When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms *probable, reasonably possible,* and *remote* to identify three areas within that range, as follows:

a. Probable. The future event or events are likely to occur.

b. Reasonably possible. The chance of the future event or events occurring is more than remote but less than likely.

c. Remote. The chance of the future event or events occurring is slight.

Therefore, the likelihood of an event is "more than remote" when it is at least reasonably possible.

misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

> **Help Desk—**SAS No. 112 includes a list of areas in which control deficiencies ordinarily are at least significant deficiencies and a list of indicators that a control deficiency should be regarded as at least a significant deficiency and a strong indicator of a material weakness. A material financial statement misstatement that was not identified by management is a strong indicator of a material weakness. SAS No. 112 also contains an appendix that provides examples of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

The Evaluation Process

You must evaluate the control deficiencies that you have identified and determine whether these deficiencies, individually or in combination with other control deficiencies, rise to the level of significant deficiencies or material weaknesses.

The factors that you should consider when evaluating control deficiencies are likelihood and magnitude. *Likelihood* refers to the probability that a control, or combination of controls, could have failed to prevent or detect a misstatement in the financial statements being audited. *Magnitude* refers to the extent of the misstatement that could have occurred or that actually occurred because misstatements include both potential and actual misstatements.

The following table summarizes how you consider the significance of a deficiency to determine whether it is a control deficiency, a significant deficiency, or a material weakness.

Magnitude of misstatement that occurred, or could have occurred	***Likelihood of misstatement***	
	More than Remote	***Remote***
Quantitatively or qualitatively material	Material weakness	Control deficiency but not a significant deficiency or a material weakness
More than inconsequential but less than material	Significant deficiency but not a material weakness	Control deficiency but not a significant deficiency or a material weakness
Inconsequential (in other words, clearly immaterial)	Control deficiency but not a significant deficiency or a material weakness	Control deficiency but not a significant deficiency or a material weakness

The "Prudent Official" Test

When you evaluate the significance of a deficiency, the last step in your evaluation is to conclude whether a "prudent official," having knowledge of the same facts and circumstances, would agree with your classification of the deficiency.

> **Help Desk—**See the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist you in the implementation of this standard and to provide additional guidance on communication requirements including the form, content, and timing of the communication and the discussion with management and others.

SAS No. 112 includes examples of factors that impact the consideration of likelihood and magnitude.

Likelihood

In addition to the factors listed in SAS No. 112 and *Understanding SAS No. 112 and Evaluating Control Deficiencies* (SAS No. 112 Alert), the following are examples of factors for employee benefit plans that may affect the likelihood that a control or combination of controls could fail to prevent or detect a misstatement:

The nature of the financial statements accounts, disclosures, and assertions involved

- For example, related party transactions may be prohibited transactions and involve greater risk

The susceptibility of the related assets or liability to loss or fraud

- Investments and benefits paid have a higher susceptibility to loss or fraud

The subjectivity and complexity of the amount involved and the extent of judgment necessary to determine that amount

- For example, the calculation of the present value of accumulated plans benefits

The cause and frequency of any known or detected exceptions relating to the operating effectiveness of a control

- Health benefit payments have a higher likelihood of fraud or irregularity
- Operational deficiencies, such as nontimely contributions

The interaction or relationship of the control with other controls

- Effective monitoring controls at the plan sponsor level and how they interact with the service provider (as outlined in the SAS No. 70 report)

Magnitude

Factors that may affect the magnitude of a misstatement that could result in a deficiency or deficiencies in controls include but are not limited to the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity in the account balance or class of transactions exposed to the deficiency in the current period or expected in future periods

For employee benefit plans, areas to consider include contributions, claim payments, benefit payments, and investments. The application of the definition of compensation, when incorrectly used, can result in a higher magnitude (for example, the exclusion of a certain earnings code in error over a period of years could have a material impact).

Generally, the recorded amount is the maximum amount by which an account balance or total of transactions can be overstated. However, because of the potential for unrecorded amounts, there is no upper limit on the amount of potential understatement.

Control Deficiencies, Significant Deficiencies, or Material Weaknesses

The SAS No. 112 Alert provides a general list of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

In addition to the items listed in the *SAS No. 112 Alert*, the following paragraphs describe circumstances for employee benefit plans that may be control deficiencies, significant deficiencies, or material weaknesses depending upon the likelihood and magnitude of the deficiency.

> **Help Desk—**The items listed here should be used to supplement but not replace those listed in the SAS No. 112 Alert. This is a companion to but not a substitute for, the guidance in SAS No. 112 and the SAS No. 112 Alert. Also, when a control deficiency has been identified, management and the auditor should also evaluate the possible mitigating effects of compensating controls. See the SAS for further guidance.

Significant Deficiencies

Deficiencies in the following areas are ordinarily at least significant deficiencies in internal control:

Controls over the selection and application of accounting principles that are in conformity with GAAP (having sufficient expertise in selecting and applying accounting principles is an aspect of such controls)

- Improper valuation of investments, especially alternative investments
- Plan management must have the ability (methodology and process) to determine reasonableness of actuarial assumptions

Controls over nonroutine and nonsystematic transactions

- Lack of controls over plan mergers and spin-offs
- Lack of controls over plan terminations and liquidation accounting
- Lack of controls over accounting for plan amendments
- Lack of controls when changing service providers and ensuring proper information has been transferred to the new service provider

Material Weaknesses

Each of the following circumstances is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

Ineffective oversight by those charged with governance of the entity's financial reporting and internal control, or an ineffective overall governance structure

- Plan sponsor has outsourced the administrative functions of the plan with no oversight by management
- Plan sponsor does not have the ability to prepare or review the financial statements
- Health and welfare plan utilizes a cash account only for the activity of the plan and neither the outside service provider nor the plan sponsor can prepare the financial statements
- Ineffective communication of plan changes between plan management and human resources or payroll department resulting in significant GAAP deficiencies such as not adjusting the plan financial statements for plan merger or other significant transactions

- Lack of documentation of meetings held by those charged with governance (making decisions without documentation)
- Appropriateness of plan expenses (if material)

Restatement of previously issued financial statements to reflect the correction of a material misstatement

The correction of a misstatement includes misstatements due to error or fraud but not restatements to reflect a change in accounting principle to comply with a new accounting principle or a voluntary change from one GAAP to another. For employee benefit plans, the following situations may cause restatement of the financial statements if material:

- For health and welfare plans, auditing and reporting only on the trust activity rather than the plan
- IBNR not accurately calculated or recorded
- Failure to record discretionary employer contributions especially in profit-sharing plans
- Errors in census data that result in a material misstatement of obligation information
- Benefit payments not calculated in accordance with plan documents
- Not recording demutualizations of insurance companies in the proper period
- Failure to properly present and disclose investments (such as securities lending activities, master trusts, and alternative investments)
- Incorrect income and expense allocations within a master trust
- Cash held on deposit by service providers and not recorded for a health and welfare plan
- Inappropriate accounting and disclosure for allocated and unallocated contracts
- Improper expenses paid by the plan
- Medicare subsidy not properly reflected in the financial statements
- Incorrect reporting of 401(k) accounts
- Use of incorrect actuarial information in the plan financial statements, for example the use of FASB Statement No. 87 rather than FASB Statement No. 35 or using FASB Statement No. 106 rather than FASB Statement No. 112
- Inappropriate expense allocation between multiemployer plans or the sponsoring union
- Improper booking of premium stabilization reserves

Identification by the auditor of a material misstatement in the financial statements for the period under audit that was not initially identified by the entity's internal control

This includes misstatements involving estimation and judgment for which the auditor identifies likely material adjustments and corrections of the recorded amounts, which is a strong indicator of a material weakness even if management subsequently corrects the misstatement. For employee benefit plans often, these are due to changes in plan design or the implementation of new pronouncements.

- IBNR not accurately calculated or recorded
- Not reflecting securities lending in the financial statements due to the lack of understanding of such activity and or the lack of understanding of GAAP requirements surrounding such investments

- Lack of having the financial expertise in the financial reporting process
- For plan mergers, the recording of net appreciation and transfer amounts may be incorrect due to timing of the accounting of the merger

An ineffective internal audit function or risk assessment function at an entity for which such functions are important to the monitoring or risk assessment component of internal control, such as for very large or highly complex entities

For employee benefit plans, this may include:

- Investing in alternative or complex investments without proper due diligence or consideration for the accounting, reporting, or regulatory requirements
- No oversight for monitoring claims paid in a health and welfare plan
- For multiemployer plans, improper monitoring of cash received from contributing employers
- Ineffective IT controls
- For plans with multiple payroll locations, failure to understand the components of eligible compensation or failure to understand the procedures related to timeliness of participant contributions
- Failure to understand the complex nature of the relationships between the plan's systems and the service provider's systems (for example, payroll systems to actuary or recordkeeper systems)
- SAS 70 report with significant testing exceptions that are not mitigated by controls at the plan sponsor

For complex entities in highly regulated industries, an ineffective regulatory compliance function

This relates solely to those aspects of the ineffective regulatory compliance function for which associated violations of laws and regulations could have a material effect on the reliability of financial reporting. When evaluating the severity of such control deficiencies, the auditor should consider whether the entity has controls in place to monitor the impact on the financial statements of laws and regulations relevant to the conduct of the entity's business, and should evaluate the severity of the absence of such controls based on the entity's potential to misstate obligations that may arise from such laws or regulations. For employee benefit plans, this may include:

- Lack of performance of tax compliance testing such as discrimination testing or lack of taking appropriate corrective action when errors are found in such testing
- Prohibited transactions such as timeliness of employee contributions or improper transactions with parties-in-interest and fiduciaries
- Lack of timely reporting to regulatory agencies (such as the IRS, DOL, and PBGC)

Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected (see paragraph 23 of SAS No. 112 for communication requirements in these circumstances)

- This could occur if, for example, one individual is primarily responsible for the accounting and internal controls over all cash receipt and cash disbursement transactions. Having one individual with access to the receipt and disbursement of monies does not provide adequate protection over the plan's assets. Management should consider hiring additional staff or reassign some responsibilities to others to ensure proper segregation of duties is maintained. Given the limited nature of accounting procedures necessary on a monthly basis, management may not feel it is cost effective to add staff to these functions.

An ineffective control environment

Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment. For employee benefit plans this may include:

- Lack of oversight by the plan sponsor of the service provider including not obtaining and reviewing a SAS 70 report if available
- For service providers with no SAS 70 reports, no procedures in place at the plan sponsor to monitor and assess control risk at the service provider

Evaluation Questions

In evaluating the severity of a control deficiency, the first step is to determine whether the deficiency is at least a significant deficiency. Some questions to ask yourself when making this determination include the following:

- Is the likelihood that a misstatement of any magnitude could occur and not be detected by the client's controls at least reasonably possible?
- Is the magnitude of a potential misstatement inconsequential or less than inconsequential to the financial statements? A misstatement is inconsequential if a reasonable person would conclude, after considering the possibility of further undetected misstatements, that the misstatement, either individually or when aggregated with other misstatements, would clearly be immaterial to the financial statements.
- Are there complementary or redundant controls that were tested and evaluated that achieve the same control objective?
- Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to inconsequential?

If the answers to these questions are all no, then the deficiency is at least a significant deficiency. If the answer to any question is yes, before concluding that the control deficiency is not at least a significant deficiency, ask yourself if prudent officials, having your knowledge of the facts and circumstances, would agree with your conclusion that the deficiency is not at least a significant deficiency.

If a prudent official would consider the control deficiency to be at least a significant deficiency, then you would conclude that the deficiency is at least a significant deficiency.

The next step is to assess whether the deficiency is a material weakness. Some questions to ask yourself in making this determination include the following:

- Is the magnitude of the potential misstatement less than material to the financial statements?
- Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to less than material but more than inconsequential?
- Does additional evaluation result in a judgment that the likelihood of a material misstatement of the financial statements is remote?

If the answers to these questions are all no, then the deficiency is a material weakness. If the answer to any question is yes, before concluding that the deficiency is not a material weakness, ask yourself if prudent officials, having your knowledge of the facts and circumstances, would agree with your conclusion that the deficiency is a significant deficiency and not a material weakness, considering the financial statements.

If a prudent official would consider the control deficiency to be a material weakness, then you would conclude that the deficiency is a material weakness.

Illustrative Letter

The following is an illustrative letter for ABC 401(k) Plan with significant deficiencies and material weaknesses. This letter is for illustrative purposes only and should be modified for the individual circumstances of each engagement. The auditor should evaluate the control deficiencies that have been identified to determine whether they rise to the level of a significant deficiency or material weakness. For guidance, see the SAS No. 112 Alert.

[Firm letterhead]

[Date]

[Addressee][2]

[Address]

Ladies and Gentlemen:

In planning and performing our audit of the financial statements of ABC 401(k) Plan (the "Plan") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America ("US GAAS"), we considered the Plan's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we do not express an opinion on the effectiveness of the Plan's internal control.

Our Responsibilities

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

Definitions Related to Internal Control Deficiencies

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects a Plan's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Plan's financial statements that is more than inconsequential will not be prevented or detected by the Plan's internal control. A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Plan's internal control.

Identified Deficiencies in Internal Control

We consider the following deficiencies to be significant deficiencies in internal control.

Employer Matching Contributions

During our audit procedures, we noted that the plan sponsor, ABC Company, incorrectly calculated the employer match for one participant, causing the participant to receive an excess match for the plan year. Upon further investigation, it was determined that the entire XYZ division was impacted by this error. The

[2] The addressee should be the plan oversight entity such as the board of trustees, the board of directors, or the audit committee.

plan sponsor intends to correct these errors by reducing the next employer match calculation for the affected participants by the amount of the excess match and earnings thereon. We recommend the plan sponsor develop and execute policies and procedures to ensure the proper calculation of employer matching contributions and that these calculations are reviewed by someone other than the individual performing the calculation.

Employee Deferral Contributions

During our audit procedures, we noted that 401(k) deferrals were not withheld from several participants' paychecks during the year due to the timing of the paycheck, setup of pay types in the ADP payroll software, or because the check was a manual check. The plan sponsor will correct these errors by increasing the participant's next deferral by the missed contribution amount along with remitting the missed employer match and lost earnings in the next monthly remittance. We recommend that the plan sponsor develop and execute policies and procedures to ensure the proper calculation of employee deferrals and that these calculations are reviewed by a knowledgeable individual at the plan sponsor because the calculations are performed by a third-party payroll service provider.

It was also noted during our audit procedures that there is some inconsistency in the application of the terms in the Plan document relating to the definition of eligible compensation for the purposes of calculating the employee's contribution and the employer's contribution. One participant in our sample made and received contributions based on his compensation including fringe benefits, although fringe benefits are not included in the definition of compensation in the Plan document. We noted this error existed on all participants receiving fringe benefits at that location. The plan sponsor will correct this error by reducing the participant's next deferral by the excess contributions along with reducing the next match for the excess match and earnings thereon. We recommend that the plan sponsor review the setup of the payroll system to ensure all locations are operating in the same manner and are consistent with the Plan document.

It was also noted during audit procedures that the rules for hardship distributions were not applied appropriately as required by the Plan document. One participant in our contribution sample was required to stop making contributions for the next twelve months after receiving a hardship distribution, but then was allowed to continue making contributions when the Plan switched recordkeepers. Upon further investigation, it was determined that a control feature at the recordkeeper had not been put in place to stop the deferral contributions where a hardship distribution had been taken. This is not allowable because the Plan document states a participant must cease making contributions for twelve months after a hardship distribution is made. We recommend that the plan sponsor review the policies and procedures surrounding the hardship distribution process to ensure all appropriate controls are in place and are operating in accordance with the Plan document.

We believe the following deficiencies constitute material weaknesses.

Investments

During our audit, we noted that the client personnel *(such as the assistant controller or human resource supervisor)*, who prepares the financial statements, is not knowledgeable regarding the various investment arrangements entered into on behalf of the plan and the financial statement implications of those arrangements. The treasury department has significant knowledge regarding the types of investment arrangements but is not involved in the accounting and reporting functions for the plan. As a result, the plan financial statements prepared did not contain the proper accounting for plan investments and required disclosures under generally accepted accounting principles. For example, it was necessary for the auditor to propose adjustments to the statement of net assets and revisions to the footnote disclosures relating to the plan's security lending arrangement with the trustee.

It is recommended that either (1) the client personnel increase his or her knowledge of the investment arrangements by working with the treasury department or (2) the treasurer become more involved in the financial statement preparation process. In addition, those individuals responsible for preparing the plan's financial statements should increase their knowledge of employee benefit plan accounting and reporting specifically surrounding investments through the use of the AICPA *Employee Benefit Plan* Audit Guide or taking outside learning and education courses surrounding employee benefit plan accounting and reporting.

Lack of Financial Statement Knowledge

During our audit, we noted that the client personnel *(such as the assistant controller or human resource supervisor)* prepares the financial statements using the year-end trial balance provided by the record keeper. However, the trial balance prepared by the record keeper is not prepared on the accrual basis and it was necessary for the auditor to propose adjusting journal entries to record the contributions receivable and expenses payable at year-end. In addition, it was necessary for the auditor to propose a number of revisions to the footnotes to the financial statements (for example, disclosure of effect of significant plan amendments, etc.) to enable the disclosures to be in accordance with generally accepted accounting principles. The client personnel does not appear to have the necessary knowledge and skill to prepare employee benefit plan financial statements in accordance with generally accepted accounting principles.

We recommend that the company utilizes individuals from the corporate finance department with the requisite knowledge and skill in employee benefit plan generally accepted accounting principles to prepare the financial statements. In addition, we recommend that a current disclosure checklist from the AICPA be used to ensure propriety and completeness of the footnotes.

Review of Information Prepared by Third-Party Service Providers

During our audit procedures, we noted that the plan sponsor, ABC Company, did not perform timely reviews of certain information prepared or provided by its third-party service providers. ABC Company is responsible for the prudent oversight and review of all services provided by third parties to the Plan. We recommend that the plan sponsor perform various periodic reviews and reconciliations of information provided by your third-party service providers including (*a*) reconciling total Plan assets per the participant detail (the sum of the individual participant account balances) provided by the Plan recordkeeper to total plan assets reported by the Plan trustee, (*b*) reconcile total contributions made to the Plan per ABC Company's general ledger or payroll register to total contributions received by the Plan per the trustee, and (*c*) agree individual demographic data included in new employee personnel files to the corresponding information included in the participant detail provided by the Plan recordkeeper.

Securities Lending

During our audit procedures, we noted that there was ineffective design and operation of the financial closing and reporting process, resulting in the misapplication of the accounting and disclosure requirements related to securities lending transactions, as governed by FASB Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.* We recommend that the plan sponsor review all security lending transactions to ensure that they are properly presented in the Plan's financial statements and accompanying footnotes in accordance with FASB Statement No. 140.

We further consider the following matters to be control deficiencies that are of a lesser magnitude than a significant deficiency.

Disbursements

During our audit procedures, we noted one participant in our sample who was paid a distribution based on the account valuation prior to all earnings and contributions being credited to a participant's account and another participant had an error in the calculation of his forfeited balance. The plan sponsor will correct the first error by distributing the remaining balance in the participant's account to him, but the sponsor is not required to make a further distribution related to the second error due to the immateriality of the underpayment. We recommend that the plan sponsor review all distribution requests for accuracy and periodically spot-check reports received from the third-party recordkeeper for any distribution errors.

Plan Management Response

[Insert "Plan Management Response" section if management issues a written response to this communication and such response will be included in a document containing this communication. If this section is included, the following sentence should also be included: "Plan management's written response to the control deficiencies identified herein has not been subjected to our audit procedures, and, accordingly, we express no opinion on it."]

* * *

We have previously discussed our observations and suggestions with the plan sponsor personnel and would be pleased to discuss them in further detail at your convenience, to perform any additional study of the matter, or to assist you in implementing the recommendations to the extent our independence is not impaired.

This communication is intended solely for the information and use of management, those charged with governance, and others within the Plan sponsor [and if applicable, identify any specified regulatory agency] and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

[Firm name]

.252

Appendix C

Definitions of Certain Investments

The following list includes certain investments as defined by the instructions to the Form 5500:

- ***Master trust.*** A trust for which a regulated financial institution (bank, trust company, or similar financial institution that is regulated, supervised, and subject to periodic examination by a state or federal agency) serves as trustee or custodian and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held.
- ***Common/collective trust (CCT).*** A trust maintained by a bank, trust company, or similar institution that is regulated, supervised, and subject to periodic examination by a state or federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer of a controlled group of corporations.
- ***Pooled separate account (PSA).*** An account maintained by an insurance carrier, which is regulated, supervised, and subject to periodic examination by a state agency, for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer of a controlled group of corporations.
- ***103-12 Entity.*** An entity that is not a master trust, CCT, or PSA whose underlying assets include *plan assets* within the meaning of 29 CFR 2510.3-101 of two or more plans that are not members of a related group of employee benefit plans.
- ***Registered investment company.*** An investment firm that is registered with the Securities and Exchange Commission and complies with certain stated legal requirements for the collective investment and reinvestment of assets contributed thereto from investors (employee benefit plans and nonemployee benefit plans).

.253

Appendix D

FSP AAG INV-1 and SOP 94-4-1 Technical Practice Aids

TPA 6931.08, *Types of Investments Subject to SOP 94-4,* as Amended by FSP AAG INV-1 and SOP 94-4-1

Inquiry: What types of investments are subject to the financial statement presentation and disclosure requirements of SOP 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans*, as amended by Financial Accounting Standards Board (FASB) staff position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*?

Reply: FSP AAG INV-1 and SOP 94-4-1 defines an investment contract as (*a*) a traditional or separate account guaranteed investment contract (GIC), (*b*) a bank investment contract (BIC), (*c*) a synthetic GIC composed of a wrapper contract and the underlying wrapped portfolio of individual investments, or (*d*) a contract with similar characteristics.

Plans may hold stable value investments through direct contracts with issuers or through a specifically plan-managed account. Plans may also hold stable value investments through beneficial ownership of bank collective funds, which own investment contracts. Insurance company pooled separate accounts that hold investment contracts also have similar characteristics.

It is important for the auditor to gain an understanding of the types of investments being held by the plan; this can be achieved by obtaining the underlying documents for the investments. Typically, investments have some form of underlying documentation to help determine the type of investment. For example, if a plan is invested in common collective trust funds (CCTs), there should be a trust declaration for that CCT, which would generally have audited financial statements.

TPA 6931.09, Financial Statement Presentation When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts

Inquiry: Do the financial statement presentation requirements in paragraph 15 of SOP 94-4, as amended by FSP AAG INV-1 and SOP 94-4-1, apply to a plan's investment in a CCT or master trust that holds fully benefit-responsive investment contracts?

Reply: Yes. Paragraph 15 of SOP 94-4, as amended by FSP AAG INV-1 and SOP 94-4-1, requires the following presentation for fully benefit-responsive investment contracts.

The statement of net assets available for benefits of the plan shall present amounts for (1) total assets, (2) total liabilities, (3) net assets reflecting all investments at fair value, and (4) net assets available for benefits. The amount representing the difference between (3) and (4) shall be presented on the face of the statement of net assets available for benefits as a single amount, calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to each fully benefit-responsive investment contract from fair value to contract value.

When the plan invests in a CCT (or similar vehicle), or a master trust that holds fully benefit-responsive investment contracts, the fair value of the investment in the CCT or master trust should be reported in investments on the face of the statement of net assets available for benefits. The amount representing the difference between the fair value and the contract value of the fully benefit-responsive investment contracts held by the CCT or master trust should be presented on the face of the statement of net assets available for benefits and calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to the plan's investment in the CCT or master trust from fair value to contract value. For the master trust, the adjustment only relates to the plan's portion of the master trust invested in the fully benefit-responsive investment contracts.

A CCT is a trust for a collective investment and reinvestment of assets contributed from employee benefit plans maintained by more than one employer or a controlled group of corporations that is maintained by a bank, trust company, or similar institution that is regulated, supervised, and subject to periodic examination by a state or federal agency. Such CCTs allow several smaller unaffiliated plans to gain the economies of scale necessary to participate in the stable value marketplace. These CCTs generally issue separate standalone financial statements and are considered investment companies subject to the AICPA Audit and Accounting Guide *Investment Companies*.

TPA 6931.10, Financial Statement Disclosure Requirements When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts

Inquiry: Do plans that directly invest in CCTs or in master trusts that hold fully benefit-responsive investment contracts need to include in the plan financial statements the disclosures in paragraph 15 of SOP 94-4, as amended by FSP AAG INV-1 and SOP 94-4-1?

Reply: Plans that directly invest in CCTs or similar vehicles that hold fully benefit-responsive investment contracts do not need to include the disclosures detailed in the FSP in the plan's financial statements. Such disclosures would be included in the financial statements of the CCT, in accordance with paragraph 11 of the FSP.

For plans that invest in a master trust that holds fully benefit-responsive investment contracts, the notes to the financial statements should include the disclosures required in paragraph 15 of SOP 94-4, as amended by FSP AAG INV-1 and SOP 94-4-1, related to the fully benefit-responsive investment contracts held by the master trust. These disclosures are necessary because, unlike a CCT (as discussed in TPA 6931.09), master trust financial statements are not required, and the related disclosure information would not be readily available.

Illustrative Financial Statements

The following illustrative financial statements are for the hypothetical XYZ Company 401(k) plan, modified to reflect the reporting and disclosure provisions of FSP AAG INV-1 and SOP 94-4-1. It does not illustrate other provisions that might apply in circumstances other than those assumed in this example. It also does not illustrate all disclosures required for a fair presentation in conformity with generally accepted accounting principles (GAAP). The presented formats and the wording of accompanying notes are only illustrative and are not necessarily the only possible presentations.

Although GAAP does not require comparative financial statements, ERISA requires a comparative statement of net assets available for benefits. The illustrative financial statements are intended to comply with the requirements of ERISA.

> **Help Desk—**This is not a set of full financial statements but rather just those portions of the financial statements impacted by FSP AAG INV-1 and SOP 94-4-1. For this example, the following items are presented: (1) The Statement of Net Assets Available for Benefits, (2) the Summary of Accounting Policies footnote, and (3) the Investment Contract With Insurance Company footnote.

XYZ Company 401(k) Plan Statements of Net Assets Available for Benefits

	December 31,	
	20X1	20X0
Assets:		
Investments, at fair value (see Note C)	$9,192,000	$8,005,000
Receivables:		
Employer contribution	14,000	10,000
Participant contributions	52,000	50,000
Total receivables	66,000	60,000
Total assets	9,258,000	8,065,000
Liabilities:		
Accounts payable	10,000	20,000
Accrued expenses	15,000	—
Total liabilities	25,000	20,000
Net assets available for benefits at fair value	9,233,000	8,045,000
Adjustment from fair value to contract value for fully benefit-responsive investment contracts	(15,000)	(10,000)
Net assets available for benefits	$9,218,000	$8,035,000

See accompanying notes to the financial statements.

XYZ Company 401(k) Plan Notes to Financial Statements

B. Summary of Accounting Policies

Use of Estimates and Basis of Accounting

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates that affect the financial statements and accompanying notes. Actual results could differ from those estimates.

As described in Financial Accounting Standards Board Staff Position, FSP AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans* (the FSP), investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. As required by the FSP, the Statement of Net Assets Available for Benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Quoted market prices are used to value investments. Shares of mutual funds are valued at the net asset value of shares held by the Plan at year end. Participant loans are valued at their outstanding balances, which approximate fair value. The fair value of the guaranteed investment contract is calculated by discounting the related cash flows based on current yields of similar instruments with comparable durations.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

E. Investment Contract with Insurance Company

In 20X0, the Plan entered into a benefit-responsive investment contract with National Insurance Company (National). National maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

As described in Note B, because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by National, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on a formula agreed upon with the issuer, but it may not be less than four percent. Such interest rates are reviewed on a quarterly basis for resetting.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) changes to plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under Employee Retirement Income Security Act of 1974. The Plan administrator does not believe that the occurrence of any such value event, which would limit the Plan's ability to transact at contract value with participants, is probable.

The guaranteed investment contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

Average yields:	***20X1***	***20X0***
Based on actual earnings	4.68%	4.90%
Based on interest rate credited to participants	4.68%	4.90%

Appendix E

Employee Benefits Security Administration Field Assistance Bulletins

In the course of audits and investigations by Employee Benefits Security Administration (EBSA) field enforcement staff, difficult legal issues often arise. In an effort to provide the regional office staff with prompt guidance, EBSA has developed a vehicle for communicating technical guidance from the national office. Field Assistance Bulletins (FABs) ensure that the law is applied consistently across the various regions. They also provide the regulated community with an important source of information about the agency's views on technical applications of the Employee Retirement Income Security Act of 1974 (ERISA). All FABs are posted on EBSA's Web site and available to the public.

Help Desk—FABs are available at www.dol.gov/ebsa under Compliance Assistance.

The following is a listing and brief description of the FABs.

FAB 2002-1	Addresses the fiduciary considerations involved with the refinancing of an ESOP loan under section 408(b)(3) of ERISA
FAB 2002-2	Addresses whether the trustees of two related multiemployer plans were subject to ERISA fiduciary standards when they amended the plan's trust agreements
FAB 2002-3	Addresses the fiduciary considerations regarding the use of agreements in which the service provider retains the "float" on plan assets
FAB 2003-1	Addresses the issue of whether corporate directors and officers may be denied participant loans that might violate securities laws when ERISA requires that such loans be made available to all participants on a reasonably equivalent basis
FAB 2003-2	Considers the application of EBSA's participant contribution requirements to multiemployer defined-contribution pension plans
FAB 2003-3	Addresses the rules that apply to how expenses are allocated among plan participants in a defined-contribution pension plan
FAB 2004-01	Addresses whether health savings accounts (HSAs) established in connection with employment-based group health plans constitute *employee welfare benefit plans* for purposes of Title I of ERISA
FAB 2004-02	Addresses a fiduciary's duties with respect to missing participants in a terminated defined-contribution plan
FAB 2004-03	Addresses the fiduciary responsibilities of a directed trustee in the context of publicly traded securities
FAB 2006-01	Addresses the distribution to plans of settlement proceeds relating to late trading and market-timing

(continued)

FAB 2006-02	Addresses recurring questions about ERISA coverage of health savings accounts (HSAs) and evolving practices in the offering of HSAs in the workplace
FAB 2006-03	Addresses interim guidance relating to individual benefit statements and notices of freedom to divest employer securities pursuant to the Pension Protection Act of 2006
FAB 2007-01	Addresses guidance relating to the investment advice provisions of the Pension Protection Act of 2006

Analytical Procedures as Substantive Tests

Analytical Procedures as Substantive Tests

For all audits of financial statements in accordance with generally accepted auditing standards (GAAS), analytical procedures should be applied to some extent for the purposes of assisting the auditor in planning the nature, timing, and extent of other auditing procedures, and as an overall review of the financial information in the final review stage of the audit. In some cases, however, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives. Analytical procedures may be used as substantive tests to obtain evidential matter about particular assertions related to account balances or classes of transactions.

AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), as amended, provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits.

Because the planning for employee benefit plan audits is often done after year end, preliminary analytics are performed using year-end numbers with minimum subsequent adjustment. In such instances, final analytics can be documented on the same schedule; however, because each type of analytic is done for a different purpose, different purposes, expectations, and conclusions need to be documented. There may be certain areas where the auditor knows during planning that substantive analytics will be performed. For these areas, it may be efficient to document preliminary, substantive, and final analytics on the same schedule, making sure the purpose of each test, expectation, and conclusion is documented appropriately. If there are any audit adjustments, a separate and final analytic would need to be performed.

Analytical Procedures in Planning the Audit

For planning purposes, these procedures should focus on (1) enhancing the auditor's understanding of the plan and the transactions and events that have occurred since the last audit date and (2) identifying areas that may represent specific risk relevant to the audit. These procedures can help identify such things as the existence of unusual transactions and events. They can also help identify amounts, ratios, and trends that might indicate matters that have financial statement and audit planning ramifications.

The following are examples of analytical procedures that the auditor may find useful in planning an audit of an employee benefit plan:

- Comparison of investment balances and rates of return with prior-period amounts
- Analysis of changes in contributions and benefit payments during the current period based on statistical data (for example, number of participants eligible to receive benefits in the current period, or the number of terminations)

Analytical Procedures Used as Substantive Tests

The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion may be derived from tests of details, from analytical procedures, or from a combination of both. The decision about which procedures to use to achieve a particular audit objective is based on the auditor's judgment on the expected effectiveness and efficiency of the available procedures.

The auditor considers the level of assurance, if any, he or she wants from substantive testing for a particular audit objective and decides, among other things, which procedure or combination of procedures can provide that level of assurance. For some assertions, analytical procedures are effective in providing the appropriate level of assurance. For example, the auditor may be able to obtain a moderate-to-high level of assurance over the accuracy of insurance premiums by performing an analytic regarding monthly premium amounts using the rates in the insurance agreement to set the expectation. For other assertions, however, analytical procedures may not be as effective or as efficient as tests of details in providing the desired level of assurance. For example, for a plan with multiple payroll locations, it may be difficult to obtain disaggregated information regarding participant contributions; therefore, substantive analytics may not be effective or efficient.

The expected effectiveness and efficiency of an analytical procedure in identifying potential misstatements depends on, among other things, (1) the nature of the assertion, (2) the plausibility and predictability of the relationship, (3) the availability and reliability of the data used to develop the expectation, and (4) the precision of the expectation.

Documentation of Substantive Analytical Procedures

When an analytical procedure is used as the principal substantive test of a significant financial statement assertion, the auditor should document all of the following:

1. The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development

2. Results of the comparison of the expectation to the recorded amounts or ratios developed from recorded amounts

3. Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

See AU section 329 for further guidance.

Examples of Analytical Procedures

Auditors should be aware that the examples contained in this section typically would not eliminate the need for detailed testing but may be used to supplement such testing.

- ***Investments.*** Investment balances may fluctuate during the year based on changes in (1) investment strategy resulting from management decisions (or resulting from participant decisions, in the case of a defined-contribution participant-directed plan), (2) market trends, or (3) other plan changes (for example, merger or termination). Once the auditor understands what types of changes have occurred, an expectation can be developed. Review market trends for similar types of investments and determine expectations based on plan activity (level of contributions or distributions), taking into account plan changes. Often the recordkeeper or investment manager prepares quarterly investment return reports that can be used to assist in developing an expectation. In addition, benchmarks for yields and total return can be obtained for asset classes or specific investments (for example, mutual funds).

- ***Participant contributions.*** Review the prior year Form 5500 to determine the participant headcount in the plan. Obtain the total contribution balance for the prior year and divide this amount by the participant headcount to determine an average participant contribution amount for the prior year. Determine (1) the growth or decline of participants for the current year, (2) changes in contribution rates (for example, plan amendments and so on), and (3) pay increases. Calculate current year contribution amount using last year's average contribution amount and this year's headcount, taking into account any changes in contribution rates or pay increases.

Participant Contributions Example

Prior-year headcount per the Form 5500 = 130 people

Prior-year participant contributions balance = $401,828

Prior-year "average" participant contribution = $401,828/130 = $3,091

Per discussion with management, during the current year, only 50 people remain actively contributing in the plan due to significant layoffs in the Company. No pay increases took effect during the year. Therefore, total participant contributions are expected to be:

$3,091 x 50 people = $154,550 expected contribution

Often, the recordkeeper prepares quarterly reports that include headcount and contribution rate information that can be used to assist in developing an expectation.

- ***Claims.*** Determine number of claimants receiving claims in the prior year and the average claim per participant. Determine the number of claims during the year. Apply the average claim per participant to the expected number of claimants, taking into account plan amendments, individual large claims, stop-loss insurance coverage, or the health care cost trend rate increase. Often, the third-party administrator prepares quarterly reports that include headcount and claim information that can be used to assist in developing an expectation.

- ***Payroll.*** For single employer plans, develop an expectation for current-year gross wages using prior-year gross wages and taking into account change in number of employees, average percentage pay increases, and addition and termination of highly compensated employees.

.256

Appendix G

Claims Testing

There are three sources that the auditor may need to consult when testing claims. They are the sources that contain Current Procedural Terminology (CPT) codes, Healthcare Common Procedure Coding System (HCPCS) codes, and International Classification of Diseases, Ninth Edition (ICD-9) codes.

Physicians' CPT is a listing of descriptive terms and identifying five-digit codes for reporting medical services and procedures. The purpose of CPT is to provide a uniform language that accurately describes medical, surgical, and diagnostic services and thereby serves as an effective means for reliable nationwide communications among physicians, patients, and third parties. In addition, for use in federal programs (Medicare and Medicaid), CPT is used extensively throughout the United States as the preferred system of coding and describing health care services.

CPT does not contain all the codes needed to report medical services and supplies. The Health Care Financing Administration (HCFA) developed level II and level III codes, which are published as HCPCS codes for supplies and services not covered by a CPT code (level I). These codes cover such items as durable medical equipment, ambulance services, and various drugs.

The ICD-9-CM is published by the United States government and is the classification employed for cause-of-death coding. The ICD-9 coding system is recommended for use in all clinical settings and is required for reporting diagnoses and diseases to the U.S. Public Health Service.

If medical claims are not submitted electronically, they are submitted on one of two types of forms. All hospital bills, both outpatient and inpatient, are submitted on a form UB92. All other bills are submitted on a form HCFA 1500.

Appendix H

Payroll Auditing

AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), states that the auditor should assume that revenue recognition is an area where fraud could occur in any entity. For employee benefit plans, the primary sources of revenue are income from investments and employer and employee contributions. The AICPA Audit and Accounting Guide *Employee Benefit Plans* (EBP Guide), with conforming changes as of March 1, 2007 (product no. 012597kk), contains chapters detailing audit procedures for investments and employer and employee contributions.

In single-employer employee benefit plans, the auditor can test payroll audits directly. Often, the auditor performs the audit for both the employer and the employee benefit plan, and this enables the auditor to do the testing of the employer's payroll without a great deal of difficulty.

For multiemployer benefit plans, employers contribute to an employee benefit plan based on the provisions of a collective bargaining agreement (CBA) negotiated between a union representing employees in a specified trade or industry and their employers. A multiemployer plan may be local, regional, or national in scope and may bind a few employers or several thousand employers.

What Is a Payroll Audit?

A payroll or compliance audit is an audit of a contributing employer to determine whether the employer has contributed the amount specified by the CBA to a multiemployer plan. Although they are called payroll audits, these examinations are actually agreed-upon procedure engagements. When a plan uses a CPA to perform payroll audits, the plan trustees will agree with the auditor about the records to examine and the steps to perform. The CPA will perform the agreed-upon procedures specified and will write a report addressed to the trustees of the multiemployer plan detailing the findings of the engagement. The agreed-upon procedures report issued will typically be in accordance with AT sections 101–701 *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1), as amended.

Purpose of a Payroll Audit

There are two primary purposes of a payroll audit. First is to determine that the employer is complying with the CBA. Only those employees covered by the CBA should be reported. The payroll audit helps ensure that all wages and hours for all covered employees are reported.

The second purpose of a payroll audit is to determine the accuracy of employer contributions. Only by having a payroll audit program of contributing employers can an independent auditor gain assurance that the completeness objective has been fulfilled for employer contributions to the multiemployer plan.

Who Should Perform the Payroll Audits?

Payroll audits can be performed internally by the staff of the multiemployer plan or externally by the auditors performing the audit of the plan, another CPA firm, or another entity specializing in payroll auditing. It does not matter who performs the payroll audits if the CPA firm conducting the audit of the plan has the opportunity to review the working papers of the payroll audits performed to the extent necessary to gain assurance regarding the completeness of employer contributions.

Payroll auditing done in-house can be less expensive if the plan can use its own employees to do the audits. In-house auditors can also be used effectively to educate contributing employers regarding their reporting responsibilities in complying with the CBA.

Other plans prefer to hire outsiders to perform payroll audits. These plans prefer to have someone else handle the employment and training issues of payroll auditors.

Are Payroll Audits Required?

Paragraph 10.09 of the EBP Guide states that in a multiemployer environment "plan sponsors or trustees may engage the employer's auditor, other outsider auditors, in-house compliance personnel, or others to perform agreed upon procedures to test the completeness of employer contributions." The Department of Labor has suggested that it is difficult to ensure the completeness objective over employer contributions without performing payroll audits and that without an effective payroll audit program, the plan auditor should consider issuing a qualified opinion on the plan's financial statements.

There may be some limited circumstances where payroll audits are not necessary. For example, some plans cover only a few contributing employers and the control system for those employers is effective and can give the external auditor confidence that all employer contributions are being collected.

How Often Should Payroll Audits Be Performed?

Paragraph 10.09 of the EBP Guide states that "a representative group of contributing employers should be tested each year." Does this mean that every contributing employer will be audited within a 3- or 4-year cycle? While a 3- or 4-year cycle might be acceptable in a small plan, a national plan with thousands of contributing employers would have difficulty in auditing all contributing employers. A random sample program should be utilized in selecting at least some of the employers for audit. In that way, every employer would have the opportunity of being audited.

The plan should monitor from year to year the effectiveness of its payroll auditing program. The payroll audit program should help ensure the completeness objective in measuring employer contributions. The plan itself should also be able to conclude that the payroll audit program is operating on a cost-effective basis. If revenue from employer contributions generated as a result of the payroll audit program increases from year to year as a percentage of the costs of the program, then consider increasing the number of audits performed. If revenue is declining as a percentage of costs, then consider reducing the number of payroll audits being performed.

AAM Section 8070

State and Local Governmental Developments—2007

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
STATE AND LOCAL GOVERNMENTAL DEVELOPMENTS—2007

This Audit Risk Alert is intended to provide auditors of financial statements of state and local governments with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole, CPA CFE
Technical Manager
Accounting and Auditing Publications

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your state and local governmental audits. This alert can also be used by a government's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your auditees operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). Further, if your state or local government audit is performed under *Government Auditing Standards* issued by the Comptroller General of the United States (also referred to as the Yellow Book or generally accepted government auditing standards [GAGAS]) or Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, you should refer to AICPA Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2007* (product no. 022457kk). These alerts can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 State and local governments may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the opinion unit level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your auditee's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the auditee operates. Economic activities relating to factors such as interest rates, consumer confidence, grantor government interests, investor (in debt securities) information, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter advance estimates, GDP increased at an annual rate of 3.4 percent. The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.11 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent during its last 10 meetings (June 2006–August 2007). Future federal fund rate adjustments will likely depend upon the outlook for economic growth and inflation.

Industry Trends and Conditions

.12 The Nelson A. Rockefeller Institute of Government (Institute) publishes frequent updates on state fiscal conditions. The Institute's report on the January through March 2007 quarter, at www.rockinst.org, showed continued improvement in the states' revenue picture and included these highlights:

- State tax revenue totaled $154 billion, up 4.8 percent from the same period in 2006.
- Adjusting for inflation and legislated tax changes, growth was 1.4 percent. This represents the 14th consecutive quarter of growth in real, adjusted terms, but was slightly below 2006 average growth.
- Revenue growth among the regions was strongest in the Rocky Mountain states for this quarter (10.5 percent) and weakest in the Great Lakes region (1.2 percent).
- The Western regions continue to lead the nation in employment growth, while the Great Lakes region and northeastern states were the weakest.
- State tax revenue growth was reduced by $1.3 billion in net enacted tax cuts.

.13 Another Institute report, at www.rockinst.org, entitled *The Effects of State-Level Tax and Expenditure Limitations on Revenues and Expenditures*, discussed the recent trends in states enacting tax or spending limitations through legislation, referenda, or voter initiatives. The report concludes that the spread of state-level tax- and expenditure-limitation initiatives has slowed in recent years. Most recent efforts to impose such limitations have either failed to get placed on voter's ballots or failed to win approval of voters. Only two states, Maine and Ohio, enacted spending limits in the past two years, and both were enacted through state legislation and not voter initiatives. The study's findings strengthened the claim that tax and spending limitations reduce total government spending on a real, per capita basis. However, the findings also suggest that the spending reductions are not uniform for all government services, with transportation spending showing little reduction compared to spending for public safety. Finally, the study expressed a concern that with the slowdown in the spread of the tax and expenditure limitations, a divide may be developing between the states that have implemented limitations and those that have not, which could result in large differences in spending and revenue priorities among the states.

.14 In May 2007, the United States Congress passed a $120 billion emergency appropriations bill. While the majority of the appropriations are for military purposes, over $22 billion was made available for domestic purposes. Some of these domestic purposes that may be of interest to state and local governments include:

- $6.3 billion for continued hurricane relief.
- $3 billion for crop disaster and livestock assistance.
- $1 billion for homeland security anti-terrorism programs.
- $650 million for funding state shortfalls in children's health insurance programs.
- $465 million for wildfire suppression.

.15 Also of interest to state and local governments in the bill is the provision to raise the minimum wage from $5.15 to $7.25 per hour over a three-year period. The increases would take effect as follows: (1) August 1, 2007 to $5.85; (2) August 1, 2008 to $6.55; and (3) August 1, 2009 to $7.25.

Retiree Health Care Costs

.16 The pending implementation of Governmental Accounting Standards Board (GASB) Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, continues to be of interest to state and local governments and their auditors. Because many governments previously have not measured or disclosed in their financial statements their obligations to pay retiree health care costs and other postemployment benefits (OPEB) other than pensions, the media, the bond market, and state and local government legislative bodies are starting to focus on the potentially significant sum of those obligations, sometimes into the billions of dollars for an individual state. In addition, a government that does not manage its OPEB liability on a go-forward basis, especially the growth in its liability, could find itself explaining its OPEB and funding policies or lack of a funding policy to credit rating agencies when issuing bonded debt.

.17 Public employee unions and retirement benefit administrators across the country are concerned that a change from the pay-as-you-go accounting approach might lead to a reduction in benefits. Many predict significant changes in OPEB as governing bodies become better informed through actuarial or similar valuations about the amount of the obligations and the effects of not managing them. Some governments have formed task forces to help them identify solutions. Auditors might consider working with the actuarial firms retained by the auditee or, if necessary, retaining actuarial specialists to evaluate auditee valuations and also be prepared to answer their auditees' questions about managing those obligations.

.18 Common solutions that have been discussed for managing the OPEB obligation and its growth include restricting new entrants into the plan, raising the employee cost share, lengthening the vesting period, restricting ad hoc benefit increases, and converting a defined benefit plan to a defined contribution plan. Another common solution is to begin to advance fund the obligation, as normally is done with pension obligations, which is a long-term solution that will take years with a well-managed funding program to fully fund the accrued liability. Some governments may even consider discontinuing or reducing benefits for current and retired employees, although that may not be possible because of legal or contractual restraints. Whichever solutions are chosen by the entity, they likely will be difficult.

.19 The state of Texas has taken an unorthodox and unprecedented approach to dealing with measuring and reporting OPEB obligations. At the urging of the Texas state comptroller and representatives from certain Texas county governments, the Texas legislature passed and the governor has signed legislation in their 2007 session that would provide all Texas government entities, including the state and all political subdivisions, an alternative to following generally accepted accounting principles (GAAP). This alternative legislated basis of accounting, which is considered an other comprehensive basis of accounting, essentially follows GAAP with the exception of applying the accrual basis principles for recognizing OPEB expenses and obligations as constructively incurred pursuant to GASB Statement No. 45. The argument put forth by the legislation's supporters is that Texas governments are constitutionally prohibited from entering into long-term obligations, such as postemployment health care benefits, and that recording such a long-term obligation would misrepresent the government's financial condition. They do not support the notion that an OPEB liability exists based on a substantive plan or constructive obligation as put forth in GASB Statement No. 45. This position has been questioned by many outside of Texas. Rough estimates of the State of Texas's OPEB obligation place the amount around $50 billion.

.20 While concerns exist across the country that other states may follow the Texas lead, the governor of the state of Connecticut recently vetoed legislation which would have allowed the state comptroller the authority to prescribe special accounting rules for the state. The governor cited as a reason for her veto that she was concerned that deviating from GAAP that were established by an independent body would jeopardize the financial standing of the state. Financial statements prepared on a basis of accounting that is not generally accepted could result in the downgrading of the state's bond rating which could increase the cost of borrowing.

Sales Tax on Internet Sales

.21 For years, this alert has discussed the ongoing debate about the taxation of Internet sales. As discussed in the 2006 alert, the Internet Tax Nondiscrimination Act (P.L. 108-357, December 3, 2004) bans new Internet access taxes and new, multiple, and discriminatory taxes on electronic commerce (e-commerce; that is, Internet sales) until November 1, 2007.

.22 The 110th United States Congress (2007) introduced legislation that would extend the current moratorium for another four years. Senate Bill 1453 would extend the moratorium to November 1, 2011, preserve the grandfather clause in the original legislation that protects state and local taxes imposed on Internet access prior to 1998, and clarify the definition of "Internet access." The bill's authors indicate that the bill is designed to ensure that customers continue to enjoy tax-free access to the Internet, but at the same time protect state and local governments' tax bases from possible erosion when future services, such as cable television, migrates to the Internet. The bill's authors also state that a temporary extension of the moratorium will allow Congress more time to understand the Internet's evolution and what it means for state and local governments.

Other Industry and Environmental Developments

.23 Questions have surfaced over the past few years regarding how to properly affect a government's right to collateral pledged by financial institutions to secure uninsured deposits. The provisions of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) could affect a government's rights to collateral. That is, unless the *financial institution* complies with FIRREA, the deposits may effectively be uncollateralized. Auditors may consider whether appropriate evidence exists to support whether the financial institution has satisfied FIRREA requirements. Courts have ruled that, based on FIRREA, a collateral pledge is not valid against the Federal Deposit Insurance Corporation (FDIC) unless it satisfies these requirements:

- It must be in writing.
- It must be approved by the institution's board of directors or loan committee, and that approval must be reflected in the minutes of the board or committee.
- It must be an official record of the depository institution since it was executed.

.24 In determining whether a collateral pledge is effective, the FDIC also considers whether the depositor has met the conditions of Article 9 of the Uniform Commercial Code (UCC) adopted by that particular state. A necessary component to perfecting a security interest in pledged collateral is to establish *control* over the securities. One way to establish control is by a control agreement. Risk therefore exists that collateral agreements may be ineffective unless FIRREA and UCC Article 9 requirements were met. Deposits covered by ineffective agreements should be disclosed as uncollateralized.

.25 As reported in last year's alert, the retirement of large numbers of baby boomers may undermine entities' internal control. Entities will suffer the loss of experience as workers retire almost en masse. Staff shortages will continue while recruitment efforts are under way. Governments and health care plans that provide prescription drug coverage to their Medicare-eligible retirees may find that the retiree drug subsidy, which may be available under the Medical Modernization Act (MMA), is a potential new source of revenue. As discussed in the "Recent Accounting Pronouncements and Related Guidance" section of this alert, the GASB has addressed the accounting for those revenues in Technical Bulletin 2006-1, *Accounting and Financial Reporting by Employers for Payments from the Federal Government Pursuant to the Retiree Drug Subsidy Provisions of Medicare Part D*.

> **Help Desk—**The U.S. Department of Health and Human Services, Centers for Medicare and Medicaid Services, maintains a Web page at www.cms.hhs.gov/EmplUnionPlanSponsorInfo to provide information to employers about the Medicare prescription drug benefit and retiree drug subsidy.

Legislative and Regulatory Developments

State and Local Government Audits Performed Under *Government Auditing Standards* and OMB Circular A-133

.26 State and local governments may receive federal or state assistance that results in additional audit requirements. For example, they may be required to comply with *Government Auditing Standards*. In addition, auditors may be required to perform a single audit and comply with applicable rules. A *single audit* is an audit of an entity's federal financial assistance, as required by the Single Audit Act Amendments of 1996 and OMB Circular A-133.

.27 When performing audits under *Government Auditing Standards* or single audits, auditors should refer to the guidance in the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* (GAS/A133 guide). This guide is updated each year for conforming changes. The 2007 update to the GAS/A133 guide is expected in winter 2007 (product no. 012747kk). Auditors should also refer to the AICPA Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2007* (product no. 022457kk) for further developments.

.28 Also, auditors that perform single audits should be aware of a recently issued federal study on single audit quality, titled *Report on National Single Audit Sampling Project* (the PCIE report), that was issued by the President's Council on Integrity and Efficiency (PCIE) and addressed to the OMB. The report can be found at www.ignet.gov/pande/audit/NatSamProjRptFINAL2.pdf. The results of the study show that improvements are needed in many areas. Auditors should refer to the AICPA Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2007* for more details on the study, its results, and a summary of the most common audit deficiencies. Further, this alert also covers other continued problems noted in Yellow Book and single audits found in recent peer reviews and AICPA Professional Ethics Division investigations of CPA firms, many of which relate to the financial statement audits of state and local government audits.

> **Help Desk—**More information about common governmental audit quality deficiencies can be found on the GAQC Web site under the Resources tab at http://gaqc.aicpa.org/Resources/Audits+Performed+Under+Government+Auditing+Standards/ and http://gaqc.aicpa.org/Resources/OMB+Circular+A-133/.

Internal Revenue Service Activities

.29 Internal Revenue Service (IRS) activities may affect the financial statement audits of your state and local government auditees. Noncompliance with federal tax requirements could have a direct and material effect on the determination of financial statement amounts. In addition, changes in U.S. Department of the Treasury and IRS regulations might result in changes in a government's activities.

.30 In IRS news release IR-2006-82 and IRS Notice 2006-50, the IRS stated that it would stop collecting the excise tax on long-distance telephone service and provide an opportunity for taxpayers who paid such taxes to request refunds. The IRS has indicated that refund requests from governmental entities should be requested on Form 8849, Claim for Refund of Excise Taxes. Government entities should not use Form 990-T. The IRS instructions for governments completing Form 8849 can be found on the IRS Web site (www.irs.gov/govt/fslg/article/0,,id=168262,00.html). A government may request a refund for federal excise taxes on long-distance service billed after February 28, 2003 and for all federal telephone excise taxes billed after December 31, 2003. There are statutory deadlines for filing for the 2004 calendar year that range from April 30, 2007 to January 31, 2008.

.31 The IRS, along with the Department of Justice and the Securities and Exchange Commission (SEC), continues to be interested in alleged abuses in the tax exempt bond market. In October 2006, an official from the Tax Exempt Bond Division of the IRS Tax Exempt/Government Entities unit warned bond attorneys that enforcement against abusive bond deals would be the Division's top priority in 2007. Specifically, the official cited abusive arbitrage transactions as a focus area and his intent to discipline tax professionals through sanctions contained in IRS Code Section 6700. In addition to the possibility for such abusive bond deals to be declared taxable rather than tax exempt, the additional penalties under IRS Code Section 6700 could result in monetary penalties to the bond lawyer or tax professional. If the abuses are determined to be criminal in nature, the Department of Justice could bring criminal charges against those involved. Auditors should be alert to these investigations and their potential impact on the issuing government's financial statements, and also pay particular attention to the determination of arbitrage liabilities for state and local governments.

.32 There is a wealth of information on the IRS Web site (www.irs.gov). The site provides separate pages for state and local governments (www.irs.gov/govts), Indian tribal governments (www.irs.gov/tribes), tax-exempt bonds (www.irs.gov/bonds), and employee retirement plans (www.irs.gov/ep). These pages allow the opportunity to access and subscribe to various newsletters or e-mail alerts, such as *FSLG Newsletter* and *Tax Exempt Bond Community Update*, which will keep you updated about relevant IRS activities. A listing of IRS subscription services is available at www.irs.gov/taxpros/article/0,,id=99120,00.html.

Department of Labor Topics

.33 Department of Labor (DOL) activities might also affect the financial statement audits of your state and local government auditees. Noncompliance with federal wage and hour laws such as the Fair Labor

Standards Act (FLSA) and other employment related requirements could have a direct and material effect on the determination of financial statement amounts. In addition, changes in DOL regulations might result in changes in a government's activities.

> **Help Desk—**Information about the FLSA is on the Internet at www.dol.gov/compliance/laws/comp-flsa.htm.

Securities and Exchange Commission Topics

The SEC and Integrity in the Municipal Market

.34 In July 2007, the chairman of the SEC, Christopher Cox, publicly raised concerns regarding the need for a comprehensive review of the municipal bond disclosure rules. In a speech given in Los Angeles, the chairman discussed establishing a "limited regulatory regime" to improve standards governing the municipal securities market and touched on how such legislation might include requirements for governments issuing municipal securities to provide improved disclosures and to make their offering documents, periodic reports, and other financial information available to investors, taxpayers, and others on a timely basis by tapping the power of the Internet.

.35 Additionally, Chairman Cox noted that the rules put forth by GASB are not requirements; that is, government bodies adopt them voluntarily. He also cited two states—Texas and Connecticut—that have made direct challenges to GASB by passing legislation that allows them to depart from GASB standards. The measures were recently adopted in Texas and vetoed by the governor of Connecticut (see further discussion in "Industry Trends and Conditions"). Chairman Cox described the concept of creating an independent funding mechanism for GASB and establishing SEC oversight of GASB similar to the SEC relationship with FASB. The full text of the speech can be accessed at www.sec.gov/news/speech/2007/spch071807cc.htm. The SEC has since delivered a white paper to Congress that calls for the improvements that Chairman Cox outlined in his speech (see www.sec.gov/news/press/2007/2007-148wp.pdf). A press release on the topic can also be found at www.sec.gov/news/press/2007/2007-148.htm.

Auditor Responsibility for Disclosure in Official Statements

.36 A number of SEC enforcement actions have suggested a need for improvement in the quality of accounting and disclosures made by state and local governments. Auditors are subject to the antifraud provisions of the federal securities laws and may be held liable for material misstatements or omissions in documents containing audited financial statements, such as preliminary or final official statements with which they are associated. Disclosures that are unclear or difficult to understand may increase an auditor's exposure to liability. When associated with the official statements, auditors should remember their responsibilities under AU section 550, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1). As described in Chapter 16 of the AICPA Audit and Accounting Guide *State and Local Governments* (the SLG guide), the following are situations in which the auditor becomes associated with the official statement:

- Assisting in preparing the financial information included in the official statement.
- Reviewing a draft of the official statement at the government's request.
- Signing (either manually or electronically) the independent auditor's report for inclusion in a specific official statement.[1]
- Providing written agreement (for example, through a consent letter or signed authorization form) for the use of the independent auditor's report in a specific official statement.

---

[1] This situation involves an original manual or electronic signature on the auditor's report, not a reproduction of an auditor's report that was manually or electronically signed. For example, the underwriter or bond counsel may require a copy of the auditor's report with an original manual or electronic signature to file with the official closing documents for the offering.

- Providing a revised independent auditor's report for inclusion in a specific official statement.
- Issuing a comfort letter, the letter described in AU section 634.09, *Letters for Underwriters and Certain Other Requesting Parties* (AICPA, *Professional Standards*, vol. 1), or an attestation engagement report in lieu of a comfort or similar letter on information included in the official statement.
- Issuing a report on an attestation engagement relating to the debt offering.

.37 If the auditor is associated with an official statement, the guidance in AU section 550.04–.06 provides that the auditor has no obligation to perform any procedures to corroborate other information[2] contained in those documents. However, the auditor should read the other information and consider whether that information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. AU section 550 (AICPA, *Professional Standards*, vol. 1) provides guidance if the auditor concludes there is a material inconsistency or a material misstatement of fact that is not a material inconsistency. This responsibility includes reading the other information and considering whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. Accordingly, when audited financial statements are included in an official statement, and the auditors are associated with the official statement, auditors should take a big picture approach and consider whether any other information in that official statement is materially inconsistent with the audited financial statements.

.38 In some cases, issuers include audit opinions and audited financial information in disclosure documents without obtaining the consent of the auditor. Because consents must be obtained from auditors in the corporate market before an audit opinion may be included in an offering document, investors in municipal securities may not be aware that this is not always the case in a municipal offering. Auditors may encourage their governmental auditees to make appropriate disclosures to investors in situations where governmental auditees intend to use the audit opinion or audited financial information without the auditor's consent.

.39 In 1998, the SEC adopted rules requiring all securities registrants to use "plain English" in writing prospectuses and in the organization, language, and design of the front parts of prospectuses. These "plain English" rules do not apply to the municipal market, but the SEC encourages their voluntary use. Municipal disclosures often abound in legalistic or overly complex presentations that make the substance of the disclosure difficult to understand. Vague boilerplate explanations are readily subject to differing interpretations. Remember that most investors who read official statements are not accountants and may have limited accounting backgrounds. Stale and incomplete accounting information is at the core of many of the cases the SEC has brought against municipal bond market participants. Many of the auditors' reports on the financial statements used in primary offering disclosure documents and in continuing disclosure filings made pursuant to Rule 15c2-12 are many months old at the time of the offering, raising the risk of an antifraud violation if there have been material changes since the audit was completed. Efficient markets require timely and reliable information to function properly. As a client service, auditors may work with their governmental auditees to try to improve the timeliness of their audited financial statements. Auditors should also remember their obligations under AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), regarding subsequent events, including in circumstances where a governmental auditee requests the auditor's consent to the inclusion of its audit opinions in disclosure documents.

Derivatives

.40 The widespread and growing use of complex derivative products, such as interest rate swaps, by municipal issuers raises concerns about the risks to investors, markets, and taxpayers. In March 1994, the SEC issued an interpretive release that continues to provide guidance for applying the antifraud provisions of the federal securities laws to the disclosure obligations of participants in the municipal securities market.

---

[2] *Other information* is a term used in AU section 550, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), and is defined therein as information in addition to audited financial statements and the independent auditor's report thereon.

The release noted, among other matters, the SEC's concern about municipal issuers' use of derivative and other complex products and the disclosure issues arising from such activities, and reminded municipal issuers that the antifraud provisions apply to their statements that can be reasonably expected to reach the secondary market for their securities. Consider whether any auditee who is an issuer or other obligated person and uses derivative products should be made aware of this SEC release.

.41 In many instances, auditors play an important role in assisting issuers in meeting their obligations with respect to complex financial products. Although the GASB's project on derivatives, *Accounting and Financial Reporting for Derivatives*, is at the exposure draft stage (see the discussion in "On the Horizon"), auditors may consider educating their auditees regarding the potential ramifications of this project on the auditees' accounting and disclosures. In addition, auditors should consider their auditees' current disclosures regarding derivative activities in their financial statements, management discussion and analysis, and official statements and discuss deficiencies with those auditees. Current guidance on derivative disclosures, pending the outcome of the project, is available in GASB Technical Bulletin 2003-1, *Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets*.

> **Help Desk—**The interpretive release discussed above is Securities Act Release No. 7049, Securities Exchange Act Release No. 33741 (March 9, 1994), 59 FR 12748 (March 17, 1994). Note that the GASB is progressing on a project on the financial reporting of derivatives; "On the Horizon" in this alert discusses that project.

Employee Benefits

.42 The SEC's recent settlement with the city of San Diego has raised concerns about the adequacy of other governments' disclosure practices concerning future pension and retirement health care costs. The SEC sanctioned the city last November, saying it committed fraud when selling bonds to investors in 2002 and 2003 without disclosing the unfunded liability in its pension plan. In auditing pension and other postemployment benefit information in state and local government financial statements prepared in accordance with GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, and GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, auditors often rely on information provided by plan actuaries. Auditors should keep in mind that audit procedures should include, among other considerations, evaluation of the actuary's qualifications under AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), assessment of management's assumptions, and testing of employee data used in the actuarial calculations, in addition to examining financial statement disclosures.

Recent Auditing and Attestation Pronouncements and Related Guidance

.43 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.44 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review AICPA Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See "AICPA Risk Assessment Standards" in this alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.

(continued)

SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue date: December 2005	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective for periods ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.

AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA TPA TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice alert responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice alert provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.45 In December 2006, the Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.46 SAS No. 114 recognizes the importance to the audit of effective two-way communication. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.47 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.48 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. Examples for state and local governmental entities might include governing boards, city councils, audit committees, mayors, governors, legislators, university/college presidents and chancellors. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.49 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.50 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320). However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the auditee to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Will Affect Practice

.51 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses and communicated to management and those charged with governance. Auditors may emphasize and, therefore, spend more time evaluating identified control deficiencies than in the past.

> **Help Desk**—The Government Audit Quality Center (GAQC) has provided a public link on its Web site to an archived conference call discussing SAS No. 112 and its impact on practice. Readers can find the link to the call at gaqc.aicpa.org/Resources/Impact+of+SAS+112+on+Governmental+Financial+Audits+Conference+Call.htm.

Discussions With Management and Others

.52 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the auditee's internal control. Auditors may have to explain to auditees that the auditor *cannot* be a part of their internal control. Only the auditee—not the auditor—can correct control deficiencies. However, a CPA firm, other than the auditor, who does not provide attest services for the auditee can be part of an auditee's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.53 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.54 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent, detect, and correct material misstatements. As previously stated, the auditor cannot be part of an auditee's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the auditee.

Issues for Audits of Smaller Entities

.55 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor's time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.56 Another issue that may cause concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if an auditee has ineffective controls over the preparation of its financial statements such that auditee controls are absent or controls are not effective in preventing, detecting, and correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the auditee's controls, including monitoring ongoing activities, as doing so would impair independence.[3] How an auditor responds to an auditee's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate an auditee's internal control weakness. Just as an auditor's response to detection risk is independent of the auditee's control risk, so too is the auditor's response to an auditee's control weakness. Assisting in drafting the financial statements does not change that control weakness.

.57 The new requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help auditees evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach auditees how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.58 The AICPA has published the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audits Performed Under Government Auditing Standards

.59 Since many state and local government financial statement audits are also performed under *Government Auditing Standards*, auditors should be aware that the required *Government Auditing Standards* (also referred to as the Yellow Book) reporting is also impacted by the issuance of SAS No. 112. As noted by the Government Accountability Office (GAO) upon issuance of the 2007 revision to the Yellow Book (see further discussion in "Government Auditing Standards Developments" in this alert), auditors should adopt the terminology and definitions in SAS No. 112 when reporting on internal control deficiencies. Updated Yellow Book report illustrations have been posted to the Government Audit Quality Center (GAQC) Web site at

[3] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

http://gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports/. In the event your auditees are also subject to OMB Circular A-133, the GAQC Web site also includes updated internal control reporting for those audits.

AICPA Risk Assessment Standards

.60 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effect on existing standards.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

(continued)

SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.61 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks to the auditee's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the auditee that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.62 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation

.63 In December 2005, the ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). This SAS establishes standards and provides guidance to auditors of nonissuers on audit documentation; it supersedes SAS No. 96 of the same name. Audit documentation is an essential element of audit quality, and although audit documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate audit documentation contributes to the quality of an audit.

.64 In developing this SAS, the ASB considered the documentation requirements of PCAOB Auditing Standard No. 3, *Audit Documentation* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"); the International Auditing and Assurance Standards Board's ISA 230 (Revised), *Audit Documentation*, issued in September 2005; *Government Auditing Standards* issued by the Comptroller General of the United States; and suggestions from the National Association of State Boards of Accountancy. Accordingly, the requirements of the SAS are similar, in most respects, to the requirements of PCAOB Auditing Standard No. 3 and ISA 230 (Revised).

Among other things, this SAS:

- Requires the auditor to prepare audit documentation for each engagement in sufficient detail to provide an experienced auditor, having no previous connection to the audit, with a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.
- Provides enhanced guidance on matters that should be documented. For example, in addition to the former requirements of SAS No. 96 that the auditor document audit findings or issues that in his or her judgment are significant, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached; SAS No. 103 requires the auditor to document discussions of significant findings or issues with management and others, on a timely basis, including when and with whom the discussions took place.
- States that oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached, but may be used by the auditor to clarify or explain information contained in the audit documentation.
- Requires the auditor to document audit evidence that is identified as being contradictory or inconsistent with the final conclusions, and how the auditor addressed the contradiction or inconsistency.
- Requires the auditor to assemble the audit documentation to form the final audit engagement file within 60 days following the report release date. After that date, the statement requires the auditor not to delete or discard existing audit documentation and to appropriately document any subsequent additions.
- Specifies a minimum file retention period of five years from the report release date. (The terms of the engagement or state law or regulation may specify a longer retention period.)

.65 SAS No. 103 also amends paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). See the following section of this alert, "Practice Alert 07-1, *Dating of the Auditor's Report and Related Practical Guidance*" for further discussion of this aspect of SAS No. 103. Also see the table "Recent Auditing and Attestation Pronouncements and Related Guidance" which refers to two AICPA Technical Practice Aids (TPA): Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" and TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*). These practice aids address issues related to audit documentation. This SAS is effective for audits of financial statements for periods ending on or after December 15, 2006.

Practice Alert 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.66 As discussed previously, one key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared, and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms, an additional visit to the auditee's office to update subsequent event analysis and management's representations may be required as well.

.67 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.68 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information, which it plans to issue during the third quarter of 2007.

Government Auditing Standards Developments

2007 Revisions to *Government Auditing Standards*

.69 In July 2007, the GAO issued the 2007 revision to *Government Auditing Standards (GAO-07-tbd)*. The revisions supersede the 2003 revision, are wide-ranging, and will affect your *Government Auditing Standards* (often referred to as the Yellow Book or GAGAS) financial statement audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Early implementation is encouraged. The July 2007 version contains the final 2007 revisions, including the quality control and peer review sections in chapter 3, which GAO had exposed for comment in January 2007. The printed version of the complete July 2007 revision is available and can be ordered from information provided on GAO's Yellow Book Web page (www.gao.gov/govaud/ybk01.htm). Among the significant revisions are:

- Chapter 1, "Use and Application of GAGAS," major changes:
  - — Reinforce the key role of auditing in government accountability and in achieving improved government operations.
  - — Add terminology defining the degree of responsibility that the professional requirements in *Government Auditing Standards* impose on auditors that is consistent with AU section 120, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1) and similar to the standards of the PCAOB and the International Auditing and Assurance Standards Board (IAASB).
  - — Provide guidance on citing *Government Auditing Standards* in the auditors' report when auditors do not comply with all unconditional or all presumptively mandatory requirements.
  - — Recognize that other sets of professional standards, such as those issued by the PCAOB and the IAASB, the Institute of Internal Auditors, and others, can be used in conjunction with *Government Auditing Standards* and to provide related guidance.
  - — Move guidance on types of governmental audits and attestation engagements (previously in Chapter 2) to this chapter.
- Chapter 2, "Ethical Principles in Government Auditing," is entirely devoted to the discussion of ethical principles auditors and audit organizations need to observe in performing their work. Several of the ethical concepts that are in this chapter were included in Chapter 1 of the 2003 *Government Auditing Standards*, but they were not separately labeled as ethical responsibilities. This chapter discusses the ethical concepts of public interest, professional behavior, integrity, objectivity, and the proper use of government information, resources, and position that auditors use to guide their work. (Chapter 2 of the 2003 *Government Auditing Standards* covered types of governmental audits and attestation engagements; that material has been moved to Chapter 1.)

- Chapter 3, "General Standards," major changes:
  - — Reorganize the discussion on independence and clarify the guidance on nonaudit services to facilitate implementing the standard. (The standards on nonaudit services are clarified but not substantially changed.) Specifically, the discussion of nonaudit services is moved from "personal impairments" to "organizational impairments" and reorganized into three categories of nonaudit services, namely, (1) those that do not impair auditor independence and, therefore, do not require compliance with the supplemental safeguards; (2) those that do not impair auditor independence if the supplemental safeguards are implemented; and (3) those that impair auditor independence. Further, the examples that had previously been interspersed throughout the independence section are consolidated and streamlined. Additional examples were added to each category of nonaudit services.
  - — Include additional guidance in an appendix to address nonaudit services that are frequently conducted by government audit organizations.
  - — Expand the discussion of professional judgment to emphasize its importance and relate it to key steps in performing an audit.
  - — Expand and clarify the discussion of competence and incorporate the revised continuing professional education (CPE) requirements issued by the GAO in April 2005, *Guidance on GAGAS Requirements for Continuing Professional Education* (GAO-05-568G).
  - — The July 2007 revision contains revisions to the quality control and peer review sections of the previous standards. The revisions related to the system of quality control are essentially consistent with the AICPA's quality control standards (except that the GAGAS requirements state that reviews of the work and the report that are performed as part of supervision are not monitoring controls when used alone). A new requirement was also added for external audit organizations to make peer review reports publicly available and for internal auditor organizations to provide a copy to those charged with governance.
- Chapter 4, "Field Work Standards for Financial Audits," major changes:
  - — Add guidance on citing GAGAS in the auditor's report when auditors do not comply with GAGAS requirements that are applicable to the engagement performed.
  - — Update the AICPA field work standards cited to reflect recent AICPA changes.
  - — Add a clear and prominent discussion on consideration of fraud and illegal acts, and violations of contract provisions and grant agreements that clarify the existing standard.
  - — Clarify the description of abuse and the existing standard on the auditors' responsibility for abuse in a financial audit that is material, either qualitatively or quantitatively.
  - — Update the audit documentation standard for consistency with AU section 339.
  - — Define internal control deficiencies consistent with AU section 325.
  - — Define those charged with governance consistent with AU section 380.
- Chapter 5, "Reporting Standards for Financial Audits," major changes:
  - — Revise the internal control terminology and definitions used in reporting to be consistent with that of the AICPA and PCAOB. Those revisions replace the terms *reportable conditions* and *material weaknesses* with *significant deficiencies* and *material weaknesses* and revise the definitions for the new terms.
  - — Clarify the reporting requirements for internal control deficiencies, illegal acts, violations of provisions of contracts or grant agreements, and abuse. For example, the revised internal control reporting standards require auditors to (1) report deficiencies in internal control considered to be significant deficiencies, including material weaknesses; and (2) include all material weaknesses and other significant deficiencies in the auditor's *Government Auditing Standards* reporting on internal control.

— Add a discussion on emphasizing significant matters in the auditors' report and provide a listing of matters that the auditor may communicate, including significant concerns, uncertainties, or other unusual events.

— Add a section on reporting on restatements of previously issued financial statements that establish additional requirements for situations in which auditors are aware of known or potential misstatements that might have affected reports on those financial statements.

— Clarify the auditors' responsibilities for reporting views of responsible officials and for issuing and distributing reports.

— Clarify the auditor's responsibility for reporting confidential and sensitive information.

- Chapter 6, "General, Field Work, and Reporting Standards for Attestation Engagements," includes clarification and revision of the description of attestation engagements, conforming changes made to be consistent with changes made elsewhere in the 2007 revision, including definitions of internal control deficiencies, description of abuse, audit documentation, and use of terminology to define professional responsibilities.

- Chapters 7, "Field Work Standards for Performance Audits," and 8, "Reporting Standards for Performance Audits," include significant changes and updates to performance audit requirements within a framework related to significance (materiality), audit risk, and reasonable assurance. If you perform performance audits, you are strongly encouraged to carefully review these chapters.

- The 2007 revision added an appendix to provide supplemental guidance (not additional standards) to assist auditors in applying GAGAS requirements. Guidance includes:

— Examples of deficiencies in internal control, abuse, and indicators of fraud risk.

— Guidance for determining significance of laws, regulations, and provisions of contract and grant agreements in the context of the audit objectives.

— Laws, regulations, and guidelines that require use of GAGAS.

— Examples of nonaudit services provided to governmental entities by auditors or audit organizations.

— Description of types of evidence and evaluation of the appropriateness of the evidence in relation to the audit objectives.

— Performance audit report quality elements.

.70 As noted above, the 2007 revision is effective for financial statement audits and attestation engagements for periods beginning on or after January 1, 2008, and for performance audits beginning on or after January 1, 2008. Certain standards issued by the AICPA incorporated by reference into the 2007 revision have earlier effective dates (see "Recent Auditing and Attestation Pronouncements and Related Guidance" in this alert). The GAO has indicated that for financial statement audits conducted under *Government Auditing Standards*, the effective dates of those AICPA standards will apply.

.71 The GAO has indicated that until the 2007 revisions become effective, auditors should adopt the terminology and definitions contained in AU section 325 when reporting on internal control deficiencies and include in their reports material weaknesses and significant deficiencies. GAO is also encouraging auditors to implement relevant sections of the 2007 revision for financial audits concurrent with the implementation of the related ASB standards.

.72 Additionally, GAO states that the 2007 revision should be used in conjunction with the following guidance documents, which are also available on the Yellow Book Web page at www.gao.gov/govaud/ybk01.htm:

- Government Auditing Standards*: Answers to Independence Questions* (GAO-02-870G, July 2002) and
- Government Auditing Standards*: Guidance on GAGAS Requirements for Continuing Professional Education* (GAO-05-568G, April 2005).

Help Desk—Two examples of the report on internal control over financial reporting and on compliance and other matters using language as defined in AU section 325 are available on the GAQC Web site at gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports.

Help Desk—The 2007 revision of *Government Auditing Standards* is available on the Internet at www.gao.gov/govaud/ybk01.htm. That site also has a summary of major changes and a slide presentation on the revision (GAO-07-162G). Another document of interest describes the technical changes made by the GAO from the January 2007 revision (which had been issued by the GAO in advance of it finalizing the quality control and peer review sections in Chapter 3) to the July 2007 revision. It can be found at www.gao.gov/govaud/ltc0707.pdf.

Recent AICPA Independence and Ethics Pronouncements

.73 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.74 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the GASB Web site at www.gasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
GASB Statement No. 51 (June 2007)	*Accounting and Financial Reporting for Intangible Assets*
GASB Statement No. 50 (May 2007)	*Pension Disclosures—an amendment of GASB Statements No. 25 and No. 27*
GASB Statement No. 49 (November 2006)	*Accounting and Financial Reporting for Pollution Remediation Liabilities*
GASB Statement No. 48 (September 2006)	*Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues*
GASB Concepts Statement No. 4 (June 2007)	*Elements of Financial Statements*

.75 The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA *General Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

GASB Statement No. 51

.76 GASB Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*, was issued in June 2007 to provide guidance regarding how to identify, account for, and report intangible assets.

.77 This statement requires that all intangible assets not specifically excluded by its scope provisions be classified as capital assets. Accordingly, existing authoritative guidance related to the accounting and financial reporting for capital assets should be applied to these intangible assets, as applicable. This statement also provides authoritative guidance that specifically addresses the nature of these intangible assets. Such guidance should be applied in addition to the existing authoritative guidance for capital assets.

.78 The guidance specific to intangible assets referred to above includes guidance on recognition. This statement requires that an intangible asset be recognized in the statement of net assets only if it is considered identifiable. Additionally, this statement establishes a specified-conditions approach to recognizing intangible assets that are internally generated. Effectively, outlays associated with the development of such assets should not begin to be capitalized until certain criteria are met. Outlays incurred prior to meeting these criteria should be expensed as incurred. This statement also provides guidance on recognizing internally generated computer software as an intangible asset. This guidance serves as an application of the specified-conditions approach described above to the development cycle of computer software.

.79 This statement also establishes guidance specific to intangible assets related to amortization. This statement provides guidance on determining the useful life of intangible assets when the length of their life is limited by contractual or legal provisions. If there are no factors that limit the useful life of an intangible asset, the statement provides that the intangible asset be considered to have an indefinite useful life. Intangible assets with indefinite useful lives should not be amortized unless their useful life is subsequently determined to no longer be indefinite due to a change in circumstances.

.80 The requirements of this statement are effective for financial statements for periods beginning after June 15, 2009. The provisions of this statement generally are required to be applied retroactively. For governments that were classified as phase 1 or phase 2 governments for the purpose of implementing Statement 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, retroactive reporting is required for intangible assets acquired in fiscal years ending after June 30, 1980, except for those considered to have indefinite useful lives as of the effective date of this statement and those that would be considered internally generated. Retroactive reporting of these intangible assets by phase 3 governments is encouraged but not required. Retroactive reporting is not required but is permitted for intangible assets considered to have indefinite useful lives as of the effective date of this statement and those considered to be internally generated.

GASB Statement No. 50

.81 GASB Statement No. 50, *Pension Disclosures—an amendment of GASB Statements No. 25 and No. 27*, was issued in May 2007. This statement more closely aligns the financial reporting requirements for pensions with those for OPEB and, in doing so, enhances information disclosed in notes to financial statements or presented as required supplementary information (RSI) by pension plans and by employers that provide pension benefits. The reporting changes required by this statement amend applicable note disclosure and RSI requirements of Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, and No. 27, *Accounting for Pensions by State and Local Governmental Employers*, to conform with requirements of Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*.

.82 This statement amends Statement Nos. 25 and 27 to require defined benefit pension plans and sole and agent employers present the following information related to note disclosures or RSI:

- Notes to financial statements should disclose the funded status of the plan as of the most recent actuarial valuation date. Defined benefit pension plans also should disclose actuarial methods and significant assumptions used in the most recent actuarial valuation in notes to financial statements instead of in notes to RSI.
- If the aggregate actuarial cost method is used to determine the annual required contribution of the employer (ARC), notes to financial statements should disclose the funded status of the plan, and a schedule of funding progress should be presented as RSI, using the entry age actuarial cost method. Plans and employers also should disclose that the purpose of doing so is to provide information that serves as a surrogate for the funded status and funding progress of the plan.
- Notes to financial statements should include a reference linking the funded status disclosure in the notes to financial statements to the required schedule of funding progress in RSI.
- If applicable, notes to financial statements should disclose legal or contractual maximum contribution rates. In addition, if relevant, they should disclose that the maximum contribution rates have not been explicitly taken into consideration in the projection of pension benefits for financial accounting measurement purposes.
- If an actuarial assumption is different for successive years, notes to financial statements should disclose the initial and ultimate rates.

.83 This statement amends Statement No. 25 to require defined benefit pension plans and defined contribution plans to disclose in the notes to financial statements the methods and assumptions used to determine the fair value of investments, if the fair value is based on other than quoted market prices.

.84 This statement amends Statement No. 27 to require cost-sharing employers to include, in the note disclosure of the required contribution rates of the employer(s) in dollars and the percentage of that amount contributed for the current year and each of the two preceding years, how the contractually required contribution rate is determined (for example, by statute or by contract, or on an actuarially determined basis) or that the cost-sharing plan is financed on a pay-as-you-go basis.

.85 This statement also amends Statement No. 27 to require that if a cost-sharing plan does not issue a publicly available stand-alone plan financial report prepared in accordance with the requirements of Statement No. 25, as amended, and the plan is not included in the financial report of another entity, each employer in that plan should present as RSI the schedules of funding progress and employer contributions for the plan (and notes to these schedules). Each employer also should disclose that the information presented relates to the cost-sharing plan as a whole, of which the employer is one participating employer, and should provide information helpful for understanding the scale of the information presented relative to the employer.

.86 This statement is effective for periods beginning after June 15, 2007, except for requirements related to the use of the entry age actuarial cost method for the purpose of reporting a surrogate funded status and funding progress of plans that use the aggregate actuarial cost method, which are effective for periods for which the financial statements and RSI contain information resulting from actuarial valuations as of June 15, 2007 or later. Early implementation is encouraged. In the initial year of implementation, defined benefit pension plans and sole and agent employers that use the aggregate actuarial cost method to determine the ARC are required to present elements of information in the schedule of funding progress using the entry age actuarial cost method as of the most recent actuarial valuation date. In subsequent years, plans and employers should add to that schedule information as of subsequent actuarial valuation dates until the requirements of Statement Nos. 25 and 27, as amended, with regard to the minimum number of years or actuarial valuations to be included have been met.

GASB Statement No. 49

.87 Issued in November 2006, GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, is intended to ensure that certain costs and long-term obligations related to pollution clean up not specifically addressed by current governmental accounting standards will be included in financial reports.

.88 Specifically, GASB Statement No. 49 sets forth the key circumstances under which a government would be required to report a liability related to pollution remediation. According to the statement, a government would have to determine whether one or more components of a pollution remediation liability are recognizable if any of the following five obligating events or triggers occurs:

- A government is compelled to take remediation action because pollution creates an imminent endangerment to the public health or welfare or environment, leaving it little or no discretion to avoid remediation action.
- A government is in violation of a pollution prevention-related permit or license.
- The government is named, or evidence indicates it will be named, by a regulator that has identified the government as a responsible party or potentially responsible party for remediation, or as a government responsible for sharing costs.
- A government is named, or evidence indicates that it will be named, in a lawsuit to compel the government to participate in remediation.
- A government commences or legally obligates itself to commence clean up activities or monitoring or operation and maintenance of the remediation effort.

.89 Statement No. 49 indicates that pollution remediation liabilities should be measured at their current value using the expected cash flow technique, which measures the liability as a sum of probability-weighted amounts in a range of possible estimated amounts. Expected recoveries from other responsible parties and from insurers reduce the amount of remediation expense. Statement No. 49 also specifies criteria for capitalization of some pollution remediation outlays.

.90 The requirements of Statement No. 49 are effective for financial statements for periods beginning after December 15, 2007. Governments that have sufficient objective and verifiable information to apply the expected cash flow technique to measurements in prior periods should apply the provisions of the statement retroactively for all such prior periods presented. Governments that do not have that information should apply the provisions of the statement as of the effective date. In that case, pollution remediation liabilities should be measured at the beginning of that period so that beginning net assets can be restated. In the period the statement is first applied, the financial statements should disclose the nature of any restatement and its effect. Also, the reason for not restating prior periods presented should be explained. Early application is encouraged.

GASB Statement No. 48

.91 Issued in September 2006, GASB Statement No. 48, *Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues*, provides accounting standards for when certain transactions—such as the sale of delinquent taxes, certain mortgages, student loans, or future revenues such as those arising from tobacco settlement agreements—should be regarded as a sale or a collateralized borrowing. The GASB has observed considerable diversity in practice in the manner that such transactions have been reported. The financial reporting question addressed in Statement No. 48 is whether such transactions should be reported as a sale or collateralized borrowing.

.92 In addition to clarifying guidance on accounting for sales and pledges of receivables and future revenues, Statement No. 48 (1) requires enhanced disclosures pertaining to future revenues that have been pledged or sold; (2) provides guidance on the sales of receivables and future revenues within the same financial reporting entity; and (3) provides guidance on recognizing other assets and liabilities arising from the sale of specific receivables or future revenues.

.93 The requirements of Statement No. 48 are effective for financial statements for periods beginning after December 15, 2006. Early application is encouraged. The statement indicates that in the first period it is applied, changes to comply with the statement, except those that would result from applying the deferral provisions of the statement related to sales of future revenues, should be treated as an adjustment to prior periods, the financial statements presented for periods affected should be restated, and the nature of the restatement and its effect should be disclosed. The deferral requirements may be applied prospectively. If restatement of financial statements for prior periods is not practical, the cumulative effect of applying the statement should be reported as a restatement of beginning net assets or fund balance for the earliest period presented.

GASB Concepts Statement No. 4

.94 GASB Concepts Statement No. 4, *Elements of Financial Statements*, issued in June 2007, establishes definitions for the seven elements of historically based financial statements of state and local governments. Elements are the fundamental components of financial statements. The elements of a statement of financial position are defined as follows:

- *Assets* are resources with present service capacity that the government presently controls.
- *Liabilities* are present obligations to sacrifice resources that the government has little or no discretion to avoid.
- *A deferred outflow of resources* is a consumption of net assets by the government that is applicable to a future reporting period.
- *A deferred inflow of resources* is an acquisition of net assets by the government that is applicable to a future reporting period.
- *Net position* is the residual of all other elements presented in a statement of financial position.

The elements of the resource flows statements are defined as follows:

- *An outflow of resources* is a consumption of net assets by the government that is applicable to the reporting period.
- *An inflow of resources* is an acquisition of net assets by the government that is applicable to the reporting period.

.95 These definitions are primarily based upon the inherent characteristics of each element. Central to most of these definitions is a *resource*, which in the governmental context is an item that can be drawn on to provide services to the citizenry. These definitions apply to an entity that is a governmental unit (that is, a legal entity) and are applicable to any measurement focus under which financial statements may be prepared.

Technical Bulletin 2006-1

.96 In June 2006, the GASB staff issued a technical bulletin (TB), *Accounting and Financial Reporting by Employers and OPEB Plans for Payments from the Federal Government Pursuant to the Retiree Drug Subsidy Provisions of Medicare Part D*. The TB clarifies the proper accounting treatment for retiree drug subsidy (RDS) payments received under the provisions of the MMA (Public Law [P.L.] 108-173, December 8, 2003).

.97 The TB provides that:

- For RDS payments made to defined benefit OPEB plans that are administered as qualifying trusts (or equivalent arrangements), the employers should treat the payments as on-behalf payments for fringe benefits, using the provisions of GASB Statement No. 24, *Accounting and Financial Reporting for Certain Grants and Other Financial Assistance*.
- RDS payments to employers should be treated as voluntary nonexchange transactions in accordance with the provisions of GASB Statement No. 33, *Accounting and Financial Reporting for Nonexchange Transactions*.
- For RDS payments to multiple-employer plans that are not administered as qualifying trusts (or equivalent arrangements), the employers in such plans should treat their payments as voluntary nonexchange transactions.
- Measurements in accordance with GASB Statement Nos. 43 and 45 should be made without reduction for RDS payments.

.98 The requirements of the TB generally were effective when it was issued. The portions of the TB guidance pertaining to measurement, recognition, or required supplementary information requirements of GASB Statement Nos. 43 and 45 should be applied simultaneously with the implementation of those statements.

User and Implementation Guides

Comprehensive Implementation Guide

.99 In October 2006, GASB published the 2006–2007 edition of its *Comprehensive Implementation Guide*. The *Comprehensive Implementation Guide* consolidates and updates previously issued guides for individual standards and provides current guidance on standards for which no stand-alone guides have been published. The 2006–2007 edition includes for the first time the freestanding Implementation Guide to Statement 44 on the Statistical Section and the Implementation Guide to Statements 43 and 45 on OPEB.

.100 This year, the *Comprehensive Implementation Guide* has been reorganized to better accommodate the addition of new questions and employs a new numbering system designed to make it easier to follow changes from year to year. The 2006–2007 guide provides the answers to new questions about OPEB and a variety of other topics, including:

- Compensated absences
- The modified approach for reporting infrastructure assets
- Asset impairment
- Reporting net assets
- Termination benefits

.101 In addition, the guide revises existing questions and deletes obsolete questions (for example, transition guidance for standards that are now effective). It also features a new chapter that brings together questions on pronouncements not covered in other chapters and that are devoted to a particular pronouncement or subject.

> **Help Desk**—The *Comprehensive Implementation Guide* can be ordered through the GASB's order department at 800-748-0659 or via its Web site at www.gasb.org.

GASB User Guide

.102 In July 2005, the GASB staff published *Government Service Efforts and Accomplishments Performance Reports: A Guide to Understanding* as a part of its continuing research project on (SEA) service efforts and accomplishments reporting. The guide is intended to assist citizens and others in using SEA performance reports issued by state and local governments. In April 2007, the GASB added an SEA reporting project to its current technical agenda. Certain constituent groups have questioned whether a project dealing with the reporting of service performance is not within the scope of the GASB mission or jurisdictional authority. However, in November 2006, the Financial Accounting Foundation reaffirmed that the GASB does in fact have such jurisdictional authority.

> **Help Desk—**The GASB staff user guide is on the Internet at www.seagov.org/sea_gasb_project/sea_guide.pdf.

Other Recent GASB Statements With Current Effective Dates

.103 The following table illustrates the implementation dates of previously issued standards which may become effective in current fiscal periods as a result of phased effective dates.

GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*	Effective in phases: Phase 1—periods beginning after December 15, 2005 Phase 2—periods beginning after December 15, 2006 Phase 3—periods beginning after December 15, 2007
GASB Statement No. 45, *Accounting and Reporting by Employers for Postemployment Benefits Other Than Pensions*	Effective in phases: Phase 1—periods beginning after December 15, 2006 Phase 2—periods beginning after December 15, 2007 Phase 3—periods beginning after December 15, 2008
GASB Statement No. 47, *Accounting for Termination Benefits*	Effective for financial statements for periods beginning after June 15, 2005. However, for termination benefits that affect defined benefit postemployment benefits other than pensions, governments should implement GASB Statement No. 47 simultaneously with GASB Statement No. 45.

On the Horizon

.104 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to state and local governments or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.105 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Governmental Accounting Standards Board (GASB)	www.gasb.org
Government Accountability Office (GAO)	www.gao.gov
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline

ASB Clarity Project

.106 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of the ASB's standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper sought feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards and the auditor's obligations related to the objectives.
- Structural and drafting improvements to make the standards easier to read and understand.
- Inclusion, in the explanatory material of the standards, special considerations related to audits of public entities and small entities.
- Establishing a glossary of terms that would be presented in a separate section of the Codification of the standards.

.107 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.108 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International

Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards +Board/.

Proposed SSAE Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.109 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attetstation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements,* which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer the issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

.110 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

GASB Exposure Drafts

.111 The GASB has two exposure drafts of statements that it plans to finalize in 2007 and 2008.

.112 The exposure draft, *Land and Other Real Estate Held as Investments by Endowments*, issued in March 2007, proposes to report investments in land and other real estate held by permanent and term endowments, including permanent funds, at fair value rather than historical cost.

.113 The exposure draft, *Accounting for Financial Reporting for Derivative Instruments*, issued in June 2007, addresses recognition and measurement of derivative instruments and disclosure of information about derivative instruments by state and local governments. A key provision in this proposed statement and a major change from current practice is that most derivative instruments covered in the scope of this proposed statement would be reported at fair value. Currently, most derivative instruments are recognized at historical prices in a government's statement of net assets. The disclosures of Technical Bulletin No. 2003-1, *Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets*, generally have been incorporated into this proposal for hedging derivative instruments. The requirements of this proposed statement would be effective for financial statements for periods beginning after June 15, 2009. Earlier application would be encouraged.

Upcoming GASB Due Process Documents

.114 Projects for which the GASB expects to release documents relating to proposed accounting and financial reporting standards in the remainder of 2007 and 2008 include (1) fund balance reporting and definition of governmental fund types (a related Invitation to Comment was released in October 2006), (2) intergovernmental financial dependency risk, and (3) service efforts and accomplishments reporting.

> **Help Desk—**To track the progress of the GASB's projects, go to the GASB Web site at www.gasb.org. The GASB generally posts exposure drafts on that site during the exposure period. It also posts its current technical plan listing and describes its projects and timetable.

Resource Central

.115 The following are various resources that practitioners may find useful with respect to state and local governments.

Publications

.116 Practitioners may find the following publications useful with respect to state and local governments:

- Audit and Accounting Guide *State and Local Governments* (2007) (product no. 012667kk)
- Audit Guide Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit and Accounting Guide *Health Care Organizations* (2007) (product no. 012617kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits—2007* (product no. 022457kk)
- Audit Risk Alert *Health Care Industry Developments—2007* (product no. 022347kk)
- Audit Risk Alert *Compilation and Review—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist and Illustrative Financial Statements for State and Local Governments*—2007 Edition (product no. 009037kk)
- *Independence Compliance: Checklists and Tools for Complying with AICPA and GAO Independence Requirements* (product no. 006627kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)

AICPA reSOURCE: Accounting and Auditing Literature

.117 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, audit and accounting guides (more than 20), audit risk alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.118 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *State & Local Government Strategic Briefing—2006/2007*
- *Foundations in Governmental Accounting*
- *Governmental Accounting and Auditing Update—2006/2007 Edition*
- *Workpaper Techniques for Government and Nonprofit Organizations*
- *Government Accounting and Reporting: Putting It All Together*
- *Audits of HUD-Assisted Projects*

Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.119 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 for nonmembers) for a new subscription and $119 ($369 for nonmembers) for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest related to state and local governments include the following:

- *Government Accounting and Reporting: Preparing the Government-Wide Financial Statements*
- *Yellow Book: An Overview*
- *2007 Annual Update-Government: GASB Activities*
- *Governmental and NPO Workpaper Preparation Techniques Overall Approach*
- *Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments*

To register or learn more, visit www.cpa2biz.com.

Webcasts

.120 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.121 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

Member Service Center

.122 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.123 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.124 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conferences

.125 The AICPA sponsors three annual Governmental Accounting and Auditing Conferences in the late summer and fall.

.126 *Governmental Accounting and Auditing Update Conference (GAAC) EAST* is held in late summer in Washington, DC, and its counterpart *Governmental Accounting and Auditing Update Conference (GAAC) WEST* takes place in Tempe, Arizona in early fall. These conferences are designed for CPAs working in federal, state, and local government; public practitioners with government auditees; and regulators who need to be aware of emerging developments should attend this conference to remain current on the issues. Attending one of these conferences is a great way to receive timely guidance along with practical advice on how to handle new legislation and standards from key government officials and representatives of the accounting profession—including the standard setters themselves.

.127 *AICPA National Governmental and Not-for-Profit Training* is held in Lake Buena Vista, Florida. If you need hands on training and are a CPA in public practice—or a governmental or not-for-profit staffer—then this conference is for you. You'll hear directly from the standards setters and industry leaders on a variety of topics including developments in governmental accounting and auditing, the latest in proposed regulations and laws on the local, state, and federal government levels, as well as those impacting the not-for-profit sector and more.

.128 For further information about the conferences, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.129 The GAQC is a firm-based, voluntary membership Center designed to improve the quality of governmental audits and the value of such audits to purchasers of governmental audit services. Governmental audits are audits and attestation engagements performed under *Government Auditing Standards* of federal, state, or local governments; not-for-profit organizations; and certain for-profit organizations, such as housing projects and colleges and universities that participate in governmental programs or receive governmental financial assistance. The GAQC keeps member firms informed about the latest developments, as well as provides tools and information to help them better manage their audit practice. Firms that join demonstrate their commitment to audit quality by agreeing to adhere to certain membership requirements.

.130 The GAQC has been in existence since September 2004. Since its launch, Center membership has grown to over 800 firms from 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The membership accounts for approximately 82 percent of the total federal expenditures covered in single audits performed by CPA firms in the Federal Audit Clearinghouse database (http://harvester.census.gov/sac/) for the year 2004 (the latest year with complete submission data).

.131 The Center's focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information they need, when they need it, to maximize quality and practice success. Center resources include:

- E-mail news alerts on current audit and regulatory developments that keep member firms informed about the latest developments
- Dedicated Center Web site at www.aicpa.org/GAQC with Resources, Community, Events and Products, and a complete listing of GAQC members in each state
- Online Member Discussion Forums for sharing best practices and discussing issues firms are facing
- Webcasts, Web seminars, and teleconferences updating members on a variety of technical, legislative, regulatory, and practice management subjects (note that these activities are archived on the GAQC Web site)

Help Desk—With all of the quality issues being noted in governmental audits (see further discussion in the section "Legislative and Regulatory Developments"), your firm should consider joining the Center. To enroll or learn more about the GAQC, including details on the membership requirements and fees for membership, go to www.aicpa.org/GAQC or e-mail GAQC staff at GAQC@aicpa.org. To preview member benefits, go to gaqc.aicpa.org/Memberships/.

AICPA State and Local Government Expert Panel

.132 The State and Local Government Expert Panel is an AICPA volunteer group whose purpose it is to identify state and local government financial reporting and auditing issues and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the Governmental Accounting Standards Board, regulators such as the Government Accountability Office and the U.S. Office of Management and Budget, and applicable industry associations; and to advise and assist in the development of AICPA products and services related to state and local government audits. For information about the activities of the State and Local Government Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_government.htm.

Industry Web Sites

.133 The Internet covers a vast amount of information that may be valuable to auditors of state and local governments, including current industry trends and developments. Some of the more relevant sites for state and local governments and their auditors are shown in the appendix of this alert. The governmental audit practices of some of the larger CPA firms may also contain specific auditing and accounting information that is helpful to auditors.

* * * *

.134 This Audit Risk Alert replaces *State and Local Governmental Developments—2006*.

.135 The Audit Risk Alert *State and Local Governmental Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to ccole@aicpa.org or write to:

Christopher Cole, CPA CFE
AICPA

AAM Section 8080

Common Interest Realty Associations Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
COMMON INTEREST REALTY ASSOCIATIONS
INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert, prepared by the AICPA staff, is intended to provide auditors of financial statements of common interest realty associations with an overview of recent economic, technical, industry, regulatory, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in Statement on Auditing Standards (SAS) No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA, and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Lori A. West, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff wishes to thank Gayle L. Cagianut, CPA, Jeffrey L. Ducker, CPA, Candido Fernandez, CPA, Mitchell Frumkin, RS, PE, Monte Kane, CPA, Douglas M. Kleine, CAE, Annette Murray, CPA, Gary A. Porter, CPA, Gary Rosen, CPA, and Clifford J. Treese, CPCU, CIRMS, for their assistance and contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your common interest realty association (CIRA) audits, reviews, and compilations. The information delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54 is referred to as AU section 317 of the AICPA *Professional Standards*.

Help Desk—See the AICPA Audit Risk Alert *Independence and Ethics Alert—2006/07* (product no. 022477kk) for a thorough discussion of recent developments and key issues in the area of independence and ethics.

Help Desk—See the AICPA Audit Risk Alert *Compilation and Review Alert—2006/07* (product no. 022307kk) for a thorough discussion of recent developments and key issues in the area of compilations and reviews.

.03 If you understand what is happening in the CIRA industry, and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry information.

Understanding the Organization and Its Environment and Assessing Risks

.04 An auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include the following:

- Industry conditions
- The regulatory environment encompassing, among other matters, relevant accounting pronouncements
- The legal and political environment
- Other external factors, such as general economic conditions

.05 The CIRA industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive).

.06 The auditor should obtain an understanding of the CIRA's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the organization's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. An understanding of business risks increases the likelihood of identifying risks of material misstatement, although the auditor does not have a responsibility to identify or assess all business risks. Many business risks could eventually have financial consequences and, therefore, affect the financial statements; obviously, however, not all business risks give rise to risks of material misstatement.

.07 After gaining an understanding of the organization and its environment, the auditor needs to make risk assessments at the financial statement and relevant assertion levels based on that understanding.

.08 Presented in this Alert are current business, economic, regulatory, accounting, and auditing matters that may affect your clients. Reading about these matters and properly addressing them as necessary will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and ultimately strengthen the integrity of your audits.

Current Economic and Industry Developments

.09 For a complete overview of the current economic environment in the United States, see the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk).

Residential Community Association Demographics

.10 In 1970, there were approximately 700,000 homes in 10,000 community associations. As part of a mid-1970 report, the U.S. Department of Housing and Urban Development (HUD) projected that 50 percent of American homes would be living in community associations by the late 1980s. Although premature, the HUD prediction was not that wrong. Today, it is estimated that 85 percent to 90 percent of all *new for-sale housing* is located in one of the three basic types of community associations. Somewhere between 40 percent and 60 percent of CIRAs are contract managed by specialized community association management (CAM) companies while the other 40 percent to 60 percent are self-managed either solely by volunteers or with association-hired staff. Regardless of management structure, all associations are governed by a volunteer board of directors elected by the membership.

Quick Facts About Residential Community Associations

	2000	*2001*	*2002*	*2003*	*2004*	*2005*	*2006*
No. of CIRAs	222,500	231,000	240,000	249,000	260,000	273,600	286,000
No. of CIRA housing units	17,800,000	18,480,000	19,200,000	19,920,000	20,800,000	22,160,000	23,100,000
CIRA population	45,200,000		48,000,000		51,800,000	54,600,000	57,000,000
U.S. population	281,001,000		287,123,000		295,084,000		306,100,000

.11 Housing cooperatives represent approximately 5 percent to 7 percent of all association units. Condominium associations represent from 38 percent to 42 percent while planned communities constitute the balance. Condominium associations, in the last two to three years, have definitely increased in acceptability and popularity.

Boards of Directors—Value of Service

.12 Over 1.7 million volunteers serve on the boards of directors of residential community associations with another 375,000 participating as committee members. There are 286,000 annual association meetings with democratically conducted elections and another nearly 2,600,000 board of directors meetings during the year in which owners debate and shape their housing community's future. To assist the board, there are over 900,000 committee meetings during each fiscal year. The estimated value of these governance services is about $370,000,000. In general, about 28 percent of the eligible U.S. population volunteers at some point during a year—association leaders volunteer continuously during a year.

.13 When planning an audit the auditor of a CIRA should assess the board members' level of experience or whether there is a small group of homeowners who control the CIRA and have done so for years. Since a CIRA's environment is unique in that volunteers help manage large assets with little or no experience and minimal oversight, the auditor's approach will vary depending on which situation is relevant.

Annual Assessments

.14 These boards supervise the collection of over $41 billion in annual assessments and maintain investment accounts of another $36 billion to $37 billion for the long-term maintenance and replacement of commonly held property.

Reserves for Major Repairs

.15 During the course of any given year, associations probably spend in excess of $20 billion from accumulated reserves and operating funds for the repair, replacement, and enhancement of commonly owned property. According to a recent survey by the National Association of Housing Cooperatives, the average cooperative (which is about 25 years older than the typical condominium) plans to spend $1 million on repairs in the next five years.

Regulatory and Legislative Developments

.16 The operations of CIRAs, especially condominium associations, are regulated by the individual states and not by the federal government. Alternatively, planned communities (that is, homeowners associations [HOAs], property owners associations [POAs], and cooperatives), may not be regulated by the states. However, federal regulations, court cases, Internal Revenue Service (IRS) revenue rulings, and federal legislation apply to the income tax treatment of CIRAs. Also, two federal agencies, the Federal Housing Administration (FHA) and the Department of Veterans Affairs, as well as two government-sponsored enterprises (GSEs), the Freddie Mac and the Fannie Mae, have regulations and underwriting guidelines to guide developers, mortgage lenders, and others in establishing CIRAs as well as in selling and financing units. Although compliance with such regulations may not be mandatory, compliance with their guidelines and underwriting requirements facilitates the development, sale, and resale of units within CIRAs. This section discusses recent developments in federal regulations as they relate to CIRAs, including HUD requirements, IRS private letter rulings, and bankruptcy legislation. Readers should be aware that some states, especially three states—California, Florida, and Nevada—have active state agencies and a fourth state, New York, has a long history of involvement by the attorney general.

> **Help Desk**—To obtain copies of the HUD handbooks, notices, and other documents, go to www.hudclips.org, where they are available for printing or viewing. Printed handbooks can be ordered online through the Direct Distribution System or by telephone at (800) 767-7468.

Internal Revenue Service Activities

IRS Revenue Rulings

.17 A revenue ruling is an official interpretation by the IRS of the Internal Revenue Code (IRC), related statutes, tax treaties, and regulations. It is the conclusion of the IRS on how the law is applied to a specific set of facts. Revenue rulings are published in the Internal Revenue Bulletin for the information of and guidance to taxpayers, IRS personnel, and tax professionals. They can be used as guidance if your client encounters a similar situation. Readers should periodically review IRS revenue rulings as they may affect CIRAs.

> **Help Desk**—For more information, go to www.irs.gov/businesses/article/0,,id=107937,00.html for complete revenue ruling and memorandums issued to examiners. The Industry Issue Resolution (IIR) Program is aimed at establishing consistent IRS positions on complicated or controversial tax issues.

Technical Advice Memoranda (TAMs)

.18 Technical Advice Memoranda (TAMs) are written determinations issued by the National Office of the Internal Revenue Service that interpret and apply tax law to a taxpayer's specific set of facts. TAMs are not legally binding and may not be used as precedent in other cases. TAMs only address a particular factual situation, and different facts could change the advice given. However, TAMs can indicate IRS thinking on an issue. Below are some TAMs that have been issued that may be helpful to CIRAs.

.19 ***TAM 9539001—National Office Technical Advice Memorandum Letter Ruling 9539001.*** (Note: This involved a time-share association.)

.20 Conclusions (as shown in the TAM):

1. Amount received as annual assessments from taxpayer's members in excess of annual expenses are includible in taxable income.
2. Prepaid member assessments collected in one year but allocable to the next budget year are includible in gross income in the year of receipt.
3. Member assessments allocated to various repair and replacement reserve accounts are includible in gross income in the year of receipt.

.21 The conclusions were based on the fact that the association did not have as its sole activity the management and maintenance of the common areas, but had maid service and furnished individual units. Also, the members-owners were not given the opportunity to vote on the 70-604 election. Furthermore, no separate reserve bank account was set up for reserves.

.22 ***TAM 9637007—National Office Technical Advice Memorandum Letter Ruling 9637007.*** (The Association developed a portion of its unused property with condominiums which were offered for sale to members and to nonmembers on the condition that nonmembers become members prior to purchase.)

.23 Conclusions (as shown in the TAM):

> Section 277(a) applied to the taxpayer and income from the condominium sales is income from transactions with members. Accordingly, any condominium sale income can only be offset by expenses of providing goods and services to members. Expenses of development and sale of the condominium project, to the extent of the deductible, can only be deducted with respect to member income.

.24 The IRS written determinations can be viewed by going to the following link: www.irs.gov/foia/lists/0,,id=97715,00.html

Special Tax Issue Related to Mixed-Use Projects

.25 The residential real estate industry continues to see the development of numerous mixed-use projects. Mixed-use development is the result of land planning that combines space for residential and commercial use. Many of these mixed-use projects contain for-sale units and therefore involve a CIRA component. The following tax issue which will need to be addressed in the annual audit is the CIRA taxation for mixed-use projects. There are several tests that a CIRA must meet in order to file IRS Form 1120-H. One key test for a mixed-use CIRA is the substantially residential test. Treasury Regulation 1.528-4 states the following:

> In general, in order for an organization to be considered a condominium management association or a residential real estate management association (and therefore in order for it to be considered a homeowners association), substantially all of its units, lots or buildings must be used by individuals for residences. For the purposes of applying paragraph (a) or (b), an organization which has attributes of both a condominium management association and a residential real estate management association shall be considered that association which, based on all the facts and circumstances, it more closely resembles. In addition, those paragraphs shall be applied based on conditions existing on the last day of the organization's taxable year.
>
> **Treasury Regulation § 1.528-4. Substantially Residential Test.**
>
> (a) *Condominium Management Associations*. Substantially all of the units of a condominium management association will be considered as used by individuals for residences if at least 85% of the total square footage of all units within the project is used by individuals for residential purposes. If a completed unit has never been occupied, it

will nonetheless be considered as used for residential purposes if, based on all the facts and circumstances, it appears to have been constructed for use as a residence. Similarly, a unit which is not occupied but which has been in the past will be considered as used for residential purposes if, based on all the facts and circumstances, it appears that it was constructed for use as a residence, and the last individual to occupy it did in fact use it as a residence. Units which are used for purposes auxiliary to residential use (such as laundry areas, swimming pools, tennis courts, storage rooms and areas used by maintenance personnel) shall be considered used for residential purposes.

(b) *Residential Real Estate Management Associations*. Substantially all of the lots or buildings of a residential real estate management association (including unimproved lots) will be considered as used by individuals as residences if at least 85% of the lots are zoned for residential purposes. Lots shall be treated as zoned for residential purposes even if under such zoning lots may be used for parking spaces, swimming pools, tennis courts, schools, fire stations, libraries, churches and other similar purposes which are auxiliary to residential use. However, commercial shopping areas (and their auxiliary parking areas) are not lots zoned for residential purposes.

(c) *Exception.* Notwithstanding any other provision of this section, a unit, or building will not be considered used for residential purposes, if for more than one-half the days in the association's taxable year, such unit, or building is occupied by a person or series of persons, each of whom so occupies such unit, or building for less than 30 days. Such an example would be timeshares.

.26 See the following link to the Tax Almanac for the further guidance: www.taxalmanac.org/index.php/Treasury_Regulations%2C_Subchapter_A%2C_Sec._1.528-4.

Compilation and Review Issues

Consideration of Fraud and Illegal Acts in a Compilation or Review Engagement

.27 Fraud is a broad legal concept and accountants do not make legal determinations of whether an act is, in fact, fraudulent. Rather, the accountant's interest specifically relates to acts that result in a material misstatement of the financial statements. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. Fraud is an intentional act that results in a material misstatement in financial statements.

.28 Guidance in AR section 100.05, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), states that the accountant should, among other things, establish an understanding with the entity that provides that the accountant will inform the appropriate level of management of any fraud or illegal acts that come to his or her attention, unless they are clearly inconsequential. This amendment revises AR section 100 by requiring the accountant to:

1. Establish an understanding with the client, preferably in writing, that the accountant will inform the appropriate level of management of any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.
2. Report, to the appropriate level of management, any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.

.29 The accountant need not report matters regarding illegal acts that are clearly inconsequential and may reach agreement in advance with the entity on the nature of such items to be communicated.

.30 Statement on Standards for Accounting and Review Services (SSARS) No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (AICPA, *Professional Standards*, vol. 2), does not add additional procedures to those normally performed in a compilation or review engagement. In other words, there is no requirement in a compilation or review engagement to search for fraud or illegal acts.

.31 However, during the performance of compilation or review procedures, if any evidence or information comes to the accountant's attention regarding fraud or an illegal act that may have occurred, the accountant should request that management consider the effect of the matter on the financial statements. Additionally, the accountant should consider the effect of the matter on his or her compilation or review report. When compiling financial statements and circumstances arise where the accountant believes that the financial statements are materially misstated, the accountant should obtain additional or revised information. When reviewing financial statements and circumstances arise where the accountant believes that the financial statements are materially misstated, the accountant should perform the additional procedures deemed necessary to achieve limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with generally accepted accounting principles (GAAP) or an other comprehensive basis of accounting (OCBOA).

> **Help Desk—**See the AICPA Audit Risk Alert *Compilation and Review Alert—2006/07* (product no. 022307kk) for a thorough discussion of recent developments and key issues in the area of compilations and reviews.

Engagement Issues

Reserve Study Concerns

.32 One of the critical components of the overall operating budget for a CIRA is the reserve study. Annual contributions to the replacement fund may be based on a reserve study which is developed to determine the timing and costs for future major repairs and replacements. While CIRAs often fund these costs through contributions over the lives of the common area components, CIRAs also fund the costs by assessing owners when funds are needed, or by borrowing. A CIRA should disclose information in its financial statements about its funding for future major repairs and replacements. The boards of directors need to be aware that the goal of whatever policies they set should be to enable them to meet their fiduciary duties to maintain and preserve the common property as stated in paragraph 3.05 of the AICPA Audit and Accounting Guide *Common Interest Realty Associations* (the CIRA Guide) as of May 1, 2006. The auditor should review the reserve study and compare it to the actual occurrences to determine if further procedures should be performed in assessing the reasonableness of the estimates and assumptions utilized (see the discussion of those procedures under the "Aging Communities" subhead below). The study also provides the CIRA with a funding strategy which is based upon its specific circumstances.

.33 The most critical times for the CIRA with regard to the development of the reserve study and the funding strategies occur when:

- The budget is first established for the new community which is either new construction or a conversion.
- The budget is reviewed while the replacements are becoming necessary.
- Each year the CIRA reviews its study and makes a decision regarding the funding plan to be implemented.

.34 In order to develop the reserve study, a number of variables needs to be defined. The auditor should understand the reserve study process, even though they may not be responsible for the generation of the study. They are as follows:

- *Common area components*. The first and most important is the selection of components, individual line items found in the physical analysis which encompass the common elements, to be included within the study. The CIRA is responsible for the maintenance and replacement of its common elements, which are described in the governing documents. Common elements vary based upon the type of CIRA. For example, when dealing with a condominium association, the common elements typically comprise not only the exteriors of the building but also the site-related items such as the driveways and other paved roadways, sidewalks, lobbies, and any other amenities. When dealing with a homeowners association (also known as a planned unit development and other terminology nationally), the common elements typically do not include the residential buildings, although they still include the site work and amenities such as the clubhouse, roads, and lighting. For this reason, it is important to understand the descriptions of the common elements as defined in the governing documents.

- *Replacement cost*. This is the estimated cost for performing the replacement when it becomes necessary. Generally, this is expressed as a unit cost and is multiplied by the overall quantity of that component. For example, the roadways comprise 1,000 square yards of area with a replacement cost of $7.00 per square yard thus yielding a total replacement cost of $7,000.

- *Beginning balance*. This is the amount of money which has been accumulated prior to the preparation of the study. This amount is distributed to each of the components within the study based upon a weighting factor. In the table in Example 1, this amount is $9,000.

- *Estimated useful life*. This is the amount of time in which a component can adequately operate before 100 percent replacement is required. In Example 1, for the pavement this would be 20 years. Depending on the state and/or the practice in a given area, components with 30 or more years may be treated as having an unlimited useful life and, hence, no replacement fund is created for that component. Domestic water piping, electric lines, and structural supports are examples.

- *Estimated remaining useful life*. This is based upon the condition and age of the component inspected at the time the study is performed. In Example 1, for the pavement this would be 10 years.

.35 While the fundamental information regarding reserve studies is essentially the same for all circumstances, the risks involved at the different times in the life of the CIRA are significantly different and are discussed below.

Background

.36 The concept of a reserve study is relatively simple and includes two parts, the physical analysis and the financial analysis. The physical analysis contains information about the physical status and replacement cost of major common area components the CIRA is obligated to maintain. It comprises component inventory, condition assessment, and life estimates. The financial analysis includes the evaluation of the CIRA's reserve balance, income, and expenses. It involves assessing the current replacement fund status and an appropriate funding plan.

.37 The physical analysis is based upon a calculation in which the replacement cost of a particular component is amortized over the life of that component. Thus, when it is time for the replacement to occur, the CIRA should have theoretically accumulated adequate funds for that replacement. An example would be the necessity to replace the roadways within the community. If the replacement cost of the roadways is $7,000, $1,750 has already been accumulated, and the estimated time period before replacement is required is 10 years, the CIRA would need to accumulate $525 per year so that the $7,000 is available when needed ($7,000 minus $1,750 = $5,250 divided by 10 years = $525 per year). This scenario can be seen in the table in Example 1.

.38 The financial analysis is based upon the creation of a cash flow projection of the amount of funds to be set aside each year, for all components which make up the physical analysis. Based upon this cash flow, the annual contributions are sought to be minimized while simultaneously allowing for sufficient funds to exist over the cash flow period such that a deficit does not occur. The resulting cash flow becomes the funding plan for the CIRA. There are four types of funding plans, three of which can be seen in the graph in Example 2. It is recommended that the CIRA review its funding plan on a yearly basis to determine if it still reflects its current financial situation.

.39 The four types of funding plans are described below:

- *Full/proportional funding.* In this funding plan each of the individual components is funded fully. This is generally considered to be the most conservative plan as excess funds may accumulate. It does not account for the cash flow projections. An example of full/proportional funding can be seen as the top line in Example 2. Note that over the cash flow period a significant amount of money continuously exists in the fund.

- *Baseline funding.* In this funding plan, the annual contributions are lowered so that at some point in the cash flow projection the replacement fund balance is equal to $0. This is the least conservative method because a budget deficit can occur if replacement costs are underestimated or if a component requires replacement before its estimated useful life is realized. An example of baseline funding can be seen as the bottom line in Example 2.

- *Threshold funding.* In this funding plan, the annual contributions are adjusted so that the minimum point in the cash flow is something other than full/proportional funding or baseline funding. Typically this point is somewhere between the two and will provide adequate funding over the cash flow period without fear of either a deficit or overfunding. Annual contributions are reduced so the cash flow projection is lowered but is never $0. The level of the threshold varies with each CIRA and is typically based on the cost of the most expensive component to be replaced and the size of the CIRA's overall budget. An example of threshold funding can be seen as the middle line in Example 2.

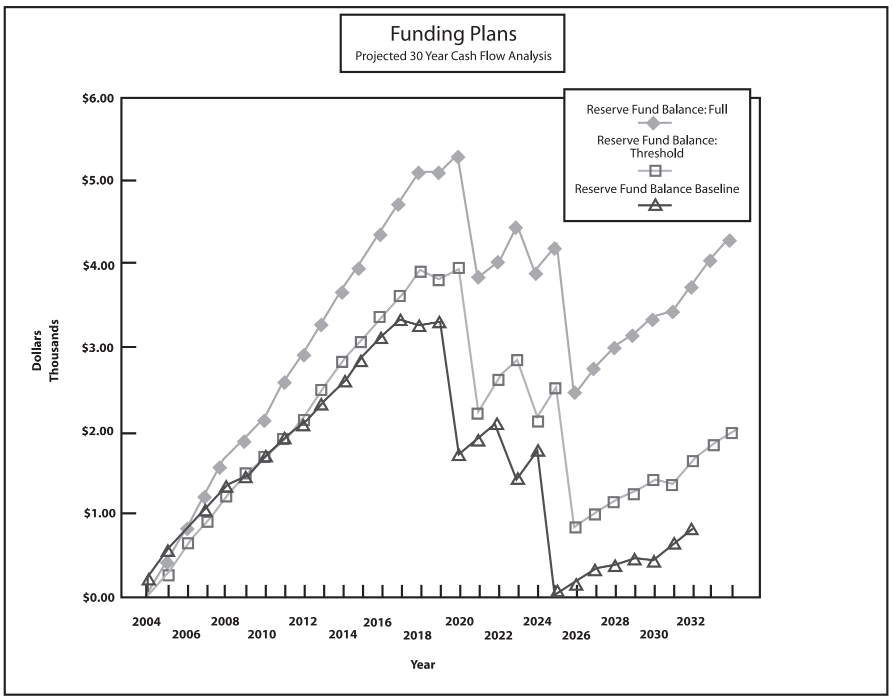
- *Statutory funding.* Although not discussed in detail, in some states governmental regulations exist which require certain levels of reserves to be accumulated. The original governing documents should comply with these regulations.

.40 The risks associated with the selection of the CIRA's funding plan are twofold. The reserves can either be overfunded, resulting in an excess amount of inactive assets, or underfunded, resulting in a deficit at the time of component replacement. In order to minimize these risks, the CIRA should review its reserve study each year regarding the type of funding plan and the respective risks. It should balance the potential for a deficit against the cost of regular updates of the study which will incorporate current replacement costs and estimated remaining lives. The auditor may consider using the management representation letter as a way for the CIRA and its management to acknowledge the funding plan that is being utilized. In the case of baseline funding, yearly updates are prudent as expenditures may exceed estimates or may be required earlier in the respective component's useful life than expected, which can trigger a cash flow hurdle for the CIRA. In contrast, in the case of full/proportional funding, three to four years between updates may be acceptable. In terms of overfunding reserves, it should be recognized that while full/proportional funding is the most conservative method, it may provide for more than adequate funding and the imprudent use of CIRA funds. CIRAs that assess owners annually for portions of future major repairs and replacements should report those assessed amounts separately from amounts assessed for normal operations. If a CIRA uses fund reporting, which is more informative to users, as stated in paragraph 4.02 of the CIRA Guide, amounts assessed for future major repairs and replacements should be reported in the major repair and replacement fund separately from transactions in the operating fund. Note this is the assessed/budgeted amount, not the actual monies transferred. Transfers between funds that are not part of the current-period operating revenues should be presented only in a statement of changes in fund balances or in a statement of changes in members' equity, if a nonfund reporting approach is used. This would include when a board chooses not to fund in accordance with its budget, as well as other decisions related to monies between funds. Readers should refer to paragraphs 4.27 and 4.33 of the CIRA Guide for recommended disclosures.

Example 1: The Physical Analysis

Common Area Component	Quantity	Unit Cost	Reserve Requirement (Present Dollars)	Beginning Balance	Estimated Useful Life	Estimated Remaining Useful Life	Annual Reserve Funding Required
Pavement overlay	1000 SY	$7.00	$7,000	$1,750	20	10	$525
Concrete sidewalks	1500 SF	$6.00	$9,000	$2,250	30	15	$450
Roofs	200 SQ	$100	$20,000	$5,000	22	11	$1,364
Total			**$36,000**	**$9,000**			**$2,339**

Example 2: The Financial Analysis



Concerns at Inception of the CIRA

.41 CIRAs may be required by state statutes, mortgage documents, or their governing documents to set aside funds on a systematic basis for future major repairs and replacements. The auditor should review the CIRA's governing documents and relevant state statutes to determine whether such requirements exist. The auditor should also review the CIRA's policy for accumulating the required funds.

.42 Generally, when a developer/builder plans a CIRA, whether it is new construction or a conversion, governing documents are prepared for the CIRA—including the type of CIRA and descriptions of the community, and the initial operating budget, which may also contain the initial reserve study. There may also be an engineer's report and a detailed public offering statement (POS). These governing documents also include a description of the common elements which will be the responsibility of the CIRA to maintain and replace as opposed to those components which are the responsibility of the individual unit owners. At this stage, a number of concerns must be taken into account. When the document is prepared for new construction, in many cases the construction has not yet been completed or even commenced. As is typical with most construction, field changes may occur such that the as-built community does not match the design drawings. Since the reserve study was based on the design drawings, it too will no longer match the as-built community. This may result in underfunding of the project. To minimize this concern, it is recommended that the study included within the governing documents be updated to reflect the as-built community either by the new homeowners or by the developer/builder, depending upon the time for the build-out of the entire community.

.43 Another concern at this time is that in some instances the governing documents are being prepared at the same time as the reserve study. Concerns are triggered if inconsistencies arise. To minimize these concerns, it is necessary that the coordinator of the reserve study be in contact with the creator of the documents so the reserve study reflects the descriptions of common elements consistently.

.44 Once the components are selected, a determination of the quantities of each of the components is taken from the design documents, which typically include the architectural drawings for the buildings and the engineering drawings for the site. Based upon a review of these documents and an understanding of the materials of construction, the estimated lives are determined. In the case of new construction, since the community has not yet been constructed, the estimated remaining life and the estimated full useful life are the same. Also, execution of the project may differ from already established plans, thereby creating risk through inconsistencies. To minimize this concern, and as discussed above, it is recommended again that either the developer or the CIRA have the original reserve study included within the governing documents updated to reflect both the quantities of the actual as-built construction as well as the materials. The replacement costs should also be updated. If this type of update is not performed and there are discrepancies between the design documents and the as-built construction, the adequate funding may not exist and will become more and more critical since this potential underfunding is cumulative as time progresses. This type of concern in some instances may affect the smooth transfer of control from the developer/builder to the new unit owners as they take control of the CIRA during the period known as transition.

.45 In the situation in which the newly formed CIRA is a conversion from another use and not a new construction, another concern arises. This concern is based upon the fact that the components which constitute the common elements are not new and have reduced useful lives. While with both new construction and conversions the beginning balance in the reserve account is $0, in the case of the conversion and the reduced useful lives, the replacement costs must be amortized over this reduced life which subsequently will result in higher annual contributions. In many instances the reduced useful lives are not accounted for in the reserve study, resulting in unanticipated replacements and inadequate funds at the time of these replacements. To minimize this concern, it is recommended that particular attention be paid to the condition of all of the components and that the reduced useful lives are reflected in the study.

Aging Communities

.46 For an aging community, the result of an underfunding of the replacement fund portion of the budget becomes especially critical if the CIRA has not been performing regular updates of the reserve study from the initial governing documents. In many instances the CIRA has also neglected the necessary ongoing maintenance of the common elements, which becomes more obvious as the CIRA ages. This lack of maintenance can have a significant impact on the estimated useful lives. If the study has not been updated, this can compound the problem since the reduction in useful lives is not recognized until the replacements are required. In order to minimize the risk associated with an aging community, it is recommended that as CIRAs age, the studies be updated on a more frequent basis and in some cases yearly. These updates should include a field inspection to reflect the actual condition of the components. At the same time a thorough review should be made of the funding plan selected to determine if it is still appropriate for the CIRA.

.47 A complete description of the requirements for the preparation of a reserve study can be found in the publication titled "National Reserve Study Standards of the Community Associations Institute" which is published by the Community Associations Institute (CAIOnline.org).

.48 The auditor should apply certain limited procedures to the required supplementary information referred to in paragraph 4.33 of the CIRA Guide. Auditors should also refer to and comply with the requirements of AU section 558.07, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1). Specifically, as stated in paragraph 7.59 of the CIRA Guide, procedures that the auditor should consider include the following:

- Determine by physical inspection of the property or review of the CIRA's legal or governing documents whether the disclosure includes all major property components.
- Compare estimates of the costs of major repairs and replacements with current period expenditures and with the annual budget, if any.
- Inquire of management about whether the CIRA's property maintenance records, which reflect each component's replacement history, if any, were considered in determining the information to be disclosed.
- Inquire of management about whether the age and condition of the components were considered in determining the information and amounts to be disclosed.
- Check the mathematical accuracy of amounts disclosed.
- Inquire of management about whether the study was prepared by the board or a professional engineer (reserve specialist [RS]) and whether the methods and bases for estimating the amounts disclosed are documented. Consider whether those methods and bases are reasonable. If the study was conducted by the board, consider whether the source of the information used to estimate the useful lives and current or future repair and replacement costs, for example, bids from contractors or technical manuals on useful lives of various components, are reasonable. Also, the auditor may consider determining whether or not the preparer has their RS designation as a way of confirming that the study was completed in conformance with the National Reserve Study Standards which are referenced in Chapter 3 of the CIRA Guide.
- Inquire if interest is a factor in the reserve study. If it is the auditor should ensure that the interest is retained in the remaining replacement fund.
- Inquire if inflation is a factor in the reserve study. If it is *not* the auditor should recommend an annual review of the replacement costs.
- Inquire of management as to the age of the study.

Audit and Attestation Issues and Developments

Specific Audit Considerations

.49 As the residential real estate market continues to cool, auditors of CIRAs must be conscious of the various financial impacts a cooldown may have on the CIRA's financial situation.

.50 For those CIRAs still under declarant control, the auditor should determine whether the current annual budget is sufficient to meet all of the CIRA's operating needs and still provide for the future replacement of its common elements. The annual budget should be reviewed and compared to the services that the CIRA is currently receiving as stated in paragraph 5.04 of the CIRA Guide regarding the budget process. A declarant of a CIRA may try to continue to operate under a budget which is not adequate so that it will not have to raise the maintenance assessments, which could result in a reduction in sales of units.

.51 The notes to a CIRA's financial statements should include the following disclosures:

- The number of units (shares for cooperative housing corporations and weeks for time-share associations) owned by the developer as stated in paragraph 4.22 of the CIRA Guide.

- The developer or other parties may provide the CIRA with some of its revenues. If 10 percent or more of a CIRA's revenues are derived from any one source, that fact and the amount of revenue from each source should be disclosed as stated in paragraph 4.25 of the CIRA Guide.

- Whether the CIRA's board of directors is controlled by the developer (declarant) as stated in paragraph 7.20 of the CIRA Guide.

.52 The auditor engaged by a CIRA should consider the effects, if any, of the declarant's influence on the CIRA's financial condition as discussed in paragraph 1.26 of the CIRA Guide.

.53 The auditor should make sure that the boards of all CIRAs carefully monitor their cash disbursements by reviewing all invoices to ensure that all expenses incurred by the CIRAs are for valid expenses of the CIRA and not those of the declarant or any one else that may be seeking unapproved personal payments.

.54 The auditor of a CIRA which utilizes a CIRA board that is managed by an outside management company should consider having the board approve all invoices prior to their being processed for payment, which may be more reasonable for unusual, nonrecurring types of expenses. If a management company manages similar-named entities or multiple communities at a similar location, the CIRA board should have a policy instituted to carefully review the invoices noting the date of the service, the service provided, the location of the service, and the quantity, if it is on a per unit or some other type of quantified basis. The auditor should consider the instituted policy and the extent to which the board of directors monitors and controls the managing agents' activities related to the CIRA to insure proper authorization and payment procedures. Since the managing agent provides the CIRA with bookkeeping and accounting services, the auditor should consider AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1), which provides guidance on the factors an independent auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain organizations. When the CIRA uses a managing agent during less than favorable economic times the auditor may also consider the following as discussed in paragraph 7.17 of the CIRA Guide:

- The manner in which the managing agent is compensated, such as the use of fixed fees or otherwise.

- Whether the CIRA maintains separate records for transactions initiated by the managing agent, if any.

- The policy or board review of managing agent reports.

- The control program used by the agent with respect to its client, the association.

.55 The auditor of a CIRA should recommend that the CIRA board review on a monthly basis the budget versus actual financial statements and balance sheet. Since the operations of most CIRAs are based on budgets, the auditor may consider a CIRA's budgeting procedures during the audit. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits. The auditor should consider comparing actual results with budgeted amounts and investigating significant variances as an analytical procedure in the audit of a CIRA. It is preferred that these statements be prepared on an accrual basis following generally accepted accounting principles (GAAP), however, if the board agrees, the cash method, which is not in conformity with GAAP, can be used. Readers should refer to SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623), as amended, for guidance on auditors' reports on financial statements prepared on a comprehensive basis of accounting other than GAAP. Note that it is not unusual for the monthly financial statements to be prepared on the cash or modified cash basis, and converted to accrual basis at the end of the year. The budget should be seasonalized so the proper expenses appear in the proper period and all major variances should be investigated. The maintenance assessments (more commonly referred to as just "assessment") delinquency report should be monitored carefully as there may be increasing delinquencies if the economy weakens.

Initial Operating Period

.56 During the startup of operations of a condominium or homeowners association, the developer has a majority of the members of the board of directors, and therefore, the CIRA is considered to be under developer control. An auditor engaged by a CIRA should consider the effects, if any, of the declarant's influence on the CIRA's financial condition during the initial operating period in which the developer (declarant) generally controls the CIRA's management, policy setting, and finances. (The initial operating period is discussed further in paragraph 7.20 of the CIRA Guide.) Since the interests of the developer and the homeowners may be divergent, this period of the CIRA's life deserves special attention.

.57 In Florida, for example, the condominium statutes require that after turnover of control an audit must be conducted covering the period from the association's inception through the date of turnover. If none of the fiscal years during the developer-controlled period have been audited, the full cost of such an audit must be borne by the developer. (Readers should refer to state statutes on developer transition with respect to homeowners associations that are not condominiums.) The auditor should keep in mind that, although the developer may pay for the audit, the CIRA is nevertheless the client. Therefore, since the developer's interests may be adverse to those of the CIRA, the auditor should take into consideration that the developer is in control in addressing the risk factors. For example, auditors should consider focusing in on the following areas of an initial operating period:

1. Developer assessments on unsold units.
2. Expenses, particularly in connection with potential payment of developer's obligations.
3. If the developer is guaranteeing that the common expenses will not exceed amounts assessed to unit owners other than the developer, care should be exercised as to the following:
   a. The determination of the proper expiration date of the deficit guarantee period.
   b. The calculation of assessments to unit owners other than the developer.
   c. The proper cutoff of accounts payable and accrued expenses at the end of the deficit guarantee period.
   d. That the rate of assessment is unchanged during the deficit guarantee period.
4. Whether there is a proper utilization, in accordance with the state statutes and condominium documents, of capital contributions collected from initial unit owners.
5. Whether funding for capital replacement and deferred maintenance ("reserves") have been properly funded, or, if funding was waived, that the waiver complied with the state statutes or the CIRA's governing documents.
6. Related party transactions, for example a master association under developer control, or management and maintenance companies owned by the developer.

.58 When making the selection of auditors to conduct the "turnover" audit, oftentimes the developer selects the same accounting firm that services the developer. Although there may not be any independence rulings prohibiting that accounting firm from accepting the CIRA as a client, the accounting firm should evaluate whether there will be any questions of perceived lack of independence. A member of the AICPA who is engaged to audit a CIRA in accordance with generally accepted auditing standards (GAAS) must be independent. In making a judgment about whether he or she is independent, the member should be guided by Rule 101, *Independence*, of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101), its interpretations, and the Ethics Rulings under it.[1] In assessing their independence, auditors

[1] Revised Ethics Ruling No. 31 under Rule 101, "Performance of Services for Common Interest Realty Associations (CIRAs), Including Cooperatives, Condominium Associations, Planned Unit Developments, Homeowners Associations, and Timeshare Developments" (AICPA, *Professional Standards*, vol. 2, ET sec. 191.061–.062), states that an auditor's independence would not be considered to be impaired if certain conditions are met with respect to an engagement to perform services for a CIRA if the member or member's firm is associated with, or is a member of, the CIRA as the result of ownership or lease of real estate.

should also consider the guidance set forth under Ethics Ruling No. 31 under Rule 101 (AICPA, *Professional Standards*, vol. 2, ET sec. 191.061–.062). Also, auditors performing audits of CIRAs should be familiar with condominium, homeowners association, and cooperative housing corporation's statutes in the states and/or jurisdictions in which the CIRA is located.

.59 For instance, under Florida statutes, the turnover audit must include the following procedure: "The auditor performing the audit shall examine to the extent necessary supporting documents and records, including the cash disbursements and related paid invoices to determine if expenditures were for CIRA purposes and the billings, cash receipts, and related records to determine that the developer was charged and paid the proper amounts of assessments."

.60 After the turnover audit is released, boards of directors, now controlled by unit owners other than the developer, frequently engage another accounting firm to evaluate the turnover audit. Procedures for this evaluation can be agreed upon with the board, and an engagement letter entered into in accordance with agreed upon procedures set forth in the AICPA attestation standards, AT section 201, *Agreed-Upon Procedures Engagements* (AICPA, *Professional Standards*, vol. 1). The accountant applying agreed-upon procedures should obtain evidential matter from applying agreed-upon procedures to provide a reasonable basis for the finding or findings expressed in his or her report (AICPA, *Professional Standards*, vol. 1, AT sec. 201.16). Examples of some procedures that the accountant may consider are as follows:

1. Ascertain whether the charges to the developer (assessments and/or deficit contributions) are in compliance with the CIRA's documents and the state statutes.
2. Obtain or prepare a summary of the components comprising the amount due from (to) the developer.
3. Ascertain whether the predecessor auditor performed procedures to determine if any CIRA disbursements were for developer-related obligations. If not, perform such procedures.
4. Determine if capital contributions were received on all initial unit purchases and whether such funds were utilized for their intended purposes.
5. Determine if amounts for future major repairs and replacements ("reserves") were properly funded or waived.

.61 Other considerations for accountants during the initial operating period and for the periods thereafter include:

1. Numbers of units that are in control of the developer or other groups. Readers should refer to paragraph 4.22 of the CIRA Guide for related disclosures.
2. Instances where maintenance fees are kept artificially low in order to induce sales. In such cases, how will the CIRA make up for prior deficits, while at the same time, be able to fund the CIRA's future operations at a significantly higher assessment level?
3. Developers often have their associations enter into lease arrangements for office and maintenance equipment. Such leases could be capital in nature. In those cases, the accountant should raise the question as to whether those assets should be expensed as they generally are under prevalent industry practice, as noted in paragraphs 2.08 through 2.10 of the CIRA Guide.

.62 During a period in which many CIRAs have suffered significant casualty losses from natural disasters, the boards need to address the responsibilities of the developer for funding shortfalls in insurance proceeds. The auditor should consider whether a CIRA's insurance coverage complies with statutory or other documentary requirements.

Special Audit Issue Related to Mixed-Use Projects

.63 Expense allocations between the various members and unit types of a CIRA that are in a mixed-use project must be carefully considered during the audit process. The auditor should consider the appropriate auditing procedures to determine if the expenses are being properly allocated on a reasonable and consistent basis. The expenses should be allocated in compliance with the CIRA's governing documents and the budget included in the offering statement. Furthermore the expense allocations may affect the surplus/deficit for a particular member and unit type and therefore future maintenance assessments for the different members and unit types. Audit procedures applied to assessment revenues should include testing whether amounts assessed to individual owners have been computed in accordance with the CIRA's documents.

Interest Rate Risk for CIRAs That Borrowed Money a Few Years Ago

.64 Banks have found a lending niche in the CIRA market. In the past few years, there has been an increase in associations taking out large dollar amount loans for major repair and replacement projects. The terms of those loans vary; however, quite often, the interest rates are adjustable. Some of these loans were originally taken out several years ago when interest rates were much lower than they are currently. For these adjustable rate loans, payments periodically adjust to market rates. This may occur as often as quarterly or annually, while other loans adjust after three to five years. If the association has a loan that is several years old and is just now adjusting, the association will be making a much larger loan payment, and the impact may be as much as 25 percent to 30 percent higher.

.65 The loans are generally secured by future assessments. If the association has included the loan payment as part of its annual budget and increased the members' assessments, these loan increases will have to be part of the annual budgeting process. The association needs to look into the future budgeting period to determine when the adjustment will take place and estimate the impact on the budget.

.66 If the loan payment is secured by special assessments from the members, those special assessment amounts will need to be adjusted according to the rate increase. Quite often, the members are given the option of paying the special assessment in full at the time of the loan, at the time of resale of their unit, or at any chosen time. Those payments that were received for payment of their portion of the special assessment should have been applied to the principal of the loan, leaving a loan balance that approximates the remaining receivable balances. Thus, only those homeowners who chose to finance their portion of the special assessment will be affected by the interest rate increase. The overall affect of this may be that these owners are also affected by rate increases in their own home mortgages and may be more at risk for default. If the association is unable to collect that portion of the special assessment, due to bankruptcy or foreclosure of the unit, the amount of the remaining loan payment will have to be paid from the general budget. Also, if the association was neglectful and did not pay down the loan as special assessment payoffs were received, the association will be affected by the increased loan payment for the shortfall between what is being received by the remaining owners and the actual payment amount.

Bad Debt Allowances

.67 Housing prices showed annualized double-digit gains for the last three years. Due to these increases in real estate prices, most accountants have seen minimal bad debt write-offs as there has been "built in" equity in a unit, even just a few months after the purchase of a unit, due to the economy. Thus, if the association has been diligent in its collection measures and has filed liens and foreclosures, they have been able to collect the past due assessments, fees, and charges. Most housing markets in many areas of the country are now seeing a leveling off, or at the most a slight increase or slight decrease, in housing prices. Predictions are for this flattening off to continue through 2006 and 2007.

.68 Added to this issue is the fact that there has been an increase in adjustable rate and nonconforming mortgages used by owners to purchase their homes. In the climate of increased interest rates, as those loan payments are adjusted to the current rates, some homeowners will find payment of the monthly mortgage payment difficult. Roughly $137.5 billion in residential mortgages will face payment resets in 2006 and another $524 billion will reset in the next four years (according to an analysis by the Union Bank of Switzerland, UBS AG). These loans are found in all income brackets.

.69 With the softening of the housing market in some areas, and the increased home mortgage payments, it is probable that write-off of assessments to bad debt will increase in the future. It is the auditor's job to determine whether management's estimate of the allowance for bad debts is reasonable. Auditors should follow AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), which provides guidance on obtaining and evaluating sufficient, competent evidential matter in support of accounting estimates included in the financial statements. The bad debts should be presented in the statement of revenues and expenses which presents information about all assessments, other revenues, and expenses.

.70 Management must make careful judgments about collectibility and estimates of allowances for bad debts. In the current economic climate, you cannot use prior history as a model for analysis. Some management companies and boards of directors do not understand the requirement for the allowance and may not want "bad debts" on their financial statements. The auditor needs to educate them in the importance of not overstating assets or revenues by including receivables or assessment income that is uncollectible.

Ensuring Management Has Expertise to Accept Adjusting Journal Entries

.71 The accountant's definition of "management" includes those within an organization who have some type of responsibility with regards to the proper presentation of the financial statements. The auditor would generally include in that definition paid management (such as a portfolio manager or on-site manager), as well as the board of directors.

.72 For non-accountants within the CIRA industry, the definition of "management" is generally more strictly defined to mean paid management. The auditor needs to ensure that the board of directors understands that they are included in this definition and, in fact, are the primary members of the "management" team.

.73 AU section 333.03, *Management Representations* (AICPA, *Professional Standards*, vol. 1), states that during an audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries or through the financial statements. Such representations from management are part of the evidential matter the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit. Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations.

.74 Written representations from management should be obtained for all financial statements and periods covered by the auditor's report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.

.75 The representation letter ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry. AU section 333.17 (Appendix B, "Additional Illustrative Representations") provides examples of additional representations that may be appropriate. Also see Appendix B of the CIRA Guide for illustrative representation letters. Generally the representation letter is signed by representatives from paid management and the board of directors.

.76 Practitioners must assure themselves that management is taking responsibility for the adjusting journal entries presented at the time of the year end engagement. Auditors may consider as a good practice including the following representation in the letter signed by management, as illustrated in the representation letter found in Appendix F, "Review of Financial Statements—Illustrative Representation Letter," of AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100.79).

We are in agreement with the adjusting journal entries you have recommended, and they have been posted to the company's accounts. (if applicable)

.77 In many instances, the CIRA's accounting department may not be sufficiently sophisticated to understand accrual adjustments. Also, the CIRA may be run by a volunteer board of directors with little or no financial expertise. Even professional managers may not have a proficiency in accounting matters.

.78 While the client does not have to be a financial expert, the practitioner must be able to assure himself or herself that the client has some rudimentary understanding of the adjustments and their impact on the financial statements. Identifying the person(s) and educating that (those) person(s) during the year end audit or review should be part of the accountant's planning process.

.79 In instances in which a management company prepares the CIRA's financial statements, the auditor should consider having a representative of the management company (for example, controller, association accountant, or its equivalent) sign the representation letter. Frequently, the management company will limit its representations to certain items. The auditor should assess the adequacy of these representations (which may have been agreed upon with the management company in advance).

.80 In obtaining representations in connection with a turnover audit, the auditor should consider the representations of each of the boards of directors, both prior to and after the turnover. Of course, the periods of time to which the representations apply should be indicated on the letter.

The Importance of Performing Monthly Bank Reconciliations and Fraud

.81 Discovering one type of fraudulent scheme before more monies are stolen can be halted by management performing monthly bank reconciliations on a timely basis. A fairly simple accounting function can provide good controls if done on a consistent basis. One such fraud committed against an association would be where the perpetrators forged checks by gaining unlawful access to a "real" check from the association and then duplicating that information onto blank check stock.

.82 The simple lesson is that associations need to be diligent in performing monthly bank reconciliations in a timely manner. This fraud was not found by the bank, but by the manager at the time of the reconciliation. Many associations do not reconcile their bank accounts for months resulting in greater difficulty tracing and more monies stolen.

.83 Other examples of recent frauds committed against CIRAs:

- Altering association records relating to costs and presenting false work reports to the board.
- At one Upper East Side New York cooperative, $4.7 million was repaid, but the looting of its funds by a trusted treasurer offers lessons for all co-ops and their volunteer boards.
- Manager, in conjunction with husband, who was a printer by trade, produces almost perfect bank statements used to loot the reserves. "Almost" perfect because the husband forgot to include the watermark which can be added with most software programs.
- Manager is allowed discretion with expenses under $1,000. Manager has associations with busy financials. The manager has work done on personal residence, splitting invoices on that residence (with the unwitting aid of vendors) into increments of less than $1,000.
- Manager in a cold climate has utility bills placed on a payment plan, but bills the association with the real-time usage and pockets the difference.

- Manager in a resort environment has work performed on personal residence by association staff during slow time.
- Maintenance staff person, with part-time duty of showing vacant units for owners and for association-owned units, rents the units (short term) and keeps the rents.

.84 Most such losses never get reported to anyone—the police, the owners, the fidelity insurers, and so on—because the board does not want the adverse publicity.

.85 Readers should be aware that for any of the above examples the CIRA has to demonstrate the perpetrator's "manifest intent" to cause harm in order to obtain recovery from the fidelity insurer.

Practice Implications Related to the Revisions Made by SAS No. 112

.86 In May 2006, the AICPA Auditing Standards Board (ASB) issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006.

How the Revisions Will Affect Practice

.87 As you gain a better understanding of what needs to be communicated to management and those charged with governance, you may find that there will be more control deficiencies that you:

- Identify as significant deficiencies and material weaknesses, and
- Communicate to management and those charged with governance.

You may emphasize and therefore spend more time evaluating identified control deficiencies than you did in the past.

.88 ***Discussions With Management and Others***. The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. You may have to explain to your clients that you, the auditor, *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.89 You may wish to be called upon to hold discussions with management and other users of your written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the definitions have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of *material weaknesses*. Another reason is that you have to include significant deficiencies and material weaknesses identified and communicated in previous years in your written communication as long as these deficiencies have not been remediated. You may need to explain to management and other users that you are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.90 You may also need to hold discussions with management and other users who ask how you were able to express a clean opinion on the financial statements when material weaknesses in internal control were present. You may wish to explain that your audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control. You can express a clean opinion on the financial statements even though material weaknesses in internal control are present, because you performed sufficient procedures and obtained appropriate audit evidence to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented or detected by the client.

Issues for Audits of Smaller Entities

.91 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.92 Another issue that may cause concern is the extent to which you (as the auditor) may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if your client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing or detecting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[2] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a control weakness by assisting in drafting the financial statements does not change the control weakness.

.93 ***Possible Opportunities.*** The new requirements of SAS No. 112 introduce possible opportunities for you. You can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. You can also teach your clients how to develop a risk assessment approach to designing internal control.

> **Help Desk—**See the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies—A Companion to SAS No. 112* (product no. 022536kk) for a thorough discussion of SAS No. 112.

Audit Documentation

.94 In December 2005, the AICPA ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). SAS No. 103 supersedes SAS No. 96, *Audit Documentation*, and amends SAS No. 1, *Codification of Auditing Standards and Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 530, "Dating of the Independent Auditor's Report"), as amended. SAS No. 103 establishes standards and provides guidance to auditors of nonissuers on audit documentation. The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed); the audit evidence obtained and its source; and the conclusions reached. Audit documentation:

1. Provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards (GAAS).

2. Provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

---

[2] See Ethics Ruling 101-3, "Performance of Nonattest Services," of AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

.95 Audit documentation is an essential element of audit quality. Although documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate documentation contributes to the quality of an audit.

.96 Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached. Audit documentation, also known as working papers or workpapers, may be recorded on paper or on electronic or other media. When transferring or copying paper documentation to another media, the auditor should apply procedures to generate a copy that is faithful in form and content to the original paper document.[3]

.97 Audit documentation includes, for example, audit programs,[4] analyses, issues memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail) concerning significant findings or issues, and schedules of the work the auditor performed. Abstracts or copies of the organization's records (for example, significant and specific contracts and agreements) should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. The audit documentation for a specific engagement is assembled in an audit file.[5]

.98 The auditor need not retain in audit documentation superseded drafts of working papers or financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

In addition to the objectives set out in paragraph 3 of SAS No. 103, audit documentation serves a number of other purposes, including:

- Assisting the audit team to plan and perform the audit;
- Assisting auditors who are new to an engagement by being able to review the prior year's documentation, allowing them to understand the work performed as an aid in planning and performing the current engagement;
- Assisting members of the audit team responsible for supervision to direct and supervise the audit work, and to review the quality of work performed;
- Demonstrating the accountability of the audit team for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached;
- Retaining a record of matters of continuing significance to future audits of the same organization;
- Assisting quality control reviewers (for example, internal inspectors) who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions;
- Enabling an experienced auditor to conduct inspections or peer reviews in accordance with applicable legal, regulatory, or other requirements; and
- Assisting a successor auditor who reviews a predecessor auditor's audit documentation.

.99 For the purposes of SAS No. 103, *experienced auditor* means an individual (whether internal or external to the firm) who possesses the competencies and skills that would have enabled him or her to perform the

---

[3] There may be legal, regulatory, or other reasons to retain the original paper document.

