy 2: The firm performs monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and the firm's quality control policies and procedures.* Multioffice CPA Firm implements this policy through the following procedures:

- Developing and performing the firm's inspection program to obtain feedback about the effectiveness of the firm's policies and procedures.

- Reviewing the resolution of matters reported by professional personnel on independence-confirmation forms to determine that matters have been appropriately considered and resolved.
- Interviewing personnel at all professional management and staff levels to obtain information about operating procedures in practice offices, whether personnel are knowledgeable about firm policies and procedures, and whether such policies and procedures are being effectively communicated.
- Reviewing the following documentation to determine compliance with firm policies and procedures:
  - — Personnel evaluations, including documentation of hiring and advancement decisions
  - — Documentation of client acceptance and continuance decisions
  - — Participants' evaluations of practice office training programs
  - — Professional development records of personnel
  - — Correspondence regarding the resolution of independence matters within the practice office
- Developing a plan to test a sample of engagements for compliance with the firm's policies and procedures. Such a review may be preissuance or postissuance.
- Reviewing a cross-section of engagements from selected practice offices using the following criteria for inclusion in the sample selected:
  - — Engagements involving all partners and managers who have significant accounting and auditing responsibilities in the selected offices
  - — Engagements for financial institutions
  - — First-year engagements
  - — Significant client engagements
  - — Specialized industries, with emphasis given to high-risk industries
  - — Level of service performed (audit, review, compilation, and attestation)
  - — Level of attestation services performed (examination, review, and agreed-upon procedures)
  - — Engagements for which there have been complaints or allegations that the work performed by the firm fails to comply with professional standards, regulatory requirements, or the firm's system of quality control
  - — Engagements in which there were significant disagreements between the quality review partner and the engagement partner
- Periodically reviewing the process for personnel evaluation and counseling to ascertain the following:
  - — Procedures for evaluation and documentation are being followed on a timely basis
  - — Personnel who have been promoted have achieved the applicable requirements for advancement
  - — Personnel decisions are consistent with evaluations
  - — Recognition is given to outstanding performance
- Designating a partner or qualified individual in each office to review the summary of the evaluations of in-house training programs to determine whether the programs are achieving their objectives.

- Designating a partner or qualified individual in each office to review summaries of CPE records for that office's professional staff to determine that the office has established a means of tracking each individual's compliance with the requirements of the AICPA and other applicable regulators.
- Interviewing selected professional personnel regarding the effectiveness of training programs.
- Considering the results of the firm's inspection as they relate to the effectiveness of the firm's professional development program.
- Ascertaining whether inquiries received by individuals consulted within the firm indicate the need for additional CPE programs.
- Reviewing and updating firm practice aids, such as audit programs, forms, and checklists, to reflect new or revised professional pronouncements.
- Issuing guidance regarding new professional standards, regulatory requirements, and related changes to firm policy.
- Soliciting comments from partners and managers as to the effectiveness of practice aids and tools.

2.50 *Policy 3: The firm communicates at least annually (a) deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action to relevant engagement partners and other appropriate personnel and (b) the results of the monitoring of its quality control system process to relevant firm personnel.* Multioffice CPA Firm implements this policy through the following procedures:

- Preparing a summary monitoring report for the firm's senior management that evaluates the overall results of the inspection and other monitoring procedures and reaches final conclusions as to whether the firm as a whole needs to improve compliance with the firm's policies and procedures and whether revisions to the firm's quality control policies and procedures are necessary.
- Communicating findings to practice office personnel and determining the corrective actions to be taken for the engagements reviewed. These findings are discussed and communicated in a report issued to each office. The practice office responds regarding the specific corrective actions or steps to be taken to improve compliance with the firm's policies and procedures and professional standards.
- Following up on planned corrective actions to determine whether those actions were taken and whether they achieved the intended objective(s).
- Communicating in partner-manager meetings and firm policy correspondence the need for changes in the system of quality control.
- Communicating in training programs, partner-manager meetings, and firm policy correspondence the need for improved compliance with the system of quality control.

2.51 *Policy 4: The firm deals appropriately with complaints and allegations.* Multioffice CPA Firm implements this policy through the following procedures:

- Establishing procedures for concerns to be brought to the attention of the ethics committee in a confidential manner
- Having the firm's ethics committee (excluding any members who are otherwise involved in the engagement under investigation) investigate the following:
  - — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
  - — Allegations of noncompliance with the firm's system of quality control
  - — Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations
- Consulting with legal counsel as necessary

- Documenting complaints and allegations and the responses to them

2.52 *Policy 5: The firm prepares appropriate documentation to provide evidence of the operation of each element of its system of quality control.* Multioffice CPA Firm implements this policy by designing its summary monitoring report to provide evidence of the operation of each element of its system of quality control, including the following:

- Monitoring procedures, including the procedure for selecting completed engagements to be inspected
- A record of the evaluation of the following:
  - — Adherence to professional standards and regulatory and legal requirements
  - — Whether the quality control system has been appropriately designed and effectively implemented
  - — Whether the firm's quality control policies and procedures have been appropriately applied
- Identification of the deficiencies noted, an evaluation of their effects, and the basis for determining whether further action is necessary and what that action should be

2.53 *Policy 6: The firm retains documentation providing evidence of the operation of the system of quality control for an appropriate period of time.* Multioffice CPA Firm implements this policy by requiring retention of the summary monitoring report for a period of time sufficient to meet the firm's peer review or other regulatory requirements.

Chapter 3:

System of Quality Control for a CPA Firm's Accounting and Auditing Practice—Firm With a Single Office

3.01 This chapter describes how a CPA firm that has a single office (Single office CPA Firm) implements each element of quality control in its accounting and auditing practice. Single office CPA Firm is a hypothetical firm with 1 office, 3 partners, and a total of 10 professionals. Its accounting and auditing practice has a concentration of employee benefit plans, and the firm has no issuer clients.[1] The firm uses practice aids that have been subjected to peer review in accordance with standards established by the AICPA. These practice aids are supplemented by oral and written communications from the firm's partners.

Quality Control Policies and Procedures

3.02 The firm's system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those polices. The policies and procedures are required to be documented. Single office CPA Firm documents its system of quality control by preparing a document that comprehensively describes the policies and procedures for each element of quality control. Single office CPA Firm reviews the documentation at least annually and updates it as necessary.

3.03 The firm should communicate its quality control policies and procedures to its personnel. Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality

3.04 Single office CPA Firm communicates these policies and procedures in writing and makes the documentation available electronically to all professional personnel. Single office CPA Firm requires each individual to be familiar with and to comply with these policies and procedures. Single office CPA Firm encourages its personnel to communicate their views or concerns about quality control matters to partners.

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

3.05 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.06–.10.

3.06 *Policy 1: The firm's managing partner assumes ultimate responsibility for the firm's system of quality control.* Single office CPA Firm implements this policy through the following procedures:

- Having the managing partner accept ultimate responsibility for the firm's system of quality control and for setting a tone that emphasizes the importance of quality and of following the firm's system of quality control
- Informing personnel that failure to adhere to the firm's policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action

3.07 *Policy 2: Commercial considerations do not override the quality of the work performed.* Single office CPA Firm implements this policy through the following procedures:

[1] If Single office CPA Firm were to be engaged to perform audit services for an issuer, it might need to revise its quality control policies and procedures to comply with Public Company Accounting Oversight Board (PCAOB) standards and to reflect Securities and Exchange Commission (SEC) requirements applicable to audits of issuers.

- Having the managing partner continually evaluate client relationships and specific engagements so that commercial considerations do not override the objectives of the system of quality control
- Emphasizing to all personnel that fee considerations and scope of services should not infringe upon quality work

3.08 *Policy 3: Responsibility for developing, implementing, and operating the firm's quality control system is assigned to personnel with sufficient and appropriate experience, authority, and ability.* Single office CPA Firm implements this policy by having the managing partner designate a quality control partner who is responsible for designing, implementing, and monitoring the firm's quality control system.

3.09 *Policy 4: Performance evaluation, compensation, and advancement (including incentive systems) with regard to personnel demonstrate the firm's overarching commitment to the objectives of the system of quality control.* Single office CPA Firm implements this policy through the following procedures:

- Designing and implementing performance evaluation and advancement systems that reward partners and staff involved in the accounting and auditing practice for the quality of their work and their compliance with professional standards.
- Establishing a compensation system that provides incentives to accounting and auditing partners and senior-level employees for the quality of their accounting and auditing work. The compensation system does the following:
    - — Takes into consideration firm feedback based on monitoring results and peer reviews of the work performed
    - — Rewards partners and personnel for timely (*a*) identification of significant and emerging accounting and auditing issues and (*b*) consultation with firm experts

3.10 *Policy 5: The firm devotes sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.* Single office CPA Firm implements this policy through the following procedures:

- Providing the designated quality control partner with sufficient time, authority, and resources to develop, implement, and maintain the firm's quality control policies and procedures
- Providing the firm's quality control documentation to personnel when they are initially hired and reviewing the documentation with them
- Reviewing the firm's quality control policies and procedures with personnel at firm training sessions at least annually

Relevant Ethical Requirements

3.11 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.12–.17.

3.12 *Policy 1: Personnel adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators.* Single office CPA Firm implements this policy through the following procedures:

- Designating a quality assurance partner to review relevant pronouncements relating to independence, integrity, and objectivity; answer questions; determine the circumstances for which consultation with sources outside the firm is required; and resolve matters
- Providing personnel with access to the AICPA *Professional Standards* service

- Establishing a system for identifying all services performed for each client and evaluating whether any of those services might impair independence

3.13 *Policy 2: The firm establishes procedures to communicate independence requirements to firm personnel and, where applicable, others subject to them.* Single office CPA Firm implements this policy through the following procedures:

- Informing personnel of those entities to which independence policies apply by doing the following on a timely basis:
  - Preparing and maintaining a list of entities with which firm personnel are prohibited from having a financial or business relationship
  - Making the list available to personnel so they may evaluate their independence (including personnel new to the firm)
  - Notifying personnel of changes in the list
- Providing frequent reminders of professional responsibilities to personnel, such as avoiding behavior that might be perceived as impairing their independence or objectivity

3.14 *Policy 3: The firm establishes procedures to identify and evaluate possible threats to independence and objectivity, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards.* Single office CPA Firm implements this policy through the following procedures:

- Requiring the engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall impact, if any, on independence requirements
- Accumulating and communicating relevant information to appropriate personnel so that the following can occur:
  - The firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements.
  - The firm can maintain and update information relating to independence.
  - The firm and the engagement partner can take appropriate action regarding identified threats to independence.
- Requiring personnel to promptly report circumstances and relationships that create a threat to independence, and independence breaches of which they become aware, so that appropriate action can be taken
- Establishing criteria to determine the need for safeguards for engagements where the following have taken place:
  - Monitoring procedures or peer review has identified weaknesses in previous years.
  - The same senior personnel have been used for five years or more on an audit or attestation engagement.
- Promptly communicating identified breaches of these policies and procedures, and the required corrective actions, to the following personnel:
  - The engagement partner who, with the firm, needs to address the breach.
  - Other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.
- Requiring the engagement partner and the other individuals referred to in the previous list to confirm to the firm that the required corrective actions have been taken

- Having a partner, or an individual designated by the partner, periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm's independence
- Establishing additional procedures that provide safeguards when the firm performs audit or other attest work for (*a*) significant clients or (*b*) clients at which partners or other senior personnel are offered key management positions or have accepted offers of employment

3.15 *Policy 4: The firm withdraws from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied.* Single office CPA Firm implements this policy through the following procedures:

- Consulting within the firm, and with legal counsel and other parties if necessary, when the firm believes that effective safeguards to reduce threats to independence to an acceptable level cannot be applied
- Withdrawing from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied

3.16 *Policy 5: The firm obtains written confirmation, at least annually, of compliance with its policies and procedures on independence from all firm personnel required to be independent by relevant requirements.* Single office CPA Firm implements this policy through the following procedures:

- Obtaining written representations from personnel, upon hire and on an annual basis, stating that they have read the firm's independence, integrity, and objectivity policies, understand the applicability of those policies to their activities, and have complied with the requirements of those policies since their last representation. (Such written representations are accompanied by the most current list of all entities with which firm personnel are prohibited from having a business relationship.)
- Reviewing these independence representations for completeness and resolving reported exceptions.
- Requiring the engagement partner to sign a step in the engagement program attesting to compliance with independence requirements that apply to the engagement.

3.17 *Policy 6: The firm establishes procedures for confirming the independence of another firm that performs part of the engagement.* Single office CPA Firm implements this policy through the following procedures:

- Using practice aids that prescribe the form and content of independence representations, and frequency with which they are to be obtained
- Requiring that such representations be documented

Acceptance and Continuance of Client Relationships and Specific Engagements

3.18 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm's client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client's management could reflect the reliability of the client's accounting records and financial representations and, therefore, affect the firm's reputation or involvement in litigation. A firm's policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

- has considered the integrity of the client, including the identity and business reputation of the client's principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;

- is competent to perform the engagement and has the capabilities and resources to do so;
- can comply with legal and ethical requirements; and
- has reached an understanding with the client regarding the services to be performed.

3.19 Single office CPA Firm satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the policies and procedures described in paragraphs 3.20–.24.

3.20 *Policy 1: The firm evaluates factors that have a bearing on management's integrity and considers the risk associated with providing professional services in particular circumstances.* Single office CPA Firm implements this policy through the following procedures:

- Informing personnel of the firm's policies and procedures for accepting and continuing clients, including those outlined in the firm's practice aids.
- Obtaining and evaluating relevant information such as the following before accepting or continuing a client:
  - The nature and purpose of the services to be provided and management's understanding thereof
  - The identity of the client's principal owners, key management, related parties, and those charged with its governance
  - Information obtained from inquiries of the client's bankers, factors, attorneys, credit services, and others who have business relationships with the entity
  - The nature of the client's operations, including its business practices, from sources such as annual reports, interim financial statements, reports to and from regulators, income tax returns, and credit reports
  - Information concerning the attitude of the client's principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting
- Evaluating the risk of providing services for the following engagements:
  - Engagements for entities operating in highly specialized or regulated industries, including financial institutions, governmental entities, and employee benefit plans
  - Engagements that require an inordinate amount of time to complete relative to the available resources of the firm
- Communicating with the predecessor accountant or auditor when required or recommended by professional standards. This communication also includes inquiries regarding the nature of any disagreements and whether there is evidence of opinion-shopping.
- Conducting a background check of the business, its officers, and the person(s) in question by using the services of an investigative company and evaluating the information obtained regarding management's integrity. Background checks are conducted when the firm is unable to obtain sufficient information about the prospective client after taking the steps described previously, or there is an indication that management or someone affiliated with the prospective client may be less than reputable.
- Evaluating the risk of providing services to significant clients or to other clients for which the firm's objectivity or the appearance of independence may be impaired. In broad terms, the significance of a client to a firm refers to relationships that could diminish a practitioner's objectivity and independence in performing attest services. In determining the significance of a client, the firm considers (*a*) the amount of time the partner devotes to the engagement, (*b*) the effect on the partner's stature within the firm as a result of his or her service to the client, (*c*) the manner in which

the partner is compensated, and (*d*) the effect that losing the client would have on the partner and the firm.

3.21 *Policy 2: The firm evaluates whether the engagement can be completed with professional competence; undertakes only those engagements for which the firm has the capabilities, resources, and professional competence to complete; and evaluates, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued.* Single office CPA Firm implements this policy through the following procedures:

- Evaluating whether the firm has obtained or can reasonably expect to obtain the knowledge and expertise necessary to perform the engagement, including relevant regulatory or reporting requirements.
- Evaluating whether the following are in place:
  — The firm has sufficient personnel with the necessary capabilities and competence.
  — Specialists are available if needed.
  — Individuals meeting the criteria and eligibility requirements to perform an engagement quality control review are available, when needed.
  — The firm is able to complete the engagement within the reporting deadline.
- Specifying conditions that trigger the requirement to reevaluate a specific client or engagement. The following are examples of such conditions:
  — Significant changes in the client, such as a major change in senior client personnel, ownership, advisers, the nature of its business, or the financial stability of the client.
  — Changes in the nature or scope of the engagement, including requests for additional services.
  — Changes in the composition of the firm, such as the loss of and inability to replace key personnel who are particularly knowledgeable about a specialized industry.
  — The decision to discontinue services to clients in a particular industry.
  — The existence of conditions that would have caused the firm to reject the client or engagement had such conditions existed at the time of the initial acceptance.
  — The client's delinquency in paying fees. (This may also affect the firm's independence.)
  — Engagements for entities operating in highly specialized or regulated industries, such as financial institutions, governmental entities, and employee benefit plans.
  — Engagements for entities in which there may be substantial doubt about the entity's ability to continue as a going concern.
  — Engagements in which the client has ignored prior recommendations, such as those that address deficiencies in internal control.
- Obtaining relevant information to determine whether the relationship should be continued and establishing a frequency for evaluations (for example, continuance decisions are made at least annually).
- Evaluating the information obtained regarding acceptance or continuance of the client or engagement through the following activities:

  a. The engagement partner assesses the information obtained about the client or the specific engagement, including information about the significance of the client to the firm, and makes a recommendation about whether the client or engagement should be accepted or continued.

  b. The engagement partner completes a client acceptance form and submits it to the managing partner for approval.

c. The engagement partner signs a step in the planning program noting consideration of client continuance and completes a form documenting the rationale and conclusion regarding client continuance if conditions exist that trigger the requirement to reevaluate a client or engagement between annual audits.

d. The managing partner assesses and approves the recommendation made by the engagement partner. If the managing partner recommends not accepting a client or discontinuing a client relationship, the managing partner discusses his or her reasons for the acceptance or continuance decision with the other partners.

- Establishing procedures for dealing with information that would have caused the firm to decline the engagement if the information had been available earlier.

3.22 *Policy 3: The firm obtains an understanding with the client regarding the services to be performed.* Single office CPA Firm implements this policy by requiring that, for all engagements, the firm prepare a written engagement letter documenting the understanding with the client and obtain the client's signature on that letter, thus minimizing the risk of misunderstanding regarding the nature, scope, and limitations of the services to be performed.

3.23 *Policy 4: The firm establishes procedures on withdrawal from an engagement or from both the engagement and the client relationship.* Single office CPA Firm implements this policy through the following procedures:

- Discussing with the appropriate level of the client's management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place or for the firm to report to regulatory authorities the withdrawal from the engagement, or from both the engagement and the client relationship, together with the reasons for the withdrawal
- Discussing with the appropriate level of the client's management and those charged with its governance withdrawal from the engagement or from both the engagement and the client relationship if the firm determines that it is appropriate to withdraw

3.24 *Policy 5: The firm documents how issues relating to acceptance or continuance of client relationships and specific engagements were resolved.* Single office CPA Firm implements this policy by documenting, in a memorandum to the engagement files, significant issues, consultations, conclusions, and the basis for the conclusions relating to acceptance or continuance of client relationships and specific engagements.

Human Resources

3.25 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (*a*) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (*b*) to enable the firm to issue reports that are appropriate in the circumstances. Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.26–.32.

