HOW *AUDIT AND ACCOUNTING MANUAL* IS ORGANIZED

This edition contains the following significant additions:

- Updated illustrative inquiries for a review of financial statements to reflect the issuance of Statement on Standards for Accounting and Review Services No. 13, *Compilation of Specified Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*, vol. 2, AR sec. 110), and Statement on Standards for Accounting and Review Services No. 14, *Compilation of Pro Forma Information* (AICPA, *Professional Standards*, vol. 2, AR sec. 120) [AAM section 2000]
- Added changes due to issuance of the new Statements on Auditing Standards (SAS) Nos. 104–111 (the risk assessment standards) [AAM sections 3000, 4000, and 5000]
- Updated communication with those charged with governance to reflect issuance of SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) [AAM section 7000]
- 2006/2007 Alerts [AAM section 8000]

Scope of *Audit and Accounting Manual*

This Publication brings together for continuing reference a set of nonauthoritative audit tools and illustrations prepared by the staff of the Accounting and Auditing Publications Team of the American Institute of Certified Public Accountants.

Arrangement of Material in *Audit and Accounting Manual* . . .

The contents of this volume are arranged as follows:

Introduction
Compilation and Review
Engagement Planning and Administration
Internal Control
Designing and Performing Further Audit Procedures
Audit Documentation
Correspondence, Confirmations & Representations
Alerts
Accountants' Reports
Quality Control

Description of Content . . .

The major divisions are subdivided into sections, each with its own section number. Each paragraph within a section is decimally numbered. For example, AAM section 7100.01 refers to the first paragraph of section 7100, *Control of Confirmations and Correspondence*.

The AICPA *Professional Standards* is referenced by the use of the following abbreviations: AU (Auditing), AT (Attestation Standards), AR (Accounting and Review Services), ET (Code of Professional Conduct), BL (Bylaws), QC (Quality Control), and PR (Peer Review).

The AICPA *Technical Practice Aids* is referenced by the use of the following abbreviations: AUD (Auditing and Attestation Statements of Position).

Quotations of accounting standards in this volume are derived from the original pronouncements and may have been editorially changed in the FASB *Accounting Standards Current Text*.

AAM Section 1000
Introduction

This manual has not been approved, disapproved, or otherwise acted upon by any senior technical committees of the American Institute of Certified Public Accountants or the Financial Accounting Standards Board and has no official or authoritative status.

TABLE OF CONTENTS

[*The next page is 1101*.]

AAM Section 1100
Introduction

.01 This manual has been prepared by the staff of the American Institute of Certified Public Accountants (AICPA) and issued as a nonauthoritative practice aid. The materials included in it are intended primarily as a reference source for conducting audit, review, and compilation engagements. The objective is to provide practitioners with the tools needed to help plan, perform, and report on their engagements. *The manual is not intended to serve as a complete or comprehensive quality control system.* The materials are not intended as a substitute for the professional judgments that must be applied by practitioners. The manual, where practicable, offers choices and alternatives rather than particular positions. The manual is not a substitute for the authoritative technical literature and users are urged to refer directly to applicable authoritative pronouncements for the text of technical standards.

.02 This manual is intended to be used in connection with engagements of nonpublic entities and is not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board (PCAOB).

.03 Some sections of the manual include quotations from Statements on Auditing Standards (SAS) and other authoritative pronouncements. Those quotations are intended only to illustrate certain matters, not to serve as a substitute for careful study of the relevant pronouncements. References are made throughout the manual to the original authoritative pronouncements and to their section numbers in AICPA *Professional Standards* to help users locate those authoritative pronouncements.

.04 The authors hope that the manual will be helpful to practitioners in the conduct of their audit and accounting practice. However, no generalized material, such as that included in this manual, can be a substitute for development and implementation by a firm of a system of quality control which is appropriately comprehensive and suitably designed in relation to the firm's organizational structure, its policies, and the nature of its practice.

.05 Explanation of References:

APB =	AICPA Accounting Principles Board Opinion
AR =	Reference to section number in AICPA *Professional Standards*
ARB =	AICPA Accounting Research Bulletin
AT =	Reference to section number in AICPA *Professional Standards*
AU =	Reference to section number in AICPA *Professional Standards*
AUD =	Reference to section number in the Auditing and Attestation Statements of Position in AICPA *Technical Practice Aids*
EITF =	Emerging Issues Task Force consensus
FIN =	FASB Interpretation
FSP =	FASB Staff Positions
PB =	AcSEC Practice Bulletin
QC =	Reference to section number in AICPA *Professional Standards*
SAS =	AICPA Statement on Auditing Standards
SFAS =	FASB Statement of Financial Accounting Standards

SOP =	AICPA Statement of Position
SQCS =	Statement on Quality Control Standards
SSAE =	Statement on Standards for Attestation Engagements
SSARS =	Statement on Standards for Accounting and Review Services

.06 The manual is expected to be updated periodically. Changes will likely arise from three main sources:

(1) Comments and suggestions from practitioners. Since this manual is a product of AICPA staff, not of a committee of practitioners, it is particularly important that practitioners advise the staff on any suggestions for material that could be improved or added.

(2) Issuance of new official pronouncements.

(3) Other additions to or deletions from the manual as a result of continued staff study.

Comments and suggestions should be addressed to:

AAM Section 1200

How to Use the Audit and Accounting Manual

Overview

.01 The Audit and Accounting Manual (AAM) is designed to provide practitioners with the tools needed to help plan, perform, and report on audit, review, and compilation engagements. *The AAM is not intended to serve as a complete or comprehensive quality control system, and is not intended to be used in connection with the audits of entities that are required to be audited under standards set by the Public Company Accounting Oversight Board (PCAOB).* The AAM is comprised of the following sections:

Section No.	*Section Name*
2000	Compilation and Review
3000	Engagement Planning & Administration
4000	Internal Control
5000	Designing and Performing Further Audit Procedures
6000	Audit Documentation
7000	Correspondence, Confirmations & Representations
8000	Alerts
9000	Accountants' Reports
10,000	Quality Control

Audits

.02 To perform an engagement in accordance with generally accepted auditing standards (GAAS) an auditor must comply with the General Standards, the Standards of Field Work, the Standards of Reporting, and the Quality Control Standards.

.03 The general standards are concerned with the qualifications of the auditor and the qualitative aspect of the work performed. They specifically address the auditor's training and proficiency, independence, and due care in the performance of work.

.04 The standards of field work address the manner used by the auditor to perform the audit. This standard begins with the appointment of the auditor and ends with the auditor communicating to those responsible for the oversight of financial reporting of the entity being audited.

.05 The standards of reporting are concerned with the opinion the auditor renders on the client's financial statements.

.06 The AAM will assist the auditor in performing an audit, in accordance with GAAS, in the following ways:

a. The Quality Control section [AAM section 10,000] includes sample forms which can be used by a firm to document its adherence to the AICPA requirement for a System of Quality Control for a CPA Firm. Included in this section are forms that relate to the five elements of Quality Control:

- Independence, Integrity, and Objectivity
- Personnel Management
- Acceptance and Continuance of Clients and Engagements
- Engagement Performance
- Monitoring

b. The Engagement Planning & Administration section [AAM section 3000] provides guidance in the planning stage. Included in this section are various formats of audit assignment controls and engagement letters.

c. The Internal Control section [AAM section 4000] conforms to the *Internal Control—Integrated Framework,* published by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO report) and AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1). This section provides guidance in evaluating internal control by utilizing checklists, questionnaires, and other generalized aids.

d. The Designing and Performing Further Audit Procedures section [AAM section 5000] explains how the auditor should design and perform tests of controls or substantive procedures or both that are responsive to the assessed risks of material misstatement.

e. The Audit Documentation section [AAM section 6000] provides the auditor with a general discussion of the purpose of audit documentation.

f. The Correspondence, Confirmations & Representations section [AAM section 7000] provides the auditor with numerous examples of confirmations, illustrative inquiries to legal counsel, representation letters, communications with audit committees, as well as a reliance letter.

g. The Accountants' Reports section [AAM section 9000] addresses the format of the accountants' report and numerous examples of the auditor's report.

Compilation and Review Services

.07 To perform either a review or compilation engagement in accordance with Statements on Standards for Accounting and Review Services (SSARS), an accountant must comply with the standards promulgated by the Accounting and Review Services Committee. There have been 14 statements issued.

.08 SSARS No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), provides guidance to accountants concerning the standards and procedures applicable to compilation and review services for a nonpublic entity. The statement also provides examples of standard single year reports and departures from those reports.

.09 SSARS No. 2, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 200), establishes standards for reporting on comparative financial statements of a nonpublic entity when one or more prior periods have been compiled or reviewed in accordance with SSARS No. 1.

.10 SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2, AR sec. 300), provides an alternative form of standard compilation report when reporting on a prescribed form calls for a departure from generally accepted accounting principles (GAAP).

.11 SSARS No. 4, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards* vol. 2, AR sec. 400), provides guidance to a successor accountant who communicates with a predecessor accountant regarding acceptance of an engagement to compile or review financial statements of a nonpublic entity.

.12 SSARS No. 5 (Deleted by SSARS No. 7).

.13 SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AICPA, *Professional Standards*, vol. 2, AR sec. 600), provides an exemption from SSARS No. 1 for personal financial plans.

.14 SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992*.

.15 SSARS No. 8, *Amendment to Statements on Standards for Accounting and Review Services No. 1,* Compilation and Review of Financial Statements (AICPA, *Professional Standards*, vol. 2, AR sec. 100), provides communication and performance requirements for unaudited financial statements submitted to a client that are not expected to be used by a third party.

.16 SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (AICPA, *Professional Standards*, vol. 2, AR secs. 100 and 400).

.17 SSARS No. 10, *Performance of Review Engagements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), expands on previous guidance on analytical procedures, inquiries, and other review procedures.

.18 SSARS No. 11, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2, AR sec. 50), clarifies the standards by which the SSARS are issued and defines terms that are used to describe certain publications. SSARS No. 11 also amends SSARS No. 2, paragraph 17, footnote 9.

.19 SSARS No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (AICPA, *Professional Standards*, vol. 2, AR secs. 100 and 200).

.20 SSARS No. 13, *Compilation of Specified Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*, vol. 2, AR sec. 110), expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement.

.21 SSARS No. 14, *Compilation of Pro Forma Financial Information* (AICPA, *Professional Standards*, vol. 2, AR sec. 120), expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on pro forma financial information.

.22 The AAM will assist the accountant in performing compilation and review engagements in accordance with SSARS in the following ways:

a. The Engagement Planning and Administration section [AAM section 2200] provides guidance in the planning stage. Addressed are engagement letters, changes in the level of service for the engagement, sample acceptance form, sample information form, and sample engagement letters.

b. The Working Papers section [AAM section 2300] provides sample procedures for both compilation and review engagements, representation letters, and checklists.

c. The Form and Content of Financial Statements [AAM section 2400] provides guidance on the statements, notes, supplementary information, and subsequent discovery of facts.

d. The Accountants' Reports section [AAM section 2500] includes examples of several reports for the engagement.

e. The Special Areas section [AAM section 2600] addresses prescribed forms and specified elements.

.23 It is suggested that the accountant also review the following areas when performing compilation and review engagements for additional guidance:

Correspondence, Confirmations & Representations [AAM section 7000]

Quality Control [AAM section 10,000]

Audit Risk Alerts

.24 The Audit Risk Alerts section [AAM section 8000] is intended to provide accountants with an overview of recent economic, professional, and regulatory developments that may affect their engagements.

[*The next page is 2001.*]

AAM Section 2000
Compilation and Review

This manual is a nonauthoritative practice aid and does not include extensive explanation or discussion of authoritative pronouncements. Users of this manual should refer directly to applicable authoritative pronouncements when appropriate.

The exhibits are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of reference when preparing working papers or a report for a compilation or review engagement.

TABLE OF CONTENTS

[*The next page is 2101.*]

AAM Section 2100
Introduction

.01 Statements on Standards for Accounting and Review Services (SSARS) are issued by the American Institute of Certified Public Accountants (AICPA) Accounting and Review Services Committee (ARSC), the senior technical committee of the AICPA designated by its Council to issue pronouncements in connection with unaudited financial statements and other unaudited financial information of nonpublic entities. (A complete listing of SSARS and the full text can be found in AICPA *Professional Standards,* vol. 2.) A nonpublic entity is defined as any entity other than (*a*) one whose securities trade in a public market either on a stock exchange or over the counter, (*b*) one that files with a regulatory agency in preparation for the sale of any class of its securities in a public market, or (*c*) subsidiary, corporate joint venture, or other entity controlled by an entity covered by (*a*) or (*b*). Thus, if an entity does not fall into either category (*a*), (*b*), or (*c*) in the above definition, it is a nonpublic entity.

.02 Although SSARS applies only to engagements involving nonpublic entities, there are circumstances when an accountant may perform a review of financial statements of a public entity under SSARS. For example, paragraph 1 of SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992*, notes that when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of AU section 504.05, *Association With Financial Statements* (AICPA, *Professional Standards*, vol. 1).

Standards for Accounting and Review Services

.03 An accountant must perform a compilation or review of a nonpublic entity in accordance with SSARS issued by the AICPA. SSARS provide a measure of quality and the objectives to be achieved in both a compilation and review.

.04 The SSARS are issued by ARSC and provide performance and reporting standards for compilations and reviews.

.05 Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET section 202.01), requires an AICPA member who performs compilations or reviews to comply with standards promulgated by ARSC. The ARSC develops and issues standards in the form of SSARS through a due process that includes deliberations in meetings open to the public, public exposure of proposed SSARS, and a formal vote. The SSARS are codified.

.06 The accountant should have sufficient knowledge of the SSARS to identify those that are applicable to his or her engagement. The nature of the SSARS requires an accountant to exercise professional judgment in applying them. The accountant should be prepared to justify departures from the SSARS.

Interpretative Publications

.07 *Interpretative publications* consist of compilation and review Interpretations of the SSARS, appendixes to the SSARS, compilation and review guidance included in AICPA Audit and Accounting Guides, and AICPA Statements of Position to the extent that those Statements are applicable to compilation and review engagements. Interpretative publications are not standards for accounting and review services. Interpretative publications are recommendations on the application of the SSARS in specific circumstances, including engagements for entities in specialized industries. An interpretative publication is issued after all ARSC members have been provided an opportunity to consider and comment on whether the proposed interpretative publication is consistent with the SSARS.

.08 The accountant should be aware of and consider interpretative publications applicable to his or her compilation or review. If the accountant does not apply the guidance included in an applicable interpretative publication, the accountant should be prepared to explain how he or she complied with the SSARS provisions addressed by such guidance.

Other Compilation and Review Publications

.09 *Other compilation and review publications* include AICPA accounting and review publications not referred to above; AICPA's annual *Compilation and Review Alert*; compilation and review articles in the Journal of Accountancy and other professional journals; compilation and review articles in AICPA's *The CPA Letter*; continuing professional education programs and other instruction materials, textbooks, guide books, compilation and review programs, and checklists; and other compilation and review publications from state CPA societies, other organizations, and individuals.[1] Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply the SSARS.

.10 If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement, and appropriate. In determining whether an other compilation and review publication is appropriate, the accountant may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SSARS and the degree to which the issuer or author is recognized as an authority in compilation and review matters. Other compilation and review publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

Overview of SSARS and Interpretations

.11 ARSC has issued 14 Statements on Standards for Accounting and Review Services. They are

- SSARS No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100) (December 1978)

  Replaced the former unaudited engagement standards contained in SAS No. 1. The statement provides guidance to CPAs concerning the standards and procedures applicable to engagements to compile or review financial statements. It does not establish standards or procedures for other services (for example, tax return preparation or bookkeeping services).

- SSARS No. 2, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 200) (October 1979)

  Applies to reports on any comparative financial statements that include current period compiled or reviewed financial statements of an entity that is nonpublic as of the current period. Otherwise, SASs would apply.

- SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2, AR sec. 300) (December 1981)

  Amends SSARS Nos. 1 and 2 to provide for an alternative form of standard compilation report on prescribed forms that call for departures from GAAP. It applies to any standard, preprinted form designed or adopted by the body to which it is submitted (for example, a bank).

[1] The accountant is not expected to be aware of the full body of other compilation and review publications.

- SSARS No. 4, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2, AR sec. 400) (December 1981)

  Provides guidance to a successor who decides to communicate with a predecessor. The standard does not require communication and does require the predecessor to respond if authorized by the client.

- SSARS No. 5, *Reporting on Compiled Financial Statements* (July 1982; Deleted November 1992 by the issuance of SSARS No. 7)

  All of the former SSARS No. 5 requirements are now included in SSARS Nos. 1, 2, and 3.

- SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AICPA, *Professional Standards*, vol. 2, AR sec. 600) (September 1986)

  Provides an optional exemption from SSARS No. 1 if the accountant establishes an understanding with the client, preferably in writing, that the financial statements:

  — Will be used solely to assist the client and the client's advisors to develop the client's personal financial goals and objectives

  — Will not be used to obtain credit or for any other purpose

  — Indicate that nothing comes to the CPA's attention during the engagement that causes him to believe that the financial statements will be used to obtain credit or for other purposes

- SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992* (November 1992)

  Contains a number of technical amendments to various standards.

- SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1*, Compilation and Review of Financial Statements (October 2000)

  Amends SSARS No. 1 to create a management-use-only compilation (and make other changes).

- SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (November 2002)

  Contains a number of technical amendments to SSARS No. 1 and SSARS No. 4

- SSARS No. 10, *Performance of Review Engagements* (May 2004)

  Amends SSARS No. 1, *Compilation and Review of Financial Statements*, by:

  — Expanding on previously provided guidance on analytical procedures, inquiries, and other review procedures

  — Providing inquiries regarding fraud that the accountant should consider making in a review engagement

  — Requiring representations regarding fraud in the management representation letter

  — Clarifying and providing guidance regarding documentation in a review engagement

- SSARS No. 11, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2, AR sec. 50) (May 2004)

  — Establishes a SSARS hierarchy

  — Makes practitioners aware of the appropriate literature and the standing of various publications in the SSARS hierarchy

  — In addition, it amends footnote 9 of SSARS No. 2, *Reporting on Comparative Financial Statements*, so that it conforms with the guidance in footnote 29 of AU section 508, *Reports on Audited Financial*

Statements (AICPA, *Professional Standards*, vol. 1), which states that a successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with, that of the successor auditor

- SSARS No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (AICPA, *Professional Standards*, vol. 2, AR sec. 200) (July 2005)

  Amends SSARS No. 1, *Compilation and Review of Financial Statements*, by:

  — Requiring the accountant to establish an understanding with the client, that the accountant will inform the appropriate level of management of any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures, that fraud or an illegal act may have occurred

  — Requiring the accountant to report, to the appropriate level of management, any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred

  — Providing guidance as to when an accountant should obtain an updating representation letter from management

  — Providing guidance to accountants on restricting the use of reports issued pursuant to SSARS

  Amends SSARS No. 2 to allow a successor accountant to report on a restatement adjustment while indicating that a predecessor accountant reported on the financial statements of the prior period before restatement.

- SSARS No. 13, *Compilation of Specified Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*, vol. 2, AR sec. 110) (July 2005)

  Provides guidance on performance and reporting requirements for an accountant who is engaged to compile or issues a compilation report of one or more specified elements, accounts, or items of a financial statement. Examples of specified elements, accounts, or items of a financial statement that an accountant may compile include schedules of rentals, royalties, profit participation, or provision for income taxes.

- SSARS No. 14, *Compilation of Pro Forma Financial Information* (AICPA, *Professional Standards*, vol. 2, AR sec. 120) (July 2005)

  Provides guidance on performance and reporting requirements for an accountant who is engaged to compile or issues a compilation report on pro forma financial information

.12 SSARS No. 1 defines a compilation of financial statements and a review of financial statements. A *compilation* of financial statements is defined as presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the financial statements. A *review* of financial statements involves performing inquiry and analytical procedures to provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications that should be made to the financial statements for them to be in conformity with generally accepted accounting principles or, if applicable, with another comprehensive basis of accounting (OCBOA).

.13 Paragraph 4 of SSARS No. 1 defines a *financial statement* as:

> A presentation of financial data, including accompanying notes, derived from accounting records intended to communicate an entity's economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles. Financial forecasts, projections, and similar presentations, and financial presentations included in tax returns are not financial statements for purposes of this statement. SSARS No. 1 also gives the following specific examples of financial statements:

- Balance sheet
- Statement of income
- Statement of comprehensive income
- Statement of retained earnings
- Statement of cash flows
- Statement of changes in owners' equity
- Statement of assets and liabilities (with or without owners' equity accounts)
- Statement on revenues and expenses
- Statement of financial position
- Statement of activities
- Summary of operations
- Statement of operations by product lines
- Statement of cash receipts and cash disbursements

.14 Paragraphs 20–23 of SSARS No. 1, as amended by SSARS No. 8, include guidelines regarding an accountant's communications with the client when the compiled financial statements are not expected to be used by a third party. Paragraph 4 of SSARS No. 1, as amended, defines *third parties* as all parties except for members of management who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements. This definition by exception indicates that all parties are third parties except for certain members of management who are knowledgeable enough about the business to put the information in the proper context.

.15 SSARS No. 2, as amended by SSARS No. 11 (See AR section 200.17), and SSARS No. 12 (See AR section 200.25–.27) establishes the standards for reporting on comparative financial statements of a nonpublic entity when the statements of one or more periods have been compiled or reviewed under SSARS No. 1.

Practice Tip

If prior-period financial statements are not presented in columnar form, they do not meet the SSARS No. 2 definition of comparative financial statements and, therefore, are not subject to the reporting requirements of SSARS No. 2. In addition, the requirements of SSARS No. 2 do not apply to prior-period financial statements in a client-prepared document that are presented on separate pages from the financial statements that are reported on by the accountant. However, the document should include an indication (generally on the face of the financial statements) that the accountant has not compiled or reviewed the prior-period financial statements and assumes no responsibility for them.

.16 SSARS No. 3 amends SSARS Nos. 1 and 2 to provide an alternative form of compilation report when a prescribed form calls for a departure from generally accepted accounting principles (GAAP). Paragraph 2 of SSARS No. 3 defines a prescribed form as any standard, preprinted form designed or adopted by the body to which it is intended to be submitted (for example, banks and governmental bodies).

.17 The requirements of AR section 100 are applicable when the unaudited financial statements of a nonpublic entity are included in a prescribed form. If the compiled or reviewed financial statements included in the prescribed form contain departures from GAAP, the accountant should follow the guidance in AR section 100.46–.48. Additionally, AR section 300 provides an alternative form of the standard compilation report when the prescribed form or related instructions call for a departure from GAAP by specifying a measurement principle not in conformity with GAAP or by failing to request the disclosures required by GAAP.

.18 SSARS No. 4, as amended by SSARS Nos. 7 and 9, provides guidance on required, as well as, optional communications between predecessor and successor accountants. SSARS No. 7 amended SSARS No. 4 to require the successor accountant to request the client to communicate with the predecessor accountant, if the successor accountant becomes aware of information that may require revision of financial statements reported on by the predecessor accountant. SSARS No. 9 amends SSARS No. 4 by providing guidance on communications between accountants when the successor accountant decides to communicate with the predecessor regarding acceptance of an engagement. The amendment defines predecessor and successor accountants, provides guidance regarding acceptance of an engagement, suggests inquiries the successor accountant may decide to ask the predecessor accountant, and includes an example successor accountant acknowledgement letter, which the predecessor may want to use in connection with granting access to working papers.

.19 Under SSARS No. 6, an accountant may submit a written personal financial plan containing unaudited personal financial statements to a client without issuing a report under SSARS No. 1, as amended, when all of the following conditions exist:

- The accountant establishes an understanding with the client that the financial statements (i) will be used solely to assist the client and the client's advisors to develop the client's personal financial goals and objectives and (ii) will not be used to obtain credit or for any purpose other than developing the aforementioned goals and objectives.
- Nothing comes to the accountant's attention during the engagement that would cause him or her to believe that the financial statements will be used to obtain credit or for any purpose other than developing the client's financial goals and objectives.

.20 Examples of implementation of a personal financial plan by a client's advisors include use of the plan by the following:

- An insurance broker who will identify specific insurance products
- An investment adviser who will provide specific recommendations about the investment portfolio
- An attorney who will draft a will or trust documents

.21 An accountant following the exemption under SSARS No. 6 should issue a written report stating that the unaudited financial statements are as follows:

- Are designed solely to help develop the financial plan
- May be incomplete or contain departures from GAAP and should not be used to obtain credit or for any purpose other than developing the plan
- Have not been audited, reviewed, or compiled

.22 SSARS No. 7, which is an omnibus statement, among other things—

- Clarified the applicability of SSARS No. 1 by indicating that, in certain circumstances, an accountant may perform a review of a public company under the provisions of SSARS.
- Eliminated the prohibition against merely typing or reproducing financial statements without modification and defined the term *submission of financial statements*.[2]
- Made explicit that the accountant is not required to communicate to a client errors that are not material and fraud or illegal acts that are clearly inconsequential.

[2] The term *submission of financial statements* has since been redefined by SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1* (AICPA, *Professional Standards*, vol. 2, AR sec. 100).

- Modified the SSARS review report to differentiate it from the review report presented in AU section 722, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1) as well as the review and compilation report to clarify that the standards referred to in the reports are Statements on Standards for Accounting and Review Services.
- Required a client representation letter when performing a review engagement under SSARS.
- Clarified the accountant's reporting responsibilities in a compilation or review engagement when he or she decides there is an uncertainty about an entity's ability to continue as a going concern.

.23 SSARS No. 8 amends SSARS No. 1 to provide communication and performance requirements for unaudited financial statements submitted to a client that are not expected to be used by a third party. *Submission of financial statements* is defined as presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software. The following two actions are necessary in order to *submit* financial statements—(1) prepare financial statements, either manually or through the use of computer software, and (2) present the financial statements to a client or third party. [SSARS No. 1 sets forth the performance and communication requirements when an accountant submits unaudited financial statements of a nonpublic entity to his or her client or third parties.]

.24 SSARS No. 8 amends SSARS No. 1 to create a provision for management-use-only financial statements (when an accountant submits financial statements to a client that are not reasonably expected to be used by a third party) indicating that he or she should document an understanding with the client through the use of an engagement letter or follow the requirements in SSARS No. 1 for issuing a compilation report.

.25 SSARS No. 9 is an omnibus statement. Following is a summary of the amendments included in SSARS No. 9—

- The auditing literature permits an accountant who may be associated with financial statements of a public company, but has not audited or reviewed such statements to state that he or she has not audited the unaudited information and includes illustrative report wording. This guidance is also appropriate for compilation and review engagements. This amendment revises SSARS No. 1 to include wording that may be appropriate under the circumstances.
- SSARS No. 9 includes two footnotes to SSARS No. 1 (See AR section 100.14 and 100.42), stating that the disclosure of a change in capital is required. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement and (1) if a separate statement of retained earnings is not presented as a separate statement, reference in the compilation and review report is not needed and (2) if the statement of retained earnings is presented, reference should be made in the appropriate paragraphs of the report.
- SSARSs did not specifically require a signature of the accounting firm or the accountant on a review or compilation report. This amendment revises SSARS No. 1 (See AR section 100.11 and 100.39) to require a signature (this signature could be manual, stamped, or typed).
- SSARS No. 9 (See AR section 100) requires the accountant to obtain specific representations from management when performing a review engagement, provides guidance on the dating of the letter, and provides guidance regarding obtaining representations from current management when they were not present during all periods covered by the accountant's report. In addition, Appendix F of AR section 100 gives an illustrative sample representation letter for a review of financial statements.
- SSARS No. 9 (See AR section 100.60) explicitly permits the accountant to issue a separate report on supplementary information in a compilation engagement, consistent with guidance on supplemental information in a review report.
- SSARS No. 9 (See AR section 100.72) clarifies that although an effective quality control system is conducive to compliance with SSARSs, deficiencies in or noncompliance with a firm's quality control system do not, in and of themselves, indicate that an engagement was not performed in accordance with the applicable professional standards.

- SSARS No. 9 (See AR section 400) defines predecessor and successor accountants, provides guidance regarding acceptance of an engagement, suggests inquiries the successor accountant may decide to ask the predecessor accountant, and includes an illustrative successor-accountant acknowledgment letter that the predecessor may want to use in connection with granting access to the working papers.

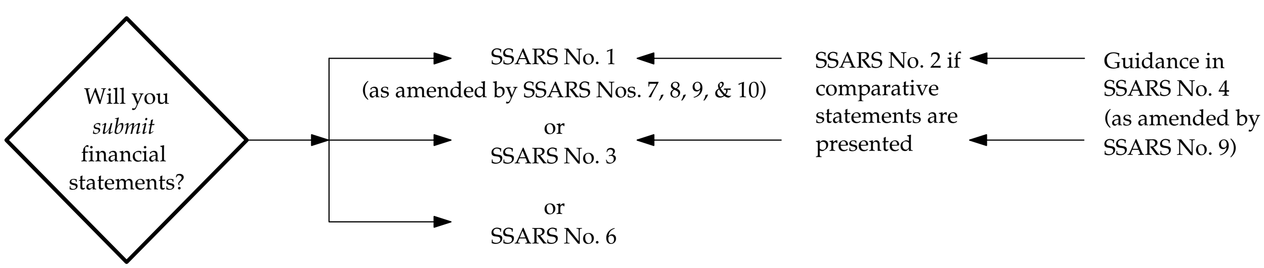
.26 Every standard does not apply to every engagement. SSARS No. 1, as amended by SSARS Nos. 7, 8, 9, 10, and 12, generally applies to any engagement in which the accountant submits financial statements to a client or third parties (compilation or review engagement). SSARS No. 2 applies to any engagement to report on comparative financial statements.

.27 SSARS No. 3 and SSARS No. 6 are considered optional exemptions from SSARS No. 1. (SSARS No. 1 applies unless the conditions in SSARS No. 3 or SSARS No. 6 are met.) SSARS No. 3 is considered a partial exemption and applies if the engagement is to compile financial statements contained in certain prescribed forms. The performance standards in SSARS No. 1 apply, but the reporting standards are replaced by the special reporting requirements of SSARS No. 3. SSARS No. 6 is considered a complete exemption from SSARS No. 1. If the SSARS No. 6 conditions are met, SSARS No. 1 does not apply.

.28 SSARS No. 4 contains recommended communication guidance for any compilation or review engagement where a change of accountants has occurred.

.29 Exhibit 2100-1 illustrates the interactions between the standards:

Exhibit 2100-1—Interaction of SSARS



.30 Illustrative reports to be issued under the provisions of SSARS Nos. 1 through 14 can be found in AAM sections 2610, 2620, and 2710.

.31 In addition to SSARS Nos. 1 through 14, interpretations issued by the staff of ARSC provide timely guidance on applying SSARS. An interpretation is not as authoritative as a SSARS, but accountants may have to justify departure from an interpretation's guidance if the quality of their work is questioned. The following interpretations have been issued by the staff.

Interpretations of SSARS No. 1

.32 No. 1—"Omission of Disclosures in Reviewed Financial Statements" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.01–.02, December 1979; revised November 2002; revised May 2004; revised July 2005). This interpretation states that typically the accountant would not accept an engagement to review financial statements that omit substantially all the disclosures required by GAAP. This interpretation gives guidance on the reporting implications if an accountant who has undertaken a review of financial statements subsequently finds that the client declines to include substantially all required disclosures.

.33 No. 2—"Financial Statements Included in SEC Filings" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.03–.05, December 1979). This interpretation basically concludes that a compilation or review report should not be filed with the SEC.

.34 No. 3—"Reporting on the Highest Level of Service" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.06–.12, December 1979; revised October 2000). This interpretation requires that if an accountant provides more than one level of service on the same financial statements, the financial statements should be accompanied by the accountant's report that is appropriate for the highest level of service provided. This interpretation does not preclude the accountant from using procedures that go beyond those required for the level of assurance expressed. Nor does this interpretation require that the accountant "step up" the level of his or her report if the accountant uses procedures that go beyond those required for the level of assurance expressed.

.35 No. 4—"Discovery of Information After the Date of the Accountant's Report" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.13–.15, November 1980; revised November 2002; revised May 2004, revised July 2005). The interpretation emphasizes the need for professional judgment in determining an appropriate course of action when information becomes available after the date of the accountant's report and that information causes the accountant to believe that the compiled or reviewed financial statements may be incorrect, incomplete, or otherwise unsatisfactory. This interpretation instructs the accountant to consider the reliability of the information and the existence of persons known to be relying on or likely to rely on the financial statements when making a decision about an appropriate course of action, as well as the existence of persons known to be relying or likely to rely on the financial statements. The accountant should also consider consulting with an attorney.

.36 No. 5—"Planning and Supervision" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.16–.17, August 1981; revised November 2002). The interpretation clarifies that the audit guidance in "Planning and Supervision," does not apply to compilation or review engagements. However, this interpretation suggests that the accountant may wish to consider AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1) and other references when planning and supervising a compilation or review engagement.

.37 No. 6—"Withdrawal From Compilation or Review Engagement" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.18–.22, August 1981; revised November 2002; revised May 2004; revised July 2005). The interpretation identifies circumstances in which it is appropriate for an accountant to withdraw from an engagement. Circumstances suggested include those in which the nature, extent, and probable effect of GAAP departures or departures from an OCBOA might cause the accountant to question whether the departures are a result of the preparer's intention to mislead those who might reasonably be expected to use the financial statements. The accountant would also withdraw from a compilation or review engagement if the financial statements are not revised after the accountant requests that revisions be made, and the client refuses to accept the modified standard report that the accountant believes is appropriate.

.38 No. 7—"Reporting When There Are Significant Departures From Generally Accepted Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.23–.26, August 1981; revised November 2002; revised May 2004; revised July 2005). The interpretation indicates that a statement in a compilation or review report that the financial statements are not in conformity with GAAP or an "other comprehensive basis of accounting" would be tantamount to expressing an adverse opinion on the financial statements taken as a whole; therefore, an accountant is precluded from making such a statement. Such an opinion can be expressed only in the context of an audit engagement. This interpretation does not preclude the accountant from emphasizing the limitation of the financial statements in a separate paragraph of the report. This separate paragraph is not, however, a substitute for disclosure of the specific GAAP or OCBOA departures or the effects of the departures.

.39 No. 8—"Reports on Specified Elements, Accounts, or Items of a Financial Statement" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.27–.28, November 1981; revised January 2001; revised November 2002; revised

September 2003; revised May 2004). The interpretation has been rescinded by the issuance of SSARS No. 13, July 2005.

.40 No. 9—"Reporting When Management Has Elected to Omit Substantially All Disclosures" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.29–.30, May 1982). The interpretation allows the accountant to modify the language in the sample report in AR section 100.18 from "Management has elected to omit substantially all disclosures." However, this interpretation stresses that the language used should clearly indicate that the omission of substantially all disclosures is the entity's decision, not the accountant's. The interpretation encourages the use of the language in the sample report in AR section 100.18.

.41 No. 10—"Reporting on Tax Returns" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.31–.32, November 1982). SSARSs do not apply to tax returns. The interpretation exempts the accountant from compiling the financial information contained in a tax return, although the accountant may accept an engagement to compile or review such a presentation.

.42 No. 11—"Reporting on Uncertainties" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.33–.40, December 1982; revised November 2002; revised May 2004). The interpretation has been rescinded by the issuance of Interpretation No. 29 in February 2007.

.43 No. 12—"Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.41–.45, December 1982; revised November 1992 and October 2000). The interpretation illustrates how the standard compilation and review reports should be modified if financial statements are prepared on another comprehensive basis of accounting. Footnotes to the financial statements should state the basis of presentation and describe how that basis differs from GAAP. If footnotes present this information, the standard compilation and review reports should be appropriately modified to identify the financial statement title (for example, Balance Sheet—Income Tax Basis). When an accountant compiles OCBOA financial statements that omit substantially all disclosures, either a footnote or a note to those statements should disclose the basis of accounting. If that disclosure is not made, the following sentence should be added to the first paragraph of the accountant's report:

> The financial statements have been prepared on the accounting basis used by the Company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

.44 No. 13—"Additional Procedures" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.46–.49, March 1983; revised October 2000; revised November 2002; revised May 2004). The interpretation permits the accountant to perform additional procedures in a compilation or review engagement without requiring the accountant to change the engagement level.

.45 No. 14—"Reporting on Financial Statements When the Scope of the Accountant's Procedures Has Been Restricted" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.50–.53, Withdrawn—April 1990).

.46 No. 15—"Differentiating a Financial Statement Presentation From a Trial Balance" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.54-.57, September 1990; revised October 2000). The interpretation identifies the attributes of a financial statement and those of a trial balance. It assists an accountant in determining whether a financial statement presentation is a financial statement, requiring compliance with the provisions of AR section 100, or a trial balance, which does not require compliance with the provisions of AR section 100.

.47 No. 16—"Determining if the Accountant Has "Submitted" Financial Statements Even When Not Engaged to Compile or Review Financial Statements" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.58–.60, Withdrawn by the issuance of SSARS No. 7—November 1992).

.48 No. 17—"Submitting Draft Financial Statements" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.61–.62, September 1990; revised October 2000). The interpretation prohibits an accountant from submitting draft financial statements without intending to submit those financial statements in final form accompanied by an appropriate compilation or review report. This interpretation requires that draft financial statements be so marked and suggests that an accountant document the reasons why he or she intended to submit, but never submitted final financial statements, should that situation occur.

.49 No. 18—"Special-Purpose Financial Presentations to Comply With Contractual Agreements or Regulatory Provisions" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.63–.72, September 1990; revised January 2004; revised May 2004). This interpretation was rescinded in September 2005.

.50 No. 19—"Reporting When Financial Statements Contain a Departure From Promulgated Accounting Principles That Prevents the Financial Statements From Being Misleading" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.73-.75, February 1991; revised October 2000; revised November 2002; revised May 2004; revised July 2005). The interpretation addresses Ethics Rule 203, *Accounting Principles* of AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 203.01), which prohibits a member from expressing an opinion that financial statements are presented in conformity with GAAP if the member is aware that the statements contain a GAAP departure. If the statements contain a GAAP departure, and the member can demonstrate that due to unusual circumstances compliance with GAAP would render the financial statements misleading, the member can comply with ET section 203 by describing in the report the departure; its approximate effects, if practicable; and the reasons why compliance with GAAP would result in misleading statements. The interpretation indicates that if the circumstances contemplated by ET section 203 exist in a review engagement, the accountant's review opinion should be unmodified, but the accountant's review report should be modified to contain a separate paragraph, including the information required by ET section 203. The interpretation clarifies that ET section 203 does not apply to compilation engagements. If the circumstances contemplated by ET section 203 exist in a compilation engagement, an accountant should follow the guidance in AR sections 100.46–48 for reporting on a compilation engagement with a GAAP departure.

.51 No. 20—"Applicability of SSARS to Litigation Services" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.76-.79, May 1991; revised October 2000). SSARSs do not apply to financial statements submitted in litigation services that involve pending or potential proceedings before a court, regulatory body, or governmental authority (or the agent of any of these) such as a grand jury or an arbitrator (mediator) when the

- Accountant is an expert witness or a "trier of fact" (or an agent for one).
- Accountant's work is subject to detailed analysis and challenge by each party to the dispute.
- Accountant is engaged by the attorney and protected by the attorney's work product privilege and such work is not intended to be used for other purposes.

.52 No. 21—"Applicability of SSARS No. 1 When Performing Controllership or Other Management Services" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.80-.84, July 2002). The interpretation clarifies that if the accountant is in the practice of public accounting as defined by the AICPA's Code of Conduct, *Definitions* (AICPA, *Professional Standards*, vol. 2, ET sec. 92.25) and is not a stockholder, partner, director, officer, or employee of the entity, the accountant is required to follow the performance and communication requirements of AR section 100, including any requirement to disclose a lack of independence. The interpretation further states that if the accountant is in the practice of public accounting and is also a stockholder, partner, director, officer, or employee of the entity, the accountant may either (1) comply with the requirements of AR section 100, or (2) communicate, preferably in writing, the accountant's relationship to the entity (for example, stockholder, partner, director, officer, or employee). In addition, if an accountant is not in the practice of public accounting, the issuance of a report under SSARS would be inappropriate.

.53 No. 22—"Use of *Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included*" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.85–.88, December 2002). The interpretation clarifies that an accountant cannot label notes to the financial statements "Selected

Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included" in situations where substantially all disclosures are included. It further states that the omission of one or more notes, when substantially all other disclosures are presented, should be treated in a compilation or review report like any other departure from GAAP, and the nature of the departure and its effects, if known, should be disclosed. The label "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included" is not intended to be used for the omission of (intentionally or unintentionally) one or more disclosures and the accountant should use his or her judgment in determining the appropriateness of the label.

.54 No. 23—"Applicability of Statements on Standards for Accounting and Review Services When an Accountant Engaged to Perform a Business Valuation Derives Information From an Entity's Tax Return" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.89–.92, August 2003). This interpretation clarifies whether or not SSARS applies if an accountant derives financial information from an entity's tax return, and such information is presented as part of the business valuation report. The interpretation states that as discussed in paragraph 4 of AR section 100, under the definition of a financial statement, "Financial forecasts, projections and similar presentations, and financial presentations included in tax returns are not financial statements for purposes of this Statement." Therefore, even if the accountant has prepared the tax return, he or she has not prepared financial statements in accordance with SSARS and the financial information derived from the tax return and presented as part of a business valuation is not deemed to be submission of financial statements as contemplated by AR section 100. It further states that when an accountant, in the course of performing a business valuation engagement, derives financial information from the client's tax return, or another accountant's audited, reviewed, or compiled financial statements, or client-prepared financial statements, the accountant should refer to the source of the financial information and include an indication in the business valuation report that the accountant has not audited, reviewed, or compiled the financial information and that the accountant assumes no responsibility for the information. However, if the accountant submits financial statements in the course of performing a business valuation as defined in paragraph 4 of AR section 100, then, at a minimum, the accountant should comply with the provisions of SSARS applicable to a compilation engagement.

.55 No. 24—"Reference to the Country of Origin in a Review or Compilation Report" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.93–.94, September 2003). The interpretation states that SSARS does not require the reference to the country of origin as review and compilation reports refer to the American Institute of Certified Public Accountants. However, there is no prohibition of the reference if the accountant believes it is appropriate under the circumstances to include it in the report.

.56 No. 25—"Omission of the Display of Comprehensive Income in a Compilation" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.95–.99, September 2003; revised May 2004; revised July 2005). The interpretation clarifies that when an element of comprehensive income is present, the display of comprehensive income can be omitted when issuing a compilation report with substantially all disclosures omitted. FASB Statement No. 130, Reporting Comprehensive Income, requires the display of comprehensive income when a full set of financial statements is presented in conformity with generally accepted accounting principles. However, the display of comprehensive income may be omitted by identifying the omission in the compilation report or engagement letter. In addition, the interpretation also suggests wording if the accountant issues a compilation report on financial statements that omit substantially all disclosures and the display of comprehensive income but include the statement of cash flows. If the accountant compiles financial statements that include all disclosures but omit the display of comprehensive income, the omission should be treated as a departure from generally accepted accounting principles. It further states if an element of comprehensive income has not been computed, for example, unrealized gains and losses arising from investments in marketable securities classified as "available for sale" then the accountant should consider a departure from generally accepted accounting principles and follow the guidance in AR sections 100.46–.48.

.57 No. 26—"Communicating Possible Fraud and Illegal Acts to Management and Others" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.100–.103, May 2004). This interpretation has been rescinded by the issuance of SSARS No. 12, July 2005.

.58 No. 27—"Applicability of Statements on Standards for Accounting and Review Services to Reviews of Nonissuers Who Are Owned by or Controlled by an Issuer" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.104–.108, August 2005). This interpretation clarifies whether accountants should perform reviews in accordance with the Public Company Accounting Oversight Board or in accordance with SSARSs when engaged to review the separate financial statements of a subsidiary, which itself is not an issuer.

.59 No. 28—"Special Purpose Financial Statements to Comply With Contractual Agreements or Regulatory Provisions" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.109-.119, December 2006). This interpretation describes the wording special purpose financial statements that are prepared to comply with contractual agreements or regulatory provisions that specify a special basis of presentation in accordance with AR section 100. This interpretation describes reporting on (1) Special-purpose financial statements prepared in compliance with a contractual agreement or regulatory provision that does not constitute a complete presentation of the entity's assets, liabilities, revenues and expenses, but is otherwise prepared in conformity with generally accepted accounting principles or an other comprehensive basis of accounting or (2) A special-purpose financial presentation (may be a complete set of financial statements or a single financial statement) prepared on a basis of accounting prescribed in an agreement that does not result in a presentation in conformity with GAAP or OCBOA. Illustrative report examples are also given for each type of report.

.60 No. 29—"Reporting on an Uncertainty, Including an Uncertainty About an Entity's Ability to Continue as a Going Concern" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.120–.129, February 2007). This interpretation provides guidance on how an accountant should modify the standard compilation report when, during the performance of a compilation or review, evidence or information comes to the accountant's attention that there may be an uncertainty about the entity's ability to continue as a going concern. In such circumstances, the accountant should consider the adequacy of management's disclosure of the uncertainty. If the accountant determines that the disclosure of the uncertainty regarding the entity's ability to continue as a going concern is not adequate, he or she should follow the guidance in AR section 100.46–.48 with respect to departures from generally accepted accounting principles. The same guidance applies if the accountant becomes aware of a material uncertainty other than a going concern uncertainty (for example, an uncertainty regarding pending or threatened litigation). This interpretation also includes sample language if the accountant determines that disclosure of the uncertainty is in compliance with generally accepted accounting principles, but would like to emphasize the matter in the compilation or review report.

Interpretation of SSARS No. 2

.61 No. 1—"Reporting on Financial Statements That Previously Did Not Omit Substantially All Disclosures" (AICPA, *Professional Standards*, vol. 2, AR sec. 9200.01–.04, November 1980; revised November 2002; revised May 2004; revised July 2005). If the financial statements are compiled (disclosures omitted) from financial statements that previously did not omit disclosures, the accountant's reference to the previous reports should include a description or quotation of any report modification or emphasis matter.

Interpretation of SSARS No. 3

.62 No. 1—"Omission of Disclosures in Financial Statements Included in Certain Prescribed Forms" (AICPA, *Professional Standards*, vol. 2, AR sec. 9300.01–.03, May 1982). This interpretation permits an accountant who has reviewed financial statements of a nonpublic entity to issue a compilation report on financial statements for the same period in a prescribed form that calls for a departure from GAAP.

Interpretation of SSARS No. 4

.63 No. 1—"Reports on the Application of Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9400.01–.05, August 1987; revised November 2002). An accountant who has been asked to provide written or oral advice on the application of accounting principles to a client whose financial statements are compiled or reviewed by another accountant is obligated to follow AU section 625, *Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1).

Interpretation of SSARS No. 6

.64 No. 1—"Submitting a Personal Financial Plan to Client's Advisers" (AICPA, *Professional Standards*, vol. 2, AR sec. 9600.01–.03, May 1991). The interpretation allows the accountant to submit a written personal financial plan, to be implemented by the client or his or her advisers, without complying with SSARS No. 1. Examples of implementation include an:

- Insurance broker to identify specific products.
- Investment adviser to provide investment portfolio recommendations.
- Attorney to draft a will or trust agreement.

Determining Applicability of SSARS No. 1

.65 SSARS No. 1 is applicable whenever an accountant submits unaudited financial statements of a nonpublic entity to a client or third parties. SSARS No. 8 (See AR section 100) modified the definition of *submission*. *Submission of financial statements* is now defined as—

> presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

.66 Two actions are necessary in order to submit financial statements:

- *Prepare* financial statements, either manually or through the use of computer software, *and*
- *Present* the financial statements to a client or third party

.67 Absent either of these actions, the financial statements have not been submitted, and SSARS No. 1 is not applicable.

.68 The term *prepared* is not defined in SSARS. Rather, professional judgment must be used to determine if financial statements will be prepared. In making this judgment, the accountant should consider the difference between mere bookkeeping services (for example, making adjustments, corrections, accruals, etc.) and preparation of financial statements. In order to prepare financial statements the accountant must use his or her knowledge, education, and experience to create financial statements that would not have existed otherwise. In other words, if the financial statements prepared by the client's bookkeeper require only that the accountant, "tweak a couple of things," then financial statements probably haven't been prepared. On the other hand, if the client gives the accountant an unadjusted trial balance and the accountant makes all of the adjustments necessary to convert the information into financial statements, then financial statements probably have been prepared.

Practice Tip

There is no definitive line to cross that would indicate submitting financial statements. Therefore, a firm policy should be established to evaluate how certain accounting services are classified within the firm.

.69 The term *presenting* is also not defined in SSARS. Again, the accountant will have to use his or her professional judgment to determine if financial statements have been presented to a client. Obviously, physically presenting printed financial statements would meet the definition used here. Other situations, especially those involving electronic presentation (for exmple, via e-mail) should be carefully considered.

.70 The issue of *submission* should be addressed early in engagement planning. This issue, along with the needs of the client and other financial statements users, is essential to determining the type of engagement to perform.

[*The next page is 2201.*]

AAM Section 2200

Engagement Planning and Administration

.01 It is important to remember that when engaged to provide compilation or review services, the accountant must comply with Rules 201, *General Standards*, and 202, *Compliance With Standards*, respectively, of the AICPA's Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 201.01 and 202.01). Rule 201 requires that an AICPA member comply with the following standards and any interpretations thereof by bodies designated by its Council:

- *Professional Competence*—Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.
- *Due Professional Care*—Exercise due professional care in the performance of professional services.
- *Planning and Supervision*—Adequately plan and supervise the performance of professional services.
- *Sufficient Relevant Data*—Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.02 Rule 202 requires that an AICPA member who performs audit, review, compilation, management consulting, tax or other professional services comply with standards promulgated by bodies designated by Council.

Client and Engagement Selection

.03 Prior to accepting an engagement to perform a compilation or review for all prospective clients, the accountant should consider if he or she wishes to be associated with them. Factors such as the ability of the accountant to adequately serve the client, the fee arrangement, client integrity, etc., need to be considered.

.04 The firm's client acceptance and continuance policies represent a key element in mitigating litigation and business risk. The firm must be aware that the integrity and reputation of a client's management could reflect on the reliability of the client's accounting records and financial representations, and therefore on the firm's reputation or involvement in litigation.

.05 Although professional standards do not require consideration of the following elements, you might consider them in determining whether or not to accept a client. Certain of these elements may not be applicable to every engagement. Practitioners should exercise professional judgment in determining the applicability of each of the following to the acceptance or continuance of a specific engagement.

- Information that might bear on the integrity or competence of management. Is there information that gives reason to doubt the integrity or competence of management?
- Past experience with management. Have past experiences on other engagements been positive?
- Independence and objectivity considerations.
- Communication with predecessor accountants or auditors.
- Assessment of management's commitment to the appropriate application of generally accepted accounting principles. Inquire of the prospective client about its significant accounting policies.

- Assessment of management's commitment to implementing and maintaining effective internal control. Inquiring of management regarding its commitment to implementing and maintaining effective internal control including anti-fraud programs and controls and inquiring about the entity's control environment, risk assessment process, information and communications systems relevant to financial reporting, and control and monitoring activities that are in place and any changes that management believes should be made to enhance the effectiveness of the entity's internal control.
- Assessment of the entity's financial viability.
- Inquiry of third parties.
- Other considerations. The following listing of other considerations is not intended to be all-inclusive and the firm should consider whether other conditions are present that may create significantly increased risk, and carefully assess those conditions that are identified.
  — Restrictions on scope of services.
  — Entities under common control.
  — One-time engagements.
  — Business and industry environment.

.06 The client acceptance procedures also should require the firm to consider its ability to provide professional services, with reference to industry expertise, size of engagement, and personnel available to staff the engagement.

.07 Some of the following tips may be helpful when evaluating a potential client (although none of these procedures is required by professional standards):

- *Gain access to available financial information.* Review the prior year's financials, with emphasis on leverage for debt. Look at the client's assets and sources of income, as well as the current condition of accounting records.
- *Review S&P, Moodys, or other publications.* Many localities provide a local or regional "S&P" in conjunction with the *Daily Journal of Commerce* or similar business publication. There is a plethora of available information on the Web. In addition, many firms offer database searches of financial, legal, and operational information, as well as personal information about key executives. Check the court dockets (including the U.S. Bankruptcy and Tax Court dockets) in the area where the client is domiciled.
- *Meet with financial persons of the company.* Ask for a brief overview of their internal practices and procedures, the business plan, bylaws, staff turnover, and so on. Representatives from other departments may provide information as well.
- *Discuss the prospective client with former accountants* (after the client provides written authorization).

.08 It is often useful to complete a "Client Acceptance and Continuance Form" to assist in determining whether or not to accept a client. An illustrative client acceptance form can be found in AAM section 2200.67.

Documentation

.09 Whether or not an engagement is accepted or a professional relationship continued, the firm should appropriately document its consideration of the elements of the acceptance and continuance process. If the prospective client becomes or is continued as an attest client of the firm, the firm should comply with its document retention policies regarding the client acceptance and/or continuance consideration. The documentation with respect to prospective clients not accepted need only be retained for purposes of review by the appropriate level of firm management.

Client Needs

.10 Generally, the cost of a review will be more than a compilation, and the cost of a compilation with full disclosure will be more than a compilation that omits substantially all disclosures. These cost considerations should be carefully explained and evaluated with the client. In addition, special consideration should be given to the issues of independence and the demands of bankers and other creditors.

.11 Several issues must be considered in determining the best type of engagement for a particular client, including:

- *Needs of third parties.* Does a third party (for example, a bank) need financial statements on a regular basis?
- *Cost-benefit considerations.* Which engagement can be performed at a reasonable cost to the client?
- *Risk management considerations.* Some practitioners may perceive the "management-use-only" compilation as potentially more risky than a "traditional"[1] compilation. Others, however, see the specific representations and restrictions agreed to in the engagement letters for management-use-only engagements as additional protections that are not present in the report that accompanies a traditional compilation engagement.

.12 If the client does not need audited financial statements, the accountant can choose from these four types of engagements:

- A review (if the accountant is independent and the client needs a moderate level of assurance on the financial statements)
- A traditional compilation[2] (the minimum level of service required if third parties will use the financial statements)
- A management-use-only compilation[3] (available if third parties will not use the financial statements)
- Bookkeeping services (available if the procedures do not include the submission of financial statements)

Traditional Versus Management-Use-Only Compilation

.13 AR section 100.04, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), defines a *compilation* as follows:

> Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

.14 This definition does not require the accountant to test, verify, or corroborate information supplied by management, but, simply, to place the information into the form of financial statements.

.15 AR section 100.01, as amended, now provides for two types of compilations:

- A compilation with a report is required when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects that the financial statements may be used by a third party. This type of engagement might be referred to as a *traditional compilation.*
- A compilation without a report is available when the accountant does not reasonably expect the financial statements to be used by a third party. This type of engagement might be referred to as a *management-use-only compilation.*

---

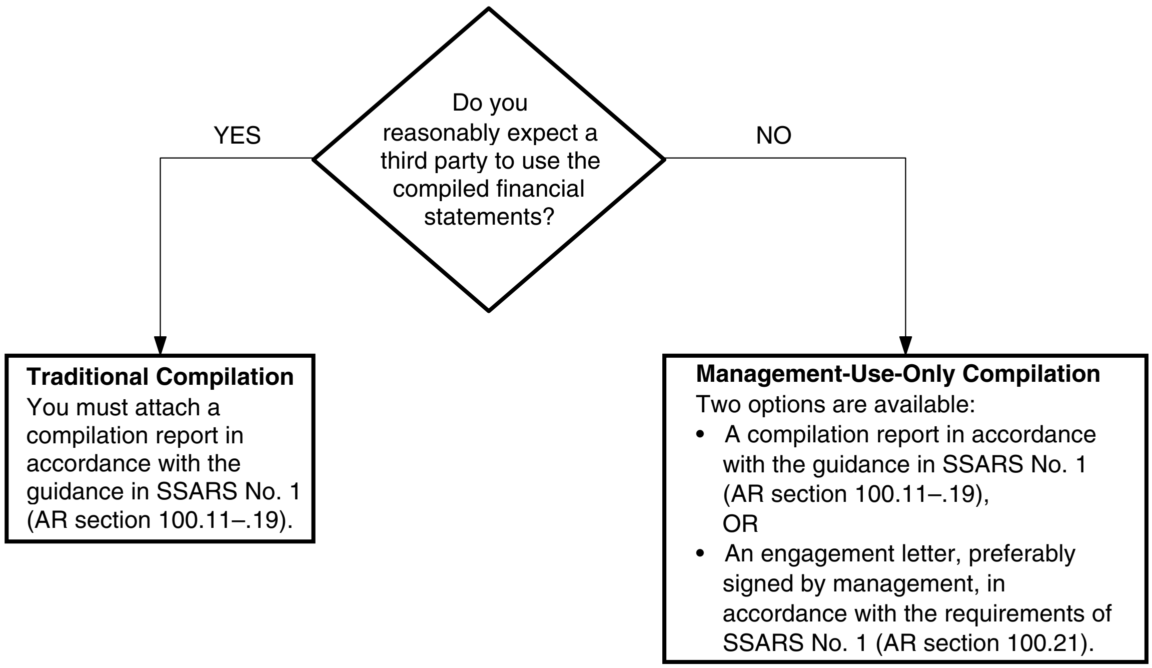
[1] See paragraph .15 for more information about types of compilations.

[2] See paragraph .15 for more information about types of compilations.

[3] See paragraph .15 for more information about types of compilations.

.16 In either case, the engagement is a compilation requiring that the accountant comply with the performance requirements of Statement on Standards for Accounting and Review Services (SSARS) No. 1, *Compilation and Review of Financial Statements* (AICPA, Professional Standards, vol. 2, AR sec. 100). The difference between the two options lies in the form of communication used in the engagement. See Exhibit 2200-1.

Exhibit 2200-1—Communication Options in Compilation Engagements



.17 Though not required by professional standards, you might consider making the decision about the best type of engagement for the client early in engagement planning and base that decision on a combination of (1) the needs of the client and other users, (2) knowledge of the client, and (3) the nature of the procedures that will be performed.

.18 If the client does not need compiled financial statements (taking into account the needs of the client and other users), the accountant may, instead, choose to perform only bookkeeping services. Other than the broad general ethical guidance available in ET section 201 of AICPA Code of Professional Conduct, there are no authoritative standards for bookkeeping services. Thus, it is wise to at least establish a written understanding with the client concerning bookkeeping services. This understanding should include:

- A description of the nature and limitations of the services.
- A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts.

.19 Although not an authoritative requirement in a traditional compilation engagement, a written engagement letter for a bookkeeping services engagement could be important because there are no specific standards to follow for these types of engagements. Other professional engagements, such as audits, reviews, and compilations, include the added benefit of authoritative standards that define the engagement objectives, limitations, communication, and so on. An illustrative engagement letter for a bookkeeping service engagement can be found in AAM section 2200.71, *Engagement Planning and Administration*.

Independence Issues

.20 If an accountant is not independent, he or she can only issue a compilation report (with report modification). If the client needs reviewed or audited financial statements, the nonindependent CPA should refer the client to another CPA. The primary rules governing independence are found in the *Independence* section of the AICPA Code of Professional Conduct. The independence standards are contained in Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101), along with the associated interpretations and ethics rulings. Rule 101 states:

> *A member in public practice shall be independent in the performance of professional services as required by standards promulgated by bodies designated by Council.*

.21 Independence is the foundation of the attest function. Third party users rely on the CPA's opinion in a review engagement because they believe the conclusion is impartial and unbiased.

.22 In the final analysis, independence in mental attitude means objective consideration of facts, unbiased judgments, and honest neutrality on the part of the CPA in forming and expressing conclusions. Independence in mental attitude presumes an undeviating concern for an unbiased conclusion.

.23 The appearance of independence is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests.

.24 On February 28, 2007, the AICPA's Professional Ethics Committee issued a revision to Interpretation No. 101-3, "Performance of Nonattest Services," of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05), which applies to AICPA members. The revised Ethics Interpretation modifies the independence requirements of the forensic accounting services provisions, and tax provisions, and makes them more restrictive starting February 28, 2007.

.25 Ethics Interpretation No. 101-3 states that a member who performs attest services should not perform management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client's management in performing its functions and making decisions.) If a member is engaged to perform nonattest services, the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed
- Accept responsibility for the results of the services

.26 The member should be satisfied that the client will be able to meet all these criteria and to make an informed judgment on the results of the member's nonattest services. Assessing the competency of the client's designated employee is a matter of professional judgment. The member should be satisfied that the employee understands the services to be performed sufficiently to oversee them. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with the necessary competence to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member's provision of nonattest services would impair independence. Before performing nonattest services, the member should establish and document in writing the client's acceptance of its responsibilities, as well as the objectives of the nonattest engagement, services to be performed, member's responsibilities, and any limitations of the engagement. Code of Professional Conduct ET section 101 provides examples of nonattest services and whether performance of those services would impair independence.

.27 As with many rules and standards of the profession, the guidance for independence is continually changing to meet the developments and pressures facing the profession. Nevertheless, CPAs and their firms should take steps to ensure they meet the independence requirements before performing any review engagement service for a client.

Understanding the Engagement

.28 Paragraph 5 of SSARS No. 1, as amended by SSARS No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (See AR section 100.05), states that the accountant should establish an understanding with the entity, preferably in writing, regarding the services to be performed. If the engagement is to compile financial statements not expected to be used by a third party, a written communication is required. (See AR section 100.20–.21.)

Establishing an Understanding With the Client

.29 As noted in the previous paragraph, SSARS No. 1 (See AR section 100.05) requires the CPA to obtain an understanding with the client. This understanding should include:

a. A description of the nature and limitations of the services.

b. A description of the report the accountant expects to render.

c. A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts.

d. A statement that the accountant will inform the appropriate level of management of any material errors, of any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures, that fraud or an illegal act may have occurred.[4] The accountant need not report any matters regarding illegal acts that may have occurred that are clearly inconsequential and may reach agreement in advance with the entity on the nature of any such matters to be communicated.

.30 If the financial statements are not expected to be used by third parties (management-use-only compilation), the documentation of understanding should include the following descriptions or statements, according to paragraph 21 of SSARS No. 1, as amended by SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1* (AIPCA, *Professional Standards*, vol. 2, AR sec. 100.21):

- The nature and limitations of the services to be performed.
- A compilation is limited to presenting in the form of financial statements information that is the representation of management.
- The financial statements will not be audited or reviewed.
- No opinion or any other form of assurance on the financial statements will be provided.
- Management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.
- Acknowledgement of management's representation and agreement that the financial statements are not to be used by third parties.
- The engagement cannot be relied upon to disclose errors, fraud, or illegal acts.

---

[4] Whether an act is, in fact, fraudulent or illegal is a determination that is normally beyond the accountant's professional competence. An accountant, in reporting on financial statements, presents himself or herself as one who is proficient in accounting and compilation or review services. The accountant's training, experience, and understanding of the client and its industry may provide a basis for recognition that some client acts coming to his or her attention may be fraudulent or illegal. However, the determination as to whether a particular act is fraudulent or illegal would generally be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law. This guidance is effective for compilations and reviews of financial statements for periods ending after December 15, 2005, by Statement on Standards for Accounting and Review Services (SSARS) No. 12.

.31 According to paragraph 21 of SSARS No. 1, as amended by SSARS No. 8 (See AR section 100.21), the documentation of understanding should also address the following additional matters, if applicable:

- Material departures from generally accepted accounting principles (GAAP) or an other comprehensive bases of accounting (OCBOA) may exist and the effects of those departures, if any, may not be disclosed.
- Substantially all disclosures (and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted.
- Lack of independence.
- Reference to any supplementary information.

.32 A written engagement letter, though not required in a traditional compilation engagement, provides a means of formalizing the understanding between the accountant and the client concerning the services to be rendered. Engagement letters are advantageous for several reasons:

- They help to avoid client misunderstandings.
- They help to avoid staff misunderstandings.
- They reduce potential legal liability.
- They improve practice management.
- They clarify contractual obligations.

What to Include in an Engagement Letter

.33 The following items of information to include in an engagement letter are suggestions only; these items do not represent authoritative requirements:

- Identification of the client
- Record retention policy
- Description of the services to be provided
- Responses to subpoenas and outside inquiries
- Staffing of the engagement
- Explanation of how fees and costs will be billed
- Description of client responsibilities
- Payment terms
- Designation of client contacts
- Consequences of non-payment
- Timing of the work
- Alternative dispute resolution
- Consequences of extending completion deadlines
- Withdrawal and termination

- Requests for additional services
- Client signature
- Client communications required by the AICPA
- Provisions to resolve potential ethical conflicts
- Any matter or terms unique to an engagement that are agreed upon in advance of rendering services

Overcoming Client Resistance to an Engagement Letter

.34 If you should encounter a situation in which your client exhibits reluctance about or resentment to an engagement letter, presenting the engagement letter face-to-face usually is sufficient to overcome any resistance on the part of the client.

.35 As an alternative to having the client sign an engagement letter, the accountant may consider developing a letter of understanding and mailing it to the client as a confirmation of the oral understanding. If an engagement letter is not obtained, the accountant should prepare a memorandum for the working papers describing the understanding with the client.

.36 Management is not required to sign the engagement letter, but it is preferable and highly advisable. Obtaining management's signature on the engagement letter helps to ensure that management has read and understands the letter and the engagement. If the engagement letter is mailed to the client, it may be advisable to send the letter by certified mail or another means that would provide proof of receipt. In any case, a copy of the engagement letter should be included in the working papers.

Engagement Letters for Monthly, Quarterly, or Comparative Statements

.37 One engagement letter can be drafted to cover financial statements issued for a period of time, such as a year, or for comparative financial statements issued for multiple periods. It is also possible to use one engagement letter for all services to be performed (compilation, review, consulting, bookkeeping, tax services, etc.). However, care should be taken when addressing multiple levels of service (for example, compilation and review) in one engagement letter, as this can be confusing to the client.

Minimizing Liability to Third Parties

.38 In certain cases, it may be beneficial to identify in the engagement letter any third parties that the accountant knows will rely on the compilation or review report to limit the ability of unknown third parties' use of the financial statements. For example, if the accountant knows at the time of the engagement that the client is negotiating with a bank for a loan of $100,000, the following language might be added to the engagement letter:

> We understand that you are negotiating with Last National Bank for a loan of $100,000 and that the purpose of our report on your financial statements is to enable you to present the compiled [reviewed] financial statements to Last National Bank. We are not aware of any other persons, entities, or limited groups of persons or entities for whose use or benefit this report is intended or contemplated.

.39 The use of language such as this in engagement letters varies in practice. Some CPAs feel that the language may offend clients or actually increase the likelihood of litigation from the identified third party. Before adding such language, the accountant should consult with legal counsel.