[4] See Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A.05), as amended, for guidance regarding preparation of audit programs.

[5] The audit documentation contained within the audit file may consist of cross-references to documentation for audit engagements with related entities.

audit. These competencies and skills include an understanding of (1) audit processes, (2) the SASs and applicable legal and regulatory requirements, (3) the business environment in which the entity operates, and (4) auditing and financial reporting issues relevant to the organization's industry.

.100 SAS No. 103 provides guidance on the form, content, and extent of audit documentation. It also discusses how to document significant findings or issues including documenting audit evidence that is identified as being contradictory or inconsistent with the final conclusions, and how the auditor addressed the contradiction or inconsistency. This SAS requires the identification of the preparer and reviewer of the audit work. In addition, it provides guidance on audit documentation of the specific items tested, documentation if there is a departure from a SAS, revisions to audit documentation made after the date of the auditor's report, and the ownership and confidentiality of audit documentation. See SAS No. 103 for specific guidance.

.101 Another key provision of this standard is the amendment of paragraphs .01 and .05 of AU section 530. AU section 530.01 now requires that "the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion" and the footnote to this paragraph describes sufficient appropriate audit evidence as "evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them." Application of the rules may require revising the process used by your firm at the end of fieldwork to include a field review of audit workpapers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.102 Furthermore, the auditor should complete the assembly of the final audit file on a timely basis, but within 60 days following the report release date (documentation completion date). Statutes, regulations, or the audit firm's quality control policies may specify a shorter period of time in which this assembly process should be completed.

Retention of Working Papers

.103 SAS No. 103 says that the auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than five years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period.

The SAS is effective for audits of financial statements for periods ending on or after December 15, 2006.

Accounting Issues and Developments

CIRA Note Disclosures

.104 Many CIRAs rely on the accountant for guidance in the preparation of the financial statements. The financial statements should include any disclosures that would be appropriate to assist the reader to better understand them. The homeowners, who are the ultimate users of the financial statements, quite often have their biggest investments in their homes within the association. However, in most instances, these "investors" do not know how to read the financial statements. Note disclosures can assist in overcoming this hurdle.

Mold Remediation Disclosure

.105 When mold is found and remediated within an association, the total financial impact may be unknown for various reasons. First, there may be little or no insurance coverage for the event. Next, the association may not have a clear policy as to the association's responsibility versus the homeowner. Last, it is a hidden problem, so the extent is not known until exposed or a period of time passes. Thus, the CPA should consider including some type of contingency note to the financial statements explaining that the condition exists, remediation is (or is not) ongoing, and that the total financial impact cannot be determined at this time.

.106 Auditors should review the minutes from the board of directors meetings for such matters as approvals for mold remediation expenditures. Also, review of large unusual repair expenses or replacement fund expenses can uncover mold remediation. Furthermore, the auditor should consider whether the CIRA's insurance coverage complies with statutory or other documentary requirements. Although Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies,* does not require the disclosure of noninsured or underinsured risks, it states specifically that it does not discourage such disclosures.

Related Party Transactions Disclosure

.107 The most common related party transactions in CIRAs involve the developer or management companies. Developer transactions are easy to find and research, as it is general knowledge when a developer is still involved with the association. However, when a management company performs duties outside the basic management contract it may not be readily known. Care needs to be taken by the accountant to inquire as to whether the management company or board of directors (and their immediate families) provides goods and services to the association. Examples include the following:

- A board member is the broker at the brokerage firm in charge of the association's investments.
- A board member is the association's insurance agent.
- The management company has a separate landscape company (sometimes under a different name) that services the association.

.108 Such services may require disclosure in conformity with FASB Statement No. 57, *Related Party Disclosures.* If the related party transactions mentioned above exist, there is a requirement to disclose such transactions to the membership. The accountant may also want to inquire if the conflict of interest was disclosed to the membership at the time the contract was entered into and if proper conflict-of-interest procedures were followed, such as the board member abstaining from voting on the contract. Additionally, when a related party is involved the CIRA should exercise due diligence by getting other bids or reviewing the contract on an annual basis.

.109 CIRAs often enter into agreements or contracts with agents or others not directly managed by the CIRA to provide services to unit owners, such as operation of recreational facilities or garages. The auditor may find it necessary to review provisions of such contracts or agreements and consider whether the board was authorized to enter into the contracts and transactions pursuant to the contracts and whether related account balances are appropriately recorded and disclosed in the financial statements. The auditor should also consider whether commitments for long-term contracts have been disclosed when appropriate.

.110 The auditor should refer to the guidance in AU section 334, *Related Parties* (AICPA, *Professional Standards*, vol. 1), to determine the existence of related-party relationships and transactions with such parties as some individual board members, officers, or developers which may provide CIRAs with insurance, maintenance, or management services. For example, the auditor of a CIRA may consider recommending that the CIRA board have each member sign a document stating that neither they, their immediate family, nor any other lineal ancestor, has an ownership interest in any entity which provides a service to the CIRA, other than those vendors which are disclosed on the signed form. This procedure would help document all related parties and inform all board members of such related parties. Additional procedures such as having the board member abstain from voting on a contract with a related party or using a closed bid process may also be considered.

.111 Furthermore, AU section 334 states that, in auditing related-party transactions that are identified during the course of the audit, the independent accountant should be aware that the substance of a particular transaction could be significantly different from its form and that financial statements should recognize the substance of particular transactions rather than merely their legal form. Except for routine transactions, it will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related, or, assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a related-party transaction was consummated on terms equivalent to those that prevail in arm's-length transactions.

Special Assessment Disclosures

.112 Special assessments are enacted for a variety of reasons with a variety of repayment plans. The footnotes should adequately explain the reason for the special assessment, the timing of the assessment and the repayment terms. Also, the summary of significant accounting policies should include the special assessments revenue recognition policy. At the end of the year, the remaining special assessments should be summarized, including the amount of deferred revenue.

.113 Below are a few examples of special assessment disclosures:

> The Association established three special assessments in a prior year. Beginning February 1, 2001, there was a special assessment of $4,892.24 per unit which could be paid at the rate of $72.86 per month. The monthly payment amount in 2005 was $62.95. The stated purpose for the assessment was reserves and settlement. Beginning October 1, 2001, there was a special assessment of $3,428.57 per unit which could be paid at the rate of $54.29 per month. The monthly payment amount in 2005 was $46.87. The stated purpose for the assessment was for streets. Beginning February 1, 2002, there was a special assessment of $2,253.86 per unit which could be paid at the rate of $16.85 per month. The monthly payment amount in 2005 was $12.72. The stated purpose for the assessment was for fireplaces. Homeowners were given the option of paying any or all of the assessments in full or paying on a monthly basis over a period of eight years. Monthly payments were to be adjusted to coincide with the prevailing interest rate. This did not occur in 2005. The payments were still at the 2004 interest rate.
>
> In a prior year, the membership approved a special assessment in the amount of $3,100.00 per unit (total $623,100.00) to be used solely for payment of the costs of applying a barrier coating material to the common area potable hot and cold water pipes and related costs. The members had the option of paying the amount in full by September 1, 2003 or paying $60.00 per month for 40 months beginning September 1, 2003. Twenty-five homeowners were making payments at year end.
>
> There was an emergency special assessment in the current year to install caissons and underpinning in one of the buildings due to slope failure. The Association's board of directors received a report from an engineer stating that a building was experiencing serious signs of failure due to slope subsistence. The special assessment was $4,000 per unit for a total of $408,000. The unit owners had the option of making four payments of $1,000 each for the months of July through October 2005. At the end of the year, the outstanding special assessments receivable was approximately $12,000.

.114 As discussed in paragraph 7.53 of the CIRA Guide, when auditing special assessments receivable, the auditor should design tests to provide reasonable assurance that—

- All assessments receivable owed to the CIRA at the balance-sheet date are recorded.
- Recorded assessments receivable represent amounts owed to the CIRA at the balance-sheet date.
- Assessments receivable are properly described and classified in the financial statements.

.115 The auditor may achieve these objectives by performing substantive tests or a combination of substantive tests and tests of control activities. Substantive tests for determining the existence and accuracy of receivables include confirmation of the amount receivable by direct communication with parties owing amounts to the entity being audited and tests of subsequent receipts. SAS No. 67, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 330), provides guidance about the confirmation process in audits performed in accordance with GAAS. If replies to confirmation requests are not received or if the replies are not satisfactory, the auditor should obtain satisfaction about the existence and accuracy of assessment receivable balances by alternative procedures such as examining subsequent cash receipts and the existence of liens filed against units, although such liens do not assure the collectibility of assessments receivable.

.116 In practice, confirming assessments receivable may not be an effective procedure because members generally do not return the confirmation or return inadequate replies, thus requiring alternative procedures. Further, alternative procedures may be the most effective method of substantiating assessments receivable balances because these are normally collected shortly after assessment. The balances that are uncollected normally require the auditor to consult with management, legal counsel, or both regarding collectibility. In accordance with SAS No. 67, auditors who omit confirmation procedures must document the reasons why those procedures were omitted.

Replacement Fund Disclosures

.117 The CIRA Guide gives some examples of the basic replacement fund disclosures. Since the replacement fund is a critical part of the association and is not found in other industries, the accountant should consider whether additional disclosures are appropriate to assist the reader of the financial statements. Some examples include the following:

- The most recent reserve study recommends a special assessment of $X,XXX for each homeowner in the upcoming year. This has/has not been adopted by the board/members.
- The board chose to use replacement fund monies for mold remediation, which is not a component of the reserve study. The reserve study will be re-computed to calculate the impact on future funding.
- The association is X percent funded according to the latest reserve study.
- The association is funding for components with a life of 30 years or less. There are additional components with lives of over 30 years which are not included in this calculation.
- The association budgeted $XX,XXX to be transferred to the replacement fund. No monies were actually deposited into the replacement fund for the year, and the association has no plans on repaying these unfunded amounts.
- In order to save finance charges, the board has chosen to borrow the earthquake insurance premium from the replacement fund. This will be repaid in twelve equal monthly payments from the operating fund. At the end of the year, there were five months remaining for a total of $X,XXX.

.118 If the disclosures about a CIRA's funding for future major repairs and replacements required by paragraph 4.27 of the CIRA Guide are absent or inadequate, the auditor should consider modifying his or her report, as discussed in AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards,* vol. 1).

Deficit Equities and Net Losses

.119 In some areas of the country, there is more resistance by boards of directors against increasing their assessments to adequately cover operating expenses and the funding of the replacement fund. This appears to be related to the fact that homeowners' budgets are tightened due to increased mortgage payments, higher fuel prices, and the general debt level of homeowners. Additionally, in associations where the vast majority of owners are on a fixed income, there is the same resistance. Thus, the decision is being made to leave association assessment amounts the same as the prior year, or with a minimal increase. This is not reasonable in relation to the same economic conditions causing association expenses to increase.

.120 Due to lack of knowledge as to how to read a financial statement, boards of directors and managers may not be aware that the association is operating at a loss or that the operating fund (members' equity) is running a deficit balance. This is especially true if monies are being borrowed from reserves so that there is sufficient cash flow to pay the bills, or if the manager or accounting personnel is holding the payments to vendors. This is further enhanced in that the financial statements are prepared on the cash basis of accounting or not on a fund balance which would show the amount due between the funds. Co-ops have significant depreciation so they usually show net operating losses and deficit equity. The test the auditor and financial statement users should make is whether the deficit equity is less than accumulated depreciation. If no, the co-op is in trouble.

.121 In order to function effectively, the board of directors should make a valid attempt to understand the issues associated with CIRA governance and the evolving accounting and auditing regulatory environment. The resources available in the "Improving the Audit Committee" section of the AICPA Web site address these issues, and help audit committee members understand how to develop efficient committee processes and engage in active and effective oversight to achieve financial literacy. Readers may refer the boards of directors of their CIRA clients to www.aicpa.org/audcommctr/homepage.htm for guidance to achieve financial literacy.

.122 The Community Associations Institute (CAI) recommends in its M-206 Financial Management course, which is required to become a Professional Community Association Manager (PCAM), that an association have a minimum of 2 percent to 5 percent of the annual budget as a balance in the operating fund for contingencies, with 10 percent to 15 percent being "very good." CAI considers this to be a good rule of thumb. Additionally, the CAI course recommends one month of operating expenses to be in the operating cash account. These are just recommendations and may differ based on the CIRA's circumstances.

.123 The practitioner may want to consider either meeting with the board of directors or discussing the issue in a management letter to ensure that the board is aware of the current financial condition.

Staff Accounting Bulletin No. 108

.124 On September 13, 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements." The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.125 There have been two common approaches used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.126 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.127 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in SAB No. 108. While the guidance outlined in the SAB only specifically applies to public companies and other entities whose financial information is filed with the SEC, non-issuers may also consider this guidance when quantifying financial statement misstatements. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

Technical Practice Aids on Guidance for Losses From Natural Disasters

.128 The AICPA recently issued an accounting Technical Practice Aid (TPA), section 5400.05, "Accounting and Disclosures Guidance for Losses From Natural Disasters—Nongovernmental Entities," regarding the accounting and disclosures for losses from natural disasters for nongovernmental entities.

.129 In 2005, hurricanes devastated several states along the Gulf Coast of the United States, took many lives, and caused considerable damage to entities. In its effort to provide financial reporting guidance on accounting and disclosures of losses from natural disasters, AICPA staff identified certain accounting issues and provided a road map reference to relevant accounting literature for nongovernmental entities to assist preparers and practitioners. For a more detailed discussion, readers should refer to the TPA at www.aicpa.org/download/acctstd/Natural_disaster_TPA_5400.05.pdf.

.130 The AICPA has also issued the following auditing TPAs in response to the hurricanes. Auditors whose clients are affected by the hurricanes or other natural disasters should follow the guidance in these TPAs, as appropriate.

- TPA section 9070.05, "Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor's Report But Before Issuance of the Auditor's Report and Related Financial Statements"
- TPA section 8345.01, "Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster"
- TPA section 8345.02, "Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster"

Disaster Response Checklist for CFOs and Controllers

.131 The AICPA has developed a checklist to help financial executives navigate through the complicated task of disaster recovery. When a company faces a disaster, whether it is a local or regional situation, it must address a variety of issues in a timely manner. This checklist helps walk the finance executive through disaster response in a series of phases, outlining issues that need to be addressed to understand damage and minimize ongoing risks, including ensuring employee safety, maintaining operations, and evaluating the company's financial situation. To access the checklist, visit www.aicpa.org/news/2005/disaster_response.htm.

Online Disaster Recovery Resource Center

.132 The AICPA has established a central online Disaster Recovery Resource Center. Visit this site frequently for up-to-date information, useful links to other Web sites, and a wide range of practical tools on this topic. It includes resources for members to use to assist their employers and clients, as well as practice management guidance for firms directly affected by Hurricane Katrina. The site will be updated regularly; check back often.

EITF Issues and FASB Staff Positions

.133 The FASB is very active in issuing Emerging Issues Task Force (EITF) Issues and FASB Staff Positions (FSPs). Auditors should visit the FASB Web site to stay abreast of these many issues and understand those accounting requirements that may pertain to their clients' financial statements. In the AICPA general *Audit Risk Alert—2006/07* you will find a list of selected EITF Issues and FSPs that have been issued recently and have broad interest.

FSP No. FAS 13-1, "Accounting for Rental Costs Incurred during a Construction Period"

.134 Accounting guidance for leasing arrangements is provided in FASB Statement No. 13, *Accounting for Leases*, as amended and interpreted. This FSP was issued in response to questions as to whether lessees can capitalize rental costs associated with ground and building operating leases that are incurred during a construction period. FSP No. FAS 13-1 states that there is no distinction between the right to use a leased asset during the construction period and the right to use that asset after the construction period. Rental costs associated with ground or building operating leases and incurred during a construction period are therefore recognized as rental expense and included in income from continuing operations. FASB Statement No. 13 and FASB Technical Bulletin 85-3, *Accounting for Operating Leases with Scheduled Rent Increases*, provide guidance to determine how to allocate rental costs over the lease term.

.135 FSP No. FAS 13-1 should be applied to the first reporting period beginning after December 15, 2005. Earlier adoption is permitted for financial statements or interim financial statements that have not been issued. Lessees are required to cease capitalizing rental costs as of the effective date of FSP No. FAS 13-1 for operating lease arrangements entered into prior to the FSP's effective date.

Recent Auditing, Attestation, and Quality Control Pronouncements and Related Guidance

.136 Presented below is a list of the most recent auditing, attestation, quality control, and related guidance issued. For information on auditing and attestation standards, quality control standards, and related guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm.

.137 You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA's Auditing Standards team and available at www.aicpa.org/members/div/auditstd/opinion/index.htm.

> ***Note:*** SAS No. 104 through No. 111 were issued together and are known as the "risk assessment" standards. They apply to audits conducted in accordance with GAAS.

Statement on Auditing Standards (SAS) No. 114 (November 2006) (Applicable to audits conducted in accordance with GAAS)	*The Auditor's Communication With Those Charged With Governance*
SAS No. 113 (November 2006) (Applicable to audits conducted in accordance with GAAS)	*Omnibus—2006*
SAS No. 112 (May 2006) (Applicable to audits conducted in accordance with GAAS)	*Communicating Internal Control Related Matters Identified in an Audit*
SAS No. 111 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Amendment to Statement on Auditing Standards No. 39,* Audit Sampling
SAS No. 110 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
SAS No. 109 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
SAS No. 108 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Planning and Supervision*
SAS No. 107 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Audit Risk and Materiality in Conducting an Audit*

(continued)

SAS No. 106 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Audit Evidence*
SAS No. 105 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards
SAS No. 104 (March 2006) (Applicable to audits conducted in accordance with GAAS)	*Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*
SAS No. 103 (December 2005) (Applicable to audits conducted in accordance with GAAS)	*Audit Documentation*. This SAS supersedes SAS No. 96 of the same name. This SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation. Audit documentation is an essential element of audit quality. Although audit documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate audit documentation contributes to the quality of an audit.
SAS No. 102 and Statement on Standards for Attestation Engagements (SSAE) No. 13 (December 2005) (Applicable to audits conducted in accordance with GAAS)	*Defining Professional Requirements in Statements on Auditing Standards* and *Defining Professional Requirements in Statements on Standards for Attestation Engagements* These Statements define the terminology the ASB will use to describe the degrees of responsibility that the requirements impose on the auditor or the practitioner.
AICPA Auditing Interpretation No. 1 of AU section 328, *Auditing Fair Value Measurements and Disclosures* and AICPA Auditing Interpretation No. 1 of AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*	"Auditing Interests in Trusts Held by a Third-Party Trustee and Reported at Fair Value" and "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist" These Interpretations clarify that simply receiving a confirmation from a third party (including a trustee) does not in and of itself constitute adequate audit evidence with respect to the valuation assertion of interests in trusts or investments in securities. The Interpretations also reiterate the responsibility of management to institute accounting and financial reporting processes for the determination of fair value measurements. According to the Interpretations, if the auditor is unable to *(continued)*

(July 2005) (Applicable to audits conducted in accordance with GAAS)	audit the existence or measurement of interests in investments in securities at the financial statement date, the auditor should consider whether that scope limitation requires the auditor to qualify his or her opinion or disclaim an opinion.
AICPA Technical Practice Aid 9070.05 (August 2005) (nonauthoritative)	"Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor's Report But Before Issuance of the Auditor's Report and Related Financial Statements"
AICPA Technical Practice Aid 8345.01 (September 2005) (nonauthoritative)	"Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster"
AICPA Technical Practice Aid 8345.02 (September 2005) (nonauthoritative)	"Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster"
AICPA Practice Alert 2005-1 (September 2005) (nonauthoritative)	*Auditing Procedures With Respect to Variable Interest Entities* The purpose of this Practice Alert is to provide guidance to auditors in planning and performing auditing procedures with respect to variable interest entities.
AICPA Audit and Accounting Practice Aid (nonauthoritative)	*SAS No. 70 Reports and Employee Benefit Plans* This publication provides guidance on the use of SAS No. 70 reports in audits performed in accordance with GAAS. In addition, this publication includes checklists and forms to help implement the guidance.
Guidance on Management Override of Internal Controls (nonauthoritative)	*Management Override of Internal Controls: The Achilles' Heel of Fraud Prevention? The Audit Committee and Oversight of Financial Reporting* This guidance is available through the AICPA Audit Committee Effectiveness Center at www.aicpa.org/audcommctr (go to "Spotlight Area").

.138 As necessary, auditors should obtain and understand the complete text of the applicable standards and other guidance. You should visit the applicable Web site for complete information.

Auditing Standards Available on AICPA Web Site

.139 The standards and interpretations promulgated by the AICPA ASB are available free of charge by visiting the AICPA Audit and Attest Standards Team's page at www.aicpa.org/members/div/auditstd/Auth_Lit_for_NonIssuers.htm. Members and nonmembers alike can download the auditing, attestation, and quality control standards by either choosing a section of the codification or an individual statement number. You can also obtain copies of AICPA standards and other guidance by contacting the AICPA at (888) 777-7077 or online at www.cpa2biz.com.

Recent AICPA Independence and Ethics Pronouncements

.140 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this Alert to be aware of independence and ethics matters that will affect their practice.

.141 In addition to the other matters discussed in *Independence and Ethics Alert—2006/07*, auditors should be aware of these recent issuances by the AICPA Professional Ethics Executive Committee (PEEC):

- Revised Interpretation No. 501-1, "Retention of Clients Records" (AICPA, *Professional Standards*, vol. 2, ET sec. 501.02), to provide guidance to members on their ethical responsibilities when a client or former client makes a request for client records, supporting records, or other documents that are in the custody or control of the member. The revised interpretation defines key terms and requires that client provided records be returned to the client upon request but that client records prepared by the member and supporting records may be withheld if the engagement is incomplete or there are fees due to the member for the specific engagement. In addition, the committee has deleted Ethics Rulings No. 182 of ET section 591, "Ethics Rulings on Other Responsibilities and Practices" (AICPA, *Professional Standards*, vol. 2, ET sec. 591.363–.364), because the substance of this ethics ruling has been incorporated into the revised Interpretation No. 501-1.

- New Interpretation No. 101-15, "Financial Relationships" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.17), defines financial interest, direct financial interest, and indirect financial interest as used in Interpretation No. 101-1, and provides guidance to members in determining whether financial interests should be considered direct or indirect financial interests. Readers should refer to the AICPA Web site at www.aicpa.org/download/ethics/interp101_1.pdf for further information.

- Ethics Rulings No. 113, "Acceptance or Offering of Gifts or Entertainment," and No. 114, "Acceptance or Offering of Gifts and Entertainment to or From an Attest Client," under Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.226–.227 and 191.228–.229, respectively), provide guidance on how a member's offer or acceptance of gifts or entertainment, to or from a client (both attest and nonattest), or a customer or vendor of the member's employer, affects a member's independence or objectivity. Readers should refer to the AICPA Web site at www.aicpa.org/download/ethics/Gifts_and_Entertainment_Rulings.pdf for further information.

- The PEEC has approved the release of "Conceptual Framework for AICPA Independence Standards" (AICPA, *Professional Standards*, ET sec. 100.01), and a related revision to "Other Considerations" of Interpretation No. 101-1, "Interpretation of Rule 101" (AICPA, *Professional Standards*, ET sec. 101.02) of the Code of Professional Conduct. Readers should refer to the AICPA Web site at www.aicpa.org/download/ethics/Ethics_Interpretation_101-1_and_Conceptual_Framework.pdf for further information, including the effective date.

.142 Readers should be aware of the following guidance on understanding and implementing Interpretation No. 101-3:

- Interpretation No. 101-3, "Performance of Nonattest Services" (as revised and adopted on January 27, 2005), can be found online at www.aicpa.org/members/div/ethics/intr_101-3.htm.

- *AICPA Interpretation 101-3, Performance of Nonattest Services—Understanding General Requirement No. 2: Client Responsibilities* provides detailed answers to the most frequently asked questions regarding this important provision of Interpretation No. 101-3. Topics covered include what is meant by having suitable skill, knowledge, and/or experience for purposes of the rule, underlying concepts supporting the requirement, how suitable skill, knowledge, and/or experience can be assessed, and which client personnel or other individuals can serve in this capacity. In addition, this document contains a new FAQ as approved by the PEEC on May 19, 2005, related to "routine activities" as referenced in the Interpretation. This document can be found online at www.aicpa.org/download/ethics/101-3_Competency_Guidance.pdf.

- *AICPA Interpretation 101-3, Performance of Nonattest Services—Requirement to Document Understanding With an Attest Client* provides clarification and guidance regarding the requirement to document certain elements of a nonattest services engagement as required by Interpretation No. 101-3. Topics covered include affected clients and services, form of documentation, failing to document, and illustrative sample documentation language. In addition, this document contains a new FAQ as approved by the PEEC on May 19, 2005, related to "routine activities" as referenced in the interpretation. This document can be found online at www.aicpa.org/download/ethics/Int._101-3_documentation_guidance.pdf.
- *Bookkeeping and General Requirement Q&As (Revised January 27, 2005)* are based on responses of the AICPA professional ethics division staff to members' inquiries and recent changes to the independence guidance of the PEEC. The Q&As can be found online at www.aicpa.org/download/ethics/nonattest_q_a.pdf.

Recent Accounting Pronouncements and Related Guidance

.143 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Statement No. 156 (March 2006)	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*
FASB Statement No. 155 (February 2006)	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.
FASB Staff Positions (various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FASB Staff Positions (FSPs). Some of the recently issued FSPs address issues relating to FASB Statements No. 13, No. 115, No. 123(R), No. 124, and No. 143, among others.
AICPA Statement of Position 06-1 (April 2006)	*Reporting Pursuant to the Global Investment Performance Standards*

(continued)

AICPA Technical Practice Aid section 1200.06–.15 (February 2005) (nonauthoritative)	“Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk”
AICPA Technical Practice Aid section 2130.09–.35 (December 2005) (nonauthoritative)	“Application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer,* to Debt Securities”
AICPA Technical Practice Aid section 5400.05 (September 2005) (nonauthoritative)	“Accounting and Disclosures Guidance for Losses From Natural Disasters—Nongovernmental Entities”
AICPA Technical Practice Aid section 5600.07–.17 (November 2005) (nonauthoritative)	“Determining a Lease Term for Accounting Purposes”
AICPA Technical Practice Aid section 6910.16–.20 (January 2006) (nonauthoritative)	“Presentation of Boxed Investment Positions in the Condensed Schedule of Investments of Nonregistered Investment Partnerships”
AICPA Technical Practice Aid section 6930.09 (August 2005) (nonauthoritative)	“Accounting and Disclosure Requirements for *Single-Employer Employee Benefit Plans* Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003”
AICPA Technical Practice Aid section 6930.10 (August 2005) (nonauthoritative)	“Accounting and Disclosure Requirements for *Multiemployer Employee Benefit Plans* Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003”
Statement on Standards for Accounting and Review Services (SSARS) No. 14 (July 2005)	*Compilation of Pro Forma Financial Information*. This SSARS expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on pro forma financial information.
SSARS No. 13 (July 2005)	*Compilation of Specified Elements, Accounts, or Items of a Financial Statement*. This SSARS expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement.

SSARS No. 12 (July 2005)	*Omnibus Statement on Standards for Accounting and Review Services—2005.* This SSARS amends SSARS No. 1, *Compilation and Review of Financial Statements*, and SSARS No. 2, *Reporting on Comparative Financial Statements*. The SSARS also rescinds Interpretation No. 26, "Communicating Possible Fraud and Illegal Acts to Management and Others," of SSARS No. 1.
Interpretation No. 27 of AR section 100	"Applicability of Statements on Standards for Accounting and Review Services to Reviews of Nonissuers Who Are Owned by or Controlled by an Issuer"

On the Horizon

.144 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all accounting and auditing projects in progress. Presented below is brief information about some ongoing projects that are especially relevant to the CIRA industry. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.145 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB) (Note that for audits of public companies, the PCAOB sets auditing standards.)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.fasb.org
Governmental Accounting Standards Board (GASB)	www.gasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message.

Auditing Pipeline—Nonpublic Companies

.146 The proposed standards discussed in this section would not apply to the audits of public companies and other audits conducted under the standards of the Public Company Accounting Oversight Board (PCAOB). Readers should keep abreast of the status of the following projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Proposed Statement on Standards for Attestation Engagements, Reporting on an Entity's Internal Control Over Financial Reporting

.147 This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). Specifically, guidance is provided regarding the following:

- Conditions that must be met for a practitioner to accept an engagement to examine the effectiveness of an entity's internal control and the prohibition of acceptance of an engagement to review such subject matter
- Engagements to examine the design and operating effectiveness of an entity's internal control
- Engagements to examine the design and operating effectiveness of a portion of an entity's internal control (for example, internal control over financial reporting of an entity's operating division or its accounts receivable)
- Engagements to examine only the suitability of design of an entity's internal control (no assertion is made about the operating effectiveness of internal control)
- Engagements to examine the design and operating effectiveness of an entity's internal control based on criteria established by a regulatory agency

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.148 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles.* The FASB proposal would move responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69) to the accounting literature. The proposed SAS would delete the GAAP hierarchy for nongovernmental entities from SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1, AU sec. 411), as amended. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www.fasb.org.

Accounting Pipeline

Proposed FASB Statement, Qualifying Special-Purpose Entities and Isolation of Transferred Assets—an amendment of FASB Statement No. 140

.149 This proposed Statement would amend and clarify FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, in several ways. The objectives of this project are to amend FASB Statement No. 140 to (1) specify the conditions under which a qualifying special-purpose entity (SPE) is required to achieve sale accounting, (2) eliminate inconsistent application of the principles FASB Statement No. 140 is based on, and (3) address other issues related to transfers of financial assets that arose during redeliberations on the amendment of FASB Statement No. 140 in order to improve the comparability of financial statements.

.150 Readers should be alert for the issuance of a final statement, which is expected to occur in the second quarter of 2007. Refer to the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.151 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA and the PCAOB in order to ensure that each of the documents has a uniform effective date.

Proposed FASB Statements, Business Combinations, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.152 The primary objective of applying the acquisition method project is to develop a single high-quality standard of accounting for business combinations that can be used for both domestic and cross-border financial reporting. The goal is to develop a standard that includes a common set of principles and related guidance that produces decision-useful information and minimizes exceptions to those principles. The standard should improve the completeness, relevance, and comparability of financial information about business combinations by:

1. Clarifying which assets and liabilities should be recognized in the initial accounting for the business combination.
2. Requiring that the assets acquired and the liabilities assumed be consistently measured at a relevant attribute.
3. Defining the scope of the standard in a way that ensures that similar economic events are accounted for similarly. (That means, by requiring that all transactions or other events in which an acquirer obtains control of a business be accounted for by applying the acquisition method).

.153 The exposure drafts on business combinations, purchase method procedures, and noncontrolling interests were published on June 30, 2005. The FASB's goal is to issue the two final Statements in the first half of 2007. The target effective date for the two proposed Statements will be reviewed near the end of redeliberations.

AICPA Audit and Accounting Products and Services

AICPA

Web Site

.154 AICPA Online (www.aicpa.org) is the AICPA's Web site on the Internet. The site offers users the opportunity to stay abreast of developments in accounting and auditing. Online resources include professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, exposure drafts, and a list of links to other accounting- and finance-related sites. The AICPA Web site also features a "Talk to Us" section, allowing users to send e-mail messages directly to AICPA representatives or teams. The AICPA Web site includes a separate section that deals with Circular A-133 audit issues, including a document that provides unofficial answers to frequently asked questions, at www.aicpa.org/belt/a133main.htm.

Order Department (Service Center Operations)

.155 To order AICPA products, call the AICPA Member Service Center at (888) 777-7077 or fax to (800) 362-5066. The best times to call are 8:30 A.M. to 11:30 A.M. and 2:00 P.M. to 7:30 P.M., Eastern Standard Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Publications

.156 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements (product numbers appear in parentheses).

- *Checklists and Illustrative Financial Statements for Common Interest Realty Associations* (product no. 008907kk). This publication is designed to help those preparing reports and financial statements of CIRAs by providing a checklist of applicable GAAP disclosures.
- Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide (product no. 006615kk)
- *Analytical Procedures* Audit Guide (product no. 012551kk)
- *Auditing Estimates and Other Soft Accounting Information* Practice Aid
- *Accounting Trends and Techniques—2006* (product no. 009898kk)
- *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* Practice Aid (product no. 006701kk)
- *Understanding and Implementing SSARS No. 8* (product no. 006612kk)
- *Audit and Accounting Manual* (product no. 005133kk). This manual is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs, auditors' reports, checklists and engagement letters, management representation letters, and confirmation letters.

Accounting and Auditing Technical Hotline

.157 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.158 The AICPA Professional Ethics Team answers inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Online CPE

.159 AICPA *CPExpress*, offered exclusively through CPA2Biz.com, is the AICPA's flagship online learning product with enhancements such as a new user interface and improved functionality. AICPA *CPExpress* now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 (nonmembers pay $369) for a new subscription and $119 (nonmembers pay $319) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA *CPExpress* offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Technical Practice Aids

.160 *AICPA Technical Practice Aids* includes questions received by the AICPA Technical Hotline on various subjects and the responses to those questions. TPA section 6990 includes a question and answer specifically pertaining to CIRAs. *Technical Practice Aids* is available both as a subscription service and in paperback form (product no. 005146kk).

Help Desk—AICPA publications can be obtained by calling AICPA Member Service Center at (888) 777-7077 or faxing a request to (800) 362-5066.

Guidance for Audit Committees on the Risk of Fraud From Management Override of Internal Control

.161 The AICPA Antifraud Programs and Controls Task Force has issued a document entitled *Management Override of Internal Controls: The Achilles' Heel of Fraud Prevention—The Audit Committee and Oversight of Financial Reporting*. The document offers assistance to audit committees in addressing the risk of fraud arising from management override of internal control over financial reporting. The guidance contains the following major sections:

- Management Override and the Audit Committee's Responsibilities
- Actions to Address the Risk of Management Override of Internal Controls
- Suggested Audit Committee Procedures: Strengthening Knowledge of the Business and Related Financial Statement Risks (Appendix)

.162 The following are some of the topics related to audit committees that are covered in the document:

- Maintaining an appropriate level of skepticism.
- Strengthening the audit committee's understanding of the business.
- Brainstorming to identify fraud risks.
- Using the code of conduct to assess financial reporting culture.
- Cultivating a vigorous whistle-blower program.
- Developing a broad information and feedback network including communications with internal auditors, independent auditors, compensation committee, and key employees.

.163 The document can be downloaded from the "Spotlight Area" on the AICPA's Audit Committee Effectiveness Center Web page at www.aicpa.org/audcommctr/homepage.htm.

References for Additional Guidance

.164 Auditors should also be aware of the economic, regulatory, and professional developments that may affect the audits they perform, as described in the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) and the AICPA *Compilation and Review Alert—2006/07* (product no. 022307kk). These Alerts may be obtained by calling AICPA Member Service Center at (888) 777-7077 or faxing a request to (800) 362-5066. Obtaining product information and placing online orders can be done at www.cpa2biz.com.

.165 Copies of FASB publications referred to in this document may be obtained directly from the FASB by calling the FASB Order Department at (800) 748-0659.

.166 The Audit Risk Alert *Common Interest Realty Associations Industry Developments* is published as warranted. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would be appreciated. You may e-mail these comments to lwest@aicpa.org or write to:

AICPA
Harborside Financial Center
201 Plaza Three
Jersey City, NJ 07311-3881

Appendix

Useful Internet Web Sites

.167 If used properly, the Internet can be a valuable tool for auditors. Through the Internet, auditors can access a wide variety of global business information. For example, information is available relating to industry statistics, resources for common interest realty associations (CIRAs) and their finance professionals, professional news, state CPA society information, Internal Revenue Service (IRS) information, software downloads, university research materials, currency exchange rates, stock prices, annual reports, and legislative and regulatory initiatives. Not only are such materials accessible from the computer, but they are available at any time, often free of charge.

.168 A number of resources provide direct information, whereas others may simply point to information inside and outside of the Internet. Auditors can use the Internet to:

- Obtain audit and accounting research information
- Obtain texts, such as audit programs
- Discuss audit issues with peers
- Communicate with audit clients
- Obtain information from a client's Web site
- Obtain information on professional associations

.169 There are caveats to keep in mind when using the Internet. Reliability varies considerably. Some information on the Internet has not been reviewed or checked for accuracy; caution is advised when accessing data from unknown or questionable sources. Although a vast amount of information is available on the Internet, much of it may be of little or no value to auditors. Accordingly, auditors should learn to use search engines effectively to minimize the amount of time browsing through useless information. The Internet is best used in tandem with other research tools, because it is unlikely that all desired research can be conducted solely from Internet sources.

.170 The following listing summarizes the various Web sites of many of the organizations referred to in this Audit Risk Alert, as well as others that auditors of CIRAs may find useful.

AAM Section 8090

Construction Contractors Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS

CONSTRUCTION CONTRACTORS INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert is intended to provide auditors of construction contractors with an overview of recent economic, industry, technical, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an *Other Auditing Publication*, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. This publication was reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA, and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Written by J. Russell Madray, CPA

Edited by Christopher Cole, CPA
Technical Manager
Accounting and Auditing Publications

How This Alert Can Help You

.01 This Audit Risk Alert helps you plan and perform your construction industry audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This Alert describes trends and issues facing most contractors in many of the construction markets in the country. National trends and industry-wide benchmarks can help you understand financial statement relationships and how they may affect your client. However, broad national trends have their limitations. Keep in mind that your client will be affected much more by local economic, political, and industry conditions that exist in the specific markets your client serves.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk).

.04 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, SAS No. 54 is referred to as AU section 317 of the AICPA *Professional Standards*.

Industry and Economic Developments

.05 Read the AICPA general *Audit Risk Alert—2006/07* for an overview of the current U.S. and global economic environment.

General Industry Trends and Conditions

.06 After a string of years of solid construction growth, analysts are predicting no slowdown, and in many cases, even more growth in commercial construction jobs. Analysts agree that single-family residential construction will soften in the remainder of 2006 and into 2007, but they believe commercial construction will pick up the pace, replacing residential work with commercial work. The 2006 U.S. construction market amounts to $1.2 trillion, of which single- and multi-family residential construction accounts for just over $642 billion. Most construction economists believe that as residential construction tails off, commercial projects will pick up the slack, resulting in a 5 percent increase in total put-in-place construction in the U.S. in 2007. Forecasters at FMI, a consultant group to commercial contractors and the construction industry, predict growth in nonresidential construction of 8 percent in 2006 and 9 percent in 2007. Ed Sullivan, chief economist at the Portland Cement Association, sees an even brighter picture for nonresidential construction in 2007. He predicts a growth rate of 8.5 percent, up from 6.4 percent in 2006 and only 1.5 percent in 2005. According to Sullivan, the nonresidential market turned in 2005 after five years of decline. But despite the large percentage gains for 2006, most markets could still be considered weak from a historical perspective, he says.

.07 While the economy is chugging along, inflationary pressures have market watchers at the Federal Reserve Board concerned. According to Ken Simonson, economist at the Associated General Contractors, the inflation level in the general economy is 3 to 4 percent, but building materials costs have increased nearly 8 percent and transportation costs have gone up 16 percent. This is spurring the Federal Reserve to increase prime interest rates, and the general consensus is that the economy may see the prime lending rate touch 6 percent in 2007. This will further dampen residential work, but commercial work will continue, barring any unforeseen event, economists predict.

.08 Most economists believe inflationary fears will ease and business growth will slow enough by the second half of 2007 that the Federal Reserve will ease up on interest rates. This should keep the fire cooking under the economy without it boiling over to feed inflation into 2008.

Construction Put in Place

.09 One of the most widely used measures of construction activity is *construction put in place*, which is tracked monthly by the Bureau of Statistics at the U.S. Department of Commerce. The *value of construction put in place* (value-in-place) is a measure of the value of construction installed or erected at the site during a given period. For an individual project, this includes:

- New buildings and structures.
- Additions, alterations, major replacements, and so on, to existing buildings and structures.
- Installed mechanical and electrical equipment.
- Installed industrial equipment, such as boilers and blast furnaces.
- Site preparation and outside construction, such as streets, sidewalks, parking lots, utility connections, and so on.
- Cost of labor and materials (including owner-supplied).

- Cost of construction equipment rental.
- Profit and overhead costs.
- Cost of architectural and engineering (A&E) work.
- Any miscellaneous costs of the project that are on the owner's books.

.10 The total value-in-place for a given period is the sum of the value of work done on all projects under way during this period, regardless of when work on each individual project was started or when payment was made to the contractors. For some categories, estimates are derived by distributing the total construction cost of the project by means of historic construction progress patterns.

.11 Exhibit 1, "New Construction Put in Place," presents details of construction put in place for various market segments. (Note that the amounts are in billions of dollars and represent seasonally adjusted annual rates.) To add some perspective, in January 1992, at the start of the current construction boom, the total new construction put in place was $452 billion, as compared with the estimated 2006 amount of $1,200 billion—a gain of more than 165 percent during the period.

Exhibit 1

New Construction Put in Place

(Billions of Dollars—Seasonally Adjusted Annual Rate, in Current Dollars)

	July 2005	*July 2006*
Private construction	856.1	930.9
Public construction	243.2	269.1
Total construction	**1,099.3**	**1,200.0**
Residential building	615.8	627.4
Nonresidential building		
Office	33.9	45.1
Power	24.8	34.7
Commercial	65.4	77.2
Lodging	11.7	21.0
Other nonresidential	104.5	125.5
Total nonresidential	240.3	303.5
Total private construction	856.1	930.9
Highways and streets	63.9	76.6
Infrastructure	35.1	36.9
Educational	63.7	69.9
Other public buildings	23.8	24.6
Other public construction	56.7	61.1
Total public construction	243.2	269.1

.12 The U.S. Census Bureau of the Department of Commerce announced that construction spending during July 2006 was estimated at a seasonally adjusted annual rate of $1,200.0 billion, 1.2 percent below the revised June 2006 estimate of $1,214.2 billion. The July 2006 figure is 5.1 percent above the July 2005 estimate of $1,141.2 billion. During the first seven months of 2006, construction spending amounted to $680.4 billion, 8.0 percent above the $630.2 billion for the same period in 2005.

.13 Spending on private construction was at a seasonally adjusted annual rate of $930.9 billion, 1.3 percent below the revised June estimate of $943.2 billion. Residential construction was at a seasonally adjusted annual rate of $627.4 billion in July, 2.0 percent below the revised June estimate of $640.5 billion. Nonresidential construction was at a seasonally adjusted annual rate of $303.5 billion in July, 0.3 percent above the revised June estimate of $302.7 billion.

.14 In July, the estimated seasonally adjusted annual rate of public construction spending was $269.1 billion, 0.7 percent below the revised June estimate of $271.1 billion. Educational construction was at a seasonally adjusted annual rate of $69.9 billion, 1.0 percent above the revised June estimate of $69.2 billion. Highway construction was at a seasonally adjusted annual rate of $76.6 billion, 0.6 percent below the revised June estimate of $77.0 billion.

Private Construction

Residential Building

.15 The residential building segment of the construction industry includes new single- and multi-family housing as well as residential repairs and improvements. Conditions with the most impact on the demand for residential construction include the following:

- *Housing affordability.* Housing affordability is the extent to which potential buyers have the means to purchase a home. Affordability can be measured in several ways by considering average home prices and income levels. For example, some analysts create an "affordability index" by comparing median home prices to household income levels. As income levels get closer to housing prices, the average home becomes affordable to more local residents.
- *Interest rates.* Most homes are financed, and interest rates therefore have a tremendous effect on the affordability of housing. As interest rates rise, the cost of home financing increases; as they fall, the cost of financing decreases. However, interest rate changes do not have an immediate impact on home-buying markets—usually rates have to be in effect for several quarters to reverse home-buying trends.
- *Land availability/pricing.* As one of the major costs of residential building, land availability and pricing have a major impact on the affordability of housing. With land suitable for residential building becoming scarce in certain parts of the country, housing prices will be affected.
- *Demographics.* Shifts in demographics can have a significant impact on housing demand. For example, the aging of the U.S. population has increased demand for low-maintenance and multifamily housing. A large number of baby boomers are now entering their peak earning years, which is expected to affect the affordability and demand for single-family homes.
- *Market velocity.* According to industry sources, more than half of all home improvements occur within 18 months after a new owner moves in, or within 12 months before the home is sold. Thus, during times when new and used home markets are active, residential remodeling and improvement activity also increases.

.16 The consensus forecast for 2007 U.S. housing starts is 1.775 million units, down from an estimated 1.902 million units this year. This forecast matches the current activity level, which was 1.795 million units in July 2006. If this forecast is accurate, the damage by "leaking bubbles" to construction volume is now almost entirely in the past, although the damage to home prices will not be over for another year. For 2008, most forecasters expect starts to decline a further 30,000 to 70,000 units but this is the consequence of weaker economic growth and not any developments specific to the housing market.

.17 The Reed Construction Data 2007 housing outlook has been lowered from nearly 1.9 million units earlier this year, because of a weaker-than-expected economic environment. Energy and other commodity inflation continued well into the summer, sapping both consumer buying power and the confidence to spend. According to economists, the impact of bad news on consumer spending is geometric, not linear. Consumers ignore the first reports of bad news because rising commodity prices are often random and quickly reversed. With the next wave of news that commodity prices are still rising, consumers are forced to partially adjust spending to accommodate the higher prices, whether or not they believe that the price spike will be reversed. With the third wave of news that commodity prices are still rising, more accommodation is needed to balance household budgets. Many consumers begin to believe that the world has changed and that there will be no price reversal soon. As a result, their spending cuts are now larger than the recent price rises require, in order to restore used-up savings and set aside money to cover future price increases.

.18 The shrinking of the housing market from 2.1 to 1.8 million units is due primarily to cuts at the top and bottom of the market, rather than across the board. At the top, speculative investment buying has been reduced sharply because prospects for quick capital gains have disappeared. The futures market for the housing price index expected home prices to stop rising this past summer and then fall 3 percent to 4 percent by next summer. Longer term investors are also leaving the housing market. Investor carrying costs are higher with higher mortgage and vacancy rates. Currently, there is little prospect of widespread double-digit home price appreciation for perhaps four to five years, according to industry analysts.

.19 At the bottom of the market, prospective entry-level buyers are being increasingly priced out of the market by higher mortgage rates, fewer subsidized mortgage rates, and tighter credit approval standards. At the same time, homebuilders who specialize in entry-level homes are now competing with a rising number of homes they built in 2004 and 2005 that are coming back on the market. Variable interest rate mortgages have adjusted higher, meaning buyers who were only marginally qualified financially to buy a new home have found themselves unable to afford the monthly payments. Now they are putting their newer homes up for sale.

.20 These developments at the bottom of the market were expected. However, the unexpected changes in the inflation environment have severely worsened buying conditions in this segment of the housing market. This situation is a repeat of what happened in the early 1980s. High inflation in a growing economy impacts the low end of the income distribution curve much more heavily than the high end because low income households are less able to cushion against the impact of higher prices by drawing on savings or easily available credit. Wage gains lag inflation, so their household financial situation progressively worsens.

.21 As of mid-2006, one of the keys to increased construction activity for 2006 and 2007 was rebuilding after Hurricane Katrina. However, the rebuilding in the affected areas has gone much more slowly than anticipated, as can be documented with residential construction trends. Almost 136,000 homes were lost in the Katrina-affected areas of Louisiana, according to Red Cross estimates. In 2004, there were almost 5,800 new housing permits in these areas. In the first nine months after the hurricane, there were fewer than 2,500 new housing permits in these areas, so construction levels were not even back to pre-Katrina levels, much less at levels that serve to replace any homes lost.

.22 The situation is not much better in Mississippi. Over 64,000 homes were lost in this state to Katrina, and there were over 3,600 new homes permitted in 2004 in the area eventually affected by Hurricane Katrina. In the first nine months after Katrina, fewer than 3,000 new homes were permitted in these areas, so residential construction in these areas was barely back to its pre-Katrina pace, with almost nothing added to compensate for lost units.

.23 Inflation is the key variable in the housing outlook—not because it will change mortgage rates but because it will change confidence. In the absence of hurricanes or new political disputes that threaten oil supplies, Reed Construction Data believes that inflation is ebbing. However, too much damage to confidence may already have been done to see housing starts rise over 1.8 million units in 2007.

Nonresidential Building

.24 Despite several concerns with the fundamentals of the nonresidential construction market—including rising short-term interest rates, ongoing inflation in key construction materials prices, and recent concerns over the economic outlook—the American Institute of Architects Consensus Construction Forecast Panel (AIA Panel) is expecting solid levels of activity through the remainder of 2006 and through 2007. After adjusting for inflation, the AIA panel is anticipating a 6.3 percent increase in nonresidential activity in 2006, and an additional 6.2 percent in 2007 with growth evenly balanced between the commercial/industrial and institutional sectors. If achieved, this would be the best two-year period for nonresidential construction activity since this market grew by about 30 percent in 1997 to 1998.

.25 The optimism of the AIA Panel comes despite recent evidence of softening in the broader economy. The Federal Reserve Board has raised short-term interest rates by 4 percentage points since 2004, which has cooled off the stock market and other interest-sensitive sectors of the economy, such as housing and auto sales. Overall inflation in consumer and producer prices has begun to increase while it continues for several key building commodities.

Office Market

.26 Office construction—almost 11 percent of total nonresidential activity—has benefited from falling office vacancy rates nationally. Vacancy rates peaked nationally in early 2004 at almost 15 percent in downtown locations, and about 18 percent in suburban locations. The most recent readings from CB Richard Ellis show rates declining to 13.6 percent overall—12.3 percent downtown and 14.3 percent in the suburbs. Metro areas with the lowest office vacancy rates (Orange County, California; New York City; Palm Beach, Florida; Honolulu; and Fort Lauderdale) are heavily concentrated in coastal areas, whereas areas with the highest vacancy rates (Detroit; Dallas-Fort Worth; Columbus, Ohio; Louisville; and Cleveland) are heavily concentrated in the interior regions, particularly the industrial Midwest.

Retail and Other Commercial Markets

.27 Retail construction, the largest commercial sector, accounting for over 20 percent of all nonresidential construction, has seen steady growth in recent years. With the unemployment rate falling and disposable personal income rising, the AIA panel is projecting an almost 4 percent increase in retail construction in 2006, and over 4 percent in 2007.

Hospitality Market

.28 Hotel construction, at just over 3 percent of total nonresidential activity, has seen a dramatic improvement in construction levels in recent years. The AIA panel is projecting an increase of almost 11 percent in 2006, followed by another 6.5 percent in 2007.

Institutional Market

.29 Education construction is the largest institutional construction category, accounting for about 16.5 percent of total nonresidential building activity. Strong growth in enrollments, particularly at the high school and college levels, has pushed up construction levels. The AIA panel is projecting a 4.4 percent increase in educational construction levels in 2006, and an additional 7.4 percent in 2007.

.30 Healthcare construction, the other major institutional sector, accounts for over 7 percent of nonresidential construction activity. The aging of the population coupled with a modernization of existing healthcare facilities—often spurred by industry consolidation—has produced strong numbers in recent years in this sector. The AIA panel is projecting a 6.3 percent increase in 2006 in the construction of healthcare facilities followed by an additional 5.0 percent in 2007.

.31 The overall nonresidential construction sector is seeing the healthiest business conditions this decade. The AIA's Architectural Billings Index indicates somewhat slower growth in design activity in recent months, which will translate into a slower pace of growth in nonresidential construction activity as we get into 2007. However, given that the broader economy continues to expand and given the current strong levels of construction activity in the planning and design stages, most analysts expect healthy levels of nonresidential construction activity to continue at least through 2007.

> **Help Desk—**The demand for construction can vary significantly among different geographic regions. One of the most comprehensive analyses of commercial real estate demands and construction activity is published by the Society of Industrial and Office Realtors (SIOR). Annually, SIOR publishes *Comparative Statistics of Industrial and Office Real Estate Markets*, which provides detailed real estate and construction statistics on all the country's larger cities. You can purchase and download this publication directly from the publications section of the SIOR Web site at www.sior.com.

Public Construction

.32 Public construction spending rises rapidly when state and local governments have generous financial reserves and they are meeting or beating their revenue targets. There is a strong correlation between public construction spending and state budget reserves two years earlier.

.33 State budgets underestimated receipts for income and sales taxes by 4.2 percent in the last fiscal year. This conservative budgeting boosted reserves to 6.9 percent of annual spending as of June 30, 2005, the end of the fiscal years for all but four states. This assures above-average spending growth well into 2007. That strength is expected to extend into 2008 because state income and sales tax receipts in the first quarter of the 2006 fiscal year (July to September 2005) were up 9.2 percent from a year earlier. The gain was 9.5 percent excluding tax cuts. This is far above the aggregate 3.3 percent sales and income tax receipts gain that states have budgeted for fiscal year 2006.

.34 State budgets expect a 4 percent rise in sales tax receipts during the 12 months ending on June 30th, 2006. Receipts were 7.5 percent above the previous year in the first three months. Similarly, personal income tax receipts were up 9.2 percent compared to the budgeted 2.8 percent and corporate income tax receipts were running at a 25.9 percent annual rate of increase instead of the expected 2.0 percent. State budget reserves at the end of the current fiscal year are likely to be 7 percent to 8 percent of annual spending.

.35 State budget reserves vary considerably from no reserves at all in Michigan, Wisconsin, and Arkansas to 75 percent in Alaska. According to the National Association of State Budget Officers, the following states have more than double the national average of budget reserves.

State	*Reserves as a percent of spending*
Alaska	75.0 percent
Delaware	30.1 percent
Georgia	23.7 percent
Montana	21.7 percent
Nebraska	21.3 percent
North Dakota	18.7 percent
Texas	15.8 percent
Florida	15.7 percent
Massachusetts	15.5 percent

.36 The budget balances of the following states are less than half of the national average, according to the National Association of State Budget Officers.

State	*Reserves as a percent of spending*
New Jersey	3.4 percent
Pennsylvania	3.0 percent
Maine	2.9 percent
Ohio	2.9 percent
Mississippi	2.9 percent
Colorado	2.4 percent
Wisconsin	0.1 percent
Michigan	0.0 percent
Arkansas	0.0 percent

Surety Industry Trends

.37 The surety industry is critical to the well-being of the construction industry. Nearly half of all work performed by contractors is bonded, so any change in the surety market will have a significant effect on the construction industry.

.38 Surety bonding is a rigorous process in which surety companies prequalify contractors and then guarantee that the contractors will complete their projects and pay first-tier subcontractors, laborers, and materials suppliers (those hired directly by the general contractors). Construction projects can involve three types of surety bonds:

- *Bid bonds* provide financial assurance that the bid has been submitted in good faith and that the contractor intends to enter into the contract at the bid price.
- *Performance bonds* protect the owner from financial loss should the contractor fail to perform the contract in accordance with its terms and conditions.
- *Payment bonds* guarantee that the contractor will pay subcontractors, laborers, and suppliers associated with the project. (Government property is not subject to mechanic's liens, meaning that laborers, suppliers, and subcontractors would be without redress if the contractor defaulted and there were no payment bonds.)

.39 Section 270 of the Miller Act, enacted in 1935, governs performance and payment bonds on federal construction projects.

.40 Additionally, each of the 50 states, the District of Columbia, Puerto Rico, and almost all local jurisdictions have enacted legislation requiring surety bonds on public works projects. Generally referred to as "Little Miller Acts," these laws often set minimum thresholds for which state agencies and local governments may require surety bonds. Sometimes no threshold is set and the local entities themselves determine what minimum project value necessitates surety bonding.

.41 While surety credit is similar to obtaining bank credit, it still is a form of insurance. Surety bonds and insurance both are risk transfer mechanisms that are regulated by state insurance commissioners, and both provide protection against financial loss.

.42 Unlike other lines of insurance, however, surety actually is a form of credit. Whereas bankers either lend money or extend a line of credit, a surety grants a "pledge guarantee." The surety does not lend the contractor money but instead allows the surety's financial resources to be used to back the commitment of the contractor; if the contractor defaults the surety pays for completion of the contractor's work.

.43 The basic function of surety is prequalification. That process involves a surety underwriter taking an in-depth look at the contractor's entire business operation and thoroughly analyzing the contractor's financial strength and capacity to perform before credit is extended. The underwriter will concentrate on the three "C's"—character, capacity, capital—when making bond credit decisions.

.44 To issue a surety bond, the surety must be confident that the contractor has good character, experience matching the requirements of its contracts, financial strength, an excellent credit history, an established banking relationship and line of credit, and ownership of (or the ability to obtain) the equipment to carry out the contract.

.45 Although there have been a number of high-profile mergers in the surety market, there have been instances of surety company failures. In most cases, capacity remains sufficient to support the nation's construction needs. However, contractors in different market sizes may see changes in the near future and those contractors considered "marginal" may be dropped by their surety.

- Capacity for small and emerging contractors remains available, although they will be subject to the same underwriting standards as their larger peers. Small and start-up contractors who have difficulty meeting today's underwriting standards may opt to explore the U.S. Small Business Administration's (SBA's) Surety Bond Guarantee Program. The SBA has proposed changes in the program in an effort to renew interest by sureties and to encourage sureties to extend credit to companies that have no surety bond history. The proposed improvements include allowing sureties to charge prevailing rates under state law, a reduction in the frequency of required audits of participating surety companies, and increased loss coverage guarantees on bonds for companies owned by veterans.
- The mid-market contractor is least likely to be affected by capacity issues. This segment is the primary target of the industry, and qualified contractors will continue to receive strong support. However, in some cases, contractors are being required to provide audited financial statements instead of reviewed financial statements, and some sureties are requiring quarterly reporting. The same back-to-basics underwriting standards apply: quality financials, capital retention, and personal and corporate indemnity are all required.
- Contractors in the $250 million-and-over market may need to address changes in the industry. Surety companies are less likely to assume the risks of massive, multiyear projects on their own. Co-sureties, segmented bonding, and joint ventures may be more common, due to the fact that approximately 80 percent of the reinsurers from the 1990s are gone because of the massive surety losses incurred in the past few years. The tightened reinsurance market is a factor in the need for more creative surety solutions on mega-projects.

.46 There are also alternatives to surety, generally referred to as alternate products. These insurance products were originally designed to protect a general contractor from subcontractor default. Unlike a surety bond, an alternate product has a deductible and guarantees payment in the event of default, but not performance. Although this is a relatively new concept, some think it may be a way to circumvent some of the limitations of the surety industry.

.47 In some parts of the country sureties are requiring clients to upgrade from reviews to audits. Other sureties are willing to accept reviewed financial statements when accompanied by a review of the client's internal controls. In some cases, sureties are also requiring quarterly financial statements, in addition to year-end statements. In addition, some smaller contractors are being required to strengthen their financial position with personal guarantees and additional indemnity.

.48 Contractors can expect sureties to look at their work programs more closely, which can lead to changes in the amount of capacity sureties are willing to offer. Although many surety companies have the capacity to support an increased work program, they may not have the same appetite for risk they had in the past. Nevertheless, a contractor with a solid reputation and sound financials should have no problem obtaining the surety credit it needs. Overall, the surety industry is attempting to return to a healthy state and will continue to respond to the challenges in the construction industry.

.49 At this critical juncture in the surety industry's life cycle, the following steps may be helpful to ensure that your client's surety relationship remains free from any dramatic exposure to the surety industry's changes. Your client may need to:

- Meet regularly with its surety underwriters and bond agents and foster a partnering relationship.
- Know its surety—its results, reinsurance, capacity limitations, credit, and AM Best (a worldwide insurance rating and information agency) ratings.
- Plan for more lead time for larger or unique projects and major decisions.
- Provide high-quality and timely financial information.
- Understand the working capital and equity requirements for the bonding program.
- Understand the adjustments that the surety makes to the financial statements to arrive at bonding capacity. You should be aware that this can be one of the biggest pressures on a contractor and recognize the associated audit risk.
- Involve its surety in major financial decisions.
- Understand the working capital and equity requirements for its bonding program (single and aggregate limit).
- Use a CPA and an attorney who specialize in construction contractors and relationships with sureties.
- Use a professional surety broker who specializes in surety, and have a "backup" surety available in case the current surety is unable to provide proper coverage.

.50 The Surety & Fidelity Association of America (SFAA) provides information about the Surety Bond Authenticity Program. This process allows interested parties to verify a contractor's bond coverage directly with the insurance provider and might be a useful audit tool. Instructions can be obtained at the SFAA Web site link www.surety.org.

Construction Cost Trends

.51 Contractors should get used to higher prices for building materials. Experts across the country see strong world demand and increased shipping costs affecting supply and boosting costs for most building supplies. The rate of increase for building material costs is generally leveling off. Some experts see this as a new plateau, but don't see the costs coming down.

.52 Cement availability continues to be an issue in many parts of the country and will be a concern in 2007, according to Portland Cement Association chief economist Ed Sullivan. Cement consumption will grow in excess of 3 percent of the record consumption in 2005. Tight market conditions will reappear in 2007 as plants are operating at high rates, inventories are lean, and our dependence on imports increases, according to Sullivan.

.53 Lumber is one building supply that has tempered its price increases. Prices have opened up some as a tariff on Canadian lumber was reduced, which has increased supply. Lumber prices have gone down in the near term and should remain stable through 2007.

.54 Associated General Contractors economist, Ken Simonson, reports double-digit price increases in several building supplies. According to Simonson, contractors and building owners should get used to it because it may level off but won't drop to past levels. The average Producer Price Index (PPI) for construction materials jumped 7.8 percent from June 2005 to June 2006. Material costs reached as high as 16 percent for highway construction. There have also been increases as high as 87 percent for copper and brass mill shapes, 48 percent for asphalt, 40 percent for diesel fuel, 26 percent on gypsum products, 18 percent for plastic construction products and 15 percent for cement. Simonson expects a few of these increases to level off as the housing market cools, but most are tied to strong U.S. and world demand for materials and freight transportation.

.55 All sectors of the construction industry are concerned about finding qualified labor as the market improves in 2007. The present workforce is getting older and replacement workers aren't coming up through the ranks in great enough numbers to meet coming demand.

.56 Unemployment remains low, worker availability is low, and labor rates are increasing. Some believe that as residential housing slows, it will free up more workers for nonresidential and commercial work, but not all skills and trades are transferable. That's why analysts believe the unemployment rate will rise to 4.9 percent in 2007.

.57 The U.S. Department of Labor Bureau of Labor Statistics reports job opportunities in the construction field will remain strong for experienced workers. As demand increases and the labor supply stays the same, wage rates will increase, especially for more experienced workers who already are paid higher than average wages. Plumbers and electricians are two groups most affected by this trend, according to research conducted by FMI, Inc.

.58 In fact, the concern for construction labor is so great in hurricane-damaged areas that the Biloxi suburb of D'Iberville, Mississippi is courting China-based construction companies to import Chinese construction workers to build shopping malls, condominiums, and casinos in a city where 35 percent of the real estate was damaged by Hurricane Katrina. Given the debate over immigration and American labor law constraints, this may be a difficult undertaking, but it is a sign of the lengths that developers and others are considering to meet the looming labor shortage. The firms, which propose to partner with private developers in the United States, plan to use Chinese materials to avoid paying higher post-Katrina prices for American materials.

.59 To a large extent, Latino workers are filling the gap of needed workers. Sources report that as much as 45 percent of the workers at some nationally-based construction companies are Hispanic. However, growing sentiment to make sure these workers are registered aliens could greatly affect worker availability and increase labor costs for those contractors who rely on short-term workers or day laborers to get their portion of the project completed.

> **Help Desk—**The *Engineering News Record* publishes detailed quarterly cost studies that track average prices for a wide variety of materials and labor classifications in major cities across the country. You can access summaries of the studies at the magazine's Web site at www.enr.com.

Legislative and Regulatory Issues

New Tax Credit for Homebuilders

.60 The Energy Policy Act of 2005 included many provisions regarding coal, natural gas, renewable energy, and energy efficiency and distribution. It also enacted a new tax credit under Internal Revenue Code (IRC) section 45L—the energy-efficient home credit—available to eligible contractors. Depending on the energy savings achieved, the credit is $1,000 or $2,000 per home.

.61 Under section 45L, a home qualifies for the credit if it has all the following characteristics:

- It is located in the United States.
- Its construction was substantially completed after August 8, 2005.
- It meets the energy-saving requirements specified in section 45L.
- It is acquired from an eligible contractor in either 2006 or 2007 for use as a residence.

.62 The Internal Revenue Service (IRS) issued IR news release 2006-32 and notices 2006-27 and 2006-28 to explain how homebuilders can qualify newly constructed homes for the credit. Notice 2006-28 provides procedures for manufactured homes; notice 2006-27 for all other homes. They include information about the certification process a builder must undergo to qualify and a public list of software programs that can help calculate energy consumption to obtain the proper certification.

.63 The credit is reported by the taxable entity or, for pass-through entities (for example, S corporations and partnerships), on the shareholder's or partner's individual return. It cannot be applied against the alternative minimum tax; thus, it may be limited and carried forward. It is not refundable. The credit can be significant; thus, obtaining the proper certification is important.

> **Help Desk—**For more information, see Tax Clinic, "Tax Credit for Home Builders," by Joel Ackerman, CPA, in the October 2006 issue of *The Tax Adviser*.

AGCxml Project

.64 The Associated General Contractors of America (AGC) recently undertook an industry-wide initiative aimed at enabling the efficient and reliable exchange of electronic construction project information among all building construction and design professionals. The project, known as the AGCxml Project, is managed by the National Institute of Building Sciences (NIBS) under a contract to AGC. This project will result in a set of extensible markup language (XML) schemas that will enable design and construction professionals to exchange electronically the information contained in common construction and communication documents, such as owner/contractor agreements, schedules of values, requests for information (RFI), requests for proposals (RFP), architect/engineer supplemental instructions, change orders, change directives, submittals, applications for payment, and addenda.

.65 XML schemas will enable the exchange of information among dissimilar and proprietary software applications, without requiring the reengineering or redesign of those applications, by establishing a common, nonproprietary data format and classification system for the information to be exchanged. Software developers will be able to modify their applications with minimal effort to reliably import and export data in AGCxml format, without having to change or share their proprietary software code and data formats.

.66 AGC also extended a nationwide invitation to architects, building owners, contractors, engineers, material suppliers, software developers, and subcontractors to serve as volunteer members of a Review and Validation Committee (RVC) for the AGCxml Project. The role of the RVC is to review and validate the development work of the NIBS technical team.

Current Audit and Accounting Issues and Developments

Assessing Audit Risk in the Current Environment

.67 The proper planning and execution of an audit has always required you to have a thorough understanding of the construction industry and the nature of your client's business.

Professional Skepticism

.68 The third general audit standard stipulates that due professional care be exercised in planning and conducting an audit engagement. Due professional care requires that you exercise professional skepticism in gathering and evaluating audit evidence.

.69 As a result of perceived external pressures, companies may be tempted to manage earnings by using nonrecurring transactions or through changes in the method of calculating key estimates, such as reserves, fair values, or impairments. Companies may also adopt inappropriate accounting practices resulting in improper recognition or omission of financial transactions. Material nonrecurring transactions may require special disclosure to facilitate the readers' understanding of the reported financial results, and the guidance in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections*, should be applied in reporting the effects of changes in estimates. Auditors of public companies should see the section titled "Staff Accounting Bulletin No. 108" in the "Recent Auditing and Attestation Pronouncements and Related Guidance" section of this Alert. Inappropriate transactions or accounting practices that may result in errors requiring adjustments of financial statements might include premature recognition of revenue, failure to appropriately accrue for contingent liabilities that are probable and estimable, and failure to record unpaid purchase invoices. Additionally, you should be particularly skeptical of fourth-quarter events that result in significant revenue recognition, loss accrual, or noncash earnings.

.70 The appropriate level of professional skepticism is needed when corroborating management's representations. Management's explanations should make business sense. Additionally, you may need to consider corroborating management's explanations with members of the board of directors or audit committee.

.71 Other indicators of potential increased accounting and reporting risk calling for increased professional skepticism include:

- Bonuses for estimators, project managers, purchasing agents, or supervisors depend on specific criteria (such as budgets, targets, or performance).
- Tax-motivated income or loss goals exist.
- There are ownership disputes, potential sale of business, or a contemplated or current divorce situation.
- Management has been unable to accurately project gross profit in the past.
- Loan covenants or bonding equity requirements have either been closely met or barely failed in the past.
- The company is committed (awarded or notified as low bidder) to a large contract in excess of capacity.
- The company is involved in construction projects subject to significant regulatory restrictions (the Environmental Protection Agency, Federal Emergency Management Agency, or federal or state projects).
- The company is undercapitalized, relying heavily on bank loans and other credit, and is in danger of violating loan covenants.
- The company is having difficulty obtaining or maintaining financing or surety bonding.
- The company is changing significant accounting policies and assumptions to less conservative ones.
- There are increasing amounts of underbillings on the balance sheet.

- The company is generating profits but not cash flow.
- The company has a consistent gross profit fade.
- The company has been entering into new types of projects or new geographic areas.
- The company has been awarded a job that has a dramatic difference in bid spread.
- There has been a significant change in senior management or the board of directors.

Evaluating Audit Risks

.72 Your evaluation of audit risk should start with a good understanding of your client's business. To develop this understanding, you should be knowledgeable about the entity's strategies for dealing with business conditions—both current conditions and those most likely to exist in the near future. In the construction industry, business conditions vary greatly across contractor types and from region to region. The risks associated with building office buildings are different from those faced by a homebuilder; a contractor in the Northeast may face different issues than a similar contractor located on the Pacific Coast. For this reason, you must be knowledgeable about contractor types and the location in which the entity operates.

Evaluating Control Deficiencies

.73 In May 2006, the AICPA Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325A), as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006.

.74 The Statement requires that auditors (1) evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses and (2) communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

.75 Some examples of potential control deficiencies you might find in construction companies are:

- Lack of segregation of duties in the cash management function due to a small number of administrative staff and without effective compensating controls
- Management override of controls by owners of privately held companies or by project managers in the invoice approval process
- Inadequate monitoring of the financial accounting process to detect deficiencies in internal control by management
- Improper revenue recognition through recording change orders that have not been approved
- Estimates regarding job completion percentage or costs to complete not reviewed and approved by a person in the company competent to evaluate the estimates
- Lack of client expertise in preparing financial statements including the process for identification, consolidation and disclosure of variable interest entities (VIEs)

.76 The AICPA has published the Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in the implementation of this Statement.

Accounting and Auditing Issues Related to Construction Contracts

.77 Auditors of construction contractors should recognize that the traditional balance sheet approach to auditing usually is not adequate when performing an audit of a contractor. The financial statements of a contractor are built from the financial results of individual contracts. The more effective audit approach requires you to focus on the terms, financial estimates, and results of individual contracts, rather than the contract-related balance sheet that accounts for the company as a whole.

.78 The authoritative guidance on auditing contractors is contained in the AICPA Audit and Accounting Guide *Construction Contractors*. Included in the Audit and Accounting Guide is a copy of Statement of Position (SOP) 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, which is the primary authoritative accounting guidance for construction contractors.

.79 Auditing construction contractors is complex. Such businesses rely on accurate and reliable estimates to operate their business as well as to prepare financial statements. Therefore, it is critical that you gain an understanding of the contractor's significant estimates and the assumptions that are used in operating the business. Remember that the audit of a construction contractor's financial statements is an audit of the contractor's ability to estimate. There are several things to consider when auditing estimates: understand the internal control structure surrounding the estimate, consider the contractor's history of accurate estimates, compare actual to budgeted figures, and review subsequent events.

.80 The Professional Issues Task Force of the AICPA has identified certain procedures that should be considered in performing an audit of a construction contractor. They are as follows:

- Read significant contracts. This procedure may seem obvious, but it is necessary to identify the terms of the contract, any guarantees, penalties, or incentives, as well as cancellation and postponement provisions. For example, reading the contract might identify the party responsible for additional expenses incurred as a result of weather delays.
- Identify unique contracts and increase the amount of testing and professional skepticism related to such contracts. These contracts increase the risk of improper estimates and thus improperly stated financial statements. If a company cannot reasonably estimate the cost or progress of a contract, it should be accounted for under the completed-contract method.
- Understand the company's cash flow and how it will manage expenses. Often, expenses are payable prior to receiving the related cash from the contract revenue. Some companies win long-term contracts, but cannot fund the project long enough to realize the revenue on the contract.
- Recognize that the longer the contract period, the greater the risk that an estimate will be incorrect. Also, the farther along a contract is toward completion, the less risk there is of an incorrect estimate. Finally, with more variables inherent in an estimate there is a greater risk that the estimate will be incorrect.
- Confirm the terms and conditions of the contract as well as the normal billing procedures. When confirming a receivable, you should strongly consider confirming the original contract price, total approved change orders, total billings and payments, retainage held and whether it accrues interest, detail of any claims, back charges, or disputes, and estimated completion date or the estimate of percentage to complete.
- Review the unapproved change orders of significant contracts. Change orders often arise during the life of a contract and estimated revenue and cost should be adjusted for changed orders that have

been approved, both as to scope and price. However, when a change order has been approved as to scope but not as to price, carefully evaluate the specific facts and circumstances prior to including in estimated contract revenues. To the extent that change orders are disputed or are unapproved as to both scope and price, they should be evaluated as claims. Generally, if there is no verifiable evidence to support recognition of revenue on an unapproved change order or claim, it should not be recognized.

- Visit construction contract sites. Visiting contract sites can be a very useful audit procedure. Such a visit can provide an opportunity to view the progress of a contract. Consideration of a site visit might include significant contract sites in which the work is in the very early stages of the contract. Such a visit may identify the complexities of performing the contract. The site visit may also provide you with the opportunity to interview operational personnel and to gain a better understanding of the responsibility the company has for performing the contract. At the site visit, you should also speak with available subcontractors to get additional information about the progress of the contract. Furthermore, you should consider observing equipment and uninstalled inventory at the site.

- Meet with project managers. Project managers play an important role in controlling and reporting job site costs. They are also close to the facts and are likely to provide more prompt and accurate information than the accounting personnel. Meeting with the project managers will also assist you in developing expectations for use in performing analytical procedures.

- Identify and understand the significant assumptions and uncertainties. This procedure is fundamental to performing an effective audit of an entity using contract accounting.

- Test contract costs to make sure that costs are matched with appropriate contracts. In some instances companies may shift costs from unprofitable contracts to profitable ones in order to defer losses.

- Audit estimated costs to complete. The focus should be on the key factors and assumptions, such as those that (1) are significant to the estimate, (2) are sensitive to variation, (3) deviate from historical patterns, and (4) are subjective and susceptible to bias or misstatement. It is also useful to review revised or updated estimates of costs to complete and compare estimates with actual costs incurred after the balance sheet date.

- See that losses are recorded as incurred, regardless of whether the entity is using the percentage-of-completion or the completed-contract method of recognizing revenue.

- Analytically review contracts completed and in progress. A detailed analytical review of completed contracts and contracts in progress will provide meaningful information in helping to focus your efforts on potential problem areas.

- See that there are appropriate disclosures relating to SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. Entities using contract accounting should have more than generic disclosure about the use of significant estimates used in the preparation of financial statements.

- Review the aging of receivables on contracts. This procedure will provide evidence that the company is collecting funds on a timely basis.

.81 For additional guidance on auditing construction contracts, see Appendix B of this Alert.

Job Performance

.82 It is difficult for contractors to be profitable when projects are not completed on time. A number of contracts may even require the contractor to pay penalties if the job is not completed by a specified date. Jobs that are significantly behind their established timetable may require additional audit attention and procedures to determine that the original estimates of gross profit have not deteriorated (called "profit fade") and that the job has not incurred a loss (which should be recognized immediately).

.83 The tight labor market and the difficulty in scheduling subcontractors may result in your clients failing to complete jobs according to their pre-established timetables. For example, a key operational employee may leave the company before the job is completed, and finding a competent replacement may require some time. A number of contractors may also be forced to use less experienced personnel in certain positions, including management, and a lack of experience can result in the job taking longer to complete than originally anticipated. Consider making inquiries of management to determine how they have factored these circumstances into their estimation process.

.84 A disruption in the supply of key materials can also affect the ability of the contractor to complete the project on time. During the past year, many construction materials were in short supply. In addition, the events of recent years have shown that an unexpected or continuing surge in demand for materials can quickly outpace supply and create shortages and delays. The lead time required for specifically fabricated items may affect the contractor's ability to deliver the project on time. You may also perform procedures to identify price hikes in your client's vital materials. Determine whether those price hikes are the result of inadequate supply. If so, assess your client's vulnerability to delays caused by the inability to obtain these materials on a regular and timely basis. You can make inquiries to discover what steps the client has taken to mitigate these risks.

Estimating Costs to Complete

.85 A contractor's ability to estimate job costs is critical both from an operational and a financial reporting standpoint. Contractors that cannot accurately estimate job costs will be unable to manage their working capital and maintain consistent levels of profitability over an extended period of time. For most contractors, the estimate of costs to complete a project drive revenue recognition. For that reason, inaccurate or unsupported estimates of costs to complete jobs in progress can result in materially misstated financial statements.

.86 When auditing construction estimates, you should be familiar with SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), and SOP 94-6.

.87 Because of the economic uncertainty, estimates may be difficult for management to make and for auditors to evaluate. Pay close attention to the underlying assumptions used by management when auditing accounting estimates. Management is responsible for making estimates included in the financial statements, and those estimates may be based, in whole or in part, on subjective factors such as judgment based on experience about past as well as current events and about conditions expected to exist. You should be alert to the possibility of management's over reliance on economic information based on favorable conditions to predict future outcomes.

> **Help Desk—**Marshall and Swift is a consulting firm that provides comprehensive cost data for the construction industry. Included on its Web site is a cost estimator that allows the user to estimate the cost of a project based on current costs in the user's geographic area. You may find these estimates helpful in performing analytical procedures on client estimates. You can access the cost estimator at www.construction.com.

Accounting Systems and Controls

.88 Companies that expand quickly frequently outgrow the capabilities of their accounting systems and controls. Contractors with a large backlog and demand for their work tend to focus primarily on completing existing projects and bidding on new ones. Little thought may be given to whether the accounting system and related controls are capable of handling the new volume of business. In the current environment, this problem is exacerbated by the lack of sufficient staffing, the high turnover rate of employees, or both. You should not underestimate the importance of accounting systems and controls in the operation of your client's business.

.89 When clients rely on technology to manage and analyze information, audit strategies change. For example—

- Audit evidence that previously existed in paper form may only be available electronically. Accessing electronic audit evidence may require you to become proficient in the use of data extraction or other audit software tools.
- The design and operation of internal control in a computer environment differs greatly from a predominately manual environment.

.90 As more construction contractors expand their use of information technology, you may need to become aware of the unique audit issues in a highly computerized environment. In addition, you should identify the risks of material misstatement that can arise during the transition from a highly manual environment to a more computerized operating environment.

.91 For further information and guidance on auditing in this paperless environment, see SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

Affiliated Entities

.92 In the construction industry, contractors frequently participate in joint ventures or have a direct or indirect affiliation with other entities and, as a result, are frequently involved in related party transactions as that term is defined in FASB Statement No. 57, *Related Party Disclosures*. The prevalence of such arrangements in the industry can be attributed to factors such as legal liability, taxation, competition, ownership and operating arrangements, labor and labor union considerations, and regulatory requirements.

.93 You should review your contractor client's participations in joint ventures to evaluate whether investments in joint ventures are reported properly. You should also review joint venture agreements and document your client's participation.

.94 The audit considerations for a contractor's participation in a partnership are similar to those for participation in corporate joint ventures. They may differ primarily in relation to the contractor's unlimited liability as a general partner for partnership obligations.

.95 For any type of venture, you should consider the nature of the venture, the scope of its operations, and the extent of involvement of each participant.

Variable Interest Entities

.96 For a variety of legitimate business reasons, many construction companies create and utilize affiliated entities to facilitate, among other things, leasing arrangements and joint ventures. These separate entities are often created for asset protection, limitations on bonding capacity, and income and estate tax planning purposes. Typically, these entities have multiple owners and, very commonly, the entities are owned by related parties. In the past, reporting entities have not been consolidating these affiliated entities into the financial statements unless the entities were controlled through owning a majority of stock. Since many of the affiliated entities are not formed as voting interest entities, the accounting literature did not require entities to consolidate the affiliated entities. As a result, in many circumstances, commonly-controlled (and other related) entities were not reflected in one set of financial statements. Essentially, rather than reflecting assets, liabilities, revenues, and expenses within the financial statements, notes to financial statements included a disclosure of transactions between and among the related entities.

Principles for Consolidation

.97 In January 2003, the FASB issued FASB Interpretation No. 46, *Consolidation of Variable Interest Entities*. Many variable interest entities had commonly been referred to as special-purpose entities or off-balance sheet structures, but the guidance applies to a larger population of entities (referred to as VIE). In December 2003, the FASB issued a revision to FASB Interpretation No. 46 (with the same title) to clarify some of the provisions in the original document. The revised document (FASB Interpretation No. 46(R)) was issued in response to input received from constituents regarding certain issues arising in implementing the original FASB Interpretation No. 46. Examples of "connects" between and among reporting entities that could trigger the consolidation provisions within this literature include:

- Equity investments in the affiliated entity
- Guarantees of the value of assets or liabilities of the affiliated entity
- Contracts to purchase assets or equity from the affiliated entity
- Contracts for services with the affiliated entity
- Synthetic lease agreements involving the affiliated entity
- Transfers or sales of assets to the affiliated entity
- Structures designed to house assets in the affiliated entity
- Providing administrative services for the affiliated entity
- Having loans to or from the affiliated entity

.98 Essentially, FASB Interpretation No. 46(R) contains the requirement that we "look through" the form of transactions and arrangements and analyze the substance of the "connects" between and among affiliated entities. If there is an effort to structure a deal to circumvent the spirit of this accounting guidance, the odds are significant that a variable interest in an affiliated entity exists and the entity would be a VIE subject to consolidation. FASB Interpretation No. 46(R) became effective for private companies in calendar year 2005.

Importance in Construction

.99 FASB Interpretation No. 46(R) already has had, and will continue to have, a significant impact on accounting in the construction industry. Some of the more common arrangements that may be affected in implementing this literature include:

- Real estate developers frequently form separate legal entities to own property to be developed. The purpose of the separate legal entity is to isolate the developer's other assets from the project to be developed in the event the project is unsuccessful.
- The owners of closely-held construction contractors may establish separate legal entities to acquire equipment that is then leased to the contractor. Often, these type entities are created for estate-planning purposes.
- Contractors also may form joint ventures to develop a project. Joint venture partners could include another party with unique capabilities in some facet of the project. In some circumstances (for example, when the bid documents require that a prime contractor perform more than half of the work) two or more contractors may form a joint venture to become the prime contractor in order to meet the contractual requirements.

Overview of the Guidance in FASB Interpretation No. 46(R)

.100 Issued in 2003 as a result of the negative fall-out of the failure of Enron (and other entities), the guidance in FASB Interpretation No. 46(R) was intended to clarify and expand the requirements of existing consolidation guidance. However, unlike previous guidance, which based consolidation requirements on voting control, this Interpretation requires an analysis and consideration of consolidation in circumstances where "substantive control" is evidenced by attributes and factors other than direct equity ownership. FASB Interpretation No. 46(R) expands the definition of related parties, and requires the consolidation of certain insufficiently capitalized entities that are connected to the reporting company through certain contractual or other interests. The literature incorporates a "principles based" model that is utilized in determining when entities need to be consolidated.

.101 Fundamentally, the objectives associated with FASB Interpretation No. 46(R) are to explain how to identify VIEs and how to determine when a reporting entity should include the assets, liabilities, noncontrolling interests, and results of activities of VIEs in consolidated financial statements. In developing this guidance, the FASB noted that some entities have entered into arrangements using VIEs that appear to be designed to avoid reporting assets and liabilities for which they are responsible, to delay reporting losses that already have been incurred, or to report gains that are illusory.

.102 In general, a VIE is a corporation, partnership, trust, or any other legal structure used for business purposes where any of the following conditions exist:

- Equity investors do not have voting rights.
- Equity investors do not provide sufficient financial resources for the entity to support its activities.
- Equity investors have voting rights that are not proportionate to their economic interests, and the activities of the entity involve or are conducted on behalf of an investor with a disproportionately small voting interest.

.103 A VIE often holds financial assets, including loans or receivables, real estate, or other property. A VIE may be essentially passive or it may engage in research and development or other activities on behalf of another company.

What Is a VIE and Who Needs to Consolidate a VIE?

.104 Technically, a VIE is an entity subject to consolidation utilizing the accounting guidance in FASB Interpretation No. 46(R). An entity (VIE) must be consolidated into the financial statements of the primary beneficiary when, by design, either of the following conditions exist:

- The VIE does not have enough equity investment.
- Equity investors in the VIE lack any one of three characteristics of controlling financial interest.

.105 For a VIE not to be subject to consolidation by a primary beneficiary, the general rule is that at least 10 percent of the fair value of the assets of a VIE must be provided as equity by unrelated third parties. The equity provided by these unrelated third parties cannot be provided or financed by the primary beneficiary (that is, there must be a legitimate equity investment on the part of unrelated third parties). In some cases, there may be a need for greater than a 10 percent investment so that the VIE can be determined to have sufficient equity to permit financing of activities without additional support from other parties.

.106 Equity investors in voting interest entities have at least three characteristics associated with ownership. These investors participate in the decision-making processes of the entity (they can vote their shares), they expect to share in returns generated by the entity, and they are subject to losses should the entity incur those losses. For purposes of analyzing VIEs to determine whether these entities need to be consolidated, if the equity investors lack any of these three characteristics, the primary beneficiary of the VIE will need to consolidate the entity.

.107 The primary beneficiary (the entity that should consolidate the VIE) associated with a VIE is the entity that will receive a majority of expected returns from the VIE (if they are generated), absorb a majority of expected losses from the VIE (if they are incurred), or both. In those cases where "shared decision making" exists between and among investors (decision-making is not the primary criterion utilized in deciding which entity should consolidate), where one entity receives the majority of expected returns and another entity absorbs the majority of expected losses, the entity that absorbs the expected losses is considered to be the primary beneficiary (expected losses is the "tie breaker" in deciding which entity will consolidate). In other words, if things "go bad" for the VIE, which entity is subject to absorbing the losses? These losses could be in the form of losing invested amounts, fulfilling commitments to advance funds, or fulfilling commitments related to guarantees related to the VIE.

Related Parties

.108 For purposes of determining whether it is the primary beneficiary of a VIE (whether the VIE needs to be consolidated), an entity with a variable interest must treat variable interests in that same entity held by its related parties as its own interests. For purposes of this guidance, the term related parties includes those parties identified in FASB Statement No. 57, *Related Party Disclosures*, and certain other parties that are acting as de facto agents or de facto principals of the variable interest holder. The following are considered to be de facto agents of an entity:

- A party that cannot finance its operations without subordinated financial support from the entity.
- A party that received its interests as a contribution or a loan from the entity.
- An officer, employee, or member of the governing board of the entity.
- A party that has (1) an agreement that it cannot sell, transfer, or encumber its interests in the entity without the prior approval of the reporting entity, or (2) a close business relationship like the relationship between a professional service provider and one of its significant clients. The right of prior approval creates a de facto agency relationship only if that right could constrain the other party's ability to manage the economic risks or to realize the economic rewards from its interests in a VIE through the sale, transfer, or encumbrance of those interests.

.109 If two or more related parties, including de facto agents, hold variable interests in the same VIE, and the aggregate variable interest held by those parties would, if held by a single party, identify that party as the primary beneficiary, then the party within the related party group that is most closely associated with the VIE is the primary beneficiary. The determination of which party within the related party group is most closely associated with the VIE requires judgment and must be based on an analysis of all relevant facts and circumstances, including:

- The existence of a principal-agency relationship between or among parties within the related party group.
- The relationship and significance of the activities of the VIE to the various parties within the related party group.
- A party's exposure to the expected losses of the VIE.
- The design of the VIE.

Impact on Construction Companies

.110 When it has been determined that a company is the primary beneficiary of a VIE, the affiliated entity (the VIE) needs to be consolidated. Consolidation may improve or diminish financial results, and therefore impact credit analyses and a variety of other things. Consolidation not only will have an impact on total assets, liabilities, revenues, expenses, and net income, but also will potentially impact factors such as working capital, working capital ratios, debt-to-equity ratios, gross margins, and operating cash flows. In addition, presentation of consolidated financial statements may impact disclosures with respect to contingencies and litigation, as well as various other disclosures regarding lease commitments and commitments of cash flows for debt service. In certain circumstances, consolidation may force a rethinking of wording incorporated into buy-sell agreements between and among shareholders where those agreements set transaction values based upon book value (or otherwise use book value as a starting point for determining the value of a transaction).

.111 As mentioned previously, it is not uncommon for construction companies to have arrangements with affiliated entities for a variety of reasons. Since guarantees constitute one of the more frequently-encountered variable interests that "trigger" the applicability of FASB Interpretation No. 46(R), the following examples focus on guarantee issues.

.112 ***Example 1.*** A construction company has only one shareholder. The shareholder owns the real estate that is used by the construction company outside the company, and the real estate is housed in a single-member limited liability company (LLC) (where the single member is the owner of the construction company). The real estate LLC initially was "thinly" capitalized (5 percent equity contribution). The LLC borrowed funds associated with the acquisition of the real estate, and the lending institution required a guarantee from the construction company. The construction company leases the real estate from the LLC and the terms of the lease parallel the 15-year time period associated with the loan. Because the LLC did not have sufficient equity at risk (or perhaps in order to just secure a reduced interest rate associated with the borrowing), the lending institution required a guarantee of the loan. The construction company has a variable interest (in the form of the guarantee) related to the real estate LLC. In this circumstance, it is relatively clear that the construction company is the primary beneficiary of the LLC since there is no other entity available to absorb any expected losses attributed to the LLC. Therefore, the construction company should consolidate the LLC.

.113 ***Example 2.*** Assume the same facts as Example 1, except that the guarantee is provided by the owner of the construction company rather than through the construction company. As in the first example, because the LLC did not have sufficient equity at risk, the lending institution required a guarantee of the loan. The shareholder has a variable interest in the real estate LLC through the guarantee of the loan of the LLC. In applying the provisions of FASB Interpretation No. 46(R), related parties need to be "collapsed" with the primary reporting entity in an effort to determine the primary beneficiary, if any, associated with any affiliated entities. Since the shareholder is, by definition, a related party of the construction company, the LLC would be considered a VIE. Since the only user of the asset housed in the LLC is the construction company, the construction company would be considered the primary beneficiary and should consolidate the LLC (even though the guarantee was provided by the shareholder).

.114 ***Example 3.*** A construction company has only one shareholder. The shareholder owns the real estate that is used by the construction company outside the company, the real estate is housed in a single-member LLC, and the single member is the owner of the construction company. The real estate LLC initially was "heavily" capitalized (40 percent equity contribution). The construction company only utilizes 30 percent of the facility that is housed in the LLC; the other 70 percent of the facility is utilized by unrelated third parties. The LLC borrowed funds associated with the acquisition of the real estate, and the lending institution did not require a guarantee from either the shareholder or the primary reporting entity (the construction company). The construction company and the third-party lessees lease the real estate from the LLC and the terms of the lease parallel the 15-year time period associated with the loan. Since (1) the real estate LLC was designed to have sufficient equity at risk, (2) the entity was able to secure the loan from the financial institution without help from either the construction company or the shareholder, and (3) the LLC is not a single-lessee entity (the LLC is not economically dependent on the construction company) the LLC has demonstrated the ability to operate on a stand-alone basis without help from related parties. In this circumstance, there would be no requirement for the construction company to consolidate the LLC.

Other Construction Industry Examples

.115 ***Refundable Deposits.*** It is common practice in the homebuilding industry for a builder to place a nonrefundable deposit on a land parcel to secure the land for the company's future homebuilding operations.

The deposit, along with the provisions on the land option contract, may run afoul of the FASB Interpretation No. 46(R) rules because (1) the deposit may represent a significant portion of the land owner's total equity and (2) the option contract may contain provisions that restrict the land owner's activities. Either of these issues may cause the landowning entity to be considered a VIE. This is true even though the homebuilder's financial risk is strictly limited to the amount of the nonrefundable deposit. If it is determined that the landowning entity is a VIE and the homebuilder is the primary beneficiary, the homebuilder will be required to place the entire cost of the land and all debt of the landowning entity onto its balance sheet.

.116 ***Project Special Purpose Entities (SPEs).*** Often an investor in a project SPE receives its investment for nominal equity and in consideration for other services (for example, construction, input supply, output purchase or marketing, or operations and maintenance services). Note that such equity will not count for the "sufficient equity" purpose to the extent that it is received and/or financed by the transaction. In addition, in many projects interested parties will receive compensation that includes participations in profits (for example, a bonus payable to an operator for exceeding specified financial targets), which can cause the equity to have insufficient participation in profits. Similarly, in many projects risk of loss will be borne under project contracts by third parties with the possible result that equity will not sufficiently participate in losses for purposes of FASB Interpretation No. 46(R), making the project SPE a VIE.

.117 ***Primary Beneficiary Determination.*** In many construction projects, there is a party that performs day-to-day operations and maintenance under an operations and maintenance agreement. If the operations and maintenance contractor is the "decision maker" of the project VIE, fees payable to such contractor will count disproportionately in the determination of the primary beneficiary, making it more likely that the contractor will be the primary beneficiary. Similarly, many equipment vendors to project VIEs will provide performance and other guarantees with respect to the equipment. If periodic fees are payable to such a vendor they will also be weighted disproportionately in the primary beneficiary determination.

.118 ***Consolidation Issues.*** In addition to the complexities associated with evaluating the application of FASB Interpretation No. 46(R), the Interpretation requires the resolution of many practical issues as well. For example, should a contractor be required to consolidate an entity whose financial information has not been audited, it will be necessary to audit the entity being consolidated as well. Although such an audit may not be difficult and time-consuming for certain types of assets and liabilities, it may be extremely challenging for others. On the other hand, information that now requires consolidation may be readily available in audited form, but it might not suit the comparative analysis needs of those using the financial statements. This situation may require the use of supplemental disclosure of consolidating information.

.119 ***Conclusion.*** While FASB Interpretation No. 46(R) has had, and will continue to have, a significant impact on reporting entities throughout various industry sectors, reporting entities within the construction industry might feel the greatest impact in financial reporting. Because of the variety of arrangements that are commonly encountered within the construction industry, there exists a variety of "connects" between and among reporting entities and parties that are related to those entities and those "connects" easily could be considered variable interests in applying FASB Interpretation No. 46(R).

Recent Technical Practice Aids (TPAs) Related to FASB Interpretation No. 46(R)

.120 The AICPA staff recently issued the following technical questions and answers related to FASB Interpretation No. 46(R).

TPA 1400.29: Consolidated Versus Combined Financial Statements Under FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities

.121 TPA 1400.29 addresses the question of whether it would be appropriate to issue combined financial statements rather than consolidated financial statements. The TPA points out that Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements*, paragraph 22, permits combined financial statements in certain situations in which consolidated financial statements are not required. However, FASB Interpretation No. 46(R) states in paragraph 14 that "an enterprise shall consolidate a variable interest entity if that enterprise has a variable interest (or combination of variable interests) that will absorb a majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both." Furthermore, the starting point for the preparation of combined financial statements is two or more sets of financial statements that are prepared in accordance with generally accepted accounting principles (GAAP); in the case of a primary beneficiary of a VIE, financial statements prepared in accordance with GAAP would be consolidated financial statements. Therefore, combined financial statements would not be an appropriate alternative when consolidated financial statements are required by GAAP.

TPA 1400.30: Stand-Alone Financial Statements of a Variable Interest Entity

.122 TPA 1400.30 addresses the question of whether it is appropriate to present stand-alone financial statements of a VIE. The TPA points out that FASB Interpretation No. 46(R) does not specifically address this issue. However, subsidiary-only financial statements are appropriate under GAAP and, by extension, it may be appropriate to present stand-alone financial statements of a VIE.

TPA 1400.31: GAAP Departure for FIN 46(R)

.123 TPA 1400.31 addresses the implications for the auditor's report if the reporting entity does not consolidate a VIE. The TPA points out that AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), addresses departures from generally accepted accounting principles. AU section 508 states that when financial statements are materially affected by a departure from GAAP and the auditor has audited the statements in accordance with generally accepted auditing standards (GAAS), he or she should express a qualified or an adverse opinion. In deciding whether the effects of a departure are sufficiently material to require either a qualified or adverse opinion, the auditor should use qualitative as well as quantitative judgments. The significance of an item to a particular entity, the pervasiveness of the misstatement (such as whether it affects the amounts and presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole are all factors to be considered in making a judgment regarding materiality.

.124 If you conclude that a qualified opinion is appropriate, you should disclose the GAAP departure in a separate explanatory paragraph(s) preceding the opinion paragraph of the report. Furthermore, the opinion paragraph of the report should include the appropriate qualifying language and a reference to the explanatory paragraph(s). The explanatory paragraph(s) should disclose the principal effects of the departure on financial position, results of operations, and cash flows, if practicable. If the effects are not reasonably determinable, the report should so state. If such disclosures are made in a note to the financial statements, the explanatory paragraph(s) may be shortened by referring to it.

TPA 1500.06: Application of FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities, *to Income Tax Basis Financial Statements*

.125 TPA 1500.06 addresses the question of whether the consolidation or disclosure provisions of FASB Interpretation No. 46(R) apply to financial statements prepared under the income tax basis of accounting. The TPA points out that, for income tax basis financial statements, consolidation is based on the IRC. Therefore, the consolidation requirements of FASB Interpretation No. 46(R) would not apply to financial statements prepared under the income tax basis of accounting. However, SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623.09–.10), as amended, and Interpretation No. 14, "Evaluating the Adequacy of Disclosure and Presentation in Financial Statements Prepared in Conformity With an Other Comprehensive Basis of Accounting (OCBOA)" (AICPA, *Professional Standards*, vol. 1, AU sec. 9623.90–.95), discuss disclosures in financial statements prepared using an other comprehensive basis of accounting (OCBOA). The literature states that if OCBOA financial statements contain elements, accounts, or items for which GAAP would require disclosure, the statements should either provide the relevant disclosure that would be required for those items in a GAAP presentation or provide information that communicates the substance of that disclosure.

.126 The TPA points out that a VIE that is not consolidated under the income tax basis of accounting is analogous to a 60-percent-owned subsidiary that would be consolidated under GAAP but is not consolidated under the income tax basis of accounting because the threshold for consolidation under the IRC is 80-percent ownership. Therefore, the primary beneficiary of the VIE should perform the same analysis in determining which disclosures are appropriate as would the parent company of the 60-percent-owned subsidiary. Examples of matters that might require disclosure are related-party transactions, guarantees, and commitments.

TPA 1400.32: Parent-Only Financial Statements and Relationship to GAAP

.127 TPA 1400.32 addresses the question of whether there are any circumstances in which an entity may prepare parent company-only financial statements without preparing related consolidated financial statements and state that the parent company-only financial statements are in accordance with GAAP. The TPA states that paragraph 1 of ARB No. 51 notes the presumption in GAAP that consolidated financial statements are more meaningful than parent company-only financial statements. Paragraph 3 of ARB No. 51 states that all majority-owned subsidiaries shall be consolidated, with few exceptions. Paragraph 24 of ARB No. 51 adds that parent company financial statements may be needed in addition to consolidated financial statements, but it does not suggest that parent company financial statements may be prepared in place of consolidated financial statements. Therefore, parent company-only financial statements would not be appropriate when consolidated financial statements are required by GAAP.

Using the Work of a Specialist

.128 It may be necessary to use a specialist (such as a construction engineer) to perform or assist in job site visits or other audit procedures. The specialist may help you gain assurance as to percent complete, identify problems on the job, and identify possible uninstalled materials or items to be classified as inventory. In addition, the specialist will generally be able to "talk shop" with your client's job site personnel.

.129 Engaging a specialist for gaining an understanding of internal controls, tests of controls, substantive tests, and analytical procedures requires awareness of guidelines available in the authoritative literature. According to paragraph .06 of AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), specialized assistance is advisable for auditors who:

> . . . may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain competent evidential matter.

.130 The use of an outside specialist[1] does not absolve the auditor from a certain level of understanding about the construction contractor. Audit planning comes into play because of the lead time necessary to contract for a specialist's services and the time required for the auditor to obtain the minimum knowledge necessary to supervise the specialist. According to paragraph .10 of AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1):

> If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a

[1] Note that AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), does not apply to specialists who are employed by the firm and are part of the engagement team. AU section 336 indicates that the auditor uses the work of the specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions. The specialist does not, however, perform the substantive tests or analytical procedures.

professional is planned, the auditor should have sufficient computer-related knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified procedures will meet the auditor's objectives; and to evaluate the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The auditor's responsibilities with respect to using such a professional are equivalent to those for other assistants.

.131 The use of a specialist is an excellent way to learn the construction contractor's business and can be helpful from initial planning through site visits and fieldwork.

Important Information for Review Engagements

.132 The majority of CPA practitioners serving construction contractors perform a higher number of reviews than audits. Readers interested in guidance for review engagements should refer to the AICPA *Compilation and Review Alert—2006/07* (product no. 022307kk). However, a brief overview of Statement on Standards for Accounting and Review Services (SSARS) No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (AICPA, *Professional Standards*, vol. 2, AR secs. 100 and 200) is provided in this Alert due to its impact on review engagements.

SSARS No. 12, Omnibus Statement on Standards for Accounting and Review Services—2005

.133 In July 2005, the AICPA Accounting and Review Services Committee (ARSC) issued SSARS No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005*. SSARS No. 12 includes revisions to existing SSARS that were accumulated over a period of time and addresses the following issues.

Consideration of Fraud and Illegal Acts in a Compilation or Review Engagement

.134 Guidance in SSARS No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100.05), stated that the accountant should, among other things, establish an understanding with the entity that provides that the accountant will inform the appropriate level of management of any fraud or illegal acts that come to his or her attention, unless they are clearly inconsequential. SSARS No. 12 revised SSARS No. 1 by requiring the accountant to:

1. Establish an understanding with the client, preferably in writing, that the accountant will inform the appropriate level of management of any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.
2. Report, to the appropriate level of management, any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.

Obtaining an Updating Representation Letter

.135 SSARS do not provide guidance on when an accountant should obtain an updating representation letter from management. SSARS No. 12 revised SSARS No. 1 to provide such guidance, by adding a paragraph in the section titled "Management Representations" and an illustrative updating management representation letter.

.136 The new guidance states that there are circumstances in which you should consider obtaining an updating representation letter from management. For example, if you obtain a management representation letter after completion of inquiry and analytical review procedures but do not issue your review report for a significant period of time thereafter, or if a material subsequent event occurs after the completion of inquiry and analytical review procedures, including obtaining the original management representation letter, but before the issuance of the report on the reviewed financial statements. In addition, if a predecessor accountant is requested by a former client to reissue his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with reviewed financial statements of a subsequent period, the predecessor accountant should obtain an updating representation letter from the management of the former client.

.137 The updating management representation letter should state (1) whether any information has come to management's attention that would cause management to believe that any of the previous representations should be modified and (2) whether any events have occurred subsequent to the balance-sheet date of the latest financial statements reported on by the accountant that would require adjustment to or disclosure in those financial statements.

.138 The following is an example of an updating management representation letter:

> [*Date*]
>
> To [*Accountant*]
>
> In connection with your review(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods of review*] for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements for them to be in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [*date of previous representation letter*]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.
>
> To the best of our knowledge and belief, no events have occurred subsequent to [*date of latest balance sheet reported on by the accountant or date of previous representation letter*] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.
>
> ______________________________
>
> [*Name of Owner or Chief Executive Officer and Title*]
>
> ______________________________
>
> [*Name of Chief Financial Officer and Title, where applicable*]

Restricting the Use of a Compilation or Review Report

.139 SSARS No. 12 revised SSARS No. 1 to provide guidance to accountants on restricting the use of reports issued pursuant to SSARS. The term *general use* applies to compilation and review reports that are not restricted to specified parties, while the term *restricted use* applies to reports intended only for one or more specified third parties. The need for restriction on the use of a report may result from a number of circumstances, including, but not limited to, the purpose of the report and the potential for the report to be misunderstood when taken out of the context in which it was intended to be used.

.140 You should restrict the use of a report when the subject matter of your report or the presentation being reported on is based on measurement or disclosure criteria contained in contractual agreements or regulatory provisions that are not in conformity with GAAP or an OCBOA.

.141 You should also consider informing your client that restricted-use reports are not intended for distribution to nonspecified parties, regardless of whether they are included in a document containing a separate general-use report. The new guidance does not preclude you, in connection with establishing the terms of the engagement, from reaching an understanding with the client that the intended use of the report will be restricted, and from obtaining the client's agreement that the client and the specified parties will not distribute the report to parties other than those identified in the report. However, you are not responsible for controlling a client's distribution of restricted-use reports. Accordingly, a restricted-use report should alert readers to the restriction on the use of the report by indicating that the report is not intended to be and should not be used by anyone other than the specified parties.

.142 An accountant's report that is restricted as to use should contain a separate paragraph at the end of the report as follows:

> This report is intended solely for the information and use of [*the specified parties*] and is not intended to be and should not be used by anyone other than these specified parties.

Restated Prior-Period Financial Statements

.143 Guidance in the section titled "Changed Prior-Period Financial Statements" in SSARS No. 2, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 200.25–.26), required that either the predecessor or successor accountant report on changed prior-period financial statements, as restated. The successor accountant was precluded from reporting on the restatement adjustment only. SSARS No. 12 revised SSARS No. 2 to allow the successor accountant to report on the restatement adjustment while indicating that a predecessor accountant reported on the financial statements of the prior period before restatement.

.144 The following is an example of a successor accountant's compilation report when the predecessor accountant's report is not presented and the successor accountant compiles the restatement adjustment(s):

> I (we) have compiled the accompanying balance sheet of XYZ Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. I (we) also compiled the adjustment(s) [described in Note X, if applicable] that were applied to restate the 20X1 financial statements. The financial statements of XYZ Company as of December 31, 20X1, before the adjustments [described in Note X, if applicable][2] that were applied to restate the 20X1 financial statements, were compiled by other accountants whose report dated March 31, 20X2, did not express an opinion or any other form of assurance on those financial statements.
>
> [*Same second paragraph as the standard report*]

.145 The following is an example of a successor accountant's review report when the predecessor accountant's report is not presented and the successor accountant has reviewed the restatement adjustment(s):[3]

> I (we) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company. The financial statements of XYZ Company as of December 31, 20X1 before the

---

[2] In the situation where management elects to omit substantially all disclosures, the accountant should follow the guidance in Statement on Standards for Accounting and Review Services (SSARS) No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100.16–.18), as amended.

[3] The accountant should follow the performance requirements in SSARS No. 1 (AICPA, *Professional Standards*, vol. 2, AR sec. 100.26–.38), as amended.

adjustment(s) described in Note X that was (were) applied to restate the 20X1 financial statements were reviewed by other accountants whose report dated March 31, 20X2, stated that they were not aware of any material modifications that should be made to those financial statements in order for them to be in conformity with generally accepted accounting principles.

[*Same second and third paragraphs as the standard report*]

I (we) also reviewed the adjustment(s) as described in Note X that was (were) applied to restate the 20X1 financial statements. Based on my (our) review, nothing came to my (our) attention to indicate that the adjustment(s) is (are) not appropriate and properly applied.

.146 SSARS No. 12 was effective for compilations and reviews of financial statements for periods ending after December 15, 2005.

Recent Auditing and Attestation Pronouncements and Related Guidance

.147 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. The Public Company Accounting Oversight Board (PCAOB) sets auditing and attestation standards for audits of public companies. See the PCAOB Web site at www.pcaobus.org for information about its activities. You may also look for announcements of newly issued standards in *The CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org.

SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (December 2005) (Not applicable to audits conducted in accordance with PCAOB standards)	These standards established two categories of professional requirements that are identified by specific terms. The words *must* or *is required* are used to indicate an unconditional requirement. The word *should* is used to indicate a presumptively mandatory requirement. (The words *may*, *might*, *could*, and *should consider* represent actions that auditors have a professional obligation to consider.) The provisions of SAS No. 102 and SSAE No. 13 were effective upon issuance. It is the ASB's intention to make conforming changes to AICPA literature over the next several years to remove any language that would imply a professional requirement where none exists.
SAS No. 103, *Audit Documentation* (December 2005) (Not applicable to audits conducted in accordance with PCAOB standards)	SAS No. 103 (AICPA, *Professional Standards*, vol. 1, AU sec. 339) supersedes SAS No. 96, *Audit Documentation*, and amends SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.

(continued)

SAS Nos. 104–111, *Risk Assessment Standards*	See "Spotlight on the AICPA Risk Assessment Standards" section, below.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (May 2006) (Not applicable to audits conducted in accordance with PCAOB standards)	The new standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325A), as amended. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.
PCAOB Conforming Amendment to AT 101.04*f*, *Attest Engagements* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	*Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting from the Adoption of Auditing Standard No. 4* This standard states that Auditing Standard No. 4 must be used for reporting on whether a material weakness continues to exist for any purpose other than a company's internal use.

Spotlight on the AICPA Risk Assessment Standards

.148 In March 2006, the AICPA's Auditing Standards Board (ASB) issued eight SASs that provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. The following table lists the eight SASs and their effect on existing standards.

Statement on Auditing Standards	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*	Amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU section 230)
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150)

SAS No. 106, *Audit Evidence*	Supersedes SAS No. 31, *Evidential Matter* (AU section 326A)
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	Supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312A)
SAS No. 108, *Planning and Supervision*	Supersedes SAS No. 1, *Appointment of the Independent Auditor* AU section 310; and supersedes SAS No. 22, *Planning and Supervision* (AU section 311A)
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	Together with SAS No. 110, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	Supersedes SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* (AU section 313); and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling	Amends SAS No. 39, *Audit Sampling* (AU section 350)

Key Provisions of the New Standards

.149 The SASs emphasize the link between understanding the entity, assessing risks, and the design of further audit procedures. The SASs introduce the concept of risk assessment procedures, which are deemed necessary to provide a basis for assessing the risk of material misstatement. Risk assessment procedures, along with further audit procedures which include tests of controls and substantive tests, provide the audit evidence to support the auditor's opinion of the financial statements. According to the SASs, the auditor should perform risk assessment procedures to gather information and gain an understanding of the entity and its environment, including its internal controls. These procedures include inquiries, analytical procedures, and inspection and observation. Assessed risks and the basis for those assessments should be documented; therefore, auditors may no longer default to maximum control risk for an entity's risk assessment without documenting the basis for that assessment. The SASs also require auditors to consider and document how the risk assessment at the financial statement level affects individual financial statement assertions, so that auditors may tailor the nature, timing, and extent of their audit procedures to be responsive to their risk assessment. It is anticipated that generic audit programs will not be appropriate for all audit engagements, as risks vary between entities.

Effective Date and Implementation

.150 The SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006; earlier application is permitted. In most cases, implementation of the SASs will result in an overall increased work effort by the audit team, particularly in the year of implementation. It also is anticipated that to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. Readers can obtain the SASs and the related AICPA Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) at www.cpa2biz.com.

New Companion Audit Guide

.151 In December 2006, the AICPA will publish an Audit Guide titled *Assessing and Responding to Audit Risk in a Financial Statement Audit*. This Guide will help practitioners understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The Guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Statement on Auditing Standards No. 103

.152 The ASB has issued SAS No. 103, *Audit Documentation.* SAS No. 103 (AICPA, *Professional Standards*, vol. 1, AU sec. 339) supersedes SAS No. 96, *Audit Documentation*, and amends SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530). SAS No. 103 is effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. One key provision of this standard is the amendment of paragraphs .01 and .05 of AU section 530. AU section 530.01 now requires that "the auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion" and the footnote to this paragraph describes sufficient appropriate audit evidence as "evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them." Application of the rules may require revising the process used by your firm at the end of fieldwork to include a field review of audit workpapers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

Staff Accounting Bulletin No. 108

.153 On September 13, 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.154 There have been two common approaches used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.155 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.156 If, in correcting a prior year error in the current year, the amount is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf. It is possible that guidance similar to that found in SAB No. 108 will be developed for nonissuers in the future as a result of FASB projects that are currently underway.

Recent AICPA Independence and Ethics Pronouncements

.157 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this Alert to be aware of independence and ethics matters that will affect their practice.

.158 The AICPA general *Audit Risk Alert—2006/07* and other AICPA industry-specific Alerts contain summaries of recent pronouncements not included here. To obtain copies of AICPA standards and Guides, contact AICPA Service Center Operations at (888) 777-7077 or go online at www.cpa2biz.com.

Recent Accounting Pronouncements and Related Guidance

.159 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *The CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 155	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Statement No. 156	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*
FASB Statement No. 157	*Fair Value Measurements*
FASB Statement No. 158	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Interpretation No. 48	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.
FASB Staff Positions (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FASB Staff Positions (FSPs). Some of the recently issued FSPs address issues relating to FASB Statements No. 143 and No. 150, among others, and FASB Interpretation No. 46(R).
AICPA Technical Practice Aids TPA section 2130.09–.37 (Nonauthoritative)	Various topics on the application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*, to debt securities

AICPA Technical Practice Aids TPA section 6910.16–.20 (Nonauthoritative)	"Nonregistered Investment Partnerships"

On the Horizon

.160 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the construction industry or that may result in very significant changes. Read the AICPA general *Audit Risk Alert—2006/07* for a more complete list of ongoing auditing and accounting projects. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.161 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaobus.org or www.pcaob.com
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed above.

Auditing Pipeline

Proposed Statement on Standards for Attestation Engagements, Reporting on an Entity's Internal Control Over Financial Reporting *(AT Section 501)*

.162 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE would establish standards and provide guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). In May 2006, the PCAOB announced plans to amend certain aspects of PCAOB Auditing Standard

No. 2 to improve its implementation. Because the forthcoming changes to the PCAOB Standard will be relevant to the revision of AT section 501, the ASB has decided to defer the issuance of final revised AT section 501 until the PCAOB issues its amendments and the ASB has time to consider them.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.163 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles.* The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69, AICPA, *Professional Standards*, vol. 1, AU sec. 411) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www.fasb.org.

Accounting Pipeline

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.164 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

Proposed FASB Statement, Accounting for Transfers of Financial Assets

.165 The exposure draft *Accounting for Transfers of Financial Assets* (Transfers Project) is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets,* and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed Statement seeks to (1) clearly specify the permitted activities of a qualifying special-purpose entity (QSPE), (2) address practice issues related to which arrangements should be considered and how they should be considered in the legal isolation analysis, (3) eliminate the prohibition on a QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor, (4) revise the methodology used to initially measure at fair value interests related to transferred financial assets held by a transferor, and (5) clarify guidance related to when rollovers of beneficial interests are permitted within a QSPE. At its July 26, 2006 meeting, the FASB decided to combine the Servicer Discretion Project (which addressed issues relating to the waiver of due-on-sale, collateral substitution, and foreclosed asset activities) into the Transfers Project. The FASB expects to issue a final Statement, which would amend FASB Statement No. 140, in the second quarter of 2007. See the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115

.166 The fair value option project has two phases. This proposal represents Phase 1, which addresses the fair value option for certain financial assets and financial liabilities. Phase 2 will consider permitting the fair value option for certain nonfinancial assets and nonfinancial liabilities and some of the financial assets and financial liabilities excluded from the scope of Phase 1.

.167 The proposed FASB Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur. The proposed FASB Statement has specific financial presentation requirements to display fair values and those values that are measured using other measurement techniques. The proposed FASB Statement would amend FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, to require that securities reported at fair value in accordance with FASB Statement No. 115 satisfy the specific financial statement presentation requirements. The planned effective date is for years beginning after December 15, 2006. Visit the FASB Web site at www.fasb.org for additional information.

Proposed FASB Statements, **Business Combinations** *and* **Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries**

.168 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. That all acquisitions of businesses be measured at the fair value of the business acquired.
2. That substantially all the assets acquired and liabilities assumed of the acquired business are recognized and measured at their fair values at the acquisition date.
3. That entities following U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.169 Exposure drafts on business combinations—purchase method procedures and noncontrolling interests—were issued on June 30, 2005. The target effective date for the two proposed Statements is for fiscal years beginning on or after December 15, 2006.

FASB Project on Derivative Disclosures

.170 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, allowing a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft on derivative disclosures is expected in the fourth quarter of 2006. The objective is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. Additionally, the project is expected to reconsider the existing disclosure requirements under FASB Statement No. 133 for relevance and applicability. It is also expected that derivative loan commitments will fall under the scope of this project and could have a significant impact on the financial statements of entities with derivative loan commitments.

Proposed FASB EITFs and FASB Staff Positions

.171 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.172 ***Proposed FASB Staff Positions (FSPs).*** A number of proposed FSPs are in progress addressing issues related to financial institutions. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

AICPA Resource Central

.173 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your construction engagements.

- Audit and Accounting Guide *Construction Contractors* (product no. 012586kk). The Audit and Accounting Guide, as of May 1, 2006, summarizes applicable practices and delivers "how to" advice for handling almost every type of financial statement. It describes relevant matters, conditions, and procedures unique to the construction industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems. This Audit and Accounting Guide is available as a CD-ROM or online subscription.
- Checklist Supplement and Illustrative Financial Statements *Construction Contractors* (product no. 008926kk). Developed by AICPA's Accounting and Auditing Publications staff as a supplement to *Checklists and Illustrative Financial Statements for Corporations* (product no. 008936kk), this practice aid is invaluable to anyone who prepares financial statements and reports for construction contractors.
- *Accounting Trends & Techniques, Sixtieth Edition* (product no. 009898kk). This is the must-have resource for any CPA who frequently creates or uses financial reports. Filled with current reporting techniques and methods used by the nation's top organizations, this 650-page AICPA bestseller will provide the guidance you need to improve your accounting preparation and procedures.
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk). Authoritative guidance on cash- and tax-basis financial statements is rather vague and leaves a great deal to professional judgment. Section One of this publication provides nonauthoritative, practical guidance on preparing and reporting on cash- and tax-basis financial statements. Section Two includes example financial statements, disclosures, and other engagement practice aids. The appendix provides an example checklist to be used for cash- and tax-basis financial statements.
- Audit Guide *Auditing Derivative Instruments, Hedging Activities and Investments in Securities* (product no. 012526kk). The *Auditing Derivative Instruments, Hedging Activities and Investments in Securities* guide has been updated with conforming changes as of May 1, 2006. In it you'll find an overview of derivatives and securities in addition to case studies to help you better understand auditing derivative instruments.
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012516kk). This publication, as of May 1, 2006, assists auditors in fulfilling their professional responsibilities with regard to auditing assertions about revenue.
- Audit Guide *Analytical Procedures* (product no. 012556kk). Receive guidance on the effective use of analytical procedures with an emphasis on analytical procedures as substantive tests.

Audit and Accounting Manual

.174 The *AICPA Audit and Accounting Manual* (product no. 005136kk) is developed exclusively for small- and medium-size CPA practices. This unique manual explains and demonstrates useful techniques and procedures for conducting compilation, review, and audit engagements—from planning to internal control to accountants' reports.

AICPA reSOURCE: Online Accounting and Auditing Literature

.175 AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that's available too! Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, Technical Practice Aids, Audit and Accounting Guides (more than 20!), Audit Risk Alerts (more than 15!), and *Accounting Trends & Techniques.* To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Educational Courses

.176 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the construction industry. Those courses include:

- *Construction Contractors: Accounting, Auditing and Tax* (product no. 736430kk). Master the fundamentals of the construction industry with this highly effective course. An outstanding value, it provides a thorough industry overview and includes AICPA authoritative publications. Content is tailored to the needs of both practitioners and industry financial professionals.
- *Construction Contractors Advanced Issues* (product no. 731992kk). Delve beyond the basics of many issues the construction industry brings to the accounting profession. Get hands-on advice on the accounting, audit, and tax issues that make construction industry clients high-risk. Address difficult issues such as look-back calculations, measuring progress of construction contracts, and overhead allocations. Enhance your skills today to reduce the risk of your next construction engagement.
- *Real Estate Accounting and Auditing* (product no. 730606kk). This course provides an in-depth study of the unique requirements that apply at each stage of the real estate life cycle. It gives practical, how-to-do-it coverage of accounting considerations related to the development, ownership, and operation of real estate assets.

.177 Accountants in the construction industry, as well as in other industries, may also find the following courses helpful:

- *FASB Review for Industry* (2006–2007 edition) (product no. 730563kk). Comprehensive coverage of recent FASB, AcSEC, IASB, and EITF pronouncements is provided in this course geared to the specific interests of the CPA in corporate management.
- *Accounting Update: A Review of Recent Activities* (2006 edition) (product no. 732762kk). This course keeps you current and shows you how to apply the most recent financial accounting and reporting standards. Highlights include FASB Statement No. 154 on accounting changes and error corrections, fair value concepts and measurements, and the revised FASB Statement No. 123 on share-based payment.
- *AICPA's Annual Accounting and Auditing Update Workshop* (2006 edition) (product no. 736182kk, text; also available in video and DVD formats with a manual). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Accounting for Income Taxes—Applying SFAS No. 109/FIN 48: A Whole New Ballgame!* (product no. 732792kk). No other area in accounting is as far reaching, and requires knowledge of a vast number of topics in financial and tax accounting, as accounting for deferred taxes. This course addresses the application of this complex standard to many common differences between financial accounting and tax compliance. You will gain a sound knowledge of the theory of deferred taxes and how this theory can be applied to practical situations. Many practical examples are included to illustrate the theory, and the information is presented so you will be able to apply this theory to any situation you may encounter.
- *The AICPA's Guide to Business Consolidations, Goodwill and Other Consolidation Issues* (product no. 735134kk). Learn how FASB Statements No. 141 and No. 142 have changed the rules for business combinations and goodwill accounting. Develop standards for applying purchase accounting and how to allocate the acquired entity now that it's the only game in town under FASB Statement No.

141. Identify variable interest entities' impact under FASB Interpretation No. 46(R). Learn how FASB Statement No. 142 deals with goodwill from initial recognition to the annual impairment review requirements.

.178 For a listing of additional courses available, please download the *Fall/Winter 2006 AICPA CPE Catalog* at www.cpa2biz.com/CPE/default.htm.

Online CPE

.179 AICPA CPExpress (formerly InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to construction company auditors are:

- *Construction Contractors: Internal Controls and Substantive Auditing Procedures*
- *Construction Contractors: Sureties and Applying the Audit Risk Model*
- *Revenue Recognition: Income Statement Presentation and Disclosures*

.180 To register or learn more, visit www.cpa2biz.com.

Webcasts

.181 Stay plugged in to what's happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in on the discussion. If you can't make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.182 The CFO Roundtable Webcast Series—brought to you each calendar quarter—covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting, to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.183 The SEC Quarterly Update Webcast Series—brought to you each calendar quarter—showcases the profession's leading experts on what's "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and CorpFin activities, these hard-hitting sessions will keep you "plugged in" to what's important. A must for both preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Satisfaction Center

.184 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Technical Hotline and Ethics Hotline

.185 Do you have a complex technical question about GAAP, OCBOA, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

.186 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Conferences

.187 Among the many interesting conferences the AICPA offers, there is one that might interest you. Held late each fall, the AICPA National Construction Industry Conference presents a comprehensive program revealing latest trends and developments in the construction industry. The conference offers a national perspective and addresses the newest trends in conducting business, among other topics.

.188 For additional information, contact CPA2Biz at its Web site, www.cpa2biz.com.

Web Sites[4]

AICPA Online and CPA2Biz

.189 Here is a unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online, at aicpa.org, informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, cpa2biz.com offers you all the latest AICPA products, including more than 15 Audit Risk Alerts, more than 20 Audit and Accounting Guides, the professional standards, and CPE courses.

.190 *Construction Contractors Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ccole@aicpa.org or write to:

Appendix B

Audit Considerations of Various Types of Contracts—Revenue Issues[1]

Fixed Price

This type of contract can be considered the riskiest for both the contractor and the auditor. This is generally the type of contract that one has in mind when considering the need for adequate auditing procedures. As the riskiest contract type in an audit, the auditor must employ all of his or her available audit tools to verify the total contract amount, the collectibility and likelihood of contract changes, and the status of the contract as of the balance sheet date. Auditing procedures related to revenue for this type of contract can consist of (1) contract confirmation; (2) testing of the contractor's business functions over estimating, billing, collection, project management, and generally all controls that influence the contractor's ability to manage estimates; (3) use of testing the contractor's subsequent performance; (4) measuring the contract job gain or fade trends by comparing the contractor's ability to estimate by using original estimated contract revenues and costs and comparing these figures to period end amounts and final contract amounts for a period of several years; and (5) using other analytical procedures.

Cost Type

This is a lower risk type of contract. The audit procedures should be focused on the contract provisions concerning the definition of contract costs and the associated revenue entitlements of the contractor. If the contract clearly defines allowable costs, overhead calculations and allocations, agreed-upon profit, and payment terms, the auditor's job is easier and can then be focused on the realization of collection and the creditworthiness of the owner. There are many variations of the cost-type contracts that present various degrees of concern and additional audit requirements for the auditor.

Time and Material

These types of contracts are also lower risk revenue issues for the auditor as long as the contractor has identified all of its costs, including its overhead costs, and defined its needed gross profit. The audit focus in this type of contract comes back to the contractor's internal controls and the ability to fully identify and capture its costs—direct, indirect, and overhead. Often, time and material contracts cannot be confirmed due to the contract's length of time. Other auditing procedures can be employed, such as internal control systems testing and/or subsequent billings and collections of the outstanding time and material costs as of the period end.

Unit Price

Unit price contracts are often small variables of fixed price contracts. Under a unit price contract, the contractor knows the amounts that will be due as each unit price is performed. The auditor's procedures in this area should consist of (1) verifying the work performed with outside parties through the use of confirmations, including the terms of the contract; (2) verifying the terms of the contract concerning the provisions for unit prices, their amounts, and contract billing terms by examining the contract; and (3) determining the revenue balance available to be performed and billed under the contract. Other procedures to be applied can be similar to the procedures applied to fixed price contracts.

Service Contract

This category of contract can include a blend of other contract types, such as time and material. The auditor should separate out these other contract type elements and perform the appropriate testing under those

[1] These audit considerations were developed by Eric P. Wallace, CPA, and are used by permission.

categories. A service contract can consist of the provision of labor only or labor and material. The terms of the contract should be reviewed for the risks that the contract presents to the contractor and to the auditor. For example, does the contract cover maintenance only with breakdowns covered at fixed time and material rates and costs? The risk of loss on such a contract would be minimal. On the other hand, does the service contract provide for the provision of a guaranteed service, such as uninterrupted power (which may be necessary for the function of a hospital)? This type of contract would require more extensive auditing procedures that would involve auditing the contractor's ability to produce reliable estimates similar to a fixed price contract. If a service contract has only provisions for maintenance and the minimal supply of parts, the revenue auditing procedures would consist of (1) scheduling out the earned and unearned parts of the contract and recording the unearned part as deferred revenue; (2) examining the contractor's system that tracks the performance of the required or contractual provision of periodic services, if any, to see that they have been performed (this could result in a liability that would need to be measured); (3) determining whether the contractor has the ability to job cost each service contract in order to determine whether the service contracts require a loss reserve; (4) testing the service revenues and costs analytically to see if the gross profits earned are typical compared to industry averages; and (5) testing the contractor's prior abilities to estimate with reasonable certainty. Service contracts that have provisions that require estimations should be tested in a manner similar to a fixed price contract.

Construction Management

Construction management (CM) contracts can also be a blend of the various types of contracts described and defined above. The particular attributes or details of the contract should be examined to see if these other attributes exist. For example, the contract may call for the CM to act as agent under a fee arrangement, but permit it to perform certain parts of the construction if it deems that it can perform the work for 5 percent less than the lowest bidder. The construction part will need to be tested and audited as a construction contractor. The audit risk that a CM contract presents will depend on the CM contract terms. If a CM contract calls for a fee based upon a percentage of costs, audit risk is lower. On the other hand, if the CM fee is a fixed price, the auditor will need to examine its revenue recognition methods and test the progress to date. An example of this would be where a CM estimates that it will take 1,000 man-hours to earn the CM fee of $500,000 over an 18-month period. The auditor can examine the hours performed to date and the estimate of the hours to complete. In addition, the calculation of hours to date to total estimated hours can be compared to the physical estimate of percentage of completion for reasonableness. Testing of the CM internal controls and prior abilities to estimate with reasonable certainty can also be used to gather audit evidence.

Design Build

This is the newest type of contract and is continuing to be an increasingly popular vehicle for contract performance. The audit risk involved in this type of contract focuses on the detail of the contract terms. Is the contractor going to be reimbursed for its costs under a cost-type arrangement? Is the contract broken out into various pieces where the contractor bid separately on the design and construction work in different phases? The answers to these questions and other facts and circumstances should lead the auditor to make judgment calls about the appropriateness of the use of audit procedures described under the contract types listed above. If a design build contract outcome is uncertain, the auditor should consider the possibility that the contract should be accounted for under alternative revenue recognition methods such as zero profit or the completed contract method until measurements are reliable and more certain.

The Above Type Contracts With Incentive Provisions

All the contract types can have provisions for incentives. The auditing of contracts that include incentive provisions should consist of but not be limited to the following procedures: (1) an examination of the contract terms to determine the conditions for incentive achievement, (2) a test to see if the conditions for achievement have been met, (3) confirmation of incentive earnings, (4) subsequent billing and collection of incentive revenues, (5) analysis of whether incentive provisions can be earned incrementally or are under "all or none" terms, and/or (6) a determination whether the incentive should be considered a gain contingency properly accounted for under Financial Accounting Standards Board Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*.

Construction Contractors Accounting Developments—2005/06

NOTICE TO READERS
CONSTRUCTION CONTRACTORS ACCOUNTING DEVELOPMENTS—2005/06

This Financial Reporting Alert is intended to provide accountants in the construction industry with an overview of recent economic, industry, technical, and professional developments that may affect their financial reporting.

This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Written by J. Russell Madray, CPA

Edited by Yelena Mishkevich, CPA
Technical Manager
Accounting and Auditing Publications

How This Alert Can Help You

.01 The knowledge that this Financial Reporting Alert delivers can assist you in achieving a more robust understanding of the business environment in which your company operates. Also, this Alert delivers information about current accounting and regulatory developments. This Alert describes trends and issues facing most contractors in many of the construction markets in the country.

.02 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 95 is referred to as AU section 150 of the AICPA *Professional Standards*.

Industry and Economic Developments

Effects of Hurricane Katrina

.03 The physical and psychological damage caused by Hurricane Katrina is likely to reverberate across the global economy in ways that will curb growth well into 2006, economists say. Most economists predict, however, that Hurricane Katrina will reduce, not derail, U.S. economic growth.

.04 A spike in already-high energy costs in the United States and around the world tops the list of risks, especially since oil prices are unlikely to return to the levels of early 2004 when they were 50 percent lower than they are today. Hurricane Katrina shut down large portions of oil and gas production in the Gulf of Mexico at a time when worldwide energy output was already stretched thin. While the storm's impact was most acute in the United States, it also sent fuel costs higher around the globe, squeezing consumers in Europe and Asia and hurting everyone from truckers to fishermen to airlines. But most analysts agree that the sharp increase in gasoline prices since the storm was a "temporary disruption." Oil industry officials say that several refineries and pipelines will soon be back in operation. Initially, 25 percent of U.S. crude oil production and a large portion of refining capacity were knocked out by the storm. Much of the pressure on oil supplies has been relieved by the release of 60 million barrels from emergency supplies. The full extent of the damage to oil and natural gas infrastructure in the Gulf of Mexico is not yet known, but it is expected to be some time before output is back to normal. The same goes for the facilities that refine crude oil into gasoline, heating oil, and jet fuel.

.05 The storm also wiped away up to half a million jobs in New Orleans and other Gulf Coast areas. And its tab is almost certain to top $100 billion, with only about a quarter of that covered by insurance, according to an assessment by Risk Management Solutions of Newark, Calif.

.06 The federal government has pledged billions of dollars of rebuilding funds, but it will take months for the basic recovery efforts to be completed before the money for reconstruction starts flowing.

.07 In Katrina's aftermath, forecasts for U.S. economic growth in the fourth quarter have dropped from 3.5 percent on an annualized basis to 2.5 percent. And that is probably what gross domestic product will average for all of 2006, economists said.

.08 Some local economies will no doubt benefit from the fact that New Orleans will be out of commission for months. Tourists who might have visited the Big Easy will go elsewhere, corporate conferences will be relocated, and cities throughout the South will witness a tightening of their rental housing markets as evacuees from New Orleans reestablish their lives elsewhere.

.09 But when winter arrives and the higher cost of home heating strikes the Northeast and Midwest, consumer spending, particularly among lower income families, is expected to take a noticeable hit. Michael P. Niemira, chief economist at the International Council of Shopping Centers, said the U.S. retail sector will face its toughest Christmas since the September 11, 2001, terrorist attacks.

.10 While the humanitarian situation is horrific, the economic blow may not be as bad as first feared. Treasury Secretary John Snow and Federal Reserve Chairman Alan Greenspan have stated that it would not have a significant long-term effect on the U.S. economy, although growth will be slowed for a short period. Mr. Snow described the impact of the hurricane as mind-boggling and acknowledged that the U.S. economy was facing a challenging time. But its inherent strength, he said, meant that economic growth would only be hit for three to four months.

.11 The Gulf Coast was hit again just three and a half weeks after Hurricane Katrina, by Hurricane Rita, a category 3 storm. Although Hurricane Rita caused far less destruction than Katrina, it still caused between $2.5 billion to $6 billion in insured damage.

.12 The rebuilding of the Gulf Coast after Hurricanes Katrina and Rita will likely have a positive effect on the construction industry. The opportunities for new work will be immense, and while it has positive implications for contractors, it will also present many challenges as well. As a result of the expected increase in construction, contractors may face the following risks:

- Accepting work beyond their abilities to manage
- Accepting work that could put dangerous pressures on their financial capacity (for example, not having sufficient working capital)
- Expanding their labor force with people who are unfamiliar with the entity's practices and methodologies.

General Industry Trends and Conditions

.13 Construction activity through July showed widespread improvement compared to the first seven months of 2004, but the devastation wrought by Hurricanes Katrina and Rita will have varied impacts on construction markets for the rest of 2005 and into 2006.

.14 Construction outlays in July were reported at a seasonally adjusted annual rate of $1.099 trillion, unchanged from June, which was revised up from a previously reported $1.093 trillion. June spending was restated as a 0.6 percent decline from a 0.3 percent fall previously reported.

.15 The gains were well distributed. Private residential construction climbed 12 percent year-to-date, private nonresidential was up 5.3 percent, and public construction was 5.8 percent higher. Within the private residential market, multifamily construction jumped 20 percent, nearly twice the growth rate for single-family and improvements. Manufacturing construction continued to lead the private nonresidential category with a 27 percent year-to-date advance, followed by "multiretail" (general merchandise stores, shopping centers, and shopping malls), 23 percent; communications, 12 percent; and lodging, 9.4 percent. The leading public categories, educational and highways and streets, were up 5.9 and 7.2 percent, respectively.

.16 However, these figures overstate "real" growth because they don't adjust for a large run-up that has occurred in the cost of cement, steel, copper, gypsum, and petroleum-based inputs. Unfortunately, Hurricanes Katrina and Rita will push many of these costs much higher. Contractors use a lot of diesel fuel for off-road equipment, their own trucks, and the multitude of deliveries of materials and equipment. Petroleum or natural gas is a key ingredient in asphalt, roofing materials, plastic pipe, and insulation. And energy costs are built into the price of mining, milling, making, molding, and transporting metals, concrete, and most other construction materials.

.17 Cement was already in short supply in 32 states and the District of Columbia, and the disruption to ocean, barge, and rail transport from Hurricanes Katrina and Rita, and the loss of power to cement plants in the storm's path, will cut further into cement supplies. At the same time, the urgent need to stabilize and rebuild roads, other infrastructure, and buildings will increase demand for cement and other materials.

Construction Put in Place

.18 One of the most widely used measures of construction activity is *construction put in place*, which is tracked monthly by the Bureau of Statistics at the U.S. Department of Commerce. The *value of construction put in place* (value-in-place) is a measure of the value of construction installed or erected at the site during a given period. For an individual project, this includes:

- New buildings and structures.
- Additions, alterations, major replacements, and so on, to existing buildings and structures.
- Installed mechanical and electrical equipment.
- Installed industrial equipment, such as boilers and blast furnaces.
- Site preparation and outside construction, such as streets, sidewalks, parking lots, utility connections, and so on.
- Cost of labor and materials (including owner supplied).
- Cost of construction equipment rental.
- Profit and overhead costs.
- Cost of architectural and engineering (A&E) work.
- Any miscellaneous costs of the project that are on the owner's books.

.19 The total value-in-place for a given period is the sum of the value of work done on all projects under way during this period, regardless of when work on each individual project was started or when payment was made to the contractors. For some categories, estimates are derived by distributing the total construction cost of the project by means of historic construction progress patterns.

.20 Exhibit 1, "New Construction Put in Place," presents details of construction put in place for various market segments. (Note that the amounts are in billions of dollars and represent seasonally adjusted annual rates.) To add some perspective, in January 1992, at the start of the current construction boom, the total new construction put in place was $452 billion, as compared with the estimated 2005 amount of $1,099 billion—a gain of more than 143 percent during the period.

Exhibit 1—New Construction Put in Place

(Billions of Dollars—Seasonally Adjusted Annual Rate, in Current Dollars)

	July 2005	*July 2004*
Private construction	856.1	758.3
Public construction	243.2	238.9
Total construction	**1,099.3**	**997.2**
Residential building	615.8	537.5
Nonresidential building		
Office	33.9	31.4
Power	24.8	24.0
Commercial	65.4	61.6
Lodging	11.7	11.6
Other nonresidential	104.5	92.2
Total nonresidential	240.3	220.8
Total private construction	**856.1**	**758.3**
Highways and streets	63.9	65.7
Infrastructure	35.1	28.9
Educational	63.7	63.8
Other public buildings	23.8	24.3
Other public construction	56.7	56.2
Total public construction	**243.2**	**238.9**

.21 The U.S. Census Bureau of the Department of Commerce announced that construction spending during July 2005 was estimated at a seasonally adjusted annual rate of $1,099.3 billion, nearly the same as the revised June estimate of $1,099.7 billion. The July figure is 6.0 percent above the July 2004 estimate of $1,037.5 billion. During the first seven months of this year, construction spending amounted to $617.9 billion, 9.3 percent above the $565.4 billion for the same period in 2004.

.22 Spending on private construction was at a seasonally adjusted annual rate of $856.2 billion, 0.2 percent above the revised June estimate of $854.5 billion. Residential construction was at a seasonally adjusted annual rate of $615.8 billion in July, 0.2 percent above the revised June estimate of $614.6 billion. Nonresidential construction was at a seasonally adjusted annual rate of $240.4 billion in July, 0.2 percent above the revised June estimate of $239.9 billion.

.23 In July, the estimated seasonally adjusted annual rate of public construction spending was $243.2 billion, 0.8 percent below the revised June estimate of $245.2 billion. Educational construction was at a seasonally adjusted annual rate of $63.7 billion, 0.6 percent below the revised June estimate of $64.1 billion. Highway construction was at a seasonally adjusted annual rate of $63.9 billion, 2.4 percent below the revised June estimate of $65.5 billion.

Help Desk—You can access current statistics of construction put in place and other construction industry information at www.census.gov.

Private Construction

Residential Building

.24 The residential building segment of the construction industry includes new single- and multifamily housing as well as residential repairs and improvements. Conditions with the most impact on the demand for residential construction include the following:

- *Housing affordability.* Housing affordability is the extent to which potential buyers have the means to purchase a home. Affordability can be measured in several ways by considering average home prices and income levels. For example, some analysts create an "affordability index" by comparing median home prices to household income levels. As income levels get closer to housing prices, the average home becomes affordable to more local residents.

- *Interest rates.* Most homes are financed, and interest rates therefore have a tremendous effect on the affordability of housing. As interest rates rise, the cost of home financing increases; as they fall, the cost of financing decreases. However, interest rate changes do not have an immediate impact on home-buying markets—usually rates have to be in effect for several quarters to reverse home-buying trends.

- *Land availability/pricing.* As one of the major costs of residential building, land availability and pricing have a major impact on the affordability of housing. With land suitable for residential building becoming scarce in certain parts of the country, housing prices will be affected.

- *Demographics.* Shifts in demographics can have a significant impact on housing demand. For example, the aging of the U.S. population has increased demand for low-maintenance and multifamily housing. A large number of baby boomers are now entering their peak earning years, which is expected to affect the affordability and demand for single-family homes.

- *Market velocity.* According to industry sources, more than half of all home improvements occur within 18 months after a new owner moves in, or within 12 months before the home is sold. Thus, during times when new and used home markets are active, residential remodeling and improvement activity also increases.

.25 As one of the main drivers of construction's recent 10-year expansion, home building continues to lead the industry's growth. However, there are signs that years of strong growth in the national housing market may finally be leveling off. Overall, new housing starts in July, which include apartment buildings and condominiums, were flat. The new housing figures, released by the Commerce Department, bolster the view of economists who have predicted a gradual slowdown in housing starts and an easing of price increases as mortgage rates tick up with the prospect of passing the 6 percent mark by next year.

.26 Although sales have certainly been sizzling this year, putting the country on track for a fifth straight year of record purchases of new and existing homes, homes in some areas are staying on the market longer before they sell and the Mortgage Bankers Association reports that its index of demand for home mortgages now stands 11 percent below a June peak.

.27 The issue of how much of a slowdown will occur and whether home prices will fall or just not rise at double-digit rates will depend to large extent on the course of interest rates in coming months.

.28 Ironically, the devastation from Hurricanes Katrina and Rita could turn out to help the housing industry, mainly through falling interest rates. Investors pushed rates lower after the storms in anticipation that the hurricanes and the resulting surge in energy prices would act as a drag on economic growth and could persuade the Federal Reserve to pause in its 14-month campaign to push rates higher. As a result, rates on 30-year mortgages dipped to 5.71 percent, down from a high this year of 6.04 percent set in late March.

.29 David Seiders, chief economist for the National Association of Home Builders, said rebuilding from the hurricanes' devastation probably will not have much impact on the overall housing market since residential building permits for all of Louisiana and Mississippi last year amounted to just 1.8 percent of the national total.

.30 But analysts are forecasting that housing sales will begin to decline from record levels by the end of this year and into 2006. The slowing sales pace is expected to end the super-sized price gains many parts of the country have experienced.

Nonresidential Building

.31 Nonresidential building in July grew 3 percent to an annual rate of $172.1 billion. Much of the upward push came from health care facilities, which soared 42 percent. July included the start of five large projects valued at $100 million or higher, including a $300 million hospital in Cleveland, Ohio; a $148 million hospital complex in San Francisco, Calif.; a $140 million hospital expansion and seismic upgrade in Seattle, Wash.; a $135 million hospital addition in Jacksonville, Fla.; and a $106 million hospital in Granville, N.C. Showing large percentage gains compared to weak contracting in June were transportation terminals, up 81 percent; and manufacturing plants, up 66 percent. Growth was also registered in July by warehouses, up 17 percent; and stores, up 3 percent.

.32 Nonresidential building in July showed reduced contracting for hotels, down 37 percent; and offices, down 15 percent. For both structure types, the declines were relative to a June that was the strongest month so far in 2005. On the institutional side, July showed a slower pace for churches, down 1 percent; public buildings (courthouses and detention facilities), down 2 percent; school construction, down 6 percent; and amusement-related projects, down 18 percent.

Office Market

.33 The U.S. office market took a big step toward recovery in the second quarter, with absorption exceeding 30 million square feet and the vacancy rate falling below 15 percent. Healthy demand for office space was widespread, with both downtown and suburban markets enjoying a robust quarter. Office construction picked up slightly but is still at relatively low levels. Rents posted another modest increase, continuing a trend for the past several quarters.

.34 Office construction took a surprising jump in the second quarter, with 12.6 million square feet completed—the most since the fourth quarter of 2003, when 16.1 million square feet were completed. This was 18.9 percent more than the 10.6 million square feet completed in the first quarter or the 11.6 million square feet completed in the second quarter of 2004. Office construction has been subdued since the middle of 2002, with completions barely averaging 10 million square feet per quarter.

.35 The outlook for the office market remains positive for the third quarter and indeed for the balance of 2005. The most important feature of the first half of the year was the sustained growth in employment. The first quarter saw job creation total 546,000, followed by a further 542,000 new jobs in the second quarter.

.36 Specific to the office market, "office-using employment" increased by 154,000 in the first quarter and 153,000 in the second quarter. Second half projections show continued job creation, which can only be good news for office markets. On the supply side, new office construction is expected to pick up in coming quarters as under-construction activity jumped from 40.3 million square feet at the end of the first quarter to 58.4 million square feet at the end of the second quarter.

Industrial Market

.37 The industrial real estate market experienced an extremely robust second quarter this year, with absorption totaling 69.4 million square feet—far surpassing the 40.9 million square feet recorded during the first quarter of 2005 and 42.2 million square feet during the second quarter of 2004—according to a report by Colliers International, the global real estate services firm.

.38 All the drivers of the U.S. industrial market are going strong—with a subsequent greater need for warehouse space, according to Colliers International. Transportation and distribution companies, manufacturers, retailers, the housing market, and consumer spending all continue to post positive results. There are no indications the industrial market will wane anytime soon.

.39 New construction during the second quarter totaled 30.5 million square feet, exceeding both the 23.2 million square feet recorded during the same quarter last year, and the 27.0 million square feet recorded during the first quarter of 2005. Almost half of the nation's new warehouse construction occurred in five markets: Chicago (2.9 million square feet), Atlanta (2.9 million square feet), Central New Jersey (2.9 million square feet), Seattle (2.7 million square feet), and Inland Empire of California (2.5 million square feet).

Retail and Other Commercial Markets

.40 The favorable conditions witnessed over the past several years have continued into 2005 with the economy on the upswing, steady job creation, disposable income on the rise, and most importantly, consumers who continue to spend. This has led retailers to increase sales and open new stores in a wide variety of centers. Occupancy levels have increased and rents have moved higher. Community rents, neighborhood rents, and power center rents have all increased during the year by 9 percent, 4 percent, and 16 percent, respectively. Going forward, rising interest rates have some concerned, but leasing conditions generally look favorable for some time to come. However, some analysts are predicting that the U.S. retail sector will face its toughest Christmas since the September 11, 2001 terrorist attacks due to the effects of Hurricanes Katrina and Rita.

Hospitality Market

.41 Hotel construction spending, which has been very erratic, is up 28 percent since the bottom of the hotel building cycle two years ago. Although hotel construction spending fell 10 percent in November and December of 2004 and January of 2005, most analysts expect a cumulative 66 percent increase by the end of 2006. That will bring the 2004-to-2006 gain to 80 percent compared to 125 percent during 1995-to-1997 at the same period in the previous building cycle.

.42 The expected building boom is being fueled both by an unusually favorable real estate financial environment and by large increases in demand for hotel rooms. Last year, according to Smith Travel Research, hotel operators added only 1 percent more rooms while they raised the occupancy rate 4 percent and boosted room rates 4 percent. Hotel profits improved sharply, although only to the bottom of the normal range. Together with unusually cheap credit costs, this prompted investors to bid up the price of hotel properties enough that building a new hotel is now a better investment than buying an existing hotel in many markets.

.43 Most real estate investors now believe that hotels offer higher returns than other types of commercial buildings. It is now much easier for hotel developers to get construction loans because real estate investment trusts (REITs) are flush with cash that they need to invest and developers have learned to add condos to hotel projects to use the condo down payments for some of their financing.

.44 Portsmouth, N.H.-based Lodging Econometrics recently released its Lodging Development Forecast that reports the hotel "pipeline"—which consists of hotels in early planning stages and those under construction or scheduled to start in the next 12 months—increased for the fifth straight quarter in the first quarter of 2005, to 2,388. The hotel pipeline has been growing since it bottomed out in the fourth quarter of 2003, and the forecast looks bright for the future of hotel construction. The report predicts that an estimated 322,177 hotel rooms will be built between the first quarter of 2005 and the first quarter of 2006.

Help Desk—The demand for construction can vary significantly among different geographic regions. One of the most comprehensive analyses of commercial real estate demands and construction activity is published by the Society of Industrial and Office Realtors (SIOR). Annually, SIOR publishes *Comparative Statistics of Industrial and Office Real Estate Markets*, which provides detailed real estate and construction statistics on all the country's larger cities. You can purchase and download this publication directly from the publications section of the SIOR Web site at www.sior.com.

Public Construction

.45 According to the Associated General Contractors of America (AGC), public construction is heading for a modest revival, with gains in highway, school, and most other categories. Highway construction will rise modestly. Congress approved a 2 percent increase in federal-aid funds for fiscal 2005 (ending September 30), with small increases likely in future years. State fuel and vehicle tax receipts, which typically fund the state share of highway spending, also are growing slowly.

.46 Educational spending will benefit from the housing boom. Single-family houses appreciated 13 percent nationally in the year ending July-September 2004, according to the Office of Federal Housing Enterprise Oversight. Where property-tax assessments keep pace, school districts that depend on property taxes can afford more construction. School construction is likely to shift more toward high schools and away from elementary schools.

.47 Census estimates show that the elementary-school population in 36 states has fallen since 2000 as the "baby boom echo" cohort is becoming older.

.48 State higher-education construction, as well as other categories, will benefit from a pickup in state general-fund revenues. Income and sales tax receipts climbed 7.5 percent in fiscal 2004 (covering July 2003 to June 2004 for most states) after much slower growth in 2001 and 2003 and a sharp decline in 2002, according to a February 2005 tally by the Nelson A. Rockefeller Institute of Government. That will enable legislatures to reverse some of the construction cuts and freezes imposed in the last several years. However, delays in the design, permit, hearing, and contract phases that follow legislative approval mean the public pickup in construction may not gather steam until 2006. Meanwhile, federal assistance and direct spending for water, wastewater, and building construction are likely to slow by 2006 due to tight budgets for domestic discretionary programs.

.49 Putting the pieces together yields a total for construction put in place in 2005 that will be close to the 2004 level, with growth resuming in all three segments by 2006. Meanwhile, more of the dollar total will represent new projects rather than merely higher materials prices.

.50 The important news affecting public works, of course, is the August enactment of the new multiyear federal transportation bill, after a delay of close to two years. The new bill includes a 38 percent funding increase compared to the previous legislation, plus its passage removes the uncertainty over long-term financing that had hampered state departments of transportation.

Surety Industry Trends

.51 The surety industry is critical to the well-being of the construction industry. Nearly half of all work performed by contractors is bonded, so any change in the surety market will have a significant effect on the construction industry.