3.26 *Policy 1: Personnel who are hired possess the characteristics that enable them to perform competently.* Single office CPA Firm implements this policy through the following procedures:

- Designating an individual in the firm to be responsible for the following activities:
  - Managing the human resources function
  - Evaluating the firm's personnel needs by considering factors such as existing clientele, anticipated growth, personnel turnover, and individual advancement
  - Developing criteria for determining which individuals will be involved in the interviewing and hiring process

- Establishing an understanding among the partners about the attributes, achievements, and experiences desired in entry-level and experienced personnel
- Setting guidelines for the additional procedures to be performed when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions

3.27 *Policy 2: The firm determines capabilities and competencies required for an engagement, including those required of the engagement partner.* Single office CPA Firm implements this policy by specifying the competencies that the engagement partners of the firm's accounting, auditing, and attestation engagements (or other persons responsible for supervising and signing or authorizing someone to sign the firm's report on such engagements) should possess. These competencies include having an understanding of the following:

- The role of the firm's system of quality control and the AICPA Code of Professional Conduct in ensuring the integrity of the accounting, auditing, and attest functions to users of reports.
- The performance, supervision, and reporting aspects of the engagement, which ordinarily are gained through training or participation in similar engagements.
- The industry in which the client operates, including its organization and operating characteristics, sufficient to identify areas of high or unusual risk associated with the engagement and to evaluate the reasonableness of industry-specific estimates.
- The professional standards applicable to the engagement and the industry in which the client operates. Such standards include accounting, auditing, and attestation standards, as well as rules and regulations issued by applicable regulators.
- The skills that contribute to sound professional judgment, including the ability to exercise professional skepticism.
- How the organization uses information technology and the manner in which information systems are used to record and maintain financial information.

3.28 *Policy 3: The firm determines the capabilities and competencies possessed by personnel.* Single office CPA Firm implements this policy through the following procedures:

- Establishing criteria for evaluating personal characteristics such as integrity, competence, and motivation
- Evaluating personnel at least annually to determine their capabilities and competencies

3.29 *Policy 4: The firm assigns the responsibility for each engagement to an engagement partner.* Single office CPA Firm implements this policy through the following procedures:

- Assigning responsibility for each engagement to an engagement partner who has the appropriate capabilities, competence, authority, and time to perform the role
- Clearly defining and communicating the responsibilities of the partner to the engagement partner
- Communicating the identity and role of the partner to management and those charged with governance
- Monitoring the workload and availability of engagement partners to enable these individuals to have sufficient time to adequately discharge their responsibilities

3.30 *Policy 5: The firm assigns personnel (including partners) based on the knowledge, skills, and abilities required in the circumstances and the nature and extent of supervision needed.* Single office CPA Firm implements this policy through the following procedures:

- Designating an appropriate person to be responsible for assigning personnel to engagements based on such factors as the following:
    - — Engagement type, size, significance, complexity, and risk profile

— Specialized experience and expertise required for the engagement and competencies gained through prior experience

— Personnel availability

— Timing of the work to be performed

— Continuity and rotation of personnel

— Opportunities for on-the-job training

— Situations for which independence or objectivity concerns exist

- Designating a partner to be responsible for partner and manager assignments
- Requiring approval of partner and manager assignments from the managing partner or other partner in the case of high-risk or significant client engagements

3.31 *Policy 6: Personnel participate in general and industry-specific continuing professional education (CPE) and professional development activities that enable them to accomplish assigned responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state boards of accountancy, and other regulators.* Single office CPA Firm implements this policy through the following procedures:

- Encouraging personnel to pass the Uniform CPA Examination
- Assigning responsibility to a partner to maintain a professional development program that does the following:

  — Requires personnel to participate in professional development programs in accordance with firm guidelines and in subjects that are relevant to their responsibilities

  — Takes into account the requirements of the AICPA, state boards of accountancy, and other regulatory agencies in establishing the firm's CPE requirements

  — Provides CPE course materials to, and maintains records of completed CPE for, professional personnel

  — Provides an orientation and training program for new hires

- Encouraging participation by personnel at each level in the firm in other professional development activities such as completing external professional development programs, including graduate-level and self-study courses, becoming members of professional organizations, serving on professional committees, writing for professional publications, and speaking to professional groups
- Communicating and distributing to personnel, when applicable, changes in accounting, auditing, attestation, and quality control standards, as well as independence requirements and the firm's guidance with respect to those standards and requirements

3.32 *Policy 7: Personnel selected for advancement have the qualifications to fulfill the responsibilities they will be called on to assume.* Single office CPA Firm implements this policy through the following procedures:

- Assigning responsibility to the three partners to jointly make advancement and termination decisions. Such responsibilities include the following:

  — Establishing criteria for evaluating personnel at each professional level and for advancement to the next higher level of responsibility. Such criteria give recognition and reward to the development and maintenance of competence and commitment to ethical principles.

  — Informing firm personnel about the criteria for advancement to the next higher level of responsibility.

  — Designating personnel responsible for preparing evaluations and determining when they should be prepared.

- — Informing personnel that failure to adhere to the firm's policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action.
- — Using forms that include the applicable qualifications when evaluating the performance of personnel. Such forms include qualifications related to performance quality and adherence to ethical principles.
- — Reviewing evaluations on a timely basis with the individual being evaluated.

- Counseling personnel regarding their progress and career opportunities by doing the following:
  - — Evaluating employees annually and at the end of each assignment lasting four weeks or longer to provide feedback on performance.
  - — Summarizing and reviewing with personnel annually the evaluation of their performance, including an assessment of their progress with the firm. Considerations include past performance, future objectives of the individual and the firm, the individual's assignment preferences, and career opportunities.
  - — Evaluating partners periodically by means of counseling, peer evaluation, or self-appraisal, as appropriate.

Engagement Performance

3.33 The objective of the engagement performance element of quality control is to provide the firm with reasonable assurance (*a*) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (*b*) that the firm or the engagement partner issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed. Single office CPA Firm satisfies these objectives by establishing and maintaining the policies and procedures described in paragraphs 3.34–.44.

3.34 *Policy 1: Planning for engagements meets professional, regulatory, and the firm's requirements.* Single office CPA Firm implements this policy by maintaining and providing personnel with the firm's practice aids that prescribe the factors the engagement team should consider in the planning process and the extent of documentation of those considerations. Planning considerations may vary depending on the size and complexity of the engagement. Planning generally includes the following activities:

- Assigning responsibilities to appropriate personnel during the planning phase
- Developing or updating background information on theclient and the engagement
- Considering client significance to the firm
- Developing a planning document that includes the following:
  - — Proposed work programs tailored to the specific engagement
  - — Staffing requirements and the need for specialized knowledge
  - — Consideration of the economic conditions affecting the client and its industry and their potential effect on the conduct of the engagement
  - — The risks, including fraud considerations, affecting the client and the engagement and how the risks may affect the procedures performed
  - — A budget that allocates sufficient time for the engagement to be performed in accordance with professional standards and the firm's quality control policies and procedures

3.35 *Policy 2: The engagement is performed, supervised, documented, and reported (or communicated) in accordance with the requirements of professional standards, applicable regulators, and the firm.* Single office CPA Firm implements this policy through the following procedures:

- Providing adequate supervision during the course of an engagement, including briefing the engagement team on the objectives of their work. The training, ability, and experience of the personnel are considered when assigning supervisors to the engagement.
- Requiring that a written work program be used in all engagements.
- Addressing significant issues arising during the engagement, considering their significance, and appropriately modifying the planned approach.
- Adhering to the guidelines set forth by the firm for the form and content of documentation of the work performed and conclusions reached. Such documentation includes standardized forms, checklists, and questionnaires used in the performance of engagements and explanations, when required, of how the firm integrates such aids into engagements.
- Requiring engagement documentation in accordance with professional standards, applicable regulatory requirements, and the firm's policies.

3.36 *Policy 3: Qualified engagement team members review work performed by other team members on a timely basis.* Single office CPA Firm implements this policy by adhering to the following guidelines established by the firm regarding review of the documentation of the work performed and conclusions reached, the financial statements and reports, and documentation of the review process:

- All reviewers are to have appropriate experience, competence, and responsibility.
- For each engagement, there is to be evidence of appropriate review of documentation of the work performed and conclusions reached, the financial statements, and the report.
- Engagement documentation is reviewed to determine whether the following have occurred:
  - The work has been performed in accordance with professional standards and regulatory and legal requirements.
  - Significant findings and issues have been raised for further consideration.
  - Appropriate consultations have taken place, and the resulting conclusions have been documented and implemented.
  - The nature, timing, and extent of work performed are appropriate and do not need revision.
  - The work performed supports the conclusions reached and is appropriately documented.
  - The evidence obtained is sufficient and appropriate to support the report.
  - The objectives of the engagement procedures have been achieved.

3.37 *Policy 4: Engagement teams complete the assembly of final engagement files on a timely basis.* Single office CPA Firm implements this policy by completing the assembly of final engagement files in accordance with professional standards and applicable regulatory requirements, if any.

3.38 *Policy 5: The firm maintains the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.* Single office CPA Firm implements this policy through the following procedures:

- Establishing and applying controls to accomplish the following:
  - Clearly determine when and by whom engagement documentation was prepared and reviewed.

   — Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means.
   — Prevent unauthorized changes to the engagement documentation.
   — Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

- Implementing procedures for properly distributing engagement documentation materials to engagement teams at the start of the engagement, preparing engagement documentation during the engagement, and assembling final documentation at the end of the engagement
- Implementing procedures to restrict access to, and enable proper distribution and confidential storage of, hardcopy engagement documentation
- Requiring the use of passwords by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users
- Implementing appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement
- Implementing procedures regarding original paper documents that have been electronically scanned or otherwise copied to another media that accomplish the following:
   — Generate copies that contain the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
   — Integrate the copies into the engagement files, including indexing and signing off on the copies as necessary.
   — Enable the copies to be retrieved and printed as necessary.

3.39 *Policy 6: The firm retains engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations.* Single office CPA Firm implements this policy through the following procedures:

- Retaining engagement documentation for a period of time sufficient to meet the requirements of the state board of accountancy and applicable professional standards
- Establishing procedures that
   — enable the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time;
   — provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed; and
   — enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

3.40 *Policy 7: The firm requires that consultation take place when appropriate; that sufficient and appropriate resources are available to enable appropriate consultation to take place; that all the relevant facts known to the engagement team are provided to those consulted; that the nature, scope, and conclusions of such consultations are documented; and that conclusions resulting from such consultations are implemented.* Single office CPA Firm implements this policy through the following procedures:

- Consulting with those having appropriate knowledge, authority, and experience within the firm (or, where applicable, outside the firm) on significant technical, ethical, and other matters. Single office CPA firm uses advisory services provided by other firms, professional and regulatory bodies, and commercial organizations that provide relevant quality control services. Before using such services, the firm evaluates whether the external provider is qualified for that purpose.

- Informing personnel of the firm's consultation policies and procedures.
- Requiring sufficiently experienced engagement team members to identify matters for consultation or consideration during the engagement.
- Requiring consultation in specialized areas or situations with appropriate individuals within and outside the firm when matters such as the following arise:
    - — The application of newly issued technical pronouncements
    - — Industries with special accounting, auditing, or reporting requirements, including unusually complex employee benefit plans
    - — Emerging practice problems
    - — Choices among alternative generally accepted accounting principles upon initial adoption or when an accounting change is made
    - — Reissuance of a report, consideration of omitted procedures after a report has been issued, or subsequent discovery of facts that existed at the date a report was issued
    - — Filing requirements of regulators
    - — Meetings with regulators at which the firm is to be called on to support the application of generally accepted accounting principles or generally accepted auditing standards that have been questioned
- Providing all professional personnel with access to adequate and current reference materials.
- Including all relevant facts, circumstances, the professional literature used, and conclusions reached in the engagement documentation of the work performed and conclusions reached.
- Documenting the issue on which consultation was sought and the results of the consultation, including any decisions taken, the basis for those decisions, and how they were implemented. If there is an unresolved disagreement, an outside source may be consulted to assist in determining the appropriate application of accounting principles.

3.41 *Policy 8: The firm deals with and resolves differences of opinion, documents and implements conclusions reached, and does not release the report until the matter is resolved.* Single office CPA Firm implements this policy through the following procedures:

- Requiring that all differences of professional judgment among members of an engagement team be resolved by the engagement and the quality control partners, and the managing partner if necessary, and that the report not be released until the matter is resolved.
- Requiring that conclusions reached be appropriately documented. If members of the team continues to disagree with the resolution, they may disassociate themselves from the resolution of the matter and may document that a disagreement continues to exist.

3.42 *Policy 9: The firm has criteria for determining whether an engagement quality control review should be performed, evaluates all engagements against the criteria, performs an engagement quality control review for all engagements that meet the criteria, and completes the review before the report is released.* Single office CPA Firm implements this policy through the following procedures:

- Establishing criteria such as the following:
    - — The identification of unusual circumstances or risks in an engagement or class of engagements as determined by the engagement partner or quality control partner.
    - — An engagement quality control review is required by law or regulation.
- Evaluating all engagements against the criteria
- Performing an engagement quality control review for all engagements that meet the criteria

3.43 *Policy 10: The firm establishes procedures addressing the nature, timing, extent, and documentation of the engagement quality control review.* Single office CPA Firm implements this policy through the following procedures:

- Implementing procedures addressing the nature, timing, and extent of the review. The firm has concluded that performing an engagement quality control review is not necessary to obtain sufficient appropriate audit evidence for audit engagements; therefore, the engagement quality control review does not need to be completed before the date of the auditor's report. When the engagement quality control review results in additional audit procedures being performed, the date of the auditor's report is changed to the date by which sufficient appropriate audit evidence has been obtained. The firm's procedures require that for audit and attestation engagements, the engagement quality control reviewer do the following:
    - Discuss significant accounting, auditing, and financial reporting issues with the engagement partner, including matters for which there has been consultation.
    - Discuss with the engagement partner the engagement team's identification and audit of high-risk assertions, transactions and account balances.
    - Confirm with the engagement partner that there are no significant unresolved issues.
    - Review selected working papers relating to the significant judgments the engagement team made and the conclusions they reached.
    - Review documentation of the resolution of significant accounting, auditing, or financial reporting issues, including documentation of consultation with firm personnel or external sources.
    - Review the summary of uncorrected misstatements related to known and likely misstatements.
    - Review additional engagement documentation to the extent considered necessary.
    - Read the financial statements and the report and consider whether the report is appropriate.
    - Complete the review before the release of the report. The review may be conducted at appropriate stages during the engagement.
    - Determine whether the issues raised in the review indicate a need to change the auditor's report date.
- Resolving conflicting opinions between the engagement partner and the engagement quality control reviewer regarding significant matters. The policy requires documentation of the resolution of conflicting opinions before the release of the audit report.
- Implementing procedures addressing documentation by the engagement quality control reviewer. The firm's procedures require documentation of the following:
    - The procedures required by the firm's policies on engagement quality control review have been performed.
    - The engagement quality control review has been completed before the report is released.
    - No matters have come to the attention of the engagement quality control reviewer that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.

3.44 *Policy 11: The firm establishes criteria for the eligibility of engagement quality control reviewers.* Single office CPA Firm implements this policy by establishing the following criteria for an engagement quality control reviewer:

- Is selected by the quality control partner or the managing partner

- Has sufficient technical expertise and experience
- Carries out his or her responsibilities with objectivity and due professional care without regard to the relative positions of the audit engagement partner and the engagement quality control reviewer
- Meets the independence requirements relating to the engagements reviewed, even though the engagement quality control reviewer is not a member of the engagement team
- Does not make decisions for the engagement team or participate in the performance of the engagement except that the engagement partner may consult the engagement quality control reviewer at any stage during the engagement

When the firm does not have suitably qualified personnel to perform the engagement quality control review, the firm contracts with a suitably qualified external person to perform the engagement quality control review.

Monitoring

3.45 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm's quality control system, and a firm's compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

- Adherence to professional standards and regulatory and legal requirements
- Whether the quality control system has been appropriately designed and effectively implemented
- Whether the firm's quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

3.46 Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.47–.56.

3.47 *Policy 1: The firm assigns responsibility for the monitoring process, including performance, to a partner or competent individual.* Single office CPA Firm implements this policy through the following procedures:

- Designating a partner or senior personnel to be responsible for quality assurance, including ensuring that the firm's quality control policies and procedures and its methodologies remain relevant and adequate. Factors to be considered include the following:
  - — Mergers and divestitures of portions of the practice
  - — Changes in professional standards or other regulatory requirements applicable to the firm's practice
  - — Results of inspections and peer reviews
  - — Review of litigation and regulatory enforcement actions against the firm and its personnel
  - — Changes in applicable AICPA membership requirements
- Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm's standards of quality in performing their duties.
- Identifying the need to do the following:
  - — Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed.
  - — Improve compliance with firm policies and procedures related to the other elements of quality control.

3.48 *Policy 2: The firm performs monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and the firm's quality control policies and procedures.*

3.49 For purposes of illustrating Policy 2, two scenarios are described. Scenario 1 illustrates how Single office CPA Firm would satisfy the objective of Policy 2 by reviewing engagements throughout the year. Scenario 2 illustrates how Single office CPA Firm would implement Policy 2 by performing an annual inspection, thereby reviewing engagements during a designated period in the year.

3.50 *Scenario 1: Monitoring by Reviewing Engagements Throughout the Year.* Single office CPA Firm implements Policy 2 through the following procedures:

- Designating a partner or management-level individual not previously associated with the engagement to perform either a preissuance or postissuance review of the engagement.
- Establishing the approach for performing preissuance or postissuance reviews, for example, the comprehensiveness of the review and the frequency for summarizing findings (such as monthly or quarterly). The comprehensiveness of the review of selected engagements is similar to that performed in an inspection or peer review.
- Designating the forms and checklists to be used during the engagement and functional element reviews and the extent of the documentation required. (Examples of functional elements are the human resources function and the firm's library.)
- Selecting a cross-section of engagements at the beginning of the monitoring year for preissuance or postissuance review and reevaluating that selection throughout the year as circumstances dictate. Criteria used for selecting engagements include the following:
    - — Significant specialized industries with emphasis on high-risk engagements
    - — Audits of the financial statements of employee benefit plans
    - — First-year engagements
    - — Significant client engagements
    - — Level of service performed (that is, audit and attest, review, or compilation)
    - — Engagements performed by all partners and other management-level personnel having accounting and auditing responsibilities
    - — Engagements performed under *Government Auditing Standards* (Yellow Book engagements)
    - — Engagements for which there have been complaints or allegations from firm personnel, clients, or other third parties that the work performed by the firm failed to comply with professional standards, regulatory requirements, or the firm's system of quality control
    - — Engagements in which there were significant disagreements between the review partner and the engagement partner
- Reviewing the selected engagements. Deficiencies identified as a result of this process are summarized and evaluated to determine whether the following are necessary:
    - — Additional emphasis on specific areas or industries in future engagements
    - — Modifications to existing policies and procedures to prevent the deficiencies noted from recurring
- Reviewing other engagement files at least annually for compliance with the firm's quality control policies and procedures including reviewing correspondence regarding consultation on independence, integrity, and objectivity matters (for example, assessments of significant clients) and acceptance and continuance decisions.

- Reviewing the resolution of matters reported by professional personnel regarding independence to determine that matters have been appropriately considered and resolved.
- Preparing a summary of the deficiencies noted resulting from the preissuance and postissuance reviews so that the partner may incorporate any recommended changes into the firm's policies and procedures.
- Communicating to all professional personnel the deficiencies noted and related changes in quality control procedures.
- Following up on planned corrective actions to determine whether the actions were taken as planned and whether they achieved the intended objectives.