.40 Illustrative engagement letters for compilation engagements are presented in AAM section 2200.68.

Practice Tip

Care should be exercised in adding additional services to the engagement letter. Although it is common to address additional services such as bookkeeping, tax, payroll, and consulting in this engagement letter, it is not advisable to include both the management-use compilation and traditional (unrestricted) compilation engagements in the same engagement letter. Should the client need compiled financial statements for third party use, it is recommended that a separate engagement letter be issued in order to reduce the risk of misunderstanding and confusion about the two types of engagements.

Also, be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. You should also make sure that a final engagement letter is always issued in such circumstances.

Change in Engagement Level of Service

.41 Occasionally, during the course of an engagement, the client may request that the CPA change the nature of the engagement. The request may be for a:

- Step-up—for example, from a compilation to a review
- Change in service—for example, from a management-use-only compilation to a traditional compilation or from a traditional compilation to a review
- Step-down—for example, from an audit to a review or compilation
- Step-down—for example, from a review to a compilation
- Change in service—from a compilation with disclosures to a compilation without disclosures
- Change in service—for example, from a traditional compilation to a management-use-only compilation, or from a management-use-only compilation to bookkeeping services

Step-Ups

.42 SSARS No. 1 does not specifically address step-ups. Generally, step-ups pose no issues of great concern. The CPA must:

- Determine what additional procedures and standards are required for the level of service requested.
- Determine whether it is possible and practical to perform the procedures and comply with the standards.
- Revise the understanding with the client.

.43 If the client needs financial statements for third-party use, the accountant may compile, review, or audit the financial statements for that client and comply with the reporting requirements in AR section 100. The accountant may do this even if he or she has previously compiled the financial statements for management's use only.

Practice Tip

You may want to include language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use (compiled, reviewed, or audited), you can provide that service separately.

Step-Downs and Changes in Service

Step-Down From Audit to Review or Compilation

.44 SSARS No. 1 (See AR section 100.63) lists three reasons that might cause a client to request a change from an audit engagement to another type of engagement after an audit has begun:

- A change in circumstances affecting the entity's requirement for an audit
  - For example, a bank may no longer require an audit because a line-of-credit is reduced to a level that does not require audited financial statements.
  - Generally, a step-down in this case is acceptable.
- A misunderstanding as to the nature of an audit, review, or compilation services originally available
  - Generally, a step-down in this case is acceptable.
  - The CPA should, however, explain all of the options available to the client.
- A restriction on the scope of the audit, whether imposed by the client or caused by circumstances
  - The implications of a scope restriction need to be considered carefully.
  - SSARS No. 1 describes two circumstances that would preclude a step-down:
    1) The accountant has been prohibited from corresponding with the entity's legal counsel.
    2) The management or owner has refused to sign a client representation letter.

Step-Down From Review to Compilation

.45 SSARS No. 1 lists three reasons that might cause a client to request a change after a review has begun:

- A change in circumstances affecting the entity's requirement for a review
  - For example, a bank may no longer require a review because a line-of-credit is reduced to a level that does not require audited financial statements.
  - Generally, a step-down in this case is acceptable.
- A misunderstanding as to the nature of an audit, review, or compilation services originally available
  - Generally, a step-down in this case is acceptable.
  - The CPA should, however, explain all of the options available to the client.
- A restriction on the scope of the inquiries or analytical procedures, whether imposed by the client or caused by circumstances.
  - The implications of a scope restriction need to be considered carefully.
  - The management's or owner's has refusal to sign a client representation letter would preclude a step-down.

Change in Service From Full Disclosure to Omission of Substantially All Disclosures

.46 The accountant can agree to a request to change in service from a compilation with full disclosure financial statements to a compilation with financial statements that omit substantially all disclosures only if, to the best of his knowledge, the omission of disclosures is not intended to mislead those who might reasonably be expected to use the statements.

Change in Service From a Traditional Compilation to a Management-Use-Only Compilation

.47 The accountant can agree to a request to change in service from a traditional compilation to a management-use-only compilation if (1) he or she does not reasonably expect the financial statements to be used by a third party, (2) nothing comes to the accountant's attention that contradicts management's representation that the financial statements will not be used by a third party, and (3) the accountant documents his or her understanding with the client through the use of a written engagement letter.

Step-Down From a Management-Use-Only Compilation to a Bookkeeping Engagement

.48 The accountant can agree to a request to step-down from a management-use-only compilation to bookkeeping services if the accountant feels that the services will not constitute preparing and presenting financial statements to the client or third parties.

Communications Between Predecessor and Successor Accountants

.49 AR section 400, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2), establishes guidance for communication between predecessor and successor accountants. Unlike AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1), which requires such communication between predecessor and successor auditors, AR section 400 does not require a successor accountant to communicate with a predecessor accountant in connection with acceptance of a compilation or review engagement, but he or she may believe it is beneficial to obtain information that will assist in determining whether to accept the engagement. The successor accountant may consider making inquiries of the predecessor accountant when circumstances such as the following exist:

- Information about the prospective client is limited or requires special attention.
- The change in accountants occurs substantially after the end of the accounting period for which financial statements are to be compiled or reviewed.
- The client has frequently changed accountants.

.50 The successor accountant should bear in mind that the predecessor accountant and the client may have disagreed about accounting principles, procedures applied by the predecessor accountant, or similarly significant matters.

.51 The successor accountant should request permission from the prospective client to make any inquiries of the predecessor accountant. Except as permitted by the AICPA Code of Professional Conduct, an accountant is precluded from disclosing any confidential information obtained in the course of an engagement unless the client specifically consents. Accordingly, if the successor accountant decides to communicate with the predecessor, the successor accountant should request the client to (*a*) permit the successor accountant to make inquiries of the predecessor accountant and (*b*) authorize the predecessor accountant to respond fully to those inquiries. If the prospective client refuses to permit the predecessor accountant to respond or limits the response, the successor accountant should inquire about the reasons and consider the implications of that refusal in connection with acceptance of the engagement (see AR section 400.04).

Inquiries Regarding Acceptance of the Engagement

.52 According to AR section 400.05, if a successor accountant decides to communicate with the predecessor accountant, either orally or in writing, the inquiries should be specific and reasonable regarding matters that will assist the successor accountant in determining whether to accept the engagement. Matters subject to inquiry would include:

- Information that might bear on the honesty or integrity of management.
- Disagreements with management about accounting matters or performance of compilation or review procedures or similarly significant matters.

- Cooperation from management when additional or revised information is needed.
- Predecessor's knowledge of any fraud or illegal acts perpetrated within the client.
- Predecessor's understanding of the reason for the change of accountants.

.53 AR section 400.06 does require the predecessor accountant, when authorized by the client, to respond promptly and fully to the inquiries on the basis of known facts. If the predecessor accountant decides, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor accountant should indicate that the response is limited. (Note that unpaid fees are not considered to be an unusual circumstance for purposes of this paragraph; however, see the paragraph below.) The successor accountant should consider the reasons and consider the implications of such a response in connection with acceptance of the engagement.

.54 If authorized by the client, AR section 400.08 states that the predecessor accountant should ordinarily make available certain work papers relating to matters of continuing significance and those relating to contingencies, for example. However, valid business reasons may lead the predecessor accountant to decide not to allow access to the work papers. Unpaid fees constitute a valid business reason to deny access to the predecessor accountant's workpapers. The predecessor accountant may decide to reach an understanding with the successor accountant about the use of the working papers. Before permitting access to the working papers, the predecessor accountant may wish to obtain a written communication from the successor accountant regarding the use of the working papers. The Appendix of AR section 400 contains an illustrative successor accountant acknowledgement letter presented for illustrative purposes only and is not required by professional standards. In addition, a predecessor accountant is not obligated to make himself or herself or the work papers available to more than one prospective successor accountant.

Materially Misleading Financial Statements

.55 If during the engagement, the successor accountant becomes aware of information that causes him or her to believe that the financial statements reported on by the predecessor accountant may need to be revised, the successor accountant should request the client to communicate the matter to the predecessor accountant. AR section 100.59, as amended, provides guidance to the predecessor accountant in determining an appropriate course of action. If the client refuses to do so or if the predecessor accountant's response is inadequate, the successor accountant should evaluate (*a*) possible implications for the current engagement and (*b*) whether to resign from the engagement. Furthermore, the successor accountant may decide to consult with legal counsel in determining an appropriate course of further action.

Subsequent Discovery of Facts

.56 After compiling or reviewing a client's financial statements and issuing a report, the accountant may become aware of facts that lead him or her to believe that information supplied by the entity may have been incorrect, incomplete, or otherwise unsatisfactory had the accountant then been aware of such facts. In this case, the accountant may wish to consider the guidance in AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AICPA, *Professional Standards*, vol. 1).

.57 You might consider these two factors in determining the appropriate course of action:

- *The reliability of the information*. If the accountant believes that the information is reliable and that it existed at the date of the report, and if the information indicates that the financial statements, the report, or both need revision, the accountant would ordinarily conclude that persons known to be relying on or likely to rely on the financial statements should be notified in an appropriate manner.

- *The existence of persons known to be relying on or likely to rely on the financial statements.* In evaluating the likelihood that users are currently relying on or likely to rely on the financial statements, the accountant should consider the time elapsed since the financial statements were issued.

.58 Because of the legal implications involved in these actions, the accountant should consider consulting with an attorney before proceeding.

Management-Use-Only Financial Statements Distributed to Third Parties

.59 AR section 100.23 states the following:

> If the accountant becomes aware that the financial statements have been distributed to third parties, the accountant should discuss the situation with the client and request that the client have the statements returned. If the client does not comply with this request within a reasonable period of time, the accountant should notify known third parties that the financial statements are not intended for third-party use, preferably in consultation with his or her attorney.

.60 If the accountant determines that the financial statements were given to a third party unintentionally (for example, the client made a mistake or forgot about the restricted nature of the financial statements), then he or she should remind the client of the restricted nature of the statements and request that the client retrieve all copies from third parties. If the client complies, then there is no need for further action.

.61 However, if the accountant discovers that the client intentionally disregarded the restriction placed on the use of the financial statements, and if the client refuses to retrieve the financial statements, then he or she should notify known third parties that the financial statements are not intended for third-party use. The accountant also might consider how such an action on the client's part to intentionally disregard the distribution restriction bears on management's integrity and, as a result, on the performance of any further services for that client.

.62 Some practitioners have suggested that the potential risk of third-party distribution is high and, therefore, may avoid performing the management-use-only type of compilation. However, in our profession, there are other restricted-use professional services that are offered (for example, agreed-upon procedures engagements and projections). If the management-use-only engagement is performed correctly, including obtaining a written engagement letter and placing a legend indicating the restricted nature of the presentation on each page of the financial statements, then the risk of third-party distribution should be very low.

Practice Tip

Notification of third parties would involve legal matters beyond the scope of this Manual, therefore, you should consult with an attorney before taking any action. In order to minimize the risk of a client distributing management-use-only financial statements to third parties, the accountant may want to include language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use that service can be provided separately (see illustrative engagement letter in AAM section 2200.68).

When to Withdraw From an Engagement

.63 The CPA should consider withdrawing from an engagement if any of the following conditions exist:

- He or she determines that he does not have and cannot obtain sufficient knowledge of the client's business or industry.
- The client refuses, or is unable, to provide additional or revised information when the accountant has become aware that information supplied is incorrect, incomplete, or otherwise unsatisfactory.

- Disclosures were omitted with an intent to mislead.
- The CPA determines that he or she is not independent with respect to the entity and reviewed financial statements are required.
- The compiled or reviewed financial statements contain departures from GAAP that the client will not correct and the CPA believes the departures were undertaken with the intention of misleading statement users.
- There have been substantial limitations in the scope of the engagement, particularly in a review engagement when management does not provide a client representation letter.
- Information comes to the accountant's attention that contradicts management's representation that financial statements compiled for management's use only will not be used by third parties.

Key Question and Answer Guidance

.64 The AICPA Practice Aid, *Compilation and Review Engagements—Essential Questions and Answers* (product no. 006622), is an extensive compendium of questions and answers about compilation and review services. The content was assembled by CPAs with extensive knowledge and experience in the compilation and review arena. The questions and answers were developed from inquiries received by the AICPA Accounting and Auditing Technical Hotline, the AICPA Technical Practice Aids, the AICPA Ethics Division, and from the collective knowledge and experience of the authors.

.65 Answering specific questions about compilations and reviews, this Practice Aid covers many topics including:

- Accounting principles
- Engagement administration
- Prescribed forms
- Supplementary information
- Fraud and illegal acts
- Interim financial statements
- Financial statements prepared on an other comprehensive basis of accounting
- Personal financial statements

.66 Moreover, the Practice Aid provides an overview of the standards and guidance associated with compilations and reviews. Developed in an easy-to-read format, *Compilation and Review Engagements—Essential Questions and Answers* is available by calling the AICPA at 888-777-7077 or going online at www.cpa2biz.com.

Client Acceptance and Continuance Form—Part I

Client: ______________________________

Financial Statement Date: ______________________________

INSTRUCTIONS:

Part I: This form should be completed for all prospective clients for which audit, review, or compilation services are to be performed. The date on the form should be completed by the in-charge of the engagement and approved by the engagement partner as a basis for initially accepting the client. Part I should be updated and reviewed annually as a basis for deciding to retain the client.

Part II: Part II should be completed by the engagement partner and concurring partner to document the firm's decision to either accept or reject the client.

CLIENT'S LEGAL NAME:

ADDRESS:

PHONE:	FISCAL YEAR END:

FEDERAL I.D. NO.:	STATE I.D. NO.:

1. Describe the nature of the client's business (and locations, if other than above address):

2. Identify the type of entity (e.g., corporation, proprietorship, partnership, or S corporation):

Client Acceptance and Continuance Form—Part I (continued)

3. List key owners, officers, and directors of the client:

Name	Percentage Owned	Position	Family Relationship

4. Identify any related businesses or individuals:

Name	Nature of Relationship

5. Identify the client's predecessor accountants:

Name:
Address:
Contact Person:

6. Indicate the results of our inquiries of the predecessor accountants regarding the following:

a. Reasons for change of accountant: ____
____
____

b. Integrity of management: ____
____
____

c. Disagreements on accounting principles and auditing, review, or compilation procedures: ________
____
____

d. Fee disputes: ____
____
____

(continued)

Client Acceptance and Continuance Form—Part I (continued)

7. Describe the client's relationship with financial institutions: ______________________
____
____

Name	Type of A/C's or Loans	Account Executive

8. Describe the services our firm is to provide: ______________________
____

.68 Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of my (our) engagement and the nature and limitations of the services I (we) will provide.

I (We) will perform the following services:

1. I (We) will compile, from information you provide, the [*monthly, quarterly, or other frequency*] financial statements of Gowers Drug Stores for the year 20XX. A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) will not audit or review the financial statements and accordingly, will not express an opinion or any other form of assurance on them. The financial statements will not be accompanied by a report.

   Based upon my (our) discussions with you, these financial statements are for management's use only and are not intended for third-party use.

   Material departures from generally accepted accounting principles (GAAP) or other comprehensive basis of accounting (OCBOA) may exist and the effects of those departures, if any, on the financial statements may not be disclosed. In addition, substantially all disclosures required by GAAP or OCBOA may be omitted. [*The accountant may wish to identify known departures.*] Notwithstanding these limitations, you represent that you have knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements that allows you to place the financial information in the proper context. Further, you represent and agree that the use of the financial statements will be limited to members of management with similar knowledge.

   The financial statements are intended solely for the information and use of [*include list of specified members of management*] and are not intended to be and should not be used by any other party.—[*optional*]

2. I (We) will also [*discussion of other services—optional*]

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management* of any material errors, of any evidence or information that comes to my (our) attention during the performance of compilation procedures, that fraud or an illegal act may have occurred, unless clearly inconsequential.

We are not independent with respect to [*name of entity*].—[*if applicable*]

The other data accompanying the financial statements are presented only for supplementary analysis purposes and will be compiled from information that is the representation of management, without audit or review, and I (we) will not express an opinion or any other form of assurance on such data.—[*if applicable*]

In view of the limitations described above, you agree not to take or assist in any action seeking to hold me (us) liable for damages due to any deficiency in the financial statements I (we) prepare and you agree to hold

* When fraud or an illegal act involves senior management, the accountant should report the matter to an individual or group at a higher level within the entity, such as the board of directors. Refer to SSARS No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005*, for guidance as to the steps the accountant should take to perform the required communication when, during the performance of a compilation or a review engagement, the accountant suspects that fraud or an illegal act may have occurred.

me (us) harmless from any liability and related legal costs arising from any third-party use of the financial statements in contravention of the terms of this agreement.—[*optional*]

Our fees for these services [*fill in*]

Should you require financial statements for third-party use, I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.[5]

Sincerely yours,

____

.69 Illustrative Engagement Letter for a Compilation of Financial Statements

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

1. I (We) will compile, from information you provide, the annual and interim balance sheets and related statements of income, retained earnings, and cash flows of Gowers Drug Stores for the year 20XX. I (We) will not audit or review such financial statements. My (Our) report on the annual financial statements of Gowers Drug Stores is presently expected to read as follows:

   I (We) have compiled the accompanying balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statement on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

   A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

   My (Our) report on your interim financial statements, which statements will omit substantially all disclosures, will include an additional paragraph that will read as follows:

   Management has elected to omit substantially all of the disclosures *and the display of comprehensive income* required by generally accepted accounting principles. If the omitted disclosures *and the display of comprehensive income* were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

   If, for any reason, I am (we are) unable to complete the compilation of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

2. I (We) will also . . . (discussion of other services).

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management* of any material errors that come to my (our) attention and any fraud or illegal acts that come to my (our) attention, unless they are clearly inconsequential.

* See footnote * in paragraph .68, Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use.

My (Our) fees for these services. . . .

I (We) shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).

Sincerely yours,

____

.70 Illustrative Engagement Letter for a Review of Financial Statements

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide.

I (We) will perform the following services:

1. I (We) will review the balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. My (Our) review will consist primarily of inquiries of company personnel and analytical procedures applied to financial data, and I (we) will require a representation letter from management. A review does not contemplate obtaining an understanding of internal control or assessing control risk, tests of accounting records and responses to inquiries by obtaining corroborating evidential matter, and certain other procedures ordinarily performed during an audit.

   Thus, a review does not provide assurance that I (we) will become aware of all significant matters that would be disclosed in an audit. My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management* of any material errors, of any evidence or information that comes to my (our) attention during the performance of review procedures, that fraud or an illegal act may have occurred, unless they are clearly inconsequential. I (We) will not perform an audit of such financial statements, the objective of which is the expression of an opinion regarding the financial statements taken as a whole, and, accordingly, I (we) will not express such an opinion on them.

   My (Our) report on the financial statements is presently expected to read as follows:

   I (We) have reviewed the accompanying balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of Gowers Drug Stores.

   A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

   Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

   If, for any reason, I am (we are) unable to complete our review of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

2. I (We) will also . . . [discussion of other services].

---

* See footnote * in paragraph .68, Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use.

My (Our) fees for these services. . . .

I (We) shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

____

.71 Illustrative Engagement Letter for a Bookkeeping Engagement

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. So that I (we) can meet your expectations related to the services we will provide, this engagement letter clearly identifies both the services that will be provided and the frequency with which these services will be provided.

I (We) will prepare semi-monthly payroll checks and compute required withholdings based on hours worked, rates of pay, tax jurisdictions, and withholding information provided by you or your representative. You will need to review all payroll checks prior to signing them, and notify me (us) promptly of any errors. I (We) will notify you of required payroll tax deposits. Failure to make these deposits on a timely basis will subject you to penalties and interest.

I (We) will prepare quarterly and annual payroll tax returns, as well as your annual 1099 forms. You will need to review the returns prior to signing them, and notify me (us) promptly of any errors or omissions.

Any significant changes in the number of employees, various miscellaneous deductions, or other items involved could cause an increase in our fees. I (We) also require that you provide complete information in good “working order” for us, with checks and deposits coded to the proper accounts. I (We) will discuss with you in advance any proposed increase in our fees.

I (We) will also assist you with various bookkeeping functions, including consultation on recordkeeping, recording of transactions, and periodic adjustments, among others.

Our work in connection with this engagement is not intended to result in submission or issuance of financial statements by [*Firm*] as defined by Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A submission of financial statements, as defined by professional standards, requires that the CPA present to a client or third parties financial statements that the CPA has prepared manually or through the use of computer software. By your signature below, you understand that the submission of financial statements as defined above is outside the scope of this engagement.

Should you require financial statements (either for management use or third-party use), I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management[*] of any material errors, of any evidence or information that comes to my (our) attention during the engagement, that fraud or an illegal act may have occurred, unless they are clearly inconsequential.

---

[*] See footnote * in paragraph .68, Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use.

I (We) appreciate the opportunity to be of service to you and believe that this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let me (us) know. If the foregoing terms are in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).

Sincerely yours,

____

AAM Section 2300
Compilation Engagements

Type of Compilation

.01 AR section 100.04, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2) defines a *compilation* as follows:

> Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

.02 AR section 100, as amended, now provides for two types of compilations:

- A compilation with a report is required when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects the financial statements to be used by a third party. This might be referred to as a *traditional compilation.*
- A compilation without a report is available when the accountant does not reasonably expect the financial statements to be used by a third party. This might be referred to as a *management-use-only compilation.*

.03 In either case, the engagement is a compilation requiring that the accountant comply with the performance requirements in AR section 100. The difference between the two options lies in the form of communication used in the engagement (see Exhibit 2200-1 in the previous section of this manual for additional details).

What's the Difference Between a Traditional Compilation and Management-Use-Only Compilation?

.04 Some practitioners have suggested that there is no real difference between the traditional compilation and the management-use-only compilation since essentially the same information is communicated in either a compilation report or an engagement letter. Although there are similarities in the two forms of communication, there are substantial differences. Both forms of communication (report and engagement letter) are used to communicate:

- *What the engagement is*—in both cases the CPA tells the user that the financial statements are compiled and explains what a compilation is (presenting in the form of financial statements information that is the representation of management).
- *What the engagement is not*—in both cases the CPA tells the user that the financial statements are not audited or reviewed and that no opinion or any other form of assurance is expressed.
- *Limitations in the financial statements*—in both cases the CPA tells the user about any limitations in the financial statements. In this area, however, the way in which limitations are communicated is very different:
  - — *Traditional Compilation (Report)*—AR section 100.46–.47 states that if the accountant becomes aware of a measurement or disclosure departure in the financial statements, the financial statements should be revised or the report should be modified to disclose the departure. In other words, absent revision of the financial statements, the accountant should add an additional paragraph

to the report to disclose the nature of the departure and disclose the effect of the departure on the financial statements (if the effect is known). The accountant is not required to determine the effects of a departure if management has not done so, provided the accountant states in the report that such determination has not been made.

— *Management-Use-Only Compilation (Engagement Letter)*—AR section 100.21 states that the accountant should include in the engagement letter a statement that material departures from generally accepted accounting principles (GAAP) or an other comprehensive bases of accounting (OCBOA) may exist and the effects of those departures on the financial statements may not be disclosed.

.05 The reason for this difference in communication is based on the intended user of the financial statements. In the case of a traditional compilation, the financial statements are intended to be used by anyone (general-use). Therefore, the limitations must be communicated in such a way as to be understood by anyone, including those not familiar with the financial matters of the entity. In the case of a management-use-only compilation, the financial statements are intended for a limited group of management ("non third parties"). By definition, these members of management have a certain level of knowledge about the business and about the engagement that the accountant is performing. For that reason, the issue of limitations can be handled in a more broad way ("departures may exist") rather than specifically identifying each and every known departure.

.06 In an engagement to compile financial statements for management's use only, a written engagement letter is required. (Note that in all compilation and review engagements an understanding with the client is required.) This engagement letter might address certain matters, as described in AAM section 2200.33, *Engagement Planning and Administration.* It is permissible to issue one engagement letter to cover multiple periods and/or multiple services. However, it is recommended that this engagement letter be updated at least annually. Because client relationships change over time, it is especially important in this type of engagement to ensure that there is a good understanding between the CPA and the client (restricted nature of the statements, limitations of the financial statements).

Performance Requirements for a Compilation Engagement

.07 AR section 100, as amended, states that in all compilation engagements, the performance standards in AR section 100.05 and .07–.10 should be followed.

.08 These performance standards consist of:

- *Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.*

The accountant should have a sufficient understanding of his or her client's industry to know what the financial statements for an entity in that industry should look like and to be aware of any accounting principles or practices that are unique to that industry. The accountant does not have to be an industry expert, and he or she can obtain this general understanding if he or she does not already possess it (for example, through AICPA guides, nonauthoritative industry guides, and trade publications).

- *Have or obtain a general understanding of the client's business.*

The accountant should have a general understanding of the client's business transactions, form of its accounting records, stated qualifications of accounting personnel, basis of accounting on which the financial statements are to be presented, and form and content of the financial statements, according to the standard. The purpose of this general understanding is to determine whether it will be necessary for the accountant to perform other accounting services (such as bookkeeping and adjustments) in order to compile the financial statements.

- *Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.*

This requirement to obtain additional or revised information has different meanings depending upon the intended use of the financial statements. For example, if the financial statements will be used by a third party (or if the accountant reasonably expects that they might be used by a third party), any information that appears to be incomplete, incorrect, or unsatisfactory for use by that third party (for example, missing disclosures or measurement departures) should be obtained from or corrected by the client. On the other hand, if the financial statements are not intended to be used by third parties, then that same information may be sufficient for management, since they have the requisite knowledge of the business to put the information in the proper context.

- *Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.*

This final reading of the financial statements is sometimes called the "smell test." The primary purpose of the smell test requirement is to look for mathematical or clerical errors, presentation errors (for example, incorrect titles on the financial statements), and others.

Traditional Compilation

Performance Requirements

.09 In order to perform a traditional compilation, the accountant should

- Establish an understanding with the client (See AAM section 2200.29–.40).
- Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.
- Have or obtain a general understanding of the client's business.
- Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.
- Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Reporting Requirements

.10 If the accountant submits financial statements to a client that will be used by a third party (or if he or she reasonably expects that they might be used by a third party), the accountant must comply with the reporting requirements in AR section 100.11–.19.

.11 Illustrative reports for compiled financial statements are included in AAM section 2610, *Accountants' Reports on Compilation of Financial Statements of a Nonpublic Entity*.

Management-Use-Only Compilation

Performance Requirements

.12 In order to perform a management-use-only compilation, the accountant should

- Establish an understanding with the client (See AAM section 2200.29–.40).
- Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.

- Have or obtain a general understanding of the client's business.
- Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.
- Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Third Parties

.13 In deciding whether the financial statements are, or reasonably might be, expected to be used by a third party, the accountant may rely on management's representation without further inquiry, unless information comes to his or her attention that contradicts management's representation. AR section 100.04 defines *third parties* as follows:

> All parties except for members of management who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

.14 This is a definition by exception. In other words, the starting point for determining who is a third party is that *all* parties are third parties, with the exception of certain members of management. Those certain members of management would be those members who are knowledgeable enough about the business to be able to put the information in the proper context. In order to not be considered a third party, the person or persons must meet two requirements:

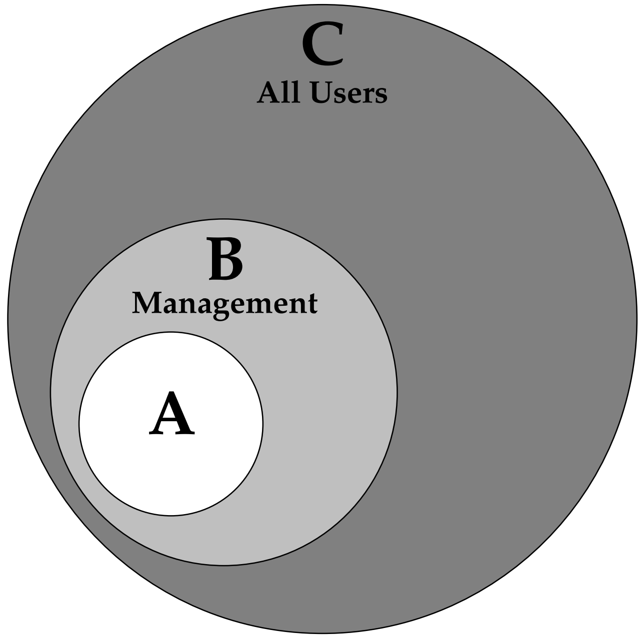
- He or she is a member of management.
- He or she is knowledgeable enough about the business to put the information in the proper context.

.15 For guidance on determining whether or not a person is a member of management, the accountant may refer to Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 57, *Related Party Disclosures*, which includes the following definition:

> Persons who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management normally includes members of the board of directors, the chief executive officer, chief operating officer, vice presidents in charge of principal business functions (such as sales, administration, or finance), and other persons who perform similar policymaking functions. Persons without formal titles also may be members of management.

.16 In Exhibit 2300-1, "Third Parties," circle C represents all potential users of an entity's financial statements (banks, bonding companies, creditors, shareholders, vendors, customers, and so on), and circle B represents all members of management. All users in circle C would be considered third parties. In addition, members of management in circle B—those without the requisite knowledge of the client's business that would allow them to place the information contained in the financial statements in the proper context—also would be considered third parties. Compiled financial statements which do not include a report should be restricted to those parties in circle A—those members of management who have the requisite knowledge of the business.

Exhibit 2300-1—Third Parties



.17 Although some judgment will be involved in making this determination, the accountant may rely on management's representation that they have the necessary knowledge of the business to put the information in the proper context.

.18 This definition does not mean that certain members of management must be thoroughly knowledgeable about technical accounting principles and procedures. Instead, management must be knowledgeable about the nature of the services the accountant is providing and understand the procedures and assumptions he or she is using. Consider these examples of third parties:

- ABC Company is a small, closely-held business, owned and managed by its sole shareholder, John. In this situation, absent evidence to the contrary, John has the requisite knowledge of his business and would not be considered a third party.
- KLM Company is a small, closely-held business, managed by one of its ten shareholders, Jane (the other nine shareholders live out of state and are not involved in the management of the business). In this situation, absent evidence to the contrary, Jane has the requisite knowledge of the business and would not be considered a third party. The other nine shareholders, however, would be considered third parties.
- XYZ Company is a small, closely-held business. The management team consists of a president, Joe; controller, Mary; operations manager, Sue; and sales manager, Jim. Joe, Mary, and Sue are all involved in the financial operation of the company and are knowledgeable about the accounting principles and practices being used. Jim, on the other hand, has no finance background and is not involved in the financial operation of the company. In this example, Joe, Mary, and Sue would not be considered third parties. Jim, although he is a member of management, does not have the requisite knowledge of the accounting practices of the business and would be considered a third party.

.19 Note that those members of management that are considered third parties (Jim in the preceding example) could be "brought into the loop" or removed from third party status. Removing management members from third-party status would occur by educating those members of management about the accounting principles and practices of the business, thereby allowing them to place the information in the proper context. This education could be accomplished by other members of management or by the accountant.

Transmittal Letter for Management-Use-Only Compilation

.20 Some practitioners have questioned whether they should include a transmittal letter with financial statements compiled for management's use only. While a transmittal letter is not required by SSARSs, it is permissible to attach such a letter to management-use-only financial statements. This letter, however, should not contain any language that resembles that found in a traditional compilation report.

Documentation Requirement

.21 AR section 100 does not discuss work paper documentation for a compilation engagement except in the case of the engagement letter in a management-use-only compilation.[1] Although not required, including the type of documentation noted below may be helpful from a risk management and quality control perspective:

- Engagement letter
- Trial balance information to bridge the client's records to the compiled financial statements
- Notes on how incorrect, incomplete, or unsatisfactory matters were resolved, if any
- If required by firm policy, compilation work program, procedural checklists, and disclosure checklists

.22 It's wise to document all client discussions, in person or over the phone. Notations should identify all parties to the discussion, what was said, and by whom. Entries should be initiated and dated by the practitioner. Also, consider potential consequences to the client if they ignore, misinterpret, or fail to act on advice or conclusions. If such actions could result in lost financial benefits or adverse tax consequences to the client, or if action by other professionals is recommended or required, send a follow-up letter to the client explaining the substance of the discussions and detailed recommendations.

.23 Never include unsubstantiated subjective statements in a working paper file. If documenting observations regarding questionable client ethics or possible fraud, list the objective findings that led to this observation. In addition, timesheets should reflect and accurately describe work performed during the engagement. Avoid using terms like "audit" and "review," unless the service performed fits the definitions contained in the AICPA professional standards.

Practice Tip

Remember—all relevant information is potentially subject to discovery in a lawsuit, regardless of the storage medium.

[1] AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), as amended by SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), does require documentation of the understanding with the client in the form of a written engagement letter for a management-use-only compilation (if a compilation report is not to be issued).

.24 Compilation Engagement Program

Client:	**Balance Sheet Date:**
Completed by:	**Date Completed:**

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance and Continuance Form.	
2. Consider whether the firm is independent. If not independent, the compilation report should be modified to indicate that fact.	
3. Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.	
4. If the engagement was originally intended to be an audit or a review, document the appropriateness of the decision to step-down.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.	
7. If there is any indication that information supplied by the entity is incorrect, incomplete or otherwise unsatisfactory, obtain additional or revised information.	
8. Draft and read the financial statements and consider whether:	
a. The financial statements include all required disclosures, unless substantially all disclosures are omitted.	
b. Financial statements prepared in accordance with an OCBOA present proper OCBOA titles and disclose the basis of accounting either in the notes or in the compilation report.	
c. The financial statements are appropriate in form.	
d. The financial statements are free of obvious mathematical or clerical error.	
e. The financial statements are free of obvious measurement departures from GAAP or OCBOA.	
9. Draft the accountant's report.	
10. If the financial statements omit substantially all disclosures required by GAAP or OCBOA, add an additional paragraph to the report disclosing the omission.	

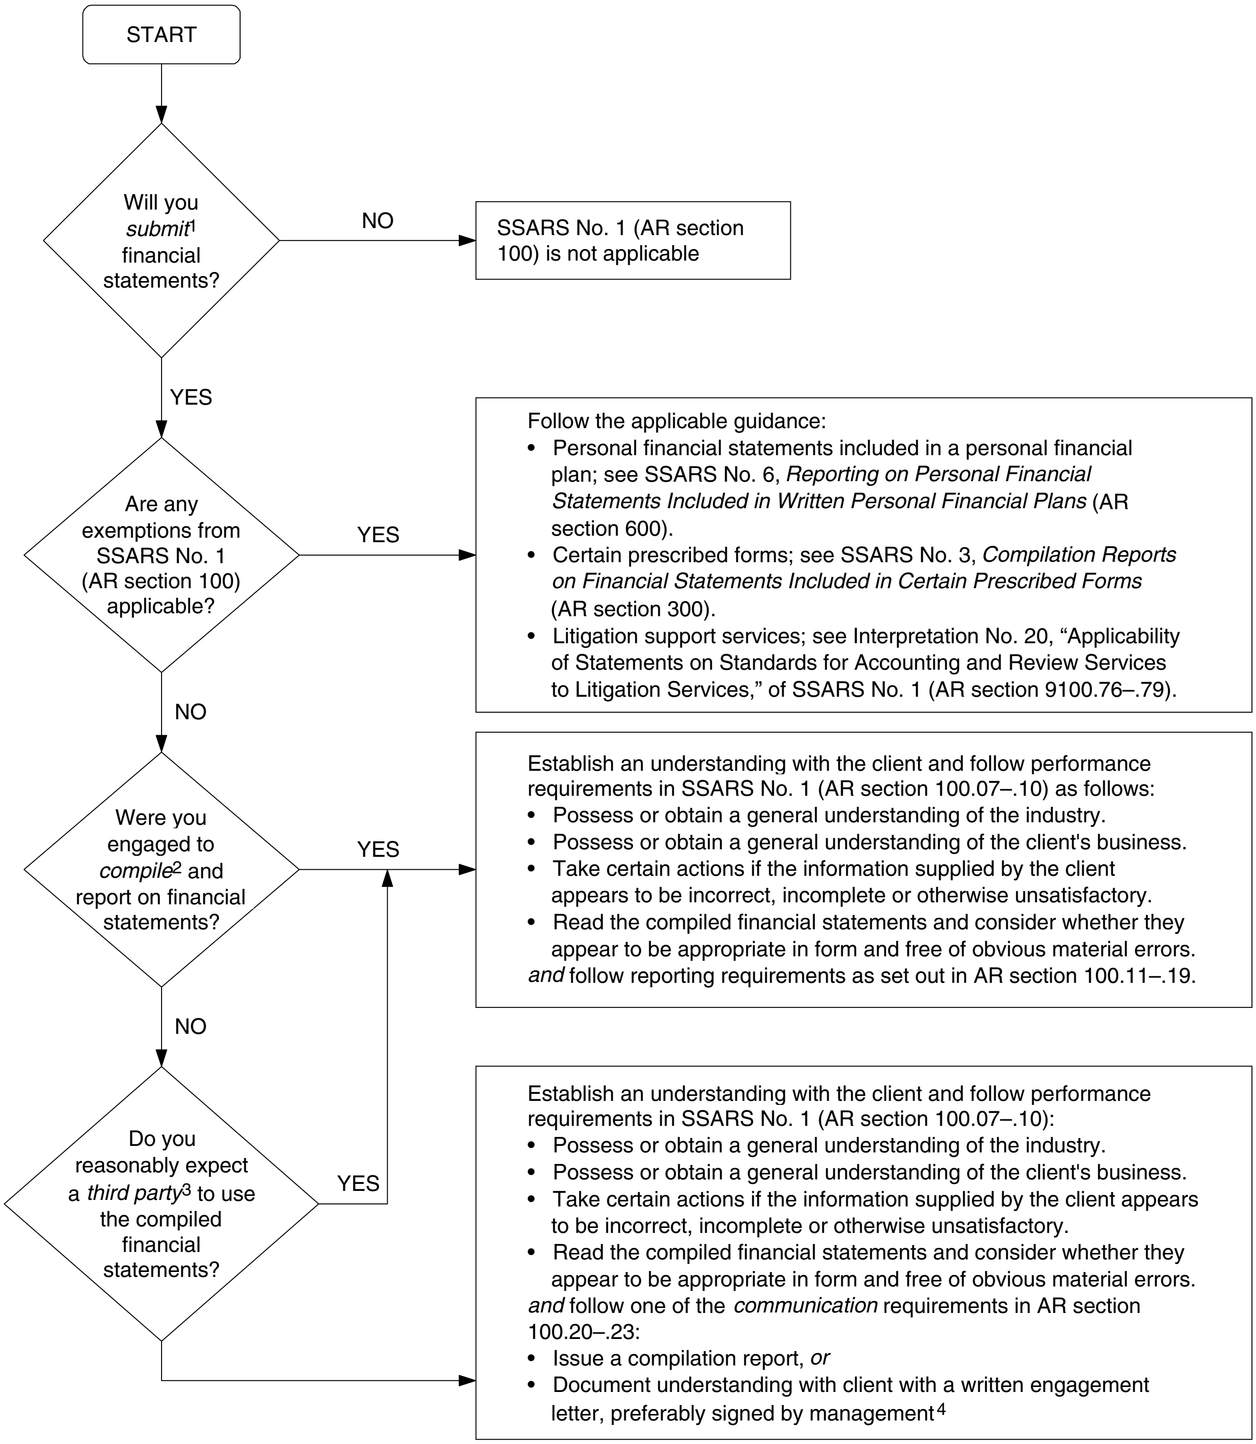
(continued)

Procedure	Completed by or N/A
11. If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:	
a. Revise the financial statements or modify the report to indicate the departure.	
b. If the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.	
c. If modification of the report is not considered adequate, consider withdrawing from the engagement.	
12. If supplementary data accompanies the financial statements, consider referring to the other data in the compilation report or issuing a separate report on the other data.	
13. Include a reference to the report on each page of the financial statements and supplementary data.	
14. Document any other procedures performed or unusual problems and their resolution.	
15. Determine that all required forms and checklists have been completed.	
16. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the work papers.	
17. Date the report as of the date the compilation was completed.	

Compilation of Financial Statements Flowchart

.25 During the initial development of Statement on Standards for Accounting and Review Service (SSARS) No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), the members of Accounting and Review Services Committee designed a flowchart to help guide their discussion about the proposed changes in SSARS No. 1. That flowchart, which appeared in SSARS No. 8, is also useful in explaining how compilation engagements may change due to the issuance of SSARS No. 8. We are including it here with the addition of explanatory notes following.

Exhibit 2300-2—Flowchart of Changes in SSARS No. 1 Resulting From Issuance of SSARS No. 8



[1] *Submission of financial statements*—Presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

[2] *Compilation of financial statements*—Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

[3] *Third parties*—All parties except for management who are generally knowledgeable and understand the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

[4] The engagement letter should include the following matters:

- A description of the nature and limitations of the services to be performed.
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management.
- A statement that the financial statements have not been audited or reviewed.
- A statement that no opinion or any other form of assurance on the financial statements will be provided.
- An acknowledgement that management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.
- An acknowledgement of management's representation and agreement that the financial statements will not be used by third parties.
- A statement that the engagement cannot be relied upon to disclose errors, fraud, or illegal acts.

The engagement letter should also include the following additional matters, if applicable:

- A statement that material departures from GAAP or OCBOA may exist and the effects of those departures on the financial statements may not be disclosed.
- A statement that substantially all disclosures (and the statement of comprehensive income and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted.
- A statement that the accountant is not independent.
- A reference to any supplementary information that may be included.

.26 Management-Use-Only Compilation Engagement Checklist

Client:	Balance Sheet Date:
Completed by:	Date Completed:

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance Form.	
2. Consider whether the firm is independent. If not independent, the engagement letter should be modified to indicate that fact.	
3. Establish an understanding with the client, in writing, regarding the following and include a copy of the engagement letter in the work papers:	
a. Nature and limitations of the services.	
b. A compilation is limited to presenting in the form of financial statements information that is the representation of management.	
c. The financial statements will not be audited or reviewed.	
d. No opinion or any other form of assurance on the financial statements will be provided.	
e. Management has knowledge of the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.	
f. Management representation that financial statements are not to be used by third parties.	
g. Engagement cannot be relied upon to disclose errors, fraud, or illegal acts, and we will inform appropriate level of management of any material errors, of any evidence or information that comes to my (our) attention during the engagement, that fraud or an illegal act may have occurred, unless clearly inconsequential.	
4. If the engagement was originally intended to be another type of engagement, document the appropriateness of the decision to change the engagement.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.	
7. If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.	
8. Draft and read the financial statements and consider whether:	
a. The financial statements are appropriate in form.	
b. The financial statements are free of obvious mathematical or clerical error.	

(continued)

Procedure	Completed by or N/A
9. Include a legend on each page of the financial statements and supplementary data indicating the restricted nature of the presentation.	
10. Document any other procedures performed or unusual problems and their resolution.	
11. Determine that all required forms and checklists have been completed.	
12. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the work papers.

AAM Section 2400
Review Engagements

Overview

.01 Statement on Standards for Accounting and Review Services (SSARS) No. 1 (AICPA, *Professional Standards*, vol. 2, AR sec. 100.04) defines a *review* of financial statements as follows:

> Performing inquiry and analytical procedures that provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications necessary that should be made to the statements in order for them to be in conformity with generally accepted accounting principles (GAAP) or an other comprehensive bases of accounting (OCBOA).

.02 The definition of a review assumes the existence of financial statements as a "precedent" to a review engagement. The accountant may have to perform other accounting services or a compilation prior to the review engagement.

.03 The following performance standards are applicable to a review engagement:

- Establish an understanding with the entity regarding the services to be performed and the report the accountant expects to render (See AAM section 2200.29–.40 for a discussion of engagement letters).
- Have, or obtain, knowledge of the accounting principles and practices of the entity's industry and a general understanding of certain matters related to the entity itself.
- Consider whether it will be necessary to perform other accounting services such as assistance in adjusting the books of account, consultation on accounting matters, or compilation of the financial statements.
- Perform sufficient inquiry and analytical procedures to provide a reasonable basis for expressing limited assurance.
- Take certain actions when the accountant becomes aware that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory.
- Obtain a representation letter from management.
- Document certain items in work papers, as required by SSARS No. 1, as amended by SSARS No. 10 (AR section 100.36–.38).

Knowledge of Accounting Principles and Practices of the Industry

.04 SSARS No. 1 requires the accountant to have knowledge of the accounting principles and practices of the industry in which the entity operates. That knowledge, the sources of obtaining it, and the timing requirements are identical to the requirements for a compilation.

.05 The purpose of having that knowledge is not the same, however. In a compilation, the purpose is to ". . . enable [the accountant] to compile financial statements that are appropriate in form for an entity operating in that industry." In review, an additional purpose is to assist the accountant in constructing inquiries and analytical procedures adequate to provide a reasonable basis for expressing limited assurance.

.06 AR section 100 states that the accountant must possess or obtain certain knowledge about the entity whose financial statements are under review. Since its basic purpose in a review is to enable the accountant to construct appropriate inquiries and analytical procedures, this level of understanding is more extensive than that required for a compilation engagement.

.07 The accountant who performs a review must have a general understanding of:

- Entity's organization
- Operating characteristics of that organization
- Nature of the entity's assets and liabilities
- Nature of the entity's revenues and expenses

.08 In order to obtain this understanding, the accountant would need a general knowledge of the entity's:

- Products and services
- Production, distribution, and compensation methods
- Operating locations
- Material transactions with related parties

Necessity to Perform Other Accounting Services

.09 AR section 100.04 states that "The accountant might consider it necessary to compile the financial statements or to perform other accounting services to enable him to perform a review."

.10 Since the definition of a review assumes the existence of financial statements as a basis for a review, if the statements do not already exist, the accountant may have to prepare books of original entry, post the ledger, prepare a trial balance, and/or compile the financial statements. However, one must consider Independence requirements in relation to conducting a review in this circumstance. In making a judgment about whether he or she is independent, the accountant should be guided by the AICPA Code of Professional Conduct.

.11 In many cases the financial statements may have to be adjusted (for example, accruals, deferrals, depreciation) before they are reviewed.

Inquiries and Analytical Procedures

.12 Procedures for conducting a review of financial statements generally are limited to analytical procedures and inquiries. The accountant performs these procedures to obtain a basis for communicating whether he or she is aware of any material modifications that should be made to the financial statements for them to be in conformity with generally accepted accounting principles. The specific inquiries made and the analytical and other procedures performed should be tailored to the engagement based on the accountant's knowledge of the entity's business. For example, if the accountant becomes aware of a significant change in the entity's operations, the accountant may consider making additional inquiries, employing additional analytical procedures, or both. Professional literature does not indicate how many procedures must be performed in a given engagement to achieve its reporting objective. That is a matter of professional judgment. The extent of the total knowledge the accountant possesses about an entity and the industry in which it operates is the basis for planning the extent of procedures to be performed.

Analytical Procedures

.13 AR section 100.29 states that the accountant should apply analytical procedures to the financial statements to identify and provide a basis for inquiry about the relationships and individual items that appear to be unusual and that may indicate a material misstatement. Analytical procedures should include:

- Developing expectations by identifying and using plausible relationships that are reasonably expected to exist based on the accountant's understanding of the entity and the industry in which the entity operates.
- Comparing recorded amounts, or ratios developed from recorded amounts, to expectations developed by the accountant.

.14 Appendix I of AR section 100 contains examples of analytical procedures an accountant may consider performing when conducting a review of financial statements.

.15 A list of examples of analytical procedures for a review engagement is included in AAM section 2400.48.

.16 Expectations developed by the accountant in performing analytical procedures in connection with a review of financial statements ordinarily are less encompassing than those developed in an audit. Also, in a review the accountant ordinarily is not required to corroborate management's responses with other evidence. However, the accountant should consider the reasonableness and consistency of management's responses in light of the results of other review procedures and the accountant's knowledge of the entity's business and the industry in which it operates.

.17 A basic premise underlying the application of analytical procedures is that relationships among data may reasonably be expected to exist and continue to exist in the absence of known conditions to the contrary.

.18 Specific analytical procedures used are a matter of the accountant's judgment. Therefore, the accountant should tailor the specific procedures to the client based on his or her understanding of the client's business and the industry in which it operates.

.19 In applying analytical procedures in a review engagement, the accountant may achieve both effectiveness and efficiency by using the following approach.

- Identify immaterial account balances or classes of transactions. Apply analytical procedures to them, if needed.
- Identify account balances or classes of transactions to which other accounting services (bookkeeping or payroll services, for example) have been applied. Consider the evidence that has been gathered and whether any material errors are likely to remain. If there is already sufficient evidence for those account balances or classes of transactions to reduce the risk of material misstatement to a moderate level, consider whether applying analytical procedures is needed.
- For the remaining account balances and classes of transactions, develop expectations (for example, using historical trends adjusted for known changes) for them. Note, however, that AR section 100 does not require a formal process of developing and documenting expectations.
- Consider how close the existing account balance or class of transaction comes to the expectation developed in the previous step.
- If the differences are small, no additional evidence may be needed. If the differences are large, material errors could exist. Inquire about valid business reasons for the difference. If the results of inquiry are plausible and agree with other evidence, no additional evidence may be needed.
- If additional evidence is needed, apply other analytical procedures or obtain other suitable evidence.

Inquiries and Other Review Procedures

.20 The following are inquiries the accountant should consider making and other review procedures the accountant should consider performing when conducting a review of financial statements:

a. Inquiries to members of management who have responsibility for financial and accounting matters concerning (see Appendix B of AR section 100):

(1) Whether the financial statements have been prepared in conformity with generally accepted accounting principles consistently applied.

(2) The entity's accounting principles and practices and the methods followed in applying them and procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements.

(3) Unusual or complex situations that may have an effect on the financial statements.

(4) Significant transactions occurring or recognized near the end of the reporting period.

(5) The status of uncorrected misstatements identified during the previous engagement.

(6) Questions that have arisen in the course of applying the review procedures.

(7) Events subsequent to the date of the financial statements that could have a material effect on the financial statements.

(8) Their knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, for example, communications received from employees, former employees, or others.

(9) Significant journal entries and other adjustments.

(10) Communications from regulatory agencies.

b. Inquiries concerning actions taken at meetings of shareholders, board of directors, committees of the board of directors, or comparable meetings that may affect the financial statements.

c. Reading the financial statements to consider, on the basis of information coming to the accountant's attention, whether the financial statements appear to conform with generally accepted accounting principles.

d. Obtaining reports from other accountants, if any, who have been engaged to audit or review the financial statements of significant components of the reporting entity, its subsidiaries, and other investees.[1]

.21 Appendix B of AR section 100 contains illustrative inquiries for a review engagement. However, these illustrative inquires are not intended to serve as a program or checklist in the conduct of a review. The inquiries to be made in a review engagement are a matter of the accountant's judgment. Specific inquiries should be tailored to the client, based on the accountant's understanding of the client's business and the industry in which it operates.

.22 A list of illustrative inquiries for a review engagement is included in AAM section 2400.53.

---

[1] The financial statements of the reporting entity ordinarily include an accounting for all significant components, such as unconsolidated subsidiaries and investees. If other accountants are engaged to audit or review the financial statements of such components, the accountant will require reports from the other accountants as a basis, in part, for the accountant's review report with respect to the review of the financial statements of the reporting entity. The accountant may decide to make reference to the work of other accountants in the accountant's review report on the financial statements. If such reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants.

.23 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with the primary basis for expressing limited assurance that no material modifications should be made to the financial statements. AR section 100 does not specify how many procedures must be performed in order to express the limited assurance. The extent and type of procedures performed is a matter of professional judgment.

.24 AR section 100.35 does allow modification of inquiry and analytical procedures. For example, the accountant may have acquired knowledge about the entity in the performance of audits of the entity's financial statements, compilation of the entity's financial statements, or other accounting services (such as bookkeeping services). This acquired knowledge may be sufficient to reduce the extent of inquiries and analytical procedures, although the accountant would still have the same degree of responsibility with respect to the financial statements (expressing limited assurance that no material modifications should be made to the financial statements).

Analytical Procedures in Initial Review Engagements

.25 Accountants often question how to apply analytical procedures on initial review engagements. For example, how can the accountant evaluate the results of procedures applied for the current year if he or she is unsure whether amounts are comparable with prior years or if the company is newly formed? As stated in the previous section, AR section 100.35 states:

> Knowledge acquired in the performance of audits of the entity's financial statements, compilation of the financial statements, or other accounting services may result in modification of the review procedures described. . . However, such modification would not reduce the degree of responsibility the accountant assumes with respect to the reviewed financial statements.

.26 This allows the accountant to modify his or her inquiries and analytical procedures based on knowledge acquired in the performance of other services. Although AR section 100 does not cite initial engagements as a situation in which the accountant may choose to modify his or her inquiries and analytical procedures, it is reasonable to assume that these procedures could be modified in initial engagements.

.27 In initial review engagements, the accountant may have to rely on other sources of evidence. For example, the accountant may have to rely on making additional inquiries. Or, the accountant may have already compiled the financial statements, or may have provided other accounting or bookkeeping services for the client. In these cases the accountant may rely on knowledge gained from these other services to supplement the limited analytical procedures that can be performed because of insufficient history. Also, the accountant's analytical procedures may also consist of comparisons with results for similar clients or to industry statistics, and of analysis of the interrelationships between accounts in these circumstances.

When the Results of Analytical Procedures Are Unfavorable

.28 When results of analytical procedures are unfavorable (that is, the accountant believes that fluctuations from expected amounts are significant), AR section 100.25 requires the accountant to apply additional procedures. The accountant must achieve limited assurance that no material modifications are necessary to conform the financial statements to GAAP. Sometimes inquiries and analytical procedures will be sufficient. However, in many cases, the accountant will combine additional inquiry or analytical procedures with preparing other accounting schedules or analyses to explain fluctuations.

.29 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with the primary basis for expressing limited assurance that no material modifications should be made to the financial statements. AR section 100 does not specify how many procedures must be performed in order to express the limited assurance. The extent and type of procedures performed is a matter of professional judgment.

.30 An illustrative ratio analysis worksheet is included in AAM section 2400.54, and an illustrative analytical procedures comparative report is included in AAM section 2400.55.

Awareness Concerning Information Supplied

.31 AR section 100.25 states that a review does not contemplate various procedures that are ordinarily performed during an audit. However, it goes on to state that ". . . the accountant may become aware that information coming to his or her attention is incorrect, incomplete, or otherwise unsatisfactory. If any evidence or information comes to the accountant's attention regarding fraud or an illegal act that may have occurred, the accountant should request that management consider the affect of the matter on the financial statements. Additionally, the accountant should consider the affect of the matter on his or her review report. In circumstances where the accountant believes the financial statements are materially misstated, the accountant should perform the additional procedures deemed necessary to achieve limited assurance . . ."

.32 If the accountant is unable to perform the inquiry and analytical procedures he considers necessary to achieve limited assurance contemplated by a review, the accountant's review will be incomplete. Under these circumstances, the accountant will not have attained his original objective and accordingly cannot express limited assurance.

.33 AR section 100.43 also states that "when an accountant is unable to perform the inquiry and analytical procedures he or she considers necessary . . . the review will be incomplete." A review that is incomplete is not an adequate basis for issuing a review report. In such a situation, the accountant should also consider whether it is appropriate to issue a compilation report on the financial statements.

Representation Letters

.34 Written representations are required from management for all financial statements and periods covered by the accountant's review report. The specific written representations obtained by the accountant will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. In connection with the review of the financial statements presented in accordance with GAAP, specific representations should relate to the following matters:[2]

- Management's acknowledgement of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity generally accepted accounting principles.
- Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.
- Management's acknowledgement of its responsibility to prevent and detect fraud.
- Knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, including any communications received from employees, former employees, or others.
- Management's full and truthful response to all inquiries.
- Completeness of information.
- Information concerning subsequent events.

.35 Like the inquiries and analytical procedures in a review engagement, the management representation letter should be tailored to the client based on the accountant's knowledge of the client's business and the

[2] Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles. The specific representations to be obtained should be based on the nature and basis of representation of the financial statements being reviewed.

industry in which it operates. Additional representations may be added to the letter, especially if the client operates in a specialized industry (for example, construction contractors, homeowners associations, and not-for-profit organizations). These additional representations may be found in AICPA *Industry Audit and Accounting Guides* you can obtain by contacting AICPA Service Center Operations at 888-777-7077.

.36 The written representations should be addressed to the accountant. The representations should be made as of a date no earlier than the date of the accountant's report since the accountant is concerned with events occurring through the date of the report that may require adjustments to or disclosure in the financial statements. The letter should be signed by those members of management whom the accountant believes are responsible for and knowledgeable, directly or through others in the organization, about the matters covered in the representation letter. Normally the chief executive officer and chief financial officer or others with equivalent positions in the entity should sign the representation letter. If the current management was not present during all the periods covered by the accountant's report, the accountant should nevertheless obtain written representations from current management on all such periods.

.37 An illustrative management representation letter is provided in Appendix F of AR section 100 and is included in AAM section 2400.51.

.38 There are circumstances in which an accountant should consider obtaining an updating representation letter from management (for example, the accountant obtains a management representation letter after completion of inquiry and analytical review procedures but does not issue his or her review report for a significant period of time thereafter, or a material subsequent event occurs after the completion of inquiry and analytical review procedures, including obtaining the original management representation letter, but before the issuance of the report on the reviewed financial statements). In addition, if a predecessor accountant is requested by a former client to reissue his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with reviewed financial statements of a subsequent period, the predecessor accountant should obtain an updating representation letter from the management of the former client. The updating management representation letter should state (*a*) whether any information has come to management's attention that would cause management to believe that any of the previous representations should be modified and (*b*) whether any events have occurred subsequent to the balance-sheet date of the latest financial statements reported on by the accountant that would require adjustment to or disclosure in those financial statements.

.39 An illustrative updating management representation letter is provided in Appendix G of AR section 100 and is included in AAM section 2400.50.

Work Paper Documentation

.40 The accountant should prepare documentation in connection with a review of financial statements, the form and content of which should be designed to meet the circumstances of the particular engagement. Documentation is the principal record of the review procedures performed and the conclusions reached by the accountant in performing the review. However, an accountant would not be precluded from supporting his or her review report by other means in addition to the review documentation. Such other means might include written documentation contained in other engagement (for example compilation) files or quality control files (for example consultation files) and in limited situations, oral explanations. Oral explanations should be limited to those situations where the accountant finds it necessary to supplement or clarify information contained in the documentation. Oral explanations should not be the principal support for the work performed or the conclusions reached.

.41 AR section 100.37 states that it is not possible to specify the form or content of the documentation the accountant should prepare because of the different circumstances in individual engagements. However, the documentation should include any findings or issues that in the accountant's judgment are significant, for example, the results of review procedures that indicate the financial statements could be materially misstated, including actions taken to address such findings, and the basis for the final conclusions reached.

.42 AR section 100.38 states that the documentation of the inquiry and analytical procedures should include the following:

- The matters covered in the accountant's inquiry procedures.
- The analytical procedures performed.
- The expectations as discussed in AR section 100.29, where significant expectations are not otherwise readily determinable from the documentation of the work performed, and factors considered in the development of those expectations.
- Results of the comparison of the expectations to the recorded amounts or ratios developed from recorded amounts.
- Any additional procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures.
- Unusual matters that the accountant considered during the performance of the review procedures, including their disposition.
- Communications, whether oral or written, to the appropriate level of management regarding fraud or illegal acts that come to the accountant's attention.
- The representation letter.

.43 In addition, most practitioners include some or all of the following in their work papers:

- Engagement letter.
- Checklist or memorandum describing the CPA's knowledge of the client's business and industry.
- Checklist, work program, and results of analytical procedures in support of inquiries and analytical procedures, including names of persons responding to inquiries.
- Support for data in the notes to the financial statements.
- Discussion of unusual matters encountered.
- Compilation work papers, if the financial statements required compilation prior to review.
- Copies of reports from other accountants who have audited or reviewed a subsidiary, etc.
- Reasons for a step-down from an audit, if applicable.

Additional Guidance

.44 For additional guidance practitioners should refer to the AICPA Accounting and Review Services Committee Issue Paper on *Analytical Procedures in a Review Engagement* which is intended to provide accountants with information that may help them understand certain requirements related to the use of analytical procedures in review engagements and how the use of analytical procedures should be documented in those engagements.

.45 Practitioners may also refer to the new AICPA Practice Aid, *Review Engagements—New and Expanded Guidance on Analytical Procedures and Inquiries and Other Procedures* (product number 006618). The practice aid clarifies certain existing SSARS, suggests ways of implementing existing and new standards in special circumstances, and provides practical guidance to help implement the changes to AR section 100.

.46 Review Engagement Program

Client:	**Balance Sheet Date:**
Completed by:	**Date Completed:**

Procedure	**Completed by or N/A**
1. Prepare or update the Client Acceptance and Continuance Form.	
2. Consider whether the firm is independent. If not independent, a review engagement cannot be performed.	
3. Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.	
4. If the engagement was originally intended to be an audit, document the appropriateness of the decision to step-down.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable review of the financial statements.	
7. Apply analytical procedures to the financial statements to identify and provide a basis for inquiry about relationships and individual items that appear to be unusual and that may indicate a material misstatement. Consider performing the analytical procedures described in AAM section 2400.48.	
8. Inquire of members of management having responsibility for financial and accounting matters concerning:	
a. Whether the financial statements have been prepared in conformity with GAAP or OCBOA consistently applied.	
b. The entity's accounting principles and practices and the methods followed in applying them and procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements.	
c. Unusual or complex situations that may have an effect on the financial statements.	
d. Significant transactions occurring or recognized near the end of the reporting period.	
e. The status of uncorrected misstatements identified during the previous engagement.	
f. Questions that have arisen in the course of applying the review procedures.	
g. Events subsequent to the date of the financial statements that could have a material effect on the financial statements.	

(continued)

Procedure	Completed by or N/A
h. Their knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, for example, communications received from employees, former employees, or others.	
i. Significant journal entries and other adjustments.	
j. Communications from regulatory agencies.	
9. Make inquiries concerning actions taken at meetings of shareholders, board of directors, committees of the board of directors, or comparable meetings that may affect the financial statements.	
10. Read the financial statements to consider whether, on the basis of information coming to the accountant's attention:	
a. The financial statements appear to conform with GAAP or an OCBOA.	
b. Financial statements prepared in accordance with an OCBOA present proper OCBOA titles and disclose the basis of accounting in the notes or in the review report.	
c. The financial statements are appropriate in form.	
d. The financial statements are free from obvious mathematical or clerical error.	
11. Obtain reports from other accountants, if any, who have been engaged to audit or review the financial statements of significant components of the reporting entity, its subsidiaries, and other investees.	
12. If there is any indication that information supplied by the entity is incorrect, incomplete or otherwise unsatisfactory, obtain additional or revised information.	
13. Draft the accountant's report.	
14. If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:	
a. Revise the financial statements or modify the report to indicate the departure.	
b. If the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.	
c. If modification of the report is not considered adequate, consider withdrawing from the engagement.	
15. Obtain a representation letter.	
16. If supplementary data accompanies the financial statements, modify the report in accordance with AR section 100.60.	
17. Include a reference to the report on each page of the financial statements and supplementary data.	
18. Document the following:	
a. The matters covered in the accountant's inquiry procedures.	
b. The analytical procedures performed.	

(continued)

Procedure	Completed by or N/A
c. The expectations as discussed in AR section 100.29, where significant expectations are not otherwise readily determinable from the documentation of the work performed, and factors considered in the development of those expectations.	
d. Results of the comparison of the expectations to the recorded amounts or ratios developed from recorded amounts.	
e. Any additional procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures.	
f. Findings, issues, and unusual matters that the accountant considered during the performance of the review procedures, including actions taken to address such matters, their disposition, and the final conclusions reached.	
g. Communications, whether oral or written, to the appropriate level of management regarding fraud or illegal acts that come to the accountant's attention.	
19. Determine that all required forms and checklists have been completed.	
20. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the work papers.	
21. Date the report as of the date the review was completed.	

Analytical Procedures the Accountant May Consider Performing When Conducting a Review of Financial Statements

.47 Analytical procedures are designed to identify relationships and individual items that appear to be unusual and that may reflect a material misstatement of the financial statements. The analytical procedures performed in a review of financial statements are a matter of the accountant's professional judgment. In determining the appropriate analytical procedures, an accountant may consider (*a*) the nature and materiality of the items reflected in the financial statements, (*b*) the likelihood of a misstatement in the financial statements, (*c*) knowledge obtained during current and previous engagements, (*d*) the stated qualifications of the entity's accounting personnel, (*e*) the extent to which a particular item is affected by management's judgment, and (*f*) inadequacies in the entity's underlying financial data.

.48 The following list of analytical procedures is for illustrative purposes only. These analytical procedures will not necessarily be applicable in every review engagement, nor are these analytical procedures meant to be all-inclusive. These illustrative analytical procedures are not intended to serve as a program or checklist to be utilized in performing a review engagement. Examples of analytical procedures an accountant may consider performing in a review of financial statements include:

- Comparing financial statements with statements for comparable prior period(s).
- Comparing current financial information with anticipated results, such as budgets or forecasts (for example, comparing tax balances and the relationship between the provision for income taxes and pretax income in the current financial information with corresponding information in (*a*) budgets, using expected rates, and (*b*) financial information for prior periods).[3]
- Comparing current financial information with relevant nonfinancial information.
- Comparing ratios and indicators for the current period with expectations based on prior periods, for example, performing gross profit analysis by product line and operating segment using elements of the current financial information and comparing the results with corresponding information for prior periods. Examples of key ratios and indicators are the current ratio, receivables turnover or days' sales outstanding, inventory turnover, depreciation to average fixed assets, debt to equity, gross profit percentage, net income percentage, and plant operating rates.
- Comparing ratios and indicators for the current period with those of entities in the same industry.
- Comparing relationships among elements in the current financial information with corresponding relationships in the financial information of prior periods, for example, expense by type as a percentage of sales, assets by type as a percentage of total assets, and percentage of change in sales to percentage of change in receivables.

.49 Analytical procedures may include such statistical techniques as trend analysis or regression analysis and may be performed manually or with the use of computer-assisted techniques.

.50 In addition, the accountant may find the guidance in AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), as amended, useful in conducting a review of financial statements.

[3] The accountant should exercise caution when comparing and evaluating current financial information with budgets, forecasts, or other anticipated results because of the inherent lack of precision in estimating the future and the susceptibility of such information to manipulation and misstatement by management to reflect desired results.

.51 Review of Financial Statements—Illustrative Representation Letter

A review of financial statements consists principally of inquiries of company personnel and analytical procedures applied to financial data. As part of a review of financial statements, the accountant is required to obtain a written representation from his or her client to confirm the oral representations made to the accountant. The introductory paragraph should specify the financial statements and periods covered by the accountant's review report. If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. The following representation letter is included for illustrative purposes only. The accountant may decide, based on the circumstances of the review engagement or the industry in which the entity operates, that other matters should be specifically included in the letter and that some of the representations included in the illustrative letter are not necessary.