.52 Surety bonding is a rigorous process in which surety companies prequalify contractors and then guarantee that the contractors will complete their projects and pay first-tier subcontractors, laborers, and materials suppliers (those hired directly by the general contractors). Construction projects can involve three types of surety bonds:

- Bid bonds provide financial assurance that the bid has been submitted in good faith and that the contractor intends to enter into the contract at the bid price.
- Performance bonds protect the owner from financial loss should the contractor fail to perform the contract in accordance with its terms and conditions.
- Payment bonds guarantee that the contractor will pay subcontractors, laborers, and suppliers associated with the project. (Government property is not subject to mechanic's liens, meaning that laborers, suppliers, and subcontractors would be without redress if the contractor defaulted, and there were no payment bond.) Section 270 of the Miller Act, enacted in 1935, governs performance and payment bonds on federal construction projects.

.53 Additionally, each of the 50 states, the District of Columbia, Puerto Rico, and almost all local jurisdictions have enacted legislation requiring surety bonds on public works projects. Generally referred to as "Little Miller Acts," those laws often set minimum thresholds for which state agencies and local governments may require surety bonds. Sometimes, no threshold is set, and the local entities themselves determine what minimum project value necessitates surety bonding.

.54 While surety credit is similar to obtaining bank credit, it still is a form of insurance. Surety bonds and insurance both are risk transfer mechanisms that are regulated by state insurance commissioners, and both provide protection against financial loss.

.55 Unlike other lines of insurance, however, surety actually is a form of credit. Whereas bankers either lend money or extend a line of credit, a surety grants a "pledge guarantee." The surety does not lend the contractor money but instead allows the surety's financial resources to be used to back the commitment of the contractor; if the contractor defaults, the surety pays for completion of the contractor's work.

.56 The basic function of surety is prequalification. That process involves a surety underwriter taking an in-depth look at the contractor's entire business operation and thoroughly analyzing the contractor's financial strength and capacity to perform before credit is extended. The underwriter will concentrate on the three "C's"—character, capacity, capital—when making bond credit decisions.

.57 To issue a surety bond, the surety must be confident that the contractor has good character, experience matching the requirements of its contracts, financial strength, an excellent credit history, an established banking relationship and line of credit, and ownership of (or the ability to obtain) the equipment to carry out the contract.

.58 The surety industry has weathered the turbulent times of the late 1990s and the first years of the 21st century, and has come through intact and on course for a potential recovery. The large losses faced by the industry in the past few years served as a wakeup call to the industry. By returning to the fundamentals, namely solid underwriting practices, many experts believe that the industry is heading toward recovery. However, some of the sureties may experience some additional short-term losses as the result of loosening of underwriting standards demonstrated by some sureties in the 1990s.

.59 Even though there have been a number of high-profile mergers in the surety market, there have been instances of surety company failures. In most cases, capacity remains sufficient to support the nation's construction needs. However, contractors in different market sizes may see changes in the near future and those contractors considered "marginal" may be dropped by their surety.

- Capacity for small and emerging contractors remains available, though they will be subject to the same underwriting standards as their larger peers. Small and start-up contractors who have difficulty meeting today's underwriting standards may opt to explore the U.S. Small Business Administration's Surety Bond Guarantee Program.

- The midmarket contractor is least likely to be affected by capacity issues. This segment is the primary target of the industry, and qualified contractors will continue to receive strong support. However, in some cases, contractors are being required to provide audited financial statements instead of reviewed financial statements, and some sureties are requiring quarterly reporting. The same back-to-basics underwriting standards apply: quality financials, capital retention, and personal and corporate indemnity are all required.

- Contractors in the $250 million-and-over market may need to address changes in the industry. Surety companies are less likely to assume the risks of massive, multiyear projects on their own. Co-sureties, segmented bonding, and joint ventures may be more common, due to the fact that approximately 80 percent of the reinsurers from the 1990s are gone because of the massive surety losses incurred in the past few years. The tightened reinsurance market is a factor in the need for more creative surety solutions on mega-projects.

.60 There are also alternatives to surety, generally referred to as alternate products. These insurance products were originally designed to protect a general contractor from subcontractor default. Unlike a surety bond, an alternate product has a deductible and guarantees payment in the event of default, but not performance. Although this is a relatively new concept, some think it may be a way to circumvent some of the limitations of the surety industry.

.61 With further consolidation in the marketplace, continued tight terms and conditions for surety credit will continue. With the 10 largest premium volume surety companies now controlling more than 65 percent of the market, it is likely that premium rates will increase. Less negotiation will be available on terms such as bonding subcontractors, acceptable contract specifications, full indemnity and other underwriting requirements. There will also likely be a rise in the frequency of credit schemes using creative, unlicensed surety entities and alternative products.

.62 In some parts of the country, sureties are requiring clients to upgrade from reviews to audits. Other sureties are willing to accept reviewed financial statements when accompanied by a review of the client's internal controls. In some cases, sureties are also requiring quarterly financial statements, in addition to year-end statements. In addition, some smaller contractors are being required to strengthen their financial position with personal guarantees and additional indemnity.

.63 Contractors can expect sureties to look at their work programs more closely, which can lead to changes in the amount of capacity sureties are willing to offer. Although many surety companies have the capacity to support an increased work program, they may not have the same appetite for risk as they have had in the past. Nevertheless, a contractor with a solid reputation and sound financials should have no problem obtaining the surety credit it needs. Overall, the surety industry is attempting to return to a healthy state and will continue to respond to the challenges in the construction industry.

.64 At this critical juncture in the surety industry's life cycle, the following steps may be helpful to ensure that your company's surety relationship remains free from any dramatic exposure to the surety industry's changes. You may need to:

- Meet regularly with your surety underwriters and bond agents and foster a partnering relationship.

- Know your surety—its results, reinsurance, capacity limitations, credit, and AM Best (a worldwide insurance-rating and information agency) ratings.

- Plan for more lead time for larger or unique projects and major decisions.

- Provide high-quality and timely financial information.

- Understand the working capital and equity requirements for the bonding program.
- Understand the adjustments that the surety makes to the financial statements to arrive at bonding capacity.
- Involve your surety in major financial decisions.
- Understand the working capital and equity requirements for your bonding program (single and aggregate limit).
- Use a professional CPA and attorney who specialize in construction contractors and relationships with sureties.
- Use a professional surety broker who specializes in surety, and have a "backup" surety available in case the current surety is unable to provide proper coverage.

Construction Cost Trends

.65 Cleaning up after Hurricanes Katrina and Rita could clean out construction suppliers over the next year. Builders working far away from the Gulf Coast are likely to experience shortages, lagging deliveries, and higher prices, experts say.

.66 The fallout comes at a time of already-high demand for construction materials and equipment. Regional cement shortages are hurting contractors in many states. Availability of larger equipment, such as earthmoving machines, is tight. Nominal prices for highway diesel, averaging $2.59 per gallon, are at an all-time high. Each week brings a new record in diesel prices, according to the U.S. Department of Energy. And Hurricanes Katrina and Rita will push many of these costs much higher, according to Ken Simonson, chief economist for the Associated General Contractors of America.

.67 Heavy equipment dealers in the Gulf Coast area expect to see a run-up for construction machines, such as crawler dozers, excavators, and wheel loaders. The region's need for equipment over the next 12 months is going to be twice the normal demand, experts say.

.68 Machinery analysts have forecasted per-unit sales of construction equipment to increase by a hearty 8 percent to 10 percent this year. Hurricanes Katrina and Rita may push up next year's modest forecast of 2 percent to 5 percent.

.69 The crunch could tighten global supplies of construction machinery, whose demand is expected to rise to $106 billion by 2009 from last year's $81.4 billion, according to Freedonia Group Inc., a market research firm in Cleveland. U.S. machinery exports climbed a staggering 44 percent during this year's first half, according to the Milwaukee-based Association of Equipment Manufacturers.

.70 Ready-mix concrete prices are up 16 percent since they began to rise quickly late in 2003. Prices rose 0.9 percent in March and April but declined slightly in May and June. The price increases to date have been driven by sharply higher imports of cement at premium prices, strained capacity at U.S. cement plants, and bigger margins for ready-mix suppliers. Also, higher diesel and natural gas prices have contributed to cost increases at cement plants and ready-mix fleets.

.71 Cement was already in short supply in 32 states and the District of Columbia before the hurricanes and the disruption to ocean, barge, and rail transport from the storm, as well as the loss of power to cement plants in the storm's path, will cut further into cement supplies. At the same time, the urgent need to stabilize and rebuild roads, other infrastructure, and buildings will increase demand for cement and other materials.

.72 The construction industry has been urging the Commerce Department and the Southern Tier Cement Committee to reach immediate agreement on a way to allow Mexican cement into the Gulf states without the punitive 55 percent duty now in place.

.73 Hurricanes Katrina and Rita's impact on industry is also stretching far beyond oil refineries. The storms knocked out lumber mills as well. The Gulf Coast region is fertile ground for yellow pine, which is sold as plywood, oriented strand board, and pressure-treated lumber. Prices for yellow pine and related products have already gone up 10 percent. Hurricane Katrina boosted lumber prices overnight, and the storms will continue to increase construction costs in other, subtler ways—through fuel surcharges on deliveries, for instance. Experts say prices are likely to go even higher because of increased demand for lumber when the work of rebuilding Hurricane Katrina damage begins in earnest.

.74 On the brighter side, the buyers' market for labor is expected to continue into next year. June's 5 percent unemployment rate overstates the tightness in the labor market because labor-force growth has been unusually low recently. The missing workers are partly due to measurement error and partly due to the usual withdrawal from the labor force when jobs are hard to find. Monthly job gains are expected to rise slightly over the next year from the 180,000 during the spring, without any further decline in the unemployment rate. Rather, the unemployment rate is more likely to rise in the next few months. A stable unemployment rate requires about 60,000 people to reenter the labor force each month. Experience in similar economic conditions in the late 1990s suggests that this is likely.

> **Help Desk—**The *Engineering News Record* publishes detailed quarterly cost studies that track average prices for a wide variety of materials and labor classifications in major cities across the country. You can access summaries of the studies at the magazine's Web site at www.enr.com.

Doing Business With FEMA During Disaster Recovery

.75 Hurricanes Katrina and Rita caused massive destruction and damage that will require a multitude of services and products during the recovery process. The services of independent contractors are usually acquired through sealed bidding or negotiations; however, the Federal Emergency Management Agency (FEMA) accepts capability statements and informational packages. The following information should be included:

- Company name
- Business address
- Contact information
- Type of service or product offered
- Type of equipment
- Number of workers being provided
- Cost for service or product
- Whether the company is volunteering services

.76 FEMA also procures goods and services through the General Service Administration's Federal Supply Schedule (information available at www.gsa.gov/regions.htm) and identifies qualified small businesses through the U.S. Small Business Administration's Pro-net. Companies can register with Pro-Net on the SBA's Web site (www.sba.gov).

.77 In addition, state and local governments make purchases for disaster recovery services and products. Contractors should check the emergency management or other appropriate Web sites of the affected states for information.

> **Help Desk**—For more information about doing business with FEMA, visit www.fema.gov/ofm or call the FEMA Acquisitions Office at (202) 646-4006.

Legislative Issues and Developments

Transportation Act

.78 In July, Congress passed the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), a measure that will provide more than $286 billion in funding for new highways, roads, airports, bridges, transit facilities, and other transportation-related projects.

.79 SAFETEA-LU reauthorizes federal aid for highways, mass transit, safety, and research programs through fiscal year 2009. The bill provides more than $50 billion for transit programs and $6 billion for transportation safety and contains a $15 billion highway bond plan.

.80 The legislation comes nearly two years after SAFETEA-LU's predecessor, TEA-21, expired in 2003. In the interim, Congress approved 12 extensions to ensure that states continued to receive funding.

Energy Bill

.81 Congress also voted in July to pass comprehensive energy legislation.

.82 The legislation touches nearly every sector of the energy industry, expanding oil and gas production and creating the first inventory of U.S. offshore oil and gas resources. Additionally, the bill provides tax incentives for renewable energy, nuclear power, and coal production; requires utilities to follow nationwide electric reliability rules; and provides incentives for energy efficiency and conservation measures.

.83 However, the final bill did not address a number of controversial items, including a provision that would have shielded manufacturers of the controversial gasoline additive methyl tertiary butyl ether (MTBE) from most product lawsuits associated with groundwater contamination, and the issue of drilling in the Arctic National Wildlife Refuge (ANWR) in Alaska.

.84 Republican leaders intend to pursue the ANWR proposal through the budget "reconciliation" process. Unlike most bills in the Senate, the budget measure cannot be filibustered and only needs a simple majority for passage.

Youth Employment Laws

.85 In July, the U.S. Department of Labor (DOL) unveiled a new national outreach campaign to increase awareness of the construction industry's youth employment laws.

.86 The Youth Working in Construction Campaign is part of the agency's ongoing YouthRules! initiative, a program launched by the DOL in 2002 to highlight federal and state rules concerning young workers and to educate parents, teens, employers, and educators about the types of jobs teens can hold and the number of hours they can work.

.87 As part of the campaign, the DOL is offering an electronic seminar presentation that describes prohibited equipment and activities and uses video clips depicting real-life examples of safe work practices. Additionally, the presentation discusses regulations implemented last year that expanded protections for young workers.

> **Help Desk**—To order a CD-ROM copy of the *Youth Working in Construction* video, visit the DOL's Wage and Hour Division Web site at www.wagehour.dol.gov. For more information about the jobs youths may perform and the number of hours they may work, contact the DOL at (866) 4USWAGE.

Current Accounting Issues and Developments

Accounting for Contracts

.88 Statement of Position (SOP) 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, sets forth recommendations on accounting for construction-type and certain production-type contracts in all industries. In addition, the AICPA's Audit and Accounting Guide *Construction Contractors* (the Guide) presents recommendations of the AICPA Construction Contractors Guide Committee on, and descriptions of, financial accounting and reporting principles and practice for construction contractors. In accounting for contracts, the basic accounting policy decision is the choice between the two generally accepted methods: the percentage-of-completion method, including units of delivery, and the completed-contract method. The Guide's recommendations on basic accounting policy are set forth in the sections "Percentage-of-Completion Method" and "Completed-Contract Method," which identify the circumstances appropriate to the methods, the basis of applying the methods, and the reasons for the recommendations. The recommendations apply to accounting for individual contracts and to accounting for other profit centers in accordance with the recommendations in the section on "Determining the Profit Center." As a result of evaluating individual contracts and profit centers, a contractor should be able to establish a basic policy that should be followed in accounting for most of his or her contracts. In accordance with the requirements of Accounting Principles Board (APB) Opinion No. 22, *Disclosure of Accounting Policies*, a contractor should disclose in the note to the financial statements on accounting policies the method or methods of determining earned revenue and the cost of earned revenue, including the policies relating to combining and segmenting, if applicable.

> **Help Desk**—AICPA Audit and Accounting Guide *Construction Contractors* (product no. 012585kk), with conforming changes as of May 1, 2005, has been updated to reflect the issuance of recently issued authoritative pronouncements. The Guide is available through the AICPA's reSOURCE Online and reSOURCE CD-ROM products, as well as through a loose-leaf subscription service. Paperback editions of Audit and Accounting Guides can be purchased as well. Subscriptions to AICPA reSOURCE, subscriptions to the loose-leaf service, and paperback copies of the Guide may be obtained by calling the AICPA Service Operations Center at (888) 777-7077, by faxing a request to (800) 362-5066, or by going online at www.cpa2biz.com.

Job Performance

.89 When projects are not completed on time, it is difficult for contractors to be profitable. Some contracts may even require that the contractor pay penalties if the job is not completed by a specified date. Jobs that are significantly behind their established timetable may require additional attention to determine that the original estimates of gross profit have not deteriorated (profit fade) and that the job has not incurred a loss (which should be recognized immediately).

.90 For contractors that are experiencing layoffs and increased turnover, it may require some time to find a competent replacement for key operational employees who leave the company before the job is completed.

The contractor may be forced to use less-experienced personnel in certain positions, including management, and that lack of experience can result in the job taking longer to complete and costing more than originally anticipated.

.91 A disruption in the supply of key materials can also affect the ability of the contractor to complete the project on time. During the past year, most construction materials were in adequate supply. However, the events of recent years have shown that an unexpected or continuing surge in demand for materials can quickly outpace supply and create shortages and delays. And cleaning up after Hurricanes Katrina and Rita could deplete some construction suppliers over the next year. Builders working far away from the Gulf Coast are likely to experience shortages, lagging deliveries, and higher prices. In addition, the lead time required for specifically fabricated items may affect the contractor's ability to deliver the project on time.

Job Status Indicators

.92 Keeping tabs on how jobs are progressing is crucial to a contractor's profitability. Presented here are four indicators (projected cost variance, over/under billings, cash flow, and scope change effectiveness index) that, when taken together, can reliably determine how a job is doing by integrating all of the financial variables that reveal and predict a job's performance. While these indicators do not indicate why a job is doing better or worse than planned, they will alert you to jobs in need of tighter management and more attention. However, before examining these indicators, it's important to establish consistent definitions for four common terms.

Original Budget

.93 The original budget (OB) is the cost budget associated with a job at the time the job is awarded, or as modified by the job's project manager before job inception. The OB must be compatible in form and function with the way incurred costs are recorded. Once established, the OB is not changed for any reason. It is broken down in accordance with the job's work breakdown structure.

Revised Budget

.94 The revised budget (RB) reflects the OB plus the cost budget associated with customer-requested scope changes. This is the most important budget pertaining to a particular job because it is the reference point. The scope changes referred to here are changes in work for which the contractor will be paid.

.95 There are several common situations that should not affect the RB:

- Savings or overruns due to subcontractor or vendor buyouts;
- Costs due to unexpected weather conditions or for any other occurrence, when such occurrences are not to be paid for by the customer; and
- Forced work orders, unless payment for the work is likely.

.96 One situation, however, that does affect the RB is a rearrangement of work (ROW)—a redistribution of resources to accomplish the original scope of work using a different methodology. To ensure that ROW transactions do not affect a job's revised budgeted margins, the sum of the rearrangements equals zero at the job (top) level, regardless of the changes made further down in the work breakdown structure. A contingency cost code is frequently used in conjunction with ROW transactions to ensure that they net to zero.

.97 There is often confusion about when the RB should be amended. By examining the steps in the scope change process, it is clear when the update should occur.

.98 *Step 1.* The customer requests a proposal for a scope change, which the contractor prepares and submits to the customer. At this point, the RB is not affected; however, the proposal is tracked so the contractor can identify the value, number, and content of outstanding proposals for any given job at any given time.

.99 *Step 2.* The customer either rejects the proposal or accepts it, perhaps even with modifications, and the contractor receives a Notice to Proceed. At this point the customer has not formally signed the scope change (in reality, the signed scope change may not follow for weeks or even months), but the contractor starts work anyway, thinking, "I don't have a signed scope change, so I'm not going to update the RB, even though I am proceeding with the work and incurring the associated costs."

.100 This is very dangerous. The job will always appear to be over-budget because the RB is too low. The RB should be updated at the time the Notice to Proceed is received. At the same time, your system should track unsigned scope changes that are affecting the RB so you can effectively monitor and manage those items. If the arrival of the Notice to Proceed alerts contractors to update the RB, it also frequently prompts contractors to ask, "How do I best record the change in contract amount associated with the Notice to Proceed transaction?" There are three commonly used methods.

1. Don't record the contract amount change at all until the scope change is signed.
2. Record the contract amount change without any margin until the scope change is signed.
3. Record the fully margined contract amount associated with the scope change when the Notice to Proceed is received.

.101 When using the four indicators discussed later, it is important to properly record the fully margined scope change and to keep the RB properly updated. The best way to do this is have three contract amount categories: original contract amount (OCA), revised contract amount (RCA), and forecast contract amount (FCA). The OCA corresponds to the OB. The RCA comprises the OCA plus additional contract amounts associated with all approved (signed) scope changes. The FCA comprises the RCA plus all unsigned scope changes/contract modifications with authorized Notices to Proceed. The difference between the FCA and the RCA (that is, unsigned scope changes for which there is a Notice to Proceed) should be continually managed so it will be reduced to zero before the job is completed.

Forecasts

.102 Forecasts are a project manager's best projection of hours, quantities, and costs at job completion, down to the most detailed level of the work breakdown structure. (Forecasts are normally furnished on a monthly basis.) In developing these forecasts, project managers integrate all available job information, as well as all scope changes for which a Notice to Proceed was received. Forecasts, when used, are typically the single most important piece of information in a contractor's management information system.

Estimated Cost at Completion

.103 Estimated cost at completion (ECAC) is a function of integrating budget and forecast information, as well as information contained in your information system, such as committed costs, incurred costs, and productivity (management information system data + forecast information). While it means nothing by itself, the ECAC is the basis for two of the four indicators: projected cost variance and over/underbillings.

The Four Indicators

.104 ***1. Projected Cost Variance (PCV).*** The formula is PCV = ECAC – RB. The PCV is the single most important indicator of job progress. On the first day of a job, this indicator should be zero. As a job progresses, this indicator becomes either positive (adverse, over budget) or negative (favorable, under budget). In one number, the PCV captures everything about how a job is progressing operationally (as opposed to financially) and easily indicates operational problems from the job level all the way down the work breakdown structure.

.105 This one indicator shows how the job costs will vary from the RB at job completion if action is not taken. The earlier in the job cycle that adverse variances are determined, the better the chances that appropriate action can remedy the situation. The PCV is normally calculated monthly and is formulated as of the end of the job, not as of the date that the calculation is made. Projecting to the end of the job is preferable because many costs not related to productivity (for example, committed costs and material costs) are much easier to evaluate as they relate to the total job at completion, rather than to fractional points in the job cycle.

.106 *2. Over/Underbillings (O/UB).* The formula is O/UB = Revenue – Billings. Unlike other industries, overbillings and underbillings are common in the construction industry. Contractors can capitalize on this to improve liquidity and to compensate for customer-withheld retention. It is common for lump-sum and unit-price work to "front-end load" billing schedules, so the billing-to-costs ratio is larger for work performed at the beginning of the job than for work performed later in the job cycle. In a practice called "unbalancing" (common in unit-price work), items with the potential for quantity overruns are priced with higher margins than items with little or no chance of overruns (or possible elimination from the contract). These practices should normally result in an overbilled position for a job, with over-billings typically largest in the early to midportion of the job cycle.

.107 Considering these factors, underbillings in a job should be a major warning to financial managers. Underbillings can and usually do occur where many (or even all) other financial indicators, including PCV, are favorable. As such, underbillings can be a telltale sign that everything is not copasetic. Underbillings usually occur because the operations staff has either (*a*) not updated the forecasts or (*b*) forecasted too low, resulting in an ECAC that is skewed too low and a percent complete that is skewed too high.

.108 Since the percent complete is too high, the billings resulting from that figure are also too high. The customer cannot be billed by those numbers, which leads to underbillings. In reality, the amount billed is probably consistent with the work that has been done, but the ECAC is not correct. An incorrect ECAC is a more serious problem than underbilling, per se; the corrected ECAC will reduce the job's revenue and associated gross margin. Due to these factors, underbillings are frequently a sign of serious problems.

.109 The O/UB indicator can sometimes be more important than PCV. In addition to possibly indicating an incorrect ECAC, O/UB relates to nonquantifiable factors, such as an unhappy customer, work falling behind schedule, or work of poor quality that must be redone, as well as just the normal lethargy project managers exhibit in submitting requisitions for payment. So, job un-derbillings should be investigated even if all other job metrics are favorable.

.110 *3. Cash Flow (CF).* CF is the ultimate reality check. There are numerous examples where PCV and O/UB were favorable, but the job was still a bust simply because the customer cannot (or will not) pay the bills. The first two indicators are based on internal factors. CF, on the other hand, is a measure of customer/client/supplier relationships. As such, it should be carefully and frequently monitored.

.111 *4. Scope Change Effectiveness Index (SCEI).* The formula is SCEI = (FCA – RB)/FCA (OCA – OB)/ OCA.SCEI is a ratio of revised contract budgeted margin to original contract budgeted margin. It indicates that both the contract amount and contract cost portion of the scope changes are properly processed. Unless special arrangements are made with the customer regarding scope change margin percentages (after the job has been awarded), this indicator is normally greater than one. If the SCEI is less than one, the scope changes are probably not being recorded correctly in the management information system.

.112 This indicator has nothing to do with job production, variances, or relationships with the customer. It simply determines if the scope changes are being properly entered into the system. The purpose of this indicator is to prevent inadvertent omission of the revenue portion of a scope change when the cost portion is processed. This is a frequent problem in the construction industry, resulting in what is commonly referred to as scope creep.

Guidance Related to Natural Disasters

.113 In September 2005, following the destruction caused by Hurricane Katrina, the AICPA issued Technical Practice Aid (TPA) section 5400.05, "Accounting and Disclosures Guidance for Losses from Natural Disasters—Nongovernmental Entities," to address some of the questions that arose in the aftermath of this disaster. This TPA identifies accounting literature, which gives guidance on the following accounting issues that may arise in accounting for losses from natural disasters:

- Classifying, in the statement of operations, losses from a natural disaster of a type that is reasonably expected to recur
- Recognizing an asset impairment loss related to a natural disaster
- Recognizing a liability for nonimpairment losses and costs related to a natural disaster
- Accounting for insurance recoveries to cover losses sustained in a natural disaster, and additional considerations related to business interruption insurance recoveries
- Fulfilling required disclosures regarding the impact of a natural disaster

Help Desk—This TPA can be accessed at www.aicpa.org/download/acctstd/Natural_disaster_TPA_5400.05.pdf.

Variable Interest Entities

.114 Financial Accounting Standards Board (FASB) Interpretation No. 46, *Consolidation of Variable Interest Entities*, issued in January 2003, affected the reporting of a large number of companies associated with special purpose entities (SPEs, entities established for a specific purpose). The concepts in FASB Interpretation No. 46 were very complex and far reaching. In December 2003, the FASB issued Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities* (FASB Interpretation No. 46(R)), which revised and clarified certain of the concepts in the original document.

.115 FASB Interpretation No. 46(R) interprets Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements*, which, for approximately half a century, was the principal authoritative literature governing when an investor should consolidate an in-vestee. ARB No. 51 concluded that consolidated financial statements are "usually necessary for fair presentation when one of the companies in the group directly or indirectly has a controlling interest in the other companies." FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, issued in October 1987, amended ARB No. 51 to remove one of the three exceptions provided in ARB No. 51 that allowed an investor to avoid consolidating a majority-owned investee. ARB No. 51, with certain exceptions, required consolidation of an investee if an investor had a controlling financial interest in the investee. In general, a controlling financial interest was exhibited by an ownership interest of more than 50 percent of the investee's voting stock.

.116 In 1990, to address the consolidation of SPEs for which voting rights were not considered substantive, the Emerging Issues Task Force (EITF) reached a consensus on Issue No. 90-15, "Impact of Nonsubstantive Lessors, Residual Value Guarantees, and Other Provisions in Leasing Transactions." Issue 90-15 required a lessee to consolidate an SPE-lessor if all the following conditions were met:

- Substantially all the SPE's activities involved assets to be leased to the lessee.
- The lessee was exposed to the substantive risks and was entitled to substantially all the residual rewards of the leased assets and the SPE's financing arrangements.
- The SPE's owners had not made a substantive residual equity investment that would be at risk throughout the term of the lease.

.117 The consolidation of most SPEs was avoided based on the third condition not being met (in other words, the SPE's owners had made a substantive residual equity investment). As practice evolved, a "substantive residual equity investment" came to mean an amount equal to 3 percent of the fair value of the SPE's assets.

.118 Then the Enron scandal exploded. Enron had set up an elaborate array of entities to shift debt away from the company's books, while absorbing substantially all the risk associated with that debt either through guarantees of the debt or the SPE's assets. The extent of those guarantees came as a surprise to many investors.

.119 In response, the FASB issued Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, which requires a guarantor to recognize the fair value of its guarantee obligations as a liability and provide certain disclosures about the nature of guarantees it has provided, and FASB Interpretation No. 46 (which subsequently was replaced by FASB Interpretation No. 46(R)).

Importance in Construction

.120 FASB Interpretation No. 46(R) may have a significant impact on construction companies. Some of the more common arrangements that may be affected by FASB Interpretation No. 46(R) include the following:

- Real estate developers frequently form separate legal entities to own property to be developed. The purpose of the separate legal entity is to isolate the developer's other assets from the project to be developed in the event the project is unsuccessful.
- The owners of closely held construction contractors may establish separate legal entities to acquire equipment that is then leased to the contractor. Often, such entities are created for estate-planning purposes.
- Contractors may also form joint ventures to develop a project. Joint venture partners could include another party with unique capabilities in some facet of the project. In some circumstances, such as when the bid documents require that a prime contractor perform more than half of the work, two or more contractors may form a joint venture to become the prime contractor, to meet the contractual requirements.

.121 Each of these separate legal entities may meet the criteria in FASB Interpretation No. 46(R) to be a variable interest entity (VIE), which necessitates a careful consideration of the Interpretation's provisions.

.122 It is common in the construction industry for a contractor to report its interests in a joint venture by consolidating its proportionate interest in the venture. The AICPA Accounting and Audit Guide *Construction Contractors* (the Guide), issued in 1981, provided guidance on how to account for joint ventures. In addition, EITF Issue No. 00-1, "Investor Balance Sheet and Income Statement Display under the Equity Method for Investments in Certain Partnerships and Other Ventures," recognized the specialized, longstanding practice that had developed in the construction industry by permitting companies to continue consolidating their proportionate interests in investees in the construction industry. However, after the issuance of FASB Interpretation No. 46(R), companies can no longer take it for granted that pro-rata consolidation is appropriate.

Variable Interest Entities

.123 FASB Interpretation No. 46(R) introduced a number of new concepts into the literature. FASB Interpretation No. 46(R) does not define a VIE, but it does describe the characteristics of one. As described by FASB Interpretation No. 46(R), a VIE is an entity for which a controlling financial interest is provided through ownership of interests other than voting stock. Rather, a controlling financial interest arises out of the economics—a holder of variable interests that is either exposed to a majority of the VIE's expected losses or is entitled to a majority of its expected residual rewards is the party with a controlling financial interest, even if none of the interests is in voting common stock.

.124 FASB Interpretation No. 46(R) is complex. Judgment is called for in analyzing entities with which a company has business arrangements to determine if those entities are VIEs and, if so, whether consolidation is required.

.125 In applying FASB Interpretation No. 46(R), an investor and its related parties (which include the investor's officers, employees, and directors; parties that have a "close business relationship" with the investor; and parties that cannot sell, pledge, or exchange their interests in an entity without the investor's prior approval) must first determine whether they have a variable interest.

.126 Variable interests include, but are not limited to, equity investments; debt instruments; guarantees; beneficial interests; service contracts; leases, including guarantees or fixed-price purchase options; forward contracts; and options. In essence, almost any asset, liability, or off-balance-sheet contractual arrangement between parties could qualify as a variable interest. However, a variable interest is distinguished from other assets, liabilities, and off-balance-sheet contractual arrangements by virtue of the fact that a variable interest under FASB Interpretation No. 46(R) is one that absorbs the variability in the entity's return. For example, a party that guarantees the value of real estate held by a developer (or guarantees the developer's bank borrowings used to finance the real estate) has a variable interest because, through the guarantee, the guarantor will absorb any negative variability in returns on the real estate that result in the value of the real estate declining.

.127 If it is decided that a party has a variable interest and it is not immediately clear that the interest is so minor it could not possibly result in that party being required to consolidate the entity in which the variable interest is held, that party must determine whether the entity is a VIE. Paragraph 5 of FASB Interpretation No. 46(R) indicates that an entity is a VIE if any one of the following criteria is met:

1. The total equity investment at risk is insufficient to permit the entity to finance its activities without additional subordinated financial support provided by any parties, including equity holders. For this purpose, the total equity investment at risk:
   - *a.* Includes only equity investments in the entity that participate significantly in profits and losses, even if those investments do not carry voting rights.
   - *b.* Does not include equity interests that the entity issued in exchange for subordinated interests in other variable interest entities.
   - *c.* Does not include amounts provided to the equity investor directly or indirectly by the entity or by other parties involved with the entity (for example, by fees, charitable contributions, or other payments), unless the provider is a parent, subsidiary, or affiliate of the investor that is required to be included in the same set of consolidated financial statements as the investor.
   - *d.* Does not include amounts financed for the equity investor (for example, by loans or guarantees of loans) directly by the entity or by other parties involved with the entity, unless that party is a parent, subsidiary, or affiliate of the investor that is required to be included in the same set of consolidated financial statements as the investor.

2. As a group the holders of the equity investment at risk lack any one of the following three characteristics of a controlling financial interest:
   a. The direct or indirect ability through voting rights or similar rights to make decisions about an entity's activities that have a significant effect on the success of the entity. The investors do not have that ability through voting rights or similar rights if no owners hold voting rights or similar rights (such as those of a common shareholder in a corporation or a general partner in a partnership).
   b. The obligation to absorb the expected losses of the entity. The investor or investors do not have that obligation if they are directly or indirectly protected from the expected losses or are guaranteed a return by the entity itself or by other parties involved with the entity.
   c. The right to receive the expected residual returns of the entity. The investors do not have that right if their return is capped by the entity's governing documents or arrangements with other variable interest holders or the entity.
3. The equity investors as a group also are considered to lack characteristic 2(a) if (*a*) the voting rights of some investors are not proportional to their obligations to absorb the expected losses of the entity, their rights to receive the expected residual returns of the entity, or both and (*b*) substantially all the entity's activities (for example, providing financing or buying assets) either involve or are conducted on behalf of an investor that has disproportionately few voting rights. For purposes of applying this requirement, enterprises shall consider each party's obligations to absorb expected losses and rights to receive expected residual returns related to all that party's interests in the entity and not only to its equity investment at risk.

In some situations, it will be easy to determine if any of these conditions is met. In most circumstances, however, that will not be the case.

.128 The requirements of FASB Interpretation No. 46 were originally to be applied immediately to all VIEs created after January 31, 2003, and no later than the beginning of the period beginning after June 15, 2003 (July 1, 2003, for a calendar-year company that issues quarterly financial information that purports to comply with generally accepted accounting principles), to VIEs created before February 1, 2003. Because of concerns raised by constituents over the operationality of FASB Interpretation No. 46, the FASB delayed its effective date in October 2003 for those entities created before February 1, 2003. FASB Interpretation No. 46(R) modified the effective date provisions in FASB Interpretation No. 46 as follows.

.129 For public entities that are small business issuers, FASB Interpretation No. 46(R) must be applied to all VIEs no later than the end of the first reporting period that ends after December 15, 2004 (the year ending December 31, 2004, for calendar-year companies), including those VIEs to which FASB Interpretation No. 46 had already been applied (for example, those created after January, 31, 2003).

.130 For public entities that are not small business issuers, FASB Interpretation No. 46(R) must be applied to all VIEs no later than the end of the first reporting period that ends after March 15, 2004 (the quarter ending March 31, 2004, for calendar-year companies), including those VIEs to which FASB Interpretation No. 46 had already been applied.

.131 A nonpublic entity is required to apply FASB Interpretation No. 46(R) to all VIEs in which it holds variable interests by the beginning of the first reporting period beginning after December 2004, (January 1, 2005, for a calendar-year company). A nonpublic entity is required to apply FASB Interpretation No. 46(R) immediately to VIEs created after December 31, 2003.

.132 In addition, FASB Interpretation No. 46(R) required public companies to apply either FASB Interpretation No. 46 or FASB Interpretation No. 46(R) to entities that would have previously been evaluated under the accounting literature as SPEs by the end of the first reporting period ending after December 15, 2003.

.133 FASB Interpretation No. 46(R) expanded the consolidation requirements by requiring existing unconsolidated VIEs to be consolidated with their primary beneficiaries if the entities do not effectively disperse risk among the investing parties. As such, VIEs that effectively disperse risks will not be consolidated unless a single party holds an interest or combination of interests that effectively recombines risks that were previously dispersed.

Expected Losses

.134 If an entity is a VIE, the primary beneficiary entity and its related parties need to determine if they—or another investor—are exposed to a majority of the entity's "expected losses." If so, the party exposed to a majority of expected losses is required to consolidate the VIE. That party is referred to in FASB Interpretation No. 46(R) as the VIE's "primary beneficiary."

.135 If no investor is exposed to a majority of "expected losses," the enterprise and its related parties would need to determine if they are entitled to a majority of the entity's residual rewards. If so, the entity entitled to major rewards would be required to consolidate the entity.

.136 If the enterprise is not required to consolidate the VIE, it would account for its investment in the entity using whatever method is appropriate under other accounting literature. (For equity investments, appropriate accounting methods may include using the equity or cost method, or recording at fair value if the investment has a readily determinable fair value and the enterprise and its related parties do not exercise significant influence over the entity's activities. If the variable interest is based on guarantees or other contractual arrangements, disclosure is required.)

.137 Where significant investments do not result in consolidation, disclosure should include the nature of the investment, the exposure to losses, the purpose and size of the investment, and activities with the VIE.

.138 In determining whether an entity's equity is sufficient to cover "expected losses," it is important to understand that "expected losses" do not only arise in situations where an investor loses its stated invested principal.

.139 As used in FASB Interpretation No. 46(R), "expected losses" can arise when an investment under-performs expectations. For example, if the property held by a real estate limited partnership is expected to appreciate by 10 percent per year for the five-year life of the partnership, the partnership would incur "expected losses" for any possible scenario where appreciation could be less than 10 percent per year.

.140 So, if it were possible that the property could appreciate by 6 percent annually, the entity would need to have sufficient equity to "absorb" the opportunity cost related to the 4 percent difference between the expected return and the possible return.

Control of Entities' Activities

.141 Fees paid to any of the investors, for any reason, must be deducted from the equity invested when considering whether the equity is sufficient to absorb losses and whether the equity investors, as a group, control the activities of an entity.

.142 For example, if a developer is the general partner in a limited partnership and receives a fee at inception in excess of its investment, the limited partnership entity would be deemed to be a VIE. This is because FASB Interpretation No. 46(R) requires investors with equity in the entity to be able to control its activities to not be considered a VIE.

.143 In this example, the general partner—who is the only party with the right to control the ongoing activities of the partnership, the other partners being passive investors—does not have equity in the entity since the fees it received at inception exceeded its investment. That conclusion could require a limited partner to consolidate if the limited partner owns more than 50 percent of the limited partnership interests even though that limited partner's risks are limited to its accumulated and undistributed investment.

Conclusion

.144 As a result of FASB Interpretation No. 46, you should review your company's participations in VIEs to evaluate whether these entities should be consolidated. In many cases, real estate partnerships, LLCs, and other entities guaranteed by the operating entity (for example, the contractor) or its owner will have to be consolidated. To ensure compliance, review the full provisions of FASB Interpretation No. 46 when accounting for your company's partnerships and alliances.

.145 ***FASB Staff Positions.*** The FASB has issued and proposed several FASB Staff Positions (FSPs) related to Interpretation No. 46 that may be of interest to construction contractors. FSPs are available on the FASB Web site at www.fasb.org.

Asset Retirement Obligations

.146 Many construction contractors have mining operations or asphalt/concrete plants that have significant dismantling and restoration costs associated with retirement of the assets. FASB Statement No. 143, *Accounting for Asset Retirement Obligations*, addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. It applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development, and/or the normal operation of a long-lived asset, except for certain obligations of lessees. As used in FASB Statement No. 143, a legal obligation is an obligation that a party is required to settle as a result of an existing or enacted law, statute, ordinance, or written or oral contract or by legal construction of a contract under the doctrine of a promissory estoppel. FASB Statement No. 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. If a reasonable estimate of fair value cannot be made in the period the asset retirement obligation is incurred, the liability shall be recognized when a reasonable estimate of fair value can be made. Upon initial recognition of a liability for an asset retirement obligation, an entity should capitalize an asset retirement cost by increasing the carrying amount of the related long-lived asset by the same amount as the liability. An entity should subsequently allocate that asset retirement cost to expense using a systematic and rational method over its useful life.

Recent Interpretation

.147 In March 2005, the FASB issued FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations—an interpretation of FASB Statement No. 143*. This Interpretation clarifies that the term *conditional asset retirement obligation* as used in FASB Statement No. 143 refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. Thus, the timing and/or method of settlement may be conditional on a future event. Accordingly, an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. The fair value of a liability for the conditional asset retirement obligation should be recognized when incurred—generally upon acquisition, construction, or development and/or through the normal operation of the asset. Uncertainty about the timing and/or method of settlement of a conditional asset retirement obligation should be factored into the measurement of the liability when sufficient information exists. FASB Statement No. 143 acknowledges that in some cases, sufficient information may not be available to reasonably estimate the fair value of an asset retirement obligation. This Interpretation also clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation.

.148 Diverse accounting practices have developed with respect to the timing of liability recognition for legal obligations associated with the retirement of a tangible long-lived asset when the timing and/or method of settlement of the obligation are conditional on a future event. For example, some entities recognize the fair value of the obligation before the retirement of the asset with the uncertainty about the timing and/or method of settlement incorporated into the liability's fair value. Other entities recognize the fair value of the obligation only when it is probable the asset will be retired as of a specified date using a specified method or when the asset is actually retired. This Interpretation clarifies that an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation when incurred if the liability's fair value can be reasonably estimated. Questions also arose about when sufficient information may not be available to make a reasonable estimate of the fair value of an asset retirement obligation. This Interpretation clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation.

.149 This Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005, for calendar-year enterprises). Retrospective application for interim financial information is permitted but is not required. Early adoption of this Interpretation is encouraged.

Accounting for Weather Derivatives

.150 Weather derivative contracts (that is, contracts indexed to climatic or geological variables) are relatively new; however, their market presence is rapidly growing. The construction industry is one of the market areas where the potential use of weather derivatives would likely expand. EITF Issue No. 99-2, "Accounting for Weather Derivatives," prescribes the accounting treatment for weather derivatives. The increased use of weather derivative contracts raises questions about whether such contracts should be accounted for under accrual accounting, under settlement accounting, under insurance accounting, marked to fair value through earnings at each reporting date, or under some other method. Most weather derivative contracts contain a terminal settlement provision based on a cumulative index (including the example degree-day swap and option contracts described in this Issue). Another issue to consider is whether the accounting for weather derivatives should vary based on the type of contract. Practice is diverse.

.151 In accordance with FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, contracts that are not exchange traded are not subject to the requirements of that Statement if settlement is based on a climatic or geological variable or on some other physical variable. Any derivative based on a physical variable that eventually becomes exchange traded will automatically become subject to the requirements of FASB Statement No. 133. EITF Issue No. 99-2 does not apply to contracts written by insurance companies that entitle the holder to be compensated only if, as a result of an insurable event, the holder incurs a liability or there is an adverse change in the value of a specific asset or liability for which the holder is at risk.

.152 This EITF addresses the following issues.

Issue 1. How should an entity account for a non-exchange-traded swap-based (or two-directional risk) weather derivative?

Issue 2. How should an entity account for a purchased non-exchange-traded option-based (or one-directional risk) weather derivative?

Issue 3. How should an entity account for a written non-exchange-traded option-based weather derivative?

.153 EITF Issue No. 99-2 explains that an entity that enters into a non-exchange-traded forward-based weather derivative in connection with nontrading activities should account for the contract by applying an "intrinsic value method." The intrinsic value method computes an amount based on the difference between the expected results from an up-front allocation of the cumulative strike and the actual results during a period, multiplied by the contract price (for example, dollars per heating degree day). The intrinsic value method first requires that the reporting entity allocate the cumulative strike amount to individual periods within the contract term. That allocation should reflect reasonable expectations at the beginning of the contract term of normal or expected experience under the contract. That allocation should be based on data from external statistical sources, such as the National Weather Service. The "intrinsic value," or "intrinsic value measure," of the contract at interim dates would then be calculated based on cumulative differences between actual experience and the allocation through that date. The initial allocation of the cumulative strike amount should not be adjusted over the term of the contract to reflect actual results.

.154 EITF Issue No. 99-2 further states that an entity that purchases a non-exchange-traded option-based weather derivative in connection with nontrading activities should amortize to expense the premium paid (or due) and apply the intrinsic value method described above to measure the contract at each interim balance sheet date. The premium asset should be amortized in a rational and systematic manner.

.155 Finally, EITF Issue No. 99-2 explains that all entities that sell or write a non-exchange-traded option-based weather derivative should initially recognize the premium as a liability and recognize any subsequent changes in fair value currently in earnings (the premium would not be amortized).

Exchanges of Nonmonetary Assets

.156 In December 2004, the FASB issued FASB Statement No. 153, *Exchanges of Nonmonetary Assets—an amendment of APB Opinion No. 29*. The guidance in APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, was based on the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged. The guidance in that Opinion, however, included certain exceptions to that principle. Opinion No. 29 provided an exception to the basic measurement principle (fair value) for exchanges of similar productive assets. That exception required that some nonmonetary exchanges, although commercially substantive, be recorded on a carryover basis.

.157 FASB Statement No. 153 amends Opinion No. 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. According to FASB Statement No. 153, a nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange.

Impact on Contractors

.158 Because of the change in the accounting for exchanges of non-monetary assets, construction contractors are likely to see an increase in the historical cost of equipment over time. This increase in historical cost of equipment will result in higher depreciation expense, which may reduce margins on contracts. Likewise, higher depreciation may justify higher revenue on reimbursable cost type contracts. In addition, contractors must consider the immediate income effect for gain or loss recognition on any equipment transactions.

.159 FASB Statement No. 153 is effective for nonmonetary exchanges occurring in fiscal periods beginning after June 15, 2005.

Recent Accounting Pronouncements and Related Guidance

.160 Presented below is a list of recently issued accounting pronouncements and other guidance issued since last fall. For information on accounting standards issued subsequent to the publication of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and the *Journal of Accountancy*.

FASB Statement No. 152 (December 2004)	*Accounting for Real Estate Time-Sharing Transactions—an amendment of FASB Statements No. 66 and 67* This FASB Statement amends FASB Statement No. 66, *Accounting for Sales of Real Estate*, to reference the financial accounting and reporting guidance for real estate time-sharing transactions that is provided in AICPA SOP 04-2, *Accounting for Real Estate Time-Sharing Transactions.* This Statement also amends FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to state that the guidance for (*a*) incidental operations and (*b*) costs incurred to sell real estate projects does not apply to real estate time-sharing transactions. The accounting for those operations and costs is subject to the guidance in SOP 04-2.
FASB Statement No. 153 (December 2004)	*Exchanges of Nonmonetary Assets—an amendment of APB Opinion No. 29* This Statement amends APB Opinion 29, *Accounting for Nonmonetary Transactions*, to eliminate the exception for nonmonetary exchanges of similar productive assets, and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. Please refer to the "Exchanges of Nonmonetary Assets" section of this Alert for a brief description of this Statement.
FASB Statement No. 123(R) (December 2004)	*Share-Based Payment* This Statement is a revision of FASB Statement No. 123, *Accounting for Stock-Based Compensation*; it supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and its related implementation guidance. This Statement focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. It establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments.
FASB Statement No. 154 (May 2005)	*Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3* This Statement replaces APB Opinion No. 20, *Accounting Changes*, and FASB Statement No. 3, *Reporting Accounting Changes in Interim Financial Statements*, and changes the requirements for the accounting for and reporting of a change in accounting principle. This Statement applies to all voluntary changes in accounting principle. It also applies to changes required by an accounting pronouncement in the unusual instance that the pronouncement does not include specific transition provisions.
FASB Interpretation No. 47 (March 2005)	*Accounting for Conditional Asset Retirement Obligations—an interpretation of FASB Statement No. 143* This Interpretation clarifies that *conditional asset retirement obligations* describes a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may not be under the entity's control. Please refer to the "Asset Retirement Obligations" section of this Alert for a brief description of this Interpretation.

FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.
FASB Staff Positions (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs. Some of the recently issued FSPs address issues relating to FASB Statements No. 143 and No. 150, among others; and FASB Interpretation No. 46(R).
AICPA TPA section 1200.06–.15 (February 2005) (Nonauthoritative)	"Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk"
AICPA TPA section 5400.05 (September 2005) (Nonauthoritative)	"Accounting and Disclosures Guidance for Losses from Natural Disasters—Nongovernmental Entities" Please refer to the "Guidance Related to Natural Disasters" section of this Alert for a brief description of this TPA.
AICPA TPA section 6930.09 (August 2005) (Nonauthoritative)	"Accounting and Disclosure Requirements for *Single-Employer Employee Benefit Plans* Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003"
AICPA TPA section 6930.10 (August 2005) (Nonauthoritative)	"Accounting and Disclosure Requirements for *Multiemployer Employee Benefit Plans* Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003"

.161 The summaries provided above are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standards and other guidance. You should visit the applicable Web site for complete information. You can obtain copies of AICPA standards and other guidance by contacting the Service Operations Center at (888) 777-7077 or online at www.cpa2biz.com.

.162 Some of the pronouncements listed above are already discussed in more detail in this Alert. Below is a brief discussion of two recently issued FSPs that that may have an impact on construction contractors.

FSP No. SOP 78-9-1, *Interaction of AICPA Statement of Position 78-9 and EITF Issue No. 04-5*

.163 This FASB Staff Position, issued in July 2005, amends SOP 78-9, *Accounting for Investments in Real Estate Ventures*.

.164 At the June 15-16, 2005, meeting, the EITF reached a consensus on EITF Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights." The consensus provides a framework for addressing when a general partner, or general partners as a group, controls a limited partnership or similar entity. The EITF acknowledged that the consensus in Issue No. 04-5 conflicts with certain aspects of SOP 78-9. The EITF agreed that the assessment of whether a general partner, or the general partners as a group, controls a limited partnership should be consistent for all limited partnerships, irrespective of the industry within which the limited partnership operates. Accordingly, the EITF requested and the FASB agreed to amend the guidance in SOP 78-9 to be consistent with the consensus in Issue No. 04-5.

.165 This FSP eliminates the concept of "important rights" in paragraph .09 of SOP 78-9 and replaces it with the concepts of "kick-out rights" and "substantive participating rights" as defined in EITF Issue No. 04-5. This FSP also amends paragraph .07 of SOP 78-9 to be consistent with revised paragraph .09. The FASB believes that the effect of the rights held by minority partners on the assessment of control, and therefore consolidation, of a general partnership should be the same as the evaluation of limited partners' rights in a limited partnership.

.166 For general partners of all new partnerships formed and for existing partnerships for which the partnership agreements are modified, the guidance in this FSP is effective after June 29, 2005. For general partners in all other partnerships, the guidance in this FSP is effective no later than the beginning of first reporting period in fiscal years beginning after December 15, 2005, and the application of either Transition Method A or Transition Method B, described in this FSP, is permitted.

FSP No. FAS 13-1, *Accounting for Rental Costs Incurred during a Construction Period*

.167 This FSP, issued in October 2005, addresses the accounting for rental costs associated with operating leases that are incurred during a construction period. This FSP does not address rental costs other than those associated with building and ground operating leases. This FSP also does not address whether a lessee that accounts for the sale or rental of real estate projects under FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, should capitalize rental costs associated with ground and building operating leases.

.168 This FSP provides that rental costs associated with ground or building operating leases that are incurred during a construction period shall be recognized as rental expense. The rental costs shall be included in income from continuing operations. A lessee shall follow the guidance in FASB Statement No. 13, *Accounting for Leases*, and FASB Technical Bulletin No. 85-3, *Accounting for Operating Leases with Scheduled Rent Increases*, in determining how to allocate rental costs over the lease term. This guidance does not change application of the maximum guarantee test in EITF Issue No. 97-10, "The Effect of Lessee Involvement in Asset Construction."

.169 The guidance in this FSP shall be applied to the first reporting period beginning after December 15, 2005. Early adoption is permitted for financial statements or interim financial statements that have not yet been issued. A lessee shall cease capitalizing rental costs as of the effective date of this FSP for operating lease arrangements entered into before the effective date of this FSP. Retrospective application in accordance with FASB Statement No. 154, *Accounting Changes and Error Corrections*, is permitted but not required.

On the Horizon

.170 You should keep abreast of accounting developments and upcoming guidance that may affect your company. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all accounting projects in progress. Presented below is brief information about certain projects that are expected to result in final standards in the near future. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing generally accepted accounting principles (GAAP).

.171 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.fasb.org
Governmental Accounting Standards Board (GASB)	www.gasb.org

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Project on Revenue Recognition

.172 Revenue usually is the largest single item in financial statements, and issues involving revenue recognition are among the most important and difficult that standard setters and accountants face. Because no comprehensive standard on revenue recognition exists, there is a significant gap between the broad conceptual guidance in the FASB's Concepts Statements and the detailed guidance in the authoritative literature. Most of the authoritative literature provides industry or transaction-specific implementation guidance, and it has been developed largely on an ad hoc basis and issued in numerous pronouncements with differing degrees of authority. Those pronouncements include APB Opinions, FASB Statements, AICPA Audit and Accounting Guides, AICPA SOPs, FASB Interpretations, EITF Issues, SEC Staff Accounting Bulletins (SABs), and the like. Each focuses on a specific practice problem and has a narrow scope, and the guidance is not always consistent across pronouncements.

.173 The SEC sought to fill the gap in the accounting literature with SAB No. 101, *Revenue Recognition in Financial Statements*, which was issued in December 1999, and the companion document, *Revenue Recognition in Financial Statements—Frequently Asked Questions and Answers*, which was issued in October 2000. SAB No. 101 was superseded by SAB No. 104, *Revenue Recognition*, in December 2003. SAB No. 104 states that if a transaction falls within the scope of specific authoritative literature on revenue recognition, that guidance should be followed; in the absence of such guidance, the revenue recognition criteria in Concepts Statement No. 5 (namely, that revenue should not be recognized until it is (*a*) *realized or realizable* and (*b*) *earned*), should be followed. However, SAB No. 104 is more specific, stating additional requirements for meeting those criteria, and reflects the SEC staff's view that the four basic criteria for revenue recognition in AICPA SOP 97-2, *Software Revenue Recognition*, should be a foundation for all basic revenue recognition principles. Those criteria are:

- Persuasive evidence of an arrangement exists.
- Delivery has occurred.
- The vendor's fee is fixed or determinable.
- Collectibility is probable.

.174 Some criticized SAB No. 101 on the basis that the criteria in SOP 97-2 were developed for a particular industry and that broader application of those criteria was neither contemplated nor intended. They asserted that that guidance may not be appropriate for certain recognition issues, including some that the EITF has considered. Others noted that a SAB is designed to provide the SEC staff's interpretive responses and not to change GAAP. For that reason, SABs are issued without an invitation for comment. Critics argued that SAB No. 101 had in fact changed GAAP by promulgating changes in industry practice without the full due process and deliberation that characterize the FASB's decision-making process. Even though the SEC guidance for revenue recognition applies only to SEC registrants, the work done in developing and implementing SAB No. 101 has focused attention on revenue recognition issues and will be very useful in this project.

.175 In response to these issues, the FASB has undertaken a project to develop a comprehensive statement on revenue recognition that is conceptually based and framed in terms of principles. The FASB is partnering with the International Accounting Standards Board (IASB) on this project.

.176 The planned comprehensive revenue recognition Statement will (*a*) eliminate the inconsistencies in the existing authoritative literature and accepted practices, (*b*) fill the voids that have emerged in revenue recognition guidance in recent years, and (*c*) provide a conceptual basis for addressing issues that arise in the future.

Proposed FASB Statements, Interpretations, and Other Guidance

Proposed FASB Statement The Hierarchy of Generally Accepted Accounting Principles

.177 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1). However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, that is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in AU section 411, subject to certain modifications. The proposed Statement would be effective for fiscal periods beginning after September 15, 2005. Readers should be alert for the issuance of a final Statement, which is expected in the third quarter of 2005.

Proposed FASB Statements Business Combinations, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.178 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. That all acquisitions of businesses be measured at the fair value of the business acquired.
2. That substantially all of the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
3. That entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.179 Issuance of the exposure drafts on business combinations, purchase method procedures, and noncontrolling interests are expected. The FASB's goal is to issue the two final Standards in the third quarter of 2006. The target effective date for the two proposed Statements is for fiscal years beginning on or after December 15, 2006.

Proposed FASB Statements Accounting for Transfers of Financial Assets, Accounting for Servicing of Financial Assets, *and* Accounting for Certain Hybrid Financial Instruments

.180 The exposure draft, *Accounting for Transfers of Financial Assets*, is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement

No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed Statement seeks to (*a*) clearly specify the circumstances that require the use of a qualifying SPE in order to derecognize all or a portion of financial assets, (*b*) provide additional guidance on permitted activities of qualifying SPEs, (*c*) eliminate the prohibition on a qualifying SPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor, and (*d*) revise the initial measurement of interests related to transferred financial assets held by a transferor. The effective dates associated with this proposed Statement vary; refer to the exposure draft for further information.

.181 The exposure draft, *Accounting for Servicing of Financial Assets*, would also amend Statement No. 140. The proposed Statement would (*a*) require all separately recognized servicing rights to be initially measured at fair value, if practicable; (*b*) permit an entity to choose between two measurement methods for each class of separately recognized servicing assets and liabilities; and (*c*) require additional disclosures for all separately recognized servicing rights. The proposed Statement would be effective for transactions occurring in the earlier of the first fiscal year beginning after December 15, 2005, or fiscal years that begin during the fiscal quarter in which the Statement is issued.

.182 The proposed Statement, *Accounting for Certain Hybrid Financial Instruments*, would amend FASB Statement No. 140 and FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. Specifically, the proposed Statement would (*a*) permit fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, (*b*) clarify which interest-only strips and principal-only strips are not subject to the requirements of Statement 133, (*c*) establish a requirement to evaluate beneficial interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, (*d*) clarify that concentrations of credit risk in the form of subordination are not embedded derivatives, and (*e*) eliminate restrictions on a qualifying SPE's ability to hold passive derivative financial instruments that pertain to beneficial interests that are themselves or that contain a derivative financial instrument. The proposed Statement would be effective after the earlier of fiscal years beginning after December 15, 2005, or fiscal years that begin during the fiscal quarter in which the Statement is issued.

.183 Readers should be alert for the issuance of final Statements, which is expected in the first quarter of 2006. See the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement Fair Value Measurements

.184 In June 2004, the FASB published an exposure draft of a proposed Statement, *Fair Value Measurements*, which seeks to establish a framework for measuring fair value that would apply broadly to financial and nonfinancial assets and liabilities, improving the consistency, comparability, and reliability of the measurements. The fair value framework would clarify the fair value measurement objective and its application under authoritative pronouncements that require fair value measurements. The exposure draft would replace any current guidance for measuring fair value in those pronouncements and would expand current disclosures. Readers should be alert for the issuance of a final Statement, which is expected in the first quarter of 2006. Refer to the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement Earnings per Share—an amendment of FASB Statement No. 128

.185 This proposed Statement would amend the computations guidance in FASB Statement No. 128, *Earnings per Share*, for calculating the number of incremental shares included in diluted shares when applying the Treasury stock method. Also, this proposed Statement would eliminate the provisions of FASB Statement No. 128 that allow an entity to rebut the presumption that contracts with the option of settling in either cash or stock will be settled in stock. In addition, this proposed Statement would require that shares that will be issued upon conversion of a mandatorily convertible security be included in the weighted-average number of ordinary shares outstanding used in computing basic earnings per share from the date when conversion becomes mandatory. Readers should be alert for the issuance of a final Statement, which is expected to be released in the third quarter of 2005.

Proposed FASB Interpretation Accounting for Uncertain Tax Positions

.186 In July 2005, the FASB published an exposure draft of a proposed Interpretation, *Accounting for Uncertain Tax Positions*, which seeks to reduce the significant diversity in practice associated with recognition and measurement in the accounting for income taxes. It would apply to all tax positions accounted for in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. Specifically, the exposure draft requires that a tax position meet a "probable recognition threshold" for the benefit of the uncertain tax position to be recognized in the financial statements.

.187 This threshold is to be met assuming that the tax authorities will examine the uncertain tax position. The exposure draft also contains guidance with respect to the measurement of the benefit that is recognized for an uncertain tax position, when that benefit should be derecognized, and other matters. The effective date of the proposed Interpretation would be as of the end of the first fiscal year ending after December 15, 2005. A final Interpretation is expected to be released in the fourth quarter of 2005.

Proposed FASB EITF Issues

.188 Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

Proposed FASB Staff Positions

.189 A number of proposed FASB Staff Positions are in progress addressing issues related to FASB Statements No. 13, No. 123(R), and No. 140, and FASB Interpretation No. 45. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

AICPA Resource Central

.190 The following publications deliver valuable guidance and practical assistance.

- Audit and Accounting Guide *Construction Contractors* (product no. 012585kk). The Audit and Accounting Guide as of May 1, 2005, summarizes applicable practices and delivers "how-to" advice for handling almost every type of financial statement. It describes relevant matters, conditions, and procedures unique to the construction industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems. This Audit and Accounting Guide is available now as a CD-ROM or Online subscription.

- Checklist Supplement and Illustrative Financial Statements *Construction Contractors* (product no. 008925kk). Developed by AICPA's Accounting and Auditing Publications staff as a supplement to *Corporations Checklists and Illustrative Financial Statements* (product no. 008935kk), this practice aid is invaluable to anyone who prepares financial statements and reports for construction contractors.

- *CPA's Guide to Accounting, Auditing and Tax for Construction Contractors* (2004 Paperback) (product no. 091014kk). Here's the definitive resource—complete with information on the specialized requirements that affect contractors—that is perfect for CPAs in public practice and in the construction industry. Based on the AICPA's best-selling CPE self-study course, this newly revised guide covers everything from GAAP accounting methods to auditing and review services performed by outside CPAs and important tax rules for contractors.

- *Accounting Trends and Techniques—2005* (product no. 009897kk). It is the must-have resource for any CPA who frequently creates or uses financial reports. Filled with current reporting techniques and methods used by the nation's top organizations, this 650-page AICPA bestseller will provide guidance you need to improve your accounting preparation and procedures.

- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk). Authoritative guidance on cash- and tax-basis financial statements is rather vague and leaves a great deal to professional judgment. Section One of this publication provides nonauthoritative, practical guidance on preparing and reporting on cash- and tax-basis financial statements. Section Two includes example financial statements, disclosures, and other engagement practice aids. The Appendix provides an example checklist to be used for cash- and tax-basis financial statements.

AICPA reSOURCE: Online Accounting and Auditing Literature

.191 AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library—that's available too! Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20!), Audit Risk Alerts (more than 15!), and *Accounting Trends and Techniques*. To subscribe to this essential online service for accounting professionals, go to cpa2biz.com.

Educational Courses

.192 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the construction industry. Those courses include:

- *Construction Contractors: Accounting, Auditing and Tax* (product no. 736429kk). Master the fundamentals of the construction industry with this highly effective course. An outstanding value, it provides a thorough industry overview and includes AICPA authoritative publications. Content is tailored to the needs of both practitioners and industry financial professionals.

- *Construction Contractors Advanced Issues* (product no. 731991kk). Delve beyond the basics of many issues the construction industry brings to the accounting profession. Get hands-on advice on the accounting, audit, and tax issues that make the construction industry a high-risk client. Address difficult issues such as look-back calculations, measuring progress of construction contracts, and overhead allocations. Enhance your skills today to reduce the risk of your next construction engagement.

- *Construction Contractors Strategic Briefing* (CD-ROM of Webcast originally presented on November 4, 2004) (product no. 780034kk). This course provides a strategic look at what's important in the area of construction contractors. The program addresses the current economic and industry environment, the regulatory environment, current accounting developments, current auditing developments, and what's on the horizon that could affect this industry segment.

- *Real Estate Accounting and Auditing* (product no. 730604kk). This course provides an in-depth study of the unique requirements that apply at each stage of the real estate life cycle. It gives practical, how-to-do-it coverage of accounting considerations related to the development, ownership, and operation of real estate assets.

.193 Accountants in the construction industry, as well as in other industries, may also find the following courses helpful:

- *FASB Review for Industry* (2005-2006 edition) (product no. 730562kk). Comprehensive coverage of recent FASB, AcSEC, IASB, and EITF pronouncements is provided in this course geared to the specific interests of the CPA in corporate management.

- *Accounting Update: A Review of Recent Activities* (2005 Edition) (product no. 732761kk). This course keeps you current and shows you how to apply the most recent financial accounting and reporting standards. Highlights include FASB Interpretation No. 46 on variable interest entities, fair value concepts and measurements, and the revised FASB Statement No. 123 on share-based payment.

- *AICPA's Annual Accounting and Auditing Update Workshop* (2005 edition) (product no. 736181kk, text; also available in video and DVD formats with a manual). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Accounting for Income Taxes: Applying SFAS No. 109* (product no. 732790kk). No other area in accounting is as far reaching, and requires knowledge of a vast number of topics in financial and tax accounting, as accounting for deferred taxes. This course addresses the application of this complex standard to many common differences between financial accounting and tax compliance. You will gain a sound knowledge of the theory of deferred taxes and how this theory can be applied to practical situations. Many practical examples are included to illustrate the theory, and the information is presented so you will be able to apply this theory to any other situation that you may encounter.
- *The AICPA's Guide to Business Consolidations, Goodwill and Other Consolidation Issues* (product no. 735129kk). Learn how FASB Statements No. 141 and No. 142 have changed the rules for business combinations and goodwill accounting. Develop standards for applying purchase accounting and how to allocate the acquired entity now that it's the only game in town under FASB Statement No. 141. Identify variable interest entities' impact under FASB Interpretation No. 46(R). Learn how FASB Statement No. 142 deals with goodwill from initial recognition to the annual impairment review requirements.

.194 For a listing of additional courses available please download the *Fall/Winter 2005 AICPA CPE Catalog* at http://media.cpa2biz.com/Publication/05_fall_winter_FINAL.pdf. You can also check at www.cpa2biz.com/CPE/default.htm for availability of a more recent catalog.

Online CPE

.195 AICPA InfoBytes, offered exclusively through CPA2Biz.com, is the AICPA's flagship online learning product. Selected as one of *Accounting Today's* top 100 products for 2003, AICPA InfoBytes now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA InfoBytes offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com/infobytes.

Webcasts

.196 Stay plugged in to what's happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in on the discussion. If you can't make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.197 The CFO Roundtable Webcast Series—brought to you each calendar quarter—is designed to cover a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting, to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.198 The SEC Quarterly Update Webcast Series—brought to you each calendar quarter—showcases the profession's leading experts on what's "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and CorpFin activities, these hard-hitting sessions will keep you "plugged-in" to what's important. A must for both preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Satisfaction Center

.199 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Technical Hotline and Ethics Hotline

.200 Do you have a complex technical question about GAAP, other comprehensive bases of accounting (OCBOA), or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with their answer. You can reach the Technical Hotline at (888) 777-7077.

.201 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Conferences

.202 Among the many interesting conferences the AICPA offers, there is one that might interest you. Held late each fall, the AICPA National Construction Industry Conference presents a comprehensive program revealing latest trends and developments in the construction industry. The conference offers a national perspective and addresses the newest trends in conducting business, among other topics.

.203 For additional information, contact CPA2Biz at its Web site, www.cpa2biz.com.

Web Sites[1]

AICPA Online and CPA2Biz

.204 Here is a unique opportunity to stay abreast of matters relevant to the CPA profession! AICPA Online, at www.aicpa.org, informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers you all the latest AICPA products, including more than 15 Audit Risk Alerts, more than 20 Audit and Accounting Guides, the professional standards, and CPE courses.

.205 *Construction Contractors Industry Developments* will be published annually. As you encounter accounting or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ymishkevich@aicpa.org or write to:

Investment Companies Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
INVESTMENT COMPANIES INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert, prepared by the AICPA staff, is intended to provide auditors of financial statements of investment companies with an overview of recent economic, industry, regulatory, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statements on Auditing Standards (SASs).

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Maryann Kasica, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff wishes to thank Brian Gallagher, Richard Grueter, Gregory M. Levy, Aaron Masek, Brent D. Oswald, Irina Portnoy, and Maryna P. Tully for their assistance and contributions in the review of this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your investment companies industry audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the investment companies industry, and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk).

.04 When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

> **Help Desk—**See the AICPA Audit Risk Alert *SEC and PCAOB Alert—2006/07* (product no. 022497kk) for a thorough discussion of recent Securities and Exchange Commission (SEC) and Public Company Accounting Oversight Board (PCAOB) developments.
>
> **Help Desk—**AICPA Audit Risk Alerts can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Economic and Industry Developments[1]

.05 AU section 311A, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1) and AU section 311 (AICPA, *PCAOB Standards and Related Rules*), among other matters, provide guidance for auditors regarding the specific procedures to be considered in planning an audit. AU section 311A.07 (AICPA, *Professional Standards*, vol. 1) and AU section 311.07 (AICPA, *PCAOB Standards and Related Rules*), state that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics, and consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit. For audits of financial statements for periods beginning on or after December 15, 2006, refer to AU section 311 (AICPA, *Professional Standards*, vol. 1). Also, paragraph 2.140 in the Audit and Accounting Guide *Investment Companies*[2] states that economic conditions in the jurisdictions in which funds invest may affect the auditor's assessment of inherent risk for assertions in investment companies' financial statements. Factors that auditors should consider include local rates of inflation, government stability, and local tax rules. Discussed below are recent developments for you to consider as you plan and perform your audits. Auditors should consider whether the current economic and business environment increases the risk for misstatement of reported investment results in order to achieve performance expectations, exceed benchmarks, earn performance-based fees, and/or gain competitive advantage.

.06 The AICPA general *Audit Risk Alert—2006/07*(product no. 022337kk) discusses current business and economic developments, along with risks and issues, and some of the audit considerations associated with those developments. That Alert generally discusses developments of broad interest to auditors. You will need to identify those developments that could have implications for your investment company client audits.

.07 Among the economic developments in 2006 that may be of particular interest for investment companies are:

- After continuing to raise the target federal funds rate through June of 2006 to 5.25 percent, the Federal Reserve kept the rate unchanged through the remainder of 2006. After moving higher earlier in 2006, yields on 10-year Treasury notes fell in the latter part of 2006, then moved higher again during January 2007.
- The Dow Jones Industrial Average reached a new high in 2006, closing over 12,000 for the first time. The performance of foreign stock markets generally exceeded that of the U.S. stock markets.

---

[1] Refer to the full text of the accounting and auditing standards and other guidance discussed in this Alert, as well as the full text of any rules, releases, or publications that are discussed in this Alert. Be alert for updates, amendments, or other changes and developments. The brief summaries provided in this Alert are for informational purposes only.

[2] References in this section of this Alert to the Audit and Accounting Guide *Investment Companies* are to the May 1, 2006, edition of that Guide.

Emerging markets performed particularly well. In U.S. dollar terms, foreign stock market performance was further enhanced by the strengthening value of many foreign currencies relative to the U.S. dollar.

- Funds that are focused on energy-related investments may be negatively affected by volatility in the energy markets in 2006 and price declines during recent months for crude oil and natural gas.
- The housing market is slowing. Consider its effect, combined with the effects of the increases in interest rates in 2006, as discussed above, on mortgage lending and the many businesses that are dependent on the housing market. For example, if your investment company clients invest in collateralized mortgage obligations or other mortgage-backed securities, consider whether the value and performance of those investments may be affected by an increase in mortgage delinquencies and foreclosures. The Audit Risk Alert *Bank, Credit Union, and Other Depository and Lending Institution Industry Developments—2006/07* (product no. 022297kk) provides further discussion about mortgages, including nontraditional mortgage products, noting that some mutual fund managers are cutting back on investments in mortgage-backed securities.
- There was significant buyout and merger activity and a number of public companies announced they were going private. Massive amounts of debt, in the form of both bank loans and bonds, are normally needed to finance the deals. High-yield debt funds, bank loan funds, and hedge funds often are purchasers of such debt. In some instances, the values of debt previously issued by the public company going private and held by various fixed-income funds decrease significantly upon the announcement of the going-private transaction, in consideration of the leverage being added to the issuer's capital structure.

Redemption Fees

.08 The SEC adopted new rules and rule amendments in 2005 and 2006 for investment companies and advisers that address mutual fund redemption fees. The rulemaking is discussed in the "Regulatory Developments" section of this Alert. Be alert for any changes to your clients' operating, accounting, and reporting procedures to comply with new regulations. Investment companies with multiple class structures may have boards that have approved charging redemption fees to address market timing. You may need to consider if the client has appropriately applied redemption fees in the multiple-class structure.

Financial Instruments

.09 Your clients in the investment companies industry may be purchasers or writers of complex financial instruments, including derivative financial instruments that are based on interest rates, to meet their investment objectives and to provide investors with the returns they seek. Chapter 3 of the Audit and Accounting Guide *Investment Companies* provides brief descriptions about certain financial instruments used by investment companies. The discussion "Investments" in the "Audit and Accounting Issues and Developments" section of this Alert lists sources of auditing and accounting guidance that may be helpful when auditing financial instruments.

.10 Financial instruments other than those described in Chapter 3 of the Guide have come into increased use by investment companies. Two of those types of financial instruments, Treasury inflation protected securities (TIPS) and credit default swaps, are briefly discussed below.

.11 TIPS are a specialized form of indexed securities issued by the U.S. government. TIPS pay a coupon rate of interest and index their contractual principal based on a recognized measure of inflation, but cannot decrease below their original par value. Foreign governments and some private concerns have issued securities with similar, though not necessarily identical, terms. Example 25: Inflation Bond, in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*, paragraph 191, illustrates the application of FASB Statement

No. 133 to investments in TIPS. Under the guidance, the indexing of the contractual principal is a derivative that is considered clearly and closely related to the host debt instrument and should not be separated from the host. Since an investment company is required to remeasure investments at fair value with changes in fair value recorded through earnings, an investment company would not bifurcate the embedded derivative regardless of whether it is clearly and closely related to the host contract. See paragraph 12(b) of FASB Statement No. 133.

.12 A credit default swap (also known as credit derivative) is a form of swap contract. Under the terms of a credit default swap, one party agrees to make payments, usually ratably over the swap term but occasionally including an up-front payment, in exchange for the agreement by the counterparty to pay an agreed-upon value (usually par) for a debt instrument of a specified issuer, should the issuer enter into an event of default (as specified in the contract) during the swap term. Investment companies may purchase credit default swaps ("purchase protection") to hedge existing holdings, and may write swaps ("offer protection") as a means of creating a synthetic debt position in an underlying issuer with a term equal to that of the swap. They may also purchase or write swaps as a means to speculate on changes in creditworthiness of particular issuers. FASB Emerging Issues Task Force (EITF) Issues No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities," and No. 03-11, "Reporting Realized Gains and Losses on Derivative Instruments That Are Subject to FASB Statement No. 133 and Not 'Held for Trading Purposes' as Defined in Issue No. 02-3," provide accounting and financial reporting guidance for swaps, including credit default swaps.

Mergers of Funds

.13 Mergers and acquisitions of investment advisers increased substantially in 2006. There has been a similar upswing in the numbers of mergers of investment companies during 2006, as advisers consolidate investment company offerings, a typical result of adviser mergers, and other advisers continue efforts to eliminate funds that are not successful in the marketplace. You can find guidance about fund mergers in the section "Business Combinations" in Chapter 8 of the Audit and Accounting Guide *Investment Companies*. Paragraph 8.34 in the Guide states that a registration statement on SEC Form N-14 is filed in connection with a fund merger. Form N-14 contains information about the companies involved in the transaction, historical financial statements, pro forma financial statements, and additional pro forma financial information. Form N-14 instructions and Article 11 of Regulation S-X, as well as prior SEC "Dear CFO" letters,[3] may assist in understanding the requirements for pro forma financial statements and additional pro forma financial information in merger proxy statement and prospectus filings.

Hedge Fund Use of Side Pocket Arrangements

.14 Many hedge funds have adopted or expanded their use of side pocket arrangements. Side pockets are used typically to segregate investments in illiquid or restricted securities. Ownership of the side pocket is attributed on a pro rata basis to investors in the general fund at the time the side pocket arrangement is adopted. Subsequent investors in the general fund do not participate in the side pocket's performance. Investors with side pocket ownership cannot redeem their side pocket investments. Generally, side pocket investments are only liquidated upon a sale or other disposition of the investment, and only at the time of such a realization event does the general partner of the hedge fund generally take any performance fee or allocation.

.15 Side pocket arrangements raise a number of considerations for auditors. Management's determination of the fair value of the underlying investments may be subject to greater judgment than the fair value determination for other investments. Consider the controls over the valuation process and the expertise and

[3] You can obtain certain Securities and Exchange Commission (SEC) Division of Investment Management staff letters to the chief financial officers of investment company registrants and their independent public accountants on the SEC Web site at www.sec.gov/divisions/investment.shtml.

knowledge of those determining fair values. You can find auditing guidance that may assist you when auditing valuation of investments in Chapter 2 in the Audit and Accounting Guide *Investment Companies*. Also, be alert for the adoption or expanded use of side pocket arrangements and determine whether they are properly accounted for and disclosed in the financial statements, as, for example, when auditing accruals and expenses for performance fees and incentive allocations, and financial highlights disclosures in the financial statements, particularly total return and expense ratios. Consider the particular circumstances of the client to identify the specific accounting and auditing issues.

Performance Fees

.16 Performance-based advisory fees continue to be a focus of regulatory scrutiny for registered investment companies. In September 2006, the SEC announced the settlement of five enforcement actions for the computation of performance-based advisory fees in a manner contrary to the requirements of the Investment Advisers Act of 1940 (Advisers Act).[4]

.17 Be alert for changes to investment advisory contracts and the computation of performance-based advisory fees. Fund management and boards of directors may have intensified their scrutiny of the procedures used by registered investment companies to compute performance-based advisory fees for conformity with related laws and regulations. Refer to Rules 205-1 and 205-2 under the Advisers Act that govern performance-based compensation under advisory contracts. Consider the guidance in AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards,* vol. 1; AICPA, *PCAOB Standards and Related Rules*), on the auditor's responsibilities when a possible illegal act is discovered. The term "illegal acts" for purposes of AU section 317 (AICPA, *Professional Standards,* vol. 1; AICPA, *PCAOB Standards and Related Rules*), refers to violations of laws or governmental regulations. AU section 317.08 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), provides guidance for inquiries of management concerning the client's compliance with laws and regulations. AU section 317.10 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), provides guidance for consulting with the client's legal counsel or other specialists about the application of relevant laws and regulations to the circumstances and the possible effects on the financial statements.

New Pronouncements and Other Guidance[5]

Recent Auditing and Attestation Pronouncements and Related Guidance

.18 Presented below is a list of auditing, attestation, and related guidance issued since the writing of last year's Alert.[6] The AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) presents brief information about selected guidance listed. Guidance of particular interest for the investment companies industry is discussed in this section of this Alert. For information on auditing and attestation standards, quality control standards, and related guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/ and the PCAOB Web site at www.pcaobus.org (applicable to audits conducted in accordance with PCAOB Standards).

.19 As a reminder, SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards,* vol. 1, AU sec. 339), which was discussed in last year's Alert, is effective for audits of periods ending on or after December 15, 2006.

Auditing Standards Available on AICPA and PCAOB Web Sites

.21 The standards and interpretations promulgated by the Auditing Standards Board (ASB) are available free of charge by visiting the AICPA Audit and Attest Standards Team's page on the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/. Members and nonmembers alike can download the auditing, attestation, and quality control standards by choosing a section of the codification. You can also obtain copies of AICPA standards and other guidance by contacting the AICPA at (888) 777-7077 or online at www.cpa2biz.com.

> **Help Desk—**See the AICPA publication *AICPA Professional Standards* (product no. 005106kk) for AICPA professional standards applicable to nonpublic companies. *PCAOB Standards and Related Rules* (product no. 057199kk), developed by the AICPA, offers a comprehensive source of PCAOB Standards.

.22 The PCAOB has published its interim standards for audits conducted in accordance with PCAOB Standards on its Web site (www.pcaobus.org).

> **Help Desk—**See the AICPA Audit Risk Alert *SEC and PCAOB Alert—2006/07* (product no. 022497kk) for a thorough discussion of recent PCAOB developments including an update on new PCAOB pronouncements and other issuances.

The Risk Assessment Standards

.23 The ASB issued eight SASs that provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. The following table lists the eight SASs, and their effect on existing standards:

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	Amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), as amended

SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), as amended
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	Supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A), as amended
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	Supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A), as amended
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	Supersedes SAS No. 1, section 310, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 310), as amended, and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A), as amended
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	Together with SAS No. 110, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	Supersedes "Substantive Tests Prior to the Balance-Sheet Date" of SAS No. 45, *Omnibus Statement on Auditing Standards—1983* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), as amended; and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	Amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350), as amended

.24 The SASs emphasize the linkage between understanding the entity, assessing risks, and the design of further audit procedures. The SASs introduce the concept of risk assessment procedures, which are deemed necessary to provide a basis for assessing the risk of material misstatement. Risk assessment procedures along with further audit procedures, which consist of tests of controls and substantive tests, provide the audit evidence to support the auditor's opinion on the financial statements. According to the SASs, the auditor should perform risk assessment procedures to gather information and gain an understanding of the entity and its environment, including its internal controls; these procedures include inquiries, analytical procedures, and inspection and observation. Assessed risks and the basis for those assessments should be documented; therefore, auditors may no longer default to maximum control risk for an entity's risk assessment without documenting the basis for that assessment. The SASs also require auditors to consider and document how the risk assessment at the financial statement level affects individual financial statement assertions, so that auditors may tailor the nature, timing, and extent of their audit procedures to be responsive to their risk assessment. It is anticipated that generic audit programs will not be appropriate for all audit engagements, as risks vary between entities.

.25 The SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006; earlier application is permitted. In most cases, implementation of the SASs will result in an overall increased work effort by the audit team, particularly in the year of implementation. It also is anticipated that to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly.

.26 The AICPA has published the Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) and the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk) to assist in the implementation of the risk assessment standards.

SAS No. 112, Communicating Internal Control Related Matters Identified in an Audit

.27 SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. SAS No. 112 applies whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion). SAS No. 112 defines the terms *significant deficiency* and *material weakness*. SAS No. 112 requires that auditors (1) evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses, and (2) communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

.28 Some examples of potential control deficiencies that you might find in investment companies are:

- Inadequate monitoring of the financial accounting and reporting process to detect deficiencies in the preparation of financial highlight disclosures or errors in net asset value calculations.
- Lack of management oversight and/or review of the preparation of financial statements.
- Inadequate procedures to reconcile investment accounts to custodian records to support the existence assertion.
- Inadequate client expertise in regulatory reporting requirements resulting in the filing of erroneous information or the use of the incorrect form for regulatory filings.
- Inadequate procedures to monitor the determination of fair values of investments.
- Deficiencies in determining a registered investment company's qualification under Subchapter M of the Internal Revenue Code.

.29 SAS No. 112 is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier implementation is permitted. The AICPA has published the Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in the implementation of SAS No. 112.

SOP 06-1, Reporting Pursuant to the Global Investment Performance Standards

.30 The CFA Institute (formerly known as the Association for Investment Management and Research [AIMR®]) developed the AIMR Performance Presentation Standards (AIMR-PPS® standards) and the

Global Investment Performance Standards (GIPS® standards)[7] (collectively, the performance standards). Although compliance with the performance standards is voluntary, an investment management firm's claim of compliance with the performance standards is widely regarded as providing a competitive advantage. As of January 1, 2006, the AIMR-PPS standards converged with the GIPS standards and the AIMR-PPS standards no longer exist as a separate set of standards.[8]

.31 AICPA SOP 06-1, *Reporting Pursuant to the Global Investment Performance Standards*, provides guidance to practitioners for engagements to examine and report on aspects of a firm's compliance with the GIPS standards (a verification engagement); and on engagements to examine and report on the performance presentation of specific composites (a performance examination). Such examination engagements should be performed pursuant to AT section 101, *Attest Engagements* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*). AT section 101 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) permits the practitioner to report either on the assertions or directly on the subject matter to which the assertions relate.

.32 Illustrative attest reports, an example engagement letter, and an example representation letter are presented in the appendixes of SOP 06-1, including:

- Appendix A, "Example Engagement Letter: Verification and Performance Examination"
- Appendix B, "Example Management Representation Letter: Verification and Performance Examination"
- Appendix C, "Illustrative Attest Reports: Verification"
- Appendix D, "Illustrative Attest Reports: Verification and Performance Examination"
- Appendix F, "Illustrative Attest Reports: Successor Practitioner Report—Verification and Performance Examination"

.33 SOP 06-1 was issued in April 2006 and is effective upon issuance. SOP 06-1 supersedes SOP 01-4, *Reporting Pursuant to the Association for Investment Management and Research Performance Presentation Standards*.

Practice Aid Alternative Investments—Audit Considerations

.34 Investment companies, including funds of funds, may have investments for which a readily determinable fair value is not available. Such investments may be structured as limited partnerships, limited liability corporations, trusts, and corporations. They can include private investment funds that meet the definition of an investment company in the Audit and Accounting Guide *Investment Companies*, such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds.

.35 The Practice Aid *Alternative Investments—Audit Considerations* addresses the challenges associated with auditing such investments, referred to in the Practice Aid as alternative investments, focusing on the

---

[7] The phrase "Association for Investment Management and Research Performance Presentation Standards" is abbreviated in this Alert as the AIMR-PPS standards. The phrase "Global Investment Performance Standards" is abbreviated in this Alert as the GIPS standards. For information on the appropriate use of the AIMR-PPS and/or GIPS registered trademark, see the CFA Institute Web site www.cfainstitute.org.

[8] Investment management firms (referred to as "firms" in Statement of Position (SOP) 06-1, *Reporting Pursuant to the Global Investment Performance Standards*; see paragraph 9 of SOP 06-1 regarding the definition of a "firm") may continue to claim compliance with the AIMR-PPS standards on presentations that include performance through December 31, 2005. Once a firms performance presentation includes results for periods that begin after December 31, 2005, the firm may no longer claim compliance with the AIMR-PPS standards. All firms that previously claimed compliance with the AIMR-PPS standards are granted reciprocity for GIPS compliance for periods prior to January 1, 2006.

existence and valuation assertions associated with alternative investments. You can obtain the Practice Aid on the AICPA Web site at www.aicpa.org. Certain guidance in the Practice Aid is briefly discussed below.

.36 The auditor's consideration of the existence assertion would typically include confirming with the fund manager the investor entity's interest in the fund. In Appendix 1 of the Practice Aid, you will find an example confirmation for alternative investments. If a confirmation request is not returned to the auditor or details of the underlying investments are not otherwise provided, the auditor performs alternative procedures that are directed toward assessing the existence of the alternative investments. Depending upon the significance of the alternative investments to the investor's financial statements, it may be necessary for the auditor to perform additional alternative audit procedures, which may include:

- Observing management site visits or telephone calls to investee funds.
- Reviewing executed partnership, trust, limited liability corporation, or similar agreements.
- Inspecting other documentation supporting the investor's interest in the fund.
- Reviewing periodic statements from the fund or trustee.
- Vouching relevant cash receipts and disbursements.

.37 Management's responsibility for the valuation of alternative investment amounts as presented in the financial statements cannot under any circumstances be outsourced or assigned to a party outside of the investor entity's management. When alternative investments are accounted for at fair value, the valuation assertion may involve significant judgment by management in the assessment of the fair value of the investment. The auditor's consideration of the valuation assertion typically begins with understanding the process used by the investor entity's management to develop fair value estimates and the established controls relative to those estimates. An auditor may test management's fair value estimate as of the balance sheet date by using one or more of the following approaches:

- Confirm the alternative investment.
- Review and test the investor entity's significant assumptions and the underlying data in its valuation or its analysis of the assumptions and data obtained from the fund manager.
- Reconcile to audited financial statements as of the same date.
- Review transactions at or near the balance sheet date.

.38 If management estimates the fair value of a significant portion of the alternative investments as of an interim date, management needs a robust process and strong internal control over the roll-forward period to the balance sheet date. The auditor tests both the estimation process as of the interim date and the roll-forward process.

.39 As the inherent uncertainty in management's estimate of fair value increases, as well as the significance of the alternative investments to the financial statements, auditors may consider including an emphasis of matter paragraph in the auditor's report, such as the emphasis of matter paragraph illustrated in the Practice Aid, tailored for the specific facts and circumstances. Such paragraphs are not required and are included solely at the auditor's discretion.

.40 If the auditor is unable to obtain sufficient appropriate audit evidence to support the financial statement assertions, it will be necessary to qualify or disclaim an opinion on the financial statements due to a scope limitation. AU section 508.22–.26, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), provides guidance in determining the appropriate form of opinion. Scope limitations related to the sufficiency of evidence are different from situations in which the auditor concludes that the financial statements are materially misstated due to departures from generally accepted accounting principles (GAAP) related to inadequate disclosure of uncertainties inherent in the investment valuations, failure to apply a valuation method required by GAAP, or valuations that are not supported or are not reasonable. If the potential affect of a GAAP departure is material to the investor entity financial statements taken as a whole, the auditor issues a qualified opinion or an adverse opinion as described in AU section 508.35–.49 (AICPA *Professional Standards*, vol. 1).

PCAOB Staff Questions and Answers

.41 The PCAOB staff issued Questions and Answers *Adjustments to Prior-Period Financial Statements Audited By a Predecessor Auditor*. Topics addressed in the document include:

- How a predecessor auditor dates a report on reissued financial statements if the predecessor auditor audits the adjustments to the prior-period financial statements.
- Successor auditor responsibility with regard to adjustments if the predecessor auditor audits the adjustments made to prior-period financial statements.
- Factors relevant to a successor auditor to determine whether to audit only the adjustments to prior-period financial statements or whether a reaudit of the financial statements is necessary.

.42 Reporting examples are provided with certain answers. You can obtain the Questions and Answers on the PCAOB Web site at www.pcaobus.org.

Recent Independence and Ethics Pronouncements

.43 See the AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) for a thorough discussion of recent developments and key issues in the area of independence and ethics including an update on new independence and ethics pronouncements. Also, see the discussion "Registration of Hedge Fund Advisers" in the "Securities and Exchange Commission Developments" section of this Alert.

Recent Accounting Pronouncements and Related Guidance

.44 Presented below is a list of accounting pronouncements and other guidance issued since the writing of last year's Alert.[9] The AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) presents brief information about selected guidance listed. Guidance of particular interest for the investment companies industry is discussed in this section of this Alert. For information on accounting standards and other accounting guidance issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 157, Fair Value Measurements[10]

.45 FASB Statement No. 157, *Fair Value Measurements*, establishes a framework for measuring fair value in GAAP and requires expanded disclosures about fair value measurements. FASB Statement No. 157 applies under other accounting pronouncements that require or permit fair value measurement and does not require any new fair value measurements. FASB Statement No. 157 emphasizes that fair value is a market-based measurement. Appendix D of FASB Statement No. 157 lists Accounting Principles Board and FASB pronouncements that refer to fair value.

[10] See footnote 2 of this Alert.

.46 *Fair value* is defined in FASB Statement No. 157, paragraph 5, as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities. The definition of fair value also should be applied to instruments measured at fair value that are classified in stockholders' equity. A fair value measurement is for a particular asset or liability and should consider attributes specific to the asset or liability.

.47 A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability, which is the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity. In the absence of a principal market, a fair value measurement assumes a sale of an asset or transfer of a liability occurs in the most advantageous market, which is the market in which the asset would be sold with a price that maximizes the amount received or the liability transferred with a price that minimizes the amount paid. Transaction costs are not an attribute of the asset or liability and are accounted for according to the provisions of other accounting pronouncements and not as an adjustment of the price.

.48 A fair value measurement for an asset assumes the highest and best use of the asset by market participants. The highest and best use of the asset establishes the in-use or in-exchange valuation premise used to measure the fair value of the asset. A fair value measurement for a liability assumes that the liability is transferred to a market participant at the measurement date. The nonperformance risk (the risk that the obligation will not be fulfilled) relating to the liability is the same before and after its transfer. A reporting entity considers the effect of its credit risk on the fair value of the liability in all periods in which the liability is measured at fair value.

.49 At initial recognition of an asset or a liability, the reporting entity determines whether the transaction price represents fair value, considering factors specific to the transaction and the asset or liability. FASB Statement No. 157 nullifies the guidance in footnote 3 of EITF Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities."

.50 Valuation techniques consistent with the market approach, income approach, and/or cost approach that are appropriate in the circumstances and for which sufficient data are available are used to measure fair value. A single valuation technique will be appropriate in some cases and multiple valuation techniques will be appropriate in others. Valuation techniques shall be consistently applied. A change in the valuation technique may be appropriate and revisions in valuations resulting from a change are accounted for as a change in accounting estimate.

.51 The fair value hierarchy established by FASB Statement No. 157 prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

1. *Level 1 inputs*. Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available, with exceptions.
   - — If the reporting entity holds a large number of similar assets or liabilities that are required to be measured at fair value, a quoted price in an active market might be available but not readily accessible for each asset or liability individually. Fair value may be measured using an alternative pricing method such as matrix pricing.
   - — A quoted price in an active market might not represent fair value, for example, if significant events occur after the close of a market but before the measurement date. Reporting entities should establish and consistently apply a policy for identifying those events that might affect fair value measurements.

In either case, any alternative pricing methods used do not necessarily constitute Level 1 inputs. As discussed in FASB Statement No. 157, paragraph 25, the use of an alternative pricing method renders the fair value measurement a lower level measurement.

2. *Level 2 inputs*. Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and market-corroborated inputs.

3. *Level 3 inputs*. Unobservable inputs that are developed based on the best information available in the circumstances, which might include the reporting entity's own data.

.52 Level 1, Level 2, and Level 3 inputs based on bid and ask prices shall use the price within the bid-ask spread that is most representative of fair value in the circumstances. FASB Statement No. 157 does not preclude using mid-market pricing or other pricing conventions as a practical expedient. Bid-ask spread pricing methods appropriate under SEC Accounting Series Release 118 are appropriate under FASB Statement No. 157. See paragraph C91 of FASB Statement No. 157.

.53 FASB Statement No. 157, paragraph 27, prohibits the use of a blockage factor to value positions in financial instruments, which can be traded on an active market, even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price. The quoted price shall not be adjusted because of the size of the position in a financial instrument relative to trading volume. The guidance applies for positions in financial instruments (including blocks) held by all entities, including investment companies within the scope of the Audit and Accounting Guide *Investment Companies*. "Standstill" provisions on current accounting practice permitted under the Audit and Accounting Guide *Investment Companies* for measurement of blocks for certain investment companies are discussed in the "Notice to Readers" section and in footnote 20 to Chapter 2, "Investment Accounts," in the Guide.

.54 The expanded disclosures about fair value measurement are provided in FASB Statement No. 157, paragraphs 32 through 35. Reporting entities are required to disclose information that enables financial statement users to assess the inputs used to develop fair value measurements. Reporting entities are encouraged, but not required, to combine fair value information disclosed under FASB Statement No. 157 with the fair value information disclosed under other accounting pronouncements, if practicable.

.55 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided the reporting entity has not issued financial statements, including interim financial statements, for that fiscal year. An investment company within the scope of the Audit and Accounting Guide *Investment Companies* shall apply FASB Statement No. 157 retrospectively, as of the beginning of the fiscal year in which FASB Statement No. 157 is initially applied, to a position held in a financial instrument that trades in an active market and that was measured at fair value using a blockage factor prior to initial application of FASB Statement No. 157. At initial application, a difference between the carrying amounts and the fair values of those instruments is recognized as a cumulative-effect adjustment to the opening balance of retained earnings (or other appropriate components of equity or net assets in the statement of financial position) for that fiscal year, presented separately. FASB Statement No. 154, *Accounting Changes and Error Corrections*, disclosure requirements for a change in accounting principle do not apply.

FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes

.56 FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an Interpretation of FASB Statement No. 109, *Accounting for Income Taxes*, prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Guidance is provided on derecognition, classification, interest and penalties, unrecognized tax benefits, accounting in interim periods, disclosures, and transition. FASB Interpretation No. 48 applies to registered investment companies whose tax liability is subject to 100 percent credit for dividends paid and potentially subject to income taxes.

.57 A two-step process that separates recognition from measurement is required. In the first step, an enterprise determines whether a tax position has met the recognition threshold. The enterprise determines whether it is more likely than not, based on the technical merits, that the position will be sustained upon examination, including resolution of any related appeals or litigation processes. *More likely than not* in FASB Interpretation No. 48 means a likelihood of more than 50 percent. Presume that the tax position will be examined by the relevant taxing authority that has full knowledge of all relevant information. The second step is measuring a tax position that meets the recognition threshold. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Measurement of a tax position that meets the more-likely-than-not recognition threshold shall consider the amounts and probabilities of the outcomes that could be realized upon ultimate settlement using the facts, circumstances, and information available at the reporting date. Previously recognized tax positions are derecognized in the first period in which it is no longer more likely than not that the tax position would be sustained upon examination. Use of a valuation allowance is not an appropriate substitute for the derecognition of the tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by FASB Interpretation No. 48.

.58 When tax law requires payment of interest on an underpayment of income taxes, interest expense is recognized in the first period the interest would begin accruing according to the provisions of the relevant tax law. If a tax position does not meet the minimum statutory threshold to avoid payment of penalties, an expense for the amount of statutory penalty is recognized in the period in which the enterprise claims or expects to claim the position in the tax return. If penalties were not recognized when the position was initially taken, the expense is recognized in the period in which the enterprise's judgment about meeting the minimum statutory threshold changes.

.59 If the more-likely-than-not recognition threshold is not met in the period for which a tax position is taken or expected to be taken, the benefit of the tax position is recognized in the first interim period that meets any one of three conditions:

1. The more-likely-than-not recognition threshold is met by the reporting date.
2. The tax matter is ultimately settled through negotiation or litigation.
3. The statute of limitations for the relevant taxing authority to examine and challenge the tax position has expired.

.60 Previously recognized interest and penalties associated with tax positions that subsequently meet one of the three conditions are derecognized in the period that condition is met.

.61 Required disclosures include the policy on classification of interest and penalties, a tabular reconciliation of the total amounts of unrecognized tax benefits at the beginning and end of the period, and the total amounts of interest and penalties recognized in the statement of operations and in the statement of financial position.

.62 FASB Interpretation No. 48 is effective for fiscal years beginning after December 15, 2006. Earlier adoption is permitted as of the beginning of the enterprise's fiscal year, provided the enterprise has not issued financial statements, including interim financial statements, for that fiscal year.

.63 The AICPA "Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48" presents a summary of FASB Interpretation No. 48, as well as related accounting, auditing, and tax issues. You can obtain the Practice Guide on the AICPA Web site at www.aicpa.org.

.64 The December 22, 2006, SEC staff "Letter to ICI re: Implementation of FASB Interpretation No. 48" provides the investment companies industry with guidance for applying FASB Interpretation No. 48. The letter is available on the SEC Web site at www.sec.gov/divisions/investment/letter_mutual_fund_fin_48.htm. A brief discussion of the SEC staff letter is presented below. See also the discussion "SEC Staff Reviews of Financial Statements" in the "Regulatory Developments" section of this Alert.

.65 The informal guidance of the taxing authority is often an important form of evidence when assessing the technical merits of a tax position. The provisions of FASB Interpretation No. 48 permit, and necessitate, the consideration of such informal guidance. Pursuant to paragraph 7(b) of FASB Interpretation No. 48, administrative practices and precedents of the taxing authority should be considered in a fund's analysis. Funds can, and should, consider the taxing authority's practice of addressing fund industry issues on a prospective basis as part of the administrative practices and precedents of the taxing authority. When performing this analysis pursuant to paragraph 7(a) of FASB Interpretation No. 48, a fund must presume that the tax position will be examined by a taxing authority that has knowledge of all relevant information. FASB Interpretation No. 48 should not be read to limit the types or forms of evidence that may be considered.

FSP No. FTB 85-4-1, "Accounting for Life Settlement Contracts by Third-Party Investors"

.66 FSP No. FTB 85-4-1, "Accounting for Life Settlement Contracts by Third-Party Investors," provides initial and subsequent measurement guidance and financial statement presentation and disclosure guidance for investments by third-party investors in life settlement contracts. Transactions in which a broker facilitates settlement transactions between the policy owner and the investor, and transactions that do not involve a broker, are addressed.

.67 An investor may elect to account for investments in life settlement contracts using either the investment method or the fair value method. Elections are irrevocable and are made on an instrument-by-instrument basis. Investments that are remeasured at fair value are reported by investors on the face of the statement of financial position separately from those accounted for under the investment method. Investment income from investments in life settlement contracts that are remeasured at fair value and investment income from those life settlement contracts accounted for under the investment method are reported separately on the face of the income statement. Cash receipts and cash payments related to life settlement contracts are classified pursuant to FASB Statement No. 95, *Statement of Cash Flows*, based on the nature and purpose for which the life settlements were acquired.[11] FSP No. FTB 85-4-1 requires certain disclosures, including disclosure of the investor's accounting policy for life settlement contracts and disclosures for the fiscal period of adoption.

.68 FSP No. FTB 85-4-1 shall be applied to fiscal years beginning after June 15, 2006. Earlier application is permitted as of the beginning of the investor's fiscal year, provided that the investor has not yet issued its first quarter financial statements for that fiscal year.

Nonauthoritative TPAs for Investment Companies

.69 AICPA TPA 6910.21, "Recognition of Premium/Discount on Short Positions in Fixed-Income Securities," provides that when recognizing interest expense on short positions, an investment company should recognize all economic elements of interest, including premium and discount. Chapter 2 in the Audit and

[11] Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*, exempts investment companies meeting certain conditions from the requirements of FASB Statement No. 95, *Statement of Cash Flows*.

Accounting Guide *Investment Companies* requires that investment companies amortize premiums and discounts on their investments, referring to long positions, but is silent as to whether similar accounting is required for short positions.

.70 AICPA TPA 6910.22, "Presentation of Reverse Repurchase Agreements," provides that investment companies should present liabilities for reverse repurchase agreements in their financial statements at amounts payable. A reverse repurchase agreement denominated in a currency that differs from the reporting currency should be translated at the current exchange rate.

.71 AICPA TPA 6910.23, "Accounting Treatment of Offering Costs Incurred by Investment Partnerships," provides that an investment partnership that continually offers its interests should defer offering costs incurred prior to the commencement of operations and then amortize them to expense over the period that it continually offers its interests, up to a maximum of 12 months. The straight-line method of amortization should generally be used. If the offering period terminates earlier than expected, the remaining deferred balance should be charged to expense.

.72 AICPA TPA 6910.24, "Meaning of Continually Offer Interests," provides guidance for how an investment partnership should determine if it continually offers its interests.

Audit and Accounting Issues and Developments[12]

Investments in Inverse Floaters

.73 Your investment company clients may make investments in municipal inverse floaters. They have been widely used by mutual funds and other investment companies over many years under various names: tender option bonds, RITES, RIBs, and DRIVERS, among others. Some of these investments are initiated with a transaction involving the transfer of municipal bonds from the investment company client. Consider whether these transfers of municipal bonds should be accounted for as secured borrowings rather than sales according to FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*.

Audit and Accounting Guide *Investment Companies*

.74 The Audit and Accounting Guide *Investment Companies* is updated periodically with conforming changes to reflect the issuance of new authoritative pronouncements and regulatory developments. The most recent update of the Guide was prepared to reflect conforming changes as of May 1, 2006 (product no. 012625kk). Conforming changes to the 2006 edition of the Guide include:

- Update of Chapter 7 to discuss the guidance in FSP Nos. AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*. The financial statement presentation and disclosure guidance in FSP Nos. AAG INV-1 and SOP 94-4-1 is effective for financial statements for annual periods ending after December 15, 2006. Investment portfolio disclosures resulting from the adoption of the FSP are discussed in "Investments" in this section in this Alert. When implementing the guidance in FSP Nos. AAG INV-1 and SOP 94-4-1, note that paragraph 11 requires disclosure of a reconciliation between the beginning and ending balance of the amount presented on the statement of assets and liabilities that represents the difference between net assets reflecting all investments at fair value and net assets for each period in which a statement of changes in net assets is presented. To be considered within the scope of FSP Nos. AAG INV-1 and SOP 94-4-1 as of the effective date and thereafter, any portion of the investment company's net assets

[12] See footnote 1 in this Alert.

attributable to a particular plan investee that is not held in trust in a qualified employer-sponsored defined-contribution plan for the benefit of participants is not permitted to increase after January 15, 2006, except for reinvestment of income earned.

- Addition of footnote 32 to paragraph 7.85 to inform readers that the AICPA has released nonauthoritative TPAs 6910.16 through 6910.20 that address nonregistered investment partnership financial statement presentation and disclosures.

- Addition of paragraph 11.07 (for nonregistered investment companies) and paragraph 11.11 (for registered investment companies) to illustrate the optional wording that may be added to reports in accordance with AU section 9508.85–.88, "Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards" (AICPA, *Professional Standards*, vol. 1). AU section 9508.85–.88 (AICPA, *Professional Standards*, vol. 1), provides for audits of nonissuers an example of additional language that may be added to an auditor's standard report to explain that an audit includes consideration of internal control over financial reporting as a basis for designing audit procedures but not for the purpose of expressing an opinion on the effectiveness of internal control over financial reporting.

- Presentation in paragraph 11.19 of the revised illustrative report that the AICPA Investment Companies Expert Panel developed to replace the illustrative "Report on Internal Control Required by The SEC Under Form N-SAR."

- Addition of a new section, "Reporting Pursuant to the Global Investment Performance Standards," to Chapter 11 to reflect the guidance in SOP 06-1. The new section replaces the section "Reporting Pursuant to the Association for Investment Management and Research Performance Presentation Standards." See the related discussion "SOP 06-1, *Reporting Pursuant to the Global Investment Performance Standards*" in the "New Pronouncements and Other Guidance" section of this Alert.

- Addition of new Appendix G, "References to AICPA Technical Practice Aids."

.75 The Guide is an interpretive publication. It is the ASB's intention to make conforming changes to the interpretive publications over the next several years to remove any language that would imply a professional requirement where none exists. See the "Notice to Readers" in the Guide, AU section 120, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1), and AT section 20, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1).

Investments[13]

Significance to the Overall Audit

.76 An investment company's securities portfolio typically comprises substantially all its net assets. Accordingly, the audit of an investment company's investment accounts is a significant portion of the overall audit because of the relative significance of those accounts and of the related income accounts. Auditors may identify changes to the operations and procedures for investment valuation. In particular, investment companies may have implemented operational and procedural changes for valuing investments in foreign securities following the focus in recent years by the SEC and by investors on market timing in funds investing overseas.

Guidance for Auditing Investments

.77 In the table that follows, you will find brief summaries of selected auditing guidance for consideration when auditing investment accounts.

---

[13] See footnote 2 in this Alert.

Paragraphs 2.99 through 2.183 of the Audit and Accounting Guide *Investment Companies*	Guidance on auditing procedures for investment accounts. Among the matters discussed are the principal objectives in auditing the investment accounts, consideration of internal control, and examination of transactions and detail records, including portfolio transactions with affiliates and the valuation of investments. The auditing procedures in paragraph 2.142 specify that the auditor should review such relevant investment company documents as the latest prospectus, statement of additional information, certificate of incorporation, bylaws, and minutes of the board of directors' and shareholders' meetings to gain an understanding of the investment company's investment objectives and restrictions, and consider whether management has a program to prevent, deter, or detect noncompliance with the investment company's investment restrictions. The auditor should also consider whether the program has identified noncompliance with the stated investment restrictions and test the operation of the program to the extent considered necessary. An investment company's failure to comply with its stated investment restrictions may be considered a possible illegal act that may have an indirect effect on the financial statements of the fund. See paragraphs 2.128 and 2.142 regarding the SEC requirement in Rule 38a-1 for appointment of a chief compliance officer responsible for administering and for reviewing annually an investment company's policies and procedures designed to prevent violation of federal securities laws. Chief compliance officers were required in 2006 to provide the first reports on the operation of the policies and procedures to fund boards.
Paragraphs 5.55 through 5.87 of the Audit and Accounting Guide *Investment Companies*	Audit considerations for complex capital structures including master-feeder funds and funds of funds.
AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*)	AU section 317 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), prescribes the nature and extent of the consideration an independent auditor should give to the possibility of illegal acts by a client in an audit of financial statements in accordance with generally accepted auditing standards (GAAS) and provides guidance on the auditor's responsibilities when a possible illegal act is detected. Auditors may also be required, under certain circumstances, pursuant to the Private Securities Litigation Reform Act of 1995 (codified in Section 10A(b)1 of the

(continued)

	Securities Exchange Act of 1934), to make a report to the SEC relating to an illegal act that has a material effect on the financial statements. See paragraph 2.142 in the Audit and Accounting Guide *Investment Companies*.
AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*)	AU section 328 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) provides guidance on auditing fair value measurements and disclosures. AU section 328.23 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) states that based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures. Substantive tests of the fair value measurements may involve (*a*) testing management's significant assumptions, the valuation model, and the underlying data, (*b*) developing independent fair value estimates for corroborative purposes, or (*c*) reviewing subsequent events and transactions.
AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*)	AU section 329 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits. For significant risks of material misstatement, AU section 329.09 (AICPA, *PCAOB Standards and Related Rules*), provides that it is unlikely that audit evidence obtained from substantive analytical procedures alone will be sufficient. The Audit Guide *Analytical Procedures* (with conforming changes as of May 1, 2006) (product no. 012556kk) provides practical guidance to auditors on the effective use of analytical procedures.
AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) and the companion Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (with conforming changes as of May 1, 2006) (product no. 012526kk)	AU section 332 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, investments in debt and equity securities, and investments accounted for under Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*. The companion Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, provides practical guidance for implementing AU section 332 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*).

AU section 9332.01–.04, "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist" (AICPA, *Professional Standards*, vol. 1)	AU section 9332.01–.04 (AICPA, *Professional Standards*, vol. 1) provides guidance for auditors of nonissuers regarding the adequacy of audit evidence, with respect to the existence and valuation assertions in AU section 332 (AICPA, *Professional Standards*, vol. 1), in confirmations received from third parties where a readily determinable fair value does not exist, and the auditor determines auditing procedures should include verifying the existence and testing the measurement of the investments. For example, an entity may have an investment in a hedge fund that is reported at fair value, but for which a readily determinable fair value does not exist. Further, the hedge fund may own interests in investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. As part of the auditor's procedures in accordance with AU section 332 (AICPA, *Professional Standards*, vol. 1), an auditor typically would satisfy the existence assertion through either confirmation with the hedge fund, examination of legal documents, or other means. In confirming existence, the auditor may request the hedge fund to indicate or confirm the fair value of the entity's investment in the hedge fund, including the fair value of investments held by the hedge fund. In some circumstances, the hedge fund will not provide detailed information about the basis and method for measuring the entity's investment in the hedge fund, nor will they provide information about specific investments held by the hedge fund. AU section 9332.01–.04 (AICPA, *Professional Standards*, vol. 1), provides illustrative examples of information auditors may receive in a third-party confirmation (in the aggregate or on a security-by-security basis), and interpretative guidance for auditors about the adequacy of audit evidence provided in those examples.
Practice Aid *Alternative Investments—Audit Considerations*	The Practice Aid is discussed in the "Recent Auditing and Attestation Pronouncements and Related Guidance" section of this Alert.
AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*)	AU section 336 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) provides guidance for auditors who use the work of a specialist in performing an audit in accordance with generally accepted auditing standards. The examples listed in AU section 336.07 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), of the types of matters that the auditor may decide require him or her to consider using the work of a specialist include valuations of complex financial instruments and restricted securities.

(continued)

AU section 9508.76–.84, "Effect on Auditor's Report of Omission of Schedule of Investments by Investment Partnerships That Are Exempt From Securities and Exchange Commission Registration Under the Investment Company Act of 1940" (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*)	AU section 508.41, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), addresses the effect of inadequate disclosure of information essential for fair presentation of the financial statements on the auditor's report. AU section 508.42 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) provides an example of a report qualified for inadequate disclosure, assuming that the auditor has concluded that it is not practicable to present the required information and the effects are such that the auditor has concluded an adverse opinion is not appropriate. AU section 9508.81 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) states that the example in AU section 508.42 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) does not change the requirement in AU section 508.41 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) for the auditor to issue a qualified or adverse opinion and also to provide the missing information, if practicable. If financial statements of an investment partnership that is exempt from SEC registration do not include the required Schedule of Investments disclosures and it is practicable for the auditor to determine them or any portion thereof, AU section 9508.81 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) states that the auditor should include the information in his or her report expressing the qualified or adverse opinion. AU section 9508.82 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*) states that ordinarily it would be practicable for the auditor to obtain and present the information about investments constituting more than 5 percent of net assets. However, due to the need to categorize the investments, the auditor might be in the position of preparer of financial information and, therefore, would not include the schedule in his or her report.

Accounting for Investments

.78 In the table that follows, you will find brief summaries of selected accounting guidance for consideration when auditing investment accounts.

Paragraph 1.33 in the Audit and Accounting Guide *Investment Companies* (the Guide)	The fair value of an investment is the amount at which the investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The best evidence of fair value is the quoted market price in an active market. In the absence of a quoted market

	price, amounts representing estimates of fair values using methods applied consistently and determined in good faith by the board of directors should be used. FASB Statement No. 157 was issued in 2006 and defines fair value. FASB Statement No. 157 is discussed in the "Recent Accounting Pronouncements and Related Guidance" section of this Alert.
Paragraphs 2.19 through 2.98, and paragraph 2.179, in the Guide	Accounting guidance including methods of valuing investments, defaulted debt securities, expenditures in support of defaulted debt securities, lending of portfolio securities, and accounting for foreign investments. As discussed in paragraph 2.179, for items valued using a valuation model, the auditor should determine whether the investment company client has made appropriate disclosures about the method(s) and significant assumptions used to estimate the fair values of such investments. As discussed in paragraph 2.34, in December 2003, the SEC adopted Rule 38a-1 under the Investment Company Act of 1940. In the adopting release, the SEC stated that Rule 38a-1 requires registered investment companies and business development companies (referred to in the release as "funds") to adopt policies and procedures that require the fund to monitor for circumstances that may necessitate the use of fair value prices; establish criteria for determining when market quotations are no longer reliable for a particular portfolio security; provide a methodology or methodologies by which the fund determines the current fair value of the portfolio security; and regularly review the appropriateness and accuracy of the method used in valuing securities, and make any necessary adjustments. In April 2004, the SEC adopted rules requiring investment companies offering their shares on Forms N-1A and N-3 to provide a brief explanation in their prospectuses of the circumstances under which they will use fair value prices and the effects of using fair value pricing. FASB Statement No. 157 establishes a framework for measuring fair value in GAAP and prohibits the use of a blockage factor. FASB Statement No.157 is discussed in the "Recent Accounting Pronouncements and Related Guidance" section of this Alert.
Chapter 3 in the Guide	Chapter 3 discusses pronouncements that provide accounting and financial statement presentation guidance for various types of financial instruments.

(continued)

Paragraphs 7.14 through 7.19 in the Guide	Guidance for reporting the Schedule of Investments. Chapter 7 of the May 1, 2006, edition of the Guide was updated with conforming changes to reflect the issuance of FSP Nos. AAG-INV-1 and SOP 94-4-1. FSP Nos. AAG-INV-1 and SOP 94-4-1 requires that investment companies disclose, for fully benefit-responsive investment contracts, as part of the schedule of investments, the fair value of each investment contract, including separate disclosure of the fair value of the wrapper contract and the fair value of each of the corresponding underlying investments, if held by the fund, in that investment contract. Major credit ratings of the issuer or wrapper provider for each investment contract are disclosed as part of the schedule of investments.
FASB EITF Issues No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities," and No. 03-11, "Reporting Realized Gains and Losses on Derivative Instruments That Are Subject to FASB Statement No. 133 and Not 'Held for Trading Purposes as Defined in Issue No. 02-3'"	See the highlights of the March 10, 2004, meeting of the Investment Companies Expert Panel, available on the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_investco.htm. The Regulatory Update section notes that the SEC staff believes that for investment companies, all fair value adjustments for interest rate swap contracts and other derivative contracts should be reflected in unrealized appreciation/depreciation and realized gains and losses upon a realization event, including periodic payments. Periodic payments under interest rate swaps and other derivative contracts are not reported as adjustments to investment income. See the highlights of the December 2, 2003, meeting of the Investment Companies Expert Panel for information about the financial statement presentation of realized gains and losses and unrealized gains and losses by investment companies.
SEC *Codification of Financial Reporting Policies* Section 404.02, *Accounting for Interest Collected on Defaulted Bonds* Section 404.03, *Accounting, Valuation, and Disclosure of Investment Securities* Section 404.04, *Restricted Securities* Section 404.05, *Money Market Funds*	See Sections 404.03 and 404.04 for guidance on accounting, valuation, and disclosure of investment securities and on restricted securities, including the factors to be considered in, and the responsibilities for and methods used for, the valuation of securities for which market quotations are not readily available.
Regulation S-X, Article 6 and Article 12	Rules 6.03, 6.04, 6.05, 12-12, 12-12A, 12-12B, 12-12C, 12-13, and 12-14 apply to registered investment companies. Small Business Investment Companies (SBICs) are covered in Article 5. Part 107 of the Small Business Administration (SBA) rules and

	regulations includes guidance on proper techniques and standards for valuing portfolios for purposes of regulatory reporting to the SBA.
SEC Division of Investment Management staff interpretive letters:[14] — Letter from Douglas Scheidt, associate director and chief counsel, SEC Division of Investment Management, to Craig S. Tyle, Investment Company Institute, December 8, 1999 (1999 Letter). — Letter from Douglas Scheidt, associate director and chief counsel, SEC Division of Investment Management, to Craig S. Tyle, Investment Company Institute, April 30, 2001 (2001 Letter).	The 1999 Letter clarified that market quotations for portfolio securities are not readily available when the exchanges or markets on which those securities trade do not open for an entire day, and that funds accordingly must price those securities based on a determination of fair value; provided additional guidance regarding the process of fair value pricing; described certain factors that funds should consider when pricing portfolio securities at fair value; and discussed the obligations of fund boards of directors for pricing portfolio securities at fair value and measures that boards may take when discharging those responsibilities. The 1999 Letter reaffirmed that SEC Accounting Series Releases No. 113 and No. 118 continue to represent the views of the SEC on securities valuation. The 2001 Letter stated the SEC staff's views on the obligations of funds and their directors under the Investment Company Act of 1940 to determine in good faith the fair value of the funds' portfolio securities when market quotations are not readily available, as well as other topics, such as the valuation of securities traded on foreign exchanges and the inappropriate use of fair value pricing for securities for which market quotations are readily available.
SEC Release No. IC-26418, *Disclosure Regarding Market Timing and Selective Disclosure of Portfolio Holdings*	Requires investment companies offering their shares on Forms N-1A and N-3 to provide a brief explanation in their prospectuses of the circumstances under which they will use fair value prices and the effects of using fair value pricing.

Investment Strategies Achieved by Funds Investing in Other Funds[15]

.79 A recent development in the investment companies industry is the increase in the number of registered funds that invest in another fund as regulations evolve to permit such investment activity. Funds might achieve their investment strategy by investing most of their investable assets in another fund or other funds, commonly referred to as a *fund of funds structure*. Fund of funds structures may provide for consolidation and greater efficiency in investment of a certain asset class.

.80 Accounting and auditing guidance for funds of funds is found in Chapter 5, "Complex Capital Structures," in the Audit and Accounting Guide *Investment Companies*. Consider whether recent industry developments regarding the use of funds of funds may indicate the existence of auditing issues in addition to those addressed in that guidance. Some examples of additional audit issues to consider are:

[14] You can obtain these documents on the SEC Web site at www.sec.gov.

[15] See footnote 2 in this Alert.

- To the extent an investor fund invests in a number of nonaffiliated investment companies, what audit procedures should the auditor perform on investee fund financial information that is included in the investor fund financial statements?
- What procedures should an auditor of a fund of registered funds perform when auditing the valuation of the underlying funds that are managed by an affiliated entity, especially if the year-ends differ or the affiliated funds are audited by another firm?
  - — How are audit procedures for auditors of nonissuers affected by AU section 9332.01–.04 (AICPA, *Professional Standards*, vol. 1)?
  - — Can the audited financial statements of the investee funds be utilized as audit evidence to the extent the fiscal years of the investee funds and the investor fund correspond?
- Are there concerns for a principal auditor if most of the assets of the investor fund are invested in investee funds that are audited by other audit firms?
- For a registered fund of funds in which the investee fund shares are held by a transfer agent, should the wording of the audit opinion that refers to the confirmation process be modified? What are the audit considerations if the transfer agent and the investee funds are affiliated with the investor fund?

.81 See the discussion "Securities and Exchange Commission Developments" in this Alert for information about recent rulemaking for fund of funds investments.

Regulatory Developments[16]

.82 In this section of the Alert, we briefly summarize selected regulatory developments since the writing of last year's Alert that have particular interest for auditors and their clients in the investment companies industry. See the "Information Sources" table at the end of this Alert for a list of some Web sites that can provide additional information on regulatory developments.

Securities and Exchange Commission Developments[17]

.83 The complete text of SEC final rules discussed in this section of this Alert, rules adopted subsequent to the writing of this Alert, proposed rules, and other information about SEC regulations and developments can be obtained from the SEC Web site at www.sec.gov.

Final Rules

.84 Brief summaries about final rules released by the SEC since the writing of last year's Alert and that are of particular interest for the investment companies industry are provided in this section of the Alert.

- *Rulemaking for EDGAR System* (Releases No. IC-26990A, No. 33-8590A, and No. 34-52052A). Last year's Alert discussed a final SEC rule (see SEC Release No. IC-26990) that expands the information that certain investment company filers are required to submit to the SEC through the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) system. The SEC made technical corrections in 2006 to Part 232 of Regulation S-T. Effective date: February 8, 2006. The final rule was published in the February 14, 2006, *Federal Register*.
- *Technical Amendments to Form ADV, Form ADV-W, Form ADV-H, Form ADV-E* (Release No. IA-2504). The SEC issued technical amendments to Form ADV, Form ADV-W, and Form ADV-E to reflect the addition of the U.S. Virgin Islands to the group of states with investment adviser statutes. Technical

[16] See footnote 1 in this Alert.

[17] See footnote 2 in this Alert.

amendments to Form ADV and Form ADV-H update the SEC mailing address. Effective date: April 7, 2006. The final rule was published in the April 6, 2006, *Federal Register*.

- *Fund of Funds Investments* (Releases No. IC-27399 and No. 33-8713). Historically, Section 12(d) of the Investment Company Act of 1940 (the 1940 Act) limits a registered investment company's ability to invest in other investment companies. Except for a limited number of registered funds that receive exemptive orders from the SEC, such fund of funds structures have been limited to unregistered investment companies. Section 12(d) was amended in 1996 to permit registered investment companies to invest in other investment companies provided that both the investor and investee funds were part of the same group of investment companies (affiliated funds). See paragraph 5.22 in the Audit and Accounting Guide *Investment Companies*. In 2006, the SEC adopted the following three new rules under Section 12(d):

  — *Rule 12d1-1: Exemptions for investments in money market funds.* Rule 12d1-1 provides exemption from Section 12(d)(1), Section 17(a), Section 57, and Rule 17d-1 under the 1940 Act, and is designed to permit cash sweep arrangements. If specified conditions are satisfied, investment companies, including business development companies and other closed-end investment companies, are permitted to invest an unlimited amount of uninvested cash in shares of money market funds in the same fund complex or a different fund complex, rather than directly in short-term investments. The investment would have to be consistent with the fund's investment objectives and policies. The acquired fund may be an unregistered money market fund that operates like a money market fund registered under the 1940 Act. The final rule permits unregistered funds to invest their cash in shares of a registered money market fund and eliminates most conditions included in SEC exemptive orders. One condition that was retained precludes the acquiring fund from paying a sales load, distribution fee, or service fee on acquired fund shares. Effective date: July 31, 2006.

  — *Rule 12d1-2: Exemptions for investment companies relying on Section 12(d)(1)(G) of the Act*. Rule 12d1-2 codifies and expands three types of relief provided for affiliated funds of funds. First, Rule 12d1-2(a)(1) permits an affiliated fund of funds to acquire securities of funds that are not part of the same group of investment companies, subject to Section 12(d)(1)(A) or Section 12(d)(1)(F) limits. Second, Rule 12d1-2(a)(2) provides an exemption from Section 12(d)(1)(G) of the 1940 Act to permit an affiliated fund of funds to invest, consistent with the fund's investment policies, directly in securities not issued by a fund. Third, Rule 12d1-2(a)(3) permits an affiliated fund of funds to invest in affiliated or unaffiliated money market funds in reliance on Rule 12d1-1. The investor fund must comply with the conditions in Rule 12d1-1. Effective date: July 31, 2006.

  — *Rule 12d1-3: Exemptions for investment companies relying on Section 12(d)(1)(F) of the Act*. A registered investment company relying on Section 12(d)(1)(F) to invest all its assets in other registered investment companies is allowed under Rule 12d1-3 to charge sales loads greater than 1 percent, provided that the aggregate sales load any investor pays does not exceed the limits on sales loads in Rule 2830 of the Conduct Rules of the National Association of Securities Dealers for funds of funds. Effective date: July 31, 2006.

  The SEC amended Form N-1A,[18] Form N-2,[19] Form N-3,[20] Form N-4,[21] and Form N-6[22] to require disclosures about acquired fund expenses in the fee table. The disclosures are required for all new registration statements and all post-effective amendments that are annual updates to effective registration statements on those forms filed on or after January 2, 2007. The final rule was published in the June 27, 2006, *Federal Register*.

[18] See Form N-1A, Item 3. Risk/Return Summary: Fee Table.

[19] See Form N-2, Item 3. Fee Table and Synopsis.

[20] See Form N-3, Item 3. Synopsis or Highlights.

[21] See Form N-4, Item 3. Synopsis.

[22] See Form N-6, Item 3. Risk/Benefit Summary: Fee Table.

- *Executive Compensation and Related Person Disclosure* (Releases No. IC-27444A and No. 33-8732A). The SEC amended the required disclosures for executive and director compensation,[23] related person transactions,[24] director independence and other corporate governance matters,[25] and security ownership of officers and directors,[26] in proxy and information statements, periodic and current reports, and other filings with the SEC.[27] The amendments change the persons covered by disclosure requirements, and the threshold for disclosure in proxy and information statements and registration statements, of certain interests, transactions, and relationships of directors, raising it from $60,000 to $120,000.[28] Amended disclosures generally have to be provided in plain English. Information that registered investment companies (other than business development companies) previously were required to provide under Item 7 of Schedule 14A is now required by Item 22(b) of Schedule 14A. Conforming amendments were made to Form N-CSR to add cross references to Item 407 of Regulation S-K and to Item 22(b)(15) of Schedule 14A. Business development companies are required to apply the same disclosure requirements for executive compensation that were adopted for operating companies in Item 402 of Regulation S-K.[29] This includes providing a Compensation Discussion and Analysis, and Summary Compensation Table, and covering the same persons as operating companies in compensation disclosure. Disclosure of compensation of members of the advisory board or certain affiliated persons is no longer required in registration statements. Business development companies are also not required to include compensation from the "fund complex" in proxy and information statements and registration statements. Effective date: November 7, 2006. Registered investment companies have to comply with the disclosure requirements in initial registration statements and post-effective amendments that are annual updates to effective registration statements on Form N-1A, Form N-2 (except those filed by business development companies), and Form N-3, and in any new proxy or information statements that are filed on or after December 15, 2006. For business development companies, Form 10-K compliance is required for fiscal years ending on or after December 15, 2006. For proxy and information statements, compliance is required for any new proxy or information statement filed on or after December 15, 2006. The final rule was published in the September 8, 2006, *Federal Register*. The SEC requested additional comment about proposed compensation disclosures for up to three additional highly compensated employees. See Release No. 33-8735.

- *Mutual Fund Redemption Fees* (Release No. IC-27504). Funds are required by Rule 22c-2 under the 1940 Act, which was adopted in 2005, to enter into written agreements with their financial intermediaries that require the intermediaries to provide the funds with access to information about certain shareholder identity and transaction information, regardless of whether the fund imposes a redemption fee. Each fund determines when it should receive that information.[30] The compliance date for Rule 22c-2 was October 16, 2006. The SEC revised Rule 22c-2 in 2006. The definition of "financial intermediary" was amended to limit the types of intermediaries with which funds must enter into shareholder information agreements by excluding from that definition any entity that the fund treats as an "individual investor" for purposes of the fund's policies intended to eliminate or reduce

---

[23] See Item 402 of Regulation S-K. In December 2006, the SEC issued interim final rules together with a request for further comments. See SEC Release No. 33-8765.

[24] See Item 404 of Regulation S-K.

[25] See new Item 407 of Regulation S-K.

[26] See Item 403 of Regulation S-K.

[27] See the release for a complete list of amendments.

[28] See Schedule 14A, Item 22(b)(7), Item 22(b)(8), and Item 22(b)(9); Form N-1A, Item 12(b)(6), Item 12(b)(7), and Item 12(b)(8); Form N-2, Item 18.9, Item 18.10, and Item 18.11; and Form N-3, Item 20(h), Item 20(i), and Item 20(j).

[29] Business development companies are required to respond to Item 11 of Form 10K, Items 7, 8, and 22(b) of Schedule 14A, and new Item 18.14 of Form N-2. Business development companies no longer have to respond to Schedule 14A, Item 22(b)(13) and to Form N-2, Item 18.13.

[30] The requirements of Rule 22c-2 do not apply to (1) money market funds, (2) funds that issue securities that are listed on a national securities exchange, and (3) funds that affirmatively permit short-term trading and prominently disclose in the prospectus that short-term trading of fund shares is permitted and may result in additional costs to the fund, unless those funds elect to impose a redemption fee. See Rule 22c-2(b).

dilution of the value of fund shares (that is, frequent trading and redemption fee policies). The exclusion does not apply if a fund has not established frequent trading policies. Such funds would need to identify the shareholder accounts that are financial intermediaries. The amendments clarify the application of Rule 22c-2 to chains of intermediaries and the effect of a fund's failure to obtain an agreement with any of its intermediaries. Effective date: December 4, 2006. The compliance date by which funds must enter into shareholder information agreements with intermediaries was extended to April 16, 2007. The date by which funds must be able to request and promptly receive shareholder identity and transaction information pursuant to shareholder information agreements was extended to October 16, 2007.

- *Definition of Eligible Portfolio Company under the Investment Company Act of 1940* (Release No. IC-27538). The SEC expanded the definition of "eligible portfolio company" as part of the requirement for business development companies to invest at least 70 percent of total assets in certain specified types of companies (the 70 percent basket), with the adoption of new Rule 2a-46 and new Rule 55a-1 under the 1940 Act. New Rule 2a-46 defines eligible portfolio company to include all private domestic operating companies and those public domestic operating companies whose securities are not listed on a national securities exchange. Domestic operating companies with securities traded on the over-the-counter bulletin board and through Pink Sheets LLC qualify as eligible portfolio companies. Rule 55a-1 allows business development companies to make 70 percent basket follow-on investments in companies that met the definition of eligible portfolio company under Rule 2a-46 at the time of the business development company's initial investment(s) in them but not at the time of the follow-on investment, subject to certain conditions. Effective date: November 30, 2006. The SEC reproposed a rule for comment (see Release No. IC-27539) that would expand the definition of eligible portfolio company to include certain companies that list their securities on a national securities exchange.

- *Amendments to the Tender Offer Best-Price Rules* (Releases No. IC-27542 and No. 34-54684). The SEC amended the third-party and issuer tender offer best-price rules[31] to address the uncertainty resulting from divergent court interpretations that have employed an integral-part test or bright-line test to determine best-price rule violations, and to diminish a regulatory disincentive against structuring transactions as tender offers. Under the amendments, the best-price rules apply only to the consideration offered and paid for securities tendered in a tender offer, and not to compensatory arrangements. Consideration offered and paid according to employment compensation, severance, or other employee benefit arrangements with security holders of the subject company are not prohibited if certain requirements are met. Under an accompanying non-exclusive safe harbor, arrangements approved by certain independent directors of either the subject company's or the bidder's board of directors, or a committee performing similar functions, are not prohibited by the third-party and issuer tender offer best-price rules. A director of a registered closed-end investment company is considered to be independent if the director is not an interested person of the investment company, as defined in Section 2(a)(19) of the 1940 Act. Effective date: December 8, 2006.

- *Internet Availability of Proxy Materials* (Releases No. IC-27671 and No. 34-55146). The SEC amended its proxy rules under Section 14 of the Securities Exchange Act of 1934 (the 1934 Act) to allow companies, through a "notice and access" model, to furnish proxy materials on an Internet Web site and provide shareholders with a Notice of Internet Availability of Proxy Materials before the meeting date. A soliciting person other than the company may follow the notice and access model. Effective date: March 30, 2007.

Self-Regulatory Organization Rulemaking

.85 You can refer to the SEC Web site at www.sec.gov to obtain information about self-regulatory organization (SRO) rules approved by the SEC.

[31] See Rule 13e-4 and Rule 14d-10 under the Securities Exchange Act of 1934.

Interpretative Release

.86 The SEC released an Interpretation, *Commission Guidance Regarding Client Commission Practices Under Section 28(e) of the Securities Exchange Act of 1934* (see Release No. 34-54165), with request for comment, to provide interpretive guidance on money managers' use of client assets to pay for research and brokerage services in light of evolving technologies and industry practices under the safe harbor that is codified as Section 28(e) of the 1934 Act. Money managers include investment advisers. Conduct not protected by Section 28(e) may constitute a breach of fiduciary duty as well as a violation of federal securities laws, including the Investment Advisers Act of 1940 (Advisers Act), and the 1940 Act. The Interpretation replaces Section II and Section III of the interpretive guidance on Section 28(e) previously issued by the SEC in 1986. Effective date: July 24, 2006. Market participants may continue to rely on the SEC's prior interpretations of Section 28(e) until January 24, 2007.

Registration of Hedge Fund Advisers

.87 The requirements in Rule 203(b)(3) under the Advisers Act for SEC registration of advisers to certain private investment pools (hedge funds) became effective February 1, 2006.[32] In the June 23, 2006, decision in *Philip Goldstein, Kimball & Winthorp, Inc., and Opportunity Partners, L.P., v. Securities and Exchange Commission*, the U.S. Court of Appeals for the District of Columbia Circuit invalidated the hedge fund registration rule. The SEC did not seek an en banc review of the decision or petition the U.S. Supreme Court for a writ of certiorari (appeal the decision).[33] SEC Chairman Christopher Cox's "Testimony Concerning the Regulation of Hedge Funds" before the U.S. Senate Committee on Banking, Housing, and Urban Affairs has information about SEC initiatives for hedge funds.[34] The Investment Adviser Registration Depository (IARD) homepage has SEC Staff Guidance for interim completion of Form ADV pending IARD reprogramming to reverse Form ADV amendments that were vacated.[35] Also, see the August 10, 2006, SEC no-action letter to ABA Subcommittee on Private Investment Entities and the August 28, 2006, SEC no-action letter to Deloitte & Touche LLP.[36] The August 28, 2006, no-action letter provides certain independence transition relief for hedge funds that are managed by advisers that registered under Rule 203(b)(3) and did not choose to subsequently withdraw their registrations and accountants that audit the hedge fund financial statements for the purpose of complying with custody Rule 206-4(2) under the Advisers Act.

Investment Company Governance

.88 In 2004, the SEC amended the 10 Exemptive Rules under the 1940 Act to require that investment companies relying on those Exemptive Rules satisfy certain governance standards.[37] The amendments require that funds relying on the Exemptive Rules have boards of directors with (1) no less than 75 percent independent directors and (2) an independent chair. The Chamber of Commerce of the United States of America challenged the two requirements. In response to a remand order by the U.S. Court of Appeals for the District of Columbia Circuit in *Chamber of Commerce of the United States of America v. Securities and Exchange Commission*, the SEC considered further two deficiencies in the rulemaking that the Court identified. On June 29, 2005, by a 3-2 vote, the SEC readopted the two corporate governance requirements.[38] The Chamber of Commerce of the United States of America responded with another request to stay implementation of the requirements, which was granted by the U.S. Court of Appeals for the District of Columbia Circuit in August 2005.

[37] See Release No. IC-26520 at www.sec.gov/rules/final/ic-26520.htm.

[38] See Release No. IC-26985 on the SEC Web site at www.sec.gov/rules/final/ic-26985.pdf for the SEC response to the remand.

.89 On April 7, 2006, the U.S. Court of Appeals for the District of Columbia Circuit vacated the two corporate governance requirements but withheld its mandate for 90 days. The SEC released a request for additional comment, *Investment Company Governance*, published in the June 19, 2006, *Federal Register*, seeking comment about the proposed rule amendments, with comments due on or before August 21, 2006. In December 2006, the SEC reopened the comment period for the amendments, to permit public comment on two papers prepared by the Office of Economic Analysis on the fund governance provisions. See Release No. IC-27600.[39]

Staff Accounting Bulletin No. 108

.90 On September 13, 2006, the SEC released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.91 There have been two common approaches used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.92 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.93 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

.94 See the related discussion "Proposed FASB Guidance for Quantification of Misstatements" in the "On the Horizon" section of this Alert.

CCOutreach Program

.95 The SEC Office of Compliance Inspections and Examinations and the Division of Investment Management jointly sponsor the CCOutreach program to enable better communication of the SEC and SEC staff with mutual fund and investment adviser chief compliance officers. For information about the program visit the SEC Web site at www.sec.gov.

SEC Staff Reviews of Financial Statements

.96 Disclaimer: Below is a summary of financial statement review comments given by the SEC Staff (the Staff) to investment company registrants. These comments were compiled by the AICPA Investment Companies Expert Panel and have not been approved or endorsed by the SEC or its Staff.

- *Consolidation by Investment Companies.* Rule 6-03(c)(1) of Regulation S-X provides guidance relating to consolidation by registered investment companies. It states ". . . statements of the registrant may be consolidated only with the statements of subsidiaries which are investment companies." The May 1, 2006, edition of the Audit and Accounting Guide *Investment Companies* (the Guide), paragraph 7.05, states that consolidation is appropriate when "the investment company has an investment in an operating company that provides services to the investment company, for example, an investment adviser or transfer agent. In those cases, the purpose of the investment is to provide services to the investment company rather than to realize a gain on the sale of the investment." The Staff has indicated that they interpret S-X 6-03(c)(1) generally to prohibit the consolidation by a registered investment company of any entities other than registered investment companies.

  The Staff have raised particular concerns about consolidation of entities providing services to registered investment companies, because the resulting mixing of fair value accounting and historical accounting may distort the investment company's reported performance. The Staff have indicated that, pursuant to written requests citing specific facts and circumstances, they have not objected to consolidation of nonregistered investment companies that are wholly owned (or substantially wholly owned) by a registered investment company and, in certain cases, operating companies providing all or substantially all of their services or operations to a registered investment company and/or its portfolio companies. The Staff recommends that registrants seek preapproval when a registered investment company intends to consolidate an entity other than another registered investment company.

- *Fund of Funds Rule.* According to the newly adopted Fund of Funds rule, which can be found at www.sec.gov/rules/final/2006/33-8713.pdf, the prospectus fee table must contain a new line item called "Acquired Fund Fees and Expenses" (AFFE). The AFFE discloses the percentage of indirect expenses incurred by the acquiring fund when investing in one or more acquired funds, or, if less than one basis point, such percentage may be included in the "other expenses" line item within the expense table. The Staff commented that any acquiring fund investing in an acquired fund must include this disclosure, including funds that invest in exchange traded funds and money market funds. The AFFE disclosure is required only in the prospectus fee table and is not required in the expense example or the financial highlights table contained in shareholder reports. However, funds are permitted to explain the differences between the expense ratios in a footnote to their respective fee table schedules.

- *Certifications Contained in Form N-CSR.* The Staff have noted outdated certifications by the principal executive and principal financial officer contained in Form N-CSR. Such certifications are required by Rule 30a-2(a) under the Investment Company Act of 1940 (the 1940 Act). In particular, some Form N-CSR certifications did not address the effectiveness of the registrant's disclosure controls and procedures as defined in Rule 30a-3(c) under the 1940 Act. Registrants should ensure they are using the most current certifications contained in Form N-CSR.

- *Fund Mergers.* Some registrants define their expenses relating to fund mergers as extraordinary. Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions,* defines extraordinary expenses as those that meet two criteria: unusual in nature and are infrequent in occurrence. The Staff believes that merger-related expenses are not extraordinary expenses as they are not unusual or infrequent as defined in APB Opinion No. 30, and thus are not eligible for exclusion from prospectus fee tables (see, for example, Form N-1A, Item 3, Instruction 3(c)(ii)). If agreements between funds and advisers established expense caps excluding "extraordinary" expenses without further definition of the term, the Staff encourages registrants to revisit whether merger-related expenses were inappropriately defined as "extraordinary" and thereby excluded from the expense cap calculation. If management and the board intended to exclude merger-related expenses from expense caps, such exclusion should be stipulated contractually.

- *Organization Costs in Seed Financial Statements for a Closed-End Fund.* The initial filing of Form N-2 for a closed-end fund that is not a series of a larger trust generally requires an audited "seed-capital" statement of assets and liabilities with accompanying notes and in certain cases, an audited statement of operations. To the extent a closed-end fund incurs organization expenses that are not paid for and assumed by the fund sponsor or another party, the fund must present these expenses in the statement of operations for the period from the organization date through the end of the reporting period.[40] Under certain arrangements, the sponsor or another party agrees to pay for and assume only those organization and offering costs incurred by the fund which exceed a specified ceiling expressed as a per share amount. For example, an arrangement might state that the adviser will reimburse the fund for organization expenses and offering costs in excess of $0.03 per share. Although the actual amount of the organization expenses that will be borne by the fund will not be known until the initial offering has been completed, AICPA Statement of Position (SOP) 98-5, *Reporting on the Costs of Start-Up Activities*, requires organization expenses to be expensed as incurred. Offering costs, however, should be deferred and charged to paid-in capital upon the sale of shares.[41] In order to comply with SOP 98-5 when an arrangement similar to that described above exists, the sponsor may contribute additional capital to ensure the net assets do not fall below $100,000 after the fund records the organization expenses.

- *Delayed Implementation of FASB Interpretation No. 48 for NAV Calculations.* The SEC staff would not object if a fund implements FASB Interpretation No. (FIN) 48 in its net asset value per share (NAV) calculation as late as its last NAV calculation in the first required financial statement reporting period for its fiscal year beginning after December 15, 2006.[42] Calendar year-end funds, for example, are the first group of funds required to implement FIN 48 and could implement FIN 48 as late as their June 29, 2007 (the last business day of the semi-annual reporting period) NAV calculation and the effects of FIN 48 would be reflected in the fund's semi-annual financial statements contained in its Form N-CSR filing. Similarly, funds that have fiscal years ending February 28, 2007, are required to implement FIN 48 in their NAV calculation no later than August 31, 2007. Funds that have a fiscal year end of November 30, 2007, would be the last group of funds required to implement FIN 48. Therefore, those funds would have until May 30, 2008 (the last business day of the semi-annual reporting period) to implement FIN 48 in their NAV calculation.

  Help Desk—See the AICPA Audit Risk Alert *SEC and PCAOB Alert—2006/07* (product no. 022497kk) for a thorough discussion of recent SEC developments including an update on new SEC final rules and other issuances. See the "On the Horizon" section of this Alert for information about selected proposed SEC rules that may be especially relevant to the investment companies industry.

Commodity Futures Trading Commission Developments

.97 Investment partnerships that are commodity pools subject to the regulations of the Commodity Exchange Act of 1974 are required to comply with the financial reporting requirements of Part 4 of the Commodity Futures Trading Commission (CFTC) Regulations.[43] The complete text of the CFTC final rules discussed in this section of the Alert, rules adopted subsequent to the writing of this Alert, and information

---

[42] See letter from Conrad Hewitt, Chief Accountant and Barry Miller, Associate Director, Division of Investment Management to Mr. Paul Schott Stevens, President of the Investment Company Institute, dated December 22, 2006.

[43] Rule 4.13 and Rule 4.5 under the Commodity Exchange Act of 1974 provide for exemptions from registration under that Act.

about proposed rules, the annual letters to commodity pool operators (CPOs), and other CFTC regulations and developments can be obtained from the CFTC Web site at www.cftc.gov.

Final Rules

.98 The CFTC published the final rule *Commodity Pool Operator Electronic Filing of Annual Reports* in the February 22, 2006, *Federal Register*. It amends the following Part 4 rules for CPOs, effective March 24, 2006:

- Rule 4.7(b)(2) was amended to clarify that the account statement provided to pool participants be presented and computed in accordance with generally accepted accounting principles.
- Rule 4.7(b)(3) and Rule 4.22(c) were amended to require that registered CPOs file their commodity pool annual reports electronically with the National Futures Association (NFA) through the NFA's established electronic filing procedures.
- Rule 4.22(d) was amended to specifically state that Rule 1.16(g) is applicable to CPOs with respect to notifications of changes in independent accountants engaged for certifying commodity pool financial statements. The notification may be made solely to the NFA.
- Rule 4.22(f)(1)(ii)(B) was amended to clarify that the term "segregation" in Rule 4.22(f)(1) refers to the Rule 4.20(c) prohibition on commingling of funds of a commodity pool with the assets of any other person.
- Rule 4.22(g)(2) and Rule 4.22(g)(3) were amended to require that notifications concerning CPOs' elections of fiscal years for commodity pools other than the calendar year or subsequent changes in fiscal year-ends be solely filed with the NFA.
- Rule 4.22(h) was amended to require that the oath or affirmation on annual reports filed with the NFA must be made using electronic filing procedures.
- Rule 4.22(j) was deleted and a provision was added to Rule 4.23(a) to require that CPOs maintain in their books and records a manually signed oath or affirmation for all annual reports and account statements, and records of key financial balances submitted to the NFA.

CFTC Staff "Dear CPO" Letter

.99 On February 17, 2006, the Division of Clearing and Intermediary Oversight of the CFTC issued a letter to assist registered CPOs with preparing and filing annual financial reports required by the Commodity Exchange Act.[44] Regulatory changes affecting CPOs and reminders about requirements in response to observed common deficiencies in prior years' annual reports that are discussed in the letter include:

- Due dates of commodity pool financial filings—late filings
- Amendments to Part 4[45]
- Compliance with U.S. GAAP
- Requests for limited relief from U.S. GAAP compliance for certain offshore commodity pools
- Initial annual reports and final annual reports
- Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity

---

[44] The February 17, 2006, Commodity Futures Trading Commission (CFTC) staff "Dear CPO" Letter is available on the CFTC Web site at www.cftc.gov/files/tm/tmcpoannualguidanceletter2005.pdf. Similar letters issued in prior years are also available on the CFTC Web site at www.cftc.gov.

[45] See the discussion "Final Rules" earlier in this section of the Alert for more information about the Part 4 amendments.

- Implementation of FASB Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*

- Reminder regarding availability of annual report information under the Freedom of Information Act

  Help Desk—See the AICPA Audit Risk Alert *Securities Industry Developments—2006/07* (product no. 022387kk) for more information about CFTC regulations and the CFTC staff "Dear CPO" letter, and for a discussion about the commodities industry.

SEC/CFTC Joint Final Rule

.100 The SEC and CFTC issued joint final rules, Application of the Definition of Narrow-Based Security Index to Debt Securities Indexes and Security Futures on Debt Securities, published in the July 13, 2006, Federal Register. Rule 6h-2 under the Securities Exchange Act of 1934 (the 1934 Act) was adopted and Rule 41.21 under the Commodity Exchange Act was amended to modify applicable statutory listing standards to permit trading of security futures based on individual debt securities that are notes, bonds, debentures, or evidences of indebtedness and indexes composed of such securities. New Rule 41.15 under the Commodity Exchange Act and new Rule 3a55-4 under the 1934 Act exclude from the statutory definition of narrow-based security index any debt securities index that satisfies certain criteria. Futures on narrow-based security indexes are subject to joint SEC and CFTC regulation. Futures on debt securities satisfying the criteria for exclusion are subject to regulation by the CFTC. Effective date: August 14, 2006.

Financial Crimes Enforcement Network Developments

.101 The complete text of the final rule and Frequently Asked Questions document discussed in this section of the Alert and other information about Financial Crimes Enforcement Network (FinCEN) developments can be obtained from the FinCEN Web site at www.fincen.gov.

Final Rule

.102 FinCEN issued a final rule, *Requirement That Mutual Funds Report Suspicious Transactions*, published in the May 4, 2006, *Federal Register*, that amends the Bank Secrecy Act regulations. Mutual funds are required to file Suspicious Activity Reports (SARs) on suspicious transactions that involve or aggregate at least $5,000 in funds or other assets. The reporting requirement is uniform with the requirements already established for other financial institutions. Four categories of transactions are specified that require reporting. Filing a single joint report is permitted in certain circumstances, such as when individual mutual funds are part of a complex and more than one mutual fund is obligated to report the same transaction or transactions. Effective date: June 5, 2006. The requirements apply to transactions occurring after October 31, 2006.

.103 FinCEN issued guidance in a Frequently Asked Questions format to assist mutual funds with applying the suspicious transaction reporting requirements.

Pension Protection Act of 2006

.104 The Pension Protection Act of 2006 (the Act) was signed into law on August 17, 2006. This comprehensive pension reform legislation aims to strengthen the federal pension insurance program and to expand and encourage participation and enrollment in retirement plans. The Act establishes, among other matters, a safe harbor to encourage automatic enrollment arrangements for defined contribution plans, allows plan fiduciaries to give investment advice to participants, makes permanent significant tax retirement savings incentives enacted under prior law, and includes provisions for default investments when a participant fails to exercise an investment election. The provisions of the Act are effective in phases, with some rules in effect in 2007 and others in 2008. For technical explanations of the provisions of the Act prepared by the staff of the Joint Committee on Taxation, visit www.house.gov/jct/x-38-06.pdf.

On the Horizon[46]

.105 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all of the accounting and auditing projects in progress. The AICPA general *Audit Risk Alert—2006/07*(product no. 022337kk) presents brief information about selected projects that may have a broad interest and are expected to result in final standards in the near future. Brief information about projects that are especially relevant to the investment companies industry is presented in this section of this Alert.

.106 Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

> **Help Desk—**See the AICPA Audit Risk Alert *SEC and PCAOB Alert—2006/07* (product no. 022497kk) for information about proposed SEC rules and PCAOB auditing standards on the horizon.