3.51 *Scenario 2: Monitoring by Inspecting a Sample of Engagements During a Designated Period of the Year.* Single office CPA Firm implements Policy 2 through the following procedures:

- Designating a partner to be responsible for performing an annual inspection using guidance prepared by the AICPA for performing inspection procedures. These procedures include reviewing a cross-section of engagements using the following criteria in selecting engagements:
    - — Significant specialized industries with emphasis on high-risk engagements
    - — Audits of the financial statements of employee benefit plans
    - — First-year engagements
    - — Significant client engagements
    - — Level of service performed (that is, audit and attest, review, or compilation)
    - — Engagements performed by all partners and other management-level personnel having accounting and auditing responsibilities
    - — Engagements performed under *Government Auditing Standards* (Yellow Book engagements)
    - — Engagements for which there have been complaints or allegations from firm personnel, clients, or other third parties that the work performed by the firm failed to comply with professional standards, regulatory requirements, or the firm's system of quality control
    - — Engagements in which there were significant disagreements between the quality review partner and the engagement partner
- Establishing an approach and timetable for performing the inspection procedures and determining the forms and checklists to be used during the inspection and the extent of documentation required.
- Deciding how long to retain detailed inspection documentation (as opposed to summaries).
- Reviewing correspondence regarding consultation on independence, integrity, and objectivity matters and acceptance and continuance decisions.
- Reviewing the resolution of matters reported by professional personnel regarding independence to determine that matters have been appropriately considered and resolved.
- Selecting a sample of engagements for review to determine compliance with the firm's quality control policies and procedures, reevaluating that selection throughout the process, and reviewing the selected engagements.
- Preparing a summary inspection report for the partner or management group that evaluates the overall results of the inspection and sets forth any recommended changes that should be made to the firm's policies and procedures.
- Reviewing the recommended corrective actions and reaching final conclusions about the actions to be taken.
- Communicating inspection findings and quality control changes to all professional personnel.

- Following up on planned corrective actions to determine whether those actions were taken and whether they achieved the intended objective(s).

3.52 In addition to the procedures described under Scenarios 1 or 2, Single office CPA Firm also implements Policy 2 through the following procedures:

- Reviewing and evaluating firm practice aids, such as audit programs, forms, and checklists, and considering whether they reflect recent professional pronouncements
- Providing information during staff meetings regarding new professional standards, regulatory requirements, and the related changes that should be made to firm practice aids
- Reviewing, or designating a management-level individual to be responsible for reviewing, the professional development policies and procedures to determine whether they are appropriate, effective, and meet the needs of the firm
- Reviewing, or designating a management-level individual to review summaries of the CPE records of the firm's professional personnel to evaluate each individual's compliance with the requirements of the AICPA and other applicable regulators
- Reviewing other administrative and personnel records pertaining to the quality control elements
- Soliciting information from the firm's personnel during staff meetings regarding the effectiveness of training programs

3.53 *Policy 3: The firm communicates (a) deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action to relevant engagement partners and other appropriate personnel and (b) the results of the monitoring of its quality control system process to relevant firm personnel at least annually.* Single office CPA Firm implements this policy through the following procedures:

- Preparing a summary report for the partners that evaluates the overall results of the monitoring and sets forth any recommended changes that should be made to the firm's policies and procedures
- Reviewing the recommended corrective actions and reaching final conclusions as to the actions to be taken
- Communicating to all professional personnel the deficiencies noted and the related changes in quality control procedures
- Following up on planned corrective actions to determine whether those actions were taken and whether they achieved the intended objective(s)

3.54 *Policy 4: The firm deals appropriately with complaints and allegations.* Single office CPA Firm implements this policy through the following procedures:

- Having the managing partner inform personnel that they may raise any concerns regarding complaints or allegations about noncompliance with professional standards, regulatory and legal requirements, or the firm's system of quality control with any partner without fear of reprisals.
- Having a partner who is not otherwise involved in the engagement investigate the following:
  - Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
  - Allegations of noncompliance with the firm's system of quality control
  - Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations
- Documenting complaints and allegations and the responses to them.

3.55 *Policy 5: The firm prepares appropriate documentation to provide evidence of the operation of each element of its system of quality control.* Single office CPA Firm implements this policy by designing its summary monitoring report to provide evidence of the operation of each element of its system of quality control, including the following:

- Monitoring procedures, including the procedure for selecting completed engagements to be inspected
- A record of the evaluation of the following:
  - Adherence to professional standards and regulatory and legal requirements
  - Whether the quality control system has been appropriately designed and effectively implemented
  - Whether the firm's quality control policies and procedures have been appropriately applied so that reports that are issued by the firm or engagement partners are appropriate in the circumstances
- Identification of the deficiencies noted, an evaluation of their effects, and the basis for determining whether further action is necessary and what that action should be

3.56 *Policy 6: The firm retains documentation providing evidence of the operation of the system of quality control for an appropriate period of time*. Single office CPA Firm implements this policy by requiring retention of the summary monitoring report for a period of time sufficient to meet the firm's peer review or other regulatory requirements.

Chapter 4:

System of Quality Control for a CPA Firm's Accounting Practice—Sole Practitioner

4.01 This chapter describes how a sole practitioner (Sole Practitioner, CPA) implements each element of quality control in her accounting practice. Sole Practitioner, CPA, is a hypothetical firm of which Sole Practitioner, CPA, is the sole owner. The firm has no professional staff; however, on occasion Sole Practitioner, CPA, hires per-diem professionals. Her accounting practice consists only of engagements subject to SSARSs. She uses practice aids that have been subjected to peer review in accordance with standards established by the AICPA. Sole Practitioner, CPA, uses per-diem personnel to assist her and recognizes that her policies and procedures would have to change if she were to perform audit or attest engagements or hire full-time or part-time professional staff.

Quality Control Policies and Procedures

4.02 The firm's system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those policies. The policies and procedures are required to be documented. Sole Practitioner, CPA, documents her system of quality control by filling out checklists and questionnaires such as those included in the AICPA Peer Review Program Manual. Sole Practitioner, CPA, reviews the documentation at least annually and updates it as necessary.

4.03 The firm should communicate its quality control policies and procedures to its personnel. Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality

4.04 Sole Practitioner, CPA, meets this requirement with regard to herself by annually reviewing the checklists and questionnaires used to document each element of her system of quality control. Sole Practitioner, CPA, communicates her policies and procedures to per-diem professionals when they are initially contracted for an engagement by holding a discussion with them and follows up on individual engagements. Sole Practitioner, CPA, requires per-diem personnel to be familiar with and to comply with these policies and procedures.

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

4.05 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.06–.08.

4.06 *Policy 1: I am ultimately responsible for the firm's system of quality control.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Accepting responsibility for the firm's system of quality control
- Educating herself about requirements for a system of quality control
- Designing and implementing policies and procedures required for her firm's system of quality control

4.07 *Policy 2: Commercial considerations do not override the quality of the work performed.* Sole Practitioner, CPA, implements this policy by continually evaluating client relationships and specific engagements so that commercial considerations do not override the objectives of the system of quality control.

4.08 *Policy 3: I devote sufficient and appropriate resources for the development, communication, and support of the firm's quality control policies and procedures.* Sole Practitioner, CPA, implements this policy by reviewing and updating the quality control policies, procedures, and documentation on an annual basis.

Relevant Ethical Requirements

4.09 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.10–.13.

4.10 *Policy 1: I adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Subscribing to the AICPA *Professional Standards* service.
- Consulting the AICPA Web site for information about changes in professional ethics and independence standards.
- Reviewing unpaid client fees to ascertain whether any outstanding amounts impair the firm's independence.
- Reviewing relevant pronouncements published in the *Journal of Accountancy* relating to independence, integrity, and objectivity and retaining relevant issues of the *Journal of Accountancy*.
- Attending periodic professional training in ethics and independence.
- Complying with SSARSs by disclosing in the accountant's compilation report instances in which the firm is not independent.
- Considering the significance of each client to the firm. In broad terms, the significance of a client to a firm refers to relationships that could diminish a practitioner's objectivity and independence in performing attest services. In determining the significance of a client, the firm considers (*a*) the amount of time the partner devotes to the engagement and (*b*) the effect that losing the client would have on the firm.

4.11 *Policy 2: I communicate independence requirements to per-diem professionals.* Sole Practitioner, CPA, implements this policy by making per-diem personnel aware of financial, family, business, and other relationships that may be prohibited by applicable requirements.

4.12 *Policy 3: I establish procedures to identify and evaluate possible threats to independence and objectivity and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards. I withdraw from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Considering relevant information about client engagements, including the scope of services, to enable her to evaluate the overall impact on independence
- Consulting with AICPA Ethics Hotline with concerns about possible threats to independence
- Accumulating and communicating relevant information to per-diem personnel as appropriate so that the following can occur:
    - Sole Practitioner, CPA, and per-diem personnel can readily determine whether they satisfy independence requirements.
    - Sole Practitioner, CPA, can maintain and update information relating to independence.
    - Sole Practitioner, CPA, can take appropriate action regarding identified threats to independence.

- Requiring per-diem personnel to promptly notify her of independence breaches of which they become aware, and circumstances and relationships that create a threat to independence, so that appropriate action can be taken
- Documenting any safeguards applied to eliminate threats to independence or reduce them to an acceptable level
- Withdrawing from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied

4.13 *Policy 4: I confirm, in writing, my compliance with policies and procedures on independence and require written confirmation from all per-diem professionals required to be independent by relevant requirements.* Sole Practitioner, CPA, implements this policy by signing a step on each engagement program attesting to her independence and requiring per-diem personnel to do the same.

Acceptance and Continuance of Client Relationships and Specific Engagements

4.14 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm's client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client's management could reflect the reliability of the client's accounting records and financial representations and, therefore, affect the firm's reputation or involvement in litigation. A firm's policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it:

- has considered the integrity of the client, including the identity and business reputation of the client's principal owners, key management, related parties and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
- is competent to perform the engagement and has the capabilities and resources to do so;
- can comply with legal and ethical requirements; and
- has reached an understanding with the client regarding the services to be performed.

4.15 Sole Practitioner, CPA, satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the policies and procedures described in paragraphs 4.16–.20.

4.16 *Policy 1: I evaluate factors that have a bearing on management's integrity and consider the risk associated with providing professional services in particular circumstances.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Obtaining information such as the following before accepting or continuing a client:
  - The nature and purpose of the services to be provided
  - The identity of the client's principal owners, key management, related parties, and those charged with its governance
  - The nature of the client's operations, including its business practices, from sources such as prior-year reports, internally generated financial statements (if applicable), income tax returns, and credit reports
  - Information concerning the attitude of the client's principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting

- Inquiring of third parties such as bankers, factors, and legal counsel about management's business reputation and integrity.
- Communicating with the predecessor accountant when required or suggested by professional standards.[1]
- Evaluating the information obtained regarding management's integrity.
- Evaluating the risk of providing review services to significant clients or to other clients for which Sole Practitioner's, CPA, objectivity or the appearance of independence may be impaired. In determining the significance of a client, Sole Practitioner, CPA, considers the amount of time she devotes to the engagement and the effect that losing the client would have on her practice.

4.17 *Policy 2: I evaluate whether the engagement can be completed with professional competence; undertake only those engagements for which the firm has the capabilities, resources, and professional competence to complete; and evaluate, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Establishing a cut-off date by which evaluations of engagements should be performed, for example, before work on the current-year engagement begins
- Considering conditions, such as the following, that require reevaluation of a client or specific engagement and obtaining the relevant information to determine whether the relationship should be continued:
  — Significant changes in the client, for example, a major change in ownership, senior client personnel, directors, advisers, the nature of the business, or the financial stability of the client.
  — Changes in the nature or scope of the engagement, including requests for additional services.
  — Client significance.
  — Matters that would have caused the firm to reject the client or engagement had such conditions existed at the time of the initial acceptance. If such matters exist, Sole Practitioner, CPA, considers the professional and legal responsibilities that apply to the circumstances and the possibility of withdrawing from the engagement or both the engagement and the client relationship.
  — The client's delinquency in paying fees. (This also may affect the firm's independence.)
- Determining if she has, or can reasonably obtain, the knowledge and expertise to perform the engagement
- Evaluating the information obtained regarding the engagement, making the acceptance or continuance decision, and documenting her evaluation or conclusion in a memorandum or by signing off next to the relevant item in a practice aid

4.18 *Policy 3: I obtain an understanding with the client regarding the services to be performed.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Adhering to all requirements set forth in professional standards regarding obtaining an understanding with the client
- Requiring that the understanding with the client be documented either through an engagement letter or in a memorandum

---

[1] AR section 400, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2), provides guidance on communications between a predecessor and successor accountant when the successor accountant decides to communicate with the predecessor accountant. It also requires a successor accountant who becomes aware of information that leads him or her to believe the financial statements reported on by the predecessor accountant may require revision to request that the client communicate this information to the predecessor accountant.

4.19 *Policy 4: I follow established procedures on withdrawal from an engagement or from both the engagement and the client relationship.* Sole Practitioner, CPA, implements this policy by discussing the issues and her conclusion with the appropriate level of the client's management and those charged with its governance. If she considers it necessary, she also discusses her decision with her attorney.

4.20 *Policy 5: I document how issues relating to acceptance or continuance of client relationships and specific engagements were resolved.* Sole Practitioner, CPA, implements this policy by documenting, in a memorandum to the engagement files, significant issues, consultations, conclusions, and the basis for the conclusions relating to acceptance or continuance of client relationships and specific engagements.

Human Resources

4.21 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (*a*) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (*b*) to enable the firm to issue reports that are appropriate in the circumstances. Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.22–.23.

4.22 *Policy 1: I hire per-diem personnel of integrity who possess the characteristics that enable them to perform competently.* Sole Practitioner, CPA, implements this policy by setting criteria, regarding such factors as education, certification or licensure, and experience, that per-diem personnel must meet to be hired.

4.23 *Policy 2: I maintain the knowledge, skills, and abilities required in the circumstances by participating in general and industry-specific continuing professional education (CPE) and professional development activities that enable me to accomplish my responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state boards of accountancy, and other applicable regulators. I also monitor the compliance of per-diem employees with CPE requirements.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Maintaining the competencies necessary to accomplish responsibilities related to each of the firm's engagements
- Establishing a professional development program that takes into account the requirements of the AICPA and state boards of accountancy
- Participating in external professional development programs, including graduate-level and self-study courses
- Joining and becoming an active member of professional organizations
- Serving on professional committees, writing for professional publications on topics she is knowledgeable about, and participating in other professional activities
- Considering changes in the applicable professional standards when determining her professional development program
- Setting criteria that per-diem personnel must meet to competently perform engagements, such as the following examples:
  - Determining that per-diem personnel are in compliance with the applicable professional education requirements of the AICPA, state boards of accountancy, and state CPA societies
  - Obtaining and retaining documentation of such compliance
- Evaluating the knowledge and expertise required to perform an engagement prior to accepting the client or engagement
- Reading professional publications, such as state society journals, to keep abreast of changes in accounting standards and any industry-specific pronouncements that affect the client
- Consulting the AICPA Web site for information about changes in professional standards

Engagement Performance

4.24 The objective of the engagement performance element of quality control is to provide the firm with reasonable assurance (*a*) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (*b*) that the firm or the practitioner-in-charge issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed. Sole Practitioner, CPA, satisfies these objectives by establishing and maintaining the policies and procedures described in paragraphs 4.25–.32.

4.25 *Policy 1: I plan engagements to meet professional standards, regulatory requirements, and the firm's requirements.* Sole Practitioner, CPA, implements this policy by adhering to professional standards regarding the planning process and the extent of documentation of the planning, if applicable. Engagement planning considerations may include the following:

- Developing or updating client information.
- Assessing the significance of the client to her firm.
- Obtaining an engagement letter for engagements performed under SSARSs. AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), requires the accountant to either issue a compilation report or document an understanding with the entity through the use of an engagement letter when the accountant submits financial statements to a client that are not expected to be used by a third party.
- Reviewing prior financial statements and accountants' reports.
- Using work programs and applicable reporting and disclosure checklists.

4.26 *Policy 2: I perform, supervise, review, document, and report (or communicate) in accordance with the requirements of professional standards.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Requiring the use of appropriate practice aids in all engagements
- Maintaining the availability of current practice aids and AICPA professional standards
- Briefing per-diem personnel on the engagement so that they understand the objectives of their work
- Documenting the work performed in accordance with professional standards and the firm's policy
- Supervising per-diem personnel as appropriate based on the following:
    - Understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation
    - Understanding of professional standards and regulatory and legal requirements
    - Technical knowledge, including knowledge of relevant information technology
    - Knowledge of relevant industries in which the client operates
    - Ability to apply professional judgment
    - Understanding of the firm's quality control policies and procedures
    - Experience level
- Reviewing and initialing all engagement documentation prepared by per-diem personnel

4.27 *Policy 3: I complete the assembly of final engagement files on a timely basis.* Sole Practitioner, CPA, implements this policy by completing the assembly of final engagement files on a timely basis in accordance with professional standards and applicable regulatory requirements, if any.

4.28 *Policy 4: I maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Establishing and applying controls to do the following:
  - Clearly determine when and by whom engagement documentation was prepared and reviewed.
  - Protect the integrity of the information at all stages of the engagement.
  - Prevent unauthorized changes to the engagement documentation.
  - Allow access to the engagement documentation by per-diem personnel and other authorized parties as necessary to properly discharge their responsibilities.
- Tracking the distribution of engagement documentation materials to the per-diem personnel at the start of the engagement, preparing engagement documentation during the engagement, and assembling final documentation at the end of the engagement
- Restricting access to, and enabling proper distribution and confidential storage of, hardcopy engagement documentation
- Using passwords or data encryption, or both, to restrict access to electronic engagement documentation to authorized users
- Using appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement
- Implementing procedures regarding original paper documents that have been electronically scanned or otherwise copied to another media that accomplish the following:
  - Generate copies that contain the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
  - Integrate the copies into the engagement files, including indexing and signing off on the copies as necessary.
  - Enable the copies to be retrieved and printed as necessary.

4.29 *Policy 5: I retain engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Retaining engagement documentation for a period of time sufficient to meet the requirements of the state board of accountancy and applicable professional standards
- Enabling the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time
- Providing, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed
- Enabling authorized external parties to access and review specific engagement documentation for quality control or other purposes

4.30 *Policy 6: I require that consultation take place when appropriate; I make sufficient and appropriate resources available to enable appropriate consultation to take place; I provide to those consulted all the relevant facts known to me; I document the nature, scope, and conclusions of such consultations; and I implement conclusions resulting from such consultations.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Maintaining current technical references to assist in resolving practice problems
- Referring to the AICPA's Technical Hotline or other qualified individuals if a practice problem arises for which the firm needs additional expertise
- Requiring that documentation of consultation include the following:
    - — All relevant facts and circumstances about the issue on which consultation was sought.
    - — References to professional literature used in the analysis of the matter.
    - — The results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented. This documentation is retained with the engagement documentation.

4.31 *Policy 7: I deal with and resolve differences of opinion; I document and implement the conclusions reached; and I do not release the report until the matter is resolved.* Sole Practitioner, CPA, implements this policy by (*a*) evaluating issues of professional judgment when differences of opinion arise with per-diem personnel, with those consulted, or with an external reviewer and (*b*) resolving the matter before releasing the report. If persons involved in the engagement continue to disagree with the resolution, they may disassociate themselves from the resolution of the matter and document that a disagreement continues to exist.