(Date [*No earlier than the date of the Accountant's Report*])

(To the Accountant)

We are providing this letter in connection with your review of the (identification of financial statements) of (name of entity) as of (dates) and for the (periods of review) for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements in order for them to be in conformity with generally accepted accounting principles.

We confirm that we are responsible for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.[4]

We confirm, to the best of our knowledge and belief, (as of [*a date no earlier than the date of review report, see section 100.79]*), the following representations made to you during your review.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.
2. We have made available to you all:
   a. Financial records and related data.
   b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
4. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
5. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
   a. Management,
   b. Employees who have significant roles in internal control, or
   c. Others that could have a material effect on the financial statements.
6. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, or others.

---

[4] The qualitative discussion of materiality used in this letter is adapted from (FASB) Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information.*

7. We have no plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities.
8. There are no material losses (such as from obsolete inventory or purchase or sales commitments) that have not been properly accrued or disclosed in the financial statements.
9. There are no:
   a. Violations or possible violations of laws or regulations, whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
   b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion that must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies.*[5]
   c. Other material liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.
10. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets, nor has any asset been pledged as collateral.
11. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.
12. The following have been properly recorded or disclosed in the financial statements:
   a. Related party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
   b. Guarantees, whether written or oral, under which the company is contingently liable.
   c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* [Significant estimates are estimates at the balance sheet date that could change materially with the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]

[*Add additional representations that are unique to the entity's business or industry. See below for additional illustrative representations.*]

13. To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

The following additional representations may be appropriate in certain situations. This list of additional representations is not intended to be all-inclusive. In drafting a representation letter, the effects of other applicable pronouncements should be considered.

- The financial statements disclose all of the matters of which we are aware that are relevant to the entity's ability to continue as a going concern, including significant conditions and events, and our plans.
- We have reviewed long-lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of those assets might not be recoverable and have appropriately recorded the adjustment.

---

[5] If management has not consulted a lawyer regarding litigation, claims, and assessments, the representation might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board [(FASB)] Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

- Debt securities that have been classified as held-to-maturity have been so classified due to our intent to hold such securities to maturity and our ability to do so. All other debt securities have been classified as available-for-sale or trading.
- We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.
- Receivables reported in the financial statements represent valid claims against debtors for sales or other charges arising on or before the balance-sheet date and have been appropriately reduced to their estimated net realizable value.
- We believe that the carrying amounts of all material assets will be recoverable.
- All agreements to repurchase assets previously sold have been properly disclosed.
- We have made provisions for losses to be sustained in the fulfillment of, or from the inability to fulfill sales commitments.

14. We have responded fully and truthfully to all inquiries made to us by you during your review.

____
(Name of Owner or Chief Executive Officer and Title)

____
(Name of Chief Financial Officer and Title, where applicable)

See AU section 333.17, *Management Representations*, Appendix B, “Additional Illustrative Representations” (AICPA, *Professional Standards*, vol. 1), for other representations that may be appropriate from management relating to matters specific to the entity’s business or industry.

.52 Review of Financial Statements—Illustrative Updating Representation Letter

Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. For example, if an event subsequent to the date of the accountant's review report is disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred . . ."[6]

[*Date*]

To [*Accountant*]

In connection with your review(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods of review] for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements for them to be in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the accountant or date of previous representation letter] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____
(Name of Owner or Chief Executive Officer and Title)

____
(Name of Chief Financial Officer and Title, where applicable)

See AU section 333.17 for other representations that may be appropriate from management relating to matters specific to the entity's business or industry.

[6] The accountant has two methods available for dating the report when a subsequent event requiring disclosure occurs after the completion of the review but before issuance of the report on the related financial statements. The accountant may use "dual dating," for example, "February 16, 20XX, except for Note Y, as to which the date is March 1, 20XX," or may date the report as of the later date.

.53 Review of Financial Statements—Illustrative Inquiries

The inquiries to be made in a review of financial statements are a matter of the accountant's professional judgment. In determining the appropriate inquiries, an accountant may consider (a) the nature and materiality of the items reflected in the financial statements, (b) the likelihood of a misstatement in the financial statements, (c) knowledge obtained during current and previous engagements, (d) the stated qualifications of the entity's accounting personnel, (e) the extent to which a particular item is affected by management's judgment, and (f) inadequacies in the entity's underlying financial data. The inquiries should generally be made of members of management with financial reporting and accounting responsibilities.

The following list of inquiries is for illustrative purposes only. These inquiries will not necessarily be applicable in every review engagement, nor are these inquiries meant to be all-inclusive. These illustrative inquiries are not intended to serve as a program or checklist to be utilized in performing a review engagement; rather, they address general areas where inquiries might be made in a review engagement. These sample inquiries can also be found in Appendix B of AR section 100. Also, the accountant may feel it necessary to make several inquiries in an effort to answer questions related to the issues addressed in these illustrative inquiries.

1. General

   a. Have there been any changes in the entity's business activities?

   b. Are there any unusual or complex situations that may have an effect on the financial statements (for example, business combinations, restructuring plans, or litigation)?

   c. What procedures are in place related to recording, classifying, and summarizing transactions and accumulating information related to financial statement disclosures?

   d. Have the financial statements been prepared in conformity with generally accepted accounting principles or, if appropriate, a comprehensive basis of accounting other than generally accepted accounting principles? Have there been any changes in accounting principles and methods of applying those principles? Have voluntary changes in accounting principles been reflected in the financial statements through retrospective application of the new principle in comparative financial statements?

   e. Have there been any instances of fraud or illegal acts within the entity?

   f. Have there been any allegations or suspicions that fraud or illegal acts might have occurred or might be occurring within the entity? If so, where and how?

   g. Are any entities, other than the reporting entity, commonly controlled by the owners? If so, has an evaluation been performed to determine whether those other entities should be consolidated into the financial statements of the reporting entity?

   h. Are there any entities other than the reporting entity in which the owners have significant investments (for example, variable interest entities)? If so, has an evaluation been performed to determine whether the reporting entity is the primary beneficiary related to the activities of these other entities?

   i. Is the reporting entity a general partner in a limited partnership arrangement? If so, has an evaluation been performed to determine whether the limited partnership should be consolidated into the financial statements of the reporting entity?

   j. Is the reporting entity a controlling partner in a general partnership agreement? If so, has an evaluation been performed to determine whether the partnership should be consolidated into the financial statements of the controlling partner?

   k. Have any significant transactions occurred or been recognized near the end of the reporting period?

2. Cash and cash equivalents

   a. Is the entity's policy regarding the composition of cash and cash equivalents in accordance with Financial Accounting Standards Board Statement of Financial Accounting Standards No. 95, *Statement of Cash Flows* (paragraphs 7–10)? Has the policy been applied on a consistent basis?

   b. Are all cash and cash equivalents[7] accounts on a timely basis?

   c. Have old or unusual reconciling items between bank balances and book balances been reviewed and adjustments made where necessary?

   d. Has there been a proper cutoff of cash receipts and disbursements?

   e. Has a reconciliation of intercompany transfers been prepared?

   f. Have checks written but not mailed as of the financial statement date been properly reclassified into the liability section of the balance sheet?

   g. Have material bank overdrafts been properly reclassified into the liability section of the balance sheet?

   h. Are there compensating balances or other restrictions on the availability of cash and cash equivalents balances? If so, has consideration been given to reclassifying these amounts as noncurrent assets?

   i. Have cash funds been counted and reconciled with control accounts?

3. Receivables

   a. Has an adequate allowance for doubtful accounts been properly reflected in the financial statements?

   b. Have uncollectible receivables been written off through a charge against the allowance account or earnings?

   c. Has interest earned on receivables been properly reflected in the financial statements?

   d. Has there been a proper cutoff of sales transactions?

   e. Are there receivables from employees or other related parties? Have receivables from owners been evaluated to determine if they should be reflected in the equity section (rather than the asset section) of the balance sheet?

   f. Are any receivables pledged, discounted, or factored? Are recourse provisions properly reflected in the financial statements?

   g. Have receivables been properly classified between current and noncurrent?

   h. Have there been significant numbers of sales returns or credit memoranda issued subsequent to the balance sheet date?

   i. Is the accounts receivable subsidiary ledger reconciled to the general ledger account balance on a regular basis?

4. Inventory

   a. Are physical inventory counts performed on a regular basis, including at the end of the reporting period? Are the count procedures adequate to ensure an appropriate count? If not, how have amounts related to inventories been determined for purposes of financial statement presentation? If so, what procedures were used to take the latest physical inventory and what date was that inventory taken?

---

[7] Cash and cash equivalents include all cash and highly liquid investments that are both (*a*) readily convertible to cash and (*b*) so near to maturity that they present insignificant risk of changes in value because of changes in interest rates, in accordance with paragraph 8 of Financial Accounting Standards Board Statement No. 95, *Statement of Cash Flows*.

b. Have general ledger control accounts been adjusted to agree with the physical inventory count? If so, were the adjustments significant?

c. If the physical inventory counts were taken at a date other than the balance sheet date, what procedures were used to determine changes in inventory between the date of the physical inventory counts and the balance sheet date?

d. Were consignments in or out considered in taking physical inventories?

e. What is the basis of valuing inventory for purposes of financial statement presentation?

f. Does inventory cost include material, labor, and overhead where applicable?

g. Has inventory been reviewed for obsolescence or cost in excess of net realizable value? If so, how are these costs reflected in the financial statements?

h. Have proper cutoffs of purchases, goods in transit, and returned goods been made?

i. Are there any inventory encumbrances?

j. Is scrap inventoried and controlled?

k. Have abnormal costs related to inventory been expensed as incurred?

5. Prepaid expenses

a. What is the nature of the amounts included in prepaid expenses?

b. How are these amounts being amortized?

6. Investments

a. What is the basis of accounting for investments reported in the financial statements (for example, securities, joint ventures, or closely-held businesses)?

b. Are derivative instruments properly measured and disclosed in the financial statements? If those derivatives are utilized in hedge transactions, have the documentation or assessment requirements related to hedge accounting been met?

c. Are investments in marketable debt and equity securities properly classified as trading, available-for-sale, and held-to-maturity?

d. How were fair values of the reported investments determined? Have unrealized gains and losses been properly reported in the financial statements?

e. If the fair values of marketable debt and equity securities are less than cost, have the declines in value been evaluated to determine whether the declines are other-than-temporary?

f. For any debt securities classified as held-to-maturity, does management have the positive ability and intent to hold the securities until they mature? If so, have those debt securities been properly measured?

g. Have gains and losses related to disposal of investments been properly reflected in the financial statements?

h. How was investment income determined? Is investment income properly reflected in the financial statements?

i. Has appropriate consideration been given to the classification of investments between current and noncurrent?

j. For investments made by the reporting entity, have consolidation, equity, or cost method accounting requirements been considered?

k. Are any investments encumbered?

7. Property and equipment
   - *a.* Are property and equipment items properly stated at depreciated cost or other proper value?
   - *b.* When was the last time a physical inventory of property and equipment was taken?
   - *c.* Are all items reflected in property and equipment held for use? If not, have items that are held for sale been properly reclassified from property and equipment?
   - *d.* Have gains or losses on disposal of property or equipment been properly reflected in the financial statements?
   - *e.* What are the criteria for capitalization of property and equipment? Have the criteria been consistently and appropriately applied?
   - *f.* Are repairs and maintenance costs properly reflected as an expense in the income statement?
   - *g.* What depreciation methods and rates are utilized in the financial statements? Are these methods and rates appropriate and applied on a consistent basis?
   - *h.* Are there any unrecorded additions, retirements, abandonments, sales, or trade-ins?
   - *i.* Does the entity have any material lease agreements? If so, have those agreements been properly evaluated for financial statement presentation purposes?
   - *j.* Are there any asset retirement obligations associated with tangible long-lived assets? If so, has the recorded amount of the related asset been increased because of the obligation and is the liability properly reflected in the liability section of the balance sheet?
   - *k.* Has the entity constructed any of its property and equipment items? If so, have all components of cost been reflected in measuring these items for purposes of financial statement presentation, including, but not limited to, capitalized interest?
   - *l.* Has there been any significant impairment in value of property and equipment items? If so, has any impairment loss been properly reflected in the financial statements?
   - *m.* Are any property or equipment items mortgaged or otherwise encumbered? If so, are these mortgages and encumbrances properly reflected in the financial statements?
8. Intangibles and other assets
   - *a.* What is the nature of the amounts included in other assets?
   - *b.* Do these assets represent costs that will benefit future periods? What is the amortization policy related to these assets? Is this policy appropriate?
   - *c.* Have other assets been properly classified between current and noncurrent?
   - *d.* Are intangible assets with finite lives being appropriately amortized?
   - *e.* Are the costs associated with computer software properly reflected as intangible assets (rather than property and equipment) in the financial statements?
   - *f.* Are the costs associated with goodwill (and other intangible assets with indefinite lives) properly reflected as intangible assets in the financial statements? Has amortization ceased related to these assets?
   - *g.* Has there been any significant impairment in value of these assets? If so, has any impairment loss been properly reflected in the financial statements?
   - *h.* Are any of these assets mortgaged or otherwise encumbered?
9. Accounts and short-term notes payable and accrued liabilities
   - *a.* Have significant payables been reflected in the financial statements?
   - *b.* Are loans from financial institutions and other short-term liabilities properly classified in the financial statements?

c. Have significant accruals (for example, payroll, interest, provisions for pension and profit-sharing plans, or other postretirement benefit obligations) been properly reflected in the financial statements?

d. Has a liability for employees' compensation for future absences been properly accrued and disclosed in the financial statements?

e. Are any liabilities collateralized or subordinated? If so, are those liabilities disclosed in the financial statements?

f. Are there any payables to employees or related parties?

10. Long-term liabilities

a. Are the terms and other provisions of long-term liability agreements properly disclosed in the financial statements?

b. Have liabilities been properly classified between current and noncurrent?

c. Has interest expense been properly accrued and reflected in the financial statements?

d. Is the company in compliance with loan covenants and agreements? If not, is the noncompliance properly disclosed in the financial statements?

e. Are any long-term liabilities collateralized or subordinated? If so, are these facts disclosed in the financial statements?

f. Are there any obligations that, by their terms, are due on demand within one year from the balance sheet date? If so, have these obligations been properly reclassified into the current liability section of the balance sheet?

11. Income and other taxes

a. Do the financial statements reflect an appropriate provision for current and prior-year income taxes payable?

b. Have any assessments or reassessments been received? Are there tax authority examinations in process?

c. Are there any temporary differences between book and tax amounts? If so, have deferred taxes on these differences been properly reflected in the financial statements?

d. Do the financial statements reflect an appropriate provision for taxes other than income taxes (for example, franchise, sales)?

e. Have all required tax payments been made on a timely basis?

f. Has the entity assessed uncertain tax positions and related disclosures in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*?

12. Other liabilities, contingencies, and commitments

a. What is the nature of the amounts included in other liabilities?

b. Have other liabilities been properly classified between current and noncurrent?

c. Are there any guarantees, whether written or verbal, whereby the entity must stand ready to perform or is contingently liable related to the guarantee? If so, are these guarantees properly reflected in the financial statements?

d. Are there any contingent liabilities (for example, discounted notes, drafts, endorsements, warranties, litigation, and unsettled asserted claims)? Are there any potential unasserted claims? Are these contingent liabilities, claims, and assessments properly measured and disclosed in the financial statements?

e. Are there any material contractual obligations for construction or purchase of property and equipment or any commitments or options to purchase or sell company securities? If so, are these facts clearly disclosed in the financial statements?

f. Is the entity responsible for any environmental remediation liability? If so, is this liability properly measured and disclosed in the financial statements?

g. Does the entity have any agreement to repurchase items that previously were sold? If so, have the repurchase agreements been taken into account in determining the appropriate measurements and disclosures in the financial statements?

h. Does the entity have any sales commitments at prices expected to result in a loss at the consummation of the sale? If so, are these commitments properly reflected in the financial statements?

i. Are there any violations, or possible violations, of laws or regulations the effects of which should be considered for financial statement accrual or disclosure?

13. Equity

a. What is the nature of any changes in equity accounts during each reporting period?

b. What classes of stock (other ownership interests) have been authorized?

c. What is the par or stated value of the various classes of stock (other ownership interests)?

d. Do amounts of outstanding shares of stock (other ownership interests) agree with subsidiary records?

e. Have pertinent rights and privileges of ownership interests been properly disclosed in the financial statements?

f. Does the entity have any mandatorily redeemable ownership interests? If so, have these ownership interests been evaluated so that a proper determination has been made related to whether these ownership interests should be measured and reclassified to the liability section of the balance sheet? Are redemption features associated with ownership interests clearly disclosed in the financial statements?

g. Have dividend (distribution) and liquidation preferences related to ownership interests been properly disclosed in the financial statements?

h. Do disclosures related to ownership interests include any applicable call provisions (prices and dates), conversion provisions (prices and rates), unusual voting rights, significant terms of contracts to issue additional ownership interests, or any other unusual features associated with the ownership interests?

i. Are syndication fees properly reflected in the financial statements as a reduction of equity (rather than an asset)?

j. Have any stock options or other stock compensation awards been granted to employees or others? If so, are these options or awards properly measured and disclosed in the financial statements?

k. Has the entity made any acquisitions of its own stock? If so, are the amounts associated with these reacquired shares properly reflected in the financial statements as a reduction in equity? Is the presentation in accordance with applicable state laws?

l. Are there any restrictions or appropriations on retained earnings or other capital accounts? If so, are these restrictions or appropriations properly reflected in the financial statements?

14. Revenue and expenses

a. What is the entity's revenue recognition policy? Is the policy appropriate? Has the policy been consistently applied and appropriately disclosed?

b. Are revenues from sales of products and rendering of services recognized in the appropriate reporting period (that is, when the products have been delivered and when the services have been performed)?

c. Were any sales recorded under a "bill and hold" arrangement? If yes, have the criteria been met to record the transaction as a sale?

d. Are purchases and expenses recognized in the appropriate reporting period (that is, matched against revenue) and properly classified in the financial statements?

e. Do the financial statements include discontinued operations or items that might be considered extraordinary, or both? If so, are amounts associated with discontinued operations, extraordinary items, or both properly displayed in the income statement?

f. Does the entity have any gains or losses that would necessitate the display of comprehensive income (for example, gains/losses on available-for-sale securities or cash flow hedge derivatives)? If so, have these items been properly displayed within comprehensive income (rather than included in the determination of net income)?

15. Other

a. Have events occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the financial statements?

b. Have actions taken at stockholders, directors, committees of directors, or comparable meetings that affect the financial statements been reflected in the financial statements?

c. Are significant estimates and material concentrations (for example, customers or suppliers) properly disclosed in the financial statements?

d. Are there plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities reflected in the financial statements?

e. Have there been material transactions between or among related parties (for example, sales, purchases, loans, or leasing arrangements)? If so, are these transactions properly disclosed in the financial statements?

f. Are there uncertainties that could have a material impact on the financial statements? Is there any change in the status of previously disclosed material uncertainties? Are all uncertainties, including going concern matters, that could have a material impact on the financial statements properly disclosed in the financial statements?

g. Are barter or other nonmonetary transactions properly recorded and disclosed? Have nonmonetary asset exchanges involving commercial substance been reflected in the financial statements at fair value? Have nonmonetary asset exchanges not involving commercial substance been reflected in the financial statements at carrying value?

.54 Illustrative Ratio Analysis Worksheet

Below you will find 24 financial ratios. These financial ratios include liquidity, activity, and efficiency ratios. Accountants should use the ratios deemed necessary and use additional ones as needed.

Ratio Name	Formula	Calculation	Explanation
Current ratio	$\frac{\text{Current Assets}}{\text{Current Liabilities}}$		measures ability to meet short term obligations
Quick ratio (or Acid test ratio)	$\frac{\text{Current Assets - Inventory}}{\text{Current Liabilities}}$		a more conservative measure of a firm's ability to meet short term obligations
Operating cash flows to current liabilities	$\frac{\text{Cash Provided by Operations}}{\text{Average Current Liabilities}}$		liquidity calculation
Days Sales in Accounts Receivable	$\frac{\text{Net Accounts Receivable}}{\text{Net Sales/360}}$		measures length of time average sales is a receivable
Allowance for bad debts as a % of accounts receivable	$\frac{\text{Allowance for Bad Debts}}{\text{Accounts Receivable}}$		calculation is compared to prior periods and other comparable companies
Bad debt expense as a % of net sales	$\frac{\text{Bad Debt Expense}}{\text{Net Sales}}$		calculation is compared to prior periods and other comparable companies
Inventory Turnover	$\frac{\text{Cost of Sales}}{\text{Inventory}}$		activity ratio – indication of efficiency of operation
Fixed Asset Turnover	$\frac{\text{Net Sales}}{\text{Average Fixed Assets}}$		activity ratio
Receivable Turnover	$\frac{\text{Net Credit Sales}}{\text{Average Receivables}}$		activity ratio
Net Sales to Inventory	$\frac{\text{Net Sales}}{\text{Inventory}}$		activity ratio
Days in Inventory	$\frac{\text{Inventory} \times \text{(Days in a cycle)}}{\text{Cost of Sales}}$		identifies how many days of inventory is available
Accounts Payable to Net Sales	Accounts Payable × (Days in a cycle)/Net Sales × (Days in a year)		compares A/P balance to net sales
Return on Total Assets	Net Income × (Days in a year)/Total Assets × (Days in a cycle)		measures profitability at a point in time
Return on Net Worth	Net Income × (Days in a year)/Net Worth × (Days in a cycle)		profitability measure
Return on Net Sales	$\frac{\text{Net Income}}{\text{Net Sales}}$		profit margin
Net Sales to Accounts Receivable	$\frac{\text{Net Sales} \times \text{(Days in a year)}}{\text{Net A/R} \times \text{(Days in a cycle)}}$		identifies how many times A/R will turn over per year of the operating cycle
Net Sales to Net Fixed Assets	$\frac{\text{Net Sales} \times \text{(Days in a year)}}{\text{Fixed Assets} \times \text{(Days in a cycle)}}$		identifies efficiency of capital investment

Ratio Name	Formula	Calculation	Explanation
Days Payables in Cost of Sales	$\frac{A/P \times (\text{Days in a cycle})}{\text{Cost of Sales}}$		
Income Before Tax to Net Worth	$\frac{EBIT \times (\text{Days in a year})}{\text{Net Worth} \times (\text{Days in a cycle})}$		ratio of earnings to net worth per year
Gross Profit Percentage	$\frac{\text{Net Sales - Cost of Sales}}{\text{Net Sales}}$		profitability calculation
Operating Expenses as a % of Net Sales	$\frac{\text{Operating Expenses}}{\text{Net Sales}}$		efficiency calculation
Times Interest Earned	$\frac{EBIT}{\text{Interest Expense}}$		profitability calculation
Income Before Tax to Assets	$\frac{EBIT \times (\text{Days in a year})}{\text{Assets} \times (\text{Days in a cycle})}$		measure of profitability
Altman Z Score	See Below		A composite formula that is widely used to measure the financial "health" of a company. The formula takes financial ratios and multiplies each by a specific constant. The amounts computed are added together to obtain an overall score. This score is then compared to scores from other companies to rate relative financial health.

For private companies (four variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	6.56	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	3.26	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	6.72	=
$\frac{\text{Net Worth}}{\text{Total Liabilities}}$	×	1.05	=
		Altman Z Score	

For private companies (five variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	.717	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	.847	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	3.107	=
$\frac{\text{Net Worth (Book Value)}}{\text{Total Liabilities}}$	×	.420	=
$\frac{\text{Sales}}{\text{Total Assets}}$	×	.998	=
		Altman Z Score	

For public companies:

$\dfrac{\text{Working Capital}}{\text{Total Assets}}$	×	.012	=	
$\dfrac{\text{Retained Earnings}}{\text{Total Assets}}$	×	.014	=	
$\dfrac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	.033	=	
$\dfrac{\text{Market Value Equity}}{\text{Book Value of Total Liabilities}}$	×	.006	=	
$\dfrac{\text{Sales}}{\text{Total Assets}}$	×	.999	=	
		Altman Z Score

AAM Section 2500

Form and Content of Financial Statements

.01 Preparing financial statements is both an art and a science, normally learned by trial and error or by word of mouth. The process is an art in that financial statements must be presented in a format that has eye appeal, is understandable, conveys the company's financial picture, and can be produced economically. Preparing financial statements is a science in that it requires mastery of a complex array of authoritative standards for measurement, presentation, and disclosure.

Title Page

.02 A title page is recommended for all financial statement presentations. The title page should contain the name of the entity, the title of the financial statements, and the date or period covered.

Name of the Entity

.03 The name of the entity should be presented exactly as it is listed in the charter, partnership agreement, or other appropriate legal document. When the entity is not a regular corporation, the type of entity should be disclosed. Examples of appropriate presentations are as follows:

- Corporation
- XYZ, Ltd.
- Jones Nursery
- The Estate of John Doe
- Mr. and Mrs. John Q. Public
- Jane Doe Testamentary Trust

Title of Financial Statements

.04 If the presentation includes more than one type of financial statement (for example, Balance Sheet and Income Statement), the term "Financial Statements" is the most practical method of communicating what is included in the presentation. When only one type of statement is presented, it is more appropriate to use the exact title of the statement. When consolidated or combined statements are presented, the title page should include the words "consolidated" or "combined." When financial statements include supplementary information, the title should be modified. Some practitioners add a description of the service performed to the title of the financial statements on the title page.

Date or Period Covered

.05 When both a balance sheet and income statement are presented, the period covered by the statement should be shown, with the period ending date. When only a balance sheet is presented, the date should be the balance sheet date, alone.

Presentation of the Accountant's Report

.06 This section discusses presentation and format of the accountant's report. AAM section 2600, *Reporting*, discusses the wording of the report and other considerations that affect the degree of responsibility assumed by the accountant.

Letterhead

.07 There is no requirement that the accountant's report be printed on the firm's letterhead (nor is there any requirement that the report be manually signed—for example, the signature could be manual, stamped, electronic, or typed—or that the financial statements be bound).

Heading of the Accountant's Report

.08 No heading is needed for an accountant's report, although some accountants prefer to use one. This avoids any misunderstanding about the type of report. Examples of appropriate report headings would be as follows:

- Accountant's Report
- Accountant's Report on Financial Statements
- Accountant's Report on Supplementary Information

Address

.09 Generally, the accountant's report should be addressed to the Board of Directors, stockholders, or both. Reports are not intended as letters. Accordingly, addresses that include street names or zip codes are not appropriate. Examples of appropriate addresses are as follows:

- To the Board of Directors; XYZ Corporation; Greenville, SC
- To the Stockholders; XYZ Corporation
- To the Board of Directors and Shareholders; XYZ Corporation; Greenville, SC
- For small, closely-held companies: Mr. John Doe; Small Manufacturing, Inc; Greenville, SC
- For personal financial statements: Mr. And Mrs. John Doe; Greenville, SC
- For partnerships: To the Managing Partner; ABC Company; Greenville, SC or Mrs. Jane Doe; General Partner, XYZ Ltd. Partnership
- For proprietorship: Mr. John Jones; Jones Transportation; Columbia, SC
- For trusts: Mr. John Smith; Trustee; Jane Doe Testamentary Trust; Myrtle Beach, SC
- For estates: Mr. John Doe; Executor; Estate of John Smith; Hilton Head Island, SC

Salutations

.10 Common practice in the profession is to exclude such salutations as "Dear Sirs" or "Gentlemen" from the report.

Signature

.11 The compilation or review report should contain a signature of the accounting firm or the accountant as appropriate. (For example, the signature could be manual, stamped, electronic, or typed.) Some state boards and certain regulatory agencies require an individual's signature on the report.

Date of Report

.12 The dating of the report affects the responsibility assumed by the accountant and is discussed in more detail in AAM section 2600. The format of the date is rather straightforward. Firms with multiple offices often precede the date of the report with the office's location.

Basic Financial Statements

.13 The basic financial statements included in a generally accepted accounting principles (GAAP) financial statement presentation are as follows: (Note: Basic financial statements for an other comprehensive bases of accounting (OCBOA) presentation are discussed in AAM section 2700, *Special Areas*).

- Balance Sheet
- Income Statement
- Statement of Retained Earnings* or Changes in Stockholders' Equity
- Statement of Cash Flows

Heading

.14 The heading of each financial statement should contain the name of the entity, the title of specific statement, and the date or period covered.

Reference on Financial Statements

.15 The type of reference/legend on the financial statements depends upon the type of engagement:

- If the financial statements are reviewed, each page of the financial statements should contain a reference, such as: *See Accountant's Review Report*.
- If the financial statements are compiled for general-use (that is, not restricted to management's use only), each page of the financial statements should contain a reference, such as: *See Accountant's Compilation Report*.
- If the financial statements are compiled for management's use only, each page of the financial statements should contain a reference to the restricted nature of the financial statements, such as:
  - — *Restricted for Management's Use Only*, or
  - — *Solely for the information of and use by the management of XYZ Company and not intended to be and should not be used by any other party*.
- If the financial statements are compiled and included in certain prescribed forms (according to SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* [AICPA, *Professional Standards*, vol. 2, AR sec. 300]), each page of the form should include a reference, such as: *See Accountant's Compilation Report*.
- If the financial statements are personal financial statements prepared for inclusion in a personal financial plan (SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* [AICPA, *Professional Standards*, vol. 2, AR sec. 600]), each of the personal financial statements should contain a reference to the report, such as: *See Accountant's Report*.

---

* The accounting literature does not require the statement of retained earnings to be presented as a separate financial statement. Accounting Principles Board (APB) Opinion No. 12, *Omnibus Opinion—1967*, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.

.16 Note that, in all cases, these requirements extend to the footnotes (since the footnotes are part of the financial statements). However, there is diversity in practice as to how to meet this requirement for footnotes. Some practitioners place the reference on each page of the footnotes, and others place the reference only on the first page of the footnotes. Still others place a statement on each page of the financial statements that "the notes are an integral part of the financial statements" and, therefore, do not place the reference on the footnote pages. Any of these approaches is acceptable.

.17 Also, the references above are examples given in SSARS, and the accountant may modify the wording of the reference. SSARS No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), requires only that the accountant refer to the report—not that he or she state the type of report (level of service) in the reference. Therefore, the reference "See Accountant's Report" would be sufficient in all engagements that contain a report. However, most practitioners follow the wording given in the examples. Accountants may place the reference on the financial statements by installing footers in the financial statement software, by using a rubber stamp, by manually writing the reference or by any other method that is practical to use.

Use of the Term "Unaudited"

.18 Some practitioners follow the financial statement title with the term "Unaudited." This practice is not required by SSARS and may be misleading.

Supplementary Information

.19 Financial statements of nonpublic companies often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

Presentation

.20 Normally, supplementary information is segregated from the basic financial statements, after a title page marked "Supplementary Information." If a separate report on the supplementary information is presented, it should follow the title page.

Reporting

.21 The accountant must describe in the report on the financial statements, or in a separate report, the degree of responsibility, if any, he or she takes with regard to the supplementary information. See AAM section 2600 for information on suggested wording for compilation and review reports.

Headings

.22 Each schedule should be headed with a descriptive title that distinguishes it from the basic financial statements. Normally, supplementary schedules are not referred to as *statements* to avoid confusing them with basic financial statements.

Reference to Report

.23 Each supplementary schedule should contain a reference to the report. Although not specifically addressed in SSARS, the reference is advisable because the report describes the degree of responsibility the accountant takes with regard to the schedules.

Disclosures

.24 In general, all financial statements should include adequate disclosures (footnotes). However, there are situations in which the accountant may omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.25 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

> Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.26 Note that if the financial statements are presented on a basis of accounting other than GAAP (for example, income tax basis), this extra paragraph would be worded as follows:

> Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's assets, liabilities, equity, revenues and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.27 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they should not be labeled as "Notes to the Financial Statements" (this title implies full disclosure). Instead, an appropriate title would be "Selected Information—Substantially All Disclosures Required by GAAP Are Not Included."

Referencing Notes

.28 While there is no requirement that individual notes be referenced to specific items in the financial statements, each page of the financial statements should contain a general reference to the notes. If "selected information" rather than all notes is presented in a compilation, a reference to the selected information should be included.

[*The next page is 2551.*]

AAM Section 2600
Reporting

Reporting Obligation

.01 AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2) discusses the accountant's reporting obligation for compilation and review engagements. In summary, it says:

- A compilation is the minimum level of service that an accountant can provide before submitting unaudited financial statements of a nonpublic entity to a client or others (AR section 100.01)
- The accountant should not consent to the use of his or her name in a document or written communication containing unaudited financial statements of a nonpublic entity unless (*a*) the accountant has compiled or reviewed the financial statements in compliance with the provisions of AR section 100, or (*b*) the financial statements are accompanied by an indication that the accountant has not compiled or reviewed the financial statements and that the accountant assumes no responsibility for them. For example, the indication may be worded as follows:
- The accountant should issue a report prepared in accordance with Statement on Standards for Accounting and Review Services (SSARS) whenever he or she is engaged to compile financial statements of a nonpublic entity, or submits financial statements that are reasonably expected to be used by a third party (paragraph 11 of SSARS No. 1, as amended by SSARS No. 9)
- The accountant should issue a report prepared in accordance with SSARS whenever he or she is engaged to review financial statements of a nonpublic entity (paragraph 34 of SSARS No. 1, as amended by SSARS No. 9)

  The accompanying balance sheet of X Company as of December 31, 20X1, the related statements of income, and cash flows for the year then ended were not audited, reviewed, or compiled by us and, accordingly, we do not express an opinion or any other form of assurance on them. (paragraph 3 of SSARS No. 1, as amended by SSARS No. 9)

- The accountant should issue a report prepared in accordance with SSARS whenever he or she is engaged to compile financial statements of a nonpublic entity, or submits financial statements that are reasonably expected to be used by a third party (paragraph 11 of SSARS No. 11, as amended by SSARS No. 9)
- The accountant should issue a report prepared in accordance with SSARS whenever he or she is engaged to review financial statements of a nonpublic entity (paragraph 39 of SSARS No. 1, as amended by SSARS No. 9)

.02 The first item in the bulleted list above is addressed in AR section 100.01. Whenever the accountant prepares financial statements (manually or using a computer) and presents them to a client or third parties, he or she has submitted financial statements. When this occurs, the accountant must at least perform a compilation.

.03 The second item in the bulleted list in paragraph .01 of this section is aimed at situations when a client includes the accountant's name in a loan proposal, prospectus, or other written communication that includes client-prepared financial statements. If the client uses financial statements that were previously compiled or reviewed by the accountant, the accountant should insist that his report accompany the statements. If the financial statements are client-prepared, the accountant must insist either that the reference to his name be removed or that the statements be accompanied by an indication that he has not compiled or reviewed them and takes no responsibility for them.

.04 The third and fourth items addressed in the bulleted list in paragraph .01 above are discussed in more detail in the following sections.

Basic Compilation Reports

.05 A report on compiled financial statements should contain the following basic elements:

- A statement that a compilation has been performed in accordance with SSARS, issued by the AICPA
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management (owners)
- A statement that the financial statements have not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on them
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the compilation report (The date of completion of the compilation should be used as the date of the accountant's report.)

.06 The report should not refer to any other procedures that the accountant may have performed. To do so might lead the reader to conclude that the accountant is, in fact, offering some form of assurance.

Basic Review Reports

.07 Financial statements reviewed by an accountant should be accompanied by a report which includes the following basic elements:

- A statement that a review has been performed in accordance with SSARS, issued by the AICPA
- A statement that all information included in the financial statements is the representation of management (owners) of the entity
- A statement that a review consists primarily of inquiries of company personnel and analytical procedures applied to financial data
- A statement that a review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements taken as a whole and, accordingly, no such opinion is expressed
- A statement that the accountant is not aware of any material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, other than those modifications, if any, indicated in the report
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the review report (The date of the completion of the accountant's review procedures should be used as the date of the accountant's report.)

.08 Any other procedures that the accountant may have performed before or during the review engagement, including those performed in connection with a compilation engagement, should not be described in the report.

Reporting When Not Independent

.09 An accountant is precluded from issuing a review report on the financial statements of an entity with respect to which he is not independent.[1] He or she may, however, issue a compilation report.

.10 The compilation report should specifically disclose the lack of independence. However, the reason for lack of independence should not be described. When the accountant is not independent, he or she should include the following as the last paragraph of the compilation report:

> We are not independent with respect to XYZ Company.

Reporting on Financial Statements That Omit Disclosures

.11 In general, all financial statements should include adequate disclosures (footnotes). However, there are situations in which the accountant may omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.12 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

> Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.13 Note that if the financial statements are presented on a basis of accounting other than generally accepted accounting principles (GAAP) (for example, income tax basis), this extra paragraph would be worded as follows:

> Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's assets, liabilities, equity, revenues and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.14 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they should not be labeled as "Notes to the Financial Statements" (this title implies full disclosure). Instead, an appropriate title would be "Selected Information—Substantially All Disclosures Required by GAAP Are Not Included."

.15 Interpretation No. 1 of SSARS No. 1, "Omission of Disclosures in Reviewed Financial Statements" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.01), indicates that the above modification for compiled

[1] In making a judgment about whether he or she is independent, the accountant should be guided by the AICPA Code of Professional Conduct (AICPA, *Professional Standards*,vol. 2, ET sec. 100).

financial statements is not appropriate for reviewed financial statements. Since the omission of substantially all disclosures is a departure from GAAP, the review report should include the omitted disclosures.

.16 When the financial statements include substantially all disclosures except one, the guidance above is not appropriate. Rather, the omission of a single disclosure should be treated in a compilation or review report like any other departure from GAAP, and the accountant should disclose the nature of the departure and its effects, if known.

Reporting on Financial Statements With Departures From GAAP

.17 Although compiled financial statements may omit substantially all disclosures required by GAAP, the omission of disclosures that are material to reviewed financial statements is a GAAP departure. As discussed previously, the accountant should include in the review report all of the omitted disclosures or, if the details to be disclosed have not been determined, the specific nature of the omitted disclosures. If, in the course of a compilation or review engagement, the accountant becomes aware of *measurement* departures from GAAP that are material to the financial statements, he or she has three alternatives:

- Persuade the client to revise the financial statements to conform to GAAP
- Refer to the departure in the report
- Withdraw from the engagement

.18 If modification of the report is appropriate, the nature of the departure from GAAP should be disclosed in a separate paragraph, and the effects (dollar amount) of the departure should be disclosed, if known. If the effects are not known, the accountant is not required to determine them, but he must state in his report that no determination of the effects of the departure has been made.

Reporting When There Are Significant Departures From GAAP

.19 According to Interpretation No. 7 of SSARS No. 1, "Reporting When There Are Significant Departures From Generally Accepted Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.23–.26), an accountant cannot modify a compilation or review report to indicate that the financial statements are not fairly presented in accordance with GAAP. Thus, an adverse opinion is not appropriate in a compilation or review engagement. An adverse opinion can only be expressed in an audit engagement.

.20 The interpretation indicates that the accountant may wish to emphasize the limitations of financial statements having significant GAAP departures (whether disclosure or measurement) in a separate paragraph in the report. This paragraph is in addition to the one that describes the departure. Suggested wording for such a paragraph follows:

> Because the significance and pervasiveness of the matters discussed above make it difficult to assess their impact on the financial statements taken as a whole, users of these financial statements should recognize that they might reach different conclusions about the Company's financial position, results of operations, and cash flows if they had access to revised financial statements prepared in conformity with generally accepted accounting principles.

Date of Reports

.21 The date of the completion of the accountant's review procedures should be used as the date of his or her report on reviewed financial statements. The date of completion of the compilation should be used as the date of his or her report on compiled financial statements. Most accountants believe that the completion of a compilation generally takes place on the date the financial statements are "read."

Highest Level of Service

.22 If the accountant provides more than one level of service on the same financial statements (for example, compilation and review or review and audit), the financial statements should be accompanied by a report that is appropriate for the highest level of service provided. This does not preclude the accountant from using procedures that go beyond those required for the level of assurance expressed.

.23 Interpretation No. 3 of SSARS No. 1, "Reporting on the Highest Level of Service" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.06–.12) provides guidance on the type of report to be issued when the accountant performs procedures that go beyond those required. It states that simply performing procedures (for example, analytical procedures in a compilation engagement) do not require the issuance of the higher report.

.24 Interpretation No. 13 of SSARS No. 1, "Additional Procedures" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.46–.49) addresses whether an accountant can perform audit procedures in a compilation or review engagement and still issue a compilation or review report. It states that this is acceptable, but the report should not reference the additional procedures performed.

.25 Both interpretations stress the importance of the understanding with the client.

.26 An exception to the highest level of service rule is indicated in AR section 100.45. If the accountant is engaged to perform an audit or a review, but finds that he or she is not independent, the auditor may issue a compilation report.

.27 AR section 300, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2), permits another exception to the highest level of service rule). It allows an accountant who has reviewed financial statements to issue a compilation report on financial statements for the same period included in a prescribed form.

Performing a Lower Level of Service

.28 CPAs may be asked to perform a level of service from the one they previously performed on financial statements covering the same period, depending on the situation Examples are:

- The client requests the CPA to compile financial statements that omit substantially all disclosures, even though the CPA has already compiled, reviewed, or audited full-disclosure financial statements for the same period
- The client requests the CPA to compile a balance sheet that omits substantially all disclosures, even though the accountant has already compiled, reviewed, or audited the complete financial statements for the same period

.29 Because professional standards are silent on this issue, practice varies. Many practitioners will consent to providing the compilation as long as they are satisfied that the client has a valid business reason for the request and is not attempting to mislead anyone. However, questions frequently arise about the form of the report. The most common question is whether the report should refer to the prior level of service performed on the statements. Again, the professional standards are silent.

Reporting When the Statement of Cash Flows and/or Comprehensive Income Information Is Omitted

.30 Financial Accounting Standards Board (FASB) Statement No. 95, *Statement of Cash Flows*, requires that a statement of cash flows be presented for each period for which an income statement is presented. Thus, omitting the statement of cash flows constitutes a departure from GAAP. Like other departures from GAAP, the accountant must disclose the departure in a separate paragraph of his report. An example wording of the separate paragraph follows:

> A statement of cash flows for the year ended December 31, 20XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

.31 According to FASB Statement No. 130, *Reporting Comprehensive Income*, all business entities that have any component of comprehensive income must display information about comprehensive income in a financial statement having the same prominence as the other basic financial statements. The primary components of other comprehensive income include:

- Unrealized gains and losses arising from investments in marketable securities classified as "available for sale" (FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*).
- Foreign currency translation adjustments, and gains and losses from certain foreign currency transactions (FASB Statement No. 52, *Foreign Currency Translation*).
- Minimum pension liability adjustments (FASB Statement No. 87, *Employers' Accounting for Pensions*).
- Unrealized gains and losses arising from certain derivative transactions (FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*).

.32 If an entity does not have components of other comprehensive income, FASB Statement No. 130 does not apply. As a result, most small business clients do not have to apply FASB Statement No. 130. The requirements of FASB Statement No. 130 do not apply to not-for-profit organizations that are required to follow the provisions of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*.

.33 FASB Statement No. 130 does not specify a format for presenting comprehensive income, although it provides three examples:

- Presenting the information in the income statement (after net income).
- Presenting the information in the statement of changes in equity.
- Presenting the information in a separate statement of comprehensive income.

.34 The wording of the introductory paragraph of the compilation or review report may have to be modified depending on how the accountant chooses to report comprehensive income. If comprehensive income is reported in the income statement, then the title of the statement will need to be modified (Statement of Income and Comprehensive Income). If comprehensive income is reported in a separate statement, then an additional statement will need to be referenced in the report. If comprehensive income is reported in the statement of changes in equity, then no modification to the report is necessary.

.35 However, in compiled financial statements, the presentation of comprehensive income may be omitted by identifying the omission (in much the same way that a statement of cash flows is omitted). Depending on the type of engagement, the omission will be identified in the report accompanying the financial statements or in the engagement letter (management-use only financial statements).

Reporting When Supplementary Information Is Included

.36 Two common questions arise when supplementary information is included with the basic financial statements:

- What is considered supplementary information, and where is it placed in the presentation?
- Does the accountant have to modify the standard compilation or review report if supplementary information is included?

.37 The term "supplementary information" is not defined in SSARS. AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1), defines this type of information as:

- Additional details of items in, or related to, the basic financial statements, unless the information has been identified as being part of the basic financial statements
- Consolidating information
- Historical summaries of items extracted from basic financial statements, including graphs prepared on a computer
- Statistical data
- Other material, some of which may be from sources outside the accounting system or outside the entity

.38 Financial statements often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

.39 Normally, supplementary information is separated from the basic financial statements. Most practitioners present supplementary information on separate pages after the basic financial statements (and footnotes, if included). It is also a good idea to separate the supplementary information from the basic financial statements by including a title page marked: "Supplementary Information." If the accountant presents a separate report on the supplementary information, it should follow the title page.

.40 SSARS No. 1, as amended by SSARS No. 9 (AR section 100.60), requires that the accountant indicate the degree of responsibility, if any, he or she is taking with respect to the supplementary information that accompanies the basic financial statements.

.41 When the accountant has compiled both the basic financial statements and other data presented only for supplementary analysis purposes, the compilation report should refer to the other data or the accountant can issue a separate report on the other data. If a separate report is issued, the report should state that the other data accompanying the financial statements are presented only for supplementary analysis purposes and that the information has been compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data. If the basic financial statements are compiled, then the compilation report can be modified as follows:

> We have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings and cash flows for the year then ended, and the accompanying supplementary information contained in Schedules A and B, which are presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
>
> A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management. We have not audited or reviewed the accompanying financial statements and supplementary schedules and, accordingly, do not express an opinion or any other form of assurance on them.

.42 If the basic financial statements are reviewed, an explanation should be included in the review report, or in a separate report on the other data. The report should state that the review has been made primarily for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, and either:

- The other data accompanying the financial statements are presented only for supplementary analysis purposes and have been subjected to the inquiry and analytical procedures applied in the review of the financial statements, and the accountant did not become aware of any material modifications that should be made to such data (in other words the accountant is stating that he or she also *reviewed* the supplementary information), or
- The other data accompanying the financial statements are presented only for supplementary analysis purposes and have not been subjected to the inquiry and analytical procedures applied in the review of the financial statements, but were compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data (in other words, the accountant is stating that he or she reviewed the financial statements but only *compiled* the supplementary information).

.43 In any case, the important thing to remember is to clearly indicate the degree of responsibility the accountant is taking for any information accompanying the basic financial statements.

Client-Prepared Supplementary Information

.44 When the supplementary information is prepared or presented solely by the client, the reporting responsibility may not be as obvious as when the accountant assembled or assisted in assembling the information. Client-prepared supplementary information is normally included with compiled or reviewed financial statements in one of the following ways:

- the financial statements and the client-prepared information are bound by the accountant in his firm's report cover (or typed on the accountant's letterhead and stapled to the financial statements); or
- after the accountant submits the financial statements to the client, the client in turn attaches (in some manner) supplementary information and distributes the package to third parties

Client-Prepared Supplementary Information Bound in the Accountant's Report Cover

.45 When the client-prepared supplementary information is bound in the accountant's report cover, a third party would normally conclude that the accountant has some responsibility for the information. Thus, in such a situation, being silent about the accountant's responsibility for the client-prepared supplementary information is not a valid alternative. SSARS No. 1 (AR section 100.60) states, "When the basic financial statements are accompanied by information presented for supplementary analysis purposes, the accountant should clearly indicate the degree of responsibility, if any, he is taking with respect to such information."

Supplementary Information Attached by the Client

.46 The accountant's reporting responsibility for client-prepared supplementary information attached to the financial statements after they are delivered to the client is not directly addressed by SSARS. Realistically, the accountant has little control over the client's actions once he or she delivers the report. However, situations do occur when the client clearly communicates to the accountant that the financial statements will be combined with other client-prepared information and submitted by the client to third parties, for example, to a bank as part of a loan proposal package. In fact, the accountant may accompany the client when he or she submits the package to the third party. Guidance for these situations can be inferred from SSARS No. 1 and SSARS No. 2, that discusses client-prepared financial statements included in a client-prepared document along with compiled or reviewed financial statements. Basically, this guidance says the client-prepared financial statements should be accompanied by a statement that they were not prepared by the accounting firm and the accounting firm assumes no responsibility for them. Absent such a statement, the accountant is advised to consult with his attorney to consider what other actions are appropriate. In such situations, the accountant should ask the client to disclose (preferably on a page immediately preceding the data) a statement such as the following:

> The supplementary information on pages ____ to ____ has not been audited, reviewed or compiled by ABC Firm, and ABC Firm assumes no responsibility for this information.

.47 Alternately, the accountant may desire to add the following paragraph to the compilation or review report:

> All other information that may be included with (or attached to) the financial statements (and supplementary information) identified in the preceding paragraph has not been audited, reviewed, or compiled by us (me) and, accordingly, we (I) assume no responsibility for it.

Percentages

.48 Percentages presented in the financial statements (as is commonly the case with computer-generated statements) do not constitute supplementary information for purposes of the reporting requirements of AR section 100. Accordingly, the accountant should not mention the percentages in the report. A related question is whether the inclusion of such percentages implies the accountant has performed analytical procedures and, thus, must report on the financial statements as if it were a SSARS review engagement. Most would argue that this is not the case.

Forecast or Projection Included With Historical Financial Statements

.49 SSARS do not apply to any type of prospective information. The accountant is required to report separately on prospective information included with historical financial statements following the reporting rules in the Statements on Standards for Attestation Engagements. Generally, the accountant must either compile, examine, or apply agreed-upon procedures to the prospective information.

.50 An exception to this rule occurs for expired forecasts or projections, i.e., presentations that are no longer prospective in nature because the prospective period has expired. An example would be 2002 historical financial statements presented alongside an expired 2002 budget. Expired prospective information presented for comparative purposes meets the definition of supplementary information; therefore AR section 100 applies.

Pro Forma Information

.51 The objective of pro forma financial information is to show what the significant direct effects on historical information might have been had a consummated or proposed transaction or event occurred at an earlier date. Pro forma financial information usually is presented by applying certain pro forma adjustments to amounts in the historical financial statements. Such information is frequently used to show the effects of the following:

- Business combinations
- Changes in capitalization
- Dispositions of a significant part of a business
- Changes in the form of business organization
- Proposed sale of securities and application of the proceeds

.52 Although such future or hypothetical transactions may appear prospective in nature, pro forma presentations are essentially historical financial statements that have been recast.

.53 In situations where the pro forma information is treated as supplementary information, the reporting guidance in AR section 100 should be followed. The document presenting pro forma information should include complete historical financial statements. Usually, the pro forma information will be presented as notes or supplementary information to the historical financial statements.

.54 According to AR section 120.05, pro forma financial information should be labeled as such to distinguish it from historical financial information. This presentation should describe the transaction (or event) that is reflected in the pro forma financial information, the source of the historical financial information on which it is based, the significant assumptions used in developing the pro forma adjustments, and any significant uncertainties about those assumptions. The presentation should also indicate that the pro forma financial information should be read in conjunction with the related historical financial information and that the pro forma financial information is not necessarily indicative of the results (such as financial position and results of operations, as applicable) that would have been attained had the transaction (or event) actually taken place earlier.

.55 If an accountant prepares or assists a client in preparing pro forma financial information, the accountant should consider how the presentation of pro forma financial information will be used. The accountant should also consider the potential of being associated with pro forma financial information and the likelihood that the user may inappropriately infer, through that association, an unintended level of assurance. If the accountant believes that he or she will be associated with the information, the accountant should consider issuing a compilation report so a user will not infer a level of assurance that does not exist.

.56 An engagement to compile pro forma financial information may be undertaken as a separate engagement or in conjunction with a compilation of financial statements. The accountant may agree to compile pro forma financial information if the document that contains the pro forma financial information includes (or incorporates by reference) complete historical financial statements of the entity for the most recent year (or for the preceding year if financial statements for the most recent year are not yet available) and, if pro forma financial information is presented for an interim period, the document also includes (or incorporates by reference) historical interim financial information for that period (which may be presented in condensed form). In the case of a business combination, the document should include (or incorporate by reference) the appropriate historical financial information for the significant constituent parts of the combined entity.

.57 Additionally, the historical financial statements of the entity (or, in the case of a business combination, of each significant constituent part of the combined entity) on which the pro forma financial information is based must have been compiled, reviewed, or audited. The accountant's compilation or review report or the auditor's report on the historical financial statements should be included (or incorporated by reference) in the document containing the pro forma financial information.

.58 Before issuance of a compilation report on pro forma financial information, the accountant should read such compiled pro forma financial information, including the summary of significant assumptions,[2] and consider whether the information appears to be appropriate in form and free of obvious material errors. In this context, the term error refers to mistakes in the compilation of the pro forma financial information, including arithmetical or clerical mistakes, and mistakes in the application of accounting principles, including disclosures, if presented. The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented. If the accountant reports on compiled pro forma financial information when management elects to omit substantially all disclosures, then the accountant should follow the guidance in AR section 100.16, as amended.

.59 When the accountant is engaged to compile or issues a compilation report on pro forma financial information, the basic elements of the report are as follows:

a. An identification of the pro forma financial information.

b. A statement that the compilation was performed in accordance with SSARS issued by the American Institute of Certified Public Accountants.

c. A reference to the financial statements from which the historical financial information is derived and a statement on whether such financial statements were compiled, reviewed, or audited. (The report on pro forma financial information should refer to any modifications in the accountant's or auditor's report on historical financial statements.)

d. A statement that the pro forma financial information was compiled. If the compilation was performed in conjunction with a compilation of the company's financial statements, the paragraph should so state and indicate the date of the accountant's compilation report on those financial statements. Furthermore, any departure from the standard report on those statements should also be disclosed if considered relevant to the presentation of the pro forma financial information.

e. A description of the basis on which the pro forma financial information is presented if that basis is not generally accepted accounting principles and a statement that that basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles.

f. A statement that a compilation is limited to presenting pro forma financial information that is the representation of management (owners).

g. A statement that the pro forma financial information has not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on it.

h. A separate paragraph explaining the objective of pro forma financial information and its limitations.

i. A signature of the accounting firm or the accountant as appropriate. (The signature could be manual, stamped, electronic, or typed.)

j. The date of the compilation report. (The date of completion of the compilation should be used as the date of the accountant's report.)

---

[2] The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented. Nothing in this Statement should be interpreted to preclude the accountant from reporting on compiled pro forma financial information when management elects to omit substantially all disclosures. In that situation, the accountant should follow the guidance in AR section 100.16–.18, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2).

.60 Each page of the compiled pro forma financial information should include a reference, such as "See Accountant's Compilation Report."

Supplementary Information Presented Without Financial Statements

.61 Since stand-alone supplementary information will ordinarily not constitute a full financial statement, the accountant has no reporting responsibility under SSARS. However, the guidance above can generally be followed if the accountant is asked to report on supplementary information that is to be presented without financial statements.

Reporting on Charts and Graphs

General

.62 Common examples of charts and graphs prepared for clients include:

- Number of days sales in accounts receivable
- Sales by product line
- Operating expenses by plant
- Line of credit usage versus owned inventory

Charts and Graphs That Accompany Financial Statements

.63 When the basic financial statements are accompanied by information in the form of a chart or graph, such information should be considered supplementary information. These basic issues that should be considered:

- Accountants should check for consistency if the same information is presented numerically in the basic financial statements and graphically in supplementary information.
- Accountants should consider whether the information is presented in a way that is obviously misleading.
- Due to the subjective nature of graphic presentations, accountants will ordinarily elect to report on them as compiled—even when they accompany reviewed financial statements.
- Each chart or graph should include a reference to the accountant's report.

Stand-Alone Charts and Graphs

.64 Unless the stand-alone chart or graph constitutes a complete financial statement (which would be rare), the accountant has no reporting responsibility. The type of financial information depicted in charts and graphs (that is, whether they are considered specified elements or condensed financial information) determines how accountants should report if they elect to do so.

Emphasis Paragraphs

.65 Footnote 29 of AR section 100 states, "Nothing in this statement . . . is intended to preclude an accountant from emphasizing in a separate paragraph of his or her report a matter regarding the financial statements." In other words, footnote 29 permits, but never requires, an emphasis paragraph (as long as the matter is appropriately disclosed in the financial statements). If the financial statements are deficient or do not contain a needed disclosure and the client does not correct the statements, the accountant is *required* to state, in a separate paragraph of the report, that the financial statements contain a departure from GAAP.

.66 If the accountant decides to add an emphasis paragraph, he or she should follow these guidelines:

- Emphasis paragraphs should not introduce new information about the financial statements; they should only emphasize a matter that is disclosed in the financial statements.
- If the financial statements are deficient or do not contain a needed disclosure and the client does not correct the statements, the accountant is *required* to state, in a separate paragraph of the report, that the financial statements contain a departure from GAAP. This required paragraph differs from a voluntary emphasis paragraph.
- Emphasis paragraphs should not contain information about the procedures the accountant has or has not performed.
- Emphasis paragraphs should not contain any conclusions or opinions.
- If the accountant decides to add an emphasis paragraph to highlight a going-concern disclosure in the client's financial statements, he or she should not use the term "substantial doubt" in that paragraph (Substantial doubt is an audit-evidence-based concept that should only be used in audit reports.)

Going Concern Issues

.67 According to Interpretation No. 11 of SSARS No. 1, "Reporting on Uncertainties" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.33–.40) and footnote 29 of SSARS No. 1, the accountant should consult AU section 341.10–.11, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), to evaluate the adequacy of disclosure of uncertainties caused by concern about the entity's ability to continue as a going concern. If, based on AU section 341, the accountant believes that the financial statement disclosure of the uncertainty is inadequate, he or she should consider modifying the report. See the preceding "Emphasis Paragraphs" section above for further information.

Full Disclosure Financial Statements

.68 As discussed earlier, footnote 29 of SSARS No. 1 permits, but never requires, an emphasis paragraph (as long as the matter is appropriately disclosed in the financial statements). If the accountant decides to add a paragraph to emphasize a going concern matter, Interpretation No. 29 of SSARS No. 1, "Reporting on an Uncertainty, Including an Uncertainty About an Entity's Ability to Continue as a Going Concern" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.123) contains illustrative language that he or she may use:

> As discussed in Note X, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

Omission of Substantially All Disclosures

.69 The accountant may compile financial statements for a client that omit substantially all disclosures required by GAAP or OCBOA, provided that the omission is clearly indicated in the report and is not, to the accountant's knowledge, undertaken with the intention of misleading those who might reasonably be expected to use such financial statements.[3]

.70 Since the user is alerted that substantially all disclosures have been omitted from the financial statements (by adding a paragraph to the compilation report to explain the omission), going concern disclosures would not be required.

[3] Note that the accountant cannot review financial statements that omit substantially all disclosures.

.71 Although not required, the going concern matter can be disclosed. In this case, however, the disclosure should be made in the financial statements. Keep in mind that emphasis paragraphs should not introduce new information about the financial statements. Rather, they should only emphasize a matter that is already disclosed in the financial statements. If the going concern matter is the only disclosure included in the financial statements, it should be labeled as "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included," rather than "Notes to the Financial Statements." Once disclosed in the financial statements, the matter can then be emphasized, if the accountant desires, in a separate paragraph of the report.

Reporting on Computer-Prepared Financial Statements

.72 Computer-prepared financial statements for interim or annual periods that contain disclosure omissions or measurement departures must be reported on in accordance with AR section 100. The accountant cannot place a legend on computer-prepared financial statements saying that the statements were not compiled, reviewed, or audited by an accountant and thereby avoid the reporting requirements of AR section 100.

Reporting When There Is a Scope Limitation

.73 Scope limitations occur in audit engagements when the auditor is prevented from applying GAAS because of limitations imposed by the client or caused by circumstances. When an auditor encounters a scope limitation, he or she issues an "except for" opinion or disclaimer of opinion. However, AR section 100 does not permit such reporting.

.74 Scope limitations can occur in SSARS engagements, especially in initial review engagements. In those cases, it is not unusual for the accountant to raise questions about the reasonableness of amounts included in the financial statements. Often, due to the timing of the engagement or inadequate accounting records, he or she may also be unable to apply analytical procedures to obtain review assurance. AR section 100.43 notes that when an accountant is unable to perform inquiry and analytical procedures necessary for a review or when the client does not furnish a representation letter, the review will be incomplete and a review report cannot be issued. In this situation, the accountant should consider whether the scope limitation also precludes him or her from issuing a compilation report.

.75 In considering the limitations of the scope limitation, the accountant should evaluate the possibility that the information affected by the scope limitation is incorrect, incomplete, or otherwise unsatisfactory. This evaluation is a matter of professional judgment. If the client is unable to provide additional or revised information due to factors beyond his or her control, a step-down to a compilation is probably acceptable. The accountant should consider the following:

- Whether the reason for the scope limitation seems logical
- Whether the scope restriction significantly impairs the usefulness of the financial statements

.76 In deciding whether it would be appropriate to issue a compilation report when a scope restriction precludes a review report, the accountant should determine if the scope restriction is client-imposed. AR section 100.09 requires the accountant to withdraw from the engagement if the client refuses to provide additional or revised information. A scope restriction resulting from inadequate accounting records should normally be considered a client-imposed restriction. Although the restriction may be unintentional, the maintenance of adequate accounting records is within the client's control. Situations where the client is unable to provide additional or revised information should be rare. One such situation may be when accounting records have been destroyed.

.77 When there has been a scope restriction that precludes a review report and the accountant decides to issue a compilation report, AR section 100.68 indicates he or she should issue an appropriate compilation report without any reference to the scope restriction.

.78 If the accountant is unable to obtain the limited assurance required for a review and decides it would not be appropriate to issue a compilation report, he or she should try to provide other accounting information to the client, short of submitting financial statements. For example, a working trial balance may satisfy the client's needs.

Reporting on Financial Statements Included in MCS Reports

General

.79 Unaudited financial statements are often included in reports on findings in Management Consulting Services engagements (MCS reports). A question often arises as to what reporting responsibility the CPA has on those historical financial statements.

.80 Currently, there is no provision in SSARS to exempt historical financial statements included in MCS reports. Likewise, SSARS do not provide for different levels of service depending on the intended use of the financial statements. Consequently, SSARS currently require that only historical financial statements that the accountant submits to clients or others, including statements included in MCS reports, at least be compiled.

Financial Statements Compiled or Reviewed by Another Accountant

.81 If the MCS report contains financial statements that were compiled or reviewed by another accountant and the other accountant's report is included, the CPA is not required to mention the statements in the report. If, however, the other accountant's report is not included with the financial statements in the MCS report, the accountant should include a reference to the other accountant's report that includes:

- A statement describing the service performed by the other accountant, without disclosing that accountant's name
- The date of the other accountant's report
- A description of the standard disclaimer in a compilation report or, for a review, the standard limited assurance language included therein
- A description of any modifications of the standard compilation or review report, including any paragraphs that emphasize certain matters relating to the financial statements

.82 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard compilation report on the financial statements follows:

> The 20X1 financial statements of XYZ Company were compiled by other accountants, whose report dated February 1, 20X2 stated that they did not express an opinion or any other form of assurance on those statements.

.83 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard review report on the financial statements follows:

> The 20X1 financial statements of XYZ Company were reviewed by other accountants, whose report dated February 1, 20X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

Client-Prepared Financial Statements

.84 If the MCS report contains client-prepared financial statements, the accountant is not required to compile and report in those statements. In that case, professional standards do not require that the accountant mention those statements in the MCS report at all. However, most accountants would compile and report on such statements since they are included in a document (MCS report) that bears their name and because a compilation is the lowest level of service with which they would want to be associated. If the accountant decides not to compile the statements, he or she should add a statement to the MCS report to clarify his or her responsibility for the financial statements. Such a statement might be worded as follows:

> We have not compiled, reviewed or audited the financial statements presented on pages ____ to ____ and, accordingly, we assume no responsibility for them.

Reporting When Only One Financial Statement Is Presented

.85 An accountant may issue a compilation report on a single financial statement, such as a balance sheet. Likewise, he or she may issue a review report on a single financial statement. Engagements to report on a single financial statement are limited reporting engagements, not scope restrictions.

Reporting on Comparative Financial Statements

.86 SSARS No. 2, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 200), sets forth the authoritative requirements that obligate the accountant to report on each period when financial statements of two or more periods are presented in columnar form. Reporting is simple unless a change of accountants has occurred, the level of service (compilation or review) differs from period to period, or a change in the nonpublic status of the entity has occurred. In these situations, the accountant may face some rather complex reporting decisions. Because the accountant may not face these complexities often, applying SSARS No. 2 can be daunting.

.87 The following definitions from SSARS No. 2 may facilitate reporting on comparative financial statements.

- *Updated report*—A continuing accountant issues this kind of report, which considers new information from the current engagement and re-expresses the previous conclusions or expresses different conclusions on the prior-period financial statements as of the current report date.
- *Reissued report*—Issued subsequent to the date of the original report but bears the same date as the original report; a reissued report may need to be revised and dual-dated for the effects of specific events.

General

.88 When comparative financial statements of a nonpublic entity are presented, the accountant should issue a report covering each period presented. If the accountant becomes aware that financial statements of other periods that have not been audited, reviewed, or compiled are presented in comparative form in a document containing financial statements that he or she has reported on and the accountant's name or report is used, the accountant should advise the client that the use of his or her name or report is inappropriate. The accountant may also wish to consult with an attorney.

.89 The accountant should not report on comparative statements when statements for one or more of the periods, but not all, omit substantially all disclosures.

Practice Tip

Financial statements in columnar form with disclosures are comparative; financial statements that omit substantially all disclosures are comparative; but financial statements with disclosures are not comparative to financial statements without disclosures.

Continuing Accountant's Standard Report

.90 A continuing accountant who performs the same or higher level of service on the current period financial statements should update his or her report on the prior period financial statements.

.91 A continuing accountant who performs a lower level of service (20X2 compiled, 20X1 reviewed) should either

- Include a separate paragraph in the report describing the responsibility for the prior period financial statements.
- Reissue the report on the prior period financial statements.

.92 If the first option indicated in the paragraph above is selected, the description should include the original date of the report and should state that no review procedures were performed after that date.

.93 If the second option is selected, the report may be

- A combined compilation and reissued review report. (The combined report should state that no review procedures were performed after the date of the review report.)
- Presented separately.

Continuing Accountant's Changed Reference to GAAP

.94 The accountant should consider the effects on the prior period report of circumstances or events that came to his or her attention. When the accountant's report contains a changed reference to a GAAP departure, the report should include a separate paragraph indicating

- Date of previous report.
- Circumstances or events that caused the change.
- If applicable, that the prior period financial statements have been changed.