.107 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Accounting Pipeline

Proposed FASB Statement—Fair Value Option

.108 The FASB released an exposure draft of a proposed FASB Statement, *The Fair Value Option for Financial Assets and Financial Liabilities*. The proposed Statement would permit an entity to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities, including debt liabilities, on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur. The availability of that election is referred to as the fair value option. Separate presentation or parenthetical disclosure on the face of the statement of financial position would be required of assets and liabilities that are subsequently measured at fair value pursuant to the fair value option and assets and liabilities subsequently measured using another measurement attribute. The proposed Statement requires disclosures that include qualitative disclosure about the nature of significant changes in fair value

[46] See footnote 1 of this Alert.

of the financial liabilities during a period. Cash receipts and cash payments related to financial assets and liabilities measured pursuant to the fair value option would be classified in the statement of cash flows based on the nature and purpose for which the related financial assets and financial liabilities were acquired or incurred.

.109 An issuer that elects the fair value option for its debt liabilities would be required under the proposed Statement to report changes in the fair values of those liabilities, including deterioration in an issuer's own creditworthiness, as gains and losses in earnings and to provide the qualitative disclosure about the nature of significant changes in fair value during a period.

.110 At its October 18, 2006, meeting, the FASB tentatively decided that if financial assets that have been reported at fair value (with changes included in earnings) because of the nature of the subsidiary that has been holding those assets are transferred to another entity within the consolidated reporting entity for which such fair value accounting is not required, the fair value option may be elected on the date of the transfer.[47]

.111 The FASB project to consider the fair value option has two phases. The proposed FASB Statement was prepared for Phase 1 of the project. Phase 2 will address creating a fair value option for selected nonfinancial assets and liabilities. For additional updated information about the project visit the FASB Web site at www.fasb.org/project/fv_option.shtml.

Proposed FASB Statement—Derivative Disclosures

.112 The FASB released an exposure draft of a proposed FASB Statement, *Disclosures about Derivative Instruments and Hedging Activities*. The proposed Statement would amend FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to require expanded disclosures about the effects of derivatives on an entity's financial position, how an entity uses derivatives, and how derivatives and related hedged items are accounted for. The proposed Statement, among other things, would require inclusion of a discussion about the primary risks that derivative instruments are intended to modify; disclosure about the notional amounts related to reported derivative instruments; the location and fair value amounts of derivative instruments reported in the statement of financial position; the location and amount of gains and losses reported on derivative instruments and related hedged items in the statement of financial performance and the statement of financial position, if applicable, at the end of the reporting period, as well as for derivative instruments and related hedged items that existed during the reporting period but are no longer held at the end of the reporting period; disclosures about contingent features in derivative instruments; and disclosure about counterparty credit risk, both on a gross basis and net of collateral received. For additional updated information about the project visit the FASB Web site at www.fasb.org/project/derivative_disclosures.shtml. The exposure draft of the proposed FASB Statement can be obtained on the FASB Web site at www.fasb.org.

FASB Project—Applying FASB Interpretation No. 46(R) to Investment Companies

.113 The FASB has a project to reconsider the temporary deferral of the effective date of FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities*, an interpretation of Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements*, for investment companies that are not subject to SEC Regulation S-X, Rule 6-03(c)(1) but currently account for their investments according to the

---

[47] You can obtain the October 18, 2006, FASB meeting minutes on the FASB Web site at www.fasb.org/board_meeting_minutes/10-18-06_fvo.pdf. Interaction between the proposed FASB Statement for the fair value option and the proposed SOP, *Clarification of the Scope of the Audit and Accounting Guide* Audits of Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*, was also discussed at the September 13, 2006, FASB meeting. Those meeting minutes can be obtained on the FASB Web site at www.fasb.org/board_meeting_minutes/09-13-06_acsec_fspfin46r-d.pdf. The proposed SOP, discussed later in this section of this Alert, would change current practice regarding which entities can be accounted for as investment companies. Certain financial and nonfinancial assets will need to be transferred out of investment company subsidiaries into other entities within the consolidated reporting entity prior to the SOP effective date.

specialized industry guidance in the Audit and Accounting Guide *Investment Companies*. See paragraph 36 of FASB Interpretation No. 46(R). The deferral does not extend to investments made after March 27, 2002, that are held by an investment company that is not a separate legal entity, unless those investments were acquired pursuant to an irrevocable binding commitment that existed prior to March 28, 2002.

.114 On November 22, 2006, the FASB released proposed FSP FIN 46(R)-d, "Application of FIN 46(R) to Investment Companies," which would amend FASB Interpretation No. 46(R), paragraph 4(e), to extend the current scope exception to encompass all investment companies subject to the Audit and Accounting Guide *Investment Companies*.[48] For additional updated information about the project visit the FASB Web site at www.fasb.org/project/application_fin46-r_investment_companies.shtml.

Proposed FASB Guidance for Quantification of Misstatements

.115 At the December 19, 2006, FASB meeting, the FASB reached a decision to issue guidance for nonregistrants for quantifying current-year misstatements that arise from the carryover or reversal of prior-year uncorrected misstatements. The guidance would require the dual method approach illustrated in SAB No. 108. See the related discussion "Staff Accounting Bulletin No. 108" in the "Securities and Exchange Commission Developments" section of this Alert. For updated information about the project, visit the FASB Web site at www.fasb.org.

Proposed AcSEC SOP, **Clarification of the Scope of the Audit and Accounting Guide** ***Investment Companies*** **and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies**

.116 The proposed SOP, *Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*, provides specific conditions for determining whether an entity is within the scope of the Audit and Accounting Guide *Investment Companies*. Entities that meet those conditions would be required to apply the provisions of the Guide in presenting their financial statements. Entities that do not meet those conditions would be prohibited from applying the provisions of the Guide. At its September 13, 2006, meeting, the FASB met with representatives of AcSEC and discussed final clearance of the SOP. The FASB did not object to issuance of the final SOP.[49]

.117 The Guide includes "standstill" provisions on current accounting practice. Until the project to clarify the scope of the Guide is finalized, an entity should consistently follow its current accounting policies for determining whether the provisions of the Guide apply to investees of the entity or to subsidiaries that are controlled by the entity. Further, the FASB has expressed its view that an investment company (other than a separate account of an insurance company as defined in the Investment Company Act of 1940) must be a separate legal entity to be within the scope of the Guide. (See the FASB Action Alert No. 02-14, April 3, 2002.) Accordingly, the specialized accounting principles in the Guide should be applied to an investment made after March 27, 2002, only if the investment is held by an investment company that is a separate legal entity. Investments acquired prior to March 28, 2002, or those acquired after March 27, 2002, pursuant to an irrevocable binding commitment that existed prior to March 28, 2002, should continue to be accounted for in accordance with the entity's existing policy for such investments. For further discussion of this matter, see the FASB staff announcement in the EITF Topic D-74, *Issues Concerning the Scope of the AICPA Audit Guide on Investment Companies*.

[48] You can obtain the November 1, 2006, FASB meeting minutes, providing further discussion about the proposed FSP, on the FASB Web site at www.fasb.org/board_meeting_minutes/11-01-06_fspfin46r-d.pdf.

[49] You can obtain the September 13, 2006, FASB meeting minutes on the FASB Web site at www.fasb.org/board_meeting_minutes/09-13-06_acsec_fspfin46r-d.pdf.

.118 The August 15, 2006 "discussion draft" of this proposed SOP that was sent to the FASB, which is briefly discussed below, is available as of the writing of this Alert on the AICPA Web site at www.aicpa.org/download/acctstd/investment_cos_scope_SOP71.pdf.

.119 AcSEC concluded that the proposed SOP's conditions for inclusion or exclusion of entities from the scope of the Guide should be based on the nature of the entity's activities. Further, AcSEC concluded that certain entities subject to regulatory requirements should automatically be within the scope of the Guide.

.120 Entities that meet the definition of an "investment company" as provided in paragraph 5 of the discussion draft and entities regulated by the 1940 Act or similar requirements as described in paragraphs 9 and 10 of the discussion draft would apply the accounting principles and reporting requirements in the Guide (investment company accounting) to their separate financial statements. The definition of an investment company is based on characteristics that AcSEC believes distinguish investment companies from entities that benefit from the operations of investees in ways other than through current income, capital appreciation, or both. Entities that are within the scope of FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, would not be within the scope of the Guide. Similarly, entities that are within the scope of the AICPA Audit and Accounting Guide *Employee Benefit Plans* would not be within the scope of the Guide. The discussion draft does not provide specific requirements for real estate investment trusts (REITs). REITs would be subject to the same provisions of the proposed SOP as other entities. Entities that are neither entities regulated by the 1940 Act or similar requirements as described in paragraphs 9 and 10 of the discussion draft nor an investment company under the definition in paragraph 5 of the discussion draft would not apply investment company accounting.

.121 Visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/Scope_Clarification_Investment_Companies_Guide-SOP.htm to obtain updated information about the status of the exposure draft and project.

AICPA Real Estate Investment Funds Project

.122 In connection with the issuance of the proposed SOP discussed above, which would provide specific conditions for determining whether an entity is within the scope of the Audit and Accounting Guide *Investment Companies*, the real estate funds project was initiated to establish consistency in implementation of the Guide for affected entities. The AICPA decided to develop for the Guide an additional nonauthoritative chapter on real estate funds that is expected to provide guidance on, among other things:

- The definition of a real estate investment.
- Balance sheet presentation of investments, including the applicability of a consolidation approach to the financial statement presentation.
- Income statement presentation of net investment income, including the applicability of recognizing rental revenue, expenses, or other accrual basis earnings in net investment income (versus the dividend income principle noted in the Guide).
- Accounting for third-party real estate financing.
- Other financial statement presentation and disclosure matters.

.123 The proposed nonauthoritative chapter would only provide guidance on applying existing GAAP to real estate funds and would not change existing GAAP.

.124 Visit the AICPA Web site at www.aicpa.org for updated information about the status of the project. You can obtain AcSEC meeting agendas, materials, and highlights that include discussions and tentative conclusions about the real estate funds project at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/.

Proposed Technical Practice Aids for Investment Companies

.125 TIS section 6910 in the "Technical Questions and Answers" section of *Technical Practice Aids* includes questions and answers (Q&As), commonly referred to as TPAs, specifically pertaining to investment companies. The AICPA staff continues to consider nonauthoritative TPAs on practice matters for investment companies and new TPAs have been proposed. Visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/ for updated information about the issuance of TPAs.

Auditing and Attestation Pipeline—Nonpublic

Proposed SOP—Compliance Controls at Service Providers

.126 In December 2003, the SEC adopted Rule 38a-1 under the Investment Company Act of 1940 (1940 Act) and Rule 206(4)-7 under the Investment Advisers Act of 1940 (Advisers Act) requiring both registered investment companies and registered investment advisers to adopt and implement written policies and procedures reasonably designed to prevent violation of federal securities laws. Both funds and advisers are required to appoint chief compliance officers responsible for administering these policies and procedures, and to review the policies and procedures annually for adequacy and effectiveness of implementation. Among other things, the designation of a chief compliance officer of a registered investment company is required to be approved by the investment company's board of directors, and the chief compliance officer is to report directly to the board of directors and meet in executive session with independent directors at least annually. See SEC Release No. IC-26299 under the 1940 Act and SEC Release No. IA-2204 under the Advisers Act.

.127 The AICPA has a project in connection with the adoption of Rule 38a-1 and Rule 206(4)-7 to develop an SOP that would provide practitioners with performance and reporting guidance when examining the suitability of the design and operating effectiveness of controls over compliance at entities that provide services (service providers), such as transfer agents, record keepers, administrators, and custodians, to funds and investment advisers (user organizations). Compliance controls at service providers may affect or be part of the user organization's internal control over compliance. For updated information about the development of the exposure draft, entitled *Attestation Engagements That Address Aspects of Internal Control Directed at Compliance Objectives at Entities That Provide Services to Investment Companies, Investment Advisers, or Other Service Providers*, visit the AICPA Web site at www.aicpa.org.

Auditing and Attestation Pipeline—Public

Revised Auditing Standard on Internal Control Over Financial Reporting

.128 On December 19, 2006, the PCAOB released Proposed Auditing Standard, *An Audit of Internal Control Over Financial Reporting That Is Integrated With An Audit of Financial Statements*, that would supersede Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements*. Investment companies, other than business development companies, generally are exempt from the requirement for issuers to include in their annual reports an assessment on the company's internal control, along with the auditor's report on that assessment. The proposed standard, among other matters, would revise the definitions of "significant deficiency" and "material weakness" as well as the "strong indicators" of a material weakness that are provided in Auditing Standard No. 2. The revised illustrative report in paragraph 11.19 of the Audit and Accounting Guide *Investment Companies*, which is discussed in the "Audit and Accounting Issues and Developments" section of this Alert, incorporates certain definitions described in Auditing Standard No. 2 that may be revised by the proposed standard.

SEC Proposed Rules

.129 The following are some of the proposed SEC rules that were released and not final as of the writing of this Alert, and that may be particularly relevant to the investment companies industry:

- *Exemption from Shareholder Approval for Certain Subadvisory Contracts* (Releases No. 33-8312, No. 34-48683, and No. IC-26230). The proposed rule would, under certain conditions, permit an adviser to serve as subadviser to an investment company without shareholder approval.

- *Prohibition of Fraud by Advisers to Certain Pooled Investment Vehicles; Accredited Investors in Certain Private Investment Vehicles* (Releases No. IA-2756 and No. 33-8766). The proposed new rules would prohibit advisers to pooled investment vehicles, including hedge funds, from making false or misleading statements or otherwise defrauding investors or prospective investors in the pooled investment vehicles, and revise the definition of "accredited investor" as it relates to natural persons.

- *Amendments to Rules Governing Pricing of Mutual Fund Shares* (Release No. IC-26288). The proposed rule would amend Rule 22c-1 under the 1940 Act to require that all purchase and redemption orders be received by the registered investment company, a single transfer agent designated by the registered investment company, or a registered clearing agency, no later than the time at which the investment company prices its securities.

- *Confirmation Requirements and Point of Sale Disclosure Requirements for Transactions in Certain Mutual Funds and Other Securities, and Other Confirmation Requirement Amendments, and Amendments to the Registration Form for Mutual Funds* (Releases No. IC-26341, No. 33-8358, and No. 34-49148). The proposed rule would amend Form N-1A to require improved disclosure regarding sales loads and revenue-sharing payments. The SEC subsequently released *Point of Sale Disclosure Requirements and Confirmation Requirements for Transactions in Mutual Funds, College Savings Plans, and Certain Other Securities, and Amendments to the Registration Form for Mutual Funds* (Releases No. IC-26778, No. 33-8544, and No. 34-51274), requesting comment about whether to adopt modified or additional disclosure requirements for Form N-1A beyond those originally proposed. The release also asks for comment about what disclosures, if any, should be added to Forms N-3, N-4, and N-6 with respect to revenue-sharing payments.

- *Definition of Nationally Recognized Statistical Rating Organization* (Releases No. IC-26834, No. 33-8570 and No. 34-51572). The proposed rule would define the term nationally recognized statistical rating organization (NRSRO) and provide interpretations of that definition for purposes of SEC rulemaking. Credit rating agencies would be provided with information to better understand whether they qualify as an NRSRO.

- *Oversight of Credit Rating Agencies Registered as Nationally Recognized Statistical Rating Organizations* (Release No. 34-55231). The proposed rules would implement provisions of the Credit Rating Agency Reform Act of 2006, enacted on September 29, 2006. That Act requires registration of credit rating agencies with the SEC and subjects the agencies to regulation of various aspects of their business, although not their rating methodologies.

.130 Visit the SEC Web site at www.sec.gov to get the full text of these proposed rules and interpretation and for information about other proposed SEC rules.

Resource Central

AICPA Products and Publications

.131 In addition to the AICPA publications already discussed in this Alert, the following are some of the AICPA products and publications that may also be of interest to auditors of investment companies. To order these and other AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Center Operations at (888) 777-7077.

Checklist Supplement and Illustrative Financial Statements for Investment Companies

.132 The *Checklist Supplement and Illustrative Financial Statements for Investment Companies* (August 2006 edition) (product no. 008946kk) is a nonauthoritative financial accounting and reporting practice aid that is updated annually. The 2006 edition was expanded to include the illustrative financial statements for management investment companies that have multiple classes of shares or master-feeder structures, the illustrative financial statements for a unit investment trust, and the illustrative financial statements for variable annuity separate accounts registered as unit investment trusts, as illustrated in the Audit and Accounting Guide *Investment Companies*. The checklist should be used in conjunction with the *Checklists and Illustrative Financial Statements for Corporations* (November 2006 edition) (product no. 008937kk).

Audit and Accounting Manual

.133 The *Audit and Accounting Manual* (revised as of July 1, 2006) (product no. 005135kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; and engagement letters, management representation letters, and confirmation letters.

AICPA reSOURCE

.134 With AICPA reSOURCE you can access accounting and auditing materials online with the AICPA Library or the AICPA Library + FASB Library. You can custom-tailor your subscription by choosing titles you use most often. To subscribe or to learn more about AICPA reSOURCE, go online at www.cpa2biz.com.

AICPA Industry Expert Panel—Investment Companies

.135 For information about the activities of the Investment Companies Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_investco.htm.

Education Courses

.136 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the investment companies industry, many of them available for both group study and self-study.

Online CPE

.137 To register or learn more visit www.cpa2biz.com.

Hotlines

Accounting and Auditing Technical Hotline

.138 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077. For more information visit the AICPA Web site at www.aicpa.org.

Ethics Hotline

.139 Members of the AICPA Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077. Send email inquiries to ethics@aicpa.org.

American Institute of Certified Public Accountants—Web Site

.140 AICPA Online (www.aicpa.org) is the AICPA's Web site on the Internet. The site offers users the opportunity to stay abreast of developments in accounting, auditing, and professional ethics. AICPA Online resources include professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, exposure drafts, and a list of links to other accounting- and finance-related sites.

Other Helpful Web Sites

.141 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the "Information Sources" table at the end of this Alert.

. . . .

.142 This Audit Risk Alert replaces the *Investment Companies Industry Developments—2005/06* Audit Risk Alert. The *Investment Companies Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to mkasica@aicpa.org or write to:

Securities Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
SECURITIES INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert is intended to provide auditors of financial statements of broker-dealers in securities with an overview of recent economic, industry, regulatory, and professional developments that may affect the audits they perform. Because securities broker-dealers often deal in commodity futures or function as commodity pool operators, this Audit Risk Alert expands the discussion of recent developments to include matters that may affect the audits of commodity entities as well.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply SASs.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Yelena Mishkevich, CPA

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform the audits of your securities industry clients. The knowledge delivered by this Alert assists you in achieving a more robust understanding of your client's business and economic environment. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the securities industry and can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk).

Economic and Industry Developments

Economic Developments

.04 In 2006, the U.S. economy has shown signs of cooling down. Real gross domestic product (GDP) grew 1.6 percent in the third quarter, which was below the 2.6 percent growth registered in the second quarter and the exceptional 5.6 percent growth in the first quarter. According the updated economic forecast issued by the White House on November 21, 2006 for the whole year, GDP is expected to increase 3.1 percent, which is below the 3.3 percent growth registered in 2005. Furthermore, economic growth is expected to slow down in 2007 to 2.9 percent.

.05 The federal funds rate incrementally increased 75 basis points throughout 2006 to 5.25 percent as a result of the Federal Reserve combating inflation. However, since late June, the Fed has kept its target federal funds rate steady.

.06 Please refer to the AICPA general *Audit Risk Alert—2006/07* for an in-depth discussion of the United States economic and business environment. For up-to-date information, you may also wish to refer to Web sites of the Federal Reserve branches at www.federalreserve.gov/otherfrb.htm. Also, the Boston branch publishes monthly a report on stock market activity which practitioners in the securities industry may find particularly helpful.

The Securities Industry

.07 Notwithstanding the economic slowdown, the stock market has performed well in 2006. On October 19, 2006, the Dow Jones Industrial Average (DJIA) closed above the 12,000 level for the first time and since then has continued its stellar performance, posting one record close after another. On November 17, 2006 the Standard & Poor's 500 Index (S&P 500) crossed the 1400 mark for the fist time in six years. The National Association of Securities Dealers Automated Quotation (NASDAQ) composite index has also been increasing and it has more than doubled since its October 2002 low of 1114.11.

.08 2006 is expected to be an exceptional year for the securities industry. According to the Securities Industry and Financial Markets Association (SIFMA),[1] for the first half of 2006, US securities industry profits reached $15.3 billion, the best half-year performance in six years. The SIFMA estimates that the industry profits reached $7.25 billion in 3Q'06, down only slightly from the $7.5 billion earned in 2Q'06 and $7.82 billion reported in 1Q'06. For the year 2006 as a whole, the SIFMA expects profits to top $28.5 billion, $10.9 billion higher than in 2005, and easily surpassing the industry's second best annual performance of $25.3 billion set in 1999, but still short of the record $31.6 billion earned in 2000. Total revenues in 2006 are expected to top $414.8 billion, an increase of 28.9 percent from the 2005 results. More importantly, net revenues (total revenues net of interest expense) are forecast to reach $211.5 billion, up 13.9 percent from last year's level.

.09 For more information, please refer to the September and November 2006 issues of the SIFMA Research Reports (Vol. VII, No. 10 and Vol. I, No. 1, respectively), which can be accessed at www.sia.com/research/html/research_reports.html.

---

[1] SIFMA was formed as a result of the merger between the Securities Industry Association and the Bond Market Association.

The Commodities Industry

.10 Global futures and options contract volume has continued to increase through 2005 and into 2006. In the first eight months of 2006, volume on U.S. futures exchanges reached three billion contracts, a 34 percent increase from the same period in 2005. The volume of contracts traded on foreign exchanges increased 18.5 percent compared to the first eight months of 2005. These changes are primarily attributable to increased trading volume in interest rate and equity products.

.11 The growth in futures volume and markets is further reflected in increased customer funds held by entities registered with the Commodity Futures Trading Commission (CFTC) as futures commission merchants (FCMs) for trading on U.S. and foreign futures and options exchanges. The total amounts required under CFTC regulations to be held in segregated or secured accounts on behalf of FCM customers increased from approximately $105 billion as of June 30, 2005, to more than $137 billion as of June 30, 2006, an increase of more than 30 percent.

.12 The U.S. futures industry, in addition to the increasing volume and customer participation, has also experienced other significant changes through 2005 and into 2006. In October 2006, the Chicago Mercantile Exchange (CME) and the Chicago Board of Trade (CBOT), the two largest contract markets designated by the CFTC, announced merger plans, subject to appropriate regulatory and stockholders' approval. The new CME/CBOT combined organization, to be called CME Group, Inc., would be U.S.-based and devoted to derivatives trading and clearing.

Regulatory Issues and Developments[2]

.13 Chapter 5, "Auditing Considerations," of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* (the Broker Dealer Guide), discusses auditing considerations for an audit of the financial statements of a broker-dealer. The Broker Dealer Guide notes that the regulatory environment of a broker-dealer has a major effect on the audit of a broker-dealer because of the requirements that auditors report on the adequacy of the broker-dealer's internal control and on its compliance with the specific rules addressing financial responsibility and record keeping. Accordingly, certain tests of controls are performed even if the auditor would not otherwise choose to do so.

.14 The audit and reporting requirements for securities broker-dealers are regulated by Rule 17a-5 under the Securities Exchange Act of 1934 (the Exchange Act). Qualifications and reports of independent accountants of FCMs and introducing brokers (IBs) are specified by Regulation 1.16 of the Commodity Exchange Act. Alternative regulatory frameworks have been created for Consolidated Supervised Entities and over-the-counter derivatives dealers. Further, registered broker-dealers in U.S. Government securities are regulated by Section 405.02 of the regulations pursuant to Section 15C of the Exchange Act.

.15 Before undertaking the audit of a regulated entity, auditors should read the applicable rules and understand the prescribed scope of the audit and the related reporting requirements.

.16 Certain regulatory activities and developments relevant to entities operating in the securities industry are presented in the following sections.

---

[2] Readers should be alert for updates, amendments, or other changes to the rules discussed in this section and for other recent developments related to regulatory activities. The brief summaries provided in this section of the Alert are for informational purposes only. Readers should refer to the full text of the regulations. The complete text of Securities and Exchange Commission (SEC) rules, including rules adopted subsequent to the publication of this Alert, can be obtained from the SEC Web site at www.sec.gov; Commodity Futures Trading Commission (CFTC) rules at www.cftc.gov; New York Stock Exchange (NYSE) rules at www.nyse.com; National Association of Securities Dealers (NASD) rules at www.nasd.com; and National Futures Association (NFA) rules at www.nfa.futures.org. See the "Information Sources" table at the end of this Alert for a full list of Internet resources.

Portfolio Margining

.17 New York Stock Exchange (NYSE or the Exchange) Rule 431, *Margin Requirements*, generally prescribes minimum initial and maintenance margin requirements. On July 14, 2005 the Securities and Exchange Commission (SEC) approved, on a pilot basis expiring July 31, 2007, amendments to Rule 431 to permit the application of a prescribed risk-based margin requirement (portfolio margin) to certain eligible products (including listed broad-based securities index options, warrants, futures, futures options, and related exchange traded funds) as an alternative to strategy-based margin requirements. Amendments to Rule 726, Delivery of Options Disclosure Document and Prospectus, were also approved requiring disclosure to and written acknowledgment from customers in connection with the use of portfolio margin. For more information, please refer to SEC Release No. 34-52031 and NYSE Information Memo No. 05-56. By separate orders, the SEC also approved a parallel rule filing by the Chicago Board Options Exchange (CBOE), and a related rule filing by the Options Clearing Corporation (OCC). See SEC Releases No. 34-52032 and No. 34-52030.

.18 On July 11, 2006, the SEC approved additional amendments to Rule 431 that:

1. Expanded the scope of products eligible for portfolio margining and cross-margining.
2. Conformed customer disclosure requirements under Rule 726 to comply with this expansion.
3. Modified certain net capital requirements in connection with the maintenance of portfolio margin accounts.

.19 Collectively, these amendments are referred to as the *expanded pilot*. The expanded pilot expanded the scope of products eligible for portfolio margining and cross-margining to include listed security futures and listed single stock options. Further, the expanded pilot permitted pilot program participants to effect transactions solely in security futures and listed single stock options without maintaining the $5 million equity requirement applicable to effecting transactions in all other eligible products. See SEC Release No. 34-54125 and NYSE Information Memo No. 06-57 for more information.

.20 On December 12, 2006, the SEC approved additional amendments to NYSE Rule 431 that permit the application of portfolio margin to an expanded universe of eligible products. In addition, amendments to NYSE Rule 726 eliminate the sample portfolio margining risk disclosure statement from the Rule. However, the Rule will continue to require member organizations to provide customers with a written disclosure statement in a form prescribed by the Exchange, as well as to receive from customers a signed acknowledgement, in a form to be published at a later date. The amendments are effective April 2, 2007. See SEC Releases No. 34-54918 and NYSE Information Memo No. 06-86 for more information.

.21 Also, on December 12, 2006, the SEC approved a rule change proposed by the CBOE, as amended, to broaden its Rule 12.4, *Portfolio Margin and Cross-Margin for Index Options*, to expand the scope of products that are eligible for treatment as part of CBOE's approved portfolio margin pilot program and to eliminate the requirement for a separate cross-margin account. The scope of eligible products in the pilot is expanded to include margin equity securities, unlisted derivatives, listed options and securities futures. See SEC Release No. 34-54919 for more information.

.22 Portfolio margining is a margin methodology that sets margin requirements for an account based on the greatest projected net loss of all positions in a "security class" or "product group" as determined by a theoretical pricing model using multiple pricing scenarios. The goal of portfolio margining is to set levels of margin that more precisely reflect actual net risk. The eligible participant benefits from portfolio margining in that margin requirements calculated on net risk are generally lower than alternative *position-* or *strategy-based* methodologies for determining margin requirements. Lower margin requirements allow the customer more leverage in an account. Broker-dealers will benefit from portfolio margining because it recognizes a greater number of offsets than was permitted under the previously required strategy-based margin rules and is expected to result in lower margin requirements. However, under the new rules, broker-dealers would be required to actively manage the risk in portfolio margin accounts.

.23 As specified in NYSE Information Memo 06-86, member organizations, for which the Exchange is the Designated Examining Authority (DEA), seeking to participate in portfolio margin must provide written notification and receive approval from the Exchange prior to establishing a portfolio margin methodology. In this regard, member organizations are expected to establish written procedures for monitoring the risk associated with portfolio margin accounts; such procedures must incorporate a methodology for assessing any potential risk to the member organization's capital. As previously discussed in Information Memo 06-57, the procedures must be fully documented and should address, at minimum, the following:

- Opening of portfolio margin accounts
- The profile of customers who will be eligible for portfolio margining, including the initial approval process to be applied
- A description of minimum equity requirements for each customer
- The determination, review, and approval of credit limits for each customer and across all customers
- A description of any internal model used to determine risk in individual customer accounts, including the documentation for this model
- A description of correlation assumptions included in any internal models used for assessing the adequacy of margin in a customer's account
- A description of the stress testing scenarios that are performed on the accounts, and provide the frequency of such testing and the results of the most recent stress test
- Monitoring of accounts to ensure that the account contains a portfolio of hedged instruments
- Identification of security concentrations within an account
- Identification of concentrations in individual securities across customer accounts
- Intraday monitoring of exposure in customer accounts
- Detection, prevention, and circumvention of day trading requirements
- Monitoring of limitation on credit extended on portfolio margining to 1,000 percent of the member organization's net capital
- A description of the process for obtaining the TIMS theoretical valuation points and the process used to compute margin requirements in individual customer accounts
- A description of house margin requirements if they differ from the TIMS requirement
- A description of exception reports that will be utilized to monitor margin exposure
- A description of the escalation procedures to alert senior management of unusual risks
- The regular review and testing of the risk analysis procedures by an independent unit such as internal audit or other comparable group
- If an organization would like to provide portfolio margining to customers in unlisted derivatives, the application should include a description of the products as well as a detailed description of the credit analysis and collateral management process that will be utilized to monitor any exposure that may result to the broker-dealer. This information may be submitted at a later date if unlisted derivatives are not being offered to customers on the implementation date

.24 Member organizations seeking approval to participate in portfolio margining must submit all relevant supporting documentation to their finance coordinator. Such documentation must be accompanied by an organization chart identifying those persons primarily responsible for portfolio margin risk management and the person or persons to whom they report.

.25 In order for member organizations to be approved by the effective date of April 2, 2007, written notifications must be submitted no later than February 15, 2007.

Rulemaking Regarding Responsibility When Outsourcing Activities to Third-Party Service Providers

.26 The concept of outsourcing is not new to the securities industry. Introducing broker-dealers have long been permitted to contractually delegate functions and responsibilities to clearing broker-dealers. Typically, introducing firms agree to retain responsibility for the opening, approving, and monitoring of accounts and delegate to clearing firms "back office" functions, such as order execution and clearance of trades. Over the past several years, the outsourcing of services has extended beyond arrangements between registered broker-dealers. It is not uncommon to now find outsourcing arrangements between broker-dealers and other types of regulated and unregulated entities. Different outsourcing arrangements have given rise to different types of regulatory concerns.

NYSE Proposed Rule

.27 NYSE Rule 382 has allowed for the delegation of both functions *and* responsibilities to a clearing firm, and accordingly, it has required that any agreement made pursuant to its provisions be subject to the prior review and approval of the Exchange, and be limited to registered broker-dealers. On March 16, 2005 the NYSE filed with the SEC a proposed new rule, Rule 340, which would govern conditions to be satisfied in connection with outsourcing arrangements between members/member organizations and various service providers.

.28 Proposed Rule 340A prohibits members and member organizations from outsourcing certain functions. Specifically, except as otherwise permitted by the Exchange, it would prohibit members and member organizations from delegating, contracting, or outsourcing to any service provider supervisory or compliance responsibilities under Exchange Act Rule 342, as well as activities that require registration and qualification under the Exchange rules. These proposed restrictions reinforce the long-held concept that functions can be outsourced but responsibility cannot.

.29 For a full text of the proposal, please refer to www.nyse.com/pdfs/2005-22fil.pdf.

NASD Notice to Members

.30 ***Notice to Members 05-48.*** In July 2005, National Association of Securities Dealers (NASD) issued Notice to Members 05-48*, Members' Responsibilities When Outsourcing Activities to Third-Party Service Providers,* to remind members that, in general, any parties conducting activities or functions that require registration under NASD rules will be considered associated persons of the member, absent the service provider separately being registered as a broker-dealer and such arrangements being contemplated by NASD rules (such as in the case of clearing arrangements), Municipal Securities Rulemaking Board (MSRB) rules, or applicable federal securities laws or regulations. In addition, outsourcing an activity or function to a third party does not relieve members of their ultimate responsibility for compliance with all applicable federal securities laws and regulations and NASD and MSRB rules regarding the outsourced activity or function. As such, members may need to adjust their supervisory structure to ensure that an appropriately qualified person monitors the arrangement. This includes conducting a due diligence analysis of the third-party service provider.

.31 ***Interpretive Letter.*** In addition, on August 15, 2006, the NASD issued an Interpretive Letter that provides responses to questions regarding the scope of the guidance provided in Notice to Members 05-48

(NtM 05-48 or the Notice). According to the Letter, NtM 05-48 is not intended as guidance regarding the appropriateness of outsourcing a particular activity or whether an activity may or may not be outsourced to a nonbroker-dealer third-party service provider. Rather, the purpose of NtM 05-48 was to clarify a member's responsibilities if the member outsources *covered activities* which the Notice identifies as activities or functions that, if performed directly by members, would be required to be the subject of a supervisory system and written supervisory procedures pursuant to NASD Rule 3010. To help members understand the meaning of the term "covered activities," the Notice provided a short, nonexhaustive list of examples as a reference.

.32 As identified in NtM 05-48, the primary responsibility for any member outsourcing covered activities is to include procedures regarding its outsourcing practices in its supervisory system and written supervisory procedures to ensure compliance with applicable securities laws and regulations and NASD rules. In addition, because a member has a continuing responsibility to oversee, supervise, and monitor the service provider's compliance performance of covered activities, the member must have in place specific policies and procedures to monitor the service provider's compliance with the terms of any agreements and assess the service provider's continued fitness and ability to perform the covered activities being outsourced.

.33 In addition, NtM 05-48 makes clear that, under certain circumstances, a function outsourced to a third-party service provider renders the person performing that function an associated person of the member by virtue of performing that function, thereby effectively negating any outsourcing because members are responsible for the supervision of all associated persons. NtM 05-48 also points out that the ultimate responsibility for supervision lies with the member. Accordingly, the member may never contract its supervisory and compliance activities away from its direct control, although it may outsource certain activities that support the performance of its supervisory and compliance responsibilities.

.34 The full text of the NASD Interpretive Letter can be viewed at the same site as Notice to Members 05-48 at www.nasd.com/RulesRegulation/NoticestoMembers/2005NoticestoMembers/NASDW_014736.

Internal Risk Management Control Systems of Consolidated Supervised Entities

.35 In April 2004, the SEC adopted rule amendments under the Exchange Act that establish a voluntary, alternative method of computing deductions from net capital for certain broker-dealers that are part of a consolidated supervised entity (CSE). This alternative method permits a broker-dealer to use mathematical models to calculate net capital requirements for market and derivatives-related credit risk.

.36 According to the amended rules (Appendixes E and G to Rule 15c3-1, "Net Capital Requirements for Brokers or Dealers"), broker-dealers that use this alternative method of computing net capital are required to have both their internal audit function and external auditors perform specific procedures related to their internal risk management controls in accordance with Rule 15c3-4, "Internal Risk Management Control Systems for OTC Derivatives Dealers," under the Exchange Act. The amended rules specify that only a *registered public accounting firm* (as that term is defined in section 2(a)(12) of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7201 *et seq*.) could act in the capacity of an external auditor for such broker-dealers. Under the rule, the external auditors would be required to review the internal risk management control system in accordance with procedures agreed upon by the broker-dealer, the external auditor conducting the review, and the SEC.

.37 The five industry participants currently registered as CSEs made a proposal to the SEC in late 2005 to replace the requirements for an annual accountants report on internal risk management control systems under Rule 15c3-1 Appendix G (b)(1)(iii)(B) with an emphasis on the role the internal audit department (IAD) would play in reviewing such controls each year. IAD would provide appropriate feedback on the regular assessment, and operating effectiveness, of the internal risk management control system within CSE registrant firms covered by Rule 15c3-4 to both senior management and the audit committee. The SEC Division of Market Regulation has agreed to the proposal which is being implemented in 2006.

Review Requirements

.38 The CSE registrants are required to demonstrate that the internal risk management control systems (as defined in Rule 15c3-4) are included within IAD's universe of coverage, that IAD reviews the key elements of those activities on a periodic basis, and that the results of those reviews are reported to senior management and the audit committee, and members of IAD are available for discussion with the SEC. In addition, IAD's periodic reviews must be conducted on a frequency and scope driven by a risk assessment program.

.39 As part of the proposal, internal risk management control system reviews should be conducted by IAD at three levels:

1. *Risk Oversight and Governance.* This is generally executed through senior risk management oversight committees that establish overall risk management policies. These committees cover, for example, credit and market risks. IAD is to conduct periodic governance reviews that include, as relevant, examination of the constitution of charters, span of authority, reporting procedures, the breadth and appropriateness of committee membership, sufficiency of committee minutes or similar documentation, and the frequency of meetings.

2. *Functional Risk Management*. This is generally executed by independent dedicated risk management functions within each CSE and includes day-to-day risk management activities, such as limit setting and monitoring, and firmwide risk aggregation. These dedicated risk management functions have responsibility for managing risks arising out of business activities, including market, credit, leverage, liquidity, legal, and operational risks. IAD is to conduct periodic reviews of these risk management functions including, as relevant, examining policies and procedures, reporting lines, limit administration, escalation procedures for limit breaches, data accuracy and completeness, data security controls, testing and authorization controls over models, processes to establish internal credit ratings, and other activities relevant to each CSE's functional risk management.

3. *Business Level Risk Management*. This is generally executed by individual business/product areas within each CSE and includes day-to-day risk management activities such as limit monitoring, the requests and approval process for limit adjustments, and the transmission of risk data to the functional risk management areas. IAD is to conduct periodic reviews of these risk management activities as a component of their business/product area audits.

Communication Requirements

.40 The scope of IAD's reviews of the internal risk management control system that should be regularly presented to the audit committee and the SEC's Division of Market Regulation should include the risk oversight and governance and functional risk management levels described above.

.41 ***Audit Committee Communications***. Periodically, but not less than annually, each CSE's IAD is to present the following materials to their audit committee at a meeting where their registered public accounting firm (RPAF) is present:

1. A schedule detailing the status of the year's audit plan over the internal risk management control system, including projected delays, if applicable

2. The rationale for any deferrals or delays in coverage

3. A review of the results of such audits

.42 The audit committee minutes need to reflect that the above topics were discussed, and should include any relevant matters raised by the RPAF. Prior to the audit committee meeting, the RPAF should have had the opportunity to review relevant reports and working papers to be in a position to discuss IAD's coverage and findings related to the internal risk management control system, and to respond to other appropriate questions.

.43 ***Periodic Meetings Between IAD and the Division of Market Regulation.*** The following specific items should be provided to the SEC's Division of Market Regulation in addition to materials already being provided during the recurring quarterly meetings relating to IAD's reviews of the internal risk management control system:

Quarterly meeting following internal audit's annual planning process:

1. IAD's universe of auditable entities comprising coverage over the internal risk management control system
2. A schedule detailing actual audit coverage, of the universe listed in item 1 above, for the past two years and projected coverage for the current and following year

Each quarterly meeting:

1. A schedule detailing the status of the year's audit coverage of the internal risk management control system, including projected delays, if applicable
2. A review of the results of completed audits relating to the internal risk management control system
3. A schedule detailing any open and past due significant issues arising from the reviews of the internal risk management control system
4. Organizational chart showing internal audit's independent reporting lines, if applicable, due to any changes since the last meeting

.44 At the request of the SEC's Division of Market Regulation, RPAFs may meet annually with the Division of Market Regulation, with the consent of the CSE's management, to discuss matters relevant to the CSE's IAD review of the internal risk management control system.

.45 The requirements discussed above are included in chapter 6 of the 2006 edition of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities*. The Broker Dealer Guide also includes two new appendixes related to CSE reporting, namely, Appendix L, "Auditor's Standard Report on Consolidated Supervised Entity," and Appendix M, "Separate Report on the Supplementary Schedule of Consolidated Supervised Entity."

Broker-Dealer Internal Audit/Compliance Priorities

.46 On October 17, 2006, Mary Ann Gadziala, Associate Director of the SEC's Office of Compliance Inspections and Examinations, spoke at the 2006 Annual Conference of the Internal Auditors Division of the Securities Industry Association (SIA). She discussed the SEC's approach to evaluating the internal audit function and areas of focus of the SEC examination program.

Evaluation of Internal Audit Work

.47 The SEC broker-dealer examination program has recently begun the implementation of a new process whereby SEC examiners may leverage off the high quality work of a firm's internal audit department (IAD) in conducting their own risk management examinations. This process is being employed only with respect to risk management examinations of broker-dealers and consolidated supervised entities at the current time because these examinations are very resource-intensive. However, she indicated that the practices and procedures that she discussed may be relevant to the development of an effective internal audit program at any firm, regardless of whether it may be subject to an SEC risk management examination. Since the scope of SEC examination, in which this new process is used, will be somewhat dependent on the SEC's evaluation of the firm's internal audit work, the SEC risk management examination process has changed to permit on-site examination to begin with a review of the work of the firm's IAD. After evaluation of the internal audit work, SEC examiners will conduct an examination of market, credit, legal and compliance, operational, and liquidity risks of the firm. They will use an examination scope that may be limited or adjusted based on the firm's internal audit work. She indicated that in order to evaluate the quality and strength of the firm's internal audit function, some areas that may be reviewed by the SEC include the qualifications and expertise of audit management and staff, the adequacy of resources and systems, the independence and authority of the IAD, and the adequacy of audit coverage throughout the organization with a focus on risk management audits.

.48 One of the first documents reviewed by the examination team is typically the internal audit charter or similar document that defines the purpose, authority, and responsibility of the internal audit function and is approved by the top levels of the firm, such as senior management and the audit committee. This document should be maintained and updated on a periodic basis and would generally include the following:

- The objectives and scope of the internal audit function;
- The IAD's role within the firm;
- The authority and access of the head of IAD to top levels of the firm, such as the audit committee and senior business executives;
- IAD's powers and responsibilities, which include full and direct access to all records and activities of the firm, as well as access to and the ability to communicate with any employee of the firm;
- The accountability of the head of IAD; and
- The terms and circumstances under which IAD may act in an advisory or consulting role.

.49 The independence of IAD is also critical to the effectiveness and quality of their evaluation of the activities and operations of an organization. Effective implementation of the internal audit function requires that IAD have adequate resources, including personnel and technology to complete the audit plan and auditing tasks effectively and in a timely manner. Auditors should have adequate experience in both auditing and an understanding of business operations of the firm where the auditor has audit responsibilities. SEC examination staff may review résumés or biographies of the internal audit staff, the firm's policies and procedures with respect to minimum qualifications, and auditors' educational level and professional experience. Training and continuing education are also assessed during the examinations.

.50 SEC examiners will evaluate the "audit universe" and audit cycles set by IAD, which are all the areas of a firm that expose it to risk. Among the SEC examiners' primary concerns regarding a firm's audit universe are its completeness, risk rankings, and cycles as related to risks and controls.

.51 An effective IAD generally has thorough and clear procedures with respect to the conduct of its audits. Effective audit procedures may (1) explain how the auditor conducts audits; (2) describe the required working papers necessary to support the audit; (3) contain guidelines for testing and sampling; (4) discuss supervision of the audit; and (5) describe reporting of audit findings and audit reports.

.52 SEC examiners will consider the guidance of recently issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), in their evaluation. SAS No. 103, which applies to audits of nonpublic companies, requires an auditor to prepare audit documentation that is sufficiently detailed for an experienced auditor having no previous connection to the audit to understand the audit work performed, evidence obtained, and conclusions reached. SAS No. 103 also requires auditors to assemble audit documentation that is the "final engagement file" within 60 days of the report release date. It also provides guidance on what to document; states that oral explanations by themselves are insufficient to support audit work or conclusions although they may be used to clarify audit documentation; and specifies a minimum file retention period of five years.

.53 The firm's meaningful corrective action in response to the audit is also a key element of the effectiveness of IAD's work. Therefore, appropriate dissemination of results and follow-up are essential.

.54 The SEC examination team will determine whether audit procedures include an adequate system to monitor audit findings and their resolution.

SEC Examination Focus Areas

.55 She also discussed some of the current areas of focus for the SEC examination program, including:

- *Supervision*. Written supervisory procedures should be complete and updated to keep pace with regulatory or business changes. They also need to be effectively implemented. Large, high-volume firms using manual monitoring processes may raise supervisory concerns. Branch office supervision is a growing challenge as the number of branch offices has escalated to about 170,000, and many offices are independent contractors or at remote locations, offering additional challenges. Outsourcing of more and more activities also raises supervisory issues. Supervising correspondence also remains a priority.

- *Sales Practices*. Sales and marketing to senior citizens is a top concern. SEC examiners are focusing on certain products with more frequent sales practice problems, including Section 529 plans, variable annuities, illiquid securities, and initial public offerings (IPOs). Instances of retail and corporate bond dealers charging large mark-ups or mark-downs on riskless principal and inventory transactions may raise suitability concerns. Also, SEC examiners continue to find firms that are not providing investors with appropriate breakpoint discounts on mutual fund purchases.

- *Risk Management*. Firms continue to make significant advances in risk management internal controls. However, there are still some areas to which special attention might be directed. For example, it is a good practice for firms to continually monitor and update business continuity plans as appropriate to implement technological advancements and address new challenges, such as a potential pandemic. Assuring that back office operations and compliance keep pace with sales and marketing new products is an area of focus. And SEC examiners are examining whether firms are effectively addressing problems with assignments and confirmations with respect to credit derivatives. Complex structured finance transactions should also be carefully monitored for appropriate risk management. Information security is a key risk management concern, particularly in view of increased instances of identity theft. Another critical risk management area is conflicts of interests, which should be carefully monitored especially by firms with diversified activities and customers.

- *Financial Issues*. Net capital deficiencies and inaccuracies in computing net capital remain among top findings from SEC examinations. Imposing adequate margin requirements on customers, particularly hedge funds and other significant or highly leveraged customers, is also an area of focus. Firms should be mindful of developments with respect to portfolio margining. SEC examiners have also focused a significant amount of attention on the alternative net capital computations of broker-dealers using methodologies that incorporate the concepts of the Basel capital requirements with internal mathematical models as the underlying basis.

- *Anti-Money Laundering (AML)*. Some areas of focus are: firms' relationships with foreign institutions; general risk assessment and suspicious activity reporting; independent tests—are they timely, comprehensive, and conducted by a person with sufficient knowledge of AML laws; whether firm compliance programs are adequate and effectively implemented; and whether each regulated entity has met its independent obligations under the USA PATRIOT Act.

- *Books and Records*. Having accurate books and records is a key component of ensuring compliance with the law and having financial integrity and accuracy of financial statements. They are also key to understanding firm operations and activities. It is important that all business-related correspondence and records, including e-mails, be accurately maintained and accessible as required.

- *Trading Practices*. Examinations continue to find instances of market timing in mutual funds, variable annuity products, and real estate investment trusts (REITs). Best execution of transactions is also an examination priority as well as compliance with Reg SHO. Trading practices is another area in which conflicts are a concern, particularly with respect to maintaining the confidentiality of nonpublic customer trade information and preventing insider trading, front running, and market manipulation.

.56 The full text of this speech is available at the SEC Web site at www.sec.gov/news/speech/2006/spch101706mag.htm.

Anti-Money Laundering Recent Regulatory Developments

.57 Over the past several years, regulators have issued a number of rules to implement key provisions of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the USA PATRIOT Act). It is critical for securities firms to comply with AML regulations, as noncompliance may lead to serious negative consequences, including tarnished reputations, legal and regulatory problems, and, in some cases, civil or criminal actions. Also, laundered funds and their proceeds could be subject to asset seizure and forfeiture (claims) by law enforcement agencies, which could result in material contingent liabilities during the prosecution and adjudication of cases.

.58 The following sections discuss recent AML developments as well as issues of continuing importance.

Customer Identification Programs

.59 ***SEC No-Action Letter—Financial Record Keeping and Reporting of Currency and Foreign Transactions/Broker-Dealer Customer Identification Rule***. On July 11, 2006, the staff of the Division of Market Regulation (Division), in consultation with the FinCEN, issued a letter stating that it would not recommend enforcement action to the SEC under Rule 17a-8. If a broker-dealer relies on an investment adviser, prior to such adviser becoming subject to an AML Rule, provided all the other requirements and conditions in paragraph (b)(6) of the CIP Rule are met, namely that (1) such reliance is reasonable under the circumstances; (2) the investment adviser is regulated by a federal functional regulator; and (3) the investment adviser enters into a contract requiring it to certify annually to the broker-dealer that it has implemented an AML program, and that it will perform (or its agent will perform) specified requirements of the broker-dealer's customer identification program. The relief will be withdrawn without further action on the earlier of (1) the date upon which an AML Rule for advisers becomes effective, or (2) January 12, 2008.

.60 For more information please refer to www.sec.gov/divisions/marketreg/mr-noaction/antiml071106.htm.

.61 ***Frequently Asked Questions Customer Identification Program Responsibilities Under the Agency Lending Disclosure Initiative.*** In April 2006, FinCEN together with the SEC published guidance in the form of questions and answers that address customer identification program (CIP) responsibilities where a U.S. bank or broker-dealer (agent lender) arranges a loan of securities to a broker-dealer under the Agency Lending Disclosure Initiative. The question is whether a broker-dealer borrower is required to treat the agent lender's customers as "customers" for purposes of the CIP Rule. Under the circumstances described in the document, the answer is *no.* Notwithstanding the limited information the broker-dealer borrower obtains about the underlying lender(s), the "customer" of the broker-dealer for purposes of the CIP rule is the agent lender. This guidance can be viewed on the SEC Web site at www.sec.gov/divisions/marketreg/qa-cip.htm.

.62 ***SIA AML Committee's Suggested Practices For Customer Identification Programs.*** In January of 2006, the SIA (now SIFMA) published Suggested Practices For Customer Identification Programs (CIP Suggested Practices), which is a supplement to the SIA's Preliminary Guidance For Deterring Money Laundering Activity issued in 2002. The CIP Suggested Practices discusses the minimum identification information and verification procedures required by the CIP Rule and sets forth what the AML Committee believes are certain practices firms may wish to consider in developing and implementing an effective CIP. The CIP Suggested Practices can be found at www.sia.com/publications/pdf/CIPGuidelines.pdf.

Suspicious Activity Reports

.63 ***FinCEN Guidance on Sharing of Suspicious Activity Reports by Securities Broker-Dealers, Futures Commission Merchants, and Introducing Brokers in Commodities***. In January 2006, FinCEN, after consulting with staff of the SEC and CFTC, issued Guidance on Sharing of Suspicious Activity Reports by Securities Broker-Dealers, Futures Commission Merchants, and Introducing Brokers in Commodities, in which it confirms that securities broker-dealers, FCMs, and IBs in commodities may share Suspicious Activity Reports with parent entities, both domestic and foreign. For more information, please refer to FinCEN Web site at www.fincen.gov/sarsharingguidance01202006.pdf.

Foreign Correspondence and Private Banking Accounts

.64 ***FinCEN Guidance on the Application of the Section 312 Rules to Certain Introduced Accounts and Give-up Arrangements in the Futures Industry***. In June 2006, FinCEN issued guidance in the form of a letter to clarify the obligations of FCMs subject to the final due diligence rules implementing Section 312 of the USA Patriot Act. This guidance can be found at www.sia.com/moneyLaundering/pdf/FincenResptoBarbaraWierzynski.pdf.

.65 ***FinCEN Guidance on the Application of the Section 312 Rules Requiring Special Due Diligence Programs for Certain Foreign Accounts***. In May 2006, FinCEN issued guidance in the form of a letter to clarify the due diligence obligations for broker-dealers, FCMs, and IBs in commodities under the final rules of Section 312 of the USA Patriot Act. This guidance can be found at www.sia.com/moneyLaundering/pdf/SIA-FIAfromFinCEN05-02-06.pdf.

AML Examination Findings

.66 On March 29, 2006, Lori A. Richards, Director of the Office of Compliance Inspections and Examinations of the SEC, spoke at the Sixth Annual Anti-Money Laundering Conference hosted by the SIA, where she discussed some of the important issues that have come up in recent AML examinations. The full text of this speech is available on the SEC Web site at sec.gov/news/speech/spch032906lar.htm.

Registration With PCAOB—Extension of Order Regarding Broker-Dealer Financial Statement Requirements Under Section 17 of the Exchange Act

.67 Although the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley or the Act) is directed at *issuers* (as defined by the Act) and their auditors, nonpublic broker-dealers also come under the scope of certain provisions of the Act. This is because Section 205(c)(2) of the Act amended Section 17 (15 U.S.C. 78q) of the Exchange Act to require *all* broker-dealers (both public and nonpublic) to be audited by a public accounting firm registered with the Public Company Accounting Oversight Board (PCAOB).

.68 Section 17(e)(1)(A) of the Exchange Act requires that every registered broker-dealer annually file with the SEC a certified balance sheet and income statement, and Section 17(e)(1)(B) requires that the broker-dealer annually send to its customers its certified balance sheet. The Sarbanes-Oxley Act established the PCAOB and amended Section 17(e) to replace the words *an independent public accountant* with *a registered public accounting firm.*

.69 The Act establishes a deadline for registration with the PCAOB of auditors of financial statements of "issuers." The Act does not provide a deadline for registration of auditors of nonpublic broker-dealers.

.70 On December 12, 2006, the SEC extended its Order permitting nonpublic broker-dealers (broker-dealers that are not "issuers") to file with the SEC a balance sheet and income statement and send to their customers a balance sheet certified by an independent public accountant, instead of by a PCAOB registered public accounting firm for fiscal years ending before January 1, 2009.

.71 The extension was originally issued on August 4, 2003, extended on July 14, 2004, and extended again on December 5, 2005. The 2005 Order was to expire on January 1, 2007. The SEC has determined that extending the Order for two additional years is consistent with the public interest and the protection of investors. See Release No. 34-54920 at www.sec.gov/rules/other/2006/34-54920.pdf for more information.

.72 Application of registration requirements and procedures to auditors of nonpublic broker-dealers is still being considered.

Breakpoint Refund Liability

.73 In Notice to Members 03-47, *Refunds to Customers Who Did Not Receive Appropriate Breakpoint Discounts in Connection with the Purchase of Class A Shares of Front-End Load Mutual Funds and the Capital Treatment of Refund Liability*, the NASD ordered broker-dealers to provide refunds to customers who had not been given appropriate breakpoint discounts on purchases of mutual funds with front-end loads.

.74 The NASD provided guidelines for firms to follow when calculating refunds to customers and accounting for their anticipated refund liabilities. NASD stressed that firms needed to consider the requirements of Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 6, *Elements of Financial Statements*, when accounting for their refund liability. FASB Concept Statement No. 6 specifically recognizes that the amount of a liability does not need to be certain before it is recorded. Accordingly, approximations and estimates could be used to record the liability. Thus, firms had to determine their probable liability based upon information available at the time in accordance with FASB Concept Statement No. 6. NASD also issued further guidance to members as to the amount of refund they should be setting aside for customers, which was to be based upon a sampling. Firms were either to record this amount or justify the appropriateness of selecting an alternative amount.

.75 Based on their experiences to date, a number of broker-dealers have claimed that they were overly conservative in estimating the total amount of potential customer restitution. Presumably, many customers who likely or possibly failed to receive breakpoint discounts have not submitted claims. Accordingly, these firms believe that due to the passage of time and in light of their efforts to communicate the availability of a possible refund, it is appropriate to reverse fully or reduce their remaining liability related to such restitution.

.76 The NASD believes that while firms have generally made substantive efforts to communicate the availability of restitution where it is warranted, the current absence of customers' claims does not on its own support removal of the liability.

.77 Prior to reducing or removing its current liability, a firm should determine to the satisfaction of those responsible for the financial management of and reporting for the firm that such a reduction of the current balance of the breakpoint liability would be representatively faithful with respect to the firm's securities business and operating practices.

.78 Further, in observing in the conduct of its business high standards of commercial honor and just and equitable principles of trade, a firm should continue to provide customers through its Web site ready-access to the NASD Mutual Fund Breakpoint Search Tool and related information found on NASD's Web site.

.79 Finally, the firm should consider any customer claim regarding a possible failure to provide an available breakpoint discount, and as appropriate, compensate such customer upon determination of a bona fide claim, regardless of when the firm failed to provide an appropriate breakpoint discount.

Recent Concerns of Regulators

.80 Over the past several years during examinations of broker-dealers, regulators encountered a number of issues, some of which are discussed in this section.

SEC

.81 ***Consolidation of Subsidiaries.*** Regulators would like to remind broker-dealers and their auditors about the requirement of Rule 17a-5(d)(2), which provides that if the Statement of Financial Condition filed in accordance with instructions to Form X-17A-5, Part II or Part IIA, is not consolidated, a summary of financial data, including the assets, liabilities, and net worth or stockholders' equity for subsidiaries not consolidated in the Part II or Part IIA Statement of Financial Condition, as filed by the broker or dealer, should be included in the notes to the consolidated statement of financial condition reported on by the independent public accountant. Readers may also wish to refer to paragraphs 4.13 and 4.14 of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* for more information.

CFTC

.82 ***Maintenance of Minimum Financial Requirements and Notification Requirements.*** CFTC Regulation 1.17 specifies minimum capital requirements and CFTC Regulation 1.12 specifies the conditions requiring FCMs to give notice of certain events occurring in a firm's financial or operational condition, changes or anticipated changes in capital balances, and how and when such notices are to be given.

.83 For example, Regulation 1.12(g) requires that an FCM provide written notice of a substantial reduction in capital as compared to that last reported in a financial report filed with the CFTC pursuant to Regulation 1.10. If such reduction would be caused by a withdrawal of equity capital of 30 percent or more, notice must be provided at least two days prior to the withdrawal. For any reduction in net capital of 20 percent or more, notice must be provided within two days after the reduction.

.84 FCMs should establish procedures to ensure that the notices required by CFTC regulations are filed with the CFTC within the established time frames set forth in the regulations. Particularly, it is a violation of CFTC rules for an FCM to file notice of a withdrawal of equity capital of 30 percent or more no earlier than two days prior to withdrawal. FCMs should not provide the notice after the filing of the financial statements in which the withdrawal is reflected. Failure to make a timely filing negates the purpose of the rule, which is designed to alert the CFTC to a possible change in an FCM's financial condition. Notices should be filed promptly when due and provide an explanation for the decrease in net capital.

.85 FCMs also should consider including details in the comments section of the electronically filed financial report affected by reporting when they have made or intend to make the filing required by Regulation 1.12(g).

.86 ***Segregation of Customer Funds in Multiple Currencies.*** FCMs must maintain compliance with CFTC record keeping, computation, and segregation requirements applicable to customer funds held in multiple currencies. Regulation 1.20 requires that all customer funds be separately accounted for and segregated as belonging to commodity customers and deposited in an account that clearly identifies those funds as such. Regulation 1.32 requires each FCM to compute as of the close of each business day, on a currency-by-currency basis:

1. Total amount of customer funds on deposit in segregated accounts on behalf of commodity and commodity option customers;

2. Amount of such customer funds required to be on deposit in segregated accounts; and

3. Amount of the FCM's residual interest in such customer funds.

.87 CFTC Regulation 1.49 specifies the conditions under which the FCM's obligations to a customer may be denominated in currencies other than the U.S. dollar. The regulation also specifies the geographic locations in which customer funds may be held, and the required qualifications for permissible depositories in those locations.

.88 Some areas of recent focus in regard to these regulations include the treatment of customer-owned securities that are denominated in non-U.S. currencies, and which are held in depositories outside of the U.S. All FCMs should take steps to ensure that such depositories satisfy all of the required criteria set forth in Regulation 1.49(d)(3). FCMs should also ensure that such customer-owned securities are included in the segregation computation for the currency in which they are denominated.

.89 Furthermore, FCMs should ensure that offsets to customer account deficits that are denominated in multiple currencies are computed in accordance with Rule 1.49(e). At the close of each business day, Rule 1.49(e) requires the FCM to maintain in segregated accounts sufficient U.S. dollars, held in the United States, to meet all U.S. dollar obligations, and also sufficient funds in each other currency to meet obligations in such currency, with certain permitted substitutions:

1. U.S. dollars held in the United States may be used to meet obligations denominated in any other currency, and

2. "Money center" currencies and U.S. dollars held in money center countries may be held to meet obligations denominated in currencies other than the U.S. dollar.

.90 ***Regulatory Supplemental Schedules Required by CFTC.*** Within the last year, several FCMs have notified the CFTC that, as the result of errors in calculating the amount of funds that are held or required to be held in segregated accounts for customers, there have been overstatements of the amounts of excess funds in segregation versus those reported by the FCM in their annual audited financial reports filed with the CFTC. One of the reported errors affected the segregation statement and also caused this FCM to overstate its reported amount of excess net capital. FCMs should exercise appropriate diligence when preparing their regulatory schedules and have FCM supervisory personnel review the calculations before they are filed with the CFTC; FCMs should be aware that regulators are likely to subject these schedules to a higher level of scrutiny based on the errors mentioned above. FCMs may wish to consider CFTC guidance on materiality provided to Self-Regulatory Organizations (SROs) in CFTC Financial and Segregation Interpretation No. 4-1, which addresses SROs' responsibilities with respect to in-field examinations and ongoing surveillance over members' compliance with the SRO/CFTC's financial, segregation, and related record keeping rules. FCM independent auditors may wish to read this guidance to assist them in evaluating the materiality of (1) errors affecting segregation or secured calculations, or (2) the impact these may have on an FCM's reported net capital/excess net capital. Attention is directed to paragraph 40 of this Interpretation, which defines a material error (for the purpose of an SRO in-field examination) as an error in any line item that would cause a change of 10 percent or more in excess net capital or excess segregated funds or where the adjustment, if made to the financial statements, would cause the FCM to fall below the "early warning" level. (Interpretation No. 4-1 can be accessed at the CFTC Web site at www.cftc.gov/tm/tmint4.htm).

SEC/CFTC

.91 ***Reporting Material Differences Between Unaudited and Audited Financial Statements.*** SEC Rule 17a-5 and CFTC Regulation 1.10(d)(2)(vi) require that if material differences exist between certain schedules that are filed in the registrant's audited and "most recent" unaudited FOCUS Report/Form 1-FR, a reconciliation, including appropriate explanations, must be included with the audited financial report filed with the SEC/CFTC. To avoid differences in the two reports, some registrants have filed subsequent amendments to the Form X-17-5/Form 1-FR routinely filed at the end of the year, incorporating into those filings, adjustments recommended by their independent auditors. Because of the amendments to the previous FOCUS Report/Form 1-FR, these firms claimed that there were no differences between the audited report and the firm's "most recent" FOCUS /Form 1-FR filing and would typically file no reconciliation. According to an SEC Letter to NYSE dated April 24, 1987 (the Letter), this interpretation frustrates the purpose of the Rule. The Rule requires that, in spite of the amendment, the audited version of the firm's year-end Form X-17A-5 contain a reconciliation and explanation of material differences, if any, as compared to the original filing at the end of the year. However, the Letter provides that if a broker-dealer files an amended FOCUS report that contains the reconciliation and explanation of material differences between the amended report and the original report, the audited report may be reconciled with the amended FOCUS report and would include a statement as to whether any material differences are shown in the amendment. The CFTC's requirements are substantially the same.

.92 Therefore, if the registrant's amended unaudited fiscal year-end report includes a reconciliation with appropriate explanations, no other reconciliation is required to be filed with the registrant's audited financial report, except where a separate reconciliation is necessary because there are material differences between the schedules filed in the audited report and the amended unaudited report. In such a case, the separate reconciliation filed with the audited financial report must specify that it has been made to the registrant's amended unaudited report.

NASD

.93 ***Soft Dollar and Commission Rebate and Recapture Arrangements.*** A number of broker-dealers offer some type of soft dollar or commission rebate and recapture program. Although the nature of the benefits to customers involved in such programs vary, the mechanics of the payments can substantially increase a broker-dealer's net capital requirement pursuant to the Securities Exchange Act Net Capital Rule, and may subject the broker-dealer to the requirements of the Securities Exchange Act Customer Protection Rule. NASD has encountered situations in which a broker-dealer will claim to be offering a soft dollar program—the broker-dealer presumably arranging for the provision of a service or product to a customer, independently of the customer—though, in fact, the structure of the remittance to a third party amounts to a commission rebate. Firms should be aware that the primary guidance regarding financial requirements relative to the use of commission rebate and recapture arrangements is found in a February 2002 verbal interpretation from the SEC to the New York Stock Exchange, as follows:

> Any introducing broker-dealer that rebates a portion of its commission back to its customer, either as a cash payment or to a creditor of the customer, is required by SEC Rule 15c3-1(a)(2)(i) to maintain a minimum net capital requirement of at least $250,000. It is also considered a carrying firm for purposes of SEC Rule 15c3-3 unless it elects the following method for the handling of the customers' rebates:
>
> (1) The introducing broker deposits money into a separate SEC Rule 15c3-3 bank account similar to those accounts established under an SEC Rule 15c3-3 (k)(2)(i) exemption;
>
> (2) The balance in this separate bank account at all times must equal or exceed the payables to customers; and
>
> (3) The firm issues checks from this separate bank account to pay the customer or the creditor of the customer.

.94 NASD plans to issue a Notice to Members that would provide additional guidance relative to the regulatory financial requirements that could stem from such programs and illustrate the differences between what is viewed as a soft dollar arrangement as opposed to a commission rebate and recapture program.

.95 ***Transfers or "Sweeps" of Customer Free Credit Balances to Other Locations and Into Other Investments***. In view of market conditions and the increasingly competitive industry environment, broker-dealers continuously seek to develop and offer customers new investment services and products, such as the "cash sweep" account programs. Such programs transfer customer funds over time out of the broker-dealer to an interest-bearing account for the customer at a bank often affiliated with the broker-dealer. With the increasing popularity of "sweeps" programs for customers' credit balances, the NASD is concerned with (1) the sufficiency and timeliness of the broker-dealer's communication with its customers with respect to such arrangements and (2) in some cases, the passage of "swept funds" through a number of "hands" before being invested. Under the current market conditions, NASD anticipates seeing a wider use and a greater variety of "sweep" programs, which may include participants and investees that are either contractually not accountable or lack the experience, systems, and controls to appropriately account for customer funds. NASD recommends that broker-dealers become *thoroughly* familiar with the issues addressed in the New York Stock Exchange's Information Memorandum 05-11, *Customer Account Sweeps to Banks*. Information Memo 05-11 provides that NYSE member organizations that have sweep arrangements whereby customer funds leave the broker-dealer and are held for any period of time by a party other than the bank must address critical issues relating to customer protection and net capital requirements. Customer credit balances that leave the broker-dealer and are not immediately reinvested in an account protected by the Federal Deposit Insurance Corporation (FDIC) may be deemed to be included as a credit in the reserve formula. In addition, any receivable on the broker-dealer's books resulting from a sweep may be deemed to be a nonallowable asset. Information Memo 05-11 addresses issues involving the adoption of new cash sweep programs and provides procedures designed to safeguard investor interests for programs currently in place. It was prepared to set out best practices under current Exchange rules.

.96 Currently, there is a joint industry effort to draft a circular that would request additional procedures related to bank-sweep programs. Among other things, it is expected that one of the provisions of the circular will be a requirement for broker-dealers to prepare a reconciliation between the broker-dealer's records and the amounts on deposit with each intermediary bank and destination bank. The circular is also expected to indicate that the auditors will need to include in the scope of their work procedures around this reconciliation prepared by the broker dealer, if applicable.

.97 ***Appropriateness of Amounts Added Back to Owners' Equity in Computing Net Capital Related to Deferred Tax Liabilities***. Certain firms believe that taxable temporary differences, such as deferred compensation and differences in the depreciation or amortization of non-financial assets, as well as nonsubstantive deferred tax liabilities, those that will not require a future transfer of cash or assets, such as deferred tax liabilities related to financial reporting and tax bases differences of acquired intangible assets, can be added back to owners' equity in computing net capital. These firms also assert that if the underlying asset is nonallowable, any related deferred tax liability should not result in a further reduction in deriving net capital.

.98 In accordance with paragraph (c)(2)(i)(C) of the Securities Exchange Act Rule 15c3-1 (the Net Capital Rule), only deferred tax liabilities resulting from the recognition for financial statement purposes of unrealized income or appreciation related to long inventory, investment positions, or assets that are nonallowable for net capital can be added back to owners' equity in computing net capital. However, the SEC Division of Market Regulation staff has, by specific relief, permitted the add-back of deferred tax liabilities related to the capitalization of internally developed software and deferred advertising costs. The staff will consider requests for relief relative to specific transactions that result in the recognition in deferred tax liabilities which do not entail any associated recognition of unrealized income or appreciation for financial statement purposes.

SEC Regulations

.99 The following is a summary of some rules that the SEC issued since the writing of last year's Audit Risk Alert that may be of interest to broker-dealers. In addition to reading about the regulatory matters presented below, see the AICPA general *Audit Risk Alert—2006/07*, the AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk), and the AICPA *SEC and PCAOB Alert—2006/2007* (product no. 022497kk) for a discussion of some of the most important SEC regulations that have been issued recently that affect many industries, including the securities industry. Also, auditors should visit the SEC Web site at www.sec.gov to inform themselves about recent SEC rulemaking activities.

- *Regulation NMS: Extension of Compliance Dates and Correcting Amendment*. In May 2006, the SEC extended the compliance dates for Rule 610 and Rule 611 of Regulation NMS under the Exchange Act. Rule 610 requires fair and nondiscriminatory access to quotations; establishes a limit on access fees; and requires each national securities exchange and national securities association to adopt, maintain, and enforce written rules that prohibit their members from engaging in a pattern or practice of displaying quotations that lock or cross protected quotations. Rule 611 requires trading centers to establish, maintain, and enforce written policies and procedures reasonably designed to prevent the execution of trades at prices inferior to protected quotations displayed by other trading centers, subject to an applicable exception. The SEC extended the compliance dates to give automated trading centers additional time to finalize development of their new or modified trading systems, and to give the securities industry sufficient time to establish the necessary access to such trading systems. Dates: The effective date for Rule 610 and Rule 611 remains August 29, 2005. The initial compliance date for Rule 610 and Rule 611 has been extended from June 29, 2006, to a series of five dates, beginning on October 16, 2006, for different functional stages of compliance that are set forth in section II.A of this release. The effective date for this release is May 24, 2006. See Release No. 34-53829 for more information. Also, in December 2005, the SEC published a correcting amendment to Regulation NMS. See Release No. 34-51808A for more information.

- *Securities Offering Reform: Correction (technical amendments)*. In February 2006, the SEC made technical corrections to rules adopted in Release No. 33-8591 (July 19, 2005), which were published in the Federal Register on August 3, 2005 (70 FR 44722). The adopted rules modify and advance significantly the registration, communications, and offering processes under the Securities Act of 1933. This document corrects certain errors in the regulatory text of the adopting release and otherwise clarifies certain of the rules. Effective date: February 13, 2006. See Release No. 33-8591A for more information.

.100 Some other SEC rules that might be of interest primarily to those that are public companies:

- *Executive Compensation and Related Person Disclosure.* In August 2006, the SEC adopted amendments to the disclosure requirements for executive and director compensation, related person transactions, director independence and other corporate governance matters, and security ownership of officers and directors. These amendments apply to disclosure in proxy and information statements, periodic reports, current reports and other filings under the Exchange Act, and to registration statements under the Exchange Act and the Securities Act of 1933. The SEC also adopted a requirement that disclosure under the amended items generally be provided in plain English. Effective date: November 7, 2006. See Release No. 33-8732A for more information.

- *Amendments to Plan of Organization and Operation Effective During Emergency Conditions.* In June 2006, the SEC adopted amendments to certain of its rules that operate in the event of emergency conditions to revise the provisions on delivering submittals, the line of succession to the chairman in the event of the chairman's incapacity or unavailability, and make conforming changes. Effective date: June 9, 2006. See Release No. 34-53937 for more information.

- *Revisions to Accelerated Filer Definition and Accelerated Deadlines for Filing Periodic Reports.* In December 2005, the SEC adopted amendments to the accelerated filing deadlines that apply to periodic reports so that a "large accelerated filer" (an Exchange Act reporting company with a worldwide market value of outstanding voting and nonvoting common equity held by nonaffiliates of $700 million or more) will become subject to a 60-day Form 10-K annual report filing deadline, beginning with the annual report filed for its first fiscal year ending on or after December 15, 2006. Until then, large accelerated filers will remain subject to a 75-day annual report deadline. Accelerated filers will continue to file their Form 10-K annual reports under a 75-day deadline, with no further reduction scheduled to occur under the revised rules. Accelerated filers and large accelerated filers will continue to file their Form 10-Q quarterly reports under a 40-day deadline, rather than the 35-day deadline that was scheduled to apply in 2006 under the previously existing rules. Further, the amendments revise the definition of the term *accelerated filer* to permit an accelerated filer that has voting and nonvoting common equity held by nonaffiliates of less than $50 million to exit accelerated filer status at the end of the fiscal year in which its equity falls below $50 million and to file its annual report for that year and subsequent periodic reports on a nonaccelerated basis. Finally, the amendments permit a large accelerated filer that has voting and nonvoting common equity held by nonaffiliates of less than $500 million to exit large accelerated filer status at the end of the fiscal year in which its equity falls below $500 million and to file its annual report for that year and subsequent periodic reports as an accelerated filer, or a nonaccelerated filer, as appropriate. Effective date: December 27, 2005. See Release No. 33-8644 for more information.

- *Asset-Backed Securities; Technical Amendments*. In November 2005, the SEC issued corrections to final rules which were published in the Federal Register on Friday, January 7, 2005 (70 FR 1506). The rules relate to the registration, disclosure, and reporting requirements for asset-backed securities under the Securities Act of 1933 and the Exchange Act. Effective date: December 5, 2005. See Release No. 33-8518A for more information.

Other Recent SEC Developments

.101 The following is a brief discussion of some other SEC developments that might be of interest to broker-dealers and their auditors.

SEC Concept Releases[3]

.102 ***Concept Release Concerning Management's Reports on Internal Control Over Financial Reporting.*** In July 2006, the SEC published this Concept Release to understand better the extent and nature of public interest in the development of additional guidance for management regarding its evaluation and assessment of internal control over financial reporting so that any guidance the SEC develops addresses the needs and concerns of public companies, consistent with the protection of investors. The comment period ended on September 18, 2006. See Release No. 34-54122 for more information.

SEC Interpretive Releases[4]

.103 ***Commission Guidance Regarding Client Commission Practices Under Section 28(e) of the Securities Exchange Act of 1934.*** On July 18, 2006, the SEC published this interpretive release with respect to the scope of "brokerage and research services" and client commission arrangements under Section 28(e) of the Exchange Act. The SEC is soliciting further comment on client commission arrangements under Section 28(e). Section 28(e) of the Exchange Act establishes a safe harbor that allows money managers to use client funds to purchase "brokerage and research services" for their managed accounts under certain circumstances without breaching their fiduciary duties to clients. In this release, the SEC issued interpretive guidance with respect to the safe harbor, with the particular goal of clarifying the scope of "brokerage and research services" in the light of evolving technologies and industry practices. Effective Date: July 24, 2006. Market participants may continue to rely on the SEC's prior interpretations of Section 28(e) until January 24, 2007. Please see Release No. 34-54165 for more information.

---

[3] The SEC occasionally publishes "concept" releases to solicit the public's views on securities issues so that it can better evaluate the need for future rulemaking. The SEC Concept Releases are available on the SEC Web site at www.sec.gov.

[4] The SEC from time to time will provide guidance relating to topics of general interest to the business and investment communities by issuing an "interpretive release," in which it publishes its views on the subject matter and interprets the federal securities laws and its own regulations. The SEC Interpretive Releases are available on the SEC Web site at www.sec.gov.

SEC Policy Statements[5]

.104 ***Interagency Statement on Sound Practices Concerning Elevated Risk Complex Structured Finance Activities.*** On May 19, 2004, Office of the Comptroller of the Currency, Treasury (OCC); Office of Thrift Supervision, Treasury (OTS); Board of Governors of the Federal Reserve System (the Board); FDIC; and the SEC (collectively, the Agencies) issued and requested comment on a proposed Interagency Statement on Sound Practices Concerning Complex Structured Finance Activities (Initial Statement) of national banks, state banks, bank holding companies, federal and state savings associations, savings and loan holding companies, U.S. branches and agencies of foreign banks, and SEC-registered broker-dealers and investment advisers (collectively, termed *financial institutions* or *institutions*). The Initial Statement described some of the internal controls and risk management procedures that may help financial institutions identify, manage, and address the heightened reputational and legal risks that may arise from certain complex structured finance transactions (CSFTs). After reviewing the comments received on the Initial Statement, the Agencies are requesting comment on a revised proposed interagency statement (Revised Statement). The Revised Statement has been modified in numerous respects to address issues and concerns raised by comments; clarify the purpose, scope, and effect of the Statement; and make the statement more principles-based. These changes include reorganizing and streamlining the document to reduce redundancies and focus the statement on those CSFTs that may pose heightened levels of legal or reputational risk to the relevant institution (referred to as *elevated risk CSFTs*). In addition, the Agencies have modified the examples of transactions that may present elevated risk to make these examples more risk-focused, and have recognized more explicitly that an institution's review and approval process for elevated risk CSFTs should be commensurate with and focus on the potential risks presented by the transaction to the institution. The Revised Statement will not affect or apply to the vast majority of small financial institutions, nor does it create any private rights of action. Comment period ended on June 15, 2006. Please see Release No. 34-53773 for more information.

SEC Special Studies[6]

.105 ***Economic Analysis of the Short Sale Price Restrictions Under the Regulation SHO Pilot.*** Short selling in exchange-listed stocks in the United States has been subject to a "tick test" and a "bid test" (the latter applies to NASDAQ National Market Stocks). The tick test and bid test are generally referred to as *price restrictions*. In July 2004, the SEC adopted Regulation SHO, which contains Rule 202T, allowing the SEC to establish, by separate order, a pilot program to examine the efficacy of price restrictions. At the same time, the SEC issued an order (Pilot Order) establishing a pilot program (Pilot) exempting a third of the stocks in the Russell 3000 Index (Russell 3000) from all price restrictions. The Pilot went into effect on May 2, 2005, and was scheduled to end on April 28, 2006, but has been extended to August 6, 2007, to allow the SEC to consider potential rulemaking after evaluating the results of the Pilot. The Pilot was designed to enable the SEC and the broader community to evaluate whether the price restrictions have a substantive impact on market quality, and more generally to achieve a deeper understanding of how price restrictions affect the trading process. The goal of this study is to examine whether eliminating price restrictions has had any impact on market quality, broadly defined. In September 2006, the SEC issued a draft analysis as a result of this study.

.106 The full text of this analysis can be found at www.sec.gov/about/economic/shopilot091506/draft_reg_sho_pilot_report.pdf.

.107 ***Proposed Study to Compare Roles of Investment Advisers, Broker-Dealers***. In August 2006, the SEC issued a request for contract proposals to conduct the first stage of a major study comparing how the different regulatory systems that apply to broker-dealers and investment advisers affect investors. The study was first suggested in connection with a rule that the SEC adopted in April 2005. Broker-dealers are regulated under the Exchange Act. Investment advisers are regulated under the Investment Advisers Act of 1940. The

---

[5] From time to time, the SEC issues a policy statement to clarify its position on a particular matter.

[6] The SEC or SEC staff often undertake special projects to study and report on current trends and issues facing the securities industry.

2005 rule allowed broker-dealers to offer fee-based brokerage accounts without being required to comply with the Advisers Act. The rule was the subject of a large number of comments. Many of the concerns that commentators raised in the rulemaking, however, went well beyond the circumstances covered by the rule; the investment professional study will help the SEC determine whether the concerns are justified and, if so, decide how best to respond.

.108 The full text of the request for proposal can be accessed on the SEC's Web site at www.sec.gov/news/extra/2006/sechq1-06-r-0177.pdf. The SEC's rule providing for the study appears on the SEC's Web site at www.sec.gov/rules/final/34-51523.pdf.

.109 ***Joint Report on Efforts of the Private Sector to Implement the Interagency Paper on Sound Practices to Strengthen the Resilience of the U.S. Financial System***. Congress in the Intelligence Reform and Terrorism Prevention Act required the Federal Reserve, the Office of the Comptroller of the Currency, and the SEC (Agencies) to prepare a study on the efforts of the private sector to implement the ***Interagency Paper on Sound Practices to Strengthen the Resilience of the U.S. Financial System (Sound Practices Paper***). As directed in the legislation, this report, which was released in April of 2006, discusses the efforts of private sector financial services firms covered by the Sound Practices Paper to implement enhanced business continuity plans, and the extent to which implementation has been done in a geographically dispersed manner. This report also addresses the agencies' views whether the Sound Practices Paper should be expanded to a larger range of private sector financial services firms that play significant roles in critical financial markets and whether legislative and regulatory changes are needed to expedite implementation by affected firms and optimize business continuity planning by the financial services industry.

.110 The full text of the report can be found at www.sec.gov/news/press/studies/2006/soundpractices.pdf.

Other SEC Orders, Notices, Information

.111 ***Order Granting Approval of Plan for Allocation of Regulatory Responsibilities Between The NASDAQ Stock Market LLC and the National Association of Securities Dealers, Inc.*** On July 12, 2006, the SEC approved and declared effective a plan for allocating regulatory responsibility between the NASDAQ Stock Market LLC (NASDAQ) and NASD. Accordingly, NASD will assume, in addition to the regulatory responsibility it has under the Exchange Act, the regulatory responsibilities allocated to it under the plan. At the same time, NASDAQ is relieved of those regulatory responsibilities allocated to NASD.

.112 The plan is intended to reduce regulatory duplication for firms that are common members of NASDAQ and NASD. Included in the plan is an attachment that:

- Clearly delineates regulatory responsibilities with respect to specified NASDAQ rules and specified federal securities laws;
- Lists every NASDAQ rule that is identical or substantially similar to a NASD rule for which, under the plan, the NASD would bear responsibility for examining and enforcing compliance by common members;
- Includes the federal securities laws for which, under the plan, the NASD would bear responsibility for examining and enforcing compliance by common members;
- Provides that NASD shall not assume regulatory responsibility, and NASDAQ will retain full responsibility, for the surveillance and enforcement of trading activities or practices solely involving NASDAQ's own marketplace;
- Permits NASDAQ and NASD to terminate the plan for various reasons, including the nonpayment of fees, for cause, and for convenience.

Guide to Broker-Dealer Registration

.113 In December 2005, the SEC Department of Market Regulation issued a Guide to Broker-Dealer Registration. The Exchange Act governs how the nation's securities markets and its brokers and dealers operate. The SEC prepared the guide to summarize some of the significant provisions of the Exchange Act and its rules. Firms will find information about whether they need to register as a broker-dealer and how they can register, as well as what standards of conduct and financial responsibility rules broker-dealers must follow. The guide covers a number of topics including:

- Who is required to register
- How to register as a broker-dealer
- Security futures
- Conduct regulation of a broker-dealer and
- Financial responsibility of a broker-dealer

.114 The guide is available at the SEC Web site at www.sec.gov/divisions/marketreg/bdguide.htm#I.

CFTC Regulations

.115 The following summarizes certain amendments to regulations and interpretations of the CFTC that became effective in the latter part of 2005 and in 2006. These amendments affected the financial reporting requirements of registered FCMs, and also of IBs that are not guaranteed by FCMs. They also included changes to the filing requirements of commodity pool operators (CPOs). The amendments were published in the Federal Register, and can be accessed electronically from the CFTC Web site at www.cftc.gov.

Alternative Capital Deductions for Market Risk and Credit Risk for FCMs Within "Consolidated Supervised Entities"

.116 The CFTC issued final rules, effective February 2, 2006, that specify filing and other requirements that FCMs must comply with in order to elect to use certain alternative capital deductions for their proprietary trading assets instead of the capital deductions that CFTC Regulation 1.17(c) would otherwise require. Only those FCMs that are also registered with the SEC as securities broker-dealers, and that have obtained written SEC approval to compute alternative deductions for market risk and credit risk based on internal mathematical models, may elect to use these same alternative deductions for the capital computations required by CFTC Regulation 1.17.

.117 Simultaneously, rules were adopted affecting minimum net capital requirements of FCMs and IBs by reducing the capital deductions for their uncovered inventory or forward contracts in specified foreign currencies, consistent with prior CFTC staff guidance.

Revision of CFTC Financial and Segregation Interpretation 10

.118 Effective February 13, 2006, Financial and Segregation Interpretation No. 10-1 was amended to prohibit FCMs from depositing, holding, or maintaining margin funds for customer accounts in third-party custodial accounts, except that, under certain specified conditions, FCMs may use such accounts for the assets of a customer that is a registered investment company (RIC) under the Investment Company Act of 1940, if the FCM is not eligible under SEC rules to hold such assets because it is an affiliate of the RIC or its adviser.

Requirement for Electronic Filing of Pool Financial Statements

.119 Effective March 24, 2006, the CFTC amended its rules to require CPOs to submit commodity pool annual financial reports to the National Futures Association (NFA) via the NFA's electronic filing system.

NFA implemented EasyFile, a Web-based system, for CPOs to file their annual financial reports electronically. The system was available in January 2005 for the December 31, 2004, annual report filings on a voluntary basis and became mandatorily effective March 24, 2006, in time for the filing of annual reports as of December 31, 2005. Detailed filing instructions are available on the NFA's home page, www.nfafutures.org under Electronic Filings, Easy File for Pool Filers. CPOs should not file hard copies of annual financial reports filed through EasyFile with either NFA or the CFTC. CPOs are required, however, to provide hard copies of the annual reports to their pool participants, and maintain a manually signed copy of the audit report, readily available for inspection by regulators.

Increase in Minimum Capital Requirements

.120 The CFTC posted on its Web site in July 2006 a revised Instructions Manual for the financial Form 1-FR-FCM, which noted necessary changes to FCM financial reports in order to reflect increased capital requirements adopted by NFA rule amendments that became effective July 31, 2006. These amendments, which were approved by the CFTC, increased minimum financial requirements for FCMs, IBs, and forex dealer members (FDMs), as follows:

- For FCMs, from $250,000 to $500,000
- For IBs, from $30,000 to $45,000
- For FDMs, from $250,000 to $1,000,000

.121 The NFA amendments also imposed the following greater requirements:

- A $7,500,000 minimum capital requirement for FCMs with affiliates, if those affiliates are authorized to act as counter parties to off-exchange forex transactions with retail customers solely by virtue of their affiliation with a registered FCM; and
- A $5,000,000 minimum capital requirement for all FCMs that are counter parties to off-exchange forex options transactions with retail customers.

.122 Also, effective November 30, 2005, the NFA adopted counter party concentration charges for FDM foreign currency transactions as follows:

- For transactions with unregistered, unaffiliated counter parties, if the net open position with the counter party exceeds 10 percent of the FDM's aggregate long or short position in a particular currency, the amount in excess of 10 percent is subject to a 6 percent haircut (if the currency is euros, British pounds, Canadian dollars, Japanese yen, or Swiss francs) or a 20 percent haircut (for all other non-U.S. currencies).
- For transactions with affiliates, the required 6 or 20 percent haircut is applied to the greater of (1) the sum of the amounts by which the FDM's net open position with any single affiliate exceeds 10 percent of the FDM's total long or short position in a particular currency; or (2) the amount by which the FDM's net open position with all affiliates combined exceeds 10 percent of the FDM's aggregate long or short positions in a particular currency.

CFTC Annual "Dear CPO" Letter

.123 On February 17, 2006, CFTC staff issued its annual letter to CPOs outlining key reporting issues and common reporting deficiencies found in annual financial reports for commodity pools. The letter emphasized the CFTC staff's concerns and, accordingly, may alert the auditor to high-risk issues that could affect assertions contained in the financial statements of commodity pools. CFTC staff suggested that CPOs share the letter with their independent auditors.

.124 Major concerns addressed in the letter are:

- Due dates of commodity pool financial filings—late filings
- Amendments to Part 4
- Notification of a change in accountants
- Compliance with U.S. generally accepted accounting principles (GAAP)
- Requests for relief from U.S. GAAP compliance for certain offshore commodity pools
- Initial annual reports and final annual reports
- FASB Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity*, implementation and its impact on participants' redemptions
- Reminder regarding availability of annual report information under the Freedom of Information Act (FOIA)

.125 The letter also noted that the CFTC's Division of Clearing and Intermediary Oversight (DCIO) issued similar letters in prior years, available under the "Compliance Information" section of the CFTC's Web site at www.cftc.gov. Those letters should be consulted with respect to commodity pool annual financial statements and reporting. In addition, CFTC interpretations and staff letters providing guidance from 1995 forward are also available there. In particular, CFTC Interpretive Letter 94-3, *Special Allocations of Investment Partnership Equity*, addresses how a CPO should report such allocations to the general partner in a commodity pool's financial statements.

Self-Regulatory Organization Regulations

.126 Under the Exchange Act, all broker-dealers are required to be members of SROs such as the NYSE and NASD, or some other organization that is designated to perform routine surveillance and monitoring of its members. During the past year, a number of significant regulations were issued by SROs, some of which are described in the following sections. Please refer to the Web sites of the respective SROs for a complete listing of recently issued rules and regulations.

.127 Please note that on November 28, 2006, the NASD and the NYSE announced a plan to consolidate their member regulation operations into a SRO that will be the single regulator for all securities firms doing business with the public in the United States. Please refer to the NASD Web site at www.nasd.com/RegulatoryConsolidation/index.htm for more information.

NASD Rulemaking

.128

- *Notice to Members 06-26—Amendments to Margin Rules to Reflect Additional Complex Option Spread Strategies*. On April 3, 2006, NASD filed with the SEC for immediate effectiveness a rule change to amend NASD Rules 2520 and 2522 that revised the margin requirements to recognize specific additional complex option spread strategies for purposes of determining required margin, and has amended the provisions relating to "permitted offsets" for certain listed option transactions. Rules 2520 and 2522, as amended, are set forth in Attachment A of Notice 06-26. The effective date and the implementation date of the amendments was April 3, 2006.
- *Notice to Members 06-23—NASD Reminds FINOPs of their Obligations under NASD Rule 1022 and Issues Guidance to FINOPS Who Work Part-Time, Work Off-Site, or Hold Multiple Registrations*. NASD issued this *Notice to Members* to remind member firms and registered financial and operations principals (FINOPs) of a FINOP's duties and responsibilities under Rule 1022 (Categories of Principal Registration). These duties are applicable to all FINOPs, regardless of whether they are employed full-time

or part-time, perform such duties on-site or off-site of the member firm or hold registrations with more than one firm. This Notice also provides additional guidance to assist FINOPs who are employed part-time, operate off-site, or hold multiple registrations in fulfilling their duties. Additionally, NASD reminds members and FINOPs that their failure to meet their responsibilities can result in disciplinary actions against both the FINOP and the member firm employing the FINOP.

- *Notice to Members 06-07—SEC Approves Amendments to Anti-Money Laundering Compliance Program Rule and Adoption of Interpretive Material.* On December 28, 2005, the SEC approved amendments to NASD Rule 3011 and the adoption of IM-3011-1 and IM-3011-2. The amendments and new interpretive material require a firm to conduct an independent test of its AML compliance program on an annual basis (with the exception of certain types of firms), clarify the persons not considered to be independent for purposes of the independent testing requirement, and require a firm, on a quarterly basis, to review and, if necessary, update the information regarding the firm's AML compliance person. The new rule text and interpretive material are contained in Attachment A to Notice 06-07. The amendments became effective on March 6, 2006. Also see the "AML Testing Requirements and Auditor Independence" section of this Alert for a discussion of this rule amendment as well as the impact of AML testing engagements on the independence of auditors.

- *Notice to Members 06-04—SEC Approves Amendments to NASD Rule 3012 to Require Members Relying on Rule 3012's "Limited Size and Resources" Exception to Notify NASD of their Reliance.* On November 18, 2005, the SEC approved amendments to NASD Rule 3012 to require members relying on the "limited size and resources" exception to Rule 3012's general supervisory requirement for conducting producing managers' supervisory reviews to report electronically to NASD their reliance on the exception. NASD issued this *Notice to Members* to advise members of the rule change and to introduce the electronic reporting system that members will need to use to notify NASD of their reliance on Rule 3012's "limited size and resources" exception. Questions and answers relating to the rule change and the reporting system are included. The new rule text appears in Attachment A to Notice 06-04. It became effective on February 14, 2006. A sample screen shot of the electronic notification system Web page is in Attachment B to Notice 06-04.

.129 The rules are available at the NASD Web site at www.nasd.com.

.130 Please be aware that securities industry professionals and others can subscribe to NASD's free e-mail service. Among other things, subscribers can obtain weekly notifications of regulatory information and updates, including new speeches, news releases, announcements, and publications. This service would be an excellent source of current information for anyone involved with broker-dealers and who is seeking to learn what regulatory issues may be affecting the industry. You can subscribe to NASD e-mail service at apps.nasd.com/contact_us/SubscriptionForm.aspx?lists=prof.

.131 Also, broker-dealers and other interested parties should avail themselves of other resources available on the NASD Web site, including:

- *NASD Manual Online*. Recently redesigned, the manual contains core regulatory content, including rules and bylaws.
- *NASD Rule Filing Status Report*. This provides a comprehensive list of pending rule filings.
- *NASD Frequently Asked Questions*. These clarify rules to better understand compliance requirements.
- *OFAC Search Tool.* This automated tool searches the "Specially Designated Nationals and Blocked Persons" list.

.132 This information is available at www.nasd.com/web/idcplg?IdcService=SS_GET_PAGE&nodeId=606&ssSourceNodeId=612.

NYSE Rulemaking

.133

- *Information Memo 06-86, Amendments to NYSE Rules 431 and 726 That Expand Customer Portfolio Margining.* See the "Portfolio Margining" section of this Alert.

- *Information Memo 06-57, Amendments to Rules 431 and 726 That Expand the Scope of Eligible Products for the Customer Portfolio Margining Pilot.* See the "Portfolio Margining" section of this Alert.

- *Information Memo 06-56, Amendments to Rules 104 123E to Change the Capital Requirements for Specialist Organizations.* On July 25, 2006, the SEC issued an order approving amendments to NYSE Rules 104, *Dealings by Specialists*, and 123E, *Specialist Combination Review Policy*, which change the capital requirements of specialist organizations. The amendments to Rules 104 and 123E restructure the capital requirements of specialist organizations from an approach based on the valuation of classes of allocated securities, which included capital penalties for mergers among specialists, to an approach based on specialist market share measured by total dollar volume traded combined with market stress and volatility risk analysis.

- *Information Memo 06-51, Independent Contractor Arrangements.* The SEC approved amendments to the Interpretation of NYSE Rule 345, *Employees—Registration, Approval, Records*, that eliminate the requirement that proposed independent contractor arrangements be submitted to the NYSE for approval. Further, the amendments eliminate the general prohibition against the assertion of independent contractor status by persons who have been delegated supervisory responsibility pursuant to Rule 342, *Supervision—Approval, Supervision and Control*. The revised Interpretation appears in Exhibit A to Information Memo 06-51. It became effective immediately.

- *Information Memo 06-30, Guidance Pertaining to Business Continuity and Contingency Plans Relating to a Potential Pandemic.* The spread of avian flu that was experienced in 2006 raised concerns among governmental and public health officials of a near-term pandemic flu. A pandemic flu would involve the person-to-person transmission of a "virulent human flu that causes a global outbreak, or pandemic, of serious illness." Although there is no pandemic flu at this time, were one to occur, it could cause a significant and extended business interruption differing materially from the emergencies recently confronted by member organizations of the NYSE. For example, a pandemic flu is expected to occur in multiple "waves," each potentially spanning weeks or longer, and thus might have a substantially greater duration than the blackout of August 14 and 15, 2003, or the terrorist attacks of September 11, 2001. In addition, a pandemic flu is expected to involve outbreaks in numerous domestic and international locations. Therefore, unlike the regional emergencies created by Hurricanes Katrina and Rita, a pandemic flu might affect a member organization's main office, branch offices, backup locations, suppliers, and customers, regardless of their geographic diversity. As a result of the concern over a potential pandemic flu, NYSE Regulation, Inc., issued this Information Memo to provide guidance to member organizations as to how to assess whether their Business Continuity and Contingency Plans (BCPs) would be suitable for a prolonged, widespread public health emergency. This memorandum reflects the current state of publicly available information concerning a potential pandemic and commonly accepted strategies for pandemic preparedness. Ultimately, the key to any BCP is flexibility: member organizations should tailor their planning efforts to their particular business models and customer needs, and should become and remain informed about developing pandemic flu projections.

- *Information Memo 06-22, Executive Responsibilities.* This Information Memo reminds member organizations that the front page of the FOCUS report specifically requires a distinct affirmation by the member organization, through its signatories, that the content of the FOCUS is "true, correct and complete." Consequently, in order to achieve the level of diligence necessary for this assertion, the chief financial officer (and other persons signing the Form) must be in a position to vouch for its content, based upon his or her knowledge of the information contained therein and the information supporting the filing. Persons signing the FOCUS report must be knowledgeable and have an independent basis for believing that the report is accurate and complete. The fact that certain clerical or computational activity has been outsourced will not serve to avert responsibility for the integrity of the final product. A close review of the report, questioning of those who may have prepared elements of it and inquiry into specific items on a random basis may be insufficient if the report is later determined to be inaccurate or incomplete; ultimate responsibility cannot be delegated. Member organizations should have systems in place to ensure that processes for the reconciliation, posting, and preparation of books and records are performed accurately and on a timely basis. The levels of care and application called for in the preparation of the FOCUS report are also applicable to forms and filings that are submitted by the member organization to all regulatory authorities, and conscientious diligence must be a uniform standard. Member organizations and their principal executives are urged to review their practices and procedures to ensure that the content of each FOCUS report and other financial submissions to the Exchange satisfy the level of accuracy required.

- *Information Memo 06-21,* Revised: *Agency Lending Disclosure Initiative*—Revised Timeline. Information Memo 06-21 is an update to Information Memo 05-39, *Agency Lending Disclosure Initiative*, which was issued in June 2005. SEC staff raised concerns regarding the level of transparency and information disclosure in agency securities lending transactions and the impact on credit and regulatory capital monitoring. The long-standing practice in the broker-dealer industry was to record agency securities lending transactions at the agent level, with few or no details disclosed regarding the transactions with or exposure to the underlying principal lenders. SEC staff concluded that to comply with existing financial responsibility rules, particularly the net capital rule, broker-dealers engaged in the business of agency securities lending must: (1) maintain books and records of loan activity with each underlying principal lender, (2) monitor credit exposure to each underlying principal lender, and (3) calculate regulatory capital exposure to each underlying principal lender. Subsequent discussions on this issue between regulators and the industry led to the formation, in January 2004, of the Agency Lending Disclosure Taskforce (the Industry Taskforce). The Industry Taskforce has drafted documents summarizing the industry deliverables in order to ensure agreement with the regulators. Among the documents is a specific timeline for the Agency Lending Disclosure Initiative. Members and member organizations that engage in the business of agency securities lending should be aware of the Agency Lending Disclosure Initiative. The purpose of the Agency Lending Disclosure Initiative is to establish uniform processes to assist members and member organizations in their compliance with existing rule requirements related to books and records, net capital, and internal controls when engaged in agency securities lending activities. Information on the efforts and all material produced by the Industry Taskforce regarding the Agency Lending Disclosure Initiative (ALDI) can be found on its Web site at www.agencylending.capco.com. As an update to Information Memo 05-39, the ALDI Industry Taskforce revised the milestones on the specific timeline for the ALDI and those revisions are reflected in Information Memo 06-21. October 1, 2006 was the deadline for completion of ALDI.

- *Information Memo 06-04, Amendments to Rule 445, Anti-Money Laundering Compliance Program.* On January 25, 2006, the SEC issued an order approving amendments to NYSE Rule 445, *Anti-Money Laundering Compliance Program*. Rule 445 requires NYSE members and member organizations to develop an AML compliance program designed to comply with the requirements of the Bank Secrecy Act and the implementing regulations promulgated thereunder. Rule 445 further requires the designation of a person or persons, commonly known as *AML Officers*, responsible for implementing and monitoring the AML program's day-to-day operations and internal controls. In addition, Rule 445 requires the "independent testing" of the AML program. The amendments to Rule 445 (which appear in Exhibit A to Information Memo 06-04) establish a time frame for the "independent testing" requirement, a standard to determine who is adequately qualified and sufficiently independent to conduct such testing, and affiliation guidelines for AML Officers (which appear in Exhibits B and C to Information Memo 06-04). The amendments became effective immediately. Also see the "AML Testing Requirements and Auditor Independence" section of this Alert for a discussion of these amendments as well as the impact of AML testing engagements on the independence of auditors.

- *Information Memo 05-108, Elimination of Paper Copy FOCUS Report Submission to NYSE*. Effective with the January 2006 filing of Form X-17A-5 FOCUS Report, the electronic submission of the FOCUS Report has been the only filing required to meet the reporting requirement of SEA Rule 17a-5, *Reports to Be Made by Certain Brokers and Dealers*. Consequently, members and member organizations are no longer required to submit a paper copy of the FOCUS Report to the NYSE. Members and member organizations are reminded that the signatures of at least two principal executive officers or partners are required on the cover page of the FOCUS Report at the time it is electronically filed with the Exchange. Specialist organizations that deduct specialist haircut charges pursuant to SEA Rule 15c3-1(c)(2)(vi) but also add back haircut charges to their capital on their specialist positions pursuant to SEA Rule 15c3-1(c)(2)(vi)(N), and where this add-back to capital is only disclosed on their paper copy FOCUS Reports, should continue to retain these FOCUS Reports as part of their books and records pursuant to SEA Rule 17a-4, *Records to be Preserved by Certain Exchange Members*, Brokers and Dealers, and NYSE Rule 440, *Books and Records*. NYSE staff may request to review these FOCUS reports during their examinations.
- *Information Memo 05-101—Amendments to NYSE Rule 342.30—Annual Report; Chief Compliance Officer Designation; Chief Executive Officer Certification.* On November 16, 2005, the SEC approved amendments to NYSE Rule 342, *Offices—Approval, Supervision and Control*, and its Interpretation that require each member not associated with a member organization (non-associated member) and each member organization to file with the Exchange, by April 1 of each year, a report (the Annual Report) that addresses the member's or member organization's supervision and compliance efforts during the preceding calendar year, as well as ongoing compliance processes and procedures. The Amendments also require that each member organization's Annual Report include the designation of a principal executive officer or general partner as chief compliance officer. The Amendments further require that the Annual Report include a certification, signed by the non-associated member or the Chief Executive Officer of the member organization submitting it, that processes are in place to establish, maintain, and review policies and procedures reasonably designed to achieve compliance with applicable Exchange rules and federal securities laws and regulations (a sample Certification Form is included as Exhibit C). The amendments became effective immediately; the annual report for calendar year 2005 was due April 1, 2006.

.134 The rules are available at the NYSE Web site at www.nyse.com.

Audit and Accounting Issues and Developments

Trends in SEC Comment Letters

Income Statement

.135 SEC Regulation S-X, Article 5-03 provides guidance on income statement presentation, which is geared towards commercial and industrial companies. The AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* and the AICPA Practice Aid, *Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools*,[7] provide a different format for income statement presentation. Recently, the SEC has requested several financial service filers to change their income statement format to comply with that of Article 5-03. In some of those cases, the SEC has accepted expanded disclosure in lieu of changing the presentation of the income statement.

---

[7] The Commodity Practice Aid Task Force of the AICPA is in the process of revamping the *Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools* Practice Aid to reflect changes in accounting and auditing guidance and regulatory rules that occurred since the original issuance of this publication. The revised Practice Aid will provide practitioners with nonauthoritative, practical guidance on auditing financial statements of FCMs, IBs, and commodity pools. Readers should be alert to further developments.

Statement of Cash Flows

.136 In the past year, there have been a number of restatements in the area of cash flow statements. In the financial services industry, most of the restatements were due to incorrect application of guidance in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*. Paragraph 9 of FASB Statement No. 102 states:

> Some loans are similar to securities in a trading account in that they are originated or purchased specifically for resale and are held for short periods of time. Cash receipts and cash payments resulting from acquisitions and sales of loans also shall be classified as operating cash flows if those loans are acquired specifically for resale and are carried at market value or at the lower of cost or market value. Cash receipts resulting from sales of loans that were not specifically acquired for resale shall be classified as investing cash inflows. That is, if loans were acquired as investments, cash receipts from sales of those loans shall be classified as investing cash inflows regardless of a change in the purpose for holding those loans.

.137 A number of finance companies had restatements resulting from the misclassification of cash flows related to certain loans that were originated or purchased with the intent to sell as cash flows from investing activities, instead of operating activities, which is the presentation required by FASB Statement No. 102.

Issues Associated With FASB Statement No. 133 Accounting for Derivative Instruments and Hedging Activities

.138 Numerous companies have been required to restate their financial statements due to technical noncompliance with the provisions of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, although their derivatives performed as expected as effective economic hedges. Broker-dealers applying hedge accounting pursuant to FASB Statement No. 133 should ensure that their application of hedge accounting is contemporaneously documented and meets all requirements of FASB Statement No. 133 and related implementation guidance. In particular, firms applying the "shortcut" method of hedge accounting should ensure that their application is appropriate and consistent with paragraph 68 in its entirety and that any unique features of instruments are evaluated closely in consideration of paragraph 68e. FASB Statement No. 133 limits the use of the "shortcut" method to hedges of interest rate risk that involve interest-rate swaps and recognized interest-bearing assets or liabilities. It also requires that general hedge requirements such as contemporaneous formal documentation be met. It then adds nine additional criteria, specific to shortcut method hedges, which must also be met. Furthermore, Derivative Implementation Group (DIG) Issue E4, *Hedging-General: Application of the Shortcut Method*, indicates that each and every one of the shortcut criteria must be met and that "a hedging relationship cannot qualify for application of the shortcut method based on an assumption of no ineffectiveness justified by applying other criteria."

AML Testing Requirements and Auditor Independence

.139 NASD Rule 3011 and NYSE Rule 445, both entitled *Anti-Money Laundering Compliance Program*, require, among other things, that member firms and member organizations independently test their AML programs. In Notice to Member 02–21 NASD stated that such testing can be done by either personnel of the broker-dealer or a qualified outside party. In one of the speeches by SEC staff, the following was said in connection with this requirement: "Many of you have voiced concerns regarding this requirement. As regulators, we understand that maintaining the independence of auditors can be a challenging task for small firms." As a result, many practitioners have questioned whether the auditor's independence is compromised if the auditor performs the independent AML testing for a firm that is an audit client.

.140 The 2006 conforming changes to the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* include revisions to the "Anti-Money Laundering Regulations" section to address this concern. Specifically, based on discussions with SEC staff, paragraph 3.103 was revised to indicate that,

> It would be proper for the auditor of the broker-dealer to perform testing of anti money laundering program if it is done in accordance with attestation standards. It can be performed as agreed upon procedures, or an attestation of management assertions. However, if performed as a consulting service, such as generating work papers, reports for the NASD or NYSE to review, the SEC staff believes this would be considered a management function, and therefore, would impair the auditor's independence.

.141 It should be noted that both NASD and NYSE recently amended their AML testing requirements. On December 28, 2005, the SEC approved amendments to NASD Rule 3011 and the adoption of new interpretive material IM-3011-1 and IM-3011-2. The amendments and new interpretive material clarify that, in most instances, firms are required to test their AML programs at least annually (on a calendar-year basis). However, the rule change allows firms that do not execute transactions for customers or otherwise hold customer accounts and do not act as an introducing broker with respect to customer accounts, to test once every two years (on a calendar-year basis) rather than on an annual basis. The amendments and new interpretive material also clarify the persons not considered to be independent for purposes of the independent testing requirement and require a firm, on a quarterly basis, to review and, if necessary, update the information regarding the firm's AML compliance person. For more information please refer to NASD Notice to Members 06-07, which is discussed in the "NASD Rulemaking" section of this Alert.

.142 On January 25, 2006, the SEC approved amendments to NYSE Rule 445. The amendments to Rule 445(3) establish that members and member organizations that conduct a public business must independently test their AML program, at a minimum, on an annual calendar year basis. Members and member organizations that do not conduct a public business must independently test their AML Program, at a minimum, every two calendar years. Members and member organizations that conduct no public business include those that engage solely in proprietary trading or that conduct business only with other broker-dealers. Section .10 of the Rule's Supplemental Material obliges members and member organizations to undertake more frequent testing if circumstances warrant (for example, a material change to the business mix of the member or member organization; in the event of a merger or acquisition; if testing of the AML program reveals systematic weaknesses; or in response to any other regulatory red flags). The amendments to rule 445 also establish a standard to determine who is adequately qualified and sufficiently independent to conduct such test, and establish affiliation guidelines for AML officers. For more information, please refer to NYSE Information Memo 06-04, which is discussed in the "NYSE Rulemaking" section of this Alert.

Annual Certification of Compliance and Supervisory Processes

.143 NASD Rule 3013, *Annual Certification of Compliance and Supervisory Processes*, requires members to (1) designate a chief compliance officer (CCO) and (2) have the chief executive officer (CEO) or equivalent officer certify annually that the member has in place processes to establish, maintain, review, test, and modify written compliance policies and written supervisory procedures reasonably designed to achieve compliance with applicable NASD rules, Municipal Securities Rulemaking Board (MSRB) rules, and federal securities laws and regulations. Recently amended NYSE Rule 342.30, *Annual Report and Certification*, contains similar requirements. (For more information on the NYSE rule, please refer to NYSE Information Memo 05-101, which is discussed in the "NYSE Rulemaking" section of this Alert.) First annual certification pursuant to these rules had to be executed by April 1, 2006.

.144 Given that 2006 is the first year in which these certifications are to be executed, auditors should consider obtaining and reading this letter to ensure there are no compliance issues affecting the internal control and/or financial reporting of their broker-dealer clients.

Report on Internal Control

.145 SEC Rule 17a-5, *Reports to Be Made by Certain Brokers and Dealers,* requires independent auditors to issue a report on broker-dealers' internal control. To meet this requirement, a report should (*a*) express an opinion on the adequacy of the practices and procedures listed in SEC Rule 17a-5(g)(1) (in relation to the definition of a material inadequacy as stated in SEC Rule 17a-5(g)(3)) and (*b*) disclose material weaknesses in internal control (including procedures for safeguarding securities) that are revealed through auditing procedures designed and conducted for the purpose of expressing an opinion on the financial statements. CFTC Regulation 1.16, *Qualifications and Reports of Accountants*, requires independent auditors of entities it regulates to issue a similar report on internal control.

.146 A material inadequacy that is expected to be reported includes any condition that has either contributed substantially to or, if appropriate corrective action is not taken, could reasonably be expected to cause any of the following:

a. Inhibit a broker-dealer from completing securities transactions or promptly discharging its responsibilities to customers or to other brokers, dealers, or creditors

b. Result in material financial loss

c. Result in material misstatements of the broker's or dealer's financial statements

d. Result in violations of the SEC's recordkeeping or financial responsibility rules to an extent that could reasonably be expected to result in the conditions described in the preceding three items *a, b, or c.*

.147 CFTC Regulation 1.16d(2) provides a similar definition.

.148 In addition to material inadequacies, reports on internal control submitted to the SEC and CFTC should also address the existence of material weaknesses as defined in SAS 112, *Communication of Internal Control Related Matters Noted in an Audit*

.149 For audits of financial statements for periods ending before December 15, 2006, auditors may follow guidance in SAS No. 60 to satisfy the internal control reporting requirements described above. SAS No. 60 defines a material weakness in internal control as a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements caused by error or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

.150 In May 2006, the ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit,* which supersedes SAS No. 60. SAS No. 112 is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier implementation is permitted. Auditors who audit financial statements for periods ending on or after December 15, 2006, or choose to implement SAS No. 112 early, should follow guidance in SAS No. 112 when reporting on internal control of their broker-dealer clients.

.151 SAS No. 112 provides the following definitions:

- A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.
- A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with GAAP such that there is more than a remote likelihood [*footnote omitted*] that a

misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected.

- A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

.152 Among other matters, SAS No. 112 also:

- Provides guidance to the auditor in evaluating the severity of control deficiencies based on the likelihood and magnitude of misstatements, including whether misstatements or potential misstatements are "more than inconsequential," and the possible mitigating effects of effective compensating controls that have been tested and evaluated as part of the financial statement audit.
- Identifies certain areas deficiencies in which ordinarily would be considered at least significant deficiencies in internal control
- Provides indicators of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control
- Includes an appendix containing examples of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

.153 Paragraph 3.85 of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* indicates that the term *material inadequacy* encompasses either a material weakness in internal control or a material inadequacy in the practices and procedures in SEC Rule 17a-5(g)(1) or Regulation 1.16d(1) of the CFTC, as appropriate. Please refer to the SEC and CFTC rules as well as paragraphs 3.77–3.91 and 5.100–5.103 of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* for additional guidance on broker-dealer internal control reporting. The guide also provides examples of reports on internal control in Appendixes C, "Report on Internal Control Required by SEC Rule 17a-5;" D, "Report on Internal Control Required by SEC Rule 17a-5 for a Broker-Dealer Claiming an Exemption From SEC Rule 15c3-3;" and F, "Report on Internal Control Required by CFTC Regulation 1.16 and SEC Rule 17a-5(g)(1)." Please note that the 2006 edition of the guide contains two versions of each appendix, one based on guidance in SAS No. 60 (Appendixes C, D, and F) and the second version is based on guidance in SAS No. 112 (Appendixes C-1, D-1, and F-1). Similarly, Chapters 3 and 5 of the guide contain guidance based on both SAS No. 60 (paragraphs 3.81 and 5.100) and SAS No. 112 (paragraphs 3.82–3.84 and 5.101–5.103).

.154 Following the issuance of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320)[8] in June of 2004, the number of material weaknesses and material inadequacies reported to the regulators has increased. This can partially be attributed to increased awareness about internal control in light of the issuance of PCAOB Auditing Standard No. 2. Also, for broker-dealers that are subsidiaries of public companies, auditors may have performed additional procedures to be able to report on the consolidated entity's financial statements and internal control in accordance with PCAOB standards. As auditors performed more internal control work for such broker-dealer clients, they became aware of additional issues and areas in which problems may arise, which could also explain the increase in the number of reported material weaknesses and material inadequacies.

.155 The number of material weaknesses and material inadequacies reported to the regulators is expected to increase even further as auditors start adopting SAS No. 112.

[8] On December 19, 2006, the PCAOB issued a proposed Auditing Standard, *An Audit of Internal Control Over Financial Reporting that is Integrated with an Audit of Financial Statements,* which would supersede PCAOB Auditing Standard No. 2. For more information, please refer to the discussion in the "Auditing Pipeline—Public Companies" section of this Alert.

.156 Auditor-initiated adjusting journal entries are common for broker-dealer clients and in the past had not often been reported to regulators as material weaknesses or material inadequacies unless those entries resulted from a systemic problem, affected net capital, or had an impact on customers. Under both PCAOB Auditing Standard No. 2 and SAS No. 112, identification by the auditor of a material misstatement in financial statements for the period under audit that was not initially identified by the entity's internal control is at least a significant deficiency and a strong indicator that a material weakness in internal control over financial reporting exists. Both standards also indicate that this is a strong indicator of a material weakness even if management subsequently corrects the misstatement. In light of that guidance, adjustments that previously were not considered material weaknesses would potentially be treated as such if they are material to the broker-dealer's audited financial statements. Also, every time a reconciliation for the computation of net capital or for determination of the reserve requirements is provided along with the audited financial statements, the auditor should consider whether there is a material weakness or material inadequacy.

.157 Also, auditors who assist their broker-dealer clients with drafting financial statements have questioned whether this constitutes a significant deficiency or a material weakness. The answer is that it depends and there is nothing that the auditor does or does not do that creates an automatic deficiency. The client's internal control system, which should encompass the preparation of the financial statements, is independent of the auditor's work and vice versa. The auditor cannot be part of the client's internal control system, because to become part of the client's system would impair independence. If the auditor is involved in assisting the client with drafting financial statements (or anything else that is directly or indirectly related to the financial statements) the auditor needs to assess whether the client's controls are designed and placed in operation to prevent and detect a material misstatement to the financial statements.

.158 Auditors may find it helpful to refer to the new Audit Risk Alert entitled *Understanding SAS No. 112 and Evaluating Control Deficiencies—A Companion to SAS No. 112, Communicating Internal Control Related Matters Identified In An Audit* (product no. 022536kk). This Audit Risk Alert provides an overview of the requirements of SAS No. 112 and how this SAS differs from SAS No. 60. Plus, this Risk Alert offers several case studies that highlight a particular control deficiency. Each case study contains a description of the control deficiencies, and an analysis of the assessment of the severity of the control deficiency to help readers better understand and evaluate control deficiencies.

Brady Bond Warrants

.159 For many years, warrants tied to the price of oil and issued with dollar denominated foreign bonds (Brady Bonds) were considered worthless and written off, given the low value of the price of oil. As a result, securities firms were not diligent in their clearance and settlement of the warrants as they were with the bond with which it traded.

.160 However, with the escalation of the price of a barrel of oil, these instruments have significant value. Now, firms are undertaking substantial efforts to review their books and records, identify those counter parties that failed to deliver the warrants as well as those counter parties that failed to receive warrants, and enter into arrangements to settle outstanding obligations.

.161 As an auditor of a broker-dealer, you need to be satisfied concerning the propriety of any financial statement asset or liability related to the failure to receive or deliver a Brady Bond Warrant and the appropriateness of its consideration for Net Capital and Customer Reserve Formula computation purposes.

Demutualization of Exchanges

Background

.162 Demutualization is the process through which a member-owned organization becomes shareholder-owned. This frequently occurs as part of taking an organization public. Over the past several years, a number of stock and commodity exchanges underwent demutualization, and some are considering it.

.163 In 2000, the Chicago Mercantile Exchange (CME) became the first U.S. financial exchange to demutualize into a shareholder-owned corporation. It went public in December of 2002, becoming yet again the first exchange to do so. The Chicago Board of Trade (CBOT) became public in October 2005. (The CBOT has agreed to merge with the CME.) In March 2006, the NYSE became a for-profit, publicly traded company following the completion of its merger with an electronic stock-exchange operator, Archipelago Holdings Inc. In November 2006, the parent of the New York Mercantile Exchange (NYMEX), NYMEX Holdings, Inc. went public with an IPO.

.164 As part of these transactions, seat owners typically receive shares in the successor company, a cash payment, or a mixture of both. The received shares often have transfer restrictions. For example, shares of NYSE Group, Inc. (NYX), the combined firm formed as a result of the merger between the NYSE and Archipelago Holdings Inc., are subject to transfer restrictions for three years with one-third of the restriction lifted every year. After restrictions on the NYX stock expire, there is no requirement for broker-dealers to own any stock in the Exchange in order to trade directly on the Exchange; however, broker-dealers will have to buy annual trading licenses. Other exchanges have different terms and require broker-dealers to own a certain number of shares in the exchange in order to conduct business there.

.165 There are a number of accounting issues associated with demutualization of financial exchanges, some of which are discussed below.

Shares With Transfer Restrictions

.166 An ownership interest in an exchange that is not required to be held for operating purposes and is a financial instrument should be accounted for at fair value. On September 15, 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, which provides enhanced guidance for using fair value to measure assets and liabilities. FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year.

.167 FASB Statement No. 157 clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market in which the reporting entity would transact for the asset or liability, that is, the principal or most advantageous market for the asset or liability. The transaction to sell the asset or transfer the liability is a hypothetical transaction at the measurement date, considered from the perspective of a market participant that holds the asset or owes the liability. Therefore, the definition focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price). FASB Statement No. 157 clarifies that market participant assumptions also include assumptions about the effect of a restriction on the sale or use of an asset. It provides that a fair value measurement for a restricted asset should consider the effect of the restriction if market participants would consider the effect of the restriction in pricing the asset.

.168 However, even prior to the issuance of FASB Statement No. 157, the predominant practice was to factor in the restriction period in the fair value of the restricted stock through some discount of the market price for those securities that are freely traded. Most firms would mark these positions to market through the income statement, but would reduce the value by some percentage based on the restriction period. Each firm is expected to use judgment to estimate the discount percentage due to the restriction. Typically, sale restrictions would be evaluated by period. For example, securities saleable in one year might be discounted by 10 percent, those saleable in two years, by 15 percent, and those saleable in three years, by 20 percent. These percentages are for illustrative purposes only and will vary depending on the facts and circumstances. In practice, the percentages typically range between 5 percent and 30 percent.

.169 NYSE Interpretation Memo 06-03 discusses the net capital treatment of NYX shares of common stock and provides that the NYX shares subject to transfer restrictions should be treated as a nonallowable asset for net capital purposes in accordance with SEC Rule 15c3-1(c)(2)(vii) for the duration of the applicable restriction period. The net capital treatment of nonrestricted NYX shares will be the same as that of any other nonrestricted security, as outlined in SEC Rule 15c3-1(c)(2)(vi). The Memo also reminds noncarrying member organizations that a PAIB agreement is required for any nonrestricted NYX shares held by their carrying organizations in order for the shares to be deemed an allowable asset for net capital purposes.

Shares Required to Be Owned in Order to Conduct Business on an Exchange

.170 Some exchanges, including the CME and CBOT, require broker-dealers to own a certain number of shares in order to trade on the exchange, or to obtain the lower "member" rates. These shares may represent either (*a*) both an ownership interest and the right to conduct business on the exchange, or (*b*) an ownership interest, which must be held by a broker-dealer to conduct business on the exchange. These shares should be accounted for at cost or at a lesser amount if there is an other-than-temporary impairment in value as provided in paragraph 7.34 (a) of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities*.

Annual Trading License

.171 In order to be able to trade directly on the NYSE, broker-dealers have to buy one-year trading licenses. The cost of the license should be set up as a prepaid asset (non–allowable for net capital purposes) and amortized to expense monthly.

AICPA 2006 Audit and Accounting Guide *Brokers and Dealers in Securities*

.172 AICPA Audit and Accounting Guide *Brokers and Dealers in Securities*, with conforming changes as of May 1, 2006 (product no. 012706kk), has been updated to reflect the issuance of recently issued authoritative pronouncements. The Guide is available through the AICPA's reSOURCE Online and reSOURCE CD-ROM products, as well as through a loose-leaf subscription service. Paperback editions of Audit and Accounting Guides can be purchased as well.

> **Help Desk—**Subscriptions to AICPA reSOURCE, subscriptions to the loose-leaf service, and paperback copies of the Broker Dealer Guide may be obtained by calling the AICPA Order Department (Member Satisfaction) at (888) 777-7077, by faxing a request to (800) 362-5066, or by going online at www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements, and Related Guidance

.173 Presented below is a list of auditing and attestation pronouncements, and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards, quality control standards, and other guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the PCAOB Web site at www.pcaobus.org (public company audits only). You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy* (available at www.aicpa.org/Magazines+and+Newsletters/), and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA's Auditing Standards Team (available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion/).

.174 The summaries provided below are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standards and other guidance. You should visit the applicable Web site for complete information.

.175 The standards and Interpretations promulgated by the AICPA Auditing Standards Board (ASB) are available free of charge by visiting the AICPA's Audit & Attest Standards Team's page at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/. Members and non-members alike can download the auditing, attestation, and quality control standards by either choosing a section of the codification or an individual statement number. You can also obtain copies of AICPA standards and other guidance by contacting the Member Satisfaction Center at (888) 777-7077 or online at www.cpa2biz.com.

SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (December 2005) (Not applicable to audits conducted in accordance with PCAOB standards)	These standards established two categories of professional requirements that are identified by specific terms. The words *must* or *is required* are used to indicate an unconditional requirement. The word *should* is used to indicate a presumptively mandatory requirement. (The words *may, might, could,* and *should consider* represent actions that auditors have a professional obligation to consider.) The provisions of SAS No. 102 and SSAE No. 13 were effective upon issuance. It is the ASB's intention to make conforming changes to AICPA literature over the next several years to remove any language that would imply a professional requirement where none exists.
SAS No. 103, *Audit Documentation* (December 2005) (Not applicable to audits conducted in accordance with PCAOB standards)	See the "Statement on Auditing Standards No. 103" section below.
SASS No. 104-111, *"Risk Assessment Standards"*	See the "AICPA Risk Assessment Standards" section below.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (May 2006) (Not applicable to audits conducted in accordance with PCAOB standards)	This new standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* as amended. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. Effective for periods ending on or after December 15, 2006. See the "Report on Internal Control" section above which also discussed major provisions of SAS No. 112.
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (December 2006) (Not applicable to audits conducted in accordance with PCAOB standards)	See the "Statement on Auditing Standards No. 114" section below.

(continued)

Non-Authoritative Practice Aid, *Alternative Investments—Audit Considerations*	See the "AICPA Practice Aid *Alternative Investments—Audit Considerations*" section below.
PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.
PCAOB Conforming Amendment to AT 101.04, *Attest Engagements* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	*Conforming Amendment to PCAOB Related Auditing and Professional Practice Standards Resulting from the Adoption of the Auditing Standard No. 4* This states that Auditing Standard No. 4 must be used for reporting on whether a material weakness continues to exist for any purpose other than a company's internal use.

AICPA Risk Assessment Standards

.176 In March 2006, the AICPA ASB issued eight SASs that provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. The following table lists the eight SASs and their effect on existing standards:

Statement on Auditing Standard	**Effect on Existing Standards**
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*	Amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU section 230)
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150)
SAS No. 106, *Audit Evidence*	Supersedes SAS No. 31, *Evidential Matter* (AU section 326A)
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	Supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312)
SAS No. 108, *Planning and Supervision*	Supersedes SAS No. 1, *Appointment of the Independent Auditor* (AU section 310); and supersedes SAS No. 22, *Planning and Supervision* (AU section 311A)

SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	Supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	Supersedes SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* (AU section 313); and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling	Amends SAS No. 39, *Audit Sampling* (AU section 350)

Key Provisions of the New Standards

.177 The SASs emphasize the link between understanding the entity, assessing risks, and the design of further audit procedures. The SASs introduce the concept of risk assessment procedures, which are deemed necessary to provide a basis for assessing the risk of material misstatement. Risk assessment procedures, along with further audit procedures, which consist of tests of controls and substantive tests, provide the audit evidence to support the auditor's opinion on the financial statements. According to the SASs, the auditor should perform risk assessment procedures to gather information and gain an understanding of the entity and its environment, including its internal controls. These procedures include inquiries, analytical procedures, and inspection and observation. Assessed risks and the basis for those assessments should be documented; therefore, auditors may no longer default to maximum control risk for an entity's risk assessment without documenting the basis for that assessment. The SASs also require auditors to consider and document how the risk assessment at the financial statement level affects individual financial statement assertions, so that auditors may tailor the nature, timing, and extent of their audit procedures to be responsive to their risk assessment. It is anticipated that generic audit programs will not be appropriate for all audit engagements, as risks vary between entities.

Effective Date and Implementation

.178 The SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006; earlier application is permitted. In most cases, implementation of the SASs will result in an overall increased work effort by the audit team, particularly in the year of implementation. It also is anticipated that to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. Readers can obtain the SASs, the related AICPA Audit Risk Alert entitled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) and the AICPA Audit Guide entitled *Assessing and Responding to Audit Risk In a Financial Statement Audit* (product no. 012456kk) at www.cpa2biz.com.

Statement on Auditing Standards No. 103

.179 The ASB has issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards,* vol. 1, AU sec. 339), which supersedes SAS No. 96 of the same name and amends SAS No. 1, section 530 *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. One key provision of this standard is the amendment of paragraphs .01 and .05 of AU sec. 530, which require that "the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion." The footnote to this section describes sufficient appropriate audit evidence as "evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them." Application of the rules may require revising the process used by your firm at the end of fieldwork to include a field review of audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

Statement on Auditing Standards No. 114

.180 The ASB has issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which replaces SAS No. 61, *Communication with Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit, and also establishes standards and provides guidance on:

- Which matters should be communicated
- Who they should be communicated to
- The form and timing of the communication

.181 SAS No. 114 is applicable to audits of the financial statements of all nonissuers and is effective for audits of financial statements for periods beginning on or after December 15, 2006.

AICPA Practice Aid Alternative Investments—Audit Considerations

.182 Over the past several years, many companies have dramatically increased their investment in financial instruments that do not have a readily determinable market value (that is, investments not listed on national exchanges or over-the-counter markets, or for which quoted market prices are not available from sources such as financial publications, the exchanges, or the NASDAQ System). This Practice Aid addresses challenges associated with auditing such investments. These investments include private investment funds meeting the definition of an *investment company* under the provisions of the AICPA Audit and Accounting Guide *Investment Companies*, such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity pools, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds. Collectively, these types of investment funds are commonly referred to as *alternative investments*. Alternative investments may be structured as limited partnerships, limited liability corporations, trusts, or corporations.

.183 This Practice Aid was developed to provide additional guidance to auditors of investor entities as to how the auditor may obtain sufficient appropriate audit evidence in order to conclude that the financial statements are free of material misstatement. This nonauthoritative Practice Aid will assist auditors in auditing alternative investments. The Practice Aid includes guidance on:

1. General considerations pertaining to auditing alternative investments
2. Addressing management's financial statement existence assertion
3. Addressing management's financial statement valuation assertion
4. Management representations
5. Disclosure of certain significant risks and uncertainties
6. Reporting

.184 The Practice Aid also includes the following Appendixes:

- Appendix 1, "Example Confirmation for Alternative Investments"
- Appendix 2, "Illustrative Examples of Due Diligence, Ongoing Monitoring and Financial Reporting Control"

.185 You can download the Practice Aid at www.aicpa.org/download/members/div/auditstd/Alternative_Investments_Practice_Aid.pdf.

Recent AICPA Independence and Ethics Pronouncements

.186 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain that Alert to be aware of independence and ethics matters that will affect their practices.

Recent Accounting Pronouncements and Related Guidance

.187 Presented below is a list of recently issued accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the publication of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and the *Journal of Accountancy*.

.188 You can obtain copies of AICPA standards and other guidance by contacting the Member Satisfaction Center at (888) 777-7077 or online at www.cpa2biz.com. FASB Statements and staff positions can be downloaded free of charge from the FASB Web site at www.fasb.org.

.189 The AICPA general *Audit Risk Alert—2006/07* and other AICPA industry-specific Alerts contain summaries of these recent pronouncements. Some of the recently issued pronouncements that have particular significance to the securities industry are discussed below.

FASB Statement No. 155	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Statement No. 156	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*
FASB Statement No. 157	*Fair Value Measurements*
FASB Statement No. 158	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Interpretation No. 48	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues
FASB Staff Positions (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FASB Staff Positions (FSPs).

AICPA Technical Practice Aids 2130.09–2130.35 (December 2005) (Nonauthoritative)	Various topics on the application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*
AICPA Technical Practice Aids 5600.07–5600.17 (November 2005) (Nonauthoritative)	Various lease topics
AICPA Technical Practice Aid 6910.16–6910.20 (January 2006) (Nonauthoritative)	*Nonregistered Investment Partnerships*
AICPA Technical Practice Aid Working Draft as of December 1, 2006 (December 2006) (Nonauthoritative)	*Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments*

.190 The summaries provided below are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standards and other guidance. You should visit the applicable Web site for complete information.

FASB Statement No. 157

.191 On September 15, 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, which provides enhanced guidance for using fair value to measure assets and liabilities. FASB Statement No. 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value and does not expand the use of fair value in any new circumstances. Below is a brief discussion of some of the provisions of FASB Statement No. 157 that should be of interest to broker-dealers and their auditors.

Exit Price Concept

.192 FASB Statement No. 157 clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market in which the reporting entity would transact for the asset or liability, that is, the principal or most advantageous market for the asset or liability. The transaction to sell the asset or transfer the liability is a hypothetical transaction at the measurement date, considered from the perspective of a market participant that holds the asset or owes the liability. Therefore, the definition focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price).

Fair Value Hierarchy

.193 FASB Statement No. 157 establishes the fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs should be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

Measurement of Blocks

.194 Among other matters, FASB Statement No. 157 precludes the use of a blockage factor. Paragraph 27 of FASB Statement No. 157 provides that:

> If the reporting entity holds a position in a single financial instrument (including a block) and the instrument is traded in an active market, the fair value of the position shall be measured within Level 1 as the product of the quoted price for the individual instrument times the quantity held. The quoted price shall not be adjusted because of the size of the position relative to trading volume (blockage factor). The use of a blockage factor is prohibited, even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

.195 Footnote 11 to this paragraph states that, "The guidance in this Statement applies for positions in financial instruments (including blocks) held by all entities, including broker-dealers and investment companies within the scope of the AICPA Audit and Accounting Guides for those industries."

Nullification of Guidance in Footnote 3 of EITF Issue No. 02-3

.196 The guidance in FASB Statement No. 157 applies for derivatives and other financial instruments measured at fair value under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, at initial recognition and in all subsequent periods. Therefore, FASB Statement No. 157 nullifies the guidance in footnote 3 of Emerging Issues Task Force (EITF) Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities," which applied for derivatives (and other) instruments measured at fair value at initial recognition under FASB Statement No. 133. That guidance precluded immediate recognition in earnings of an unrealized gain or loss, measured as the difference between the transaction price and the fair value of the instrument at initial recognition, if the fair value of the instrument was determined using significant unobservable inputs. FASB Statement No. 157 provides, however, that for unobservable inputs the fair value measurement objective remains the same, that is, an exit price from the perspective of a market participant that holds the asset or owes the liability. Consistent with that objective, FASB Statement No. 157 clarifies that the fair value measurements should be adjusted for risk, that is, the amount market participants would demand because of the risk (uncertainty) inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique (a risk premium notion). Accordingly, a measurement (for example, a "mark-to-model" measurement) that does not include an adjustment for risk would not represent a fair value measurement if market participants would include one in pricing the related asset or liability.

.197 FASB Statement No. 157 also amends FASB Statement No. 133 to remove the similar guidance to that in EITF Issue No. 02-3, which was added by FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments.*

.198 At the 2006 AICPA National Conference on Current SEC and PCAOB Developments, SEC staff provided their views on the impact of FASB Statement No. 157 on the recognition of day one or inception gains. For more information, please refer to Joseph D. McGrath's speech which can be found at www.sec.gov/news/speech/2006/spch121106jdm.htm.

Inputs Based on Bid and Ask Prices

.199 FASB Statement No. 157 provides that if an input used to measure fair value is based on bid and ask prices (for example, in a dealer market), the price within the bid-ask spread that is most representative of fair value in the circumstances should be used to measure fair value, regardless of where in the fair value hierarchy the input falls (Level 1, 2, or 3). FASB Statement No. 157 does not preclude the use of mid-market pricing or other pricing conventions as a practical expedient for fair value measurements within a bid-ask spread.

Restricted Assets

.200 FASB Statement No. 157 clarifies that market participant assumptions also include assumptions about the effect of a restriction on the sale or use of an asset. It provides that a fair value measurement for a restricted asset should consider the effect of the restriction if market participants would consider the effect of the restriction in pricing the asset.

Entity's Credit Standing

.201 FASB Statement No. 157 also clarifies that a fair value measurement for a liability reflects its nonperformance risk (the risk that the obligation will not be fulfilled). Because nonperformance risk includes the reporting entity's credit risk, the reporting entity should consider the effect of its credit risk (credit standing) on the fair value of the liability in all periods in which the liability is measured at fair value under other accounting pronouncements, including FASB Statement No. 133.

Disclosures

.202 FASB Statement No. 157 also expands disclosures about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition. The disclosures focus on the inputs used to measure fair value and for recurring fair value measurements using significant unobservable inputs (within Level 3 of the fair value hierarchy), the effect of the measurements on earnings (or changes in net assets) for the period. FASB Statement No. 157 encourages entities to combine the fair value information disclosed under FASB Statement No. 157 with the fair value information disclosed under other accounting pronouncements, including FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments,* where practicable.

Effective Date

.203 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year.

.204 You can access FASB Statement No. 157 at www.fasb.org/pdf/fas157.pdf.

FASB Statement No. 156

.205 In March of 2006, the FASB issued FASB Statement No. 156, *Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*, which simplifies the accounting for servicing assets and liabilities, such as those common with mortgage securitization activities. Specifically, FASB Statement No. 156 addresses the recognition and measurement of separately recognized servicing assets and liabilities and permits an entity to elect to carry servicing assets and liabilities at fair value through earnings, which may simplify efforts to obtain hedge-like accounting.

.206 This Statement:

1. Requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in any of the following situations:

   a. A transfer of the servicer's financial assets that meets the requirements for sale accounting

   b. A transfer of the servicer's financial assets to a qualifying special-purpose entity (QSPE) in a guaranteed mortgage securitization in which the transferrer retains all of the resulting securities and classifies them as either available-for-sale securities or trading securities in accordance with FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*

   c. An acquisition or assumption of an obligation to service a financial asset that does not relate to financial assets of the servicer or its consolidated affiliates

2. Requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable.

3. Permits an entity to choose either of the following subsequent measurement methods for each class of separately recognized servicing assets and servicing liabilities:

   a. *Amortization method*—Amortize servicing assets or servicing liabilities in proportion to and over the period of estimated net servicing income or net servicing loss and assess servicing assets or servicing liabilities for impairment or increased obligation based on fair value at each reporting date.

   b. *Fair value measurement method*—Measure servicing assets or servicing liabilities at fair value at each reporting date and report changes in fair value in earnings in the period in which the changes occur.

4. At its initial adoption, permits a one-time reclassification of available-for-sale securities to trading securities by entities with recognized servicing rights, without calling into question the treatment of other available-for-sale securities under FASB Statement No. 115, provided that the available-for-sale securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or servicing liabilities that a servicer elects to subsequently measure at fair value.

5. Requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities.

.207 Entities should adopt FASB Statement No. 156 as of the beginning of its first fiscal year that begins after September 15, 2006. Earlier adoption is permitted as of the beginning of an entity's fiscal year, provided the entity has not yet issued financial statements, including interim financial statements, for any period of that fiscal year.

.208 You can access FASB Statement No. 156 at www.fasb.org/pdf/fas156.pdf.

FASB Statement No. 155

General Provisions of FASB Statement No. 155

.209 In February of 2006, the FASB issued FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*, which allows financial instruments that have embedded derivatives to be accounted for as a whole (eliminating the need to bifurcate the derivative from its host) if the holder elects to account for the whole instrument on a fair value basis. FASB Statement No. 155 also:

a. Clarifies which interest-only strips and principal-only strips are not subject to the requirements of FASB Statement No. 133

b. Eliminates the exemption from FASB Statement No. 133 for interests in securitized financial assets provided temporarily by Implementation Issue D1, "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets," and establishes a requirement to evaluate those interests to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation

c. Clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives

d. Amends paragraphs 35(c)(2) and 40 of FASB Statement No. 140 to eliminate the prohibition on a QSPE from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument.

.210 FASB Statement No. 155 is effective for all financial instruments acquired, issued, or subject to a remeasurement (new basis) event occurring after the beginning of an entity's first fiscal year that begins after September 15, 2006. The fair value election provided for in paragraph 4(c) of FASB Statement No. 155 may also be applied upon its adoption for hybrid financial instruments that had been bifurcated under paragraph 12 of FASB Statement No. 133 prior to the adoption of FASB Statement No. 155. Earlier adoption is permitted as of the beginning of an entity's fiscal year, provided the entity has not yet issued financial statements, including financial statements for any interim period, for that fiscal year.

.211 You can access FASB Statement No. 155 at www.fasb.org/pdf/fas155.pdf.

.212 On November 8, 2006, the FASB issued proposed FASB Statement No. 133 Implementation Issue No. B40, *Application of Paragraph 13(b) to Securitized Interest in Prepayable Financial Assets*, to provide guidance on implementation issues related to FASB Statement No. 155. Please refer to the "On the Horizon" section of this Alert for a discussion of this proposed Implementation Issue.

FASB Interpretation No. 48

.213 In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109.* FASB Interpretation No. 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The standard also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.214 FASB Interpretation No. 48 was issued to reduce the significant diversity in practice. A company's tax positions can change over time from a myriad of variables, for example, Internal Revenue Service (IRS) developments, state taxing authorities, and/or tax court cases. Companies were recording uncertainties in different ways. Some companies had been assessing a position being supported under a tax audit, some had also included the probability of an audit, and some companies simply recorded tax assets and liabilities based on what was filed on their returns. Additionally, some companies recorded tax reserves for contingent tax liabilities.

.215 The scope of FASB Interpretation No. 48 applies to all tax positions. The Interpretation assumes that a company cannot factor in the probability of being audited. Therefore, for purposes of determining the likelihood of being sustained, the taxpayer has to presume the position will be examined by taxing authorities. Consequently, the tax benefit of a position that would not be sustained under audit cannot be recorded.

.216 Prior to the issuance of FASB Interpretation No. 48, management's common approach was to create an inventory of uncertain tax positions and evaluate them under FASB Statement No. 5, *Accounting for Contingencies.* Because FASB Interpretation No. 48 now provides guidance, FASB Statement No. 5 no longer applies to uncertain tax positions. However, for clarification, FASB Interpretation No. 48 does not in any way alter the requirement in FASB Statement No. 109, *Accounting for Income Taxes,* to assess the need for a valuation allowance for deferred tax assets.

.217 Only tax positions that meet the more likely than not recognition threshold, as defined, may be recognized or continue to be recognized upon adoption of FASB Interpretation No. 48. The cumulative effect of applying the Interpretation for the first time is reported as an adjustment to the opening balance of retained earnings for that fiscal year, presented separately. This Interpretation is effective for fiscal years beginning after December 15, 2006. Earlier application of its provisions is encouraged if the enterprise has not yet issued financial statements, including interim financial statements, in the period adopted.

.218 For calendar year corporations, the new rules would seem to initially take effect with first quarter 2007 results. However, the new rules require calendar year corporations to have a "clean" starting point for their tax accounts at January 1, 2007. In other words, the deferred tax asset and deferred tax liability accounts on that date must be determined in accordance with the standards of FASB Interpretation No. 48. Note that companies that do not file quarterly reports may be able to put compliance off for a year.

.219 The IRS has recognized that some taxpayers may wish to request a greatly accelerated examination and resolution before the end of their current fiscal year of "uncertain tax positions" taken in filed returns and/or expected to be taken in tax returns yet to be filed. According to information received by the AICPA, the IRS has put procedures in place to quickly respond to taxpayer requests to resolve some uncertain tax positions prior to the end of their current fiscal year. The IRS has provided guidance and direction to field teams for taxpayers under examination which can be viewed at www.irs.gov/businesses/corporations/article/0,,id=163496,00.html. The IRS has also established procedures for taxpayers whose returns are not under examination as well as for taxpayers whose returns have not yet been filed.

.220 Practitioners may find it helpful to refer to the recently issued AICPA *Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48,* which includes highlights of the Interpretation and its implications for in-house accountants, auditors, and tax advisers. It is not authoritative, but intended to assist practitioners in quickly understanding the requirements of FASB Interpretation No. 48. The Practice Guide can be accessed at tax.aicpa.org/Resources/Professional+Standards+and+Ethics/Practice+Guide+on+Accounting+for+Uncertain+Tax+Positions+Under+FIN+48.htm.

FASB Staff Position FIN 46(R)-6

Background

.221 There is diversity in practice in determining the variability that should be considered in applying FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities* (FASB Interpretation No. 46(R)). For example, some believe that only the variability that results from changes in cash flows (referred to as the *cash flow method*) should be considered, while others believe that only the variability that results from changes in fair value (referred to as the *fair value method*) should be considered. In applying FASB Interpretation No. 46(R), a reporting enterprise may have—but not always—reached the same conclusion as to whether the entity is a variable interest entity (VIE) and which interests should be considered variable interests regardless of the method used.

.222 An entity may enter into an arrangement, such as a derivative contract, to either reduce or eliminate (1) the variability created by certain assets or operations of the entity or (2) mismatches between the overall asset and liability profiles of the entity, thereby protecting certain liability and equity holders from exposure to such variability. During the life of the entity, those arrangements can be in either an asset position or a liability position (recorded or unrecorded) from the perspective of the entity. Currently, there is diversity in practice as to whether these arrangements should be treated as variable interests or considered as creators of variability. In certain cases, application of either the cash flow method or the fair value method will not result in a clear determination as to whether those arrangements are variable interests or creators of variability.

FASB Staff Position

.223 FASB Staff Position (FSP) FIN 46(R)-6, *Determining the Variability to Be Considered in Applying FASB Interpretation No. 46(R)*, issued on April 13, 2006, addresses how a reporting enterprise should determine the variability to be considered in applying Interpretation 46(R). The variability that is considered in applying Interpretation 46(R) affects the determination of (1) whether the entity is a VIE, (2) which interests are variable interests in the entity, and (3) which party, if any, is the primary beneficiary of the VIE. That variability will affect any calculation of expected losses and expected residual returns, if such a calculation is necessary.

.224 FSP FIN 46(R)-6 provides that the variability to be considered in applying FASB Interpretation No. 46(R) should be based on an analysis of the design of the entity as outlined in the following steps:

- *Step 1.* Analyze the nature of the risks in the entity (paragraphs 6 and 7 of this FSP).
- *Step 2.* Determine the purpose(s) for which the entity was created and determine the variability (created by the risks identified in Step 1) the entity is designed to create and pass along to its interest holders (paragraphs 8–14 of this FSP).

.225 For the purposes of this FSP, interest holders include all potential variable interest holders (including contractual, ownership, or other pecuniary interests in the entity). After determining the variability to consider, the reporting enterprise can determine which interests are designed to absorb that variability. The cash flow and fair value methods described in this FSP are examples of methods that can be used to measure the amount of variability (that is, expected losses and expected residual returns) of an entity. However, a method that is used to measure the amount of variability does not provide an appropriate basis for determining which variability should be considered in applying FASB Interpretation No. 46(R).

.226 An enterprise should apply the guidance in FSP FIN 46(R)-6 prospectively to all entities (including newly created entities) with which that enterprise first becomes involved and to all entities previously required to be analyzed under FASB Interpretation No. 46(R) when a reconsideration event has occurred pursuant to paragraph 7 of FASB Interpretation No. 46(R) beginning the first day of the first reporting period beginning after June 15, 2006. Early application is permitted for periods for which financial statements have not yet been issued. Retrospective application to the date of the initial application of FASB Interpretation No. 46(R) is permitted but not required. Retrospective application, if elected, must be completed no later than the end of the first annual reporting period ending after July 15, 2006.

.227 Please refer to www.fasb.org/fasb_staff_positions/fsp_fin46r-6.pdf for a complete text of this FSP.

AICPA Technical Practice Aid *Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments—Working Draft as of December 1, 2006*

.228 This Technical Practice Aid was prepared by the Analyzing Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments Task Force and the staff of the AICPA. This Technical Practice Aid is a working draft and the content reflects what the authors believe is existing authoritative literature as of December 1, 2006. Readers are reminded that there are several projects currently in process at the FASB that may affect the contents of this Technical Practice Aid and they must be alert to any changes. This Technical Practice Aid has not been approved, disapproved, or otherwise acted on by any senior technical committee of the AICPA or the FASB or the staff of the SEC and has no official or authoritative status.

.229 Financial instruments that are indexed to and potentially settled in a company's own stock have become increasingly popular in the current financial markets. These financial instruments may be either freestanding or embedded in the structure of other financial instruments. Examples of freestanding instruments include written and purchased stock options, forward stock purchase/sale contracts, and various combinations of these instruments. Examples of embedded features that may require bifurcation include conversion options in convertible debt. Preparers and auditors of financial statements often need to decide whether these financial instruments, or some component of those financial instruments, qualify for classification in stockholders' equity (or nonbifurcation if the instrument is an embedded derivative) or should be accounted for as a financial asset or liability.

.230 The FASB currently has a long-term project on its agenda to develop a comprehensive standard of accounting and reporting for financial instruments with characteristics of liabilities and equity, in addition to several short-term projects under consideration. In the absence of a single comprehensive accounting standard for such instruments, the existing accounting literature was developed in a largely piecemeal fashion, by various standard-setting bodies, often in response to specific instruments that have been observed in the marketplace.

.231 Practitioners often find it difficult to navigate standards relevant to these financial instruments, particularly because two or three of these standards must often be considered in contemplation of one another before reaching a final conclusion on the appropriate accounting for a financial instrument. The interaction between these standards, coupled with the complex nature of financial instruments, requires that practitioners be familiar with complex accounting rules and possess knowledge of the various common types of financial instruments. In addition, analyzing these financial instruments requires that practitioners exercise significant judgment on complex accounting issues.

.232 This Technical Practice Aid is not intended to provide practitioners with interpretative guidance or to describe the accounting for specific instruments. Rather, it is intended to assist practitioners in identifying the scope of and the interrelationships between the various relevant accounting pronouncements. To accomplish that goal, the Practice Aid is a roadmap addressing the accounting considerations that should be considered in analyzing freestanding and embedded derivative financial instruments at issuance and on an ongoing basis.

.233 This Practice Aid is available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/Working+Draft+of+Convertible+Debt+Convertible+Preferred+Shares+Warrants+and+Other+Equi.htm.

SEC Staff Accounting Bulletins

.234 Auditors of public companies and of those companies that file with the SEC need to consider the accounting and financial reporting requirements contained in the SEC regulations as well as requirements imposed upon auditors. Currently, public companies must adhere to the requirements set forth in SEC Staff Accounting Bulletins (SABs), but private companies are not bound by them. However, with respect to SAB No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements,* which is discussed below, on December 19, 2006, the FASB said it would issue guidance specifying that private companies should use the same methods as public companies to evaluate the materiality effects of prior-year adjustments on current year financial statements. FASB said it would incorporate the concepts from SAB No. 108 as part of a narrow scope look at the issue in either a FASB staff position or an interpretation. The FASB said it also would issue guidance modifying current standards to allow for a one-time cumulative-effect adjustment for private companies to correct misstatements resulting from the carryover or reversal of prior year misstatements.

.235 The summary below is for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable rules. See the SEC Web site at www.sec.gov for complete information.

Staff Accounting Bulletin No. 108

.236 On September 13, 2006, the SEC released SAB No. 108. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current-year misstatement.

.237 There have been two common approaches used to quantify such errors. Under one approach, the error is quantified as the amount by which the current-year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current-year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current-year income statement that result from the correction of an error existing in previously issued financial statements.