4.32 *Policy 8: I have criteria for determining whether an engagement quality control review should be performed; I evaluate all engagements against the criteria before I accept the engagement; I contract with a qualified external person to perform the engagement quality control review; and I do not release the report until the review is completed.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Establishing the following criteria for determining whether an engagement quality control review should be performed:
    - — The engagement is subject to Statements on Auditing Standards (SASs) or Statements on Standards for Attestation Engagements (SSAEs).
    - — An initial engagement for a client is in a specialized industry in which Sole Practitioner, CPA, has had no previous experience.
    - — An engagement quality control review is required by law or regulation.
- Evaluating all engagements against the criteria
- Contracting with a qualified external person to perform the engagement quality control review
- Not releasing the report until the review is completed

Monitoring

4.33 The objective of the monitoring element of a system of quality control is to provide the firm with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm's quality control system, and a firm's compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

- Adherence to professional standards and regulatory and legal requirements
- Whether the quality control system has been appropriately designed and effectively implemented
- Whether the firm's quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

4.34 Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.35–.39.

4.35 *Policy 1: I perform monitoring procedures that are sufficiently comprehensive to enable me to assess compliance with all applicable professional standards and the firm's quality control policies and procedures.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Performing a postissuance review of selected engagements at least annually[2]
- Summarizing the findings from the firm's monitoring procedures at least annually and considering the systemic causes of findings that indicate improvements are needed
- Determining any corrective actions or improvements to be made with respect to the specific engagements reviewed or the firm's quality control policies and procedures and taking those actions, including necessary modifications to the quality control system, on a timely basis
- Reviewing compliance with the firm's policies and procedures related to relevant ethical responsibilities, including independence, human resources, acceptance and continuance of client relationships and specific engagements, and engagement performance
- Reviewing all policies and procedures and revising those affected by changes in professional standards or the nature of her practice
- Reviewing and determining that the firm's practice aids are current and reflect recent professional pronouncements and changes in her practice
- Reviewing CPE records to determine whether the classroom training and self-study programs she uses are appropriate for the firm's practice
- Reviewing CPE records to determine compliance with the requirements of the AICPA and other applicable regulatory agencies

4.36 *Policy 2: I deal appropriately with complaints and allegations.* Sole Practitioner, CPA, implements this policy through the following procedures:

- Investigating the following:
    - — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
    - — Allegations of noncompliance with the firm's system of quality control
    - — Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations
- Documenting complaints and allegations and the responses to them

4.37 *Policy 3: I prepare appropriate documentation to provide evidence of the operation of each element of the firm's system of quality control.* Sole Practitioner, CPA, implements this policy by documenting evidence of the operation of each element of the firm's system of quality control by preparing a memorandum of the following:

- Monitoring procedures, including the procedure for selecting completed engagements to be subject to postissuance review
- A record of the evaluation of the following:
    - — Adherence to professional standards and regulatory and legal requirements
    - — Whether the quality control system has been appropriately designed and effectively implemented

[2] A postissuance review may be performed as part of an inspection. A sole proprietor may consider engaging another CPA to perform the inspection to obtain a fresh look at the engagement. See paragraph 3.52, "Scenario 2: Monitoring by Inspecting a Sample of Engagements During a Designated Period of the Year," for a description of how a firm considers and evaluates, on an ongoing basis, compliance with a firm's policies and procedures by performing an annual inspection. Note that a preissuance review by the sole proprietor does not satisfy the monitoring requirements.

- — Whether the firm's quality control policies and procedures have been appropriately applied so that reports that are issued by the firm are appropriate in the circumstances
- Identification of the deficiencies noted, an evaluation of their effects, and the basis for determining whether further action is necessary and what that action should be

4.38 Although the form and content of that documentation is a matter of judgment, the illustration in table 1 in this chapter is an example of such documentation.

4.39 *Policy 4: I retain documentation of evidence of the operation of the system of quality control for an appropriate period of time.* Sole Practitioner, CPA, implements this policy by requiring retention of the summary report for a period of time sufficient to meet the firm's peer review or other regulatory requirements.

Table 1: Summary of Quality Control Monitoring For the Calendar Year 20XX

Element of Quality Control and Applicable Policies	*Reviewer's Initials and Date Reviewed*	*Location of Additional Documentation*
Leadership Responsibilities for Quality Within the Firm		**These policies are evidenced by the overall operation of the firm's system of quality control.**
Relevant Ethical Requirements		
Policy 1. Adhering to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, and other applicable regulators	JB 6/30/XX	Independence confirmation files
Policy 2. Communicating independence requirements to per-diem professionals and, where applicable, others subject to them	JB 6/30/XX	Independence confirmation files
Policy 3. Establishing procedures to help mitigate possible threats to my independence and objectivity	JB 6/30/XX	Independence confirmation files
Policy 4. Confirming, in writing, my compliance with policies and procedures on independence and obtaining written confirmation from all per-diem professionals required to be independent by relevant requirements	JB 6/30/XX	Independence confirmation files
Acceptance and Continuance of Client Relationships and Specific Engagements		
Policy 1. Evaluating factors that have a bearing on management's integrity and considering the risk associated with providing professional services in particular circumstances	JB 6/30/XX	Client acceptance files and client engagement files

Element of Quality Control and Applicable Policies	*Reviewer's Initials and Date Reviewed*	*Location of Additional Documentation*
Policy 2. Accepting or continuing to perform only those engagements that I can complete with professional competence and evaluating whether the relationship should be continued	JB 6/30/XX	Engagement files
Policy 3. Obtaining an understanding with the client regarding services to be performed	JB 6/30/XX	Engagement files
Policy 4. Following established procedures on withdrawal from an engagement or from both the engagement and the client relationship	JB 6/30/XX	Not applicable for year ended 20XX
Policy 5. Documenting how issues relating to acceptance or continuance of client relationships and specific engagements were resolved	JB 6/30/XX	Client acceptance files and client engagement files
Human Resources		
Policy 1. Hiring per-diem personnel of integrity who possess the characteristics that enable them to perform competently	JB 6/30/XX	Personnel files
Policy 2. (*a*) Maintaining the knowledge, skills, and abilities required in the circumstances by participating in general and industry-specific continuing professional education (CPE) and professional development activities that enable me to accomplish my responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA society, state boards of accountancy, and other applicable regulators and (*b*) monitoring for compliance the CPE requirements of per-diem employees	JB 6/30/XX	Personnel files
Engagement Performance		
Policy 1. Planning engagements to meet professional standards, regulatory requirements, and the firm's requirements	JB 6/30/XX	Engagement files
Policy 2. Performing, supervising, reviewing, documenting, and reporting (or communicating) in accordance with the requirements of professional standards	JB 6/30/XX	Engagement files
Policy 3. Completing the assembly of final engagement files on a timely basis	JB 6/30/XX	Engagement files
Policy 4. Maintaining the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation	JB 6/30/XX	Engagement files

(continued)

Element of Quality Control and Applicable Policies	*Reviewer's Initials and Date Reviewed*	*Location of Additional Documentation*
Policy 5. Retaining engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations	JB 6/30/XX	Engagement files
Policy 6. Requiring that consultation take place when appropriate; making sufficient and appropriate resources available to enable appropriate consultation to take place; providing to those consulted all the relevant facts known to me; documenting the nature, scope, and conclusions of such consultations; and implementing conclusions resulting from such consultations	JB 6/30/XX	Engagement files
Policy 7. Dealing with and resolving differences of opinion; documenting and implementing the conclusions reached; and not releasing the report until the matter is resolved	JB 6/30/XX	Engagement files
Policy 8. Evaluating all engagements against my criteria for an engagement quality control review; contracting with a qualified external person to perform the engagement quality control review; and not releasing the report until the review is completed	JB 6/30/XX	Client acceptance files
Monitoring		
Policy 1. Performing monitoring procedures that are sufficiently comprehensive to enable me to assess compliance with all applicable professional standards and the firm's quality control policies and procedures	JB 6/30/XX	Monitoring files
Policy 2. Dealing appropriately with complaints and allegations	JB 6/30/XX	Engagement files
Policy 3. Preparing appropriate documentation to provide evidence of the operation of each element of the firm's system of quality control	JB 6/30/XX	Monitoring files
Policy 4. Retaining documentation of evidence of the operation of the system of quality control for an appropriate period of time	JB 6/30/XX	Monitoring files

Chapter 5:

System of Quality Control for an Alternative Practice Structure

5.01 An alternative practice structure, as referred to in this practice aid, is a nontraditional structure in the practice of public accounting that contains an attest and a nonattest portion. The attest portion is conducted through a firm owned and controlled by CPAs (a *closely aligned CPA firm*). The nonattest portion is conducted through a separate issuer or nonissuer firm owned and controlled by individuals who are not CPAs (a *non-CPA-owned entity*[1]). The non-CPA-owned entity may be an issuer or a nonissurer. Alternative practice structures are described in Interpretation 101-14, "The Effect of Alternative Practice Structures on the Applicability of Independence Rules," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .16), which is included as appendix B of this practice aid.

5.02 The quality control policies and procedures established by a closely aligned CPA firm that may or may not perform audit services are illustrated in chapters 2–3, as applicable. Additional quality control policies and procedures relevant to alternative practice structures may be necessary when certain portions of the CPA firm's system of quality control (*a*) reside at the non-CPA-owned entity or (*b*) operate in conjunction with the system of quality control of the non-CPA-owned entity.

5.03 Elements of quality control that might reside in a non-CPA-owned entity include the following:

- Relevant ethical requirements
- Human resources
- Monitoring of relevant ethical requirements and human resources

For example, the non-CPA-owned entity may be responsible for hiring personnel for both firms.

5.04 This chapter describes how Non-CPA-Owned Entity and Closely Aligned CPA Firm, hypothetical firms that are organized in an alternative practice structure, implement incremental quality control policies and procedures to address the previously mentioned elements of quality control that reside at Non-CPA-Owned Entity. Closely Aligned CPA Firm has no issuer clients[2] and implements the policies and procedures described in chapter 2 of this practice aid.

Quality Control Policies and Procedures

5.05 *Policy 1: The top-tier company*[3] *maintains a system of quality control.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Designating a qualified individual to be responsible for the following:
  - — Designing and directing the quality control activities at the top-tier company
  - — Disseminating information to all subsidiaries and affiliated entities, all subsidiaries associated with CPA firms, and all CPA firms closely aligned with company subsidiaries
- Providing all company personnel and indirect superiors[4] with access to the company's quality control policies and procedures

---

[1] A *non-CPA-owned entity* is an entity that is closely aligned to a CPA firm through common employment; leasing of employees, equipment, or facilities; or other similar arrangements. In addition to one or more professional service subsidiaries or divisions that offer nonattest professional services (for example, tax, personal financial planning, and management consulting), a non-CPA-owned entity may have subsidiaries or divisions such as a bank, insurance company, or broker-dealer.

[2] If the closely aligned CPA firm were to be engaged to perform audit services for an issuer, the non-CPA-owned entity or its affiliated companies might need to revise their quality control policies and procedures to comply with Public Company Accounting Oversight Board (PCAOB) standards and to reflect Securities and Exchange Commission (SEC) requirements applicable to audits of issuers.

[3] The top-tier company is the parent company of the non-CPA-owned entity, which may be an issuer.

[4] Indirect superiors may be involved in regional management of direct superiors; thus, they may need to adhere to requirements.

Relevant Ethical Requirements

5.06 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Closely Aligned CPA Firm satisfies this objective by ensuring that Non-CPA-Owned Entity establishes and maintains the policies and procedures described in paragraphs 5.07–.09.

5.07 *Policy 1: Non-CPA-Owned Entity adheres to applicable relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes,the GAO, and any other applicable regulators.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Developing policies and procedures to ensure the independence of Closely Aligned CPA Firm as required by the applicable aforementioned regulators. (Non-CPA-Owned Entity is required to be independent only in the context of its alignment with the CPA firm; it does not perform any attest functions, so its independence is not relevant.)
- Designating an officer to be responsible for providing guidance, answering questions, monitoring compliance, and resolving matters concerning independence, integrity, and objectivity of Closely Aligned CPA Firm.
- Determining when consultation with outside sources regarding independence, integrity, and objectivity matters is required.
- Reviewing written representations from *direct superiors* and *indirect superiors*[5] and others as applicable and resolving potential independence, integrity, and objectivity matters.
- Maintaining documentation of the resolution of independence, integrity, and objectivity matters.
- Requiring entity personnel to obtain sufficient training and education to accomplish their responsibilities with respect to independence, integrity, and objectivity.
- Obtaining from Closely Aligned CPA Firm a current list of all entities with which firm personnel are prohibited from having a financial or business relationship.[6]
- Obtaining written representations from personnel of Non-CPA-Owned Entity, upon hire and on an annual basis, stating that they are familiar with and in compliance with Non-CPA-Owned Entity's policies and procedures regarding independence, integrity, and objectivity.

5.08 *Policy 2: Personnel of Non-CPA-Owned Entity are familiar with policies and procedures regarding relevant ethical requirements.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Providing all of its personnel with access to its policies and procedures and guidance materials related to independence, integrity, and objectivity, such as manuals, memoranda, and databases containing professional and regulatory literature
- Advising personnel of Non-CPA-Owned Entity of the financial or other relationships, circumstances, or activities involving either individuals or entities that may be prohibited, as in the following examples:

---

[5] *Direct superiors* are defined to include those persons so closely associated with a partner or manager who is a covered member that such persons can directly control the activities of such partner or manager. For this purpose, a person who can directly control is the immediate superior of the partner or manager who has the power to direct the activities of that person so as to be able to directly or indirectly (for example, through another entity over which the direct superior can exercise significant influence) derive a benefit from that person's activities. Examples would be the person who has day-to-day responsibility for the activities of the partner or manager and is in a position to recommend promotions and compensation levels. *Indirect superiors* are those persons who are one or more levels above direct superiors. Generally, this would start with persons in an organization structure to whom direct superiors report and go up the line from there.

[6] Examples of business relationships prohibited by independence standard-setting bodies such as the AICPA, the GAO, and the U.S. Department of Labor because they might impair independence include being an investor in a joint venture with a client that is material or serving as a board member on the board of an audit client.

- — Business relationships with Closely Aligned CPA Firm's clients or with nonclients that have investor or investee relationships with Closely Aligned CPA Firm's clients
- — Loans to and from Closely Aligned CPA Firm's clients, including loans from Closely Aligned CPA Firm's financial institution clients
- — Family members who are employed by Closely Aligned CPA Firm's clients or who serve as director, officer, manager, or in other audit-sensitive positions with clients of Closely Aligned CPA Firm, including not-for-profit organizations
- — Past due fees from Closely Aligned CPA Firm's clients
- — Services in which the service provider assumes some of the responsibilities of client management
- — Performing certain bookkeeping services for governmental entities that are clients of Closely Aligned CPA Firm
- — Client relationships with Non-CPA-Owned Entity in which Closely Aligned CPA Firm leases employees, facilities, and so on
- — Situations in which personnel of Non-CPA-Owned Entity act as promoters, underwriters, voting trustees, directors, or officers of Closely Aligned CPA Firm's clients
- — Direct and material indirect financial interests in clients of Closely Aligned CPA Firm
- — Material investments by Closely Aligned CPA Firm's clients in Non-CPA-Owned Entity that allow the clients to exercise significant influence over Non-CPA-Owned Entity

- Advising personnel of Non-CPA-Owned Entity of the following:
  - — All direct superiors with whom, and all activities in which, Non-CPA-Owned Entity is prohibited from engaging, as defined in Non-CPA-Owned Entity's independence policies and procedures
  - — All indirect superiors with whom, and all activities in which, Non-CPA-Owned Entity is prohibited from engaging, as defined by Non-CPA-Owned Entity's policies and procedures
- Obtaining client lists from Closely Aligned CPA Firm to inform all personnel, on a timely basis, of Closely Aligned CPA Firm client's to which independence policies apply
- Obtaining documented representations from all Non-CPA-Owned Entity personnel (including those defined as direct and indirect superiors or supervisors of affiliated issuers),[7] upon hire and on an annual basis thereafter, stating that they are familiar with and in compliance with policies and procedures regarding relevant ethical requirements

5.09 *Policy 3: Non-CPA-Owned Entity identifies and evaluates possible threats to independence and objectivity and takes appropriate action to eliminate those threats or reduce them to an appropriate level by applying safeguards.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Assigning responsibility for obtaining, maintaining, and reviewing documented representations from all Non-CPA-Owned Entity personnel (see paragraph 5.08) for completeness and resolving reported exceptions with Non-CPA-Owned Entity's chief executive
- Requiring the chief executive of Non-CPA-Owned Entity to review or to designate an appropriate individual to review unpaid fees from clients of Closely Aligned CPA Firm to ascertain whether any outstanding amounts impair Closely Aligned CPA Firm's independence
- Requiring all professionals to report, on a timely basis when identified, circumstances and relationships that form a threat to independence so that appropriate action can be taken

[7] Affiliated issuers include the top-tier company and all entities consolidated in the top-tier company's financial statements. Individuals in these entities are not in situations in which a direct superior can exercise significant influence.

- Requiring all professionals to report, on a timely basis when identified, apparent violations of independence, integrity, or objectivity policies involving themselves, their spouses, or their dependents and the corrective actions taken or proposed to be taken

Human Resources

5.10 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (*a*) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (*b*) to enable the firm to issue reports that are appropriate in the circumstances. Closely Aligned CPA Firm satisfies this objective by ensuring that Non-CPA-Owned Entity establishes and maintains the policies and procedures comparable to those that are described in paragraphs 5.11–.13 with regard to its leased or per-diem personnel.

5.11 *Policy 1: Leased or per-diem personnel possess characteristics that enable them to competently perform and review engagements.* Non-CPA-Owned Entity implements this policy by having knowledge and experience equivalent to that of Closely Aligned CPA Firm to make the following decisions:

- Designating an individual from Closely Aligned CPA Firm to be responsible for hiring and managing human resources within Non-CPA-Owned Entity on behalf of Closely Aligned CPA Firm.
- Reviewing Closely Aligned CPA Firm's personnel requirements for attest engagements to ensure that sufficient and capable staff persons are available to perform those engagements.
- Involving members of Closely Aligned CPA Firm in the process of hiring professionals on behalf of Closely Aligned CPA Firm that include establishing the attributes, achievements, and experiences desired in entry-level and experienced personnel. Such criteria assist in evaluating (*a*) the personal characteristics of professionals, such as integrity, competence, and motivation, and (*b*) whether professionals can competently perform responsibilities within Closely Aligned CPA Firm.
- Establishing guidelines for additional procedures to be performed when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions.
- Establishing criteria for determining which individuals will be involved in interviewing and hiring personnel on behalf of Closely Aligned CPA Firm.