Predecessor's Compilation or Review Report

.95 A predecessor accountant is not required to, but may choose to reissue his or her report. If the predecessor's compilation or review report is not presented, the successor should either

- Make reference to the predecessor's report.
- Perform a compilation, review, or audit of the prior period financial statements and report thereon.

.96 If "reference to the predecessor's report" option is selected, the successor's reference should include

- A statement that the prior period financial statements were compiled or reviewed by another accountant(s) (without identifying the predecessor by name).[4]

[4] The successor accountant should not name the predecessor accountant in his or her report; however, the successor accountant may name the predecessor accountant if the predecessor accountant's practice was acquired by, or merged with, that of the successor accountant. [SSARS No. 2, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 200), as amended, effective May 2004, by SSARS No. 11, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2, AR sec. 50).]

- The date of prior accountant's report.
- A description of the disclaimer or limited assurance report.
- A description or quotation of any report modification or emphasis paragraphs.

.97 According to AR section 200.20, if the predecessor report is to be reissued, before reissuing the predecessor should consider

- The current form and presentation of the prior period financial statements.
- Subsequent events not previously known.
- Changes in the financial statements that alter modifications to the report.

.98 The predecessor should also perform the following procedures:

- Read the current period financial statements and the successor's report.
- Compare the prior period financial statements (*a*) with those previously issued, and (*b*) with the current period.
- Obtain a letter from the successor indicating whether he or she is aware of any matter that affects the prior period financial statements. The predecessor should not refer in his reissued report to this letter or the report of the successor.

.99 If the predecessor becomes aware of any matter that affects the prior period financial statements, he or she should

- Make inquiries or perform analytical procedures similar to those that would have been applied to the information if it had been known at the report date.
- Perform other procedures considered necessary such as discussing the matter with the successor or reviewing the successor's working papers.

.100 When reissuing the report, the predecessor should use the date of the previous report. However, if the financial statements are revised, the report should be dual dated. Also, if the financial statements are revised, the predecessor should obtain a written statement from the former client describing the new information and its effect on the prior period financial statements.

.101 If the predecessor is unable to complete the reissue procedures described above, he or she should not reissue the report and may wish to consult with an attorney.

Changed Prior Period Financial Statements

.102 When the financial statements have been changed, either the predecessor (as discussed above) or the successor should report on the restated financial statements. If the successor reports on them, he or she should audit, review, or compile the financial statements and report accordingly. The successor accountant is not precluded from issuing a compilation or review report on the financial statements for both years. Additionally, the predecessor is not precluded from updating his or her compilation or review report. If the predecessor accountant does not reissue his or her report and the successor auditor does not report on the restated prior-year financial statements, the successor accountant should indicate in the introductory paragraph of his or her compilation or review report that a predecessor accountant reported on the financial statements of the prior period before restatement.

Reporting When Prior Period Is Audited

.103 The accountant should issue a compilation or review report on the current period financial statements and either

- Reissue the audit report on the prior period or
- Add a separate paragraph to the current period report that includes the following information:
  - — The financial statements of the prior period were audited.
  - — The date of the audit report.
  - — The type of opinion.
  - — Substantive reasons for other than unqualified opinion.
  - — No audit procedures were performed after the date of the audit report.

Reporting on Financial Statements That Previously Did Not Omit Substantially All Disclosures

.104 The accountant may report on comparative financial statements that omit substantially all disclosures even if the prior period statements were originally compiled, reviewed, or audited (with disclosures) provided that his or her report includes an additional paragraph stating the nature of the previous service and the date of the previous report.

Change of Accountants—Reporting Following a Merger or Purchase of a Firm

.105 When there has been a merger or purchase of a firm, the new firm or purchaser should report as a successor accountant and apply the guidance in SSARS No. 2. Basically, it permits the successor to (*a*) make reference to the old or acquired firm's report or (*b*) assume compilation, review, or audit responsibility for the prior period financial statements. The new firm or purchaser may also indicate in the report that a merger or purchase took place if reference is made to the predecessor's report. However, the predecessor firm should not be named.

Change of Accountants—Predecessor Accountant Has Ceased Operations

.106 A February 1991 *Notice to Practitioners* issued by the AICPA states that the reporting depends on whether the prior-period financial statements have been restated.

.107 If the prior-period financial statements were compiled or reviewed and have not been restated, the Notice states that the successor accountant should add a paragraph to the report on the current-year financial statements that includes:

- A statement that the prior-period financial statements were compiled or reviewed by another accountant who has ceased operations
- The date of the predecessor accountant's report
- A description of the standard form of disclaimer or limited assurance, as applicable, included in the report
- A description or quotation of any modifications of the standard report and any paragraphs emphasizing a matter regarding the financial statements

.108 If the prior-period financial statements were audited and have not been restated, the successor accountant should add a paragraph to the report on the current-period financial statements that indicates:

- That the prior period financial statements were audited by another firm who has ceased operations
- The date of the predecessor's report
- The type of opinion issued by the predecessor

- If the opinion was other than unqualified, the substantive reasons therefore
- That no auditing procedures were performed after the date of the predecessor's report

.109 If the prior-period financial statements have been restated, the successor accountant should compile, review or audit those financial statements and report accordingly.

Change of Status—Public/Nonpublic Entity

.110 A previously issued compilation or review report should not be reissued or referred to in the current report if the entity is currently a public entity.

SSARS No. 2 Summary

.111 SSARS No. 2 is rather complex. The following summary decision aid helps simplify the report decision process in SSARS No. 2. The comparative statements are for years 20X5 and 20X6.

1. If 20X6 is audited, SASs apply.
2. If the entity's current status for 20X6 is a public company, SASs apply.
3. For continuing accountant:
   a. If 20X6 level of service is equal to or higher than 20X5, update report.
   b. If 20X6 is lower level of service, either refer to or reissue prior report.
4. For successor accountant:
   a. If predecessor does not reissue, refer to report of predecessor or perform audit, review, or compilation of 20X5.
   b. If financial statements are restated because of an error and predecessor doesn't report on restated financials, perform audit, review, or compilation of 20X5.

Split-Level Reporting

.112 Split-level reporting involves providing different levels of assurance on a single set of financial statements (for example, auditing the balance sheet and reviewing the income statement). Although the authoritative literature does not address this situation, most believe that it should be avoided.

Reporting When Other Accountants Have Audited or Reviewed a Component

.113 If other accountants are engaged to audit or review the financial statements of a division, branch, subsidiary, or other investee, the accountant should require reports from the other accountants as a basis, in part, for his report on his review of the financial statements of the reporting entity. The accountant may decide to refer to the work of the other accountants in his review report. If such a reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants. SSARS do not contain guidance for obtaining compilation reports from other accountants, since no assurance can be derived from compilation work.

Preliminary Financial Statement Drafts

.114 Interpretation No. 17 of SSARS No. 1, "Submitting Draft Financial Statements" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.62) states that an accountant can submit draft financial statements without attaching a compilation or review report as long as:

- He or she intends to submit final financial statements, and
- He or she labels each page of the draft financial statements with words such as "Draft," "Preliminary Draft," "Draft—Subject to Change," or "Working Draft."

.115 In the rare circumstances where the accountant submits drafts but never issues the final statements, the interpretation suggests that the accountant document the reasons why. The interpretation reinforces the fact that preliminary drafts should not be used as a means of circumventing the reporting standards of SSARS.

AAM Section 2610

Accountants' Reports on Compilation[1] of Financial Statements of a Nonpublic Entity

.01 Accountants' Standard Report

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings,[*] and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

---

[1] If the statement of comprehensive income is included, the first paragraph of the report should also refer to this statement.

[*] APB Opinion No. 12, *Omnibus Opinion—1967*, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.

.02 Omission of Substantially All Disclosures

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income and retained earnings, for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures (and the statement of cash flows) required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

January 28, 20X7

[*Signature of CPA*]

.03 Accountants Not Independent

Stockholders and Board of Directors
[*Company*]
[*Address*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

We are not independent with respect to [*Company*].

January 28, 20X7

[*Signature of CPA*]

.04 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

A statement of cash flows for the year ended December 31, 20X6, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

January 28, 20X7

[*Signature of CPA*]

.05 Departure From GAAP—Accounting Principles Not Generally Accepted

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management [*owners*]. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed me (us) that the company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders' equity would have been decreased by $500,000.

January 28, 20X7

[*Signature of CPA*]

.06 Departure From GAAP—Accounting Principles Not Generally Accepted and Omission of Disclosures

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (We) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

Generally accepted accounting principles require that [*describe requirement*]. Management has informed me (us) that the company has [*describe departure*], which is not in accordance with generally accepted accounting principles. Management has not determined the effect of the departure from generally accepted accounting principles on the accompanying balance sheet. The accompanying statements of income, retained earnings, and cash flows would not be affected by the departure.

Management has elected to omit substantially all disclosures required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.08 Continuing Accountants' Report on Comparative Statements—Both Periods Compiled

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheets of [*Company*] as of December 31, 20X6 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

.09 Continuing Accountants' Report on Comparative Statements—Current Period Compiled With Reference to Review Report on Prior Period

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6 and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The accompanying December 31, 20X5 financial statements of [*Company*] were previously reviewed by us, and our report dated [*Date*] stated that we were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles. I (We) have not performed any procedures in connection with that review engagement after the date of our report on the [*Year*] financial statements.

January 28, 20X7

[*Signature of CPA*]

.10 Continuing Accountants' Report on Comparative Statements—Both Periods Compiled With Restatement of Prior Period Financial Statements

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheets of [*Company*] as of December 31, 20X6 and December 31, 20X5, and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

In my (our) previous compilation report dated [*Date*], on the December 31, 20X5 financial statements, I (we) referred to a departure from generally accepted accounting principles because the company [*describe departure*]. However, as disclosed in Note [*Number*], the company has restated its December 31, 20X5 financial statements to [*describe correction*] in accordance with generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The December 31, 20X5 financial statements of [*Company*] were reviewed by other accountants whose report, dated [*Date*], stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

January 28, 20X7

[*Signature of Successor CPA*]

.13 Continuing Accountants' Report on Comparative Statements—Current Period Compiled With Reference to Audit Report on Prior Period

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The December 31, 20X5 financial statements were audited by us and I (we) expressed an unqualified opinion on them in our report dated [*Date*]. I (We) have not performed any auditing procedures since that date.

January 28, 20X7

[*Signature of CPA*]

.14 Continuing Accountants' Report on Comparative Statements—Prior Period Financial Statements That Omit Substantially All Disclosures Have Been Compiled From Previously Compiled (Reviewed) Financial Statements for the Same Period

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

The accompanying 20X5 financial statements were compiled by me (us) from financial statements that did not omit substantially all of the disclosures required by generally accepted accounting principles and that I (we) previously reviewed as indicated in my (our) report dated March 1, 20X6.

January 28, 20X7

[*Signature of CPA*]

.15 Compilation Report—Financial Statements Accompanied by Supplementary Information

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, and the supplementary information appearing on pages [*Numbers*], which is presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and supplementary information and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

.16 Compilation Report on Pro Forma Financial Information

Stockholders and Board of Directors
[*Company*]

I (we) have compiled the accompanying pro forma financial information as of and for the year ended December 31, 20X6, reflecting the business combination of the Company and ABC Company in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The historical condensed financial statements are derived from the historical unaudited financial statements of XYZ Company, which were compiled by me (us), and of ABC Company, which were compiled by another (other) accountant(s).[2]

A compilation is limited to presenting pro forma financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying pro forma financial information and, accordingly, do not express an opinion or any other form of assurance on it.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the transaction (or event) occurred at an earlier date. However, the pro forma financial information is not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the above-mentioned transaction (or event) actually occurred earlier.

[*If the presentation does not include all applicable disclosures, the following paragraph should be added.*][3]

Management has elected to omit all of the disclosures ordinarily included in pro forma financial information. The omitted disclosures might have added significant information regarding the company's pro forma financial position and results of operations. Accordingly, this pro forma financial information is not designed for those who are not informed about such matters.

January XX, 20X7

[*Signature of CPA*]

---

[2] Where one set of historical financial statements is audited or reviewed and the other is audited, reviewed, or compiled, wording similar to the following would be appropriate:

> The historical condensed financial statements are derived from the historical financial statements of XYZ Company, which were compiled by me (us), and of ABC Company, which were reviewed by another (other) accountant(s), appearing elsewhere herein (or incorporated by reference).

If either accountant's review report or auditor's report includes an explanatory paragraph or is modified, that fact should be referred to within this report.

[3] The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented.

.17 Compilation Report—Emphasis of a Going-Concern Uncertainty

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

As discussed in Note [*Number*], certain conditions indicate that the company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the company be unable to continue as a going concern.

January 28, 20X7

[*Signature of CPA*]

.18 Comparative Statements—Current Year Compiled and Prior Year Reviewed by a Different Accountant Who Has Ceased Operations

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The December 31, 20X5 financial statements of [*Company*] were reviewed by other accountants who have ceased operations and whose report, dated [*Date*], stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

January 28, 20X7

[*Signature of Successor CPA*]

.19 Comparative Statements—Current Year Compiled; Prior Year Audited by a Different Accountant Who Has Ceased Operations

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The December 31, 20X5 financial statements of [*Company*] were audited by other accountants who have ceased operations, and they expressed an unqualified opinion on them in their report dated [*Date*], but they have not performed any audit procedures since that date.

January 28, 20X7

[*Signature of Successor CPA*]

[*The next page is 2641.*]

AAM Section 2620

Accountants' Reports on Review of Financial Statements of a Nonpublic Entity

.01 Accountants' Standard Report

Stockholders and Board of Directors
[*Company*]

I (We) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings,* and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

January 28, 20X7

[*Signature of CPA*]

---

* APB Opinion No. 12 requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the review report is not needed.

.02 Departure From GAAP—Accounting Principle Not Generally Accepted

Stockholders and Board of Directors
[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As disclosed in Note X to the financial statements, investments in marketable equity securities should be reported at fair value. Management has informed us that the Company has stated these investments at cost, which is not in accordance with generally accepted accounting principles. If generally accepted accounting principles had been followed, the investment in marketable equity securities and stockholders' equity would have been decreased by $70,000.

January 28, 20X7

[*Signature of CPA*]

.03 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors
[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

A statement of cash flows for the year ended December 31, 20X6, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operations.

AAM Section 2700
Special Areas

Other Comprehensive Bases of Accounting

.01 Bases of accounting other than generally accepted accounting principles (GAAP) (referred to as other comprehensive bases of accounting, or OCBOA) have become a widely used alternative to the numerous and sometimes complex accounting requirements prescribed by GAAP. Unfortunately, there is very little authoritative guidance related to applying OCBOA.

.02 The only authoritative guidance for OCBOA is found in the auditing standards. AU section 623.03, *Special Reports* (AICPA, *Professional Standards*, vol. 1), and states that "an independent auditor's judgment concerning the overall presentation of financial statements should be applied within an identifiable framework." Ordinarily, that framework is provided by GAAP, but AU section 623 allows the use of a comprehensive basis of accounting other than GAAP (AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), also recognizes OCBOA for compiled and reviewed financial statements). AU section 623 recognizes the following OCBOAs:

- The basis of accounting the reporting entity uses to comply with the requirements or financial reporting provisions of a governmental regulatory agency which has jurisdiction over the entity. An example is a basis of accounting insurance companies use pursuant to the rules of a state insurance commission.
- The basis of accounting the reporting entity uses or expects to use to file its income tax return for the period covered by the financial statements
- The cash receipts and disbursements basis of accounting, and modifications of the cash basis having substantial support, such as recording depreciation on fixed assets or accruing income taxes
- A definite set of criteria having substantial support that is applied to all material items appearing in financial statements, such as the price-level basis of accounting

.03 AU section 623.04 prohibits auditors from issuing the special report described in the Statement on Auditing Standards (SAS) unless one of the foregoing descriptions applies to the financial statements.

Deciding When To Use an OCBOA

.04 OCBOA financial statements are beneficial to clients for many reasons. Among them is the idea that accountants do not need to consider the measurement requirements of GAAP for OCBOA financial statements and, therefore, OCBOA statements often can be prepared on a more timely and cost efficient basis.

.05 You might consider the following characteristics of entities as good candidates for cash- or tax-basis financial statements:

- There are no third-party users of financial statements (for example, the entity is closely held with no third-party debt)
- The entity's debt is secured rather than unsecured

- The entity's creditors do not require GAAP financial statements
- The cost of complying with GAAP would exceed the benefits
- The owners and managers are closely involved in the day-to-day operations of the business and have a fairly accurate picture of the entity's financial position
- The business's owners are primarily interested in cash flows
- The owners are primarily interested in the tax implications of transactions
- Capital expenditures and long-term financing are not significant
- Internal Revenue Code rules do not require the entity to prepare its tax return on the accrual basis

.06 In advising clients about the use of an OCBOA, accountants should consider the following issues:

- Does the entity have inventory? If so, the pure cash basis may not be helpful.
- What basis of accounting does the entity use in preparing its income tax return? If the accrual basis is used, preparing financial statements on the same basis makes sense.
- Is the entity highly leveraged? Lenders may require GAAP financial statements.
- Are there outside investors? GAAP financial statements may provide information required by such users.
- Does the entity's cash flow parallel its income and expenses? The pure cash basis may be appropriate.
- Does the entity anticipate going public? If so, the entity will need a history of GAAP financial statements.
- Was the entity formed for tax purposes? If yes, the owners are probably interested in the tax effects of transactions, and the income tax basis would be appropriate.
- Is the entity subject to bonding requirements? Most bonding companies will only accept GAAP financial statements.

Basic Financial Statements

.07 In an OCBOA presentation, the basic financial statements typically present financial position and results of operations as measured under the OCBOA, descriptions of accounting policies, and notes to the financial statements. However, an exception to this presentation exists for entities that use the pure cash basis of accounting. Under the pure cash basis of accounting, a statement of assets, liabilities, and equity would be needless because the cash balance would be the only item that would appear. Consequently, entities using the pure cash basis of accounting present a single statement titled "Statement of Cash Receipts and Disbursements."

Statement Titles

.08 AU section 623.07 and Interpretation No. 12 of Statement on Standards for Accounting and Review Services (SSARS) No. 1, "Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.41–.45) indicate that titles of OCBOA financial statements should differ from titles of similar statements prepared in accordance with GAAP. AU section 623 and Interpretation No. 12 do not require specific titles, although they do list examples.

Table 2700-1
Suggested OCBOA Statement Titles

GAAP	*Cash-Basis*	*Tax-Basis*
Balance Sheet	Statement of Assets, Liabilities, and Equity—Cash Basis	Statement of Assets, Liabilities, and Equity—Income Tax Basis
Statement of Income	Statement of Revenues and Expenses—Cash Basis	Statement of Revenues and Expenses—Income Tax Basis
Statement of Income & Retained Earnings	Statement of Revenues, Expenses, and Retained Earnings—Cash Basis	Statement of Revenues, Expenses, and Retained Earnings—Income Tax Basis
Statement of Changes in Equity	Statement of Changes in Equity—Cash Basis	Statement of Changes in Equity—Income Tax Basis
Statement of Cash Flows	Statement of Cash Flows—Cash Basis	Statement of Cash Flows—Income Tax Basis

Notes:

- These titles are only suggestions. Other titles may be derived from the suggestions in AU section 623.07–.08.
- The pure cash basis has a single asset and no liabilities. Accordingly, only a single statement titled "Statement of Cash Receipts and Disbursements" is normally presented.
- Although Financial Accounting Standards Board (FASB) Statement No. 95, *Statement of Cash Flows,* does not require a statement of cash flows for OCBOA financial statements, if a cash flow statement is presented, it is suggested that the basis of accounting used be added to the statement title.

Disclosures

.09 Authoritative accounting literature does not address OCBOA or the disclosures necessary in such presentations. Limited guidance on disclosures can be found in the auditing literature (which is also applicable to compilation and review engagements). AU section 623 establishes the overriding criterion that cash, modified cash, and income tax basis financial statements should be "informative of matters that may affect their use, understanding, and interpretation." It goes on by stating that:

- The financial statements should include a summary of significant accounting policies that discusses the basis of presentation and describes how the basis differs from GAAP
- When financial statements contain items the same as, or similar to, those in GAAP financial statements, similar disclosures are appropriate (for example, depreciation or long-term debt)
- The auditor should also consider disclosing matters not specifically identified on the face of the statements, such as related party transactions, restrictions on assets and owners' equity, subsequent events, and uncertainties.

.10 Nevertheless, diversity in practice has developed over the years. Accountants at one extreme believe disclosures should be included in cash, modified cash, and income tax basis financial statements that are identical to those that would be included in a GAAP presentation. Accountants at the other extreme would recommend including very little disclosure in OCBOA statements.

.11 A survey completed by the AICPA Private Companies Practice Section in the mid-1990's found that there was a great deal of diversity in the interpretation of AU section 623 regarding the issue of disclosures. Guidance for practitioners was needed.

.12 To help clarify the issue of the disclosures related to AU section 623, the Audit Issues Task Force (AITF) of the Auditing Standards Board issued Interpretation No. 14 of AU section 623, *Evaluating the Adequacy of Disclosure in Financial Statements Prepared on the Cash, Modified Cash, or Income Tax Basis of Accounting* (AICPA, *Professional Standards* vol. 1, AU sec. 9623.90–.95). The interpretation provides the following guidance:

- The discussion of the basis of accounting required by AU section 623 may be brief and only needs to describe the primary differences from GAAP. Quantifying differences is not required.
- If the financial statements contain amounts for which GAAP would require disclosure, the statements should either provide the relevant disclosure or provide information that communicates the substance of that disclosure.
- If GAAP sets forth requirements that apply to the presentation of financial statements, cash, modified cash, and income tax basis statements should either comply with those requirements or provide information that communicates the substance of those requirements.
- A statement of cash flows is not required in presentations on the cash, modified cash, or income tax basis of accounting. However, if a presentation of cash receipts and disbursements is presented in a format similar to a statement of cash flows or if the entity chooses to present such a statement, the statement should conform to the requirements for a GAAP presentation or communicate the substance of the GAAP requirements.
- If GAAP would require disclosure of other matters, the need for that same disclosure or disclosure that communicates the substance of those requirements should be considered.

Cash Basis of Accounting

Pure Cash Basis

.13 Under the cash receipts and disbursements basis of accounting ("pure cash basis"), only transactions that increase or decrease cash and cash equivalents are reflected in the financial statement. The pure cash basis recognizes all cash disbursements as expenses and all cash receipts as revenues. In practice, the pure cash basis of accounting is rare.

.14 Entities that use the pure cash basis of accounting would include, for example, school activity funds, civic ventures, trusts and estates, political action committees and political campaigns. Typically, those types of entities have the following characteristics:

- They are not-for-profit oriented
- Their operations are simple
- Their accounting and finance functions are unsophisticated
- There is only one major activity
- Capital expenditures and long-term debt are not significant

Modified Cash Basis

.15 AU section 623 describes the modified cash basis of accounting as the pure cash basis incorporating modifications having substantial support. These modifications generally include the recognition of certain transactions on an accrual basis, as entities would recognize them under GAAP. The appropriate modifications and the extent of those modifications are not clearly defined in the literature, however.

.16 Generally, entities that use the modified cash basis of accounting, such as professional association of doctors, lawyers, or CPAs, might include the following characteristics:

- They are profit oriented
- They distribute profits as collected (for example, through bonuses and retirement plan contributions)
- They have significant inventory and credit arrangements with vendors
- They make material capital expenditures or incur material amounts of debt
- Their operations are somewhat sophisticated, and accounting for them may become complex

Income Tax Basis of Accounting

.17 The income tax basis of accounting typically is based on federal income tax laws that generally do not address financial statement presentation or disclosure considerations, however.

.18 Typically, entities that use the tax basis of accounting are either:

- Profit oriented enterprises (such as small, closely held companies for which conversion to GAAP would be costly)
- Partnerships whose partnership agreements require the use of the tax basis of accounting
- Not-for-profit organizations seeking relief from the requirements of FASB Statement Nos. 116, *Accounting for Contributions Received and Contributions Made,* and 117, *Financial Statements of Not-for-Profit Organizations.*

Nontaxed Entities

.19 AU section 623.04 defines the income tax basis of accounting as the basis an entity uses or expects to use to file its income tax return. However, AU section 623 does not provide any additional guidance on what is meant by the phrase “income tax return.” If taken literally, many entities would not be able to use the income tax basis under AU section 623. Interpretation No. 14 of AU section 623 includes examples of not-for-profit organizations using the accounting principles followed in filing Form 990, thus acknowledging that such entities may issue income tax basis financial statements.

Other Bases of Accounting

.20 Although less common, entities may present their financial statements on a basis of accounting other than cash, tax, or GAAP. For example, insurance companies present financial statements on a regulatory basis. In addition, AU section 623 allows entities to use other comprehensive bases if they have substantial support and are applied consistently to all items in the financial statements. At the present time, however, only the price-level basis of accounting meets that criteria, and its use is very rare.

Disclosure of Basis of Accounting

.21 AR section 100 states that when the accountant reports on compiled financial statements that omit substantially all disclosures, he or she must disclose the basis of accounting in the compilation report if it is not disclosed in the financial statements. This paragraph has been interpreted by some accountants to mean that compiled or reviewed OCBOA financial statements must disclose the OCBOA is some manner, but that such statements are not required to describe the basis of accounting or to state that it is a comprehensive basis of accounting other than GAAP. AU section 623 requires these latter two disclosures for audited OCBOA financial statements.

.22 Interpretation No. 12 of SSARS No. 1 clarifies the disclosure requirements of OCBOA financial statements. The interpretation states that, ordinarily, OCBOA statements would contain a note stating the basis of presentation and describing how the basis differs from GAAP. Thus, the interpretation implies that the OCBOA disclosures for a SSARS engagement and an audit engagement should be similar. However, the location of this disclosure does differ. In a SSARS engagement, the disclosure is made in the notes. In an audit engagement, AU section 623 requires that the disclosure of the basis of presentation and a statement that it is a basis other than GAAP be made in a separate paragraph in the auditor's report, with a description of how the basis of presentation differs from GAAP in the notes. However, the difference between GAAP and the basis need not be quantified. Interpretation No. 14 of AU section 623 makes an exception to this disclosure requirement for compiled OCBOA financial statements that omit substantially all disclosures. In such an engagement, the report is modified by adding a sentence such as the following to the first paragraph of the report:

> The financial statements have been prepared on the accounting basis used by the Company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

.23 In summary, compiled OCBOA financial statements should ordinarily contain a note that discloses the basis of presentation and describes how it differs from GAAP. (This disclosure must always be made in reviewed financial statements. Otherwise, the review report would have to be modified for an OCBOA disclosure exception.) If this disclosure is included in the notes, only the financial statement titles should be modified in the report. If all disclosures are omitted from compiled financial statements, the compilation report should be modified as illustrated above.

Other Disclosures

.24 Financial statements prepared on an OCBOA require notes and other disclosures. If the statements are compiled, management may elect to omit substantially all disclosures. However, this option is not available if the statements are reviewed.

Reporting

.25 In general, the only report modification necessary when financial statements are prepared using a comprehensive basis of accounting other than GAAP is the identification of the financial statements. Since financial statements prepared using an OCBOA must contain modified titles (for example, "Statement of Assets, Liabilities, and Equity—Income Tax Basis" instead of "Balance Sheet"), the compilation or review report should refer to the modified titles actually used on the statements (for example, "We have compiled the accompanying statement of assets, liabilities, and equity—income tax basis...") However, when the accountant compiles OCBOA financial statements that omit substantially all disclosures, AR section 100 requires that he or she disclose the basis of accounting. This disclosure may be in an attached footnote or in a note on the face of the financial statements. If disclosure is not made as part of the financial statements, modification of the compilation report would be required.

.26 In addition, if substantially all disclosures have been omitted, the accountant must communicate this fact in the compilation report, by adding the following paragraph:

> Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were

> included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Prescribed Forms

Background

.27 One of the major complications of prescribed form engagements has been the requirement in AR section 100 that the accountant's report disclose all material measurement departures from GAAP. In 1981, the ARSC issued SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2, AR sec. 300), which amends AR section 100 and AR section 200 to provide for an alternative form of standard compilation report when the prescribed form or related instructions call for departures from GAAP.

Provisions of SSARS No. 3

.28 Any standard preprinted form designed or adopted by the body to which it is to be submitted is a prescribed form. Examples include forms used by industry trade associations, credit agencies, banks, and governmental and regulatory bodies other than those concerned with the sale or trading of securities.

.29 According to AR section 300.03, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2), the following alternative form of compilation report is appropriate when the financial statements are included in a prescribed form that calls for a departure from GAAP:

> I (We) have compiled the (identification of financial statements, including period covered and name of entity) included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
>
> My (Our) compilation was limited to presenting in the form prescribed by (name of body) information that is the representation of management (the owners). I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.
>
> These financial statements (including related disclosures) are presented in accordance with the requirements of (name of body), which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.30 Note that the first two paragraphs are similar to the standard compilation report of AR section 100. The main differences are the references to:

- The prescribed form
- The body that prescribed the form
- The third paragraph, which indicates that the basis of accounting and disclosures required by the form are different from GAAP and cautions the reader about the limits of the financial statements.

Departures From GAAP or From the Prescribed Form

.31 The accountant is concerned with three types of departures in an engagement to compile financial statements to be included in a prescribed form:

- Departures from GAAP required by the prescribed form. This type of departure does not require disclosure in the AR section 300 report.
- Departures from GAAP not required by the prescribed form. Such departures must be disclosed following the guidance in AR section 100.
- Departures from the requirements of the prescribed form. These departures also require disclosure following the guidance in AR section 100.

.32 For the items in the second and third bullets in the preceding paragraph, the accountant must modify the compilation report to identify, in a separate paragraph the departures, including the effects, if known. If not known, the accountant must include a statement that the effects have not been determined.

Signing a Preprinted Report Form

.33 AR section 300.05 states that the accountant should not sign a preprinted report form unless the language in it conforms to the guidance in AR section 300 or AR section 100. If the preprinted report is not suitable, the accountant should attach an appropriate report to the prescribed form. It is advisable to type, "See accountant's report" in the prescribed form signature block.

Determining When AR Section 300 Is Applicable

.34 Questions involving the applicability of AR section 300 might pertain to the definition of a prescribed form, the type of service involved or clarification of how a form calls for a departure from GAAP. These issues are discussed in the following questions.

.35 Does AR section 300 establish different standards for compiling a prescribed form? No. The reporting standards of AR section 100 require issuing a report whenever the accountant compiles or reviews financial statements included in a prescribed form. AR section 300 merely provides an alternative form of standard compilation report. It does not expand the accountant's reporting responsibility, nor does it change the performance standards of AR section 100.

.36 Is AR section 300 applicable to review engagements? No. AR section 300 makes no provision for an alternative review report. A review report must conform to the standards of AR section 100 or AR section 200. The report must describe any departures from GAAP (even if the departures are called for by the form). The review report must also describe each GAAP disclosure that is omitted.

.37 Is a tax return a prescribed form? No. AR section 300 refers to financial statements, and thus excludes financial presentations included in tax returns. Interpretation No. 10, "Reporting on Tax Returns" of AR section 100 (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.31–.32) points out that an accountant may attach a report to tax or information returns. This report should follow the guidance in AR section 100, since the tax return will be submitted to a user that did not design the form.

.38 Does a comprehensive set of instructions constitute a prescribed form? No. The definition of a prescribed form in AR section 300 specifically includes the words "standard preprinted form."

.39 Is AR section 300 applicable to a prescribed form that does not call for departures from GAAP? No. If the form does not call for departures from GAAP, the AR section 300 alternative report is not appropriate.

.40 How does a prescribed form call for departures from GAAP? AR section 300 indicates that a form calls for a departure from GAAP by either:

- Specifying a measurement principle not in conformity with GAAP; or
- Failing to request disclosures required by GAAP

.41 Can an AR section 100 report be issued even if AR section 300 applies? Yes. The accountant must, however, comply with AR section 100 regarding departures from GAAP.

.42 Is the AR section 300 report appropriate when a prescribed form is presented to other third parties? No. The AR section 300 alternative report presumes that the information required by a prescribed form is sufficient to meet the needs of the body that designed or adopted the form.

.43 What does a CPA do when financial statements presented on an OCBOA are included in the prescribed form and uses the terms "Balance Sheet," "Income Statement," etc.? In practice, the titles usually are not changed, and the report on the statements use the preprinted titles.

.44 What if the CPA is not independent? An accountant who is not independent can issue a AR section 300 report on financial statements included in a prescribed form. He or she must, however, comply with AR section 100 and include the following as the last paragraph of the report:

> I am (We are) not independent with respect to XYZ Company.

.45 Does the CPA have to mark each page of the prescribed form with "See Accountant's Report"? Yes. AR section 300 does not change that requirement.

Personal Financial Statements

.46 The term "personal financial statements" refers to financial statements that present the personal assets and liabilities of an individual or group of related individuals.

.47 AICPA Statement of Position (SOP) 82-1, *Accounting and Financial Reporting for Personal Financial Statements* (AICPA, *Technical Practice Aids*, ACC sec. 10,350), is the principle source of guidance in dealing with personal financial statements. This SOP establishes the current value basis of accounting as GAAP for personal financial statements. The AICPA's *Personal Financial Statement Guide*, contains guidance on the scope of work and form of report for audits, reviews, and compilations of personal financial statements.

Personal Financial Statements Engagements

.48 Using the estimated current value basis of accounting in personal financial statements creates some unique considerations for accountants engaged to compile or review such statements.

Acceptance of Clients

.49 Before accepting the engagement, the accountant should consider his independence, the client's integrity, and circumstances that present unusual business risks.

.50 Personal financial statement engagements usually require a greater degree of client participation than do other engagements. In many cases, client interviews and telephone inquiries are an integral part of the process. Therefore, it is especially important to consider a potential client's ability and willingness to provide sufficient data and reliable estimates of current value.

Engagement Letters

.51 Both AR section 100 and the *Personal Financial Statements Guide* recommend, but do not require, written engagement letters. Engagement letters are especially important in personal financial statement engagements to:

- Dispel any notion that the accountant is responsible for estimates of current value
- Link the client's cooperation to the fee, since the cooperation of the client is vital to developing adequate accounting information

Client Representation Letters

.52 Although AR section 100 only requires that a representation letter be obtained from the client in engagements to review personal financial statements, the *Personal Financial Statements Guide* recommends obtaining written representations on all personal financial statement engagements, because:

- The informal nature of personal financial records usually requires that accountants place greater reliance on the client's representation to ensure completeness of the statements.
- The estimated current values and amounts of assets and liabilities provided by the client have a significant effect on the statements.
- A client representation letter can help to clarify that responsibility for the estimates of current value, even if developed by the accountant, rests with the client.

Compilation of Personal Financial Statements

.53 Standards for compilation of financial statements prescribed by AR section 100 are applicable to the compilation of personal financial statements in the same manner as to the compilation of other financial statements. There is an exception for personal financial statements contained in written financial plans, if certain criteria are met (see the subsequent section in this Manual, "Exception for Personal Financial Statements Included in Written Financial Plans"). Thus, in compiling personal financial statements, the accountant must meet the same general requirements.

.54 First, the accountant should have knowledge of the accounting principles and practices applicable to personal financial statements. For instance, the accountant should understand the provisions of SOP 82-1.

.55 Second, the accountant should posses a general understanding of:

- The nature of the individual's transactions
- The form of available accounting records
- The stated qualifications of accounting personnel, if any
- The basis of accounting on which the financial statements are to be presented
- The form and content of the financial statements
- The methods used for determining estimated current values of significant assets and estimated current amounts of significant liabilities, and be able to consider whether the methods are appropriate in light of the nature of each asset or liability

.56 Third, the accountant should read the financial statements and consider whether they appear to be appropriate in form and free of obvious material errors.

.57 The standards prescribed by SSARS do not require an accountant to verify the reasonableness of information supplied to him or her in a compilation engagement. Accordingly, he or she can compile personal financial statements based on the client's estimate of current values and amounts.

.58 However, the *Personal Financial Statements Guide* warns that other factors may prevent the acceptance of the client's estimate. The guide requires that, at a minimum, the accountant obtain an understanding of the methods by which the individual determined the estimated current values and amounts and consider whether the methods are appropriate for the asset or liability.

.59 With the exception of compiled personal financial statements that omit substantially all disclosures, the financial statements, including the notes, should disclose the method used to determine the estimated current values and amounts, even when such values or amounts are based on the individual's estimate.

.60 In many situations, particularly when the individual is unsophisticated in financial matters, the individual and the accountant will jointly develop the estimated current values and amounts. In such situations, the accountant should obtain the individual's approval and acceptance of responsibility for the values, preferably in writing.

Review of Personal Financial Statements

.61 Standards for the review of financial statements prescribed by AR section 100 are applicable to the review of personal financial statements in the same manner as the review of other financial statements. Accordingly, to review personal financial statements, the accountant must meet the following general requirements.

.62 The accountant should possess (*a*) a level of knowledge of the accounting principles and practices applicable to personal financial statements and (*b*) an understanding of the individual's financial activities and financial position that will provide him, through the performance of inquiry and analytical procedures, with a reasonable basis for expressing limited assurance that no material modifications are necessary to the financial statements for them to conform to GAAP. Knowledge of accounting principles and practices implies that the accountant should be thoroughly familiar with the requirements of SOP 82-1.

.63 AR section 100 requires accountants to obtain a representation letter in all review engagements.

Reporting

.64 In general, the only report modifications necessary when presenting personal financial statements are the identification of the financial statements and identification of the reporting entity. For example:

> I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20XX, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
>
> A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

.65 However, when the accountant compiles personal financial statements that omit substantially all disclosures, the *Personal Financial Statements Guide* requires that he or she disclose that assets are presented at their estimated current values and liabilities are presented at their estimated current amount. This disclosure may be in an attached footnote or in a note on the face of the financial statements. If disclosure is not made as part of the financial statements, modification of the compilation report would be required. For example, the following sentence could be added to the first paragraph of the standard compilation report:

> The financial statement(s) is (are) intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

.66 In addition, if substantially all disclosures have been omitted, the accountant must communicate this fact in the compilation report, by adding the following paragraph:

> The individuals whose financial statements are presented have elected to omit substantially all disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the individuals' assets, liabilities, and net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Exception for Personal Financial Statements Included in Written Financial Plans

.67 AR section 600.03, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AICPA, *Professional Standards*, vol. 2), provides an exemption from AR section 100 for personal financial statements included in written personal financial plans when the following conditions exist:

- The accountant establishes an understanding with the client, preferably in writing, that the financial statements (1) will be used solely to assist the client and the client's advisers to develop the client's personal financial goals and objectives and (2) will not be used to obtain credit or for any purpose other than developing the financial plan
- Nothing comes to the accountant's attention during the engagement that would cause him to believe that the financial statements will be used to obtain credit or for any purpose other than developing the client's financial goals and objectives

.68 If both conditions exist, the accountant is exempt from both the performance and reporting standards in AR section 100. Absent both of these conditions, AR section 100 would apply.

.69 As long as those same conditions are met, Interpretation No. 1, "Submitting a Personal Financial Plan to a Client's Advisers" of AR section 600 (AICPA, *Professional Standards*, vol. 2, AR sec. 9600.01) clarifies that the same exception applies when an accountant submits a written personal financial plan containing the financial statements for use by a client's advisers to help the client implement the personal financial plan. Implementing the plan includes, for example, use of the plan by an insurance broker who will recommend specific insurance products to the client, an investment adviser who will provide specific recommendations about the investment portfolio, and an attorney who will draft a will or trust document.

The Accountant's Report

.70 AR section 600 prescribes the following language when the conditions of the AR section 100 exemption are met:

> The accompanying statement of financial condition of John Doe, as of December 31, 20XX, was prepared solely to help you develop your personal financial plan. Accordingly, it may be incomplete or contain departures from generally accepted accounting principles and should not be used to obtain credit or for any other purposes other than developing your personal financial plan. We have not audited, reviewed, or compiled the statement.

.71 AR section 600 does not require the accountant to identify specific measurement or disclosure departures in the report. As with any SSARS engagement, the accountant is required to place a notation such as "See accountant's report" on each financial statement page.

Specified Elements, Accounts, or Items of a Financial Statement

.72 A compilation of one or more specified elements, accounts, or items of a financial statement is limited to presenting financial information that is the representation of management (owners) without undertaking to express any assurance on that information. (The accountant might consider it necessary to perform other accounting services to compile the financial information.)

.73 Examples of specified elements, accounts, or items of a financial statement that an accountant may compile include schedules of rentals, royalties, profit participation, or provision for income taxes.

.74 If an accountant prepares or assists a client in preparing a schedule of one or more specified elements, accounts, or items of a financial statement, the accountant should consider how such a presentation of specified elements, accounts, or items will be used. If the specified element, account, or item of a financial statement is included as accompanying information to the basic financial statements, the accountant should refer to AR section 100.60, as amended. The accountant should also consider the potential of being associated with the schedule and the likelihood that the user may inappropriately infer, through that association, an unintended level of assurance. If the accountant believes that he or she will be associated with the information, the accountant should consider issuing a compilation report so a user will not infer a level of assurance that does not exist.

.75 An engagement to compile one or more specified elements, accounts, or items of a financial statement may be undertaken as a separate engagement or in conjunction with a compilation of financial statements.

.76 Before issuance of a compilation report on one or more specified elements, accounts, or items of a financial statement, the accountant should read such compiled specified elements, accounts, or items of a financial statement and consider whether the information appears to be appropriate in form and free of obvious material errors. In this context, the term *error* refers to mistakes in the compilation of the specified elements, accounts, or items of a financial statement, including arithmetical or clerical mistakes, and mistakes in the application of accounting principles, including disclosures, if presented.

.77 When the accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement, the basic elements of the report, in addition to the basic elements described in AAM section 2600.05, *Reporting*, are as follows:

a. A statement that the specified element(s), account(s), or item(s) identified in the report were compiled. If the compilation was performed in conjunction with a compilation of the company's financial statements, the paragraph should so state and indicate the date of the accountant's compilation report on those financial statements. Furthermore, any departure from the standard report on those statements should also be disclosed if considered relevant to the presentation of the specified element(s), account(s), or item(s).

b. A description of the basis on which the specified element(s), account(s), or item(s) are presented if that basis is not generally accepted accounting principles and a statement that that basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles.

.78 Each page of the compiled specified elements, accounts, or items of a financial statement should include a reference, such as "See Accountant's Compilation Report."

.79 Following are illustrations of accountant's compilation reports on specified elements, accounts, or items of a financial statement.

Report Related to Accounts Receivable

I (we) have compiled the accompanying schedule of accounts receivable of XYZ Company as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying schedule of accounts receivable and, accordingly, do not express an opinion or any other form of assurance on it.

Report Related to the Schedule of Depreciation— Income Tax Basis

I (we) have compiled the accompanying schedule of depreciation—income tax basis of XYZ Company as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The schedule of depreciation—income tax basis has been prepared on the accounting basis used by the Company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying schedule of depreciation—income tax basis and, accordingly, do not express an opinion or any other form of assurance on it.

Relationship of Statements on Standards for Accounting and Review Services to Quality Control Standards

.80 SSARS No. 1, as amended by SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (See AR section 100.70–.72), states that an accountant is responsible for compliance with SSARS in a review or compilation engagement. Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202.01) of the Code of Professional Conduct of the American Institute of Certified Public Accountants requires members to comply with such standards when associated with reviewed or compiled financial statements.

.81 An accountant has the responsibility to adopt a system of quality control in conducting an accounting practice. Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with SSARS in its review and compilation engagements. The nature and extent of a firm's quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations.

.82 SSARSs relate to the conduct on individual review and compilation engagements; Statements on Quality Control Standards (SQCSs) relate to the conduct of a firm's accounting practice. Thus, SSARSs and SQCSs are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of an individual engagement and the firm's accounting practice as a whole. However, deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular review or compilation engagement was not performed in accordance with SSARSs. This amendment is effective for review reports dated January 1, 2003, or after, by SSARS No. 9.

AAM Section 2710

Accountants' Reports on Prescribed Forms, Specified Elements, Personal Financial Statements, and OCBOA Financial Statements

.01 Compilation Report—Cash Basis Statements; Full Disclosure

Stockholders and Board of Directors
[*Company*]

We have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [*Company*] as of December 31, 20X6, and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

.02 Compilation Report—Cash Basis Statements; Omission of Substantially All Disclosures, With No Reference to Basis

Stockholders and Board of Directors
[*Company*]
[*Address*]

We have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [*Company*] as of December 31, 20X6, and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the modified cash basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

January 28, 20X7

[*Signature of CPA*]

.03 Compilation Report—Tax Basis Statements; Full Disclosure

Stockholders and Board of Directors
[*Company*]
[*Address*]

We have compiled the accompanying statement of assets, liabilities, and equity—income tax basis of [*Company*] as of December 31, 20X6, and the related statement of revenues and expenses—income tax basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

.04 Compilation Report—Tax Basis Statements; Omission of Substantially All Disclosures, With No Reference to Basis

Stockholders and Board of Directors
[*Company*]
[*Address*]

We have compiled the accompanying statement of assets, liabilities, and equity—income tax basis of [*Company*] as of December 31, 20X6, and the related statement of revenues and expenses—income tax basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the income tax basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.05 Review Report—Cash Basis Statements; Full Disclosure

Stockholders and Board of Directors
[*Company*]
[*Address*]

We have reviewed the accompanying statement of assets, liabilities, and equity—cash basis of [*Company*] as of December 31, 20X6, and the related statement of cash receipts and disbursements for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the cash basis of accounting, as described in Note [*Number*].

.07 Financial Statements Included in Certain Prescribed Forms

[*Name*], President
[*Company*]
[*Address*]

We have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (our) compilation was limited to presenting in the form prescribed by the [*Name of Bank or Other Entity*] information that is the representation of management. We have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of the [*Name of Bank or Other Entity*], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

January 28, 20X7

[*Signature of CPA*]

.08 Financial Statements Included in Certain Prescribed Forms—Departure From GAAP Not Called for by the Prescribed Form

[*Name*], President
[*Company*]
[*Address*]

We have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (our) compilation was limited to presenting in the form prescribed by the [*Name of Bank or Other Entity*] information that is the representation of management. We have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them. However, we did become aware of a departure from the accounting standards prescribed by the [*Name of Bank or Other Entity*] that is described in the following paragraph.

The instructions that accompany the prescribed form require that [*describe requirement*]. Management has informed us that the company [*describe deviation*]. Management has not determined the effect of the departure on the accompanying financial statements.

These financial statements (including related disclosures) are presented in accordance with the requirements of the [*Name of Bank or Other Entity*], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

January 28, 20X7

[*Signature of CPA*]

.09 Compilation Report—Personal Financial Statements; GAAP Basis

[*Name*]
[*Address*]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X6, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

.10 Compilation Report—Personal Financial Statements; GAAP Basis With GAAP Departure for Omission of Provision for Income Taxes

[*Name*]
[*Address*]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying statement of financial condition and, accordingly, do not express an opinion or any other form of assurance on it. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the statement of financial condition, generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and estimated current amounts of liabilities and their tax bases. The accompanying statement of financial condition does not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

AAM Section 3000

Engagement Planning and Administration

Sections 3160 and 3165 include illustrative audit assignment control forms and engagement letters that can be used by an accountant in the planning phase of an audit engagement.

Various formats of audit assignment controls and engagement letters are in use; nevertheless, inclusion of the formats in this section in no way means that they are preferable. Readers are urged to refer directly to authoritative pronouncements when appropriate.

Illustrative formats of audit assignment controls and engagement letters are often helpful in developing a consistent style within a firm. However, no set of illustrative formats can cover all the situations that are likely to be encountered in practice because the circumstances of engagements vary widely.

Readers should consider other sources of illustrative presentations, such as those in authoritative pronouncements and AICPA audit and accounting guides.

TABLE OF CONTENTS

Section *Paragraph*

[*The next page is 3101*.]

AAM Section 3100
Planning the Engagement

General

.01 The planning phase is an important part of every engagement. During this phase, the partner and the staff obtain an understanding of the entity and its environment, including its internal control, then develop an overall strategy for the expected conduct and scope of the engagement.

.02 The need for planning is highlighted in Rule 201, *General Standards* (AICPA, *Professional Standards*, vol. 1, ET sec. 201.01), AICPA Code of Professional Conduct, which states: "A member shall adequately plan and supervise an engagement."

.03 The first standard of fieldwork of generally accepted auditing standards states: "The auditor must adequately plan the work and must properly supervise any assistants." Statement on Auditing Standards (SAS) No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311), establishes standards and provides guidance to the independent auditor conducting an audit in accordance with generally accepted auditing standards on the considerations and activities applicable to planning and supervision.

.04 Proper planning also enhances the productivity of engagement personnel and should result in a more profitable engagement.

.05 The nature, timing, and extent of planning vary with the size and complexity of the entity, and with the auditor's experience with the entity and understanding of the entity and its environment, including its internal control. The auditor must plan the audit so that it is responsive to the assessment of the risk of material misstatement based on the auditor's understanding of the entity and its environment, including its internal control (see AAM sections 3120 and 3125).

Audit Planning

.06 Planning is not a discrete phase of the audit, but rather an iterative process that begins with engagement acceptance and continues throughout the audit as the auditor performs audit procedures and accumulates sufficient appropriate audit evidence to support the audit opinion. As a result of performing planned audit procedures,[1] the auditor may obtain disconfirming evidence that might cause the auditor to revise the overall audit strategy.

Appointment of the Independent Auditor

.07 Early appointment of the independent auditor has many advantages to both the auditor and the client. Early appointment enables the auditor to plan the audit prior to the balance-sheet date. Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the

---

[1] Paragraph 3 of SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), provides guidance with respect to the procedures the auditor performs in obtaining an understanding of the entity and its environment to establish a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing the risks of material misstatement of the financial statements.

fiscal year. In such instances, before accepting the engagement, the auditor should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they will not, the auditor should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion.

Establishing an Understanding With the Client and Preparing an Engagement Letter

.08 The auditor should establish an understanding with the client regarding the services to be performed for each engagement. The understanding should include the objectives of the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. The understanding could also include matters such as the timing of field work, report deadlines, and methods of fee determination and payment.

.09 SAS No. 108 requires the auditor to document the understanding through a written communication with the client in the form of an engagement letter. An engagement letter helps to prevent misunderstandings between the client and the auditor regarding the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client, and in most states it becomes a legally binding contract on both parties. There are other good reasons to obtain an engagement letter, including the following:

- *Reduce the risk of litigation and avoid misunderstandings with the client*. In today's litigious environment an engagement letter is needed for both old and new clients. To avoid misunderstandings, the engagement letter should describe in detail the services to be rendered, the fee, and other terms and conditions of the engagement. Oral agreements may result in differences of recollection or understanding between the accountant and the client.
- *Avoid misunderstandings by the staff*. The members of the staff working on the engagement must have a complete understanding of what is required of them. A copy of the engagement letter in the working papers provides them with an authoritative reference to supplement their oral instructions.

.10 Often, entities that have never been audited resist signing a client representation letter. To avoid client resistance at the end of the audit, many firms notify the client in the engagement letter that they will be asked to sign a client representation letter.

.11 If the auditor has reason to believe the client may publish all or a portion of an audit report, he should advise the client (preferably in the engagement letter) that firm policy is to read printer's proofs of the report and any other accompanying material. This precaution will protect both the client and accountant against condensation of financial statements, omission of footnotes, erroneous layout, and other errors such as misstatement of figures used in a president's letter, other narrative, or statistics.

.12 The understanding with the client should be obtained and the letter should be prepared before any significant work takes place on the engagement. The partner should personally present the letter to the client to ensure that a complete understanding has been achieved. The understanding or a signed copy of the engagement letter should be filed with the engagement's current working papers and permanent file.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. You should always make sure that a final engagement letter is issued in such circumstances.

.13 Should the nature of an engagement change during its progress, or should the firm be engaged for additional services during the year, a new engagement letter should be prepared. A step-down to a compilation or review engagement, or a special engagement for preparing a forecast, are examples of changes that would require a new engagement letter. Such changes should be made by the engagement partner after careful consideration of the reasons justifying the change. For example, the reasons justifying a step-down from an audit to a compilation or review may prevent the firm from reporting on the lower level of service.

Special Considerations

.14 The following matters should be considered while preparing an engagement letter:

- Whether the circumstances preclude an unqualified opinion, as in these examples:
  - — The auditor is retained after the beginning of the client's fiscal year, did not observe inventories or confirm receivables at the beginning of the year and was unable to gain satisfaction through application of alternative procedures.
  - — The client imposes restrictions on the scope of the audit. (AU section 508.42, *Reports on Audited Financial Statements* [AICPA, *Professional Standards*, vol. 1]).
  - — Significant litigation or other matters exist which may affect the opinion.
- Whether fee should be stated as a range, in hourly rates, as standard per diem charges for the engagement, or as a maximum or flat fee
- The person or persons to whom reports should be addressed
- The number of copies needed of the report and the people to whom they are to be distributed
- Deadlines for reports or analyses
- Out-of-pocket costs
- Additional work not contemplated in the original engagement
- The condition of records or circumstances other than those contemplated in the engagement letter (for example, deficient internal controls)
- A retainer
- One-time engagements
- Start-up costs when the client changes accountants
- Underwriters' requirements in connection with public offerings
- The part of the work to be done by other accountants

Contents of Engagement Letters

.15 An understanding with the client and an engagement letter regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements and the selection and application of the accounting policies.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.

- Management is responsible for designing and implementing programs and controls to prevent and detect fraud.

- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.

- Management is responsible for making all financial records and related information available to the auditor.

- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.

- The auditor is responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

- An audit includes obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies. However, the auditor is responsible for ensuring that those charged with governance are aware of any significant deficiencies that come to his or her attention.

- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

.16 The engagement letter should be addressed to those charged with governance, chief executive, or to whomever retained the firm. The engagement partner should sign the letter on behalf of the firm. The client representative responsible for the engagement should sign the letter denoting agreement with the contract. The original letter should be maintained in the engagement documentation. A copy of the letter should be given to the client.

.17 An understanding with the client and an engagement letter may include other matters, such as the following:

- The overall audit strategy.

- Involvement of specialists or internal auditors, if applicable.

- Involvement of a predecessor auditor.

- Fees and billing. Estimates of fees should be based on conservative, carefully prepared estimates. The expected billing methods and payment periods should be described.

- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators, including the Securities and Exchange Commission, may restrict or prohibit such liability limitation arrangements).

- Conditions under which access to the auditor's documentation may be granted to others.

- Additional services to be provided relating to regulatory requirements.
- Other services to be provided in connection with the engagement, for example, nonattest services, such as accounting assistance and preparation of tax returns subject to the limitations of Ethics Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

.18 Presented below is a list of analyses, schedules and other items that are often requested from the client prior to the start of an audit engagement. The client assistance schedule should be tailored to each specific engagement.

- The general ledger.
- A reconciliation for each bank account.
- A trade accounts receivable aging.
- Accounts receivable confirmation letters, using drafts to be provided by the accountant.
- A schedule of accounts receivable from officers and employees.
- A schedule of bad debts written off during the year.
- A schedule of notes receivable. The notes should be available for inspection.
- A schedule of transactions with affiliated enterprises.
- An inventory listing.
- An analysis of transactions affecting marketable securities.
- An insurance schedule. The policies should be available for inspection.
- A schedule of property and equipment additions and retirements.
- A depreciation schedule.
- A schedule of life insurance for officers.
- A schedule of accounts payable. The creditor's regular monthly statements for [*date*] should be retained and made available.
- A schedule of notes payable.
- The corporate stock book and minutes should be up to date and available for inspection.
- A schedule of all transactions to partners' capital and drawing accounts.
- A copy of the partnership agreement or corporate charter should be available for inspection.
- Copies of all leases, including equipment rental contracts, should be available for inspection.
- Copies of employment contracts with salesmen or executives should be available for inspection.
- Copies of pension, profit-sharing, deferred compensation, and stock option agreements, and letters of acceptance from the Treasury Department, should be available for inspection.
- A schedule of repairs in excess of $________.
- A schedule of each officer's salary and expense account payments.
- A schedule of contributions.
- A schedule of tax expense.
- A schedule of professional fees.

.19 Following is a list of common engagement letter deficiencies:

- Reference in the letter to audit of the books and records rather than to audit of financial statements
- Adverse comments about other firms
- Failure to specify *in detail* the services to be rendered when a maximum fee is quoted
- Inclusion of a review of internal control as one of the services when what is really intended is an understanding of internal control as required by auditing standards
- Failure to identify accounting or other problems that may have an effect on the opinion
- Failure to change, in writing, the terms of the engagement when conditions are found to be different (such as the inability to express an opinion without extensive additional auditing because internal control was found deficient)
- Failure to include fee basis and payment terms
- Failure to identify subsidiaries
- Failure to identify specific tax returns to be prepared

Investigatory Procedures for Individuals

.20 When credit information is requested about individuals who are new clients, the investigative procedures are subject to the Fair Credit Reporting Act of 1971.

.21 An individual should be informed in writing that an investigative consumer report, including information about the individual's character, general reputation, personal characteristics, and mode of living is being made. The individual should also be advised, within three days of the time the report is requested, that he or she may within a reasonable time, by written request, be furnished disclosure of the nature and scope of the investigation.

Sample Engagement Letters

.22 See AAM section 3165 for sample engagement letters.

Preliminary Engagement Activities

.23 In addition to the procedures mentioned above, at the beginning of the audit engagement the auditor should (1) perform procedures regarding the continuance of the client relationship and the specific audit engagement and (2) evaluate the auditor's compliance with ethical requirements, including independence. The purpose of performing these preliminary engagement activities is to consider any events or circumstances that may either adversely affect the auditor's ability to plan and perform the audit engagement to reduce audit risk to an acceptably low level or may pose an unacceptable level of risk to the auditor.

The Overall Audit Strategy

.24 In establishing the overall audit strategy, the auditor should: (1) determine the characteristics of the engagement that define its scope, such as the basis of reporting, industry-specific reporting requirements, and the locations of the entity; (2) ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required, such as deadlines for interim and final reporting, and key dates for expected communications with management and those charged with governance; and (3) consider the important factors that will determine the focus of the audit team's efforts, such as determination of appropriate materiality levels, preliminary identification of areas where there may be higher risks of material misstatement, preliminary identification of material locations and account balances, evaluation of whether the auditor may plan to obtain evidence regarding the operating effectiveness of internal control, and identification of recent significant entity-specific, industry, financial reporting, or other relevant developments. The Appendix to SAS No. 108 provides examples of matters the auditor may consider in establishing the overall audit strategy.

The Audit Plan

.25 The auditor must develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level. The audit plan is more detailed than the audit strategy and includes the nature, timing, and extent of audit procedures to be performed by audit team members in order to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level. Documentation of the audit plan also serves as a record of the proper planning and performance of the audit procedures that can be reviewed and approved prior to the performance of further audit procedures. The audit plan should include:

- A description of the nature, timing, and extent of planned risk assessment procedures sufficient to assess the risks of material misstatement, as determined under SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1).
- A description of the nature, timing, and extent of planned further audit procedures at the relevant assertion level for each material class of transactions, account balance, and disclosure, as determined under SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318). The plan for further audit procedures reflects the auditor's decision whether to test the operating effectiveness of controls, and the nature, timing, and extent of planned substantive procedures.
- A description of other audit procedures to be carried out for the engagement in order to comply with generally accepted auditing standards (for example, seeking direct communication with the entity's lawyers).

Determining the Extent of Involvement of Professionals Possessing Specialized Skills

.26 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should determine whether that professional will effectively function as a member of the audit team. If such a professional is part of the audit team, the auditor's responsibilities for supervising that professional are equivalent to those for other assistants. In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified audit procedures will meet the auditor's objectives; and to evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures.

Communications With Those Charged With Governance and Management

.27 The auditor may discuss elements of planning with those charged with governance and the entity's management. These discussions may be a part of the overall communications made to those charged with governance of the entity or may be made to improve the effectiveness and efficiency of the audit. Discussions with those charged with governance ordinarily include the overall audit strategy and timing of the audit, including any limitations thereon, or any additional requirements. Discussions with management often occur to facilitate the conduct and management of the audit engagement (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility. When discussions with those charged with governance or with the entity's management of matters included in the overall audit strategy or audit plan occur, the auditor should be careful to not compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management might compromise the effectiveness of the audit by making the audit procedures too predictable.

Additional Considerations in Initial Audit Engagements

.28 Before starting an initial audit, the auditor should perform procedures regarding the acceptance of the client relationship and the specific audit engagement (see Statement on Quality Control Standards No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, as amended [AICPA, *Professional Standards*, vol. 2, QC sec. 20]) and communicate with the previous auditor, where there has been a change of auditors (see AU section 315, *Communication Between Predecessor and Successor Auditors* [AICPA, *Professional Standards*, vol. 1]). The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. See paragraph 27 of SAS No. 108 for additional matters the auditor should consider in developing the overall audit strategy and audit plan for an initial audit.

[*The next page is 3121.*]

AAM Section 3105

Understanding the Assignment

.01 The auditor should (*a*) meet with the client to understand the type, scope, and timing of the engagement; (*b*) understand if reports on compliance, internal control, or segments of the entity are required; (*c*) understand the client's expectations, both stated and implied; and (*d*) review the expectations of both the owners and managers.

.02 To obtain an adequate understanding of any assignment, the auditor should be familiar with generally accepted accounting principles (GAAP), which includes specialized AICPA industry guides as well as Emerging Issues Task Force (EITF) consensuses. The auditor should also be familiar with generally accepted auditing standards (GAAS), which are promulgated by the AICPA.

.03 AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1),[*] sets forth the GAAP hierarchy. Statement on Standards for Accounting and Review Services (SSARS) No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992* (AICPA, *Professional Standards*, vol. 2), indicates that the GAAP hierarchy set forth in AU section 411 also applies to compilation and review engagements.

.04 AU section 411:

a. Presents three separate but parallel hierarchies—one for state and local governments, another for nongovernmental entities, and another for federal governmental entities.

b. Establishes a true GAAP hierarchy—each successive category in the hierarchy is a different level of authority.

.05 The table below in paragraph .06 summarizes the pronouncements that are included in each of the five categories of GAAP for nongovernmental entities, state and local governments, and federal governmental entities. This Manual does not take into account federal governmental entities.

---

[*] In April 2005, the FASB issued an exposure draft of a proposed statement, *The Hierarchy of Generally Accepted Accounting Principles*, objectives of which include moving responsibility for the GAAP hierarchy for nongovernmental entities from the AICPA AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1), to FASB literature. Additionally, the proposed FASB Statement expands the sources of category (a) to include accounting principles that are issued after being subject to the FASB's due process (including, but not limited to, FASB Staff Positions and FASB Statement 133 Implementation Issues, which are currently not addressed in AU section 411).

Among other matters, the proposed FASB Statement would not carry forward the Rule 203 exception from paragraph .07 of AU section 411. Accordingly, the proposed FASB Statement states that an enterprise shall not represent that its financial statements are presented in accordance with GAAP if its selection of accounting principles departs from the GAAP hierarchy set forth in this FASB Statement and that departure has a material impact on its financial statements.

In response to the proposed FASB Statement in May 2005, the AICPA issued an exposure draft of a proposed SAS, *Amendment to Statement on Auditing Standards No. 69 for Nongovernmental Entities*, which deletes the GAAP hierarchy for nongovernmental entities from AU section 411. The final FASB Statement and SAS on GAAP hierarchy will be issued concurrently and will have a uniform effective date. For more information please visit the FASB Web site at www.fasb.org and the AICPA Web site at www.aicpa.org.

.06 GAAP Hierarchy Summary*

Nongovernmental Entities	*State and Local Governments*	*Federal Governmental Entities*
	Established Accounting Principles	
.10*a* FASB Statements and Interpretations, APB Opinions, and AICPA Accounting Research Bulletins	.12*a* GASB Statements and Interpretations, plus AICPA and FASB pronouncements if made applicable to state and local governments by a GASB Statement or Interpretation	.14*a* FASAB Statements and Interpretations plus AICPA and FASB pronouncements if made applicable to federal governmental entities by a FASAB Statement or Interpretation
.10*b* FASB Technical Bulletins, AICPA Industry Audit and Accounting Guides, and AICPA Statements of Position	.12*b* GASB Technical Bulletins, and the following pronouncements if specifically made applicable to state and local governments by the AICPA: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position	.14*b* FASAB Technical Bulletins and the following pronouncements if specifically made applicable to federal governmental entities by the AICPA and cleared by the FASAB: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position
.10*c* Consensus positions of the FASB Emerging Issues Task Force and AICPA Practice Bulletins	.12*c* Consensus positions of the GASB Emerging Issues Task Force† and AICPA Practice Bulletins if specifically made applicable to state and local governments by the AICPA	.14*c* AICPA AcSEC Practice Bulletins if specifically made applicable to federal governmental entities and cleared by the FASAB and Technical Releases of the Accounting and Auditing Policy Committee of the FASAB
.10*d* AICPA accounting interpretations, "Qs and As" published by the FASB staff, as well as industry practices widely recognized and prevalent	.12*d* "Qs and As" published by the GASB staff, as well as industry practices widely recognized and prevalent	.14*d* Implementation guides published by the FASAB staff and practices that are widely recognized and prevalent in the federal government

* Paragraph references correspond to the paragraphs of AU section 411 that describe the categories of the GAAP hierarchy.

† As of the date of this Manual, the GASB had not organized such a group.

Nongovernmental Entities	*State and Local Governments*	*Federal Governmental Entities*
	Other Accounting Literature[‡]	
.11 Other accounting literature, including FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; GASB Statements, Interpretations, and Technical Bulletins; FASAB Statements, Interpretations, and Technical Bulletins; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*, and accounting textbooks, handbooks, and articles	.13 Other accounting literature, including GASB Concepts Statements; pronouncements in categories (*a*) through (*d*) of the hierarchy for nongovernmental entities when not specifically made applicable to state and local governments; FASB Concepts Statements; FASAB Statements, Interpretations, Technical Bulletins, and Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles	.15 Other accounting literature, including FASAB Concepts Statements; pronouncements in categories (*a*) through (*d*) of the hierarchy in paragraph .10 when not specifically made applicable to federal governmental entities; FASB Concepts Statements; GASB Statements, Interpretations, Technical Bulletins, and Concepts Statements; AICPA Issues Papers; International Accounting Standards of the International Accounting Standards Committee; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles

[‡] In the absence of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances.

Generally Accepted Auditing Standards

.07 An independent auditor plans, conducts and reports the results of an audit in accordance with generally accepted auditing standards (GAAS). Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

.08 AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1), provides a framework of GAAS.