.238 The staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior-year misstatements, on the current-year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.239 If, in correcting an error in the current year, an error is material to the current-year's income statement, the prior-year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior-year financial statements. Correcting prior-year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior-year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, please refer to the full text of SAB No. 108 at www.sec.gov/interps/account/sab108.pdf.

On the Horizon

.240 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all accounting and auditing projects in progress. Presented below is brief information about certain projects that are expected to result in final standards in the near future. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or generally accepted auditing standards (GAAS).

.241 The following table lists the Web sites of various standard-setting bodies, at which information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB) (Note that for audits of public companies, the Public Company Accounting Oversight Board sets auditing standards.)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/
Public Company Accounting Oversight Board (PCAOB)	www.pcaobus.org
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+ and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/

> **Help Desk**—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

.242 Below are discussions of some of the projects that have particular significance to the securities industry. These summaries are for informational purposes only.

Proposed FASB Statement, *Accounting for Transfers of Financial Assets*

.243 On August 11, 2005, the FASB issued an exposure draft of a proposed Statement, *Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140*. This exposure draft is a revision of the June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets.* The revised exposure draft reflects what the FASB learned from constituents' comments in the earlier effort and deals with some new issues.

.244 Specifically, the revised proposed Statement seeks to (1) clearly specify the circumstances that require the use of a QSPE in order to de-recognize all or a portion of financial assets, (2) provide additional guidance on permitted activities of QSPEs, (3) eliminate the prohibition on a QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferrer, and (4) revise the initial measurement of interests related to transferred financial assets held by a transferrer.

.245 During re-deliberations of this proposed Statement the FASB decided to amend the isolation criteria in paragraph 9(a) of FASB Statement No. 140 for consolidated financial statements that include a transferrer by requiring that the legal analysis treat all of the involvements in the transferred financial assets by any entity that is included in the consolidated financial statements being presented as if those involvements were made by the transferrer. In order for a parent entity of a transferrer to meet the isolation requirement, an isolation analysis must conclude that the transferred financial assets would be beyond the reach of all of the entities (and their creditors) included in the financial statements being presented, using the assumption that all of the involvements of the entities were made by the transferrer.

.246 You can access this exposure draft at www.fasb.org/draft/rev_ed_qspe_amend_st140.pdf and get updated information on the status of its deliberations at www.fasb.org/project/transfers_of_financial_assets.shtml.

Proposed FASB Statement, *The Fair Value Option for Financial Assets and Financial Liabilities*

.247 In January 2006, the FASB issued an exposure draft of a proposed Statement, *The Fair Value Option for Financial Assets and Financial Liabilities*. The fair value option project has two phases: This proposed Statement represents Phase 1, which addresses the fair value option for certain financial assets and financial liabilities. Phase 2 will consider permitting the fair value option for certain nonfinancial assets and nonfinancial liabilities and some of the financial assets and financial liabilities excluded from the scope of Phase 1.

.248 This proposed Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities, with changes in fair value recognized in earnings as those changes occur. An entity would be permitted to elect the fair value option at initial recognition of a financial asset or financial liability or upon an event that gives rise to new-basis accounting for that item. The election of the fair value option would be made on a contract-by-contract basis and would need to be supported by concurrent documentation or a preexisting documented policy.

.249 This proposed Statement would require an entity to report its financial assets and financial liabilities that, pursuant to electing the fair value option, would be subsequently measured at fair value in a manner that separates those reported fair values from the carrying amounts of assets and liabilities subsequently measured using another measurement attribute on the face of the statement of financial position. To accomplish that separate reporting, an entity would either (1) display separate line items for the fair value and nonfair-value carrying amounts or (2) present the aggregate of those fair value and nonfair-value amounts and disclose parenthetically the amount of fair value included in the aggregate amount. This proposed Statement would amend FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities,* to require that securities reported at fair value in accordance with FASB Statement No. 115 satisfy this financial statement presentation requirement.

.250 This proposed Statement would also require an entity to provide information that would allow users to understand the effect on earnings of changes in the fair values of assets and liabilities subsequently measured at fair value as a result of a fair value election.

.251 It is expected that *The Fair Value Option* Statement will have the same effective date as the effective date of FASB Statement No. 157; that is, effective for financial statements issued for fiscal years beginning after November 15, 2007. Entities will be permitted to early adopt *The Fair Value Option* Statement provided that the entity also adopts all of the requirements (measurement and disclosure) of FASB Statement No. 157 concurrent with or prior to the early adoption of *The Fair Value Option* Statement.

.252 You can access this exposure draft at www.fasb.org/draft/ed_fair_value_option.pdf and get updated information on the status of this project at www.fasb.org/project/fv_option.shtml.

Proposed FASB Statement, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*

.253 On December 8, 2006, FASB issued an exposure draft of a proposed Statement, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*, which would amend and expand the disclosure requirements in FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and other related literature. This proposed Statement would enhance the current disclosure framework by requiring that objectives and strategies for using derivative instruments be discussed in terms of underlying risk and accounting designation. The exposure draft would require tabular disclosure of notional and fair value amounts of derivatives instruments and the gains and losses on derivatives instruments and related hedged items. Additionally, the proposed Statement would require disclosure of information about counter party credit risk and the existence and nature of contingent features in derivative instruments.

.254 The requirements of the proposed Statement would be effective for financial statements issued for fiscal years and interim periods ending after December 15, 2007, with early application encouraged. The proposed Statement would encourage but would not require disclosures for earlier periods at initial adoption. In years after initial adoption, the proposed Statement would require disclosures for earlier periods.

.255 You can access this exposure draft at www.fasb.org/draft/ed_derivatives_disclosure.pdf and get updated information on the status of this project at www.fasb.org/project/derivative_disclosures.shtml. Comment deadline is March 2, 2007.

EITF Issue No. 06-12, *Application of AICPA Audit and Accounting Guide, Brokers and Dealers in Securities to Entities That Engage in Commodity Trading Activities and Related Issues*

.256 At its November 16, 2006, meeting, the EITF discussed Issue No. 06-12, "Application of AICPA Audit and Accounting Guide, *Brokers and Dealers in Securities*, to Entities That Engage in Commodity Trading Activities and Related Issues."

.257 The landscape for the commodities trading market continues to expand both in volume and in diversity of market participants. Although some global investment banks and energy companies have been trading a wide range of energy-related products (and other physical commodities) for many years, other financial intermediaries have become increasingly active over the last several years in the energy trading markets. Traditionally, the product offerings were primarily focused on financial products including those based on crude oil, natural gas, power, coal, and base metals; in addition to market making, speculation, and risk management trading activities. Recently, these other financial intermediaries have expanded their portfolios to incorporate the purchase and sale of commodities by taking physical delivery of the underlying commodity. These entities may or may not be regulated as broker-dealers.

.258 Although GAAP applies to broker-dealers in the same manner as it applies to other industries, certain activities of a broker-dealer's operations are unique. For this reason, the Broker Dealer Guide provides certain interpretations and other guidance specific to broker-dealers. Determining whether an entity is within the scope of the Broker Dealer Guide is significant because it provides a specialized accounting model. One important difference in financial reporting for entities within the scope of the Broker Dealer Guide is the requirement to carry inventory at fair value.

.259 The specific accounting requirements for a broker-dealer make it important to consistently determine whether an entity is within the scope of the Broker Dealer Guide, which states:

> This Guide applies to preparation and audit of financial statements of entities that are broker-dealers in securities. The activities of broker-dealers in securities are described in Chapter 1. Operations of such entities are subject to the rules and regulations of the Securities and Exchange Commission and other regulatory bodies.
>
> Broker-dealers in securities are subject to regulation under the Securities Exchange Act of 1934. Some broker-dealers are also futures commission merchants for commodity futures and commodity option contracts subject to regulation under the Commodity Exchange Act.

.260 In practice, diversity exists regarding the interpretation of the type of entity that can apply the Broker Dealer Guide. Some believe the Broker Dealer Guide is only applicable to entities that are regulated as broker-dealers under the Exchange Act, while others believe the Broker Dealer Guide is applicable based on the activity of the entity, if the activities of the entity are similar to those of a regulated broker-dealer. Entities that qualify as a consolidated supervised entity have applied the Broker Dealer Guide under an activities-based approach to nonregulated subsidiaries (or subsidiaries regulated in other jurisdictions) that conduct activities similar or identical to regulated broker-dealers. The SEC has prohibited certain other entities that are not subject to regulation as a broker-dealer under the 1934 Act from applying the Broker Dealer Guide under an activities-based approach on the basis that their organizations are predominantly financial institutions (conducting banking activities) that are subject to the banking regulations.

.261 In addition to the identification of the type of entity that can apply the Broker Dealer Guide, diversity exists on whether entities that are within the scope of the Broker Dealer Guide should be accounting for physical commodity inventory at fair value. Many entities (both those that are and those that are not regulated) that are applying the Broker Dealer Guide believe that physical commodity positions (such as natural gas, crude oil, and so forth) should be recorded at fair value based on an interpretation of the Broker Dealer Guide that allows all trading inventory to be measured at fair value.

.262 Although inventory is not specifically defined in the Broker Dealer Guide, industry practice has been to use references linked to the Broker Dealer Guide to interpret the definition of inventory as all trading positions, including financial instruments and physical commodities, that are held for sale to customers in connection with market making activities, as proprietary positions, or to economically hedge risks inherent in both.

.263 However, paragraph 17 of EITF Issue No. 02-3 prohibits fair value accounting for nonderivative contracts. The consensus in EITF Issue No. 02-3 observes that prior to EITF Issue No. 02-3, broker-dealers carried physical commodity inventory at fair value. However, EITF Issue No. 02-3 eliminated "any basis for recognizing physical inventories at fair value, except as provided by other guidance under higher categories of the GAAP hierarchy." Furthermore, Chapter 4, *Inventory Pricing*, of Accounting Research Bulletin No. 43, *Restatement and Revision of Accounting Research Bulletins* (ARB 43), has historically been the accounting guidance applied to measure commodity inventory for most nonregulated broker-dealers. ARB 43 describes inventory held for sale in the ordinary course of business and requires that inventory be recognized at cost less impairment; however, ARB 43 allows an exception in Chapter 4, Statement 9, which states, in part:

> Only in exceptional cases may inventories properly be stated above cost. For example, precious metals having a fixed monetary value with no substantial cost of marketing may be stated at such monetary value; any other exceptions must be justifiable by inability to determine appropriate approximate costs, immediate marketability at quoted market price, and the characteristic of unit interchangeability.

.264 The SEC has further interpreted ARB 43 to imply that recognition of inventory above cost should be rare. Many times, energy-based financial products are marked-to-market because they meet the definition of a derivative (including physically settled contracts that meet the requirements of FASB Statement No. 133).

However, since the Broker Dealer Guide provides specialized accounting guidance that may not be specifically addressed by ARB 43, entities that qualified for the Broker Dealer Guide have applied the provisions of the Broker Dealer Guide as it relates to inventory.

.265 Energy companies that conduct similar commodities trading activities do not fair value their physical commodity inventory since they have historically been considered outside the scope of the Broker Dealer Guide and do not meet the guidance in Chapter 4, Statement 9, of ARB 43. These entities contend that they are at a competitive disadvantage since their energy trading subsidiaries are conducting activities similar to those of a regulated broker-dealer, but have no basis to support fair value accounting recognition.

.266 EITF Issue No. 06-12 will address the following two accounting issues:

- *Issue 1.* How to determine whether an entity is included within the scope of the Broker-Dealer Guide
- *Issue 2.* Whether entities within the scope of the Broker Dealer Guide should record physical commodity inventory at fair value

.267 At the November 16, 2006, meeting the EITF deferred making a decision on this Issue and recommended that the FASB address the accounting for traded physical commodity inventory through the issuance of an FSP. The EITF also recommended that the FASB consider amending ARB 43, Chapter 4, "Inventory Pricing," to remove any perceived conflict with the Broker-Dealer Guide in the accounting for physical commodity inventory as part of the proposed FSP. At a future meeting, the EITF will evaluate whether it is necessary to continue discussing this Issue after considering the FASB's decision on whether to add the recommended project to the FASB's agenda. In the event that the EITF decides to continue discussing this Issue, the EITF requested that the staff further explore the criteria used to determine the application of an activities-based approach to interpreting whether an entity should be included within the scope of the Broker-Dealer Guide.

.268 For more information on this Issue, please refer to the "Issue Summary" that was presented to the EITF in November and which can be accessed at www.fasb.org/eitf/IS0612WW.pdf.

Proposed FASB Staff Position FIN 39-a, *Amendment of FASB Interpretation No. 39*

.269 On December 13, 2006, the FASB issued a proposed FSP FIN 39-a that addresses:

a. Certain modifications to FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts*

b. Whether a reporting entity that is party to a master netting arrangement 1 can offset the receivable or payable recognized upon payment or receipt of cash collateral 2 against fair value amounts recognized for derivative instruments that have been offset under the same master netting arrangement in accordance with paragraph 10 of Interpretation 39.

.270 Specifically, this FSP amends paragraph 3 to replace the terms *conditional contracts* and *exchange contracts* with the term *derivative instruments* as defined in FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities,* and paragraph 10 to permit a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against fair value amounts recognized for derivative instruments executed with the same counter party under the same master netting arrangement that have been offset in accordance with paragraph 10 of Interpretation 39.

.271 The guidance in this proposed FSP would be effective for fiscal years beginning after December 15, 2006. A reporting entity would recognize the effects of applying this FSP as a change in accounting principle through retrospective application for all financial statements presented unless it is impracticable to do so. If a reporting entity determines it is impracticable to retrospectively apply the guidance in this FSP for all financial statements presented, the reporting entity would disclose why it is impracticable and apply the guidance in this FSP retrospectively for as many consecutive prior financial statements as practicable. Upon adoption of this FSP, a reporting entity would be permitted to change its accounting policy to offset or not offset fair value amounts recognized for derivative instruments under master netting arrangements.

.272 For the full text of this FSP, please refer to the FASB Web site at www.fasb.org/fasb_staff_positions/prop_fsp_fin39a.pdf.

Proposed FASB Statement No. 133 Implementation Issue No. B40, *Embedded Derivatives: Application of Paragraph 13(b) to Securitized Interests in Prepayable Financial Assets*

.273 On November 8, 2006, the FASB issued proposed FASB Statement No. 133 Implementation Issue No. B40, *Application of Paragraph 13(b) to Securitized Interest in Prepayable Financial Assets*, with an accelerated 30-day public comment period that ended on December 6, 2006.

.274 The objective of this project is to provide guidance on implementation issues related to FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments,* which have been raised by constituents. Specifically, the proposed Implementation Issue clarifies that a securitized interest in prepayable financial assets would not be subject to the conditions in paragraph 13(b) of FASB Statement No. 133 if it meets specified criteria.

.275 The provisions in the proposed Implementation Issue would be effective upon initial adoption of FASB Statement No. 155. An entity that adopted FASB Statement No. 155 prior to December 31, 2006, would apply the guidance in the first reporting period beginning before December 31, 2006 for which financial statements have not yet been issued.

.276 You can access this proposed Implementation Issue at www.fasb.org/derivatives/11-08-06.pdf and get updated information on the status of this project at www.fasb.org/project/st155_implementation_issues.shtml.

Proposed SOP, *Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*

.277 At its September 13, 2006, meeting, the FASB met with representatives of the AICPA's Accounting Standards Executive Committee (AcSEC) and discussed final clearance of the AICPA Statement of Position (SOP), *Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*. The FASB did not object to issuance of that final SOP. AcSEC expects to issue the final SOP by March 2007.

.278 This SOP provides guidance for determining whether an entity is within the scope of the AICPA Audit and Accounting Guide *Investment Companies*. For those entities that are investment companies under this SOP, this SOP also addresses whether the specialized industry accounting principles of the guide (referred to as *investment company accounting*) should be retained by a parent company in consolidation or by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity (referred to as an *equity method investor*). In addition, this SOP includes certain disclosure requirements for parent companies and equity method investors in investment companies that retain investment company accounting in the parent company's consolidated financial statements or the financial statements of an equity method investor.

.279 Some practitioners are concerned that the conditions specified in the proposed SOP for determining whether investment company accounting should be retained in the consolidated financial statements of the entity's parent company or an equity method investor are too restrictive. For example, paragraph 30(b) of the proposed SOP provides that to retain investment company accounting in the financial statements of the parent company, the consolidated group (the parent company and its consolidated subsidiaries) should follow established policies that effectively distinguish the nature and type of investments made by the investment company from the nature and type of investments made by other entities within the consolidated group that are not investment companies. Those policies should address, at a minimum (1) the degree of influence held by the investment company and its related parties over the investees of the investment company, (2) the extent to which investees of the investment company or their affiliates are in the same line of business as the parent company or its related parties, and (3) the level of ownership interest held in the investment company by the consolidated group. The guidance in this condition is intended to prohibit the consolidated group from selectively making investments within an investment company subsidiary that are similar to investments held by noninvestment company members of the consolidated group when those investments would be accounted for by the equity method, by consolidation, or at cost if the investment were made by a noninvestment company member of the consolidated group.

.280 Practitioners in the industry are concerned that those provisions are overly strict and would prohibit a company from using investment company accounting if it has an investment through an investment company and simultaneously has a direct investment in that same or similar investment. According to the notes of the September 13, 2006, FASB meeting, the FASB staff discussed that concern with some of those constituents. The staff believes that the proposed SOP is operational as written.

.281 Some broker-dealers have real estate and other investment type vehicles that might be affected by the applicability of the new scope of the Investment Companies guide. The proposed SOP includes Appendix C, Applying the Provisions of this Statement of Position to Entities That Hold Investments in Real Estate," which discusses the application of the provisions of this SOP to entities that hold investments in real estate. Certain entities that hold investments in real estate may meet the definition of an *investment company*. Paragraph 5 of the proposed SOP defines an *investment company*, in part, as a "separate legal entity whose business purpose and activity are investing in multiple substantive investments for current income, capital appreciation, or both, with investment plans that include exit strategies." The proposed SOP includes no specific conclusions applicable to entities that own direct interests in real estate. Entities with direct interests in real estate should consider whether the entity's activities pertaining to those investments would result in the entity not meeting the definition of an *investment company*. Appendix C should help practitioners in determining whether the entity is a real estate investment company (an investment company that holds direct ownership of real estate) or an operating company (not an investment company).

.282 The proposed SOP is expected to become effective for fiscal years beginning on or after December 15, 2007, with earlier application encouraged. You can access the most recent draft of the SOP updated as of August 15, 2006, at www.aicpa.org/download/acctstd/investment_cos_scope_SOP71.pdf.

Revision of AICPA Practice Aid *Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools*

.283 This Practice Aid provides practitioners with nonauthoritative practical guidance on auditing financial statements of FCMs, IBs, and commodity pools. Organized to complement the Audit and Accounting Guide *Brokers and Dealers in Securities*, this Practice Aid includes an overview of the commodity industry; discussions of regulatory considerations, auditing considerations, and accounting standards; and illustrative financial statements of FCMs, IBs, and commodity pools.

.284 The Commodity Practice Aid Task Force of the AICPA is in the process of revamping this practice aid to reflect changes in accounting and auditing guidance and regulatory rules that have occurred since the original issuance of this publication. The revised practice aid will provide practitioners with nonauthoritative, practical guidance on auditing financial statements of FCMs, IBs, and commodity pools. Readers should be alert to further developments.

Auditing Pipeline—Nonpublic Companies

Proposed Statement on Standards for Attestation Engagements, Reporting on an Entity's Internal Control Over Financial Reporting

.285 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). In May 2006, the PCAOB announced plans to amend certain aspects of PCAOB Auditing Standard No. 2 to improve its implementation. Because the forthcoming changes to the PCAOB Standard will be relevant to the revision of AT Section 501, the ASB has decided to defer the issuance of a final revised AT Section 501 until the PCAOB issues their amendments and the ASB has time to consider them. For additional information, see the section, "FDICIA Update—What's New (or Not) for 2006?"

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.286 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed Statement, which can be obtained at www.fasb.org.

Auditing Pipeline—Public Companies

.287 In addition to reading about the matters presented below, see the AICPA *SEC and PCAOB Alert—2006/2007* (product no. 022497kk) for a detailed overview of recent developments at the SEC and PCAOB with respect to financial reporting and auditing matters.

Proposed PCAOB Auditing Standard, An Audit of Internal Control Over Financial Reporting that is Integrated with an Audit of Financial Statements

.288 This proposed standard would supersede PCAOB Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an *Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320), and is designed to focus the auditor on the matters most important to internal control; eliminate unnecessary procedures; simplify and shorten the standard by reducing detail and specificity; and make the audit more scalable for smaller and less complex companies. Among other things, the proposed standard would:

- Direct the auditor to the most important controls and emphasize the importance of risk assessment;
- Revise the definitions of significant deficiency and material weakness, as well as the "strong indicators" of a material weakness;
- Clarify the role of materiality, including interim materiality, in the audit;
- Remove the requirement to evaluate management's process;

- Permit consideration of knowledge obtained during previous audits;
- Direct the auditor to tailor the audit to reflect the attributes of smaller and less complex companies;
- Refocus the multi location testing requirements on risk rather than coverage; and
- Recalibrate the walkthrough requirement.

.289 The PCAOB is also seeking comment on certain related proposals that would facilitate the PCAOB's efforts to make audits of internal control more effective and efficient. These related proposals are described below.

Proposed PCAOB Auditing Standard, Considering and Using the Work of Others

.290 This proposed standard would supersede AU section 322 (AICPA, *PCAOB Standards and Related Rules*) and the direction currently contained in PCAOB Auditing Standard No. 2 regarding using the work of others. Among other things, the proposed standard would:

- Allow the auditor to appropriately use the work of others, and not just internal auditors, for both the internal control audit and the financial statement audit, eliminating a barrier to integration of the two audits;
- Encourage greater use of the work of these others by requiring auditors to evaluate whether and how to use their work to reduce auditor testing;
- Require the auditor to understand the relevant activities of these others and determine how the results of that work may affect the audit;
- Provide a single framework for using the work of others based on the auditor's evaluation of the combined competence and objectivity of others and the subject matter being tested; and
- Eliminate the explicit principal evidence provision previously included in PCAOB Auditing Standard No. 2.

Proposed Rule 3525, Audit Committee Pre-Approval of Services Related to Internal Control

.291 The proposed new independence rule would replace direction currently contained in PCAOB Auditing Standard No. 2 regarding independence and internal control-related services. The proposed rule is intended to ensure that audit committees are provided relevant information for them to make an informed decision on how the performance of internal control-related services may affect independence. The new rule would also recognize that audit committees may pre-approve the provision by their independent auditor of internal control-related services on an ad hoc (i.e., specific to each request) basis, or pursuant to committee-approved policies and procedures.

Proposed Amendments to PCAOB Interim Standards

.292 The PCAOB proposed amendments that, among other things, would:

- Simplify the internal control standard by moving certain information currently contained in PCAOB Auditing Standard No. 2 to other existing interim standards. For example, the proposed amendments would move the auditor's responsibilities for management's internal control certifications under Section 302 of the Act into AU section 722, *Interim Financial Information* (AICPA, *PCAOB Standards and Related Rules*); and
- Change the existing requirement that "generally, the date of completion of the field work should be used as the date of the independent auditor's report" to "the auditor should date the audit report no

earlier than the date on which the auditor has obtained sufficient competent evidence to support the auditor's opinion."

.293 Comments on these proposals should be received no later than February 26, 2007. The proposed standards and related documents are available on the PCAOB's Web site under Rulemaking Docket 21.

SEC Proposed Guidance on *Management's Report on Internal Control Over Financial Reporting*

.294 In addition to reading about the proposal discussed below, see the AICPA *SEC and PCAOB Alert—2006/2007* (product no. 022497kk) for a detailed overview of recent developments at the SEC and PCAOB with respect to financial reporting and auditing matters.

.295 On December 20, 2006, the SEC proposed interpretive guidance for management regarding its evaluation of internal control over financial reporting. The interpretive guidance sets forth an approach by which management can conduct a top-down, risk-based evaluation of internal control over financial reporting. The proposed guidance is intended to assist companies of all sizes to complete their annual evaluation in an effective and efficient manner and it provides guidance on a number of areas commonly cited as concerns over the past two years. In addition, the SEC proposed an amendment to its rules requiring management's annual evaluation of internal control over financial reporting to make it clear that an evaluation that complies with the interpretive guidance is one way to satisfy those rules. Further, the SEC proposed an amendment to its rules to revise the requirements regarding the auditor's attestation report on the assessment of internal control over financial reporting. Under the proposed rule amendments, the auditor would express only a single opinion on the effectiveness of the company's internal controls in its attestation report rather than expressing separate opinions directly on the effectiveness of the company's internal control over financial reporting and on management's assessment. In addition, the proposed rule amendments would clarify the circumstances in which the SEC would expect that the accountant cannot express an opinion.

.296 Comments on this proposal should be received on or before February 26, 2007. Please see Release No. 33-8762 for more information.

Resource Central

On the Bookshelf

.297 The following AICPA publications deliver valuable guidance and practical assistance as potent tools to be used in your engagements:

- Audit and Accounting Guide *Brokers and Dealers in Securities* (product no. 012706kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012526kk)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012516kk)
- Audit Guide *Audit and Accounting Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012556kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, As Amended* (product no. 012776kk)
- *Accounting Trends & Techniques—2006* (product no. 009898kk)

- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Practice Aid *Fraud Detection in a GAAS Audit* (product no. 006615kk)

Audit and Accounting Manual

.298 The *Audit and Accounting Manual* (product no. 005136kk) is developed exclusively for small- and medium-size CPA practices. This unique one-volume manual explains and demonstrates useful techniques and procedures for conducting compilation, review and audit engagements—from planning to internal control to accountants' reports.

AICPA reSOURCE Online: Accounting and Auditing Literature

.299 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential online service, go to cpa2biz.com.

Educational Courses

.300 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Those courses include:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2006 edition) (product no. 736182kk, text; also available in video and DVD formats with a manual). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Fraud and the Financial Statement Audit: Auditor Responsibilities Under SAS 99* (product no. 731813kk, text; for product numbers for other formats please refer to the cpa2biz.com Web site). The new fraud standard may not change your responsibilities for detecting fraud in a financial statement audit, but it will change how you meet that responsibility. Practitioners will benefit from a risk assessment approach to detecting fraud in a financial statement audit. You will learn the conceptual framework necessary to understand the characteristics of fraud.
- *Auditing for Internal Fraud* (product no. 730277kk). This course provides the auditor with the tools to identify fraud schemes. It trains CPAs to focus their analytical and substantive tests on the fraud triangle when evaluating internal controls. It also illustrates the latest in fraud prevention and detection programs implemented by industry leaders.
- *Identifying Fraudulent Financial Transactions* (product no. 730546kk). Learn to identify the red flags of fraud in financial information and to analyze a variety of fraud schemes. You will develop a framework for detecting financial statement fraud and learn about fraud schemes in revenue, inventory, liabilities, and assets.
- *Independence* (product no. 739175kk). This interactive CD-ROM course reviews the AICPA authoritative literature covering independence standards (including the AICPA SEC practice section independence requirements), SEC regulations on independence, and Independence Standards Board (ISB) standards.
- *SEC Reporting* (product no. 736773kk, text; for product numbers for other formats, please refer to the www.cpa2biz.com Web site). This course helps the practicing CPA and corporate financial officer learn to apply SEC reporting requirements. It clarifies the more important and difficult disclosure requirements.
- *Internal Control and IT: Reliable Reporting and Fraud Prevention* (product no. 732551kk). This course provides an overview of the key auditing standards, conceptual frameworks, IT infrastructures and auditing issues you are likely to face on medium to small company engagements.

.301 For listing of additional courses available, please download the *Fall/Winter 2006 AICPA CPE Catalog* and *Accounting and Auditing CPE Catalog*, which are available at https://www.cpa2biz.com/CPE/CPEFilter.htm.

Online CPE

.302 AICPA CPExpress, offered exclusively through cpa2biz.com, is AICPA's flagship online learning product. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com/infobytes.

Webcasts

.303 Stay plugged in to what's happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in on the discussion. If you can't make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.304 The CFO Roundtable Webcast Series—brought to you each calendar quarter—is designed to cover a broad array of "hot topics" that successful organizations employ and subjects that are important to a CFO's personal success. From financial reporting and budgeting and forecasting, to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.305 The SEC Quarterly Update Webcast Series—brought to you each calendar quarter—showcases the profession's leading experts on what's "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and CorpFin activities, these hard-hitting sessions will keep you "plugged-in" to what's important. A must for both preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

National Securities Industry Conference

.306 Each year, the AICPA cosponsors with the Financial Management Division of the SIA (now SIFMA) the National Conference on the Securities Industry, which is specifically designed to update auditors and securities industry financial executives on significant accounting, legal, financial, and tax developments affecting the securities industry. Information on the conference may be obtained by calling the AICPA CPE Conference Hotline at (888) 777-7077 or visiting the AICPA Web site at www.aicpa.org.

Member Satisfaction Center

.307 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.308 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.309 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.310 AICPA Online, at www.aicpa.org, offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the professional standards, and CPE courses.

Other Helpful Web Sites

.311 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the "Information Sources" table at the end of this Alert.

.312 This Audit Risk Alert replaces *Securities Industry Developments—2005/06*. The *Securities Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ymishkevich@aicpa.org, or write to:

AAM Section 8120

Not-for-Profit Organizations Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
NOT-FOR-PROFIT ORGANIZATIONS INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert, prepared by the AICPA staff, is intended to help you identify the significant business risks that may result in the material misstatement of your client's financial statements. This Alert provides CPAs with an overview of recent economic, business, regulatory and professional developments that may affect the audits and other engagements they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Lori West, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff wishes to thank Joel Tanenbaum, Technical Manager, AICPA Accounting Standards; Christopher Cole, CPA, CFE, Technical Manager, AICPA, Accounting and Auditing Publications Team; and various members of the not-for-profit profession, including Gregory Capin, CPA; Carrie R. Charles, CPA; Julie Floch, CPA; Betsy Krisher, CPA, CGFM; Richard Larkin, CPA; Amanda E. Nelson, CPA; Nancy E. Shelmon, CPA; and Scott D. Steffens, CPA, for their assistance and contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert (Alert) helps you plan and perform your not-for-profit organization (NPO) audits. The information delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement in the financial statements. Also, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the NPO industry, and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry information.

Understanding the Organization and Its Environment and Assessing Risks

.03 An auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include the following:

- Industry conditions
- The regulatory environment encompassing, among other matters, relevant accounting pronouncements
- The legal and political environment
- Other external factors, such as general economic conditions

.04 The NPO industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive).

.05 The auditor should obtain an understanding of the organization's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the organization's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. An understanding of business risks increases the likelihood of identifying risks of material misstatement, although the auditor does not have a responsibility to identify or assess all business risks. Many business risks could eventually have financial consequences and, therefore, affect the financial statements; however, not all business risks give rise to risks of material misstatement.

.06 After gaining an understanding of the organization and its environment, the auditor needs to make risk assessments at the financial statement and relevant assertion levels based on that understanding.

.07 Presented in this Alert are current business, economic, regulatory, accounting, and auditing matters that may affect your clients. Reading about these matters and properly addressing them as necessary will help you gain a better understanding of your client's environment, will help you better assess risks of material misstatement of the financial statements, and could strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.08 One aspect of obtaining an understanding of the client and the environment in which they operate is to develop a sense of the economic situation during the period under audit. There are many competing and conflicting factors affecting the United States economy. At the present time, the consensus is that the economy is growing, but not quickly.

.09 An indicator of economic conditions is the U.S. gross domestic product (GDP) which measures output by labor and property within the U.S. and increases as the economy grows. The GDP was up by 3.3 percent in 2006. The overall pace of growth is essentially the same as that of 2005 when GDP increased by 3.2 percent; however, the third and fourth quarters of 2006 produced annualized growth rates of only 2.0 percent and 2.2 percent, respectively, demonstrating a slowdown from the 5.6 percent expansion in the first quarter of 2006.

.10 The overall unemployment rate, which is a lagging indicator of economic conditions, has ranged from 4.4 percent to 4.8 percent during 2006 with an annual average of 4.6 percent representing just over 7 million people. The 2006 figures represent the lowest annual rate and total number of jobless since 2000, according to statistics from the U.S. Department of Labor, Bureau of Labor Statistics (BLS). During that period, from 2000 to 2006, 8 million new jobs were added. These data further demonstrates the economic growth the U.S. has experienced since the beginning of 2006.

.11 The Consumer Price Index (CPI) is a measure of the average change in prices over time of goods and services purchased by households. The CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 87 percent of the total population and include, in addition to wage earners and clerical worker households, groups such as professional, managerial, and technical workers; the self-employed; short-term workers; the unemployed; retirees and others not in the labor force. The CPIs are based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. The CPI-U in January 2007 was 2.1 percent higher than in January 2006. This is a relatively low rate and indicates moderate price inflation levels.

.12 According to the BLS, average gross weekly earnings increased 4 percent in 2006, which is the largest increase since 1997 and resulted in a per capita increase in disposable income of 1.8 percent for the year. The increase in disposable income along with moderate inflation numbers may be a contributing factor to a fourth quarter increase in the retail consumer spending rate of 4.1 percent over the same period in 2005. The excess of spending over the growth in disposable income has further exacerbated the negative savings trend over the past few years. Americans are spending 1 percent more than they earn according to the U.S. Department of Commerce, Bureau of Economic Analysis (BEA) and Bureau of the Census (BC).

.13 The Federal Reserve has kept the federal funds rate, the rate for overnight inter-bank loans, at five and a quarter percent since June 2006. According to Federal Reserve Chairman Ben Bernanke, consumer spending strength has buoyed the economy and should continue to do so in the near future. The stability in the federal funds rate generally indicates a low to moderate growth rate in both economic expansion and inflationary bellwethers.

.14 Energy prices, including natural gas and gasoline, were explosive in 2006. Prices shot up 25 percent to 30 percent during the first quarter and then dropped back down to beginning-of-the-year levels early in the fourth quarter. The higher mid-year prices impact almost every aspect of the economy from the cost of office supplies to the cost of air and ground transportation.

.15 The housing market appears to be stopping to catch its breath. The Case-Shiller price index showed a 0.4 percent increase in prices during 2006. On an inflation-adjusted basis, that translates to a 1.6 percent decrease. A variety of opinions exist on the direction the market will take in the next year. One effect of the current slowdown is an increase in foreclosure rates. As low, introductory mortgage rates expire and ratchet up payments, many homeowners find themselves unable to make even the minimum payment on their loans. Refinancing existing loans may not be an option due to lack of equity in the property or failure to qualify as lenders tighten standards. Mortgage delinquency and foreclosure rates are up to levels last seen after the economic recession in 2001. The majority of delinquencies and foreclosures are occurring in the subprime mortgage market, although, there has been an increase in the midlevel credit or "Alt-A" market as well. As a result, several lenders who cater to the subprime segment have ceased operations.

The State of Not-for-Profits

.16 The NPO sector is a growth industry. According to a study by the National Center for Charitable Statistics at the Urban Institute that covered the period from 1994 to 2004, the total number of NPOs recognized by the Internal Revenue Service (IRS) increased by 27 percent and assets increased by 90.7 percent. Contributions to these groups in 2005 topped $260 billion and 65 million people in the United States did volunteer work for them. As of September 30, 2006, there were 1.6 million NPOs registered with the IRS.

.17 NPOs continue to face challenges including continuing demands for accountability from the public and the legislative community. The ongoing demands for accountability have led to the voluntary implementation of Sarbanes-Oxley or similar regulations by some NPOs and further discussion of future expansion of those or similar regulations to NPOs.

.18 The auditor should be aware of regional conditions as well as national conditions when establishing expectations for financial results. This is especially true for the NPO sector in that 70 percent to 80 percent of charitable contributions are for local causes. The health of the local labor market can also have a substantial impact on donations.

Governance and Accountability

.19 Since 2002 when the Sarbanes-Oxley law was enacted, there have been a number of accounting fraud cases that have come to light. Many attribute the increase to improved detection as a result of the stringent internal control testing requirements and other provisions of the law such as whistle-blower hotlines. While there are provisions that currently apply to both publicly held companies and NPOs, there has been discussion of the applicability and practicality of expanding more of the provisions to include NPOs. Some very large NPOs have voluntarily adopted some of the provisions of Sarbanes-Oxley, either as a result of expectations from their corporate board members or in an effort to improve governance and accountability practices.

.20 According to a recent survey conducted in 2006, 54 percent of NPOs that participated in the survey have made changes to their policies with the goal of improving governance and accountability. The policies that the majority are rewriting or establishing include conflict-of-interest, investment, code-of-ethics, records-retention, and new board member policies. Nearly two-thirds of those surveyed have also developed an accounting policies and procedures manual, established an audit committee to oversee the financial statement audit and monitor internal controls, and have included a certified public accountant on their governing board or audit committee. Additionally, reporting policies have been strengthened at some organizations through implementation of some form of certification of the financial statements by the executive director and board president or treasurer.

.21 The IRS has issued a discussion draft titled *Good Governance Practices for 501(c)(3) Organizations*, which is available on the IRS Web site at: www.irs.gov/charities/charitable/article/0,,id=167626,00.html. In this document, the IRS suggests a variety of areas that NPOs can consider in an effort to promote good governance practices. In addition to the items mentioned earlier in this section, the IRS recommends a review of the organization's mission statement and governance practices including organizational transparency, compensation practices, and board member responsibilities in the areas of due diligence and duty of loyalty.

Corporate Sponsors

.22 Corporate giving continues to rise even though it represents only 5.3 percent of the total giving in 2005. Corporate contributions increased 22 percent from 2004 to $13.77 billion in 2005, much of which can be tied to disaster relief efforts; more than one-third of corporate giving is "in-kind." In some circumstances, resources received from corporations are advertising or sponsorship arrangements, rather than contributions and often then strings are attached to the funds. The corporation may have specific requirements in return for those funds, such as naming opportunities, discounted access to services, and advertisement of the company, among others. NPOs must be sure that the goals of their sponsors do not conflict with the goals and mission of their organization.

Funding Administrative Costs

.23 Foundations, corporations, and individuals may have different priorities when it comes to selecting an NPO to support. Some may consider the organization's mission, its reputation, the number of people served, or even who else supports them, but the one factor that most often receives consideration is the percentage of each dollar that is spent on programs. Many donors have the perception that the biggest impact they can make with their contribution is by only supporting programmatic activities. Operating expenses such as the accounting department, maintenance and utilities, and the executive management staff must therefore be supported by unrestricted dollars. As a result, organizations and their auditors should be careful to understand the administrative allocation process, as overhead costs cannot be charged against gifts that prohibit that funding.

Volunteers

.24 The Independent Sector announced that the 2006 estimate for the value of a volunteer hour is $18.77. A recent study conveys the fact that there are approximately 6 million active volunteers at the core of many NPOs. These volunteers are contributing 15 million hours, which equates to a value of close to $284 million in volunteer labor. As indicated by these statistics, retaining volunteers is an integral part of many NPOs.

.25 The USA Freedom Corps was established by the President of the United States in early 2007 as a response to a 7 percent decrease in volunteerism from 2005 to 2006. In part, the decrease may be a result of the 31 percent of baby boomers that do not return to volunteer their time after the first year of service. Retention of volunteers can be seen as a significant problem for organizations. Frequently, the NPO has invested resources such as staff time in the recruiting and training process for volunteers just as they would for paid staff. A similar rate of turnover among employees would be considered a significant problem in most organizations.

Changing Face of Donors

.26 There has been an increase in the desire for control and a say in the direction of the mission of organizations by young donors. Though no statistics are available, a general belief is that the younger affluent donors want to participate as donors and volunteers to the organizations they support more than their older counterparts. They are more likely to want elements of control as conditions of their gifts.

Retiring Work Force

.27 The demographic shift in the workplace, as baby boomers near retirement, is impacting the NPO sector. Surveys indicate that 50 percent to 70 percent of executive directors plan to leave within 5 years. Many are founders and leaders, closely identified with their organizations.

.28 Because the sector already suffers from fragile infrastructures, the transitions are expected to be hugely disruptive. Many organizations devote resources to programmatic functions, and do not have "executives in training" to replace these positions. Succession planning is not seen as a priority.

Cyber Donations

.29 As the internet becomes the quick and easy means of providing access to information, it has also become a tool to expand the audience of NPOs. As you surf the net you will find Web sites for thousands of NPOs and on most of them will be the opportunity to contribute. Many of these organizations make use of services such as PayPal to permit donors to charge online donations to credit or debit cards. The money is then placed in an account similar to a bank account in the organization's name and a fee is deducted. At some future time the money is then electronically transferred to another bank account as specified by the NPO. This may be an area that auditors find worthy of attention in that the nonprofit's internal controls over these accounts may not be as thorough as those for deposit accounts at brick and mortar banks.

Ethics Rules Overhaul

.30 Lawmakers cannot accept gifts from groups that employ lobbyists. Currently, it is still unclear whether charities are included in these new rules; thus, this has led to confusion around charitable events because lawmakers and charities are unclear whether meals, gift bags, or spousal attendance of events violates these rules.

Mission Related Investments

.31 There has been an increased focus on socially responsible investing. "Mission investing" has been defined as making loans to NPO groups, engaging in shareholder activism to influence corporations' policies, investing in companies that seek to make money and solve a social or environmental problem, and screening stocks to align a fund's investments with its philanthropic mission by the FSG Social Impact Advisors, formerly known as Foundation Strategy Group. For instance, some foundations may not opt to invest in tobacco companies or may make a concerted effort to purchase stock in businesses that are environmentally friendly.

Regulatory and Legislative Developments

NPO Audits Performed Under Government Auditing Standards and Circular A-133

.32 NPOs may receive federal or state assistance that results in additional audit requirements. For example, they will be required to comply with *Government Auditing Standards* (GAS, also referred to as the Yellow Book). In addition, auditors may be required to perform a single audit and comply with applicable rules. A *single audit* is an audit of an entity's federal financial assistance, as required by the Single Audit Act Amendments of 1996 (the Act), and Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133).[1]

.33 When performing audits under *Government Auditing Standards* or single audits, auditors should refer to the guidance in AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* (GAS/A133 Guide). That Guide is updated each year for conforming changes. The 2007 update to the GAS/A133 Guide is expected to be issued in June 2007 (product number 012747kk). Auditors should also refer to the AICPA Audit Risk Alert, Government Auditing Standards *and Circular A-133 Audits—2007* (product number 022457kk) for further developments.

IRS Activities

New Law Revised Exempt Organization Tax Rules, Pension Protection Act of 2006

.34 On August 17, 2006, the President signed the Pension Protection Act of 2006. The new law contains numerous changes to the tax law provisions affecting tax-exempt organizations.

.35 The following are key provisions of the legislation:

---

[1] Instead of a single audit, under certain circumstances, program-specific audits may be conducted.

- ***Controlling organizations*** must report income from and loans to controlled organizations as well as transfers between controlled and controlling organizations. This provision is effective for returns due (without regard to extensions) after the date of enactment.
- ***Section 501(c)(3) organizations*** that file unrelated business income tax returns (Forms 990-T) must now make them available for public inspection. This provision is effective for returns filed after the date of enactment.
- ***Private foundation and excess benefit penalty excise taxes*** are doubled.
- ***Donor advised funds, supporting organizations, and credit counseling organizations*** are subject to new requirements. Donor advised funds and supporting organizations will be subject to continued federal study.
  - — Supporting organizations that want to change their public charity classification should follow the procedures outlined in **Announcement 2006-93** at www.irs.gov/pub/irs-drop/a-06-93.pdf.
  - — **Notice 2006-109** provides interim guidance on issues affecting supporting organizations and sponsoring organizations of donor advised funds. Go to link www.irs.gov/pub/irs-drop/n-06-109.pdf.
- Applicable exempt organizations are subject to new reporting requirements when they acquire life insurance contracts that are structured to give both the exempt organization and private investors an interest in the contract. For purposes of this reporting requirement, applicable exempt organizations include governmental organizations (including Indian Tribal Governments) and employee stock ownership plans.
  - — **Notice 2007-24** at www.irs.gov/pub/irs-drop/n-07-24.pdf requests public comments on Forms 8921 and 8922 which will be used to satisfy this requirement as well as to gather data for the study mandated by Congress.
- Individual Retirement Account (IRA) owners age 70½ or older are permitted to directly transfer, tax-free, up to $100,000 per year to an eligible charity.
  - — **Notice 2007-7** at www.irs.gov/pub/irs-drop/n-07-07.pdf clarifies several issues related to this provision.
- Charitable contribution deductions for food, books, and certain conservation property are increased.
- Starting in 2007, donors must maintain written documentation (cancelled check or communication from the donee) for **all** contributions—even cash put in a church collection plate, not just contributions over $250, if they want to take an income tax deduction for the gift. Organizations should try to ensure that donors are aware of this new requirement.
- Charitable contribution deductions for monetary donations, certain easements, taxidermy property, clothing and household goods, and certain other items are limited.
  - — **Notice 2006-96** at www.irs.gov/pub/irs-drop/n-06-96.pdf provides guidance regarding appraisal requirements for noncash charitable contributions, including transitional guidance relating to the definitions of *qualified appraisals* and *qualified appraiser*.
  - — **Notice 2006-110** at www.irs.gov/pub/irs-drop/n-06-110.pdf provides guidance on new recordkeeping requirements for charitable contributions made through payroll deductions.
  - — The IRS highlighted changes that may affect charitable giving in **News Release IR-2006-192** at www.irs.gov/newsroom/article/0,,id=164997,00.html.
- Beginning in 2008, exempt organizations with gross receipts under $25,000 must file an annual notice. The IRS Web site indicates that the IRS is currently proposing an annual electronic notice—e-postcard Form 990-N (see www.irs.gov/charities main page).

Changes to the 2006 Form 990

.36 Certain provisions of the Pension Protection Act of 2006 result in new reporting requirements for Forms 990, 990-EZ, 990-PF, 990-T, and 4720. As a result the instructions to the 2006 Forms 990, 990-EZ, and Schedule A have been revised to incorporate those significant changes in an effort to address the legislation enacted in 2006.

.37 The following are highlights of the significant changes.

.38 ***Family and Business Relationships of Officers, Directors, Trustees, and Key Employees***

- The definitions of family and business relationships used for purposes of completing Form 990, line 51 must now also be used for purposes of completing Form 990, line 75b. See pages 32 and 35 of the Form 990 Instructions.

.39 ***Compensation of Officers, Directors, Trustees, and Key Employees From Related Organizations***

- The definition of *related organization* (used for purposes of completing Form 990, line 75c) is clarified by listing 8 specific relationships. See page 35 of the Form 990 Instructions.
- The definition of *related organization* excludes certain bank or financial institution trustees and certain common independent contractors.
- Organizations no longer have to report the ***amount*** of compensation where (1) the organization conducts joint programs or shares facilities or employees, (2) one or more persons exercise substantial influence over two organizations, and (3) volunteers control two organizations.
- The definition of *substantial influence* is clarified by referencing Internal Revenue Code section 4958(f)(1) and Regulations section 53.4958-3.

.40 ***Supporting Organizations***

- A supporting organization must now generally file Form 990 (or Form 990-EZ, if applicable) even if its gross receipts are normally less than $25,000. See page 2 of the Form 990 Instructions.
- A supporting organization must provide additional information on Schedule A, page 3. See page 7 of Schedule A instructions.

.41 ***Organizations Maintaining Donor Advised Funds***

- Organizations maintaining donor advised funds must complete new lines 1a and 22a on Form 990. See pages 23 and 28 of Form 990 Instructions.
- Organizations maintaining donor advised funds must complete new lines 4a–4g on the Schedule A. See pages 3 and 4 of the Schedule A Instructions.

.42 ***Organizations with Controlled Entities***

- Organizations with controlled entities must file Form 990 even if their gross receipts are normally less than $25,000. See page 2 of the Form 990 Instructions.
- Organizations with controlled entities must file Form 990 even if their gross receipts are normally less than $25,000. See pages 2 and 41 to 42 of the Form 990 Instructions and Code section 512(b)(13).

.43 ***Organizations Paying Travel and Entertainment Expenses for Government Officials***

- Organizations paying travel and entertainment expenses for federal, state and local government officials and their family members must separately report certain payments on Form 990, line 43 as described on page 30 of Form 990 Instructions.

.44 ***Organizations With Conservation Easements***

- An organization receiving or holding conservation easements must complete Schedule A, line 3c and attach a schedule with the information described on page 3 of the Schedule A Instructions.

IRS, Treasury Issue Priority Guidance Plan for 2007

.45 Fiscal year (FY) 2007 priorities will include a number of ongoing projects as well as the beginning of some new projects. In addition, the enactment of the Tax Increase Protection and Reconciliation Act of 2005 and the Pension Protection Act of 2006, which contains significant changes to the laws that govern tax-exempt organizations, will require substantial time and resource commitments to implement the changes as well as provide guidance, education, and outreach.

.46 New projects for FY 2007 include:

- Implementing new legislation
- Gaming
- Employment taxes
- Telephone excise tax refund
- Community foundations
- College and university unrelated business income tax

.47 Among the ongoing projects, the Form 990 redesign continues with a goal of having a draft form and instructions available for comment in 2007.

.48 The joint endeavor among the Chief Counsel and Treasury will continue in an effort to provide new guidance on topics that further the strategic goals of the IRS as well as topics that are of concern to the NPO community. In particular, the FY 2007 Priority Guidance Plan includes:

- Guidance on political activities by section 501(c)(3) organizations
- A revenue procedure on processing exemption applications that will replace Revenue Procedure 90-27
- Final regulations under sections 501(c)(3) and 4958 on revocation standards (proposed regulations were published on September 9, 2005)
- Guidance on advance and definitive rulings for publicly supported organizations
- Guidance under section 509(a)(3) regarding supporting organizations
- Guidance under section 527(l) with respect to the reasonable cause standard for penalties imposed on political organizations for failing to comply with notice and reporting requirements
- Regulations under section 529 regarding qualified tuition programs
- Guidance on section 516 of the Tax Increase Prevention and Reconciliation Act of 2005 regarding the involvement of accommodation parties in tax shelter transactions

.49 Quality education and outreach programs will continue to be provided including:

- A new interactive Web-based training program modeled on our Small and Mid-Size Exempt Organizations workshop
- Information on the new legislative changes

- Phone forums on the hottest topics
- Updates to the Charities and Non-Profits page on www.irs.gov

.50 Readers may go to www.irs.gov/pub/irs-tege/fy07_implementing_guidelines.pdf to view the FY 2007 Exempt Organizations Implementing Guidelines document in its entirety.

Exemption Application Form for Charities Revised

.51 The exemption application form 1023 used to apply for section 501(c)(3) exemption has been updated to incorporate new user fee information.

.52 A document containing the changes can be found at www.irs.gov/pub/irs.pdf/f1023.pdf.

Frequently Asked Questions About Exempt Organizations Revised

.53 Additional frequently asked questions (FAQs) about issues of interest to the general public regarding exempt organizations have been posted to www.irs.gov/charities/article/0,,id=96583,00.html.

Information for Tax Professionals and E-Filing

.54 Tax professionals who plan to file Forms 990, 990-EZ, 990-PF, or 1120-POL electronically must submit a new or revised electronic IRS *e-file* application using the electronic e-services application. This is a one-time registration process and you must apply at least 45 days before you plan to file electronically. Go to www.irs.gov/taxpros/article/0,,id=109646,00.html for additional information.

Report on Exempt Organizations Executive Compensation Compliance Project—Parts I and II issued in March 2007

.55 In 2004, the IRS, through the Exempt Organizations Office of the Tax Exempt and Government Entities Division, implemented the Executive Compensation Compliance Initiative (the Project). The Project encompassed Forms 990 and related returns for tax years beginning in 2002, and was divided into three parts. The report discusses Part I, involving compliance check letters sent to 1,223 organizations, and Part II, a separate project involving examinations of 782 organizations. Approximately 10 percent of the examinations remain open. Part III was initiated based on information gathered in Part II, and is ongoing as work is continued in the executive compensation compliance area.

.56 The Project revealed mixed results regarding reporting and compliance by the contacted organizations. The compliance checks uncovered significant reporting errors and omissions in specific areas, particularly excess benefit transactions and transactions with disqualified persons, as well as potential compliance issues related to loans made to officers.

.57 On the other hand, the examinations closed thus far have indicated that those selected for examination generally were compliant with section 4958 and private foundation self-dealing rules. However, breaches of the rules were uncovered, such as excessive compensation to executives and officers which resulted in tens of millions of dollars in penalties. More than 30 percent of the 1,223 organizations that received letters by the Exempt Organizations Office of the IRS amended their Form 990 as a result. The IRS then selected 782 organizations to be examined. Forty people in 25 organizations were assessed penalties totaling more than $21 million. Besides lavish salaries and bonuses, the examinations uncovered payments for meals, gifts, automobiles, and even vacation homes not reported as compensation.

.58 Internal Revenue Code Section 4958 imposes an excise tax of 25 percent of an "excess benefit" provided by an exempt organization to a person who exercises or is in a position to exercise substantial influence over the organization's affairs. If the excess benefit is not corrected within the tax period in which it is initially assessed, the penalty increases to 200 percent. An excess benefit is one that exceeds the value of a person's service to the organization. Section 4958 also imposes a 10 percent penalty on excess benefits to officers, directors, or trustees of organizations.

.59 The Report includes a summary of findings, background information, methodology, detailed findings for Part I, compliance check results and Part II, examination results, as well as lessons learned and recommendations. Readers should go to www.irs.gov/pub/irs-tege/exec._comp._final.pdf to view the complete report.

New Electronic Filing Requirement for Small Tax-Exempt Organizations—Annual Electronic Notice—e-Postcard (Form 990-N)

.60 Beginning in 2008, small tax-exempt organizations that previously were not required to file returns may be required to file an annual electronic notice, Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations not required to file Form 990 or 990-EZ. This filing requirement applies to tax periods beginning after December 31, 2006.

.61 Small tax-exempt organizations, whose gross receipts are normally $25,000 or less, are not required to file Form 990, Return of Organization Exempt From Income Tax, or Form 990-EZ, Short Form Return of Organization Exempt from Income Tax. With the enactment of the Pension Protection Act of 2006, these small tax-exempt organizations will now be required to file electronically Form 990-N, also known as the e-Postcard, with the IRS annually. Exceptions to this requirement include organizations that are included in a group return, private foundations required to file Form 990-PF, and section 509(a)(3) supporting organizations required to file Form 990 or Form 990-EZ.

.62 For additional information go to www.irs.gov/charities/article/0,,id=169250,00.html.

Other Technical Guidance for Tax Exempt Entities

Definition of "Party" and Allocation of Net Income or Proceeds for Purposes of Section 4965

.63 Notice 2007-18 provides guidance under section 4965 of the Internal Revenue Code to tax-exempt entities described in section 4965(c) regarding whether they are parties to a prohibited tax shelter transaction. This notice also provides guidance to tax-exempt entities described in sections 4965(c)(1), (2), and (3) that are subject to tax under section 4965(a) regarding the allocation to various periods of net income or proceeds attributable to a prohibited tax shelter transaction. To view the notice in its entirety, readers should go to www.irs.gov/pub/irs-drop/n-07-18.pdf. Furthermore, it will be included in the IRB 2007-9 dated February 26, 2007.

Refund for Federal Telephone Excise Tax Paid

.64 The Telephone Excise Tax Refund is a one-time payment available on the 2006 federal income tax return. It is designed to refund previously collected long distance telephone taxes. Individuals, businesses and tax-exempt organizations are eligible to request it by attaching Form 8913 (Credit for Federal Telephone Excise Tax Paid) to a tax form. The Form 990-T instructions illustrate how to complete the form when it is filed only to request this credit. Forms and instructions are available on-line at www.irs.gov/charities/article/0,,id=164585,00.html.

New Internet-Based Workshop for Exempt Organizations

.65 The IRS has launched a *new* Web-based version of its popular Exempt Organizations Workshop covering tax compliance issues confronted by small and mid-sized tax exempt organizations.

.66 The free online workshop—*Stay Exempt—Tax Basics for 501(c)(3)s*—consists of 5 interactive modules on tax compliance topics for exempt organizations:

- *Tax-Exempt Status*—How can you keep your 501(c)(3) exempt?
- *Unrelated Business Income*—Does your organization generate taxable income?
- *Employment Issues*—How should you treat your workers for tax purposes?
- *Form 990*—Would you like to file an error-free return?
- *Required Disclosures*—To whom do you have to show your records?

Executive Compensation Project Report

.68 A report of findings of the Exempt Organizations Executive Compensation Compliance Project has been issued. Go to the following link to view the March 2007 findings of the compliance project www.irs.gov/pub/irs-tege/exec._comp._final.pdf.

Listing of Published Guidance—2007

.69 Readers should be aware the IRS Web site contains a digest of exempt organizations' published guidance issued in 2007 at www.irs.gov/charities/content/0,,id=165801,00.html. The published guidance includes Treasury Regulations, Revenue Rulings, Revenue Procedures, and Notices and Announcements of recently published issues of interest to tax-exempt organizations.

.70 Additionally, the IRS Web site also contains an archive which presents digests of IRS published guidance items of interest to tax-exempt organizations. The archived guidance can be found at www.irs.gov/charities/article/0,,id=151053,00.html.

Group Exemptions Publication Available

.71 The IRS Tax Exempt and Government Entities Division issued publication 4573, *Group Exemptions*, which answers questions about the rules and procedures for group exemptions. The publication is available at www.irs.gov/pub/irs-tege/p4573.pdf.

.72 Group exemptions are sometimes issued by the IRS to recognize a group of organizations as tax-exempt if they are affiliated with a central organization. This avoids the need for each of the organizations to apply for exemption individually. A group exemption letter has the same effect as an individual exemption letter except that it applies to more than one organization.

A Charity Scam is Included in the IRS's Dirty Dozen

.73 The IRS's "dirty dozen" for 2007 continues to include the following scam that is designed to exploit the laws governing charitable organizations. Readers should be aware of arrangements involving charities and NPOs that continue to remain high on the 2007 IRS dirty dozen tax scam list.

.74 ***Abuse of Charitable Organizations and Deductions:*** (number 10 on the tax scam list) The IRS continues to observe the use of tax-exempt organizations to improperly shield income or assets from taxation. This can occur when a taxpayer moves assets or income to a tax-exempt supporting organization or donor-advised fund but maintains control over the assets or income. Contributions of noncash assets continue to be an area of abuse, especially with regard to overvaluation of contributed property. In addition, the IRS is noticing the return of private tuition payments being disguised as charitable contributions to religious organizations.

Independent Sector

.75 The Panel on the Nonprofit Sector, convened by the Independent Sector, submitted a final report to Congress and the Nonprofit Sector in June 2005 in response to a request from the Senate Finance Committee. As discussed in last year's Alert, the final report included and expanded the ideas contained in the Panel's March 1, 2005, Interim Report, and included an overview of the charitable community, including its achievements, scope, and existing programs to improve ethics and accountability. The focal point of the report was the 120 or so recommendations for action by Congress, the IRS, and charitable organizations for improving transparency and governance, while stressing the need to maintain a balance between legitimate oversight and protecting the independence that charitable organizations need to remain innovative and effective.

.76 Readers can view the final report in its entirety at www.nonprofitpanel.org/final/Panel_Final_Report.pdf.

.77 In April 2006, the Panel on the Nonprofit Sector released additional recommendations to Congress as part of its continuing effort to strengthen the accountability of the nation's 1.3 million charitable organizations. The Supplemental Report focused on 9 areas, including international grantmaking and charitable solicitation.

.78 Readers can view the supplement to the final report in its entirety at www.nonprofitpanel.org/supplement/Panel_Supplement_Final.pdf.

.79 The recommendations in these reports helped to shape the NPO reforms legislated as part of the Pension Protection Act of 2006. (See "IRS Activities" section of the Alert.)

.80 In March 2007, the Panel released Draft Principles for Effective Practice, which were developed by its Advisory Committee on Self-Regulation of the Charitable Sector. After reviewing various marketplace standards and principles, the committee developed principles of effective practice that all charitable organizations should consider adopting. These draft principles can be accessed at www.nonprofitpanel.org/selfreg/All_Principles_Revised.pdf.

.81 Comments were initially requested to be received by March 30, 2007 but the advisory committee indicates that it continues to welcome feedback. A final report will be issued late spring 2007 based on comments received.

.82 The Panel is also continuing to study recommendations for improvements to Form 990, 990-PF, and uniform financial standards and reports.

Uniform Prudent Management of Institutional Funds Act Update

.83 As discussed in last year's Alert, the profession continues to monitor the development and the enactment of the Uniform Prudent Management of Institutional Funds Act (UPMIFA). On February 12, 2007 the UPMIFA, which provides a major overhaul of proposed legislation pertaining to charitable institutions, was approved by the American Bar Association's House of Delegates. The Act was drafted and approved by the National Conference of Commissioners on Uniform State Laws in 2006.

.84 At the time the Alert was written, the following two states had adopted the Act:

- Utah
- South Dakota

.85 Furthermore, the Act had been introduced into the following jurisdictions:

- Connecticut
- Idaho
- Indiana
- Kentucky
- Minnesota
- Montana
- Nebraska
- Nevada
- Oklahoma
- Oregon
- Tennessee
- Texas
- U.S. Virgin Islands

.86 Readers can access the most recent UPMIFA update at www.nccusl.org./Update/CommitteeSearchResults.aspx?committee=288. The July 2006 final Act document can be viewed at www.law.upenn.edu/bll/ulc/umoifa/2006final_act.htm.

Other Regulatory Activities

.87 Listed below are links to documents of interest for NPOs not discussed elsewhere in the Alert. Readers should continue to monitor all activity revolving around the NPO sector.

1. Principles of International Charity (March 2005) www.independentsector.org/programs/gr/CharityPrinciples.pdf
2. Voluntary Treasury Anti-Terrorist Financing Guidelines (October 2006) www.ustreas.gov/press/releases/reports/0929%20finalrevised.pdf
3. Council on Foundations requests withdrawal of Anti-Terrorist Financing Guidelines and the substitution of the Principles of International Charity (letter dated December 18, 2006) www.cof.org/Action/content.cfm?ItemNumber=8998&navItemNumber=2466#Sixth
4. Political Activity and Disclosure Requirements (March 2006) Congressional Research Library Report RL-33377 www.ncseonline.org/NLE/CRSreports/06May/RL33377.pdf

6. IRS Charitable Rollover Clarification by the IRS (January 2007) Notice 2007-05 www.irs.gov/irb/2007-05_IRB/ar11.html

Audit and Attestation Issues and Developments

Alternative Investments

.88 Over the past several years, allocation of NPO assets to alternative investments has grown significantly. Although not a defined term in generally accepted accounting principles (GAAP), the term alternative investments generally refers to investments for which a readily determinable fair value does not exist. Such investments include hedge funds, private equity funds, venture capital funds, real estate funds, as well as bank common and collective trust funds. Some of the NPOs invest in a single alternative investment while others have portfolios of hundreds of alternative investments.

.89 Alternative investments can present challenges with respect to obtaining sufficient appropriate audit evidence in support of the existence and valuation assertions, because of the lack of readily determinable fair value for these investments and the limited information generally provided by fund managers. In July 2005, the Auditing Standards Board (ASB) Audit Issues Task Force issued Interpretation No. 1 to AU Section 332, "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist" (AICPA, *Professional Standards*, vol. 1, AU sec. 9332.01–.04) (the Interpretation), which interprets SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332). The Interpretation provides auditing guidance related to the existence and valuation assertions for investments in securities where readily determinable fair values do not exist.

.90 In July 2006, the AICPA issued a nonauthoritative Practice Aid, "Alternative Investments—Audit Considerations" (the Practice Aid) to provide additional guidance on the existence and valuation assertions associated with alternative investments. The guidance may be useful to both financial statement preparers and the auditor. The Practice Aid describes management's responsibility for establishing a valuation process and the related internal control. Appendix 2 to the Practice Aid contains illustrative examples of due diligence, ongoing monitoring, and financial reporting controls.

.91 The Practice Aid reminds auditors that their audit approach is based on an assessment of the risk of material misstatement of the financial statements. It states that the risk assessment with respect to alternative investments depends on the particular facts and circumstances, including (1) the significance of alternative investments to the financial statements as a whole; (2) the nature, complexity, and volatility of the underlying investments; (3) the nature and extent of management's process and related internal controls associated with the valuation of alternative investments; and (4) the nature and extent of information available to management to support its valuation process and conclusions. It also describes the relationship between the auditor's risk assessment and the sufficiency and appropriateness of audit evidence. The Practice Aid indicates that the auditor's understanding of management's process for determining estimated fair value affects the nature, timing and extent of audit procedures, and it provides example approaches. Appendix 1 to the Practice Aid also contains an example confirmation for alternative investments. The Practice Aid also reminds auditors that if the auditor is unable to obtain sufficient appropriate evidence to support the financial statement assertions, it will be necessary to qualify or disclaim an opinion due to a scope limitation.

.92 The Practice Alert is available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Practice+Aids+and+Tools/alternative_investments.htm.

The Auditor's Communication With Those Charged With Governance

.93 In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), as amended. The new SAS establishes standards for the matters *required* to be communicated by the auditor with those charged with governance in relation to an audit of financial statements, the form and timing of that communication, and to whom the matters should be communicated. The new SAS applies to all entities regardless of size, ownership, or organizational structure.

.94 Paragraph 3 of SAS No. 114 has particular relevance to NPOs as it defines *those charged with governance.* Those charged with governance are defined as the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards (GAAS).

.95 SAS No. 114 recognized the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated with them. Additional matters to be communicated are identified in other SASs, which are reflected in Appendix A of SAS No. 114.

.96 Paragraph 5 of SAS No. 114 states that the auditor **must** communicate with those charged with governance matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process.

Identifying Those Charged With Governance

.97 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.98 Because there is such diversity it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some NPOs, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards,* vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

.99 Paragraphs 29–33 of SAS No. 114 add requirements to communicate an overview of the planned scope and timing of the audit. Paragraph 64 of SAS No. 114 also requires significant matters communicated with those charged with governance to be documented.

.100 SAS No. 114 is effective for audits of financial statements for periods beginning on or after December 15, 2006.

Practice Implications Related to the Revisions Made by SAS No. 112

.101 In May 2006, the ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards,* vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006.

How the Revisions Will Affect Practice

.102 As you gain a better understanding of what needs to be communicated to management and those charged with governance, you may find that there will be more control deficiencies that you:

1. Identify as significant deficiencies and material weaknesses
2. Communicate to management and those charged with governance

.103 You may emphasize and therefore spend more time evaluating identified control deficiencies than you did in the past.

Discussions With Management and Others

.104 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. You may have to explain to your clients that you, the auditor, *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies; however, a CPA firm other than the auditor can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.105 You may be called upon to hold discussions with management and other users of your written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the definitions have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of *material weaknesses*. Another reason is that you have to include significant deficiencies and material weaknesses identified and communicated in previous years in your written communication as long as these deficiencies have not been remediated. You may need to explain to management and other users that you are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.106 You may also need to hold discussions with management and other users who ask how you were able to express a clean opinion on the financial statements when material weaknesses in internal control were present. You may wish to explain that your audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control. You can express a clean opinion on the financial statements even though material weaknesses in internal control are present, because you performed sufficient procedures and obtained appropriate audit evidence to afford reasonable assurance that the financial statements are free from material misstatement; however, these procedures do not *correct or remediate* control deficiencies. The deficiencies in internal control could still result in a material misstatement not being prevented or detected by the client.

Issues for Audits of Smaller Entities

.107 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.108 Another issue that may cause concern is the extent to which you (as the auditor) may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if your client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing or detecting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[2] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.109 ***Possible opportunities.*** The new requirements of SAS No. 112 introduce possible opportunities for you. You can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. You can also teach your clients how to develop a risk assessment approach to designing internal control.

.110 The AICPA has published the Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist you in the implementation of this Standard.

The Risk Assessment Standards

.111 In March 2006, the AICPA's ASB issued 8 SASs. SASs No. 104–No. 111 were issued together and are known as the *risk assessment standards*, applying to audits conducted in accordance with GAAS. While the new risk assessment standards include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The primary objective of the SASs is to provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. They are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier application permitted. Below is a table listing the 8 SASs and their effect on existing standards.

Statement on Auditing Standard	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures ("Due Professional Care in the Performance of Work")	Amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU section 230)
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150)
SAS No. 106, *Audit Evidence*	Supersedes SAS No. 31, *Evidential Matter* (AU section 326)
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	Supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312)

[2] See Ethics Ruling 101-3, "Performance of nonattest services," of AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

SAS No. 108, *Planning and Supervision*	Supersedes SAS No. 1, *Appointment of the Independent Auditor* (AU section 310); and supersedes SAS No. 22, *Planning and Supervision* (AU section 311)
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	Supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	Supersedes SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* (AU section 313); and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling	Amends SAS No. 39, *Audit Sampling* (AU section 350)

Some Key Highlights of the New Risk Assessment Standards

.112 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risk of material misstatement. That understanding should identify risks to your client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to maximum control risk. While this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relates to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what you have previously done. Implementation of the SASs will most likely result in significant changes to your firm's audit methodologies and the training of your personnel. Therefore, it is recommended that you allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessments* (product number 022526kk) at www.cpa2biz.com.

New Companion Audit Guide

.113 In December 2006, the AICPA issued an Audit Guide titled, *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This Guide helps practitioners understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The Guide can be ordered by calling the AICPA at 888-777-7077 or going online at www.cpa2biz.com.

Practice Alert 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.114 In December 2005, the ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). One key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. Footnote 1 to AU section 530.01 of the Standard describes sufficient appropriate audit evidence as "evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that the management has asserted that they have taken responsibility for them." Application of the rules may require revising the process used by your firm at the end of fieldwork to include a field review of the audit workpapers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.115 The purpose of the Practice Alert is to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures—specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.116 Readers may download the AICPA Practice Alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf.

Accounting Issues and Developments

Reporting No Fundraising Expense

.117 Some NPO's with contributions report no fundraising expense. Paragraph 13.34 of the NPO Guide provides that the financial statements should disclose total fundraising expenses. It would be unusual for an NPO to have contributions but have minimal or no fundraising expense.

.118 Examples of circumstances in which an NPO with contributions may have no fundraising expense, or minimal fundraising expense in relation to contributions, include the following:

- A religious organization obtains most or all of its contributions from member tithing.
- Most or all contributions arise from volunteers making phone calls or writing letters on the organization's behalf (and this volunteer activity does not meet the recognition criteria for contributed services in paragraph 9 of Financial Accounting Standards Board (FASB) Statement No. 116, *Accounting for Contributions Received and Contributions Made*).
- An organization has no paid staff and most or all contributions arise from uncompensated board members soliciting contributions (and this board member activity does not meet the recognition criteria for contributed services in Paragraph 9 of FASB Statement No. 116).

.119 The reporting organization is a private foundation or is supported by a private foundation and the reporting organization expends no or minimal resources in soliciting those contributions.

Application of FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*, and FASB Statement No. 159, *The Fair Value Option for Financial Assets or Financial Liabilities—Including an amendment of FASB Statement No. 115*

.120 In February 2007, the FASB issued FASB Statement No. 159 to permit entities to choose to measure many financial instruments and certain other items at fair value at specified election dates. The Statement applies to all entities, including NPOs.

.121 FASB Statement No. 159 creates a fair value option under which an organization may irrevocably elect fair value as the initial and subsequent measure for many financial instruments and certain other items, with changes in fair value recognized in the statement of activities as those changes occur. FASB Statement No. 155 similarly permits an elective fair value remeasurement for any hybrid financial instrument that contains an embedded derivative, if that embedded derivative would otherwise have to be separated from its debt host in conformity with FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities.* An election is made on an instrument-by-instrument basis (with certain exceptions), generally when an instrument is initially recognized in the financial statements.

.122 Most financial assets and financial liabilities are eligible to be recognized using the fair value option, as are firm commitments for financial instruments and certain other items, including certain items arising from arrangements that are not financial instruments. Specifically excluded from eligibility are investments in other entities that are required to be consolidated, employer's and plan's obligations under post-employment, postretirement plans, and deferred compensation arrangements (or assets representing overfunded positions in those plans), financial assets and liabilities recognized under leases, deposit liabilities of depository institutions, and financial instruments that are, in whole or in part, classified by the issuer as a component of shareholder's equity. Additionally, the election cannot be made for most nonfinancial assets and liabilities or for current or deferred income taxes.

.123 FASB Statement No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. Organizations should report assets and liabilities that are measured using the fair value option in a manner that separates those reported fair values from the carrying amounts of similar assets and liabilities measured using another measurement attribute. To accomplish that, an organization should either (*a*) report the aggregate carrying amount for both fair value and non-fair-value items on a single line, with the fair value amount parenthetically disclosed or (*b*) present separate lines for the fair value carrying amounts and the non-fair-value carrying amounts.

.124 FASB Statement No. 159 will be effective as of the beginning of each reporting entity's first FY that begins after November 15, 2007 and should not be applied retrospectively to FYs beginning prior to the effective date, except as permitted in paragraph 30 of the Statement for early adoption.

.125 At the effective date, an entity may elect the fair value option for eligible items that exist at that date. An NPO should report such cumulative-effect adjustment as a separate line item within the changes in the appropriate net asset class or classes in its statement of activities, outside of any performance indicator or other intermediate measure of operations.

.126 For the complete Statement, readers should go to www.fasb.org/pdf/fas159.pdf.

.127 FASB Statement No. 158 improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur as changes in unrestricted net assets of an NPO. It also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.128 All NPOs with single employer defined benefit pension, health, and other postretirement plans are within the scope of FASB Statement No. 158. The Statement includes extensive guidance tailored for NPOs and their reporting requirements. Paragraph 8 of the Statement provides guidance for an NPO that sponsors one or more single-employer defined benefit plans (an NPO employer). Paragraph 9 provides guidance for the measurement date of plan assets and benefit obligations for an NPO employer. The Statement also provides guidance in paragraph 10 on disclosure requirements. Furthermore, Example 3 of Appendix A, "Implementation Guidance," provides guidance for an NPO that sponsors a defined benefit postretirement plan. In addition, paragraph 8 of the Statement provides that NPOs recognize as a separate line item or items within changes in unrestricted net assets, apart from expenses, the gains or losses and the prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost pursuant to FASB Statements No. 87, *Employers' Accounting for Pensions*, and No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*. Consistent with the provisions of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*, FASB Statement No. 158 does not prescribe whether the separate line item or items should be included within or outside an intermediate measure of operations or performance indicator, if one is presented.

.129 An organization without publicly traded equity securities must initially apply the requirement to recognize the funded status of a benefit plan (FASB Statement No. 158, paragraphs 4 and 8) and the disclosure requirements (FASB Statement No. 158, paragraphs 7 and 10) as of the end of the FY ending after June 15, 2007, but the measurement date provision need not be applied until FYs ending after December 15, 2008.

.130 For the complete Statement, readers should go to www.fasb.org/pdf/fas158.pdf.

Application of FASB Statement No. 157, *Fair Value Measurements*

.131 FASB Statement No. 157 defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. The Statement applies under other accounting pronouncements that require or permit fair value measurements. FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made;* FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations;*and FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others* are such accounting pronouncements specific to NPOs where fair value is the relevant measurement attribute. Accordingly, FASB Statement No. 157 does not require any new fair value measurements; however, for some entities, the application of FASB Statement No. 157 will change current practice.

.132 FASB Statement No. 157 does not tell entities how to specifically value assets and liabilities, nor does it tell entities what judgments to make when developing estimates of the inputs that go into valuation techniques.

.133 NPOs should be aware that FASB Statement No. 157 provides guidance pertaining to the effect of donor restrictions on the fair value of assets. Appendix A, "Implementation Guidance," paragraph A30 of FASB Statement No. 157 includes a comprehensive NPO example illustrating this principle (Example 9, *Restrictions on Use of Asset*).

.134 Readers should also be aware that some of the accounting pronouncements within the scope of FASB Statement No. 157 permit practicability exceptions to the requirement to use fair value measurements in specified circumstances. FASB Statement No. 157 does not amend those other pronouncements to eliminate those practicality exceptions. Practicability exceptions that may be of particular interest to NPOs include the following:

- An exemption to the requirement to measure fair value if fair value cannot be measured with sufficient reliability (contributions under FASB Statement No. 116, and AICPA Audit and Accounting Guide *Not-for-Profit Organizations*).
- Paragraph 21 of FASB Statement No. 116 provides that unconditional promises to give that are expected to be collected or paid in less than one year may be measured at net realizable value because that amount results in a reasonable estimate of fair value.

.135 In addition, it should be noted that the FASB has published an index of Statement No. 133 Implementation Issues revised to conform to FASB Statement No. 157. One that specifically relates to NPOs is Statement

No. 133 Implementation Issue B35, "Application of Statement No. 133 to a Not-for-Profit Organization's Obligation Arising from an Irrevocable Split-Interest Agreement."

.136 FASB Statement No. 157 is effective for financial statements issued for FY beginning after November 15, 2007, and interim periods within those FY. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that FY, including any financial statements for an interim period within that FY.

.137 For the complete Statement, readers should go to www.fasb.org/pdf/fas157.pdf.

FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No . 109*

.138 This Interpretation clarifies and expands the accounting and financial reporting for uncertainties related to income taxes. This Interpretation is applicable to all entities, including NPOs. Tax positions taken by any entity that may result in potential future obligations to a taxing authority (for example, IRS or state revenue department) may have to be recorded under this interpretation. Specific types of taxes which may need to be considered include the tax on unrelated business income and the excise tax on private foundation net investment income. FASB Interpretation No. 48 also applies to tax-exempt organizations with net operating loss (NOL) or an NOL carryover for unrelated business income tax purposes, and tax positions taken in allocating expenses through joint venture and other business relationships with taxable entities. NPOs should also note that the term *tax position* as defined in paragraph 4 of FASB Interpretation No. 48 encompasses "a decision to classify a transaction, entity, or other position in a tax return as tax exempt," thereby requiring all tax exempt NPOs to think about events or circumstances that could endanger their tax exempt status and how that would affect the financial statements.

.139 The Interpretation is effective for FY beginning after December 15, 2006. Earlier application is encouraged if the organization has not yet issued financial statements, including interim financial statements, in the period FASB Interpretation No. 48 is adopted.

.140 For additional guidance, the AICPA has issued a Practice Guide about FASB Interpretation No. 48. It is available at www.aicpa.org/fin48guide.

Staff Accounting Bulletin No. 108

.141 On September 13, 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.142 There have been two common methods used to quantify such errors. Under one method, the rollover approach, the error is quantified as the amount by which the current year income statement is misstated. The other common method, the iron curtain approach, quantifies the error as the cumulative amount by which the current year balance sheet is misstated. Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.143 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.144 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was, and continues to be, immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements; however, registrants electing not to restate prior periods should follow the disclosure requirements specified in SAB No. 108. While the guidance outlined in the SAB only specifically applies to public companies and other entities whose financial information is filed with the SEC, nonissuers (private companies) may also consider this guidance when quantifying financial statement misstatements. In general, SAB No. 108 is effective for financial statements for FY ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first FY ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

.145 Since the issuance of SAB No. 108, the FASB has received inquiries about the application of SAB No. 108 to the private sector since they are not bound by SAB No. 108. The inquiries raised concerns that diversity will exist in the private sector relating to the determination of materiality associated with errors caused by the carryover or reversal of prior-year misstatements.

.146 As a result, on March 31, 2007 the FASB staff issued Proposed FASB Staff Position (FSP) Financial Accounting Standards (FAS) No. 154-a, *Considering the Effects of Prior-Year Misstatements When Quantifying Misstatements in Current-Year Financial Statements,* which provides guidance on how to evaluate and account for the correction of errors identified from the quantification of misstatements associated with the carryover or reversing effects of prior year misstatements on current year financial statements. The FASB has stated that private companies should be given the same favorable opportunity as public companies to correct the misstatements without having to restate prior year financial statements. The comment deadline was April 30, 2007. Readers should monitor the progress of the potential FSP by going to www.fasb.org/project/sab_108.shtml.

.147 Furthermore, the AICPA Center for Audit Quality has developed FAQs on Quantifying Financial Statement Misstatements based on discussions with the SEC staff. The FAQs provide much needed clarification for implementing certain aspects of SAB No. 108. To access the complete Center for Audit Quality SAB No. 108 FAQs, go to www.aicpa.org/caq/download/AICPA_SAB_108_FAQ.pdf.

Emerging Issues Task Force Issues and FSPs

.148 The FASB is very active in issuing Emerging Issues Task Force (EITF) Issues and FSPs. Auditors should visit the FASB Web site to stay abreast of these many issues and understand those accounting requirements that may pertain to their client's financial statements. In the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk), you will find a list of selected EITF Issues and FSPs that have been issued recently and have broad interest. Recently issued EITF Issues and FSPs that may be of particular interest to auditors of NPOs are discussed in this section of the Alert.

.149 Some practitioners may inadvertently fail to consider FASB EITF consensus opinions when working on NPO engagements; however, EITF consensus opinions that do not conflict with guidance at levels (a) and

(b) of GAAP are applicable to NPOs. Therefore, we present these EITF Issues for consideration on your engagements. Readers should be aware of the guidance in the following EITF Issues and FSPs.

FSP FAS No. 126-1, "Applicability of Certain Disclosure and Interim Reporting Requirements for Obligors for Conduit Debt Securities"

.150 FSP No. 126-1 clarifies the definition of a *public entity* in certain accounting standards to include entities that are conduit bond obligors for conduit debt securities that are traded in a public market. A number of NPOs, largely in the health care and higher education sector that are obligors on municipal publicly traded bonds issued by a state or local government, will be affected by the issuance of this FSP. In all instances where NPOs enter into conduit debt arrangements, it will be necessary to determine whether the bonds are publicly traded or privately placed for purposes of applying this FSP.

.151 This FSP amends Accounting Principles Board (APB) Opinion No. 28, *Interim Financial Reporting*; FASB Statements No. 69, *Disclosures about Oil and Gas Producing Activities—an amendment of FASB Statements 19, 25, 33, and 39*, No. 109, *Accounting for Income Taxes*, No. 126, *Exemption from Certain Required Disclosures about Financial Instruments for Certain Nonpublic Entities—an amendment of FASB Statement No. 107*, No. 131, *Disclosures about Segments of an Enterprise and Related Information*, No. 132(R) (revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits—an amendment of FASB Statements No. 87, 88, and 106*, and No. 141, *Business Combinations*; and AICPA Audit and Accounting Guides *Health Care Organizations* and *Not-for-Profit Organizations* to include conduit bond obligors in the definition of a public entity or enterprise. The biggest effect for NPOs is likely to relate to FASB Statement No. 132(R).

.152 The guidance in this FSP shall be applied prospectively in fiscal periods beginning after December 15, 2006. An entity may elect to retrospectively apply the guidance to all prior periods. If an entity issues interim financial statements, this FSP shall be applied to the first interim period after the date of adoption.

.153 The FSP can be viewed in its entirety at www.fasb.org/fasb_staff_positions/fsp_fas126-1.pdf.

FSP Authoritative Guidance Audits of Airlines-1, "Accounting for Planned Major Maintenance Activities"

.154 FSP Authoritative Guidance (AUG) Audits of Airlines (AIR)-1 addresses the accounting for planned major maintenance activities. This FSP amends certain provisions in the AICPA Industry Audit Guide, *Audits of Airlines* (Airline Guide), and APB Opinion No. 28. Although the principal source of guidance on the accounting for planned major maintenance activities is the Airline Guide, the methods discussed are widely used by other industries. Accordingly, the guidance in FSP AUG AIR-1 is applicable to entities in all industries. The FSP prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods.

.155 For example, FSP AUG AIR-1 discusses accounting for planned activities that improve the operating efficiency of an asset, comply with regulatory operating guidelines, or extend the useful life of the asset. In compliance with that FSP, NPOs should not use an accrue-in-advance method of accounting for those planned major maintenance activities because they do not embody a present duty or responsibility of the entity until the obligating transaction or event occurs.

.156 FSP AUG AIR-1 is effective for the first FY beginning after December 15, 2006. Earlier adoption is permitted as of the beginning of an entity's FY.

.157 The FSP can be viewed in its entirety at www.fasb.org/fasb_staff_positions/fsp_augair-1.pdf.

FSP EITF Issue No. 00-19-2, "Accounting for Registration Payment Arrangements"

.158 FSP EITF Issue No. 00-19-2 addresses an issuer's accounting for registration payment arrangements. The FSP may be applicable to colleges and universities or other NPOs with conduit debt or bond issuances.

.159 This FSP specifies that the contingent obligation to make future payments or otherwise transfer consideration under a registration payment arrangement, whether issued as a separate agreement or included as a provision of a financial instrument or other agreement, should be separately recognized and measured in accordance with FASB Statement No. 5, *Accounting for Contingencies*. The guidance in this FSP amends FASB Statements No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*, and FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, to include scope exceptions for registration payment arrangements. This FSP further clarifies that a financial instrument subject to a registration payment arrangement should be accounted for in accordance with other applicable GAAP without regard to the contingent obligation to transfer consideration pursuant to the registration payment arrangement.

.160 Readers should refer to the FSP for the effective date and transition guidance. The FSP can be viewed in its entirety at www.fasb.org/fasb_staff_positions/fsp_eitf00-19-2.pdf.

EITF Issue No. 06-2, "Accounting for Sabbatical Leave and Other Similar Benefits Pursuant to FASB Statement No. 43"

.161 EITF Issue No. 06-2 may be of particular interest to colleges and universities. The EITF states that an employee's right to a compensated absence under a sabbatical or other similar benefit arrangement (1) that requires the completion of a minimum service period and (2) in which the benefit does not increase with additional years of service accumulates pursuant to paragraph 6(b) of FASB Statement No. 43 for arrangements in which the individual continues to be a compensated employee and is not required to perform duties for the entity during the absence. Therefore, assuming all of the other conditions of paragraph 6 of FASB Statement No. 43 are met, the compensation cost associated with a sabbatical or other similar benefit arrangement should be accrued over the requisite service period.

.162 EITF Issue No. 06-2 is effective for fiscal periods beginning after December 15, 2006. The EITF can be viewed in its entirety at www.fasb.org/pdf/abs06-2.pdf.

EITF Issue No. 06-3, "How Taxes Collected From Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)"

.163 EITF Issue No. 06-3 is of particular interest for those NPOs that collect and remit significant amounts of sales, use, value added, or excise taxes in associated with their revenue producing activities.

.164 The EITF states that the presentation of taxes within the scope of Issue 1 of the EITF on either a gross basis (included in revenues and costs) or a net basis (excluded from revenues) is an accounting policy decision that should be disclosed pursuant to APB Opinion No. 22. An entity is not required to reevaluate its existing policies related to taxes assessed by a governmental authority as a result of the consensus. In addition, for any such taxes that are reported on a gross basis, an entity should disclose the amounts of those taxes in interim and annual financial statements for each period for which an income statement is presented if those amounts are significant. The disclosure of those taxes can be done on an aggregate basis.

.165 EITF Issue No. 06-3 is effective for fiscal periods beginning after December 15, 2006. The EITF can be viewed at www.fasb.org/pdf/abs06-3.pdf.

Recent Auditing, Attestation, and Quality Control Pronouncements and Related Guidance

.166 Presented here is a list of auditing, attestation, and related guidance issued since the publication of last year's Alert. For information on auditing and attestation standards, quality control standards, and related guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/ASB+Technical+Activities+and+Publications.htm. As a reminder, AICPA auditing and attest standards are applicable only to audits and attestation engagements of nonissuers.

.167 You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA's Auditing Standards team and available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion/.

.168 As necessary, auditors should obtain and understand the complete text of the applicable standards and other guidance. You should visit the applicable Web site for complete information.

Auditing Standards Available on AICPA Web Site

.169 The standards and interpretations promulgated by the AICPA ASB are available free of charge by visiting the AICPA Audit and Attest Standards Team's page at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Authoritative+Standards+and+Related+Guidance+

for+Non-Issuers/default.htm. Members and nonmembers alike can download the auditing, attestation, and quality control standards by either choosing a section of the codification or an individual statement number. You can also obtain copies of AICPA standards and other guidance by contacting the AICPA at (888) 777-7077 or online at www.cpa2biz.com.

Recent AICPA Independence and Ethics Pronouncements

.170 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain that Alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.171 Presented here is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

On the Horizon

.172 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed here) for a complete picture of all accounting and auditing projects in progress. Presented is brief information about some ongoing projects that are especially relevant to the NPO industry. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.173 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/edo/index.htm
Financial Accounting Standards Board (FASB)	www.fasb.org/draft/index.shtml
Governmental Accounting Standards Board (GASB)	www.gasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Overhaul Project—AICPA Audit and Accounting Guide *Not-for-Profit Organizations*

.174 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since the NPO Guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the NPO Guide, updated to reflect recent pronouncements.

Auditing Pipeline—Nonpublic Companies

.175 Readers should keep abreast of the status of the following projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.176 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 411), as amended, for Nongovernmental Entities. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www.fasb.org.

Accounting Pipeline

.177 Presented below are accounting pronouncements currently in the exposure process. Some of the proposed pronouncements discussed in the prior year Alert have not been finalized as of the date of this writing, and are thus included again.

Mergers and Acquisitions by a Not-for-Profit Organization

.178 On October 9, 2006 the FASB issued two exposure drafts intended to improve the accounting and disclosures related to mergers and acquisitions (M&A) by NPOs. The first exposure draft is *Not-for-Profit Organizations: Mergers and Acquisitions*, and the second exposure draft is *Not-for-Profit Organizations: Goodwill and Other Intangible Assets Acquired in a Merger or Acquisition—an amendment of FASB Statement No. 142*. The proposals reflect the Board's commitment to meet the reporting needs of the NPO community and to ensure that financial statement users have access to decision-useful information.

.179 The two exposure drafts propose accounting standards that would produce financial information that is more consistent, comparable, and representationally faithful of the underlying economics of M&A events.

.180 Specifically, the first exposure draft, *Not-for-Profit Organizations: Mergers and Acquisitions,* would eliminate the use of the pooling-of-interests method of accounting by NPOs, in which assets acquired and liabilities assumed are recorded as "carryover" amounts on the books of acquired organizations. This proposal would instead require the application of the acquisition method to all mergers and acquisitions by an NPO. In applying that method, the proposal generally would require that NPOs:

1. Identify one of the parties to the merger as the acquiring party

2. Recognize the identifiable assets acquired and liabilities assumed that compose the business or NPO activity acquired in a merger or acquisition

3. Measure those assets and liabilities at their fair values as of the acquisition date

4. Recognize either goodwill of the acquired business or NPO activity or the contribution inherent in the merger or acquisition as a residual based on the value of the identifiable assets acquired, liabilities assumed, and the consideration transferred (if any)

5. Disclose information to enable users of the financial statements to evaluate the nature and financial effects of the merger or acquisition

.181 The second exposure draft, *Not-for-Profit Organizations: Goodwill and Other Intangible Assets Acquired in a Merger or Acquisition—an amendment of FASB Statement No. 142*, proposes accounting guidance for intangible assets acquired in a merger or acquisition after the merger or acquisition. The proposed guidance is consistent with the accounting for all other acquired intangible assets—whether purchased or donated, or whether acquired individually or as part of a group.

.182 One practical problem readers should be aware of is how to identify the acquirer when the merger appears to be a merger of equals. The *acquirer* is defined in paragraph 4b of the mergers of NPO entities exposure draft as "the organization that obtains control of the acquiree and recognizes the acquiree in its financial statements." Determining whether an organization obtains control of an acquiree would be based on existing guidance, including Statement of Position (SOP) 94-3, *Reporting of Related Entities by Not-for-Profit Organizations* and the Health Care Guide. If an acquirer cannot be determined based solely on that guidance, this proposed Statement would require that the factors provided in paragraph 11 of the exposure draft be considered.

.183 Under this proposal, NPOs would be required to provide:

1. Consistent and comparable information about identifiable intangible assets acquired by NPOs in a merger or acquisition.

2. More representationally faithful and relevant information about events resulting in impairments of goodwill that an NPO has acquired. Goodwill will not be amortized. Goodwill would, however, be subject to an impairment test.

.184 An NPO would be required to apply the provisions in this proposed Statement prospectively in its FY that begins approximately six months after the issuance of a final Statement. For example, if a final Statement is issued on June 30, 2007, its application would be required in FY beginning after December 15, 2007. Earlier application would be encouraged for organizations with annual periods that begin on or after the date a final Statement is issued. The two proposed Statements would be effective at the same time.

.185 For a tentative summary of the decisions reached by the FASB and to access both exposure drafts and comment letters go to www.fasb.org/project/nfp.shtml. The FASB Staff is currently analyzing the comments received from constituents and will begin its redeliberations in the second quarter of 2007. Readers should monitor the progress of these exposure drafts.

Proposed FASB Statements, Business Combinations—a replacement of FASB Statement No. 141, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries—a replacement of Accounting Research Bulletin ARB No. 51

.186 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. Among the main proposals is that:

1. All acquisitions of businesses be measured at the fair value of the business acquired

2. Substantially, all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date

3. Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations

.187 Exposure drafts on business combinations—purchase method procedures and noncontrolling interests—were issued on June 30, 2005. Auditors should visit the FASB Web site for expected issuance dates.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.188 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69; however, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonpublic Companies" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

FASB Project on Derivative Disclosures

.189 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities,* has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, allowing a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft was issued on December 8, 2006, titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment deadline was March 2, 2007. The objective of this project is to provide guidance on enhanced disclosure requirements as well as balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. The proposed disclosures will be effective for both interim and annual reporting periods ending after December 15, 2007, with early application encouraged. At initial adoption, disclosures for earlier periods presented for comparative purposes will be encouraged but not required. Disclosures for earlier periods presented for comparative purposes will be required beginning in the first year after the year of initial adoption. Auditors can monitor the progress of this project on the FASB's Web site.

Exposure Draft of a Proposed SOP, Clarification of the Scope of the Audit and Accounting Guide Audits of Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies

.190 The proposed SOP (referred to hereafter as the Investment Companies Guide SCOPE SOP) provides specific conditions for determining whether an entity is within the scope of the AICPA Audit and Accounting Guide *Investment Companies* (the Investment Guide). For those entities that are investment companies under the Investment Companies Guide SCOPE SOP, the SOP also addresses the retention of the specialized industry accounting for investment companies by a parent company in consolidation or by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity (referred to as an equity method investor).

.191 Readers should be alert to the fact that the Investment Companies Guide SCOPE SOP would reconcile and conform SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations*, and the AICPA

Audit and Accounting Guide *Health Care Organizations* (the Health Care Guide) to clarify that NPOs, including health care NPOs, that are parent companies of, or equity method investors in for-profit entities that apply investment company accounting pursuant to the Investment Companies Guide SCOPE SOP, should consider whether investment company accounting should be retained in the financial statements of the NPO parent company or equity method investor pursuant to the Investment Companies Guide SCOPE SOP.

.192 Specifically, for those entities that are investment companies under the Investment Companies Guide SCOPE SOP, the Investment Companies Guide SCOPE SOP also addresses the retention of that specialized industry accounting by a parent company in consolidation. For example, NPOs with a controlling financial interest in a for-profit entity, through direct or indirect ownership of a majority voting interest in that entity, that applies investment company accounting pursuant to the Investment Companies Guide SCOPE SOP should consider whether investment company accounting should be retained in the financial statements of the parent NPO pursuant to the Investment Companies Guide SCOPE SOP.

.193 Also, for those entities that are investment companies under the Investment Companies Guide SCOPE SOP, the SOP also addresses the retention of that specialized industry accounting by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity. For example, NPOs with investments in the common stock of a for-profit entity that applies investment company accounting pursuant to the SOP, wherein the NPO's investment qualifies for the equity method in conformity with APB Opinion No. 18, should consider whether investment company accounting should be retained in the financial statements of the investor's NPO pursuant to the Investment Companies Guide SCOPE SOP.

.194 Furthermore, Chapter 8 of the NPO Guide permits investment portfolios (other than assets covered by FASB Statement No. 124, which must be reported at fair value) to be reported at fair value in certain circumstances. NPOs that report investment portfolios at fair value in conformity with the NPO Guide would be permitted to continue to do so.

.195 AcSEC expects to issue the SOP in the second quarter of 2007, effective for FY beginning on or after December 15, 2007, with earlier application encouraged. Readers should be alert to the issuance of the final SOP.

AICPA Audit and Accounting Products and Services

AICPA

Web Site

.196 AICPA Online (www.aicpa.org) is the AICPA's Web site on the Internet. The site offers users the opportunity to stay abreast of developments in accounting and auditing. Online resources include professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, exposure drafts, and a list of links to other accounting- and finance-related sites.

Order Department (Service Center Operations)

.197 To order AICPA products, call the AICPA Member Service Center at (888) 777-7077 or fax to (800) 362-5066. The best times to call are 8:30 a.m. to 11:30 a.m. and 2:00 p.m. to 7:30 p.m., Eastern Standard Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Industry Conference

.198 The AICPA National Not-For-Profit Industry Conference will be held on June 19–June 21, 2007, in Washington, D.C. at the Grand Hyatt Washington. For further information, call the AICPA CPE Conference Hotline at (888) 777-7077 or for a detailed brochure, log onto www.cpa2biz.com/conferences.

Accounting and Auditing Technical Hotline

.199 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.200 The AICPA Professional Ethics Team answers inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

AICPA Products of Interest to Not-for-Profit Organizations

.201 The AICPA offers a number of products specific to the NPO industry. Among the available products are the following:

- Paperback, *Using Competition for Performance Improvement: A Resource for Practitioners Advising Governments and Not-for-Profits* (product no. 056507kk)
- Paperback, *Guide to Fraud in Governmental and Not-for-Profit Environments* (product no. 091021kk)
- Paperback, *Using the AICPA Audit and Accounting Guide "Not-for-Profit Organizations"*
- Paperback, *Beyond Vision and Mission—Reaching Operational and Financial Goals in Governments and NPOs* (product no. 056514kk)
- NPO Audit Committee Toolkit available at www.aicpa.org/audcommctr/homepage.htm. A professionally printed soft-cover book version of this Toolkit is also available for purchase (product no. 991004kk).
- *Checklists and Illustrative Financial Statements for Not-for-Profit Organizations* (product no. 008986kk), a nonauthoritative publication designed to help those preparing reports and financial statements of NPOs.
- *Accounting Trends and Techniques—Not-for-Profit Organizations* is a comprehensive Practice Aid (product no. 006616kk) that illustrates a wide variety of financial statement formats and disclosures for NPOs.
- Technical Practice Aids (TPAs) Sections 6140 and 6960 include questions and answers specifically pertaining to NPOs. TPAs are available both as a subscription service and in paperback form (product no. 005145kk).

Continuing Professional Education Courses

.202 The AICPA offers a number of continuing professional education (CPE) courses related to NPOs, many of them available for both group study and self-study. Among the available titles are the following:

- Accounting and Reporting Practices of Not-for-Profit Organizations (product no. 743274kk)
- Form 990: AICPA's Answer to Unlocking the Tax Complexities (product no. 731058kk)

- Clever Cases on Current Complexities Confronting Governments & Not-for-Profits (product no. 731913kk)
- **New!** Religious and Other Faith-Based Nonprofits: Management, Tax, and Accounting (product no. 733170kk)
- Governmental & Nonprofit Annual Update (2007–2008 Edition) (product no. 731933kk)
- Not-For-Profit Organizations Strategic Briefing—2006/2007 CDROM (product no. 780081hskk)
- Fraud in the Governmental and Not-For-Profit Environments: What a Steal! (available in text [product no. 731922kk] and DVD [product no. 180923kk])
- Advanced Accounting and Auditing Problems for NPOs (product no. 731122kk)
- Advanced Auditing of HUD-Assisted Projects (product no. 730192kk)
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 730207kk)
- Audits of HUD-Assisted Projects (product no. 730297kk)
- Analytical Procedures for Nonprofit Organizations (product no. 730223kk)
- Cost Allocation in Nonprofits: Who Gets It (product no. 730415kk)
- Managing Nonprofit Organizations Like a Business (product no. 730345kk)
- Nonprofit Auditing and Accounting Update (2007–2008 Edition) (available in text [product no. 732092kk] and DVD [product no. 182073kk])
- Auditing Nonprofits: Tips and Traps (product no. 731523kk)
- Private Foundations: Mastering the Unique Tax Aspects (product no. 732272kk)
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations (product no. 734410kk)
- Nonprofit Organizations: Guide to Advanced Tax Planning (product no. 736768kk)
- Workpaper Techniques for Government and Nonprofit Organizations (product no. 732635kk)
- The 2007 Revised Yellow Book: Government Auditing Standards (product no. 736115kk)
- Not-for-Profit Accounting & Reporting: From Start to Finish (product no. 732980kk)

.203 For more information about AICPA CPE courses, call the AICPA Member Service Center at (888) 777-7077 or visit the AICPA Web site at www.aicpa.org.

Online CPE

.204 AICPA CPExpress (formerly InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

AICPA reSOURCE: Accounting and Auditing Literature

.205 AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

References for Additional Guidance

.206 Auditors should also be aware of the economic, regulatory, and professional developments that may affect the audits they perform, as described in the AICPA general *Audit Risk Alert—2006/07* (product no. 022336kk), and AICPA *Compilation and Review Alert—2006/07* (product no. 022307kk). These Alerts may be obtained by calling the AICPA Member Service Center at (888) 777-7077 or faxing a request to (800) 362-5066. Obtaining product information and placing online orders can be done at www.cpa2biz.com. The 2007/08 versions of these publications will be issued later this year.

.207 Copies of FASB publications referred to in this document may be obtained directly from the FASB by calling the FASB Order Department at (800) 748-0659.

.208 This Audit Risk Alert replaces *Not-for-Profit Organizations Industry Developments—2006*. *The Not-for-Profit Organizations Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would be appreciated. You may e-mail these comments to ccole@aicpa.org or write to:

Appendix—Useful Internet Web Sites

If used properly, the Internet can be a valuable tool for auditors. Through the Internet, auditors can access a wide variety of global business information. For example, information is available relating to industry statistics, resources for not-for-profit organizations (NPOs) and their finance professionals, professional news, state CPA society information, Internal Revenue Service (IRS) information, software downloads, university research materials, currency exchange rates, stock prices, annual reports, and legislative and regulatory initiatives. Not only are such materials accessible from the computer, but they are available at any time, often free of charge.

A number of resources provide direct information, whereas others may simply point to information inside and outside of the Internet. Auditors can use the Internet to:

- Obtain audit and accounting research information
- Obtain texts, such as audit programs
- Discuss audit issues with peers
- Communicate with audit clients
- Obtain information from a client's Web site
- Obtain information on professional associations

There are caveats to keep in mind when using the Internet. Reliability varies considerably. Some information on the Internet has not been reviewed or checked for accuracy; caution is advised when accessing data from unknown or questionable sources. Although a vast amount of information is available on the Internet, much of it may be of little or no value to auditors. Accordingly, auditors should learn to use search engines effectively to minimize the amount of time browsing through useless information. The Internet is best used in tandem with other research tools, because it is unlikely that all desired research can be conducted solely from Internet sources.

The following listing summarizes the various Web sites of many of the organizations referred to in this Audit Risk Alert, as well as others that auditors of NPOs may find useful.

Name of Site	*Content*	*Internet Address*
American Institute of CPAs	Information for CPAs on accounting, auditing, industry activities, the activities of the AICPA, and other matters	www.aicpa.org
Accountant's Home Page	Resources for accountants and financial and business professionals	www.computercpa.com
Action Without Borders	Includes a directory of NPOs and volunteering resources, a newsletter on NPO issues, job postings and frequently asked questions.	www.idealist.org
American Society of Association Executives	Provides resources to assist association executives and individuals from for-profit companies that provide products and services to the association community	www.asaecenter.org

High-Technology Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
HIGH-TECHNOLOGY INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert is intended to provide auditors of financial statements of the high-technology industry with an overview of recent economic, technical, and professional developments that may affect the audits they perform.

This publication is an Other Auditing Publication, as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply generally accepted auditing standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Technical Manager
Accounting and Auditing Publications

How This Alert Can Help You[1]

.01 This Audit Risk Alert can help you plan and perform your high-technology industry audits. The knowledge delivered by this Alert can assist you in achieving a more robust understanding of the high-technology business environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the high-technology industry and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be read in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022336kk).

[1] This Alert is intended to assist auditors of both public and nonpublic companies. As such, references to AICPA professional standards, that is, generally accepted auditing standards (GAAS) and Public Company Accounting Oversight Board (PCAOB) professional standards, are included. In referring to AICPA professional standards, this Alert cites the applicable sections of the AICPA *Professional Standards* publication. In referring to PCAOB standards, this Alert cites the applicable sections of the AICPA's publication entitled *PCAOB Standards and Related Rules*. In those cases in which the standards of the AICPA and those of the PCAOB are the same, this Alert cites the applicable section of the AICPA *Professional Standards* publication only.

.04 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54 is referred to as AU section 317 of the AICPA *Professional Standards*.

New Auditing, Attestation, and Quality Control Pronouncements, and Other Guidance

.05 Presented below is a list of auditing, attestation, and quality control pronouncements and other guidance issued since the publication of last year's Alert. The AICPA general *Audit Risk Alert—2006/07* (product no. 022336kk) contains a summary explanation of most of these issuances. For information on auditing, attestation, and other standards and guidance issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the Public Company Accounting Oversight Board (PCAOB) Web site at www.pcaobus.org. The PCAOB sets standards for auditors of public companies and other Securities and Exchange Commission (SEC) registrants only. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, "In Our Opinion," issued by the AICPA's Auditing Standards team and available at www.aicpa.org/members/div/auditstd/opinion/index.htm.

AICPA TPA section 1400.32 (June 2006)	*Parent-Only Financial Statements and Relationship to GAAP*
SEC Rules, Regulations, Accounting Bulletins, etc. (Various dates)	Go to www.sec.gov for a complete list of all SEC Guidance.

.08 For summaries of the above standards and other guidance, visit the applicable Web site. To obtain copies of AICPA standards and other guidance, contact Service Center Operations at (888) 777-7077 or go online at www.cpa2biz.com.

Current Economic and Industry Developments

General Industry Trends and Conditions

.09 Worldwide information technology (IT) spending is expected to increase approximately 5.5 percent in 2006, according to IDC, a global market research firm based in Framingham, Massachusetts. IDC estimates that while there will be an increased momentum in software, there will be an offsetting moderation in spending on PCs and peripherals. Forrester Research, Inc. (Forrester) believes that the U.S. IT industry will experience a slight slowdown in 2007 and 2008, but that there will be a revival in tech spending in 2009 and 2010 as companies will have absorbed the previous boom's Internet technologies and will be poised to develop newer technologies.

.10 Lower-cost technology should heighten demand for computer chips, software, and wireless devices, but may also result in slower revenue growth. IDC has forecasted an average of only 6 percent industry growth from 2006 to 2008, as compared to a 10 percent annual rate in the 1990s.

.11 The tech job market has picked up once again despite fears of outsourcing and the fallout from the tech recession. In 2005, approximately 125,000 tech jobs were created, according to Moody's. The industry now appears to be reaching a steady pace of creating an average of 150,000 jobs a year. A series of shocks, including the terrorist attacks on September 11, 2001, the war in Iraq, and the technology industry recession, led companies to cut back spending on labor. Recently, however, a gradual catch-up process has taken place, as revenues and profits within the technology industry have started to increase again.

What Is High Technology, and What Are Its Industry Segment Conditions?

.12 It is difficult to find common ground on the precise definition of the high-technology industry. According to the AEA (formerly known as the American Electronics Association), the high-technology industry is made up of 45 Standard Industrial Classification (SIC) codes. These sectors fall into three broad categories, namely, high-technology manufacturing, communications services, and software and computer-related services.

.13 High technology is a lot like quality—people know it when they see it—but it is not easy to define. This means the definition of the high-technology industry varies greatly depending on the combination of products and services selected to define the industry. For the purposes of this Alert, we will use a definition that segments the industry into five classifications, namely, PCs; semiconductors; mainframes, servers, and storage; networking and telecommunications equipment; and software and services.

Personal Computers

.14 The worldwide PC market performed well in 2005, as PC shipments increased 15.5 percent from 2004. In addition, the Europe, Middle East, and Africa regions surpassed the United States as the largest PC market, based on 2005 shipments, according to Gartner, Inc. Shipments in Europe, the Middle East, and Africa totaled 72.6 million units in 2005, versus shipments to the United States of 67.2 million units.

.15 Worldwide PC shipments totaled 54.9 million units in the second quarter of 2006, which was an 11 percent increase over the same period last year. Demand for mobile PCs remained strong during the first quarter, and demand for desktop PCs also increased, due to renewed price competition by Intel and AMD. However, according to Gartner, the PC industry will experience slower growth overall in 2006. While mobile PC growth remains strong, desk-based PC replacement activity will soon peak and then subside, thereby hurting the overall PC industry's growth potential. Gartner has predicted that worldwide PC shipments will therefore only increase by approximately 11 percent in 2006, as compared to the 15.5 percent growth rate experienced in 2005. IDC has similar expectations. IDC expects worldwide PC shipments to grow 10.5 percent in 2006 over 2005, helped in part by strong sales in emerging markets. IDC further estimates that PC spending will only grow approximately 2 percent in 2006, as price competition continues.

.16 Short product life cycles are a fundamental characteristic of this industry sector. For example, the life cycle of a desktop PC is thought to be two years or less, and it is estimated that up to 50 percent of profits from PCs and related products are generated in the first three to six months of sales. As a result, computer makers face the risk of inventory obsolescence. (See the "Inventory Valuation" section later in this Alert for a discussion of this issue.)

Semiconductors

.17 Worldwide semiconductor revenue totaled $235 billion in 2005, which was a 5.7 percent increase from 2004, according to Gartner; total worldwide semiconductor revenues for 2005 surpassed the industry's previous record of $223 billion, set in 2000. This increase in revenues is largely the result of an increase in popularity of MP3 players, which require flash memory semiconductors. The entire flash memory segment of the semiconductor industry increased 71 percent between 2004 and 2005, according to Gartner.

.18 Gartner expects the semiconductor industry to experience modest growth over the next few years and expects worldwide semiconductor revenue to reach $257.7 billion in 2006. For the second quarter of 2006, worldwide semiconductor sales were $58.9 billion, an increase of 9.4 percent over the same time period last year. As chipmakers such as Intel and AMD have slashed prices on their chips, this price slump was offset by an increase in the total number of PCs sold, and strong demand for cell phones and MP3 players. According to Gartner, however, a slight slowdown in the semiconductor industry is expected in 2007, followed by a cyclical market peak in 2008.

.19 In a sign that the semiconductor industry is maturing, more chip equipment companies are starting to issue dividends or buy back shares of their stock. The industry's largest company, Applied Materials, began issuing a dividend for the first time in company history in the first quarter of 2005.

.20 For electronics and semiconductor manufacturing, approximately 55 percent to 60 percent of the world's outsourcing will be based in China by the end of 2006, according to market research service In-Stat. Semiconductor manufacturers already regard China as very important to their growth; China's semiconductor market is the third largest in the world.

.21 Advances in computing, digital media processing, and wireless technology have enabled the semiconductor industry to create lifestyle-changing devices. PCs still account for the largest proportion of chip demand, although that percentage has decreased in recent years. In the past, governments, the military, and businesses consumed the majority of IT resources. But as consumers buy more of the computing power created each year, IT companies will have to create IT products with features that appeal to consumers. According to Gartner, 45 percent of the semiconductor chips made in the world today are for consumer devices, and, by 2013, consumer devices will account for more than half of semiconductor chips made in the world, thereby outpacing the use of commercial chips.

Mainframes, Servers, and Storage

.22 Worldwide server shipments in 2005 increased 12.7 percent in 2005 as compared to 2004, according to Gartner. Worldwide server revenues grew 4.5 percent in 2005. A good environment for hardware and software replacement and migration is helping fuel new enterprise spending for IT infrastructure, according to IDC analysts. IDC anticipates growing demand in emerging markets, such as Eastern Europe and Asia, as well as in mature markets such as the United States and Western Europe. Worldwide server shipments for the second quarter of 2006 grew 12.8 percent over the same time period last year, according to Gartner.

.23 From a regional perspective, the United States will continue to hold the greatest share of the worldwide server market, followed by Western Europe and Asia and the Pacific Rim (excluding Japan). IDC expects the strongest growth over the next five years to be in Central and Eastern Europe, as well as Asia and the Pacific Rim region.

.24 In terms of products, a key growth area will be the server blade (or modular) market, which is expected to reach $9 billion by 2008. According to Gartner, the blade market continued to remain strong in the first quarter of 2006, with volumes increasing 46 percent over the same period last year. IDC believes the blade computing market is a new area of opportunity for server vendors and will bring dramatic changes to the server landscape while creating new areas of demand for server management, virtualization, network equipment, and clustering.

.25 Servers based on the Linux operating system will have comparable market share numbers in 2008, representing approximately 29 percent of all server unit shipments and about $9.7 billion in revenues. Microsoft Windows-based servers are expected to capture 60 percent of all server unit shipments in 2008 and represent the largest server-operating environment in terms of revenues with $22.7 billion. IDC anticipates Windows and Linux servers combined to total more than 50 percent of server market revenues in 2008, up from just 37 percent in 2003.

.26 Worldwide external controller-based disk storage revenue totaled $3.8 billion in the first quarter of 2006, an 8.6 percent increase over the first quarter of 2005, according to Gartner. The data storage industry has remained very competitive; as new electronic products are becoming more commonplace (for example, cellular phones, digital cameras, and laptop PCs), new markets for the data storage sector have opened up. Hard disk drive and flash memory suppliers have been particularly successful in recent years, due to the proliferation of new consumer electronic devices; these suppliers have experienced improvements in average selling prices and a reduction in excess inventory levels. Market research firm IDC estimates that worldwide shipments of flash memory cards will increase at a compound annual growth rate of 32 percent through 2008.

.27 Data storage companies have attempted to gain market share through cost cutting and new product releases that focus on the low- and mid-range segments of the storage markets. According to IDC, sales of low-end external disk storage systems are expected to grow by more than 23 percent annually through 2009. The industry is also emphasizing research and development (R&D) to help create products with improved functionality and lower cost applications.

.28 Standard and Poor's believes that consolidation within the storage industry will increase. Many storage providers generate and possess large amounts of cash and typically have little or no debt; thus, they have the means to acquire companies that will improve their competitive positioning.

.29 As with other segments of the high-technology industry, there is the potential for rapid inventory obsolescence. As demand for new types of servers and storage systems increases, older types may become obsolete. As a result, you may need to consider an increased level of risk associated with inventory valuations. (For a further discussion, see the section entitled "Inventory Valuation" later in this Alert.)

Networking and Telecommunications Equipment

.30 Worldwide mobile phone sales totaled 816.6 million units in 2005, a 21 percent increase from 2004, according to Gartner. In addition, the six leading vendors of mobile phones increased their market share, to the detriment of smaller vendors. Competition has continued to drive prices down at the low end of the market; at the same time, competition has also spurred new designs and features at the high end of the market. In the second quarter of 2006, mobile phone sales totaled 229 million units, which was an 18.3 percent increase from the same period last year, according to Gartner. Demand for mobile phones in emerging markets such as the Middle East and Africa has increased in recent years. In addition, in more mature markets such as North America and Western Europe, there is a strong upgrade rate as operators continue to offer attractive new devices to replace customers' outdated devices.

.31 *Convergence* seems to be the new buzzword for the wireless telecommunications industry. Cell phones now have increased and multiple functionalities and can now function in sync with, or in place of, PCs and TVs. As various wireless technologies converge on a single mobile device, their use is expected to increase dramatically. According to Forrester, approximately 5 million people in the United States watched video on their cell phones in 2005, and that number could double by the end of 2006. Furthermore, consultancy Informa expects that by 2010, more people worldwide will watch mobile TV broadcasts than there are U.S. TV households today.

.32 Prices of wireless calls continue to drop, as phone companies use price cuts to compete with cable providers. Wireless phone calls are becoming so inexpensive that, consultancy In-Stat predicts, by 2009, one-third of all mobile subscribers will use their cell phones as their primary phones. As per-subscriber phone call revenue keeps dropping, content owners (including record labels, movie studios, and broadcasters) want cell phone service providers who use their content to share revenues. Therefore, wireless carriers have begun outsourcing the creation of new wireless technologies (for example, videos viewed through cell phones) to software developers under a shared revenue/shared business risk model.

.33 In the United States, competition between telecom companies and cable companies continues to intensify, as their service offerings have become increasingly intertwined. For instance, cable companies are beginning to offer inexpensive Internet-based phone services. Telephone companies have argued that cable companies should be subject to the same regulations as telephone companies, but the Federal Communications Commission (FCC) and Congress believe that less regulation for cable will help drive competition.

.34 Internet protocols (IP) that allow telephony and voice communications, will drive voice/data convergence activity in greater than 95 percent of large companies by 2010, according to Gartner. Gartner also estimates that by 2010, 40 percent of companies will have integrated their entire voice and data networks into a single network, and that more than 95 percent of both large and midsized companies will have begun consolidating their networks.

.35 Broadband services continue to gain traction, particularly for the wireless technology known as WiMAX (worldwide interoperability for microwave access). In the United States, it is possible that WiMAX would be universally available by the end of 2007.

.36 Merger and acquisition (M&A) activity has significantly increased over the past few years, as highlighted by several large deals (including SBC's purchase of AT&T, Verizon's purchase of MCI, and Sprint's merger with Nextel). Continued consolidation could lead to higher prices and less competition, or conversely, large companies could invest in new technology that could help small and medium-sized businesses if these smaller businesses can access larger companies' Internet and phone networks. Gartner estimates that by 2009, half of all large network service providers will have merged or been acquired.

.37 Standard & Poor's sees continued growth in telecom's wireless, digital subscriber line (DSL), and long-distance customer bases as a result of bundling efforts. Also, Standard & Poor's expects telecom companies to continue looking outside of their traditional services for growth, by offering higher speed data and video offerings, and take aggressive actions to keep customers loyal.

.38 Standard & Poor's also expects 8 percent to 10 percent industry growth in enterprise networking and telecommunications, as telecom service providers continue to upgrade their communications infrastructure to better handle data and mobile applications. The market's underlying growth driver is the demand for bandwidth, which creates the need for new networks and upgrades to existing networks. As consumers become more interested in higher speed connections and video-on-demand, these applications will drive more demand for bandwidth.

Software and Services

.39 Forrester breaks the U.S. software market into three broad segments:

1. Purchases of commercial software, whether in prepackaged or in customizable forms.
2. Purchases of custom-developed software by IT services companies.
3. The value of internally developed software.

.40 If people think about software today, they primarily think of commercial software from leading software vendors, such as Microsoft, IBM, Oracle, SAP, Computer Associates International, Symantec, Veritas, BMC Software, and Adobe Systems, to name just a few of the largest of thousands of software vendors. Commercial software includes both packaged off-the-shelf software and component-based software that can be configured and customized by the purchaser.

.41 Twenty years ago, custom-developed software still dominated the commercial software segment, especially for enterprise operations and applications. However, the role of custom-developed software has steadily diminished as commercial packaged and semi-packaged software has grown in sophistication and scope. The packaged application software segment is expected to reach more than $120.6 billion in 2009, for a compound annual growth rate of 5.6 percent, according to IDC.

.42 According to Standard & Poor's, the enterprise or corporate software industry should see growth rates only in the mid-single digits for the next few years, due to the fact that no new must-have technologies are seen on the horizon. Enterprise customers now are focused on return on investment when purchasing software, and in this buyers' market, software vendors are facing intense competition and pricing pressure.

.43 The vulnerability of computer systems has become more apparent in recent years, as the threat of terrorist attacks, power outages, computer viruses, and other events that could compromise computer security become more noticeable. Therefore, sales of security software are expected to remain strong in upcoming years; IDC projects a compound annual growth rate of 14 percent through 2009, with revenue exceeding $19.2 billion that year.

.44 M&A activity in the software industry has accelerated in recent years, most notably with the acquisition of PeopleSoft by Oracle, and the merger of Symantec Corp. and Veritas Software Corp. IDC believes that the recent surge in M&A activity will continue, as a result of intense pricing pressure experienced by software companies and because corporate clients are reducing the number of vendors with which they conduct business. However, Standard & Poor's Equity Research Services expects fewer large, multi-billion dollar deals as occurred in past years. Instead, M&A activity will largely be confined to smaller transactions, priced below $1 billion, which will allow the acquirer to take advantage of a complementary technology or specific market segment. The reasons for this shift are that companies are discovering that significant resources and operations are required to derive benefits from large acquisitions, and that customers and investors are sometimes wary of such large deals.

.45 Internet companies are also making a comeback; according to IDC, the percentage of the U.S. population with Internet access rose from 46 percent in 2000 to 71 percent in 2003, and annual growth to 80 percent was expected in 2006. Many domestic Internet companies have been looking abroad for new growth opportunities. There have been some notable acquisitions involving European Internet companies, but Asian Internet companies have remained the main focus of potential acquisitions. It is also expected that as these newly merged companies begin to integrate operations, Internet companies will also spend more money on marketing initiatives and R&D to create new offerings.

.46 Standard and Poor's believes that the Internet is likely to become one of the primary distribution channels for software. The popularity of the Internet has enabled movement away from reliance of proprietary software toward the more cost-effective open source alternative. The open source movement has gained popularity largely due to the growth of the Linux operating system in the enterprise market. Revenues for Linux and other open source alternatives are expected to see a compound annual growth rate ranging from 30 percent for system infrastructure software to 48 percent for application software through 2009, according to IDC.

.47 As technology becomes more complex, computer services have become increasingly more important to the customers of hardware and software companies. The commercial computer services industry includes two subcategories: business services and IT services. Business services include business consulting and business process outsourcing. IT services include application management, system infrastructure, network and desktop outsourcing, project-oriented services, support, and training. For the IT services market, outsourcing is expected to be the fastest growing segment over the next several years, outpacing other segments such as business consulting, support, and training. IDC estimates that overall spending on worldwide IT services will grow at a 7 percent compound annual growth rate through 2009, reaching $803.9 billion. Business process outsourcing is also expected to continue to grow; IDC projects annual growth of that segment of 11 percent through 2009.

Audit Issues and Developments

Assessing Audit Risks in the Current Environment

.48 The proper planning and execution of an audit has always required that auditors have an understanding of the high-technology industry and the nature of the client's business. Auditors of high-technology companies will need to obtain an understanding of the client's products, services, and distribution processes, and the terms and conditions of sales arrangements. Such an understanding enhances the ability to plan and perform auditing procedures. For most audit firms, obtaining this understanding means that the most experienced partners and managers must become involved early and often in the audit process.

.49 You should keep the following points in mind as you plan and perform audits of high-technology clients:

- Understand how your client is affected by changes in the current business environment.
- Understand the stresses on your client's internal control over financial reporting, and the impact on effectiveness.
- Identify key risk areas, particularly those involving significant estimates and judgments.
- Approach the audit with objectivity and skepticism, setting aside prior experiences with or belief in management's integrity.
- Pay special attention to complex transactions, especially those presenting difficult issues of form versus substance.
- Consider whether additional specialized knowledge is needed on the audit team.
- Make management aware of identified audit differences on a timely basis.
- Question the unusual, and challenge anything that does not make sense.
- Foster open, ongoing communications with management and the audit committee, including discussions about the quality of financial reporting and any pressure to accept less than high-quality financial reporting.
- When faced with a "gray" area, perform appropriate procedures to test and corroborate management's explanations and representations, and consult with others as needed.

.50 Specific points to keep in mind with respect to high-technology clients include:

- Consider the inappropriate use of "bill-and-hold" accounting, for example, in circumstances in which the customer has not requested the delay in shipment or provided a ship date that is unreasonably delayed under the circumstances.
- Identify "round-trip" transactions. (See the "Accounting Issues and Developments" section later in this Alert for a detailed discussion of these transactions.)
- Consider nonmonetary transactions.
- Pay attention to whether persuasive evidence of the arrangement exists at the time revenue is recognized and whether legal title to the goods has been transferred and the customer has all the risks and rewards of ownership at that time.
- Consider customers' rights of return, particularly those of distributors, and whether all the requirements of FASB Statement of Financial Accounting Standards No. 48, *Revenue Recognition When Right of Return Exists*, have been satisfied for revenue recognition.

Audit Planning

.51 Guidance for auditors regarding the specific procedures that should be considered in planning an audit, among other matters, is provided in AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1; for audits conducted in accordance with PCAOB Standards: AICPA, *PCAOB Standards and Related Rules*). AU section 311 states that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, organization, and operating characteristics, and consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit. For audits of high-technology companies, you should consider obtaining information relating to:

- The types of products being developed and marketed as well as their corresponding life cycles
- Whether those products are relatively standard or require significant customization
- Whether the company has a practice of allowing customers to return products for new or upgraded models
- Whether the company sells standalone products or a bundle of products and services (that is, multiple-element arrangements)
- The company's current marketing programs, for example, pricing incentives and the nature of any incentives that may affect the timing of revenue recognition
- Whether the company uses a standard form of sales agreement; if standard sales agreements are not used, the processes by which sales agreements are evaluated for propriety of revenue recognition
- Compensation plans for management and sales personnel that may provide an incentive to misstate revenue
- Factors used by stock analysts to value the entity
- The general terms of the company's arrangements with distributors and value-added resellers (VARs), if the company uses them
- The kind of arrangements and warranty provisions the company typically enters into with its end-user customers
- If sales are made internationally, the laws of the local jurisdiction relating to billing, transfer of title, or other items that may affect revenue recognition
- The competitive environment

Risk Assessment Standards

.52 In March 2006, eight Statements on Auditing Standards were issued that provide extensive guidance on how you should apply the audit risk model in the planning and performance of a financial statement audit. These SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006, but earlier application is permitted. You should not underestimate the standards' significant effect on your audits. The eight SASs consist of:

- SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*
- SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards
- SAS No. 106, *Audit Evidence*

- SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*
- SAS No. 108, *Planning and Supervision*
- SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
- SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
- SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling

.53 The ASB believes that the SASs represent a significant strengthening of auditing standards that will improve the quality and effectiveness of audits. The primary objective of the SASs is to enhance your application of the audit risk model in practice by requiring, among other things:

- A more in-depth understanding of your audit client and its environment, including its internal control. This knowledge will be used to identify the risk of material misstatement in the financial statements (whether caused by error or fraud) and what the client is doing to mitigate them.
- A more rigorous assessment of the risk of material misstatement of the financial statements based on that understanding.
- Improved linkage between the assessed risks and the nature, timing, and extent of audit procedures performed in response to those risks.

.54 In most cases, implementation of the new SASs will result in an overall increased work effort by the audit team. It also is anticipated that, to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. To ease the implementation process, it is recommended that firms adopt at least some of the provisions of the standards in advance of the required implementation date.

.55 The AICPA Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) may be helpful in determining the necessary revisions to your audit methodologies. Also, at the end of 2006 the AICPA will issue a companion Audit Guide entitled *Assessing and Responding to Audit Risk in a Financial Statement Audit*. This Guide will help auditors interpret and implement the risk assessment standards. Moreover, the Guide will contain case studies and illustrations. The Audit Guide and Audit Risk Alert can be obtained by calling AICPA Service Center Operations at (888) 777-7077 or by going online at www.cpa2biz.com.

The Competitive Environment

.56 Currently, the high-technology industry is extremely competitive, as discussed in the "Current Economic and Industry Developments" section above. Industry participants use a variety of pricing mechanisms and other product offerings to gain market share and increase their customer base. A number of segments of the industry—most notably, the PC segment—sell what is considered a commodity. If a product is considered a commodity, the primary means of differentiation is price, and it is not unusual for participants in the industry to engage in aggressive pricing practices or offer generous sales concessions to gain or retain market share.

.57 Rapid innovation and substantial technological change also characterize the industry. New industry players and products continuously emerge, and companies are under constant pressure to enhance the capabilities and quality of their products and services. Clients whose products become technologically inferior become vulnerable to customer demands for price or other concessions.

.58 The pressure to meet quarterly or annual earnings targets creates a strong incentive for entities to complete transactions by the end of the reporting period. Customers can take advantage of this desire to meet revenue expectations by forcing companies to lower prices or provide more liberal sales terms in contracts negotiated near the end of a reporting period. For this reason, it is not uncommon for high-technology companies to report a proportionately higher number of sales near the end of a reporting period. This situation generally leads to a greater risk of material misstatement to the financial statements.

Outsourcing

.59 High-tech companies are increasingly outsourcing various business functions, primarily to remain competitive and improve profit margins. Outsourced functions can include finance, accounting, data entry, transaction processing, manufacturing, human resources, and call center operations. Gartner estimates that by 2015, 30 percent of traditional IT services jobs will be handled by people based in emerging markets, such as India, China, Russia, and Brazil.

.60 Such outsourcing may result in less control of business functions, which in turn could result in weakened internal control and security over systems. In addition, the privacy of customer financial and other personal data could be compromised. Also, internal controls are at risk of being weakened by inadequate training at the entity handling the outsourced work.

.61 Auditors should consider and comply with the auditing requirements of AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB Standards: AICPA, *PCAOB Standards and Related Rules*), as amended. In response to the increased legal risks associated with outsourcing significant business activities, auditors should consider complying with the auditing requirements of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1), and AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1).

.62 Auditors of public companies and other issuers should comply with Appendix B of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*), and the related PCAOB Staff Questions and Answers available at www.pcaobus.org.

Impairment or Disposal of Assets

.63 If a high-tech company decides to move a manufacturing plant to an overseas location, certain long-lived assets within the old manufacturing plant may be deemed to be impaired. FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides the primary guidance on accounting for the impairment of long-lived assets. In general, the accounting for the impairment of long-lived assets depends on whether the asset is to be held and used or held for disposal. Long-lived assets to be held and used should be reported at cost, less accumulated depreciation, and should be evaluated for impairment if circumstances indicate that impairment may have occurred. Long-lived assets to be disposed of by sale (assets for which management has committed to a plan of disposal) generally should be reported at the lower of the carrying amount or fair value, less costs to sell.

.64 The movement of a plant to an overseas location likely would be deemed an unusual or infrequent event. Unusual or infrequent (but not both) transactions are to be presented in the income statement as separate elements of income from continuing operations, as required by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*. The presentation should not imply that the amounts are extraordinary items because they would not meet the criteria of being both infrequent and unusual. Clients may present plant closings on the face of the income statement as a component of continuing operations, such as "provision for plant closing." Disclosures stating the effect and nature of the transaction or event can be made in the financial statement footnotes using captions, such as unusual items or nonrecurring items, as well as on the face of the income statement, as stated above.

.65 Assets that are to be abandoned, exchanged for a similar productive asset, or distributed to owners in a spin-off are to be considered as held and used until they are disposed. If the asset is to be abandoned, the depreciable life is revised in accordance with FASB Statement No. 154, *Accounting Changes and Error Corrections*. If the asset is to be exchanged for a similar productive asset or distributed to owners in a spin-off, an impairment loss is to be recognized at the date of exchange or distribution, if the carrying amount of the asset exceeds its fair value at that date.

Accounting for Exit Activities and Personnel Reductions

.66 An increase in the outsourcing of jobs may result in significant reductions in domestic personnel. In such cases, auditors should ensure that they have properly accounted for employee-related termination charges, such as severance packages, voluntary separation charges, fees for outplacement services offered to terminated employees, and bonuses and educational allowances offered to assist employees in finding new jobs.

.67 Accounting literature that may need to be considered when employee layoffs occur includes:

- FASB Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities; the Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred, and establishes that fair value is the objective for initial measurement of the liability.

- FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*. This Statement establishes standards for accounting for curtailments and termination benefits, among other issues. Practitioners should refer to paragraphs 6 through 14 for guidance on curtailments, and paragraphs 15 through 17 for guidance on termination benefits.

- FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*. This Statement requires recording as a loss the effect of curtailments, such as the termination of employees' services earlier than expected. Refer to paragraphs 96 through 99 for guidance on how to account for plan curtailments. The Statement also provides guidance on how to measure the effects of termination benefits in paragraphs 101 and 102.

- FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits—an amendment of FASB Statements No. 5 and 43*. This Statement requires that entities providing postemployment benefits to their former or inactive employees accrue the cost of such benefits. Accrual would occur in accordance with FASB Statement No. 5 when four conditions are met. Inactive employees include those who have been laid off, regardless of whether they are expected to return to work. Postemployment benefits that can be attributed to layoffs can include salary continuation, supplemental unemployment benefits, severance benefits, job training and counseling, and continuation of benefits, such as health care and life insurance. FASB Statement No. 112 does not require that the amount of postemployment benefits be disclosed; however, financial statement disclosure should be made if an obligation for postemployment benefits is not accrued because the amount cannot be reasonably estimated.

- FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits*. This Statement standardizes the disclosure requirements for pensions and other postretirement benefits.

Among other disclosures, the Statement requires the disclosure of the amount of any gain or loss recognized as a result of a settlement or curtailment. Additionally, the cost of providing special or contractual termination benefits recognized during the period and a description of the nature of the event are required to be disclosed.

Expanding Into Nontraditional Areas

.68 High-tech companies that add or expand products, services, and businesses may generate audit risks and risks to themselves. You should consider the following factors if your client is adding or expanding products, services, or businesses:

- Management may lack expertise in the new areas. For example, cable companies may not possess the knowledge and skills needed to manage the business and risk of providing Internet-based phone services. This lack of expertise may contribute to financial statement misstatements and internal control weaknesses. You may want to assess management's level of expertise in the new areas of business and consider that assessment in the determination of your audit procedures.

- Management may not properly implement industry-specific accounting principles related to the new areas. You should determine that proper accounting principles are being applied concerning the new areas of business.

- The accounting, operations, and other systems related to the new areas may lack adequate testing and proper integration with core systems. Thus, these new systems may have inadequate internal control, which may result in unreliable accounting data. You should consider this when planning and performing the audit. Guidance for internal control is provided in AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB Standards: AICPA, *PCAOB Standards and Related Rules*).

- The company may fail to comply with regulations attendant to the new area of business (such as FCC regulations). The company's failure to comply with such regulations may result from unfamiliarity with the regulations and a lack of expertise in the new area. You may want to inquire about the regulations that exist in new business areas (to the extent necessary to perform a proper audit). AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1), describes an auditor's responsibilities regarding violations of laws or governmental regulations.

.69 You may want to assess management's depth and a company's strategic plans when a client enters complicated, new areas of business. If you require the help of a specialist, you should consider the guidance in AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1).

Increased Merger and Acquisition Activity

.70 With M&As of high-tech companies on the rise, auditors may need to refamiliarize themselves with the accounting standards relevant to this area. Additionally, if your audit engagements involve an M&A transaction, you should be prepared to conduct the necessary audit procedures.

Applicable Accounting Guidance

.71 FASB Statement No. 141, *Business Combinations*, addresses financial accounting and reporting for business combinations, including the application of the purchase method, and the accounting for goodwill and other intangible assets acquired.

Possible Internal Control Weaknesses

.72 Subsequent to a merger, management typically reduces personnel and eliminates positions and functions in hopes of saving money and gaining efficiencies. Management may shift personnel to different positions and alter standard operating procedures. By making these changes, however, management may risk creating deficiencies in internal control and in business operations.

.73 You should take these issues into account in your consideration of internal control and your assessment of control risk. These possible gaps and deficiencies in internal control may affect the nature, timing, and extent of audit testing and may represent reportable conditions or weaknesses in internal control that should be communicated to management and the audit committee. Auditors should refer to the guidance set forth under AU section 319.

Increased Fraud Risks

.74 Employees may have an increased opportunity to commit fraud when entities merge. With major changes in the company's operations, there may be breakdowns in internal control, including the poor segregation of duties and a lack of supervisory reviews, which employees can take advantage of by committing fraud. Furthermore, the bitterness that can follow a merger may trigger some employees to rationalize that the commission of fraud is justified. You should refer to the guidance set forth in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB Standards: AICPA, *PCAOB Standards and Related Rules*), when assessing the risk of fraud.

Spring Loading and Premerger Outlays

.75 An entity acquiring another entity may try to worsen the reported financial performance of the purchased company during the period immediately preceding the acquisition date, the *stub period*. By worsening the financial performance of the acquired company before the acquisition, management will find it much easier to report "improved" performance after the acquisition, thus demonstrating the positive effects of the business combination and providing an increase in reported earnings. This practice is often referred to as *spring-loading*. Generally, the practice involves accelerating the purchased company's payment of payables and other obligations, and writing down investments and other assets on the purchased company's books. Some of these practices, such as paying down payables, may not necessarily violate the letter of any generally accepted accounting principles (GAAP) standard. However, other financial engineering techniques do violate GAAP because they may involve the deliberate inflation of reserves and allowances recorded on the acquired company's books. These inflated reserves are then reversed in the period following the acquisition providing a generous burst of earnings growth. Accounts that can be manipulated in this manner include:

- Reserves for merger costs
- Inventory obsolescence allowance
- Pension allowances
- Restructuring reserves
- Reserves for workers' compensation and medical insurance

You should be on the lookout for these kinds of accounting practices and determine that the appropriate accounting treatment in accordance with GAAP is being followed.

.76 AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB Standards: AICPA, *PCAOB Standards and Related Rules*), says the successor auditor must obtain sufficient competent evidential matter to afford him or her a reasonable basis for expressing an opinion of the financial statements under audit, including the opening balances. The predecessors' working papers alone are not sufficient evidential matter. The successor must use his or her judgment and evaluate the results of those working papers as they pertain to the opening balances. The successor also should consider other audit evidence available, such as the predecessor audit report, the results of inquiries with the predecessor auditor and audit procedures performed in the current year's engagement that may provide evidence about opening balances or consistency. Also, the successor may apply procedures to the account balances at the beginning of the period, such as vouching for fixed assets from prior years.

Compliance With the Sarbanes-Oxley Act

.77 Management of public companies may fail to consider the effect of the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley) and related SEC regulations on the merger. For example, a company may encounter a serious challenge if it acquires a privately held company that has not had to comply with Sarbanes-Oxley. Necessary internal controls may not be in place at the acquired entity. Auditors of public companies need to pay special attention to the proper compliance with Sarbanes-Oxley at the acquired entity and should consider the guidance contained in PCAOB Auditing Standard No. 2.

Revenue Recognition

.78 Revenue recognition continues to pose significant audit risk to auditors. The high-technology industry is one of the more challenging industries when it comes to the topic of revenue recognition.

.79 The SEC sought to fill the gap in the accounting literature with Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, which was issued in December 1999, and the companion document, *Revenue Recognition in Financial Statements—Frequently Asked Questions and Answers*, which was issued in October 2000. SAB No. 101 was superseded by SAB No. 104, *Revenue Recognition*, in December 2003. SAB No. 104 states that if a transaction falls within the scope of specific authoritative literature on revenue recognition, that guidance should be followed; in the absence of such guidance, the revenue recognition criteria in FASB Statement of Financial Accounting Concepts No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*. The criteria, namely, that revenue should not be recognized until it is (*a*) *realized or realizable* and (*b*) *earned*, should be followed. However, SAB No. 104 is more specific, stating additional requirements for meeting those criteria, and reflects the SEC staff's view that the four basic criteria for revenue recognition in AICPA SOP 97-2, *Software Revenue Recognition*, should be a foundation for all basic revenue recognition principles. Those criteria are:

- Persuasive evidence of an arrangement exists.
- Delivery has occurred.
- The vendor's fee is fixed or determinable.
- Collectibility is probable.

.80 The SEC continues to see instances of questionable and inappropriate revenue recognition practices. Significant issues encountered recently include:

- Complex arrangements that provide for separate, multiple deliverables (for example, multiple products and/or services), at different points in time, during the contract term.
- Nonmonetary (for example, barter) transactions in which fair values are not readily determinable with a sufficient degree of reliability.

.81 The SEC has requested that the Emerging Issues Task Force (EITF) address certain of these issues to clarify the application of GAAP in these transactions. However, the SEC staff generally believes that the existing accounting literature provides analogous guidance for a number of these issues, including SOP 97-2; APB Opinion No. 29, *Accounting for Nonmonetary Transactions*; SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*; FASB Concept Statement No. 5; and FASB Concept Statement No. 6, *Elements of Financial Statements*.

.82 In an industry as varied as high technology, invariably there will be significant differences among companies regarding the types of products and services sold, and how they are sold. Characteristics of high-technology revenue transactions that may affect revenue recognition include the following:

- *Bundled sales.* The bundling of installation or other services with product sales can complicate the revenue recognition process.
- *Indirect versus direct selling.* Many high-technology companies use a combination of direct sales with a network of VARs and distributors to sell their products to end users. Sales made through distributors, as well as significant single sales, often can have unique, nonstandard terms. It is common for high-technology companies to provide incentives or sales concessions to their VARs and distributors that go beyond the rights of return granted to end users. Many of the incentives and concessions raise revenue recognition issues.
- *Bill-and-hold sales.* It is not uncommon for high-technology companies to enter into bill-and-hold transactions. In a bill-and-hold transaction, a customer agrees to purchase the goods but the seller retains physical possession until the customer requests shipment. Normally, such an arrangement does not qualify as a sale because delivery has not occurred.
- *International sales.* High-technology companies may make sales in non-U.S. legal jurisdictions. The laws in these jurisdictions relating to product sales can vary significantly from U.S. laws. For example, some countries may prohibit the billing for goods until delivery occurs or may have rules regarding transfer of title that may be significantly different from U.S. rules.
- *Licensing Arrangements.* During the tech downturn, software vendors were willing to relax the terms of the licensing agreements, in order to hold on to their customers. However, as corporate spending on software has increased, licensing fees have also increased, and now are, on average, 20 percent of the purchase price of an application. Software vendors are now paying closer attention to the terms of their licensing agreements with customers, and are now more willing to confront late-paying customers. Gartner believes that the cost of software licenses could increase by 50 percent by 2006. You may need to pay close attention to the terms of licensing agreements, and the revenue recognized as a result of licensing fees.

AICPA's Audit Guide on Revenue Recognition

.83 The AICPA Audit Guide *Auditing Revenue in Certain Industries* (the Guide) assists auditors in auditing assertions about revenue in selected industries not covered by other AICPA Audit and Accounting Guides. You can look to this Guide for descriptions and explanations of auditing standards, procedures, and practices as they relate to auditing assertions about revenue in both the computer software and high-technology manufacturing industries.

.84 This Guide:

- Discusses the responsibilities of management, boards of directors, and audit committees for reliable financial reporting.
- Summarizes key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP.
- Identifies circumstances and transactions that may signal improper revenue recognition.
- Summarizes key aspects of the auditor's responsibility to plan and perform an audit under GAAS.
- Describes procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition.

.85 You can order the AICPA Audit Guide *Auditing Revenue in Certain Industries* (product no. 012516kk) from the AICPA at (888) 777-7077 or go online at www.cpa2biz.com.

Inventory Valuation

.86 The primary literature on inventory accounting is Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*, as amended, Chapters 3A and 4, which provide the following summary:

> Inventory shall be stated at the lower of cost or market, except in certain exceptional cases when it may be stated above cost. Cost is defined as the sum of the applicable expenditures and charges directly or indirectly incurred in bringing inventories to their existing condition and location. Cost for inventory purposes may be determined under any one of several assumptions as to the flow of cost factors (such as first-in, first-out; average; and last-in, last-out).

.87 Whether inventory is properly stated at lower of cost or market can be a very significant issue for high-technology audit clients because of the rapid changes that can occur in many areas of the industry, and the need for entities to keep up with the newest technology. Examples of factors that may affect inventory pricing include:

- A competitor's introduction of a technologically advanced version of the product that may decrease the salability of a client's products.
- Changes in the products promoted by the industry as a whole, such as a shift from analog to digital technology, which may affect salability.
- Changes in foreign economies that could result in situations such as a slowdown of sales to that region or lower priced imports from that region.
- Changes in technology to produce high-technology products that can give competitors a selling-price advantage.
- Changes in regulations that could affect the competitive environment.
- The entity's own product changes that may not be well researched as a result of the pressure to introduce new products quickly, resulting in poor sales or high returns.

.88 The highly competitive environment and the rapid advancement of technological factors contribute to the common problem of rapid inventory obsolescence in the high-technology industry. As such, you should consider whether the carrying amount of inventories is appropriate.

.89 You can look at many factors in determining the proper valuation of inventories. A few examples of factors that may be useful include the following:

- Product sales trends and expected future demand
- Sales forecasts prepared by management as compared with industry statistics
- Anticipated technological advancements that could render existing inventories obsolete or that could significantly reduce their value
- Inventory valuation ratios, such as gross profit ratios, inventory turnover, obsolescence reserves as a percentage of inventory, and days' sales in inventory
- New product lines planned by management and their effects on current inventory

- New product announcements by competitors
- Economic conditions in markets in which the product is sold
- Economic conditions in areas in which competitive products are produced
- Changes in the regulatory environment
- Unusual or unexpected movements, or lack thereof, of certain raw materials for use in work-in-process inventory
- Levels of product returns
- Pricing trends for the type of products sold by the client
- Changes in standards used by the industry

.90 These are not the only issues of importance to consider. You may need to address many other issues, including the client's taking of physical inventories in high-technology entities. Consider guidance set forth in AU section 331.09–.13, *Inventories* (AICPA, *Professional Standards*, vol. 1). Among the issues for your consideration are the following:

- When addressing a number of difficult types of inventory, such as chemicals used in the process, you may need to take samples for outside analysis. The work of a specialist may also be needed, in which case you should follow the guidance set forth in AU section 336.
- The extent to which raw materials have been converted to work-in-process will need to be determined to assess the value of the work-in-process.
- Indications of old or neglected materials or finished goods need to be considered in the valuation of the inventory.
- The client's inventory held by others, as well as field service inventories for use in servicing the client's products, will need to be considered.

.91 In addition, the SEC staff believes that inventory reserves create a new cost basis and thus cannot be subsequently reversed into income as a change in estimate if, for example, demand were forecasted to pick up and thereby a previously established excess and obsolete inventory reserve were deemed no longer necessary.

.92 There are also risks posed by the use of contract manufacturers. In many of those circumstances, the hardware vendor will provide the contract manufacturer with a guarantee against its loss due to excess raw material inventory (and, possibly, against the value added in the manufacturing or assembly process) that would occur if the vendor were to reduce purchases beyond a certain point. Such a guarantee may represent a contingent loss that needs to be recognized or disclosed under FASB Statement No. 5. The disclosure requirements of FASB Statement No. 47, *Disclosure of Long-Term Obligations*, also need to be considered.

Foreign Currency Hedges

.93 The multinational nature of the computer hardware industry means that companies within this industry can be greatly affected by changes in the dollar's value versus other currencies. Revenues can be affected if the company generates a significant portion of its sales from outside the United States, and expenses can also be affected if the company has a significant operating presence in international markets. The increasing level of global exposure can often cause wide variations in these companies' operating results. To limit the financial risk associated with these currency fluctuations, companies are therefore increasing their usage of hedging techniques, according to Standard & Poor's. However, it is still important to understand both the net impact of currency swings on reported financial statements and the actual level of business activity on a constant currency basis.

Accounting Issues and Developments

Revenue Recognition

Income Statement Classification

.94 The appropriate classification of amounts within the income statement or balance sheet can be as important as the appropriate measurement or recognition of such amounts. In the current environment, an auditor may need to be particularly concerned about income statement misclassifications designed to increase reported revenue (for example, reporting agency transactions on a gross basis and showing sales discounts as a marketing expense rather than a revenue reduction). Several EITF consensus provisions provide guidance on the proper classification of certain revenue and expense items. For example, consider the following:

- EITF Issue No. 99-17, "Accounting for Advertising Barter Transactions"
- EITF Issue No. 99-19, "Reporting Revenue Gross as a Principal versus Net as an Agent"
- EITF Issue No. 00-10, "Accounting for Shipping and Handling Fees and Costs"
- EITF Issue No. 00-14, "Accounting for Certain Sales Incentives"
- EITF Issue No. 00-25, "Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products"
- EITF Issue No. 01-9, "Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)"
- EITF Issue No. 02-16, "Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor"
- EITF Issue No. 03-10, "Application of EITF Issue No. 02-16 by Resellers to Sales Incentives Offered to Consumers by Manufacturers"

.95 SEC registrants should apply the guidance provided in SEC Regulation S-X regarding classification of amounts in financial statements.

Round Tripping

.96 Round tripping is another technique used to artificially inflate revenues and has appeared in several restatement scenarios. It involves transactions in which the company sells products and services to the same entity from which it buys products and services. Often, the transactions occur in close temporal proximity and completing one transaction is dependent on completing the other. The fair value of both transactions may be overstated such that the company can report higher revenue at the "cost" of increased expenses. In addition, the products and services purchased back may not be used in the same period the revenue is recognized, resulting in more than a basic incorrect grossing-up of the income statement.

Nonmonetary or Barter Transactions

.97 Abuses in the area of nonmonetary or barter transactions have also been a focus of several recent restatements. It is very common for telecommunications companies to "swap" network capacity; some of these companies in the past may have inappropriately inflated their operating results by recognizing revenue for the network capacity sold, and recording a long-term fixed asset for the capacity purchased. In order for a network capacity swap transaction to be appropriately accounted for as revenue and a capital expenditure at fair value:

- The network capacity received in the exchange cannot be sold in the same line of business as the network capacity given up in the exchange.
- The network capacity received must be a productive asset that is dissimilar to the network capacity given up.
- There must be determinable fair values of the assets exchanged.

Capacity swap arrangements typically include complex terms that require professional judgment to determine proper accounting treatment.

.98 Other principle issues for barter transactions are whether there is a legitimate business purpose for the transaction and whether there is sufficient objective evidence of fair values. Also of concern are "disguised" barter transactions that escape analysis because of the presence of "boot" or as a result of a time lapse between transactions that are, in fact, negotiated together. Abuses are seen most often in situations in which there is little hard inventoriable cost associated with the deliverables.

.99 In December 2004, the FASB issued FASB Statement No. 153, *Exchanges of Nonmonetary Assets—an amendment of APB Opinion No. 29*, which affected the accounting for nonmonetary exchanges. APB Opinion No. 29 provided an exception to the basic measurement principle (fair value) for exchanges of similar productive assets; such exception required that some nonmonetary exchanges, although commercially substantive, be recorded on a carryover basis. FASB Statement No. 153 eliminates the exception to fair value for exchanges of similar productive assets and instead creates a general exception for exchange transactions that do not have commercial substance—that is, transactions that are not expected to significantly change the cash flows of the reporting entity. By focusing the exception on exchanges that lack commercial substance, the FASB believes this financial reporting more faithfully represents the economics of the transactions.

Telecommunications Industry Purchase and Sale Agreements

.100 The expansion of fiber optics communications has increased the frequency of transactions involving the "sale" of network capacity. The granting of the right to use such capacity for a defined period of time is often referred to as an *indefeasible right of use* (*IRU*). Accounting by the purchaser of the network capacity is fairly straightforward: The amount paid for the capacity would be recorded as an asset, and that asset would be amortized over the term of the agreement. For the provider of the capacity, however, the question of when to recognize revenue can become rather complex.