5.12 *Policy 2: Leased or per-diem personnel participate in general and industry-specific continuing professional education (CPE) and other professional activities that enable them to accomplish assigned responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state accountancy boards, and other regulatory agencies.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Designating an individual to be responsible for CPE and professional development activities, including maintaining appropriate documentation evidencing that leased and per-diem personnel have met the professional education requirements of the AICPA, state boards of accountancy, and other applicable regulators
- Establishing policies that require individuals performing audits, reviews, compilations, or attestation engagements for Closely Aligned CPA Firm to participate in CPE related to accounting and auditing
- Establishing policies requiring all leased or per-diem personnel to be in compliance with the professional education requirements of the boards of accountancy in states where they are licensed and with the AICPA, state societies, and other regulatory agencies, as applicable
- Establishing an orientation and training policy for new hires who will perform audits, reviews, compilations, or attestation engagements for Closely Aligned CPA Firm or who will have partner- or manager-level responsibility for the overall supervision or review of such engagements

- Ensuring that leased or per-diem personnel are informed about changes in accounting and auditing standards, independence, integrity, and objectivity requirements, and Closely Aligned CPA Firm's technical policies and procedures that are relevant to them
- Encouraging leased or per-diem personnel to participate in other professional activities, such as graduate-level courses, membership in professional organizations, and serving on professional committees

5.13 *Policy 3: Leased or per-diem personnel who are selected for advancement have the qualifications to accomplish the responsibilities they will be called upon to assume. Factors to consider include the degree of technical training and proficiency required in the circumstances and the nature and extent of supervision of assignments relating to audits, reviews, compilations, or attestation engagements performed by Closely Aligned CPA Firm.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Establishing a system for providing information to Closely Aligned CPA Firm so that it can make appropriate personnel decisions, such as assignments for audits, reviews, compilations, and attestation engagements.
- Designating an individual to be responsible for the following:
  - Establishing criteria for the evaluation and advancement of leased or per-diem personnel, including appropriate documentation
  - Making advancement and termination decisions, including identifying responsibilities and requirements for evaluation, at each professional level and deciding who will prepare those evaluations
  - Developing appropriate evaluation forms
  - Reviewing performance evaluations with personnel, discussing future objectives of Closely Aligned CPA Firm and the individual, and discussing assignment preferences
  - Periodically evaluating owners of Closely Aligned CPA Firm by means of peer evaluation or self-appraisal
  - Counseling leased or per-diem personnel regarding their progress and career opportunities
- Establishing an arrangement with Closely Aligned CPA Firm in which a supervisory-level individual of Closely Aligned CPA Firm is responsible for assisting Non-CPA-Owned Entity in making advancement and termination decisions concerning leased or per-diem personnel. This would include evaluating personnel needs, establishing hiring objectives, and providing final approval.
- Developing a system for evaluating the performance of leased or per-diem personnel and advising them of their progress.

Monitoring

5.14 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm's quality control system, and a firm's compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

- Adherence to professional standards and regulatory and legal requirements
- Whether the quality control system has been appropriately designed and effectively implemented
- Whether the firm's quality control policies and procedures have been operating effectively so that reports that are issued by the CPA firm are appropriate in the circumstances

5.15 A CPA firm that is closely aligned with a non-CPA-owned entity satisfies this objective by ensuring that the non-CPA-owned entity establishes and maintains the policies and procedures described in paragraphs 5.16–.19.

5.16 *Policy 1: Non-CPA-Owned Entity considers and evaluates, on an ongoing basis, the relevance and adequacy of its policies and procedures related to relevant ethical requirements that are applicable to all its personnel and its personnel management policies and procedures that are applicable to leased or per-diem personnel.* Non-CPA-Owned Entity implements this policy by designating qualified individuals to be responsible for monitoring quality assurance, including ensuring that Non-CPA-Owned Entity's quality control guidance is regularly updated to reflect changes in professional standards related to independence, CPE, and other regulatory requirements through the following procedures:

- Implementing a system of ongoing monitoring of the effectiveness and appropriateness of policies and procedures related to independence, objectivity, and integrity as applicable to all personnel of Non-CPA-Owned Entity and compliance with those policies and procedures
- Ensuring, on an ongoing basis, that guidance materials and any practice aids Non-CPA-Owned Entity provides to Closely Aligned CPA Firm are appropriately designed to assist Closely Aligned CPA Firm in adhering to quality control standards
- Maintaining a system to ensure that the practice aids regarding independence and other technical matters provided by Non-CPA-Owned Entity are updated to reflect current professional standards and regulatory requirements and are relevant to and effective for Closely Aligned CPA Firm's practice
- Ensuring that Non-CPA-Owned Entity informs and provides guidance to leased or per-diem personnel regarding new professional standards, regulatory requirements, and related changes to relevant Closely Aligned CPA Firm policies or practice aids

5.17 *Policy 2: Non-CPA-Owned Entity considers and evaluates, on an ongoing basis, compliance with its policies and procedures related to relevant ethical requirements that are applicable to all of its personnel and personnel management policies and procedures that are applicable to leased or per-diem personnel.* Non-CPA-Owned Entity implements this policy by considering and evaluating, on an ongoing basis, compliance with policies and procedures related to independence, integrity, and objectivity, as applicable to all of its personnel, through the following procedures:

- Performing timely monitoring of policies and procedures, on an ongoing basis, related to independence, integrity, and objectivity to evaluate compliance with those policies and procedures. The monitoring policies and procedures could include an internal audit function, ongoing review by senior management, or engaging an independent CPA to examine and report on compliance.
- Summarizing and communicating the results of the monitoring to all of its personnel and communicating any suggested changes to policies and procedures to the appropriate levels of personnel in Non-CPA-Owned Entity.
- Correcting noted deficiencies based on the results of the monitoring to ensure compliance with policies and procedures.

5.18 *Policy 3: Non-CPA-Owned Entity deals appropriately with complaints and allegations.* Non-CPA-Owned Entity implements this policy through the following procedures:

- Performing timely monitoring of policies and procedures, on an ongoing basis, related to independence, integrity, and objectivity to evaluate compliance with those policies and procedures. The monitoring policies and procedures could include an internal audit function, ongoing review by senior management, or engaging an independent CPA to examine and report on compliance.
- Having the firm's ethics committee (excluding any members who are otherwise involved in the engagement under investigation) investigate the following:

- — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
- — Allegations of noncompliance with the firm's system of quality control
- — Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations

- Documenting complaints and allegations and the responses to them.

5.19 *Policy 4: Non-CPA-Owned Entity prepares appropriate documentation to provide evidence of the operation of each element of its system of quality control.* Non-CPA-Owned Entity implements this policy by preparing and retaining documentation that provides evidence of the operation of the system of quality control for a period of time sufficient to permit those performing monitoring procedures to evaluate the firm's compliance with its system of quality control.

Appendix A:

Statement on Quality Control Standards (SQCS) No. 7, *A Firm's System of Quality Control*

Supersedes SQCSs Nos. 2–6. SQCS No. 1 was previously superseded by SQCS No. 2.

Source: SQCS No. 7.

Effective date: Applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 2009.

Statements on Quality Control Standards (SQCS) are issued by the Auditing Standards Board. Firms that are enrolled in an Institute-approved practice-monitoring program are obligated to adhere to quality control standards established by the Institute.

On July 30, 2002, President Bush signed the Sarbanes-Oxley Act of 2002 (Act) which created a five-member Public Company Accounting Oversight Board (PCAOB) and charged it with overseeing audits of issuers, as defined by the Act, or other entities subject to SEC regulation (issuers). Under the Act, the PCAOB's duties include, among other things, establishing auditing, quality control, ethics, independence, and other Standards relating to audits of issuers.

The AICPA's Quality Control Standards do not address the quality-control ramifications of the Act nor do they address the quality control ramifications of PCAOB Standards that must be followed by auditors of issuers. The AICPA's Quality Control Standards do not purport to include any modifications that may be necessary for a firm's system of quality control to conform to PCAOB Standards. Additional information about the PCAOB and the Act can be obtained at the PCAOB Web site, www.pcaobus.org, and the AICPA Web site, http://thecaq.aicpa.org/Resources/Sarbanes+Oxley/.

Introduction

.01 The purpose of this section is to establish standards and provide guidance for a CPA firm's responsibilities for its system of quality control for its accounting and auditing practice. This section describes elements of quality control and other matters essential to the effective design, implementation, and maintenance of the system. This section is to be read in conjunction with the AICPA Code of Professional Conduct.

.02 This section also sets forth the meaning of certain terms used in SQCSs issued by the Auditing Standards Board in describing the professional requirements imposed on firms and engagement partners.

System of Quality Control

.03 The firm must establish a system of quality control designed to provide the firm with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the firm or engagement partners issue reports that are appropriate in the circumstances. A system of quality control consists of policies designed to achieve these objectives and the procedures necessary to implement and monitor compliance with those policies.

.04 The nature of the policies and procedures developed by individual firms to comply with this section will depend on various factors such as the size and operating characteristics of the firm. The system of quality control should be designed to provide the firm with reasonable assurance that the segments of the firm's engagements performed by its foreign member firms or offices or by its domestic or foreign affiliates, if any, are performed in accordance with professional standards in the United States when such standards are applicable.

Definitions

.05 In this section, the following terms have the meanings given:

a. *Accounting and auditing practice.* A practice that performs engagements covered by this section, which are audit, attestation, compilation, review and any other services for which standards have been established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct (ET sections 201–202). Although standards for other engagements may be established by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an accounting and auditing practice.

b. *Engagement documentation.* The record of work performed, results obtained, and conclusions the practitioner reached, also known as *working papers* or *workpapers*.

c. *Engagement partner.* An individual responsible for supervising engagements covered by this section and signing or authorizing an individual to sign the report on such engagements, and who, where required, has the appropriate authority from a professional, legal or regulatory body. Firms may use different titles to refer to individuals with this authority.

d. *Engagement quality control review.* A process designed to provide an objective evaluation, by an individual or individuals who are not members of the engagement team, of the significant judgments the engagement team made and the conclusions they reached in formulating the report.

e. *Engagement quality control reviewer.* A partner, other person in the firm, qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to perform the engagement quality control review.

f. *Engagement team.* All personnel performing the engagement, excluding those who perform the engagement quality control review. The engagement team (i) includes all employees and contractors retained by the firm who perform engagement procedures, irrespective of their functional classification (for example, audit, tax, or management consulting services) and (ii) excludes specialists as discussed in AU section 336, *Using the Work of a Specialist*, and individuals who perform only routine clerical functions, such as word processing and photocopying.

g. *Firm.* A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the American Institute of Certified Public Accountants that is engaged in the practice of public accounting.

h. *Inspection*. A retrospective evaluation of the adequacy of the firm's quality control policies and procedures, its personnel's understanding of those policies and procedures and the extent of the firm's compliance with them. Inspection is an element of monitoring.

i. *Monitoring*. A process comprising an ongoing consideration and evaluation of the firm's system of quality control, the objective of which is to enable the firm to obtain reasonable assurance that its system of quality control is designed appropriately and operating effectively.

j. *Partner.* An individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, partner may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.

k. *Personnel*. All individuals who perform professional services for which the firm is responsible, whether or not they are CPAs.

l. *Professional standards*. Standards established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct or other standard setting bodies that set auditing and attest standards applicable to the engagement being performed.

m. *Qualified external person.* An individual outside the firm with the capabilities and competence to act as an engagement partner.

n. *Reasonable assurance.* In the context of this standard, a high, but not absolute, level of assurance.

o. *Relevant ethical requirements*. Ethical requirements to which the firm and its personnel are subject, which consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies, which may be more restrictive.

p. *Staff*. Personnel, other than partners and engagement partners, including any specialists who are employees of the firm.

Professional Requirements

.06 SQCSs contain professional requirements together with related guidance in the form of explanatory material. Firms have a responsibility to consider the entire text of an SQCS with regard to their system of quality control and in understanding and applying the professional requirements of the relevant SQCSs.

.07 Not every paragraph of an SQCS carries a professional requirement that the firm is expected to fulfill. Rather, the professional requirements are communicated by the language and the meaning of the words used in the SQCSs.

.08 SQCSs use two categories of professional requirements, identified by specific terms, to describe the degree of responsibility they impose on firms, as follows:

- *Unconditional requirements.* The firm is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SQCSs use the words *must* or *is required* to indicate an unconditional requirement.
- *Presumptively mandatory requirements.* The firm is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the firm may depart from a presumptively mandatory requirement provided the practitioner documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SQCSs use the word *should* to indicate a presumptively mandatory requirement.

If an SQCS provides that a procedure or action is one that the firm "should consider," the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of an SQCS are to be understood and applied in the context of the explanatory material that provides guidance for their application.

Explanatory Material

.09 Explanatory material is defined as the text within an SQCS (excluding any related interpretations[1]) that may:

- Provide further explanation and guidance on the professional requirements; or
- Identify and describe other procedures or actions relating to the activities of the firm.

[1] Interpretive publications differ from explanatory material. Interpretive publications, for example, interpretations of the SQCSs, reside outside of the standards section of an SQCS and are recommendations on the application of the SQCS in specific circumstances. In contrast, explanatory material is always contained within the standards sections of the SQCS and is meant to be more descriptive in nature.

.10 Explanatory material that provides further explanation and guidance on the professional requirements is intended to be descriptive rather than imperative. That is, it explains the objective of the professional requirements (where not otherwise self-evident); it explains why the firm might consider or employ particular procedures, depending on the circumstances; and it provides additional information for the firm to consider in exercising professional judgment with regard to its system of quality control.

.11 Explanatory material that identifies and describes other procedures or actions relating to the activities of the firm is not intended to impose a professional requirement for the firm to perform the suggested procedures or actions. Rather, these procedures or actions require the firm's attention and understanding; how and whether the firm carries out such procedures or actions with regard to its system of quality control depends on the exercise of professional judgment in the circumstances consistent with the objective of the standard. The words *may*, *might*, and *could* are used to describe these actions and procedures.

Documentation and Communication of Quality Control Policies and Procedures

.12 The firm should document its quality control policies and procedures. The size, structure, and nature of the practice of the firm are important considerations in determining the extent of the documentation of established quality control policies and procedures. For example, documentation of established quality control policies and procedures would generally be expected to be more extensive in a large firm than in a small firm and in a multioffice firm than in a single-office firm.

.13 The firm should communicate its quality control policies and procedures to its personnel. Although communication is enhanced if it is in writing, the communication of quality control policies and procedures is not required to be in writing. Effective communication of the firm's quality control policies and procedures:

- Describes the quality control policies and procedures and the objectives they are designed to achieve;
- Includes the message that each individual has a personal responsibility for quality and is expected to be familiar with and to comply with these policies and procedures; and
- Stresses the importance of obtaining feedback on its system of quality control from its personnel and encourages its personnel to communicate their views or concerns on quality control matters.

Elements of a System of Quality Control

.14 The firm's system of quality control should include policies and procedures addressing each of the following elements:

a. Leadership responsibilities for quality within the firm (the "tone at the top")

b. Relevant ethical requirements

c. Acceptance and continuance of client relationships and specific engagements

d. Human resources

e. Engagement performance

f. Monitoring

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

.15 The firm should promote an internal culture based on the recognition that quality is essential in performing engagements and should establish policies and procedures to support that culture. Such policies and procedures should require the firm's leadership (managing partner or board of managing partners, chief executive officer, or equivalent) to assume ultimate responsibility for the firm's system of quality control.

.16 The firm's leadership and the examples it sets significantly influence the internal culture of the firm. The promotion of a quality-oriented internal culture depends on clear, consistent, and frequent actions and messages from all levels of the firm's management that emphasize the firm's quality control policies and procedures, and the requirement to:

a. Perform work that complies with professional standards and regulatory and legal requirements.

b. Issue reports that are appropriate in the circumstances.

Such actions and messages encourage a culture that recognizes and rewards quality work. These actions and messages may be communicated by training seminars, meetings, formal or informal dialogue, mission statements, newsletters, or briefing memoranda. They may be incorporated in the firm's internal documentation and training materials, and in partner and staff appraisal procedures such that they will support and reinforce the firm's view on the importance of quality and how, practically, it is to be achieved.

.17 Of particular importance in promoting an internal culture based on quality is the need for the firm's leadership to recognize that the firm's business strategy is subject to the overarching requirement for the firm to achieve the objectives of the system of quality control in all the engagements that the firm performs. Accordingly, the firm should establish policies to:

a. Assign management responsibilities so that commercial considerations do not override the quality of work performed;

b. Address performance evaluation, compensation, and advancement (including incentive systems) with regard to its personnel, to demonstrate the firm's overarching commitment to the objectives of the system of quality control; and

c. Devote sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.

.18 Any person or persons assigned operational responsibility for the firm's quality control system by the firm's leadership should have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures.

Relevant Ethical Requirements

.19 The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements.

.20 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care
- Scope and nature of services

.21 The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel, and, where applicable, others subject to independence requirements, maintain independence where required. Independence requirements are set forth in Rule 101 (ET section 101) and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and safeguards to mitigate such threats involving matters that are not explicitly addressed in the Code of Professional Conduct, are set forth in the AICPA's Conceptual Framework for AICPA Independence Standards. Such policies and procedures should enable the firm to:

a. Communicate its independence requirements to its personnel and, where applicable, others subject to them.

b. Identify and evaluate circumstances and relationships that create threats to independence, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards, or, if effective safeguards cannot be applied, withdrawing from the engagement.[2]

.22 Such policies and procedures should require:

a. The engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall effect, if any, on independence requirements.

b. Personnel to promptly notify the engagement partner and the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken.

c. The accumulation and communication of relevant information to appropriate personnel so that:

(i) The firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements;

(ii) The firm can maintain and update information relating to independence; and

(iii) The firm and the engagement partner can take appropriate action regarding identified threats to independence.

.23 The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements, and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for:

a. Personnel to promptly notify the firm of independence breaches of which they become aware.

b. The firm to promptly communicate identified breaches of these policies and procedures and the required corrective actions to:

(i) The engagement partner who, with the firm, has the responsibility to address the breach; and

(ii) Other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.

c. Confirmation to the firm by the engagement partner and the other individuals referred to in subparagraph b.(ii) that the required corrective actions have been taken.

.24 At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in Rule 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Written confirmation may be in paper or electronic form.

---

[2] An accountant is not precluded from issuing a report with respect to a compilation of financial statements for an entity with respect to which the accountant is not independent. If the accountant is not independent, disclosure of the accountant's lack of independence is the appropriate response.

.25 The purpose of obtaining confirmation and taking appropriate action on information indicating noncompliance is to demonstrate the importance that the firm attaches to independence and keep the issue current for and visible to its personnel.

.26 For all audit or attestation engagements where regulatory or other authorities require the rotation of personnel after a specified period, the firm's policies and procedures should address these requirements.

Acceptance and Continuance of Client Relationships and Specific Engagements

.27 The firm should establish policies and procedures for the acceptance and continuance of client relationships and specific engagements, designed to provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where the firm:

a. Has considered the integrity of the client, including the identity and business reputation of the client's principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;

b. Is competent to perform the engagement and has the capabilities and resources to do so; and

c. Can comply with legal and ethical requirements.

The firm should obtain such information as it considers necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client.

.28 To minimize the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed, policies and procedures should provide for obtaining an understanding with the client regarding those services. Professional standards may provide guidance in deciding whether the understanding should be oral or written.

.29 When issues have been identified, and the firm has decided to accept or continue the client relationship or a specific engagement, the firm should document how the issues were resolved.

.30 Factors to consider regarding the integrity of a client include:

- The nature of the client's operations, including its business practices.
- Information concerning the attitude of the client's principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting.

The extent of knowledge a firm will have regarding the integrity of a client will generally grow within the context of an ongoing relationship with that client.