.09 The general, field work, and reporting standards (the 10 standards) approved and adopted by the membership of the AICPA, as amended by the AICPA Auditing Standards Board (ASB), are as follows:

General Standards

1. The auditor must have adequate technical training and proficiency to perform the audit.
2. The auditor must maintain independence in mental attitude in all matters relating to the audit.
3. The auditor must exercise due professional care in the performance of the audit and the preparation of the report.

Standards of Fieldwork

1. The auditor must adequately plan the work and must properly supervise any assistants.
2. The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.
3. The auditor must obtain sufficient appropriate[1] audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

Standards of Reporting

1. The auditor must state in the auditor's report whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).[2]
2. The auditor must identify in the auditor's report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.
3. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.
4. The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

---

[1] See paragraph 6 of SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, AU sec. 326.06), for the definition of the term *appropriate*.

[2] When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the first standard of reporting is satisfied by stating in the auditor's report that the basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used.

.10 Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202.01) of the AICPA Code of Professional Conduct, requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the ASB. The ASB develops and issues standards in the form of SASs through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

.11 The auditor should have sufficient knowledge of the SASs to identify those that are applicable to his audit. The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting. The auditor should be prepared to justify departures from the SASs.

.12 *Interpretive Publications* consist of auditing interpretations of the SASs, appendixes to the SASs,[3] auditing guidance included in AICPA Audit and Accounting Guides, and AICPA Auditing Statements of Position. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs.

.13 The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he complied with the SAS provisions addressed by such auditing guidance. The specific terms used to define professional requirements in the SASs are not intended to apply to interpretive publications since interpretive publications are not auditing standards. It is the ASB's intention to make conforming changes to the interpretive publications over the next several years to remove any language that would imply a professional requirement where none exists.[†]

.14 *Other Auditing Publications* include:

- AICPA auditing publications not referred to above
- Auditing articles in the *Journal of Accountancy* and other professional journals
- Auditing articles in the AICPA *CPA Letter*
- Continuing professional education programs and other instructional materials, textbooks, guide books, audit programs and checklists; and other auditing publications from state CPA societies, other organizations and individuals

---

[3] Appendixes to the SASs referred to in paragraph 5 of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150.05), do not include previously issued appendixes to original pronouncements that when adopted modified other SASs.

[†] In December 2005, the Auditing Standards Board (ASB) issued SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120), and the companion Statement for Attestation Engagements (SSAE) No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). Those statements, which were effective upon issuance, define the terminology that the ASB will use going forward to describe the degree of responsibility that the requirements impose on the auditor or the practitioner in engagements performed for nonissuers.

SASs and SSAEs will use the words *must* or *is required* to indicate an unconditional requirement, with which the auditor or practitioner is required to comply. SASs and SSAEs will use the word *should* to indicate a presumptively mandatory requirement. The auditor or practitioner is required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the auditor or practitioner may depart from a presumptively mandatory requirement provided the auditor or practitioner documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. If a SAS or SSAE provides that a procedure or action is one that the auditor *should consider*, the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not.

Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

.15 If an auditor applies the auditing guidance included in an other auditing publication, he should be satisfied that, in his judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

AAM Section 3110

Assigning Personnel to the Engagement and Supervision

General Comments

.01 Engagement planning should include procedures for assigning personnel to the engagement. The procedures established should provide the firm with reasonable assurance that work will be performed by persons having the degree of technical training and proficiency required in the circumstances. Generally, the more able and experienced the personnel assigned to a particular engagement, the less need for direct supervision.

.02 Some procedures regarding assignment of personnel to the engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all the procedures or be limited to those discussed. Overall firm requirements for assigning personnel to engagements are addressed in the *Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice* at AAM section 10,200. Sample quality control forms are available at AAM section 10,300, which are helpful in assigning personnel to engagements.

Engagement Planning Procedures

.03 A time budget for the engagement should be prepared to determine manpower requirements and to schedule field work. The engagement partner should approve the time budget prior to the beginning of field work. A time budget should have columns for budgeted time (in hours) for preliminary and final field work. Time budget forms differ depending upon firm preference and needs. Some firms use separate forms for the time budget report and the job progress report or analysis (see AAM section 3160.01 for "Audit Time Budget—Sample A"), whereas others combine these reports into one form (see AAM section 3160.02 for "Audit Time Budget—Sample B").

.04 Other alternatives include longer, more detailed sets of forms. These forms combine the features of a time budget, a source document for staff scheduling, and a job progress report that compares each assigned person's actual daily hours against the budget. Some firms use a shorter, less detailed form for jobs of less than a predetermined number of staff hours (for example, one hundred hours; see AAM section 3160.03 for "Audit Time Analysis—Short Form") and a longer form for jobs requiring more time (see AAM section 3160.04 for "Audit Time Analysis—Long Form"). Some firms use a weekly (or daily) progress report (see AAM section 3160.05, for example). This report, submitted by the accountant in charge, shows the time actually spent in relation to the estimate, the estimated additional time required, and the estimated variance from the original estimate.

.05 When the combined time budget and progress report form (sample B) is used, it must be kept current as the assignment progresses. This form is carried in the working papers file and is filled in daily by the accountant in charge, for all persons applying time on the engagement. This procedure is vital to identify and control time as it is applied so that it can be compared to the budgeted time for that phase of the engagement.

.06 The following factors should be considered in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:

a. Engagement size and complexity

b. Personnel availability

c. Special expertise

d. Timing of the work to be performed

e. Continuity and periodic rotation of personnel

f. Opportunities for on-the-job training

.07 The scheduling and staffing of the engagement should be approved by the partner with final responsibility for the engagement so that the partner can consider the qualifications, experience, and training of personnel to be assigned. The experience and training of the engagement personnel should be considered in relation to the complexity or other requirements of the engagement and the extent of supervision to be provided.

.08 It is recommended that all procedures discussed in this section be documented in the accountant's work papers.

Supervision

.09 Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant issues encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work, including knowledge of the client's business and industry.

.10 The auditor with final responsibility for the audit should communicate with members of the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, with special emphasis on fraud. Such discussion helps all audit team members understand the entity and its environment, including its internal control, and how risks that the entity faces may affect the audit. The discussion should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit.[1]

.11 In addition, assistants should be informed of their responsibilities and the objectives of the audit procedures they are to perform. They should be informed of matters that may affect the nature, timing, and extent of audit procedures they are to perform, such as the nature of the entity's business as it relates to their assignments and possible accounting and auditing issues. The auditor with final responsibility for the audit should direct assistants to bring to his or her attention accounting and auditing issues raised during the audit that the assistant believes are of significance to the financial statements or auditor's report so the auditor with final responsibility may assess their significance. Assistants also should be directed to bring to the attention of appropriate individuals in the firm difficulties encountered in performing the audit, such as missing documents or resistance from client personnel in providing access to information or in responding to inquiries.

.12 The work performed by each assistant, including the audit documentation, should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditor's report.

---

[1] For further guidance on the discussion among the audit team, see paragraphs .14–.18 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), and paragraphs .14–.20 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1).

.13 Each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm disagreements or concerns with respect to accounting and auditing issues that the assistant believes are of significance to the financial statements or auditor's report, however those disagreements or concerns may have arisen. The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his or her disagreement with the conclusions reached if, after appropriate consultation, he or she believes it necessary to disassociate himself or herself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented.

[*The next page is 3161.*]

AAM Section 3115
Independence

General Comments

.01 AICPA professional standards require independence, in accordance with Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.01), of the AICPA Code of Professional Conduct, for all attest engagements.[1] Attest engagements are those in which your firm attests—or affirms—that a client's financial or other information is reasonably stated. Examples of attest services are—

- Financial statement audits.
- Financial statement reviews.
- Other attest services as defined in the Statements on Standards for Attestation Engagements.

.02 Third parties—investors, creditors, and others—rely on your firm's attestations about a client's financial information when making various business decisions. Therefore, attest services have value for third parties only if an *independent firm* renders the services. Accordingly, AICPA professional standards require independence when your firm provides attest services; your firm may perform attest services for a client *only* when it is independent of that client. Independence is not required to perform the following services, if these are the *only* services your firm provides to a client:

1. Tax preparation and advice.
2. Consulting services (such as tax consulting or personal financial planning).

.03 One other service—a compilation of a client's historical financial statements—does not require independence. If a nonindependent firm issues a compilation report, the report must state, "I am (we are) not independent with respect to XYZ Company."[2]

.04 Engagement planning should include procedures to provide the firm with reasonable assurance that all persons required to maintain independence, to the extent required by the AICPA Code of Professional Conduct and the regulations of other organizations, as applicable (for example, the Securities and Exchange Commission [SEC], and the Department of Labor [DOL]), do so. The interpretations and rulings under Rule 101 of the AICPA Code of Professional Conduct contain examples of instances wherein a firm's independence will be considered to be impaired.

.05 As stated below, audit firms that perform audits of or perform other attest services for public companies or other SEC registrants must comply with the independence rules of the SEC and the Public Company Accounting Oversight Board.

.06 Other organizations that have established other independence requirements that may be applicable to you and your firm include:

---

[1] There are additional requirements for public companies and companies subject to other governmental oversight.

[2] Statements on Standards for Accounting and Review Services (SSARS) No. 1, *Compilation and Review of Financial Statements*, paragraph 19 (AICPA, *Professional Standards*, vol. 2, AR sec. 100.19).

- State boards of Accountancy
- State CPA Societies
- Federal and State Agencies, such as the Governmental Accountability Office (GAO)

.07 Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule. The AICPA's Practice Aid, *Independence Compliance—Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627), is a valuable resource for helping practitioners observe applicable independence rules. The Practice Aid can be obtained at www.cpa2biz.com or by calling 888-777-7077.

Maintaining Your Independence

.08 Maintaining your independence is your responsibility, not your firm's. As part of its quality control system, the firm is required to address independence matters; however, ultimately it is up to you to follow firm policies and the independence rules. Many firms require you to certify your independence on a regular basis. The following are some suggestions that will help you to complete and sign that certification in good faith.

.09 *Gain an understanding of the independence rules and firm policies.* As a prerequisite to establishing and maintaining the independence of you and your firm, you must have a good, working understanding of the basic independence rules. At a minimum, you should be aware of the circumstances in which you and your immediate family meet the definition of a covered member (discussed below in greater detail) and of the types of relationships you may have with the firm's clients that could impair independence. If you have any questions about independence matters, you should consult with someone in your firm who is knowledgeable about such matters, or you may seek the advice of the AICPA (ethics@aicpa.org). If your firm performs audits and other attest services for SEC registrants, you should familiarize yourself with rules promulgated by the SEC and the Public Company Accounting Oversight Board (PCAOB), too.

Covered Member

.10 Know when you meet the definition of a covered member. Whenever you are a *covered member* with respect to a particular attest client, you become subject to the highest possible level of independence restrictions (for example, restrictions on financial and business interests, and your family's employment). You are a covered member with respect to a client if you are:

1. An individual on the attest engagement team;
2. An individual in a position to influence the attest engagement;
3. A partner or manager who provides more than ten hours of nonattest services to the attest client;
4. A partner in the office in which the lead attest engagement partner primarily practices in connection with the attest engagement;
5. The firm, including the firm's employee benefit plans; or
6. An entity whose operating, financial, or accounting policies can be controlled (as defined by generally accepted accounting principles (GAAP) for consolidation purposes) by any of the individuals or entities described in (1)–(5) or by two or more such individuals or entities if they act together.

.11 However, there are two relationships that— due to their magnitude—impair independence even when you are *not* considered to be a covered member.

The following rules apply to all partners and professional employees of a firm:

- No partner or professional employee may be simultaneously employed by an attest client in any position or serve a client as a:
  — Director, officer (or any management capacity), or employee.
  — Promoter, underwriter, or voting trustee.
  — Trustee of any of the client's employee benefit plans.
- No partner or professional employee may own greater than 5 percent of an attest client's outstanding equity securities (or other ownership interests).

Family Members

.12 The investments and employment of certain family members may impair your independence. Know which of your family members meet the definition of "immediate family" and which ones meet the definition of "close relative."

.13 If you are a covered member with respect to a client, members of your immediate family (your spouse—or equivalent—and your dependents) generally must follow the same rules as you. So, for example, your spouse's investments must be investments that you could own under the rules. This would be the case even if your spouse keeps the investments in his or her own name or with a different broker.

.14 There are two exceptions to this general rule.

1. Your immediate family member's employment with a client would not impair your firm's independence provided he or she is not in a "key position." A key position is one in which your family member
   - Has primary responsibility for significant accounting functions that support material components of the financial statements or the preparation of the financial statements;
   - Has primary responsibility for preparing the financial statements; or
   - Is able to influence the contents of the financial statements (for example, a chief executive officer, treasurer, or a member of the board of directors).
2. Immediate family members of *certain* covered members may have a financial interest in a client through an employee benefit plan (for example, retirement or savings account) provided the plan is offered equitably to all similar employees. The covered members whose families may have such interests are:
   - Partners and managers who provide only nonattest services to the client; and
   - Partners who are covered members *only* because they practice in the same office where the client's lead attest partner practices in connection with the engagement.

.15 Also note that immediate family of individuals on the attest engagement team *or* of those who can influence the attest engagement team may not apply this exception.

.16 Your immediate family is also prohibited from owning more than 5 percent of the client's outstanding equity securities.

.17 The close relatives of *certain* covered members will be subject to some employment and financial restrictions. These covered members are:

- Persons on the attest engagement team.
- Persons who can influence the attest engagement.

- Other partners in the office where the client's lead partner the attest engagement.

.18 Close relatives are your:

- Nondependent children
- Siblings
- Parents

.19 So, as a covered member your close relative's employment by a client would impair independence if your relative had a key position with the client.

.20 Rules pertaining to your close relatives' financial interests differ depending on whether you participate on the client's attest engagement as follows:

- If you participate on the client's attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either:
  - — Was material to your relative's net worth, **or**
  - — Enables the relative to exercise significant influence over the client.
- If you are able to influence the client's attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that:
  - — Is material to your relative's net worth, **and**
  - — Enables your relative to exercise significant influence over the client.

Financial Relationships

.21 There are various types of financial interests and some of those interests affect independence. Although your firm and its employee benefit plans are also subject to the financial interest provisions of the independence rules (firms are included in the definition of *covered member*), here we focus on their application to individuals.

.22 As a covered member with respect to a particular client, you (and your spouse and dependents) may not have a:

- Direct financial interest in that client, regardless of how immaterial it would be to you.
- Material indirect financial interest in that client.

.23 In addition, if you commit to acquire a financial interest in a client with respect to which you are a covered member, your independence would be impaired.

.24 Examples of financial interests include shares of stock; mutual fund shares; partnership units; stock rights; options or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles.

.25 Direct financial interests are financial interests that are owned by you directly; under your control; or beneficially owned by you through an investment vehicle, estate, trust, or other intermediary if you (a) control the intermediary; or (b) have the authority to supervise or participate in the intermediary's investment decisions.

For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest in the investments held in your account.

.26 You also have a direct financial interest in a client when you have a financial interest in a client through a:

- Partnership if you are a general partner.
- Section 529 savings plan if you are the account owner.
- Estate if you serve as an executor and meet certain other criteria.
- Trust if you serve as the trustee and meet certain other criteria.

.27 Indirect financial interests arise if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary when you can neither control the intermediary nor have the authority to supervise or participate in the intermediary's investment decisions. For example, if you invest in a defined contribution plan that is not participant directed and you have no authority to supervise or participate in the plan's investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments.

Business Relationships

.28 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not simultaneously serve a client as a:

- Director, officer, employee, or act in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent
- General counsel (or equivalent)
- Trustee for a client's pension or profit-sharing trust

.29 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client's operations or business affairs, independence is considered impaired.

.30 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client's governing body and therefore would be able to participate in the client's management decisions.

.31 There are two possible exceptions to this rule, as follows:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may serve that client and not impair your firm's independence if:
   - Your position is purely honorary.
   - You do not vote or participate in managing the organization.
   - Your position is clearly identified as honorary in any internal or external correspondence.
2. In addition, you are also permitted to serve on a client's advisory board provided all the following criteria are met:
   - The advisory board's function is purely advisory.
   - The advisory board does not appear to make decisions for the client.
   - The advisory board and any decision-making boards are separate and distinct bodies.
   - Common membership between the advisory board and any decision-making groups is minimal.

Fee Issues

.32 Two types of fee arrangements, contingent fees and commissions, are prohibited when the arrangement involves certain attest clients (see paragraph .37 for details), even though the fee is not related to an attest service.

.33 A contingent fee is an arrangement where (1) no fee is charged unless a specified result is attained or (2) the amount of the fee otherwise depends on the results of your firm's services. Some examples of contingent fees are:

- Your firm receives a "finder's fee" for helping a client locate a buyer for one of the client's assets.
- Your firm performs a consulting engagement to decrease a client's operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

Exceptions are:

- Fees fixed by a court or other public authority.
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies.

.34 A commission is any compensation paid to you or your firm for (1) recommending or referring a third party's product or service to a client or (2) recommending or referring a client's product or service to a third party. Permitted commissions must be disclosed to the person or entity you recommend or refer a product or service to.

.35 For example, you or your firm:

- Refers a client to a financial planning firm that pays you a commission for the referral.
- Sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- Refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

.36 The rule provides an exception for *referral fees* that are related to recommending or referring the services of a CPA. That is, you may (1) receive a fee for referring the services of a CPA to any person or entity or (2) if you are a CPA, pay a fee to obtain a client provided you disclose such receipt or payment to the client. Referral fees are not considered commissions under these specific circumstances.

.37 You and your firm may not have commission or contingent fee arrangements with a client when your firm also provides one of the following services to a client:

- An audit of financial statements.
- A review of financial statements.
- Compiled financial statements when a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence.
- An examination of prospective financial statements.

.38 You and your firm may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not a client).[3] For example, you or your firm may receive a commission from an officer of a client without violating the AICPA rule. Even when permitted, the existence of a commission arrangement must be disclosed to the person (or entity) to whom the commission relates.

Restricted Entities

.39 Be familiar with the firm's restricted entities. Restricted entities are those entities for whom the firm provides attest services. You should be aware of who these entities are. Many firms maintain a formal list or database of these clients. If yours is one of these firms, you should know how to access the list.

.40 Maintain the integrity of the restricted entity list. If you perform attest services, then you need to make sure that those clients are identified as restricted entities of the firm. Certain entities that are related to your clients (for example, subsidiaries) also will be considered restricted entities, even if they are not clients of the firm.

.41 Consult the restricted entities list regularly. Get into the habit of referring to the firm's restricted entity list whenever you are considering changes in circumstances that could affect your independence. For example, you should consult the restricted entity list prior to—

- Making an investment or acquiring a financial interest in an entity
- Entering into a business relationship
- Obtaining a loan or refinancing an existing loan
- Having an immediate family member change employers or assume new responsibilities at an existing job

Nonattest Services

.42 Be aware of the rules relating to the performance of nonattest services. If you provide nonattest services to restricted entities, you should be familiar with Interpretation 101-3, "Performance of nonattest services" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05) regarding the performance of nonattest services. You should be aware of the services that are permitted and prohibited under the ruling, as well as your responsibilities for establishing an understanding of the engagement with your client and documenting various aspects of the engagement. If your clients are SEC registrants, you should be aware of the more restrictive SEC rules in this area. Certain other regulators (for example, the Government Accounting Office or GAO) may have more restrictive rules concerning nonattest services, which should be reviewed depending upon the circumstances of the engagement.

.43 The term, *nonattest services*, includes accounting and consulting services that are not part of an attest engagement.[4] Nonattest services specifically addressed in the rules are:

- Bookkeeping services
- Payroll and other disbursement services
- Internal audit assistance
- Benefit plan administration

---

[3] Also see AICPA Ethics Ruling No. 25 under section 391 of the Code of Professional Conduct, "Commission and Contingent Fee Arrangements With Nonattest Client" (AICPA, *Professional Standards*, vol. 2, ET sec. 391.049–.050).

[4] Defined in the Code of Professional Conduct, an *attest engagement* is one that requires independence under AICPA *Professional Standards*, for example, audits and reviews of financial statements or agreed-upon procedures performed under the attestation standards.

- Investment advisory or management services
- Tax compliance services
- Forensic accounting services
- Corporate finance consulting or advisory
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration

.44 Interpretation 101-3 requires the adherence to three general requirements in order to maintain independence when performing permitted nonattest services.

.45 The first of the three general requirements of Interpretation 101-3 states that you should not perform management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client's management in performing its functions and making decisions.)

.46 The second general requirement is that the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, and/or experience, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed
- Accept responsibility for the results of the services

The member should be satisfied that the client will be able to meet all of these criteria and to make an informed judgment on the results of the member's nonattest services. In assessing whether the designated individual possesses suitable skill, knowledge, and experience, the member should be satisfied that the employee understands the services to be performed sufficiently to oversee them. However, the individual is not required to possess the expertise to perform or reperform the services. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with the necessary competence to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member's provision of nonattest services would impair independence.

.47 The third general requirement is that before performing nonattest services, the member should establish and document in writing his or her understanding with the client (board of directors, audit committee, or management, as appropriate in the circumstances) regarding the following:

a. Objectives of the engagement

b. Services to be performed

c. Client's acceptance of its responsibilities

d. Member's responsibilities

e. Any limitations of the engagement

The documentation requirement does not apply to certain routine activities performed by the member such as providing advice and responding to the client's technical questions as part of the normal client-member relationship. The understanding might be documented in a separate engagement letter, in the workpapers, or in an internal memo, or it might be included in an engagement letter obtained in conjunction with an attest engagement.

.48 One of the key principles underlying the AICPA rules on nonattest services is: You may not serve—or even appear to serve—as a member of a client's management. For example, you may not:

- Make operational or financial decisions for the client.
- Perform management functions for the client.
- Supervise client employees in the performance of their normal recurring activities.
- Determine which recommendations of the member should be implemented.
- Report to the board of directors on behalf of management.

.49 In addition, the following are examples of the types of activities that impair independence:

- Authorizing, executing or consummating a transaction, or otherwise exercising authority on behalf of a client or having the authority to do so
- Preparing source documents, in electronic or other form, evidencing the occurrence of a transaction
- Having custody of client assets
- Serving as a client's stock transfer or escrow agent, registrar, general counsel or its equivalent
- Designing a client's financial information system
- Performing a valuation of a client's business
- Establishing and maintaining internal controls, including performing ongoing monitoring activities for a client

.50 Additionally, Interpretation 101-3 requires you comply with more restrictive independence provisions, if applicable, of certain regulators such as state boards of accountancy, the SEC, and the GAO.

.51 *Report any apparent violations*. If you become aware of any apparent violations of the independence rules, you should report these immediately to the person in your firm responsible for independence matters.

.52 The procedures employed at the engagement level should be designed to ascertain whether the firm and its partners and employees have complied with all applicable independence rules. Overall firm requirements for independence are addressed in AICPA's Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*,* paragraphs 7–10, as amended by SQCS No. 4, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (AICPA, *Professional Standards*, vol. 2, QC sec. 20.07–.10).

Independence Quality Controls

.53 The AICPA SQCSs include the following requirement.

* SQCS No. 6, *Amendment to Statement on Quality Control Standards No. 2*, System of Quality Control for a CPA Firm's Accounting and Auditing Practice, amends SQCS No. 2 (AICPA, *Professional Standards*, vol. 2, QC sec. 20), to clarify that deficiencies in individual audit, attest, review, and compilation engagements do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards.

> Policies and procedures should be established to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance) in all required circumstances. (See QC section 20.13.)

The professional standards do not describe how a firm should establish compliance with these requirements. However, in regards to independence matters, a CPA firm should consider the following.

.54 *Establish "plain English" independence policies and procedures.* Written policies and procedures are an important first step toward ensuring compliance with the independence rules. These policies should be written in a manner that is easy to read and understand.

.55 *Designate a partner-in-charge.* There are two reasons why a firm might wish to designate a partner-in-charge of independence matters. First, firm members who have questions about independence matters need to have someone to turn to for answers. It helps if they know there is one person in charge. Additionally, the independence rules are complicated and subject to change. A firm is more likely to have a good understanding of the independence rules when one person is specifically assigned the responsibility.

.56 *Communication and training.* The firm's independence policies and procedures must be communicated throughout the firm. Periodic training on these matters will help ensure understanding and compliance.

.57 *Maintain a list of restricted entities.* Firm personnel must be independent with respect to the firm's restricted entities. It is important for the firm to maintain a database or list of all clients (and certain related entities) for whom the firm performs services requiring independence. Policies and procedures should exist for keeping the list current.

.58 *Obtain written representations from firm personnel.* Many firms require their personnel to execute and return to the firm an independence representation in which the firm member affirms that he or she is independent with respect to the firm's restricted entities. Typically, these representations are completed annually.

.59 *Resolution of apparent independence violations.* The firm should have procedures for resolving apparent independence violations that are reported by firm personnel.

Additional Guidance

.60 It is recommended that all procedures discussed in this section be documented in the auditor's work papers.

.61 For additional guidance practitioners should refer to AICPA *Independence and Ethics Alert* (AAM section 8240). This annual Alert informs you of recent developments in the area of independence and ethics for accountants. Moreover, the Alert helps you understand your independence requirements under the AICPA Code and, if applicable, certain other rule-making and standard-setting bodies. Also, the Alert contains the AICPA Plain English Guide to Independence which discusses the independence rules of the principal standard-setting bodies in plain, straight-forward English so you can understand and apply them with greater confidence and ease. Call 888-777-7077 of visit www.cpa2biz.com to obtain the Alert.

AAM Section 3120

Understanding the Entity and Its Environment

General

.01 In accordance with the second standard of field work, "the auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures." Obtaining an understanding of the entity and its environment is an essential aspect of performing an audit in accordance with generally accepted auditing standards. In particular, that understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing risks of material misstatement of the financial statements and responding to those risks throughout the audit, for example when:

- Establishing materiality for planning purposes and evaluating whether that judgment remains appropriate as the audit progresses.
- Considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures.
- Identifying areas where special audit consideration may be necessary, for example, related-party transactions, the appropriateness of management's use of the going-concern assumption, complex or unusual transactions, or considering the business purpose of transactions.
- Developing expectations for use when performing analytical procedures.
- Designing and performing further audit procedures to reduce audit risk to an appropriately low level.
- Evaluating the sufficiency and appropriateness of audit evidence obtained, such as evidence related to the reasonableness of management's assumptions and of management's oral and written representations.

.02 The auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment, including its internal control. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures. The depth of the overall understanding that the auditor obtains in performing the audit is less than that possessed by management in managing the entity.

.03 Obtaining an understanding of the entity and its environment, including its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. Throughout this process, the auditor should also follow the guidance in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1).

Risk Assessment Procedures

.04 Audit procedures performed to obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels are referred to as *risk assessment procedures*. The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels.

.05 The auditor should perform the following risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control:

a. Inquiries of management and others within the entity

b. Analytical procedures

c. Observation and inspection

.06 Risk assessment procedures are designed to gather and evaluate information about the client and are not specifically designed as substantive procedures or as tests of controls. Nevertheless, in performing risk assessment procedures, the auditor may obtain evidence about relevant assertions or the effectiveness of controls.

Inquiry of Management and Others

.07 Although much of the information obtained by inquiry can be obtained from management, accounting personnel, and others involved in the financial reporting process, it is often helpful to direct inquires to others within the entity. For example, people who work in production, sales, or internal audit, as well as individuals employed at different levels within the organization can provide a different perspective that helps identify risks of material misstatement. Inquiries of others can also help corroborate or provide additional details to the statements and representations made by management and accounting personnel. The table below provides examples of other individuals within the entity who might be able to help the auditor identify and assess the risk of material misstatement.

.08

Inquiries of these individuals (outside of management or the financial reporting process, or both). . .	*May help the auditor understand. . .*
Those charged with governance	• The environment in which the financial statements are prepared. • Whether they have knowledge of any fraud or suspected fraud. • How they exercise oversight of the entity's programs and controls that address fraud. • Their views on where the company is most vulnerable to fraud. • How financial statements are used.
Internal audit personnel	• The design and operating effectiveness of internal control. • Internal audit activities related to internal control over financial reporting. • Whether management has responded satisfactorily to internal audit findings. • Their views on where the company is most vulnerable to fraud.
Employees involved in the initiation, processing, or recording of complex or unusual transactions	• The controls over the selection and application of accounting policies related to those transactions. • The business rationale for those transactions.

IT systems users	• How IT users identify changes to IT systems and how frequently those changes occur. • How users "work around" IT systems for those circumstances where the IT system does not support them. • How logical access to data and applications is controlled. • How remote access to the system is controlled. • Excessive system down time and other indicators that the system is not functioning properly.
In-house legal counsel	• Litigation. • Compliance with laws and regulations. • Fraud or suspected fraud. • Warranties. • Post sales obligations. • Arrangements such as joint ventures. • The meaning of certain contract terms.
Marketing, sales, or production personnel	• Marketing strategies. • Sales trends. • Production strategies. • Contractual arrangements with customers. • Any pressures to meet budgets or change reported performance measures.

Analytical Procedures

.09 AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), directs the auditor to apply analytical procedures in planning the audit. The objective of these procedures is to help the auditor understand the client and its environment and, ultimately, to assess the risk of material misstatement. As such, the auditor may consider the analytical procedures performed during audit planning to be a risk assessment procedure that provides some broad audit evidence to support the opinion on the financial statements.

.10 Please refer to AU section 329.06–.08 for additional guidance on the performance of analytical procedures in planning the audit.

.11 The results of analytical procedures may help the auditor obtain an understanding of the entity. For example, analytical procedures may be helpful in identifying:

- The existence of unusual transactions or events, which may indicate the presence of significant risks.
- Amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. For example, an unexpected amount, ratio, or trend may be the result of a misstatement that was not prevented or detected and corrected by the client's system of internal control.

Observations and Inspection of Documents

.12 The auditor may use observation and the inspection of documents to support the responses received to the inquiries of management and others. Additionally, the observations and inspections will provide the auditor with further information about the entity and its environment that might not otherwise be obtained.

.13 The procedures performed to observe activities and inspect documents typically include:

- Observation of client activities and operations.
- Visits to the client's premises and plant facilities.
- Inspection of documents, records, and internal control manuals.
- Reading reports prepared by management (such as quarterly management reports and interim financial statements).
- Reading minutes of board of directors' meetings and other documents prepared by those charged with governance.
- Tracing transactions through the financial reporting information system (walkthroughs).

A Mix of Procedures

.14 The auditor is not required to perform all the risk assessment procedures described above for each aspect of the understanding described below. However, all the risk assessment procedures should be performed by the auditor in the course of obtaining the required understanding.

Discussion Among the Audit Team

.15 The members of the audit team, including the auditor with final responsibility for the audit, should discuss the susceptibility of the entity's financial statements to material misstatements. The objectives of this discussion are for team members to:

- Gain a better understanding of the potential for misstatements in the specific areas assigned to them, and
- Understand how the results of the audit procedures they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

.16 This discussion could be held concurrently with the discussion among the audit team that is specified by AU section 316 to discuss the susceptibility of the entity's financial statements to fraud.

.17 Topics for audit team discussion include the following:

- Areas of significant risk of material misstatement.
- Unusual accounting procedures used by the client.
- Important control systems.
- Significant IT applications and how the client's use of IT may affect the audit.
- Areas susceptible to management override of controls.
- Materiality at the financial level and tolerable misstatement.

- How materiality will be used to determine the extent of testing.
- The application of generally accepted accounting principles to the client's facts and circumstances and in light of the entity's accounting policies.
- The need to:
  - — Exercise professional skepticism throughout the engagement.
  - — Remain alert for information or other conditions that indicate that a material misstatement due to fraud or error may have occurred.
  - — Follow up rigorously on any indications of a material misstatement.

.18 The auditor should exercise professional judgment to determine logistical matters relating to the audit discussion, such as who should participate, how and when the discussion should occur, and its extent. Key members of the audit team, including the auditor with final responsibility, should be involved in the discussion.

.19 When considering who should participate in the discussion, the auditor also may determine that an IT specialist or other individual possessing specialized skills should be included.

Understanding Specified Aspects of the Entity and Its Environment

.20 The auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

a. Industry, regulatory, and other external factors

b. Nature of the entity

c. Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements

d. Measurement and review of the entity's financial performance

e. Internal control, which includes the selection and application of accounting policies

.21 The nature, timing, and extent of the risk assessment procedures performed depend on the circumstances of the engagement, such as the size and complexity of the entity and the auditor's experience with it. In addition, identifying significant changes in any of the above aspects of the entity from prior periods is particularly important in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

Industry, Regulatory, and Other External Factors

.22 The auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include industry conditions, such as the competitive environment, supplier and customer relationships, and technological developments; the regulatory environment encompassing, among other matters, relevant accounting pronouncements, the legal and political environment, and environmental requirements affecting the industry and the entity; and other external factors, such as general economic conditions.

.23 The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (such as political, economic, social, technical, and competitive). For example, long-term contracts may involve significant estimates of revenues and costs that give rise to risks of material misstatement of the financial statements.

Similarly, regulations may specify certain financial reporting requirements for the industry in which the entity operates. In such cases, the auditor should consider whether the audit team includes members with sufficient relevant knowledge and experience. If management fails to comply with such regulations, its financial statements may be materially misstated.

Nature of the Entity

.24 The auditor should obtain an understanding of the nature of the entity. The nature of an entity refers to the entity's operations, its ownership, governance, the types of investments that it is making and plans to make, the way that the entity is structured, and how it is financed. An understanding of the nature of an entity enables the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements.

Objectives and Strategies and Related Business Risks

.25 The auditor should obtain an understanding of the entity's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the operational approaches by which management intends to achieve its objectives. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic and the entity's strategies and objectives change over time.

.26 Business risk is broader than the risk of material misstatement of the financial statements, although it includes the latter. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Usually management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs 76–80 of SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314).

Measurement and Review of the Entity's Financial Performance

.27 The auditor should obtain an understanding of the measurement and review of the entity's financial performance. Performance measures and their review indicate to the auditor aspects of the entity's performance that management and others consider to be important. Performance measures, whether external or internal, create pressures on the entity that, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Obtaining an understanding of the entity's performance measures assists the auditor in considering whether such pressures result in management actions that may have increased the risks of material misstatement.

.28 Internally generated information used by management for this purpose may include key performance indicators (financial and nonfinancial); budgets; variance analysis; subsidiary information and divisional, departmental, or other level performance reports; and comparisons of an entity's performance with that of competitors. External parties may also measure and review the entity's financial performance. For example, external information, such as analysts' reports and credit rating agency reports, may provide information useful to the auditor's understanding of the entity and its environment. Such reports may be obtained from the entity being audited or from Web sites.

Internal Control

.29 Refer to AAM section 3125 for the discussion of internal control.

Documentation

.30 The auditor should document the key elements of the understanding obtained regarding each of the aspects of the entity and its environment, including each of the components of internal control (discussed in AAM section 3125) to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures.

[*The next page is 3201.*]

AAM Section 3125
Understanding of Internal Control

Introduction

.01 Internal control is broadly defined as a process designed to provide reasonable assurance regarding the achievement of the entity's objectives in the following categories: (*a*) reliability of financial reporting, (*b*) effectiveness and efficiency of operations, and (*c*) compliance with applicable laws and regulations. Internal control is effected by those charged with governance, management, and other personnel.

.02 The above definition reflects certain fundamental concepts:

- *A process*. Internal control is a process. It is not one event or circumstance, but a series of actions that permeate an entity's activities. These actions are pervasive, and are inherent in the way management runs the business.
- *People*. Internal control is effected by people. It is not accomplished by policy manuals and forms, but the people of an organization, what they do and say. People must know their responsibilities and limits of authority.
- *Reasonable assurance*. Internal control, no matter how well designed and operated, can provide only reasonable assurance to management and the board of directors regarding achievement of an entity's objectives.
- *Achievement of objectives*. Internal control is geared to the achievement of entity objectives. The definition of these objectives provides auditors with a useful framework for understanding and analyzing internal controls.

.03 Auditors are required to obtain an understanding of their client's internal control during the planning phase of every audit. SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), states the following:

> The auditor should obtain an understanding of the five components of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.

.04 As a practical matter, the above requirement raises the following questions.

- What constitutes a "sufficient understanding"? That is, what should an auditor know about the client's internal control?
- How should an auditor obtain this understanding?

.05 This section provides answers to each of the above questions.

What Auditors Should Understand About Internal Control

.06 A "sufficient" understanding of internal control means:

- The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented.
- This understanding is ordinarily limited to controls that pertain to the entity's objective of preparing reliable financial statements for external purposes.
- That one objective can be broken into five components, and an auditor should obtain an understanding of each of the five components.

.07 Obtaining an understanding of controls should be distinguished from testing the operating effectiveness of controls. Obtaining an understanding of internal control involves evaluating the design of a control and determining whether it has been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. Implementation of a control means that the control exists and that the entity is using it. The auditor should consider the design of a control in determining whether to consider its implementation. In contrast, the objective of testing the operating effectiveness of controls is to determine whether the controls, as designed, prevent or detect a material misstatement. This includes obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

.08 *The Jones family owns and operates several neighborhood grocery stores in Anytown. On a monthly basis, the controller of Jones Grocery performs bank reconciliations for all the bank accounts. For planning purposes, the auditor of Jones Grocery should determine whether this control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements and determine whether the controller actually performs the reconciliations. Not testing, but identifying controls are a key part of audit planning.*

.09 SAS No. 109 provides a framework to help auditors obtain their understanding of internal control. That framework is built on two basic concepts: objectives and components.

.10 Internal control is a process designed to provide reasonable assurance regarding the achievement of entity *objectives*. Entities generally have the following three objectives:

- *Financial reporting.* This objective relates to the preparation of reliable published financial statements.
- *Operations.* This objective relates to effective and efficient use of the entity's resources.
- *Compliance.* This objective relates to the entity's compliance with applicable laws and regulations.

.11 *The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* ***financial reporting*** *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the* ***operations*** *objective. Each store also has a small deli that prepares sandwiches and hot entrees. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the entity's* ***compliance*** *objective.*

.12 Ordinarily, relevant controls for an audit relate to the financial reporting objective. Controls relating to operations and compliance objectives that are not relevant to an effective audit need not be considered. It is a matter of the auditor's professional judgment, as to the controls or combination of controls that should be assessed. However, as stated in paragraph 115 of SAS No. 109, for significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented.

.13 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. The auditor of Jones may wish to inquire and document these controls for client service or other purposes, but since these controls are not relevant to the audit, he or she is not required to do so.*

.14 However, if controls relating to operations and compliance objectives pertain to information the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.15 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she should consider obtaining an understanding of the following:

- Which transactions or classes of transactions are included in the report.
- How significant accounting information about those transactions are entered into and flow through the financial reporting system.
- The files that are processed.
- The nature of processing involved in producing the report.

.16 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.17 Controls designed to prevent or detect misappropriations of assets may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or access controls, such as passwords that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. An auditor's responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.18 An objective is what an entity strives to achieve. But what is needed to achieve that objective?

.19 SAS No. 109 provides a framework that separates each financial reporting objective into five components. These components represent what is needed to achieve the entity's objectives. The components of internal control are briefly described as follows:

- *Control environment*. The core of any business is its people—their individual attributes, including integrity, ethical values, and competence—and the environment in which they operate. They are the engine that drives the entity and the foundation on which everything rests.
- *Risk assessment*. The entity must be aware of and deal with the risks it faces. It must set objectives, integrated with the sales, production, marketing, financial, and other activities so that the organization is operating in concert. It also must establish mechanisms to identify, analyze, and manage the related risks.
- *Control activities*. Control policies and procedures must be established and executed to help ensure the actions identified by management as necessary to address risks to achievement of the entity's objectives are effectively carried out.
- *Information and communication*. Surrounding the control activities are information and communication systems, including the financial reporting information system. These systems support the ability of the entity's people to identify, capture, and exchange the information needed to conduct, manage, and control its operations.

- *Monitoring*. The entire process must be monitored, and modifications made as necessary. In this way, the system can react dynamically, changing as conditions warrant.

.20 Some control components, for example the control environment, will have a pervasive effect on the entity's activities. Other components, for example control activities, will be directed primarily toward the achievement of one or more of the three objectives described in AAM section 3125.10. Auditors are generally interested only in those components of internal control that have a pervasive effect on the entity and those that are directly related to the reliability of financial reporting.

.21 This internal control framework, the relationship between an entity's objectives and internal control components, is discussed in more detail in AAM section 4200.

.22 The internal control framework described here and in AAM section 4200 is only a means to help auditors consider the impact of an entity's internal control in an audit. An auditor's primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, an auditor's primary concern is whether, and how, a specific control prevents, or detects and corrects, material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.23 *Andrea Auditor audits Jones Grocery. As on all audits, she is required to obtain an understanding of internal control sufficient to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures. To achieve this, she organizes her inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objective. As a result of performing her procedures, she discovers the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control activity"? What about the fact that someone follows up and investigates old or unusual reconciling items. Is that considered a "monitoring" activity?*

.24 *The issue of how to classify a particular control is irrelevant for Andrea's purposes. As an auditor, her primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

How an Auditor Obtains an Understanding of Internal Control

.25 The auditor should obtain a sufficient understanding of internal control by performing risk assessment procedures (inquiries of management and others within the entity, analytical procedures, and observation and inspection) to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. Procedures to obtain audit evidence about the design and implementation of relevant controls may include inquiring of entity personnel, observing the application of specific controls, inspecting documents and reports, and tracing transactions through the information system relevant to financial reporting. Inquiry alone is not sufficient to evaluate the design of a control relevant to an audit and to determine whether it has been implemented.

.26 Auditors should consider the types of misstatements that occurred in prior audits (for example, whether they were associated with accounting estimates, whether they were routine errors that resulted from a lack of control consciousness, or whether they resulted from lack of sufficient personnel). This knowledge of prior misstatements can help an auditor focus his or her inquiries on those areas and whether changes have been made to internal control to prevent those misstatements in the future.

.27 In a continuing audit, the auditor may already have significant experience with and documentation of internal control. In these situations, this knowledge from previous audits allows the auditor to focus on system changes.

.28 *Jones Grocery purchased a commercially available software package for independent grocers. During 20X1, Jones installed the general ledger system and the cash receipts/disbursements and accounts payable modules. As part of performing her 20X1 audit, Andrea Auditor obtained an understanding of the software package and the modules that were installed. For her 20X2 audit, Andrea should focus on changes made to the system since 20X1. For example, she might inquire about the installation of other modules (such as inventory) or updated versions of the software package.*

.29 Some controls are documented in policy and procedure manuals, flowcharts, source documents, journals, and ledgers. In these cases, inspection of the documentation and inquiries of entity personnel may provide a sufficient understanding to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures.

.30 *When Jones Grocery receives a bill, it is input directly into the accounts payable module of their software package. The computer generates an accounts payable aging and a cash requirements report that indicates when each bill should be paid. The accounts payable module interfaces with the general ledger system to automatically post and update the appropriate general ledger account whenever bills are received or paid. To obtain her understanding of the accounts payable system, Andrea performed a "walk-through." She made inquiries of Jones personnel and obtained copies of bills and the reports generated by the computer. She "walked through" the example bills to see how they were included in the computer reports and how totals from those reports were posted to the general ledger. She also made inquiries related to the completeness assertion, that is, how does Jones ensure that **all** bills are entered into the system? Andrea observed the Jones employee performing those control procedures.*

.31 Documentation may not be available for some controls. For example, the understanding of certain aspects of the control environment, such as management integrity, may be obtained through previous experience updated by inquiries of management and observation of their actions. Although documentation may not be available, the auditor is still responsible for documenting his or her understanding of the components of internal control.

Documenting the Understanding

.32 The auditor should document the key elements of the understanding obtained regarding each of the components of internal control, to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures. The form and extent of this documentation is influenced by the nature and complexity of the entity's controls. For example, documentation of the understanding of internal control of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity's internal control and the more extensive the procedures performed by the auditor, the more extensive the auditor's documentation should be.

[*The next page is 3221.*]

AAM Section 3130

Assessing the Risks of Material Misstatement

General

.01 Knowledge an auditor acquires about a client encompasses a broad range of information, including:

- Industry, regulatory, and other external factors affecting the client.
- The nature of the client, including its operations and organizational structure.
- The client's objectives, strategies, and related business risks, some of which will give rise to risks affecting the financial statements.
- How management measures and reviews the company's financial performance.
- An understanding of the internal controls that are in use at the entity, including an understanding of the use of IT and the controls designed and used within the IT system.

This knowledge of a client forms the basis for identifying risks and evaluating how these risks could result in financial statement misstatements.

.02 The auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. For this purpose, the auditor should:

- Identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and considering the classes of transactions, account balances, and disclosures in the financial statements.
- Relate the identified risks to what can go wrong at the relevant assertion level.
- Consider whether the risks are of a magnitude that could result in a material misstatement of the financial statements.
- Consider the likelihood that the risks could result in a material misstatement of the financial statements.

.03 The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed. When the risk assessment is based on an expectation that controls are operating effectively to prevent or detect material misstatement, individually or when aggregated, at the relevant assertion level, the auditor should perform tests of the controls that the auditor has determined to be suitably designed to prevent or detect a material misstatement in the relevant assertion to obtain audit evidence that the controls are operating effectively, as described in SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318).

.04 The auditor should determine whether the identified risks of material misstatement relate to specific relevant assertions related to classes of transactions, account balances, and disclosures, or whether they relate more pervasively to the financial statements taken as a whole and potentially affect many relevant assertions.

Financial Statement Assertions

.05 Paragraphs 14–19 of SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326), discuss the use of assertions in obtaining audit evidence. In representing that the financial statements are fairly presented in accordance with GAAP, management implicitly or explicitly makes assertions regarding the recognition, measurement, and disclosure of information in the financial statements and related disclosures. Assertions used by the auditor fall into the following categories:

Categories of Assertions			
	Description of Assertions		
	Classes of Transactions and Events During the Period	*Account Balances at the End of the Period*	*Presentation and Disclosure*
Occurrence/Existence	Transactions and events that have been recorded have occurred and pertain to the entity.	Assets, liabilities, and equity interests exist.	Disclosed events and transactions have occurred.
Rights and Obligations	—	The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.	Disclosed events and transactions pertain to the entity.
Completeness	All transactions and events that should have been recorded have been recorded.	All assets, liabilities, and equity interests that should have been recorded have been recorded.	All disclosures that should have been included in the financial statements have been included.
Accuracy/Valuation and Allocation	Amounts and other data relating to recorded transactions and events have been recorded appropriately.	Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are recorded appropriately.	Financial and other information is disclosed fairly and at appropriate amounts.
Cut-off	Transactions and events have been recorded in the correct accounting period.	—	—
Classification and Understandability	Transactions and events have been recorded in the proper accounts.	—	Financial information is appropriately presented and described and information in disclosures is expressed clearly.

.06 The auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks.

Assessing Risks at the Financial Statement Level

.07 Risks of material misstatement at the financial statement level are those risks that relate pervasively to the financial statements and potentially affect many individual assertions. Risks at the financial statement level may derive in particular from a weak control environment. The nature of the risks arising from a weak control environment is such that they are not likely to be confined to specific individual risks of material misstatement in particular classes of transactions, account balances, and disclosures. Rather, weaknesses such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

.08 Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- *Financial statement level risks can affect many assertions*. By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.
- *Assessing financial statement-level risks requires significant judgment*. Ultimately, the auditor should relate identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of the auditor's professional judgment to determine:
  - — The accounts and relevant assertions that could be affected.
  - — The likelihood that a financial statement misstatement will result from the increased risk.
  - — The significance of any misstatement.
- *Risks at the Financial Statement Level May Not be Identifiable With Specific Assertions*. Control weaknesses at the financial statement level can render well-designed activity-level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult, and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed IT general controls allow many unauthorized personnel the opportunity to access and inappropriately change the data, the well-designed input controls have been rendered ineffective. Also, strengths in financial statement-level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and therefore the assessment of the risks of material misstatement) is subjective and may vary from client to client.

Assessing Risks at the Assertion Level

.09 In making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions. Generally, the auditor gains an understanding of controls and relates them to relevant assertions in the context of processes and systems in which they exist. Doing so is useful because individual control activities often do not in themselves address a risk. Often only multiple control activities, together with other elements of internal control, will be sufficient to address a risk.

.10 Conversely, some control activities may have a specific effect on an individual relevant assertion embodied in a particular class of transaction or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

.11 Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing or detecting and correcting misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

Significant Risks That Require Special Audit Consideration

.12 As part of the assessment of the risks of material misstatement, the auditor should determine which of the risks identified are, in the auditor's judgment, risks that require special audit consideration (such risks are defined as *significant risks*). One or more significant risks normally arise on most audits. In exercising this judgment, the auditor should consider inherent risk to determine whether the nature of the risk, the likely magnitude of the potential misstatement including the possibility that the risk may give rise to multiple misstatements, and the likelihood of the risk occurring are such that they require special audit consideration. SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), provides guidance to the auditor in determining whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor should evaluate the design of the entity's controls, including relevant control activities, over such risks and determine whether they are adequate and have been implemented. Paragraphs 45 and 53 of SAS No. 110 (AICPA, *Professional Standards*, vol. 1, AU sec. 318), describe the consequences for further audit procedures of identifying risks as significant.

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.13 As part of the risk assessment described in paragraph 12, the auditor should evaluate the design and determine the implementation of the entity's controls, including relevant control activities, over those risks for which, in the auditor's judgment, it is not possible or practicable to reduce detection risk at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures. The consequences for further audit procedures of identifying such risks are described in paragraph 24 of SAS No. 110.

Revision of Risk Assessment

.14 The auditor's assessment of the risks of material misstatement at the relevant assertion level is based on available audit evidence and may change during the course of the audit as additional audit evidence is obtained. In particular, the risk assessment may be based on an expectation that controls are operating effectively to prevent or detect and correct a material misstatement at the relevant assertion level. In performing tests of controls to obtain audit evidence about their operating effectiveness, the auditor may obtain audit evidence that controls are not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency that is greater than is consistent with the auditor's risk assessment. When the auditor obtains audit evidence from performing further audit procedures that tends to contradict the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and should further modify planned audit procedures accordingly. See paragraphs 70 and 74 of SAS No. 110 for further guidance.

Documentation

.15 The auditor should document (a) the assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level and the basis for the assessment and (b) the risks identified and related controls evaluated as a result of the requirements for significant risks.

AAM Section 3140
Audit Risk and Materiality

General

.01 Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures. The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. Audit risk is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. In other words, audit risk is the risk that the auditor will issue an unqualified opinion on financial statements that are materially incorrect.

.02 Financial statements are materially misstated when they contain misstatements whose effect, individually or in the aggregate, are important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles. Materiality is the criterion used by accountants and auditors to distinguish between unimportant and important matters. The auditor's consideration of materiality is a matter of professional judgment and is influenced by a perception of the needs of users of the financial statements. The perceived needs of users are recognized in the discussion of materiality in FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, which defines materiality as:

> "The magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement."

Nature and Causes of Misstatements

.03 The representation in the auditor's standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor's belief that the financial statements, taken as a whole, are not materially misstated. Misstatements can result from errors or fraud.[1] and may consist of any of the following:

a. An inaccuracy in gathering or processing data from which financial statements are prepared;

b. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under generally accepted accounting principles;

c. The omission of a financial statement element, account, or item;

d. A financial statement disclosure that is not presented in conformity with generally accepted accounting principles;

---

[1] The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AU section 317). See AAM section 3150, *Illegal Acts*. For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts if the same as that for errors or fraud.

e. The omission of information required to be disclosed in conformity with generally accepted accounting principles;

f. An incorrect accounting estimate arising, for example, from an oversight or misinterpretation of facts; and

g. Management's judgments concerning an accounting estimate or the selection or application of accounting policies that the auditor may consider unreasonable or inappropriate.

.04 Misstatements may be of two types: known and likely, defined as follows:

a. *Known misstatements*. These are specific misstatements identified during the audit arising from the incorrect selection or misapplication of accounting principles or misstatements of facts identified, including, for example, those arising from mistakes in gathering or processing data and the overlooking or misinterpretation of facts.

b. *Likely misstatements*. These are misstatements that:

   i. Arise from differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate (for example, because an estimate included in the financial statements by management is outside of the range of reasonable outcomes the auditor has determined).

   ii. The auditor considers likely to exist based on an extrapolation from audit evidence obtained (for example, the amount obtained by projecting known misstatements identified in an audit sample to the entire population from which the sample was drawn).

.05 The term *errors* refers to unintentional misstatements of amounts or disclosures in financial statements. The term *fraud* refers to an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage. Two types of misstatements resulting from fraud are relevant to the auditor's consideration in a financial statement audit: misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets. These two types of misstatements are further described in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1).

.06 See AAM section 3145 for a further discussion on fraud.

.07 Although the auditor has no responsibility to plan and perform the audit to detect immaterial misstatements, there is a distinction in the auditor's response to detected misstatements depending on whether those misstatements are caused by error or fraud. When the auditor encounters evidence of potential fraud, regardless of its materiality, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

Considerations at the Financial Statements Level

.08 The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of:

a. Determining the extent and nature of risk assessment procedures

b. Identifying and assessing the risks of material misstatement

c. Determining the nature, timing, and extent of further audit procedures

d. Evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with generally accepted accounting principles

.09 Audit risk is a function of the risk that the financial statements prepared by management are materially misstated and the risk that the auditor will not detect such material misstatement. The auditor should consider audit risk in relation to the relevant assertions related to individual account balances, classes of transactions, and disclosures and at the overall financial statement level. The auditor should perform risk assessment procedures to assess the risks of material misstatement both at the financial statement and the relevant assertion levels. The auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures based on those assessments.

.10 The auditor should perform the audit to reduce audit risk to a low level that is, in the auditor's professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms.

.11 The considerations of audit risk and materiality are affected by the size and complexity of the entity and the auditor's experience with and knowledge of the entity and its environment, including its internal control. As discussed in the section below entitled, "Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level," certain entity-related factors also affect the nature, timing, and extent of further audit procedures with respect to relevant assertions related to specific account balances, classes of transactions, and disclosures.

.12 In considering audit risk at the overall financial statement level, the auditor should consider risks of material misstatement that relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. Risks of this nature often relate to the entity's control environment and are not necessarily identifiable with specific relevant assertions at the class of transactions, account balance, or disclosure level. Such risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control. In developing responses to the risks of material misstatement at the overall financial statement level, the auditor should consider such matters as the knowledge, skill, and ability of personnel assigned significant engagement responsibilities; whether certain aspects of the engagement need the involvement of a specialist; and the appropriate level of supervision of assistants.

Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level

.13 In determining the nature, timing, and extent of audit procedures to be applied to a specific account balance, class of transactions, or disclosure, the auditor should design audit procedures to obtain reasonable assurance of detecting misstatements that the auditor believes, based on the judgment about materiality, could be material, when aggregated with misstatements in other balances, classes, or disclosures, to the financial statements taken as a whole.

.14 The auditor should consider audit risk at the individual account balance, class of transactions, or disclosure level because such consideration directly assists in determining the nature, timing, and extent of further audit procedures for the relevant assertions related to balances, classes, or disclosures. The auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk.

.15 At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk (AR) consists of (*a*) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (*b*) the risk (detection risk) that the auditor will not detect such misstatements. These components of audit risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms such as *high*, *medium*, or *low* risk. The way the auditor should consider these component risks and combines them involves professional judgment and depends on the auditor's approach or methodology.

.16 *Inherent risk* (IR) is the susceptibility of a relevant assertion to a misstatement that could be material, either individually or when aggregated with other misstatements, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related account balances, classes of transactions, and disclosures than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates that are subject to significant measurement uncertainty pose greater risks than do accounts consisting of relatively routine, factual data. External circumstances giving rise to business risks also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those circumstances that are peculiar to a specific relevant assertion, factors in the entity and its environment that relate to several or all of the classes of transaction, account balances, or disclosures may influence the inherent risk related to a specific relevant assertion. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.17 *Control risk* (CR) is the risk that a misstatement that could occur in a relevant assertion and that could be material, either individually or when aggregated with other misstatements, will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.18 Inherent risk and control risk are the entity's risks, that is, they exist independently of the audit of financial statements. SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA *Professional Standards*, vol. 1, AU sec. 312), and other SASs describe the risk of material misstatement (RMM) as the auditor's combined assessment of inherent risk and control risk; however, the auditor may make separate assessments of inherent risk and control risk. Furthermore, auditors may implement the concepts surrounding the assessment of inherent and control risks and responding to the risk of material misstatement in different ways as long as they achieve the same result.

.19 The auditor should assess the risk of material misstatement at the relevant assertion level as a basis for further audit procedures. Although that assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. This basis may be obtained through the risk assessment procedures performed to obtain an understanding of the entity and its environment, including its internal control, and through the performance of suitable tests of controls to obtain audit evidence about the operating effectiveness of controls, where appropriate.

.20 *Detection risk* (DR) is the risk that the auditor will not detect a misstatement that exists in a relevant assertion that could be material, either individually or when aggregated with other misstatements. Detection risk is a function of the effectiveness of an audit procedure and of its application by the auditor. Detection risk cannot be reduced to zero because the auditor does not examine 100 percent of an account balance or a class of transactions and because of other factors. Such other factors include the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results. These other factors might be addressed through adequate planning, proper assignment of personnel to the engagement team, the application of professional skepticism, supervision, and review of the audit work performed, and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards. Detection risk can be disaggregated into additional components of tests of details risk (TD) and substantive analytical procedures risk (AP).

.21 Detection risk relates to the substantive audit procedures and is managed by the auditor's response to risk of material misstatement. For a given level of audit risk, detection risk should bear an inverse relationship to the risk of material misstatement at the relevant assertion level. The greater the risk of material misstatement, the less the detection risk that can be accepted by the auditor. Conversely, the lower the risk of material misstatement, the greater the detection risk that can be accepted by the auditor. However, the auditor should perform substantive procedures for all relevant assertions related to material classes of transactions, account balances, and disclosures.

Materiality

.22 The auditor's consideration of materiality is a matter of professional judgment and is influenced by the auditor's perception of the needs of users of financial statements. Materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations.

Determining Materiality for the Financial Statements Taken as a Whole When Planning the Audit

.23 The auditor should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit. Determining a materiality level for the financial statements taken as a whole helps guide the auditor's judgments in identifying and assessing the risks of material misstatements and in planning the nature, timing, and extent of further audit procedures. This materiality level does not, however, establish a threshold below which identified misstatements are always considered to be immaterial when evaluating those misstatements and their effect on the financial statements and the auditor's report thereon.

.24 The auditor often may apply a percentage to a chosen benchmark as a step in determining materiality for the financial statements taken as a whole. When identifying an appropriate benchmark, the auditor may consider factors such as:

- The elements of the financial statements (for example, assets, liabilities, equity, income, and expenses) and the financial statement measures defined in generally accepted accounting principles (for example, financial position, financial performance, and cash flows), or other specific requirements.
- Whether there are financial statement items on which, for the particular entity, users' attention tends to be focused (for example, for the purpose of evaluating financial performance).
- The nature of the entity and the industry in which it operates.
- The size of the entity, nature of its ownership, and the way it is financed.

Examples of benchmarks that might be appropriate, depending on the nature and circumstances of the entity, include total revenues, gross profit, and other categories of reported income, such as profit before tax from continuing operations. Profit before tax from continuing operations may be a suitable benchmark for profit-oriented entities but may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when it is an owner-managed business where the owner takes much of the pretax income out of the business in the form of remuneration. For asset-based entities (for example, an investment fund) an appropriate benchmark might be net assets. Other entities (for example, banks and insurance companies) might use other benchmarks.

.25 When determining materiality, the auditor should consider prior periods' financial results and financial positions, the period-to-date financial results and financial position, and budgets or forecasts for the current period, taking account of significant changes in the entity's circumstances (for example, a significant business acquisition) and relevant changes of conditions in the economy as a whole or the industry in which the entity operates.

.26 Once materiality is established, the auditor should consider materiality when planning and evaluating the same way regardless of the inherent business characteristics of the entity being audited.

Tolerable Misstatement

.27 The initial determination of materiality is made for the financial statement taken as a whole. However, the auditor should allow for the possibility that some misstatements of lesser amounts than the materiality levels could, in the aggregate, result in a material misstatement of the financial statements. To do so, the auditor should determine one or more levels of tolerable misstatement. *Tolerable misstatement* (or *tolerable error*) is the maximum error in a population (for example, the class of transactions or account balance) that the auditor is willing to accept. Such levels of tolerable misstatement are normally lower than the materiality levels.

Qualitative Aspects of Materiality

.28 As indicated above, judgments about materiality include both quantitative and qualitative information. As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

.29 Qualitative considerations also influence the auditor in reaching a conclusion about whether misstatements are material. Paragraph 60 of SAS No. 107 provides qualitative factors that the auditor may consider relevant in determining whether misstatements are material.

Considerations as the Audit Progresses

.30 Because it is not feasible for the auditor to anticipate all the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit, the auditor's judgment about materiality for planning purposes may differ from the judgment about materiality used in evaluating the audit findings.

.31 If the auditor concludes that a lower materiality level than that initially determined is appropriate, the auditor should reconsider the related levels of tolerable misstatement and appropriateness of the nature, timing, and extent of further audit procedures. The auditor should consider whether the overall audit strategy and audit plan need to be revised if the nature of identified misstatements and the circumstances of their occurrence are indicative that other misstatements may exist that, when aggregated with identified misstatements, could be material. The auditor should not assume that a misstatement is an isolated occurrence.

.32 If the aggregate of the misstatements (known and likely) that the auditor has identified approaches the materiality level, the auditor should consider whether there is a greater than acceptably low level of risk that undetected misstatements, when taken with the aggregate identified misstatements, could exceed the materiality level and, if so, the auditor should reconsider the nature and extent of further audit procedures.

Quantifying Materiality

.33 Although no authoritative body has established specific guidelines for materiality, there are certain rules of thumb that can be used in making a preliminary assessment of materiality.

.34 Generally, materiality guidelines should be relative rather than absolute. In other words, materiality is usually set as a percentage rather than as an absolute amount. For example, an absolute amount such as

$100,000 may be immaterial to a large, multinational corporation but very material to a small, closely held company. To apply percentage guidelines, auditors must determine what base to use. Generally, auditors select a base that is relatively stable and predictable. Bases commonly used include income before taxes, revenues, and total assets. Generally, misstatements become material to income before they become material to the balance sheet. As a consequence, net income before taxes is often selected as the base.

.35 In small business audits, auditors sometimes make a number of significant audit adjustments. Thus, income before taxes may vary too much to be useful as a base. When income before taxes is not used as a base, auditors sometimes use either total revenue or an average of net income for several prior periods.

Example

.36 A common rule of thumb for materiality is 5 to 10 percent of pretax income (for profit-orientated entities). Some auditors apply this rule of thumb so that items less than 5 percent of normal pretax income are considered immaterial, whereas items that are more than 10 percent are material. For items between 5 and 10 percent, judgment is applied. For example, when unusual factors exist (perhaps the company is about to be sold for a multiple of audited earnings) auditors would tend to classify items between 5 and 10 percent as material. Others use 1 or 1.5 percent of the larger of total assets or revenues. (See Exhibit 1 for a sample planning materiality worksheet.) Note that a percentage of pretax income may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when the owner takes much of the pretax income out of the business in the form of remuneration.

Exhibit 1

	Initials	Date
Done	_______	_______
Reviewed	_______	_______

Client Name
Planning Materiality Worksheet
Balance Sheet Date

1.	Unaudited total assets at balance sheet date	_______
2.	Unaudited total revenues at balance sheet date	_______
3.	Select the larger of line *1* or line *2*	_______
4.	Select a multiplier if audit risk is normal, or, if better than normal, select .01	_______
5.	Multiply line *3* by line *4*	_______
6.	Unaudited pretax income (or equivalent if not a for-profit entity)	_______
7.	Select a multiplier if audit risk is normal, or, if better than normal, select .1	_______
8.	Multiply line *6* by line *7*	_______
9.	Evaluate line *5* and line *8* along with other relevant factors and determine materiality for audit planning purposes	_______

.37 Consideration of which base to use should include such factors as income variability and the nature of the client's business and industry. For a not-for-profit organization, for example, the auditor would probably use total assets or revenues as a base, since pretax income is not meaningful.

SEC Staff Bulletin on Materiality for SEC Registrants

.38 SEC SAB No. 99, *Materiality*, addresses the application of materiality thresholds to the preparation and audit of financial statements filed with the SEC. The SAB does not create new standards or definitions for materiality, but reaffirms the concepts of materiality as expressed in the accounting and auditing literature as well as in long-standing case law.

.39 The SAB states that registrants and the auditors of their financial statements should not rely exclusively on quantitative benchmarks to determine whether an item is material to the financial statements. Equally important is a consideration of whether, in light of the surrounding circumstances, a reasonable investor would consider the item to be important. The SAB also states that management should not make intentional immaterial errors in a registrant's financial statements to "manage" earnings. It further reminds registrants of their legal responsibility to make and keep books, records, and accounts that, in reasonable detail, accurately and fairly reflect transactions and the disposition of assets. The SAB reminds auditors of their obligations to inform management and, in some cases, audit committees of illegal acts that come to the auditor's attention. The full text of the SAB can be viewed at the SEC Web site at: www.sec.gov/interps/account/sab99.htm.

Communication of Misstatements to Management

.40 The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial,[2] and communicate them to the appropriate level of management. This communication should occur on a timely basis.

.41 When communicating details of misstatements, the auditor should distinguish between known misstatements and likely misstatements. The auditor should request management to record the adjustment needed to correct all known misstatements, including the effect of prior period misstatement, other than those that the auditor believes are trivial.

.42 If management decides not to correct some or all of the known and likely misstatements communicated to it by the auditor, or identified when management examined a class of transactions, account balance, or disclosure, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that into account when considering the qualitative aspects of the entity's accounting practices and the implications for the auditor's report.

Evaluating Audit Findings

.43 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence, and determine the effect of such misstatements on the financial statements taken as a whole.

---

[2] Matters that are "trivial" are amount designated by the auditor below which misstatements need not be accumulated. This amount is set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

.44 In aggregating misstatements, the auditor should include the effect on the current period's financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, the auditor should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

.45 In evaluating the effects of misstatements, the auditor should include both qualitative and quantitative materiality considerations (see SAS No. 107 [AU section 312.59–.60]). Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material.

Likely Misstatements

.46 The auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined is referred to as "likely misstatements."

.47 When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she ordinarily would not specifically identify misstatements but would only obtain an indication of whether a misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor ordinarily would have to employ other procedures to enable him to estimate the likely misstatement in the balance or class.