.101 The first step in determining when to recognize revenue is to evaluate whether the contract is a lease or an arrangement to provide a service. To the extent that a network capacity contract grants to the purchaser the right to use specific assets for a period of time, providers of the capacity have concluded that such a contract meets the definition of a lease. If the purchaser is not granted the right to use specific identifiable assets, the contract is considered to be an arrangement for the provision of services. Under GAAP, revenue generated from long-term service contracts is typically recognized over time as performance occurs.

.102 For capacity contracts that meet the definition of a lease, the appropriate lease classification must then be determined (for example, a sales-type lease or an operating lease). For a network capacity transaction to be appropriately classified and accounted for as a sales-type lease, certain criteria must be met; otherwise, the transaction must be classified as an operating lease. Such criteria differ depending on whether the leased asset is considered equipment or real estate. A lease of real estate must transfer title to the lessee in order to be classified as a sales-type lease by the lessor; however, equipment leases need not transfer title in order to be classified and accounted for as sales-type leases. In addition, FASB Interpretation No. 43, *Real Estate Sales*, which provides interpretive guidance on the definition of real estate for accounting evaluations, states that assets subject to telecommunications capacity agreements are to be treated as real estate for accounting purposes. Prior to this Interpretation, the assets subject to telecommunications capacity agreements were generally viewed as equipment, and such agreements were therefore classified as sales-type leases.

.103 In addition, as the industry has evolved, many capacity arrangements have become more flexible and no longer grant the purchaser the right to use identifiable assets for a specific period of time. Such contracts are not considered to be leases, but are instead considered contracts for the provisions of services. Therefore, sales-type lease accounting may not apply for more recent capacity contracts.

Quantifying Financial Statement Misstatements

.104 On September 13, 2006, the SEC released SAB No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.105 There have been two common approaches to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effect of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.106 The SEC staff believes that registrants must quantify the impact of correcting all misstatements, including both the carryover and the reversing effects of prior year misstatements, on the current year financial statements. The staff believes that this can be accomplished by quantifying errors under both a balance sheet and income statement approach, and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require an adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.107 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

Employee Stock Options

.108 Knowledgeable workers are the prime assets of high-technology businesses and are the key to wealth creation. Accounting for their compensation sometimes raises difficult accounting issues if high-technology companies include stock options in employee compensation packages. High-technology companies grant stock options to essential employees to attract, motivate, and retain them, in addition to granting stock options, awards of stock, or warrants to consultants, contractors, vendors, lawyers, finders, lessors, and others. Issuing equity instruments makes a lot of sense, partly because of the favorable accounting treatment and partly because the use of equity conserves cash and generates capital.

.109 In reaction to increased scrutiny from the press, Congress, regulators, and others, the FASB issued a revised standard, FASB Statement No. 123(R), *Share-Based Payment*, in December 2004. The Statement addresses the accounting for employee stock options. It also addresses the accounting for transactions in which a company incurs liabilities that are based on the fair value of the company's equity instruments or that may be settled by issuing equity instruments in exchange for employee services. The Statement only affects employee stock options (and related liabilities); it does not affect the accounting for similar transactions involving parties other than employees. It also does not affect the accounting for employee stock ownership plans (ESOPs), which are subject to SOP 93-6, *Employers' Accounting for Employee Stock Ownership Plans*. Generally, the approach in the Statement is similar to the approach described in FASB Statement No. 123, *Accounting for Stock-Based Compensation*. However, the Statement requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values.

.110 The main purpose of this Statement is to recognize the cost of employee services received in exchange for equity instruments and related liabilities in an entity's financial statements. Key provisions of the Statement are as follows:

- For public entities, the cost of employee services received in exchange for equity instruments is measured using the fair value of those instruments on the grant date. The compensation cost is then recognized over the requisite service period (usually the vesting period). Generally, no cost is recognized if the equity instruments do not vest.
- For public entities, the cost of employee services received in exchange for liabilities is measured at the fair value of the liabilities initially, then remeasured at each reporting date through the settlement date. The pro rata change in the fair value of the liability during the requisite service period is recognized over that period. After the requisite service period is complete, the change in fair value is recognized in the financial statements in the period of the change.
- On the grant date, the estimated fair value of employee stock options and similar instruments is determined using options pricing models (unless observable market prices are available).
- If an equity award is modified after the grant date, incremental compensation cost is recognized. This amount is the difference between the fair value of the modified award and the fair value of the original award immediately before the modification.
- If the terms of employee share purchase plans are no more favorable than those available to all holders of the same class of shares, and substantially all employees can participate on an equitable basis, those plans are not considered compensatory.
- Excess tax benefits, as defined by the Statement, are treated as additional paid-in capital. Cash retained as a result of those benefits is reported in the statement of cash flows as cash from financial activities. The write-off of deferred tax assets as a result of unrealized tax benefits associated with recognized compensation is reported as income tax expense.
- The Statement allows nonpublic companies to elect to use the intrinsic method to measure the cost of employee stock options and similar instruments, as well as liability instruments. Public companies may also use the intrinsic method if it is not reasonably possible to estimate grant-date fair value.
- The notes to the financial statements of all entities should include information that users need to understand the nature of employee stock options and similar instruments and the effect those instruments have on the financial statements.

.111 The SEC issued SAB No. 107, *Share-Based Payment*, in April 2005, to help public companies implement the provisions of FASB Statement No. 123(R). The SAB does not alter any conclusions in FASB Statement No. 123(R), but states that amounts represented in financial statements for stock option expenses are highly judgmental estimates. For example, because the grant-date fair value estimate required by FASB Statement No. 123(R) is not intended to predict the ultimate value realized by an option holder, the staff will not object to reasonable fair value estimates made in good faith, even if subsequent events indicate other estimates would have been more accurate. See the SEC Web site at www.sec.gov/interps/account/sab107.pdf for complete information.

.112 Some tech companies have chosen to accelerate the vesting periods of their stock options to avoid expensing the options. Some have also cut back on the number of options they grant, to limit the dilution caused by the granting and exercising of large blocks of options. Others have started granting restricted stock in place of granting stock options.

.113 You should continue to discuss the implications of this Statement with your high-technology clients. For information on this Statement and other accounting standards issued subsequent to this Alert, please refer to the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Backdating and "Spring-Loading" of Stock Options

.114 In 2006, one of the accounting issues that bubbled up was the issuance of stock option grants to executives and other employees, and the timing of those issuances. As of September 2006, the SEC had over 100 companies under investigation for backdated stock options.

.115 When options are backdated, the grant date for an award is set to an earlier date with a lower strike price, than the day on which the option was actually approved. As the stock rises, the value of the options likewise rises, thereby giving executives a potential gain on their options when they vest.

.116 Most back-dating of options occurred five to ten years ago, when issuing options as a form of compensation became popular among tech companies. However, new rules mandated by the Sarbanes-Oxley Act of 2002 largely put an end to the use of back-dating, as public companies are now required to report option grants within two business days. Many of the options issued that were back-dated, though, are still outstanding. Additionally, certain option granting practices that have a financial reporting consequence may have continued even after 2002.

.117 One area of concern is whether the options were tax deductible or not when granted. Nonqualified options are considered incentive compensation, and generally the difference between the strike price and the fair market value at date of exercise is ordinary income to the employee and an equal deductible expense by the employer at the date of exercise. Accordingly for tax purposes, back-dating a nonqualified option to garner a more favorable exercise price generally has the effect of the employee reporting more income and the company taking a greater deduction at the exercise date.

.118 The rules are different and the effect of back-dating is different if the option is intended to qualify as an incentive stock option (ISO). The employer does not receive a deduction, and the employee does not report income for either the grant or exercise of a qualified ISO. (Note, however, for alternative minimum tax purposes, the difference between the strike price and fair market value at date of exercise is a preference item in the year of the exercise.) However, if back-dating results in a strike price of less than 90 percent of the fair market value of the stock at the date of grant, the ISO is disqualified and for tax purposes is treated as a nonqualified option, as discussed above.

.119 Another area of concern is whether the income statement prepared in accordance with GAAP reflects the appropriate measurement of stock option compensation expense. According to a letter issued from the Office of the Chief Accountant of the SEC dated September 19, 2006 (the SEC letter), which summarizes the staff's views regarding the accounting for stock options, the measurement date for determining the cost of a stock option is the first date on which both of the following are known: (*a*) the number of options that an individual employee is entitled to receive and (*b*) the option or purchase price. Therefore, dating the underlying stock option grant documents as of a date prior to the date on which the terms of the award and its recipient are determined does not affect the appropriate measurement date under APB Opinion No. 25, *Accounting for Stock Issued to Employees*, which was the accounting standard in effect at the time backdating was done. Readers can access the SEC letter at http://www.sec.gov/info/accountants/staffletters.shtml.

.120 The SEC letter also states that if a company operated as if the terms of its awards were not final prior to the completion of all required granting actions (such as by changing the option terms), the staff believes the company's measurement date for all of its awards (including those awards that were not changed) would be delayed until the completion of all required granting actions.

.121 Companies that have engaged in backdating could face penalties and fines from the IRS and SEC, and may owe back taxes. They also may have to restate their financial statements, to reflect the proper amount of compensation expense that resulted from the issuance of the backdated options.

.122 With the explosion of option grants in the mid-1990s, "spring-loading" also became a common form of compensation, especially for high-tech companies. Spring-loading is the intentional issuance of option awards just ahead of positive company news that is likely to raise the price of the stock. Therefore, once the news is released, executives can see the value of their options increase. Currently, legal opinions differ regarding the legality of spring-loading, and companies and their auditors should be aware of the legal issues that could arise from spring-loading.

.123 According to the SEC letter, questions have also been raised as to whether companies who engage in option timing techniques would need to adjust the market prick of the stock at the measurement date to accurately measure compensation cost. It is the SEC staff's view that compensation cost must be computed on the measurement date by reference to the unadjusted market price of a share of stock of the same class that trades freely in an established market, in accordance with APB Opinion No. 25.

.124 You should pay close attention to the timing of option grants when conducting your audit. Particular attention should be paid to one-time grants that appear out of sync with earlier awards, especially if such grants were issued just ahead of positive company news.

.125 You should also ensure that the proper controls are in place to prevent option grant abuses such as backdating. For instance, the board of directors should set the date and price of all option awards they approve, and this information should be reflected in the board minutes. Boards should also ensure that SEC form 4 is filed within two business days of the option grant. To remove any suspicion of backdating or spring loading, companies should also consider instituting a policy whereby options are only granted at set times during the year. You should also be aware of the risks if option granting authority is delegated to management.

.126 PCAOB Practice Alert No. 1, "Matters Relating to Timing and Accounting for Options Grants," discusses factors that may be relevant to auditors in assessing the risks related to the timing of option grants. This Practice Alert provides detailed auditing guidance related to this issue and can be obtained at www.pcaobus.org/news_and_events/news/2006/07-28_release.pdf.

Research and Development Costs

.127 As noted in last year's Alert, ongoing innovation is the heart of competition in the high-technology industry and is required for survival. Consequently, most high-technology companies devote a substantial portion of their resources to R&D activity. According to paragraphs 8a and 8b of FASB Statement No. 2, *Accounting for Research and Development Costs*:

> *Research* is planned search or critical investigation aimed at discovery of new knowledge with the hope that such knowledge will be useful in developing a new product or service...
>
> *Development* is the translation of research findings or other knowledge into a plan or design for a new product or process...whether intended for sale or use.

.128 High-technology management may reduce net loss or increase earnings by capitalizing R&D costs, which are significant for many companies in the high-technology industry. However, FASB Statement No. 2, as interpreted by FASB Interpretation No. 4, *Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method*, prohibits capitalization and requires R&D to be expensed when incurred, except for acquired R&D with alternative future uses purchased from others. In addition to the requirement to expense internal R&D, FASB Statement No. 2 requires disclosure in the financial statements regarding the total amount of R&D costs charged to expense.

.129 Some high-technology companies acquire their assets through M&As. One purpose of these business combinations is to acquire in-process R&D. You may need to hire a technology specialist to determine which acquired technology objects have alternative future uses. For clients with technology with alternative future uses, you should verify that they are properly valued and capitalized.

.130 The AICPA Practice Aid, *Assets Acquired in a Business Combination to Be Used in Research and Development Activities: A Focus on Software, Electronic Devices, and Pharmaceutical Industries* (product no. 006609kk), may be helpful in valuing these intangible assets. The Practice Aid can be obtained by calling AICPA Service Center Operations at (888) 777-7077 or by going online at www.cpa2biz.com.

On the Horizon

.131 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all accounting and auditing projects in process. Presented below is brief information about some ongoing projects that may be relevant to your high-technology engagements. Refer to the AICPA general *Audit Risk Alert—2006/07* (product no. 022336kk) for additional summaries of some of the more significant ongoing projects and exposure drafts outstanding. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP, GAAS, or PCAOB Standards.

.132 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts and from which copies of exposure drafts may be downloaded. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB) (Note that for audits of public companies and other issuers, the Public Company Accounting Oversight Board (PCAOB) sets auditing standards.)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.fasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm
PCAOB	www.pcaobus.org

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to expedite your submission. Include your full name, mailing address and, if available, your membership and subscriber number in the message.

Auditing Pipeline—Nonpublic Companies

.133 The proposed standards discussed in this section apply to auditors of nonissuers only. Readers should keep abreast of the status of the following projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Proposed Statement on Quality Control Standards, A Firm's System of Quality Control

.134 The ASB has issued an exposure draft for a proposed Statement on Quality Control Standards (SQCS) that would replace all existing SQCSs. The proposed SQCS establishes standards and provides guidance for a CPA firm's responsibilities for its system of quality control for its accounting and auditing practice. It deals comprehensively with a firm's quality control practices in the areas of audits, reviews, and compilations and other attestation engagements. The proposed SQCS places an unconditional obligation on a firm to establish a system of quality control designed to provide it with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the reports issued by the firms or engagement partners are appropriate in the circumstances. A final standard is expected in the second quarter of 2007.

Proposed SAS, Omnibus—2006

.135 The ASB has issued an exposure draft of a proposed SAS entitled *Omnibus—2006*. The Omnibus includes proposed revisions to various existing SASs:

- The proposed SAS Omnibus will amend the general and reporting standards that were not amended by SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards. The Omnibus will also amend those SASs that quote the generally accepted auditing standards to conform them with the changes in SAS No. 105 and to the changes proposed in this Statement.

- The Omnibus will include a proposed amendment to SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*. This proposed amendment will provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks.

- SAS No. 103, *Audit Documentation*, amended SAS No. 1, *Codification of Audit Standards and Procedures* ("Dating of the Independent Auditor's Report"), to change the date of the auditor's report from the date of completion of fieldwork to require that the auditor's report be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. The proposed Omnibus will include amendments to remove references to the "completion of fieldwork" throughout the codification of SASs.

- The proposed Omnibus will include a proposed amendment to SAS No. 85, *Management Representations*, as amended. This proposed amendment will align the date of the representation letter with the requirement in SAS No. 103 that the auditor's report not be dated prior to the date on which the auditor has obtained sufficient appropriate audit evidence.

Readers should be alert for the issuance of a final standard.

Proposed SAS, The Auditor's Communication With Those Charged With Governance

.136 The ASB has issued an exposure draft of a proposed SAS that would replace SAS No. 61, *Communication With Audit Committees*, as amended. SAS No. 61 currently establishes communication requirements applicable to entities that either have an audit committee or have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. The proposed SAS broadens the applicability of the SAS to audits of the financial statements of all nonissuers and establishes a requirement for the auditor to communicate with those charged with governance certain significant matters related to the audit.

.137 The proposed SAS identifies specific matters to be communicated, many of which are generally consistent with the existing requirements in SAS No. 61. However, the proposed SAS includes certain additional matters to be communicated and provides additional guidance on the communication process. In particular, the proposed SAS:

- Requires the auditor to determine the appropriate person(s) in the entity's governance structure with whom to communicate particular matters. That person may vary depending on the nature of the matter to be communicated.
- Recognizes the diversity in governance structures among entities (including the existence of audit committees or other subgroups charged with governance) and encourages the use of professional judgment in deciding with whom to communicate particular matters.
- Recognizes the unique considerations for communicating with those charged with governance when all of those charged with governance are involved in managing the entity, which may be the case with some small entities.
- Adds requirements to communicate an overview of the planned scope and timing of the audit, and representations the auditor is requesting from management.
- Provides additional guidance on the communication process, including the forms and timing of communication. Significant findings from the audit are required to be communicated in writing, while other communications may be oral or in writing.
- Requires the auditor evaluate the adequacy of the two-way communication between the auditor and those charged with governance.
- Establishes a requirement to document significant matters communicated to those charged with governance.

.138 In addition to the proposed SAS, the exposure draft includes a proposed amendment to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, as amended. The proposed amendment requires the auditor to communicate to those charged with governance events or conditions that cause an auditor to conclude that there is substantial doubt about the entity's ability to continue as a going concern as well as management's plans for addressing such events or conditions.

.139 Readers should be alert for the issuance of a final standard in the fourth quarter of 2006.

Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.140 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled

The Hierarchy of Generally Accepted Accounting Principles. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www.fasb.org. This project is therefore on hold awaiting FASB finalization of the hierarchy.

Accounting Pipeline

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.141 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. Readers should be alert for the issuance of a final Statement.

Proposed FASB Statements, Business Combinations, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.142 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. That all acquisitions of businesses be measured at the fair value of the business acquired.
2. That substantially all of the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
3. That entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.143 The FASB's goal is to issue the two final Standards in the second quarter of 2007. The target effective date for the two proposed Statements will be reviewed near the end of redeliberations.

Proposed FASB Statement, Accounting for Transfers of Financial Assets

.144 The exposure draft *Accounting for Transfers of Financial Assets* is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed Statement seeks to (*a*) clearly specify the circumstances that require the use of a qualifying special-purpose entity (SPE) in order to derecognize all or a portion of financial assets, (*b*) provide additional guidance on permitted activities of qualifying SPEs, (*c*) eliminate the prohibition on a qualifying SPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor, and (*d*) revise the initial measurement of interests related to transferred financial assets held by a transferor. The effective dates associated with this proposed Statement vary; refer to the exposure draft for further information.

.145 Readers should be alert for the issuance of a final Statement, which is expected in the second quarter of 2007. See the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, The Fair Value Option for Financial Assets and Financial Liabilities

.146 In January 2006, the FASB published an exposure draft of a proposed Statement, *The Fair Value Option for Financial Assets and Financial Liabilities*. This proposed Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur.

.147 Current GAAP requires some assets or liabilities to be reported using the fair value measurement attribute, while other related assets or liabilities are required to be reported using another measurement attribute. This mixed-attribute accounting leads to volatility in reported earnings. Creation of the fair value option would permit an entity to mitigate that volatility by enabling entities to achieve an offset accounting effect for the changes in the fair values of related assets and liabilities without having to apply complex hedge accounting provisions.

.148 Adoption of this proposed Statement would be required as of the beginning of an entity's first fiscal year that begins after December 15, 2006, with earlier adoption permitted as of the beginning of an entity's earlier fiscal year that begins after issuance of the final Statement. As of the date of initial adoption, an entity would be permitted to elect the fair value option for any existing financial asset or financial liability within the scope of the proposed Statement. The adjustment to reflect the difference between the fair value and the carrying amount of the existing financial assets and financial liabilities for which an entity irrevocably elected the fair value option as of the date of initial adoption would be accounted for as a cumulative-effect adjustment to retained earnings. Retrospective application of the accounting provisions in the proposed Statement would not be permitted.

.149 Readers should be alert for the issuance of a final Statement, which is expected in the fourth quarter of 2006.

Proposed FASB EITF Issues

.150 Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

Proposed FASB Staff Positions

.151 A number of proposed FASB Staff Positions are in progress addressing issues related to FASB Statements No. 123(R), and No. 126. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

Resource Central

.152 Presented below are various resources that practitioners engaged in the high-technology industry may find beneficial.

Publications

.153 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements (product numbers appear in parentheses):

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2006) (product no. 012523kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2006) (product no. 012516kk)

- Audit Guide *Audit Sampling* (2001) (product no. 012530kk)
- Audit Guide *Analytical Procedures* (2006) (product no. 012556kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2006) (product no. 012776kk)
- *Accounting Trends & Techniques—2006* (product no. 009896kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Practice Aid *Fraud Detection in a GAAS Audit, Revised Edition* (006615kk)
- General *Audit Risk Alert—2006/07* (product no. 022336kk)

Audit and Accounting Manual

.154 The *Audit and Accounting Manual* (revised as of July 1, 2006) (product no. 005136kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditor's reports, checklists, and engagement letters; management representation letters; and confirmation letters.

Educational Courses

.155 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Visit www.cpa2biz.com for a complete list of CPE courses.

Hotlines

Accounting and Auditing Technical Hotline

.156 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.157 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

.158 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the following table.

Name of Site	*Content*	*Internet Address*
Accountants World	Online community of independent accountants providing resources and tools	www.accountantsworld.com
AccountingWeb	Online community for the accounting profession	www.accountingweb.com

AAM Section 8140

Real Estate Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
REAL ESTATE INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert is intended to provide auditors of financial statements of real estate organizations with an overview of recent economic, technical, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statement on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Amy M. Eubanks, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgements

The AICPA staff wishes to thank J. Russell Madray, CPA, for his valuable contribution to and insight into this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your real estate industry audits. The information delivered by this Alert assists you in achieving a more comprehensive understanding of the business, economic, and regulatory environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the real estate industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry information.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk). This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this Alert.

.04 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Economic and Industry Developments

.05 AU sections 311A and 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with Public Company Accounting Oversight Board [PCAOB] standards: AICPA, *PCAOB Standards and Related Rules*, respectively), provides guidance for auditors regarding the specific procedures that should be considered in planning an audit. These sections state that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics. The auditor should also consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit.

.06 Presented in this Alert are current business, economic, regulatory, accounting, and auditing matters that may affect your clients. Reading about these matters and properly addressing them as necessary will help you gain a better understanding of your client's environment, will help you better assess risks of material misstatement of the financial statements, and will ultimately strengthen the integrity of your audits.

The State of the Economy

.07 In planning audits, auditors need to understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the company's financial statements being audited.

.08 A number of factors that could upset economic growth, possibly affecting your client's operations and therefore possibly affecting audit risk, include:

- Rising interest rates during most of the year
- Unstable oil prices
- Dangerously high and rising consumer debt levels
- Inflation concerns
- A softening housing boom in some markets

.09 The U.S. real gross domestic product (GDP), which is the broadest measure of economic activity, increased at an annual rate of 5.6 percent during the first quarter of 2006 but slowed to a growth rate of 2.6 percent in the second quarter and 2.0 percent in the third quarter of 2006, according to the Bureau of Economic Analysis. The deceleration in growth from the first to the second quarter is due, among other factors, to downturns in personal consumption expenditures for durable goods, in equipment and software, and in federal government spending; decelerations in personal consumption expenditures for nondurable goods and in exports; and a decrease in residential fixed investment. The continued deceleration in growth into the third quarter is due, among other factors, to an acceleration in imports; a larger decrease in residential fixed investment; and decelerations in private inventory investment, personal consumption expenditures for services, and state and local government spending that were partly offset by upturns in equipment and software, personal consumption expenditures for durable goods, and federal government spending.

.10 The unemployment rate has remained relatively unchanged during 2006 holding between 4.4 and 4.8 percent, down from rates experienced in the prior year and the lowest since 2001. As of November 2006, the unemployment rate was 4.5 percent.

.11 After a period of rising rates, the Federal Reserve Board kept its target for the federal funds rate at 5.25 percent during its last four meetings (August through December 2006). The Federal Reserve stated, "Economic growth has slowed over the course of the year, partly reflecting a substantial cooling of the housing market. Although recent indicators have been mixed, the economy seems likely to expand at a moderate pace on balance over coming quarters." The Federal Reserve cautioned that "Readings on core inflation have been elevated and the high level of resource utilization has the potential to sustain inflation pressures. However, inflation pressures seem likely to moderate over time, reflecting reduced impetus from energy prices, contained inflation expectations, and the cumulative effects of monetary policy actions and other factors restraining aggregate demand."

Economic Impact of Hurricanes Katrina and Rita

.12 It has been over a year since Hurricanes Katrina and Rita hit the Gulf Coast region causing catastrophic damage. The natural disaster disrupted the nation's economic growth and destroyed housing, commercial, and public property. A year later, the United States has experienced a mild hurricane season and the Gulf Coast region continues to rebuild and real estate markets recover from the short-term economic disruption caused by the hurricanes.

General Industry Trends and Conditions

.13 As of the writing of this Alert, several of the real estate segments (office, industrial, multifamily, and hospitality) have been showing positive signs of growth, such as lower vacancy rates and rising rents. However, the retail market is lagging behind other commercial real estate sectors, and the housing market is slowing. The office market continues to recover with falling vacancy rates, strong absorption, modest construction, and some spikes in rental rates. The industrial sector is moving from a recovery phase into an expansionary phase, as global trade increases and with it, the need for space. The hospitality market continues to rebound to pre-September 11, 2001, levels with strong occupancy and increasing room rates. The retail market is experiencing weakening absorption and disconcerting vacancy rates due to higher interest rates, fluctuating oil prices, and a slowing housing market. The housing market's five years of growth is slowing and the multifamily market is improving as potential homebuyers stay in rentals as a result of the slowing housing market. In addition, real estate investment trusts (REITs) have continued to outperform the Standard & Poor's 500 and the Dow Jones Industrial for the seventh consecutive year.

Industry Segment Conditions

Office Market Conditions

.14 The office market continues to recover from its downturn in the early 2000s. Vacancy rates are falling, absorption is strong, construction is modest, and rental rates are rising in some markets. According to the commercial real estate services firm, Grubb & Ellis Company (Grubb & Ellis), the U.S. office vacancy rate at the end of the third quarter of 2006 was 13.9 percent, compared to 14.1 percent in the prior quarter and 15.1 percent in the year-ago quarter. Although vacancy rates still remain above the generally accepted equilibrium rate of 10.0 to 12.0 percent, the rates continue to decline from the 17.9 percent high in the first quarter of 2004.

.15 During the year, several markets experienced declining vacancy rates including Denver, San Antonio, San Francisco, and Miami, posting declines of 3 to 4 percentage points. A few markets experienced increasing vacancy rates, led by Westchester County, New York, with a vacancy rate up to 16.7 percent. According to Grubb & Ellis, the high vacancy rates in Westchester County are a result of corporate downsizings in that market.

.16 The absorption rate (the rate at which rentable space is filled) grew stronger as demand continued to outrun new supply during 2006. Tenant demand for space has been the strongest during 2006 in Chicago, Dallas-Fort Worth, and New York City. However, the suburban New York City markets of Westchester

County and Long Island have posted the largest negative absorption rates during the year. According to Grubb & Ellis, third-quarter net absorption of 17.6 million square feet far outpaced the 6.1 million square feet of new space delivered during the quarter, which helped fuel the falling vacancy rate. Grubb & Ellis cited five markets that absorbed at least 1.0 million square feet during the third quarter of 2006. They include Dallas-Fort Worth (absorption of 1.7 million square feet), Boston, Houston, Los Angeles, and Denver. Seattle and Phoenix just missed the 1.0 million square foot threshold.

.17 At the end of the third quarter of 2006, competitive office space under construction crept higher to 65.2 million square feet, an increase of 2 percent from the prior quarter and 26 percent from the year-ago quarter. Despite the large year-over-year gain, space under construction is barely over halfway back to its prior high of 125.0 million square feet experienced in the third quarter of 2000.

.18 Average asking rental rates continue to increase. According to Grubb & Ellis, as of the third quarter of 2006, Class A space rates increased 7.1 percent and class B space rates increased 5.5 percent over the past four quarters. Class A rates for available space ended the third quarter of 2006 at $31.36 and class B rates ended at $24.19 per square foot per year, full service gross. Several markets posted double-digit increases in Class A asking rates during the third quarter, led by San Mateo (19.1 percent) and San Francisco (16.7 percent). Seven of the top ten rent gainers were in California, with Manhattan, Phoenix, and Austin also included in this elite group. Rental rates remained relatively flat in a number of other markets during the year including Atlanta, Northern and Central New Jersey, Cleveland, Detroit, and Westchester County.

.19 While the office market continues in a state of recovery, slower year-to-date recovery can be linked to the softening housing market and rises in the federal funds rate from mid-2004 through mid-2006. Despite the slowdown, many experts believe the impact of the softening housing market will only be modest and not significant enough to derail the recovery of the office market.

Industrial Market Conditions

.20 The industrial market continues to show positive results moving from a recovery phase in 2005 to an expansionary phase in 2006. Global trade and an increase in imports continue to create the need for space. U.S. vacancy rates continue to decrease. The U.S. vacancy rate at the end of the third quarter of 2006 was 7.7 percent, the lowest level since the third quarter of 2001. This is down from the second quarter rate of 7.9 percent. Grubb & Ellis noted the decreasing vacancy rate is significant in three respects: (1) the economic pullback of the last few months has had little impact on demand for space, at least so far; (2) developers are being prudent in adding new space; and (3) the quarterly drop of 20 basis points breaks a string of three consecutive quarters when vacancy fell by 10 basis points, suggesting that the market has the potential for further tightening.

.21 Markets experiencing the lowest vacancy rates include Calgary, driven by a boom in oil and other commodities, and Los Angeles and the Inland Empire area of Southern California, due to port-related demand and limited land availability. The highest vacancy rates are occurring in Raleigh-Durham and Atlanta. Raleigh-Durham is still recovering from the technology bust several years ago.

.22 Much like the office sector, demand is outpacing new supply. Absorption of 52.4 million square feet during the third quarter of 2006 set a new high in the current expansion cycle, just above the 52.3 million square feet absorbed in the third quarter of 2005. New supply added to the market of 26.5 million square feet was barely half the total square feet absorbed. According to Grubb & Ellis, the amount of space under construction at the end of the third quarter pulled back very slightly following nine consecutive quarterly increases, which indicates good news for the market as it represents a hint of restraint on the part of lenders and developers responding to the economic slowdown of the last few months.

.23 After the average asking rent for warehouse-distribution space rose during the first half of 2006, the rate fell 8 cents in the third quarter to $4.45 per square foot per year net-net-net (NNN). This rate is still 1.9 percent above the year-ago level.

.24 In regards to the factors contributing to the declining rent rate, Grubb & Ellis noted:

- Certain markets and submarkets have seen a lot of new construction; and landlords have made some adjustments in their asking rents, even though demand has been strong.
- The average size of warehouse construction projects has grown dramatically from 119,350 square feet in 2002 to 215,821 square feet in 2006. Larger buildings tend to command lower rental rates per square foot.
- Warehouse-distribution projects are increasingly being built in the hinterlands where land is cheap, allowing landlords to be competitive with rents. This new construction is putting a lid on the average rental rate, though individual projects are penciling out and earning competitive returns for their owners.

.25 Experts believe the industrial market will meet optimistic forecasts set at the beginning of 2006 and that the long-term forecast is bright, especially as the U.S. appetite for trade grows.

Retail Market Conditions

.26 Retail market performance is lagging behind the other commercial real estate sectors. Higher interest rates, fluctuating oil prices, and an unsteady housing market are affecting consumer confidence and thus affecting the retail market. During the first two quarters of 2006, absorption showed signs of weakness. The *Wall Street Journal* reported that tenants absorbed 4.9 million square feet during the second quarter of 2006, compared with only 3.3 million during the first quarter. Both figures are well below the two-year average of approximately 7.0 million square feet per quarter.

.27 Availability in the retail market continues to increase. Vacancy rates were 7.6 percent in the first quarter and 8.5 percent in the second quarter of 2006. Although these rates are well below the double digit rates seen in 2002, some experts believe they are still a cause for concern.

.28 According to Colliers International, a global partnership of independently owned commercial real estate firms, rents continue to increase at a 3 to 4 percent annual rate, similar to that recorded a year ago. Three retail categories identified for their growth potential include value-oriented/discount, upscale, and ethnically targeted stores. Changes in economic factors, such as interest rates, high oil prices, the job market, disposable income, consumer confidence, and the housing market will greatly influence the retail sector's performance over the remainder of the year.

Residential Market Conditions

.29 ***Housing.*** After five years of record sales and growth, the housing market is slowing. It remains to be seen how bad the market will actually become and when it will hit bottom. So far the downturn resembles a correction more than a crash on a national level, slowing economic growth rather than sending it into a recession.

.30 The sellers market is transitioning into a buyers market. Falling demand and increases in supply cause house prices to decline. According to the National Association of Realtors (NAR), there were 3.9 million existing homes on the market in August 2006, up 38.0 percent from a year earlier. This represented a 7.5-month supply of existing homes; the highest supply level estimated by NAR since April 1993. By the end of October 2006, there was inventory of 3.85 million existing homes, representing a 7.4-month supply with the current pace of sales. Meanwhile, the inventory of new homes on the market climbed in October 2006 to 558,000 homes, a 7-month supply. One year ago, inventory levels of new homes were only at a 4.5-month supply.

.31 According to NAR, total existing home sales decreased during September 2006 to a seasonally adjusted annual rate of 6.21 million, but rose 0.5 percent in October 2006 to a seasonally adjusted annual rate of 6.24 million units. This is still well below the 7.05 million-unit pace experienced in October 2005. October 2006 existing home sales were down in all regions compared to October 2005 by 8.8 to 18.9 percent. Likewise, new home sales also fell in October 2006. Sales of single-family homes decreased in October 2006 to a seasonally adjusted annual rate of 1.004 million, down 25.4 percent from the prior year.

.32 A survey from the U.S. Census Bureau showed that 35 percent of American homeowners with mortgages in 2005 spent 30 percent or more of their household income on housing costs, including loan payments, real estate taxes, insurance, and utilities. This compared to only 30 percent of American homeowners with mortgages in a 2003 study. Such strain on household income contributes to slow or decreasing house prices. During most of the first half of 2006, mortgage rates were on the rise. However, as of the week ended December 7, 2006, the 30-year fixed mortgage rate dropped to 6.11 percent, the lowest rate since the week of January 19, 2006. Despite decreases in mortgage rates for the latter part of the year, housing activity continues to slow.

.33 House prices have begun to adjust in some markets and will likely continue due to the buildup of inventory and decrease in demand discussed previously. According to NAR, the national median existing home price for all housing types was $221,000 in October 2006, down 3.5 percent from the year earlier when the median price spiked to $229,000. The median price for existing home sales in October 2006 is down from a year ago by 7.0 percent in the South, 1.2 percent in the Midwest, 0.6 percent in the West, and 5.2 percent in the Northeast. However, despite rising inventory levels of new homes, the median price of new homes actually increased in October 2006 to $248,500, up nearly 14 percent from September 2006. Some experts believe builders are able to continue to sell new homes at a higher price due to other incentives being offered such as upgrades in amenities and paying portions of closing costs.

.34 NAR projects new home sales will continue to decline in 2007, but that existing home sales will rise gradually in 2007 from current levels with overall annual totals comparable to 2006. NAR also predicts the median existing and new home prices will increase only marginally in 2007. Moody's Economy.com, a leading independent provider of economic, financial, country, and industry research, projects that the median sales price for an existing home will decline in 2007 by 3.6 percent. Other sources predict median house prices will decline by more than 10.0 percent over the next few years in 20 metropolitan (metro) areas. Some predict prices may keep falling into the year 2009. Markets that have appreciated most rapidly over the past five years are now showing the fastest decline in appreciation rates. Metro areas that did not begin appreciating until later in the housing boom are still experiencing appreciation, an indication the market correction may take some time to run its course. Experts seem to agree the areas most prone to decline are in California and Florida.

.35 ***Multifamily.*** The multifamily market continues to experience improving fundamentals as vacancy rates decline and rents rise. During 2006, the multifamily market benefited from the slowing housing market. Rising mortgage rates during the early part of 2006 made rentals more attractive than buying a home, leaving potential homebuyers in rentals. During the first quarter of 2006, apartment rents rose at the fastest pace in five years. According to the National Multi-Family Housing Counsel, the average monthly apartment rent was $952, up 5.0 percent from the prior year quarter. This was the fastest pace since rents rose 8.3 percent during the first quarter of 2001. NAR estimates that average rent will increase to 4.8 percent during the fourth quarter of 2006 compared to 2.9 percent during the same quarter of 2005.

.36 The multifamily market has also experienced declining vacancy rates. Vacancy rates declined 11 consecutive quarters to 5.4 percent at the end of the third quarter of 2006. Several metro markets have experienced sub-2.5 percent vacancy rates during the year including Albuquerque, Los Angeles, Las Vegas, Orlando, Norfolk, Northern New Jersey, San Francisco, San Jose, and Washington. Multifamily net absorption is expected to be 262,800 units in 59 of the tracked metro areas during 2006, compared to 351,000 units in 2005.

.37 In past years, declining vacancy rates and rising rents were due, in large part, to condominium conversions. Developers were converting apartments into condominiums at a frenzied pace and decreasing rental supply. However, condominium conversion activity has declined notably during 2006 due to slowing condominium sales. Some properties originally purchased for conversion are actually reverting back into multifamily rentals. The potential return of unsold condominium units to the rental marketplace, coupled with significant new additions to the existing apartment stock may present a risk of eventual oversupply to the multifamily sector and curtail rent increases.

Hospitality Market Conditions

.38 According to Lodging Econometrics (LE), the industry authority for hotel real estate, all but eight markets fully recovered in 2005 to pre-September 11, 2001, operating levels. LE concluded that five more markets are expected to fully recover by the end of 2006 (Chicago, Dallas, Denver, Atlanta, and Nashville), and the remaining three should recover in 2007 (Boston, Detroit, and San Francisco).

.39 The market continued to experience strong occupancy and record gains in room rates during the first half of 2006. During the first half of 2006, overall occupancy was 63.5 percent, a 2.1 percent increase from the same period in 2005. The West South Central region of the United States experienced the highest gain in occupancy (6.7 percent increase) during this same period, as compared to the prior year. This region, which includes Texas, Oklahoma, Louisiana, and Arkansas, experienced increases due to the influx of evacuees and relief workers resulting from Hurricane Katrina. NAR forecasts occupancy rates will average 68.4 percent in 2006, the highest since 2001.

.40 Revenue per available room (RevPAR) increased 8.4 percent in 2005, according to Pricewaterhouse-Coopers' (PwC's) Hospitality and Leisure Group. This represents the largest increase since 1984. During the first quarter of 2006, RevPAR increased 9.7 percent. The mid-scale-without-food-and-beverage segment led the industry during this period, posting a RevPAR gain of 13.0 percent, followed by upscale segments with RevPAR increase of 11.3 and luxury segments with RevPAR increase of 11.2 percent. RevPAR is estimated to increase by 8.4 percent in 2006, according to PwC's Hospitality and Leisure Group.

.41 Low supply growth and steady demand have also allowed increases in the overall average daily rate (ADR). During the first half of 2006, the overall ADR was $96.56, a 6.8 percent increase from the same period in 2005, when overall ADR was $90.42. The luxury segment posted the highest increases rising 7.2 percent followed by the budget segment with a 7.0 percent increase.

.42 Supply growth, which has been slow over the past few years, is expected to increase. At the end of the second quarter of 2006, the total construction pipeline was at 3,436 projects (463,629 rooms), according to LE. This is a new high for this cycle but is still approximately 15.0 percent below the high set in 1998. LE also believes supply will continue to rise and the construction pipeline peak of 1998 could be exceeded in 2007 if rising interest rates do not curtail development. Increases in supply could weaken occupancy levels; however, many experts believe demand will remain ahead of supply resulting in continued growth.

.43 The hospitality market continues to benefit from the growing global economy, which has increased consumer and business travel. However, as the housing market slows and oil prices potentially rise again, one must consider the effect on discretionary spending and its impact on travel and thus the hospitality market.

Real Estate Investment Trusts

.44 For the seventh consecutive year, REITs have outperformed all other stock groups and stock indexes. Year-to-date through November 30, 2006, the FTSE National Association of Real Estate Investment Trust

(NAREIT) All REIT Index[1] climbed in excess of 37.0 percent. REITs have been outperforming the stock market since 2000, and during the technology crash, REITs rose while the Dow lost percentage points. REIT performance, of course, varies by real estate segment in response to how economic changes are affecting each segment. Consistent with strong performance in multifamily, office, and industrial real estate, these REITs have posted high growth in year-to-date returns as well. Even in the current market, REITs specializing in manufactured homes have jumped 13.3 percent year-to-date through November 30, 2006.

.45 According to INVESCO, an institutional investment manager, REIT performance accelerated during the third quarter of 2006 as a result of improving fundamentals and falling long-term interest rates. INVESCO projects that moderate economic growth with below-average construction levels should allow REIT earnings to grow at a favorable pace in the near future.

.46 REITs, which were originally viewed as just a fixed-income vehicle, are now being recognized for their capital appreciation benefits. Many investors also continue to use REITs as an investment diversification strategy, and the pace of institutional investments in REITs continues to be strong. In an INVESCO third quarter 2006 report, the investment management firm explained that forces similar to those that led to the acceptance of REITs within the United States are now driving the evolution of securitized real estate markets across the globe. On a global basis, the securitized real estate market has more than doubled in size versus 10 years ago, with listed real estate assets now exceeding $1.0 trillion. However, only six of the top ten countries around the globe, as measured by the value of their real estate assets, have passed some form of tax-efficient REIT legislation. With several large markets, including Japan, having just permitted the formation of REITs in the last five years, significant potential remains for the growth in market capitalization of listed real estate as other countries like Germany, the United Kingdom, Italy, and Spain finally introduce REIT structures. INVESCO further explains that, assuming all countries reach at least the same level of listed real estate as the United States, the total combined value of real estate listed on global stock exchanges could grow by more than 50.0 percent, surpassing $1.6 trillion. Despite this large increase, the value of listed real estate would still only represent 3.8 percent of the total market capitalization of the global stock markets (up from 2.5 percent currently).

.47 Another interesting development in the world of REITs is the recent increase in privatizations. Globally, there have been an increasing number of public REITs acquired by private companies. According to Ernst & Young's Autumn 2006 publication, *Global Real Estate Newsline*, globally in 2005, there were eight announced deals valued at $20.7 billion. There were nearly $18.0 billion announced deals in the first half of 2006. Some REITs view privatization as a way to maximize shareholder value and gain flexibility in long-term business planning or diversify into new geographic markets. Some smaller cap REITs are also using privatization as an exit strategy. Experts expect more REIT mergers and acquisitions during the remainder of 2006.

Regulatory and Legislative Issues

Banks in Real Estate

.48 For the past two centuries, the U.S. Congress has mandated the separation of banking and commerce determining that real estate brokerage and management was commerce rather than financial in nature. The Gramm-Leach-Bliley Act of 1999 significantly changed the way the financial services industry is organized and how it functions, but Congress still maintained a separation of banking and commerce. However the Gramm-Leach-Bliley Act did authorize the Federal Reserve and the U.S. Department of Treasury to periodically update a list of activities that federally regulated financial holding companies and national bank subsidiaries could legally engage.

[1] The FTSE National Association of Real Estate Investment Trust (NAREIT) All REIT Index includes all tax-qualified REITs listed on the New York Stock Exchange, American Stock Exchange, and NASDAQ National Market List. Effective March 6, 2006, the FTSE Group assumed responsibility for the calculation and distribution of NAREIT's domestic indexes, which were renamed the FTSE NAREIT U.S. Real Estate Index Series.

.49 Subsequently, on January 3, 2001, the Board of Governors of the Federal Reserve and the U.S. Department of Treasury published a joint proposal for public comment that would allow financial holding companies and financial subsidiaries of national banks to engage in real estate brokerage and management. Readers can access the proposal at www.federalreserve.gov/boarddocs/press/boardacts/2000/20001227/attachment.pdf. Since then, the real estate industry has managed to hold off banks. Each year since 2001, a law or resolution has passed (generally attached to an appropriations bill) to delay or bar implementation of the proposed regulations.

.50 Meanwhile, the Community Choice in Real Estate Act, which would prohibit national banking conglomerates from engaging in real estate brokerage or property management and removes the powers of the Federal Reserve and the Treasury Department to regulate these real estate activities, is pending in both the House of Representatives and the Senate. Despite a broad bi-partisan base of support, the bill remains pending in committee.

.51 On June 14, 2006 the House of Representatives (again) approved a one-year prohibition in the Transportation-Treasury-Housing and Urban Development Appropriation bill prohibiting the Federal Reserve and Treasury Department from finalizing the rule allowing bank conglomerates to engage in real estate brokerage. On July 20, 2006, the Senate Appropriations Committee (again) approved a permanent prohibition as part of their Transportation-Treasury-Housing and Urban Development Appropriation bill. The House and Senate will come together and negotiate the differences in the two appropriations bills (one-year prohibition versus permanent provisions). NAR has commented that it expects this to occur later this year.

.52 The real estate community, of course, strongly supports the Community Choice in Real Estate Act and seeks a permanent prohibition to keep banks out of real estate. NAR has commented that allowing banks in real estate would cause an unfair competitive environment for real estate management firms not affiliated with banks and lead to conflicts of interest, fewer competitive loans, and higher rates to consumers among other things. Auditors should remain alert to the status of this issue as it could increase competition in the real estate industry and potentially affect the financial performance of your clients.

Commercial Real Estate Lending Under Increased Scrutiny

.53 Real estate lending has come under increased scrutiny from federal regulators lately, prompting concern that changes in policy could adversely affect the real estate market. The Federal Bank and Thrift Agencies have become concerned over high and increasing concentrations of commercial real estate (CRE) loans some financial institutions (institutions) are holding and the potential for these concentrations to make institutions more vulnerable to cyclical CRE markets. According to the FDIC, CRE debt has grown to $2.3 trillion in 2006, compared to $952.0 billion in the late 1980s, with increased growth in just the last two years. Comptroller of the Currency, John C. Dugan, noted in a November 5, 2006, news article posted in the *Chicago Tribune*, that 35 percent of the banks it oversees hold CRE loans exceeding 300 percent of capital. Many of those are smaller institutions. Regulators perceive banks have relaxed their underwriting standards excessively to attract CRE business in the current competitive market. Federal Reserve Board Governor, Susan Bies, noted that aggregate CRE concentrations for small-to-medium sized U.S. banks, relative to capital, are twice the exposures before the substantial real estate downturn in the late 1980s. However, many people in the real estate community believe that similar guidance issued by financial institution regulators in the 1980s contributed to the real estate credit crunch of the early 1990s.

.54 CRE loan repayment is primarily dependent upon rental income or from proceeds of the sale, refinancing, or permanent financing of the property, thus exposing the financial institutions to unanticipated earnings and capital volatility if the CRE market were to experience a downturn. In response, the four agencies charged with regulating the banking industry—the Federal Reserve Board, the Federal Deposit Insurance Corporation (FDIC), the Office of the Comptroller of the Currency (OCC), and the Office of Thrift Supervision (OTS)—proposed guidance regarding concentrations in CRE lending. *Concentrations in Commercial*

Real Estate Lending, Sound Risk Management Practices, issued on January 10, 2006, proposed criteria for identifying institutions with CRE concentrations that may warrant greater supervisory scrutiny. The guidance focused on CRE loans that are particularly vulnerable to cyclical CRE markets that it defined as those in which the source of repayment is primarily dependent upon rental income or from proceeds of the sale, refinancing, or permanent financing of the property. This included loans to REITs and unsecured loans to developers that closely correlate to the inherent risk in CRE markets.

.55 The proposed guidance provided that if an institution has loans for construction, land development, and other land (as defined in the guidance) in excess of 100 percent of capital or total CRE loans in excess of 300 percent of capital, the institution should have heightened risk management practices and capital levels higher than the regulatory minimums and levels that are appropriate based upon the risk in its CRE loan portfolios.

.56 The Real Estate Roundtable, an organization of executives from the nation's top public and privately held real estate ownership, development, lending, and management firms, has a working group of its Real Estate Capital Policy Advisory Committee (RECPAC) who reviewed and commented on the proposed lending guidance. In addition to the real estate industry, the proposed guidance prompted much debate and comment from financial institutions. Comptroller Dugan stated, in an April 2006 press release, "Our message is not, 'Cut back on commercial real estate loans.'" However, there is concern for the real estate industry on how the guidance could affect CRE lending practices. A contraction of available bank credit for CRE could lead to higher borrowing costs for the credit that is available and potentially lead to a decline in property values.

.57 After an extended comment period, the OCC, Federal Reserve Board, and FDIC issued final guidance on December 6, 2006. The issuing agencies noted in the final guidance (of the same title as the proposed guidance) that they made significant changes to the proposed guidance to clarify the purpose and scope of the guidance. In a joint press release the day of issuance, the agencies noted the guidance is intended to help ensure that institutions, pursuing a significant commercial real estate lending strategy, remain healthy and profitable while continuing to serve the credit needs of their communities. The final guidance reminds institutions that strong risk management practices and appropriate levels of capital are important elements of a sound lending program and builds upon existing regulations to emphasize risk management practices that allow an institution to pursue CRE lending in a safe manner.

.58 One of the real estate industry's primary concerns was that the proposed concentration thresholds, discussed previously, would be enacted as limits or perceived to be *de facto* limits on an institution's CRE lending activity. This was also an expressed concern in many financial institutions' comments. The final guidance still contains the proposed concentration thresholds, but stresses the levels are included as part of the agencies' supervisory oversight criteria. The concentration thresholds are to be used by examiners as a starting point for identifying potential CRE concentrations and are not established limits on CRE lending.

.59 This guidance is effective immediately upon publication in the Federal Register and can be accessed at www.fdic.gov/news/news/press/2006/pr06114.html. Auditors should remain alert to how financial institutions perceive and respond to this guidance and how examiners apply the guidance, as it could potentially discourage some institutions from becoming involved in or continuing to participate in increased levels of CRE lending. This could affect the availability and cost of borrowing for your clients, directly affecting their operations and financial performance.

Audit and Accounting Issues and Developments

Assessing Audit Risks in the Current Environment

.60 The proper planning and execution of an audit has always required you to have a thorough understanding of the real estate industry and the nature of your client's business. For most audit firms, this in-depth understanding means that the most experienced partners and managers will be involved early and often in the audit process. In today's environment, an auditor's judgment, knowledge, and experience are even more important than in the past.

.61 As discussed earlier in the "Economic and Industry Developments" section, the current state of the economy is uncertain. GDP third quarter expansion was only 2.0 percent, and after a period of rising interest rates, the federal funds rate has remained steady; however, there are concerns of inflationary pressures. The majority of real estate markets are experiencing solid performance in fundamentals with the exception of retail and housing. It is uncertain how the U.S. economy will perform and how the slowing housing market may affect other real estate markets and the economy as a whole.

.62 Periods of economic uncertainty often lead to challenging conditions for companies due to potential deterioration of operating results, increased external scrutiny, and reduced access to capital. During such times, an auditor should ensure audit planning reflects the risks present in the current environment and exercise heightened professional skepticism during the audit. Both of these aspects are discussed in the following sections.

Professional Skepticism

.63 The third general audit standard stipulates that due professional care be exercised in planning and performing an audit engagement (AICPA, *Professional Standards*, vol. 1, AU sec. 230A). Due professional care requires that you exercise professional skepticism in gathering and evaluating audit evidence. Although you neither assume that management is dishonest nor assume unquestioned honesty, you should consider the increased risk associated with the potential increases in external pressure faced by management during times of economic uncertainty.

.64 As a result of perceived external pressures, companies may be tempted to manage earnings by using nonrecurring transactions or through changes in the method of calculating key estimates, such as reserves, fair values, or impairments. Companies may also adopt inappropriate accounting practices resulting in improper recognition or omission of financial transactions. Material nonrecurring transactions may require special disclosure to facilitate the readers' understanding of the reported financial results; and the guidance in Financial Accounting Standards Board Statement of Financial Accounting Standards (FASB Statement) No. 154, *Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3*, should be applied in reporting the effects of changes in estimates. Inappropriate transactions or accounting practices that may result in errors requiring adjustments of financial statements might include premature recognition of revenue, failure to appropriately accrue for contingent liabilities that are probable and estimable, and failure to record unpaid purchase invoices. Additionally, you should be particularly skeptical of fourth-quarter events that result in significant revenue recognition, loss accrual, or noncash earnings.

.65 The appropriate level of professional skepticism is needed when corroborating management's representations. Management's explanations should make business sense. Additionally, you may need to consider corroborating management's explanations with members of the board of directors or audit committee.

Audit Planning

.66 As you prepare to conduct quarterly reviews and annual audits of real estate companies, consider that your clients are operating in an overall uncertain economy in which the housing market is slowing. This situation may directly or indirectly affect both residential and commercial real estate. You should gain an understanding of this environment to adequately plan and perform the audit, keeping in mind each segment of the real estate market may respond in differing ways to changes in the economy and specifically the housing market. For example, the multifamily market will often improve at the expense of the housing market while other markets may suffer along with the housing market. Many clients may experience effects related to shifts in demand, collectibility of accounts receivable, or valuation of their investments.

.67 In the "Regulatory and Legislative Issues" section, two ongoing issues were presented that could potentially affect the real estate industry in a great way. If either financial institutions were allowed into real estate development and management, or financial institutions significantly change their current real estate lending practices, increased competition and decreased availability of financing could occur, which may adversely affect your clients both operationally and financially. It is important that auditors keep abreast of current issues such as these to properly plan and perform the audit including identifying new or changing audit risks based upon each engagement's unique characteristics.

Evaluating Audit Risks

.68 Your evaluation of audit risk should start with a solid understanding of your client's business. To develop this understanding, you should be knowledgeable about the company's strategies for dealing with business conditions—both current conditions and those most likely to exist in the near future. In the real estate industry, business conditions vary greatly across property types and geographic markets. The risks associated with the development and management of office space are different from those faced by a company involved in the residential housing market. Even the risks associated with being in a strong performing office market such as Dallas-Fort Worth are different from risks associated with office market operations in Westchester County, New York, where vacancy rates are very high. A warehouse facility in the Northeast may face different issues than does a similar facility located on the Pacific Coast, and a company operating in the hospitality market in a region that has fully recovered from September 11, 2001, will operate differently than one in a region such as Boston or San Francisco still trying to recover to pre-September 11, 2001, levels. For this reason, you should be knowledgeable about property types and the markets in which your clients operate.

.69 Audit risk can be altered when a real estate company enters into new property types or new geographic markets. You should be aware that current economic conditions might force your real estate clients to expand beyond their traditional sphere of operations. During audit planning, you should identify new property types or geographic locations and carefully assess the risks associated with the client's change in operating strategy.

.70 In March 2006, the AICPA Auditing Standards Board (ASB) issued eight Statements on Auditing Standards (SASs), No. 104 through No. 111, collectively referred to as the risk assessment standards. The new standards will change many of the planning and risk assessment procedures auditors perform during an audit. Further discussion of the risk assessment standards is included in the "Recent Auditing and Attestation Pronouncements and Related Guidance" section of this Alert.

Auditing Estimates

.71 The real estate industry uses estimates in a variety of ways. For example, supplemental current values of real estate assets and the recognition and measurement of impairment losses both require management to make estimates of future events or assumptions about current conditions.

.72 When auditing estimates, you should be familiar with SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), and Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.73 As previously discussed, certain segments of the real estate industry are currently in decline. In these segments, management may feel increasing pressure to produce positive financial results. Certain estimates, for example, expected future cash flows used in the determination of possible asset impairment, require management to make assumptions about future events and conditions. Be skeptical of cash flow and other performance projections that assume overly optimistic upward trends will occur.

.74 Pay close attention to the underlying assumptions used by management when auditing accounting estimates. Management is responsible for making the estimates included in the financial statements. Those estimates may be based in whole or in part on subjective factors, such as judgment based on experience with past as well as current events, and with conditions it expects to exist. You should be alert to the possibility of management's overreliance on economic information based on favorable conditions to predict future outcomes.

Transactions Involving Off-Balance-Sheet Arrangements, Including Variable Interest Entities

.75 For a variety of legitimate business reasons, many real estate companies create and use affiliated entities to facilitate, among other things, leasing arrangements and joint ventures. These separate entities are often created for asset protection and income and estate tax planning purposes. Typically, these entities have multiple owners and, very commonly, the entities are owned by related parties. For example, real estate developers often form separate legal entities to own property to be developed in order to isolate the developer's other assets from the project to be developed in the event the project was unsuccessful. In the past, reporting entities have not been consolidating these affiliated entities into the financial statements unless they had a "controlling interest" in the entities, defined as more than 50 percent ownership of the voting interests. Since many of the affiliated entities are not formed as voting interest entities, the accounting literature did not require entities to consolidate the affiliated entities. As a result, in many circumstances, commonly controlled (and other related) entities were not reflected in one set of financial statements. Essentially, rather than reflecting assets, liabilities, revenues, and expenses within the financial statements, the notes to financial statements included a disclosure of transactions between and among the related entities.

New Principles for Consolidation

.76 In January 2003, the FASB issued Interpretation No. (FIN) 46, *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*. Many variable interest entities had commonly been referred to as special-purpose entities or off-balance-sheet structures, but the guidance applies to a larger population of entities (referred to as variable interest entities [VIEs]). In December 2003, the FASB issued a revision to FIN 46 (with the same title) to clarify some of the provisions in the original document. The revised document (FIN 46(R)) was issued in response to input received from constituents regarding certain issues arising in implementing the original FIN 46. FIN 46(R) requires an analysis and consideration of consolidation in circumstances in which "substantive control" is evidenced by attributes and factors other than direct equity ownership. FIN 46(R) expands the definition of related parties, and requires the consolidation of certain insufficiently capitalized entities that are connected to the reporting entity through certain contractual or other interests. The interpretation incorporates a "principles-based" model that is used in determining when entities need to be consolidated. Examples of "connects" between and among reporting entities that could trigger the consolidation provisions within the new literature include:

- Equity investments in the affiliated entity
- Guarantees of the value of assets or liabilities of the affiliated entity
- Contracts to purchase assets or equity from the affiliated entity
- Contracts for services with the affiliated entity
- Synthetic lease agreements involving the affiliated entity
- Transfers or sales of assets to the affiliated entity

- Structures designed to house assets in the affiliated entity
- Providing administrative services for the affiliated entity
- Having loans to/from the affiliated entity

.77 Essentially, FIN 46(R) contains the requirement that we "look through" the form of transactions and arrangements and analyze the substance of the "connects" between and among affiliated entities. If there is an effort to structure a deal to circumvent the spirit of this accounting guidance, then the odds are significant that a variable interest in an affiliated entity exists and the entity would be a VIE subject to consolidation. FIN 46(R) became effective for private companies in calendar year 2005.

Importance in Real Estate

.78 FIN 46(R) already has had and will continue to have a significant impact on accounting in the real estate industry. Real estate entities subject to VIE evaluation include:

- Tax credit entities
- Homebuilders lot option contracts
- Traditional real estate joint ventures and partnerships
- Investors in those structures could also qualify as a "variable interest" and be primary beneficiaries under FIN 46(R). This could include:
  - Equity investors
  - Debt or loan providers
  - Developers
  - Real estate management companies
  - Leasing companies
  - Others with options to acquire either shares in the entities or assets of the entity

Potential VIE Real Estate Structures

.79 Typical of the structures that could qualify as VIEs are the tax credit entities. These are affordable housing partnerships, or U.S. Department of Housing and Urban Development (HUD) structures, as well as historic development partnerships. The former develops lower income housing and other projects; the latter is involved in the restoration of historical sites. These attract investors because of the tax benefits they offer. Since rents are set by formula, there is minimal profit or cash flow to the investor. So the incentive is to secure tax credits against future tax liabilities. There are also depreciation credits that can be realized, and those become tax deductions. A lot of these structures are turning out to be VIEs, because of the nonrefundable up-front fee paid by the entity, or others involved with the entity, to the developer investor (often the general partner) for services which return their initial capital investment.

.80 Also turning out to be VIEs are legal structures that are established for homebuilder lot options contracts. These enable landowners to put their land into a separate entity and then find buyers and builders. The buyer pays the owner a nonrefundable deposit on the land and has the option of developing sections of that property in future years. The option contract results in the builder, who has the right to the land, becoming a variable interest holder under FIN 46(R) and thus may have to consolidate.

.81 A third group of entities being affected is joint ventures and partnerships. Such entities generally divide into three categories:

1. Joint ventures that are set up to construct and sell properties. The participants usually include the developer, a provider of capital such as a bank, and an investor with sources of large development funds.

2. Joint ventures that construct and keep developed properties. Joining the participants in these entities are property managers as the partnership's purpose is to build, lease, and manage residential and commercial developments.

3. Joint ventures that invest in already constructed properties with the intention to resell those properties.

.82 These structures often include a "buy-sell clause" that controls the coming and going of investment partners in the venture or restrictions on the owner's ability to sell or transfer interest in the venture (known as a transfer restriction). This establishes a "related party concept" under FIN 46(R) and means that the entity is likely to be a VIE and that one of the partners will be the consolidating primary beneficiary.

New Consolidation Guidance Adds Another Dimension

.83 Beyond FIN 46(R), the real estate industry has to be aware of another interesting change in the landscape regarding consolidation accounting. For those non-VIE ventures, the newly amended AICPA SOP 78-9, *Accounting for Investments in Real Estate Ventures*, provides new guidance on whether a general partner controls a real estate venture. The issuance of FASB Staff Position (FSP) SOP 78-9-1, *Interaction of AICPA Statement of Position 78-9 and EITF Issue No. 04-5*, must be applied to all old and new non-VIE real estate ventures. FSP SOP 78-9-1 starts with the presumption of control by the general partners and provides two specific criteria for determining whether limited partners have either substantive "kick-out rights" or "substantive participating rights." This FSP removes the previous concepts of "important rights" in SOP 78-9 and conforms that guidance to the newly issued Emerging Issues Task Force (EITF) Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights."

.84 The bottom line is that the real estate industry has another twist in consolidation accounting that applies to all non-VIE real estate ventures and many expect that the amended guidance would result in more partnerships consolidated by the general partner.

Synthetic Leases

.85 During the economic expansion of the late 1990s, synthetic leases became a popular form of financing for real estate entities. As the steamrolling economy fueled corporate expansion, companies looked for ways to take real estate off of their balance sheet and free up capital. And the synthetic lease was one way of doing this.

.86 However, FIN 46(R) will have a major impact on synthetic leases. Companies with existing synthetic leases will need to either consolidate these entities or convert them to another structure (for example, a sale-leaseback).

.87 As a result of FIN 46(R), you should review your client's participations in synthetic leases to evaluate whether they have been accounted for properly.

Recent Technical Practice Aids Related to FIN 46(R)

.88 The AICPA recently issued a number of Technical Practice Aids related to FIN 46(R). These and other Technical Practice Aids can be assessed online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/recent_tpas.htm.

Sales of Condominiums

.89 In September, the FASB's EITF tentatively concluded that the continuing investment criterion in FASB Statement No. 66, *Accounting for Sales of Real Estate*, must be met to recognize profit on a percentage-of-completion basis for condominium sales. The tentative conclusion is addressed in EITF Issue No. 06-8, "Applicability of the Assessment of a Buyer's Continuing Investment under FASB Statement No. 66, *Accounting for Sales of Real Estate*, for Sales of Condominiums."

.90 Many homebuilders and lodging companies are entering into the condominium development market. Since condominium projects are generally long term in duration, individual units of the condominium are often sold during the construction phase. Paragraph 5 of FASB Statement No. 66 states the following:

> Profit on real estate transactions shall not be recognized by the full accrual method until all of the following criteria are met:
>
> a) A sale is consummated.
>
> b) The buyer's initial and continuing investments are adequate to demonstrate a commitment to pay for the property.
>
> c) The seller's receivable is not subject to future subordination.
>
> d) The seller has transferred to the buyer the usual risks and rewards of ownership in a transaction that is in substance a sale and does not have a substantial continuing involvement with the property.

.91 FASB Statement No. 66 provides specific guidance on the application of the consummation of a sale and the seller's continuing involvement for condominium projects. These two criteria may not be met for individual condominium units sold during the construction phase of the project because of the long-term nature of condominium development projects.

.92 FASB Statement No. 66 requires a condominium developer to recognize profit from the sale of individual condominiums during the construction phase on a percentage-of-completion basis if specified criteria are met, including collectibility of the sales price. The EITF's tentative conclusion would require a developer to evaluate a buyer's continuing investment during the construction period and to conclude that the condominium sales price was collectible before recognizing profit during the construction period.

.93 If adopted as a ratified consensus, this tentative conclusion would be effective for the first annual reporting period beginning after March 15, 2007. Early adoption would be permitted as of the beginning of the entity's fiscal year. Entities that have not accounted for sales of condominiums in a manner that is consistent with the consensus would recognize a cumulative effect adjustment to beginning retained earnings or to other components of equity or net assets. Comments received will be discussed at the November 16, 2006, EITF meeting.

Lease Accounting

.94 FASB Statement No. 13, *Accounting for Leases*, has been in existence for many years and is critical for accounting for leases in real estate. As discussed in the prior year's Alert, a number of Securities and Exchange Commission (SEC) registrants recently restated their financial statements relating to lease accounting. Specifically, restatements occurred related to the amortization of leasehold improvements; recognition of rent when lease terms of an operating lease contain what is referred to as rent holidays; and incentives related to leasehold improvements. The Chief Accountant of the SEC issued a letter in February 2005 to the AICPA's Chairman of the Center for Public Company Audit Firms. The letter clarified the SEC staff's interpretation of certain accounting issues and their application under generally accepted accounting principles (GAAP) relating to operating leases. The letter focused on specific concerns regarding the appropriate accounting for operating leases; restatements resulting from the correction of errors that deviate from the lease accounting standards; and clear and concise disclosures of both operating and capital leases. Non-SEC registrants should also ensure compliance with the lease accounting standards and related interpretations set forth by the FASB and make any necessary restatements or corrections.

.95 In November 2005, the AICPA issued a Technical Practice Aid on lease accounting to clarify the requirements in the existing accounting standards. The Technical Practice Aid can be accessed at www.aicpa.org/download/acctstd/LEASE_TPAs_5600.07.pdf. It is considered nonauthoritative and not a source of established accounting principles. Issues discussed include the following:

- Lease term for accounting purposes
- Lease term for accounting purpose that differs from term stated in the lease
- Rent expense and rent revenue in an operating lease (general, scheduled increase in rental space, rent holiday, and scheduled rent increases)
- Amortization/depreciation of leasehold improvements in an operating lease
- Leasehold improvements and lease term in an operating lease
- Landlord incentive allowance in an operating lease
- Cash flows statement presentation of landlord incentive allowance in an operating lease

.96 In July 2006, the FASB took two major steps regarding lease accounting. First, the FASB announced that it was formally opening a project to reconsider the current accounting standards for leases. The goal of this project is to develop principles that would faithfully represent lease transactions in the financial statements of lessees and lessors and would reflect similarities and differences in the wide variety of leasing arrangements prevalent today. This project will be conducted jointly with the International Accounting Standards Board (IASB). Many expect the FASB to shift away from permitting off-balance-sheet treatment of many leases to an assets and liabilities model, which would put most leases on the lessee's balance sheet. The first major milestone of the project will be a Preliminary Views document expected to be released for constituent comment in 2008.

.97 Second, the FASB issued FSP FAS 13-2, *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction*. This FSP amends FASB Statement No. 13 and applies to all transactions classified as leveraged leases in accordance with FASB Statement No. 13. Leveraged leases can provide significant tax benefits to the lessor, and the timing of cash flows relating to income taxes generated by a leveraged lease is an important assumption that affects the periodic income recognized by the lessor for the lease. The FSP will require companies to recalculate their leveraged leases if there is a change or projected change in the timing of cash flows relating to income taxes generated by the leveraged lease. In accordance with the FSP, companies must review the projected timing of income tax cash flows generated by a leveraged lease transaction annually or more frequently, if events or changes in circumstances indicate that a change in timing has occurred or is projected to occur. If, during the lease term, the projected timing of the income tax cash flows generated by a leveraged lease is revised, the rate of return and the allocation of income to positive investment years must be recalculated from the inception of the lease. The lessor must update all assumptions used to calculate total and periodic income when the lessor is performing a recalculation of the leveraged lease. The recalculation must include actual cash flows up to the date of the recalculation and projected cash flows following the date of recalculation. The guidance only applies to changes or projected changes in the timing of income taxes that are directly related to the leveraged lease transaction.

.98 The FSP must be applied to fiscal years beginning after December 15, 2006, and certain disclosures are required in the fiscal year of adoption. Earlier application is permitted as of the beginning of an entity's fiscal year, provided that the entity has not yet issued financial statements, including financial statements for any interim period, for that fiscal year. Auditors should refer to the full text of the FSP on the FASB's Web site.

Quantifying Misstatements

.99 On September 13, 2006, the SEC released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. Although the guidance is directed at registrants, it is also important for auditors as they consider and quantify the effects of misstatements in financial statements. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.100 Two approaches have commonly been used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (the rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (the iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but that nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.101 The staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.102 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf. Auditors should note that accounting standards setting bodies are also considering projects to propose concepts similar to those of SAB No. 108 for nonissuers.

Assessing Internal Control Deficiencies

.103 Several audit and accounting issues have been discussed. While considering how these affect your engagements and assessing the associated risks, also consider how your client's internal control affects these potential risks. As discussed in the next section, "Recent Auditing and Attestation Pronouncements and Related Guidance," the ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended.

.104 SAS No. 112 requires the auditor to evaluate identified control deficiencies and determine if they individually or when combined are significant deficiencies or material weaknesses. These terms are defined consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320). The term *reportable condition* is no longer used. The SAS also requires that these communications now be in writing. Common control deficiencies may include:

- Segregation of duties issues (especially common among smaller companies)
- Potential for management override
- Inadequate process and controls over revenue recognition
- Lack of controls over the process by which estimates are determined and recorded
- Lack of a process and controls to properly identify, consolidate, and disclose VIEs

.105 The AICPA has published an Audit Risk Alert entitled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk), which provides an overview of the standard's requirements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance

.106 Presented below is a list of recent auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/. You may also look for announcements of newly issued standards in *The CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org.

.107 The PCAOB establishes auditing and attestation standards for audits of public companies. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2006/07* (product no. 022497kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) Statement on Standards for Attestation Engagements (SSAE) No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20) Issue Date: December 2005 (Not applicable to audits conducted in accordance with PCAOB standards)	These standards established two categories of professional requirements that are identified by specific terms. The words *must* or *is required* are used to indicate an unconditional requirement. The word *should* is used to indicate a presumptively mandatory requirement. (The words *may*, *might*, *could*, and *should consider* represent actions that auditors have a professional obligation to consider.) The provisions of SAS No. 102 and SSAE No. 13 were effective upon issuance. It is the ASB's intention to make conforming changes to AICPA literature over the next several years to remove any language that would imply a professional requirement where none exists.

(continued)

SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue Date: December 2005 (Not applicable to audits conducted in accordance with PCAOB standards)	SAS No. 103 supersedes SAS No. 96, *Audit Documentation*, and amends SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. This SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation. See the "Audit Documentation" section in this Alert.
SASs No. 104 through No. 111, the Risk Assessment Standards Issue Date: March 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	See the "Risk Assessment Standards" section in this Alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue Date: May 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	The new standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. Effective for periods ending on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	This standard: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120); • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316) to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks; • Replaces throughout the SASs *completion of fieldwork* with the term *date of the auditor's report*; and • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report.

SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit, and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication.
SSAE No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attest engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20).
AICPA Technical Practice Aid (TPA) 8100.01–.02 (Nonauthoritative)	"Determining the Effective Date of a New Statement on Auditing Standards for Audits of a Single Financial Statement" and "Determining the Effective Date of a New Statement on Auditing Standards for Audits of Interim Periods"
PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* Issue Date: February 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.
PCAOB Conforming Amendment to AT section 101.04*f*, *Attest Engagements* Issue Date: February 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	*Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting from the Adoption of the Auditing Standard No. 4* The conforming amendment states that Auditing Standard No. 4 must be used for reporting on whether a material weakness continues to exist for any purpose other than a company's internal use.

(continued)

PCAOB Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees Issue Date: April 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The rules include general rules with respect to ethics and independence, restrict certain types of tax services a registered public accounting firm may provide to its audit clients, and prohibit contingent fee arrangements for any services a registered public accounting firm provides to its audit clients, in order to maintain its independence.
PCAOB Report on the Initial Implementation of Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* Issue Date: November 2005 (Applicable to audits conducted in accordance with PCAOB standards only)	This report reaffirmed and amplified previous guidance issued by the PCAOB in May 2005. The report focuses on reasons the PCAOB found audits performed were not always as efficient and effective as Auditing Standard No. 2 intended. The report also explains certain aspects of Auditing Standard No. 2 such as the terms *more than remote* and *strong indicators*.
PCAOB Overview of Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* Issue Date: April 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	This overview provides additional information on the provisions of Auditing Standard No. 4.
PCAOB Staff Questions and Answers, *Adjustments to Prior Period Financial Statements Audited by a Predecessor Auditor* Issue Date: June 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The guidance explains that if prior period financial statements that require adjustments were audited by a predecessor auditor, either the successor auditor or the predecessor auditor may audit the adjustments so long as the auditor is independent and registered with the PCAOB. The guidance continues to address questions regarding when the predecessor auditor audits the prior period financial statement adjustments; when the successor auditor audits the prior period financial statement adjustments; and when the successor auditor has not yet completed an audit of the current period financial statements.

PCAOB Staff Audit Practice Alert No. 1, *Matters Relating to Timing and Accounting for Options Grants* Issue Date: July 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	This issuance was prompted by recent reports and disclosures about issuer practices related to the granting of stock options, including the "backdating" of such grants. The guidance identifies existing standards that could bear on auditors' work and applies them to the issues that have been raised regarding companies' stock option granting practices, but does not establish new requirements.
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

Audit Documentation

.108 In December 2005, the ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). This SAS supersedes SAS No. 96 of the same name. Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.

.109 The SAS also amends paragraphs .01 and .05 of SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530.01 and .05). The amendment requires that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the company's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Consider how this guidance affects the process followed on your engagements including the review of audit documentation and financial statements; obtaining management's representations; and analyzing subsequent events and in turn how this affects the date of the audit report.

Risk Assessment Standards

.110 In March 2006, the AICPA ASB issued eight SASs that provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. The following table lists the eight SASs and their effect on existing standards.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*	Amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU section 230)
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150)
SAS No. 106, *Audit Evidence*	Supersedes SAS No. 31, *Evidential Matter* (AU section 326A)
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	Supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312A)
SAS No. 108, *Planning and Supervision*	Supersedes SAS No. 1, *Appointment of the Independent Auditor* (AU section 310); and supersedes SAS No. 22, *Planning and Supervision* (AU section 311A)
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	Supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	Supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AU section 313); and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling	Amends SAS No. 39, *Audit Sampling* (AU section 350)

Key Provisions of the New Standards

.111 The SASs emphasize the link between understanding the entity, assessing risks, and the design of further audit procedures. The SASs introduce the concept of risk assessment procedures, which are deemed necessary to provide a basis for assessing the risk of material misstatement. Risk assessment procedures, along with further audit procedures, which consist of tests of controls and substantive tests, provide the audit evidence to support the auditor's opinion of the financial statements. According to the SASs, the auditor should perform risk assessment procedures to gather information and gain an understanding of the entity and its environment, including its internal controls. These procedures include inquiries, analytical procedures, and inspection and observation. Assessed risks and the basis for those assessments should be documented; therefore, auditors may no longer default to maximum control risk for an entity's risk assessment without documenting the basis for that assessment. The SASs also require auditors to consider and document how the risk assessment at the financial statement level affects individual financial statement assertions, so that auditors may tailor the nature, timing, and extent of their audit procedures to be responsive to their risk assessment. It is anticipated that generic audit programs will not be appropriate for all audit engagements, as risks vary between entities.

Effective Date and Implementation

.112 The SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006; earlier application is permitted. In most cases, implementation of the SASs will result in an overall increased work effort by the audit team, particularly in the year of implementation. It also is anticipated that to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

New Companion Audit Guide

.113 In December 2006, the AICPA will publish the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This Guide will help auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The Guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Recent Independence and Ethics Pronouncements

.114 The AICPA *Independence and Ethics Alert—2006/2007* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this Alert to be aware of independence and ethics matters that will affect their practice.

.115 The AICPA general *Audit Risk Alert—2006/07* and other AICPA industry-specific Alerts contain summaries of recent pronouncements not included here. To obtain copies of other AICPA Alerts, contact AICPA Service Center Operations at (888) 777-7077 or go online at www.cpa2biz.com.

Recent Accounting Pronouncements and Related Guidance

.116 Presented below is a list of recent accounting pronouncements and related guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *The CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance

The Committee of Sponsoring Organizations of the Treadway Commission (COSO) *Internal Control Over Financial Reporting—Guidance for Smaller Public Companies*	The guidance provides a set of 20 basic principles representing the fundamental concepts associated with and drawn directly from the five components of internal control described in the COSO Internal Control Framework.

On the Horizon

.117 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the real estate industry or that may result in significant changes. Read the AICPA general *Audit Risk Alert—2006/07* for a more complete list of ongoing auditing and accounting projects. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or generally accepted auditing standards (GAAS).

.118 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonpublic Companies

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.119 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*, *for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles.* The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed Statement, which can be obtained at www.fasb.org.

Proposed SSAE Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.120 In January 2006, the ASB issued a revised exposure draft of a proposed SSAE that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). In May 2006, the PCAOB announced plans to amend certain aspects of PCAOB Auditing Standard No. 2 to improve its implementation. Because the forthcoming changes to the PCAOB Standard will be relevant to the revision of AT section 501, the ASB has decided to defer to issuance of final revised AT section 501 until the PCAOB issues their amendments and the ASB has time to consider them.

Auditing Pipeline—Public Companies

.121 Guidance issued by the PCAOB is included in the section of this Alert entitled "Recent Auditing and Attestation Pronouncements and Related Guidance." For pending projects for both the PCAOB and the SEC, readers may refer to the *SEC and PCAOB Alert—2006/07* (product no. 022497kk), mentioned previously.

Accounting Pipeline

.122 Presented below are accounting pronouncements currently in the exposure process. Some of the proposed pronouncements discussed in the prior year Alert have not been finalized as of the date of this writing, and thus are included again below.

Proposed FASB Statement, The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115

.123 The fair value option project has two phases. This proposal represents Phase 1, which addresses the fair value option for certain financial assets and financial liabilities. Phase 2 will consider permitting the fair value option for certain nonfinancial assets and nonfinancial liabilities and some of the financial assets and financial liabilities excluded from the scope of Phase 1.

.124 The proposed Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur. The proposed Statement has specific financial presentation requirements to display fair values and those values that are measured using other measurement techniques. The proposed Statement would amend FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, to require that securities reported at fair value in accordance with FASB Statement No. 115 satisfy the specific financial statement presentation requirements. The planned effective date is for fiscal years beginning after December 15, 2006. Visit the FASB Web site at www.fasb.org for additional information.

Proposed FASB Statement, Earnings Per Share—an amendment of FASB Statement No. 128

.125 This proposed Statement would amend FASB Statement No. 128, *Earnings per Share*, to clarify guidance for mandatorily convertible instruments, the treasury stock method, contracts that may be settled in cash or shares, and contingently issuable shares. Specifically, the proposed Statement would:

- Amend the computational guidance for FASB Statement No. 128 for calculating the number of incremental shares included in diluted shares when applying the Treasury Stock method.
- Eliminate the provisions of FASB Statement No. 128 that allow an entity to rebut the presumption that contracts with the option of settling in either cash or stock will be settled in shares.
- Require that shares that will be issued upon conversion of a mandatorily convertible security be included in the weighted-average number of ordinary shares outstanding used in computing basic earnings per share from the date when conversion becomes mandatory.

Proposed FASB Statement, Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140

.126 The exposure draft *Accounting for Transfers of Financial Assets* (Transfers Project) is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*. The proposed Statement seeks to:

1. Clearly specify the permitted activities of a qualifying special-purpose entity (QSPE).
2. Address practice issues related to which arrangements should be considered and how they should be considered in the legal isolation analysis.
3. Eliminate the prohibition on a QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor.
4. Revise the methodology used to initially measure at fair value interests related to transferred financial assets held by a transferor.
5. Clarify guidance related to when rollovers of beneficial interests are permitted within a QSPE.

.127 At its July 26, 2006 meeting, the FASB decided to combine the servicer discretion project (which addressed issues relating to the waiver of due-on-sale, collateral substitution, and foreclosed asset activities) into the Transfers Project. The FASB expects to issue a final Statement, which would amend FASB Statement No. 140, in the second quarter of 2007. See the FASB Web site for complete information.

Proposed FASB Statements, Business Combinations—a replacement of FASB Statement No. 141, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries—a replacement of ARB No. 51

.128 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. Among the main proposals is that:

1. All acquisitions of businesses be measured at the fair value of the business acquired.
2. Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
3. Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.129 Exposure drafts on business combinations—purchase method procedures and noncontrolling interests—were issued on June 30, 2005. Auditors should visit the FASB Web site for expected issuance dates.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.130 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69 (AICPA, *Professional Standards*, AU sec. 411). However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonpublic Companies" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

FASB Project on Derivative Disclosures

.131 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities,* has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, allowing a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft was issued on December 8, 2006, entitled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment deadline is March 2, 2007. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. The proposed disclosures will be effective for both interim and annual reporting periods ending after December 15, 2007, with early application encouraged. At initial adoption, disclosures for earlier periods presented for comparative purposes will be encouraged but not required. Disclosures for earlier periods presented for comparative purposes will be required beginning in the first year after the year of initial adoption. Auditors can monitor the progress of this project on the FASB's Web site.

Proposed FASB EITFs and FSPs

.132 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.133 ***Proposed FASB Staff Positions.*** A number of proposed FASB Staff Positions are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

Resource Central

.134 The following are various resources that practitioners engaged in the real estate industry may find beneficial.

Publications

.135

- Audit and Accounting Guide *Common Interest Realty Associations* (2006) (product no. 012576kk). This Guide summarizes applicable practices and delivers "how-to" advice for handling almost every type of financial statement. It describes relevant matters, conditions, and procedures unique to realty associations, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.
- Audit and Accounting Guide *Construction Contractors* (2006) (product no. 012586kk). This Guide describes relevant matters, conditions, and procedures unique to realty associations, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.
- Audit and Accounting Guide *Guide for the Use of Real Estate Appraisal Information* (1997) (product no. 013159kk). This Guide is as of May 1, 1997, and describes relevant matters, conditions, and procedures unique to the real estate industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.
- Audit Guide *Analytical Procedures* (product no. 012556kk). You'll receive guidance on the effective use of analytical procedures with an emphasis on analytical procedures as substantive tests. This 2006 Guide includes SAS No. 56 concepts and definitions, a questions and answers section, an illustrative case study, and a new appendix that includes useful financial ratios.
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2006) (product no. 012526kk). In this Guide, you'll find an overview of derivatives and securities in addition to case studies to help you better understand how to audit derivative instruments.
- Audit Guide *Auditing Revenue in Certain Industries* (2006) (product no. 012516kk). This Guide assists auditors in fulfilling their professional responsibilities with regard to auditing assertions about revenue. In this edition you'll find:

— Discussions on responsibilities of management, boards of directors, and audit committees for reliable financial reporting;

— Summaries on key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP or GAAS updated for SAS No. 99;

— Circumstances and transactions that may signal improper revenue recognition; and

— Procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition.

- Audit Risk Alert *Construction Contractors Industry Developments—2006/07* (product no. 022317kk). This Alert is intended to provide auditors of construction contractors with an overview of recent economic, industry, technical, and professional developments that may affect the audits they perform.

- General *Audit Risk Alert—2006/07* (product no. 022337kk). This Alert will help you plan and perform your audits by identifying the significant business risks that may result in the material misstatement of your client's financial statements.

- *Compilation and Review—2006/07* (product no. 022307kk). This Alert updates CPAs on recent practice issues and professional standards that affect these types of engagements.

- *Independence and Ethics—2006/07* (product no. 022477kk). This Alert will inform you of recent developments in the area of independence and ethics for accountants. Specifically, this Alert will help you understand your independence requirements under the AICPA Code of Professional Conduct and certain other rule-making and standard-setting bodies. A compact "plain English" digest of AICPA independence rules is also included. This alert includes information on guidance on the performance of nonattest services to attest clients, SEC independence rules, PCAOB independence and ethics activities, and Government Accountability Office (GAO) independence rules.

- *SEC and PCAOB Alert—2006/07* (product no. 022497kk). This Alert will prove useful for accountants working in public companies, auditors of public companies, or just the interested accountant who would like to remain current on issues affecting public companies. This Alert provides preparers and auditors with a detailed overview of recent developments at the SEC and PCAOB with respect to financial reporting and auditing matters.

- *Checklist and Illustrative Financial Statements for Real Estate Ventures* (2006) (product no. 008977kk). This practice aid is invaluable to anyone who prepares financial statements and reports for real estate ventures. These disclosure checklists have been designed to help you prepare financial statements and assist you in determining the adequacy of disclosures in the financial statements you're auditing.

- *Checklist and Illustrative Financial Statements for Common Interest Realty Associations* (2006) (product no. 008907kk). This practice aid is invaluable to anyone who prepares financial statements and reports for common interest realty associations. These disclosure checklists have been designed to help you prepare financial statements and assist you in determining the adequacy of disclosures in the financial statements you're auditing.

- *Audit and Accounting Manual* (2006) (product no. 005136kk) is developed exclusively for small- and medium-size CPA practices. This unique manual explains and demonstrates useful techniques and procedures for conducting compilation, review, and audit engagements—from planning to internal control to accountants' reports.

- *Accounting Trends & Techniques, 60th Edition* (product no. 009898kk). This is the must-have resource for any CPA who frequently creates or uses financial reports. Filled with current reporting techniques and methods used by the nation's top organizations, this 650-page AICPA bestseller will provide the guidance you need to improve your accounting preparation and procedures.

AICPA reSOURCE: Accounting and Auditing Literature

.136 AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library—that's available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www. cpa2biz.com.

Continuing Professional Education

.137 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Among the many available titles, related to real estate, is a self-study course, *Real Estate Accounting and Auditing*, by Michael Ramos (product no. 730606kk). Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.138 AICPA CPExpress (formerly InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to real estate company auditors are:

- *Planning the Audit of a Real Estate Entity's Financial Statements*
- *Auditing Real Estate Transactions*
- *Accounting for the Impairment of Completed Real Estate Projects*

.139 To register or learn more, visit www.cpa2biz.com.

Webcasts

.140 Stay plugged in to what's happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in on the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.141 The CFO Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting, to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.142 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what's "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what's important. A must for both preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Satisfaction Center

.143 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.144 Do you have a complex technical question about GAAP, other comprehensive bases of accounting (OCBOA), or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.145 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Real Estate Conference

.146 The AICPA sponsors an annual National Real Estate Conference in the fall. The Real Estate Conference is a two-day conference designed to update attendees on recent developments related to real estate accounting and auditing, tax, and management issues. It delivers solid news about the latest trends in the real estate market while offering new ideas for the accounting and financial management of the real estate industry. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

Web Sites

.147 The Internet covers a vast amount of information that may be valuable to auditors of real estate entities, including current industry trends and developments, market forecasts and analyses by property type, comparative financial and nonfinancial data (capitalization rates, occupancy statistics, and planned future development).

.148 Some of the more relevant sites for auditors with real estate clients include those shown in the following table:

Organization	Web Site
Colliers International	www.colliers.com
Grubb & Ellis Company	www.landauer.com
Hospitality Trends	www.htrends.com
Institute of Real Estate Management	www.irem.org
Lodging Econo*metrics*	www.lodging-econometrics.com
National Association of Realtors	www.realtor.org
National Association of Real Estate Investment Trusts	www.nareit.com
National Multi Housing Council	www.nmhc.org
Reis, Inc.	www.reis.com
The Real Estate Roundtable	www.rer.org
Torto Wheaton Research	www.twr.com
Urban Land Institute	www.uli.org

.149 The real estate practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

.150 This Audit Risk Alert replaces *Real Estate Industry Developments—2005/06.*

.151 The Audit Risk Alert *Real Estate Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to aeubanks@aicpa.org or write to:

Auto Dealership Industry Developments—2005/06

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
AUTO DEALERSHIP INDUSTRY DEVELOPMENTS—2005/06

This Audit Risk Alert is intended to provide auditors of auto dealerships with an overview of recent economic, industry, technical, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in AU sec. 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the auditing standards.

If an auditor applies the auditing guidance included in an *Other Auditing Publication*, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. This publication was reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA, and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Acknowledgements

The AICPA staff would like to thank J. Russell Madray for his development and preparation of this Alert. In addition, the AICPA staff wishes to thank Randal Lund who provided his valuable review.

How This Alert Helps You

.01 This Audit Risk Alert is intended to help you plan and perform your dealership audits. The knowledge that this Alert delivers can assist you in achieving a more robust understanding of the business environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the auto dealership industry, and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert can assist you in making considerable strides in gaining that industry knowledge.

.03 This Alert describes trends and issues facing most dealerships in many of the markets in the country. Although this Alert focuses on the automobile dealership, the topics discussed here often can be applied to other types of dealerships, including boats, heavy trucks, farm machinery, and recreational vehicles. National trends and industry-wide benchmarks can help you identify unusual financial statement relationships at the planning or final review stages of an audit. Once they are identified, you can direct your audit attention to those areas. However, broad national trends have their limitations. Keep in mind that your clients will be affected much more by local economic, political, and industry conditions that exist in the specific markets your clients serve.

.04 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2005/06* (product number 022336kk).

.05 ***References to Professional Standards***. When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, SAS No. 54 is referred to as AU section 317 of the AICPA *Professional Standards*.

New Auditing and Attestation Pronouncements and Other Guidance

.06 Presented below is a list of auditing, attestation, and quality control pronouncements and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards, quality control standards, and other guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm and the PCAOB Web site at www.pcaobus.org (public company audits only). You may also look for announcements of newly issued standards in *The CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, "In Our Opinion," issued by the AICPA's Auditing Standards team and available at www.aicpa.org/members/div/auditstd/opinion/index.htm.

AICPA Audit Interpretation No. 1 of AU section 328, *Auditing Fair Value Measurements and Disclosures*, and AICPA Audit Interpretation No. 1 of AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (July 2005) (Not applicable to audits conducted in accordance with PCAOB standards)	"Auditing Interests in Trusts Held by a Third-Party Trustee and Reported at Fair Value," and "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist," respectively.

Industry and Economic Developments

.11 The sale of vehicles continues to constitute a significant portion of the U.S. economy, securing the importance of the role dealerships play in the national economy and local communities as well. In auditing a dealership, you should be aware of the general economic, regulatory, and professional developments that may affect your client. This section details some of the economic developments specific to the auto dealership industry.

Dealership Results in 2004

.12 The nation's franchised new car and light truck dealers recorded their fourth strongest year on record in 2004, selling 16.86 million vehicles, up from 16.6 million in 2003, according to National Automobile Dealers Association (NADA) Data, a comprehensive annual analysis compiled by NADA. Total dealership dollar sales volume exceeded $714 billion in 2004, up from $699 billion in 2003. Generous incentives, a recovering economy, relatively low borrowing rates, and enhanced dealership services contributed to the industry's moderate growth last year.

.13 According to the NADA Data report, the light truck category grew for the twelfth consecutive year, accounting for a record 8.3 million units sold, or 55.5-percent market share. The popularity of vans, pickups and, in particular, crossover utility vehicles (CUV), drove the light truck gains. CUV, van, and pickup sales continued to grow in the first quarter of 2005.

.14 The number of franchised new vehicle dealerships in the U.S. dropped very slightly in 2004 by 10 to 21,640. In addition, auctions continue to increase in importance as a source of used cars at dealerships, from less than 10 percent in the early 1980s to 33 percent in 2004.

New Vehicle Department

.15 New vehicle sales totaled 16.86 million units in 2004—almost 2 percent higher than in 2003. On a seasonally adjusted annual rate (SAAR) basis, sales volume was at or above 17 million units during the second quarter of 2004. Sales dropped off in October and November, but after a resurgent incentive campaign, sales recovered in December to reach 18.3 million units on a SAAR basis for the month. The popularity of vans, pickups, and, in particular, CUVs helped boost light-duty truck sales for the twelfth consecutive year to an all-time-high of 8.3 million units. Light trucks outsold cars, boosting their market share to more than 55.5 percent of total light vehicles sold in 2004. The average selling price of a new vehicle, including accessories and options, increased by 1.8 percent in 2004, after rising by 5.4 percent in 2003.

Used Vehicle Department and Service and Parts

.16 Dealers sold almost 20 million used vehicles last year. Of these, 11.8 million were retailed, and 7.9 million were wholesaled. The average selling price of a used unit retailed in 2004 was $14,250. New-car dealers acquired 55 percent of the used units they retailed from trade-ins and the remaining 45 percent from auctions, street purchases, or other sources. As a source of used cars, auctions have made the biggest inroads in the past decade—from less than 10 percent of the dealer's inventory in the early 1980s to 33 percent in 2004.

Service, Parts, and Body Shop

.17 Service and parts sales reached almost $85.5 billion in 2004, up slightly from 2003. In recent years, increased competition from independent service stations and quick-lube centers has cut into dealerships' service work, but dealers are fighting back. Last year's increase in service sales was powered by a strong light-vehicle market, a technologically advanced vehicle population, and more miles driven on average. New-car dealers have made a major investment in service and parts to beef up sales and customer satisfaction. Data from 2004 show that they provided 369,125 service stalls, employed 279,150 technicians, and carried a parts inventory valued at $5.6 billion.

.18 In recent years, more dealerships have opted to remain out of the body-shop business. Still, the total amount of body repair work performed by dealerships operating body-shop facilities continued its upward trend in 2004. Auto body work performed by all dealerships increased to just under $10 billion last year.

Finance, Insurance, and Service Contracts

.19 Aftermarket income (combined gross income from finance and insurance (F&I) and service contracts) was 26.2 percent of new and used vehicle department gross in 2004—up from 25.2 percent in 2003. This increase stemmed partly from more attention being paid to F&I by public groups and consolidators, higher finance penetration rates for both new and used cars, and a greater emphasis on customer satisfaction in F&I. Improvement in vehicle quality helped to bring a drop in service contract penetration from a high of 35.0 percent in 1986 to 20.1 percent in 1998. Nevertheless, it jumped in 2004 to 34.1 percent—the highest level since 1988. The increase was aided by a relatively low leasing rate during the year, innovative service plans, and the increased attention to F&I.

The Current Economic Environment

.20 Although no single variable can determine how the auto dealership industry will perform over time, history has shown that many economic factors influence buying decisions, such as disposable personal income; consumer confidence; the relationship between car prices, the rate of inflation, and real wage growth; and the availability, cost, and average maturity of consumer credit. Given the interrelationship of automobile sales and the economy, auditors of dealerships will benefit from having an understanding of general economic conditions and recent events that impact the general economy.

The Effect of Hurricane Katrina

.21 The physical and psychological damage caused by Hurricane Katrina (Katrina) is likely to reverberate across the global economy in ways that will curb growth well into 2006. Most economists predict, however, that Katrina will slow down, but not derail, U.S. economic growth.

.22 Katrina damaged approximately 230 General Motors, Ford, and Daimler Chrysler dealerships across the Gulf Coast, according to NADA. In Louisiana, about 60 auto dealerships that were severely damaged by Katrina remained closed as of September 2005, almost all of which were in the New Orleans area. Approximately 18,000 vehicles on Louisiana dealers' lots were destroyed, according to NADA. In addition, the storm put approximately 3,400 Louisiana dealership employees out of work.

.23 A spike in already-high energy costs in the United States and around the world tops the list of economic risks, especially since oil prices are unlikely to return to the levels of early 2004, when they were 50 percent lower than they are today. Katrina shut down large portions of oil and gas production in the Gulf of Mexico at a time when worldwide energy output was already stretched thin. Although the storm's impact was most acute in the United States, it also sent fuel costs higher around the globe, squeezing consumers in Europe and Asia and hurting everyone from truckers to fishermen to airlines. Nevertheless, most analysts agree that the sharp increase in gasoline prices was a "temporary disruption." Several refineries and pipelines are already back in operation. Initially, 25 percent of U.S. crude oil production and a large portion of refining capacity were knocked out by the storm. Much of the pressure on oil supplies has been relieved by the release of 60 million barrels from emergency supplies. The full extent of the damage to oil and natural gas infrastructure in the Gulf of Mexico is not yet known, but it is expected to be some time before output is back to normal. The same goes for the facilities that refine crude oil into gasoline, heating oil, and jet fuel.

.24 The storm also wiped away up to half a million jobs in New Orleans and other Gulf Coast areas. And the total cost to rebuild is almost certain to top $100 billion, only about a quarter of which is covered by insurance, according to an assessment by Risk Management Solutions of Newark, CA. The federal government has pledged billions of dollars of rebuilding funds, but it will take months for the basic recovery efforts to be completed before the money for reconstruction starts flowing. In Katrina's aftermath, economists believe that Hurricane Katrina could trim economic growth by a full percentage point in the second half of the year as soaring gasoline prices force consumers to cut back spending in other areas. In particular, higher gas prices have led some consumers to rethink their purchases of SUVs and other vehicles that are not fuel efficient. According to NADA, rising gas prices and a shift to more fuel-efficient vehicles hurt sales of SUVs in September 2005. GM sales fell 24 percent in September 2005 from a year earlier, and Ford sales fell 19.5 percent.

.25 However, the overall economic blow may not be as bad as first feared. Treasury Secretary John Snow and Federal Reserve Chairman Alan Greenspan have stated that it would not have a significant long-term effect on the U.S. economy, although growth will be slowed for a short period. Snow described the impact of the hurricane as mind-boggling and acknowledged that the U.S. economy is facing a challenging time. Still, he added that the adverse effect on economic growth would not exceed three to four months, given the inherent strength of the economy.

Current Economic Conditions of Auto Dealership Industry

.26 2004 ranked fourth among the best six years ever for new-unit sales by franchised new vehicle dealers. Sales in all departments increased for the year, and the U.S. economy grew by 4.4 percent in 2004, well ahead of the 3 percent growth observed in 2003. Consumer confidence measures rose through the second quarter of 2004 to peak in July, but modest employment gains, volatile energy prices, and conflict and political unrest in the Middle East were major concerns for the second half of 2004. Early 2005 showed modest improvements in consumer confidence, as vehicle sales were to be driven by generous incentives, such as cash rebates, low-rate financing, and attractive lease options. Analysts on Wall Street had expected a repeat of 2004 sales, but they came in slightly above NADA's 2005 estimate. In 2005, with a recovering economy and modest gains in employment nationwide, new-car dealers were able to maintain strong light-vehicle sales and profits.

.27 However, retail sales plunged in August 2005 by the largest amount in nearly four years, evidence that the economy was weakening even before Katrina struck. The Commerce Department reported that total sales fell by 2.1 percent in August, doubling the decline that analysts had been expecting. The 2.1-percent drop in total sales in August was the largest decline since a 2.9-percent plunge in November 2001, the period following the 2001 terrorist attacks. The worry is that consumer confidence could be jolted by soaring energy prices and an expected wave of Katrina-related job layoffs. The weakness in overall retail sales came from a 12-percent drop in sales of autos, which followed a 6.3-percent surge in July auto sales, reflecting attractive sales incentives offered to help reduce inventory levels of autos.

.28 AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), requires the use of analytical procedures in the planning and overall review stages of all audits. The following key statistics relating to the overall performance of the U.S. economy may be useful to auditors in applying the provisions of AU section 329:

- Gross domestic product (GDP)—which measures the output of goods and services produced by labor and property located in the United States—increased at a rate of 3.8 percent in the first quarter of 2005, with the second-quarter rate recently revised downward to 3.3 percent. It would not be surprising to see U.S. GDP slow from recent full year 2005 projections of 3.7 percent toward a figure of 3.1 percent. Given recent events, economists are likely to revise down previous bullish and healthy third quarter U.S. GDP estimates (that averaged 4.5 percent) into the 3.0 to 3.5 percent range. However, the fourth quarter is likely to drop to a below-par 2.0 percent pace (or lower)—followed by a slowly recovering U.S. economy in the first half of 2006. Full-year 2006 estimates for U.S. GDP are likely to drop into the 3.1 to 3.3 percent range, from recently published 3.5 to 3.7 percent estimates.
- Consumer confidence,[1] a key predictor of household spending, plummeted in September 2005 after slightly rebounding in August. Katrina, coupled with rising gas prices and a less positive job outlook, pushed consumer confidence to its lowest level in almost two years. Contrary to the historically strong link between consumer confidence and vehicle sales, continuing incentives have helped to keep auto sales strong.
- Unemployment was 5.1 percent in September 2005; the unemployment rate had been trending downward in recent months, but September was the first month that reflected job losses due to Katrina. Auto dealerships continue to play a major role in the nation's employment. In 2004, the payroll for all dealerships combined represented 13 percent of the nation's total retail trade payroll.
- Interest rates have continued to climb from a 46-year low of 1 percent in June 2003. In September, the Federal Reserve raised interest rates for an eleventh consecutive month, to 3.75 percent, despite concerns the economy will slow after Katrina. Even though there are fears that Katrina will negatively affect consumer spending, the biggest driver of the economy, analysts see interest rates rising to between 4 percent and 4.5 percent in the near future. Quarter-percentage-point rate increases are expected to keep a lid on price growth without slamming the brakes on the economy, analysts said.

The Local Economy

.29 Significant local developments may affect dealership performance. Whenever a dealership operates in an area that is experiencing economic pressures, new car sales may be negatively affected. Certain regions may also be vulnerable to economic downturns in major local industries, whereas other regions may be susceptible to various natural disasters. For example, Katrina damaged about 230 Ford, General Motors, and Daimler Chrysler dealerships across the Gulf Coast region. Such events can affect sales in both positive and negative ways. Although the dealerships damaged in the hurricane may experience a downturn in sales, others will see an increase as many people look to replace their lost vehicles.

Relationships With Factories

.30 The factory[2]-dealer relationship can have a tremendous impact on the dealership. In effect, dealers just pass through a product from the factory to the consumer. In addition to providing the vehicles for

---

[1] As measured by the Conference Board. See www.conferenceboard.org for further information.

[2] For the purposes of this section, the word *factories* is synonymous with *manufacturers*.

dealers to sell, factories may also provide dealers' customers with financing or incentives such as factory rebates. In some cases, adverse relationships with the factory may affect the dealership's ability to continue as a going concern—for instance, if the factory discontinues a certain brand of vehicle that was largely profitable for the dealership, or if a dealer cannot meet customer demands because of a factory backlog. In reviewing such relationships, auditors should be aware of their responsibilities pursuant to AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1). AU section 341 states that typical signs of a going-concern issue include the inability to continue to meet obligations as they become due without substantial disposition of assets outside the ordinary course of business, or externally forced revisions of operations. Auditors also should consider whether management has made appropriate financial statement disclosures of concentrations in the available source of supply materials pursuant to SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties.*

Legislative and Regulatory Issues

Bankruptcy Bill

.31 In April, President Bush signed into law major reform legislation that will curb abuses in the bankruptcy system. The legislation marked the culmination of NADA's successful efforts to correct two specific problems faced by dealers.

.32 The first change would extend the federal timeframe (from 20 to 30 days) during which dealers may protect their interest in a vehicle if a consumer files for bankruptcy. The provision to extend the lien perfection period to 30 days will be particularly helpful to dealers with trade-ins since there are often delays beyond the control of dealers because of customers' misplaced titles and out-of-state titlework.

.33 The second change would crack down on debtors who have paid only the market value of the vehicle at the time of bankruptcy, not what is owed. The new law ensures that debtors must pay the contract amount of the loan if a car was purchased within 30 months of bankruptcy.

Repeal of Vicarious Liability Laws

.34 In August 2005, President Bush signed a new transportation bill that supersedes state and local vicarious liability laws. Under the previous vicarious liability laws, injured persons or the estates of persons killed in accidents could sue companies that held leases because the leasing companies were the legal owners of the vehicles. Such laws had forced dealerships to drop leasing in areas in which such laws were in effect, and resulted in multimillion-dollar awards resulting from lawsuits filed against auto makers, banks, and leasing companies whose lessees were involved in accidents. The elimination of vicarious liability will most likely lead to an increase in auto leasing.

Finance and Insurance Employees' Overtime Pay

.35 In decisions that will benefit new car and light truck dealers, the U.S. Ninth Circuit Court of Appeals ruled that F&I employees at dealerships are exempt from overtime pay under the Fair Standards Labor Act (FSLA). The Ninth Circuit opinion involved three cases that considered whether F&I managers, compensated almost entirely through commission, were exempt from the FSLA's overtime pay requirements. The court adopted the Department of Labor's long-standing view of Section 7(i)'s application to F&I employees who have a regular rate of pay of more than 1.5 times minimum wage, earn more than 50 percent of their income from commissions, and are employed by dealerships earning 75 percent of gross revenues from retail sales.

The Federal Trade Commission's Privacy Rule FAQs

.36 The Federal Trade Commission (FTC) has developed a series of frequently asked questions to help auto dealers comply with the Gramm-Leach-Bliley Act and the FTC's Privacy Rule. These frequently asked questions can be viewed at www.ftc.gov/bcp/conline/pubs/buspubs/autoglb.htm. The Privacy Rule applies to car dealers who:

- Extend credit to someone (for example, through a retail installment contract) in connection with the purchase of a car for personal, family, or household use;
- Arrange for someone to finance or lease a car for personal, family, or household use; or
- Provide financial advice or counseling to individuals.

.37 If your client engages in these activities, any personal information that the dealership collects to provide these services is covered by the Privacy Rule. Examples of personal information include someone's name, address, phone number, or other information that could be used to identify them individually. The Privacy Rule applies if the dealership collects personal information about someone in connection with the potential financing or leasing of a car, even if that person does not fill out a formal application. The Privacy Rule does not apply if a person buys a car with cash or arranges financing through another lender.

.38 Other business guidance is available on the FTC's Web site at www.ftc.gov/privacy/privacyinitiatives/financial_rule_bus.html.

New IRS Publications

.39 The Internal Revenue Service (IRS) has issued the *New Vehicle Dealership Audit Technique Guide 2004*. This publication, which received NADA guidance, discusses various tax issues for IRS employees who audit new automobile dealerships. The IRS also released an alert, *Electronic Records Retention Requirements for Auto Dealerships*, which lists common documents dealers will need during most IRS examinations. Both of these IRS publications are available at www.irs.gov.

New Look at the Corporate Average Fuel Economy Standards

.40 A bipartisan group of lawmakers plans to propose legislation that would raise corporate average fuel economy (CAFE) standards for cars and trucks to a combined 33 miles per gallon (mpg) by 2016. The light-truck standard for 2006 is 21.6 mpg. The car standard remains at 27.5 mpg. Under the proposed legislation, fuel economy for light trucks would be based on size and broken into six categories, with smaller vehicles required to be the most fuel-efficient. By 2011, the smallest light truck group would have to average 28.4 mpg, and large trucks would have to average 21.3 mpg. Similar boosts in fuel economy have been proposed in previous years; all were rejected, but gas prices were not more than $3 a gallon previously. In 2005, Congress enacted a comprehensive energy bill that does not include higher fuel economy standards. Nevertheless, the subject has suddenly resurfaced, amid soaring gasoline prices and fuel shortages in the aftermath of Katrina. The proposed legislation is likely to push the auto industry to apply fuel-saving technologies to future light truck and other vehicle models. These technologies would include more hybrid gas-electric vehicles, six-speed automatic transmissions that provide better gas mileage, and air conditioners that run on electricity instead being powered by the gas engine.

Current Audit and Accounting Issues and Developments

Assessing Audit Risks in the Current Environment

.41 The proper planning and execution of an audit have always required the auditor to have an understanding of the auto dealership industry and the nature of the client's business. Such an understanding enhances the auditor's ability to plan and perform auditing procedures. For most audit firms, this understanding means that the most experienced partners and managers must become involved early and often in the audit process.

.42 AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), provides, among other matters, guidance for auditors regarding the specific procedures that should be considered in planning an audit in accordance with generally accepted auditing standards (GAAS). AU section 311 states that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics; and consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit.

.43 You should keep the following points in mind as you plan and perform audits of auto dealerships:

- Understand how your client is affected by changes in the current business environment.
- Understand the stresses on your client's internal control over financial reporting, and how those stresses may affect internal control.
- Identify key risk areas, particularly those involving significant estimates and judgments.
- Approach the audit with objectivity and skepticism, setting aside prior experiences with or belief in management's integrity.
- Pay special attention to complex transactions, especially those presenting difficult issues of form versus substance.
- Consider whether additional specialized knowledge is needed on the audit team.
- Make management aware of identified audit differences on a timely basis.
- Question the unusual and challenge anything that does not make sense.
- Foster open, ongoing communications with management and the audit committee, including discussions about the quality of financial reporting and any pressure to accept less than high-quality financial reporting.
- When faced with a "gray" area, perform appropriate procedures to test and corroborate management's explanations and representations, and consult with others as needed.

Consideration of Fraud

.44 AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), is the primary source of authoritative guidance about an auditor's responsibilities concerning the consideration of fraud in a financial statement audit. AU section 316 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in AU section 110.02, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1). Two types of misstatements are relevant to the auditor's consideration of fraud in a financial statement audit, namely misstatements arising from one of the following:

- Fraudulent financial reporting
- Misappropriation of assets

Considering Fraud Risk Factors

.45 You may identify events or conditions that indicate the incentives and pressures to perpetrate fraud, opportunities to carry out the fraud, or attitudes and rationalizations to justify a fraudulent action. Such events or conditions are referred to as *fraud risk factors*. Fraud risk factors do not necessarily indicate the existence of fraud; however, they coincide with the occurrence of fraud.

.46 Examples of fraud risk factors can be found in Appendix B, "Fraud Risk Factors," of this Alert.

Responding to the Results of the Assessment

.47 AU section 316.46–.67 provide requirements and guidance about your response to the results of the assessment of the risks of material misstatement attributable to fraud. You can respond to risks of material misstatement due to fraud in the following three ways:

1. A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned.
2. A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed.
3. A response involving the performance of certain procedures to further address the risk of material misstatement attributable to fraud involving management override of controls, given the unpredictable ways in which such override could occur.

Evaluating Audit Evidence

.48 AU section 316.68–.78 provide requirements and guidance for evaluating audit evidence. You should evaluate whether analytical procedures that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud. You also should consider whether responses to inquiries throughout the audit about analytical relationships have been vague or implausible, or have produced evidence that is inconsistent with other evidential matter accumulated during the audit.

.49 At or near the completion of fieldwork, you should evaluate whether the accumulated results of auditing procedures and other observations affect the assessment of the risks of material misstatement due to fraud made earlier in the audit. As part of this evaluation, the auditor with final responsibility for the audit should ascertain that there has been appropriate communication with the other audit team members throughout the audit regarding information or conditions indicative of risks of material misstatement due to fraud.

Practical Guidance

.50 The AICPA has issued additional guidance on the implementation of AU section 316, including *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide* (product no. 006613kk), and CPE courses entitled *Fraud and the Financial Statement Audit: Auditor Responsibilities Under SAS No. 99* (product no. 731810), *Auditing for Internal Fraud* (product no. 730237kk), and *Identifying Fraudulent Financial Transactions* (product no. 730245kk).

> **Help Desk**—The AICPA's Antifraud Resource Center, at www.aicpa.org/antifraud, is an online resource providing comprehensive tools, information, and resources devoted to the prevention, detection, and investigation of fraud.

Public Dealerships and the Effects of the Sarbanes-Oxley Act of 2002

.51 Although most auto dealerships are privately held, some are publicly held; therefore, management of these publicly held companies and their auditors must comply with the provisions of the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley). Many experts in the accounting profession also expect Sarbanes-Oxley to have a profound effect on auditors of nonpublic companies in the future, if the legislation ultimately results in similar state legislative changes that apply to auditors of nonpublic companies.

.52 The Act establishes the Public Company Accounting Oversight Board (PCAOB) under the supervision of the Securities and Exchange Commission (SEC) to set auditing, quality control, ethics, independence, and other standards for auditors of public companies. In particular, Sarbanes-Oxley restricts the non-audit services (such as bookkeeping, internal auditing, actuarial services) that an audit firm may provide to public company audit clients. Certain services, such as tax services, may continue to be provided but only with the approval of the client's audit committee. Sarbanes-Oxley also requires the auditors of public companies to report on internal control over financial reporting in conjunction with the financial statement audit. It also increases the penalties for certain crimes, including securities fraud, fraudulent financial reporting, the destruction of key financial or audit documents, and the failure to certify financial statements. It bans personal loans to executives and requires chief executive officers (CEOs) and chief financial officers (CFOs) to reimburse the company for bonuses or other incentive-based or equity-based compensation received if earnings are restated due to securities fraud.

.53 Sarbanes-Oxley also requires the rotation of lead and reviewing audit partners on engagements every five years, and prohibits auditors from auditing public companies whose CEO, CFO, or controller worked for the audit firm during the preceding year.

.54 For further information regarding the Sarbanes-Oxley Act of 2002 and the PCAOB, visit www.pcaobus.org.

Dealer Incentives

.55 To entice customers to buy a new vehicle, dealerships continue to offer special incentives, such as free oil changes or free gas for a certain period of time. The EITF has discussed issues relating to certain sales incentives. Auditors should be aware and understand what incentive programs the dealership has, if any, and what consideration is being received from the vendor (such as cash or free parts) to determine whether any EITF Issues may apply.

.56 EITF Issue No. 01-9, "Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products"),[3] addressed the accounting by a vendor for consideration given to a customer including both a reseller of the vendor's products and an entity that purchases the vendor's products from a reseller. That Issue provided accounting guidance on how a vendor should characterize consideration given to a customer and when to recognize and how to measure that consideration in its income statement.

.57 The following EITF Issues related to the accounting for sales incentives should also be considered:

- EITF Issue No. 00-21, "Revenue Arrangements with Multiple Deliverables." Sometimes, a dealership will offer maintenance service contracts with the purchase of a vehicle. According to EITF Issue No. 00-21, revenue arrangements for the vehicle and the service contract should be divided into separate units of accounting, and the consideration for the vehicle and service contract should be allocated based on their relative fair values.

[3] The purpose of EITF Issue No. 01-9 is to codify and reconcile EITF Issue No. 00-14, "Accounting for Certain Sales Incentives" (paragraphs 10, 16, 22–25, 27, and 28); Issue 3 of EITF Issue No. 00-22, "Accounting for 'Points' and Certain Other Time-Based or Volume-Based Sales Incentive Offers, and Offers for Free Products or Services to Be Delivered in the Future" (paragraphs 30–33); and EITF Issue No. 00-25, "Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products" (paragraphs 9–14 and 16–21). These EITF Issues address the accounting for consideration given by a vendor to a customer (including both a reseller of the vendor's products and an entity that purchases the vendor's products from a reseller.)

- EITF Issue No. 02-16, "Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor." Keep in mind that this EITF issue also covers other types of consideration such as interest credits and other rebates. Manufacturers often agree to grant advertising allowances to a dealership if the dealership advertises the manufacturer's vehicles. According to the guidance outlined in EITF Issue No. 02-16, if the cooperative advertising allowances can be characterized as a reimbursement to the dealership for a specific, incremental, identifiable cost incurred by the dealership, the allowances should be treated by the dealership as a reduction of the advertising costs in the dealership's income statement. Any material excess reimbursement received by the dealership should be treated as a reduction of the cost of sales. If the cooperative advertising allowances cannot be characterized as a reimbursement to the dealership for a specific, incremental and identifiable cost, the dealership should treat the allowances received as a reduction to inventory.

- EITF Issue No. 03-10, "Application of EITF Issue No. 02-16, *Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor*, by Resellers to Sales Incentives Offered to Consumers by Manufacturers."

Variable Interest Entities

.58 FASB Interpretation No. 46, *Consolidation of Variable Interest Entities*, issued in January 2003, affected the reporting of a large number of companies associated with special purpose entities (SPEs), entities established for a specific purpose). The concepts in FASB Interpretation No. 46 were very complex and far-reaching. In December 2003, the FASB issued FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities* (FASB Interpretation No. 46(R)), which revised and clarified certain of the concepts in the original document.

.59 FASB Interpretation No. 46(R) interprets Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements,* which, for approximately half a century, was the principal authoritative literature governing when an investor should consolidate an investee. FASB Interpretation No. 46(R) introduced a number of new concepts into the literature. As described by FASB Interpretation No. 46(R), a variable interest entity (VIE) is an entity for which a controlling financial interest is provided through ownership of interests other than voting stock. Rather, a controlling financial interest arises out of the economics—a holder of variable interests that is either exposed to a majority of the VIE's expected losses or is entitled to a majority of its expected residual rewards is the party with a controlling financial interest, even if none of the interests is in voting common stock. In applying FASB Interpretation No. 46(R), an investor and its related parties must first determine whether they have a variable interest. In essence, almost any asset, liability, or off-balance-sheet contractual arrangement between parties could qualify as a variable interest. However, a variable interest is distinguished from other assets, liabilities, and off-balance-sheet contractual arrangements by virtue of the fact that a variable interest under FASB Interpretation No. 46(R) is one that absorbs the variability in the entity's return.

.60 FASB Interpretation No. 46(R) is complex. Judgment is called for in analyzing entities with which a company has business arrangements to determine if those entities are VIEs and, if so, whether consolidation is required.

.61 If it is decided that a party has a variable interest and it is not immediately clear that the interest is so minor it could not possibly result in that party being required to consolidate the entity in which the variable interest is held, that party must determine whether the entity is a VIE. Paragraph 5 of FASB Interpretation No. 46(R) indicates that an entity is a VIE if any one of the following criteria is met:

1. The total equity investment at risk is insufficient to permit the entity to finance its activities without additional subordinated financial support provided by any parties, including equity holders.
2. As a group the holders of the equity investment at risk lack any one of the following three characteristics of a controlling financial interest:

a. The direct or indirect ability through voting rights or similar rights to make decisions about an entity's activities that have a significant effect on the success of the entity.

b. The obligation to absorb the expected losses of the entity.

c. The right to receive the expected residual returns of the entity.

In some situations, it will be easy to determine if any of these conditions is met. In most circumstances, however, that will not be the case.

Effective Dates

.62 FASB Interpretation No. 46(R) modified the effective date provisions in FASB Interpretation No. 46 as follows:

.63 For public entities that are small business issuers, FASB Interpretation No. 46(R) must be applied to all VIEs no later than the end of the first reporting period that ends after December 15, 2004 (the year ending December 31, 2004, for calendar-year companies), including those VIEs to which FASB Interpretation No. 46 had already been applied (for example, those created after January 31, 2003).

.64 For public entities that are not small business issuers, FASB Interpretation No. 46(R) must be applied to all VIEs no later than the end of the first reporting period that ends after March 15, 2004 (the quarter ending March 31, 2004, for calendar-year companies), including those VIEs to which FASB Interpretation No. 46 had already been applied.

.65 A nonpublic entity is required to apply FASB Interpretation No. 46(R) to all VIEs in which it holds variable interests by the beginning of the first reporting period beginning after December 2004 (January 1, 2005 for a calendar-year company). A nonpublic entity is required to apply FASB Interpretation No. 46(R) immediately to VIEs created after December 31, 2003.

.66 In addition, FASB Interpretation No. 46(R) required public companies to apply either FASB Interpretation No. 46 or FASB Interpretation No. 46(R) to entities that would have previously been evaluated under the accounting literature as SPEs by the end of the first reporting period ending after December 15, 2003.

FASB Staff Positions (FSPs)

.67 The FASB has also issued and proposed several FSPs related to Interpretation No. 46 that may be of interest to auto dealerships and their auditors. One such FSP that may be particularly relevant for auto dealerships is FSP FIN 46(R)-5, *Implicit Variable Interests under FASB Interpretation No. 46 (revised December 2003)*, Consolidation of Variable Interest Entities. Implicit variable interests commonly arise in leasing arrangements among related parties, and in other types of related party arrangements. The identification of an implicit variable interest involves determining whether an enterprise may be indirectly absorbing or receiving the variability of the entity. The determination of whether an implicit variable interest exists is a matter of judgment that depends on the relevant facts and circumstances. For example, an implicit variable interest may exist if the reporting enterprise can be required to protect a variable interest holder in an entity from absorbing losses incurred by the entity. The identification of variable interests (implicit and explicit) may affect (*a*) the determination as to whether the potential VIE should be considered a VIE, (*b*) the calculation of expected losses and residual returns, and (*c*) the determination as to which party, if any, is the primary beneficiary of the VIE. The entire content of FSP FIN 46(R)-5 and other FSPs are available on the FASB Web site at www.fasb.org.

Conclusion

.68 As a result of FASB Interpretation No. 46, you should review your client's participations in VIEs to evaluate whether these entities should be consolidated. In many cases, real estate partnerships, limited liability companies (LLCs), and other entities guaranteed by the operating entity (for example, the auto dealership) or its owner will have to be consolidated. To ensure compliance, review the full provisions of FASB Interpretation No. 46 and the related FSPs when accounting for your clients' partnerships and alliances.

Auto Dealership Merger and Acquisition Activity

.69 Although there haven't been many large transactions in recent years, dealerships are still being bought and sold at a brisk rate, primarily in private transactions in which independent dealer groups are purchasing other privately owned dealers. In 2005, General Motors began encouraging dealer franchises to consolidate under one owner. In addition, Daimler Chrysler AG's Chrysler Group plans to reduce the number of dealerships it has in big-city markets by 20 percent over the next five to seven years, attributable to Chrysler's view that certain urban dealerships are undersized, outdated, or too close to other Chrysler stores; this plan could mean that roughly 240 of Chrysler's 1,200 metropolitan dealerships could be closed or consolidated in future years. Most dealership purchases are asset deals rather than stock deals, and most deals are priced at some multiple of earnings.

Applicable Accounting Guidance

.70 FASB Statement No. 141, *Business Combinations*, addresses financial accounting and reporting for business combinations, including the application of the purchase method, and the accounting for goodwill and other intangible assets acquired.

Asset Valuation

.71 Inventory valuation is typically the most significant aspect of a dealership purchase. Generally, new vehicles are priced at what the purchaser would pay the manufacturer, taking into consideration all credits, incentives, and allowances. Prior-year models are generally discounted. Used vehicles are typically negotiated unit-by-unit, with the seller keeping units that the purchaser does not want and disposing of them at an auction. Parts are typically priced at current factory prices for useable and returnable parts.

.72 In many deals, the real estate is retained by the existing dealer and is leased long-term to the new dealer, with an option to buy in the future. Other deals include the outright sale of the real estate, under which the property is appraised and the fair market value is established. You may consider using the help of a specialist, to ensure the proper valuation of the real estate or other significant account, such as fixed assets. If you require the help of a specialist, you should consider the guidance in AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1).

Possible Internal Control Weaknesses

.73 Subsequent to a merger, management typically reduces personnel and eliminates positions and functions in hopes of saving money and gaining efficiencies. Management may shift personnel to different positions and alter standard operating procedures. By making these changes, however, management may risk creating deficiencies in internal control and in business operations.

.74 You should take these issues into account in their consideration of internal control and their assessment of control risk. These possible gaps and deficiencies in internal control may affect the nature, timing, and extent of audit testing and may represent reportable conditions or weaknesses in internal control that should be communicated to management and the audit committee. Auditors should refer to the guidance set forth under AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*).

Increased Opportunity for Fraud

.75 Employees may have an increased opportunity to commit fraud when entities merge. With major changes in the company's operations, there may be breakdowns in internal control, including the poor segregation of duties and a lack of supervisory reviews, which employees can take advantage of by committing fraud. Furthermore, the bitterness that can follow a merger may trigger some employees to rationalize that the commission of fraud is justified. You should refer to the guidance set forth in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*), when assessing the risk of fraud.

Spring Loading and Premerger Outlays

.76 An entity acquiring another entity may try to worsen the reported financial performance of the purchased company during the period immediately preceding the acquisition date, the *stub period*. By worsening the financial performance of the acquired company before the acquisition, management will find it much easier to report "improved" performance after the acquisition, thus demonstrating the positive effects of the business combination and providing an increase in reported earnings. This practice is often referred to as *spring-loading*. Generally, the practice involves accelerating the purchased company's payment of payables and other obligations, and writing down investments and other assets on the purchased company's books. These practices may not necessarily violate the letter of any GAAP standard.

.77 However, this sort of financial engineering may involve the deliberate inflation of reserves and allowances recorded on the acquired company's books. These inflated reserves are then reversed in the period following the acquisition providing a generous burst of earnings growth. Accounts that can be manipulated in this manner include:

- Reserves for merger costs
- Inventory obsolescence allowance
- Pension allowances
- Restructuring reserves
- Reserves for worker's compensation and medical insurance

You should be on the lookout for these kinds of accounting practices and determine that the appropriate accounting treatment in accordance with GAAP is being followed.

Compliance With the Sarbanes-Oxley Act

.78 Management of public companies may fail to consider the effect of Sarbanes-Oxley and related SEC regulations on the merger. For example, a company may encounter a serious challenge if it acquires a privately held company that has not had to comply with Sarbanes-Oxley. Necessary internal controls may not be in place at the acquired entity. Auditors of public companies need to pay special attention to the proper compliance with Sarbanes-Oxley at the acquired entity and should consider the guidance contained in PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320).

Environmental Liabilities

.79 Certain auto dealerships may face problems with asbestos or other environmental liabilities. In March 2005, the FASB issued FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations—an interpretation of FASB Statement No. 143*. Although the Interpretation is not limited to environmental liabilities, it does address how to account for situations in which environmental liability can be projected.

.80 Under the requirements of the Interpretation, companies must account for the fair value of any future liabilities that attach to an asset, if a reasonable estimate of the fair value of that future liability can be projected. This estimate should include all assets, even if they are not currently scheduled for retirement; this includes assets that will have an environmental liability that will be triggered by a known future event. According to FASB Interpretation No. 47, financial statements are required to reflect any legally required obligations and expenses for environmental remediation, demolition, decommissioning, closure, disposal or recycling that will attach to the property in the future. A company must attempt to estimate the fair value of these future obligations, even if the conditional event in the future that triggers the environmental liability has not yet occurred. If a future event can be reasonably projected, and the costs reasonably estimated, then the liability must be recognized in the current financial statements. If such information is not available at the present time, then that fact and the supporting reasons shall be disclosed.

.81 If an auto dealership is faced with environmental issues, investigation may be required to determine whether the assets are subject to reporting under FASB Interpretation No. 47. Not only will a legal decision have to be made to confirm whether there is any obligation to estimate and report the liability, environmental managers and consultants may also need to estimate the probable costs and timing of the future remediation, closure, disposal or recycling obligations. The Interpretation is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005 for calendar-year companies).

Increasing Use of E-Commerce

.82 The Internet presence of U.S.-franchised new car and light truck dealers reached an all-time high in 2004, according to a survey from the NADA's Industry Analysis Division. NADA's annual survey of Internet utilization found that 94 percent of new car and light truck dealerships have Web sites—up from 93 percent in 2003 and 74 percent in 1999. Of these sites, 98 percent are interactive, with most allowing car shoppers to view stock and manufacturers' suggested retail prices, fill out finance forms, and schedule sales and service appointments. Many others provide customers the convenience of ordering on-line and linking directly to related financial, insurance, and auto sites.

.83 As dealerships venture into e-commerce, auditors need to consider how these ventures will affect the audit. The technological skills required to fully understand the operations of e-business and the manner in which business is transacted may be highly specialized. Therefore, you may need to engage information technology (IT) audit specialists to perform certain procedures. Qualified IT specialists are sometimes available from another part of the firm, such as the consulting division or the internal IT support staff. If not, you may have to go outside your own organization to obtain qualified specialists.

.84 Engaging a specialist for gaining an understanding of internal controls, tests of controls, substantive tests, and analytical procedures requires awareness of guidelines available in the authoritative literature. According to AU section 336.06, specialized assistance is advisable for auditors who:

> …may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain competent evidential matter.

.85 The use of an outside specialist[4] in an e-business context does not absolve the auditor from a certain level of understanding about computers. It is important to plan accordingly when a specialist's services are required, because of the lead time necessary to contract for a specialist's services and the time required for the auditor to obtain the minimum technological knowledge necessary to supervise the specialist. According to AU section 311.10:

---

[4] Note that AU section 336.06 does not apply to specialists who are employed by the firm and are part of the engagement team. AU section 336.06 indicates that the auditor uses the work of the specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions. The specialist does not, however, perform the substantive tests or analytical procedures.

If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should have sufficient computer-related knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified procedures will meet the auditor's objectives; and to evaluate the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The auditor's responsibilities with respect to using such a professional are equivalent to those for other assistants.

Nonmonetary Exchanges

.86 On occasion, a dealership may exchange a vehicle for advertising services. Or, two dealerships may exchange vehicles to meet customer needs or to balance their inventory. These types of trades should be treated as an exchange, and should follow the guidance outlined in Accounting Principles Board (APB) Opinion No. 29, *Accounting for Nonmonetary Transactions*. The guidance in APB Opinion No. 29 is based on the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged. However, APB Opinion No. 29 provided an exception to the basic measurement principle (fair value) for exchanges of similar productive assets. That exception required that some nonmonetary exchanges, although commercially substantive, be recorded on a carryover basis. FASB Statement of Financial Accounting Standards No. 153, *Exchanges of Nonmonetary Assets—an amendment of APB Opinion No. 29,* issued in December 2004, amends APB Opinion No. 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance—that is, transactions that are not expected to result in significant changes in the cash flows of the reporting entity.

.87 In addition, EITF Issue No. 04-13, "Accounting for Purchases and Sales of Inventory with the Same Counterparty," addresses how to account for two-way exchanges of inventory by entities in the same line of business. EITF Issue No. 04-13 introduces an "in contemplation model," which determines whether acquired inventory that is subsequently sold represents one transaction or two. For example, two auto dealers who enter into simultaneous transactions to buy 10 cars from each other are deemed to be involved in one transaction, while the same dealers who happen to buy each other's cars at an auction are involved in two transactions. The auto dealers who swap cars would be required to record the exchange at the carrying amount of the inventory transferred. In contrast, the auction example would represent two separate transactions, and a gain or loss could be recognized on each sale.

.88 See www.fasb.org for further information on both EITF Issue No. 04-13 and FASB Statement No. 153.

The Use of Swaps

.89 Dealerships continue to use derivatives to manage their financing costs by mitigating their exposure to interest rate risk. As interest rates continue to rise, a growing number of dealers are locking in rates by swapping floating rates for fixed rates. Dealers typically use swaps to stabilize interest costs on real estate loans or floorplan financing. The AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk), defines a swap as follows:

> Swap—a forward-based contract in which two parties agree to swap streams of payments over a specified period of time.

.90 In effect, they exchange the investment performance of one underlying instrument for the investment performance of another instrument without exchanging the instruments themselves.

.91 The two main types of swaps are interest rate swaps and exchange rate swaps. An interest rate swap occurs if two parties agree to exchange interest payments on a set principal amount for a specified period of time. For example, if an entity pays a variable rate of interest under the swap and receives a fixed rate of interest under the swap, the entity actually pays or receives only the net amount under the swap. The most common form of an interest rate swap entails the exchange of streams of fixed rate and variable interest payments. Interest rate swaps are often used because they allow the borrower to borrow in a readily accessible market yet obtain the type of debt they need via the swap. Swaps are also used to hedge existing debt obligations.

.92 Other examples are basis swaps in which both rates are variable but are tied to different index rates, and fixed-rate currency swaps, whereby two counterparties exchange fixed-rate interest in one currency for fixed-rate interest in another currency.

.93 If your client is financing with swaps, you should become familiar with what a swap is and how to audit such financial instruments.

.94 Keep in mind that FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, applies when accounting for swaps. When auditing swaps, AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA *Professional Standards*, vol. 1), should be followed.

.95 The following are potential misstatements relating to swaps:

- Failure to identify the swap
- Failure to properly document the hedge and the expectation of hedge effectiveness
- Hedge not highly effective on an ongoing basis, so that hedge accounting is no longer appropriate
- Assessment of hedge effectiveness inconsistent with the risk management strategy documented for the particular hedging relationship
- Dealership not assessing hedge effectiveness for similar hedging strategies in a similar manner, and not documenting such differences
- Incorrectly determining the fair value of the swap and the bonds
- Incorrectly computing and recording interest and accrued interest on the bonds
- Inadequate financial statement presentation and disclosure

.96 The following are inherent risks related to swaps:

- The transaction requires no initial cash outlay, and, therefore, detection of the derivative may be difficult.
- Management may not have a valuation model capable of valuing the interest rate swap and may instead rely on the broker-dealer who arranged the transaction for the valuation of the swap.
- Credit risk related to the swap is moderate and is primarily related to the risk of nonperformance by the counterparty.

Vehicle Leasing

.97 Vehicle leasing began to make a modest comeback in 2004. Leasing peaked in 1999 with a 25-percent penetration of total sales of 17.4 million cars and trucks. The low point was 2003 when 13 percent of 16.9 million vehicle deliveries were leases. But the lease numbers are nudging up; about 2 million vehicles, or

14.2 percent, were leased in 2004. Leasing will increase to 16.5 percent in 2005 and hit 20 percent in a few years, according to Automotive Lease Guide.

.98 As interest rates rise and as residual values stabilize, leasing becomes more attractive. But the terrific lease terms of yesteryear will remain a memory. Back then, auto makers subsidized leasing to move the cars and build customer loyalty with low monthly leasing payments. The strategy was structured on overly optimistic forecasts that vehicle residual values would be higher than they actually turned out to be. That led to millions of dollars lost as predicted values collided with real values.

.99 Hefty sales incentives of the last four years also converted many lessees into buyers. Lease terms today are higher than before because they are built on a more realistic prediction of what a vehicle will be worth at the end of the lease. Manufacturers also do a better job of remarketing off-lease vehicles, especially through certified used-car programs that fetch higher prices for reconditioned three- and four-year-old vehicles with low mileage and warranties.

.100 In most cases, a dealer lease arrangement is treated as a typical sales transaction because the dealership does not maintain the lease but transfers it to a manufacturer's financing subsidiary. The dealership records a sale to the financing institution and the financing institution obtains a vehicle subject to a lease and the responsibility to account for the lease transaction.

.101 Dealerships may, however, retain vehicle leases and lease new vehicles under either a sales-type lease or an operating lease. If a long-term lease meets the criteria established by FASB Statement No. 13, *Accounting for Leases*, the leasing transaction is treated as a sale.

.102 Many leases establish a mileage charge in addition to the minimum lease payments. These are considered contingent payments under FASB Statement No. 13 and are not included in the minimum lease payments. Accordingly, they do not enter into the calculation of the sales price of a sales-type lease. Instead, they are recognized when they are determined to be receivable. FASB Statement No. 13 requires that the total contingent rentals included in income be disclosed in the financial statements. (See EITF Issue No. 98-9, "Accounting for Contingent Rent," for guidance on how lessors and lessees should account for contingent rental income that is based on future specified targets.)

.103 Dealerships may also enter into operating leases, some of which are long-term leases that do not meet the criteria established in FASB Statement No. 13 for sales-type leases. Others are short-term rentals to benefit customers whose vehicles need repair.[5] In these cases, rental revenue is recognized as it is earned. Many floorplan arrangements allow the dealer to pay off a portion of the debt every month for these vehicles.

.104 For operating leases, auditors should consider whether management has complied with the provisions and disclosures required by FASB Statement No. 13.

.105 Auditors may also wish to select a sample of the new leases and review selected lease agreements. Auditors may also wish to understand all relevant terms of the lease agreements, to ensure that management has properly accounted for the transactions, including the calculation of receivables and interest income for sales-type leases. Further, auditors may consider confirming the principal balance with the lessee for sales-type leases.

Showroom Lease Accounting

.106 Some auto dealers are heavily spending on new and refurbished showrooms to entice customers with upscale amenities. According to NADA, approximately one-third of one percent of U.S. dealers have

[5] The same accounting is usually used for loaners except that there is no rental revenue. Many dealerships include loaners under inventory in their financial statements.

made significant improvements to showrooms, service, and waiting areas in 2004 and 2005, with an emphasis on business centers for customers and showroom upgrades. Domestic automakers in particular have been pushing auto dealers to improve their facilities to help boost lagging sales.

.107 In January 2005, the SEC issued an interpretation clarifying its position on certain accounting issues and their application under GAAP relating to operating leases. Of specific concern was the appropriate accounting for (1) the amortization of leasehold improvements by a lessee in an operating lease with lease renewals, (2) the pattern of recognition of rent when the lease term in an operating lease contains a period where there are free or reduced rents (commonly referred to as *rent holidays*), and (3) incentives related to leasehold improvements provided by a landlord/lessor to a tenant/lessee in an operating lease.

.108 The staff's views on these issues were as follows:

- *Amortization of Leasehold Improvements.* The staff believes that leasehold improvements in an operating lease should be amortized by the lessee over the shorter of their economic lives or the lease term, as defined in paragraph 5(f) of FASB Statement No. 13, as amended. The staff believes amortizing leasehold improvements over a term that includes assumption of lease renewals is appropriate only when the renewals have been determined to be "reasonably assured," as that term is defined in FASB Statement No. 13.

- *Rent Holidays.* The staff believes that pursuant to the response in paragraph 2 of FASB Technical Bulletin 85-3, *Accounting for Operating Leases with Scheduled Rent Increases*, rent holidays in an operating lease should be recognized by the lessee on a straight-line basis over the lease term (including any rent holiday period) unless another systematic and rational allocation is more representative of the time pattern in which leased property is physically utilized.

- *Landlord/Tenant Incentives.* The staff believes that (1) leasehold improvements made by a lessee that are funded by landlord incentives or allowances under an operating lease should be recorded by the lessee as leasehold improvement assets and amortized over a term consistent with the guidance in the first bullet above; (2) the incentives should be recorded as deferred rent and amortized as reductions to lease expense over the lease term in accordance with paragraph 15 of FASB Statement No. 13 and the response to Question 2 of FASB Technical Bulletin 88-1, *Issues Relating to Accounting for Leases*, and therefore, the staff believes it is inappropriate to net the deferred rent against the leasehold improvements; and (3) a registrant's statement of cash flows should reflect cash received from the lessor that is accounted for as a lease incentive within operating activities and the acquisition of leasehold improvements for cash within investing activities.

.109 Although the SEC only directed its interpretation to public registrants, the accounting guidance outlined by the SEC also applies to privately held companies. To the extent that dealerships have deviated from the lease accounting standards and related interpretations set forth by the FASB, those dealerships, in consultation with their independent auditors, should assess the impact of the resulting errors on their financial statements to determine whether restatement is required. The SEC staff believes that the positions noted above are based upon existing accounting literature and dealerships who determine their prior accounting to be in error should state that the restatement results from the correction of errors or, if restatement was determined by management to be unnecessary, state that the errors were immaterial to prior periods.

.110 Registrants in particular should ensure that the disclosures regarding both operating and capital leases clearly and concisely address the material terms of and accounting for leases. Registrants should provide basic descriptive information about material leases, usual contract terms, and specific provisions in leases relating to rent increases, rent holidays, contingent rents, and leasehold incentives. The accounting for leases should be clearly described in the notes to the financial statements and in the discussion of critical accounting policies in management's discussion and analysis (MD&A) if appropriate. Known likely trends or uncertainties in future rent or amortization expense that could materially affect operating results or cash flows should be addressed in MD&A. The disclosures should address the following:

- *Material lease agreements or arrangements.* The essential provisions of material leases, including the original term, renewal periods, reasonably assured rent escalations, rent holidays, contingent rent, rent concessions, leasehold improvement incentives, and unusual provisions or conditions.
- The accounting policies for leases, including the treatment of each of the above components of lease agreements.
- The basis on which contingent rental payments are determined with specificity, not generality.
- The amortization period of material leasehold improvements made either at the inception of the lease or during the lease term, and how the amortization period relates to the initial lease term.

Lending

.111 The average new car loan term has jumped to nearly 62 months. With longer loans, negative equity becomes an issue. Also, new-car incentives, such as "employee pricing," have hurt used-car prices and trade-in values. When consumers look to purchase a new vehicle, their negative equity may get rolled into new loans.

.112 If the dealership provides the customer with financing and the note is sold to a financial institution, that institution generally pays a fee to the dealership. If a customer prepays or defaults on the note, the financial institution may charge back a portion of the fee to the dealership.

.113 In determining whether a dealership should recognize financing income, auditors should assess management's consideration of FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*.

.114 Auditing Interpretation No. 1, "The Use of Legal Interpretations As Evidential Matter to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140," of AU section 9336.01–.21, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance regarding the use of a legal specialist's findings as audit evidence to support management's assertion that a transfer of financial assets meets the legal isolation criterion of paragraph 9(a) of FASB Statement No. 140. The Auditing Interpretation addresses when the use of a legal specialist's work may be appropriate; factors that should be considered in assessing the adequacy of the legal response; and the use, as audit evidence, of legal responses that are restricted to the client's use. The Interpretation includes the form of letter that adequately communicates permission for the auditor to use the legal specialist's opinion for the purpose of evaluating management's assertion as well as sample language that does not adequately communicate such permission.

.115 In December 2003, the AICPA issued SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*, which provides guidance on the proper accounting for loans acquired by purchase and in other transfers (including used automobile retail sales contracts) that show evidence of deteriorating credit quality since origination and for which it is probable, at acquisition, that the purchaser will be unable to collect all contractually required payments receivable. The guidance generally precludes accretion (or recognition) of purchase discount income when actual collections equal those that were expected when the loans were acquired. Additionally, a valuation allowance is required when actual collections are less than those expected at the time of acquisition. Only when actual cash flows exceed those that were expected at the time of acquisition, can the finance company recognize such differences into income subject to certain limitations. The ability to apply these rules is largely dependent on having reasonable expectations about the timing and amount of cash flows that can be expected to be collected at the time the loans are acquired. Therefore, finance companies will need to perform more extensive financial analysis prior to acquiring the loans and more accurately predict portfolio losses that will be expected over the remaining life of the portfolio.

.116 This accounting guidance applies when loans are acquired either by a related finance company (from its affiliated dealership) or from unrelated dealer operators. This SOP only affects reported financial results when the finance company reports separately from its related dealership, since transactions addressed by the SOP are eliminated when reporting the combined results of the finance company and the related dealership together. If applicable, this SOP must be applied prospectively in reporting financial results for years beginning after December 15, 2004.

Pension Plans

.117 Many companies in a variety of industries have underfunded defined-benefit plans whereby the obligations owed to retirees exceed the assets in the plans. These companies are faced with infusing large amounts of cash into these plans to maintain legal requirements; as a result, many companies have opted to terminate their pension plans. Management should continually monitor the key assumptions used in measuring pension benefit obligations, returns on plan assets, and periodic service cost. Principal actuarial assumptions include discount rates, participation rates, and factors affecting the amount and timing of future benefit payments. FASB Statements No. 87 and No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, indicate that each assumption shall reflect the best estimate with respect to that individual assumption on the applicable measurement date.

.118 When auditing accounting estimates, auditors should pay close attention to the underlying assumptions used by management. AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), provides guidance on obtaining and evaluating sufficient evidential matter to support significant accounting estimates used in a client's financial statements. Practical guidance on auditing estimates is also available in the AICPA Audit and Accounting Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk).

.119 In addition, in December 2003, the FASB issued revised FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits—an amendment of FASB Statements No. 87, 88, and 106*. This FASB Statement applies only to defined-benefit pension plans and other postretirement benefit plans, but does not apply to defined contribution or multiemployer plans. The FASB Statement requires additional disclosures about pension plans and other postretirement benefits. Auditors should understand the requirements of FASB Statement No. 132(R) to determine whether management has complied with those requirements.

Employee Stock Options

.120 Certain auto dealerships issue stock options to their employees as part of their compensation. Issuing equity instruments makes a lot of sense, partly because of the favorable accounting treatment and partly because the use of equity conserves cash and generates capital.

.121 In reaction to increased scrutiny from the press, Congress, regulators, and others, the FASB issued a revised standard, FASB Statement No. 123(R), in December 2004. The FASB Statement addresses the accounting for employee stock options, and accounting for transactions in which a company incurs liabilities that are based on the fair value of the company's equity instruments or that may be settled by issuing equity instruments in exchange for employee services. The FASB Statement only affects employee stock options and related liabilities; it does not affect the accounting for similar transactions involving parties other than employees. It also does not affect the accounting for employee stock ownership plans (ESOPs), which are subject to SOP 93-6, *Employers' Accounting for Employee Stock Ownership Plans.* Generally, the approach in the

FASB Statement is similar to the approach described in FASB Statement No. 123, *Accounting for Stock-Based Compensation*. However, the Statement requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values.

.122 The main purpose of this FASB Statement is to recognize the cost of employee services received in exchange for equity instruments and related liabilities in an entity's financial statements. Key provisions of the FASB Statement are as follows:

- For public entities, the cost of employee services received in exchange for equity instruments is measured using the fair value of those instruments on the grant date. The compensation cost is then recognized over the requisite service period (usually the vesting period). Generally, no cost is recognized if the equity instruments do not vest.

- For public entities, the cost of employee services received in exchange for liabilities is initially measured at the fair value of the liabilities, and then remeasured at each reporting date through the settlement date. The pro rata change in the fair value of the liability during the requisite service period is recognized over that period. After the requisite service period is complete, the change in fair value is recognized in the financial statements in the period of the change.

- On the grant date, the estimated fair value of employee stock options and similar instruments is determined using options pricing models (unless observable market prices are available).

- If an equity award is modified after the grant date, incremental compensation cost is recognized. This amount is the difference between the fair value of the modified award and the fair value of the original award immediately before the modification.

- If the terms of employee share purchase plans are no more favorable than those available to all holders of the same class of shares, and substantially all employees can participate on an equitable basis, those plans are not considered compensatory.

- Excess tax benefits, as defined by the FASB Statement, are treated as additional paid-in capital. Cash retained as a result of those benefits is reported in the statement of cash flows as cash from financial activities. The write-off of deferred tax assets as a result of unrealized tax benefits associated with recognized compensation is reported as income tax expense.

- The FASB Statement allows nonpublic companies to elect to use the intrinsic method to measure the cost of employee stock options and similar instruments, as well as liability instruments. Public companies may also use the intrinsic method if it is not reasonably possible to estimate grant-date fair value.

- The notes to the financial statements of all entities should include information that users need to understand the nature of employee stock options and similar instruments and the effect of those instruments on the financial statements.

.123 In April 2005, the SEC adopted a rule amending the compliance dates for FASB Statement No. 123(R). The new rule does not change the accounting that the FASB Statement requires, but it does allow companies more time to implement it. Originally, the deadline was the beginning of the first interim or annual period after June 15, 2005, or December 15, 2005, for small business issuers. The SEC now requires implementation no later than the beginning of the first fiscal year after those dates. For example, calendar year-end companies, excluding small business issuers, do not have to comply with FASB Statement No. 123(R) until the first quarter of 2006. However, companies with a June 30 year-end, excluding small business issuers, must comply with the Statement's requirements beginning July 1, 2005.

.124 The SEC also issued Staff Accounting Bulletin (SAB) No. 107, *Share-Based Payment*, in April 2005, to help public companies implement the provisions of FASB Statement No. 123(R). The SAB does not alter any conclusions in FASB Statement No. 123(R), but states that amounts represented in financial statements for stock option expenses are highly judgmental estimates. For example, because the grant-date fair value estimate required by FASB Statement No. 123(R) is not intended to predict the ultimate value realized by an option holder, the staff will not object to reasonable fair value estimates made in good faith, even if subsequent events indicate other estimates would have been more accurate. See the SEC Web site at www.sec.gov/interps/account/sab107.pdf for complete information.

.125 You should continue to follow the developments of this FASB Statement and discuss its implications with your auto dealership clients if they issue stock options. For information on this FASB Statement and other accounting standards issued subsequent to this Alert, please refer to the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in *The CPA Letter* and *Journal of Accountancy*.

Disaster Recovery Resources

.126 In August 2005, Katrina devastated several states along the Gulf Coast of the United States, took many lives, and caused considerable damage to entities. In its effort to provide financial reporting guidance on accounting and disclosures of losses from natural disasters, AICPA staff identified certain accounting and auditing issues and provided a road map to relevant accounting literature for use by the nongovernmental entities that will assist preparers and practitioners. In addition, the AICPA issued three technical practice aids that relate to Katrina and other natural disasters:

- AICPA Technical Practice Aid 9070.05, "Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor's Report But Before Issuance of the Auditor's Report and Related Financial Statements"
- AICPA Technical Practice Aid 8345.01, "Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster"
- AICPA Technical Practice Aid 8345.02, "Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster"

.127 In addition, the FASB noted that losses that resulted from the destruction of Hurricane Katrina are not extraordinary events; therefore, dealerships affected by the hurricane will not be able to exclude costs related to the hurricane when reporting their financial results. According to the FASB, "as tragic as hurricanes and other natural disasters are for everyone affected, unfortunately every year many businesses across the country are affected by these types of events and thus they do not represent an unusual and infrequent occurrence to businesses or to insurers." Additional disaster recovery resources are available at www.aicpa.org.

On the Horizon

.128 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. You should check the appropriate standard-setting Web sites (listed below) for a complete picture of all accounting and auditing projects in progress. Presented below is brief information about certain projects that are expected to result in final standards in the near future. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.129 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

Standard-Setting Body	*Web Site*
AICPA ASB (Note that for audits of public companies, the PCAOB sets auditing standards.)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
FASB	www.fasb.org
Governmental Accounting Standards Board (GASB)	www.gasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm
PCAOB	www.pcaobus.org

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Auditing Pipeline—Nonpublic Companies

.130 The standards discussed in this section would not apply to the audits of public companies. Readers should keep abreast of the status of the following projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Eight Statements on Auditing Standards Related to Audit Risk

.131 In October 2005, the AICPA's ASB voted to ballot eight new Statements on Auditing Standards (SASs) relating to the auditor's risk assessment process. One open item, dealing with materiality, is yet to be resolved. The ASB believes that the requirements and guidance provided in the SASs would result in a substantial change in audit practice and in more effective audits. The primary objective of the SASs is to enhance auditors' application of the audit risk model in practice by requiring:

- More in-depth understanding of the entity and its environment, including its internal control, to identify the risks of material misstatement in the financial statements and what the entity is doing to mitigate them.
- More rigorous assessment of the risks of material misstatement of the financial statements based on that understanding.
- Improved linkage between the assessed risks and the nature, timing, and extent of audit procedures performed in response to those risks.