.31 Matters to consider in accepting or continuing the client engagement include whether:

- Firm personnel have knowledge of relevant industries or subject matters or the ability to effectively gain the necessary knowledge;
- Firm personnel have experience with relevant regulatory or reporting requirements, or the ability to effectively gain the necessary competencies;
- The firm has sufficient personnel with the necessary capabilities and competence;
- Specialists are available, if needed;
- Individuals meeting the criteria and eligibility requirements to perform an engagement quality control review are available, where applicable; and
- The firm is able to complete the engagement within the reporting deadline.

.32 If a potential conflict of interest is identified in accepting an engagement from a new or an existing client, the firm should determine whether it is appropriate to accept the engagement. Where the engagement is accepted, the firm should consider any ethical requirements that exist under AICPA Interpretation No. 102-2, "Conflicts of Interest," under Rule 102, *Integrity and Objectivity* (ET section 102), such as disclosure of the relationship to the client and other appropriate parties.

.33 Deciding whether to continue a client relationship includes consideration of significant issues that have arisen during the current or previous engagements, and their implications for continuing the relationship.

.34 If the firm obtains information that would have caused it to decline an engagement if that information had been available earlier, policies and procedures on the continuance of the engagement and the client relationship should include consideration of the professional and legal responsibilities that apply to the circumstances, and the possibility of withdrawing from the engagement or from both the engagement and the client relationship.

.35 Policies and procedures on withdrawal from an engagement or from both the engagement and the client relationship should include documenting significant issues, consultations, conclusions, and the basis for the conclusions. Policies and procedures may include:

- Discussing with the appropriate level of the client's management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances.
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place, or for the firm to report the withdrawal from the engagement or from both the engagement and the client relationship, together with the reasons for the withdrawal, to regulatory authorities.
- If the firm determines that it is appropriate to withdraw, discussing with the appropriate level of the client's management and those charged with its governance withdrawal from the engagement or from both the engagement and the client relationship.

.36 In certain situations, the auditor may be appointed by statutory procedures or required by law or regulation to perform the engagement. Accordingly, certain of the considerations regarding the acceptance and continuance of client relationships and specific engagements, as set out in paragraphs .27–.35, may not be relevant. Nonetheless, establishing policies and procedures as described may provide valuable information to public sector auditors in performing risk assessments and in carrying out reporting responsibilities.

Human Resources

.37 The firm should establish policies and procedures designed to provide it with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary to:

a. Perform its engagements in accordance with professional standards and regulatory and legal requirements, and

b. Enable the firm to issue reports that are appropriate in the circumstances.

.38 Such policies and procedures should address the following:

- Recruitment and hiring, if applicable;
- Determining capabilities and competencies;
- Assigning personnel to engagements, if applicable;
- Professional development; and

- Performance evaluation, compensation, and advancement.

Recruitment and Hiring

.39 Effective recruitment processes and procedures help the firm select individuals of integrity, who have the capacity to develop the capabilities and competence necessary to perform the firm's work, and possess the appropriate characteristics to enable them to perform competently. Examples of such characteristics may include meeting minimum academic requirements established by the firm, maturity, integrity, and leadership traits.

Determining Capabilities and Competencies

.40 Capabilities and competencies are the knowledge, skills, and abilities that qualify personnel to perform an engagement covered by this section. Capabilities and competencies are not measured by periods of time because such a quantitative measurement may not accurately reflect the kinds of experiences gained by personnel in any given time period. Accordingly, for purposes of this section, a measure of overall competency is qualitative rather than quantitative.

.41 Capabilities and competence are developed through a variety of methods; for example:

- Professional education
- Continuing professional development, including training
- Work experience
- Mentoring by more experienced staff; for example, other members of the engagement team

Competencies of Engagement Partner

.42 A firm's quality control policies and procedures should provide reasonable assurance that an engagement partner possesses the competencies necessary to fulfill his or her engagement responsibilities.

.43 In most cases, an engagement partner will have gained the necessary competencies through relevant and appropriate experience in engagements covered by this section. In some cases, however, an engagement partner may have obtained the necessary competencies through disciplines other than the practice of public accounting, such as in relevant industry, governmental, and academic positions. When necessary, the experience of the engagement partner may be supplemented by continuing professional education (CPE) and consultation. The following are examples.

- An engagement partner whose recent experience has consisted primarily in providing tax services may acquire the competencies necessary in the circumstances to perform a compilation or review engagement by obtaining relevant CPE.
- An engagement partner whose experience consists of performing review and compilation engagements may be able to obtain the necessary competencies to perform an audit by becoming familiar with the industry in which the client operates, obtaining CPE relating to auditing, using consulting sources during the course of performing the audit engagement, or any combination of these.
- A person in academia might obtain the necessary competencies to perform engagements covered by this section by (*a*) obtaining specialized knowledge through teaching or authorship of research projects or similar papers and (*b*) performing a rigorous self-study program, or by engaging a consultant to assist on such engagements.

.44 The characteristics of a particular client, industry, and the kind of service being provided determine the nature and extent of competencies established by a firm that are expected of the engagement partner for an engagement. For example:

- The competencies expected of an engagement partner for an engagement to compile financial statements would be different than those expected of a practitioner engaged to review or audit financial statements.
- Supervising engagements and signing or authorizing others to sign reports for clients in certain industries or engagements, such as financial services, governmental, or employee benefit plan engagements, would require different competencies than those expected in performing attest services for clients in other industries.
- The engagement partner for an attestation engagement to examine management's assertion about the effectiveness of an entity's internal control over financial reporting would be expected to have technical proficiency in understanding and evaluating the effectiveness of controls, while an engagement partner for an attestation engagement to examine investment performance statistics would be expected to have different competencies, including an understanding of the subject matter of the underlying assertion.

.45 In practice, the competency requirements necessary for the engagement partner are broad and varied in both their nature and number. Required competencies include the following, as well as other competencies as necessary in the circumstances.

- *Understanding of the role of a system of quality control and the Code of Professional Conduct*. An understanding of the role of a firm's system of quality control and the AICPA's Code of Professional Conduct, both of which play critical roles in assuring the integrity of the various kinds of reports.
- *Understanding of the service to be performed*. An understanding of the performance, supervision, and reporting aspects of the engagement. This understanding is usually gained through actual participation under appropriate supervision in that type of engagement.
- *Technical proficiency*. An understanding of the applicable professional standards including those standards directly related to the industry in which a client operates and the kinds of transactions in which a client engages.
- *Familiarity with the industry*. An understanding of the industry in which a client operates, to the extent required by professional standards applicable to the kind of service being performed. In performing an audit or review of financial statements, this understanding would include an industry's organization and operating characteristics sufficient to identify areas of high or unusual risk associated with an engagement and to evaluate the reasonableness of industry-specific estimates.
- *Professional judgment*. Skills that indicate sound professional judgment. In performing engagements covered by this section, such skills would typically include the ability to exercise professional skepticism and identify areas requiring special consideration including, for example, the evaluation of the reasonableness of estimates and representations made by management and the determination of the kind of report appropriate in the circumstances.
- *Understanding the organization's information technology systems*. A sufficient understanding of how the organization is dependent on or enabled by information technologies and the manner in which the information systems are used to record and maintain financial information, to determine when involvement of an IT professional is necessary for an audit engagement.

Interrelationship of Competencies and Other Elements of a Firm's System of Quality Control

.46 The competencies listed above are interrelated and gaining one particular competency may be related to achieving another. For example, familiarity with the client's industry interrelates with a practitioner's ability to make professional judgments relating to the client.

.47 In establishing policies and procedures related to the nature of competencies needed by the engagement partner for an engagement, a firm may consider the requirements of policies and procedures established for other elements of quality control. For example, a firm might consider its requirements related to engagement performance in determining the nature of competency requirements that describe the degree of technical proficiency necessary in a given set of circumstances.

The Relationship of the Competency Requirement of the Uniform Accountancy Act to the Human Resource Element of Quality Control

.48 CPAs are required to follow the accountancy laws of the individual licensing jurisdictions in the United States that govern the practice of public accounting. These jurisdictions may have adopted, in whole or in part, the Uniform Accountancy Act (UAA), which is a model legislative statute and related administrative rules designed by the AICPA and the National Association of State Boards of Accountancy (NASBA) to provide a uniform approach to the regulation of the accounting profession. The UAA provides that "any individual licensee who is responsible for supervising attest or compilation services and signs or authorizes someone to sign the accountant's report on the financial statements on behalf of the firm shall meet the competency requirements set out in the professional standards for such services." A firm's compliance with this section is intended to enable a practitioner who performs the services described in the preceding sentence on the firm's behalf to meet the competency requirement referred to in the UAA.

Assignment of Engagement Teams

.49 The firm should assign responsibility for each engagement to an engagement partner and should establish policies and procedures requiring that:

a. The identity and role of the engagement partner are communicated to management and those charged with governance;

b. The engagement partner has the appropriate capabilities, competence, authority, and time to perform the role; and

c. The responsibilities of the engagement partner are clearly defined and communicated to that individual.

.50 Policies and procedures may include systems to monitor the workload and availability of engagement partners so as to enable these individuals to have sufficient time to adequately discharge their responsibilities.

.51 The firm should establish policies and procedures to assign appropriate staff with the necessary capabilities, competence, and time to:

a. Perform engagements in accordance with professional standards and regulatory and legal requirements; and

b. Enable the firm or engagement partners to issue reports that are appropriate in the circumstances.

.52 When assigning engagement teams, and in determining the level of supervision required, the firm might consider factors such as the engagement team's:

- Understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation.
- Understanding of professional standards and regulatory and legal requirements.
- Technical knowledge and expertise, including knowledge of relevant information technology.
- Knowledge of relevant industries in which the client operates.
- Ability to apply professional judgment.
- Understanding of the firm's quality control policies and procedures.

Generally, as the ability and experience levels of assigned staff increase, the need for direct supervision decreases.

.53 Appropriate teamwork and training assist less experienced members of the engagement team to clearly understand the objectives of the assigned work.

Professional Development

.54 The continuing competence of the firm's personnel depends to a significant extent on an appropriate level of continuing professional development so that personnel maintain their knowledge and capabilities. Effective policies and procedures emphasize the need for all levels of firm personnel to participate in general and industry-specific continuing professional education and other professional development activities that enable them to fulfill responsibilities assigned, and to satisfy applicable continuing professional education requirements of the AICPA and regulatory agencies. Effective policies and procedures also place importance on passing the Uniform CPA Examination. The firm may provide the necessary training resources and assistance to enable personnel to develop and maintain the required capabilities and competence. The firm may use an external source that is qualified for that purpose if internal technical and training resources are unavailable, or for any other reason.

Performance Evaluation, Compensation, and Advancement

.55 The firm's policies and procedures should provide that personnel selected for advancement have the qualifications necessary for fulfillment of the responsibilities they will be called on to assume.

.56 Effective performance evaluation, compensation, and advancement procedures give due recognition and reward to the development and maintenance of competence and commitment to ethical principles. Steps a firm may take in developing and maintaining competence and commitment to ethical principles include:

- Making personnel aware of the firm's expectations regarding performance and ethical principles;
- Providing personnel with evaluation of, and counseling on, performance, progress, and career development; and
- Helping personnel understand that their compensation and advancement to positions of greater responsibility depend upon, among other things, performance quality and adherence to ethical principles, and that failure to comply with the firm's policies and procedures may result in disciplinary action.

The size and circumstances of the firm are important considerations in determining the structure of the firm's performance evaluation process. Smaller firms, in particular, may employ less formal methods of evaluating the performance of their personnel.

Engagement Performance

.57 The firm should establish policies and procedures designed to provide it with reasonable assurance that engagements are consistently performed in accordance with professional standards and regulatory and legal requirements, and that the firm or the engagement partner issues reports that are appropriate in the circumstances. Required policies and procedures should address:

a. Engagement performance,

b. Supervision responsibilities, and

c. Review responsibilities.

.58 Effective policies and procedures facilitate consistency in the quality of engagement performance. This may be accomplished through written or electronic manuals, software tools or other forms of standardized documentation, and industry- or subject-matter-specific guidance materials. The firm might address, for example:

- How engagement teams are briefed on the engagement to obtain an understanding of the objectives of their work,
- Processes for complying with applicable engagement standards,
- Processes of engagement supervision, staff training, and mentoring,
- Methods of reviewing the work performed, the significant judgments made, and the type of report being issued,
- Appropriate documentation of the work performed and of the timing and extent of the review,
- Appropriate communication of the results of each engagement, and
- Processes to keep all policies and procedures current.

.59 Policies and procedures for engagement supervision might include:

- Tracking the progress of the engagement;
- Considering the capabilities and competence of individual members of the engagement team, whether they have sufficient time to carry out their work, whether they understand their instructions, and whether the work is being carried out in accordance with the planned approach to the engagement;
- Addressing significant issues arising during the engagement, considering their significance, and appropriately modifying the planned approach; and
- Identifying matters for consultation or consideration by more-experienced engagement team members during the engagement.

.60 Review responsibility policies and procedures should be determined on the basis that qualified engagement team members, which may include the engagement partner, review work performed by other team members on a timely basis.

.61 A review may include consideration of whether, for example:

- The work has been performed in accordance with professional standards and regulatory and legal requirements;
- Significant findings and issues have been raised for further consideration;
- Appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- The nature, timing, and extent of work performed is appropriate and without need for revision;
- The work performed supports the conclusions reached and is appropriately documented;
- The evidence obtained is sufficient and appropriate to support the report; and
- The objectives of the engagement procedures have been achieved.

.62 The firm should establish policies and procedures for engagement teams to complete the assembly of final engagement files on a timely basis, as appropriate for the nature of the engagement, after the engagement reports have been released. Professional standards, laws, or regulations may prescribe the time limits by which the assembly of final engagement files for specific types of engagements is to be completed.

Confidentiality, Safe Custody, Integrity, Accessibility, and Retrievability of Engagement Documentation

.63 The firm should establish policies and procedures designed to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.

.64 Relevant ethical requirements establish an obligation for the firm's personnel to observe at all times the confidentiality of information contained in engagement documentation, unless specific client authority has been given to disclose information or there is a legal or professional duty to do so. Specific laws or regulations may impose additional obligations on the firm's personnel to maintain client confidentiality, particularly where data of a personal nature are concerned.

.65 Whether engagement documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the firm's knowledge, or could be permanently lost or damaged. Appropriate and reasonable controls for engagement documentation may include those that:

- Clearly determine when and by whom engagement documentation was prepared or reviewed;
- Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means;
- Prevent unauthorized changes to the engagement documentation; and
- Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

.66 Controls that the firm may design and implement to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation may include, for example:

- The use of a password by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users;
- Appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement;
- Procedures for properly distributing engagement documentation to the team members at the start of the engagement, processing it during the engagement, and collating it at the end of the engagement; and
- Procedures for restricting access to and enabling proper distribution and confidential storage of hardcopy engagement documentation.

.67 For practical reasons, original paper documentation may be electronically scanned or otherwise copied to another media for inclusion in engagement files. In that case, the firm should establish procedures designed to maintain the integrity, accessibility, and retrievability of the documentation.

.68 These procedures may include, for example:

- Generating scanned copies that reflect the entire content of the original paper documentation, including manual signatures, cross-references and annotations;
- Integrating the scanned copies into the engagement files, including indexing and signing off on the copies as necessary; and
- Enabling the scanned copies to be retrieved and printed as necessary.

There may be legal, regulatory, or other reasons to retain original paper documentation.

Retention of Engagement Documentation

.69 The firm should establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm, professional standards, laws, and regulations.

.70 In determining the needs of the firm for retention of engagement documentation and the period of such retention, the firm may consider the nature of the engagement and the firm's circumstances; for example, whether the engagement documentation is needed to provide a record of matters of continuing significance to future engagements. The retention period may also depend on other factors, such as whether professional standards, laws, or regulations prescribe specific retention periods for certain types of engagements, or whether there are generally accepted retention periods in the absence of specific legal or regulatory requirements.

.71 Procedures that the firm may adopt for retention of engagement documentation include those that:

- Enable the retrieval of and access to the engagement documentation during the retention period, particularly in the case of electronic documentation, as the underlying technology may be upgraded or changed over time.
- Provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed.
- Enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

Consultation

.72 The firm should establish policies and procedures designed to provide it with reasonable assurance that:

a. Consultation takes place when appropriate (for example, when dealing with complex, unusual, unfamiliar, difficult, or contentious issues);

b. Sufficient and appropriate resources are available to enable appropriate consultation to take place;

c. All the relevant facts known to the engagement team are provided to those consulted;

d. The nature and scope of such consultations are documented, and are understood by both the individual seeking consultation and the individual consulted; and

e. The conclusions resulting from such consultations are documented and implemented.

.73 Consultation includes discussion, at the appropriate professional level, with individuals within or outside the firm who have relevant specialized expertise.

.74 Consultation uses appropriate research resources as well as the collective experience and technical expertise of the firm. Consultation helps to promote quality and improves the application of professional judgment. Appropriate recognition of consultation in the firm's policies and procedures helps to promote a culture in which consultation is recognized as a strength and encourages personnel to consult on complex, unusual, unfamiliar, difficult, or contentious issues.

.75 The firm's consultation procedures should provide for consultation with those having appropriate knowledge, seniority, and experience within the firm (or, where applicable, outside the firm) on significant technical, ethical, and other matters, and for appropriate documentation and implementation of conclusions resulting from consultations.

.76 A firm needing to consult externally may take advantage of advisory services provided by other firms, professional and regulatory bodies, or commercial organizations that provide relevant quality control services. Before using such services, the firm should evaluate whether the external provider is qualified for that purpose.

.77 Documentation of consultations with other professionals that involve complex, unusual, unfamiliar, difficult, or contentious matters that is sufficiently complete and detailed contributes to an understanding of:

- The issue on which consultation was sought; and
- The results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented.

Differences of Opinion

.78 The firm should establish policies and procedures for dealing with and resolving differences of opinion within the engagement team, with those consulted, and, where applicable, between the engagement partner and the engagement quality control reviewer (including a qualified external person). Such policies and procedures should require that:

a. Conclusions reached be documented and implemented; and

b. The report not be released until the matter is resolved.

.79 Effective procedures encourage identification of differences of opinion at an early stage, provide clear guidelines about the successive steps to be taken thereafter, and require documentation regarding the resolution of the differences and the implementation of the conclusions reached. Procedures to resolve such differences may include consulting with another practitioner or firm, or a professional or regulatory body.

Engagement Quality Control Review

.80 The firm should establish criteria against which all engagements covered by this section are to be evaluated to determine whether an engagement quality control review should be performed.

.81 The firm's policies and procedures should require that if an engagement meets the criteria established, an engagement quality control review be performed for that engagement, and that the review be completed before the report is released.

.82 The firm's policies and procedures should require the engagement partner to remain responsible for the engagement and its performance, notwithstanding involvement of the engagement quality control reviewer.

.83 The structure and nature of the firm's practice are important considerations in establishing criteria to consider when determining which engagements are to be subject to an engagement quality control review. Such criteria may include:

- The nature of the engagement, including the extent to which it involves a matter of public interest;
- The identification of unusual circumstances or risks in an engagement or class of engagements; and
- Whether laws or regulations require an engagement quality control review.

.84 If the firm has no engagements that meet the criteria, paragraphs .85–.99 do not apply.

Nature, Timing, and Extent of the Engagement Quality Control Review

.85 The engagement quality control review procedures should include an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the report.

.86 The engagement quality control review should include reading the financial statements or other subject matter information and the report and considering whether the report is appropriate.