.48 When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. For example, if a $1,000 loan receivable misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $10,000. That projected misstatement also contributes to the auditor's assessment of likely misstatement.

.49 When auditing accounting estimates (for example, allowance for inventory obsolescence, allowance for doubtful accounts, warranty obligations) the audit evidence gathered may support an amount for an estimate different from the amount the client has recorded. That difference may be considered reasonable by the auditor inasmuch as no one accounting estimate can be considered accurate with certainty. In that case, the difference between the estimate that the audit evidence supports and the estimate recorded in the financial statements would not be considered a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

Known Misstatements

.50 *Known misstatements* are those for which the amount of the misstatements are specifically identified. Such misstatements are often supported by highly reliable evidence, such as third-party documents. An example of a known misstatement would be a failure to record an invoice for repairs expense.

Misstatements From the Prior Year

.51 Often overlooked is the consideration of misstatements detected in the prior year that affect the current year. For example, assume last year's aggregation of uncorrected misstatements included an item representing an overstatement of prepaid insurance and an understatement of insurance expense. This item would be included in the current year's aggregation of uncorrected misstatements because it affects the current year's insurance expense. Therefore, the prior year's aggregation of uncorrected misstatements should be reviewed for any items that may have an effect on the current year's financial statements.

Summarizing and Evaluating Misstatements

.52 Most firms prepare a summary of the uncorrected misstatements identified during the audit. This summary may be called the "Summary of Misstatements," or the "Summary of Possible Journal Entries," or other names. The summary presents known, likely, and prior period misstatements separately. The summary is used in evaluating the effect of uncorrected misstatements on the financial statements at the end of the audit.

.53 Some firms establish a predetermined dollar threshold below which misstatements need not be accumulated. This amount should be set so that any such misstatements, either individually, or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

.54 When concluding as to whether the effect of misstatements, individually or in the aggregate, is material, an auditor should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit.

.55 If the auditor believes that the financial statements taken as a whole are materially misstated, the auditor should request management to make the necessary corrections. If management refuses to make the corrections, the auditor must determine the implications for the auditor's report

.56 If the auditor concludes that the effects of uncorrected misstatements, individually or in the aggregate, do not cause the financial statements to be materially misstated, they could still be materially misstated because of further misstatements remaining undetected. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases; consequently, the auditor should also consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

Documentation

.57 In addition to the documentation requirements in SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), SAS No. 107 states the auditor should document:

a. The levels of materiality, as discussed in AU section 312.27, and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined.

b. A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements.

c. The auditor's conclusion as to whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion.

d. All known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management.

.58 Uncorrected misstatements should be documented in a manner that allows the auditor to:

a. Separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods

b. Consider the aggregate effect of misstatements on the financial statements

c. Consider the qualitative factors that are relevant to the auditor's consideration whether misstatements are material (see AU section 312.60)

[*The next page is 3291.*]

AAM Section 3145
Fraud

General

.01 AU section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1), states that "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud." Management is responsible for the design and implementation of programs and controls to prevent, deter, and detect fraud. That responsibility is described in paragraph .03 of AU section 110.

.02 An auditor's responsibilities relating to fraud are stated within the context of materiality to the financial statements taken as a whole. An auditor is not responsible for detecting fraud per se, but for obtaining reasonable assurances that material misstatements due to fraud are detected. An auditor is not responsible for detecting immaterial misstatements caused by fraud. AU section 316.03, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), describes the auditor's consideration of fraud as something that should be integrated into the overall audit process. AU section 316 describes a process in which the auditor:

- Exercises professional skepticism
- Discusses the risks of material misstatements due to fraud with engagement personnel
- Gathers information needed to identify risks of material misstatement due to fraud
- Identifies risks that may result in a material misstatement due to fraud
- Assesses the identified risks after taking into account an evaluation of the entity's programs and controls that address the risks
- Responds to the results of the assessment
- Evaluates audit evidence
- Communicates about fraud to management, the audit committee, and others
- Documents the auditor's consideration of fraud

.03 Even though some requirements and guidance set forth in AU section 316 are presented in a manner that suggests a sequential audit process, auditing in fact involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly, the sequence of the requirements and guidance in AU section 316 may be implemented differently among audit engagements.

Description and Characteristics of Fraud

.04 The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. AU section 316 defines fraud as an intentional act that results in a material misstatement in financial statements that are the subject of an audit.

.05 Three conditions generally are present when fraud occurs. First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Second, circumstances exist that provide an opportunity for a fraud to be perpetrated. Third, those involved are able to rationalize committing a fraudulent act.

Misstatements Arising From Fraudulent Financial Reporting

.06 Misstatements arising from fraudulent financial reporting are intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve acts such as the following:

- Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared.
- Misrepresentation in, or intentional omission from, the financial statement of events, transactions, or other significant information.
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure.

Misstatements Arising From Misappropriation of Assets

.07 Misstatements arising from misappropriation of assets involve the theft of an entity's assets where the effect of the theft causes the financial statement not to be presented, in all material respects, in conformity with generally accepted accounting principles. Misappropriation can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services not received. Misappropriation of assets may be accomplished by false or misleading records or documents, possibly created by circumventing controls, and may involve one or more individuals among management, employees, or third parties.

The Importance of Exercising Professional Skepticism

.08 Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence, and requires an ongoing assessment of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.09 AU section 316 requires that members of the audit team discuss the potential for material misstatement due to fraud prior to or in conjunction with his or her information-gathering procedures. The discussion should include:

- An exchange of ideas or "brainstorming" among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated.
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud.

.10 Communication among the audit team members about the risks of material misstatement due to fraud should continue throughout the audit. See paragraphs .14–.18 of AU section 316 for further guidance.

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.11 In obtaining an understanding of the entity and its environment, including its internal control, information may come to the auditor's attention that should be considered in identifying risks of material misstatements due to fraud. The auditor should perform procedures to obtain information that is used to identify the risks of material misstatement due to fraud, including:

- Making inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed.
- Considering any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit.
- Considering whether one or more fraud risk factors exist.
- Considering other information that may be helpful in identifying risks of material misstatement due to fraud.

See paragraphs .19–.34 of AU section 316 for further guidance.

.12 Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain risk factors or other conditions may suggest to the possibility that fraud may exist. However, these conditions may be the result of circumstances other than fraud.

.13 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or error. Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify "fraud risk factors" that do not necessarily indicate the existence of fraud, but often are present in circumstances where fraud exists. A fraud risk factor is an event or condition that indicates:

- An incentive or pressure to perpetrate fraud
- Opportunities to carry out the fraud
- Attitudes or rationalizations to justify a fraudulent action

Identifying Risks That May Result in a Material Misstatement Due to Fraud[1]

.14 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives/pressures, opportunities, and attitudes/rationalizations. However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks.

.15 The identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including:

---

[1] Statement on Auditing Standards (SAS) No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA *Professional Standards*, vol. 1, AU sec. 314), requires the auditor to identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures (see AU section 314.102).

- The type of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets.
- The significance of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements.
- The likelihood of the risk, that it, the likelihood that it will result in a material misstatement in the financial statements.
- The pervasiveness of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions.

.16 AU section 316 identifies two new requirements for identifying risks that may result in a material misstatement due to fraud. The auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. In addition, the risk of management override of controls should be considered a fraud risk on every audit.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.17 As part of the understanding of internal control sufficient to plan the audit required by AU section 314, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation, and assess those risks taking into account that evaluation.

Responding to the Results of the Assessments[2]

.18 The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence and is influenced by the nature and significance of the risks identified as being present and the entity's programs and controls that address these identified risks. The auditor's response can be (1) an overall response on how the audit is conducted, (2) a response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed, or (3) a response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur.

.19 The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action.

Overall Responses to the Risk of Material Misstatement

.20 Judgements about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

- *Assignment of personnel and supervision*. The knowledge, skill, and ability of personnel assigned significant engagement responsibility should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud.

[2] SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318), requires the auditor to determine overall responses and design and perform further audit procedures to respond to the assessed risks of material misstatement at the financial statement and relevant assertion levels in a financial statement audit. See AU section 318.04 and .07.

- *Accounting principles*. The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.
- *Predictability of auditing procedures*. The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.

Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.21 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending on upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures. See AU section 316.52–.56 for more guidance.

Responses to Further Address the Risk of Management Override of Controls

.22 Management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. Accordingly, in addition to overall responses and responses that address specifically identified risks of material misstatement due to fraud, certain procedures should be performed to further address the risk of management override of controls, as discussed in AU section 316.58–.67.

Evaluating Audit Evidence

.23 The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. The auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatements due to fraud. The auditor also should evaluate whether analytical procedure that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.

.24 At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud made earlier in the audit. Such an evaluation may provide further insight into the risk of material misstatement due to fraud and whether there is a need for additional or different audit procedures to be performed.

.25 If audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. If the auditor has determined that misstatements are or may be the result of fraud, but the effect of the misstatements is not material, the auditor nevertheless should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. If the matter involves higher-level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management. In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (*a*) the nature, timing, and extent of the tests of balances or transactions and (*b*) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

.26 If the auditor believes that the misstatement is, or may be, the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

- Attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report thereon.
- Discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and the audit committee.
- Consider the implications for other aspects of the audit.
- If appropriate, suggest that the client consult with legal counsel.

.27 The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to the audit committee or others with equivalent authority and responsibility. Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (*a*) the implications about the integrity of management and (*b*) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not always possible to definitely describe when withdrawal is appropriate. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

Communicating About Possible Fraud to Management, the Audit Committee, and Others

.28 If the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee. In addition, the auditor should reach an understanding with the audit committee regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower-level employees.

.29 If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected) the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity's internal control that should be communicated to management and those charged with governance. Also the auditor should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance.

.30 The auditor should recognize that in the following circumstances a duty to disclose outside the entity may exist:

- To comply with certain legal and regulatory requirements.
- To a successor auditor when the successor makes inquiries in accordance with AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1).

- In response to a subpoena.
- To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters of fraud or possible fraud with parties outside the client.

Documenting the Auditor's Consideration of Fraud

.31 The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud
- Specific risks of material misstatement due to fraud that were identified, and a description of the auditor's response to those risks
- If the auditor has not identified in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion
- The results of the procedures performed to further address the risk of management override of controls
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions
- The nature of the communications about fraud made to management, the audit committee, and others

Practical Guidance

.32 The AICPA Practice Aid, *Fraud Detection in a GAAS Audit—Revised Edition*, provides a wealth of information and help on complying with the provisions of AU section 316. This practice aid is an other auditing publication as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply SASs.

Fraud Risk Factor Memory Jogger

.33 An auditor may find this memory jogger helpful during planning and at other stages of the audit, when considering fraud risk factors and assessing the risk of material misstatement due to fraud. The listing below contains example risk factors for small, privately-owned businesses. If used, this memory jogger should be tailored for the particular client being audited. Identified or possible risk factors should be added to the list. An auditor may also decide to remove the example factors from the list, based on the circumstances. In any event, be sure to consider fraud risk factors that relate to fraudulent financial reporting and misappropriation of assets in every related category presented below. An auditor should feel free to use this practice aid as he or she sees fit (for example, adding attachments, redesigning the form of the memory jogger). Finally, note that AU section 316 does not require an auditor to use a memory jogger or checklist of fraud risk factors.

Part 1—Fraudulent Financial Reporting

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[3]	*Audit Response Documented? (W/P Ref.)*[4]	*Additional Information*
A. Incentives/Pressures				
a. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):				
(1) High degree of competition or market saturation, accompanied by declining margins.				
(2) New accounting, statutory, or regulatory requirements.				
(3) Significant declines in customer demand and increasing business failures in either the industry or the economy in which the entity operates.				
(4) High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates.				
(5) Operating losses making the threat of bankruptcy or foreclosure, imminent.				
(6) Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth.				
(7) Rapid growth or unusual profitability especially compared to that of other companies in the same industry.				
b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:				
(1) Need to obtain additional debt or equity financing to stay competitive, including financing of major research and development or capital expenditures.				
(2) Marginal ability to meet debt repayment or other debt covenant requirements.				
c. Management's personal net wealth is threatened by the entity's financial performance arising from the following:				
(1) Heavy concentrations of their personal net worth in the entity.				
(2) Personal guarantees of debt of the entity that are significant to their personal net worth.				

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[3]	*Audit Response Documented? (W/P Ref.)*[4]	*Additional Information*
(3) Adverse consequences on significant matters if *good* financial results are reported. Specific examples include management's motivation to inappropriately reduce income taxes, to defraud a divorced spouse or a partner of his or her share of the profits or assets of a business, or to convince a judge or arbitrator that the business in dispute is not capable of providing adequate cash flow. Keep in mind that you are not required to plan your audit to discover personal information (e.g., marital status) of the owner-manager. However, if you become aware of such information, you should consider it in your assessment of risk of material misstatement due to fraud.				
d. There is excessive pressure on management or operating personnel to meet financial targets set by the owner, including sales or profitability incentive goals.				
B. Opportunities				
a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:				
(1) Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.				
(2) Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate.				
(3) Significant, unusual, or highly complex transactions, especially those close to year end that pose difficult "substance over form" questions.				
b. There is a complex or unstable organizational structure as evidenced by the following:				
(1) Difficulty in determining the organization or individuals that have controlling interest in the entity.				
(2) Overly complex organizational structure involving unusual legal entities or managerial lines of authority.				
(3) High turnover of senior management or counsel.				
c. Internal control components are deficient as a result of the following:				
(1) Inadequate monitoring of controls, including automated controls.				
(2) High turnover rates or employment of ineffective accounting staff.				
(3) Ineffective accounting and information systems including situations involving reportable conditions.				

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[3]	*Audit Response Documented? (W/P Ref.)*[4]	*Additional Information*
C. Attitudes/ Rationalizations				
1. A failure for management to display and communicate an appropriate attitude regarding internal control and the financial reporting process.				
2. Ineffective communication and support of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards.				
3. Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates.				
4. Known history of violations or claims against the entity, its owner or senior management alleging fraud or violations of laws and regulations.				
5. A practice by management of committing to, creditors, and other third parties to achieve aggressive or unrealistic forecasts.				
6. Management failing to correct known reportable conditions on a timely basis.				
7. An interest by management in employing inappropriate means to minimize reported earnings for tax motivated reasons.				
8. Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality.				
9. The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:				
a. Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters.				
b. Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report.				
c. Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or audit committee.				
d. Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of audit personnel assigned to the engagement.				

Part 2—Misappropriation of Assets

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[3]	*Audit Response Documented? (W/P Ref.)*[4]	*Additional Information*
A. Incentives/Pressures				
a. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.				
b. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:				
(1) Known or anticipated future layoffs.				
(2) Promotions, compensation, or other rewards inconsistent with expectations.				
B. Opportunities				
a. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:				
(1) Large amounts of cash on hand or processed.				
(2) Company issued credit cards.				
(3) Inventory items that are small in size, of high value, or in high demand.				
(4) Easily convertible assets.				
(5) Fixed assets, that, are small in size, marketable, or lacking observable identification of ownership.				
b. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:				
(1) Inadequate segregation of duties or independent checks. Inadequate segregation of duties is quite often understandable in a small business environment in that it's a function of the entity's size. However, you should consider it in conjunction with other risk factors and with mitigating controls.				
(2) Inadequate management oversight of employees responsible for assets.				

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[3]	*Audit Response Documented? (W/P Ref.)*[4]	*Additional Information*
(3) Inadequate job applicant screening of employees with access to assets.				
(4) Inadequate record keeping with respect to assets.				
(5) Inadequate system of authorization and approval of transactions (for example, in purchasing).				
(6) Inadequate physical safeguards over cash, investments, inventory, or fixed assets.				
(7) Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns.				
(8) Lack of mandatory vacations for employees performing key control functions.				
(9) Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.				
(10) Inadequate access controls over automated records.				
C. Attitudes/Rationalizations				
1. Disregard for the need for monitoring or reducing risks related to misappropriations of assets.				
2. Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies.				
3. Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee.				
4. Changes in behavior or lifestyle that may indicate assets have been misappropriated.				

[*The next page is 3311.*]

[3] Based on the assessment of risk of material misstatement due to fraud, an auditor may respond to identified risk factors individually or in combination.

[4] The auditor's response to identified risk factors should be documented. Documentation should be maintained at a place in the workpapers considered most suitable, depending upon the type of risk factor and the type of response. Generally, if a response is specific to a particular account balance or class of transactions, documentation of the audit procedures would be placed in the appropriate audit program (e.g., Cash, Investments). If it is determined that audit procedures already planned or normally carried out are a sufficient response to the identified risk factor, that fact should be documented.

AAM Section 3150
Illegal Acts

General Comments

.01 The term *illegal acts* refers to violations of laws or governmental regulations. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

.02 Whether an act is illegal is a determination that is normally beyond the auditor's professional competence. The auditor's training and experience may provide a basis for recognition that some client acts coming to his or her attention may be illegal.

Direct and Material Effect Illegal Acts

.03 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies). For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

.04 The auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statement assertions rather than from the perspective of legality *per se*.

.05 The auditor's responsibility to detect and report misstatement resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for errors or fraud. (See SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 312].) That is, the auditor should design the audit to provide reasonable assurance that financial statement amounts are free from material misstatement resulting from these direct-effect illegal acts.

Other Illegal Acts

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects and their financial statement effect is indirect.

.07 An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. An audit conducted in accordance with GAAS normally does not include audit procedures specifically designed to detect illegal acts having an indirect effect on financial statements.

Engagement Planning Procedures

.08 The auditor should assess the risks that the entity has not complied with laws and regulations which have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies) in the planning phase of the audit.

.09 Matters that may influence the auditor's assessment include:

a. Management's understanding of the requirements of laws and regulations pertinent to audit objectives.

b. The nature and extent of noncompliance noted in prior audits.

c. Changes in requirements since the last audit.

d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations.

e. The client's policy relative to the prevention of illegal acts.

.10 Normally, there is no need to include audit procedures specifically designed to detect illegal acts. However, if the auditor becomes aware of information that raises suspicions, he or she is obligated to apply additional procedures to determine whether an illegal act has, in fact, occurred.

[*The next page is 3331.*]

AAM Section 3155
Analytical Procedures

General Comments

.01 Analytical procedures are a natural extension of the auditor's understanding of the client's business, and add to his or her understanding because the key factors that influence the client's business may be expected to affect the client's financial information. Analytical procedures are used in all three stages of the audit. In the planning stage, the purpose of analytical procedures is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions.[1] In the substantive testing stage of the audit, the purpose of analytical procedures is to obtain evidence, sometimes in combination with other substantive procedures, to identify misstatements in account balances and thus to reduce the risk that misstatements will remain undetected. The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion may be derived from tests of details, from analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor's judgment about the expected effectiveness and efficiency of the available procedures. In the overall review stage, the objective of analytical procedures is to assist the auditor in assessing the conclusions reached and in evaluating the overall financial statement presentation. In all cases, the effectiveness of analytical procedures lies in developing expectations that can reasonably be expected to identify unexpected relationships.

.02 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

Analytical procedures should be applied to some extent for the purposes referred to in the planning stage and the overall review stage above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

Analytical Procedures

.03 Analytical procedures are defined by AU section 329.02, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), as amended, as "evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data.… A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of conditions to the contrary." The definition implies several key concepts.

- The "evaluations of financial information" suggests that analytical procedures will be used to understand or test financial statement relationships or balances.

---

[1] In accordance with paragraph 6 of Statement on Auditing Standards (SAS) No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), analytical procedures are also performed as risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control. Refer to SAS No. 109 for further guidance.

- The "study of plausible relationships" implies an understanding of what can reasonably be expected and involves a comparison of the recorded book values with an auditor's expectations.
- "Relationships among both financial and nonfinancial data" suggests that both types of data can be useful in understanding the relationships of the financial information and, therefore, in forming an expectation.

.04 Also, in accordance with paragraph 9 of SAS No. 109, the auditor should apply analytical procedures in planning the audit to assist in understanding the entity and its environment and to identify areas that may represent specific risks relevant to the audit. For example, analytical procedures may be helpful in identifying the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. In performing analytical procedures as risk assessment procedures, the auditor should develop expectations about plausible relationships that are reasonably expected to exist. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying risks of material misstatement. However, when such analytical procedures use data aggregated at a high level (which is often the situation), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, the auditor should consider the results of such analytical procedures along with other information gathered in identifying the risks of material misstatement.

.05 Analytical procedures performed during the overall review stage are designed to assist the auditor in assessing that (*a*) all significant fluctuations and other unusual items have been adequately explained and (*b*) the overall financial statement presentation makes sense based on the audit results and the auditor's knowledge of the business.

.06 During the substantive testing stage, analytical procedures are performed to obtain assurance that material misstatements are not likely to exist in financial statement account balances. To do this, the auditor focuses his or her analytical procedures on particular assertions about account balances and gives detailed attention to the underlying factors that affect those account balances through the development of an expectation independent of the recorded balance. Therefore, substantive analytical procedures generally are performed with more rigor and precision than those used for planning or overall review.

.07 SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318), provides guidance on the use of analytical procedures as substantive procedures. In designing substantive analytical procedures, the auditor should consider such matters as:

- The suitability of using substantive analytical procedures, given the assertions
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance
- The amount of any difference in recorded amounts from expected values that is acceptable

The auditor should consider testing the controls, if any, over the entity's preparation of information to be used by the auditor in applying analytical procedures. When such controls are effective, the auditor has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. When designing substantive analytical procedures, the auditor should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting some types of fraud. Alternatively, the auditor may consider whether the information was subjected to audit testing in the current or prior period. In determining the audit procedures to apply to the information upon which the expectation for substantive analytical procedures is based, the auditor should consider the guidance in paragraph 14 of SAS No. 110.

.08 In planning substantive analytical procedures, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced primarily by tolerable misstatement and should be consistent with the desired level of assurance. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balance, class of transactions, or disclosure could aggregate to an unacceptable amount. In designing substantive analytical procedures, the auditor should increase the desired level of assurance as the risk of material misstatement increases.

Analytical Procedure Process: Four Phases

.09 The use of analytical procedures can be considered a process that consists of four phases. The first phase is the expectation-formation process. In this phase, the auditor forms an expectation of an account balance or financial relationship. In doing so, the auditor determines the precision of the expectation and thus, in part, the effectiveness of the analytical procedure.

.10 The remaining three phases consist of the identification, investigation, and evaluation of the difference between the auditor's expected value and the recorded book value in light of the auditor's materiality assessment. In the second phase, identification, the auditor identifies whether an unusual fluctuation exists between the expected and recorded amounts. In the third, investigation, the auditor investigates the cause of unexpected differences by considering possible causes and searching for information to identify the most probable causes. Finally, in the evaluation phase, the auditor evaluates the likelihood of material misstatement and determines the nature and extent of any additional auditing procedures that may be required.

Expectation Formation (Phase I)

.11 Forming an expectation is the most important phase of the analytical procedure process. The more precise the expectation (that is, the closer the auditor's expectation is to the correct balance or relationship), the more effective the procedure will be at identifying potential misstatements. Also, AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), requires the auditor to form an expectation whenever he or she applies analytical procedures.

.12 The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

a. Financial information for comparable prior period(s) giving consideration to known changes.

b. Anticipated results—for example, budgets or forecasts including extrapolations from interim or annual data.

c. Relationships among elements of financial information within the period.

d. Information regarding the industry in which the client operates—for example, gross margin information.

e. Relationships of financial information with relevant nonfinancial information.

.13 The effectiveness of an analytical procedure is a function of three factors related to the precision with which the expectation is developed: (*a*) the nature of the account or assertion, (*b*) the reliability and other characteristics of the data, and (*c*) the inherent precision of the expectation method used.

Identification and Investigation (Phases II and III)

.14 The next two phases of the analytical procedure process consist of identification and investigation. Identification begins by comparing the auditor's expected value with the recorded amount. Given that the auditor developed an expectation with a particular amount of difference that could be accepted without further explanation, he or she then compares the unexpected differences with the threshold. In substantive testing, an auditor testing for the possible misstatement of the book value of an account determines whether the audit difference was less than the auditor's threshold. If the difference is less than the acceptable threshold, taking into consideration the desired level of assurance from the procedure, the auditor accepts the book value without further investigation. If the difference is greater, the next step is to investigate the difference.

.15 In investigation, the auditor considers possible explanations for the difference. The greater the precision of the expectation (that is, the closer the expectation is to the correct amount) the greater the likelihood that the difference between the expected and recorded amounts is due to misstatement rather than nonmisstatement causes. The difference between an auditor's expectation and the recorded book value of an account (value of an account not subject to auditing procedures) can be due to any or all of the following three causes: (*a*) the difference is due to misstatements, (*b*) the difference is due to inherent factors that affect the account being audited (for example, the predictability of the account or account subjectivity), and (*c*) the difference is due to factors related to the reliability of data used to develop the expectation (for example, data that have been subject to auditing procedures versus data that have not been subject to auditing procedures). The greater the precision of the expectation, the more likely the difference between the auditor's expectation and the recorded value will be due to misstatements (cause *a*). Conversely, the less precise the expectation, the more likely the difference is due to factors related to the precision of the expectation (causes *b* and *c*).

Evaluation (Phase IV)

.16 The final phase of the analytical procedure process consists of evaluating the difference between the auditor's expected value and the recorded amount. It is usually not practicable to identify factors that explain the exact amount of a difference identified for investigation. However, the auditor should attempt to quantify that portion of the difference for which plausible explanations can be obtained and, where appropriate, corroborated and determine that the amount that cannot be explained is sufficiently small to enable him or her to conclude on the absence of material misstatement.

.17 If a reasonable explanation can not be obtained, in accordance with SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312.50), the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence, and determine the effect of such misstatements on the financial statements taken as a whole. Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole." In this case, the auditor would aggregate the misstatement, depending on materiality considerations, with other misstatements the entity has not corrected in the manner discussed in SAS No. 107.

Engagement Planning Procedures

.18 As stated above, the purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (*a*) enhancing the auditor's understanding of the clients' business and the transactions and events that have occurred since the last audit date, and (*b*) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events, and amounts, ratios and trends that might indicate matters that have financial statement and audit planning ramifications.

.19 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

.20 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant non-financial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

Audit Documentation Requirements

.21 AU section 329.22 states than when an analytical procedure is used as the principal substantive test of a significant financial statement assertion the auditor should document all of the following:

- The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development.
- Results of the comparison of the expectation to the recorded amounts or ratios developed from the recorded amounts.
- Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures.

Analytical Procedures Audit Guide

.22 For additional guidance practitioners should refer to the AICPA Audit Guide *Analytical Procedures*. The guide provides practical guidance for auditors on the effective use of analytical procedures. Specifically, the audit guide includes a discussion of AU section 329; concepts and definitions; a series of questions and answers, grouped in the following five categories: precision of the expectation, relationship of analytical procedures to the audit risk model, evaluation and investigation, purpose of analytical procedures, and fraud; and a case study illustrating the four types of expectation methods discussed in Chapter 1 of the guide: trend analysis, ratio analysis, reasonableness testing, and regression analysis.

.23 The audit guide also includes illustrations that demonstrate the importance of forming expectations and considering the precision of the expectation, two of the most misunderstood concepts from AU section 329. The concepts discussed are applicable for all three stages of the audit (planning, substantive testing, and review). However, the audit guide focuses principally on how the concepts are applied to substantive testing because in designing substantive procedures, auditors ordinarily desire a specified level of audit assurance. To obtain the audit guide, call the AICPA order department at 888-777-7077 and ask for product number 012557.

Sample Engagement Letters

.01 Following are illustrative engagement letters (and one engagement memorandum). They may be used as guides in the design of specific letters, tailored to satisfy the terms of a particular engagement.

.02 Audit Engagement Leading to Opinion

LACKO, LYNCH, BROWN & COMPANY Certified Public Accountants

[*Date*]
Mr. Matt Decker, President
Civil War Antiques, Inc.
111 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Decker:

This will confirm our understanding of the services we will provide to Civil War Antiques, Inc. for the year ending December 31, 20XX.

We will audit the balance sheet of Civil War Antiques, Inc. as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them.

The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the establishment and maintenance of effective internal control over financial reporting, the establishment and maintenance of proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us.

Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We are responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that we obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[1]

---

[1] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule of Conduct 101, "Indemnification Clause in Engagement Letters" (AICPA, *Professional Standards*, vol. 1, ET sec. 191.188–.189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses and is expected to issue guidance on the topic during the second half of 2006. Practitioners should be alert to any final guidance.

An audit includes obtaining an understanding of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies or material weaknesses. However, we are responsible for ensuring that you are aware of any significant deficiencies or material weaknesses which come to our attention.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and banks. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

The Company's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

As part of our engagement for the year ending December 31, 20XX, we will review the federal and state income tax returns for Civil War Antiques, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from $XX,XXX to $XX,XXX.

The working papers for this engagement are the property of Lacko, Lynch, Brown & Company and constitute confidential information. However, we may be requested to make certain working papers available to ______________________ [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such working papers will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected working papers to ______________________________ [*name of regulator*]. The ____________________ [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.[2]

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one.

---

[2] This paragraph is optional depending upon the nature of the engagement.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

.03 Change in Circumstances From Those Contemplated in Original Engagement Letter

MACARTHUR & KENNEY, CPA'S Certified Public Accountants

[*Date*]
Mr. James Melakon, Treasurer
Nimbus Country Club
64 Vasily Road
Velikiye Luki, Ohio 10000

Dear Mr. Melakon:

As we agreed in our original engagement letter dated [*date*] we are notifying you that our audit of your December 31, 20XX financial statements requires additional procedures.

We have found that certain guest checks are held for only three months after they are paid. Thus, a substantial number of guest checks are not available for examination. Fortunately, your internal control activities allow us to use alternative procedures to satisfy ourselves on this part of the audit. However, this will require substantially more time than examining guest checks.

The fee for these additional services will be billed at our standard per diem rates and added to the fees quoted in our previous letter.

The situation has been discussed with your controller, who assured us that in the future all guest checks will be kept for two years.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Very truly yours,

MACARTHUR & KENNEY, CPA'S

.04 Conditions Encountered Which Do Not Permit Expression of Opinion as Anticipated in Original Engagement Letter

GEROW, COLLINS & PATCH Certified Public Accountants

[*Date*]
Mrs. Helene Daestrom, President
Cohrane Manufacturing, Inc.
1234 West Street
Cedar Hill, Tennessee 10000

Dear Mrs. Daestrom:

Our March 15, 20XX letter described our present engagement as an audit for the purpose of expressing an opinion on the financial statements based on our audit. This letter is to inform you that because of the circumstances described below, we will be required to qualify our opinion on these statements.

As you know, the Internal Revenue Service has proposed total income tax assessments of approximately $XXX,XXX for the three fiscal years ended December 31, 20XX. Your tax counsel has advised us that although you have a defensible position and will protest the assessments, counsel cannot offer an opinion as to your ultimate liability. No provision for this assessment or any portion of it is included in your December 31, 20XX financial statements, nor do you feel any is necessary.

Due to an inability to obtain sufficient appropriate audit evidence to support your assertions regarding the tax assessment situation described above, we will be unable to express an unqualified opinion. Our report will state the reasons for the qualification of our opinion.

You and your tax counsel have advised that you will inform us of any new developments in the proposed assessment before our report is issued so that we may consider their effect on your financial statements and on our report.

Sincerely,

GEROW, COLLINS & PATCH

____
[*Engagement Partner's Signature*]

Note: The client is not asked to sign this letter. Its purpose is to inform the client of the altered circumstances and the effect on the opinion. There is no change in the terms of the engagement. However, it might be desirable to have the client acknowledge receipt of this letter by signing a copy and returning it where—for example—it is a problem, or when there has been a history of misunderstandings.

.05 Sample Engagement Memorandum (When No Formal Engagement Letter Is Sent)

Engagement Memorandum

The following understanding was agreed to between Gabreski and Bong, CPAs and Kramden Bowling, Inc.

[*Date*]	February 18, 20XX
Client	Kramden Bowling, Inc.
Address	1 Oak Street, Winchester, Virginia 00000
Phone	(555) 555-5555
Final arrangements made with	Ralph Marshall, President
Date final arrangements made	February 15, 20XX, at a meeting in the Kramden Bowling, Inc. offices
Client's personnel responsible for accounting matters	John Sandoval, Treasurer Bob Wesley, Controller
Objective of engagement	Audit engagement. Expression of an opinion on the financial statements. Also, review of federal and state income tax returns for year ended March 31, 20XX. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report.
Management's responsibilities	Management is responsible for the entity's financial statements, establishing and maintaining effective internal control over financial reporting, identifying and ensuring that the entity complies with the laws and regulations applicable to its activities, and for making all financial records and related information available to us. At the conclusion of the engagement, management will provide us with a letter that confirms certain representations made during the audit. Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
Auditor's responsibilities	We are responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that we obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform management of all matters of fraud that come to our attention. We will also inform the client of illegal acts that come to our attention, unless they are clearly inconsequential.

Internal control	An audit includes obtaining an understanding of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies or material weaknesses. However, we are responsible for ensuring that management is aware of any reportable conditions which come to our attention.
Financial statements to be audited	Balance sheet at March 31, 20XX and statements of income, retained earnings, shareholders' equity, and cash flows for year ended March 31, 20XX
Responsibilities of client's personnel in preparation for engagement	Trial balance of G/L and completion of schedules, a list of which we will submit two weeks before beginning of engagement
Reports to be addressed to	Board of Directors (twelve copies)
Date audit to commence	Approximately April 24, 20XX (check with controller about April 10)
Estimated time required	Approximately three weeks
Staff requirements	Manager, supervisor, in-charge senior, and two staff assistants
Billing arrangements	Every two weeks, at standard plus out-of-pocket costs; invoices to attention of Bob Wesley; payable on presentation
Special accounting problems	Client was involved in a substantial sale and leaseback transaction during the year
	Imputed interest may be required on long-term liabilities resulting from purchase of business
Other comments	Client is presently negotiating with machinists' union

.06 Audit of Personal Financial Statements

[*Salutation*]

This will confirm our understanding of the arrangement for our audit of the financial statements of James and Jane Person for the [*period*] ended [*date*].

We will audit the statement of financial condition of James and Jane Person as of [*date*] and the related statement of changes in net worth for the [*period*] then ended, for the purpose of expressing an opinion on them. The financial statements are the responsibility of James and Jane Person. You are responsible for establishing and maintaining effective internal control over financial reporting, making all financial records and related information available for audit, and for identifying and ensuring compliance with the laws and regulations applicable to your activities.

You are responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements we have aggregated during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

We will conduct our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected.[3] Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

The audit includes obtaining an understanding of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify significant deficiencies or material weaknesses. However, we are responsible for ensuring you are aware of any significant deficiencies or material weaknesses which come to our attention.

At the conclusion of our audit, you will provide us with a letter that confirms certain representations made during the audit.

We will also [*discussion of other services, if any*].

Our fees for these services [*specify fees or terms*].

We shall be pleased to discuss this letter with you at any time.

If this letter is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

____

(Signature of accountant)

(Date)

[3] AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), describes the auditor's responsibilities to plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatement, whether caused by error or fraud, and provides guidance on what should be done to meet those responsibilities.

.07 Audit of Not-for-Profit Financial Statements

[*Date*]

[*Name and address*]

Dear [*Contact*]

Agreement to Provide Services

This agreement is intended to describe the nature and scope of our services.

As agreed, we will audit the statement of financial position of [*Name of Client*] (the "*abbreviated name*") as of [date] and the related statements of activities and cash flows for the year then ended in accordance with auditing standards generally accepted in the United States of America. The financial records and financial statements are the responsibility of the [*Organization's*] management. In that regard, management is responsible for establishing and maintaining effective internal control over financial reporting, establishing and maintaining proper accounting records, selecting appropriate accounting principles, safeguarding company assets and complying with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us.

Our responsibility is to express an opinion on the financial statements based on our audit. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation.

At the conclusion of our audit, we will submit to you a report containing our opinion as to whether the financial statements, taken as a whole, are fairly presented based on accounting principles generally accepted in the United States of America. If during the course of our work it appears for any reason that we will not be in a position to render an unqualified opinion on the financial statements, or that our report will require an explanatory paragraph, we will discuss this with you. It is possible that because of unexpected circumstances, we may determine that we cannot render a report or otherwise complete the engagement. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement. If, in our professional judgment, the circumstances require, we may resign from the engagement prior to completion.

We will design our audit to provide reasonable rather than absolute assurance of detecting errors or fraud that would have a material effect on the financial statements. Our work will be based primarily upon selected tests of evidence supporting the amounts and disclosures in the financial statements and, therefore, will not include a detailed check of the [*Organization's*] transactions for the period. Accordingly, an audit performed in accordance with auditing standards generally accepted in the United States of America is not a guarantee of the accuracy of the financial statements, and there is a risk that material errors or fraud may exist and not be detected by us. Also, an audit is not designed to detect errors or fraud that are immaterial to the financial statements. However, we will inform you of any material errors or fraud that come to our attention. We will also inform you of illegal acts that come to our attention unless they are clearly inconsequential. In addition, during the course of our audit, financial statement misstatements may be identified, either through our audit procedures or through communication by your employees to us and we will bring these misstatements to your attention as proposed adjustments. Management is responsible for recording such adjustments in the financial statements or otherwise concluding and confirming in a representation letter provided to us at the conclusion of our audit, that the effects of the unrecorded adjustments are, both individually and in the aggregate, immaterial to the financial statements taken as a whole. At the conclusion of our audit we will communicate to management and all those charged with governance all such unrecorded adjustments.

An audit includes obtaining an understanding of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies or material weaknesses. However, we are responsible for ensuring that you are aware of any significant deficiencies or material weaknesses which come to our attention during our engagement.

Ownership of Working Papers

The working papers prepared in conjunction with our audit are the property of our Firm, constitute confidential information and will be retained by us in accordance with our Firm's policies and procedures.

Reproduction of Audit Report

If the [*Organization*] plans any reproduction or publication of our report, or any portion of it, copies of masters' or printers' proofs of the entire document should be submitted to us in sufficient time for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Management Representations

As required by auditing standards generally accepted in the United States of America, we will request certain written representations from management at the close of our audit to confirm oral representations given to us and to indicate and document the continuing appropriateness of such representations and reduce the possibility of misunderstanding concerning matters that are the subject of the representations. Because of the importance of management's representations to an effective audit and provided the audited financial statements and our report thereon are not included in registration statements under the Securities Act of 1933 or in a Private Placement Memorandum, the [*Organization*] agrees to release and indemnify [*Firm*] and its personnel from any liability and costs relating to our services under this agreement attributable to any misrepresentations by management.

Availability of Records

You agree that all records, documentation, and information we request in connection with our audit (including those pertaining to related parties) will be made available to us, that all material information will be disclosed to us, and that we will have full cooperation of your personnel.

Assistance by Your Personnel

We also ask that your personnel, to the extent possible, prepare various schedules and analyses for our staff. This assistance by your personnel will serve to facilitate the progress of our work and minimize costs to you.

Preparation of Tax Returns [*if applicable*]

As part of our engagement, we will prepare the Federal Form 990 and [*identify other returns*] for the year ended [date]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of the Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Other Services [*modify as necessary*]

We are always available to meet with you or other executives, or both, at various times throughout the year to discuss current business, operational, accounting, and auditing matters affecting the [*Organization*]. Whenever you feel such meetings are desirable, please let us know. We are also prepared to provide services to assist you in any of these areas. We will also be pleased, at your request, to attend your directors' meetings.

Independence

Professional standards require us to be independent with respect to the [*Organization*] in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the [*Organization*], [xx] days from the first day of employment.

Audit and Tax Fees

Our charges to the [*Organization*] for the audit [*and tax return preparation*] services described above are expected to be $[*fee*], plus out-of-pocket expenses. The fee is based on anticipated cooperation from your personnel and the assumption that unexpected circumstances will not be encountered during the audit. If significant additional time is necessary, we will discuss it with you and arrive at a new fee estimate before we incur the additional costs. Bills will be rendered on a monthly basis with payment due upon presentation. Prior to the release of the audit report, we will require payment of 100 percent of all fees billed.

Our charges for other services will be agreed to separately.

* * *

The arrangements described in this letter will be updated annually.

Very truly yours,

[*FIRM*]

.08 Audit of Not-for-Profit Financial Statements Subject to the Provisions of OMB Circular A-133[4]

[*Date*]

[*Name and address*]

Dear [*Contact*]

Agreement to Provide Services

This letter confirms our understanding of the services we will provide to [*Name of Client*] (the [*abbreviated name*]) for the year ending [*date*].[5]

We will audit the [*abbreviated name*]'s basic financial statements as of and for the year ending [*date*]. We will conduct our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. We also will report on the supplementary schedule of expenditures of federal awards that accompanies the basic financial statements.

In addition, we will audit the [*abbreviated name*]'s compliance with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs as defined in OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. We will conduct our audit of the [*abbreviated name*]'s compliance with those compliance requirements in accordance with GAAS, the standards applicable to financial audits contained in *Government Auditing Standards*, and the requirements of OMB Circular A-133.

The objectives of our audit are the expression of our opinions concerning:

- Whether the financial statements are presented fairly, in all material respects, in conformity with accounting principles generally accepted in the United States of America (GAAP).
- Whether the schedule of expenditures of federal awards is presented fairly, in all material respects, in relation to the basic financial statements taken as a whole.
- Whether the [*abbreviated name*] complied with the types of compliance requirements described in the *Compliance Supplement* that are applicable to each of the [*abbreviated name*]'s major federal programs.
- A report on the financial statements that provides our opinion or disclaimer of opinion on the basic financial statements and on the schedule of expenditures of federal awards.
- A report on internal control over financial reporting and on compliance based on an audit of financial statements performed in accordance with the standards applicable to financial audits contained in *Government Auditing Standards*.
- A report that provides our opinion or disclaimer of opinion on compliance with requirements applicable to each major program and that reports on internal control over compliance in accordance with OMB Circular A-133.
- A schedule of findings and questioned costs.

---

[4] *Note to users of this sample engagement letter:* This sample engagement letter was derived from a sample letter in the AICPA Practice Aid, *Auditing Recipients of Federal Awards: Practical Guidance for Applying OMB Circular A-133, 2005–2006 Edition* (product no. 006621). That practice aid includes additional resources in paper and electronic form for a Circular A-133 audit.

[5] *Note to users of this sample engagement letter*: You should add to the engagement letter as appropriate, for additional considerations, such as performing procedures relating to a compliance audit of or limited-scope audits of subrecipients, the involvement of other auditors (for example, a joint audit with a minority firm), or the auditee's responsibility for obtaining the cooperation of the predecessor auditor.

We also will complete the appropriate sections of and sign the OMB Data Collection Form that summarizes our audit findings. We will provide copies of our reports to you so that they can be included in the [*abbreviated name*]'s reporting package as defined in OMB Circular A-133. The [*abbreviated name*] is responsible for submitting the reporting package and OMB Data Collection Form to the appropriate recipients.

Our ability to express the opinions and render the reports referred to above, and the wording of our opinions and reports, will depend on the results of the audit and the facts and circumstances at the date of those reports. If circumstances preclude us from issuing unqualified opinions, we will discuss the reasons with you in advance. If circumstances preclude us from completing our audit and issuing our reports as we contemplate, we will advise you and other appropriate parties promptly and take appropriate action.

Financial Statement Audit

The [*abbreviated name*]'s management is responsible for the basic financial statements and the schedule of expenditures of federal awards as well as all representations contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; the prevention and detection of fraud; and the identification of and compliance with laws, regulations, and the provisions of contracts or grant agreements. Management also is responsible for adjusting the basic financial statements to correct material misstatements and for affirming to us in its representation letter that the effects of any uncorrected misstatements that we accumulate during the current audit and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the basic financial statements.

Our responsibility is to express an opinion on the basic financial statements based on our audit, and is limited to the period covered by our audit. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; therefore, our audit will involve judgment about the number of transactions to be examined and the areas to be tested. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the financial statement presentation.

We will plan and perform the audit to obtain reasonable rather than absolute assurance about whether the basic financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. In addition, an audit is not designed to detect error or fraud that is immaterial to the basic financial statements.

As part of our audit of the basic financial statements, we will obtain an understanding of the [*abbreviated name*]'s internal control over financial reporting sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on the financial statements. Our audit is not designed to provide an opinion on the [*abbreviated name*]'s internal control over financial reporting or to identify significant deficiencies in the design or operation of internal control over financial reporting.

We also will perform tests of the [*abbreviated name*]'s compliance with certain provisions of laws, regulations, and the provisions of contracts or grant agreements. However, it is not our objective to provide an opinion on overall compliance with those provisions and, accordingly, we will not express such an opinion.

In planning the audit, we will follow up on known significant findings and recommendations from previous financial audits, attestation engagements, performance audits, or other studies that directly relate to the objectives of the current audit to determine the effect on our risk assessment and audit procedures.

As part of our audit, we will be alert to situations or transactions that could be indicative of abuse, which involves behavior that is deficient or improper when compared with behavior that a prudent person would consider reasonable and necessary business practice given the facts and circumstances. The determination of abuse is subjective; *Government Auditing Standards* does not expect us to provide reasonable assurance of detecting abuse, and we will not design the audit to detect abuse. However, if we become aware of indications of material abuse, we will apply procedures to ascertain whether abuse has occurred.

We will include in our reports information about the following, if any: significant deficiencies in internal control over financial reporting (reportable conditions); reportable conditions that are material weaknesses; fraud or illegal acts unless they are clearly inconsequential; material violations of contracts or grant agreements; and material abuse.

A schedule of expenditures of federal awards will accompany the [*abbreviated name*]'s basic financial statements. We will subject that schedule to the audit procedures applied in our audit of the basic financial statements and render our opinion on whether that schedule is fairly presented, in all material respects, in relation to the basic financial statements taken as a whole. We also will make specific inquiries of management about that schedule, which management will affirm to us in its representation letter.

Compliance Audit of Federal Programs

The [*abbreviated name*]'s management is responsible for compliance with laws, regulations, and the provisions of contracts or grant agreements related to federal programs. Encompassed in that responsibility is the establishment and maintenance of internal control over compliance that provides reasonable assurance that the [*abbreviated name*] is managing federal awards in compliance with laws, regulations, and provisions of contracts or grant agreements.

Our responsibility is to express an opinion on whether the [*abbreviated name*] complied with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the [*abbreviated name*]'s major federal programs. Following the criteria for federal program risk in OMB Circular A-133, we will determine which federal programs should be considered major programs and thus included within the scope of the compliance audit.[6]

We will plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements that are applicable to the [*abbreviated name*]'s major federal programs could have a direct and material effect on each of its major federal programs. An audit of compliance includes examining, on a test basis, evidence about the [*abbreviated name*]'s compliance with those requirements and performing such other procedures we consider necessary in the circumstances. Our audit does not provide a legal determination on the [*abbreviated name*]'s compliance with those requirements.

As part of our audit of compliance applicable to the [*abbreviated name*]'s major federal programs, we will obtain an understanding of the [*abbreviated name*]'s internal control over compliance sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on compliance and not to provide assurance on the internal control over compliance. We also will perform testing of internal control as required by OMB Circular A-133.

We also will follow up on prior audit findings by performing procedures to assess the reasonableness of the [*abbreviated name*]'s summary schedule of prior audit findings.

We will include in our reports information about the following, if any: significant deficiencies in internal control over major programs (reportable conditions), identifying any that are material weaknesses; material noncompliance with laws, regulations, and provisions of contracts or grant agreements related to major programs; certain known questioned costs; fraud affecting federal awards; abuse that is material to a federal program; and other federal award audit findings as required by *Government Auditing Standards* and OMB Circular A-133.

---

[6] *Note to users of this sample engagement letter:* This paragraph should be modified if the auditor elects to use a dollar threshold approach to selecting major programs, as allowed by A-133 for first-year single audits.

Other Communications Arising From the Audit

In connection with planning and performing our audit we will communicate certain matters to appropriate [*abbreviated name*] personnel and to its audit committee, including our responsibilities for testing and reporting on internal control over financial reporting and on compliance with laws, regulations, and provisions of contracts or grant agreements, both for our financial statement audit and our compliance audit of major federal programs.[7] We also will communicate certain matters of interest, as applicable, to the audit committee, including changes in significant accounting policies or their application; adjustments arising from the audit that could either individually or in the aggregate have a significant effect on the [*abbreviated name*]'s financial reporting process; and fraud involving senior management that is not otherwise included in our reports.

In planning and performing our audit, we will ask management, the audit committee, the internal auditor, and others within the entity about fraud or suspected fraud; allegations of fraud or suspected fraud; the risks of fraud; programs and controls established to prevent and detect fraud; whether management has communicated information about those programs and controls to the audit committee; and how management communicates to employees its views on business practices and ethical behavior.

We also may communicate in a management letter certain matters identified during the audit or possible ways to improve the [*abbreviated name*]'s operational efficiency and effectiveness or otherwise improve its internal control or other policies or procedures. Under GAAS and *Government Auditing Standards*, we also may be required to directly report fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse to outside parties.

Preparation of Tax Returns [*if applicable*]

As part of our engagement, we will prepare the Federal Form 990 [*and identify other returns*] for the year ended [*date*]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Other Matters

Other [Abbreviated Name] Responsibilities

The [*abbreviated name*] agrees to make available to us all records, documentation, and information we request in connection with our audit, to disclose to us all material information, and to give to us the full cooperation of the [*abbreviated name*]'s personnel. An enclosure to this letter describes the assistance to be supplied by [*abbreviated name*] personnel, including preparation of schedules and analyses of accounts, and the timing for that assistance. Timely completion of that work will facilitate the conclusion of our audit.

The [*abbreviated name*] agrees to provide us printer's proofs of its basic financial statements, schedule of expenditures of federal awards, and other information for its Circular A-133 reporting package for our review and approval before printing. The [abbreviated name] also agrees to provide us with a copy of the final reproduced material for our approval before distributing it.

The [*abbreviated name*] also is responsible for:

---

[7] *Note to users of this sample engagement letter: Government Auditing Standards*, paragraphs 4.08 and 4.09, specifies the parties to whom this communication should be made.

- Taking timely and appropriate steps to remedy fraud, illegal acts, violations of provisions of contracts or grant agreements, or abuse that we report.
- Having a process to track the status of audit findings and recommendations.
- Identifying for us previous financial audits, attestation engagements, performance audits, or other studies related to the objectives of our audit and the corrective actions taken to address significant findings and recommendations.
- Providing its views on our current findings, conclusions, and recommendations, as well as management's planned corrective actions, for our reports. The corrective action plan that the [*abbreviated name*] develops for its OMB Circular A-133 reporting package may fully or partially satisfy this responsibility.

Our reports on the [*abbreviated name*]'s internal control and compliance will state that they are intended solely for the information and use of the audit committee, management, federal awarding agencies, and pass-through entities and are not intended to be and should not be used by anyone other than these specified parties. However, the [*abbreviated name*] should make copies of our reports available for public inspection unless they are restricted by law or regulation, or contain privileged and confidential information.

Other Auditor Responsibilities

As required by GAAS, we will make specific inquiries of management about the representations embodied in the basic financial statements, the effectiveness of internal control, and the [*abbreviated name*]'s compliance with laws, regulations, and the provisions of contracts or grant agreements that govern federal programs. We also will obtain a representation letter from management about those matters.

If during our audit we become aware that the [*abbreviated name*] is subject to an audit requirement that is not encompassed in the terms of this engagement, we will communicate to management and the audit committee that those terms may not satisfy the relevant legal, regulatory, or contractual requirements.

The documentation for this audit is our firm's property and constitutes confidential information. We will maintain that documentation for the minimum period of time required by applicable auditing standards and requirements. In accordance with *Government Auditing Standards*, OMB Circular A-133, and federal law, we may be required, upon request, to make certain of that documentation (including photocopies) available to other auditors or reviewers, including the cognizant or oversight agency for audit or its designee, a federal agency providing direct or indirect funding, and the U.S. Government Accountability Office. Those parties may intend, or decide, to distribute the photocopies or information contained therein to others, including other governmental agencies and the public. We will notify you of any such requests.

Peer Review Reports

Our firm undergoes a periodic external peer review that examines the quality of our auditing practice. We are enclosing with this letter a copy of the report and letter of comment from our firm's most recent external peer review.

Other Services

We are always available to meet with you or other executives at various times throughout the year to discuss current business, operational, accounting, and auditing matters affecting the [*abbreviated name*]. Whenever you feel such meetings are desirable, please let us know. We also are prepared to provide services to assist you in any of these areas. We also will be pleased, at your request, to attend your directors' meetings.

If the [*abbreviated name*] wishes to assert that it complied, in all material respects, with specified laws and regulations, we could perform an engagement in accordance the American Institute of Certified Public Accountants' and *Government Auditing Standards'* attestation standards. The procedures we would perform would be more limited than if we were to express an opinion on management's assertions.

Independence

Professional standards require us to be independent with respect to the [*abbreviated name*] in the performance of our services. Any discussion that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [*XX*] percent of that individual's base compensation at the [*abbreviated name*], [*xx*] days from the first day of employment.

Fees

Our fee estimate, which is shown in a separate schedule, is based on a "core" amount for the financial statement audit and tax return preparation services plus an incremental amount for the compliance audit of federal programs, based on the [*abbreviated name*]'s actual number of major programs.[8] We also will charge the [*abbreviated name*] for our out-of-pocket expenses. We will bill our fees as work progresses with payment to be made upon presentation. Our initial fee estimate and our target date for delivering our reports assume that we will receive the aforementioned assistance from [*abbreviated name*] personnel and that we will not encounter unexpected circumstances. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of fees or our report delivery date, which is on or about [*date*]. Prior to the release of the audit reports, we will require payment of 100 percent of all fees billed.

Our charges for other services will be agreed to separately.

[*The next page is 4001.*]

[8] *Note to users of this sample engagement letter:* Various factors may change the level of effort required for the compliance audit of federal programs from year-to-year. For example, the auditee may have more or fewer federal programs or major programs because of new or discontinued federal programs, increased or decreased federal funding for existing programs, and OMB changes in program clusters; or the auditee may achieve or lose low-risk auditee status. As shown in this sample letter, auditors could consider pricing their services for the compliance audit based on the number of major programs to be audited.

AAM Section 4000
Internal Control

> The material included in these sections on internal control is presented for illustrative purposes only. The comments and illustrations are neither all inclusive nor are they prescribed minimums. They are intended as conveniences for users of this manual who may want assistance when developing materials to meet their individual needs.
>
> This manual is a nonauthoritative kit of practice aids and, accordingly, these sections on internal control do not include extensive explanation or discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate.

TABLE OF CONTENTS

[*The next page is 4101.*]

AAM Section 4100
Introduction

Overview

.01 As discussed in AAM section 3125, on every audit, the auditor is required to obtain an understanding of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. A *sufficient* understanding means you should perform risk assessment procedures to evaluate the design of controls relevant to an audit and to determine whether they have been implemented. In obtaining this understanding, the auditor should consider how an entity's use of information technology (IT) and manual procedures, may affect controls relevant to the audit.

.02 Statement on Auditing Standards (SAS) No. 109, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), provides a framework to help you obtain your understanding of internal control. This framework breaks internal control into five components as identified in AAM section 4200.03. The division of internal control into the five components provides a useful framework for auditors to consider how different aspects of an entity's internal control may affect the audit.

.03 Your understanding of internal control is used to—

- Identify types of potential misstatement.
- Consider factors that affect the risk of material misstatement.
- Design tests of controls, when applicable.
- Design substantive procedures.

.04 Your understanding of a client's internal control should be based on your previous experience with the client and the following:

- Inquiries of appropriate management, supervisory, and staff personnel.
- Analytical procedures.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

.05 AAM section 4200 provides more detail on the internal control framework described in SAS No. 109. Refer to AAM section 5100 for guidance pertaining to the design of further audit procedures (tests of controls or substantive procedures, or both) and AAM section 5200 for specific guidance on the performance of tests of controls.

[*The next page is 4201.*]

AAM Section 4200
Internal Control Framework

Introduction

.01 As described in AAM section 3125, Statement on Auditing Standards (SAS) No. 109, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), provides a framework to help you obtain an understanding of internal control. That framework is built on two concepts: objectives and components.

.02 An *objective* is what the entity is trying to achieve. Generally, an entity tries to achieve objectives in the following three categories:

- Reliability of financial reporting
- Effectiveness and efficiency of operations
- Compliance with applicable laws and regulations

.03 For each of these objectives, internal control consists of the following five interrelated components:

- *Control environment*, which sets the tone of an organization and influences the control consciousness of its people. It is the foundation for all other components of internal control and provides discipline and structure.
- *Risk assessment*, which is the entity's identification and analysis of relevant risks to achievement of its objectives. It forms a basis for determining how the risks should be managed.
- *Control activities*, which are the policies and procedures that help ensure management directives are carried out.
- *Information and communication systems* support the identification, capture, and exchange of information in a form and time frame that enables people to carry out their responsibilities.
- *Monitoring*, which is a process that assesses the quality of internal control performance over time.

.04 Although an entity's internal control addresses objectives referred to in AAM section 4200.02, not all of these objectives and related controls are relevant to an effective audit of an entity's financial statements. Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles, including the management of risk that may give rise to a risk of material misstatement in those financial statements. An entity may have controls that relate to operations and compliance with laws and regulations that are not relevant to an audit and therefore need not be considered.

.05 *The Jones family owns and operates several neighborhood grocery stores in Anytown. The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* ***financial reporting*** *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the* ***operations*** *objective. Each store has a small deli that prepares sandwiches and some hot foods. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the* ***compliance*** *objective of the entity.*

.06 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. If you were the auditor of Jones Grocery, you may wish to ask about and document these controls for client service or other purposes, but because these controls are not relevant to the audit, you are not required to do so.*

.07 However, if controls relating to operations and compliance objectives pertain to data you evaluate or use in applying auditing procedures, then they may be relevant to the audit.

.08 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she should obtain an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting data about those transactions are entered into and flow through the financial reporting system
- The files that are processed
- The nature of processing involved in producing the report

.09 Controls relating to operations and compliance objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.10 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.11 The internal control framework described in SAS No. 109, is only a means to help you consider the impact of an entity's internal control in an audit. Your primary consideration is whether, and how, a specific control prevents, or detects and corrects, material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.12 *Suppose you are the auditor of Jones Grocery. As on all audits, you are required to obtain an understanding of internal control sufficient to assess the risks of material misstatement and to design the nature, timing, and extent of further audit procedures. To achieve this, you organize your inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objectives. As a result of performing your procedures, you discover the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items? Is that considered a "monitoring" activity?*

.13 *These questions are rhetorical since the issue of how to classify a particular control is irrelevant for your purposes. As an auditor, your primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

Effect of Information Technology on Internal Control

.14 An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives, and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.15 The use of IT also affects the fundamental manner in which transactions are initiated, authorized, recorded, processed, and reported. In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, and reconciliations and follow-up of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions, or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

.16 IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to—

- Consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data.
- Enhance the timeliness, availability, and accuracy of information.
- Facilitate the additional analysis of information.
- Enhance the ability to monitor the performance of the entity's activities and its policies and procedures.
- Reduce the risk that controls will be circumvented.
- Enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

.17 IT also poses specific risks to an entity's internal control, including—

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both.
- Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions.
- Unauthorized changes to data in master files.
- Unauthorized changes to systems or programs.

- Failure to make necessary changes to systems or programs.
- Inappropriate manual intervention.
- Potential loss of data or inability to access data as required.

.18 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

.19 Manual controls of systems may be more suitable where judgment and discretion are required, such as for the following circumstances:

- Large, unusual, or nonrecurring transactions.
- Circumstances where misstatements are difficult to define, anticipate, or predict.
- In changing circumstances that require a control response outside the scope of an existing automated control.
- In monitoring the effectiveness of automated controls.

.20 Manual controls are performed by people, and therefore pose specific risks to the entity's internal control. Manual controls may be less reliable than automated controls because they can be more easily bypassed, ignored, or overridden and they are also more prone to errors and mistakes. Consistency of application of a manual control element cannot therefore be assumed. Manual systems may be less suitable for the following:

- High volume or recurring transactions, or in situations where errors that can be anticipated or predicted can be prevented or detected by control parameters that are automated.
- Control activities where the specific ways to perform the control can be adequately designed and automated.

.21 The purpose of this section is to provide guidance on each of the five components that comprise the internal control framework. This guidance should help you perform procedures to obtain an understanding of internal control. These procedures generally require the following steps:

- Understand internal control components that have a pervasive effect on the organization.
- Understand how information technology (IT) is used to process significant accounting information.
- Understand control activities for significant account balances or transaction cycles.
- Assess the risk of management override and lack of segregation of duties.

Focus on the Small Business Entity

.22 This section emphasizes the audit of a small business entity. Small business entities are typically characterized by—

- A single owner or a small group of owners who manage the business on a day-to-day basis.
- A small number of employees involved in the accounting function.

- No outside board of directors or internal audit function.
- The use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.23 This section provides some guidance for the audits of medium to large businesses.

Controls With a Pervasive Effect on the Organization

.24 Your client's control components consist of controls that either have a pervasive effect on the organization or are designed to address specific account balances, classes of transactions, or disclosures. Initially, you should focus on the policies and procedures that have a pervasive effect on the organization.

Understanding the Control Environment

.25 The control environment sets the tone of an organization. It influences the control consciousness of its people and is the foundation for all other components of internal control. In obtaining an understanding of your client's control environment, you should try to understand the attitudes, awareness, and actions of those charged with governance concerning the entity's internal control and its importance in achieving reliable financial reporting. In understanding the control environment, you should concentrate on the implementation of controls because controls may be established but not acted upon. The following paragraphs describe some factors you should consider when evaluating your client's control environment.

.26 ***Integrity and Ethical Values***. The effectiveness of internal control cannot rise above the integrity and ethical values of the owner-manager. Integrity and ethical values are essential elements of the control environment because they affect the design, administration, and monitoring of other internal control components.

.27 Management may *tell you* a great deal about their integrity and ethical values. They may even commit their *words* to a *written document*. Responses to inquiries and written policies are good, but as an auditor you should focus on management's *actions* and how these actions affect the entity on a day-to-day basis.

.28 For management's integrity and ethical values to have a positive effect on the entity, the following must exist.

- The business owner and management must personally have high ethical and behavioral standards.
- These standards must be communicated to company personnel. In a small business, this communication is often informal.
- The standards must be reinforced.

.29 When observing and evaluating management's *actions* be alert for the following:

- *Segregation of personal from business funds and activities*. Many small business owners intermingle their personal and business activities, for example, the company may pay the owner's credit card bills even if they contain non-business expenditures. You should consider the owner's attitude and the care with which he or she separates the personal from the business activities. It's not unusual for a business to pay the owner's credit card bills, but the more important question is "does the owner reimburse the company?" Owners who treat company assets as if they were personal assets set a bad example for employees who may be encouraged to do the same.
- *Dealing with signs of problems*. Consider how management deals with signs that problems exist, particularly when the cost of identifying and solving the problem could be high. For example, suppose

your client became aware of a possible environmental contamination on their premises. How would they react? Would they try to hide it, deny its existence, or act evasively if asked about it, or would they actively seek out your advice or the advice of their attorney?

- *Removal or reduction of incentives and temptations*. Individuals may engage in dishonest, illegal, or unethical acts simply because the owner-manager gives them strong incentives or temptations to do so. Removing or reducing these incentives and temptations can go a long way toward diminishing undesirable behavior.

  The emphasis on results, particularly in the short term, fosters an environment in which the price of failure becomes very high. *Incentives* for engaging in fraudulent or questionable financial reporting practices include—

  — Pressure to meet unrealistic performance targets, particularly for short-term results.

  — High performance-dependent rewards.

  — Upper and lower cutoffs on bonus plans.

  Temptations for employees to engage in improper practices include—

  — Nonexistent or ineffective controls, such as poor segregation of duties in sensitive areas, that offer temptations to steal or conceal questionable financial reporting practices.

  — Owner-managers who are unaware of actions taken by employees.

  — Penalties for improper behavior that are insignificant or unpublicized and thus lose their value as deterrents.

- *Management intervention*. There are certain situations where it is appropriate for management to intervene and overrule prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the financial reporting information system. You should consider whether management has provided guidance on the situations and frequency with which intervention of established controls is appropriate. Management intervention should be documented and explained.

.30 ***Commitment to Competence***. Competence should reflect the knowledge and skills necessary to accomplish tasks that define an individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

.31 *Mrs. Jones has always kept the books for Jones Grocery. She is "self-taught," with no formal training in accounting or bookkeeping. There are no plans to replace Mrs. Jones with someone more "qualified." As the auditor of Jones Grocery you recognized the risk of having an untrained bookkeeper and design your audit approach to address such concerns by—*

- *"Training" Mr. and Mrs. Jones to call you whenever they have a transaction out of the ordinary.*
- *Strongly encouraging Mrs. Jones to take training classes on her accounting software package. (She has.)*
- *Explaining to Mrs. Jones the importance of key accounting records such as the accounts payable subledger and inventory reports.*
- *Teaching Mrs. Jones important basic control functions such as bank reconciliations.*

.32 ***Management's Philosophy and Operating Style***. Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include—

- The owner-manager's approach to taking and monitoring business risks.
- Attitudes and actions toward financial reporting and tax matters.
- Attitudes toward information processing and accounting functions and personnel.

.33 Management's philosophy and operating style have a significant influence on the control environment, particularly in a small business where the owner-manager dominates the organization, regardless of the consideration given to the other control environment factors. For example, you may be concerned about your client's unduly aggressive attitude toward financial reporting. Not only might this cause you to assess control risk as high for some or all assertions, but it may heighten concerns about irregularities affecting certain assertions.

.34 However, a dominant owner-manager does not necessarily cause you to assess control risk as high.

.35 *Mr. Jones dominates the management of Jones Grocery. He demonstrates a positive attitude toward the control environment and a moderate to conservative attitude toward accepting business risk such as expansion. He is more concerned about taxes than financial reporting. Mr. Jones uses information generated by the financial reporting information system to monitor the financial results of the company and compare it to prior periods. His review of the accounting reports encourages Mrs. Jones and others who help with the accounting to work with greater care. Mr. Jones also performs many control activities himself, such as the review and supervision of the physical inventory counts. Although Mr. Jones is concerned about his income tax liability, you might not view the possible bias to misstate income as a significant risk because of the otherwise positive control environment.*

.36 ***Organizational Structure***. Your client's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and reviewed.

.37 Significant aspects of establishing an organizational structure include considering key areas of authority and responsibility and appropriate lines of reporting. Small business entities usually have fairly simple organizational structures. A highly structured organization with formal reporting lines and responsibilities may be appropriate for large entities, but for a small business, this type of structure may impede the necessary flow of information.