.132 The eight SASs consist of:

- *Amendment to "Due Professional Care in the Performance of Work," of Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures
- *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards
- *Audit Evidence*

- *Audit Risk and Materiality in Conducting an Audit*
- *Planning and Supervision*
- *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
- *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
- *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling

.133 The SASs establish standards and provide guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. In addition, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit.

Proposed SAS, Communication of Internal Control Related Matters Noted in an Audit

.134 This proposed SAS will supersede SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), and significantly strengthen the quality of auditor communications of such matters in audits of nonpublic companies. Readers should be alert for the issuance of a final standard in the first quarter of 2006.

SAS, Audit Documentation

.135 In October 2005, the ASB voted out this new SAS that will supersede SAS No. 96 of the same name (AICPA, *Professional Standards*, vol. 1, AU sec. 339), and establish standards and provide guidance to an auditor of a nonissuer on audit documentation for audits of financial statements or other financial information being reported on. In developing this SAS, the ASB considered the documentation requirements of PCAOB Auditing Standard No. 3, *Audit Documentation*; the International Auditing and Assurance Standards Board's exposure draft, ISA 230, *Audit Documentation*, issued in September 2004; suggestions received from the National Association of State Boards of Accountancy; and *Government Auditing Standards* (GAS, also referred to as the Yellow Book) issued by the Comptroller General of the United States.

.136 In addition to the SAS, the ASB voted out amendments to SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530.01 and .05). The amendment requires that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient competent audit evidence to support the opinion on the financial statements. The ASB also voted out an amendment to SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150.05). The amendment adds a requirement for the auditor to document his or her justification for a departure from the SASs in the working papers.

SAS, Defining Professional Requirements in Statements on Auditing Standards, *and Statement on Standards for Attestation Engagements*, Defining Professional Requirements in Statements on Standards for Attestation Engagements

.137 In October 2005, the ASB voted out a SAS entitled *Defining Professional Requirements in Statements on Auditing Standards* and a Statement on Standards for Attestation Engagements (SSAE) entitled *Defining Professional Requirements in Statements on Standards for Attestation Engagements*. The SAS and SSAE define the terminology the ASB will use to describe the degrees of responsibility that the requirements impose on the auditor or the practitioner.

Proposed SSAE, Reporting on an Entity's Internal Control Over Financial Reporting

.138 This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). Specifically, guidance is provided regarding the following:

- Conditions that must be met for a practitioner to accept an engagement to examine the effectiveness of an entity's internal control and the prohibition of acceptance of an engagement to review such subject matter
- Engagements to examine the design and operating effectiveness of an entity's internal control
- Engagements to examine the design and operating effectiveness of a portion of an entity's internal control (for example, internal control over financial reporting of an entity's operating division or its accounts receivable)
- Engagements to examine only the suitability of design of an entity's internal control (no assertion is made about the operating effectiveness of internal control)
- Engagements to examine the design and operating effectiveness of an entity's internal control based on criteria established by a regulatory agency

.139 Readers should be alert for the issuance of a final standard in the fourth quarter of 2005.

Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.140 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www.fasb.org.

Auditing Pipeline—Public Companies

PCAOB Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist

.141 In July 2005, the PCAOB adopted a standard that applies when auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary stand-alone engagement that would be performed at the company's request. This standard facilitates implementation of the requirements of Section 404 of the Act and provides for additional assurance regarding the reliability of public company financial reporting. The standard will not take effect unless approved by the SEC.

PCAOB Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees

.142 In July 2005, the PCAOB adopted certain ethics and independence rules addressing tax services, contingent fees, and certain related general ethics and independence standards. The rules further strengthen the auditor's responsibilities in connection with seeking audit committee pre-approval of tax services. The rules also treat registered public accounting firms as not independent of their audit clients if they (1) enter into contingent fee arrangements with those clients, (2) provide services related to marketing, planning, or opining in favor of a confidential transaction's tax treatment or a tax treatment on a transaction that is based on aggressive interpretation of tax laws, or (3) provide tax services to members of management who serve in financial reporting oversight roles at an audit client or to immediate family members of such person. The rules also include a general obligation requiring a registered public accounting firm to be independent of the firm's audit clients throughout the audit and professional engagement period. The rules will not take effect unless approved by the SEC.

Accounting Pipeline

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.143 This proposed FASB Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA Statement on Auditing Standards No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The proposed FASB Statement would be effective for fiscal periods beginning after September 15, 2005. Readers should be alert for the issuance of a final FASB Statement, which is expected in the third quarter of 2005.

Proposed FASB Statements, Business Combinations, *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.144 In these proposed FASB Statements, the Board plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. That all acquisitions of businesses be measured at the fair value of the business acquired.
2. That substantially all of the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
3. That entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.145 Issuance of the exposure drafts on business combinations—purchase method procedures and noncontrolling interests are expected in mid-2005. The FASB's goal is to issue the two final Standards in the third quarter of 2006. The target effective date for the two proposed FASB Statements is for fiscal years beginning on or after December 15, 2006.

Proposed FASB Statements, Accounting for Transfers of Financial Assets, Accounting for Servicing of Financial Assets, and Accounting for Certain Hybrid Financial Instruments

.146 The exposure draft, *Accounting for Transfers of Financial Assets*, is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed FASB Statement seeks to (1) clearly specify the circumstances that require the use of a qualifying special-purpose entity (SPE) in order to derecognize all or a portion of financial assets, (2) provide additional guidance on permitted activities of qualifying SPEs, (3) eliminate the prohibition on a qualifying SPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor, and (4) revise the initial measurement of interests related to transferred financial assets held by a transferor. The effective dates associated with this proposed FASB Statement vary; refer to the exposure draft for further information.

.147 The exposure draft, *Accounting for Servicing of Financial Assets*, would also amend FASB Statement No. 140. The proposed FASB Statement would (1) require all separately recognized servicing rights to be initially measured at fair value, if practicable, (2) permit an entity to choose between two measurement methods for each class of separately recognized servicing assets and liabilities, and (3) require additional disclosures for all separately recognized servicing rights. The proposed FASB Statement would be effective for transactions occurring in the earlier of the first fiscal year beginning after December 15, 2005, or fiscal years that begin during the fiscal quarter in which the FASB Statement is issued.

.148 The proposed FASB Statement, *Accounting for Certain Hybrid Financial Instruments*, would amend FASB Statement No. 140, and FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. Specifically, the proposed FASB Statement would:

1. Permit fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation.
2. Clarify which interest-only strips and principal-only strips are not subject to the requirements of FASB Statement No. 133.
3. Establish a requirement to evaluate beneficial interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation.
4. Clarify that concentrations of credit risk in the form of subordination are not embedded derivatives.
5. Eliminate restrictions on a qualifying SPE's ability to hold passive derivative financial instruments that pertain to beneficial interests that are themselves or that contain a derivative financial instrument.

The proposed FASB Statement would be effective after the earlier of fiscal years beginning after December 15, 2005, or fiscal years that begin during the fiscal quarter in which the FASB Statement is issued.

.149 Readers should be alert for the issuance of final FASB Statements, which are expected in the first quarter of 2006. See the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, Fair Value Measurements

.150 In June 2004, the FASB published an exposure draft of a proposed FASB Statement, *Fair Value Measurements*, which seeks to establish a framework for measuring fair value that would apply broadly to financial and nonfinancial assets and liabilities, improving the consistency, comparability, and reliability of the measurements. The fair value framework would clarify the fair value measurement objective and its application under authoritative pronouncements that require fair value measurements. The exposure draft would replace any current guidance for measuring fair value in those pronouncements and would expand current disclosures. Readers should be alert for the issuance of a final FASB Statement, which is expected in the first quarter of 2006. Refer to the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, Earnings per Share—an amendment of FASB Statement No. 128

.151 This proposed FASB Statement would amend the computations guidance in FASB Statement No. 128, *Earnings per Share*, for calculating the number of incremental shares included in diluted shares when applying the Treasury stock method. Also, this proposed FASB Statement would eliminate the provisions of FASB Statement No. 128 that allow an entity to rebut the presumption that contracts with the option of settling in either cash or stock will be settled in stock. In addition, this proposed FASB Statement would require that shares that will be issued upon the mandatory conversion of a convertible security be included in the weighted-average number of ordinary shares outstanding used in computing basic earnings per share from the date when conversion becomes mandatory. Readers should be alert for the issuance of a final FASB Statement, which is expected to be released in the third quarter of 2005.

Proposed FASB Interpretation, Accounting for Uncertain Tax Positions

.152 In July 2005, the FASB published an exposure draft of a proposed FASB Interpretation, *Accounting for Uncertain Tax Positions*, which seeks to reduce the significant diversity in practice associated with recognition and measurement in the accounting for income taxes. It would apply to all tax positions accounted for in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. Specifically, the exposure draft requires that a tax position meet a *probable recognition threshold* for the benefit of the uncertain tax position to be recognized in the financial statements. This threshold is to be met assuming that the tax authorities will examine the uncertain tax position. The exposure draft also contains guidance with respect to the measurement of the benefit that is recognized for an uncertain tax position when that benefit should be derecognized and other matters. The effective date of the proposed FASB Interpretation would be as of the end of the first fiscal year ending after December 15, 2005. A final FASB Interpretation is expected to be released in the fourth quarter of 2005.

Proposed FASB EITF Issues

.153 Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

Proposed FASB Staff Positions

.154 A number of proposed FASB Staff Positions are in progress addressing issues related to FASB Statements No. 13, No. 123(R), and No. 140, and FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others.* Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

AICPA Resource Central

.155 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your auto dealership engagements (product numbers appear in parentheses).

- Audit Guide *Auditing Derivative Instruments, Hedging Activities and Investments in Securities* (012523kk)
- Audit Guide *Auditing Revenue in Certain Industries* (012515kk)
- Audit Guide *Audit Sampling* (012530kk)
- Audit Guide *Analytical Procedures* (012555kk)
- *Accounting Trends & Techniques—2005* (009897kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (006701kk)

Audit and Accounting Manual

.156 The *Audit and Accounting Manual* (product no. 005135kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. The Manual contains numerous practice aids, samples, and illustrations, including audit programs, auditors' reports, checklists, engagement letters, management representation letters, and confirmation letters.

AICPA reSOURCE: Online Accounting and Auditing Literature

.157 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (more than 20), *Audit Risk Alerts* (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to cpa2biz.com.

Educational Courses

.158 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the auto dealership industry. Those courses include (product numbers are in parentheses):

- *AICPA's Annual Accounting and Auditing Update Workshop* (2005 edition) (736181kk, text; 187189kk, DVD; 187089kk, video). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Dealerships: Accounting, Auditing & Tax* (product no. 731204kk). This course is valuable to CPAs working in the automobile dealership industry.
- *The AICPA's Guide to Business Consolidations, Goodwill, and Other Consolidation Issues* (735129kk). Learn how FASB Statements No. 141 and No. 142 have changed the rules for business combinations and goodwill accounting.

Online CPE

.159 *AICPA InfoBytes*, offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. Selected as one of *Accounting Today*'s top 100 products for 2003, AICPA InfoBytes now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA InfoBytes offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com/infobytes.

CPE CD-ROM

.160 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.161 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Technical Hotline and Ethics Hotline

.162 Do you have a complex technical question about GAAP; other comprehensive bases of accounting (OCBOA); accounting, auditing, or compilation engagements; review engagements; or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with their answer. You can reach the Technical Hotline at (888) 777-7077.

.163 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Conferences

.164 Each fall the AICPA sponsors a National Auto Dealership Conference that is specifically designed to update auditors and dealers on significant accounting, auditing, legal, financial, and tax developments affecting the auto dealership industry. Information on the conference may be obtained on the CPA2Biz Web site at www.cpa2biz.com.

Web Sites[6]

AICPA Online and CPA2Biz

.165 AICPA Online, at www.aicpa.org, informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, cpa2biz.com offers you all the latest AICPA products, including more than 15 Audit Risk Alerts, more than 20 Audit and Accounting Guides, the professional standards, and CPE courses.

.166 This Audit Risk Alert replaces *Auto Dealership Industry Developments—2003/04*. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to kglupe@aicpa.org or write to:

Appendix B—Fraud Risk Factors

AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), provides fraud risk factor examples that have been written to apply to most enterprises. Remember that fraud risk factors are only one of several sources of information you consider when identifying and assessing risk of material misstatement due to fraud. Some examples of fraud risk factors that may exist in the auto dealership industry include the following:

- Fraudulent financial reporting, including:
  - — A high degree of competition or market saturation, accompanied by declining margins
  - — High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
  - — Significant declines in customer demand and increasing business failures in either the industry or overall economy
  - — The vehicles produced by the manufacturer have been poorly received for the last few years
  - — Significant financial interests in the entity
  - — Personal guarantees of debts of the entity
  - — There is excessive pressure on management or operating personnel to meet financial targets set up by the board of directors or management, including sales or profitability incentive goals
  - — Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls
  - — Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates
  - — An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons
- Misappropriation of assets, including:
  - — Large amounts of cash on hand or processed (often customers will pay for vehicles or parts with cash or other bearer instruments).
  - — Inventory items that are small in size, of high value, or in high demand (vehicles and parts have value in a secondary market).
  - — Inadequate segregation of duties or independent checks (used vehicle inventory count performed by the used vehicle manager).
  - — Inadequate physical safeguards over cash, investments, inventory, or fixed assets (infrequent counting of used vehicle inventory).

In identifying risks of material misstatement due to fraud, it is helpful to consider the information that has been gathered in accordance with the requirements of AU sections 316.19–.34. Your identification of fraud risks may be influenced by characteristics such as the size, complexity, and ownership attributes of the entity. In addition, you should evaluate whether identified risks of material misstatement due to fraud can be related to specific financial-statement account balances or classes of transactions and related assertions, or whether they relate more pervasively to the financial statements as a whole. Certain accounts, classes of transactions, and assertions that have high inherent risk because they involve a high degree of management judgment and subjectivity also may present risks of material misstatement due to fraud because they are susceptible to manipulation by management.

AAM Section 8220

Government Auditing Standards *and Circular A-133 Audits—2007*

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
***GOVERNMENT AUDITING STANDARDS* AND CIRCULAR A-133 AUDITS—2007**

This Audit Risk Alert is intended to provide auditors who perform audits under *Government Auditing Standards* or Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, with an overview of recent industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits conducted in accordance with *Government Auditing Standards* (GAS or the Yellow Book) or Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133). Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 It is important that you understand what is happening in the *Government Auditing Standards* and OMB Circular A-133 arena if you perform Yellow Book or Circular A-133 audits. This alert assists you in making considerable strides in gaining an understanding of key developments regarding those audits.

.03 Readers of this alert may also find the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk) useful. Further, if you are also performing a financial statement audit of a state, local government, or not-for-profit organization, you should also refer to the following Audit Risk Alerts:

- AICPA Audit Risk Alert *State and Local Governmental Developments* (2007) (product no. 022437kk)
- AICPA Audit Risk Alert *Not-For-Profit Organizations Industry Developments* (2007) (product no. 022427kk)
- AICPA Audit Risk Alert *Health Care Industry Developments* (2007/08) (product no. 022346kk)

.04 These alerts can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in these alerts.

.05 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity, Its Federal Programs, and Assessing the Risks of Material Noncompliance

.06 As noted in SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), an auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. The Audit Risk Alerts titled, *State and Local Governmental Developments* (2007), *Not-For-Profit Organizations Industry Developments* (2007/08), and *Health Care Industry Developments* (2007/08), further discuss the auditor's responsibilities in this area for a financial statement audit.

.07 In a Circular A-133 audit it is also important to understand the entity subject to single audit and its federal programs, including its internal control over compliance with those programs, to assess the risk of material noncompliance, and to design the nature, timing, and extent of further audit procedures. One of the auditor's initial tasks in the planning process of as single audit is determining whether management has properly defined the entity to be audited. Paragraph 6.11 of the AICPA Audit Guide Government Auditing Standards *and Circular A-133 Audits* (GAS/A-133 Guide) provides additional information on defining the entity to be audited, including the option for auditees to meet the requirements of the circular through a series of audits that cover an auditee's departments, agencies, and other organizational units that expended or otherwise administered federal awards during a fiscal year.

.08 Further, Circular A-133 requires the auditee to maintain internal control over compliance for federal programs that provides reasonable assurance that the auditee is managing federal awards in compliance with laws, regulations, and the provisions of contracts or grant agreements that could have a material effect on each of its federal programs. The auditor is required to perform procedures to obtain an understanding of internal control over compliance that is sufficient to plan the audit to support a low assessed level of control risk for major programs. The auditor needs to understand the assertions relevant to the compliance requirements for each major program. In obtaining the understanding, the procedures performed should provide sufficient knowledge of both the design of the relevant controls pertaining to each of the five internal control components (that is, control environment, risk assessment, control activities, information and communication, and monitoring) and whether they have been placed in operation. The auditor ordinarily obtains this knowledge through previous experience with the entity and through such procedures as inquiries of appropriate management, supervisory, or staff personnel; an inspection of the entity's documents and records; and his or her observation of the entity's activities and operations. Chapter 10 of the GAS/A-133 Guide further discusses the auditor's consideration and testing of internal control over compliance for major programs.

.09 Finally, because Circular A-133 requires the auditor to determine whether the auditee has complied with laws, regulations, and the provisions of contracts or grant agreements that may have a direct and material effect on each of its major federal programs, the auditor should assess not only the risk that noncompliance may cause the financial statements to contain a material misstatement, but also the risk that noncompliance may have a material effect on each of its major programs. Chapter 8 of the GAS/A-133 Guide discusses audit risk as it relates to the compliance auditing of major programs.

Industry Developments

.10 From the standpoint of the federal user, audits conducted under Circular A-133 are a key accountability mechanism for the expenditure of taxpayer dollars. Recently, the results of a federal study on single audit quality were issued by the President's Council on Integrity and Efficiency (PCIE) and Executive Council on Integrity and Efficiency. The report titled, *Report on National Single Audit Sampling Project* (the PCIE report), identifies single audit quality deficiencies and shows that improvements are needed. The types of audit quality issues identified in the PCIE report are also consistent with the types of issues found in peer reviews of firms doing single audits and in investigations performed by the AICPA Professional Ethics Division (see "Other Reviews Indicate Continued Problems in GAS and Single Audits" in this alert).

.11 Consequently, as an auditor that performs single audits, you should review the PCIE report in detail to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices. Further discussion of the results of the federal study is included in, "Results of Federal Study on Single Audit Quality" in this alert.

Legislative and Regulatory Developments

.12 This section sets forth recent changes to relevant regulatory, legislative, and other guidance affecting GAS and Circular A-133 audits. In addition, it provides information on other legislative and regulatory developments.

Results of Federal Study on Single Audit Quality

.13 The long-awaited federal study on the quality of audits performed under OMB Circular A-133 was issued on June 22, 2007. This section presents a background of the study, a summary of findings, a listing of some deficiencies noted, report recommendations, and highlights the AICPA and its Governmental Audit Quality Center's (GAQC) next steps to responding to the report.

.14 *Background.* Several years ago, a group of federal Offices of Inspectors General (OIGs), along with three state auditor's offices, decided to work together to develop a statistically based measure of single audit quality (the Project). The U.S. Department of Education served as the project leader. The project had two primary goals:

- Determine the quality of single audits and establish a statistically based measure of audit quality
- Recommend changes in single audit requirements, standards, and procedures to improve the quality of single audits

.15 To accomplish these goals, the OIGs conducted quality control reviews (QCRs) of a statistical sample of 208 audits randomly selected from approximately 38,000 audits submitted to and accepted by the Federal Audit Clearinghouse (FAC) between April 1, 2003 and March 31, 2004. Generally, the audits reviewed were from the 2002–2003 timeframe and, in some cases, earlier. The sample was split into two strata. Stratum I included audits of entities with $50 million or more of total federal expenditures. Stratum II included audits of entities with at least $500,000 but less than $50 million of total federal expenditures.

.16 The scope of the project covered portions of the single audit relating to the planning, conduct, and reporting of audit work related to the review and testing of internal controls and compliance testing pertaining to compliance requirements for selected major federal programs. Documentation of audit work for up to three major programs for each audit was reviewed. Further, the review included audit work performed on the Schedule of Expenditure of Federal Awards (SEFA) and the content of all of the auditors' reports on the federal programs. The scope did not include a review of the content of, or the audit work performed, related to the general-purpose financial statements, the auditor's opinion on those statements, or the auditors' review of internal control over financial reporting.

.17 *Summary of Findings.* The issues and deficiencies identified in each QCR were compiled, and each engagement was then classified into one of three groupings. The groupings are defined as follows:

- Acceptable: No deficiencies were noted, or one or two insignificant deficiencies were noted. In some cases, the acceptable audits had deficiencies with applicable auditing criteria noted, which did not require corrective action, but should be corrected going forward.
- Limited Reliability: Significant deficiencies with applicable auditing criteria were noted and require corrective action to afford unquestioned reliance upon the entire audit.
- Unacceptable: Deficiencies were so serious that the auditor's opinion on at least one major program cannot be relied upon or a material reporting error was noted requiring that the report be reissued in order to be relied upon by users, or both.

.18 The PCIE report clearly shows that improvements are needed in many areas. The tables shown below summarize the overall results and results by stratum. In addition to providing results by the number of audits reviewed, the OIGs also analyzed the results in relation to the dollar amounts of federal awards reported in the audits reviewed. Results in relation to dollar amounts reported in the audits reviewed show a much higher percentage of acceptability. The following tables show the results for both strata combined and then the results of Stratum I and Stratum II individually.[1]

TOTAL SAMPLE (STRATA I & II)				
	Acceptable	***Limited Reliability***	***Unacceptable***	***Total***
Sampled Audits	115	30	63	208
% of Audits	49%	16%	35%	100%
% of Federal $	93%	2%	5%	100%
STRATUM I (>$50 Million in Federal Expenditures)				
	Acceptable	***Limited Reliability***	***Unacceptable***	***Total***
Sampled Audits	61	12	23	96
% of Audits	64%	12%	24%	100%
% of Federal $	93%	2%	5%	100%

[1] The report indicates the confidence parameter was 90 percent, and the precision parameters ranged between plus or minus 2.1 and 7.9 percentage points.

STRATUM II ($500 Thousand–$50 Million in Federal Expenditures)				
	Acceptable	***Limited Reliability***	***Unacceptable***	***Total***
Sampled Audits	54	18	40	112
% of Audits	48%	16%	36%	100%
% of Federal $	56%	10%	34%	100%

.19 *Deficiencies Identified.* The PCIE report goes into detail regarding the deficiencies noted on the audits reviewed. The following presents a brief summary of deficiencies identified:

- Misreporting of audit coverage of major federal programs
- Unreported audit findings
- Compliance testing not documented as performed or not applicable
- Deficiencies in understanding and testing of internal control over compliance
- Deficiencies in risk assessments as part of major program determination
- Missing audit finding information
- Deficiencies in presentation and auditing of the SEFA
- Management representations related to federal awards missing or misdated
- Consideration of audit materiality at the major federal program level not documented
- Other kinds of deficiencies (described in Appendix A of the report)

.20 *PCIE Report Recommendations.* The PCIE report proposes a three-pronged approach for reducing the deficiencies noted and to improve the quality of single audits. The recommendations in the report are directed to various organizations including the OMB and other federal agencies, the AICPA, and other single audit stakeholders. A summary of the recommendations is as follows:

- Revise and improve single audit criteria, standards, and guidance to address deficiencies noted in the report. Specific recommendations are described throughout Part II and the "Other Matters" sections of the PCIE report and include recommendations for revisions to Circular A-133 and, in some cases, additions or clarifications to AICPA auditing standards and the GAS/A-133 Guide.
- Establish minimum requirements for completing comprehensive single audit training as a prerequisite for conducting such audits (the report suggests at least 16–24 hours) and thereafter, require single audit update training for continued performance of single audits.
- Review and enhance processes to address unacceptable audits and not meeting established training and continuing professional education requirements. This includes (*a*) reviewing the process of suspension and debarment; (*b*) identifying ways that the AICPA and State Boards of Accountancy can further the quality of single audits and address due professional care issues; and (*c*) identifying, reviewing, and evaluating the potential effectiveness of other ways to address unacceptable audits (these other ways could include sanctions to be applied to auditors or fines, or both).

.21 *Next Steps.* The AICPA shares the commitment of the federal agencies involved in the project to improving the quality of single audits. Many of the audits reviewed were performed 4–5 years ago, and the AICPA is hopeful that many endeavors over the last several years (for example, the launch of the GAQC) have already begun to address some of the issues raised in the PCIE report.

.22 However, auditors should take this report very seriously and read the PCIE report in its entirety to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices.

.23 The AICPA and the GAQC Executive Committee and GAQC staff will be working closely with the federal government on a go-forward basis to address the PCIE report recommendations. During the course of the next year, auditors should watch the GAQC Web site at www.aicpa.org/GAQC for updates on initiatives undertaken by the AICPA and others in response to the PCIE report.

> **Help Desk—**To access the PCIE report go to the following Web site: www.ignet.gov/pande/audit/NatSamProjRptFINAL2.pdf.

Other Reviews Indicate Continued Problems in GAS and Single Audits

.24 In addition to the PCIE report, the GAQC Web site contains a summary of common deficiencies noted in audits conducted in accordance with GAS and Circular A-133 and found during recent peer reviews and AICPA Professional Ethics Division investigations of CPA firms. A sampling of those deficiencies is included below. You should consider reviewing your firm's policies and procedures to determine whether your GAS and Circular A-133 audits might have these types of issues.

- Audit organizations did not submit their peer review report to required parties.
- The engagement team did not meet the *Government Auditing Standards* or state licensing board continuing professional education (CPE) requirements.
- The auditor used inadequate or outdated reference material related to the engagement performed. Be sure to be familiar with new SASs and accounting standards that are issued. Further, you should ensure that you are using the most up-to-date versions of the *Compliance Supplement*, Yellow Book, and the GAS/A-133 Guide.
- The auditor did not use written audit programs or failed to tailor the audit programs for specialized industries or for specific transactions or balances (such as significant inventory and receivable balances).
- Audit documentation did not evidence when appropriate (1) the auditor's consideration of the existence of an internal audit function or the use of service organizations; (2) the auditor's reliance on the work of other auditors or of specialists; (3) the auditor's consideration of the client's internal control structure, the effect of the use of information technology on internal control, or the effect of internal control on substantive procedures; (4) the required communications between predecessor and successor auditors; and (5) adequate or complete documentation regarding engagement planning.
- In Circular A-133 audits, internal control and compliance tests were not always adequately documented to support the reports issued. In some cases the auditor did not document that an auditee was considered a low-risk auditee (to support the reduced testing that was performed). Further, in a few other cases, items such as the subsequent events review and litigation follow-up were not documented. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), provides guidance on the content, retention, and confidentiality of audit documentation as required by generally accepted auditing standards (GAAS). Among other things, AU section 339 requires audit documentation to be sufficient to enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent, and results of auditing procedures performed and the evidence obtained. *Government Auditing Standards* includes an additional standard that requires audit documentation to contain sufficient information to enable an experienced auditor having no previous connection with the audit to ascertain the evidence that supports the auditor's significant conclusions and judgments. You should keep these AU section 339 and *Government Auditing Standards* requirements in mind when you are preparing your audit documentation. It is possible that problems with audit documentation could be the root of many of the other problems discussed in this section.

- The auditor did not assess the level of materiality or control risk.
- The auditor did not perform or document risk assessments for each of the five components of internal control or at the assertion level for major account balances or transaction classes.
- The auditor did not assess or document the risk of fraud, did not make appropriate inquiries, or did not adequately consider fraud risks in designing audit procedures.
- The auditor did not apply proper sampling techniques.
- Audit documentation did not indicate the disposition of prior audit findings and proper consideration of current potential significant deficiencies and other findings.
- The auditor failed to identify or address the client's incorrect application of generally accepted accounting principles (GAAP) or inadequate financial statement disclosure.
- The auditor did not request a legal representation letter when the client consulted an attorney and, in some cases, did not obtain a client management representation letter or did not include appropriate engagement-specific representations within the letter.
- The engagement letter did not include proper references to Circular A-133 requirements or record retention policies or include a copy of the latest peer review report.
- The auditor's reports did not conform to reporting requirements. For example, the reports omitted required wording or did not appropriately address other information accompanying the basic financial statements.
- Not all auditors are including all of the required finding elements in describing their findings for both GAS and Circular A-133 purposes. Among the required elements being left out of findings with respect to Circular A-133 are the Catalog of Federal Domestic Assistance (CFDA) number, federal award number, and year for each federal program. Chapter 5 of *Government Auditing Standards* and section 510(b) of Circular A-133 describes each of the elements that should be included in your findings. You should ensure that each of your findings contain the required elements.
- The auditor failed to audit as major programs type A programs not qualifying as low risk. Circular A-133 requires a type A program to be audited as a major program unless it qualifies as a low-risk program. For a program to be considered low risk, it must, among other criteria, have been audited as a major program in at least one of the two most recent audit periods. Auditors have made errors in applying this criterion. No auditor judgment is permitted in evaluating this historical two-year look-back criterion, and the reason a type A program was not audited in the prior two audit periods is irrelevant. Errors often occurred when a type A program was not audited in the first year it became a type A program (for example, a new program or a program that had previously been type B).
- The auditor failed to audit type A programs as major because of errors made in determining the type A/type B program dollar threshold.
- The auditor failed to audit all programs included in a cluster of programs. *Clusters* are defined in Part 5 of the supplement "Clusters of Programs," and should be considered as one program in determining major programs. Auditors made errors in identifying programs as part of a program cluster.
- The auditor failed to meet the percentage-of-coverage requirement in Circular A-133, section 520(f). The percentage-of-coverage requirement is applied as the last step in the risk-based approach and must always be met. At least one program must always be audited as a major program. In some cases, there were errors in the reviewed audits' compliance with the percentage-of-coverage requirement.
- Sometimes the Circular A-133 report was not modified when it appeared that it should be. In other words, an unqualified opinion was provided when there were material instances of noncompliance. When the audit of an auditee's compliance with requirements applicable to a major program detects material instances of noncompliance with those requirements, you should express a qualified or adverse opinion. You should also consider whether the noncompliance is the result of a related reportable condition or material weakness and, if so, report it in the Circular A-133 reports.

- In some cases, the required compliance testing was not performed, sometimes because the auditor did not follow the guidance in Part 7 of the Compliance Supplement titled, "Guidance for Auditing Programs Not Included in This Compliance Supplement," for identifying the applicable compliance requirements to test and report on. In other cases, internal control and compliance tests were not adequately designed or documented to support the reports issued. In performing compliance tests, be sure that you have identified which of the applicable compliance requirements may have a direct and material effect on each major program. It is imperative that you use the most recent version of the supplement to make this identification. If the program you are auditing is not included in the supplement, you should follow the guidance in Part 7 of the supplement for identifying the applicable compliance requirements. Further, in performing compliance tests, be sure to consider relevant portions of the entity's internal control over compliance. Remember that you must test controls (to support a low assessed level of control risk for the assertions relevant to the compliance requirements for each major program) unless they are likely to be ineffective in preventing or detecting noncompliance.

Help Desk—The AICPA's GAQC (as discussed in "Governmental Audit Quality Center" in this alert) is the source of the above listing of common engagement deficiencies. Look under the "Resources" tab (gaqc.aicpa.org/Resources/) and select either the "Audits Performed Under *Government Auditing Standards*" or "OMB Circular A-133" links.

Office of Management and Budget Developments

OMB Revises Circular A-133

.25 Auditor reporting required under OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, has been affected by the issuance of SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). On June 26, 2007, the OMB issued a Federal Register Notice titled Revisions to OMB Circular A-133 (the OMB Notice) revising the circular to, among other things, adopt updated terminology consistent with SAS No. 112 requirements.

.26 The OMB Notice has two main purposes: (1) to update the internal control terminology and related definitions used in Circular A-133; and (2) to simplify the auditee reporting package submission requirement to the FAC. With regard to terminology changes, the OMB Notice first states that to be consistent with professional auditing standards, when reporting on *internal control over financial reporting* in a financial statement audit required by Circular A-133, the references to *reportable conditions* and *material weaknesses* in the circular are replaced with the terms *significant deficiency* and *material weakness* as those terms are defined in SAS No. 112 and the 2007 revision to *Government Auditing Standards*. As for the auditor's reporting on internal control over compliance in a single audit, the OMB Notice states that the terms *reportable condition* and *material weakness* are replaced with the updated terminology and definitions in an AICPA Auditing Interpretation of SAS No. 112. These changes are effective for single audits of periods ending on or after December 15, 2006. Further discussion of the AICPA auditing interpretation and related illustrative auditor reports are included in "AICPA Issues Auditing Interpretation to Address SAS No. 112 Implications on Single Audits" in this alert. Further discussion of the 2007 revision to *Government Auditing Standards* is included in "*Government Auditing Standards* Developments" in this alert.

.27 The OMB Notice acknowledges that the change in terminology and related definitions may result in the reporting of additional internal control matters and that the reporting of such additional matters may affect the scope of future single audits, particularly as it relates to the determination of major programs and the auditee's low-risk status.

.28 Further, the OMB Notice also provided instructions on how to address the new internal control terminology in Form SF-SAC, "Data Collection Form for Reporting on Audits of States, Local Governments, and Non-Profit Organizations" (DCF or Data Collection Form) and an important change in the reporting package submission process. See "Data Collection Form and Reporting Package Submission Changes" in this alert for further information on these changes.

Impact on Illustrative Schedule of Findings and Questioned Costs

.29 The illustrative Schedule of Findings and Questioned Costs (Example 12-5 in the GAS/A-133 Guide) should also be modified by auditors to replace the term *reportable condition* throughout the example with the term *significant deficiency* as it is updated in the 2007 edition of the GAS/A-133 Guide.

> **Help Desk—**A PDF of the *Federal Register* notice is available at www.whitehouse.gov/omb/grants/grants_docs.html. As of the date of this alert, OMB has not yet incorporated the changes in the OMB Notice to the version of Circular A-133 on its Web site at www.whitehouse.gov/omb/grants/grants_circulars.html. However, it is expected to do so soon.

OMB Circular A-133 Compliance Supplement Update

.30 The Circular A-133 *Compliance Supplement*, issued annually by OMB, identifies existing important compliance requirements that the federal government expects to be considered as part of an audit required by the Single Audit Act. For the programs it includes, the *Compliance Supplement* provides you with a source of information to understand the federal program's objectives, procedures, and compliance requirements relevant to the audit, as well as the audit objectives and suggested audit procedures for determining compliance with these requirements. For programs not listed in the *Compliance Supplement*, you should follow its Part 7, "Guidance for Auditing Programs Not Included in This Compliance Supplement," which instructs you to use the types of compliance requirements contained in the *Compliance Supplement* as guidance for identifying the types of compliance requirements to test, and to determine the requirements governing the federal program by reviewing the provisions of contracts and grant agreements and the laws and regulations referred to in such contracts and grant agreements.

> **Help Desk—**The 2007 *Compliance Supplement* and two previous years' versions can be found on the OMB Web site at www.whitehouse.gov/omb/grants/grants_circulars.html.

.31 The OMB issued the 2007 *Compliance Supplement* dated March 2007. The 2007 *Compliance Supplement* is effective for audits of fiscal years beginning after June 30, 2006 and supersedes the *Compliance Supplement* issued in April 2006. Appendix V of the supplement, "List of Changes for the 2007 Compliance Supplement," is a key piece of information to identify all of the changes the OMB is making to the supplement.

.32 Some of the more significant changes in the 2007 *Compliance Supplement* include the following:

- New programs were added as follows:
  - — CFDA 14.169, Housing Counseling Assistance Program
  - — CFDA 16.738 replaced 16.579, Byrne Formula Grant
  - — CFDA 20.609, 20.610, 20.611, 20.612, and 20.613 were added to the Highway Safety Cluster
  - — CFDA 84.032 covers the lender portion of 81.032, the Federal Family Education Loans (FFEL) program
- Two programs were deleted as follows:
  - — CFDA 14.854, Public and Indian Housing Drug Elimination
  - — CFDA 16.579 (see CFDA 16.738 above)
- In Part 2, "Matrix of Compliance Requirements," CFDA 10.500 added "subrecipient monitoring," and programs 10.665 and 10.666 removed the "Davis Bacon Act."
- Part 3, "Compliance Requirements," amended references to the various costs principles due to amendments effective in June 2004.

- There were extensive changes made to various programs in Part 4, "Agency Program Requirements."
- In Part 5, various changes were made to the Student Financial Assistance Cluster, including adding two programs, CFDA 84.375, Academic Competitiveness Grant, and CFDA 84.376, National Science and Mathematics Access to Retain Talent Grant. As noted above, five programs were added to the Highway Safety Cluster. Finally, the National Farmworker Jobs Cluster was removed.
- Appendix VI, which discusses special provisions related to Hurricanes Katrina and Rita, was revised.

OMB Clarifies Compliance Supplement Guidance for Research and Development Cluster

.33 If you have clients that participate in federal Research and Development (R&D) programs, you should be aware that the OMB made a correction to the guidance in the 2007 *Compliance Supplement* for the R&D cluster relating to cost transfers after the *Compliance Supplement* had already been issued and posted for several months. The language that appeared in the 2006 *Compliance Supplement* on this topic should have been carried forward to the 2007 *Compliance Supplement*. However, due to an administrative error, it was changed. Upon being notified of the error, OMB corrected the language that originally was included in the 2007 supplement. The revised guidance appears in Part 5, *Clusters of Programs*, in the R&D cluster section on "Allowable Costs/Cost Principles" and reads as follows:

> "Transfers of costs between cost centers or research projects are often used to correct the financial records (such as transfers of costs between projects when costs were initially charged to the wrong project and the institutions control system found the error) and for other valid reasons.
>
> Cost transfers should be reviewed for allowability. A cost transfer from one project to another project may appear to be an unallowable charge to the second project. However, these costs may be allowable costs of the second project because of the closely linked nature of the research, and the costs would be allowable charges to either project. Alternatively, the transfers would not be allowable under the second project if the costs are not allowable under the terms and conditions of that project.
>
> The auditor should determine if journal entries and transfers of costs were made to federal R&D projects. If so, the auditor should select a separate sample of these R&D cost transfers and test the sampled items to determine the allowability of the costs transferred using the applicable federal regulations and award requirements for the project to which the costs were transferred. If the number of cost transfers between unrelated projects is significant, this could be an indication of poor internal control and might result in a noncompliance finding."

.34 If you are auditing R&D clusters as part of your single audits, check the *Compliance Supplement* section that you are using to be sure that the cost transfers guidance is the correct version (that is, that it includes the language above).

OMB Leading Development of Web Site to Provide Data on Grants, Contracts, and Other Spending

.35 OMB has created an interim Web site at www.federalspending.gov to provide data on federal grants, contracts, and other spending in a searchable format. The purpose of this temporary Web site is to solicit feedback from the public on how to develop a search engine for the official Web site, which will be launched in January 2008. This entire effort is geared to satisfying the provisions of the Federal Funding Accountability and Transparency Act, which became law in 2006. Besides providing an opportunity for public comment and feedback, the site offers information and links to the Federal Funding Act (FFA), FFA task force implementation plan, answers to frequently asked questions, and links to information on federal spending.

Federal Audit Clearinghouse Topics

.36 The FAC operates on behalf of the OMB. Its primary purpose is to collect single audit and program-specific audit information and disseminate it to federal agencies and the public. Your clients are responsible for submitting the required reporting packages to the FAC, including the audit reports and the DCF. Auditors are required to complete Part I, Item 7, Part II, and Part III of the form before it is submitted with the reporting package.

.37 Auditors can fill out and print the DCF on the FAC Web site at harvester.census.gov/fac. This site also contains the form's instructions. The FAC encourages online completion and submission because the system provides edit checks that will increase the likelihood that the form will be accepted without errors.

.38 There are separate forms for audits of fiscal periods ending in 2001–2003, and 2004–2006. Submissions covering fiscal periods with end dates before January 1, 2004 should use the prior version of the DCF. As noted in the following section, the 2004–2006 form should be used for audits covering fiscal periods ending in 2004, 2005, 2006, and 2007.

Data Collection Form and Reporting Package Submission Changes

.39 As noted in "Office of Management and Budget Developments" in this alert, the OMB revised Circular A-133 primarily for needed revisions as a result of SAS No. 112. However, the OMB Notice that revised the circular also identified important information and updates relating to the DCF. The OMB Notice states that for single audits of periods ending December 15, 2006 through December 31, 2006, the approved DCF for fiscal years ending 2004, 2005, and 2006 should be used when filing with the FAC. The OMB Notice goes on to say that since the DCF has not yet been updated for the new internal control terminology, any *significant deficiency* should be recorded under the term *reportable condition* on the following items: Part II - items 3 and 4, Part III - items 4 and 5, and Part 3, item 10 (a). The OMB Notice states that the DCF approved for audits with fiscal period end dates in 2004, 2005, and 2006 has now also been extended to apply to audits with fiscal period end dates in 2007. All submissions with fiscal period end dates in 2007 must use the 2004–2006 version of the DCF. The DCF terminology will be updated in an upcoming revision to the form scheduled for January 1, 2008.

.40 The OMB Notice also communicates a change relating to an auditee's submission of the reporting package to the FAC. Per the OMB, due to technology advances, starting January 1, 2007, the auditee is no longer required to submit multiple copies of the reporting package to the FAC, in accordance with Section 320(d) of Circular A-133. Instead, only one copy of the reporting package is necessary. However, Part III, item 8, of the DCF should continue to be completed noting all agencies required to receive a copy of the reporting package.

Data Collection Form and Reporting Package Submission Not Appropriate in Compliance Audits of For-Profits

.41 Some for-profit entities are required by granting agencies through either a grant clause or contract to have a Circular A-133 audit (or an audit that is very similar to a Circular A-133 audit). The FAC has asked that auditors remind their for-profit clients that must undergo such an audit that they are ***not*** to send the DCF and the audit reporting package to the FAC. The package should be sent, however, to the requesting federal or state agency.

Preparing the Data Collection Form

Basic Reporting Requirements

.42 Your client is required to submit both the DCF and one complete copy of the reporting package FAC within 30 days of receipt of the auditor's reports, but no later than nine months after the end of its fiscal year.

The DCF requires information regarding the period under audit, the client, the auditor, a summary of the client's federal expenditures, and a summary of the results of the audit.

.43 To take advantage of the online editing feature, the client is encouraged to use the Internet to enter the DCF data electronically. However, until the FAC receives an acceptable reporting package and the signed DCF, the client does not receive credit for meeting the submission requirement.

.44 The FAC has on its Web site frequently asked questions, which provide additional guidance on completing the form. The FAC also maintains an online database of audit submissions. See the following sections of this alert for additional discussion of the FAC, DCF, and how you can use the FAC database to help lessen the chance that your organization's audits have quality issues.

> **Help Desk—**For questions about submitting the DCF and reporting packages, auditors may contact the FAC by e-mail at govs.fac@census.gov, by phone at (800) 253-0696, or by fax at (301) 457-1592. For questions regarding previous submissions, please call the FAC processing unit at (888) 222-9907.

Data Universal Numbering System Number Questions

.45 The Data Universal Numbering System (DUNS) number field is one area of the 2004–2006 DCF that generates a lot of questions. A DUNS number is a nine-digit identification sequence assigned by Dun & Bradstreet. The instructions to the 2004–2006 DCF state that if your clients are considered to be a direct applicant (that is, the entity that made the grant application to the federal government, including state, local, and tribal governments, and other entities receiving block or other mandatory grants) they are requested to enter their DUNS number(s) for submissions effective starting with submissions for fiscal periods ending in 2005. Questions have arisen as a result of a question and answer that appears in the "Frequently Asked Questions and Answers" document on the FAC's Web site. Question 21 addresses the issue of whether DUNS numbers are required. The answer states that the OMB requests, but does not require, a DUNS number to be entered for all entities submitting a DCF.

Subrecipient Reporting Requirements

.46 The DCF provides information on the results of the Circular A-133 audit and is entered into a database maintained by the FAC. Although both auditors and clients are required to complete parts of the DCF, the client is responsible for submitting both the DCF and the reporting package to the FAC. If your client is a subrecipient, it is also required to forward a copy of a reporting package to the pass-through entity (PTE) when the schedule of findings and questioned costs contains audit findings relating to federal awards provided by the PTE or when the summary schedule of prior audit findings reports the status of any audit findings relating to such awards. If the report contains no such findings, a subrecipient is required only to provide the affected PTEs with a notification that the audit was completed and that neither the schedule of findings and questioned costs nor the summary schedule of prior audit findings contained findings relating to the federal awards provided by the PTE.

Common Reasons for Form Rejection

.47 FAC representatives have identified a number of common faults that would cause the FAC to reject a filing. Most form errors are detected by edits and can be avoided when entering the data on the FAC Web site. Among these are the following:

- Part III, Item 8, "Federal Agency Distribution," is incorrect: A reporting package is distributed to federal agencies only if there are current year findings on directly funded programs, if the program is listed in the Schedule of Prior Year Findings, or they meet the threshold for coverage by a federal cognizant agency not covered by findings on direct funding.

- Part III, Item 9c, "Research and Development," is invalid (either blank or more than one box is checked).
- Part III, Item 9f, "Direct award," is invalid (either blank or more than one box is checked).
- Part III, Item 9a and 9b "CFDA Number," Multiple CFDA Numbers appear on one program line or an extra '.' is included before the CFDA Extension.
- Missing audit components, especially a Corrective Action Plan (when required) from the auditee.
- Missing form signatures or signature dates.

Tips on Reviewing Forms Before Submission

.48 To avoid a DCF rejection, it is important for the form to be carefully reviewed by the auditor prior to its submission. Here are a few tips you can use within your practice to review the DCF before it is submitted to the FAC, and some "red flags" that can raise questions with federal OIGs.

.49 *Part II: Financial Statements.* Part II refers to the financial statement report and the report issued under *Government Auditing Standards*, not the reporting on internal control and compliance relating to federal programs. A tip for the person reviewing Part II is to simultaneously read the final auditor reports and the form to ensure this section is prepared using the final versions of the auditor reports and that the entries on the form are consistent with those reports.

.50 *Part III: Federal Programs.* In reviewing this section of the form, it is good practice to read the instructions to the DCF for Part III. Those instructions include useful information. Again, simultaneously reviewing the final Circular A-133 reporting and the form is good practice to ensure that the entries on the form are consistent with the results of the audit. Other tips for reviewing various items in this part follow.

- Item 7: This should be answered "no" if the summary schedule of prior audit findings indicates there were no prior audit findings.
- Item 8: It is important to ensure that all agencies affected by a cross-cutting finding are included. Also, the line "and, if not marked above, the federal cognizant agency" should not be checked if the client is too small to have a cognizant agency. Finally, it is important that the finding write-ups include all of the required elements, including the CFDA number, to ensure that Item 8 is properly completed.
- For Item 9 in this part, Column B should include the award number when the award does not have a three-digit CFDA extension.
- In Item 9: The programs should be listed in the same level of detail as in the SEFA. For instance, if the SEFA lists 10 Department of Health and Human Services (DHHS) awards within one or more CFDA numbers, Item 9 should list 10 DHHS awards; there should not be one total HHS line.
- Good practice is to prepare a written reconciliation between the total of Item 9(e) to the total of the schedule of federal award expenditures included in the Circular A-133 report. Common reconciling items include amounts that may be reported in the footnotes to the schedule of expenditures of federal awards. The following are examples:
  - — Student loan outstanding balances
  - — Administrative cost allowances
  - — Commodities
  - — Donated property
  - — Interest subsidies
  - — Insurance

- For Item 9, another good practice is for the reviewer to independently verify that Columns C, F, and G have been completed correctly. That is particularly true for very lengthy DCFs, as it is easy to inadvertently mark the wrong box.

- Item 10, Column A, should not include response P ("Other") very often. Sometimes, form preparers will tend to use "P" rather than take the time to properly match a finding to the appropriate compliance requirement. If a "P" is noted as a response, extra attention may be needed to assure that the response is correct.

- Item 10, Column B, "Audit finding reference numbers," should reconcile to Item 8 in Part III, allowing only for differences relating to prior year findings covered in Item 8, but not in Item 10.

Red Flags Raised by Incorrect Data Collection Forms

.51 Federal OIGs sometimes review specific DCF data or use the FAC database to determine potential problems or issues with single audits that have been performed. Once potential problems are identified, the OIGs will likely contact the auditor for additional information or may decide to perform a quality control review of the engagement in question. For this reason, it is even more important that the DCF be completed correctly. The following are some of the red flags that incorrect DCF submissions might raise with federal reviewers:

- If the wrong box is checked in Part II, federal reviewers might conclude that the preparer did not understand the nature of the auditor's report that was issued.

- If the wrong boxes are checked in Part III, Items 1–8, federal reviewers might conclude that the auditor did not understand one or more of the following concepts: low risk auditee, type of report issued, or what belongs on the summary of prior audit findings.

- If Part III, Item 9, is not completed properly, the federal reviewer might conclude that the auditor did not understand the concept of "major programs," or that the auditor audited the incorrect major programs. Further, he or she might conclude that the auditor does not understand the nature of the findings reported.

Revising a Data Collection Form Submission

.52 For one reason or another, your client may need to revise a submission that has been made to the FAC. If this is the case, keep the following in mind:

- You must use a paper copy of the form (available at harvester.census.gov/fac/collect/formoptions.html).

- You should write "Revision" at the top of Page 1 and fill out Page 1 completely.

- You and the client should sign and date the form again.

- The client should fill out corrections/additions/deletions only.

- The client should retotal total federal awards expended (if needed).

- The client should send the paper form to FAC along with a cover letter summarizing the nature of the revision(s).

- The FAC Web site has instructions for such revisions.

Using the FAC Database

.53 You may find it worthwhile to investigate the FAC database. You can find instructions for its use on the FAC Web site at harvester.census.gov/fac. The FAC expects that the major users of its database will be federal sponsoring agencies. A number of agencies report that they have found it useful, for example, to compare the results of their own programmatic audits with those Circular A-133 audits performed by independent auditors and filed on the database. FAC officials also point out that you, as an auditor, can benefit from the database. For example, consider the following benefits:

- You and your clients can check on the status of submissions.
- You and your clients can ascertain the status of their subrecipients' submissions.
- You can perform overall analytical assessments of your organization's audits to determine, for example, whether there are any problems with the two-year look-back rule and major program determination. Although this is true, the FAC should not be the ones making this point.
- You can look at reports or findings related to programs you are auditing to supplement staff training.

Government Auditing Standards Developments

.54 In July 2007, the U.S. Government Accountability Office (GAO) issued the July 2007 revision to *Government Auditing Standards* (GAO-07-731G). The July 2007 revision supersedes the 2003 revision and updates the January 2007 revision. The July 2007 revision contains the final 2007 revisions, including the quality control and peer review sections in Chapter 3, which GAO had exposed for comment in January 2007. The July 2007 revision represents the completed 2007 revision of *Government Auditing Standards* and is the version that should be used until further revisions or updates are made. It will be effective for financial audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Early implementation is encouraged. A downloadable version of the complete July 2007 revision is available on the GAO's Yellow Book webpage at www.gao.gov/govaud/ybk01.htm. You will also find ordering information for the printed version on the GAO's Yellow Book webpage at www.gao.gov/govaud/ybk01.htm.

.55 GAO has also issued a summary document titled, *Major Changes: July 2007 Revision to Government Auditing Standards* on its Web site at www.gao.gov/govaud/somc0707.pdf. This document highlights key revisions to the standards including those specifically related to ethics and independence, professional judgment and competence, all types of audits and attestation engagements performed under the Yellow Book, and financial and performance audits. The listing of changes is intended to assist practitioners in updating their related policies and procedures for conducting government audits. Among the significant changes in the July 2007 revision of *Government Auditing Standards* are the following:

Overall Changes

.56 The July 2007 revision accomplished the following:

- Reinforced the key role of auditing in maintaining accountability and providing information for making improvements in government operations
- Clarified the standards through standardized language to define the auditor's level of responsibility and distinguish between auditor requirements and guidance/explanatory material. This approach is consistent with that being used by other auditing standard-setters
- Clarified and expanded the standards to recognize that other sets of professional standards, such as those issued by the Public Company Accounting Oversight Board (PCAOB), the International Auditing and Assurance Standards Board (IAASB), and the Institute of Internal Auditors (IIA) can be used in conjunction with generally accepted government auditing standards (GAGAS)

Changes Related to Ethics and Independence

.57 The July 2007 revision also made changes related to ethics and independence:

- Heightened emphasis on ethical principles as the foundation, discipline, and structure behind the implementation of the standards, including a description of five key ethical principles that guide the work of those who conduct audits in accordance with GAGAS (Chapter 2 is devoted entirely to ethical principles.)
- Clarified and streamlined the discussion of professional services other than audit and attestation engagements (nonaudit services) and their impact on auditor independence by reorganizing the discussion and related examples into three distinct categories of nonaudit services
- Added guidance on actions required if an impairment to independence is identified after the audit report is issued

Changes Related to Professional Judgment and Competence

.58 The July 2007 revision also includes changes related to professional judgment and competence:

- It stressed the critical role of professional judgment in all aspects of GAGAS audits, in considering risk, and in complying with GAGAS overall.
- It expanded the description of competence to emphasize its importance and relate it to key steps in performing an audit and reporting the findings and conclusions.
- It incorporated the revised CPE requirements that were issued by GAO in April 2005 (GAO-05-568G).
- It clarified the CPE requirement to include internal specialists who are part of the audit organization and perform as a member of the team.

Changes Related to Quality Control and Assurance

.59 The July 2007 revision made changes related to quality control and assurance:

- It clarified that an audit organization's noncompliance with the peer review requirements result in a modified GAGAS statement, while the audit organization's compliance (or noncompliance) with the requirements for a system of quality control are tested and reported on as part of the peer review process and do not affect the GAGAS compliance statement.
- It clarified that an audit organization's system of quality control should also provide reasonable assurance that the organization and its personnel comply with professional standards and applicable legal and regulatory requirements.
- It clarified that the GAGAS requirements for a system of quality control are consistent with the AICPA proposed Statement on Quality Control Standards (SQCS), except that the GAGAS requirements state that reviews of the work and the report that are performed as part of supervision are not monitoring controls when used alone.
- It added a requirement for an audit organization to include policies and procedures in its system of quality control that collectively address (*a*) leadership responsibilities for quality within the audit organization; (*b*) independence, legal, and ethical requirements; (*c*) initiation, acceptance, and continuance of audit and attestation engagements; (*d*) human resources; (*e*) audit and attestation engagement performance, documentation, and reporting; and (*f*) monitoring of quality.
- It added a requirement for audit organizations to analyze and summarize the results of its monitoring procedures at least annually, with identification of any systemic issues needing improvement, along with recommendations for corrective action.
- It added a requirement for external audit organizations to make peer review reports publicly available and for internal audit organizations to provide a copy to those charged with governance.

Changes Related to All Types of GAGAS Audits and Attestation Engagements

.60 The July 2007 revision also accomplished the following:

- It added guidance on citing GAGAS in the audit report.
- It defined those charged with governance consistent with SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380).
- It added a requirement that the audit organization establish information systems controls concerning accessing and updating electronically maintained audit documentation.
- It clarified reporting requirements for internal control deficiencies, fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse.
- It clarified and streamlined several other areas relating to audit and attestation engagements, one of which is requirements and guidance for developing elements of a finding.

Changes Related to Internal Auditors

.61 The July 2007 revision also included the following:

- Several changes to the guidance for internal auditors and encourages internal auditors to use IIA standards in conjunction with GAGAS

Changes Related to Financial Audits

.62 The July 2007 revision further provided the following:

- It updated the financial auditing standards based on recent developments in financial auditing and internal control including SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards,* vol. 1, AU sec. 339), and SAS No. 112.
- It clarified that professional judgment is used in determining whether and how to communicate deficiencies in internal control that are not significant deficiencies.
- It added requirements for reporting on the restatement of previously-issued financial statements.
- It encouraged communicating in the audit report significant concerns, uncertainties, or other unusual or catastrophic events that could have a significant impact on the financial condition or operations of a government entity or program for financial audits.

Changes Related to Attestation Engagements

.63 The July 2007 revision made the following changes as they relate to attestation engagements:

- It clarified and revised the description of attestation engagements and included additional examples of types of attestation engagements.
- It conformed attestation engagements standards and guidance for consistency with changes in financial audits.

Changes Related to Performance Audits

.64 The July 2007 revision further provided the following:

- It clarified and revised the definition of performance audits and included additional examples of types of performance audits.

- It enhanced performance auditing standards to elaborate on the overall framework for high-quality performance audits and clarified and expanded information on other performance auditing issues.

Changes Related to Guidance Material

.65 The July 2007 revision also accomplished the following:

- It added an appendix to provide supplemental guidance to assist auditors in the implementation of GAGAS. This guidance does not establish additional GAGAS requirements but is intended to assist auditors in their work.

Effective Dates

.66 As noted above, the 2007 revision is effective for financial statement audits and attestation engagements for periods beginning on or after January 1, 2008 and for performance audits beginning on or after January 1, 2008. Certain standards issued by the AICPA incorporated by reference into the 2007 revision have earlier effective dates. The GAO has indicated that for financial statement audits conducted under *Government Auditing Standards*, the effective dates of those AICPA standards will apply.

.67 The GAO has indicated that until the 2007 revisions become effective, auditors should adopt the terminology and definitions contained in SAS No. 112 when reporting on internal control deficiencies and include in their reports material weaknesses and significant deficiencies. GAO is also encouraging auditors to implement relevant sections of the 2007 revision for financial audits concurrent with the implementation of the related Auditing Standards Board (ASB) standards.

.68 Additionally, GAO states that the 2007 revision should be used in conjunction with the following guidance documents, which are also available on the Yellow Book webpage at www.gao.gov/govaud/ybk01.htm:

- Government Auditing Standards: Answers to Independence Questions (GAO-02-870G, July 2002)
- Government Auditing Standards: Guidance on GAGAS Requirements for Continuing Professional Education (GAO-05-568G, April 2005)

Help Desk—Two examples of the report on internal control over financial reporting and on compliance and other matters using language as defined in SAS No. 112 are available on the GAQC's Web site.

.69 The GAO also plans to issue on its Web site a Professional Requirements Tool. The tool will provide a listing of the professional responsibilities from the 2007 revision that are specifically identified in the standards by the words "must" and "should."

U.S. Department of Housing and Urban Development Update

HUD Consolidated Audit Guide Revisions

.70 The U.S. Department of Housing and Urban Development (HUD) continues its chapter-by-chapter process to update the Consolidated Audit Guide for Audits of HUD Programs, Handbook 2000.04 REV-2 CHG-1 (HUD audit guide). Presented below is a summary of the changes issued through the date of this writing.

Chapter	*Date Issued*	*Effective for Audits With Fiscal Years Ending On or After*
Chapter 2, "Report Requirements and Sample Reports," Example B	March 14, 2007	March 31, 2007
Chapter 2 Example B-1	March 14, 2007	March 31, 2007
Chapter 5, "Insured Development Cost Certification Audit Guidance"	March 23, 2007	June 30, 2007
Chapter 6, "Ginnie Mae Issuers of Mortgage-Backed Securities Audit Guidance"	April 3, 2007	June 30, 2007
Chapter 7, "HUD-Approved Title II"	April 27, 2007	June 30, 2007
Chapter 8, "HUD-Approved Title I"	September 1, 2006	December 31, 2006

.71 Auditors should review the transmittals announcing the issuance of each of the above chapters on the HUD OIG Web site at www.hud.gov/offices/oig/reports/auditguide/ for a summary of the revisions made to each chapter.

.72 The following chapters have yet to be revised or written.

Chapter	*Comment*
Chapter 1, "General Audit Guidance"	Revision in process.
Chapter 2, "Reporting Requirements and Sample Reports" (excluding Example B and B-1 which have already been revised (see table above)	Revision in process.
Chapter 3, "HUD Multifamily Housing Programs"	In the current guide, Chapter 3 is in reserve, and multifamily housing programs are covered in Chapter 4. HUD plans to move the multifamily housing program guidance to Chapter 3. Chapter 3 is in the process of being revised.
Chapter 4	This chapter is reserved to provide guidance on insured hospitals to address the many questions and concerns regularly received from auditors and managers on hospital audits. Development of this chapter has not been started.

.73 Auditors should periodically check HUD's Web site at www.hud.gov/offices/oig/reports/auditguide/ to make certain that they identify and follow the relevant audit guidance. The GAQC Web site will also provide status updates on future HUD revisions to the HUD audit guide.

HUD's Consolidated Audit Guide Incorrectly Used for Circular A-133 Purposes

.74 According to the HUD OIG's office, some auditors have been incorrectly using the HUD audit guide to satisfy OMB Circular A-133 audits requirements of not-for-profit entities participating in Federal Housing Administration (FHA)/HUD's multifamily housing programs. The HUD audit guide is in the process of being updated (see previous section) and is not intended to be a program-specific audit guide that would satisfy Circular A-133 requirements by itself. Although Circular A-133, section 235(a) states that the auditor should contact the OIG to determine whether a current guide exists, HUD reports that no such contacts have been made. HUD indicates that if auditors use the HUD audit guide, it is their responsibility to assure that all Circular A-133 requirements as contained in the Circular and in the *Compliance Supplement* are covered.

Multifamily Audits Where Agents/Owners Manage Multiple Insured Projects

.75 For situations where audit management agents and owners (not-for-profit and for-profit) manage many multifamily insured projects, auditors should be aware that the HUD audit guide is intended to cover the activities of a single project/entity and not the activities of the owner or the management agent. Some auditors have reviewed internal controls of the owner/agent and not of the project. Also, some auditors have not covered compliance requirements of each project but tested requirements of some projects and (1) if acceptable, accepted the results for all projects without disclosure in the projects' audit reports that certain projects were not tested, and (2) if deficiencies were found in the projects tested, those deficiencies were reported only in the tested projects' audit reports and not in all reports that were to be represented by the testing performed. HUD OIG has concluded that insufficient audit work was performed to support the opinion of many of the projects managed by the owner/agent. When HUD completes its revision to Chapter 3 of the HUD audit guide, it will prohibit this type of testing application. However, as part of that revision, HUD is also reviewing areas that can be tested at the owner/agent level if certain operating conditions exist. Also, HUD is reviewing various methods of sampling applications for inclusion in the revision to Chapter 3 to assure that the opinions upon which HUD relies are supportable.

Deficiencies in HUD Audits

.76 In some cases, for-profit organizations, not-for-profits, and public housing authorities (PHAs) and their auditors have not followed the requirements outlined in HUD's *Guidelines on Reporting and Attestation Requirements of Uniform Financial Reporting Standards (UFRS) for Public Housing Authorities, Not-for-Profit Multifamily Program Participants, For-Profit Multifamily Program Participants, and Their Independent Accountants*. This HUD document provides guidance to PHAs and multifamily participants receiving HUD financial assistance and their auditors in meeting HUD audit reporting requirements and requirements for filing financial information electronically with the HUD Real Estate Assessment Center. Specific problems identified include the omission of the required supplemental schedules and omission of required AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1), reporting on these schedules.

.77 HUD's settlements with six firms since 2003 reinforce the federal government's strong emphasis on ensuring financial accountability and the importance of firms taking appropriate steps to ensure that they do not have any quality issues. Other steps HUD has taken in this regard include the following:

- Referrals to state boards of accountancy and the AICPA
- New methods of audit verification (that is, HUD staff reperforms a portion of the Circular A-133 audit at PHAs to determine whether the PHAs' audit firms identified all material instances of noncompliance with federal laws, regulations, and contract provisions occurring at the agency.)

Other Regulatory Activity

USDA Rural Rental Housing and Rural Labor Housing Programs

.78 The USDA Office of Rural Development (RD) recently issued a letter to its state directors informing them that the financial reporting and audit requirements for the Rural Rental Housing (RRH) Program and the Rural Labor Housing (RLH) Program are changing effective for projects with December 31, 2007 year-ends. You can access the letter issued August 29, 2007, at the following Web site: www.rurdev.usda.gov/regs/ul/ulaugust07.pdf. If your firm has clients that participate in these programs, you should pay close attention to the new requirements.

.79 Those firms having clients that participate in the previously described programs know that it was not that long ago that the USDA Office of Inspector General (OIG) issued audit guidance titled, *Audit Program, USDA Rural Rental Housing Program*, which can be accessed at www.usda.gov/oig/webdocs/FINALAUDPROG050414.pdf, that deleted the financial statement audit requirement and, instead, required an agreed-upon procedures engagement for the RRH program. For that reason, the GAQC staff verified the authoritative status of the new USDA RD audit guidance with the USDA OIG. The OIG stated that although it has not approved or sanctioned the new guidance, they will not impede its implementation at this time. Therefore, you should use the new guidance in lieu of the previous RRH Audit Program. However, you should also note that the OIG cautioned that the guidance in the previously issued Audit Program for Construction Cost Engagements continues to be effective.

.80 Among other things, the new RD guidance will reinstate a financial statement audit requirement to be performed under *Government Auditing Standards* for borrowers with projects of 24 or more units. Further, borrowers with projects of 16 units or more will be required to undergo an additional agreed-upon procedures engagement. The RD guidance identifies three agreed-upon procedures that must be performed and promises additional guidance on testing criteria and procedures, sampling methodology and sample size, and standard reporting requirements. Borrowers with projects of 15 or fewer units are not subject to either the financial statement audit or agreed-upon procedures requirement. Finally, all borrowers will have additional reporting requirements directly to USDA (for example, borrower certification of performance standards). The following table (which is excerpted from the guidance) summarizes the new requirements:

Rural Development MFH Year End Financial Reporting Requirements

Type of Property	*Forms RD 3560-7 and 3560-10?*	*Borrower Certification of Performance Standards?*	*Agreed-Upon Procedures and Determinations**	*Audited Financial Statements? (In Accordance With Yellow Book Standards)*
Rural Development Project (1–15 units)	Yes	Yes	No	No
Rural Development Project (16–23 units)	Yes	Yes	Yes	No
Rural Development Project (24+ units)	Yes	Yes	Yes	Yes*
State and local governments, Indian tribes, and Non-profit Organizations (subject to OMB Circular A-133)	Yes	Yes	No	No**

* Must be completed by a CPA.

** This Audit is in Accordance with OMB Circular A-133 and submitted to the Agency as **part** of the Financial Reporting Requirements.

.81 The guidance also provides several examples to further illustrate the above requirements as follows:

- A project of 36 units owned by a limited partnership must provide the self-certification, the budget and balance sheet forms, the agreed-upon procedures, and the financial audit.
- A for-profit borrower with an 8-unit project must provide the self-certification and the two forms.
- A for-profit borrower with a 20-unit property will provide the self-certification, the two forms, and the agreed-upon procedures.
- A nonprofit housing authority, subject to OMB Circular A-133, with a 24-unit property, will provide a copy of that report, the self-certification, and the two forms.
- A nonprofit borrower not subject to A-133 with a 16-unit property will provide the self-certification, the two forms, and the agreed-upon procedures.

.82 You should periodically check the RD "regulations" section of the USDA Web site for updates at www.rurdev.usda.gov/regs/.

Department of Education Amends Student Financial Assistance Guide to Reflect Two New Programs

.83 If your firm audits for-profit postsecondary institutions or servicers, you should be aware that in September, the U.S. Department of Education (ED) issued interim guidance to amend the January 2000 Audit Guide *Audits of Federal Student Financial Assistance Programs at Participating Institutions and Institution Servicers* (SFA Guide). The guide can be found at www.ed.gov/about/offices/list/oig/nonfed/sfgd2000.pdf. The purpose of the guidance is to recognize two new financial aid programs—the Academic Competitiveness Grant (ACG) Program and the National Science and Mathematics Access to Retain Talent Grant (National SMART Grant) Program.

.84 The guidance was issued in the form of a "Dear CPA Letter" and can be accessed at www.ed.gov/about/offices/list/oig/nonfed/dearcpa0701.pdf. ED issued the guidance in this interim format because it is in the process of working on a more comprehensive revision to the SFA Guide to reflect changes in the Federal Student Aid programs. In the meantime, ED wants to ensure audit coverage of the ACG Program and the National SMART Grant Program before the complete revised SFA Guide is issued.

.85 The ED guidance provides background information on each of the new programs. It also includes required procedures for each program that are mandatory for all audits conducted using the SFA Guide for audits with field work starting on or after (or still being conducted) 15 calendar days after the date of the issuance of the amendment (that is, 15 calendar days after issuance date of August 30, 2007), if the client institution participated, or should have participated, in either of the new programs in audit periods ending after June 30, 2006. Two of the required procedures are also applicable for audits of servicers who service schools participating in the two new programs.

.86 Watch the GAQC Web site for updates and information on the more comprehensive revision to the SFA Guide.

Recent Auditing and Attestation Pronouncements and Related Guidance

.87 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. Although some do not specifically address issues associated with your single audits, you should still be aware of them as they could affect the work you do on the financial statement audit portion of the single audit. You can look to the Audit Risk Alerts *State and Local Governmental Developments* (2007), *Not-For-Profit Organizations Industry Developments* (2007/08), and *Health Care Industry Developments* (2007/08) for further discussion of the financial statement audit implications of these standards. We are only describing in more detail below those standards that may have some impact on your single audits.

.88 For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. The GAQC Web site at www.aicpa.org/GAQC is also a useful Web site to look for updates. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report

(continued)

SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See "AICPA Risk Assessment Standards" in this alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue date: December 2005	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective for periods ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.

Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA TPA TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice alert responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice alert provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.89 In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.90 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.91 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.92 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.93 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. Examples for state and local governmental entities might include governing boards, city councils, audit committees, mayors, governors, legislators, university/college presidents, and chancellors. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.94 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

.95 The AICPA has also published the AICPA Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS in a financial statement audit. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

> **Help Desk—**The GAQC has provided a public link on its Web site to an archived conference call discussing SAS No. 112 and its impact on practice. You can find the link to the call at gaqc.aicpa.org/Resources/Impact+of+SAS+112+on+Governmental+Financial+Audits+Conference+Call.htm.

AICPA Issues Illustrative Yellow Book Reports With SAS No. 112 Terminology

.96 The required *Government Auditing Standards* reporting is also affected by the issuance of SAS No. 112. As noted by GAO upon issuance of the 2007 revision to the Yellow Book, auditors should adopt the terminology and definitions in SAS No. 112 when reporting on internal control deficiencies (see also, "*Government Auditing Standards* Developments" in this alert). The GAQC has developed updated Yellow Book report illustrations that reflect the new SAS No. 112 terminology that can be found at gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports/#YB. Those reports have been reviewed by GAO staff. The illustrative report examples, which update two illustrations that appear in the GAS/A-133 Guide, will ultimately be incorporated into the 2007 edition of the GAS/A-133 Guide when it is updated later this year. Further, two other reports in the GAS/A-133 Guide (Example 4-4 and 4-6) will be updated in the 2007 edition to reflect similar SAS No. 112.

AICPA Issues Auditing Interpretation to Address SAS No. 112 Implications on Single Audits

.97 The ASB has issued a final related audit interpretation to SAS No. 112 (AU section 9325.01–.03) titled, Auditing Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1). As mentioned previously in "OMB Revises Circular A-133," in this alert, the issuance of this interpretation coincides with the issuance by OMB of a revision to Circular A-133 for the implications of SAS No. 112. The interpretation establishes definitions for the terms *control deficiency*, *significant deficiency*, and *material weakness* when the auditor is reporting control deficiencies that relate to internal control over compliance in a Circular A-133 audit. The terms and definitions included in the interpretation are as follows:

- A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect on a timely basis noncompliance with a type of compliance requirement of a federal program.
- A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected.
- A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected.

Updated Circular A-133 Illustrative Single Audit Reports Issued to Incorporate SAS No. 112 Language

.98 The three Circular A-133 reports listed below have been updated for SAS No. 112 and are incorporated into the 2007 update to the GAS/A-133 Guide which is expected to be available in late 2007. GAS/A-133 Guide also includes other illustrative reports illustrating various compliance reporting situations that were also updated for SAS No. 112.

- Example 12-1. Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance With OMB Circular A-133 (*Unqualified Opinion on Compliance and No Material Weaknesses [No Significant Deficiencies in Internal Control Over Compliance Identified*]).
- Example 12-2. Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance With OMB Circular A-133 (*Unqualified Opinion on Compliance and Significant Deficiencies in Internal Control Over Compliance Identified*) [Note that this is a new report to reflect the most common situation for the reporting of significant deficiencies—that is, when the report on compliance is unqualified].
- Example 12-3. Report on Compliance With Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance With OMB Circular A-133 (*Qualified Opinion on Compliance and Material Weaknesses in Internal Control Over Compliance Identified*) [Note that this report has been revised to reflect the most common situation for the reporting of material weaknesses—that is, when the report on compliance is qualified].

Help Desk—The GAQC has provided updated illustrative single audit reports that incorporate the new SAS No. 112 language on its Web site at gaqc.aicpa.org/Resources/Illustrative+Auditors+Reports/#OMB

Guidance on Evaluating Control Deficiencies in a Single Audit

.99 As noted in SAS No. 112, the auditor must evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses. However, the guidance in SAS No. 112 for evaluating control deficiencies is written from the perspective of a financial statement audit. The following guidance is intended to emulate the guidance in SAS No. 112 for your consideration when evaluating control deficiencies in a single audit.

.100 In a single audit, the significance of a control deficiency depends on the potential for noncompliance, not on whether noncompliance actually has occurred. Accordingly, the absence of identified noncompliance does not provide evidence that identified control deficiencies are not significant deficiencies or material weaknesses. When evaluating whether control deficiencies, individually or in combination, are significant deficiencies or material weaknesses, the auditor should consider the likelihood and magnitude of actual or potential noncompliance.

.101 The following are examples of factors that may affect the likelihood that a control, or combination of controls, could fail to prevent or detect noncompliance:

- The nature of the type of compliance requirement involved. For example, a specific special test or provision may involve greater risk because it is unique to the program and may require unique controls.
- The susceptibility of the program and related types of compliance requirements to fraud.
- The subjectivity and complexity involved in meeting the compliance requirement and the extent of judgment allowed.
- The cause and frequency of any known or detected exceptions related to the operating effectiveness of a control.
- The interaction or relationship of the control with other controls.
- The interaction of the control deficiency with other control deficiencies.
- The possible future consequences of the deficiency.

.102 The evaluation of control deficiencies includes the magnitude of noncompliance. Several factors affect the magnitude of noncompliance that could result from a deficiency or deficiencies in controls. The factors may include, but are not limited to, the following:

- The program amounts or total of transactions exposed to the deficiency in relation to the type of compliance requirement
- The volume of activity related to the compliance requirement exposed to the deficiency in the current period or expected in future periods
- Adverse publicity or other qualitative factors

.103 Multiple control deficiencies that affect the same type of compliance requirement increase the likelihood of noncompliance and may, in combination, constitute a significant deficiency or material weakness, even though such deficiencies are individually insignificant. Therefore, the auditor should evaluate individual control deficiencies that affect the type of compliance requirement, or component of internal control, to determine whether they collectively result in a significant deficiency or material weakness.

.104 In determining whether a control deficiency or combination of control deficiencies is a significant deficiency or material weakness, the auditor also should evaluate the possible mitigating effects of effective compensating controls that have been tested and evaluated as part of the audit of the major program. A compensating control is a control that limits the severity of a control deficiency and prevents it from rising to the level of a significant deficiency or, in some cases, a material weakness. Compensating controls operate at a level of precision, considering the possibility of further undetected noncompliance, which would result in the prevention or detection of noncompliance that is more than inconsequential or material to the type of compliance requirement. Although compensating controls mitigate the effects of a control deficiency, they do not eliminate the control deficiency. The auditor could evaluate and test the effectiveness of a compensating control and determine whether it operates effectively for the purpose of mitigating the effects of the control deficiency in the type of compliance requirement.

.105 The auditor may encounter deviations in the operating effectiveness of controls. A control that has an observed nonnegligible deviation rate is at least a control deficiency regardless of the reason for the deviation, and could be, based upon further evaluation, a significant deficiency or material weakness. For example, if the auditor designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a nonnegligible deviation rate because based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

.106 The auditor should conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency. Although the term *prudent official* is not defined in the standard, the concept is that an auditor should "stand back" and take another objective look at the severity of the deficiency much as would a regulator or someone from an oversight agency.

.107 For purposes of deficiencies in a single audit, the following areas ordinarily are at least significant deficiencies in internal control:

- Policies and procedures that are incomplete, inadequate, or outdated for the activities subject to a type of compliance requirement.
- Inadequate segregation of duties over a type of compliance requirement.
- Controls over complex types of compliance requirements.
- IT controls relating to the activity subject to the type of compliance requirement.

.108 Each of the following is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

- Lack of operating policies and procedures for the activities subject to a type of compliance requirement.
- Ineffective oversight of a major federal program by those charged with governance over compliance with those program requirements where the activity is subject to the type of compliance requirement, for example, lack of adequate review of federal financial reports prior to submission to the grantor.
- Identification by the auditor of material noncompliance for the period under audit that was not initially identified by the entity's internal control. (This is a strong indicator of a material weakness even if management subsequently corrects the noncompliance.)
- An ineffective internal audit function or risk assessment function for a major program for which such functions are important to the monitoring or risk assessment component of internal control for a type of compliance requirement.
- Identification of fraud in the major program of any magnitude on the part of senior program management. For the purposes of evaluating and communicating deficiencies in internal control, the auditor should evaluate fraud of any magnitude—including fraud resulting in immaterial noncompliance—on the part of senior program management, of which he or she is aware.
- Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected.
- An ineffective control environment. Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment over compliance with major program requirements.

AICPA Risk Assessment Standards

.109 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111) that are described in the following table. They are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The risk assessment standards were written from the perspective of a financial statement audit. The AICPA will be evaluating the new SASs and any potential implications for audits performed under Circular A-133. Watch the GAQC Web site for further updates over the course of the next year.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Audit Documentation

.110 SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), provides guidance on the form, content, retention, extent, and confidentiality of audit documentation as required by

GAAS. Among other things, SAS No. 103 requires audit documentation to be sufficient to enable an experienced auditor, having no previous connection to the audit, to understand the nature, timing, extent, results, and conclusions of auditing procedures performed, and that the accounting records agree or reconcile with the audited financial statements or other audited financial information. SAS No. 103 contains guidance on documenting significant findings or issues; identifying the preparer and reviewer of audit documentation; documenting specific items tested; documenting departures from relevant SASs; revising audit documentation after the date of the auditor's report; and ownership and confidentiality of audit documentation.

.111 It requires you to assemble, within 60 days following the delivery of the auditor's report to the entity, the audit documentation that forms the final audit engagement file. (Some states may require that this be done within a shorter period.) After that date, SAS No. 103 precludes you from deleting or discarding existing audit documentation, and requires that you appropriately document any subsequent additions or changes.

.112 In developing this SAS, the ASB considered the documentation requirements of the PCAOB, the International Auditing and Assurance Standards Board, the GAO's *Government Auditing Standards*, and suggestions received from the National Association of State Boards of Accountancy. The SAS establishes standards and provides guidance to an auditor of a nonissuer regarding the audit documentation for audits of financial statements or other financial information being reported on. Audit reviewers consider audit documentation to be an essential element of determining audit quality, including the quality of audits conducted under GAS and Circular A-133. Evidence from quality control reviews and peer reviews clearly shows that problems with audit documentation may be the root of many quality problems. Therefore, you may want to consider spending some time considering the new requirements and your firm's policies and procedures relating to documentation. Some additional key areas of the SAS are as follows:

- It requires the auditor, when preparing audit documentation, to consider the needs of an "experienced auditor" having no previous connection with the audit, to understand the procedures performed, the evidence obtained, and the specific conclusions reached. That concept is likely to be familiar to you because GAS contains a similar requirement.
- It provides enhanced guidance concerning matters that should be documented and the retention of documentation.
- It requires you to document audit evidence that is contradictory or inconsistent with the final conclusions and how you addressed the contradiction or inconsistency.

.113 We suggest that you consider this requirement as you develop your firm internal policies with regard to documentation. You should keep in mind that, in situations in which a single audit is performed later, after the completion of the financial statement audit, questions have arisen about how the 60-day requirement would apply to single audit documentation. While no authoritative guidance has been issued on this question yet, some are interpreting this to mean that the auditor would assemble, within 60 days following the delivery of the auditor's Circular A-133 report to the entity, the single audit documentation that forms the final single audit engagement file.

.114 It specifies a minimum file retention period of five years from the date of the auditor's report. Some states have their own separate retention requirements that may extend beyond five years for auditors that practice within the state. This SAS is effective for audits of financial statements for periods ending on or after December 15, 2006.

Dating the Auditor's Reports

.115 SAS No. 103 also includes amendments to SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530.01 and .05). The amendment requires that your report not be dated earlier than the date on which you have obtained sufficient competent audit evidence to support the opinion on the financial statements.

.116 The AICPA has issued Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*, providing information that may help practitioners interpret this requirement. See the discussion in the next section of this alert.

.117 The auditor's report on compliance and on internal control over compliance related to major programs, as required by Circular A-133, ordinarily should have the same date as that of the other reports, but may carry a later date because some of the audit work to satisfy Circular A-133 requirements may be done subsequent to the work on the financial statements. When this is the case, the reporting required by Circular A-133 should be dated at the later date (that is, when the auditor has obtained sufficient appropriate audit evidence to support the report on the audit of compliance).

Audit Documentation Technical Practice Aids

.118 In May 2007, the ASB issued two practice aids related to SAS No. 103, which was issued in December 2005.

.119 Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because, since management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.120 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.121 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.122 The Professional Issues Task Force (PITF) issued Practice Alert No. 07–1 to provide guidance to auditors of nonissuers regarding the following:

- The audit report date

- Evidence supporting financial statement amounts and disclosures—specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.123 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information which it plans to issue during the third quarter of 2007.

AICPA Peer Review Checklists—A Tool to Help Improve Audit Quality

.124 In performing peer reviews, review teams must complete all relevant programs and checklists issued by the AICPA Peer Review Board. The AICPA updates its *Peer Review Checklists* annually; the 2007 versions of those checklists (which include checklists on state and local government, health care, and not-for-profit audits; GAS audits; single audits; and HUD audits) are now available. While intended for use in peer reviews, the various relevant checklists may be a helpful tool for your firm or audit organization to use as a memory jogger to ensure you have not overlooked anything significant before issuing your audit reports. Taking this step may help you improve your audit quality. The various relevant checklists can be accessed through the GAQC at gaqc.aicpa.org/Resources/Research+Tools+and+Aids/Peer+Review+Checklists.htm.

Recent AICPA Independence and Ethics Pronouncements

.125 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Independence Requirements Under AICPA Rules, GAS, and Circular A-133

.126 If you perform audits under GAS (including Circular A-133 audits), then you should be aware of the independence rules in those standards and regulations, as well as the independence rules of the AICPA. The AICPA's Professional Ethics Executive Committee (PEEC) proposes and issues ethics interpretations and rulings relating to independence and other ethics matters. You can download recent proposals and rulings from the AICPA Web site at www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/.

.127 In a GAAS audit, AICPA members are required to comply with the AICPA's Code of Professional Conduct Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01). Ethics Interpretation 101-3, "Performance of Nonattest Services" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05), establishes requirements that members should meet to perform nonattest services for an attest client without impairing independence with regard to that client.

> **Help Desk**—In July 2006, the AICPA published a Practice Aid, *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627kk). This valuable tool contains a series of checklists to help auditors determine their compliance with applicable independence rules. The publication can be obtained at www.cpa2biz.com or by calling the AICPA at (888) 777-7077.

.128 For audits conducted in accordance with GAS, auditors and audit organizations also are subject to the GAS independence rules. Those rules, which are, in some cases, very similar to the AICPA independence rules and in other cases more restrictive, address when auditors and their organizations are independent from the organizations they audit by defining when personal, external, and organizational impairments to independence exist.

.129 To comply with the GAS provisions governing nonaudit services to audit clients, audit organizations are required to meet two overarching principles. First, audit organizations are barred from performing management functions or making management decisions for their clients. Second, audit organizations are prohibited from auditing their own work or providing nonaudit services if the services are material or significant to the subject matter of the audit. Paragraphs 3.24–.30 of GAS discuss various types of nonaudit services and the affect that they have on auditor independence. The GAO has issued a question and answer document, *Answers to Independence Standard Questions*, to address its independence standard.

> **Help Desk—***Answers to Independence Standard Questions* is available on the Web at www.gao.gov/govaud/ybk01.htm. The AICPA Web site provides a useful discussion of the AICPA and GAO independence rules at www.aicpa.org/audcommctr/spotlight/Govt_21_Independence_and_Related_Topics.htm.

.130 Finally, you should note that Section 305(b) of Circular A-133 contains an additional independence requirement. Under Circular A-133, an auditor who prepares the indirect cost proposal or cost allocation plan may not also perform the single audit when indirect costs recovered by the auditee during the prior year, as defined, exceeded $1 million.

On the Horizon

.131 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to *Government Auditing Standards* or Circular A-133 audits or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.132 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+ Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code +of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline

ASB Clarity Project

.133 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper, *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including the following:

- Establishing objectives for each of the standards and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.134 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.135 The ASB has created a number of task forces charged with monitoring specific activities of the IAASB and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Response to Single Audit Quality Issues

.136 With the increased focus on single audit quality (see "Results of Federal Study on Single Audit Quality" in this alert), there are likely to be many new projects taken on over the course of the next year and into the future to address the audit deficiencies cited in the PCIE report. These projects could result in revisions to AU section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1), the GAS/A-133 Guide, and other standards, regulations, and guidance. The best way to keep informed of developments over the next year is to watch the GAQC Web site at www.aicpa.org/GAQC for updates and news items.

Resource Central

.137 The following are various resources that practitioners engaged in *Government Auditing Standards* and Circular A-133 audits may find beneficial.

Publications

.138 Practitioners may find the following publications useful with respect to *Government Auditing Standards* and Circular A-133 audits.

- Audit Guide Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit and Accounting Guide *State and Local Governments* (2007) (product no. 012667kk)
- Audit and Accounting Guide *Not-for-Profit Organizations* (2007) (product no. 012647kk)
- Audit and Accounting Guide *Health Care Organizations* (2007/08) (product no. 012617kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)

AICPA reSOURCE: Accounting and Auditing Literature

.139 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.140 The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry. Among the many courses, the following may be of specific interest to auditors of organizations subject to *Government Auditing Standards* and Circular A-133 audits.

- *State & Local Government Strategic Briefing—2006/2007*
- *Foundations in Governmental Accounting*

- *Governmental Accounting and Auditing Update—2006/2007 Edition*
- *Workpaper Techniques for Government and Nonprofit Organizations*
- *Government Accounting and Reporting: Putting It All Together*
- *Audits of HUD-Assisted Projects*

.141 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.142 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for both. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to auditors of organizations subject to *Government Auditing Standards* and Circular A-133 audits are:

- *Yellow Book: An Overview*
- *2007 Annual Update-Government: GASB Activities*
- *Governmental and NPO Workpaper Preparation Techniques Overall Approach*
- *Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments*

.143 To register or learn more, visit www.cpa2biz.com.

Webcasts

.144 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

Member Service Center

.145 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.146 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.147 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.148 The AICPA sponsors four annual conferences that focus on GAS and Circular A-133 topics in the summer and fall of each year.

.149 *Governmental Accounting and Auditing Update Conference (GAAC) EAST* is held in late summer in Washington, D.C., and its counterpart, *Governmental Accounting and Auditing Update Conference (GAAC) WEST*, takes place in Tempe, AZ in early fall. They are designed for CPAs working in federal, state, and local government; public practitioners with government clients; and regulators who need to be aware of emerging developments should attend this conference to remain current on the issues. Attending one of these conferences is a great way to receive timely guidance along with practical advice on how to handle new legislation and standards from key government officials and representatives of the accounting profession—including the standard setters themselves.

.150 *AICPA National Governmental and Not-for-Profit Training* is held in Lake Buena Vista, FL. If you need hands on training and are a CPA in public practice—or a governmental or not-for-profit staffer—then this conference is for you. You'll hear directly from the standards setters and industry leaders on a variety of topics including developments in governmental accounting and auditing, the latest in proposed regulations and laws on the local, state, and federal government levels, as well as those affecting the not-for-profit sector and more.

.151 *Not-for-Profit Industry Conference* is held in early summer in Washington, D.C. The conference offers a wide range of topics geared to NPO professionals at every level: tax, management, audit and accounting issues, fundraising, and regulatory issues.

.152 For further information about the conferences, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.153 The GAQC is a firm-based, voluntary membership center designed to improve the quality of governmental audits and the value of such audits to purchasers of governmental audit services. Governmental audits are audits and attestation engagements performed under *Government Auditing Standards* of federal, state, or local governments; not-for-profit organizations; and certain for-profit organizations, such as housing projects and colleges and universities that participate in governmental programs or receive governmental financial assistance. The GAQC keeps member firms informed about the latest developments, as well as provides tools and information to help them better manage their audit practice. Firms that join demonstrate their commitment to audit quality by agreeing to adhere to certain membership requirements.

.154 The GAQC has been in existence since September 2004. Since its launch, center membership has grown to over 850 firms from 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The membership accounts for approximately 82 percent of the total federal expenditures covered in single audits performed by CPA firms in the Federal Audit Clearinghouse database (harvester.census.gov/sac/) for the year 2004 (the latest year with complete submission data).

.155 The Center's focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information they need, when they need it, to maximize quality and practice success. Center resources include the following:

- E-mail news alerts on current audit and regulatory developments that keep member firms informed about the latest developments
- Dedicated center Web site at www.aicpa.org/GAQC with Resources, Community, Events and Products, and a complete listing of GAQC members in each state

- Online Member Discussion Forums for sharing best practices and discussing issues firms are facing
- Webcasts, Web seminars, and teleconferences updating members on a variety of technical, legislative, regulatory, and practice management subjects (note that these activities are archived on the GAQC Web site)

Help Desk—With all of the quality issues being noted in governmental audits, as discussed in this alert, your firm should consider joining the center. To enroll or learn more about the GAQC, including details on the membership requirements and fees for membership, go to www.aicpa.org/GAQC or e-mail GAQC staff at GAQC@aicpa.org. To preview member benefits, go to gaqc.aicpa.org/Memberships/.

AICPA State and Local Government Expert Panel

.156 The State and Local Government Expert Panel is an AICPA volunteer group whose purpose it is to identify state and local government financial reporting and auditing issues and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the GASB, regulators such as the GAO and the OMB, and applicable industry associations; and to advise and assist in the development of AICPA products and services related to state and local government audits. For information about the activities of the State and Local Government Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_government.htm.

AICPA Not-For-Profit Organization Expert Panel

.157 The Not-For-Profit Organization Expert Panel is an AICPA volunteer group whose purpose it is to identify financial reporting and auditing issues unique to not-for-profit organizations and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the AICPA Accounting Standards Executive Committee (AcSEC) and Financial Accounting Standards Board (FASB); and to advise and assist in the development of AICPA products and services related to not-for-profit organizations. For information about the activities of the Not-For-Profit Organization Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_notforprofit.htm.

Industry Web Sites

.158 The Internet covers a vast amount of information that may be valuable to auditors of organizations that are subject to *Government Auditing Standards* or OMB Circular A-133 Audits, including current industry trends and developments. Some of the more relevant sites are shown in the appendix of this alert. The governmental or not-for-profit audit practice sections of some of the larger CPA firms may also contain specific auditing and accounting information that is helpful to auditors.

.159 This Audit Risk Alert replaces Government Auditing Standards *and Circular A-133 Audits—2006.*

.160 The Audit Risk Alert Government Auditing Standards *and Circular A-133 Audits* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to sreed@aicpa.org or write to:

Susan Reed, CPA

Manufacturing Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
MANUFACTURING INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert, prepared by the AICPA staff, is intended to help you identify the significant business risks that may result in the material misstatements of your manufacturing client's financial statements with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements you perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an *Other Auditing Publication*, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Written by Christopher Cole, CPA CFE
Technical Manager
Accounting and Auditing Publications

How This Alert Helps You

.01 This Audit Risk Alert is intended to help you plan and perform audits and other engagements of your manufacturing clients. The knowledge delivered by this Alert can assist you in achieving a more robust understanding of the business and economic environment in which your clients operate, an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the manufacturing industry, and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry knowledge.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022336kk). You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this Alert.

.04 When referring to the professional standards, this alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54 is referred to as AU section 317.

Economic and Industry Developments

.05 AU section 311A, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), among other matters, provides guidance for auditors regarding the specific procedures that should be considered in planning an audit in accordance with generally accepted auditing standards (GAAS). AU section 311A states that the auditor should obtain knowledge of matters that relate to the nature of the entity's business, organization, and operating characteristics, and consider matters affecting the industry in which the entity operates, including economic conditions as they relate to the specific audit.

Current Manufacturing Economic and Industry Developments

The U.S. Manufacturing Environment

.06 There are many competing and conflicting factors affecting the United States economy. The consensus is that the economy is still growing but not as quickly. That's good news for the Federal Reserve Board, which has increased the federal fund rate 75 basis points during the year to stabilize inflation and cool the economy. The U.S. Department of Commerce reported continued but smaller increases in real gross domestic product through third quarter of 2006.

.07 The Institute for Supply Management (ISM) cites data that shows October 2006 as the 41st consecutive month of growth in the manufacturing sector of the economy. At current levels, the National Association of Manufacturers' (NAM) president, John Engler, says, "U.S. manufacturing output has never been higher. Overall, manufacturing continues to grow but at a slower pace and with some level of decline in sectors related to the motor vehicle and home construction industries."

.08 According to a study conducted by Duke University, small business owners are concerned by slowing sales and rising labor and energy costs. As a result, many companies will be delaying capital spending and hiring plans. The NAM reported that labor, energy, and other structural costs are as much as 30 percent higher in the United States than those of foreign manufacturers, which serves to further squeeze profit margins.

.09 With a midterm election in 2006 many consumer-impact items have shown some price softening. Gas prices have declined by 25 percent this year, mortgage interest rates edged back to March 2006 levels, and price forecasts for heating fuels such as natural gas and propane are down from last winter. These trends should increase consumer and business confidence during the fourth quarter and boost spending by year end.

.10 Manufacturers face a variety of issues in this business environment. Some examples would include the shortage of skilled labor and the widening opportunities to outsource production design and processing. This in turn may give rise to concerns with supply chain security. New environmental regulations and enforcement efforts with regard to business practices may affect manufacturing throughout the world.

The Labor Pool and Why It Is Drying Up

.11 There is a drought coming. Over the next 10 years, the baby boomer generation will begin to receive their Social Security checks, cash in their 401k accounts, and roll over their lump sum pension distributions. Who is going to fill those empty workstations? Educational institutions in the United States have not been turning out enough engineers, information technology specialists, chemists, or machinists to offset these vacancies. According to the Bureau of Labor Statistics, the unemployment rate has remained essentially flat at 4.7 percent in August 2006, compared to 4.9 percent in the previous year. Of those who were unemployed, 22 percent were not actively seeking employment. There is a small pool of qualified applicants for skilled jobs and a general low level of unemployment with demand ready to skyrocket. Recruiting costs can be expected to increase along with wage and benefits expenses as competition drives the market rate for these applicants up. Recently there has been an increase in skilled labor outside the United States, which has allowed manufacturers to combat the rising domestic labor costs by outsourcing to nations with developing economies.

.12 The shrinking labor pool is also accompanied by an increase in the cost of providing employee benefits. According to a study released earlier this year by the U.S. Government Accountability Office (GAO), employee benefits costs have increased 18 percent while wages are up 10 percent from 1991 to 2005. The disparity in the increase between wages and benefits developed between 2002 and 2005. Prior to that time the growth rate was uniform. Since 2002, wages have shown no appreciable growth as a result of increased benefit costs.

.13 For the purpose of the GAO study, employee benefits expense contained three components; health insurance cost, paid leave, and retirement income. Paid leave has historically been the largest piece of the benefit dollar, but in 2005, health care costs were on par with it. This equality is a result of a 28 percent increase in health care costs versus a 5 percent increase in paid leave costs during the period of the study. Health insurance cost increases were greatest for medium-sized companies, at 45 percent, while large companies saw increased costs of 34 percent and small company costs remained flat.

.14 With global pricing competition causing shrinking profit margins, manufacturers have trended toward passing the cost of benefit increases through to employees in the forms of higher employee contributions to health insurance premiums, higher co-pay and deductible policies, and the shift from defined benefit pensions to defined contribution plans such as 401k or Simple IRA plans. For manufacturing clients with pension and postretirement benefits the Financial Accounting Standards Board (FASB) has recently issued Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*.

Outsourcing to the Global Marketplace

.15 The outsourcing of U.S. manufacturing production is picking up pace. The availability of skilled and unskilled labor at a discount in China, Thailand, India, Viet Nam, and Mexico is very attractive to U.S. manufacturers under pressure to reduce costs. While the desire to reduce labor and product cost is universal, the final destination varies according to the needs or requirements of the manufacturer. Each of the recent slate of assembly countries has its own skill set and advantages for the U.S. manufacturer.

.16 China has the inexpensive labor to draw assembly business away from the United States and even other Asian countries. Now China is turning to creating competing products in the high tech, automotive, and value-added arenas based on the lessons learned. During 2006, China ousted the United States as the world's largest exporter. However, China does not have as much experience with U.S. quality and delivery standards, and the legal protection of a manufacturer's intellectual property is still a deep concern.

.17 Thailand has been in the marketplace for decades. Its manufacturers are more familiar with U.S. quality expectations and have a legal system that addresses product counterfeiting laws. As is to be expected with any nation that is developing an economic base, wages have risen, making Thailand less of a bargain to U.S. manufacturers.

.18 India has a cheap workforce and is comparable in size to that of China. India has taken a different tack with its economic development in that it is more focused on internal growth than imported jobs. The amount of paperwork required by foreign companies to operate in India could be described as daunting.

India has a healthy workforce number. Most are primarily employed in the service sector, and most of the remainder, employed in the manufacturing sector, are employees of India-based companies.

.19 Viet Nam is relatively new to this market and has wage rates similar to those in China. Similarly there is a lack of experience with U.S. manufacturers and a low level of legal protection for intellectual property. It may be possible that your client is the first foreign customer that a manufacturer has ever dealt with, which may lead to quality and U.S. import issues for your client.

.20 Mexico has drawn the interest of a different type of manufacturer. U.S. companies are beginning to rely more heavily on our southern neighbor in two areas: large product manufacturing and design engineering. The advantage to manufacturers of large items such as autos and appliances is proximity. Products can be easily transported by truck or train, and production line visits are less cumbersome for U.S. personnel. An increasingly well-trained pool of engineers has allowed companies to outsource design work and more complex production processes as well. This makes Mexico more attractive for high tech manufacturers. While still less expensive than the United States, Mexican wages are being pushed up by an increasing standard of living, as in Thailand. Mexico has positioned itself well with the focus on skilled labor to maintain an advantage.

.21 In general, the outsourcing trend continues as countries all over the world market the natural and human resources they have. Gaining an understanding of the risks and pitfalls of international commerce is as important as reaping the benefits.

Intellectual Property

.22 In the United States, manufacturers expect intellectual property rights (IPR) to be honored. For generations U.S. courts have enforced product and process patent rights, copyrights, and trademarks. The same may not be true with global trading partners. According to Congressman Donald Manzullo, 70 percent of all counterfeit goods are produced in China. Idea theft has been going on for centuries, only the products and processes have changed. The most counterfeited products in recent years have been music CDs and movie DVDs. Manzullo stated that there has been a growing market in bogus auto and aircraft parts, pharmaceuticals, and software.

.23 There are several types of theft, such as:

- An unauthorized sale of the genuine product.
- An unauthorized but functional copy of the product.
- An inferior copy of the product with the manufacturer's name or trademark affixed.

.24 Within the last category are the possibilities of harm to the public either through the use of harmless but ineffective components or through the use of ingredients that may actually cause harm.

.25 The concept of individual property is a fairly new one in China. Until recently, property, including IPR, belonged to the government. There are laws in place to protect IPR but they go largely unenforced, with the exception of domestically developed intellectual property.

.26 In the past, the same could be said for India. However, India has begun to realize that to become a modern nation with cutting edge, globally competitive products, you must have innovation. There will be little interest in investing time or money in innovation to have ideas stolen and then be driven out of the market by your own product. It is the national interest of every developed nation to respect and enforce IPR laws. Hopefully, China will eventually realize its own stake in enforcing the laws it agreed to when it joined the World Trade Organization. You may want to discuss with your clients the possibility of stolen IPR and their plans to address the issue.

.27 In the report produced by the National Intellectual Property Law Enforcement Coordination Council (NIPLECC), several government agencies in the commerce/trade and law enforcement areas outline actions to combat the theft of U.S. intellectual property. These measures include a Web site, www.stopfakes.gov, where companies can access information on protecting themselves when dealing with non-U.S. partners, with a special focus on China. The Department of Homeland Security and the Customs and Border Protection agency are working to intercept fake and counterfeit goods at the borders. Seizures of these goods have doubled since 2001.

Supply Chain Security

.28 A recent report indicated that 73 percent of U.S. companies with greater than $1 billion in sales had a disruption primarily related to raw materials, natural disasters, or supply chain partners in the past five years, and 36 percent of those surveyed took more than a month to recover. How is your client going to handle supply chain disruptions? Over the past few years there have been events that have brought production to a halt. It happened after 9/11, it happened after Hurricane Katrina, and it could happen again. With just-in-time production (JIT), inventory levels have dropped to record low amounts as manufacturers streamline processes to reduce holding costs. Under normal operating conditions this system is beneficial, but what happens when there are no airlines operating for seven days, or an entire region of the country is under water, or 40 percent of the workforce is affected by pandemic flu? Planning for the worst case scenario could prevent your client from becoming one of the 40 percent of small businesses that do not reopen after a major disaster, according to the American Red Cross. Companies should be prepared for risks such as fire, natural disasters such as hurricanes, pandemic illness, communications failure, civil disturbance, terrorist action, or hazardous materials incidents.

.29 A good plan may include:

- Maintaining a contact list of employees, suppliers, and customers.
- Establishing an emergency information number for employees.
- Storing a current back-up of computer data in a secure location off-site.
- A review of insurance coverage to establish appropriate coverage and address events that are excluded from coverage.

.30 The plan should be reviewed and updated periodically.

.31 Planning for major disasters will also address more localized or industry-specific disruptions, such as increases in fuel prices and raw materials, skilled labor shortages, changes in the competitive landscape, or the loss of a key supplier or customer. Use of multiple suppliers in a variety of geographic areas, identifying alternative raw materials, diversifying the customer base, and vertical integration of the supply chain are all solutions implemented by manufacturers.

.32 Further information on disaster recovery plans can be obtained at www.fema.gov, www.redcross.org, and www.sba.gov and from most insurance carriers.

Regulatory and Legislative Issues

Pension Protection Act of 2006

.33 On August 17, 2006, President Bush signed the Pension Protection Act. In addition to expanding and improving defined contribution plans such as IRAs and 401(k) plans, the purpose of the Act is to strengthen the federal pension insurance program. The provisions in the Act are effective for fiscal years beginning after December 31, 2007. The major provisions of this legislation that may affect manufacturers with pension plans are:

- Increased premiums and contributions required for underfunded plans and companies that terminate their plans.
- Requirements for accurate measurement and reporting of benefit obligation liabilities.
- A prohibition on promising additional benefits to employees until they are funded.
- Closure of loopholes that permitted companies to defer contributions to under-funded plans.

.34 Included in the Act were several trade provision changes, such as the suspension or modification of tariffs on certain categories of imported goods and modification of specific trade agreements and regulations. For technical explanations of the provisions of the Pension Protection Act, see www.house.gov/jct/x-38-06.pdf.

National Ambient Air Quality Standards

.35 The Environmental Protection Agency implemented new air quality standards that will require a nearly 50 percent reduction in particulate matter (PM) emissions. The National Ambient Air Quality Standards (NAAQS) announced on September 21, 2006, address fine and coarse particle pollution. Research has linked significant health issues ranging from respiratory problems to heart and lung disease to this type of pollution. These standards must be met by 2015. If your manufacturer has emission concerns, it may need to consider these standards in the future. For more information on NAAQS see www.epa.gov/pm/naaqsrev2006.html.

Foreign Corrupt Practices Act

.36 The past two years have been active for the Department of Justice (DOJ) and the Securities and Exchange Commission (SEC), which are the primary enforcement organizations for the Foreign Corrupt Practices Act (FCPA). Since 2004, the DOJ and SEC reached settlements totaling $64 million for improper payments made to foreign officials. The largest penalty ever assessed was recently imposed as a result of improper payments and an insufficient corporate FCPA compliance policy. Ethics are on the front burner for American companies at least in part because they are on the front page of America's newspapers. Stepped-up FCPA enforcement efforts by DOJ and SEC can result in crippling fines and forfeiture of profits for those who violate the Act.

.37 The FCPA was passed in 1977 in response to SEC investigations that determined that millions of dollars were being paid to foreign officials, politicians, and political parties. The purpose of this legislation is to help maintain the integrity of the American business system. The FCPA is written to acknowledge the fact that business practices and customs vary throughout the world. It is important to be aware of the provisions of this legislation in the age of the global economy.

.38 The FCPA prohibits the payment, offer, or promise of payment to induce the recipient to influence any act or decision of a foreign official in his or her official capacity, to violate his or her lawful duty, or induce a foreign official to exercise his or her influence in an improper manner. The prohibition extends to payments or offers made through third parties and the business sought does not need to be with a foreign governmental entity.

.39 Payments that are made to facilitate or expedite performance of a "routine governmental action" may be allowed. Examples provided by the U.S. DOJ include obtaining permits or licenses; processing visas; providing police protection, mail service, phone service, or utility service; and inspections associated with transit of goods.

.40 Each violation of the FCPA can result in fines for corporations of up to $2 million and fines up to $100,000 and five years imprisonment for officers, directors, stockholders, employees, and other agents of the corporation. In certain circumstances, the Racketeer Influenced and Corrupt Organizations Act provisions may apply as well. For more information about the FCPA or to utilize the DOJ's Foreign Corrupt Practices Act Opinion Procedure to predetermine compliance with the law see www.usdoj.gov.

An Update on European Hazardous Waste Regulations

.41 Last year's Alert discussed the Waste Electrical and Electronic Equipment (WEEE) and Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS) directives of the European Commission. The goals of these directives are the prevention of WEEE and to require environmentally friendly recovery and disposal of WEEE. The provisions of WEEE and RoHS are minimum standards required to be adopted by European Union (EU) members. Each member may impose more restrictive measures if it chooses. Fines and penalties for noncompliance will be established by individual nations. Regulations have been implemented in some nations with effective dates in 2006. Additional guidance in the form of questions and answers has been issued by the European Commission in an effort to clarify the application of these rules at http://ec.europa.eu/environment/waste/weee_index.htm. You may need to contact EU members to determine specific requirements for each nation.

.42 Many manufacturers may find it difficult to comply with RoHS requirements. The directive provides for the removal of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyl, and polybrominated dipheyl ether from their electronic products and file the appropriate compliance documents with the EU or face having their products stopped at the border. You may consider inquiring of your client if any of its products contain the regulated compounds. Compliance records include certification of all raw materials and component parts and must be maintained for four years from the time the product is first sold. If the EU is a large part of your client's market, the use of a specialist to verify compliance may be in order. See AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1).

Energy Efficiency Action Plan

.43 The European Commission has provided an overview of a plan to reduce energy consumption by EU members by 20 percent by 2020. During the next two years, the commission will be setting standards for minimum energy performance for appliances, equipment, buildings, and energy services. Some of the manufactured items that are specifically included in the plan are autos, refrigerators, water heaters, computers, televisions, heating and air conditioning systems, lighting, and washing machines. To be sold in the EU, these items will require special labeling that indicates that they meet the prescribed energy standards that are anticipated to be applied in 2009. The commission expects the plan to be fully implemented within six years. For more information see http://ec.europa.eu/index_en.htm.

U.S. Bureau of Customs and Border Protection

.44 Since September 11, 2001, the U.S. Bureau of Customs and Border Protection (CBP) has played an increasing role in policing imports to the United States. To ease the daily burden on an organization that processes nearly 70 thousand truck, rail, and sea containers each day, CBP implemented a voluntary program to improve supply chain security. The Customs-Trade Partnership Against Terrorism (C-TPAT) and its subsidiary Free and Secure Trade (FAST) program include annual corporate self-assessments of supply chain security procedures in relation to C-TPAT criteria, including all outsourced elements such as foreign facilities or warehousing. Once these criteria are met and validated by CBP, there are substantial benefits for participants, including a reduced number of inspections, Front of the Line processing for inspections, and assignment of a CBP Supply Chain Security Specialist to assist with the process. For more information on these or other CBP programs or requirements, see www.cbp.gov.

Transportation Worker Identification Credential Program

.45 Two Department of Homeland Security divisions are implementing a program that is part of the 2002 Maritime Transportation Security Act. The Transportation Worker Identification Credential (TWIC) program will require 850,000 port workers to prove legal citizenship and pass a background check to obtain an ID card. According to the Transportation Security Administration, the affected workers include 110,000 truck drivers and may include a substantial number of illegal immigrants. An article in the *Wall Street Journal* put the number between 20 percent and 50 percent of the truck drivers. The program is expected to begin by the end of 2006. There is a potential for major impact on the nation's goods flow from and to seaports. For more information, see www.tsa.gov.

Audit and Accounting Issues Arising From Current Risks

Related Party Transactions

.46 The existence of related party transactions has always presented a concern for the auditor. There is a current trend toward vertical integration of the supply chain, as discussed in the "Supply Chain Security" section of this Alert, which may affect your manufacturing clients. The client often fails to understand the question fully when asked about the existence of related parties. The definition, according to FASB Statement No. 57, *Related Party Disclosures*, is as follows:

> Affiliates of the enterprise; entities for which investments are accounted for by the equity method by the enterprise; trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; principal owners of the enterprise; its management; members of the immediate families of principal owners of the enterprise and its management; and other parties with which the enterprise may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. Another party also is a related party if it can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

.47 One way that the existence of related parties can be established is through inquiry of management during the planning process. It is often helpful to provide the client with examples to help understand your query. Transactions that frequently occur between related parties could include:

- Borrowing or lending money at no or low interest
- Real estate transactions for amounts significantly different from appraised value
- Nonmonetary like-kind exchanges
- Loans made without repayment terms
- Related vendors or customers
- Use of company or personal property with or without payment
- Guarantees of indebtedness
- Other noncash activity with a related party

.48 Once known, the auditor can evaluate the company's policies and procedures for identifying, recording, and disclosing related activity.

.49 It is important to be alert for evidence of nondisclosed related parties throughout the audit. Some useful sources in a search for related parties are board of directors meeting minutes, conflict-of-interests disclosure forms, large unusual or nonrecurring accounting entries, legal invoices, bank confirmations, and vendors or customers that account for a large percentage of activity.

.50 The fact that there are dealings with related parties does not indicate that they are not valid business transactions. Identifying such items is merely the first step. Material transactions may be tested to ensure that they are reasonable, have an appropriate business purpose and, where possible, were reviewed and approved by disinterested parties at the appropriate level. Documentation of the items should include names and relationships of the parties involved, amounts, and a description of the transactions for possible disclosure in the financial statements. Be sure to refer to FASB Statement No. 57 for complete disclosure criteria and requirements.

Management Override of Controls

.51 As described in AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), the design, implementation, and monitoring of internal control are the responsibility of the entity's management. One of the most difficult types of fraud to detect is management override of internal control. Auditors often spend a good deal of time considering, documenting, and testing a client's controls. Within minutes, a supervisor in the accounts payable department can bypass one or more controls and establish a bogus vendor without a trace. The clerk that "just went ahead" and entered the vendor without the prerequisite background check is on the supervisor's bowling team and was just "helping him out." Now the groundwork has been laid for payments on fictitious invoices that will either fund the supervisor's retirement or allow him to spend it in state prison. The likelihood is that the clerk won't think twice about helping out a friend (the supervisor) because he doesn't realize the implications of overriding controls such as obtaining a credit report or references for potential vendors. He may not even understand why the controls exist in the first place.

.52 How do you find out if it's likely that overrides are occurring? AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), has several things for you to think about:

- Brainstorming. Adopt the mindset of the potential fraudster. For example, if you were the accounts payable supervisor, how could you steal from the client? What if you were the accounts receivable supervisor, the purchasing manager, or even the CFO? Who has access to the accounting records? Use the required brainstorming session to get inside the organization's controls and look for holes and potential conflicts-of-interest. Which categories of accounts are most likely to have misstatements and which of those are lacking the controls to expose them in the normal course of business?
- Inquiring. Try to ask questions of the people that no one thinks to ask. You may be introduced to the department manager but also ask to interview one or two of the frontline employees. The people with their hands in the mix might just have the best vantage point. Be careful in the way you phrase your questions and try to put the employee at ease. The least you will get is a better understanding that the controls are working as designed.
- Flowcharting. Consider the use of flowcharts to record the flow of documents and the approval/review process. A flowchart is a good way to visually identify control system overlaps and gaps. Microsoft Excel can be a valuable tool in this arena.

.53 Once you have identified the potential problems, tailor your audit program to address those areas in your testing. In addition, AU section 316.57 provides guidance on procedures to address management override of controls. If you suspect management override of controls, you should document your findings and review them with the appropriate level of management.

.54 You should also refer to AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), which addresses additional responsibilities of the auditor with regard to internal control issues discussed in the "Evaluating Control Deficiencies" section, which follows.

.55 The AICPA Auditing Standards Board (ASB) has issued Statements on Auditing Standards (SASs) No. 104 through No. 111, referred to as the Risk Assessment Standards. A discussion of these standards and how they affect your audit can be found in the "Recent Auditing and Attestation Pronouncements and Related Guidance" section of this Alert.

Evaluating Control Deficiencies

.56 In May 2006, the ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006.

.57 The standard requires that auditors (1) evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses and (2) communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

.58 Some examples of potential control deficiencies that you might find in manufacturing companies are:

- Lack of segregation of duties in the cash management function due to a small number of administrative staff and without effective compensating controls
- Management override of controls by owners of privately held companies or by project managers in the invoice approval process
- Inadequate monitoring of the financial accounting process to detect deficiencies in internal control by management
- Inadequate controls that would prevent improper revenue recognition through recording change orders that have not been approved
- Ineffective perpetual inventory controls that do not detect a material misstatement of inventory
- Inadequate controls due to a lack of client expertise in preparing financial statements including the process for identification, consolidation, and disclosure of VIEs

.59 The AICPA has published the Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in the implementation of this Standard.

Compliance With Laws and Regulations

.60 While it is not a requirement under generally accepted audit standards to design procedures to detect illegal acts by clients, exercising professional skepticism and due diligence may bring issues to light. AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1), discusses the responsibilities of the auditor when encountering questionable activity. Audit procedures that may highlight concerns could be reading of meeting minutes, obtaining a legal representation letter from the client's attorney, and substantive testing of transactions. As a step in understanding the client, AU section 317.08 recommends inquiry of management regarding the client's policies for the prevention of illegal acts to gain insight into the client's compliance with laws and regulations. Some examples provided of items that may warrant additional testing include:

- Unauthorized transactions, improperly recorded transactions, or transactions not recorded in a complete or timely manner in order to maintain accountability for assets
- Investigation by a governmental agency, an enforcement proceeding, or payment of unusual fines or penalties
- Large payments for unspecified services to consultants, affiliates, or employees
- Unusually large payments in cash, purchases of bank cashiers' checks in large amounts payable to bearer, transfers to numbered bank accounts, or similar transactions

.61 It is important to consider the impact that illegal acts would have on your audit engagement and your client's financial statements. It may be necessary to take one or more of the following steps:

- Consider whether management needs to record or disclose a contingent liability (FASB Statement No. 5, *Accounting for Contingencies*)
- Consider the impact on the entity as a whole, including its ability to continue as a going concern (AU sec. 341A, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern,* AICPA, *Professional Standards,* vol. 1)
- Communicate with audit firm owners and legal counsel
- Communicate with the client's legal counsel
- Communicate with an appropriate level of management, the audit committee, or others of similar authority
- Express a qualified or adverse opinion (AU sec. 508, *Reports on Audited Financial Statements,* AICPA, *Professional Standards,* vol. 1)
- Withdraw from the engagement
- Document findings and steps taken to resolve the issues

Contingencies

.62 FASB Statement No. 5 defines a contingency as "an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss to an enterprise that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the acquisition of an asset or the reduction of a liability or the loss or impairment of an asset or the incurrence of a liability." The purpose of gaining an understanding of contingencies is to properly reflect the financial position of an entity at the end of the reporting period.

.63 The difficulty in recording or disclosing contingent events relates to the heavy reliance on estimates. When determining that a contingency should be accrued, the statement requires that as of the date of the financial statements, "it is probable that an asset has been impaired or a liability had been incurred." Further determinations are required regarding the reasonableness of the amount to be accrued and whether the loss will be substantiated by future events. The term *probable* is defined as "the future event or events are likely to occur." Events occurring subsequent to the financial statement date can provide a valuable resource in your search for contingent items. It is clear that a thorough reading of FASB Statement No. 5 is required to properly apply the rules. Appropriate documentation should be kept with regard to potential contingency accruals and disclosures.

.64 Examples of items that may require accrual or disclosure are:

- Pending or threatened litigation, claims, or assessments, including those related to counterfeit products

- Defense of intellectual property rights
- Threat of expropriation of assets
- Environmental remediation
- Self-insurance
- Tax assessments
- Product warranties
- Guarantees of indebtedness

.65 Sample disclosures for these events can be obtained in AICPA *Accounting Trends and Techniques*, 60th Edition (product no. 009898kk).

.66 Items that are generally not accrued and may not require disclosure could include:

- Gain contingencies
- General business risks
- Appropriated retained earnings

.67 The goal of accruing or disclosing contingencies is to provide users with financial statements that are not misleading.

Recent Auditing and Attestation Pronouncements and Related Guidance

.68 Presented below is a list of auditing and attestation pronouncements, Guides, and other guidance. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. The PCAOB sets auditing and attestation standards for audits of public companies. See the PCAOB Web site at www.pcaobus.org for information about its activities. You may also look for announcements of newly issued standards in *The CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org.

SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (December 2005)	These standards established two categories of professional requirements that are identified by specific terms. The words *must* or *is required* are used to indicate an unconditional requirement. The word *should* is used to indicate a presumptively mandatory requirement. (The words *may*, *might*, *could*, and *should consider* represent actions that auditors have a professional obligation to consider.) The provisions of SAS No. 102 and SSAE No. 13 were effective upon issuance. The ASB intends to make conforming changes to AICPA literature over the next several years to remove any language that would imply a professional requirement where none exists.

SAS No. 103, *Audit Documentation* (December 2005)	SAS No. 103 supersedes AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. This SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
SASs No. 104 through No. 111, Risk Assessment Standards	See the "Spotlight" section in this Alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (May 2006)	The new standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. Effective for periods ending on or after December 15, 2006.
PCAOB Auditing Standard No. 4 (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	*Reporting on Whether a Previously Reported Material Weakness Continues to Exist* This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.
PCAOB Conforming Amendment to AT section 101.04*f*, *Attest Engagements* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	*Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting from the Adoption of the Auditing Standard No. 4* This states that Auditing Standard No. 4 must be used for reporting on whether a material weakness continues to exist for any purpose other than a company's internal use.

Spotlight on the AICPA Risk Assessment Standards

.69 In March 2006, the ASB issued eight SASs that provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. The following table lists the eight SASs and their effect on existing standards:

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1*, Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*	Amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU section 230)
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150)
SAS No. 106, *Audit Evidence*	Supersedes SAS No. 31, *Evidential Matter* (AU section 326A)
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	Supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312A)
SAS No. 108, *Planning and Supervision*	Supersedes SAS No. 1, *Appointment of the Independent Auditor* (AU section 310); and supersedes SAS No. 22, *Planning and Supervision* (AU section 311A)
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	Supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	Supersedes SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* (AU section 313); and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319)
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling	Amends SAS No. 39, *Audit Sampling* (AU section 350)

Key Provisions of the New Standards

.70 The SASs emphasize the link between understanding the entity, assessing risks, and the design of further audit procedures. The SASs introduce the concept of risk assessment procedures, which are deemed necessary to provide a basis for assessing the risk of material misstatement. Risk assessment procedures, along with further audit procedures, which consist of tests of controls and substantive tests, provide the audit evidence to support the auditor's opinion of the financial statements. According to the SASs, the auditor should perform risk assessment procedures to gather information and gain an understanding of the entity and its environment, including its internal control. These procedures include inquiries, analytical procedures, and inspection and observation. Assessed risks and the basis for those assessments should be documented; therefore, auditors may no longer default to maximum control risk for an entity's risk assessment without documenting the basis for that assessment. The SASs also require auditors to consider and document how the risk assessment at the financial statement level affects individual financial statement assertions, so that auditors may tailor the nature, timing, and extent of their audit procedures to be responsive to their risk assessment. It is anticipated that generic audit programs will not be appropriate for all audit engagements, as risks vary between entities.

Effective Date and Implementation

.71 The SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006; earlier application is permitted. In some cases, implementation of the SASs may result in an overall increased work effort by the audit team, particularly in the year of implementation. It also is anticipated that to implement the SASs appropriately, some firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessments* (product no. 022526kk) at www.cpa2biz.com.

New Companion Audit Guide

.72 In December 2006, the AICPA published an Audit Guide titled *Assessing and Responding to Audit Risk in a Financial Statement Audit*. This guide will help practitioners understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

SAS No. 103

.73 The ASB has issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which supersedes SAS No. 96 of the same name and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. One key provision of this standard is the amendment of AU section 530.01 and .05, which requires that "the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion." The footnote to this section describes sufficient appropriate audit evidence as "evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them." Application of the rules may require revising the process used by your firm at the end of fieldwork to include a field review of audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

Staff Accounting Bulletin No. 108

.74 On September 13, 2006, the SEC released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.75 There have been two common approaches used to quantify such errors. Using one approach, the error is quantified as the amount by which the current year income statement is misstated (rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but that nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.76 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.77 If, in correcting a prior year error in the current year, the amount is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

Recent AICPA Independence and Ethics Pronouncements

.78 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this Alert to be aware of independence and ethics matters that will affect their practice.

.79 The AICPA general *Audit Risk Alert—2006/07* and other AICPA industry-specific Alerts contain summaries of recent pronouncements not included here. To obtain copies of AICPA standards and Guides, contact AICPA Service Center Operations at (888) 777-7077 or go online at www.cpa2biz.com.

Recent Accounting Pronouncements and Related Guidance

.80 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in *The CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 155	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Statement No. 156	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*
FASB Statement No. 157	*Fair Value Measurements*
FASB Statement No. 158	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Interpretation No. 48	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/about_eitf.shtml for a complete list of EITF Issues.
FASB Staff Positions (Various dates)	Go to www.fasb.org/fasb_staff_positions/index.shtml for a complete list of FASB Staff Positions (FSP). Some of the recently issued FSPs address issues relating to FASB Statements No. 143 and No. 150, among others; and FASB Interpretation 46(R).

AICPA Technical Practice Aids 2130.09–.35 (December 2005) (Nonauthoritative)	Various topics on the application of Statement of Position (SOP) 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* to Debt securities
AICPA Technical Practice Aids 5600.07–.17 (November 2005) (Nonauthoritative)	Various lease topics
AICPA Technical Practice Aid 6910.16–.20 (January 2006) (Nonauthoritative)	"Nonregistered Investment Partnerships"

On the Horizon

.81 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the manufacturing industry or that may result in very significant changes. Read the AICPA general *Audit Risk Alert—2006/07* for a more extensive list of ongoing auditing and accounting projects. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing generally accepted accounting principles (GAAP) or GAAS.

.82 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaobus.org or www.pcaob.com
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed above.

Auditing Pipeline

Proposed Statement on Standards for Attestation Engagements, Reporting on an Entity's Internal Control Over Financial Reporting *(AT section 501)*

.83 In January 2006, the ASB issued a revised exposure draft of a proposed SSAE that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE would establish standards and provide guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). Additionally, the new definitions of *significant deficiency* and *material weakness* provided by SAS No. 112 have been incorporated into AT section 501. In May 2006, the PCAOB announced plans to amend certain aspects of PCAOB Auditing Standard No. 2 to improve its implementation. Because the forthcoming changes to the PCAOB Standard will be relevant to the revision of AT section 501, the ASB has decided to defer the issuance of final revised AT section 501 until the PCAOB issues its amendments and the ASB has time to consider them.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles,* for Nongovernmental Entities

.84 The ASB has issued an exposure draft introducing a proposed SAS entitled *Amendment to Statement on Auditing Standards No. 69, The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles, *for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards entitled *The Hierarchy of Generally Accepted Accounting Principles.* The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69, AICPA, *Professional Standards*, vol. 1, AU sec. 411) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed statement, which can be obtained at www. fasb.org.

Proposed Statement on Auditing Standards, The Auditor's Communication With Those Charged With Governance

.85 This proposed SAS would replace AU section 380A, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1), and establish standards and provide guidance to an auditor on matters to be communicated with those charged with governance. Among other matters, the proposed SAS identifies specific matters to be communicated and also would amend AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1). Readers should be alert for the issuance of a final standard.

Accounting Pipeline

Proposed FASB Statement The Hierarchy of Generally Accepted Accounting Principles

.86 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

Proposed FASB Statement Accounting for Transfers of Financial Assets

.87 The exposure draft *Accounting for Transfers of Financial Assets* (Transfers Project) is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets,* and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed Statement seeks to (1) clearly specify the permitted activities of a qualifying special-purpose entity (QSPE), (2) address practice issues related to which arrangements should be considered and how they should be considered in the legal isolation analysis, (3) eliminate the prohibition on a QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor, (4) revise the methodology used to initially measure at fair value interests related to transferred financial assets held by a transferor, and (5) clarify guidance related to when rollovers of beneficial interests are permitted within a QSPE. At its July 26, 2006, meeting, the FASB decided to combine the servicer discretion project (which addressed issues relating to the waiver of due-on-sale, collateral substitution, and foreclosed asset activities) into the Transfers Project. The FASB expects to issue a final Statement, which would amend FASB Statement No. 140, in the second quarter of 2007. See the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115

.88 The fair value option project has two phases. This proposal represents Phase 1, which addresses the fair value option for certain financial assets and financial liabilities. Phase 2 will consider permitting the fair value option for certain nonfinancial assets and nonfinancial liabilities and some of the financial assets and financial liabilities excluded from the scope of Phase 1.

.89 The proposed FASB Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur. The proposed FASB Statement has specific financial presentation requirements to display fair values and those values that are measured using other measurement techniques. The proposed FASB Statement would amend FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities,* to require that securities reported at fair value in accordance with FASB Statement No. 115 satisfy the specific financial statement presentation requirements. Visit the FASB Website at www.fasb.org for additional information.

Proposed FASB Statements, Business Combinations *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.90 In these proposed FASB Statements, the FASB plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. That all acquisitions of businesses be measured at the fair value of the business acquired.

2. That substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.

3. That entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.91 Exposure drafts on business combinations—purchase method procedures and noncontrolling interests—were issued on June 30, 2005. Visit the FASB Web site for further information.

FASB Project on Derivative Disclosures

.92 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, allowing a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft on derivative disclosures is expected in the fourth quarter of 2006 or early 2007. The objective is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. Additionally, the project is expected to reconsider the existing disclosure requirements under FASB Statement No. 133 for relevance and applicability. It is also expected that derivative loan commitments will fall under the scope of this project and could have a significant impact on the financial statements of entities with derivative loan commitments.

Proposed FASB EITF Issues

.93 Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

Proposed FASB Staff Positions

.94 A number of proposed FASB Staff Positions are in progress addressing issues related to financial institutions. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

AICPA Resource Central

.95 Educational courses, publications, and other resources available to practitioners are listed here.

On the Bookshelf

.96 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements:

- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012776kk). This Audit Guide is designed to provide guidance to auditors reporting on a service organization's controls. This Guide also provides guidance to auditors of companies that use service organizations. In addition, it has been revised as of May 1, 2006, to reflect certain changes necessary because of the issuance of authoritative pronouncements.

- Audit Guide *Analytical Procedures* (product no. 012556kk). Receive guidance on the effective use of analytical procedures with an emphasis on analytical procedures as substantive tests.

- *Accounting Trends & Techniques*, 60th Edition (product no. 009898kk). This is the must-have resource for any CPA who frequently creates or uses financial reports. Filled with current reporting techniques and methods used by the nation's top organizations, this 650-page AICPA bestseller will provide guidance you need to improve your accounting preparation and procedures.

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012526kk). This Guide has been updated with conforming changes as of May 1, 2006. In it you'll find an overview of derivatives and securities, in addition to case studies to help you better understand auditing derivative instruments.

- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012516kk). This publication, as of May 1, 2006, assists auditors in fulfilling their professional responsibilities with regard to auditing assertions about revenue.

- *Audit and Accounting Manual* (product no. 005136kk) is developed exclusively for small- and medium-size CPA practices. This unique manual explains and demonstrates useful techniques and procedures for conducting compilation, review, and audit engagements—from planning to internal control to accountants' reports.

AICPA reSOURCE: Online Accounting and Auditing Literature

.97 AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library—that's available too! Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, Technical Practice Aids, Audit and Accounting Guides (more than 20!), Audit Risk Alerts (more than 15!), and *Accounting Trends & Techniques.* To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Educational Courses

.98 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the manufacturing industry. Those courses include:

- *Auditing Inventory* (product no. 738340HSkk). This interactive CD-ROM course will teach you all you need to know to audit inventory effectively and efficiently. The course covers accounting principles, audit risks, performing an inventory observation, and reviewing the inventory amount. All this is taught with interactive exercises and a video inventory observation in which you participate.
- *Information Security: Critical Guidance for CPAs in Public Practice and Industry* (product no. 732451kk). This course informs participants about security for systems developed with new technology and what part the assessment of risk plays in developing controls to secure these systems.
- *SEC Reporting* (product no. 736773kk [text] and 186754kk [video]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance. Learn to apply Regulations S-X, S-K, and other SEC guidance, prepare or review financial statements and their related disclosures, and more. This course benefits financial reporting managers of registrants or companies planning to go public as well as managers and partners in public practice with SEC registrants as clients.

.99 Accountants in the manufacturing industry, as well as in other industries, may also find the following courses helpful:

- *Accounting Update: A Review of Recent Activities* (2006 edition) (product no. 732762kk). This course keeps you current and shows you how to apply the most recent financial accounting and reporting standards. Highlights include FASB Statement No. 154 on accounting changes and error corrections, fair value concepts and measurements, and the revised FASB Statement No. 123 on share-based payment.
- *FASB Review for Industry* (2006-2007 edition) (product no. 730563kk). Comprehensive coverage of recent FASB, AcSEC, IASB, and EITF pronouncements is provided in this course geared to the specific interests of the CPA in corporate management.
- *AICPA's Annual Accounting and Auditing Update Workshop* (2006 edition) (product no. 736182kk, text; also available in video and DVD formats with a manual). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *Accounting for Income Taxes: Applying SFAS No. 109/FIN 48: A Whole New Ballgame!* (product no. 732792kk). No other area in accounting is as far reaching, and requires knowledge of a vast number

of topics in financial and tax accounting, as accounting for deferred taxes. This course addresses the application of this complex standard to many common differences between financial accounting and tax compliance. You will gain a sound knowledge of the theory of deferred taxes and how this theory can be applied to practical situations. Many practical examples are included to illustrate the theory, and the information is presented so you will be able to apply this theory to any other situation that you may encounter.

- *The AICPA's Guide to Business Consolidations, Goodwill and Other Consolidation Issues* (product no. 735134kk). Learn how FASB Statements No. 141 and No. 142 have changed the rules for business combinations and goodwill accounting. Develop standards for applying purchase accounting and how to allocate the acquired entity now that it's the only game in town under FASB Statement No. 141. Identify variable interest entities' impact under FASB Interpretation No. 46(R). Learn how FASB Statement No. 142 deals with goodwill from initial recognition to the annual impairment review requirements.

.100 For a listing of additional courses available, please download the *Fall/Winter 2006 AICPA CPE Catalog* at www.cpa2biz.com/CPE/default.htm.

Online CPE

.101 AICPA CPExpress (formerly InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 nonmembers) for a new subscription and $119 ($319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to construction company auditors are:

- *2006 Annual Update-A&A: Issues for Audits of Nonpublic Entities on the Horizon*
- *2006 Annual Update-A&A: Issues for Audits of Public Entities on the Horizon*
- *Just-in-Time Systems, Economic and Market-Value-Added*
- *Revenue Recognition: Income Statement Presentation and Disclosures*

.102 To register or learn more, visit www.cpa2biz.com.

Webcasts

.103 Stay plugged in to what's happening and earn CPE credit right from your desktop. AICPA webcasts are high-quality two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in on the discussion. If you can't make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.104 The CFO Roundtable Webcast Series—brought to you each calendar quarter—covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting, to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.105 The SEC Quarterly Update Webcast Series—brought to you each calendar quarter—showcases the profession's leading experts on what's "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and CorpFin activities, these hard-hitting sessions will keep you "plugged in" to what's important. A must for both preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Technical Hotline and Ethics Hotline

.106 Do you have a complex technical question about GAAP, other comprehensive bases of accounting (OCBOA), or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

.107 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Service Center Operations

.108 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Center Operations at (888) 777-7077.

.109 This Audit Risk Alert replaces the *Manufacturing Industry Developments—2005/06* Audit Risk Alert. The Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ccole@aicpa.org, or write to:

Independence and Ethics Alert—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Lori L. Pombo, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

We thank and acknowledge Lisa Snyder, CPA, Director, AICPA Professional Ethics Division, for her significant and valuable contributions to the development of this Alert.

How This Alert Helps You

.01 This Alert informs you of recent developments in the area of independence and ethics for accountants—an area receiving increasing attention from regulators, investors, the news media, and others. Moreover, this Alert helps you understand your independence requirements under the AICPA Code of Professional Conduct (the Code) and, if applicable, certain other rule-making and standard-setting bodies. We present a section entitled "Digest of the AICPA Independence Rules" in plain English at the back of this Alert so you can understand and apply them with greater confidence.

Independence Defined

.02 *Independence* is defined as:

1. *Independence of mind.* The state of mind that permits the performance of an attest service without being affected by influences that compromise professional judgment, thereby allowing an individual to act with integrity and exercise objectivity and professional skepticism; and
2. *Independence in appearance.* The avoidance of circumstances that would cause a reasonable and informed third party, having knowledge of all relevant information, including safeguards applied, to reasonably conclude that the integrity, objectivity, or professional skepticism of a firm or a member of the attest engagement team has been compromised.

AICPA Independence and Ethics Developments

Two New Ethics Rulings on Gifts and Entertainment

.03 On October 26, 2005, the Professional Ethics Executive Committee (PEEC) adopted Ethics Ruling No. 113, "Acceptance or Offering of Gifts or Entertainment," under Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.226–.227), and Ethics Ruling No. 114, "Acceptance or Offering of Gifts and Entertainment to or From an Attest Client," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.228–.229). The new rulings provide guidance on how a member's offer or acceptance of gifts or entertainment, to or from a client (both attest and nonattest), or a customer or vendor of the member's employer, affects a member's independence or objectivity. The PEEC also deleted Ethics Ruling No. 1, "Acceptance of a Gift," under Rule 101 (AICPA, *Professional Standards*, vol. 2, ET sec. 191.001–.002) because the substance of this ethics ruling was incorporated into Ethics Ruling No. 114.

Acceptance or Offering of Gifts or Entertainment

.04 Ethics Ruling No. 113 under Rule 102 is applicable to members in public practice with respect to all clients as well as to members in business and industry with respect to the customers and vendors of their employers, and provides that objectivity would not be considered to be impaired if a member offers or accepts gifts or entertainment to or from a client (including certain individuals associated with a client) or a customer or vendor of the member's employer (including representatives of the customer or vendor), provided the gift or entertainment is "reasonable in the circumstances."

.05 In determining whether gifts or entertainment are "reasonable in the circumstances," the ruling directs the member to exercise judgment. Relevant facts and circumstances include, but are not limited to:

- The nature of the gift or entertainment
- The occasion giving rise to the gift or entertainment
- The cost or value of the gift or entertainment
- The nature, frequency, and value of other gifts and entertainment offered or accepted
- Whether the entertainment was associated with the active conduct of business either directly before, during, or after the entertainment
- Whether other clients, customers, or vendors also participated in the entertainment
- The individuals from the client, customer, or vendor and the member's firm or employer who participated in the entertainment

.06 In addition, the ruling makes it clear that permitted gifts or entertainment should not violate a member, client, customer, or vendor's own policies governing gifts and entertainment, or applicable laws and regulations.

Acceptance or Offering of Gifts and Entertainment to or From an Attest Client

.07 Ethics Ruling No. 114 under Rule 101 incorporates the substance of the existing guidance contained in Ethics Ruling No. 1 and is applicable to members in public practice who are "covered members" with respect to an attest client of the member's firm. The ethics ruling provides that independence would be considered impaired if an individual on the attest engagement team or in a position to influence the attest engagement accepts a gift from an attest client unless the value is clearly insignificant to the member. In addition, since a member may also offer a gift to an attest client, the proposal also provides that as long as the gift offered was "reasonable in the circumstances," independence would not be considered impaired. With respect to entertainment, the proposal provides that covered members should be able to offer or accept entertainment to or from an attest client provided the entertainment is "reasonable in the circumstances."

Effective Date

.08 The ethics rulings became effective on January 21, 2006. Ethics Ruling No. 113 under Rule 102 can be found at www.aicpa.org/about/code/et_191.html#et_191_ruling_113 and Ethics Ruling No. 114 under Rule 101 can be found at www.aicpa.org/about/code/et_191.html#et_191_ruling_114.

Basis for Conclusions

.09 The PEEC also developed a basis for conclusion document which summarizes considerations that were deemed significant by the PEEC in the development of the new ethics rulings. It can be found at www.aicpa.org/download/ethics/Gifts_Basis_Document.pdf.

New Conceptual Framework for Independence Standards and Revision to "Other Considerations" of Interpretation No. 101-1

.10 In January 2006, the PEEC adopted a "Conceptual Framework for AICPA Independence Standards" (Conceptual Framework) (AICPA, *Professional Standards*, vol. 2, ET sec. 100.01), and a related revision to "Other Considerations" of Interpretation No. 101-1, "Interpretation of Rule 101" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02), under Rule 101.

.11 The revision to Interpretation No. 101-1 ("Other Considerations" section) requires members to use the Conceptual Framework when making independence decisions involving matters that are not specifically addressed in the independence interpretations and rulings in the Code. Interpretation No. 101-1 also states if the threats to independence are not at an acceptable level, safeguards should be applied to eliminate the threats or reduce them to an acceptable level. In cases where threats to independence are not at an acceptable level, thereby requiring the application of safeguards, the threats identified and the safeguards applied to eliminate the threats or reduce them to an acceptable level should be documented.

.12 The provisions of the Conceptual Framework are discussed below.

Risk-Based Approach of the Conceptual Framework

.13 The Conceptual Framework provides a valuable tool to members in complying with the requirement in the "Other Considerations" section of Interpretation No. 101-1 to evaluate whether a specific circumstance that is not addressed in the Code would pose an unacceptable threat to a member's independence.[1] The Conceptual Framework, which is used by the PEEC when it develops independence standards, uses a risk-based approach to analyze independence matters.

.14 The risk-based approach entails evaluating the risk that the member would not be independent or would be perceived by a reasonable and informed third party having knowledge of all relevant information as not being independent. That risk must be reduced to an acceptable level to conclude that a member is independent under the concepts in this framework. Risk is at an acceptable level when threats are at an acceptable level, either because of the types of threats and their potential effect, or because safeguards have sufficiently mitigated or eliminated the threats. Threats are at an acceptable level when it is not reasonable to expect that the threat would compromise professional judgment.

.15 The risk-based approach involves the following steps:

a. Identifying and evaluating threats to independence.

b. Determining whether safeguards already eliminate or sufficiently mitigate identified threats and whether threats that have not yet been mitigated can be eliminated or sufficiently mitigated by safeguards.

---

[1] Members should note that under no circumstances should the Conceptual Framework be used to overcome specific prohibitions or requirements contained in the independence interpretations and rulings in the Code.

c. If no safeguards are available to eliminate an unacceptable threat or reduce it to an acceptable level, independence would be considered impaired.

These steps are discussed in more detail below.

Identifying and Evaluating Threats to Independence

.16 Threats should be identified and evaluated, both individually and in the aggregate, because threats can have a cumulative effect on a member's independence.

.17 Threats to independence are circumstances that could impair independence. Whether independence is impaired depends on the nature of the threat, whether it would be reasonable to expect that the threat would compromise the member's professional judgment and, if so, the specific safeguards applied to reduce or eliminate the threat, and the effectiveness of those safeguards.

.18 Many different circumstances (or combinations of circumstances) can create threats to independence. It is impossible to identify every situation that creates a threat. However, the following seven broad categories of threats should always be evaluated when threats to independence are being identified and assessed.

Categories of Threats to Be Evaluated

Threat	*Description*	*Example(s)*
Self-Review	Members reviewing as part of an attest engagement evidence that results from their own, or their firm's, nonattest work.	• Preparing source documents used to generate the client's financial statements.
Advocacy	Actions promoting an attest client's interests or position.	• Promoting the client's securities as part of an initial public offering. • Representing a client in U.S. tax court.
Adverse Interest	Actions or interests between the member and the client that are in opposition.	• Commencing, or the expressed intention to commence, litigation by either the client or the member against the other.
Familiarity	Members having a close or longstanding relationship with an attest client or knowing individuals or entities (including by reputation) who performed nonattest services for the client.	• A member of the attest engagement team whose spouse is in a key position at the client, such as the client's chief executive officer. • A partner of the firm who has provided the client with attest services for a prolonged period. • A member who performs insufficient audit procedures when reviewing the results of a nonattest service because the service was performed by the member's firm. • A member of the firm having recently been a director or officer of the client.

		• A member of the attest engagement team whose close friend is in a key position at the client.
Undue Influence	Attempts by an attest client's management or other interested parties to coerce the member or exercise excessive influence over the member.	• A threat to replace the member or the member's firm over a disagreement with client management on the application of an accounting principle. • Pressure from the client to reduce necessary audit procedures for the purpose of reducing audit fees. • A gift from the client to the member that is other than clearly insignificant to the member.
Financial Self-Interest	Potential benefit to a member from a financial interest in, or from some other financial relationship with, an attest client.	• Having a direct financial interest or material indirect financial interest in the client. • Having a loan from the client, from an officer or director of the client, or from an individual who owns 10 percent or more of the client's outstanding equity securities. • Excessive reliance on revenue from a single attest client. • Having a material joint venture or other material joint business arrangement with the client.
Management Participation	Taking on the role of client management or otherwise performing management functions on behalf of an attest client.	• Serving as an officer or director of the client. • Establishing and maintaining internal controls for the client. • Hiring, supervising, or terminating the client's employees.

.19 Where threats are identified but, due to the types of threats and their potential effects, such threats are considered to be at an acceptable level (that is, it is not reasonable to expect that the threats would compromise professional judgment), the consideration of safeguards is not required. If identified threats are not considered to be at an acceptable level, safeguards should be considered as described below.

Determining Whether Safeguards Mitigate or Eliminate Threats

.20 Safeguards are controls that mitigate or eliminate threats to independence. Safeguards range from partial to complete prohibitions of the threatening circumstance to procedures that counteract the potential influence of a threat. The nature and extent of the safeguards to be applied depend on many factors, including the size of the firm and whether the client is a public interest entity.[2] To be effective, safeguards should eliminate the threat or reduce to an acceptable level the threat's potential to impair independence.

[2] Refer to footnote 5 of the Conceptual Framework (AICPA, *Professional Standards*, vol. 2, ET sec. 100.01.20), for the definition of a *public interest entity* as used in the Conceptual Framework.

.21 To determine whether safeguards already eliminate or sufficiently mitigate identified threats and whether threats that have not yet been mitigated can be eliminated or sufficiently mitigated by safeguards, the effectiveness of the safeguards should be considered. The effectiveness of safeguards depends on many factors, including those listed here:

a. The facts and circumstances specific to a particular situation

b. The proper identification of threats

c. Whether the safeguard is suitably designed to meet its objectives

d. The party or parties that will be subject to the safeguard

e. How the safeguard is applied

f. The consistency with which the safeguard is applied

g. Who applies the safeguard

.22 Different safeguards can mitigate or eliminate different types of threats, and one safeguard can mitigate or eliminate several types of threats simultaneously. When threats are sufficiently mitigated by safeguards, the threats' potential to compromise professional judgment is reduced to an acceptable level. A threat has been sufficiently mitigated by safeguards if, after application of the safeguards, it is not reasonable to expect that the threat would compromise professional judgment.

.23 Per revised Interpretation No. 101-1 (as previously discussed), in cases where a threat to independence is not at an acceptable level before the application of safeguards, members are required to document that threat and the safeguards applied to eliminate it or reduce it to an acceptable level. This is a new requirement that is consistent with the International Federation of Accountants Code of Ethics for Professional Accountants. A failure to prepare the documentation would be considered a violation of Rule 202, *Compliance With Standards* (AICPA, *Professional Standards,* vol. 2, ET sec. 202.01), but would not result in an independence impairment, provided the member can demonstrate that he or she did apply safeguards to eliminate the unacceptable threat or reduce it to an acceptable level.

.24 Refer to the Conceptual Framework for numerous examples of the various types of safeguards.

Determining When Independence Is Impaired

.25 If no safeguards are available to eliminate an unacceptable threat or reduce it to an acceptable level, independence would be considered impaired.

Effective Date

.26 The provisions of the Conceptual Framework and the related revision to "Other Considerations" of Interpretation No. 101-1 are effective for all independence decisions made after April 30, 2007. Earlier application is encouraged. The Conceptual Framework can be found at www.aicpa.org/about/code/et_100.html and the revised "Other Considerations" section in Interpretation No. 101-1 can be found at www.aicpa.org/about/code/et_101.html#et_101.02.

Revised Ethics Interpretation on Requests for Client Records

.27 In January 2006, the PEEC adopted revisions to Ethics Interpretation No. 501-1, "Response to Requests by Clients and Former Clients for Records," under Rule 501, *Acts Discreditable* (AICPA, *Professional Standards*, vol. 2, ET sec. 501.02), and Ethics Ruling No. 189, "Requests for Records Pursuant to Interpretation 501-1," of ET section 591, *Ethics Rulings on Other Responsibilities and Practices* (AICPA, *Professional Standards*, vol. 2, ET sec. 591.377–.378), to provide guidance to members on their ethical responsibilities when a client or former client makes a request for client records, supporting records, or other documents that are in the custody or control of the member. The revised interpretation defines four categories of documents and provides guidance when each is required to be made available to clients, as presented in the table below:

Document Type	*Description*	*Member's Requirement Upon Request From Client*
Client-provided records	Accounting or other records belonging to the client that were provided to the member by or on behalf of the client.	When in the member's custody or control, client-provided records should be returned to the client.
Client records prepared by the member	Accounting or other records (for example, tax returns, general ledgers, subsidiary journals, and supporting schedules such as detailed employee payroll records and depreciation schedules) that the member was engaged to prepare for the client.	Should be provided to the client, except that client records prepared by the member may be withheld if the preparation of such records is not complete or there are fees due the member for the engagement to prepare those records.
Supporting records	Information not reflected in the client's books and records that are otherwise not available to the client, with the result that the client's financial information is incomplete. For example, supporting records include adjusting, closing, combining, or consolidating journal entries (including computations supporting such entries) that are produced by the member during an engagement (for example, an audit).	When relating to a completed and issued work product, supporting records should be provided to the client, except that such supporting records may be withheld if there are fees due to the member for the specific work product.
Member's working papers	Include, but are not limited to, audit programs, analytical review schedules, and statistical sampling results, analyses, and schedules prepared by the client at the request of the member.	Member's working papers are the member's property and need not be provided to the client under provisions of this interpretation; however, such requirements may be imposed by state and federal statutes and regulations, and contractual agreements.

.28 Once the member has complied with the requirements above for client-provided records, client records prepared by the member, or supporting records, he or she is under no ethical obligation to comply with any subsequent requests to again provide such records or copies of such records. However, if subsequent to complying with a request, a client experiences a loss of records due to a natural disaster or an act of war, the member should comply with an additional request to provide such records.

.29 In connection with any request for client-provided records, client records prepared by the member, or supporting records, the member may:

- Charge the client a reasonable fee for the time and expense incurred to retrieve and copy such records and require that such fee be paid prior to the time such records are provided to the client;
- Provide the requested records in any format usable by the client;[3] and

[3] The member is not required to convert records that are not in electronic format to electronic format. However if the client requests records in a specific format and the member was engaged to prepare the records in that format, the client's request should be honored.

- Make and retain copies of any records returned or provided to the client.

.30 The revised interpretation also states that the member should comply with the client's request as soon as practicable but, absent extenuating circumstances, no later than 45 days after the request is made. The fact that the statutes of the state in which the member practices grants the member a lien on certain records in his or her custody or control does not relieve the member of his or her obligation to comply with this interpretation. In addition, certain states have laws and regulations that impose obligations on the member greater than the provisions of this interpretation and should be complied with.

.31 In addition, the committee has deleted Ethics Ruling No. 182, "Termination of Engagement Prior to Completion," of ET section 591 (AICPA, *Professional Standards*, vol. 2, ET sec. 591.363–.364) because the substance of this ethics ruling has been incorporated into the revised Interpretation No. 501-1.

Effective Date

.32 Revised Interpretation No. 501-1 became effective April 30, 2006 and can be found at www.aicpa.org/about/code/et_500.html#et_501.02.

New PCAOB Independence and Ethics Rules

.33 (Please refer to "PCAOB Rules Regarding Independence and Ethics" in the section in this Alert entitled "Compliance Reminder Regarding Other Authoritative Bodies" for additional information regarding the Public Company Accounting Oversight Board's (PCAOB) independence and ethics rules.)

.34 On July 26, 2005 the PCAOB adopted seven independence and ethics rules pertaining to independence, tax services, and contingent fees. Pursuant to section 107(b) of the Sarbanes-Oxley Act, these rules were approved by the Securities Exchange Commission (SEC) on April 19, 2006.

.35 The ethics and independence rules cover three primary areas:

1. Fundamental ethics and independence requirements,
2. Contingent fees, and
3. Prohibited tax services that impair auditor independence and audit committee preapproval of certain tax services.

Each of these areas is described in further detail below.

Fundamental Ethics and Independence Requirements

.36 Rule 3502, *Responsibility Not to Knowingly or Recklessly Contribute to Violations*, codifies, in an ethics rule, the principle that persons associated with a registered public accounting firm should not take or omit to take an action knowing, or recklessly not knowing, that the act or omission would directly and substantially contribute to a violation by that registered public accounting firm of relevant laws, rules, and professional standards. Rule 3502 became effective April 29, 2006.