.87 An engagement quality control review also should include a review of selected engagement documentation relating to the significant judgments the engagement team made and the conclusions they reached, and should include a discussion with the engagement partner regarding significant findings and issues. The extent of the engagement quality control review may depend upon, among other things, the complexity of the engagement and the risk that the report might not be appropriate in the circumstances.

.88 An engagement quality control review may include consideration of the following:

- The engagement team's evaluation of the firm's independence in relation to the specific engagement;
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters and the conclusions arising from those consultations; and
- Whether working papers selected for review reflect the work performed in relation to the significant judgments and support the conclusions reached.

.89 Significant judgments made by the engagement team may include, for example:

- Significant risks identified during the engagement and the responses to those risks.
- Judgments made, particularly with respect to materiality and significant risks.
- The significance and disposition of corrected and uncorrected misstatements identified during the engagement.
- The matters to be communicated to management and those charged with governance and, where applicable, other parties such as regulatory bodies.

.90 The firm's policies and procedures should require the engagement quality control reviewer to conduct the review in a timely manner so that significant issues may be promptly resolved to the reviewer's satisfaction before the report is released. The review may be conducted at appropriate stages during the engagement.

.91 When the engagement quality control reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer's satisfaction, the firm's procedures for dealing with differences of opinion apply (see paragraphs .78–.79).

Criteria for the Eligibility of Engagement Quality Control Reviewers

.92 The firm should establish policies and procedures addressing

a. The appointment of engagement quality control reviewers; and

b. The technical qualifications required to perform the role, including the necessary experience and authority.

.93 The firm's policies and procedures on the technical qualifications of engagement quality control reviewers may address the technical expertise, experience, and authority necessary to fulfill the role. What constitutes sufficient and appropriate technical expertise, experience, and authority depends on the circumstances of the engagement.

.94 The firm should establish policies and procedures designed to maintain the objectivity of the engagement quality control reviewer. Such policies and procedures should provide that while the engagement quality control reviewer is not a member of the engagement team, the engagement quality control reviewer should satisfy the independence requirements relating to the engagements reviewed.

.95 Policies and procedures designed to maintain the objectivity of the engagement quality control reviewer may include a requirement, where practicable, that the engagement quality control reviewer is not selected by the engagement partner, and requirements that the engagement quality control reviewer not:

a. Participate in the performance of the engagement except as discussed in paragraph .96 or

b. Make decisions for the engagement team.

It may not be practicable, in the case of firms with few partners, for the engagement partner not to be involved in selecting the engagement quality control reviewer.

.96 The engagement partner may consult the engagement quality control reviewer at any stage during the engagement, for example, to establish that a judgment made by the engagement partner will be acceptable to the engagement quality control reviewer. Such consultation need not impair the engagement quality control reviewer's eligibility to perform the role. However, when the nature and extent of the consultations become significant, the reviewer's objectivity may be impaired unless both the engagement team and the reviewer are careful to maintain the reviewer's objectivity.

.97 The firm's policies and procedures should provide for the replacement of the engagement quality control reviewer when the reviewer's ability to perform an objective review has been impaired.

.98 Qualified external persons may be contracted when sole practitioners or small firms identify engagements requiring engagement quality control reviews. Alternatively, some sole practitioners or small firms may wish to use other firms to facilitate engagement quality control reviews. When the firm contracts qualified external persons or other firms, the requirements and guidance in paragraphs .85–.97 apply.

Documentation of the Engagement Quality Control Review

.99 The firm should establish policies and procedures that provide for appropriate documentation of the engagement quality control review, including documentation that:

a. The procedures required by the firm's policies on engagement quality control review have been performed;

b. The engagement quality control review has been completed before the report is released; and

c. The reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.

Monitoring

.100 The firm should establish policies and procedures designed to provide the firm and its engagement partners with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Such policies and procedures should:

a. Include an ongoing consideration and evaluation of the firm's system of quality control to determine

(i) The appropriateness of the design and

(ii) The effectiveness of the operation of the system of quality control.

b. Assign responsibility for the monitoring process to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility.

c. Assign performance of monitoring of the firm's system of quality control to qualified individuals.

.101 The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of:

- Adherence to professional standards and regulatory and legal requirements;
- Whether the quality control system has been appropriately designed and effectively implemented; and
- Whether the firm's quality control policies and procedures have been operating effectively, so that reports that are issued by the firm are appropriate in the circumstances.

The evaluation may identify circumstances that necessitate changes to, or the need to improve compliance with, the firm's policies and procedures to provide the firm with reasonable assurance that its system of quality control is effective.

.102 The firm's policies should require the performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and regulatory requirements, and the firm's quality control policies and procedures. Monitoring procedures include:

- Review of selected administrative and personnel records pertaining to the quality control elements.
- Review of engagement working papers, reports, and clients' financial statements.
- Discussions with the firm's personnel.
- Summarization of the findings from the monitoring procedures, at least annually, and consideration of the systemic causes of findings that indicate improvements are needed.
- Determination of any corrective actions to be taken or improvements to be made with respect to the specific engagements reviewed or the firm's quality control policies and procedures.
- Communication of the identified findings to appropriate firm management personnel.
- Consideration of findings by appropriate firm management personnel who should also determine that any actions necessary, including necessary modifications to the quality control system, are taken on a timely basis.

.103 Monitoring procedures also include an assessment of:

- The appropriateness of the firm's guidance materials and any practice aids;
- New developments in professional standards and regulatory and legal requirements, and how they are reflected in the firm's policies and procedures where appropriate;
- Compliance with policies and procedures on independence;
- The effectiveness of continuing professional development, including training;
- Decisions related to acceptance and continuance of client relationships and specific engagements; and
- Firm personnel's understanding of the firm's quality control policies and procedures, and implementation thereof.

.104 Some of the monitoring procedures discussed above may be accomplished through the performance of:

- Engagement quality control review.
- Postissuance review of engagement working papers, reports, and clients' financial statements for selected engagements.
- Inspection procedures.

.105 The need for and extent of inspection procedures depends in part on the existence and effectiveness of the other monitoring procedures. The nature of inspection procedures varies based on the firm's quality control policies and procedures and the effectiveness and results of other monitoring procedures.

.106 The inspection of a selection of completed engagements may be performed on a cyclical basis. For example, engagements selected for inspection may include at least one engagement for each engagement partner over an inspection cycle that spans three years. The manner in which the inspection cycle is organized, including the timing of selection of individual engagements, depends on many factors, including the following:

- The size of the firm.
- The number and geographical location of offices.
- The results of previous monitoring procedures.
- The degree of authority both personnel and offices have (for example, whether individual offices are authorized to conduct their own inspections or whether only the head office may conduct them).
- The nature and complexity of the firm's practice and organization.
- The risks associated with the firm's clients and specific engagements.

.107 The inspection process involves the selection of individual engagements, some of which may be selected without prior notification to the engagement team. In determining the scope of the inspections, the firm may take into account the scope or conclusions of a peer review or regulatory inspections. (See paragraph .119.)

.108 Inspection procedures with respect to the engagement performance element of a quality control system are particularly appropriate in a firm with more than a limited number of management-level individuals responsible for the conduct of its accounting and auditing practice.

.109 In small firms with a limited number of persons with sufficient and appropriate experience and authority in the firm, monitoring procedures may need to be performed by some of the same individuals who are responsible for compliance with the firm's quality control policies and procedures. This includes postissuance review of engagement working papers, reports, and clients' financial statements by the person with final responsibility for the engagement. To effectively monitor one's own compliance with the firm's policies and procedures, it is necessary that an individual be able to critically review his or her own performance, assess his or her own strengths and weaknesses, and maintain an attitude of continual improvement. Changes in conditions and in the environment within the firm (such as obtaining clients in an industry not previously serviced or significantly changing the size of the firm) may indicate the need to have quality control policies and procedures monitored by another qualified individual.

.110 Having an individual inspect his or her own compliance with a quality control system may be less effective than having such compliance inspected by another qualified individual. When one individual inspects his or her own compliance, the firm has a higher risk that noncompliance with policies and procedures will not be detected. Accordingly, a firm with a limited number of persons with sufficient and appropriate experience and authority in the firm may find it beneficial to engage a qualified individual from outside the firm to perform inspection procedures.

.111 Any system of quality control has inherent limitations that can reduce its effectiveness. Deficiencies in individual engagements covered by this section do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards. The firm should evaluate the effect of deficiencies noted as a result of the monitoring process and determine whether they require prompt corrective action.

.112 Deficiencies identified during the monitoring process may be *a.* Instances that do not necessarily indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that it complies with professional standards and regulatory and legal requirements, and that the reports issued by the firm or engagement partners are appropriate in the circumstances; or

b. Systemic, repetitive or other significant deficiencies that require prompt corrective action.

.113 The firm should communicate to relevant engagement partners and other appropriate personnel deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action.

.114 The firm's evaluation of each type of deficiency should result in recommendations for one or more of the following:

a. Taking appropriate remedial action in relation to an individual engagement or member of personnel.

b. The communication of the findings to those responsible for training and professional development.

c. Changes to the quality control policies and procedures.

d. Disciplinary action against those who fail to comply with the policies and procedures of the firm, especially those who do so repeatedly.

.115 When the results of the monitoring procedures indicate that a report may be inappropriate or that procedures were omitted during the performance of the engagement, the firm should determine what further action is appropriate to comply with relevant professional standards and regulatory and legal requirements. The firm may also consider obtaining legal advice.

.116 At least annually, the firm should communicate the results of the monitoring of its quality control system process to relevant engagement partners and other appropriate individuals within the firm, including the firm's leadership. Such communication should enable the firm and these individuals to take prompt and appropriate action where necessary in accordance with their defined roles and responsibilities and provide a basis for them to rely on the firm's system of quality control. Information communicated should include the following:

a. A description of the monitoring procedures performed.

b. The conclusions drawn from the monitoring procedures.

c. Where relevant, a description of systemic, repetitive, or other significant deficiencies and of the actions taken to resolve or amend those deficiencies.

.117 The reporting of identified deficiencies to individuals other than the relevant engagement partner need not include an identification of the specific engagements concerned, unless such identification is necessary for the proper discharge of the responsibilities of the individuals other than the engagement partner.

.118 The firm should establish policies and procedures requiring appropriate documentation of monitoring (see paragraph .125). Appropriate documentation relating to monitoring includes:

a. Monitoring procedures, including the procedure for selecting completed engagements to be inspected;

b. A record of the evaluation of:

(i) Adherence to professional standards and regulatory and legal requirements;

(ii) Whether the quality control system has been appropriately designed and effectively implemented; and

(iii) Whether the firm's quality control policies and procedures have been operating effectively, so that reports that are issued by the firm or engagement partners are appropriate in the circumstances; and

c. Identification of the deficiencies noted, an evaluation of their effect, and the basis for determining whether and what further action is necessary.

The Relationship of Peer Review to Monitoring

.119 A peer review does not substitute for all monitoring procedures. However, since the objective of a peer review is similar to that of inspection procedures, a firm's quality control policies and procedures may provide that a peer review conducted under standards established by the AICPA may substitute for the inspection of engagement working papers, reports, and clients' financial statements for some or all engagements for the period covered by the peer review.

Complaints and Allegations

.120 The firm should establish policies and procedures designed to provide it with reasonable assurance that it deals appropriately with:

a. Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements; and

b. Allegations of noncompliance with the firm's system of quality control; and

c. Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations.

.121 As part of this process, the firm should establish clearly defined channels for firm personnel to raise any concerns in a manner that enables them to come forward without fear of reprisals.

.122 Complaints and allegations of noncompliance with the firm's system of quality control (which do not include those that are clearly frivolous) may originate from within or outside the firm. They may be made by firm personnel, clients, state boards of accountancy, other regulators, or other third parties. They may be received by engagement team members or other firm personnel.

.123 The firm should require that investigations of such complaints and allegations in accordance with established policies and procedures be supervised by a person with sufficient and appropriate experience and authority who is not otherwise involved in the engagement. The firm's policies and procedures may require involving legal counsel in the investigation. Small firms and sole practitioners may use the services of a qualified external person or another firm to carry out the investigation.

.124 The firm should establish policies and procedures requiring documentation of complaints and allegations, and the responses to them.

Documentation of Operation of Quality Control Policies and Procedures

.125 The firm should establish policies and procedures requiring appropriate documentation to provide evidence of the operation of each element of its system of quality control.

.126 The form and content of documentation evidencing the operation of each of the elements of the system of quality control is a matter of judgment and depends on a number of factors, including, for example:

- The size of the firm and the number of offices.
- The nature and complexity of the firm's practice and organization.

For example, large firms may use electronic databases to document matters such as independence confirmations, performance evaluations and the results of monitoring inspections. Smaller firms may use more informal methods such as manual notes, checklists, and forms.

.127 The firm should establish policies and procedures that require retention of documentation for a period of time sufficient to permit those performing monitoring procedures and peer review to evaluate the firm's compliance with its system of quality control, or for a longer period if required by law or regulation.

Effective Date

.128 The provisions of this section are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 2009.

Appendix B:

Interpretation No. 101-14 of Rule 101

Interpretation No. 101-14 Under Rule 101, *Independence*, "The Effect of Alternative Practice Structures on the Applicability of Independence Rules" (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .16)

Because of changes in the manner in which **members**[*] are structuring their practices, the AICPA's professional ethics executive committee (PEEC) studied various alternatives to "traditional structures" to determine whether additional independence requirements are necessary to ensure the protection of the public interest.

In many "nontraditional structures," a substantial (the nonattest) portion of a member's practice is conducted under public or private ownership, and the attest portion of the practice is conducted through a separate firm owned and controlled by the member. All such structures must comply with applicable laws, regulations, and Rule 505, *Form of Organization and Name* [ET section 505.01]. In complying with laws, regulations, and rule 505 [ET section 505.01], many elements of quality control are required to ensure that the public interest is adequately protected. For example, all services performed by members and persons over whom they have control must comply with standards promulgated by AICPA Council-designated bodies, and, for all other firms providing attest services, enrollment is required in an AICPA-approved practice-monitoring program. Finally, and importantly, the members are responsible, financially and otherwise, for all the attest work performed. Considering the extent of such measures, PEEC believes that the additional independence rules set forth in this interpretation are sufficient to ensure that attest services can be performed with objectivity and, therefore, the additional rules satisfactorily protect the public interest.

Rule 505 [ET section 505.01] and the following independence rules for an alternative practice structure (APS) are intended to be conceptual and applicable to all structures where the "traditional firm" engaged in attest services is closely aligned with another organization, public or private, that performs other professional services. The following paragraph and the chart below provide an example of a structure in use at the time this interpretation was developed. Many of the references in this interpretation are to the example. PEEC intends that the concepts expressed herein be applied, in spirit and in substance, to variations of the example structure as they develop.

The example APS in this interpretation is one where an existing CPA practice ("Oldfirm") is sold by its owners to another (possibly public) entity ("PublicCo"). PublicCo has subsidiaries or divisions such as a bank, insurance company or broker-dealer, and it also has one or more professional service subsidiaries or divisions that offer to clients nonattest professional services (e.g., tax, personal financial planning, and management consulting). The owners and employees of Oldfirm become employees of one of PublicCo's subsidiaries or divisions and may provide those nonattest services. In addition, the owners of Oldfirm form a new CPA firm ("Newfirm") to provide attest services. CPAs, including the former owners of Oldfirm, own a majority of Newfirm (as to vote and financial interests). Attest services are performed by Newfirm and are supervised by its owners. The arrangement between Newfirm and PublicCo (or one of its subsidiaries or divisions) includes the lease of employees, office space and equipment; the performance of back-office functions such as billing and collections; and advertising. Newfirm pays a negotiated amount for these services.

APS Independence Rules for Covered Members

The term **covered member** in an APS includes both employed and leased individuals. The **firm** in such definition would be Newfirm in the example APS. All covered members, including the firm, are subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety. For example, no covered member may have, among other things, a direct financial interest in or a loan to or from an attest client of Newfirm.

[*] Terms shown in **boldface** type upon first usage in this interpretation are defined in ET section 92, *Definitions*.

Partners of one Newfirm generally would not be considered partners of another Newfirm except in situations where those partners perform services for the other Newfirm or where there are significant shared economic interests between partners of more than one Newfirm. If, for example, partners of Newfirm 1 perform services in Newfirm 2, such owners would be considered to be partners of both Newfirms for purposes of applying the independence rules.

APS Independence Rules for Persons and Entities Other Than Covered Members

As stated above, the independence rules normally extend only to those persons and entities included in the definition of covered member. This normally would include only the "traditional firm" (Newfirm in the example APS), those covered members who own or are employed or leased by Newfirm, and entities controlled by one or more of such persons. Because of the close alignment in many APSs between persons and entities included in covered member and other persons and entities, to ensure the protection of the public interest, PEEC believes it appropriate to require restrictions in addition to those required in a traditional firm structure. Those restrictions are divided into two groups:

1. *Direct Superiors.* Direct Superiors are defined to include those persons so closely associated with a partner or manager who is a covered member, that such persons can *directly control* the activities of such partner or manager. For this purpose, a person who can *directly control* is the immediate superior of the partner or manager who has the power to direct the activities of that person so as to be able to directly or indirectly (e.g. through another entity over which the Direct Superior can exercise significant influence[1]) derive a benefit from that person's activities. Examples would be the person who has day-to-day responsibility for the activities of the partner or manager and is in a position to recommend promotions and compensation levels. This group of persons is, in the view of PEEC, so closely aligned through direct reporting relationships with such persons that their interests would seem to be inseparable. *Consequently, persons considered Direct Superiors, and entities within the APS over which such persons can exercise significant influence*[2] *are subject to rule 101 [ET section 101.01*] and its interpretations and rulings in their entirety.

2. *Indirect Superiors and Other PublicCo Entities.* Indirect Superiors are those persons who are one or more levels above persons included in Direct Superior. Generally, this would start with persons in an organization structure to whom Direct Superiors report and go up the line from there. PEEC believes that certain restrictions must be placed on Indirect Superiors, but also believes that such persons are sufficiently removed from partners and managers who are covered persons to permit a somewhat less restrictive standard. Indirect Superiors are not connected with partners and managers who are covered members through direct reporting relationships; there always is a level in between. The PEEC also believes that, for purposes of the following, the definition of Indirect Superior also includes the **immediate family** of the Indirect Superior.

PEEC carefully considered the risk that an Indirect Superior, through a Direct Superior, might attempt to influence the decisions made during the engagement for a Newfirm attest client. PEEC believes that this risk is reduced to a sufficiently low level by prohibiting certain relationships between Indirect Superiors and Newfirm attest clients and by applying a materiality concept with respect to financial relationships. If the financial relationship is not material to the Indirect Superior, PEEC believes that he or she would not be sufficiently financially motivated to attempt such influence particularly with sufficient effort to overcome the presumed integrity, objectivity and strength of character of individuals involved in the engagement.

[1] For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section I82] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.

[2] For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section I82] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.

Similar standards also are appropriate for Other PublicCo Entities. These entities are defined to include PublicCo and all entities consolidated in the PublicCo financial statements that are not subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety.