.38 ***Assignment of Authority and Responsibility***. The assignment of authority and responsibility includes the following:

- The establishment of reporting relationships and authorization procedures
- The degree to which individuals and groups are encouraged to use initiative in addressing issues and solving problems
- The establishment of limits of authority
- Policies describing appropriate business practices
- Resources provided for carrying out duties

.39 Alignment of authority and accountability often is designed to encourage individual initiatives, within limits. Delegation of authority means surrendering central control of certain business decisions to lower echelons, to the people who are closest to everyday business transactions.

.40 A critical challenge is to delegate only to the extent required to achieve objectives. This requires ensuring that risk acceptance is based on sound practices for identifying and minimizing risk, including sizing risks and weighing potential losses versus gains in arriving at good business decisions.

.41 Another challenge is ensuring that all personnel understand the entity's objectives. It is essential that each individual knows how his or her actions interrelate and contribute to achievement of the objectives.

.42 *Mr. Jones had to decide how to delegate authority and responsibility when he expanded Jones Grocery from the one, original store to its present eight-store chain spread out over Greater Anytown and the surrounding suburbs. One area that proved problematic was setting prices. Mr. Jones assumed that he would be able to set the prices at all the stores, just like he did for his original store. He felt this was a good procedure because it allowed him some control over profit margins. Problems arose because the competitive pressures were different in different areas of the city. A competitor in the North Suburb ran specials or lowered prices on certain items, while a competitor in the Western Suburb ran specials on different items. It became too difficult for Mr. Jones to keep up with the constantly changing price battles at eight different stores. He eventually delegated this responsibility to the individual store managers. He set a limit on how much a store manager could discount prices without his prior approval, but other than that, the store managers had the freedom to set prices to respond to the changing competitive environment.*

.43 *The responsibility for accounting information was also affected by Jones Grocery's expansion. Mr. Jones' original thought was that each store would be run as a separate business, with separate financial reporting information systems that would be "consolidated" together at the main store. Problems soon developed in several areas, most notably accounts payable. The store managers were responsible for entering vendor invoices into the computer system. But it seemed that no matter how much Mr. Jones threatened, cajoled, and begged his store managers to enter the invoices on a timely basis, they just couldn't do it consistently. The procedure had to be changed. Now, the store managers only have the responsibility to check incoming goods for quantity and condition. Vendor invoices are sent directly to Mrs. Jones at the main store, and she is responsible for maintaining the accounts payable for all the stores.*

.44 The control environment is greatly influenced by the extent to which individuals recognize that they will be held accountable. This holds true all the way to the owner-manager, who has the ultimate responsibility for all activities within the organization, including internal control.

.45 ***Human Resource Policies and Practices***. Human resource policies and practices affect an entity's ability to employ sufficient competent personnel to accomplish its goals and objectives. Human resource policies and practices include an entity's policies and procedures for hiring, orienting, training, evaluating, counseling, promoting, compensating, and taking remedial action. In many small businesses, the policies may not be formalized but they should nevertheless exist and be communicated. The owner-manager can orally make explicit his or her expectations about the type of person to be hired to fill a particular job, and may even be active in the hiring process. Formal documentation is not always necessary for a policy to be in place and operating effectively.

.46 *When Mr. and Mrs. Jones added a second store, the hiring of a store manager was easy—they hired their daughter. Adding a third store proved to be more problematic, since the other Jones children had no interest in the family business. Mr. and Mrs. Jones talked at length about the type of person they would hire as a store manager. They finally decided it was more important to hire someone they could trust, someone they felt comfortable with on a personal level rather than someone with an extensive background in the grocery business. They felt they could teach someone the grocery business but not how to be trustworthy. That hiring policy worked, and they've been following it ever since.*

.47 Standards for hiring the most qualified individuals, with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity's commitment to competent and trustworthy people. Hiring practices that include formal, in-depth employment interviews and informative and insightful presentations on the company's history, culture, and operating style send a message that the company is committed to its people.

.48 Personnel policies that communicate prospective roles and responsibilities and that provide training opportunities indicate expected levels of performance and behavior. Rotation of personnel and promotions driven by periodic performance appraisals demonstrate the entity's commitment to advancement of qualified personnel to higher levels of responsibility. Competitive compensation programs that include bonus incentives serve to motivate and reinforce outstanding performance. Disciplinary actions send a message that violations of expected behavior will not be tolerated.

Other Control Components With a Pervasive Effect on the Organization

.49 Elements of other control components may have a pervasive effect on the organization. These are discussed in the following paragraphs.

.50 ***Risk Assessment***. An entity should identify, analyze, and manage risks relevant to the preparation of reliable financial statements. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

.51 Risks relevant to financial reporting include events and circumstances that may adversely affect the company's ability to initiate, authorize, record, process, and report financial data. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations.

.52 Risks can arise or change due to circumstances such as the following:

- *Changes in the operating environment*. Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel*. New personnel may have a different focus on or understanding of internal control. When people change jobs or leave the company, management should consider the control activities they performed and who will perform them going forward. Steps should be taken to ensure new personnel understand their tasks.
- *New or revamped information systems*. Significant and rapid changes in information systems can change the risk relating to internal control. When these systems are changed, management should assess how the changes will impact control activities. Are the existing activities appropriate or even possible with the new systems? Personnel should be adequately trained when information systems are changed or replaced.
- *Rapid growth*. Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls. Management should consider whether accounting and information systems are adequate to handle increases in volume.
- *New technology*. Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New business models, products, or activities*. Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *New accounting pronouncements*. Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

.53 Your procedures to assess whether a risk assessment process is placed in operation are generally of an inquiry nature. For example, you may ask accounting personnel what accounts they believe are the most difficult to become satisfied with as they prepare the financial statements. You may also consider asking the same questions of personnel outside the accounting department.

.54 ***Control Activities***. Control activities are policies and procedures that help ensure necessary actions are taken to address risks to achieve the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.

.55 At the entity-wide level, control activities may be categorized as policies and procedures that pertain to the following.

- *Performance reviews*. These control activities include reviews of actual performance versus budgets, forecasts, and prior-period performance. They may also involve relating different sets of data (for example, operating or financial) to one another, together with analyses of the relationships, investigating unusual relationships and taking corrective action. Performance reviews may also include a review of functional or activity performance.
- *Information processing*. A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end-user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail. These controls are discussed in more detail in AAM section 4200.81–.85.
- *Physical controls*. These activities encompass the physical security of assets, including adequate safeguards over access to assets and records such as secured facilities and authorization for access to computer programs and data files and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.
- *Segregation of duties*. Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Segregation of duties is often a problem for small business entities. See AAM section 4200.123–.131 for further discussion and guidance.

.56 You should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities. An audit does not require an understanding of all the control activities related to each class of transactions, account balance, and disclosure in the financial statements or to every relevant assertion. Ordinarily, control activities that may be relevant to an audit include those relating to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records. You should obtain an understanding of the process of reconciling detail to the general ledger for significant accounts.

.57 In obtaining an understanding of control activities, your primary consideration is whether, and how, a specific control activity, individually or in combination with others, prevents, or detects and corrects, material misstatements in classes of transactions, account balances, or disclosures. Control activities relevant to the audit are those for which the auditor considers it necessary to obtain an understanding in order to assess risks of material misstatement at the assertion level and to design and perform further audit procedures responsive to the assessed risks. Your emphasis is on identifying and obtaining an understanding of control activities that address the areas where you consider that material misstatements are more likely to occur. When multiple control activities achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to such objective.

.58 You should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

.59 Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer-produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

.60 General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. While ineffective general controls do not, by themselves, cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if there are weaknesses in the general controls over access security, and applications are relying on these general controls to prevent unauthorized transactions from being processed, such a general control weakness may have a more severe effect on the effective design and operation of the application control. General controls should be assessed in relation to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, weaknesses in the general controls over "systems development" may not be relevant to the financial statements being audited.

.61 The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

.62 The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls depend. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process.

.63 ***Information and Communication Systems***. An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and automated), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems make extensive use of information technology. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Authorization includes the process of approving transaction by the appropriate level management. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by automated or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in measuring and reviewing the entity's financial performance and in other functions.

.64 The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial statements. Thus, it is important that management receives the information they need to carry out their responsibilities and that the information is provided at the right level of detail. Accordingly, an information system encompasses procedures and records that—

- Identify and record all valid transactions.
- Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
- Measure the value of transactions in a manner that permits recording of their proper monetary value in the financial statements.
- Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- Present properly the transactions and related disclosures in the financial statements.

.65 The financial reporting information system is an integral part of an entity's information and communication system. Your consideration of the system should be made at the individual account and classes of transaction level. See AAM section 4200.106–.122 for additional guidance.

.66 Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

.67 The auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting, to understand—

- The classes of transactions in the entity's operations that are significant to the financial statements.
- The procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements.
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting transactions.
- How the information system captures other events and conditions that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.68 When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

.69 The auditor also should obtain an understanding of how the incorrect processing of transactions is resolved. For example, such understanding might include whether there is an automated suspense file, how it isused by the entity to ensure that suspense items are cleared out on a timely basis, and how system overrides or bypasses to controls are processed and accounted for.

.70 In obtaining an understanding of the financial reporting process, the auditor should understand the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include—

- *The procedures used to enter transaction totals into the general ledger (or equivalent record)*. In some information systems, IT may be used to automatically transfer such information from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to automatically transfer information there may be little or no visible evidence of such intervention in the information systems.
- *The procedures used to initiate, authorize, record, and process journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as sales, purchases, and cash disbursements, or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more difficult to identify through the use of computer-assisted techniques.
- *The procedures used to initiate and record recurring and nonrecurring adjustments to the financial statements.* These are procedures relating to adjustments and reclassifications that are not reflected in formal journal entries.
- *The procedures used to combine and consolidate general ledger data*. This includes procedures to combine detailed general ledger accounts, prepare the trial balance, and prepare consolidated financial data (for example, transferring general ledger data and adjusting journals into a consolidation system or spreadsheet; performing consolidation routines; and reconciling and reviewing consolidated financial data, including footnote data).
- *The procedures used to prepare financial statements and disclosures*. These are procedures designed to ensure that information required to be presented and disclosed is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.

.71 *Monitoring*. Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions.

.72 Examples of ongoing monitoring activities include the following:

- Management reviews of data produced by the entity's information system. Managers are in touch with operations and may question reports that differ significantly from their knowledge of operations. However, management should have a basis for believing the data are accurate. If errors exist in the information, management may make incorrect conclusions from its monitoring activities.
- Communications from external parties corroborate internally generated information or indicate problems. Customers implicitly corroborate billing data by paying their invoices. Conversely, customer complaints about billings could indicate system deficiencies in the processing of sales transactions. Similarly, bankers, regulators or other outside parties may communicate with the company on matters of accounting significance.
- External auditors regularly provide recommendations on the way internal control can be strengthened. Auditors may identify potential weaknesses and make recommendations to management for corrective action.
- Employees may be required to "sign off" to evidence the performance of critical control functions. The sign-off allows management to monitor the performance of these control functions.

Application to Medium and Large Businesses

.73 The control environments of medium to large businesses may differ from those of small business entities in the following ways:

- The presence of a Board of Directors or audit committee
- The presence of an internal audit function
- More formalized policies and procedures

Board of Directors or Audit Committee

.74 The control consciousness of a medium or large business is influenced significantly by the entity's board of directors and audit committee. In general, the board of directors should have an appropriate degree of management, technical, and other expertise. It should also have the necessary stature and mind-set so that it can adequately perform the necessary governance, guidance, and oversight responsibilities.

.75 Factors that influence the effectiveness of those charged with governance include—

- Its independence from management.
- The experience and stature of its members.
- The extent of its involvement and scrutiny of activities.
- The appropriateness of its actions.
- The degree to which difficult questions are raised and pursued with management.
- Its interaction with internal and external auditors.

.76 The board of directors must be prepared to question and scrutinize management's activities, present alternative views and have the courage to act in the face of obvious wrongdoing. Because of this it is necessary that the board contain at least a critical mass of outside directors. The number should suit the entity's circumstances, but more than one outside director normally would be needed for a board to have the requisite balance.

Internal Audit Function

.77 The internal audit function is established within an entity to monitor and evaluate the adequacy and effectiveness of internal control. For entities with an internal audit function, you ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'—

- Organizational status within the entity.
- Application of professional standards.
- Audit plan, including the nature, timing, and extent of audit work.
- Access to records and any limitations on the scope of their activities.

.78 After obtaining an understanding of the internal audit function you may either—

- Conclude that the internal auditors' activities are not relevant to the financial statement audit and give no further consideration to the internal audit function,
- Identify relevant internal auditor activities, but conclude that it would not be efficient to consider further the work of the internal auditors, or
- Decide that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of the audit. In this case, you should assess the competence and objectivity of the internal audit function as outlined in AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *Professional Standards*, vol. 1).

.79 You may also request direct assistance from the internal auditors. If so, you should follow the guidance in AU section 322.27.

Formal Policies

.80 Medium and large businesses may communicate their policies in formal, written documents. For example, they may have a written code of conduct or human resource policies. The existence of formal policy documents is good, but as an auditor, your primary consideration is how the policies are implemented.

Computer Applications

.81 Small business entities are typically characterized by the use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.82 *Jones Grocery has a stand-alone, state-of-the-art PC at its main store. One other store has a computer—an Apple Macintosh Mr. and Mrs. Jones' daughter used at college. The PC at the main store is used to run the accounting software, which is an off-the-shelf product developed specifically for independent grocers. The payroll is processed by an outside payroll service.*

.83 In gaining an understanding of how computers are used in the business, you should consider the following:

- The acquisition of hardware and software
- Physical access
- Logical access
- User controls over outsider service bureau applications

Acquisition of Hardware and Software

.84 Companies should take steps to ensure they have compatible hardware and software. The use of compatible software reduces the risk of error, since there will be no need to transfer data from one format into another. Even small businesses should have a coherent plan for the purchase of computer hardware and software. If the business is growing, management should plan for the upgrade of the processor, randomaccess memory (RAM), or hard-disk storage.

.85 *Mr. and Mrs. Jones did not plan for the purchase of their computers. For several years, Mrs. Jones processed the accounting applications on an old PC with limited RAM and hard-disk storage. When the Jones' daughter opened the second store, she brought with her the Apple Macintosh she had in college. At first, she tried to transfer data from her store to the main store, but the software had problems converting from the Apple format, so the procedure was abandoned. At a trade show, Mr. Jones discovered a computer software program specifically designed for independent grocers. He was impressed with the program and decided that it fit his needs perfectly. However, his hardware was out of date, and so in order to run the software, he upgraded his hardware. The new software supposedly is able to handle Apple-formatted data, and the company has plans to transfer data from the second store electronically. There are no plans to install computers at the other stores.*

.86 *As the auditor of Jones Grocery, you should use this understanding of the company computer system to help plan the audit. For example, they plan to transfer data from the Apple to the PC. What sort of errors might occur in the transfer? What steps has the client taken to prevent or detect those errors? You also know that stores three through eight are on a manual system. What types of errors might occur in a manual system? What is the risk that those errors will occur?*

.87 Entities should also establish policies and procedures to mitigate the risk of computer viruses being introduced into their systems. Viruses can cause the loss of data and programs. A virus has the ability to attach itself to a program and infect other programs and systems. Although some viruses merely write messages across the screen, others can cause serious damage to disk files or shut down a network by replicating millions of times and filling all available memory or disk storage.

.88 Methods to prevent the introduction of viruses and to recover from a virus attack include the following:

- Obtain recognized software from reputable sources and only accept delivery of the software in the manufacturer's sealed package.
- Make multiple generations of backups. A virus that is not detected initially may be copied onto more recent backup copies, while the older versions may not be infected.
- Prohibit the use of unauthorized programs introduced by employees.
- Prohibit downloading of untested software from sources such as dial-up bulletin boards.
- Use virus protection software to screen for virus infections.

Physical Security

.89 Physical security—primarily backup and contingency planning—often is ignored by small businesses in a microcomputer environment. Poor backup procedures can result in the loss of important data that are very difficult, time-consuming and costly to recreate, if they can be recreated at all.

.90 Your clients should have established procedures for the periodic backup of data files and applications. Critical applications and files should be stored off-site with corresponding documentation in the event that on-site files become unavailable.

Logical Access

.91 Logical access to computer applications and data files may not be formally or rigorously controlled in a small business. This leaves the company exposed to the risk that files could be inappropriately manipulated or unauthorized transactions entered into the system. For example, without logical access controls a user may be able to enter any or all sections of a general ledger or other financial module and perform file maintenance such as changing the address of an accounts receivable customer or data used to calculate payroll.

.92 Management should identify confidential and sensitive data for which access should be restricted. Mechanisms such as password control or the use of menus should be used to limit the access to that data.

.93 In a microcomputer environment, password control may be installed over the operating system using a shell program to prevent the user from accessing menu options of a program. Even if such a restriction exists, a sophisticated user can often bypass the shell by using a utility. Therefore, the use of utility programs should be controlled or monitored carefully.

User Controls Over Computer Service Organization Applications

.94 Entities may use an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1).

.95 When using an outside computer service organization, most small businesses typically retain the responsibility for authorizing transactions and maintaining the related accountability. The computer service organization merely records user transactions and processes the related data. In these circumstances, the user (the small business) should maintain controls over the input and output to prevent or detect material misstatement. When the service organization initiates, executes, and does the accounting processing of the user organization's transactions, it may not be practicable for the user organization to implement effective controls for those transactions.

.96 *Jones Grocery uses an outside computer service to process payroll. Time cards are gathered for each store and reviewed by the store manager before being sent to the main store. Mrs. Jones reviews the time cards for the store managers and checks to make sure all personnel have submitted time cards for the pay period. All other payroll transactions such as pay rates, withholdings, etc. are sent directly to Mrs. Jones. She forwards all information to the payroll service, which prepares the checks and produces a payroll register. Mrs. Jones reviews the register and checks for any obvious misstatements, before she distributes the checks.*

Application to Medium or Large Businesses

.97 Medium and large businesses typically have more complicated computer processing systems than small businesses. They also tend to use the computer for a greater amount of processing. For example, a small business may prepare customer invoices manually by looking up prices on a master price list. A medium size business may maintain master price information on a computer file and use the computer to generate packing slips, sales invoices, and reports of unmatched documents.

.98 Medium and large businesses are also typically characterized by a separate management information services (MIS) department with formally defined job descriptions and responsibilities.

.99 Instead of using off-the-shelf, unmodified software, the medium or large business will modify standard software or develop their own applications. Their software may be more complicated than that used by the small business; for example, they may use a database management system or telecommunications software.

.100 Medium and large businesses often use a mainframe computer in conjunction with microcomputers or a local area microcomputer network. Information is frequently transferred between the mainframe and microcomputers that may be located on-site or at a remote location.

.101 Control activities in a computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up
- Computer general control activities

.102 ***User Controls***. User control activities are manual checks of the completeness and accuracy of computer output against source documents or other input. For example, an entity may have programmed procedures in a billing system that calculate sales invoice amounts from shipping data and master-price files. The entity may also have a procedure to manually check the completeness and accuracy of the invoices. In many systems, user controls relate only to the completeness of records and not to the accuracy of processing.

.103 ***Programmed Control Activities and Manual Follow-up Activities***. Programmed control activities are those that are built into the computer processing program; for example, the generation of an exception report. However, an exception report is useless unless the client follows up on the items listed. Thus, in addition to understanding the nature of the programmed control activities, you also need to understand the related manual follow-up procedures.

.104 ***Computer General Control Activities***. If computer general control activities operate effectively, there is greater assurance that programmed control activities are properly designed and function consistently throughout the period. You may plan to understand computer general control activities to provide evidence that—

- Programs are properly designed and tested in development.
- Changes to programs are properly made.
- Computer operations ensure the proper use of application programs and data files.
- Adequate access controls reduce the risk of unauthorized changes to the program and data files.

.105 The following table summarizes computer general control activities.

Area	*Control Objectives*	*Example Controls*
Program Development	• Controls ensure that new applications systems are suitably authorized, designed, and tested	• Users are involved in the design and approval of systems • Checkpoints where users review the completion of various phases of the application • Development of test data and testing of the program • User involvement in the review of tests of the program • Adequate procedures to transfer programs from development to production libraries

Area	*Control Objectives*	*Example Controls*
Program Changes	• Controls over changes to existing programs and systems ensure that modifications to application programs are suitably approved, designed, tested, and implemented	• Same as program development • User involvement • Adequate testing • Adequate transfer activities • Segregation of duties between programmers and production libraries
Computer Operations	• Controls ensure that application programs are used properly and that proper data files are used during processing	• Review of lists of regular and unscheduled batch jobs by operations management • Use of menu-driven job control instruction sets • Jobs executed only from the operator's terminal • Adequate procedures for managing and backing up data and program files
Access	• Controls should prevent or detect unauthorized changes to programs and to data files supporting the financial statements	• Programmers have limited access to production programs, live data files, and job control language • Operators have limited access to source code and individual elements of data files • Users have access only to defined programs and data files

Obtaining an Understanding of Significant Account Balances and Transaction Cycles

.106 You should obtain an understanding of the classes of transactions in your client's operations that are significant to the financial statements. For less significant classes of transactions or account balances, an understanding of controls that have a pervasive effect on the organization is usually sufficient.

.107 For significant transactions and account balances you should obtain an understanding of—

- The procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements.
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions.
- How the information system captures other events and conditions that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.108 ***Accounting Processing***. You should obtain an understanding of how your client processes accounting information—from the initiation of the transaction to its inclusion in the financial statements. This understanding should include how the computer is used to process data. Your understanding involves knowledge of the ways in which transactions are valued, classified, and summarized in data files, journals, or ledgers. For some transactions, there may be several significant processing activities and accounting records, including the use of computer programs. Other transactions may involve only limited processing activities performed manually.

.109 *At Jones Grocery, sales are initiated by customers and recorded in the cash register. At the end of the day the cash register totals are reconciled to the cash on hand, and a deposit is prepared for the day's receipts. On a weekly basis, the daily cash register tapes are batched for each store, forwarded to Mrs. Jones, and entered into the computer. The computer generates a sales register, a sales analysis report, and posts the sales totals to the general ledger. Also, the processing of inventory transactions (receipt of goods, sales, spoilage, etc.) involves several processing activities that are linked in the inventory module of the software package. On the other hand, recording depreciation expense is fairly simple. Fixed assets and the related depreciation are maintained on a computer spreadsheet, and each month, Mrs. Jones prepares a journal entry to record depreciation.*

.110 Understanding the accounting processing also involves understanding the information used for processing and when processing occurs. For example, when considering the completeness assertion, you normally should understand whether transactions entered into the computer system are processed immediately or in batches and how frequently batches are processed.

.111 The processing of accounting information may involve "end user computing." End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person.

.112 *Mrs. Jones developed and maintains the fixed asset spreadsheet that serves as the source document for her monthly depreciation expense journal entry.*

.113 In general, the product of end user computing may be used to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, the fixed-asset spreadsheet is separate from the Jones Grocery general ledger software package.
- Make significant accounting decisions. For example, a spreadsheet application may be used to generate information used to write down inventory.
- Accumulate footnote information. For example, a spreadsheet may be used to calculate the five-year debt maturity disclosure.

.114 Generally, end users have no training in the formal computer application development process. Accordingly, applications developed by end users are often inadequately tested, and the development process is often not documented. This situation can cause significant difficulties for an organization if the end user computing application is critical to making business or financial decisions.

.115 The access to end user computing applications may also be an audit concern. Many computer applications used in end user computing come with on-line systems that are capable of restricting users to specific applications, specific departments, or even specific fields. Often, however, these access restrictions facilities are not implemented.

.116 To address these concerns and to ensure the end user applications process data completely and accurately, you should generally look for control policies and procedures that—

- Require all significant end user applications to be adequately tested before use.
- Prescribe documentation standards for significant end user applications.
- Provide for adequate access controls to data.

- Provide a mechanism to prevent or detect the use of incorrect versions of data files.
- Provide for appropriate applications controls, for example, edit checks, range tests, or reasonableness checks.
- Support meaningful user reconciliations.

.117 ***Accounting Records, Supporting Information, and Specific Accounts***. In general you will want to identify the following for your client's significant accounts and transactions:

- Source documents
- The conversion of documents to computer media
- The nature of computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.118 Your client's accounting systems may create many documents, files, and reports that are useful for managing the organization, but you need to understand only those aspects that are relevant to the financial statements.

.119 *At Jones Grocery, the sales analysis report described in AAM section 4200.109 is used for management information and analysis. The documents and reports relevant to the financial statements are the daily cash register tapes and the computer-generated sales register.*

.120 ***Other Significant Events and Conditions***. You should understand how the entity's information system captures other events and conditions that are significant to the financial statements. This might involve, for example, nonrecurring or unusual transactions or adjustments and nonrecurring estimates.

.121 *A broken water line, which is an uninsured risk, spoiled a large amount of produce and dry goods in one of the Jones Grocery stores. Based on a list of the lost inventory provided by the store manager, Mrs. Jones recorded a large spoilage loss.*

.122 ***Financial Reporting Process***. When gaining an understanding of the financial reporting process, you may determine the extent of client procedures to prepare accounting estimates (when significant accounting estimates are called for) and information for significant disclosures. You also should understand the way in which general ledger information is summarized to determine how the amounts and disclosures are reported in the financial statements.

Segregation of Duties and Management Override

.123 Small businesses are typically characterized by—

- A dominant owner-manager.
- A lack of segregation of duties.

.124 If your client has these characteristics, you should be sure to address the risks they pose to the entity.

.125 In general, duties should be divided, or segregated, among different people to reduce the risk of error or inappropriate actions. For instance, responsibilities for authorizing transactions, recording them, and handling the related assets should be divided.

.126 Even small businesses with only a few employees can usually parcel out responsibilities to achieve the necessary checks and balances. If that is not possible—as may occasionally be the case—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. Thus, a dominant owner-manager may be a positive element in the design of internal controls.

.127 A dominant owner-manager may be a negative element in the design of internal control when he or she is able to override established policies and procedures.

.128 Management *override* should be distinguished from management *intervention*. Management *intervention* is discussed in AAM section 4200.29 and is described as the overrule of internal control for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the system.

.129 In contrast, management *override* is the overrule of internal control for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

.130 An owner-manager might override the control system for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

.131 When gaining an understanding of internal control, you generally assess the risk of management override.

Assessing Internal Control Strengths and Weaknesses

.132 When obtaining your understanding of internal control, you may consider the *collective* effect of strengths and weaknesses in various control environment factors. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by top management to overstate earnings.

.133 Internal control strengths may indicate account balances, transaction classes, or assertions where you can assess control risk at low or moderate.[1] Internal control weaknesses usually indicate areas where substantive procedures are required. However, in situations where electronic evidence (information transmitted, processed, maintained, or accessed by electronic means) is significant, testing of the related internal control generally will be necessary to obtain sufficient competent audit evidence.

.134 In rare circumstances, your understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause you to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity's records may cause you to conclude it is unlikely that sufficient competent audit evidence will be available to support an opinion on the financial statements.

.135 If you determine the entity is unauditable, you should consider withdrawing from the engagement.

[1] Control risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms such as *high*, *medium*, or *low* risk.

Practical Guidance

Readers should refer to Appendix M, "Illustrative Audit Documentation Case Study: Young Fashions, Inc.," of the AICPA Audit Guide, Assessing and Responding to Audit Risk in a Financial Statement Audit, for examples of how to document your understanding of internal control. Appendix M contains several sub-appendixes (Appendix M-1–M-6). Those that are particularly relevant to internal control include the following:

- Appendix M-2, "Young Fashions: Evaluation of Entity–Level Controls," provides example documentation of the auditors evaluation of entity-level controls, except for IT general controls. Appendix M-2 illustrates how to document your understanding of the controls relevant to the audit, including (1) an evaluation of whether the design of the control, individually or in combination, is capable of effectively preventing or detecting and correcting material misstatements and (2) a determination of whether the control exists and the entity is using it.
- Appendix M-2-1, "Young Fashions: Procedures Performed to Evaluate Entity-Level Controls," provides illustrative documentation for the risk assessment and other procedures an auditor performs to gather information about internal control and the source of that information.
- Appendix M-3, "Young Fashions: Understanding of Internal Control—IT General Controls," provides example documentation of the auditors evaluation of IT general controls.
- Appendix M-4, "Evaluation of Activity-Level Controls," provides example documentation of an evaluation of activity-level controls. This case study presents only one class of transactions, sales. In practice, the auditor would evaluate activity-level controls for each significant class of transactions.

AAM Section 5000

Designing and Performing Further Audit Procedures

> The material included in these sections on designing and performing further audit procedures is presented for illustrative purposes only. The nature, extent, and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the assessed risks of material misstatement.
>
> This manual is a nonauthoritative kit of practice aids. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate. Users should also note that this manual does not deal with specialized industry problems; reference should be made to applicable AICPA Audit and Accounting Guides.

AAM Section 5100
Designing Further Audit Procedures

Audit Procedures for Obtaining Audit Evidence

.01 In order to draw reasonable conclusions on which to base the audit opinion, auditors should obtain audit evidence by performing audit procedures to:

a. Obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels (audit procedures performed for this purpose are referred to as *risk assessment procedures*);

b. When necessary, or when you have determined to do so, test the operating effectiveness of controls in preventing or detecting material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *tests of controls*); and

c. Detect material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *substantive procedures* and include tests of details of classes of transactions, account balances, and disclosures, and substantive analytical procedures).

.02 You must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels. Risk assessment procedures by themselves do not provide sufficient appropriate audit evidence on which to base the audit opinion and must be supplemented by further audit procedures in the form of tests of controls, when relevant or necessary, and substantive procedures.

.03 Tests of controls are necessary in two circumstances. When your risk assessment includes an expectation of the operating effectiveness of controls, you should test those controls to support the risk assessment. In addition, when the substantive procedures alone do not provide sufficient appropriate audit evidence, you should perform tests of controls to obtain audit evidence about their operating effectiveness. See AAM section 5200 for additional guidance on performing tests of controls.

.04 As described in SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318), you should plan and should perform substantive procedures to be responsive to the related planned level of detection risk, which includes the results of tests of controls, if any. The auditor's risk assessment is judgmental, however, and may not be sufficiently precise to identify all risks of material misstatement. Further, there are inherent limitations in internal control, including the risk of management override, the possibility of human error, and the effect of systems changes. Therefore, regardless of the assessed risk of material misstatement, you should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure to obtain sufficient appropriate audit evidence. See AAM section 5300 for additional guidance on performing substantive procedures.

Linking the Assessed Risks to the Design of Further Audit Procedures

.05 As discussed in AAM section 3130, the auditor's risk assessment process culminates with the articulation of the account balances, classes of transactions, or disclosures where material misstatements are most likely to occur and—even more specifically—how the misstatements may occur and the assertions that are likely to be misstated. This assessment of the risks of misstatement, which relates identified financial reporting risks to what can go wrong at the assertion level, provides a basis for the design of further audit procedures.

.06 To reduce audit risk to an acceptably low level, you should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The overall responses and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor.

Overall Responses to Risks at the Financial Statement Level

.07 Your audit response to financial statement level risks should be responsive to the assessed risk. The same is true for responses to risk at the account/assertion level. It is critical that your audit procedures are linked clearly and responsive to your assessment. This linkage between risk assessment and audit procedures should be part of your audit strategy and audit plan, and it should be documented. The following paragraph describes some important characteristics of financial statement level risks. The purpose of these descriptions is to help you "bridge" between your assessment of financial statement level risks and your subsequent response.

.08 Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- *Financial statement level risks can affect many assertions*. By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.
- *Assessing financial statement-level risks requires significant judgment*. Ultimately, you should relate identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, you discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of your professional judgment to determine:
  — The accounts and relevant assertions that could be affected.
  — The likelihood that a financial statement misstatement will result from the increased risk.
  — The significance of any misstatement.
- *Risks at the Financial Statement Level May Not be Identifiable With Specific Assertions*. Control weaknesses at the financial statement level can render well-designed activity-level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult, and may not even be possible. As another example, your client may have excellent data input controls at the application level. But if poorly designed IT general controls allow many unauthorized personnel the opportunity to access and inappropriately change the data, the well-designed input controls have been rendered ineffective. Also, strengths in financial statement-level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and therefore the assessment of the risks of material misstatement) is subjective and may vary from client to client.

.09 Due to the unique characteristics of financial statement level risks, it may not be possible to correlate all of these risks to a finite set of assertions. For example, a weakness in control environment may affect all or mostly all of the accounts, classes of transactions, or disclosures and the relevant assertions. To respond appropriately to these types of financial statement level risks, you may need to reconsider your overall approach to the engagement. The following paragraph provides examples of overall responses to risks at the financial statement level that have a pervasive effect on the financial statements and cannot necessarily be mapped to individual assertions.

.10 Your overall responses to address the assessed risks of material misstatement at the financial statement level may include:

- Emphasizing to the audit team the need to maintain professional skepticism in gathering and evaluating audit evidence.
- Assigning more experienced staff or those with specialized skills or using specialists.
- Providing more supervision.
- Incorporating additional elements of unpredictability in the selection of further audit procedures to be performed and in selecting individual items for testing.
- Making general changes to the nature, timing, or extent of further audit procedures as an overall response, for example, performing substantive procedures at period end instead of at an interim date. One could also focus more time and attention on audit areas more closely associated with the risk.

.11 The assessment of the risks of material misstatement at the financial statement level is affected by your understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to perform some audit procedures at an interim date rather than at period end. If there are weaknesses in the control environment, you should consider an appropriate response. For example, you could perform audit procedures as of the period end rather than at an interim date, seek more extensive audit evidence from substantive procedures, modify the nature of audit procedures to obtain more persuasive audit evidence, or increase the number of locations to be included in the audit scope.

.12 Such considerations, therefore, have a significant bearing on your general approach, for example, an emphasis on substantive procedures (substantive approach), or an approach that uses tests of controls as well as substantive procedures (combined approach).

.13 Paragraphs .13 and .50 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), describe the overall responses you may take in response to your assessment of the risk of material misstatement due to fraud. When determining your overall audit response, you should consider your assessment of fraud risk concurrently with your assessment of the risk of material misstatement due to error. You can develop one overall response that is appropriate for both kinds of risks.

Audit Procedures Responsive to Risks of Material Misstatement at the Relevant Assertion Level

.14 Further audit procedures provide important audit evidence to support your audit opinion. These procedures consist of tests of controls and substantive tests.

.15 You should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditor's further audit procedures and the risk assessments.

.16 In designing further audit procedures, you should consider such matters as:

- The significance of the risk and the likelihood that a material misstatement will occur. In general, the more significant (in terms of likelihood and magnitude) the risk, the more reliable and relevant your audit evidence should be.
- The characteristics of the class of transactions, account balance, or disclosure involved, which will help determine the nature, timing, and extent of procedures available to the auditor. For example, the gross accounts receivable balance comprises transactions with third parties, which means the auditor can contact these external parties to confirm the transactions or individual account balances. On the other hand, the allowance for doubtful accounts is an estimate prepared internally, which does not lend itself to confirmation but to other substantive tests.
- The nature of the specific controls used by the entity, in particular, whether they are manual or automated.
- Whether the auditor expects to obtain audit evidence to determine if the entity's controls are effective in preventing or detecting material misstatements.

The nature of the audit procedures is of most importance in responding to the assessed risks.

.17 Your assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. In some cases, you may determine that performing only substantive procedures is appropriate for specific relevant assertions and risks. In those circumstances, you may exclude the effect of controls from the relevant risk assessment. This may be because your risk assessment procedures have not identified any effective controls relevant to the assertion or because testing the operating effectiveness of controls would be inefficient. However, you need to be satisfied that performing only substantive procedures for the relevant assertions would be effective in reducing detection risk to an acceptably low level. You often will determine that a combined audit approach using both tests of the operating effectiveness of controls and substantive procedures is an effective audit approach.

.18 Regardless of the audit approach selected, you should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. Because effective internal controls generally reduce, but do not eliminate, risk of material misstatement, tests of controls reduce, but do not eliminate, the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes such as examining the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to period end) due to the risk of management override of controls or the subjectivity of the account balance.

.19 In the case of very small entities, there may not be many control activities that could be identified by the auditor. For this reason, your further audit procedures are likely to be primarily substantive procedures. In such cases, in addition to the matters referred to in paragraph .12 above, the auditor should consider whether in the absence of controls it is possible to obtain sufficient appropriate audit evidence.

Nature of Further Audit Procedures

.20 The nature of further audit procedures refers to:

a. Their purpose, that is, tests of controls or substantive procedures (or dual-purpose tests) and whether they are designed to test for overstatement, understatement, or both.

b. Their type, that is:

- Inspection
- Observation

- Inquiry
- Confirmation
- Recalculation
- Reperformance
- Analytical procedures (including scanning)

Table 1 provides additional guidance on each of these procedures.

Table 1

Types of Audit Procedures

Type of Procedure	*Definition*	*Additional Guidance*
Inspection of Documents	Inspection of documents involves examining records or documents, whether internal or external, in paper form, electronic form, or other media.	• This procedure provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal documents, on the effectiveness of the controls over their production. • Some documents represent direct audit evidence of the existence of an asset but not necessarily about ownership or value. • Inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting principles, such as revenue recognition. • Some forms of documents are less persuasive than others. For example, faxes and copies may be less reliable than original documents.
Inspection of Tangible Assets	Inspection of tangible assets consists of physical examination of the assets.	• This procedure may provide audit evidence relating to existence, but not necessarily about the entity's rights and obligations or the valuation of the assets. • Inspection of individual inventory items ordinarily accompanies the observation of inventory counting.
Observation	Observation consists of looking at a process or procedure being performed by others.	• This procedure provides audit evidence about the performance of a process or procedure but is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed.

(continued)

Type of Procedure	Definition	Additional Guidance
Confirmation	Confirmation is the process of obtaining a representation of information or of an existing condition directly from a knowledgeable third party.	This procedure: • Frequently is used in relation to account balances and their components but need not be restricted to these items. • Can be designed to ask if any modifications have been made to an agreement, and if so, what the relevant details are. • Also is used to obtain audit evidence about the absence of certain conditions, for example, the absence of an undisclosed agreement that may influence revenue recognition. See AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), for further guidance on confirmations.
Recalculation	Recalculation consists of checking the mathematical accuracy of documents or records.	• This procedure can be performed through the use of information technology, for example, by applying a data extraction application or other computer assisted audit techniques (CAATs).
Reperformance	Reperformance is the auditors independent execution of procedures or controls that were originally performed as part of the entity's internal control.	• This procedure may be performed either manually or through the use of CAATs, for example, reperforming the aging of accounts receivable.

Inquiry

.21 Inquiry consists of seeking information of knowledgeable individuals. These individuals may be involved in the financial reporting process or outside of that process; they may be internal or external to the company. Inquiry is used extensively throughout the audit and often is complementary to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Asking questions of knowledgeable individuals is only part of the inquiry process. Evaluating the responses to your inquiries is an equally integral part of the process.

.22 Inquiry normally involves:

- Considering the knowledge, objectivity, experience, responsibility, and qualifications of the individual to be questioned.
- Asking clear, concise, and relevant questions.
- Using open or closed questions appropriately.
- Listening actively and effectively.
- Considering the reactions and responses and asking follow-up questions.

See Appendix K, "Suggestions for Conducting Inquiries," of the AICPA audit guide, *Assessing and Responding to Audit Risk in a Financial Statement Audit*, for further guidance on performing inquiries.

.23 Responses to inquiries may provide the auditor with information he/she did not previously possess or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information the auditor has obtained. In those situations, the auditor should resolve any significant inconsistencies in the information obtained. In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures.

.24 The auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Inquiry alone ordinarily does not provide sufficient appropriate audit evidence to detect a material misstatement. Moreover, inquiry alone is not sufficient to test the operating effectiveness of controls.

.25 In some instances, the auditor may need to obtain evidence about management's intended actions, for example when obtaining evidence to support management's classification of investments as either trading, available for sale, or hold to maturity. To corroborate management's responses to questions regarding their intended future action, the following may provide relevant information.

- Management's past history of carrying out its stated intentions.
- Their stated reasons for choosing a particular course of action.
- Their ability to pursue a specific course of action.

.26 In some cases, the auditor should obtain replies to inquiries in the form of written representations from management. For example, when obtaining oral responses to inquiries, the nature of the response may be so significant that it warrants obtaining written representation from the source. See AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), as amended, for further guidance on written representations.

Substantive Analytical Procedures

.27 Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures.

b. As risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control.

c. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions.

d. As an overall review of the financial information in the final review stage of the audit.

.28 Analytical procedures can be effective:

- For certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts).
- When the relationships between amounts are very predictable.
- When the data used to develop expectations based on the relationship are reliable.
- When relatively precise expectations can be developed.

.29 Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they should be used whenever practical.

.30 AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1) as amended, describes analytical procedures as follows:

> Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:
>
> *a.* Financial information for comparable prior period(s) giving consideration to known changes.
>
> *b.* Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data.
>
> *c.* Relationships among elements of financial information within the period.
>
> *d.* Information regarding the industry in which the client operates—for example, cost of funds information.
>
> *e.* Relationships of the financial information with relevant nonfinancial information.

.31 Whenever analytical procedures are applied as substantive tests, the auditor must apply the following procedures:

a. Consider whether the relationship is plausible and predictable.

b. Consider whether the data used for the comparison is reliable.

c. Consider whether the account balance tested is consistent with the auditor's expectations. If it is not consistent, obtain the client's explanation for the variance and get evidence to corroborate the client's explanation.

.32 AU section 329 also requires that analytical procedures be performed at the planning and final review stages of the audit. See AU section 329 and AAM section 3155 for further guidance on analytical procedures.

The Selection of Audit Procedures

.33 Your risk assessments will have a bearing on your selection of audit procedures. The higher your assessment of risk, the more reliable and relevant the audit evidence you seek from substantive procedures. This determination of the requisite reliability and relevance of audit evidence may affect both the types of audit procedures to be performed and their combination. For example, you may confirm the completeness of the terms of a contract with a third party, in addition to inspecting the document and obtaining management's representation. This combination of several procedures would result in more reliable and relevant audit evidence than you would have obtained by performing only one procedure.

.34 In determining the audit procedures to be performed, you should consider the underlying reasons for your assessment. These underlying reasons relate to both the inherent and control risks related to the assertion. For example, if you assessed risk of material misstatement to be low that a material misstatement might occur because of low inherent risk, you may determine that substantive analytical procedures alone may provide sufficient appropriate audit evidence. On the other hand, if you expect that there is a lower risk of material misstatement because the client has effective controls and you intend to design substantive procedures based on relying on the effective operation of those controls, you should perform tests of controls or dual-purpose tests in addition to analytical procedures or other substantive tests.

.35 You should obtain audit evidence about the accuracy and completeness of information produced by the entity's information system when that information is used in performing audit procedures. For example, if the auditor uses nonfinancial information or budget data produced by the entity's information system in performing audit procedures, such as substantive analytical procedures or tests of controls, the auditor should obtain audit evidence about the accuracy and completeness of such information.

Timing of Further Audit Procedures

.36 Timing refers to when audit procedures are performed or the period or date to which the audit evidence applies. The auditor may perform tests of controls or substantive procedures:

- At an interim date
- At period end
- After period end, in those instances where the procedure cannot be performed prior to or at year end (for example, agreeing the financial statements to the accounting records)

.37 The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to, or at the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters. If the auditor performs tests of the operating effectiveness of controls or substantive procedures before period end, the auditor should consider the additional evidence that is necessary for the remaining period.

.38 Considering when to perform audit procedures, the auditor should also consider such matters as:

- Your assessed risk of misstatement. In general, the higher the risk, the more likely it is that you will perform procedures nearer to or at the period end.
- The control environment. In general, the more effective the control environment, the more likely it is that you will be able to perform tests as of an interim date.
- When the information necessary to perform your procedures is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, you may examine contracts available on the date of the period end).
- The period or date to which the audit evidence relates.

Extent of Further Audit Procedures

.39 Extent refers to the quantity of a specific audit procedure to be performed, for example, a sample size or the number of observations of a control activity. The extent of an audit procedure is determined by the judgment of the auditor after considering the:

- Tolerable misstatement
- Assessed risk of material misstatement
- Degree of assurance the auditor plans to obtain

.40 In particular, the auditor may increase the extent of audit procedures as the risk of material misstatement increases. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk and reliable; therefore, the nature of the audit procedure is the most important consideration.

.41 The AICPA audit guide *Audit Sampling*, provides additional guidance on sampling for substantive testing.

Documentation

.42 The auditor should document the overall responses to address the assessed risks of misstatement at the financial statement level and the linkage of those procedures with the assessed risks at the relevant assertion level. The manner in which these matters are documented is based on the auditor's professional judgment. SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5201.*]

AAM Section 5200
Performing Tests of Controls

.01 The auditor should perform tests of controls when the auditor's risk assessment[1] includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

.02 When, in accordance with paragraph 117 of SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), the auditor has determined that it is not possible or practicable to reduce the detection risks at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures, he or she should perform tests of controls to obtain audit evidence about their operating effectiveness. For example, as discussed in paragraphs 119–120 of SAS No. 109, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the relevant assertion level when an entity conducts its business using information technology (IT) and no documentation of transactions is produced or maintained, other than through the IT system.

.03 Tests of the operating effectiveness of controls are performed only on those controls that the auditor has determined are suitably designed to prevent or detect a material misstatement in a relevant assertion. Paragraphs 106–108 of SAS No. 109 discuss the identification of controls at the relevant assertion level likely to prevent or detect a material misstatement in a class of transactions, account balance, or disclosure.

.04 Testing the operating effectiveness of controls is different from obtaining audit evidence that controls have been implemented. When obtaining audit evidence of implementation by performing risk assessment procedures, the auditor should determine that the relevant controls exist and that the entity is using them. When performing tests of controls, the auditor should obtain audit evidence that controls operate effectively. This includes obtaining audit evidence about:

- How controls were applied at relevant times during the period under audit.
- The consistency with which they were applied.
- By whom or by what means they were applied.

If substantially different controls were used at different times during the period under audit, the auditor should consider each separately. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

General Considerations When Testing Controls

Sources of Audit Evidence About Internal Control Effectiveness

.05 The audit evidence used to provide support for your conclusion about the operating effectiveness of controls during the audit period may come from a variety of sources, including:

- Tests of controls performed during the current period.
- Risk assessment procedures performed during the current period.

---

[1] The auditor's strategy reflects the level of assurance the auditor plans to obtain regarding controls.

- Evidence provided in a Type 2 AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1), report.
- Evidence obtained from the performance of procedures in previous audits.
- The information gathered and conclusions reached as part of your quality control procedures for client acceptance and continuance. For example, client acceptance procedures may include inquiries of attorneys, bankers, or others in the business community about client management that provide insight into their:
  — Competence
  — Integrity
  — Operating philosophy
  — Ethical values

Risk Assessment Procedures vs. Tests of Controls

.06 Risk assessment procedures allow you to evaluate the design effectiveness of internal controls for the purpose of assessing risks of material misstatement. Tests of controls build on your evaluation of design effectiveness and allow you to assess the operating effectiveness of controls during the operating period. The results of your tests of controls are used to design substantive procedures.

.07 Although some risk assessment procedures that the auditor performs to evaluate the design of controls and to determine that they have been implemented may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, a walkthrough or the observation of the performance of a control may provide evidence about the operating effectiveness of controls. In such circumstances, the auditor should consider whether the audit evidence provided by those audit procedures is sufficient.

Evidence of Operating Effectiveness of Controls at a Service Organization

.08 A Type 2 service auditor's report may provide evidence about the operating effectiveness of controls at a service organization. However, controls over the information provided to the service organization may still need to be assessed.

Evaluating the Effectiveness of Complementary Controls

.09 When designing tests of controls, typically you will focus first on testing control activities, since the control activities component of internal control is the one most directly related to the assertion. For example, physically counting goods that have been received and comparing the quantity and description to the vendor's packing slip is directly related to both the existence and valuation of inventory.

.10 However, in addition to testing the controls that relate directly to the assertion, you should consider the need to obtain audit evidence supporting the effective operation of the complementary controls upon which the effectiveness of the direct control depends.

.11 When considering the need to test complementary controls, you should consider the following.

a. *The significance of the complementary control to the effective functioning of the direct control.* As the effectiveness of the direct control becomes more dependent on the complementary control, your need to test the indirect control increases.

b. *The relative significance of the audit evidence of the complementary control to the auditor's conclusion on the effectiveness of the direct control.* Your conclusion about the operating effectiveness of a control activity is supported by a combination of evidence about (i) the operating effectiveness of the direct control activity itself and (ii) the operating effectiveness of other, complementary controls upon which the effectiveness of the direct control depends. In some instances, you may be able to support a conclusion based primarily on tests of the direct control, with little evidence about the operating effectiveness of the related complementary controls. In other instances (for example, IT application controls), your conclusion may be based primarily on tests of the complementary controls and little on tests of the direct control. In those situations where you rely significantly on the operating effectiveness of the complementary control, you should obtain more sufficient and adequate audit evidence to support the conclusion on the operating effectiveness of the indirect control, for example, the monitoring of the performance of the reconciliation.

c. *The degree of reliability required of the audit evidence obtained about internal control operating effectiveness.* Testing the complementary control increases the reliability of the audit evidence obtained about the operating effectiveness of the direct control. For example, you may test four month-end reconciliations and draw a conclusion about the effectiveness of those reconciliations for an entire 12-month period. If you have tested the operating effectiveness of the complementary controls related to the reconciliation, the conclusion about the effectiveness of the reconciliation during the period you did not test will be more reliable than if you did not test the complementary controls.

d. *Evidence of operating effectiveness that may have been obtained as part of obtaining an understanding of the design and implementation of the complementary controls.* When performing risk assessment procedures to obtain an understanding of internal control, you may obtain some information about the operating effectiveness of the complementary controls that are indirectly related to an assertion. For example, risk assessment procedures may provide you with some evidence about the operating effectiveness of portions of the control environment. This information about operating effectiveness may be limited, but nevertheless, it may be sufficient for the purpose of drawing a conclusion about the operating effectiveness of the direct control.

.12 When testing complementary controls, you may choose not to test the operating effectiveness of the entire component to which the complementary control pertains, but may limit the tests to those elements of the component that have an immediate bearing on the effectiveness of the direct control. For example, when testing controls over purchasing to place moderate reliance on them, you may consider the need to test the control environment or IT general controls relating to the entire entity beyond the required design and implementation assessment procedures you already have performed. If practical, you may limit your tests to those aspects of the control environment or IT general controls that have a direct bearing on the financial statement assertions related to purchasing. To place high reliance on the controls, you may often need to gather additional evidence concerning the IT general controls and overall control environment to support high reliance on the purchasing controls.

The Relationship Between Tests of Controls and Substantive Tests

.13 There is an inverse relationship between the audit evidence to be obtained from substantive tests and that obtained from tests of controls. As the sufficiency and adequacy of the audit evidence obtained from tests of controls increases, the sufficiency and adequacy of the audit evidence required from substantive tests should decrease. For example, in circumstances when you adopt a strategy at the assertion level that consists primarily of tests of controls, you should perform tests of controls to obtain a high level of assurance about their operating effectiveness.

.14 On the other hand, the more audit evidence from substantive tests, the less audit evidence from tests of controls would be necessary. In many instances, the nature and extent of substantive tests alone may provide sufficient, adequate evidence at the assertion level, which would make the testing of control effectiveness (beyond assessing the design and implementation of the related controls) unnecessary.

A Financial Statement Audit vs. an Examination of Internal Control

.15 Testing the operating effectiveness of internal control to support an opinion on the financial statements is different from testing controls to support an opinion on the effectiveness of the internal control system.

.16 In an attestation engagement to examine the effectiveness of internal control, the audit evidence obtained from the tests of internal control is the only evidence you have to support your opinion. In contrast, when performing an audit of the financial statements, you ordinarily perform both tests of controls and substantive tests. The objective of the tests of controls in a financial statement audit is to assess the operating effectiveness of controls and incorporate this assessment into the design of the nature, timing, and extent of substantive procedures. Thus, when testing controls in a financial statement audit, you have flexibility in determining not only whether to test controls, and if so which controls to test, but also the level of effectiveness of those controls that is necessary to provide the desired level of support for an opinion on the financial statements.

Determining the Nature of the Tests of Controls

.17 The nature of the procedures you perform to test controls has a direct bearing on the relevance and reliability of your audit evidence. When responding to assessed risks of material misstatement, the nature of the audit procedures is of most importance. Performing more tests or conducting the tests closer to the period end will not compensate for a poorly designed test that lacks sufficient relevance or reliability in gathering audit evidence about the effectiveness of a control.

.18 The types of audit procedures available for obtaining audit evidence about the effectiveness of controls includes:

- Inquiries of appropriate entity personnel.
- Inspection of documents, reports, or electronic files indicating performance of the control.
- Observation of the application of the control.
- Reperformance of the application of the control by the auditor.

.19 The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about operating effectiveness. Documentation may provide evidence about the performance of some controls, and in these situations, you may inspect this documentation to obtain evidence about the operating effectiveness of the control.

.20 For other controls, complete documentation may not be available or relevant. For example, documentation of the operation may be sketchy for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed automatically by the client's IT system. In these circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation of the performance of the control or the use of computer assisted audit techniques (CAATs). Entities should be encouraged to improve weak documentation.

.21 Because of the limits of inquiry and observation, inquiry combined with inspection or reperformance ordinarily provide more reliable audit evidence than a combination of only inquiry and observation. For example, you may inquire about and observe the entity's procedures for opening the mail and processing cash receipts to test the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, you should supplement the observation with other observations or inquiries of entity personnel, and you may also inspect documentation about the operation of such controls at other times during the audit period.

Tests of IT Controls

.22 Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated control, combined with audit evidence about the operating effectiveness of IT general controls (and in particular, security and change controls) may provide you substantial audit evidence about the operating effectiveness of the control during the entire audit period. That is, once you have determined that an IT application control has been implemented (placed in operation), you may draw a conclusion about the operating effectiveness of the IT portion of the control activity, so long as you have determined that relevant IT general controls are operating effectively.

Tests of Spreadsheets

.23 The development and use of spreadsheets typically lack the controls that usually are present for formal, purchased software. Absent audit evidence indicating that appropriate general controls over spreadsheets have been implemented, you should continue to test spreadsheet controls even after their implementation.

Dual Purpose Tests

.24 Some audit procedures may simultaneously provide audit evidence that both:

- Supports the relevant assertion or detects material misstatement, and
- Supports a conclusion about the operating effectiveness of related controls.

Tests that achieve both of these objectives concurrently on the same transaction typically are referred to as dual-purpose tests. For example, you may examine an invoice to determine whether it has been approved and also to provide substantive audit evidence about the existence and amount of the transaction.

.25 When performing a dual purpose test, you should consider carefully whether the design and evaluation of such tests can accomplish both objectives. For example, the population of controls and the population of substantive procedures should be the same. If tests on components of a balance such as receivables are designed as dual purpose tests, only evidence of the controls operating over period-end balance items will be obtained.

.26 Furthermore, when performing such tests, you should consider how the outcome of the tests of controls may affect your determination about the extent of substantive procedures to be performed. For example, if controls are found to be ineffective, you should consider whether the sample size you designed for the dual purpose test will be adequate or whether the sample size for substantive procedures should be increased from that originally planned.

Determining the Timing of Tests of Controls

.27 The timing of your tests of controls affects the relevance and reliability of the resulting audit evidence. In general, the relevance and reliability of the audit evidence obtained diminishes as time passes between the testing of the controls and the end of the period under audit. For this reason, when tests of controls are performed during an interim period or carried forward from a previous audit, you should determine what additional audit evidence should be obtained to support a conclusion on the current operating effectiveness of those controls.

.28 The timing of your tests of controls depends on your objective.

a. When controls are tested as of a point in time, you have obtained audit evidence that the controls operated effectively only at that time.

b. If you test controls throughout a period, you obtain audit evidence of the effectiveness of the operation of the control during that period.

.29 Audit evidence pertaining only to a point in time may be sufficient for your purpose, for example, when testing controls over the client's physical inventory counting at the period end. If, on the other hand, you need audit evidence of the effectiveness of a control over a period, audit evidence pertaining only to a point in time may be insufficient, and you should supplement your tests with others that provide audit evidence that the control operated effectively during the period under audit. For example, for an automated control, you may test the operation of the control at a particular point in time. You then may perform tests of controls to determine whether the control operated consistently during the audit period, or you may test with the intention of relying on general controls pertaining to the modification and use of that computer program during the audit period.

.30 The tests you perform to supplement tests of controls at a point of time may be part of your tests of controls over your client's monitoring of controls.

Updating Tests of Controls Performed During an Interim Period

.31 You may test controls as of or for a period that ends prior to the balance sheet date. This date often is referred to as the *interim date* or *interim period*. The period of time between the interim date or period and the balance sheet date often is referred to as the *remaining period*.

.32 When you test controls during an interim period or as of an interim date, you should:

a. Obtain audit evidence about the nature and extent of any significant changes in internal control that occurred during the remaining period, and

b. Determine what additional audit evidence should be obtained for the remaining period.

.33 To determine what additional audit evidence you should obtain to update tests of controls performed in advance of the balance sheet date, you should consider:

a. The significance of the assessed risks of material misstatement at the relevant assertion level.

b. The specific controls that were tested during the interim period.

c. The degree to which audit evidence about the operating effectiveness of those controls was obtained.

d. The length of the remaining period.

e. The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls.

f. The control environment.

g. The volume or value of transactions processed in the remaining period.

.34 When you test controls as of or during an interim period, you may obtain additional evidence about the operating effectiveness of controls during the remaining period by performing procedures such as:

a. Extending the testing of the operating effectiveness of controls over the remaining period, or

b. Testing the client's monitoring of controls.

.35 For example, you might perform:

- Inquiries and observations related to the performance of the control, the monitoring of the control, or any changes to the control during the remaining period.
- A walkthrough covering the period between the interim date and the period end.
- The same procedures you performed at interim, but directed to the period from interim to period end.

Use of Audit Evidence Obtained in Prior Audits

.36 If certain conditions are met, you may use audit evidence obtained in prior audits to support your conclusion about the operating effectiveness of controls in the current audit. If you plan to use evidence obtained in prior periods, you should consider:

a. Whether the use of this evidence is appropriate.

b. The length of the time period that may elapse before retesting the control.

.37 The following table summarizes the factors you should consider when determining whether to use audit evidence about the operating effectiveness you obtained in a prior audit.

	Appropriateness of Using Evidence From Prior Audit		*Length of Time Before Retesting Control*	
	May be appropriate	*May not be appropriate*	*Longer*	*Shorter*
Effectiveness of control environment, the client's risk assessment, monitoring, and IT general controls	Effective design and operation	Evidence of poor design or operation	Effective design and operation	Evidence of poor design or operation
Risks arising from characteristics of the control	Largely automated control	Significant manual or judgmental component to control	Largely automated control	Significant manual or judgmental component to control
Changes in circumstances at the client that may require changes in controls, including personnel changes that affect application of the control	Minor changes in client circumstances, including personnel	Significant changes in client circumstances, including personnel	Minor changes in client circumstances, including personnel	Significant changes in client circumstances, including personnel
Operating effectiveness of the control	Control operated effectively in prior audit	Control did not operate effectively in prior audit	Control operated effectively in prior audit	Control did not operate effectively in prior audit
Risks of material misstatement	Low risk of material misstatement for relevant assertion	High risk of material misstatement for relevant assertion	Low risk of material misstatement for relevant assertion	High risk of material misstatement for relevant assertion
Extent of reliance on the control to design substantive procedures	Low reliance on the control	High reliance on the control	Low reliance on the control	High reliance on the control

.38 If you plan to use audit evidence about the operating effectiveness of controls obtained in prior audits, you should:

a. Obtain audit evidence about whether changes in those specific controls have occurred subsequent to the prior audit.

b. Perform audit procedures to establish the continuing relevance of audit evidence obtained in the prior audit.

.39 Even when you use audit evidence about the operating effectiveness of controls obtained in prior periods, you still should evaluate the design effectiveness and implementation of controls in the current period. The procedures performed as described in the paragraph above may help you to fulfill this responsibility; however, you may have to supplement these procedures with others. For example, if the controls have not changed from the previous period but the client's business process have changed, you will need to determine whether the design of controls remains effective in light of the changed business processes.

.40 You may not rely on audit evidence about the operating effectiveness of controls obtained in prior audits for controls that:

a. Have changed significantly since the prior audit.

b. Pertain to business processes that have changed significantly since the prior audit.

c. Mitigate significant risks.

For any control that meets one of the above criteria, you should test operating effectiveness in the current audit.

.41 For example, changes in a system that enable an entity to receive a new report from the system probably is not a significant change and therefore is unlikely to affect the relevance of prior-period audit evidence. On the other hand, a change that causes data to be accumulated or calculated differently probably is significant and therefore does affect the relevance of audit evidence obtained in the prior period, in which case the operating effectiveness of the control should be tested in the current period.

Rotating Emphasis on Tests of Controls

.42 When you plan to rely on controls that have not changed since they were last tested, you should test the operating effectiveness of these controls at least once every third audit. There also may be some controls, such as over revenue recognition or inventories that, due to their importance to the client financial statements, might be subject to testing every two years or every year, depending on the risks, even when there are purported to be no changes in controls.

.43 When there are a number of controls for which you plan to use audit evidence obtained in prior audits, you should test the operating effectiveness of *some* controls each audit. However, when you are testing controls for only one or two key classes of transactions in an entity, rotating the testing of these controls may not be warranted.

Determining the Extent of Tests of Controls

.44 The extent of your tests of controls affects the sufficiency of the audit evidence you obtain to support the auditor's assessment of the operating effectiveness of controls. You should design sufficiently extensive tests of controls to obtain the desired level of assurance that the controls are operating effectively:

a. At the relevant assertion level, and

b. Either throughout the period, or as of the point in time when you plan to rely on the control.

.45 Factors the auditor may consider in determining the extent of tests of controls include the following:

a. The frequency of the performance of the control by the entity during the period.

b. The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.

c. The relevance and reliability of the audit evidence to be obtained in supporting that the control prevents, or detects and corrects, material misstatements at the relevant assertion level.

d. The extent to which audit evidence is obtained from tests of other controls that meet the same audit objective.

e. The extent to which the auditor plans to rely on the operating effectiveness of the control in the assessment of risk (and thereby reduce substantive procedures based on the reliance of such control). The more the auditor relies on the operating effectiveness of controls in the assessment of risk, the greater is the extent of the auditor's tests of controls.

f. The expected deviation from the control.

Sampling Considerations

.46 You should consider using an audit sampling technique to determine the extent of tests whenever the control is applied on a transaction basis (for example, matching approved purchase orders to supplier invoices) and it is applied frequently. When a control is applied periodically (for example, monthly reconciliations of accounts receivable subsidiary ledger to the general ledger), you should consider guidance appropriate for testing smaller populations (for example, testing the control application for two months and reviewing evidence the control operated in other months or reviewing other months for unusual items). AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), as amended, and the AICPA audit guide, *Audit Sampling*, provide further guidance on the application of sampling techniques to determine the extent of testing of controls. The AICPA audit guide *Audit Sampling* also provides guidance for testing in smaller populations.

.47 You should consider the expected deviation from the control when determining the extent of tests. As the rate of expected deviation from a control increases, you should increase the extent of testing of the control. However, if the rate of expected deviation is expected to be too high, you may determine that tests of controls for a particular assertion may not be effective. In this case you may conclude that a control deficiency exists and you should consider its severity and whether it should be communicated to those charged with governance and/or management.

Extent of Testing IT Controls

.48 Generally, IT processing is inherently consistent. An automated control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Therefore, you may be able to limit the testing of an IT application control to one or a few instances of the control operation, provided that you determine that related IT general controls operated effectively during the period of reliance.

Assessing the Operating Effectiveness of Controls

Evidence About Operating Effectiveness

.49 The concept of effectiveness of the operation of controls recognizes that some deviations in the way your client applies the controls may occur. Deviations from prescribed controls may be caused by factors such as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error.

.50 When you encounter deviations in the operation of controls, those deviations will have an effect on your assessment of operating effectiveness. A control with an observed nonnegligible deviation rate is not an effective control. For example, if you design a test in which you select a sample of, say, 25 items and expect no deviations, the finding of one deviation would be considered a nonnegligible deviation because, based on the results of your test of the sample, the desired level of confidence has not been obtained.

.51 There are sources of audit evidence beyond your tests of controls that contribute to your assessment of the operating effectiveness of controls. The extent of misstatements you detect by performing substantive procedures also may alter your judgment about the effectiveness of controls in a negative direction. However, misstatement-free results of substantive tests do not indicate that a lower assessment of control risk should be substituted for the one supported by the procedures you used to assess control risk.

Investigating Additional Implications of Identified Deviations

.52 When you detect control deviations during the performance of tests of controls, you should make specific inquiries to understand these matters and their potential consequences, for example, by inquiring about the timing of personnel changes in key internal control functions.

.53 Deviations in the application of control activities may be caused by the ineffective operation of indirect controls such as IT general controls, the control environment, or other components of internal control. To gain an understanding of the deviations in control, you may wish to make inquires and perform other tests to identify possible weaknesses in the control environment or other indirect controls.

.54 For example, suppose that one of your client's primary controls related to the existence of inventory—periodic test counts—had several instances where the number of items counted by the count teams did not agree to the actual physical count of the items on hand. When gaining a further understanding of the nature of these deviations, you determine that the underlying cause is poor training of the test count teams and a lack of written instructions. Training and written instructions are indirect controls that may affect the operating effectiveness of controls other than those related to existence. For example, the lack of training and instruction could result in the count teams reporting the wrong product number or description, which also could affect the valuation of inventory. This finding could cause the company and auditor to conclude that a recount is necessary once the teams are properly trained.

Assessing Effectiveness

.55 After considering the results of tests of controls and any misstatements detected from the performance of substantive procedures, you should determine whether the audit evidence obtained provides an appropriate basis for reliance on the controls. If the reliance on the controls is not warranted, you should determine whether:

- Additional tests of controls are necessary, or
- How the potential risks of misstatement will be addressed using substantive procedures.

Once you have concluded that reliance on certain controls is not warranted, it is unnecessary to perform further tests of those controls.