.37 Rule 3520, *Auditor Independence*, establishes a general obligation requiring registered public accounting firms and persons associated with them to be independent of the firm's audit clients throughout the audit and professional engagement period. Rule 3520 became effective April 29, 2006.

Contingent Fees

.38 Rule 3521, *Contingent Fees*, states that a registered accounting firm is not independent if it provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission. Rule 3521 does not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.

Prohibited Tax Services and Audit Committee Preapproval

.39 Rule 3522, *Tax Transactions*, states that a registered accounting firm is not independent if it provides any nonaudit service to the audit client related to marketing, planning, or opining in favor of the tax treatment of a transaction that is confidential or that was initially recommended, directly or indirectly, by the registered public accounting firm and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws. Rule 3522 does not apply to tax services that were completed by a registered public accounting firm no later than June 18, 2006.

.40 Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles*, states that a registered accounting firm is not independent if it provides tax services to a person in a financial reporting oversight role at the audit client, or an immediate family member of such person. Certain exceptions exist for persons who are in a financial reporting oversight role as a result of service on the audit client's board of directors; employed by certain affiliates of the audit client; or hired, promoted, or other change in employment event, provided the tax service was (1) in process before the employment event and (2) completed within 180 days after the event. Rule 3523 does not apply to tax services being provided pursuant to an engagement in process on April 19, 2006, provided that such services are completed before October 31, 2006.

.41 Rule 3524, *Audit Committee Pre-approval of Certain Tax Services*, discusses what a registered accounting firm should do when seeking audit committee preapproval to perform for an audit client any permissible tax service. Specifically, the rules require a registered public accounting firm seeking preapproval to (1) describe proposed tax service engagements, in writing, for the audit committee; (2) discuss with the audit committee the potential effects of the services on the firm's independence; and (3) document the substance of that discussion. Rule 3524 does not apply to any tax service preapproved on an engagement-by-engagement basis before June 18, 2006. For tax services provided to audit clients whose audit committees preapproved tax services pursuant to policies and procedures, this rule will not apply to any such tax service that is begun by April 20, 2007.

Additional Information

.42 Rule 3501, *Definition of Terms*, defines the terms used in the rules. Rule 3501 became effective April 29, 2006.

.43 More detailed information regarding these rules can be found on the PCAOB Web site at www.pcaobus.org/Rules/Rules_of_the_Board/tax_t.aspx.

Compliance Reminder Regarding Other Authoritative Bodies

.44 The independence and ethics rules under the AICPA Code of Professional Conduct apply to all members of the AICPA. However, other rule-making and standard-setting bodies such as the SEC, the PCAOB, the Government Accountability Office (GAO), the U.S. Department of Labor (DOL), state boards of accountancy, and state CPA societies also have independence and/or ethics rules that members must comply with, if applicable, in addition to the AICPA rules. The rules of the SEC, PCAOB, and GAO are discussed briefly below. You should refer to the original text of each organization's rules for full guidance.

SEC Rules Regarding Auditor Independence

.45 Of continuing importance to auditors are the SEC rules entitled "Strengthening the Commission's Requirements Regarding Auditor Independence." These rules were adopted in January 2003 to fulfill the mandate of Title II of the Sarbanes-Oxley Act of 2002, strengthen auditor independence, and require additional disclosures to investors about the services provided to issuers by the independent accountant. These rules address nonaudit services, employment of audit engagement team members by issuers, partner rotation and compensation rules, audit committee reporting requirements, auditor fee and service disclosure requirements to investors, and audit committee reporting requirements.

.46 Auditors should be familiar with these rules as they apply to the audits of domestic issuers, foreign subsidiaries, and affiliates of U.S. issuers, as well as foreign private issuers, by U.S. and foreign accounting firms. More detailed information regarding these rules can be found in the original SEC release at www.sec.gov/rules/final/33-8183.htm.

.47 In response to questions about the implementation and interpretation of the SEC rules discussed above, the SEC staff issued a document to assist practitioners entitled *Application of the January 2003 Rules on Auditor Independence—Frequently Asked Questions*. In December 2004, the SEC expanded and updated the January 2003 FAQs and consolidated all previous auditor independence FAQs into a single release, which will be updated and maintained in one place for easier access. The consolidated and updated FAQs are titled *Application of the Commission's Rules on Auditor Independence—Frequently Asked Questions* (December 13, 2004) and can be found at www.sec.gov/info/accountants/ocafaqaudind121304.htm. The updated FAQs primarily relate to partner rotation and fee disclosures.

PCAOB Rules Regarding Independence and Ethics

.48 The PCAOB has the authority to establish ethics and independence standards in accordance with sections 103(a) and 103(b), respectively, of the Sarbanes-Oxley Act. Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards may be the subject of a PCAOB disciplinary proceeding in accordance with section 105 of the Sarbanes-Oxley Act.

.49 As mentioned earlier, on April 19, 2006, the SEC approved seven PCAOB independence and ethics rules pertaining to independence, tax services, and contingent fees. See the section entitled, "New PCAOB Independence and Ethics Rules" for further discussion.

.50 In addition to the above-mentioned rules, the PCAOB rules pertaining to independence and ethics also include Rule 3100, *Compliance with Auditing and Related Professional Practice Standards*; Rule 3500T, *Interim Ethics Standards*; and Rule 3600T, *Interim Independence Standards*. Given the continuing importance of these rules, they are summarized below.

Compliance With Auditing and Related Professional Practice Standards

.51 Rule 3100 generally requires all registered public accounting firms to adhere to the PCAOB's auditing and related professional practice standards (which encompass auditing, attestation, quality control, ethics, and independence standards) in connection with the preparation or issuance of any audit report for an issuer and in their auditing and related attestation practices. This rule also requires registered public accounting firms and their associated persons to comply with all *applicable* standards. Accordingly, if the PCAOB's standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

Interim Ethics Standards

.52 Rule 3500T designates the provisions of the AICPA Code of Professional Conduct on integrity and objectivity as "Interim Ethics Standards." Accordingly, in connection with the preparation or issuance of any audit report, a registered public accounting firm and its associated persons should comply with ethics standards as described in the AICPA Code of Professional Conduct Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 102.01), and interpretations and rulings thereunder, as in existence as of April 16, 2003 (AICPA, *Professional Standards*, vol. 2, ET sec. 191), to the extent not superseded or amended by the PCAOB.

Interim Independence Standards

.53 Rule 3600T designates the provisions of the AICPA Code of Professional Conduct regarding independence and existing standards and interpretations of the Independence Standards Board (ISB) as "Interim Independence Standards." This rule states that, in connection with the preparation or issuance of any audit report, a registered public accounting firm and its associated persons shall comply with the following independence standards, to the extent not superseded or amended by the PCAOB:

1. The AICPA Code of Professional Conduct Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01), and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA, *Professional Standards*, vol. 2, ET sec. 191)
2. ISB Standards No. 1, *Independence Discussions with Audit Committees*; No. 2, *Certain Independence Implications of Audits of Mutual Funds and Related Entities*; and No. 3, *Employment with Audit Clients*; and Interpretations No. 99-1, *Impact on Auditor Independence of Assisting Clients in the Implementation of FAS 133 (Derivatives)*; No. 00-1, *The Applicability of ISB Standard No. 1 When "Secondary Auditors" Are Involved in the Audit of a Registrant*; and No. 00-2, *The Applicability of ISB Standard No. 1 When "Secondary Auditors" Are Involved in the Audit of a Registrant—An Amendment of Interpretation 00-1*, of the ISB

.54 To the extent that the SEC's rules are more or less restrictive than the PCAOB's Interim Independence Standards, registered public accounting firms must comply with the more restrictive requirements.

.55 The PCAOB rules referenced above can be found at www.pcaobus.org/Standards/Standards_and_Related_Rules/index.aspx.

GAO Independence Standard

.56 CPAs, non-CPAs, government financial auditors, and performance auditors who are auditing federal, state, and local governments as well as not-for-profit and for-profit recipients of federal (and some state) grant and loan assistance should be familiar with Amendment No. 3, *Independence*, of the GAO's *Government Auditing Standards* (GAGAS, also referred to as the Yellow Book). The GAO independence rules, which are in some cases very similar to the AICPA independence rules and in other cases more restrictive, address three types of independence impairments, namely, personal, external, and organizational. But it is particularly important that practitioners comprehend the standard's most important provision, which involves personal independence impairments.

.57 The GAO's Independence Standard can be found at www.gao.gov/govaud/yb/2003/html/chap33.html#1034803. The GAO also has a Q&A book, *Answers to Independence Standard Questions*, which can be found at www.gao.gov/govaud/d02870g.pdf. Additional information is available at AICPA Online at www.aicpa.org/members/div/ethics/index.htm.

On the Horizon

Omnibus Proposal of AICPA Ethics Interpretations and Rulings

.58 On September 8, 2006, the PEEC issued an omnibus exposure draft that proposes one new and one revised interpretation under Rule 101, *Independence*. Based on comments received on the PEEC's September 15, 2005, omnibus exposure draft containing proposed guidance regarding independence and the use of indemnification and limitation of liability provisions and the performance of forensic accounting services, the PEEC agreed to revise and re-expose such guidance, which is included in the September 8, 2006, exposure draft. The exposure draft also includes new guidance regarding independence and the performance of tax compliance services.

Proposed Interpretation No. 101-16

.59 Proposed Interpretation No. 101-16, "Indemnification, Limitation of Liability, and ADR Clauses in Engagement Letters," would provide guidance to members on the impact that certain indemnification and limitation of liability provisions may have on a member's independence when included in engagement letters or other agreements entered into with a client.

.60 Under the proposal, certain types of indemnification and limitation of liability provisions in connection with an attest engagement are considered to pose an unacceptable threat to a member's independence because they may result in a member's performance of insufficient attest procedures in reliance on the belief that the member is protected through the indemnification or limitation of liability provision. However, this threat could be sufficiently mitigated, provided the limitation of liability or indemnification agreement was contingent on the member's attest services being performed in compliance with professional standards. Accordingly, the PEEC is proposing ethics guidance that adopts an underlying principle whereby independence would be considered to be impaired if a member entered into an agreement with a client that included an indemnification or limitation of liability provision regarding a member's exposure to actual damages unless such provision was contingent on the member's attest services being performed in compliance with professional standards, in all material respects. The indemnification and limitation of liability provisions in attest services engagements and the related effect on a member's independence, as proposed, is summarized as follows:

Indemnification or Limitation of Liability Provision in an Attest Services Engagement	*Effect on Member's Independence*
One that limits or eliminates a member's liability for actual damages arising from the member's failure to perform the attest services in accordance with professional standards, in all material respects	Would impair independence
One that limits or eliminates a member's liability for punitive damages in an attest services engagement	Would not impair independence
One that requires the client to reimburse the member for litigation costs and expenses, including amounts paid in settlement of actual damage claims, incurred in connection with the member's defense of claims for damages arising from the member's performance of attest services —provided that such provision is contingent upon the member having performed such services in accordance with professional standards, in all material respects	Would not impair independence

.61 The proposed interpretation also provides guidance on arrangements whereby a member and client agree to use arbitration, mediation, or other alternative dispute resolution (ADR) methods to resolve a dispute between them, or an agreement to waive a jury trial. The proposed interpretation states that an agreement between a member and client to use arbitration, mediation, or another ADR technique or proceeding to resolve a dispute between them would not impair the member's independence, provided the ADR technique or proceeding does not incorporate a provision, procedure, or rule that would impair independence under the preceding guidance. However, a provision in an arbitration agreement that prohibits discovery, or unreasonably limits the extent or nature of discovery, would impair independence unless the agreement permits the arbitrator(s) to override such provision as they determine necessary for the conduct of a fair and cost-effective proceeding. An agreement between a member and client to waive a jury trial would not impair independence.

.62 In addition, the proposed interpretation states that the following would *not* impair independence:

- An indemnification and limitation of liability provision related to nonattest services performed for an attest client
- An agreement whereby the member and the client agree that the unsuccessful party in a lawsuit or ADR proceeding between them will pay the legal fees and expenses of the successful party
- A limitation of the time period during which the client would otherwise be legally entitled to file a claim, provided the time period is reasonable in the circumstances
- A limitation on the clients legal right to assign or transfer a claim or potential claim

Proposed Revisions to Interpretation No. 101-3

.63 The proposed revisions to Ethics Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101 (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05) would incorporate guidance on how the provision of forensic accounting services and tax compliance services would affect a member's independence.

.64 Under the proposal, forensic accounting services consist of (1) litigation services and (2) investigative services. Litigation services recognize the role of the member as an expert or consultant and consist of providing assistance for actual or potential legal or regulatory proceedings before a trier of fact in connection with the resolution of disputes between parties. Litigation services are further categorized as expert witness services, litigation consulting services, and other services. The effect of each of these services on a member's independence is summarized as follows:

- Expert witness services create the appearance that a member is advocating or promoting a client's position. Accordingly, if a member conditionally or unconditionally agrees to provide expert witness testimony for a client, independence would be considered to be impaired.
- The performance of litigation consulting services would not impair independence, provided the member complies with the general requirements set forth under Interpretation No. 101-3. However, if the member subsequently agrees to serve as an expert witness, independence would be considered to be impaired.
- Other services, such as serving as a court-appointed expert, special master, trier of fact, or arbitrator, create the appearance that the member is not independent. Accordingly, if a member serves in such a role, independence would be considered to be impaired.

.65 Investigative services include all forensic services not involving actual or threatened litigation such as performing analyses or investigations that may require the same skills as used in litigation services. Investigative services would not impair independence, provided the member complies with the general requirements set forth under Interpretation No. 101-3.

.66 The proposed interpretation also provides guidance on the provision of fact witness testimony. As a fact witness, the member's role is to provide factual testimony to the trier of fact. While testifying as a fact witness, the trier of fact or counsel may request that the member testify as to his or her opinions pertaining to matters within the member's area of expertise. In such circumstances, independence would not be considered to be impaired.

.67 With regard to tax compliance services, the services included under the proposal are (1) preparation of a tax return; (2) transmittal of a tax return, and transmittal of the related tax payment to the taxing authority; (3) signing and filing of a tax return; and (4) authorized representation of clients before a taxing authority. The proposal states that preparing a tax return and transmitting the tax return and related tax payment to a taxing authority, in paper or electronic form, would not impair a member's independence, provided the member does not have custody or control over the client's funds and the individual designated by the client to oversee the tax services approves and signs the tax return prior to the member transmitting the return to the taxing authority. However, signing and filing a tax return on behalf of client management would impair independence, unless certain criteria are met. Authorized representation of a client in administrative proceedings before a taxing authority would not impair a member's independence, provided the member does not commit a client to a specific arrangement with the taxing authority without first obtaining client approval. Filing a petition or otherwise representing a client in a court to resolve a tax dispute would impair a member's independence.

.68 The omnibus exposure draft can be obtained at www.aicpa.org/download/ethics/Final_ED_September_2006.pdf.

.69 The PEEC is expected to consider all comments and adopt final guidance at a public meeting scheduled for November 30, 2006, in Durham, NC.

Other AICPA Projects

Potential Guidance on Contingent Fees

.70 The PEEC appointed the Contingent Fee Task Force to consider the appropriateness of Rule 302, *Contingent Fees* (AICPA, *Professional Standards*, vol. 2, ET sec. 302.01), and the related Interpretation No. 302-1, "Contingent Fees in Tax Matters." Amongst other things, the Contingent Fee Task Force is considering the clarity of the existing guidance that permits a member to accept a fee in tax matters if the member can "demonstrate a reasonable expectation, at the time of the fee arrangement, of substantive consideration by an agency with respect to the member's client."

International Ethics Convergence and Monitoring

.71 The AICPA is a member body of the International Federation of Accountants (IFAC). IFAC is the global organization for the profession and consists of approximately 163 member bodies including most of the major accounting associations around the world. IFAC's Ethics Standards Board, which includes AICPA representation, develops ethical standards and guidance for professional accountants for use around the world which is published in its Code of Ethics for Professional Accountants. The PEEC has formed a task force to monitor the activities of the IFAC Ethics Standards Board and consider how the AICPA Code differs from that of IFAC. Where appropriate, the task force will recommend changes to the AICPA Code to harmonize it with the IFAC guidance. For example, the IFAC Code is drafted primarily in a threats and safeguards framework approach. The AICPA Conceptual Framework for Independence Standards is consistent with the independence framework used in the IFAC Code. Consistent with IFAC, the PEEC is currently considering expanding the conceptual framework approach to all rules of conduct of the AICPA Code. Other projects include developing a definition of a "network firm" which was recently adopted by IFAC and incorporated into its independence standard.

Three-Year Project Agenda

.72 The AICPA Professional Ethics Division maintains a three-year project agenda on its Web site that lists all current and future PEEC projects. The agenda can be found at www.aicpa.org/download/ethics/PEEC_TF.pdf.

GAO Exposure Draft on Proposed Changes to Government Auditing Standards

.73 In June 2006, the GAO issued an exposure draft requesting comments on proposed changes to Government Auditing Standards. These changes propose revisions throughout the entire set of standards, including the "General Standards," which incorporate the independence standards. Specifically, the Independence section was reorganized and the guidance on nonaudit services was clarified to facilitate implementing the standard. The standard on nonaudit services was not changed. In particular, the discussion of nonaudit services was moved from "personal" to "organizational" impairments because it is often the audit organization's independence that is impaired rather than that of the individual auditor and reorganized into three categories of nonaudit services. In addition, examples that had previously been interspersed throughout the independence section have been consolidated and streamlined.

.74 The three distinct categories of nonaudit services are:

1. Nonaudit services that do not impair auditor independence and, therefore, do not require compliance with the supplemental safeguards.
2. Nonaudit services that would not impair independence if supplemental safeguards are implemented.
3. Nonaudit services that impair independence.

.75 Additional guidance in the appendix was included to deal with nonaudit services that are frequently conducted by government audit organizations.

.76 The GAO's exposure draft can be found at www.gao.gov/govaud/ybk01.htm.

DOL Request for Comments on Independence Rules Pertaining to Employee Benefit Plan Audits

.77 On September 11, 2006, the Department of Labor (DOL) issued a request for information (RFI) seeking public comment on the advisability of the DOL amending the auditor independence rules for employee benefit plan audits subject to the Employee Retirement Income Security Act of 1974 (ERISA). This is the first time the DOL has considered its independence requirements since DOL Interpretive Bulletin 75-9 (29 CFR 2509.75-9) was issued in 1975. The DOL RFI notes that the current DOL requirements conflict with AICPA and SEC independence requirements and have caused confusion among practitioners. Comments on the RFI must be submitted to the DOL by December 11, 2006.

.78 The DOL's RFI can be found at ebpaqc.aicpa.org/Resources/Independence/.

Digest of the AICPA Independence Rules

.79 Presented below is a plain-English description of the AICPA independence rules. The purpose of the section is to help you to understand your independence requirements under the AICPA Code of Professional Conduct and, if applicable, other rule-making and standard-setting bodies. Independence generally implies one's ability to act with integrity and exercise objectivity and professional skepticism. The AICPA and other rule-making bodies have developed rules that establish and interpret independence requirements for the accounting profession. We broadly use the term *rules* to also mean standards, interpretations, rulings, laws, regulations, opinions, policies, or positions. This guide discusses the independence requirements of the principal rule-making bodies in the United States in plain English so you can understand and apply them with greater confidence and ease.

.80 This section of the Alert is intentionally concise, so it does not cover all the rules, some of which are complex, nor does it cover every aspect of them. Nonetheless, this guide should help you to identify independence issues that may require further consideration. Therefore, you should always refer to the rules directly, in addition to your firm's policies on independence, for complete information.

Conventions and Key Terms Used

.81 Here are some of the conventions used in this section of the Alert:

- The word *Note* in boldface italics emphasizes important points, highlights applicable government regulations, or indicates that a rule change may soon occur.

> We describe the rules of the U.S. Securities and Exchange Commission (SEC) and Public Company Accounting Oversight Board (PCAOB)—that is, those that apply to audits of public companies—in boxed text (like this one) and provide citations to specific rules. Generally, we provide these descriptions where the SEC has a rule that differs in some manner or is presented somewhat differently than the corresponding AICPA rule.

.82 This section uses the following key terms:

- *Client* (or *attest client*), an entity with respect to which independence is required
- *Firm*, a form of organization permitted by law or regulation (whose characteristics conform to resolutions of AICPA Council) that is engaged in the practice of public accounting

What Is Independence?

.83 Independence is defined in the "Conceptual Framework for AICPA Independence Standards" (AICPA, *Professional Standards*, vol. 2, ET sec. 100.01), referred to herein as the Conceptual Framework, as:

a. *Independence of mind*—The state of mind that permits the performance of an attest service without being affected by influences that compromise professional judgment, thereby allowing an individual to act with integrity and exercise objectivity and professional skepticism.

b. *Independence in appearance*—The avoidance of circumstances that would cause a reasonable and informed third party, having knowledge of all relevant information, including safeguards applied, to reasonably conclude that the integrity, objectivity, or professional skepticism of a firm or a member of the attest engagement team had been compromised.

.84 This definition reflects the longstanding professional requirement that members who provide services to entities for which independence is required be independent both "in fact" (that is, "of mind") and in appearance.

What Should I Do If No Specific Guidance Exists on My Particular Independence Issue?

.85 The "Other Considerations" section of Interpretation No. 101-1, "Interpretation of Rule 101" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02), recognizes that it is impossible for the AICPA Code of Professional Conduct (the Code) to identify all circumstances in which the appearance of independence might be questioned. In January 2006, the AICPA adopted the Conceptual Framework and a related revision to "Other Considerations" of Interpretation No. 101-1 of the Code.

.86 The revision to Interpretation No. 101-1 requires that members use the risk-based approach described in the Conceptual Framework when making independence decisions involving matters that are not specifically addressed in the independence interpretations and rulings in the Code. Where threats to independence are not at an acceptable level, safeguards must be applied to eliminate the threats or reduce them to an acceptable level. In cases where threats to independence are not at an acceptable level, thereby requiring the application of safeguards, the threats identified and the safeguards applied to eliminate the threats or reduce them to an acceptable level must be documented.

.87 The Conceptual Framework provides a valuable tool to help you in complying with the requirement in the "Other Considerations" section to evaluate whether a specific circumstance that is not addressed in the Code would pose an unacceptable threat to your independence. These new provisions are effective for all independence decisions made after April 30, 2007, with earlier application encouraged.

When Is Independence Required, and Who Sets the Rules?

.88 AICPA professional standards require your firm, including the firm's partners and professional employees, to be independent in accordance with Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01), of the Code whenever your firm performs an attest service for a client. Attest services include:

- Financial statement audits
- Financial statement reviews
- Other attest services as defined in the Statements on Standards for Attestation Engagements (SSAEs)

.89 Performing a compilation of a client's financial statements does not require independence. However, if a nonindependent firm issues such a compilation report, the report must state, "I am (we are) not independent with respect to XYZ Company."[4]

.90 You and your firm are not required to be independent to perform services that are not attest services (for example, tax preparation or advice, or consulting services, such as personal financial planning) are the *only* services your firm provides to a particular client.

> ***Note:*** You should familiarize yourself with your firm's independence policies, quality control systems, and list or database of attest clients.

In Addition to the AICPA, Who Else Sets Independence Rules?

.91 Many clients are subject to oversight and regulation by governmental agencies. For example, the GAO sets independence rules that apply to entities audited under Governmental Auditing Standards (also known as Yellow Book requirements). For these clients (and others, such as those subject to regulation by the SEC or DOL), you and your firm also must comply with the independence rules established by those agencies.

.92 The SEC regulates public companies[5] and establishes the qualifications of independent auditors. This section refers to these independence rules as *SEC rules*.

.93 The PCAOB, a private standards-setting body whose activities are overseen by the SEC, is authorized to set, among other things, auditing, quality control, ethics, and independence standards for accounting firms that audit public companies. The PCAOB adopted interim ethics standards based on the provisions of the AICPA's Code of Professional Conduct, Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 102.01), and Rule 101, *Independence*, and interpretations and rulings under those rules, as of April 16, 2003. It also adopted Independence Standards Board (ISB) Standards. To the extent that the SEC's rules are more or less restrictive than the PCAOB's interim independence standards, registered public accounting firms must comply with the more restrictive requirements.

---

[4] See Statements on Standards for Accounting and Review Services (SSARS) No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100.19).

[5] This includes companies that are registered with or are otherwise regulated by the Securities and Exchange Commission (SEC) or that file audited financial statements with the SEC, including foreign filers.

In addition to its detailed rules, the SEC looks to its general standard of independence and four basic principles to determine whether independence is impaired. The general standard is an appearance standard that considers whether a reasonable investor with knowledge of all relevant facts and circumstances would conclude that an accountant is independent.

Under the four basic principles, an auditor cannot:

1. Function in the role of management
2. Audit his or her own work
3. Serve in an advocacy role for the client
4. Have a mutual or conflicting role with the client

Note: The SEC has recently voted to adopt several new independence rules adopted by the PCAOB:

- General independence standard
- Accountability for independence violations
- Contingent fees
- Tax services provided to persons in financial reporting oversight roles
- The accountant's involvement in potentially abusive tax transactions
- Preapproval requirements for nonprohibited tax services

.94 Other organizations that have established independence requirements that may be applicable to you and your firm include:

- State boards of accountancy
- State CPA societies
- Federal and state agencies

.95 You should contact these organizations directly for further information.

Note: Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule.

.96 Once you determine that your firm provides attest services to a client and which rules apply, the next step is to determine how the rules apply to you.

Applying the Rules—Covered Members and Other Firm Professionals

How Do the Independence Rules Apply to Me?

.97 Whenever you are a *covered member*, you become subject to the full range of independence rules with regards to a specific client. You are a covered member if you are:

1. An individual on the client's attest engagement team;
2. An individual in a position to influence the client's attest engagement;
3. A partner or manager who provides more than 10 hours of nonattest services to that attest client;
4. A partner in the office in which the lead attest engagement partner primarily practices in connection with the client's attest engagement;

5. The firm, including the firm's employee benefit plans; or
6. An entity whose operating, financial, or accounting policies can be controlled[6] by any of the individuals or entities described in items 1 through 5 or by two or more such individuals or entities if they act together.

> The SEC uses the term *covered person*[7] to describe the individuals in a firm who are subject to SEC independence rules. This term is largely consistent with the AICPA's term *covered member*. The only difference between the two definitions is that of classification. The AICPA considers consultants to be in a position to influence the engagement (SEC uses the term *chain of command*), whereas the SEC considers these persons to be on the attest engagement team. Overall, the definitions are the same.

Note: This Alert uses the term *covered member* (and *covered person* with respect to SEC rules) extensively in explaining the *personal* independence rules, for example, rules that apply to you and your family's loans, investments, and employment. Therefore, it is important that you understand these terms before proceeding. Also, remember to check with your firm to determine whether its independence policies are more restrictive than the AICPA or SEC rules.

Do Any of the Rules Apply to Me If I Am Not a Covered Member?

.98 Yes; there are two relationships with a client that due to their magnitude impair independence even if you are not a covered member. These relationships are:

- Director, officer, or employee (or in any capacity equivalent to a member of management) of the client, promoter, underwriter, voting trustee, or trustee of any of the client's employee benefit plans
- Ownership of more than 5 percent of an attest client's outstanding equity securities (or other ownership interests)

.99 The independence rules prohibit these relationships if you are a partner or professional employee in a public accounting firm.

What If I Was Formerly Employed by a Client or I Was a Member of the Client's Board of Directors?

.100 There are a number of things you must be aware of, as follows:

1. You may not participate in the client's attest engagement, or be in a position to influence the engagement, for any periods covering the time that you were associated with the client. So, for example, if you worked for the client in 2005, you would be prohibited from serving on the client's audit engagement for the fiscal year 2005 financial statements. You also could not serve in a position that would allow you to influence the fiscal 2005 engagement (for example, you could not directly or indirectly supervise the audit engagement partner).
2. Before becoming a covered member, you must:
   - Terminate any relationships with the client as described in Interpretation No. 101-1C, "Interpretation of Rule 101," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02).[8]

---

[6] As defined by generally accepted accounting principles (GAAP) for consolidation purposes.

[7] See Rule 2-01(f)(11). Also see *Discussion of Rule 2-01, Covered persons in the firm*, in the SEC's Final Rule Release [Section IV (H)(9)].

[8] This includes the director, officer, or employee, or in any capacity equivalent to that of a member of management; promoter, underwriter, or voting trustee; or trustee for the entity's pension and profit-sharing trust.

- Dispose of all financial interests[9] in the client.
- Collect and repay all loans to or from the client (except those specifically permitted or grandfathered).[10]
- Cease active participation in the client's employee benefits plans (except for benefits under the Consolidated Omnibus Budget Reconciliation Act of 1985 [COBRA]).
- Liquidate or transfer any vested benefits in the client's retirement plans.

What Rules Apply If I Am Considering Employment With an Attest Client?

.101 If an attest client offers you employment, or you seek employment with an attest client, you may need to take certain actions. If you are on that client's attest engagement team or can otherwise influence the engagement, you must promptly report any employment negotiations with the client to the appropriate person in your firm. You cannot participate in the engagement until your negotiations with the client end.

What If I Accept Employment or a Board Position With an Attest Client?

.102 Being employed by a client or a member of the client's board of directors impairs independence. However, even if you leave your firm to take a position with a client, independence may still be affected. This would be the case if you accept a "key position" with the client, which means that you prepare financial statements or accounting records or are otherwise able to influence the client's statements or records. A few examples of "key positions" are controller, chief financial officer, or treasurer. Remember that the substance, and not only the position title, determines whether a position is "key" or not.

.103 If you meet the following conditions, having a key position with a client will not impair your firm's independence:

- The amounts the firm owes you (capital balance or retirement benefits) are based on a fixed formula and are not material to the firm.
- You cannot influence the firm's operations or financial policies.
- You do not participate or appear to participate in the firm's business or professional activities.

.104 Your firm must consider whether it should apply additional procedures to ensure that your transition to the client has not compromised the firm's independence and that independence will be maintained going forward. Some things the firm should consider are:

- Whether you served on the engagement team and for how long
- Positions you held with the firm and your status
- Your position and status with the client
- The amount of time that has passed since you left the firm

.105 Based on these factors, the firm may decide to:

- Adjust the audit plan to reduce the risk that your knowledge of the plan could lessen the audit's effectiveness.

---

[9] See the "When Do My Financial Interests—or My Family's—Impair Independence?" section.

[10] Also see AICPA Ethics Interpretation No. 101-5, "Loans From Financial Institution Clients and Related Terminology," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.07).

- If you will interact significantly with the engagement team, reconsider the successor engagement team to ensure it has sufficient stature and experience to deal effectively with you in your new position.
- Perform an internal technical review of the next attest engagement to determine whether engagement personnel exercised the appropriate level of professional skepticism in evaluating your work and representations.[11]

> Under SEC rules, if a former partner will be in an "accounting role" or "financial reporting oversight role" with an SEC audit client, he or she may not have:
>
> - A capital balance with the firm
> - A financial arrangement with the firm (for example, retirement benefits) that is not fully funded by the firm
> - Influence over the firm's operations or financial policies
>
> The SEC uses the terms *accounting role* and *financial reporting oversight role* in its rules; taken together, these terms are consistent with the AICPA term *key position.* The SEC also requires a one-year "cooling-off period" for members of the audit engagement team who assume a *financial reporting oversight role* with that client. In other words, if an engagement team member who participated on the audit of the current (or immediately preceding) fiscal year goes to work for a client, the firm's independence would be impaired.
>
> Only members who have provided less than 10 hours of services of audit, review, or other attest services to the client (and did not serve as either the lead or concurring partner for the client) are *not* considered to be members of the audit engagement team for purposes of this rule.
>
> This rule applies to the audit client and its consolidated entities.

Applying the Rules—Family Members

When Is My Family Subject to the Rules?

.106 If you are a covered member with respect to a client, members of your immediate family (your spouse—or equivalent—and your dependents) generally must follow the same rules as you. For example, your spouse's investments must be investments that you could own under the rules. This rule applies even if your spouse keeps the investments in his or her own name or with a different broker.

.107 There are two exceptions to this general rule:

1. Your immediate family member's employment with a client would not impair your firm's independence, provided he or she is not in a key position.
2. Immediate family members of *certain* covered members may invest in a client through an employee benefit plan (for example, retirement or savings account), provided the plan is offered equitably to all similar employees. The covered members whose families may invest in this way are:
   - Partners and managers who provide only nonattest services to the client
   - Partners who are covered members *only* because they practice in the same office where the client's lead attest partner practices in connection with the engagement

.108 In other words, immediate family of individuals on the attest engagement team *or* of those who can influence the attest engagement team *may not* invest in a client under any circumstances.

---

[11] An objective professional with the appropriate stature and expertise should perform this review and the firm should take any recommended action(s) that result from the review.

> Under SEC rules, the immediate family of certain covered persons may have financial interests in SEC audit clients only if such interests are an *unavoidable consequence* of their participation in an employee compensation or benefit plan. This means that if nonclient investments are available through the plan, the immediate family member must choose those investments.

What About My Other Close Relatives?

.109 The close relatives (siblings, parents, and nondependent children) of covered members (with the exception of covered members who provide only nonattest services to a client) are subject to some employment and financial restrictions. Your close relative's employment by a client *in a key position* impairs independence.

.110 Rules pertaining to your close relatives' financial interests differ depending on whether you participate on the client's attest engagement as follows:

- If you participate on the client's attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either:
  - Was material to your relative's net worth, *or*
  - Enables the relative to exercise significant influence over the client.
- If you are able to influence the client's attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that:
- Is material to your relative's net worth, *and*
- Enables your relative to exercise significant influence over the client.

> Under SEC rules, your close family members include your spouse (or equivalent) and dependents and your parents, nondependent children, and siblings. If you are a covered person, your independence is affected if your close family member:
>
> - Has an *accounting role* or *financial reporting oversight role* with the client (for example, the family member is a treasurer, chief financial officer, accounting supervisor, or controller).
> - Owns more than 5 percent of a client's equity securities or controls the client.
>
> In addition, independence is considered to be impaired if *any* partner's close family member controls a client.

Financial Relationships

When Do My Financial Interests—or My Family's—Impair Independence?

.111 This section discusses various types of financial relationships and how they affect independence. Although this section focuses on how these rules apply to you and your family, keep in mind that your firm is also subject to the financial relationship rules (since firms are included in the definition of *covered member*).

.112 As a covered member, you (and your spouse and dependents) are not permitted to have a:

- Direct financial interest in that client, regardless of how immaterial it would be to your net worth.
- Material indirect financial interest in that client.

> ***Note:*** The AICPA Code of Professional Conduct does not define or otherwise provide guidance on determining materiality. In determining materiality, you should apply professional judgment to all relevant facts and circumstances and refer to applicable guidance in the professional literature. Both qualitative and quantitative factors should be considered.

.113 In addition, if you commit to acquire a financial interest in a client, your independence would be impaired. For example, if you sign a stock subscription agreement with the client, your independence would be considered impaired as soon as you sign the agreement.

.114 Examples of financial interests include shares of stock; mutual fund shares; partnership units; stock rights; options or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles.

.115 Direct financial interests are financial interests that are:

1. Owned by you directly, or
2. Under your control, or
3. Beneficially owned[12] by you through an investment vehicle, estate, trust, or other intermediary if you can either:
   a. Control the intermediary, or
   b. Have the authority to supervise or participate in the intermediary's investment decisions.

.116 For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest in the investments held in your account.

.117 You also have a direct financial interest in a client if you have a financial interest in a client through one of the following:

- A partnership if you are a general partner
- A Section 529 savings plan if you are the account owner
- An estate if you serve as an executor and meet certain other criteria
- A trust if you serve as the trustee and meet certain other criteria

.118 For example, suppose you are a covered member with respect to ABC Co. and you are also a general partner of XYZ Partnership. XYZ Partnership owns shares in ABC Co. Under the independence rules, you would be deemed to have a direct financial interest in ABC, which would impair your independence, regardless of materiality.

.119 Indirect financial interests arise if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary when you can neither control the intermediary nor have the authority to supervise or participate in the intermediary's investment decisions.

.120 For example, if you invest in a defined contribution plan that is not participant directed and you have no authority to supervise or participate in the plan's investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments.

---

[12] A financial interest is beneficially owned if an individual or entity is not the record owner of the interest but has a right to some or all of the underlying benefits of ownership. These benefits include the authority to direct the voting or the disposition of the interest or to receive the economic benefits of the ownership of the interest.

Note: Interpretation No. 101-15, "Financial Relationships" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.17), of the Code (effective December 31, 2005) provides extensive examples of various types of financial interests and whether they should be considered to be direct or indirect financial interests, including investments in mutual funds, retirement and savings plans, Section 529 plans, trusts, partnerships, and insurance products.

> The SEC classifies your investment in a client held through another entity (the intermediary) as *direct* if either of the following is true:
>
> - You participate in the intermediary's investment decisions or have control over them.
> - The investment in the client by the intermediary (which is not a diversified mutual fund) represents 20 percent or more of the value of its total investments.
>
> If neither of the above applies, your investment in a client through another entity would normally be considered to be an *indirect* financial interest in that client.

What Are the Rules That Apply to My Mutual Fund Investments—and Those of My Family—If My Firm Audits Those Mutual Funds?

.121 If you are a covered member with respect to a mutual fund attest client of your firm, and you or your immediate family own shares in the fund, you have a direct financial interest in the fund client.

> The SEC rules also prohibit the firm and covered persons and their immediate family members from having any financial interest in an entity (even one that is not a client) that is part of an *investment company complex* that includes an audit client.

Which Rules Pertain to My Mutual Fund Investments—and Those of My Family—If My Firm Audits Companies Held in Those Mutual Funds?

.122 Financial interests that you and your immediate family have in clients through a mutual fund are considered to be indirect financial interests in those clients unless the fund is a diversified mutual fund.

.123 If a mutual fund is diversified, and you and/or your immediate family own 5 percent or less of its outstanding shares, the fund's holdings in clients for which you are a covered person will *not* be considered material indirect financial interests in those clients. Thus, you would be relieved of the burden of having to monitor whether, and to what degree, the fund invests in audit clients for which you are a covered person.

.124 If the fund is *not* diversified, or you and/or your family own more than 5 percent of the fund's equity, you should treat the fund's holdings as indirect financial interests. Here is an illustration.

.125 Suppose ABC Mutual Fund owns shares in a client, XYZ:

- ABC's net assets are $10,000,000.
- Your shares in ABC Mutual Fund are worth $50,000.
- ABC has 2 percent of its assets invested in XYZ.
- Your indirect financial interest in XYZ is $1,000 ($50,000 x .02).

If $1,000 is material to your net worth, independence would be considered to be impaired.

May I Have a Joint Closely Held Investment With a Client?

.126 As a covered member, if you or the client individually or collectively control an investment, that investment is considered to be a joint closely held investment. If this joint closely held investment is material to your net worth, independence would be considered to be impaired. In this rule, *client* includes certain persons associated with the client, such as officers, directors, or owners who are able to exercise significant influence over the client.

> The SEC rules prohibit you and your immediate family from having a joint business venture with a client or with persons associated with the client in a decision-making capacity—meaning officers, directors, or substantial shareholders, whether or not the venture is material to your net worth. The SEC believes that these joint ventures, whether material or not, cause the client and the audit firm to have mutuality of interests, which impairs independence.

May My Family or I Borrow Money From or Lend Money to a Client?

.127 If you are a covered member with respect to an attest client, you and your immediate family may not have a loan to or from the client or:

- An officer or director of the client
- An individual holding 10 percent or more of the client's outstanding equity securities (or other ownership interests)

.128 Investments in a client's bonds are considered a prohibited loan to that client.

.129 There are certain exceptions to this rule. First, there are specific loans that covered members are permitted to have from financial institution attest clients. They are:

- Car loans and leases collateralized by the vehicle
- Credit card and overdraft reserve account balances not exceeding $10,000 (that is, by payment due date, including any grace period)
- Passbook loans fully collateralized by cash deposits at the same financial institution
- Loans fully collateralized by an insurance policy

.130 In addition, if you have a loan from a client financial institution (a bank, for example) that meets certain criteria, your loan *may* be "grandfathered" (that is, you may be allowed to keep it). For your loan to be grandfathered, you must have obtained it under normal lending procedures, terms, and requirements. The following loans *may* be grandfathered:

- Home mortgages
- Other secured loans
- Unsecured loans that are immaterial to your net worth

.131 Generally speaking, a loan may be grandfathered if you obtained it before:

1. You became a covered member with respect to the client.
2. The bank became a client.
3. The client acquired the loan.

.132 To maintain your loan's grandfathered status, you must keep the loan current (make timely payments according to the loan agreement). Also, you cannot renew or renegotiate the terms of the loan (for example, the interest rate or formula) unless the change was part of the original agreement, for example, an adjustable rate mortgage.

> The SEC rules differ from the AICPA rules in that secured loans (other than a mortgage on your primary residence) and immaterial unsecured loans may not be grandfathered.

May I Have a Brokerage Account With a Client?

.133 The AICPA rules indicate that in order for independence to be maintained, a covered member whose assets are held by a broker/dealer client must not receive any preferential treatment or terms and any assets that are subject to risk of loss must be immaterial to the covered member's net worth. In addition, margin accounts are subject to the loan rules.[13]

> Under the SEC rules, you may have a brokerage account with a client if your account (1) only holds cash or securities and (2) is fully insured by the Securities Investor Protection Corporation (SIPC).

May I Have a Bank Account With a Client?

.134 As a covered member, you may have a bank account with a client financial institution (for example, checking, savings, or money market accounts and certificates of deposit) if your deposits are fully insured by state or federal deposit insurance agencies or uninsured amounts are not material to your net worth.[14]

> The SEC prohibits covered persons and their immediate families from having bank account balances in excess of Federal Deposit Insurance Corporation (FDIC) insurance limits; that is, deposits in excess of FDIC limits are considered to impair independence even if immaterial to you and your family.[15]

May I Have an Insurance Policy With a Client?

.135 The AICPA rules indicate that in order to maintain independence, a covered member must not receive any preferential treatment or terms when purchasing an insurance policy from a client. If the policy has an investment option, the financial interest rules must be applied.

> The SEC prohibits covered persons and their immediate family members from owning an individual insurance policy issued by a client unless both of the following criteria are met:
>
> - He or she obtained the policy before the professional became a covered person.
> - The likelihood of the insurer becoming insolvent is remote.

---

[13] See the preceding question, "May My Family or I Borrow Money From or Lend Money to a Client?"

[14] Both AICPA and SEC rules permit a practical exception for firms that maintain deposits exceeding insured limits when the likelihood of the financial institution experiencing financial difficulties is considered remote.

[15] The SEC treats money market *funds* (as opposed to money market *accounts*) as mutual funds for purposes of their rules. Also see Rule 2-01(c)(1)(B).

May I Give or Accept Gifts or Entertainment From a Client?

.136 A new ethics ruling[16] addresses the exchange of gifts and entertainment between covered members, the client, and certain persons associated with the client (for example, persons in key positions and 10 percent or more stockholders of the client).

.137 Independence is impaired if the firm, a member of the attest engagement team, or a person able to influence the engagement accepts a gift that is not "clearly insignificant."

.138 A covered member may give a gift to persons associated with the client and not impair independence if the gift is "reasonable in the circumstances." In addition, covered members may give or receive entertainment, provided it was reasonable in the circumstances.

.139 Another new ethics ruling[17] addresses the broader issue of integrity and objectivity when partners, professionals, or their firms exchange gifts or entertainment with clients or persons associated with clients. Generally, gifts are differentiated from entertainment by whether the client participates in the activity with the firm member (for example, giving tickets to a sporting event for the client to use would be considered a gift versus attending the event with the client, which would be considered entertainment).[18]

.140 Relevant factors in determining *reasonableness* include the event or occasion (if any) giving rise to the gift or entertainment, cost or value, frequency, whether business was conducted, and who participated.

Business Relationships

Which Business Relationships With a Client Impair Independence?

.141 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as:

- Employee, director, officer, or in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent
- General counsel (or equivalent)
- Trustee for a client's pension or profit-sharing trust

.142 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client's operations or business affairs, independence is impaired.

.143 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client's governing body and, therefore, would be able to participate in the client's management decisions.

.144 There are two possible exceptions to this rule:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may serve that client without impairing your independence if:

---

[16] See Ethics Ruling No. 114 under Rule 101 (ET section 191.228–.229).

[17] See Ethics Ruling No. 113 under Rule 101 (ET section 191.226–.227).

[18] See www.aicpa.org/download/ethics/Gifts_Basis_Document.pdf.

a. Your position is purely honorary.

b. You do not vote or participate in managing the organization.

c. Your position is clearly identified as honorary in any internal or external correspondence.

2. In addition, you are also permitted to serve on a client's advisory board, provided all of the following criteria are met:

   a. The advisory board's function is purely advisory.

   b. The advisory board does not appear to make decisions for the client.

   c. The advisory board and any decision-making boards are separate and distinct bodies.

   d. Common membership between the advisory board and any decision-making groups is minimal.

> The SEC prohibits direct or material indirect business relationships with a client (or persons associated with client), except when the firm is acting as a consumer in the ordinary course of business (for example, purchasing goods or services from a client at normal commercial terms and these goods or services will be consumed by the firm). Examples of prohibited business relationships include joint business ventures, limited partnership agreements, and certain leasing interests.

Nonattest Services

Which Rules Describe the Nonattest Services That My Firm and I May or May Not Provide to Attest Clients?

.145 The term *nonattest services* includes accounting and consulting services that are not part of an attest engagement.[19] Nonattest services specifically addressed in the rules are:

- Bookkeeping services
- Payroll and other disbursement services
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Tax services
- Corporate finance consulting or advisory services
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration

[19] Defined in the AICPA Code of Professional Conduct, an attest engagement is one that requires independence under AICPA professional standards, for example, audits and reviews of financial statements or agreed-upon procedures performed under the attestation standards.

In addition to considering the general standard and four guiding principals, the SEC rules generally prohibit a CPA from providing the following services to an issuer contemporaneously with an audit:

- Bookkeeping and other services related to the client's accounting records or financial statements
- Financial information systems design and implementation
- Appraisal or valuation services
- Actuarial services
- Internal audit outsourcing
- Management functions
- Human resources
- Broker-dealer, investment adviser, or investment banking
- Legal services
- Expert services unrelated to the audit

.146 If your firm performs nonattest services for an attest client, the independence rules impose limits on the nature and scope of the services your firm may provide. In other words, the extent to which your firm may perform certain tasks will be limited by the rules. Further, certain services will be prohibited (for example, serving as a client's general counsel).

.147 This section does not discuss each of these services but rather focuses on a few for purposes of illustration. To see the full context of the rules, see Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101, *Independence*, and SEC Rule 2-01(c)(4), "Non-audit services."

.148 The AICPA rules require a member to comply with more restrictive independence provisions, if applicable, of certain regulators such as state boards of accountancy, the SEC, GAO, and the DOL.

> ***Note:*** On September 8, 2006, the AICPA issued an omnibus exposure draft that includes proposed revisions to Interpretation No. 101-3, "Performance of Nonattest Services," which would incorporate guidance on how the provision of forensic accounting services and tax compliance services would affect a member's independence.

The SEC rules require independence of the client and various affiliated entities.[20]

Note: SEC rules also require a client's audit committee (or equivalent) to preapprove all audit and nonaudit services provided by the firm to the audit client and the client's consolidated entities.

AICPA General Requirements

.149 *General Requirement 1.* One of the key principles underlying the AICPA rules on nonattest services is: You may not serve—or even appear to serve—as a member of a client's management. For example, you may not:

- Make operational or financial decisions for the client.
- Perform management functions for the client.
- Report to the board of directors on behalf of management.

[20] See Rule 2-01(f)(4) and (6).

.150 In addition, the following are examples of the types of activities that impair independence:

- Authorizing or executing a transaction on behalf of a client
- Preparing the client's source documents (for example, purchase orders)
- Having custody of a client's assets

.151 *General Requirement 2*. To help ensure compliance with general requirement 1, the second requirement states that the client must agree to assume certain responsibilities related to the nonattest services engagement. So, prior to agreeing to perform any nonattest services to the client, the firm must obtain the client's agreement to:

1. Make all management decisions and perform all management functions.
2. Designate an individual who possesses suitable skill, knowledge, and/or experience, preferably within senior management, to oversee the services.
3. Evaluate the adequacy and results of the services performed.
4. Accept responsibility for the results of the services.
5. Establish and maintain internal controls, including monitoring ongoing activities.

.152 With regards to item 2 above, the firm should be satisfied that the client's designee understands the services to be performed sufficiently to oversee them. This does not mean that the individual must be able to perform or re-perform the services, but he or she should be able to understand and agree to the nature, objectives, and scope of the services, make all significant judgments, evaluate the adequacy and results of the service, accept responsibility for the service results, and ensure that the resulting work product meets the agreed-upon specifications. The client must also be willing to commit the time and resources needed for the designee to fulfill these duties.

.153 *General Requirement 3.* Before performing nonattest services, the firm should establish and document its understanding with the client regarding the following:

1. Objectives of the engagement
2. Services to be performed
3. Client's acceptance of its responsibilities
4. Member's responsibilities
5. Any limitations of the engagement

.154 The firm should document the understanding in the engagement letter, audit planning memo, or other internal firm file.

> ***Note:*** Routine activities (for example, assisting clients with technical accounting questions, advising on internal controls, or providing periodic training on new pronouncements) that are part of the normal member-client relationship are exempt from the second and third general requirements.

What Are the Rules on Performing Bookkeeping Services for a Client?

.155 The AICPA independence rules prohibit members from acting as client management in all circumstances. Accordingly, a member may provide bookkeeping services, provided the client oversees the services and, among other things, performs all management functions and makes all management decisions in connection with the services. For example, if a member is engaged to provide bookkeeping services that will result in a set of financial statements, the client must:

- Approve all account classifications.
- Provide source documents to the member so that the member can prepare journal entries.
- Take responsibility for the results of the member's services (for example, financial statements).
- Establish and maintain internal controls over the member's bookkeeping activities.

  Note: Proposing adjusting entries to financial statements as a part of the member's audit, review, or compilation services is a normal part of those engagements and would not be considered the performance of a nonattest service subject to the general provisions of Interpretation No. 101-3, provided the client reviews these entries and understands the impact on its financial statements and records the adjustments identified by the member.

> Because of self-audit concerns, performing any type of bookkeeping service for a client (or affiliate of a client) is considered to impair independence under SEC rules unless it is reasonable to expect that the results of the auditor's services will not be subject to the firm's audit procedures. The SEC considers there to be a rebuttable presumption that the results of these services would be subject to audit procedures and therefore, the firm must overcome the presumption to perform the service.
>
> This presumption of self-audit also applies to (1) financial information design and implementation; (2) appraisals, valuations, fairness opinions, or contribution-in-kind reports; (3) actuarial-related advisory services; and (4) internal audit outsourcing.

May My Firm Provide Internal Audit Assistance to a Client?

.156 To perform internal audit assistance for a client and maintain independence, your firm may not act—or appear to act—as a member of the client's management. For example, you and your firm may not:

- Have custody of the client's assets.
- Make decisions on the client's behalf.
- Report to the client's governing body.

.157 To maintain independence, the client must:

- Designate an individual or individuals who possess suitable skill, knowledge, and/or experience to oversee the internal audit function.
- Determine the scope, risk, and frequency of internal audit activities.
- Evaluate the findings and results of internal audit activities.
- Evaluate the adequacy of the audit procedures performed and related findings.

> Internal audit services impair independence under SEC rules unless it is reasonable to expect that the results of the auditor's services would not be subject to the firm's audit procedures.

Note: For entities regulated by the FDIC or other banking agencies, see www.fdic.gov/news/news/financial/2003/fil0321.html.

May My Firm Provide Valuation, Appraisal, or Actuarial Services to a Client?

.158 Your firm may not provide valuation, appraisal, or actuarial services for a client if:

- The results of the service would be material to the client's financial statements, and
- The service involves a significant amount of subjectivity.

.159 For instance, your firm may not perform a valuation in connection with a business merger that would have a material effect on a client's financial statements because that service generally involves significant subjectivity (for example, setting the assumptions, and selecting and applying the valuation methodology).

.160 There are two limited exceptions to this rule. Valuation, appraisal, or actuarial services performed for *nonfinancial statement purposes* may be provided if they otherwise meet the rule's general requirements (for example, the client assigns an individual to oversee the service who is in a position to make an informed judgment on and accept responsibility for the results of the service). Also, your firm may provide an actuarial valuation of a client's pension or postretirement liabilities since these services are not considered to entail a significant subjectivity (that is, results of the valuation would be reasonably consistent regardless of who performs the valuation).

> The SEC prohibits your firm from providing valuation, appraisal, or *any* service involving a fairness opinion or contribution-in-kind report[21] to clients *unless* it is reasonable to expect that your firm would not audit the results of those services.

May My Firm Provide Investment Advisory Services to a Client?

.161 Here are examples of what you and your firm may do under the AICPA rules:

- Make recommendations to a client about the allocation of funds to various asset classes.
- Analyze investment performance.

.162 However, the AICPA rules also indicate that you and your firm may not:

- Make investment decisions for the client.
- Execute investment transactions.
- Take custody of a client's assets.

May My Firm Design or Implement an Information System for a Client?

.163 Your firm may not design or develop a client's financial information system or make more than insignificant modifications to the source code underlying such a system. In addition, operating a client's local area network (LAN) is prohibited.

.164 Your firm may install an accounting software package for a client, including helping the client set up a chart of accounts and financial statement format. Your firm may also provide training to the client's employees on how to use an information system. Your firm may not, however, supervise the client's employees in their day-to-day use of the system since that activity is a management function.

.165 Your firm is not precluded from designing, implementing, integrating, or installing an information system that is unrelated to the client's financial reporting process.[22]

---

[21] Per the SEC, fairness opinions and contribution-in-kind reports are opinions and reports in which your firm provides its opinion on the adequacy of consideration in a transaction.

[22] FAQs to assist members in understanding and implementing the new information technology services provisions may be obtained at www.aicpa.org/download/ethics/QA_IT.pdf.

SEC rules prohibit your firm from providing any service related to a client's financial information system design or implementation *unless* the results of your firm's services would *not* be subject to audit procedures during an audit of the client's financial statements. Your firm may:

- Evaluate internal controls of a financial information system as it is being designed, implemented, or operated for the client by another service provider, or
- Make recommendations on internal control matters to management in connection with a system design and implementation project being performed by another service provider.

Fee Issues

What Types of Fee Arrangements Between My Firm and a Client Are Prohibited?

.166 Two types of fee arrangements, contingent fees and commissions, are prohibited if the arrangement involves certain attest clients, even though the fee is not related to an attest service.

.167 A contingent fee is an arrangement whereby (1) no fee is charged unless a specified result is attained or (2) the amount of the fee depends on the results of your firm's services. Some examples of contingent fees are:

- Your firm receives a "finder's fee" for helping a client locate a buyer for one of the client's assets.
- Your firm performs a consulting engagement to decrease a client's operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

.168 Exceptions are:

- Fees fixed by a court or other public authority
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies

.169 A commission is any compensation paid to you or your firm for (1) recommending or referring a third party's product or service to a client or (2) recommending or referring a client's product or service to a third party.

.170 For example, you or your firm:

- Refers a client to a financial planning firm that pays you a commission for the referral.
- Sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- Refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

.171 Commissions or contingent fee arrangements with a client are not allowed if your firm also provides one of the following services to a client:

- An audit of financial statements
- A review of financial statements

- Compiled financial statements if a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence

- An examination of prospective financial statements

.172 You may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not an attest client). For example, you may receive a commission from a *nonclient* insurer if you refer an officer of an attest client to the insurer and the officer purchases a policy. Even though this situation is permitted, you are still required to tell the officer that you received a commission for making the referral.

> ***Note:*** State boards of accountancy and state societies may also have more restrictive regulations regarding fee arrangements, as well as specific disclosure requirements.

> On April 19, 2006, the SEC approved PCAOB Rule 3521, *Contingent Fees*, which prohibits you and your firm from providing any service or product to an audit client for a contingent fee or a commission, or receiving from the audit client, directly or indirectly, a contingent fee or commission. Although the PCAOB's definition of contingent fees was adapted from the SEC's definition, the PCAOB rule eliminates the exception for fees in tax matters, if determined based on the results of judicial proceedings or the findings of governmental agencies. In addition, the PCAOB rule specifically indicates that the contingent fees cannot be received directly or indirectly from the audit client. Rule 3521 does not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.

.173 The AICPA rule provides an exception for *referral fees* for recommending or referring a CPA's services to another person or entity. That is, you may (1) receive a fee for referring a CPA's services to any person or entity or (2) if you are a CPA, you may pay a fee to obtain a client. You must inform the client if you receive or pay a referral fee.

Is Independence Affected When a Client Owes the Firm Fees for Professional Services the Firm Has Already Provided?

.174 If a client owes your firm fees for services rendered more than one year ago, your firm's independence is considered impaired. It does not matter whether or not the services were for attest services; what matters is that the client has an outstanding debt with the firm. This is the case even if the client has given you a note receivable for these fees.

> The SEC generally expects payment of past-due fees before an engagement has begun, although a short-term payment plan may be accepted if the client has committed to pay the balance in full before the current year report is issued.[23]

Does Being Compensated for Selling Certain Services to Clients Affect My Independence?

.175 The AICPA rules do not specifically address this issue.

[23] The exception has generally been applied only to engagements to audit a client's financial statements included in its annual report, not in a registration statement.

The SEC prohibits audit partners from being *directly* compensated for selling nonattest services to audit clients. The SEC believes that such financial incentives could threaten an audit partner's objectivity and that the appearance of independence could be affected by such compensation arrangements.[24]

The rule does not prevent an audit partner from sharing in profits of the audit practice or the overall firm. Nor does it preclude the firm from evaluating a partner based on factors *related to* the sale of nonaudit services to clients, for example, the complexity of engagements or overall management of audit or nonaudit engagements.

Does It Matter If a Significant Proportion of My Firm's Fees Come From a Particular Client?

.176 The Conceptual Framework for AICPA Independence Standards states that a *financial self-interest threat* may exist due to "excessive reliance on revenue from a single attest client." In addition, Rule 102, *Integrity and Objectivity*, and *Article IV—Objectivity and Independence*, of the Principles of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 55), discuss in broad terms that members should be alert for relationships that could diminish their objectivity and independence in performing attest services. The significance of a client to a member (or his or her firm)—measured in terms of fees, status, or other factors—may diminish a member's ability to be objective and maintain independence when performing attest services.

.177 To address this issue, firms should consider implementing policies and procedures to identify and monitor significant clients to help mitigate possible threats to a member's objectivity and independence:

1. Policies and procedures for identifying and monitoring significant client relationships include:
   - Considering client significance in the planning stage of the engagement
   - Basing the consideration of client significance on firm-specific criteria or factors that are applied on a facts and circumstances basis (see the following section entitled "Factors to Consider in Identifying Significant Clients")
   - Periodically monitoring the relationship

   What constitutes *periodic* is a matter of judgment but assessments of client significance that are performed at least annually can be effective in monitoring the relationship. During the course of such a review, a client previously deemed to be significant may cease to be significant. Likewise, clients *not* identified as significant could become significant whenever factors the firm considers relevant for identifying significant clients arise (for example, additional services are contemplated).

2. Policies and procedures to help mitigate possible threats to independence and objectivity by:
   - Assigning a second (or concurring) review partner who is not otherwise associated with the engagement and practices in an office other than that which performs the attest engagement
   - Subjecting the assignment of engagement personnel to approval by another partner or manager
   - Periodically rotating engagement partners

[24] Accounting firms with ten or fewer partners and five or fewer audit clients that are *issuers*, as defined by the SEC, are exempt from this rule.

- Subjecting significant client attest engagements to internal firm monitoring procedures
- Subjecting significant client attest engagements to pre- or post-issuance reviews or to the firm's external peer review process

.178 The most effective safeguards a firm can employ will vary significantly depending on the size of the firm, the way the firm is structured (for example, whether highly centralized or departmentalized), and other factors. For example, smaller firms (particularly those with one office) tend to be simpler and less departmentalized than larger firms. Generally, their processes will be less formal and involve fewer people than larger firms. Further, their firms' managing partners may engage in frequent and direct communications with the firms' partners and professional staff on client matters and be personally involved in staff assignments. Larger firms draw from a sizeable and diverse talent pool. In those firms, partners who are not affiliated with the engagement (or the client service office or business unit) can choose second (or concurring) review partners from outside the office performing the attest engagement. Mid-sized—or regional—firms may have aspects of both their smaller and larger counterparts, that is, combining the ability to choose second-review partners from an office other than the client service office, while maintaining a relatively close connection to specific client relationships.

Factors to Consider in Identifying Significant Clients

.179 Both qualitative and quantitative factors can reveal a significant client, including:

- The size of the client in terms of the percentage of fees or the dollar amount of fees versus total revenue of the engagement partner, office, practice unit,[25] or the firm
- The significance of the client to the engagement partner, office, or practice unit of the firm in light of the:
  - — Amount of time the partner, office, or practice unit devotes to the engagement
  - — Effect on the partner's stature within the firm due to his or her servicing of the client
  - — Manner in which the partner, office, or practice unit is compensated
  - — Effect that losing the client would have on the partner, office, or practice unit
- The importance of the client to the firm's growth strategies (for example, the firm is trying to gain entry into a particular industry)
- The stature of the client, which may enhance the firm's stature (for example, the client is a company of distinction within its industry, or in the local, regional, national, or international business community)
- Whether the firm also provides services to related parties (for example, also provides professional services to affiliates or owners of the client)
- Whether the engagement is recurring or not

.180 Judgment is necessary to determine whether a client is significant to the firm, office, practice unit, or partner of the firm. Firms will vary considerably in terms of the degree to which they consider some factors to be more pertinent than others. Gauges that relate to each relevant level within a firm (for example, firm, geographic region, office, or practice unit), or partner, may be useful but will likely be different for various levels within the firm.

---

[25] Assessing client significance at the business or "practice" unit level may be a more meaningful measure for firms that structure their practices along industry lines (such as health care or financial services).

According to SEC guidance, in general, if a firm derives more than 15 percent of its total revenues from one client or group of related clients, independence may be impaired because this may cause the firm to be overly dependent on the client or group of related clients.

Other Guidance

Where Can I Find Further Assistance With My Independence Questions?

.181 This section of the Alert does not address many subjects included in the AICPA rules. Readers are encouraged to view the online version of the Code of Professional Conduct at www.aicpa.org/about/code/index.html.

.182 In addition, readers should refer to the Conceptual Framework for AICPA Independence Standards in evaluating whether a specific circumstance that is not addressed in the Code would pose an unacceptable threat to independence.

Resource Central

Independence and Ethics Contact List

.183 As specific services and situations arise in practice, refer to the independence literature and consult with those responsible for independence in your firm. If you need further assistance researching your question, contact one of the following organizations for guidance:

AICPA

Internal Control Reporting—Implementing Sarbanes-Oxley Act Section 404

NOTICE TO READERS
INTERNAL CONTROL REPORTING—IMPLEMENTING SARBANES-OXLEY ACT SECTION 404 (REVISED EDITION)

This Financial Reporting Alert was developed by an independent consultant and the staff of the AICPA. Its content represents the opinions of the author. This Financial Reporting Alert has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the AICPA and has no official or authoritative status.

AICPA Staff

Written by
Michael J. Ramos, CPA

Edited by
Karin Glupe, CPA
Technical Manager
Accounting and Auditing Publications

Introduction

.01 In July 2002, the Sarbanes-Oxley Act of 2002 (the Act) was signed into law, bringing with it sweeping changes to many aspects of the financial reporting, corporate governance, and regulatory landscape for public companies. Section 404 of the Act requires public companies to include with their annual report to the Securities and Exchange Commission (SEC) a separate report on the assessment of the effectiveness of the entity's internal control. Additionally, the entity's external auditors must attest to and report on the assessment made by management.

.02 A company that is an "accelerated filer" must begin to comply with the internal control reporting and attestation requirements associated with the Act for its fiscal year ending on or after November 15, 2004. According to the SEC, a company is an accelerated filer if its common public equity float was $75 million or more as of the last business day of its most recently completed second fiscal quarter; the company has been subject to the reporting requirements of the Securities Exchange Act of 1934 for at least 12 calendar months; the company has filed at least one annual report; and the company is not a small-business issuer (that is, it is not eligible to use Forms 10-KSB or 10-QSB). By contrast, a nonaccelerated filer does not meet these requirements, and is not required to file its annual and quarterly reports on an accelerated basis. A nonaccelerated filer, or a foreign private issuer that files its annual reports on Form 20-F or Form 40-F, must begin to comply with the internal control reporting and attestation requirements for its first fiscal year ending on or after July 15, 2006.

.03 Since the passage of the Act, many issues have arisen regarding the implementation of the internal control assessment and reporting process. The purpose of this Alert is to articulate significant technical issues that have surfaced and to provide direction for those responsible for managing or participating in the implementation of section 404, including:

- The entity's CEO and CFO, who have the overall responsibility for assessing and reporting on internal control
- Internal auditors
- Third parties who might be engaged by the entity to assist with the assessment process

Summary of Relevant Rules and Other Authoritative Literature

.04 Management's assessment and reporting on internal control is shaped by several key rules and standards, including:

- *SEC rules.* The Sarbanes-Oxley Act directed the SEC to adopt detailed rules to implement the requirements of the Act relating to internal control. These rules define for issuers the requirements for assessing and reporting on internal control. To read the SEC rules, go to the SEC Web site at www.sec.gov/rules/final/33-8238.htm.
- *External auditor standards.* These standards describe the approach, required tests, and other guidance that the entity's external auditors are expected to follow when reporting on management's assertion about the effectiveness of internal control. These standards do not affect the issuer directly, but they do have a significant *indirect* effect on the procedures performed by management.
- *The Committee of Sponsoring Organizations of the Treadway Commission (COSO) Internal Control Integrated Framework.* Management's report on internal control effectiveness is required to disclose the criteria against which management assesses effectiveness. The COSO framework is one example set of criteria and it is anticipated that most U.S. entities will use COSO in their evaluation. To obtain the COSO framework, call the AICPA at (888) 777-7077 or visit www.cpa2biz.com and order *Internal Control—Integrated Framework* (product no. 990012kk).

The SEC Rules

.05 The SEC issued its final rule on management's report on internal control in May 2003, and the rule became effective on August 14, 2003. It is the entity's annual report to the SEC (Form 10-K) that contains management's report on internal control, and therefore it is the SEC rules regarding those reports that management must follow in planning and performing its assessment of control effectiveness.

Definition of Internal Control

.06 The SEC rules clarify that management's assessment and report are limited to *internal control over financial reporting*. Management is not required to consider other aspects of control, such as controls pertaining to operating efficiency. The SEC's definition of *internal control* encompasses the COSO definition (described later in this Alert in the section titled "The COSO Internal Control Integrated Framework"), but the SEC does not mandate that the entity use COSO as its criteria for judging effectiveness.

Annual Reporting Requirements

.07 Under the SEC rules, the company's annual 10-K must include:

1. *Management's Annual Report on Internal Control Over Financial Reporting.* This report on the company's internal control over financial reporting should contain:
   a. A statement of management's responsibilities for establishing and maintaining adequate internal control over financial reporting.
   b. A statement identifying the framework used by management to evaluate the effectiveness of the company's internal control over financial reporting.

c. Management's assessment of the effectiveness of the company's internal control over financial reporting as of the end of the most recent fiscal year, including a statement as to whether or not internal control over financial reporting is effective. This discussion must include disclosure of any material weakness in the company's internal control over financial reporting identified by management. Management is not permitted to conclude that the registrant's internal control over financial reporting is effective if there are one or more material weaknesses in the company's internal control over financial reporting.

d. A statement that the registered public accounting firm that audited the financial statements included in the annual report has issued an attestation report on management's assessment of the registrant's internal control over financial reporting.

2. *Attestation Report of the Registered Public Accounting Firm.* This is the registered public accounting firm's attestation report on management's assessment of the company's internal control over financial reporting.

3. *Changes in Internal Control Over Financial Reporting.* This report must disclose any change in the company's internal control over financial reporting that has materially affected or is reasonably likely to materially affect the company's internal control over financial reporting.

.08 Key provisions of these reporting requirements that merit management's consideration include the following.

- *"As of" reporting.* Management assesses the effectiveness of internal control as of the end of the fiscal year, rather than throughout the reporting period. This reporting requirement has significant implications for the reporting of material weaknesses that were identified and corrected during the period. It also affects the timing of management's tests of the design and operating effectiveness of controls.
- *Material weakness in internal control.* Management is required to disclose any material weakness[1] in the company's internal control. Further, the existence of one or more material weaknesses precludes management from concluding that its internal control is effective.

Both of these considerations are discussed in more detail in the section titled "Reporting" in this Alert.

Quarterly Reporting Requirements

.09 The SEC rules also require management to evaluate any change in the entity's internal control that occurred during a fiscal quarter and that has materially affected, or is reasonably likely to materially affect, the entity's internal control over financial reporting.

.10 Additionally, management is required to evaluate the effectiveness of the entity's "disclosure controls and procedures" and issue a report as to their effectiveness on a quarterly basis. With these rules, the SEC introduced a new term, *disclosure controls and procedures*, which differs from *internal controls over financial reporting* and is much broader.

.11 As defined, disclosure controls and procedures encompass the controls over all material financial *and nonfinancial information* in Exchange Act reports. Information that would fall under this definition that would *not* be part of an entity's internal control over financial reporting might include the signing of a significant contract, changes in a strategic relationship, management compensation, or legal proceedings.

.12 This Alert does not discuss the evaluation of disclosure controls and procedures but is limited to a discussion of the annual and quarterly evaluation and reporting of internal control over financial reporting.

[1] For a definition of *material weakness*, see the "Reporting" section of this Alert.

External Auditor Standards

.13 The entity's external auditors are required to audit management's internal control report in accordance with certain professional standards. These standards *directly* affect *only* the work of the external auditor. The work performed by the entity to assess the effectiveness of its internal controls need only comply with the requirements of the SEC rules. However, the auditing standards related to internal control reporting will have a *significant indirect* effect on the way in which management plans and performs its internal control testwork. For example, the standards may require the external auditors to include certain divisions, categories of controls, or control procedures within the scope of their work. If that is the case, management would need to ensure that the scope of their assessment process is congruent with the requirements of external auditors.

Public Company Accounting Oversight Board Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Conducted in Conjunction With an Audit of Financial Statements

.14 In June 2004, the SEC approved Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2. This standard is effective for audits of internal control over financial reporting required by section 404 of the Sarbanes-Oxley Act of 2002 and addresses several important areas that affect financial statement issuers. A brief discussion of these follows.

.15 ***The Audit Process.*** The overall objective of the external auditor's engagement is to form an opinion about management's assessment of the effectiveness of internal control. To form his or her opinion, the auditor:

- Evaluates the reliability of the process used by management to assess the entity's internal control and assesses the adequacy of the company's documentation of internal control. Lack of adequate documentation is considered a control deficiency that may preclude an unqualified opinion on internal control or may result in a scope limitation on the auditor's engagement.
- Confirms his or her understanding of the entity's internal control by performing walk-throughs of the company's significant processes. A walkthrough is a procedure in which a transaction is traced from its origination through the information processing system, to the transaction's reporting in the financial statements.
- Reviews and relies on the results of *some* of the tests performed by management, internal auditors, and others during their assessment process.
- Performs his or her own tests.

.16 This framework of the auditor's process poses several important questions for management, including:

- What are the qualities of management's process for assessing internal control that the external auditors deem necessary to make the process "reliable"?
- Which of management's tests can the external auditor rely on and which are subject to retesting by the auditor?

.17 ***Required Elements of Management's Process.*** The standard provides guidance on the *required* elements of management's process for assessing the effectiveness of internal control. The absence of one or more of those required elements may result in a modification to the standard audit report. For this reason, it is critical that management's process comply with all requirements established by the new standard.

.18 The auditing standard states that the auditor should determine whether management's assessment process has addressed the following elements.

- Determining which controls should be tested, including controls over relevant assertions related to all significant accounts and disclosures in the financial statements. Generally, such controls include:
  - — Controls over initiating, authorizing, recording, processing, and reporting significant accounts and disclosures and related assertions embodied in the financial statements.
  - — Controls over the selection and application of accounting policies that are in conformity with generally accepted accounting principles.
  - — Antifraud programs and controls.
  - — Controls, including information technology general controls, on which other controls are dependent.
  - — Controls over significant nonroutine and nonsystematic transactions, such as accounts involving judgments and estimates.
  - — Company-level controls, including the control environment.
  - — Controls over the period-end financial reporting process, including controls over procedures used to enter transaction totals into the general ledger; to initiate, authorize, record, and process journal entries in the general ledger; and to record recurring and nonrecurring adjustments to the financial statements (for example, consolidating adjustments, report combinations, and reclassifications).
- Evaluating the likelihood that failure of the control could result in a misstatement, the magnitude of such a misstatement, and the degree to which other controls, if effective, achieve the same control objectives.
- Determining the locations or business units to include in the evaluation for a company with multiple locations or business units.
- Evaluating the design effectiveness of controls.
- Evaluating the operating effectiveness of controls based on procedures sufficient to assess their operating effectiveness. To evaluate the effectiveness of the company's internal control over financial reporting, management must have evaluated controls over all relevant assertions related to all significant accounts and disclosures.
- Determining the deficiencies in internal control over financial reporting that are of such a magnitude and likelihood of occurrence that they constitute significant deficiencies or material weaknesses.
- Communicating findings to the auditor and to others, if applicable.
- Evaluating whether findings are reasonable and support management's assessment.

.19 ***Documentation of Testwork to Support Management's Assertion.*** The standard provides additional guidance on the nature and extent of the documentation required by the entity to support management's assessment of internal control. The form and extent of documentation should vary depending on the size, nature, and complexity of the company. The standard also states that inadequate documentation is a control deficiency that may rise to the level of a material weakness.

.20 The standard also addresses other situations that are likely to occur in practice, including:

- *Extent of testing of multiple locations, business segments, or subsidiaries.* To determine the locations or business units that should be tested, management should evaluate their relative financial significance and the risk of material misstatement arising from them. Management should also determine the other locations or business units that, when aggregated, represent a group with a level of financial significance that could create a material misstatement in the financial statements.

- *Required tests when the entity uses a service organization to process transactions.* Management should obtain an understanding of the controls at the service organization that are relevant to the entity's internal control and the controls at the user organization over the activities of the service organization. Management should also obtain evidence that the controls that are relevant to management's assessment are operating effectively.

- *Updated testwork required when the original testing was performed at an interim date in advance of the year-end reporting date.* Generally, as the risk associated with the control being tested decreases, the testing may be performed farther from the as-of date; on the other hand, as the risk associated with the control increases, the testing should be performed closer to the as-of date.

Appendix B of Auditing Standard No. 2 provides further information regarding these situations.

.21 ***Using the Work of Internal Auditors and Others.*** Many entities are using the work of their own internal audit staff and others within the organization to perform tests of the effectiveness of internal control. At issue is the extent to which the external auditors can rely on those tests to reach their own conclusion.

.22 Paragraphs 108 through 126 of the standard provide extensive guidance on the degree to which the company's work on internal control can be used by the external auditors. The standard indicates that the work of "others" includes the relevant work performed by internal auditors, other company personnel, and third parties working under the direction of management or the audit committee. However, the external auditor "must perform enough of the testing himself or herself so that the [*external*] auditor's own work provides the principal evidence for the [*external*] auditor's opinion."

.23 There are two areas where the external auditors are prohibited from using the company's work in their audit.

- *Control environment.* The external auditors are prohibited from using the work of company management and others to reduce the amount of work they perform on controls in the control environment. However, the external auditor should still "consider the results of work performed in this area by others because it might indicate the need for the [*external*] auditor to increase his or her [*own*] work."

- *Walkthroughs.* External auditors are required to perform at least one walkthrough for each major class of transactions.

.24 For all areas other than the control environment and the walkthroughs, the external auditors may use the company's tests on internal control during their audit. To determine the extent to which the external auditor may use the company's work, the external auditor is required to:

- Evaluate the nature of the controls subjected to the work of others;

- Evaluate the competence and objectivity of the individuals who performed the work; and

- Test some of the work performed by others to evaluate the quality and effectiveness of their work.

.25 The auditor should evaluate the following factors when evaluating the nature of the controls subjected to the work of others. As these factors increase or decrease in significance, the need for the auditor to perform his or her own work on those controls increases or decreases, respectively.

- The materiality of the accounts and disclosures that the control addresses and the risk of material misstatement.

- The degree of judgment required to evaluate the operating effectiveness of the control.

- The pervasiveness of the control.
- The level of judgment or estimation required in the account or disclosure.
- The potential for management override of the control.

.26 The extent to which the external auditors can use the company's work depends on the degree of competence and objectivity of the individuals performing the work. The more objective and competent the individuals who performed the work, the more the external auditors can rely on such work. Factors concerning the competence of the individuals performing the tests of controls include their educational level and professional experience, their professional certification and continuing education, practices regarding the assignment of individuals to work areas, supervision and review of their activities, the quality of the documentation of their work, and the level of supervision and review of their activities. Factors concerning the objectivity of the individuals performing the tests of controls include the following: if the individuals responsible for the work of others (testing authority) in testing controls reports to an officer of sufficient status to ensure sufficient testing coverage and appropriate action on findings and recommendations of the individuals performing the testing; if the testing authority reports regularly to the board of directors or audit committee; and if there are policies prohibiting individuals from testing controls in areas to which they were recently assigned, or areas in which relatives are employed.

.27 The auditing standard notes that the work of internal auditors may be used "to a greater extent than the work of other company personnel." This is particularly true for internal auditors who follow the *International Standards for the Professional Practice of Internal Auditing*, issued by the Institute of Internal Auditors. According to the standard, "if internal auditors have performed an extensive amount of relevant work and the auditor determines they possess a high degree of competence and objectivity, the auditor could use their work to the greatest extent an auditor could use the work of others."

.28 ***Documentation of Internal Control.*** The external auditors evaluate the adequacy of management's documentation of internal control. Paragraph 42 of the auditing standard states that when determining whether management's documentation provides reasonable support for its assessment, the auditor should evaluate whether such documentation includes the following:

- The design of controls over all relevant assertions related to all significant accounts and disclosures in the financial statements. The documentation should include the five components of internal control over financial reporting, including the control environment and company-level controls.
- Information about how significant transactions are initiated, authorized, recorded, processed, and reported.
- Sufficient information about the flow of transactions to identify the points at which material misstatements due to error or fraud could occur.
- Controls designed to prevent or detect fraud, including who performs the controls and the related segregation of duties.
- Controls over the period-end financial reporting process.
- Controls over safeguarding of assets.
- The results of management's testing and evaluation.

.29 As management documents internal control, they should be aware of what elements their auditors will be looking for and ensure that those elements are present.

.30 ***Seeking Help From External Auditors—Independence Issues.*** The auditing standard incorporates four basic principles in its guidance on independence when performing an audit of internal control. These basic principles state that independence would be impaired if the auditor's services to the company create a mutual or conflicting interest between the firm and the client, place the firm in a position where it subsequently audits its own work, result in the firm acting as an employee of the client, or result in the firm acting as an advocate for the client.

.31 Maintaining independence is primarily the responsibility of the external auditors. However, note that several of the independence requirements impose certain responsibilities on management and the audit committee.

- *Preapproval by the audit committee.* Any internal control-related service to be provided by the external auditor must be preapproved by the audit committee. There is no grandfathering for ongoing internal control-related engagements that were preapproved before the effective date of Auditing Standard No. 2 in a manner that would not satisfy the requirements in the standard.
- *Active involvement of management.* Management must be "actively involved" in a "substantive and extensive" way in all internal control services the external auditor provides. Management cannot delegate these responsibilities, nor can it merely accept responsibility for documentation and testing performed by the auditors.
- *Independence in fact and appearance.* According to the standard, the test for independence in fact is whether "the activities would impede the ability of anyone on the engagement team or in a position to influence the engagement team from exercising objective judgment in the audits of the financial statements or internal control over financial reporting." The test for independence in appearance, according to the standard, is "whether a reasonable investor … would perceive an auditor as having interests which could jeopardize the exercise of objective and impartial judgments on all issues … within the auditor's engagement."

.32 ***Additional Guidance.*** Subsequent to the approval of the standard, both the PCAOB and the SEC released documents of answers to frequently asked questions (see the Appendix of this Alert for the SEC questions and answers). These documents set forth the PCAOB and SEC staff's opinions and views on certain matters. Although the PCAOB and the SEC point out that these opinions and views do not represent official "rules," any departure from the answers to questions discussed in these documents should be justified. In addition, the auditing standard can be downloaded directly from the PCAOB Web site at www.pcaobus.org/Standards/index.aspx.

The COSO Internal Control Integrated Framework

.33 In 1985, the Committee of Sponsoring Organizations of the Treadway Commission (COSO) was formed to sponsor the National Commission on Fraudulent Financial Reporting, whose charge was to study and report on the factors that can lead to fraudulent financial reporting. Since this initial undertaking, COSO has expanded its mission to improving the quality of financial reporting. A significant part of this mission is aimed at developing guidance on internal control. In 1992, COSO published *Internal Control—Integrated Framework*, which established a framework for internal control and provided evaluation tools that business and other entities could use to evaluate their control systems. This COSO report can be obtained through the AICPA by calling (888) 777-7077 or by going online at www.cpa2biz.com (product no. 990012kk).

The COSO Internal Control Components

.34 The COSO framework describes five interrelated components of internal control.

- *Control environment.* Senior management must set an appropriate "tone at the top" that positively influences the control consciousness of entity personnel. The control environment is the foundation for all other components of internal control and provides discipline and structure.

- *Risk assessment.* The entity must be aware of and deal with the risks it faces. It must set objectives, integrated throughout all value chain activities, so the organization is operating in concert. Once these objectives are set, the entity must then identify the risks to achieving those objectives, analyze those risks, and develop ways to manage them.

- *Control activities.* Control policies and procedures must be established and executed to help ensure the actions identified by management as necessary to address risks are effectively carried out.

- *Information and communications.* Surrounding the control activities are information and communication systems, including the accounting system. These systems enable the entity's people to capture and exchange the information needed to conduct, manage, and control its operations.

- *Monitoring.* The entire control process must be monitored, and modifications made as necessary. In this way, the system can react dynamically, changing as conditions warrant.

.35 The COSO report describes these individual components as being tightly integrated with each other. Each component has a relationship with and can influence the functioning of every other component. When evaluating the effectiveness of internal control, management should consider it as an integrated whole. Weak controls in one area can be offset by stronger controls in another area.

Key Characteristics of the COSO Framework

Flexible, Adaptable, No "One Size Fits All" Approach

.36 The COSO framework is not a rigid, prescriptive approach to internal controls. It recognizes that different entities make different choices about how to control their businesses. Internal control is not a "one size fits all" proposition. Consequently, internal control cannot be evaluated against a detailed set of fixed, required procedures. Management has to exercise a great deal of judgment, driven by the particular needs of the entity, to determine the nature of the controls in place and whether they are functioning effectively.

Effectiveness Determined by Achievement of Objectives

.37 Management should judge the effectiveness of internal control by how well the controls enable the entity to achieve stated objectives. Controls have value only to the degree to which they allow the entity to achieve its objectives. Thus, the COSO framework adopts a business objectives-driven approach to defining internal control. Under that approach, the entity:

1. Establishes business objectives. The SEC rules describe those objectives as relating to the preparation of reliable financial statements.

2. Identifies the risks to achieving those objectives.

3. Determines how to manage the identified risks. The establishment of internal controls is just one of several options.

4. Where appropriate, establishes control objectives as a way to manage certain risks. Individual controls are then designed and implemented to meet the stated control objectives.

Significant Control Objectives

.38 The COSO framework focuses on the achievement of control *objectives* (rather than the existence of predetermined control procedures), and it is expected that management will rely on some control procedures more than others to achieve these objectives. For example, management may decide to rely more on detective controls rather than preventive controls to identify and correct unauthorized transactions. At the entity level, some control objectives or activity-level processing streams may be more significant to the entity's financial statements or financial reporting process than others.

.39 When assessing the effectiveness of internal control *as a whole*, management should be sure to identify the controls it relies on most to produce reliable financial statements, and to include the testing of these controls in the scope of its work.

The Importance of the Control Environment

.40 Managers typically think of internal control only in terms of the policies and procedures related to the processing of transactions. For example, the matching of a vendor invoice to a master file of approved vendors, the recalculation of that invoice, or the reconciliation of the accounts payable subsidiary ledger to the general ledger account are all examples of controls over the processing of purchases.

.41 The COSO framework does not limit itself to these types of business activity-level procedures. The framework acknowledges that the *environment* in which those procedures operate has a direct effect on their effectiveness. In fact, this environment is described as the foundation of all other control components. The control environment encompasses the following:

- Integrity and ethical values
- Commitment to competence
- Board of directors or audit committee
- Management's philosophy and operating style
- Organizational structure
- Assignment of authority and responsibility
- Human resource policies and practices

.42 When evaluating the effectiveness of internal control, management must be sure to perform tests that allow it to assess the effectiveness of the control environment. The section of this Alert titled "Testing of Internal Control" discusses this matter in more detail.

.43 ***Antifraud Programs and Controls.*** Management is responsible for designing and implementing systems and procedures for the prevention and detection of fraud and, along with the board of directors, for ensuring a culture and environment that promote honesty and ethical behavior. Broadly stated, three fundamental elements are essential when implementing a system to prevent, deter, and detect fraud. They are: (*a*) create and maintain a culture of honesty and high ethics; (*b*) evaluate the risks of fraud and implement the processes, procedures, and controls needed to mitigate the risks and reduce the opportunities for fraud; and (*c*) develop an appropriate oversight process. The AICPA Antifraud & Corporate Responsibility Resource Center provides extensive guidance for developing antifraud programs and controls.

Reasonable Assurance

.44 No matter how well designed or operated, internal control can provide only reasonable assurance that objectives will be met. Reasonable assurance is a high threshold, but it stops short of absolute assurance. The presence of an internal control failure does not, in and of itself, mean that a system is ineffective. The COSO report states that "even an effective internal control system can experience failure."

Information Technology Considerations

.45 The COSO framework groups information technology (IT)-related controls into two types: general computer controls and application-specific controls.

- *General controls* include controls over:
  - Data center operations (for example, job scheduling, backup, and recovery procedures)
  - Systems software controls (for example, the acquisition and implementation of operating systems)
  - Access security
  - Application system development and maintenance controls (for example, the acquisition and implementation of individual computer software applications)
- *Application controls* are designed to control information processing and help ensure the completeness and accuracy of transaction processing, authorization, and validity. Application controls also encompass the way in which different applications interface with each other and exchange data.

.46 The COSO report does not mandate this approach to assessing the effectiveness of internal controls but states that this is one set of groupings of IT-related control activities that can be used.

.47 Many entities will find the COSO guidance on IT-related controls to be insubstantial and may look for additional guidance. The Control Objectives for Information and Related Technology (COBIT) framework is a good source for such guidance.

The COBIT Framework

.48 Since the release of COSO, the Information Systems Audit and Control Association and Foundation (ISACA) has developed its COBIT framework, which provides a generally applicable and accepted standard for IT security and control practices. Among IT audit professionals, COBIT is widely accepted.

.49 The COBIT framework is similar to COSO in that it puts controls within the context of an entity's need to achieve certain business objectives and the risks it faces toward achievement. In defining the goals of IT governance and control, COBIT takes a rather broad brush and does not limit itself to the financial reporting process. For the purpose of complying with the SEC internal control reporting requirements, management should limit its consideration of IT controls to those that affect the reliability of financial reporting, either directly (for example, application controls) or indirectly (for example, general controls).

.50 COBIT groups the IT processes into four categories, each of which is critical in delivering information that meets certain stated criteria.

- *Planning and organization.* These processes cover strategy and tactics and concern the identification of the way IT can best contribute to the achievement of stated business objectives, both now and in the future.
- *Acquisition and implementation.* To realize the IT strategy, IT solutions need to be identified, developed, or acquired, as well as implemented and integrated into business processes.
- *Delivery and support.* These processes include the actual processing of data by application systems.
- *Monitoring.* All IT processes need to be regularly assessed over time for their quality and compliance with control requirements.

.51 The delivery and support category of processes is analogous to the COSO category of application controls. The other categories identified by COBIT approximate the general controls described by COSO but are somewhat broader in scope.

AICPA Trust Services, Including SysTrust[SM] and WebTrust[SM]

.52 SysTrust and WebTrust are professional services that address areas such as security, privacy, processing integrity, availability, and confidentiality through the use of the AICPA/CICA Trust Services Principles and Criteria. Management can benefit from using these suitable criteria in several ways when implementing Sarbanes-Oxley section 404 requirements. They can use the AICPA/CICA Trust Services Principles and Criteria as:

1. A guideline to setting up appropriate controls and systems that will instill confidence and trust.
2. A method of evaluating a system to determine whether it meets specific criteria and employs best practices.
3. An internal method of assurance and self-assessment that management, the board, and others can rely upon.

For more information about Trust Services, visit AICPA Online at www.aicpa.org/trustservices.

Project Planning Considerations

.53 To reach a reliable conclusion about the effectiveness of the entity's internal control, management will need to plan a logical, structured approach to its testing and evaluation, for example:

1. Ensure adequate documentation of existing controls. If controls are found to be missing or to contain design deficiencies, new or redesigned controls need to be documented and implemented.
2. Perform tests of the design and operating effectiveness of all significant controls.
3. Evaluate the test results and form a conclusion about the effectiveness of internal control. If the tests reveal significant deficiencies or material weaknesses in internal control, corrective action should be taken immediately.
4. Prepare management's report on internal control.

General Planning Considerations

.54 During the course of the project to assess internal control effectiveness, management will be required to make important judgments regarding:

- The focus of testing and areas of risk requiring increased scrutiny
- The nature of the testwork and other procedures necessary to achieve the project's objectives
- The scope of the work to be performed, for example, the locations or business units to be included in testing

.55 Planning involves gathering information to help make broad, preliminary judgments on these matters. The knowledge gained from gathering this information also provides the requisite knowledge to make informed decisions as the engagement proceeds. In that sense, planning is an ongoing process. Preliminary judgments made at the onset of the project are revisited continuously as the project progresses and more information becomes available.

Information Sources

.56 Sources of information that are useful for planning an assessment of internal control include the following:

- Published sources such as:
  - Form 10K and other SEC filings
  - Annual report
  - Information available in the Investor Relations section of the entity's Web site
  - Analyst reports
  - Inquiries of key individuals with knowledge of the entity's most significant business processes and financial reporting processes and how these processes are monitored and controlled.

Areas of Focus

.57 The tests of control effectiveness should be focused on the entity's most significant control objectives. Determining these control objectives is largely a matter of judgment that requires management to consider the most significant risks of producing reliable financial statements and the controls that mitigate these risks. The use of a percentage or other quantitative threshold may provide a reasonable basis for evaluating the significance of an account or process; however, judgment, including a review of qualitative factors, should be used to determine if amounts above or below the quantitative threshold must be evaluated. Factors that management should consider include the following:

- The entity's most significant business process activities
- Significant risks facing the entity and the industry
- Significant accounts, classes of transactions, and disclosures in the entity's financial statements
- Areas that pose a high risk of material misstatement to the financial statements, including those that:
  — Have a known or suspected control weakness
  — Possess a high risk for material misstatement irrespective of any controls

.58 Management should be careful not to make the assessment a "check-the-box" exercise. An assessment of internal control that is too formulaic or too detailed may not fulfill the underlying requirements. The desired approach should be to focus resources on the areas with the greatest risk, and avoid giving all significant accounts and related controls equal attention without regard to risk.

.59 For future years' assessments of internal controls, management's knowledge of the prior year's assessment results affect its current year risk-based analysis of the significant accounts and the related required documentation and testing. Management may determine that certain controls require more extensive testing, while other controls require little testing. Management may also find it appropriate to adjust the nature, timing, and extent of testing from year to year, by performing extensive tests in selected internal control areas some years, while performing less extensive testing in other areas, and changing that focus from year to year.

Management Override of Controls

.60 Assessing internal control effectiveness may necessitate addressing the key area of management override of controls, a characteristic of many fraudulent financial reporting schemes. The audit committee plays an important role in helping the board of directors fulfill its oversight responsibilities with respect to the entity's financial reporting process and the system of internal control. In exercising this oversight responsibility, the audit committee should consider the potential for management override of controls or other inappropriate influence over the financial reporting process.

Structuring the Project Team

.61 Performing an assessment of internal control is a complex process. Management should assemble a project team that includes individuals with a wide variety of technical expertise, including the following:

- Financial reporting requirements and processes
- Operations management
- Auditing concepts, techniques, and tools
- Information technology
- Securities law and SEC reporting requirements

.62 Members of the project team should have sufficient authority and stature within the organization to allow them access to information and resources. The team should report directly to the CEO and CFO, who ultimately bear the responsibility for establishing and maintaining internal control and reporting on its effectiveness.

Engaging Third Parties for Assistance

.63 Entities that lack sufficient resources or expertise may look to third parties for assistance. Completely outsourcing the entire project to a third party normally would be inappropriate for management to do—ultimately, management should remain responsible for evaluating and reporting on the effectiveness of the entity's internal control. However, third parties may be engaged to participate as part of the project team or to provide other services such as training.

.64 When engaging third parties for help on the project, management should clarify with the third party:

- *Qualifications.* This includes the nature of their expertise and their experience in performing the work you will ask of them.
- *Scope of work.* Management should be sure to define, as unambiguously as possible, the scope of the third party's work. For example, if the entity engages a third party to assist "in the documentation of internal control," what does that entail? Is that limited to the preparation of documentation for controls already in existence? What if, during this process, management discovers that some necessary controls do not exist or the ones that do are inadequately designed? Is the design or redesign of controls within the original scope of work?
- *Work product.* The work performed by a third party may result in evidence used by management to support its assessment of internal control effectiveness. As such, the external auditors also may rely on some or all of the work to reach their conclusion about management's assertion. When engaging third parties, management should obtain a clear understanding about the form and content of the work product to ensure that it is suitable for their purposes and, if necessary, acceptable for use by the external auditors.

Working With the External Auditors

.65 Management's relationship with its external auditor will play a role in determining effectiveness, efficiency, and cost of the project. Particularly in the first year of implementation, the entity's efforts to assess internal control effectiveness should be closely coordinated with the needs of the external auditor. A lack of coordination with the auditors could result in a variety of negative, unforeseen consequences, including:

- Duplication of effort
- Reperformance of certain tests
- Performance of additional tests or unanticipated expansion of the scope of the engagement
- Misunderstandings relating to the definition or reporting of material weaknesses.

Issues to Consider With the External Auditors

.66 The communication between management and the external auditors should take place early and continue throughout the project. Many issues arise during the course of the project. For some of these issues, the input of the external auditors is important if management is to reach a suitable resolution. Issues that management should consider discussing with its external auditors include the following.

Project Planning

- The overall process and approach management will take to evaluate internal control effectiveness
- The scope of the project
- The degree to which the external auditors will rely on the results of management's test work to reach their conclusion
- The list of controls determined to be significant and, therefore, the primary focus of the project
- The use of service centers and reliance on service center reports

Documentation

- Documentation of internal control policies and procedures, including the form of the documentation and what the documentation will contain
- The nature and extent of the documentation of tests of controls
- How to determine whether documentation of controls and tests of controls is sufficient

Tests of Internal Control

- The nature and extent of the planned tests of controls and whether the evidence expected to be obtained in those tests is sufficient to allow management to draw a reliable conclusion about the design and operating effectiveness of internal control
- The general type of deviations or conditions that might be considered significant deficiencies or material weaknesses[2] and therefore should be considered when designing tests of controls; the planned timing of management's tests of controls and whether this timing will allow management to draw conclusions about the design and operating effectiveness of internal control "as of" year end
- The nature and extent of procedures that may be required to update management's conclusions about effectiveness from the time the procedures were performed until year end
- The results of management's tests of controls and the conclusions reached regarding the effectiveness of internal control

Reporting

- Contents of management's report on internal control, including:

---

[2] See definitions of *significant deficiencies* and *material weaknesses* in the "Reporting" section of this Alert.

— Completeness of the report and whether the contents satisfy the SEC reporting requirements

— Possible deletion of material that is not required

- Disclosure of material weaknesses that exist at the reporting date
- The nonreporting of material weaknesses that existed and were reported at an interim period but subsequently have been remediated
- Disclosure of significant control changes that occurred after year end

Auditor Independence

.67 To perform an audit of an entity's financial statements, the external auditor must be independent of the entity. The SEC has developed a detailed body of rules that define auditor independence. Underlying these detailed rules are fundamental concepts of independence, including:

- Auditors should not act in the capacity of management.
- Auditors should not audit their own work.

.68 The audit committee should proceed carefully when engaging the entity's external auditors to assist in management's internal control assessment process. The nature of the relationship and scope of work should be defined in a way that the auditor's independence both in appearance and in fact remains uncompromised. The audit committee or board of directors should be involved in all discussions and have the final authority for determining whether and how the external auditors will be engaged to assist in any internal control related matters. The consequences of violating the SEC's auditor independence rules may be severe, and in some cases, the SEC may even require the entity to have its financial statements reaudited.

Documentation of Internal Control and Tests of Controls

.69 Within the context of assessing internal control to comply with the SEC reporting requirements, there are two separate sets of documentation:

- Documentation of the entity's internal control policies and procedures
- Documentation of management's tests to support its conclusion about the design and operating effectiveness of those controls

Documentation of Internal Control Policies and Procedures

.70 The adequate documentation of internal control is important for the following reasons.

- *To improve reliability of internal control.* The documentation of an entity's internal control policies and procedures improves the effectiveness and reliability of the system. Without adequate documentation, the performance of the system depends exclusively on the skills and competence of the individual responsible for performing the procedure. As such, performance can vary greatly between individuals or over time. Adequate documentation reduces this variability by facilitating the consistent dissemination of critical information. Additionally, by clearly stating the parameters within which control procedures should be performed, it becomes easier to identify deviations from the policy or procedure—that is, material weaknesses can be identified.
- *To enable effective monitoring.* Management is required to report material changes in internal control on a quarterly basis. As a result, one of the most important features of the monitoring component of

the entity's internal control system is its ability to identify changes. Documentation facilitates this monitoring element.

.71 In addition to enhancing the overall effectiveness of internal control, documentation of control policies and procedures also will facilitate management's assessment of effectiveness by providing a basis for:

- Evaluating design effectiveness
- Planning tests of operating effectiveness

.72 Management should be careful to distinguish between the documentation of internal control and internal control itself. Creating a document that describes the control policies and procedures that should be followed is *not* internal control. Internal control is the *process* used by the *people* to carry out those documented policies and procedures.

.73 The mere documentation of a control policy or procedure provides *no evidence* to support the operating effectiveness of the control. To support a conclusion about effectiveness, management needs to gather evidence by performing tests of controls.

Assessing the Adequacy of Existing Documentation

.74 Many entities currently are involved in projects to assess the adequacy of their existing documentation of internal control. In assessing the adequacy of documentation, management should determine whether:

- *All significant controls objectives have been considered.* As described previously, some control objectives, policies, and procedures are more significant to the entity's overall internal control structure than others. When considering the adequacy of an entity's documentation of internal control, individual policies and procedures should be documented for all significant control objectives. If control policies have not been documented for certain significant control objectives, management must determine whether:
  - — Controls do not exist to achieve the stated control objective, in which case the entity must design, implement, and document new control procedures, or
  - — Controls exist to achieve the control objective; however, they are informal, communicated verbally, or otherwise not documented. In this case, suitable documentation must be developed to facilitate an evaluation of the effectiveness of the design of the control.
- *Documentation is sufficient.* To be sufficient, the documentation should allow management and the external auditor to:
  - — Determine whether the policy or procedure is adequately designed
  - — Design and perform procedures to test the operating effectiveness of the controls

Documenting the Control Environment

.75 The documentation of the entity's control environment should encompass all the control environment elements described in COSO and summarized in "The Importance of the Control Environment" in the "Key Characteristics of the COSO Framework" section of this Alert. Those elements usually are described in documents such as:

- Board of directors' charter
- Audit committee documents and charter
- Company code of conduct

- Disclosure committee[3] charter
- Human resource policies and personnel handbook

Documentation can also encompass the elements essential in management's antifraud programs and controls.

Documenting Activity Level Control Policies and Procedures

.76 The documentation of controls related to transaction processing streams should contain the following elements.

- A link between the control objective and the control policy or procedure
- A description of the control policy or procedure that achieves the control objective
- A description of:
  - — How the control procedure is to be applied
  - — Who is responsible for performing the procedure
  - — How frequently the procedure is performed

.77 There are no requirements for the form of the documentation. There are many different acceptable ways to document control policies and procedures, including narratives, "walk through" descriptions of key documents, and flowcharts. Computerized documentation tools may be used to facilitate this process.

Documentation of Tests of Controls

.78 The entity should document the tests performed and evidence obtained to evaluate both the design and operating effectiveness of internal control. This documentation serves two purposes.

- It provides the CEO and CFO with the information needed to make and support their assessment of the effectiveness of internal control.
- It may be used, at least in part, by the external auditors to reach their conclusion about management's assertion.[4]

.79 No definitive guidance on the form or content of the entity's documentation of its tests of controls currently exists. However, one might expect such guidance to address matters such as the following:

- The objective of the tests performed
- A description of the test performance, including:
  - — The scope of the procedures, for example, the number of transactions tested or business segments reviewed
  - — When the tests were performed or the period covered by the tests
  - — Who performed the tests

---

[3] As described in the section of this Alert titled "The SEC Rules," management is required to report on the effectiveness of the entity's disclosure controls and procedures on a quarterly basis. The SEC has recommended that entities form a disclosure committee to comply with this requirement.

[4] The degree to which the external auditors may rely on tests performed by the entity to evaluate the effectiveness of internal control is a matter that is addressed in Public Company Accounting Oversight Board Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Conducted in Conjunction With an Audit of Financial Statements*, as discussed in the section of this Alert titled "External Auditor Standards."

- The results of the tests
- The conclusion reached as a result of the tests performed

Automated Documentation Tools

.80 Since the passage of the Sarbanes-Oxley Act, many companies have developed computer software products that aid in complying with the internal control provisions of the Act. These software tools typically center on helping companies automate the documentation of internal control policies and procedures, although some products perform additional functions such as automating the testing and reporting on internal controls, business process activities (for example, the approval and payment of vendor invoices), or both.

.81 The first function of an automated tool typically is to serve as a repository for all the documentation relating to the design of internal control. In those instances where the documentation of the control or the control itself either does not exist or otherwise is deficient, the software may allow the company to efficiently (*a*) document existing policies or (*b*) design and document new ones.

Documentation Process

.82 Automated internal control documentation tools typically use a combination of the following methods for creating and accumulating internal control documentation.

- *Reference existing documentation.* In many instances, the documentation of a policy or procedure already exists, for example, human resource policies or personnel manuals. When that is the case, the automated tool will allow this existing documentation to be accessed and reviewed by the user. To allow for this sharing of existing information, the automated tool may have to:
  - — Interface with existing systems
  - — Import existing data
- *Menu-driven responses.* To create documentation for a new or existing control procedure, the automated tool may provide users with choices from a pull-down menu. For example, to describe a control objective, the user may be presented with a choice of "ensure proper authorization of transactions," "verify accuracy," "ensure the capture of all valid transactions," and so on.
- *Free responses.* Instead of choosing from a predetermined list of possibilities, users may enter their own response into a text box.

.83 Regardless of the method used to document new or existing controls, the goal remains the same—to accurately describe the entity's control policies and procedures as they currently exist. Whether that goal is achieved depends primarily on the user's qualifications, knowledge, and training. To effectively document the entity's control policies and procedures, the user should have an in-depth understanding of all of the following:

- The entity's operations and existing control policies and procedures
- Internal control concepts, as described in the COSO framework (or other framework, if the entity does not use COSO)
- The financial reporting process
- The assertions that are represented in the financial statements[5]

[5] Financial statement assertions are described in the auditing literature as the assertions that are embodied in an entity's financial statements. For example, implicit in the financial statements is the assertion that the statements present *all* transactions and that only bona fide, authorized transactions are included. The five financial statement assertions are completeness, existence or occurrence, valuation, rights or ownership, and presentation and disclosure. A working knowledge of these assertions will help users understand risks and related controls. For example, there is a risk that the entity will fail to capture and process all valid transactions (completeness assertion). Therefore, a control objective of the entity's system should be to ensure completeness.

Maintaining Information Integrity

.84 To be effective, management must be able to rely on the accuracy of the documentation maintained. To achieve this integrity, the automated tool should have the following features:

- *Logical access controls.* The ability to modify documentation should be tightly controlled in the same way that access to all of an entity's sensitive information and computer applications is controlled. Individual users should be granted access privileges only to those areas of documentation that pertain to their assigned responsibilities. These access privileges should be administered carefully.
- *Standardized updating procedures.* As with any database, changes to data—in this case, the documentation of internal control—should be monitored and controlled. Modifications to the documentation should be done in an orderly fashion that ensures that all required changes are made. Once the changes have been made, they should be reviewed.

Monitoring Documentation Changes

.85 Once the documentation warehouse becomes established as an accurate reflection of internal control, and standardized updating procedures are in place, any changes to the documentation should represent actual changes to internal control. Management is required to report material changes in internal control. Identifying and capturing changes to the internal control documentation will enable this requirement to be met.

.86 The automated documentation tool should have a means for identifying changes since the last reporting date. To help reviewers evaluate their significance, these changes should be able to be grouped in a variety of ways, including business process, control objective, and financial statement account grouping.

Testing of Internal Control

.87 Management's tests of internal control should be:

- *Complete.* If the COSO criteria are used to measure internal control effectiveness, all five components of internal control, including the control environment, should be tested.
- *Sufficient.* The scope and extent of the tests should be sufficient for management to draw a reliable conclusion about the overall effectiveness of internal control taken as a whole.
- *Timely.* The timing of the tests, or the time period covered by the tests, should allow management to draw a reliable conclusion about the effectiveness of controls as of the reporting date, that is, fiscal year end.

.88 Additionally, the entity should address both the design and the operating effectiveness of the control.

- *Design effectiveness.* A control policy or procedure should be designed in a way that material misstatements to the financial statements will be prevented or detected in a timely manner.
- *Operating effectiveness.* Tests to evaluate operating effectiveness should allow management to evaluate how the control procedure was applied, the consistency with which it was applied, and by whom it was applied.

.89 To be effective, the tests should have:

- Clearly stated objectives
- A design that is appropriate to achieve those objectives

- A scope and extent that is comprehensive enough to draw a reliable conclusion

Testing the Control Environment

.90 The control environment has a significant influence on the operating effectiveness of the other components of the COSO integrated framework. The control environment is different from the other components in that it:

- Has an *indirect* effect on the amounts and disclosures reported in the financial statement, and
- Is *not* transaction-oriented. As such, it does not lend itself to transaction-oriented testing.

.91 Testing the operating effectiveness of the control environment may pose a challenge for management. Documenting the control policies that make up the control environment is not sufficient to draw a conclusion about operating effectiveness. For example, the mere existence of a company code of conduct and its dissemination are not sufficient to allow management to conclude on the effectiveness of the related elements of the entity's control environment. Following the guidance provided here, tests must be performed to allow management to determine:

- How management, the board of directors, the audit committee, and the company employees applied the policies described in the code of conduct to their work
- The consistency with which individuals followed the guidelines contained in the code
- Who followed the code and who did not

.92 In general, two approaches have begun to emerge for testing the control environment.

1. *Indirect.* Under this approach, management focuses its primary testing on activity-level controls. The results of those tests are evaluated carefully, and any deficiencies are investigated thoroughly to understand their root causes. Based on the information gained from these tests of activity-level controls, management is able to infer the relative effectiveness of the control environment.
2. *Direct.* Under this approach, management plans and performs tests to gather evidence directly about the operating effectiveness of the control environment. Such tests might include employee surveys, interviews with selected individuals, and the performance of a computer general controls review. Management uses the results of these tests of the control environment to design the activity-level tests.

.93 The definitive guidance on internal control reporting does not express a preference for either approach. In the opinion of the author, directly testing the control environment will lead to more reliable conclusions about its operating effectiveness. Designing and performing these types of tests may be outside the realm of tests normally performed by audit or financial professionals; however, credentialed specialists in organizational development and other disciplines have developed tools and methodologies in this area that may be appropriate for management wishing to gain a direct understanding of an entity's control environment effectiveness.

Testing Activity-Level Controls

Assessing the Effectiveness of Design

.94 Activity-level controls are effective when they can provide reasonable assurance that material financial statement errors will be prevented or detected in a timely fashion. To assess design effectiveness, management should consider:

- The general types of errors that could occur
- The points in the processing stream where errors may be introduced

.95 After gaining an understanding of what could go wrong and where, management will then determine whether the system, as designed, adequately addresses these potential errors and error points.

Assessing Operating Effectiveness

.96 ***Nature.*** Management will need to decide about the kinds of tests it will perform. For example, will the entity conduct inquiries, observe controls being performed, or reperform certain control procedures? The nature of the tests performed depends on the kind of control procedure being tested and whether its performance is documented.

.97 Typically, management will perform a combination of one or more controls to gather evidence about their effective operations. It would be unlikely that one test will provide all the evidence needed to support a conclusion. An opinion about control effectiveness most likely will be formed by the congruence and consistency of the evidence gathered from several sources and kinds of tests.

.98 Typical tests that management may choose from include:

- Tests of transactions
- Reperformance of control procedures
- Tests of computer application controls
- Inquiries
- Direct observation

.99 ***Timing.*** The Sarbanes-Oxley Act requires management to report on the effectiveness of internal control as of a point in time, namely, year end. As a practical matter, many tests will be performed in advance of the reporting date. In those situations, management will need to consider the need to perform additional tests to establish the effectiveness of the control procedure from the time the tests were performed until the reporting date. For example, if the entity tests the effectiveness of bank reconciliations as of June 30 and the reporting date is December 31, management will need to consider performing tests to cover the period from July 1 through December 31. These tests may *not* require a repeat of the detailed tests performed at June 30 for the subsequent six-month period. Once management establishes the effectiveness of the control procedure at June 30, it may be able to support the effectiveness of the control at the reporting date indirectly through the consideration of entity-level controls and other procedures such as:

- The effectiveness of personnel-related controls such as the training and supervision of personnel who perform control procedures.
- The effectiveness of risk identification and management controls, including change management.
- The effectiveness of the monitoring component of the entity's internal control.
- Inquiries of personnel to determine what changes, if any, occurred during the period that would affect the performance of controls.
- Repeating the procedures performed earlier in the year, focusing primarily on elements of the control procedure that have changed during the period.

Reporting

.100 The section of this Alert titled "The SEC Rules" describes what management's report on internal control must contain. However, the SEC has not mandated a prescribed form for management's report. Of the items required to be included in management's report, the one that calls for the most judgment is the following:

> Management's assessment of the effectiveness of the company's internal control over financial reporting as of the end of the most recent fiscal year, including a statement as to whether or not internal control over financial reporting is effective. This discussion must include disclosure of any material weakness in the company's internal control over financial reporting identified by management. Management is not permitted to conclude that the registrant's internal control over financial reporting is effective if there are one or more material weaknesses in the company's internal control over financial reporting.

.101 In its commentary to the final rules, the SEC requires management to state whether internal control is functioning effectively or not. "Negative assurance"—in which management states that "nothing came to its attention that would lead it to believe that internal control was not functioning effectively"—is not acceptable.

Material Weaknesses and Significant Deficiencies

.102 Management is required to disclose any "material weakness" in the company's internal control. Further, the existence of one or more material weaknesses precludes management from concluding that its internal control is effective.

.103 The SEC has stated that the meaning of the terms *material weaknesses* and *significant deficiencies* should be determined by reference to the auditing literature. Paragraphs 9 and 10 of the auditing standard provide the following definitions:

> 9. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the company's ability to initiate, authorize, record, process, or report external financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the company's annual or interim financial statements that is more than inconsequential will not be prevented or detected.
>
> Note: The term "remote likelihood" as used in the definitions of *significant deficiency* and *material weakness* (paragraph 10) has the same meaning as the term "remote" as used in Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies* ("FAS No. 5"). Paragraph 3 of FAS No. 5 states:
>
> > When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms probable, reasonably possible, and remote to identify three areas within that range, as follows:
> >
> > *a.* *Probable.* The future event or events are likely to occur.
> >
> > *b.* *Reasonably possible.* The chance of the future event or events occurring is more than remote but less than likely.
> >
> > *c.* *Remote.* The chance of the future events or events occurring is slight. Therefore, the likelihood of an event is "more than reasonably possible or probable."
>
> Note: A misstatement is inconsequential if a reasonable person would conclude, after considering the possibility of further undetected misstatements, that the misstatement, either individually or when aggregated with other misstatements, would clearly be immaterial to the financial statements. If a reasonable person could not reach such a conclusion regarding a particular misstatement, that misstatement is more than inconsequential.
>
> 10. A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected.

Note: In evaluating whether a control deficiency exists and whether control deficiencies, either individually or in combination with other control deficiencies, are significant deficiencies or material weaknesses, the auditor should consider the definitions in paragraphs 8, 9 and 10 [*of the auditing standard*], and the directions in paragraphs 130 through 137 [*of the auditing standard*]. As explained in paragraph 23 [*of the auditing standard*], the evaluation of the materiality of the control deficiency should include both quantitative and qualitative considerations. Qualitative factors that might be important in this evaluation include the nature of the financial statement accounts and assertions involved and the reasonably possible future consequences of the deficiency. Furthermore, in determining whether a control deficiency or combination of deficiencies is a significant deficiency or a material weakness, the auditor should evaluate the effect of compensating controls and whether such compensating controls are effective.

Making Judgments About the Severity of Internal Control Deficiencies

.104 Determining whether an internal control deficiency rises to the level of a material weakness will require management to consider:

- *Likelihood*, that is, the chance that the deficiency could result in a financial statement misstatement. When assessing likelihood, consider:
  - The relative importance of the control and whether the overall control objective is achieved by other control activities or a combination of control activities.
  - If the deficiency is an operating deficiency, the frequency of the operating failure rate. For example, numerous or repeated failures in the operation of a control would be more likely to be considered a significant deficiency than failures that are considered isolated occurrences.
  - Whether the control is automated and therefore could be expected to perform consistently over time.
- *Significance*, that is, the magnitude of potential misstatements resulting from the deficiency. When assessing significance, consider:
  - The nature of the account balance or classes of transactions affected by the deficiency and the financial statement assertions involved.
  - Whether the deficiency relates to an entity-level or activity-level control. Because entity-level controls can affect many account balances, classes of transactions, or financial statement assertions, weaknesses in entity-level controls that seem relatively insignificant by themselves could result in material financial statement misstatements.

Disclosures About Material Weaknesses

.105 When a company identifies a material weakness, and such material weakness has not been remediated before its fiscal year end, it must conclude that its internal control over financial reporting is ineffective. The SEC staff believes that in such a case, companies should consider including the following in their disclosures:

- The nature of any material weakness
- Its impact on financial reporting and the control environment
- Management's current plans, if any, for remediating the weakness

Annual Reporting of Material Weaknesses That Have Been Corrected

.106 Management is required to report on the effectiveness of internal control over financial reporting as of year end. In some cases, management may have identified and corrected a material weakness in internal control during an interim period. At issue is whether that corrected weakness is required to be reported in the entity's annual report on internal control.

.107 To make that determination, management should consider whether the corrected deficiency has been operational for a period of time that is sufficient to draw a reliable conclusion about its operating effectiveness as of year end. Testing the corrected deficiency for design and operational effectiveness would be required to support management's conclusion. Before making its final decision regarding the reporting of a corrected deficiency, management should consult with its SEC legal counsel and the external auditors.

.108 In addition, in July 2005, the PCAOB adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*; this standard established a stand-alone engagement that is completely voluntary, performed at the company's request. Although the auditor's evaluation of the design and operating effectiveness of the identified controls generally follows the requirements of PCAOB Auditing Standard No. 2, this engagement is designed to be significantly narrower in scope because the auditor's testing is limited to the controls specifically identified by management as addressing the material weakness. Also, unlike an auditor's report on internal control over financial reporting, in which the assessment is required to be as of the date of the annual financial statements, an auditor's report on whether a material weakness continues to exist may be as of any date set by management. The PCAOB believes that in deciding whether to engage their auditors to report on whether a material weakness continues to exist, most companies will do so only when the benefits, such as renewed investor confidence, would outweigh the costs of such an audit. Auditing Standard No. 4 will become effective when ratified by the SEC.

Resource Central

On the Bookshelf

.109 The following publications deliver valuable guidance and practical assistance related to internal control.

- *Internal Control—Integrated Framework* (product no. 990012kk), a paperbound version of the COSO report that established a common definition of internal control different parties can use to assess and improve their control systems. It also includes information on how to prepare external reports and five tools for evaluating each of the components identified in the framework.
- *Financial Reporting Fraud: A Practical Guide to Detection and Internal Control* (product no. 029879kk), a paperbound publication for CPAs in both public practice and industry. It uses case studies to provide information necessary to minimize fraud exposure for CPAs, employers, and clients.
- *Audit Committee Toolkit* (product no. 991001kk), a practice aid that brings you checklists, matrixes, questionnaires, and other materials that are designed to help the audit committee do the job it needs to do.

AICPA's reSOURCE Online Accounting and Auditing Literature

.110 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential service, go to www.cpa2biz.com.

reSOURCE CD-ROM

.111 The AICPA is currently offering a CD-ROM product entitled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to AICPA Professional Literature products in a Windows format, namely, *Professional Standards*, *Technical Practice Aids*, and Audit and Accounting Guides (available for purchase as a set or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Educational Courses and Training

.112 The AICPA offers the following continuing professional education (CPE) courses related to internal control:

- *Internal Control Reporting for Public Companies*, a self-study course on CD (product no. 737132kk).
- *Internal Control and Design*, a CPE course, and *Internal Controls: Design and Documentation*, a CPE self-study course (product no. 731850kk), that provide information on regulatory requirements and techniques for meeting them. These courses explain why internal controls matter to management, auditors, and regulators; what makes up a good system; how internal controls can be both cost- effective and efficient; and how to create usable, affordable documentation.
- *Internal Control Reporting: Standards for Compliance*, a video CPE course.
- *Internal Control Reporting for Public Companies*, a July 17, 2003, Webcast that described what the SEC's final rules require of companies and who is affected. Available on CD-ROM (product no. 737132kk).

Online CPE

.113 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee will offer unlimited access to over 1,000 credits of online CPE in one- and two-hour segments. Register today at www.cpa2biz.com.

AICPA's Antifraud & Corporate Responsibility Resource Center

.114 The AICPA's Antifraud & Corporate Responsibility Resource Center (www.aicpa.org/antifraud/) allows you to select optional ways to learn about fraud. The Center spotlights the new Web-based fraud and ethics case studies and commentaries recently issued; the AICPA antifraud Webcast series; the interactive CPA course *Fraud and the CPA*, and a competency model that allows you to assess your overall skills and proficiencies as they relate to fraud prevention, detection, and investigation, among other topics. In addition, the site offers press releases and newsworthy items on other AICPA courses related to prevention and detection and an overview of the AICPA Antifraud & Corporate Responsibility Program.

AICPA Audit Committee Effectiveness Center

.115 Located at www.aicpa.org/audcommctr/homepage.htm, the AICPA Audit Committee Effectiveness Center presents the guidance and tools necessary to make audit committee best practices actionable. Available at the center is the AICPA Audit Committee Toolkit, the Audit Committee Matching System, Audit Committee e-Alerts, and other guidance and resources.

AICPA/CPA2Biz Service Center

.116 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA/CPA2Biz Service Center at (888) 777-7077. The best times to call are 8:30 a.m. to 11:30 a.m. and 2:00 p.m. to 7:30 p.m., Eastern Standard Time. You can also order AICPA products from the Service Center by fax at (800) 362-5066 or visit www.cpa2biz.com to obtain product information and place online orders.

Hotlines

Accounting and Auditing Technical Hotline

.117 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.118 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

Sarbanes-Oxley Act/PCAOB Implementation Central

.119 Visit Sarbanes-Oxley Act/PCAOB Implementation Central at www.aicpa.org/Sarbanes/index.asp. This AICPA Web site provides extensive, up-to-date compliance information for CPAs.

AICPA Online and CPA2Biz

.120 AICPA Online (www.aicpa.org) offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit and Accounting Guides, *Professional Standards*, CPE courses, Practice Aids, and Audit Risk Alerts.

Appendix

Frequently Asked Questions (From the U.S. Securities and Exchange Commission)

November 8, 2002 (Revised November 14, 2002)

The answers to these frequently asked questions represent the views of the Division of Corporation Finance. They are not rules, regulations nor statements of the Securities and Exchange Commission. Further, the Commission has neither approved nor disapproved them.

Q1: Section 2(a)(7) of the Sarbanes-Oxley Act of 2002 (the "Act") defines an "issuer" as an "issuer (as defined in Section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78(c)), the securities of which are registered under Section 12 of that Act (15 U.S.C. 78l), or that is required to file reports under Section 15(d)…." A company has offered and sold debt securities pursuant to a registration statement filed under the Securities Act of 1933, thus subjecting it to the reporting requirements of Section 15(d). The company did not register the debt securities under Section 12 of the Exchange Act of 1934. Subsequently, the company's reporting obligations have been statutorily suspended under Section 15(d) because it had fewer than 300 security holders of record at the beginning of its fiscal year. The company has not filed a Form 15 and has continued to file reports pursuant to its indenture. Is the company considered an "issuer" under the Act?

A1: No. Because the issuer had fewer than 300 security holders of record at the beginning of its fiscal year, the suspension is granted by statute and is not contingent on filing a Form 15. The definition of issuer applies only to issuers required to file reports. However, see Question 9 regarding these kinds of filers under Section 302 of the Act.

Q2: Will the rules relating to Section 301 apply to issuers whose securities are traded on the over-the-counter bulletin board market?

A2: No. Securities traded on the over-the-counter bulletin board market currently are not considered listed securities.

Q3: An issuer is filing a Form 10-K report after August 29, 2002, the date Rules 13a-14, 13a-15, 15d-14 and 15d-15 became effective, for a period ending prior to the effective date. Section V of Release No. 33-8124 provides that the certification required to be included with the report need contain only the statements set forth in paragraphs (b)(1), (2) and (3) of Exchange Act Rules 13a-14 and 15d-14. However, the instructions to Forms 10-Q, 10-QSB, 10-K, 10-KSB, 20-F and 40-F indicate that the required certification must be in the exact form set forth in the report. Must a certification filed during the transition period for a period ended before August 29th include the statements set forth in paragraphs (b)(4), (5) and (6) of Rules 13a-14 and 15d-14?

A3: No. Paragraphs (b)(4), (5) and (6) of Rules 13a-14 and 15d-14 need only be included for quarterly and annual reports, including transition reports, filed for periods ending after August 29, 2002.

Q4: Does an amended quarterly or annual report filed after August 29, 2002, the effective date of Rules 13a-14 and 15d-14, that amends a report filed prior to August 29, 2002 have to be certified?

A4: Yes. See note 48 of Release 33-8124. The certification need not include paragraphs (b)(4), (5) and (6) of Rules 13a-14 and 15d-14.

Q5: A company is filing a Form 10-Q/A for a period ending prior to the effective date of Rules 13a-14 and 15d-14. The amendment will neither contain nor amend financial statements. May the principal executive officer and principal financial officer omit paragraph 3 from the certifications?

A5: Yes. Since there will be no financial statements in the Form 10-Q/A, paragraph 3 may be omitted.

Q6: If an issuer has filed a Form 10-Q before the effective date of Rules 13a-14 and 15d-14, but needs to file an amended Form 10-Q after August 29, does the issuer need to provide the disclosure required by Item 307 of Regulation S-K?

A6: No.

Q7: Does the new Item 15 of Form 20-F apply to periods ending prior to August 29, 2002?

A7: Issuers must comply with Item 15(b) but not Item 15(a).

Q8: Does Section 302 apply to Forms 8-K filed by asset-backed issuers?

A8: No. Asset-Backed Issuers, as defined in Rules 13a-14(g) and 15d-14(g), do not need to file a certification with each Form 8-K. However, the certification that is filed with the Asset-Backed Issuer's Form 10-K will relate to certain Forms 8-K filed by the issuer in the preceding year. Please refer to Statement by the Staff of the Division of Corporation Finance of the Securities and Exchange Commission Regarding Compliance by Asset-Backed Issuers with Exchange Act Rules 13a-14 and 15d-14, dated August 27, 2002.

Q9: Is an issuer that is filing or submitting reports exclusively under Section 15(d) of the Exchange Act on a "voluntary" basis (for example, pursuant to a covenant in an indenture or similar document), due to a statutory suspension of the Section 15(d) filing obligation, subject to Rules 15d-14 and 15d-15 and the disclosure required by Item 307 of Regulations S-B and S-K?

A9: Yes. All companies filing or submitting reports under Section 13(a) or 15(d) must comply with those provisions whether or not a Form 15 has been filed pursuant to Rule 15d-6.

Q10: If only one other officer is certifying to the issuer's reports, is it permissible to revise paragraph 4 of the certification to make "other certifying officers" singular?

A10: Yes.

Q11: If an officer signs the certification without altering the wording to indicate he or she is providing the certification as principal financial officer, how will readers know whether the signatory is the principal executive officer or the principal financial officer?

A11: The officer should include his or her title under the signature.

Q12: If the same individual is both the principal executive officer and principal financial officer, must he or she sign two certifications?

A12: The individual may provide one certification and provide both titles underneath the signature.

Q13: A CEO resigned after the end of the quarter but before the filing of the upcoming Form 10-Q. The company appointed a new CEO prior to the filing. Who signs the certification?

A13: The new CEO because he or she is the principal executive officer at the time of the filing.

Q14: A company has a CEO who is resigning at the end of the year and is no longer performing the function of CEO although he is still employed with the company. In the interim, the company has another individual that is performing the functions of CEO. Can that other individual sign the certification despite the fact that the company still has another person with the CEO title?

A14: The person performing the function of CEO at the time of the filing should provide the certification. If it is not the person with the title of CEO, the company should disclose in the filing that the other individual is performing that function.

Q15: An issuer currently does not have a CEO/CFO. Who must execute the certifications required by Rules 13a-14 and 15d-14?

A15: As set forth in paragraph (a) of Rules 13a-14 and 15d-14, where an issuer does not have a CEO/CFO, the person or persons performing similar functions must execute the required certification.

Q16: Must co-principal executive officers (or co-principal financial officers) execute separate certifications or may both execute the same certification?

A16: Co-principal executive officers (or co-principal financial officers) should each execute separate certifications.

Q17: If Section 302 certifications are not included in, for example, a Form 10-K or 10-Q filing, and an amendment will be filed to include the certifications, must the entire document be re-filed or can the amendment include only the signature pages?

A17: Because the certification relates to the entire Form 10-K or 10-Q filing, the amendment should include the entire filing, not just the signature pages.

Q18: Using the same facts in Question 17 above, if the amendment is not filed within the time period required for the periodic report, is the report deemed to be untimely?

A18: Yes. The periodic report will not be deemed timely for purposes of form eligibility and the issuer will not be deemed current until the amended periodic report containing the certification is filed.

Q19: A Canadian issuer is filing a Form F-10. Are certifications required because the Form F-10 incorporates prior Exchange Act filings?

A19: No.

Q20: What definition is the Commission currently using for internal controls and internal controls and procedures for financial reporting?

A20: In the release adopting the rules pursuant to Section 302 of the Act, the Commission noted the pre-existing concept of "internal controls" contained in Codification of Statements on Auditing Standards Section 319 ("AU Section 319"). See Release 33-8124 fn. 59 and accompanying text. In Release No. 33-8138, the Commission proposed defining "internal controls and procedures for financial reporting" by reference to AU Section 319, subject to any future modifications by the Public Company Accounting Oversight Board. Pending completion of rulemaking, the staff interprets both "internal controls and procedures for financial reporting" and "internal controls" for purposes of Exchange Act Rules 13a-14(b)(5) and (6) and 15d-14(b)(5) and (6) and Item 307 of Regulations S-B and S-K by reference to existing literature regarding generally accepted auditing standards, which would also be by reference to AU Section 319.

Q21: Are paragraphs (b)(5) and (b)(6) of Rules 13a-14 and 15d-14 currently operative given that there is no current requirement for evaluation of internal controls?

A21: Yes, these paragraphs are currently operative as to any filing relating to a period ending after August 29, 2002. See also Question 22.

Q22: New Exchange Act Rules 13a-14(b)(5) and (6) and 15d-14(b)(5) and (6) require an issuer's CEO and CFO to certify that:

> He or she and the other certifying officers have disclosed, based on their most recent evaluation, to the issuer's auditors and the audit committee of the board of directors (or persons fulfilling the equivalent function):
>
> - All significant deficiencies in the design or operation of internal controls which could adversely affect the issuer's ability to record, process, summarize and report financial data and have identified for the issuer's auditors any material weaknesses in internal controls; and
> - Any fraud, whether or not material, that involves management or other employees who have a significant role in the issuer's internal controls; and
> - He or she and the other certifying officers have indicated in the report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of their most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

In addition, paragraph (b) of Item 307 of Regulations S-B and S-K requires an issuer to disclose whether or not there were significant changes in the issuer's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses. Is a quarterly evaluation of internal controls or internal controls and procedures for financial reporting required at this time, and if so, what are the particular standards? How should the issuer respond to Item 307(b) of Regulations S-B and S-K? How should the issuer's CEO and CFO address this situation in their certification statements?

A22: Although proposed amendments to Exchange Act Rules 13a-15 and 15d-15 would impose a requirement on an issuer's management to conduct an evaluation, with the participation of the issuer's CEO and CFO, of the effectiveness of the issuer's internal controls and procedures for financial reporting (See Release No. 33-8138), the Commission's rules currently do not specifically require an issuer's CEO or CFO, or the issuer itself, to conduct periodic evaluations of the issuer's internal controls or the issuer's internal controls and procedures for financial reporting. Some elements of internal controls are included in the definition of disclosure controls and procedures. There is a current evaluation requirement involving the CEO and the CFO of that portion of internal controls that is included within disclosure controls and procedures as part of the required evaluation of disclosure controls and procedures. We expect that issuers generally also would engage in an evaluation of internal controls. We believe that issuers generally currently evaluate internal controls, for example, in connection with reviewing compliance with Section 13(b) of the Exchange Act or in connection with the preparation or audit of financial statements.

In the case of Item 307(b) of Regulations S-K and S-B, to the extent that an issuer has conducted an evaluation of its internal controls as of the end of the period covered by the report, including under the circumstances described in the preceding paragraph, the issuer should disclose any significant changes to the internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses. If the issuer has made any significant changes to internal controls or in other factors that could significantly affect these controls, such changes would presumably follow some evaluation, in which case the required disclosure must be made. If the issuer has made no significant changes, then no disclosure is required. This response is also applicable to Item 15(b) of Form 20-F and Item 6(c) of Form 40-F.

Regarding the certifications under Exchange Act Rules 13a-14(b)(5) and (6) and 15d-14(b)(5) and (6), the disclosures under Item 307 of Regulations S-B and S-K described above following any evaluations of internal controls, including in the circumstances described above in which the CEO or the CFO participates, would satisfy the requirements of paragraph (6). Paragraph (5) would currently require that disclosure be made by the CEO and the CFO to the issuer's auditors and the audit committee of its board of directors of any events enumerated in paragraph (5) that have occurred of which the CEO or CFO become aware based on the most recent evaluation of internal controls, including in the circumstances described above, in which the CEO or CFO participates.

Q23: For purposes of Rules 13a-14(b)(5) and (6) and 15d-14(b)(5) and (6), what do the terms "significant deficiencies" and "material weaknesses" mean?

A23: For purposes of Rules 13a-14(b)(5) and (6) and 15d-14(b)(5) and (6), the meaning of the terms "significant deficiencies" and "material weaknesses" should be determined by reference to generally accepted auditing standards. See generally, AU Section 325.

Q24: Where the registrant is a limited partnership that does not have an audit committee, who should be considered the persons performing the equivalent function as referenced in new Exchange Act Rules 13a-14(b)(5) and 15d-14(b)(5)?

A24: Many limited partnerships do not have audit committees. Many general partners of limited partnerships are themselves limited partnerships. In this case, look through each general partner of the limited partnerships acting as general partner until a corporate general partner or an individual general partner is reached. With respect to a corporate general partner, the registrant should look to the audit committee of the corporate general partner or to the full board of directors as fulfilling the role of the audit committee. With respect to an individual general partner, the registrant should look to the individual as fulfilling the role of the audit committee.

Q25: If a company otherwise maintains a dividend reinvestment plan that satisfies the exemptive conditions of Rule 16a-11, are automatic dividend reinvestments under a non-qualified deferred compensation plan also eligible for the Rule 16a-11 exemption, so that those reinvestment transactions would not be required to be reported, thus reducing the number of Forms 4 due?

A25: Non-qualified deferred compensation plans are not Excess Benefit Plans, as defined by Rule 16b-3(b)(2) under the Exchange Act, in which transactions are exempted by Rule 16b-3(c). See Interpretive Letter to American Bar Association (Feb. 10, 1999, Q. 2(c)). Under Rule 16a-3(g)(1), as amended in Release 34-46421 (Aug. 27, 2002), each transaction in a non-qualified deferred compensation plan must be reported on a Form 4 not later than the end of the second business day following the day on which the transaction was executed. However, if a company maintains a dividend reinvestment plan that satisfies the exemptive conditions of Rule 16a-11, automatic dividend reinvestments under a non-qualified deferred compensation plan are also eligible for the Rule 16a-11 exemption. See Interpretive letter to American Home Products (Dec. 15, 1992).

Q26: In order to reduce the number of Forms 4 due annually, an insider makes the following choices: In connection with the annual year-end election to defer some of the following year's salary into a non-qualified deferred compensation plan, the insider elects to have payroll deductions invested in the plan's interest-only account. The insider also elects for the deferred salary so invested to be "swept" on a quarterly basis into the plan's stock fund account. How should these "sweep" transactions be reported?

A26: Each "sweep" transaction would be reportable separately on Form 4. If the "sweep" election satisfies the Rule 16b-3(f) exemptive conditions for Discretionary Transactions (as defined in Rule 16b-3(b)(1)), the "sweep" transactions would be reported using Code I. Further, if the reporting person does not select the date of execution for a "sweep" that is a Discretionary Transaction, Rules 16a-3(g)(3) and (4) would apply to determine the deemed execution date.

Q27: For purposes of satisfying the affirmative defense conditions of Rule 10b5-1(c), an insider adopts a written plan for the purchase or sale of issuer equity securities. In the plan, which was drafted by a broker-dealer, the broker-dealer specified the dates on which plan transactions will be executed. Can the insider rely on Rule 16a-3(g)(2) to compute the Form 4 due date for plan transactions based on a deemed execution date?

A27: No. By adopting a written plan that specifies the dates on which plan transactions will be executed, the insider will have selected the date of execution for plan transactions. Consequently, the insider will not be able to rely on Rule 16a-3(g)(2) to compute the Form 4 due date for plan transactions based on a deemed execution date.

Q28: When reporting more than one transaction on the same Form 4, what date should be stated in Box 4?

A28: The transaction date (not the deemed execution date) of the earliest transaction reported should be stated in Box 4.

(Revised October 6, 2004)[1]

The answers to these frequently asked questions represent the views of the staffs of the Office of the Chief Accountant and the Division of Corporation Finance. They are not rules, regulations or statements of the Securities and Exchange Commission. Further, the Commission has neither approved nor disapproved them.

Q1: Financial Accounting Standards Board (FASB) Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities—An interpretation of ARB No. 51*, requires that registrants apply that guidance and, if applicable, consolidate entities based on characteristics other than voting control no later than the period ending March 15, 2004, or December 15, 2004 for small business issuers. In instances where the registrant lacks the ability to dictate or modify the internal controls of an entity consolidated pursuant to Interpretation No. 46, it may not have legal or contractual rights or authority to assess the internal controls of the consolidated entity even though that entity's financial information is included in the registrant's financial statements. Similarly, for entities accounted for via proportionate consolidation in accordance with Emerging Issues Task Force Issue No. 00-1 (EITF 00-1), management may not have the ability to assess the internal controls. How should management's report on internal control over financial reporting address these situations?

A1: We would typically expect management's report on internal control over financial reporting to include controls at all consolidated entities, irrespective of the basis for consolidation. However, in a situation where the entity was in existence prior to December 15, 2003 and is consolidated by virtue of Interpretation No. 46 (i.e., would not have been consolidated in the absence of application of that guidance) and where the registrant does not have the right or authority to assess the internal controls of the consolidated entity and also lacks the ability, in practice, to make that assessment, we believe management's report on internal control over financial reporting should provide disclosure in the body of its Form 10-K or 10-KSB regarding such entities. For example, a registrant could refer readers to a discussion of the scope of management's report on internal control over financial reporting in a section of the annual report entitled "Scope of Management's Report on Internal Control Over Financial Reporting." The registrant should disclose in the body of the Form 10-K or 10-KSB that it has not evaluated the internal controls of the entity and should also note that the registrant's conclusion regarding the effectiveness of its internal control over financial reporting does not extend to the internal controls of the entity. The registrant should also disclose any key sub-totals, such as total and net assets, revenues and net income that result from consolidation of entities whose internal controls have not been assessed. The disclosure should note that the financial statements include the accounts of certain entities consolidated pursuant to FIN 46 or accounted for via proportionate consolidation in accordance with EITF 00-1 but that management has been unable to assess the effectiveness of internal control at those entities due to the fact that the registrant does not have the ability to dictate or modify the controls of the entities and does not have the ability, in practice, to assess those controls.

[1] On October 6, 2004, changes were made to clarify the answer to Question 3 (see footnote 2 and a cross reference added to Question 3 to reference the answer to Question 9), to describe a Type 2 SAS 70 report (see footnote 3) and to address new frequently asked questions (see Questions 19 through 23).

Q2: Is a registrant required to evaluate the internal control over financial reporting of an equity method investment?

A2: The accounts of an equity method investee are not consolidated on a line-by-line basis in the financial statements of the investor, and as such, controls over the recording of transactions into the investee's accounts are not part of the registrant's internal control structure. However, the registrant must have controls over the recording of amounts related to its investment that are recorded in the consolidated financial statements. Accordingly, a registrant would have to consider, among other things, the controls over: the selection of accounting methods for its investments, the recognition of equity method earnings and losses, its investment account balance, etc. For example, a registrant might require that, at least annually, its equity method investees provide audited financial statements as a control over the recognition of equity method earnings and losses. However, nothing precludes a registrant from evaluating the control over financial reporting of an equity method investment, and there may be circumstances where it is not only appropriate but also may be the most effective form of evaluation. For purposes of applying this guidance, we make no distinction between those equity method investments for which the registrant is required to file audited financial statements pursuant to Rule 3-09 of Regulation S-X and those where no such requirement is triggered.

Q3: If a registrant consummates a material purchase business[2] combination during its fiscal year, must the internal control over financial reporting of the acquired business be included in management's report on internal control over financial reporting for that fiscal year?

A3: As discussed above, we would typically expect management's report on internal control over financial reporting to include controls at all consolidated entities. However, we acknowledge that it might not always be possible to conduct an assessment of an acquired business's internal control over financial reporting in the period between the consummation date and the date of management's assessment. In such instances, we would not object to management referring in the report to a discussion in the registrant's Form 10-K or 10-KSB regarding the scope of the assessment and to such disclosure noting that management excluded the acquired business from management's report on internal control over financial reporting. If such a reference is made, however, management must identify the acquired business excluded and indicate the significance of the acquired business to the registrant's consolidated financial statements. Notwithstanding management's exclusion of an acquired business's internal controls from its annual assessment, a registrant must disclose any material change to its internal control over financial reporting due to the acquisition pursuant to Exchange Act Rule 13a-15(d) or 15d-15(d), whichever applies (also refer to the last two sentences in the answer to Question 9). In addition, the period in which management may omit an assessment of an acquired business's internal control over financial reporting from its assessment of the registrant's internal control may not extend beyond one year from the date of acquisition, nor may such assessment be omitted from more than one annual management report on internal control over financial reporting.

Q4: If management, the accountant, or both conclude in a report included in a timely filed Form 10-K or 10-KSB that the registrant's internal control over financial reporting is not effective, would the registrant still be considered timely and current for purposes of Rule 144 and Forms S-2, S-3, and S-8 eligibility?

A4: Yes, as long as the registrant's other reporting obligations are timely satisfied. As has previously been the case, the auditor's report on the audit of the financial statements must be unqualified.

Q5: May management qualify its conclusions by saying that the registrant's internal control over financial reporting are effective subject to certain qualifications or exceptions or express similar positions?

---

[2] The staff intends the term business to include those acquisitions that would constitute a business based upon the facts and circumstances as outlined in Article 11-01(d) of Regulation S-X. An acquisition may not meet the definition of a business in EITF 98-3, "Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business," and would not be accounted for under FASB Statement No. 141, *Business Combinations*, but nevertheless may be a business under the definition in Article 11 used for SEC reporting purposes. This guidance applies irrespective of whether the acquisition is significant under Rule 1-02(w) of Regulation S-X.

A5: No. Management may not state that the registrant's controls and procedures are effective except to the extent that certain problems have been identified or express similar qualified conclusions. Rather, management must take those problems into account when concluding whether the registrant's internal control over financial reporting is effective. Management may state that controls are ineffective for specific reasons. In addition, management may not conclude that the registrant's internal control over financial reporting is effective if a material weakness exists in the registrant's internal control over financial reporting.

Q6: If management's report on internal control over financial reporting does not identify a material weakness but the accountant's attestation report does, or vice versa, does this constitute a disagreement between the registrant and the auditor that must be reported pursuant to Item 304 of Regulation S-K or S-B?

A6: No, unless the situation results in a change in auditor that would require disclosure under Item 304 of Regulation S-K or S-B. However, such differences in identification of material weaknesses could trigger other disclosure obligations.

Q7: When should a registrant determine whether it is an accelerated filer for purposes of determining when it must comply with Items 308(a) and (b) of Regulations S-K and S-B?

A7: As provided in Exchange Act Rule 12b-2, a registrant that is not already subject to accelerated filing should determine whether it is an accelerated filer at the end of its fiscal year, based on the market value of its public float of its common equity as of the last business day of its most recently completed second fiscal quarter. Consideration should also be given to the other components of the Rule 12b-2 definition (i.e. the registrant has been subject to Exchange Act reporting for at least 12 months, has filed at least one annual report, and is not eligible to use Forms 10-KSB and 10-QSB).

Q8: Is a registrant required to provide management's report on internal control over financial reporting, and the related auditor attestation report, when filing a transition report on Form 10-K or 10-KSB?

A8: Yes. Because transition reports filed on Forms 10-K or 10-KSB (whether by rule or by election) must contain audited financial statements, they must also include management's report on internal control, subject to the transition provisions specified in Release No. 34-47986. The transition provisions relating to management's report on internal control should be applied to the *transition period as if it were a fiscal year*. Transition reports on Form 10-Q or 10-QSB are not required to include a management report on internal control.

Q9: Is a registrant required to disclose changes or improvements to controls made as a result of preparing for the registrant's first management report on internal control over financial reporting?

A9: Generally we expect a registrant to make periodic improvements to internal controls and would welcome disclosure of all material changes to controls, whether or not made in advance of the compliance date of the rules under Section 404 of the Sarbanes-Oxley Act. However, we would not object if a registrant did not disclose changes made in preparation for the registrant's first management report on internal control over financial reporting. However, if the registrant were to identify a material weakness, it should carefully consider whether that fact should be disclosed, as well as changes made in response to the material weakness.

After the registrant's first management report on internal control over financial reporting, pursuant to Item 308 of Regulations S-K or S-B, the registrant is required to identify and disclose any material changes in the registrant's internal control over financial reporting in each quarterly and annual report. This would encompass disclosing a change (including an improvement) to internal control over financial reporting that was not necessarily in response to an identified significant deficiency or material weakness (i.e. the implementation of a new information system) if it materially affected the registrant's internal control over financial reporting. Materiality, as with all materiality judgments in this area, would be determined upon the basis of the impact on internal control over financial reporting and the materiality standard articulated in TSC Industries, Inc. v. Northway, Inc. 426 U.S. 438 (1976) and Basic Inc. v. Levinson, 485 U.S. 224 (1988). This would also include disclosing a change to internal control over financial reporting related to a business combination for which the acquired entity that has been or will be excluded from an annual management report on internal control over financial reporting as contemplated in Question 3 above. As an alternative to ongoing disclosure for such changes in internal control over financial reporting, a registrant may choose to disclose all such changes to internal control over financial reporting in the annual report in which its assessment that encompasses the acquired business is included.

Q10: The definition of the term "internal control over financial reporting" does not encompass a registrant's compliance with applicable laws and regulations, with the exception of compliance with the applicable laws and regulations directly related to the preparation of financial statements, such as the Commission's financial reporting requirements. Are all aspects of the rules promulgated under the Sarbanes-Oxley Act, for example, within that definition?

A10: No. While, it may be possible to connect the violation of any law, rule or regulation to the financial statements by observing that if the violation is significant enough it will have a material impact on the registrant's financial statements, we do not believe that compliance with all laws fits within the definition. The Commission's financial reporting requirements and the Internal Revenue Code are examples of regulations that are directly related to the preparation of the financial statements. Conversely, rules requiring disclosure as to the existence of a code of ethics or disclosure as to the existence of an audit committee financial expert are examples of rules promulgated under the Sarbanes-Oxley Act that are not directly related to the preparation of financial statements.

However, as part of management's evaluation of a registrant's disclosure controls and procedures, management must appropriately consider the registrant's compliance with other laws, rules and regulations. Such consideration should include assessing whether the registrant (1) adequately monitors such compliance, and (2) has appropriate disclosure controls and procedures to ensure that required disclosure of legal or regulatory matters is provided. Evaluation of disclosure controls and procedures and internal control over financial reporting in respect of compliance with applicable laws or regulations does intersect at certain points, including, for example, whether the registrant has controls to ensure that the effects of non-compliance with laws, rules and regulations are recorded in the registrant's financial statements, including the recognition of probable losses under FASB Statement No. 5, *Accounting for Contingencies.*

Q11: Must identified significant deficiencies be disclosed either as part of management's report on internal control over financial reporting or elsewhere in a registrant's periodic reports?

A11: A registrant is obligated to identify and publicly disclose all material weaknesses. If management identifies a significant deficiency it is not obligated by virtue of that fact to publicly disclose the existence or nature of the significant deficiency. However, if management identifies a significant deficiency that, when combined with other significant deficiencies, is determined to be a material weakness, management must disclose the material weakness and, to the extent material to an understanding of the disclosure, the nature of the significant deficiencies. In addition, if a material change is made to either disclosure controls and procedures or to internal control over financial reporting in response to a significant deficiency, the registrant is required to disclose such change and should consider whether it is necessary to discuss further the nature of the significant deficiency in order to render the disclosure not misleading. A registrant's auditor that is aware of a significant deficiency is required to communicate the significant deficiency to the audit committee as required by PCAOB Auditing Standard No. 2.

Q12: Many registrants with global operations have a lag in reporting the financial results of certain foreign subsidiaries for financial reporting purposes. For example, a registrant with a December 31 year-end may consolidate the operations of certain foreign subsidiaries with a November 30 year-end. Is this difference in period ends also acceptable in relation to the assessment of internal control over financial reporting?

A12: Yes.

Q13: The Commission's adopting release for its rules pursuant to Section 404 of the Sarbanes-Oxley Act (Release No. 34-47986) provides that the terms "significant deficiency" and "material weakness" have the same meaning for purposes of those rules as they do under generally accepted auditing standards and attestation standards. PCAOB Auditing Standard No. 2 modified the definitions of the terms "significant deficiency" and "material weakness." Does the Commission staff intend to look to the definitions as they existed when the adopting release was issued or as they have been revised by the PCAOB?

A13: When the Commission published its adopting release, the Commission expressed an intention to incorporate the definitions of "significant deficiency" and "material weakness" as they exist in the standards used by auditors of public companies. Looking to the definitions as revised by the PCAOB is consistent with this intention and, accordingly, the SEC staff will apply the PCAOB definitions in interpreting the Commission rules in this area.

Q14: In many situations, a registrant relies on a third party service provider to perform certain functions where the outsourced activity affects the initiation, authorization, recording, processing or reporting of transactions in the registrant's financial statements, such as payroll. In assessing internal controls over financial reporting, management may rely on a Type 2 SAS 70 report[3] performed by the auditors of the third party service providers. If the auditors of the third party service provider are the same as the auditors of the registrant, may management still rely on that report? Additionally, may management rely on a Type 2 SAS 70 report on the third party based on a different year-end?

A14: In situations where management has outsourced certain functions to third party service provider(s), management maintains a responsibility to assess the controls over the outsourced operations. However, management would be able to rely on the Type 2 SAS 70 report even if the auditors for both companies were the same. On the other hand, if management were to engage the registrant's audit firm to also prepare the Type 2 SAS 70 report on the service organization, management would not be able to rely on that report for purposes of assessing internal control over financial reporting. Management would be able to rely on a Type 2 SAS 70 report on the service provider that is as of a different year-end. Note, however, that management is still responsible for maintaining and evaluating, as appropriate, controls over the flow of information to and from the service organization.

Q15: What is the impact of combining the auditor's attestation report on management's assessment of internal controls over financial reporting with the audit report on the financial statements?

A15: Item 2-02 of Regulation S-X permits the auditor to combine the attestation report on management's assessment on internal control with the auditor's report on the financial statements. However, in determining whether to combine the reports, the auditor should take into account any issues that may arise if its audit report on the financial statements is expected to be reissued or incorporated by reference into a filing under the Securities Act.

Q16: Will the SEC be providing guidance on specific considerations relating to internal control over financial reporting for small business issuers?

A16: Although the Commission's final rule implementing Section 404 of the Act does not distinguish between large and small issuers, the Commission, as noted in the release accompanying the final rule, recognized that many smaller issuers might encounter difficulties in evaluating their internal control over financial reporting. The SEC staff would support efforts by bodies such as COSO to develop an internal control framework specifically for smaller issuers.

Q17: To what extent may management rely on the registrant's auditor to assist in its development of an assessment process and documentation process in preparation of issuing management's report on internal control over financial reporting?

---

[3] AU sec. 324 defines a report on controls placed in operation and test of operating effectiveness, commonly referred to as a "Type 2 SAS 70 report". This report is a service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.