The rules for Indirect Superiors and Other PublicCo Entities are as follows:

A. Indirect Superiors and Other PublicCo Entities may *not* have a relationship contemplated by interpretation 101-1.A [ET section 101.02] (e.g., investments, loans, etc.) with an attest client of Newfirm that is material. In making the test for materiality for financial relationships of an Indirect Superior, all the financial relationships with an attest client held by such person should be aggregated and, to determine materiality, assessed in relation to the person's net worth. In making the materiality test for financial relationships of Other PublicCo Entities, all the financial relationships with an attest client held by such entities should be aggregated and, to determine materiality, assessed in relation to the consolidated financial statements of PublicCo. In addition, any Other PublicCo Entity over which an Indirect Superior has direct responsibility cannot have a financial relationship with an attest client that is material in relation to the Other PublicCo Entity's financial statements.

B. Further, financial relationships of Indirect Superiors or Other PublicCo Entities should not allow such persons or entities to exercise significant influence[3] over the attest client. In making the test for significant influence, financial relationships of all Indirect Superiors and Other PublicCo Entities should be aggregated.

C. Neither Other PublicCo Entities nor any of their employees may be connected with an attest client of Newfirm as a promoter, underwriter, voting trustee, director or officer.

D. Except as noted in C above, Indirect Superiors and Other PublicCo Entities may provide services to an attest client of Newfirm that would impair independence if performed by Newfirm. For example, trustee and asset custodial services in the ordinary course of business by a bank subsidiary of PublicCo would be acceptable as long as the bank was not subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety.

Other Matters

1. An example, using the chart below, of the application of the concept of Direct and Indirect Superiors would be as follows: The chief executive of the local office of the Professional Services Subsidiary (PSS), where the partners of Newfirm are employed, would be a Direct Superior. The chief executive of PSS itself would be an Indirect Superior, and there may be Indirect Superiors in between such as a regional chief executive of all PSS offices within a geographic area.

2. PEEC has concluded that Newfirm (and its partners and employees) may not perform an **attest engagement** for PublicCo or any of its subsidiaries or divisions.

3. PEEC has concluded that independence would be considered to be impaired with respect to an attest client of Newfirm if such attest client holds an investment in PublicCo that is material to the attest client or allows the attest client to exercise significant influence[4] over PublicCo.

---

[3] For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section I82] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.

[4] For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section I82] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.

4. When making referrals of services between Newfirm and any of the entities within PublicCo, a member should consider the provisions of Interpretation 102-2, *Conflicts of Interest* [ET section 102.03].

Alternative Practice Structure (APS) Model

Statement on Quality Control Standards

Statements on Quality Control Standards (SQCSs) are issued by the Auditing Standards Board. Firms that are enrolled in an AICPA approved practice-monitoring program are obligated to adhere to quality control standards established by the AICPA.

Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control* (QC Section 10)

Supersedes SQCSs Nos. 2–6. SQCS No. 1 was previously superseded by SQCS No. 2.

Effective date: Applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 2009.

.14 Performance Evaluation

[To be completed after each engagement of 40 hours or more.]

Name ______________________________ Classification ______________

Client ______________________________ From __________ To __________

Describe work assigned: ______________________________

____

____

In your opinion based on the staff member's classification, should this assignment be considered:

Demanding ☐ Routine ☐

This individual is ☐ is not ☐ ready for increased responsibility. Explain ______________

____

Rating: Enter comments which describe the staff member's performance on this engagement. Rate the staff member on each of the items below as Outstanding (O), Very High (VH), Good (G), Below Normal (BN), or Not Applicable (NA).

[Support each caption with specific incidents or remarks.]

Technical Knowledge: Did the staff member possess adequate knowledge to function effectively at the level assigned? Did this knowledge encompass accounting principles, auditing standards, and tax accounting? Has the staff member kept current on recent developments and new pronouncements on professional practice matters as they affected this engagement?

	O	VH	G	BN	NA
Rating:	☐	☐	☐	☐	☐

____

____

____

Analytical Ability and Judgment: How well did the staff member recognize problems, develop relevant facts, formulate alternative solutions, and decide on appropriate conclusions? Did the staff member distinguish between material and immaterial items? Was the staff member practical in adapting theory and experience to the individual circumstances of this client?

	O	VH	G	BN	NA
Rating:	☐	☐	☐	☐	☐

____

____

____

Written and Oral Expression: Evaluate the effectiveness of the staff member's letters, memoranda, and other forms of written communication. In conversation, did the staff member communicate intentions effectively? Were instructions understood the first time? Did the staff member sell ideas, obtain acceptance and action?

	O	VH	G	BN	NA
Rating:	☐	☐	☐	☐	☐

____

____

____

(continued)

Performance: Can you depend on the staff member for sustained, productive work? Were assignments organized and completed accurately in a reasonable amount of time? Did the staff member readily assume responsibility? Did the staff member meet time estimates and document work papers properly?

Rating: O ☐ VH ☐ G ☐ BN ☐ NA ☐

Development of Personnel: In assigning work, did the in-charge member make the most effective use of available talent in terms of getting the work done and in terms of developing staff members performing the work? Did the in-charge staff member tend to make assignments which were either too easy or too hard for his subordinates? Was the staff member readily accepted as a leader? Was the staff member effective in on-the-job coaching?

Rating: O ☐ VH ☐ G ☐ BN ☐ NA ☐

Client Relations: How well did the staff member relate to this client and gain his acceptance? How well did the staff member recognize and take advantage of practice development opportunities, through extension of services to this client?

Rating: O ☐ VH ☐ G ☐ BN ☐ NA ☐

Attitude: Did the staff member demonstrate a positive and professional approach to the assignment? Was this demonstrated by sustained effort in completing work? Was the assignment undertaken with enthusiasm and zest? Did the staff member respond in a positive way to suggestions and guidance from superiors? To what degree did the staff member make personal sacrifices to meet client requirements? Was the staff member a helpful member of the team? Did the staff member go out of his way to help an associate?

Rating: O ☐ VH ☐ G ☐ BN ☐ NA ☐

Personal Characteristics: Did the staff member possess self-confidence and was this confidence projected in an acceptable way? Were positive impressions created with this client and with associates? Did the staff member have a keen sense of what to do or say (tact)? Were clothes appropriate to professional work? Was the staff member well groomed?

Rating: O ☐ VH ☐ G ☐ BN ☐ NA ☐

Note: See the AICPA MAP Handbook for alternatives.

JOB EVALUATION REPORT
[For Assignments of Thirty (30) Hours or More]

Name ____

Location ____

Engagement ____

Assistant ______________________ In-Charge ______________________

	Compared to Others in Peer Group							
	A	A-	B+	B	B-	C+	C	
	SUPERIOR	EXCELLENT	ABOVE AVERAGE	SATISFACTORY	IMPROVEMENT DESIRED	IMPROVEMENT REQUIRED	UNSATISFACTORY	NOT APPLICABLE
A. PERFORMANCE ON THE JOB								
1. *Technical Ability Demonstrated*								
a) The purpose of the audit procedures planned was understood								
b) Materiality was neither underestimated nor overestimated								
c) Accounting theory and current releases of the profession were applied correctly								
d) Federal and state income tax regulations were applied correctly								
2. *Working Paper Evidence*								
a) Documentation of work performance, including adequate indexing and cross referencing								
b) Sound explanations and conclusions								
c) Use of standard work papers								
d) Legibility								
e) Accuracy — absence of mathematical errors								
3. *Completing This Job*								
a) Meeting planned time estimates								
b) Completing reports and tax returns								
c) Following up the reviewer's comments and making the necessary changes								
4. *Client Reaction on This Job*								
a) Getting along with the client's employees								
b) Interest in the client's business								
B. ENGAGEMENT ADMINISTRATION — (For In-Charge Accountants Only)								
1. *Effectiveness of Proper Planning*								
a) Extent that the scope of the work related to internal control								
b) Developing the work program								
2. *Utilizing Staff Effectively and Efficiently*								
a) Advance planning to minimize crises								
b) Efficient use of staff on the job								
c) On-the-job training of assistants								
3. *Meeting Deadlines*								
a) Completing the engagement in the planned time								
b) Delivering completed pencil copies of the report and tax returns to the supervisor as agreed								
4. *The Product*								
a) Quality of report preparation, including adequate and informative disclosures								
b) Quality of the management advice recommendations								
5. *Practice Management*								
a) Extending service								
b) Ease of collecting for services performed

.17 Employee Annual Performance Appraisal

Time Period Involved			
From	To		☐ EXEMPT ☐ NON-EXEMPT

Name		Position Title	Number
Hire Date	Present Position Date	Days Absent From: ____________ To: ______ Charged To Sick Time: ______________ Disability: ______________	

Strengths	Development Needs
	Suggested Plan for Performance Improvement

Summary

Overall Rating on Having Met Job Requirements	
Non-Exempt - Circle One	Exempt - Circle One
1 2 3	1 2 3 4 5
1 = Did Not Meet Job Requirements 2 = Met All 3 = Exceeded	1 = Did Not Meet Job Requirements 2 = Met Most 3 = Met All 4 = Exceeded 5 = Far Exceeded

Review the following questions before answering them, using the following criteria:

- A *yes* answer should be considered for possible mention as a "strength." If so, refer to it on the first page of this evaluation.
- A *no* answer should be considered for possible mention as a "development need." If so, refer to it on the first page of this evaluation.

All answers should be considered in arriving at an overall rating on having met job requirements.

Is good judgment exercised in observing budget constraints?	( )	( )	( )	( )	( )
Does the individual maintain adequate discipline in regard to subordinates attendance and punctuality?	( )	( )	( )	( )	( )
Does the individual provide a good example for peers and subordinates to follow?	( )	( )	( )	( )	( )

INCUMBENT REVIEW COMMENTS & ACKNOWLEDGEMENT
I acknowledge that: (1) I have reviewed and discussed this performance appraisal with the preparer. My signature means that I have been advised of my performance evaluation but does not necessarily imply that I agree with it; (2) I have received a copy of the goals/duties that will be used to evaluate my performance during the coming year; and (3) I have reviewed my job description and do ☐ do not ☐ feel it should be revised. My signature and the date I discussed this with the preparer appears below.

Employee	Date
Evaluator/Title	**Date**

.18 Client/Engagement Acceptance and Continuation Checklist [1]

Note: Acceptance of a new client normally is of critical importance to a small firm. Depending on the type of industry and the services to be provided, accepting a new client can affect nearly all aspects of a firm's quality control system: Are the firm's library and practice aids adequate? Do personnel have appropriate CPE? Does the firm need an outside consultant? The best time to document the acceptance decision is when a new audit or attestation client or engagement is signed, using a form such as the one below.

Name of prospective client: ______________________________

Address and Phone No.: ______________________________

____

Name and title of contact at prospective client: ______________________________

____

Form completed by: ______________________________ Date: ____________

Instructions

This form provides for information necessary to assess whether to accept a prospective client. The information should be obtained from discussions with the prospective client's management, bankers, attorneys, credit services, and if applicable current or former independent CPA, from reviewing the client's financial statements, regulatory agency reports, credit reports, and tax returns, and from other sources such as industry or accounting journals, etc. As much information as possible should be obtained before visiting the potential client. Depending on the type of engagement involved, some information requested on this form may not be applicable, or additional information may be necessary and should be attached.

Services and Reports Required

1. Describe the service and reports requested. ______________________________
____
____

2. Describe the reason the service is needed, including any regulatory requirements or third parties for which the service or report is intended. ______________________________
____
____

3. What is the required completion date? ______________________________
____

4. Describe any other services not requested for which there appears to be a need. ____________
____
____

5. What is the preliminary estimate of hours to complete the engagement? ____________
____

6. Has the client imposed any restrictions on the scope of the engagement that might preclude expression of an unqualified report? ______________________________
____
____

7. Do we have the necessary expertise and staff to perform the engagement? (If not, how will we overcome this problem?) ______________________________
____
____

Fixed assets	______	______	______	______
Loans payable	______	______	______	______
Accounts payable	______	______	______	______
Perpetual inventory	______	______	______	______
Physical inventory summarization	______	______	______	______
______	______	______	______	______
______	______	______	______	______
______	______	______	______	______
Journals:				
Cash receipts	______	______	______	______
Cash disbursements	______	______	______	______
Sales/purchase/voucher	______	______	______	______
Payroll	______	______	______	______
General journal entries	______	______	______	______
______	______	______	______	______
______	______	______	______	______
______	______	______	______	______
Financial Reporting [Indicate basis of accounting]:				
Annual financial statements	______	______	______	______
Monthly financial statements	______	______	______	______
Management reports	______	______	______	______
______	______	______	______	______
Other:				
Bank reconciliations	______	______	______	______
______	______	______	______	______

31. Describe the company's completeness procedures and methods to insure that accounting transactions enter into the accounting system, i.e., that all shipments or services are invoiced, that all cash sales are recorded, and that all disbursements are recorded. ____________________
    ____
    ____

32. Describe any unusual features of the accounting system. ____________________
    ____
    ____

33. Are sufficient records available to perform the engagement?

34. Is management sufficiently knowledgeable about applicable accounting principles?

35. Does management understand accounting matters adequately to assume responsibility for proper valuation, presentation, and disclosure?

Tax Matters

36. Who prepares the tax returns?

37. Describe major differences between book and tax income, unusual tax elections, carry forwards or IRS examinations in process. If possible, review copies of the most recent 3 years of tax returns and attach them to this form.

Other Matters

38. Describe any significant problems that could affect the engagement, such as litigation or other contingencies, unusual agreements, and plans to acquire or dispose of significant assets, merge with another entity, enter a new area of business, convert to or expand use of information technology, etc.

39. Give the name of a current or former independent CPA.

    a. Describe any disputes over accounting matters.

40. Describe any apparent problems or areas for improvement that were noted where our firm could provide additional service or recommendations.

41. Is the client relatively free from controversy and media coverage?

Independence

42. Would service to this client cause problems of independence or conflicts of interest because of relationships with other clients or members of the staff?

Fees

43. Based on inquiries with a current or former independent CPA, if applicable, indicate the amount of any unpaid fees and the reason for nonpayment.

44. If possible indicate the amount of fees charged by an existing or former independent CPA for the service being proposed. (The CPA or the potential client may be willing to furnish this information, or it might be obtainable from the financial statements or tax return.)________________________________

45. Describe any other indications that our firm might have a problem billing or collecting our fees. _____
____
____

46. Does the prospective fee justify pursuing this engagement?_____________________________________
____
____

Management Integrity

47. Have any of the following sources raised any concerns about management's integrity?
    a. Difficulty in obtaining information from management, or evasive, guarded or glib responses to inquiries. ____
    ____

    b. Apparent difficulty in meeting financial operations or a deteriorating financial position that might predispose management to commit fraud or make a misrepresentation. _______________________
    ____

    c. Disputes about accounting principles, engagement procedures or similarly significant matters with an existing or former accountant, or doubts of the predecessor accountant about management's integrity. ____
    ____

    d. Comments by bankers, attorneys, creditors, or others having a business relationship with a potential client. ____
    ____

48. If management is changing accountants, why is the change being made, and is the reason for the change acceptable? ____
____
____

49. Is there any reason to suspect that management would be uncooperative, unreasonable or otherwise unpleasant to work with? ____
____
____

50. Does the general integrity of the client seem satisfactory? _______________________________________
____
____

Other Comments or Observations

51. Give any other comments or observations that might affect our decision whether to prepare a proposal letter or its contents. Add attachments to this form, if necessary. _________________________________
____
____

Conclusion

52. Should we accept/continue this client/engagement?____
____
____

1. Captain ______________________ Position ______________________
2. Team Member ______________________ Position ______________________
3. Team Member ______________________ Position ______________________

C. Indicate matters that may require additional emphasis in the inspection and explain why.

____
____
____
____
____

D. Development of Inspection Program:

1. Describe programs used and indicate any deviations therefrom.

____
____
____
____

2. Describe basis for selection of engagements:

____
____
____

E. Timing of Inspection:

Commencement ______________________________

Completion of work ______________________________

Issuance of report ______________________________

II. *Scope of Work Performed*

A. Indicate elements of quality control not addressed and give reasons.

____
____
____
____

B. Engagements Reviewed:

	Firm Totals		Engs. Reviewed	
	Hrs.	No. of Engs.	Hrs.	No. of Engs.
Audits:				
SEC Clients				
Government[2]				
ERISA				
Other				
Reviews				
Compilations				
Attestations				
Other Accounting Services	________	________	________	________
	________	________	________	________
	________	________	________	________

Comments: ____

____

____

____

III. *Engagement Conclusions*

A. Did the inspection disclose any situation that led the reviewers to conclude that the firm or office should consider:

1. Taking action to prevent future reliance on a previously issued report, pursuant to SAS No. 1 (AICPA, *Professional Standards*, vol. 1, AU sec. 561)? Yes ________ No ________

2. Performing additional auditing procedures to provide a satisfactory basis for a previously expressed opinion, pursuant to SAS No. 46 (AICPA, *Professional Standards*, vol. 1, AU sec. 390)? Yes ________ No ________

B. Did the inspection team conclude in any instances that the firm or office lacked a reasonable basis under the standards for accounting and review services for the report issued? Yes ________ No ________

If any of the answers above are yes, attach a description of such situations, including actions the firm or office has taken or plans to take.

IV. *Findings and Recommendations:*

Attach a copy of any reports issued, including a summary of any inspection findings and recommendations for improvement or list such findings and recommendations below.

____

Supervisory Partner ____________________

Date ____________________

[2] Includes only audits conducted pursuant to the *Government Auditing Standards*, issued by the Comptroller General of the United States ("Yellow Book").

.21

Note: A firm should make the analysis and assessment of the relevance of new professional pronouncements that can affect its practice, and consequently its quality control system, an ongoing activity. The AICPA's *Journal of Accountancy* publishes many of the new pronouncements in its Official Releases column. Thus, a practitioner can review the new pronouncements monthly (or after tax season for the first three months of the year) and record that review on a checklist similar to the one below.

New Pronouncements Checklist

Firm Name ____________________

Analysis of New Professional Pronouncements

The purpose of this checklist is to document the firm's analysis and assessment of the relevance of new professional pronouncements to the firm practice.

		Reviewed		**Relevant?**		
Professional Pronouncement	**Effective Date**	**By**	**Date**	**Yes**	**No**	**Comment, Reference**
Auditing Standards Statement on Auditing Standards No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit*	Audits of financial statement for periods beginning on or after 6/1/01					
Attestation Standards						
Auditing Interpretations						
Attestation Interpretations						
Standards for Accounting and Review Services

AICPA RESOURCE: *Accounting & Auditing Literature*

The AICPA has created a unique online research tool by combining the power and speed of the Web with comprehensive accounting and auditing standards. *AICPA RESOURCE* includes the AICPA, FASB and GASB libraries. You'll find subscriptions to these titles:

- AICPA Professional Standards
- AICPA Technical Practice Aids
- AICPA's Accounting Trends & Techniques
- AICPA Audit and Accounting Guides
- AICPA Audit Risk Alerts
- AICPA Financial Statement Preparation Manual
- AICPA Audit & Accounting Manual
- FASB Original Pronouncements
- FASB Current Text
- EITF Abstracts
- FASB Implementation Guides
- FASB's Comprehensive Topical Index
- GASB Original Pronouncements
- Codification of Governmental Accounting and Financial Reporting Standards
- GASB Implementation Guides
- GASB's Comprehensive Topical Index

Search for pertinent information from both databases by keyword and get the results ranked by relevancy. Print out important *AICPA RESOURCE* segments and integrate the literature into your engagements and financial statements. Available from anywhere you have Internet access, this comprehensive reference library is packed with the A & A guidance you need — and use — the most. All libraries are updated with the latest standards and conforming changes.