Deficiencies in the Operation of Controls

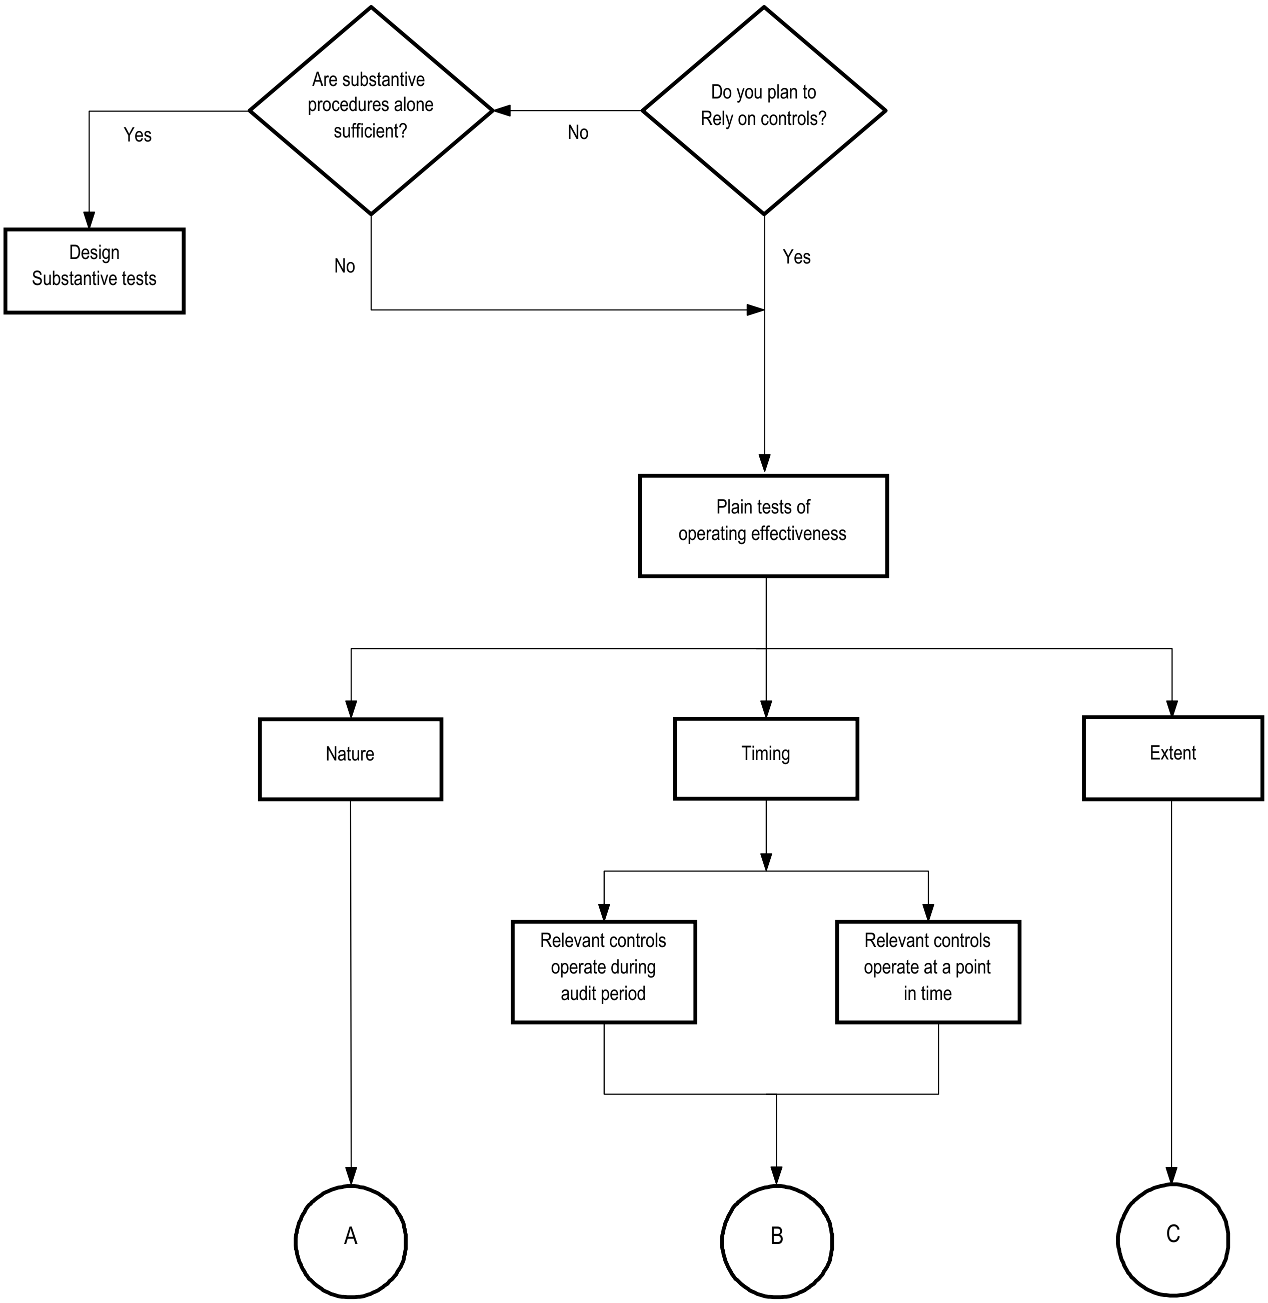
.56 You should consider whether deviations in the operation of controls have been caused by an underlying control deficiency. When evaluating the reason for a control deviation, you should consider:

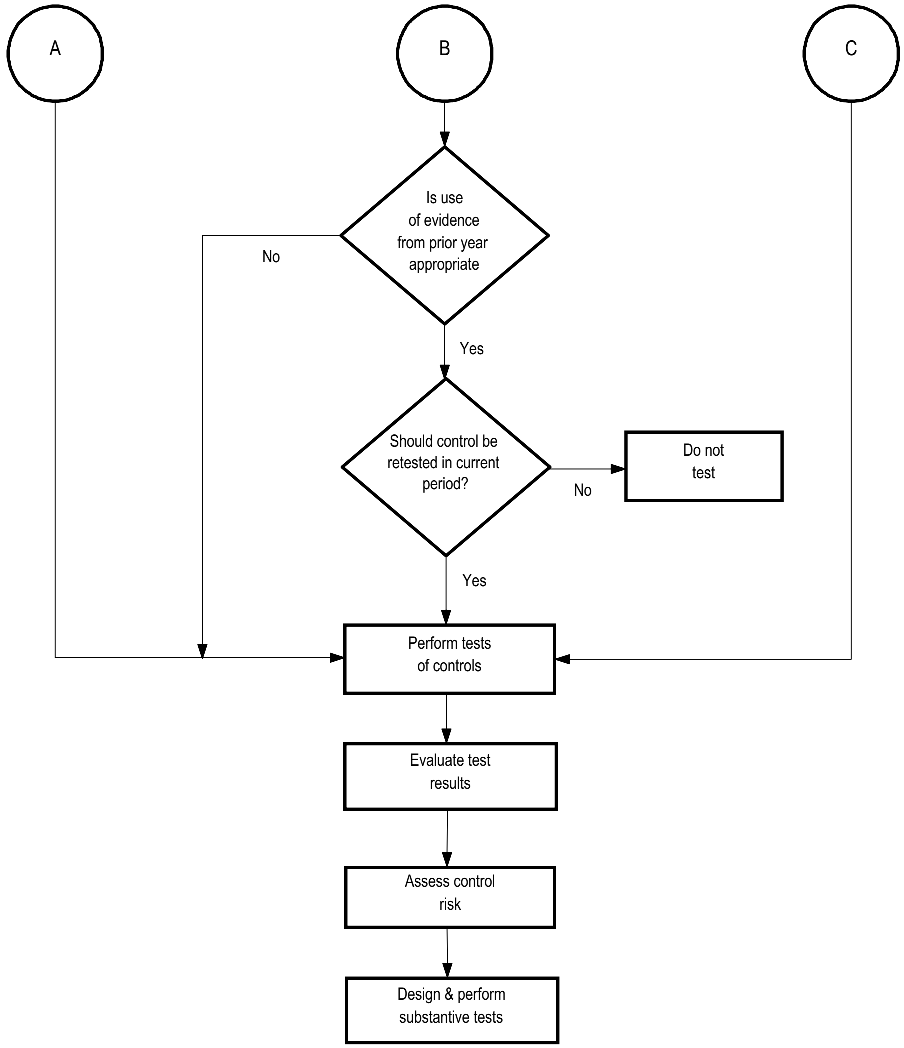
- Whether the control is automated (in the presence of effective information technology general controls, an automated application control is expected to perform as designed),
- The degree of intervention by entity personnel contributing to the deviation (for example, was the deviation evidence of a possible override), and
- If management was aware of the deviation, its actions in response to the matter.

.57 Regardless of the reason for the deviation, numerous or repeated instances of the deviation may constitute a significant deficiency or material weakness. The following are examples of circumstances that may be control deficiencies of some magnitude:

- Failure in the operation of properly designed controls within a significant account or process, for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy, for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements.
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. For example, a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. However, a preventive control failure may be mitigated by an effective detective control that prevents the misstatement of the financial statements. Suppose the inventory security control fails. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement to the financial statements if performed effectively and timely (near or at the reporting date). In the absence of a timely count, a deficient preventive control may be a deficiency in internal controls of some magnitude.
- Failure to perform reconciliations of significant accounts, for example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions, for example, consistent under accruals of expenses or overstatement of allowances at the direction of management.
- Misrepresentation by client personnel to the auditor (an indicator of fraud).
- Management override of controls that would enable the entity to prepare financial statements in accordance with generally accepted accounting principles.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.

.58 The following diagram summarizes your considerations related to tests of controls.





Documentation

.59 In regards to the performance of further audit procedures, the auditor should document:

a. The overall responses to address the assessed risks of misstatement at the financial statement level

b. The nature, timing, and extent of the further audit procedures

c. The linkage of those procedures with the assessed risks at the relevant assertion level

d. The results of the audit procedures

e. The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5301.*]

AAM Section 5300
Performing Substantive Procedures

.01 The objective of your substantive procedures is to detect individual misstatements that alone or in the aggregate cause material misstatements at the assertion level. Substantive procedures include the following:

- Tests of details of transactions, account balances, and disclosures.
- Analytical procedures. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), provides guidance on the application of analytical procedures as substantive tests.

.02 In general, your substantive procedures should be responsive to your assessed risks of material misstatement. However, you should perform certain tests regardless of your risk assessment since your risk assessment may not identify all risks.

- *Substantive tests of material items*. You should perform substantive procedures for all relevant assertions for each material class of transactions, account balance, and disclosure. For example, if you determine that long-term debt is a material account, you should perform substantive tests for all assertions that are relevant to long-term debt, even if you have determined that it is unlikely that the assertion could contain a material misstatement. You may determine that the risk of the entity not having the obligation to repay the debt (the obligation assertion) is low, but nevertheless, you should perform a substantive procedure (for example, confirming the terms of the debt with the lender) to address the risk. Because the account is material, you are precluded from relying solely on risk assessment procedures or tests of controls to support your conclusion.
- *Substantive tests related to the financial statement reporting system*. On all your engagements you should:
    - — Agree the financial statements, including their accompanying notes, to the underlying accounting records.
    - — Examine material journal entries and other adjustments made during the course of preparing the financial statements.
    - — The nature and extent of your examination of journal entries and other adjustments depend on the nature and complexity of the client's financial reporting system and the associated risks of material misstatement.

.03 When, in accordance with paragraph 110 of Statement on Auditing Standards (SAS) No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. When your audit approach to significant risks consists only of substantive procedure, your substantive procedures should include either of the following:

a. Tests of details only.

b. A combination of tests of details and analytical procedures.

That is, to address significant risks, it is unlikely that audit evidence obtained solely from substantive analytical procedures will be sufficient.

Nature of Substantive Procedures

.04 Substantive procedures include tests of details and substantive analytical procedures. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Tests of details are ordinarily more appropriate to obtain audit evidence regarding certain relevant assertions about account balances, including existence and valuation.

.05 The auditor should plan substantive procedures to be responsive to the planned level of detection risk. In some situations, the auditor may determine that performing only substantive analytical procedures may be sufficient to reduce the planned level of detection risk to an acceptably low level. For example, the auditor may determine that performing only substantive analytical procedures is responsive to the planned level of detection risk for an individual class of transactions where the auditor's assessment of risk has been reduced by obtaining audit evidence from performance of tests of the operating effectiveness of controls. In other situations, the auditor may determine that tests of details only are appropriate, or that a combination of substantive analytical procedures and tests of details is most responsive to the assessed risks. The auditor's determination as to the substantive procedures that are most responsive to the planned level of detection risk is affected by whether the auditor has obtained audit evidence about the operating effectiveness of controls.

Tests of Details

.06 The auditor should design tests of details responsive to the assessed risk with the objective of obtaining sufficient appropriate audit evidence to achieve the planned level of assurance at the relevant assertion level. In designing substantive procedures related to the existence or occurrence assertion, the auditor should select from items contained in a financial statement amount and should obtain the relevant audit evidence. On the other hand, in designing audit procedures related to the completeness assertion, the auditor should select from audit evidence indicating that an item should be included in the relevant financial statement amount and should investigate whether that item is so included. The knowledge gained when understanding the business and its environment should be helpful in selecting the nature, timing, and extent of audit procedures related to the completeness assertion. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

Substantive Analytical Procedures

.07 In designing substantive analytical procedures, the auditor should consider such matters as:

- The suitability of using substantive analytical procedures, given the assertions. Analytical procedures may not be suitable for all assertions. For example, transactions subject to management discretion (such as a decision to delay advertising expenses) may lack the predictability between periods or financial statement accounts that is necessary to perform and effective analytical procedure.
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed. To assess the reliability of the data used in a substantive analytical procedure, you should consider its source and the conditions under which it was gathered.
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance. The precision of your expectation depends on (among other things):
  - — Your identification and consideration of factors that significantly affect the amount being audited (for example, contributions to an employee 401(k) plan depends on compensation expense and the percentage of the employer contribution committed to by management).
  - — The level of data used to develop your expectation. Typically, expectations developed at a detailed level have a greater chance of detecting a material misstatement than do broad comparisons.

- The amount of any difference in recorded amounts from expected values that is acceptable. The smaller the difference between your expected amount and the recorded amount that you can accept, the more precise your expectation should be.
- The risk of management override of controls. Management override of controls might result in adjustments to the financial statements outside of the normal financial reporting process, which may result in artificial changes to the financial statement relationships being analyzed. These artificial relationships may result in you drawing erroneous conclusions about your substantive analytical procedures.

AU section 316.57–.67, *Consideration of Fraud in a Financial Statement* (AICPA, *Professional Standards*, vol. 1), directs you to perform certain procedures to assess the risk of management override of controls.

.08 AU sec. 329.09–.21 provides additional guidance on the design of substantive analytical procedures.

Timing of Substantive Procedures

Substantive Procedures Performed at an Interim Date

.09 In some circumstances, you may choose to perform substantive procedures at an interim date. When you perform procedures as of a date in advance of year end, you increase the risk that you will fail to detect a material misstatement that may exist at year end. This risk increases as the length of the period between your interim tests and year end increases. The following table summarizes factors you may consider when determining whether to perform substantive procedures at an interim date.

Matters to Consider in Determining Whether to Perform Substantive Procedures at an Interim Date

	Likelihood of Performing Substantive Procedures at an Interim Date	
Factor to consider	*More likely*	*Less likely*
Control environment and other relevant controls	Effectively designed or operating controls, including the control environment	Ineffectively designed or operating controls, including the control environment
The availability of information for the remaining period	Information is available that will allow you to perform procedures related to the remaining period	Lack of information necessary to perform procedures related to the remaining period
Assessed risk	Lower risk of material misstatement for the relevant assertion	Higher risk of material misstatement for the relevant assertion
Nature of transactions or account balances and relevant assertions	Year-end balances are reasonably predictable with respect to amount, relative significance, and composition	Year-end balances can fluctuate significantly from interim balances, for example, due to rapidly changing business conditions, seasonality of business, or transactions that are subject to management's discretion
Ability to perform audit procedures to cover remaining period	You will be able to perform all necessary procedures to cover the remaining period	Your ability to perform procedures relating to the remaining period is limited, for example, by a lack of available information

.10 The objective of some of the tests may make the results of the tests irrelevant if performed at an interim date. For example, tests related to the preparation of the financial statements or the client's compliance with debt covenants typically provide relevant audit evidence only if performed at the period end.

.11 In addition to those items described in the table above, the circumstances of the engagement may result in you performing certain tests at an interim date. For example, your client may require you to identify all material misstatements a short period of time after year end (which is common for companies that wish to issue a press release of their earnings for the period). In that situation, you may decide to confirm receivables prior to year end because the time period between the end of the period and the release of earnings is too short to allow you to send and receive confirmations of customers and to complete your test work.

.12 Your ability to perform audit procedures relating to the remaining period depends a great deal on whether the client's accounting system is able to provide the information you need to perform your procedures. That information should be sufficient to allow you to investigate:

a. Significant unusual transactions or entries (including those at or near the period end).

b. Other causes of significant fluctuations or fluctuations that did not occur.

c. Changes in the composition of the classes of transactions or account balances.

.13 The timing of audit procedures also involves consideration of whether related audit procedures are coordinated properly. This consideration includes, for example:

- Coordinating the audit procedures applied to related-party transactions and balances.
- Coordinating the testing of interrelated accounts and accounting cutoffs.
- Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items.

.14 When you perform substantive procedures at an interim date, you should perform tests that cover the remaining period and provide a reasonable basis for extending your audit conclusions from the interim date to the period end. Those additional tests may be either of the following:

a. Substantive procedures.

b. A combination of substantive procedures and tests of controls.

.15 When you perform substantive procedures at an interim date, you may reconcile the account balance at the interim date to the balance in the same account at year end. The reconciliation will allow you to:

- Identify amounts that appear unusual.
- Investigate these amounts.
- Define the appropriate population to perform substantive analytical procedures or tests of details to test the remaining period.

.16 If you detect misstatements in classes of transactions or account balances at an interim date, you should consider whether:

- Your initial assessment of risk remains appropriate or should be modified.
- Your planned substantive procedures covering the remaining period remain adequate considering your updated risk assessment.

Substantive Procedures Performed in Previous Audits

.17 In most cases, audit evidence from substantive procedures you performed in a prior audit provides little or no audit evidence for the current period. To use audit evidence obtained during a prior period in the current period audit, both the audit evidence and the related subject matter must fundamentally be the same. For example, a legal opinion would continue to be relevant audit evidence if it were received in a prior period related to the structure of a securitization transaction and no changes have occurred during the current period. Whenever you use audit evidence from a prior period in the current audit, you should perform audit procedures during the current period to establish the continuing relevance of the audit evidence.

Extent of the Performance of Substantive Procedures

.18 The greater the risk of material misstatement, the greater the extent of your substantive procedures. However, the nature of your audit procedures is of most importance in responding to assessed risks. Increasing the extent of an audit procedure is appropriate only if the procedure itself is relevant to the specified risk.

.19 **Considerations for Designing Tests of Details.** When determining the extent of your tests of details, you ordinarily think in terms of sample size. However, you also should consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population, rather than performing sampling or stratifying the population into homogeneous sub-populations for sampling. AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), and the AICPA audit guide, *Audit Sampling*, provide guidance on the use of sampling and other means of selecting items for testing.

Adequacy of Presentation and Disclosure

.20 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, are in accordance with generally accepted accounting principles. The auditor should consider whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information. The presentation of financial statements in conformity with generally accepted accounting principles also includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the bases of amounts set forth. The auditor should consider whether management should have disclosed a particular matter in light of the circumstances and facts of which the auditor is aware at the time. In performing the evaluation of the overall presentation of the financial statements, including the related disclosures, the auditor should consider the assessed risk of material misstatement at the relevant assertion level. See paragraph 15 of SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326), for a description of the relevant assertions related to presentation and disclosure.

Documentation

.21 In regards to the performance of further audit procedures, the auditor should document:

a. The overall responses to address the assessed risks of misstatement at the financial statement level

b. The nature, timing, and extent of the further audit procedures

c. The linkage of those procedures with the assessed risks at the relevant assertion level *d*. The results of the audit procedures

e. The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5401*.]

AAM Section 5400
Audit Sampling Considerations

.01 Once an auditor decides what audit procedures to apply (the nature of the tests) and when to apply them (the timing of the tests), a decision must be made about how many items to apply the procedures to—that is, the extent of testing. The greater the risk of material misstatement, the less detection risk that can be accepted; consequently, the greater the extent of substantive procedures. Because the risks of material misstatement include consideration of the effectiveness of internal control, the extent of substantive procedures may be reduced by satisfactory results from tests of the operating effectiveness of controls. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

.02 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size, which is affected by the planned level of detection risk, tolerable misstatement, expected misstatement, and nature of the population. However, the auditor should also consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population as opposed to performing sampling or stratifying the population into homogeneous subpopulations for sampling.

Authoritative Standards

.03 AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), addresses a variety of issues relating to the auditor's use of sampling in an audit engagement. However, AU section 350 does not always apply when the auditor is examining less than 100 percent of a population. The AICPA audit guide *Audit Sampling* presents recommendations on the application of generally accepted auditing standards to audits involving the use of audit sampling methods, and provides guidance to help auditors apply audit sampling in accordance with AU section 350.

When AU section 350 Applies

.04 Audit sampling is only one of many tools used by auditors to obtain sufficient, appropriate audit evidence to support an opinion on financial statements. AU section 350 discusses design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used—

a. In tests of controls in internal control to evaluate operating effectiveness from prescribed controls.

b. In substantive tests of details of account balances and classes of transactions.

c. In dual-purpose tests that assess control risk and test whether the monetary amount of a transaction is correct.

.05 The portion of AU section 350 pertaining to tests of controls applies when sampling techniques are used to assess control risk. The portion pertaining to substantive tests apply when sampling techniques are used to test details of transactions or balances.

.06 According to AU section 350, sampling occurs when the auditor tests less than 100 percent of a population for the purpose of evaluating some characteristic of an account balance or class of transactions. AU section 350 applies to tests of controls when such tests are performed and to tests of balances when sampling populations are material. The extent to which sampling is used in an audit depends on the size of the client and the nature of the client's internal control. Also, if the sampling populations are small, it is usually more efficient to audit individually significant items and obtain audit assurance about the remaining balance through analytical procedures than to perform audit sampling. As the size and sophistication of the client's internal control increases, the auditor is more likely to use audit sampling to perform tests of controls and tests of balances.

.07 In determining whether AU section 350 is applicable to circumstances in which an auditor examines less than 100 percent of the items making up an account balance or class of transactions, the auditor should consider the purpose of the test. If the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, the guidance in AU section 350 should be followed. For example, if the auditor intends to examine selected sales invoices to draw a conclusion about whether sales are overstated, audit sampling as described in AU section 350 should be applied because the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to the remaining invoices, the auditor is not sampling according to AU section 350—the examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the combined results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed related to overstatement of sales.

.08 The auditor should remember that the way in which the population is defined can determine whether the requirements of AU section 350 apply. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables, and employee receivables. Each of these populations can be tested using a different audit strategy—some using audit sampling and others not. The sampling concepts in AU section 350 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

Authoritative Guidance About the Application of Audit Sampling to Substantive Tests Provided by AU Section 350

.09 AU section 350 contains the following provisions regarding sampling in connection with substantive testing.

a. The concept that some items exist for which, in the auditor's judgment, acceptance of some sampling risk is not justified, and that these should be examined 100 percent (See AU section 350.21). This simply reminds the auditor that some of the items encountered in an examination of financial statements may be so significant individually or may have such a high likelihood of being in error or misstated that *all* such items should be examined.

b. The suggestion that the efficiency of a sample may be improved by separating items subject to sampling into relatively homogeneous groups based on some characteristic (See AU section 350.22). This indicates that audit efficiency can sometimes be improved by, for example, stratifying or segregating the items constituting a balance or class of transactions into groups based on individual dollar value or some other characteristic.

c. A requirement that the auditor consider tolerable misstatement in planning audit sampling applications in the examination of account balances and classes of transactions (See AU section 350.18). This asks the auditor to consider, in the early stages of an audit, how much misstatement the auditor will be able to tolerate for each balance and class of transactions that is sampled, in combination with misstatements in other accounts, and still render an unqualified opinion on the financial statements. AU section 350 asks the auditor to consider tolerable misstatement and to recognize that it is one of the factors influencing sample size. There is no requirement to document or quantify tolerable misstatement.

d. A requirement that the auditor select a sample that can be expected to be representative of the population (See AU section 350.24). Simply put, this means that each item in the population being sampled should have *a chance* of being selected, not necessarily *an equal chance* of being selected. This does not mean that the auditor is required to use a random or probability sample.

e. A requirement that the auditor consider selected sample items to which the auditor is unable to apply planned audit procedures to determine their effect on the evaluation of the sample (See AU section 350.25). For example, sometimes the auditor may not be able to apply planned audit procedures to selected sample items because the entity may not be able to locate supporting documentation. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative audit procedures that would provide sufficient appropriate audit evidence to form a conclusion.

f. A requirement that the auditor project the misstatement results of the sample to the items from which the sample was selected (See AU section 350.26). Since the sample is expected to be representative of the population from which it was selected, misstatements found are also expected to be representative of the population. This merely asks the auditor to measure the likely misstatement in the population from which the sample was drawn and to consider it in reaching conclusions.

g. A requirement that the auditor consider, in the aggregate, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications, along with other relevant audit evidence, when evaluating whether the financial statements taken as a whole may be materially misstated (See AU section 350.30).

Documentation Requirements

.10 AU section 350 contains no specific documentation requirements. However, the documentation standards set forth in the Statements on Auditing Standards dealing with documentation apply to audit sampling applications just as they apply to other auditing procedures. Statement on Auditing Standards (SAS) No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311), states that the auditor should prepare a written audit plan or program, and SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), states that audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested. The identification of the items tested may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- When a haphazard or random sample is selected, the documentation should include identifying characteristics (for example, the specific invoice numbers of the items included in the sample).
- When all items over a specified dollar amount are selected from a listing, the documentation need describe only the scope and the identification of the listing (for example, all invoices over $25,000 from the December sales journal).
- When a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

With regard to audit sampling applications, the audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. Examples of items that the auditor may document for tests of controls are discussed in AAM section 5400.26. Examples of items that the auditor typically documents for substantive tests are discussed in AAM section 5400.56.

Determining Extent of Testing in a Small Business Without Sampling

.11 Small businesses have certain characteristics that may influence the auditor's decision to use audit sampling.

.12 For substantive testing, small businesses frequently have small populations of accounting data in both account balances and classes of transactions. Consequently, sampling may not be as useful since there may be large populations of data.

.13 AU section 350.01 defines audit sampling: "The application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class." This definition allows some alternative approaches to sampling to determine the extent of testing in a small business engagement. These alternatives, by not using audit sampling and thus eliminating the requirements of AU section 350, may provide a more effective and efficient audit approach for a small business engagement.

.14 These alternative approaches include:

a. Procedures applied to 100 percent of a certain group (strata) of transactions or balances.

b. Testing unusual items without applying procedures to the remainder of the population.

c. Other tests that involve application of procedures to less than 100 percent of the items in the population without drawing a conclusion about the entire account or class of transactions.

.15 The auditor should decide what audit procedures to perform to meet the established audit objectives. Once this decision is made, the auditor needs to determine the extent of testing.

.16 An effective and efficient approach to determining the extent of testing in a small business engagement is shown in flowchart 1. This approach involves four important steps.

Identification of Individual Items to Be Examined

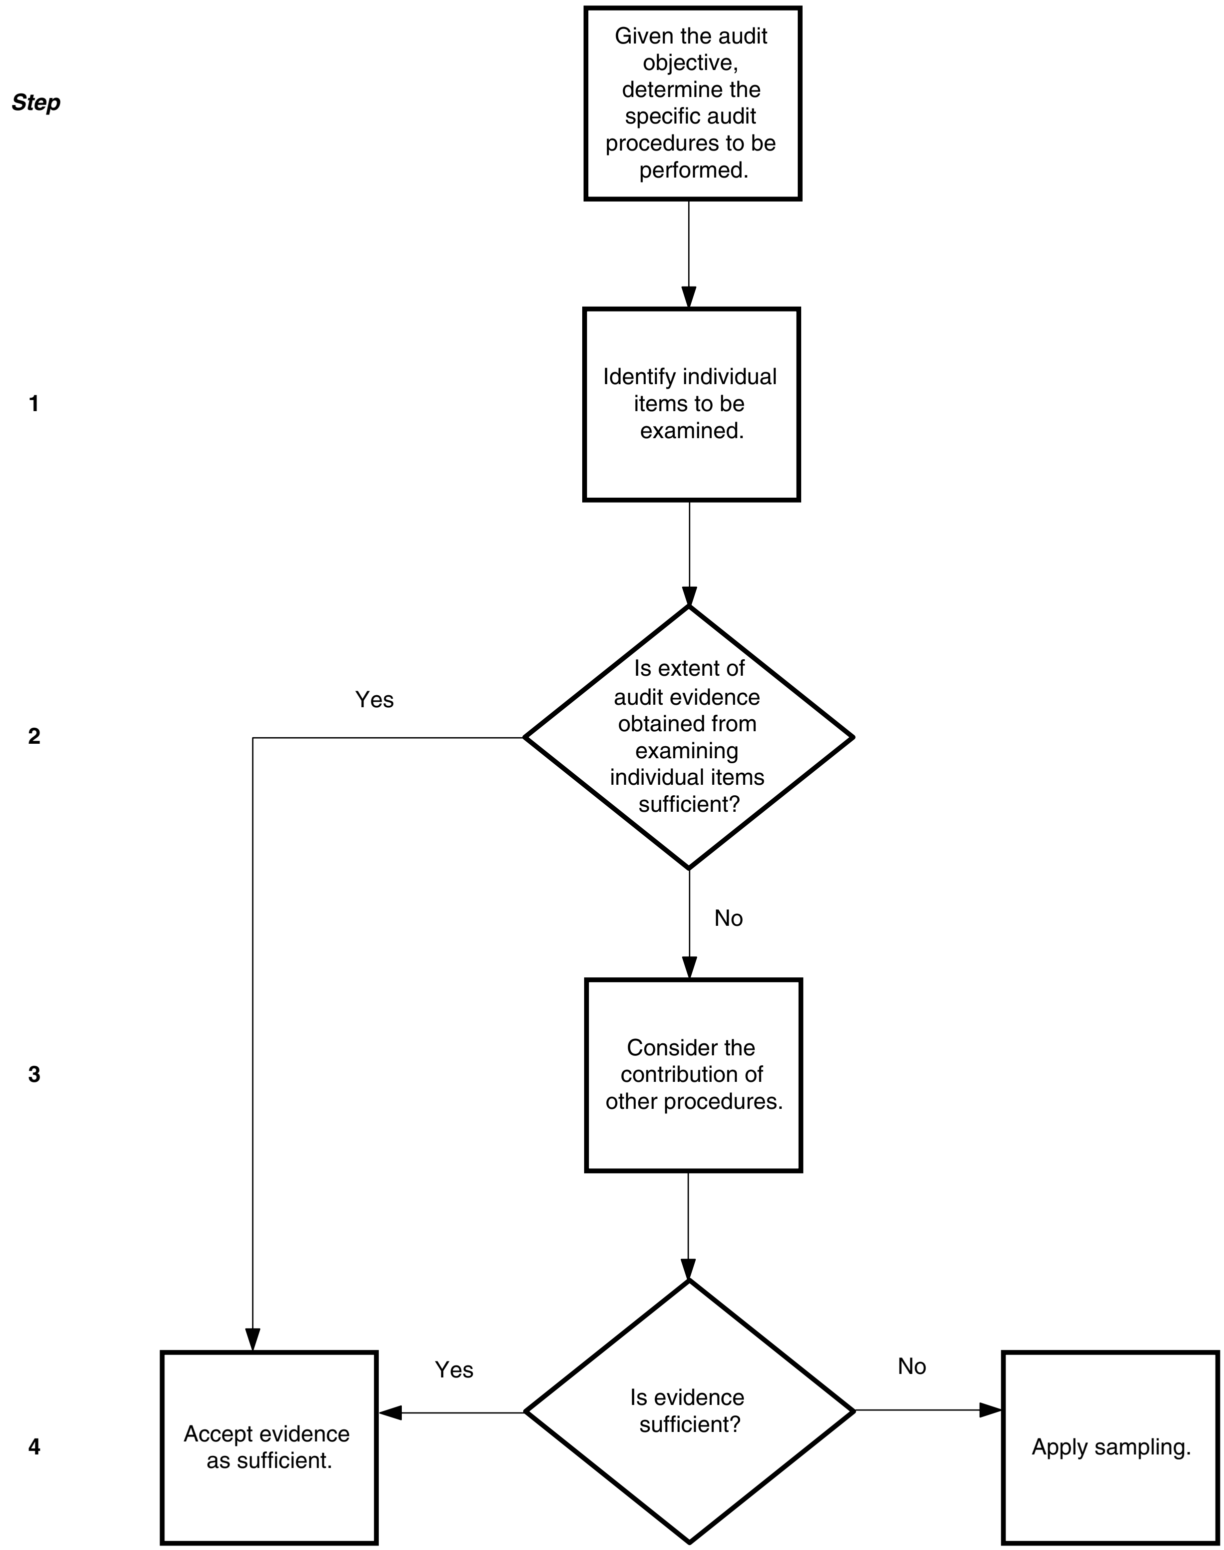
.17 An auditor should apply professional judgment in determining which individual items in an account balance or class of transactions need to be examined. In evaluating individual items, the auditor should consider factors such as size of the item, whether the item is unusual, prior experience with the client, and whether the item involves a related party.

.18 For example, consider the following information for accounts receivable of a small business.

Number of Accounts	*Balances*	*Total Accounts*
4	$100,000 or more	$ 625,000
7	$25,000–99,999	375,000
62	$1–24,999	300,000
73		$1,300,000

In this case, if the eleven largest accounts are confirmed by the auditor, most of the accounts receivable balance is supported ($1,000,000 out of $1,300,000, or 77 percent). Also, the auditor may decide to confirm the receivables that have unusual characteristics (for example, receivables with either large credit balances or those that are very delinquent).

Flowchart 1
An Audit Sampling Approach for a Small Business



Is Extent of Audit Evidence Obtained Sufficient?

.19 Some factors in evaluating the sufficiency of audit evidence obtained in tests of details for a particular account balance or class of transactions are:

a. The individual importance of the items examined. If the items examined, account for a high percentage of the total population, then the auditor may be reasonably assured that there is an acceptably low risk of an undetected misstatement.

b. The nature and cause of misstatements. If during the course of the audit, misstatements are discovered, those misstatements should be evaluated to determine if they are due to differences in principle or in application, are errors or fraud or are due to misunderstanding of instructions or carelessness.

c. Possible relationship of the misstatement to other phases of the audit. If it is determined that the misstatement is due to fraud this would require a broader consideration of the possible implications than would the discovery of an error.

d. The characteristics of the sample to the population. The auditor may obtain some knowledge of the types of items in the population if the characteristics in the sample are similar in nature and the same controls are followed for processing the transactions.

.20 If an auditor has examined a substantial number of individual amounts and found no evidence of problems from the other procedures performed—and the remaining population totals less than an amount that would be material to the financial statements—there is often no need to sample the remaining population. Otherwise, the auditor should extend tests to the remaining population unless an alternative approach can be justified.

Consider Contribution of Other Procedures

.21 The auditor should also consider whether other evidence obtained contributes to conclusions regarding the account balance or class of transactions. The auditor often considers the contribution of other procedures at the same time the extent of audit evidence obtained from examining individual items is considered.

.22 The auditor may use a combination of analytical procedures and substantive tests of details to support an opinion on the financial statements. In deciding whether other audit procedures make a contribution, the auditor should consider whether they support the audit objectives in the area, whether they indicate potential problems, and whether the evidence is consistent with the previous evidence obtained.

.23 In considering the contribution of other procedures, the auditor should use professional judgment in determining whether an unqualified opinion can be given without performing additional tests in the form of audit sampling.

Evaluation of Sufficiency of Evidence

.24 There are three factors that the auditor may consider in evaluating the sufficiency of audit evidence obtained from examining individual items and contributed by other procedures, and in determining whether the remaining items in the population should be tested.

.25 First, the auditor should consider whether the dollar amount of the remaining population is equal to or greater than an amount that would be material to the financial statements. If the remaining population is less than material, the auditor may decide that no additional testing by sampling is necessary. Second, the auditor should consider the degree of risk involved (that is, how susceptible the account is to misstatement, and whether there have been problems with this area in prior audits). Third, the auditor should consider the sufficiency of all the audit evidence obtained so far (the extent of audit evidence obtained by testing individual items along with the contribution of other procedures).

Audit Sampling for Tests of Controls

.26 AU section 350 indicates that an auditor may use nonstatistical or statistical sampling in performing tests of controls. This section provides guidance for both approaches. Regardless of whether nonstatistical or statistical sampling is being used, audit sampling for tests of controls involves the following steps:

a. *Determine the objective of the test*. The objective of tests of controls is to provide evidence about the operating effectiveness of controls. Audit sampling for tests of controls is generally appropriate when application of the control leaves documentary evidence of performance. Normally, audit sampling for tests of controls will involve selecting a sample of documents and examining them for evidence that the relevant controls were applied. Tests of controls involving observation of performance of procedures or inquiries of the client are not normally subject to audit sampling.

b. *Define the deviation conditions*. A deviation condition is a situation that indicates that the controls were not performed. For example, if the auditor is examining purchase invoices for evidence of approval of an expenditure (for example, the initials of the approving individual), a deviation condition would be an invoice that is not initialed by the appropriate individual. Performance of a control consists of all the steps the auditor believes are necessary to support the assessed level of control risk. For example, assume that a prescribed control requires that support for every disbursement should include an invoice, a voucher, a receiving report, and a purchase order, all stamped "Paid." The auditor believes that the existence of an invoice and a receiving report, both stamped "Paid," is necessary to indicate adequate performance of the control for purposes of supporting the assessed level of control risk. Therefore, a deviation may be defined as "a disbursement not supported by an invoice and a receiving report that have been stamped 'Paid.'"

c. *Define the population*. The population selected must be appropriate for the objective being tested. For example, if the auditor is testing the operating effectiveness of a prescribed control designed to ensure that all shipments were billed, the auditor would not detect deviations by sampling from billed items. An appropriate population for detecting such deviations usually includes the record of all items shipped.

d. *Defining the period covered by the test*. For samples to be representative of the period under audit, the population generally should include all transactions processed during the period. Often, auditors perform tests of controls during interim work. The auditor should determine what additional evidence needs to be obtained for the remaining period. Often, the auditor obtains the additional evidence by extending the test to the transactions occurring in the remaining period. However, it is not always efficient to include all transactions executed throughout the period under audit in the population to be sampled. In some cases, it might be more efficient to use alternative approaches to test the performance of the control during the remaining period. In these cases the auditor would define the population to include transactions for the period from the beginning of the year to an interim date and consider the following factors in determining what, if any, additional evidence needs to be obtained for the remaining period:

- The significance of the assertion involved.
- The specific controls that were tested during the interim period.
- Any changes in controls from the interim period.
- The extent to which substantive tests were changed as a result of the controls.
- The results of the tests of controls performed during the interim period.
- The length of the remaining period.
- The audit evidence about design or operation that may result from the substantive tests performed in the remaining period.

The auditor selects sampling units from a physical representation of the population. For example, if the auditor defines the population as all customer receivable balances as of a specific date, the physical representation might be a printout of the customer accounts receivable trial balance as of that date. Making selections from a controlled source minimizes differences between the physical representation and the population. The auditor should consider whether the physical representation includes the entire population. If the auditor reconciles the selected physical representation and the population and determines that the physical representation has omitted items in the population that should be included in the overall evaluation, the auditor should select a new physical representation or perform alternative procedures on the items excluded from the physical representation.

e. *Defining the sampling unit*. The auditor should define the sampling unit in light of the control being tested. A sampling unit may be, for example, a document, an entry, or a line item, where examination of the sampling unit provides evidence of the operation of the control. An important efficiency consideration in selecting a sampling unit is the manner in which documents are filed and cross-referenced.

f. *Determine the method of selecting the sample*. Any sample that is selected should be representative of the population and all items should have an opportunity to be selected. Random-number selection is generally used when statistical sampling is being applied. When nonstatistical sampling is applied, random-number sampling, systematic sampling, and haphazard sampling are methods that might be used to obtain a representative sample. Methods of selecting samples are discussed beginning at AAM section 5400.62.

g. *Determine the sample size*. Sample sizes for tests of controls are affected by (*a*) the risk of assessing control risk too low, (*b*) the tolerable rate, (*c*) the expected population deviation rate, and (*d*) any effects of small population sizes.

   Guidance for determining sample size when performing nonstatistical sampling begins with AAM section 5400.29. A description of statistical sampling begins with AAM section 5400.32.

h. *Perform the sampling plan*. Once the sample has been selected, the auditor should examine the selected items to determine whether they contain deviations from the prescribed control. If the auditor selects a voided item, and the auditor obtains reasonable assurance that the item has been properly voided and does not represent a deviation from the prescribed control, he or she should replace the voided item. If the auditor selects an unused item, he or she should obtain reasonable assurance that it actually represents an unused item, and not a deviation from the control, and then replace the unused item. If the auditor is unable to examine a selected item because it cannot be located or for any other reason, and the auditor is unable to apply the planned audit procedures or appropriate alternative procedures to selected items, he or she should consider the selected items to be deviations from the controls for purposes of evaluating the sample. In addition, the auditor should consider the reasons for this limitation and the effect that such a limitation might have on his or her understanding of internal control and assessment of control risk.

i. *Evaluate the sample results*. Guidance for evaluating nonstatistical sampling results begins with AAM section 5400.31 and guidance for evaluating statistical sampling results begins with AAM section 5400.33.

j. *Document the sampling procedure*. Examples of items that the auditor typically documents for tests of controls include the following:

   - A description of the control being tested. The control objectives related to the sampling application, the relevant assertions.
   - The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor considered the completeness of the population.
   - The definition of the deviation condition.

- The acceptable risk of overreliance (or desired confidence or assurance level), the tolerable deviation rate, and the expected population deviation rate used in the application.
- The method of sample-size determination.
- The method of sample selection (specific selection criteria).
- A description of how the sampling procedure was performed and a list of the deviations identified in the sample.
- The evaluation of the sample and a summary of the overall conclusion.

.27 ***Factors Affecting Sample Sizes for Tests of Controls.*** Sample sizes for tests of controls are affected by the following factors:

a. *Acceptable risk of assessing control risk too low*. The risk of assessing control risk too low is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control. Decreasing the risk of assessing control risk too low will increase the sample size.

b. *Expected population deviation rate.* The expected population deviation rate is an anticipation of the deviation rate in the entire population. As the expected population deviation rate increases, the sample size will increase.

c. *Tolerable rate.* Tolerable rate is the maximum rate (%) of deviation from a prescribed control that the auditor is willing to accept without altering the planned assessed level of control risk. Higher tolerable rates will permit smaller sample sizes.

d. *Population size.* The size of the population has little or no effect on the determination of sample size except for very small populations. For example, it is generally appropriate to treat any population of more than 5,000 sampling units as if it were infinite. If the population size is under 5,000 sampling units, the population size may have a small effect on the calculation of the sample size.

.28 The effects of these factors on the appropriate nonstatistical sample size may be summarized as follows:

Factor	*General Effect on Sample Size*
Risk of assessing control risk too low—increase (decrease)	Smaller (larger)
Tolerable rate—increase (decrease)	Smaller (larger)
Expected population deviation rate—increase (decrease)	Larger (smaller)
Population size	Virtually no effect

.29 ***Sample Sizes Using Nonstatistical Sampling.*** The auditor using nonstatistical sampling for tests of controls uses his or her professional judgment to consider the factors described in AAM section 5400.27 in determining sample sizes.

.30 Neither AU section 350 nor the Audit Guide *Audit Sampling*, require the auditor to compare the sample size for a nonstatistical sampling application with a corresponding sample size calculated using statistical theory. Auditors might find it helpful to be familiar with the tables in AAM section 5400.34–.37. Auditors using these tables as an aid in understanding relative sample sizes for tests of controls will need to apply professional judgment in reviewing the risk levels and expected population deviation rates in relation to sample sizes. Also, an auditor may decide to establish guidelines for sample sizes for tests of controls based on attribute sampling tables.

.31 After completing the examination of the sampling units and summarizing deviations from prescribed controls, the auditor evaluates the results.

- *Calculate the deviation rate*. Calculating the deviation rate in the sample involves dividing the number of observed deviations by the sample size.
- *Consider sampling risk*. When evaluating a sample for a test of controls, consideration may be given to sampling risk.
- *Consider the qualitative aspects of deviations*. In addition to evaluating the frequency of deviations from pertinent controls, the auditor should consider the qualitative aspects of the deviations.
- *Reach an overall conclusion*. The auditor uses professional judgment to reach an overall conclusion about the effect that the evaluation of the results will have on the assessed level of control risk and on the nature, timing and extent of planned substantive tests.

.32 ***Sample Sizes Using Statistical Sampling.*** The appropriate statistical method for tests of controls is attributes sampling, which is a technique designed to estimate qualitative characteristics of a population. Attributes sampling is most commonly used in auditing to test the rate of deviation from a prescribed control to support the auditor's assessed level of control risk.

.33 Applying attributes sampling involves performing the following steps:

a. *Decide on the attributes to test*. The tests of controls may include the testing of one or more attributes. Proper evaluation of the results may require testing and evaluating each attribute separately.

b. *Define the population from which the sample items should be selected*. The auditor should make sure that the population is appropriate for the audit objective as described in AAM section 5400.26.

c. Specify the following factors:

- *Acceptable risk of assessing control risk too low*. There is an inverse relationship between the risk of assessing control risk too low and sample size. If the auditor is willing to accept only a low risk of assessing control risk too low, the sample size would ordinarily be larger than if a higher risk were acceptable.
- *Tolerable rate*. Higher assessments of control risk will permit higher tolerable deviation rates as shown in the following table:

Relationship Between Tolerable Rates and the Auditor's Planned Assessed Levels of Control Risk

Planned Assessed Level of Control Risk	*Tolerable Rate*
Low	2%–5%
Moderate	6%–12%

- *Expected population deviation rate*. The auditor's expectations may be based on prior year's tests and the control environment. The prior year's results should be considered in light of changes in the entity's internal control and changes in personnel. Sample sizes will increase significantly as the expected population deviation rate increases from zero. If the deviation rate in the sample turns out to be higher than the rate specified by the auditor in determining the sample size, the sample results will not support the auditor's planned assessed level of control risk.

d. *Determine the appropriate sample size*. Sample sizes are found in the tables in AAM section 5400.34 and .35. The table in AAM section 5400.34 is designed for a risk of assessing control risk too low of 5 percent, and the table in AAM section 5400.35 is designed for a 10 percent risk of assessing control risk too low. With the tolerable rate and the expected population deviation rate, the auditor may find the sample size from the table. The numbers in parentheses are the number of deviations that may be found in the sample and still support the auditor's planned assessed level of control risk.

e. *Randomly select the sample from the population.* The section beginning at AAM section 5400.62 describes the methods that may be used to select a random sample.

f. *Perform the audit procedures to identify deviations in the sample.*

g. *Calculate the statistical results.* Using the tables in AAM section 5400.36 and .37 or the appropriate risk of assessing control risk too low, determine the actual tolerable deviation rate from the sample size and the actual number of deviations found in the sample.

h. *Reassess the level of control risk.* If the sample results, along with other relevant evidential matter, support the planned assessed level of control risk, the auditor generally does not need to modify planned substantive tests. If the planned assessed level of control risk is not supported, the auditor would ordinarily either perform tests of other controls that could support the planned assessed level of control risk or increase the assessed level of control risk.

i. *Document the Sampling Procedures.* AU section 350 and the audit guide *Audit Sampling*, do not require specific documentation of audit sampling applications. See AAM section 5400.10 for certain documentation requirements of SAS No. 103. Examples of items that the auditor typically documents for tests of controls are discussed in AAM section 5400.26.

.34

Statistical Sample Sizes for Test of Controls— Five Percent Risk of Assessing Control Risk Too Low (with number of expected errors in parentheses)

Audit Sampling for Substantive Tests of Details

.38 The purpose of substantive tests of details of transactions and balances is to detect material misstatements in the account balance, transaction class, and disclosure components of the financial statements. An auditor assesses the risks of material misstatement and relies on a combination of further control tests, analytical procedures, and substantive tests of details for providing a basis for the opinion about whether the financial statements are materially misstated. When testing the details of an account balance or class of transactions, the auditor might use audit sampling to obtain evidence about the reasonableness of monetary amounts.

.39 The auditor uses professional judgment to determine whether audit sampling is appropriate. Sampling may not always be appropriate. For example, the auditor may decide that it is more efficient to test an account balance or class of transactions by applying analytical procedures.

.40 When an auditor plans any audit sampling application, the first consideration is the specific account balance or class of transactions and the circumstances in which the procedure is to be applied. The auditor generally identifies items or groups of items that are of individual significance to an audit objective. For example, an auditor planning to use audit sampling as part of the tests of an inventory balance as well as observing the physical inventory would generally identify items that have significantly large balances or that might have other special characteristics.

.41 The auditor considers all special knowledge about the items constituting the balance or class before designing audit sampling procedures. For example, the auditor might identify 20 items that make up 25 percent of the account balance, and decide that those items should be examined 100 percent and excluded from inventory subject to audit sampling. Any items that the auditor has decided to test 100 percent are not part of the population subject to sampling.

.42 A population for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. In some circumstances, an auditor might examine all the items that constitute an account balance or class of transactions that exceed a given amount or that have an unusual characteristic; the auditor might either (1) apply other auditing procedures (for example, analytical procedures) to items that do not exceed a given amount or possess an unusual characteristic or (2) apply no auditing procedures to them because there is an acceptably low risk of material misstatement existing in the remaining items.

.43 Once a decision has been made to use audit sampling, the auditor must choose between statistical and nonstatistical sampling. The choice is primarily a cost-benefit consideration. Statistical sampling uses the laws of probability to measure sampling risk. Any sampling procedure that does not measure the sampling risk is a nonstatistical sampling procedure.

.44 *Determining the test objectives*. A sampling plan for substantive tests of details might be designed to (1) test the reasonableness of one or more assertions about a financial statement amount (for example, the existence of accounts receivable) or (2) make an independent estimate of some amount (for example, the last in, first out (LIFO) index for a LIFO inventory). The auditor should carefully identify the characteristic of interest (for example, the misstatement) for the sampling application that is consistent with the audit objective.

.45 *Defining the population*. The population consists of the items constituting the account balance or class of transactions of interest. The auditor should determine that the population from which he or she selects the sample is appropriate for the specific audit objective because sample results can be projected only to the population from which the sample was selected.

.46 *Defining the sampling unit*. A sampling unit is any of the individual elements that constitute the population, and depends on the audit objective and the nature of the audit procedures to be applied. A sampling unit might be a customer account balance, an individual transaction or an individual entry in a transaction. The auditor might consider which sampling unit leads to a more effective and efficient sampling application in the circumstances.

.47 *Choosing an audit sampling technique*. Either statistical or nonstatistical sampling is appropriate for substantive tests of details. The most common statistical approaches are classical variables sampling and probability-proportional-to-size (PPS) sampling.

.48 *Determining the method of selecting the sample*. The auditor should select the sample in such a way that the sample can be expected to be representative of the population or the stratum from which it is selected.

.49 *Determining the sample size*. Accounting populations tend to include a few very large amounts, a number of moderately large amounts, and a large number of small amounts. Auditors consider the variation in a characteristic when they determine an appropriate sample size for a substantive test, and, generally, the variation of the items' recorded amounts as a means of estimating the variation of the audited amounts of the items in the population. A measure of this variation, or scatter, is called the standard deviation. Sample sizes generally decrease as the variation becomes smaller. Sample sizes for unstratified populations with high variation are generally very large.

.50 In performing substantive tests of details, auditors are also concerned with two aspects of sampling risk:

a. *Risk of incorrect acceptance*—the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.

b. *Risk of incorrect rejection*—the risk that the sample supports the conclusion that the recorded amount is materially misstated when it is not.

.51 When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions is acceptable without causing the financial statements to be materially misstated. The maximum monetary misstatement for the balance or class is called tolerable misstatement for the sample. For a particular account balance or class of transactions, the sample size required to achieve the auditor's objective at a given risk of incorrect acceptance increases as the auditor's assessment of tolerable misstatement for that balance or class decreases.

.52 The auditor also assesses the expected amount of misstatement on the basis of his or her professional judgment after considering such factors as the entity's business, the results of prior year's tests of account balances or class of transactions, the results of any pilot sample, the results of any related substantive tests, and the results of any tests of the related controls.

.53 The effect of population size on the appropriate sample size varies according to the audit sampling method used.

.54 *Performing the sampling plan*. The auditor generally should apply auditing procedures appropriate for the particular audit objectives to each sample item.

.55 *Evaluating the sample results*. In evaluating sample results, the auditor should:

- Project the misstatements found in the sample to the population from which the sample was selected and add that amount to the misstatements discovered in any items examined 100 percent.

- Compare the tolerable misstatement for the account balance or class of transactions with the total projected misstatement, adjusted for corrected misstatements. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement for the population exceeds the tolerable misstatement. The auditor should also aggregate the projected misstatement in the balance or class, after adjustments, if any, with other known or likely misstatements in other balances or classes to evaluate whether the financial statements taken as a whole are materially misstated.
- Consider the qualitative aspects of misstatements. If the sample results suggest that the auditor's planning assumptions were in error, appropriate action is taken.

.56 *Documenting the sampling procedure*. AU section 350 and the audit guide *Audit Sampling*, do not require specific documentation of audit sampling applications. See AAM section 5400.10 for certain documentation requirements of SAS No. 103. Examples of items that the auditor typically documents for substantive tests include:

- The objectives of the test the accounts and assertions affected.
- The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor determined the completeness of the population.
- The definition of a misstatement.
- The risk of incorrect acceptance, the risk of incorrect rejection, and the tolerable misstatement.
- The audit sampling technique used.
- The method of sample selection (specific selection criteria).
- A description of the performance of the sampling procedures and a list of misstatements identified in the sample.
- The evaluation of the sample and a summary of the overall conclusion. A summary of the overall conclusion (if not evident from the results).
- Any qualitative factors considered significant in making the sampling assessments and judgments.

.57 ***Nonstatistical Sampling for Substantive Tests of Details***. Neither AU section 350 nor the audit guide *Audit Sampling*, require the auditor to compare the sample size for a nonstatistical sampling application with a corresponding sample size calculated using statistical theory. Auditors might find familiarity with sample sizes based on statistical theory helpful when applying professional judgment and experience in considering the effect of various planning considerations on sample size.

.58 The following table "Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning" summarizes the effects of various factors on sample sizes for substantive tests of details. (The table is provided only to illustrate the relative effect of different planning considerations on sample size and is not intended as a substitute for professional judgment).

Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning

Factors	*Conditions Leading to:* Smaller Sample Size	Larger Sample Size	*Related Factor for Substantive Sample Planning*
a. Assessment of inherent risk	Low assessed level of inherent risk	High assessed level of inherent risk	Allowable risk of incorrect acceptance
b. Assessment of control risk	Low assessed level of control risk	High assessed level of control risk	Allowable risk of incorrect acceptance
c. Assessment of risk related to other substantive procedures directed at the same assertion (including substantive analytical procedures and other relevant substantive procedures)	Low assessment of risk associated with other relevant substantive procedures	High assessment of risk associated other relevant substantive procedures	Allowable risk of incorrect acceptance
d. Measure of tolerable misstatement for a specific account	Larger measure of tolerable misstatement	Smaller measure of tolerable misstatement	Tolerable misstatement
e. Expected size and frequency of misstatements, or the estimated variance of the population	Smaller misstatements or lower frequency, or smaller population variance	Larger misstatements, higher frequency, or larger population variance	Assessment of population characteristics
f. Number of items in the population	Virtually no effect on sample size unless population is very small		

.59 The following model, based on the statistical theory underlying PPS sampling, illustrates a method of assisting an auditor in gaining an understanding of the relative size of samples for substantive tests of details. The factors presented are based on certain judgments and may differ as auditors' judgments differ in the circumstances. The model illustrates the relative effect of difference planning considerations on sample size only and is not intended as a substitute for professional judgment.

.60 The steps in determining the sample size using this model are:

a. Consider the level of inherent risk for the particular assertion(s).

b. Consider the effectiveness of the controls in preventing and detecting material misstatements.

c. Combine steps *a.* and *b.* using the following categories:

1. Maximum.
2. Slightly below minimum.
3. Moderate.
4. Low.

d. Determine tolerable misstatement.

e. Assess the risk that other substantive procedures designed to test the same assertion will fail to detect a material misstatement in the particular assertion(s).

1. Maximum.
2. Moderate.
3. Low.

f. Estimate the population's recorded amount after deducting any items that will be examined 100 percent.

g. Select the appropriate assurance factor from the following table:

Assurance Factors

Assessment of Inherent and Control Risk	*Risk That Other Substantive Procedures Will Fail to Detect a Material Misstatement*			
	Maximum	*Slightly Below Maximum*	*Moderate*	*Low*
Maximum	3.0	2.7	2.3	2.0
Slightly below maximum	2.7	2.4	2.0	1.6
Moderate	2.3	2.1	1.6	1.2
Low	2.0	1.6	1.2	1.0

Estimate the sample size using the following formula:

$$\text{Population's recorded amount} \,/\, \text{Tolerable misstatement} \times \text{Assurance factor} = \text{Sample size}$$

h. Adjust the sample size estimate to reflect any differences in efficiency between the nonstatistical approach and the statistical approach underlying this model. In practice auditors typically adjust the sample size from 10 percent to 50 percent if the sample is not selected in a statistically efficient manner.

.61 Stratification is particularly important to increasing the efficiency of the sample. If the nonstatistical sample design is planned without stratification, the auditor should increase the sample size. The auditor selects the sample so that it can be expected to be representative of the population from which it has been selected. Before selecting the sample, the auditor generally identifies individually significant items, and may then select the sample from the remaining items using the systematic selection method, which automatically stratifies the sample, or stratify the remaining items into groups and allocate the sample size accordingly.

.62 ***Evaluating the Sample Results***. The misstatement in the sample must be projected to the items from which the sample was selected. One method of projecting the amount of misstatement found in a sample is to divide the amount of misstatement in the sample by the fraction of total dollars in the population included in the sample. For example, if a $100 misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $1,000 ($100/.10).

.63 A second method for projecting the misstatement uses the average difference between the audited and the recorded amounts of each item included in the sample. For example, if $200 of misstatement is found in a sample of 100 items, the average difference between audited and recorded amounts for items in the sample is $2 ($200/100). An estimate of the amount of misstatement in the population may be calculated by multiplying the total number of items in the population (in this case 5,000 items) by the average difference of $2 for each sample item. The estimate of misstatement in the population is $10,000 (5,000 x 2).

Suggested Supplemental Reference Materials

.01 Suggested Supplemental Reference Materials

The following publications are useful in helping to determine the nature, timing, and extent of audit procedures. To order AICPA products, call 1-888-777-7077.

- **Audit and Accounting Guides (AICPA)**

  Each guide describes relevant matters, conditions, and procedures unique to a particular industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- **Audit Risk Alerts (AICPA)**

  Audit Risk Alerts complement the guidance provided in many of the Audit and Accounting Guides by describing current economic, regulatory, and professional developments that can have a significant impact on engagements.

- **Professional Standards (AICPA)**

  The publication features the outstanding pronouncements on professional standards issued by the AICPA, including standards for audits, compilations, and reviews.

- **Accounting Standards—Original Pronouncements (FASB)**

  This publication contains the original text of accounting standards pronouncements with superseded sections and amendments clearly noted.

- **Accounting Standards—Current Text (FASB)**

  This publication is organized as follows: General Standards—generally applicable to all enterprises; Industry Standards—applicable to enterprises operating in specific industries. It includes comprehensive summaries of each subject, plus applicable standards, illustrations and examples.

- **Financial Statement Preparation Manual (AICPA)**

  This publication provides sample statements and checklists for a variety of business enterprises and governmental units.

- **Disclosure Checklist series (AICPA)** (individual paperback versions of sections of the Financial Statement Preparation Manual)

  The practice aids are invaluable to anyone who prepares financial statements and reports. The material has been updated to reflect AICPA, FASB, and GASB pronouncements and interpretations as well as SEC regulations.

- **Auditing Estimates and Other Soft Accounting Information (AICPA)**

  This practice guide provides nonauthoritative guidance for handling the audit problems related to the audit of soft accounting information, including how AU section 342, Auditing Accounting Estimates, *may be applied by practicing auditors.*

- **Accounting Trends & Techniques (AICPA)**

  This publication contains reporting methods, based on a cumulative survey; significant accounting presentations, discussions and trends. By following the lead of these industry front-runners, you can apply the latest techniques and improve your own reporting performance.

- **Fraud Detection in a GAAS Audit (Revised edition) (AICPA)**

  This practice aid provides CPAs with the most recent information related to complying with AU section 316, Consideration of Fraud in a Financial Statement Audit.

- **Technical Practice Aids (AICPA)**

  This publication contains all outstanding AICPA Statements of Position and Practice Bulletins and offers carefully thought-out responses to selected inquiries received by the AICPA Technical Hotline and AICPA Technical and Industry Committees.

- **Auditing Practice Releases (AICPA)**

  These publications are intended to provide practitioners with nonauthoritative practical assistance concerning auditing procedures. Topics include: Confirmation of accounts receivable and audits of inventories.

- **Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools (AICPA)**

  By focusing on unique reporting and auditing matters of commodity entities, this publication gives you nonauthoritative practical guidance on reporting on and auditing these financial statements.

- **Audit Implications of Electronic Document Management and The Information Technology Age: Evidential Matter (AICPA)**

  These two Auditing Procedures Studies contain helpful and valuable guidance about the implications of electronic evidence on an audit.

- **Standard Confirmation Forms (AICPA)**

  This form may be used to request a full report on credit balance, liabilities and contingent liabilities. It may also be used for a confirmation of bank balance only.

- **EITF Abstracts—A Summary of Proceedings of the FASB Emerging Issues Task Force**
- **Accountants' Handbook by Carmichael, Lilien & Mellman (Wiley)**
- **Montgomery's Auditing by O'Reilly, Hirsch, Defliese, and Jaenicke (Wiley)**
- **Handbook of Modern Accounting by Davidson & Weil (McGraw-Hill)**
- **Kohler's Dictionary for Accountants by Coopers & Ijiri (Prentice-Hall)**

AAM Section 6000
Audit Documentation

TABLE OF CONTENTS

[*The next page is 6101.*]

AAM Section 6100
Audit Documentation—General

.01 Audit documentation[1] is the record of audit procedures performed, relevant audit evidence obtained, and conclusions reached by the auditor in the engagement. SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), provides authoritative guidance on the functions and nature, general content, and ownership and confidentiality of audit documentation.

.02 Other SASs contain specific documentation requirements and can be found in Appendix A of SAS No. 103. Additionally, specific documentation or document retention requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement. Furthermore, paragraph 83 of SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316.83), includes documentation requirements regarding the auditor's consideration of fraud and paragraph 51 of SAS No. 100, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722.51), includes documentation requirements the auditor should be aware of.

.03 The auditor should prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached. Audit documentation provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards (GAAS) and provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

.04 SAS No. 103 provides authoritative guidance on audit documentation. SAS No. 103 supersedes SAS No. 96 of the same name. SAS No. 103:

- Requires the auditor to prepare audit documentation in connection with each engagement in sufficient detail to provide an experienced auditor with no previous connection to the audit a clear understanding of the work performed (including the nature, timing, extent and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.
- Provides enhanced guidance on matters that should be documented, including guidance on documentation that should be retained.
- States that oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached, but may be used by the auditor to clarify or explain information contained in the audit documentation.
- Requires the auditor to document audit evidence that is identified as being contradictory or inconsistent with the final conclusions, and how the auditor addressed the contradiction or inconsistency.
- Requires that the auditor assemble the audit documentation to form the final audit engagement file within 60 days following the report release date. After this date, the SAS requires the auditor not to delete or discard existing audit documentation, and appropriately document any subsequent additions.
- Specifies a minimum file retention period of five years from the report release date.

---

[1] Audit documentation also may be referred to as working papers.

SAS No. 103 is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted.

General Discussion

.05 These sections present points of view on the organization and preparation of audit documentation.

.06 Proper planning is important in the design of specific audit documentation if they are to serve the objective of aiding the auditor in the conduct of his work. For example, a well-planned working paper may be designed to provide information that will be needed later in the preparation of tax returns and other required reports, such as those to regulatory bodies, and may therefore eliminate the need for examining the same documents twice to obtain necessary information. The quality, type, and content of the audit documentation are matters of the auditor's professional judgment. The individual preferences of auditors and firms may be informal common practices or expressed as part of a firm's formal written policies and procedures. A firm should consider the nature of its practice and the services commonly provided to its clients, as well as professional standards in developing its procedures and policies on audit documentation. Those procedures and policies should permit the flexibility necessary to meet the needs of individual engagements.

[*The next page is 6201.*]

AAM Section 6200

Basic Elements of Format

.01 Audit documentation formats generally include at least the following for identification purposes:

- A title or heading comprised of (*a*) the name of the client, (*b*) a caption that briefly describes the paper's contents, (*c*) the nature of the engagement, and (*d*) the applicable period or closing date covered by the engagement.
- The initials or names of the auditors who performed and reviewed the work presented in the paper and the date the paper was completed.

.02 In instances when audit documentation requires more than one page, some auditors present the heading on only the lead page, fasten or staple all the applicable pages together as a unit and number each page, for example, 1 of 5, 2 of 5, and so forth. Many auditors index each working paper in some organized pre-established manner. This provides for ease in cross-referencing to other relevant papers, for more organized indexing and filing, and for a form of control over the audit documentation. (See AAM section 6400, *Organization and Filing (Indexing)*.)

.03 Some auditors purchase standard analysis paper that includes preprinted blocks for the initials or signature of the preparer and reviewer, and the dates on which the paper was prepared and reviewed. Others design their own signature and reference blocks and have them imprinted on all of their analysis paper and lined pads. These signature blocks may include captions such as the following:

— prepared by client and tested by

— prepared by

— date prepared

— date tested

— reviewed by

— date reviewed

— source

— audit documentation reference

— footed by

— extensions checked by

.04 Some auditors prefer to identify client preparation of schedules and analysis by notations or codes, such as *PBC*, for prepared by client, rather than use a detailed signature and reference block.

[*The next page is 6301.*]

AAM Section 6300
Content of Audit Documentation

.01 The content of audit documentation varies with the circumstances and needs of the auditors on individual engagements. Some firms, however, include various general and specific instructions on audit documentation content in their policies concerning the working papers.

.02 The AICPA's Auditing Standards Board issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which supersedes SAS No. 96. SAS No. 103 is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted. Among other things, the SAS:

- Requires the auditor to prepare audit documentation in connection with each engagement in sufficient detail to provide an experienced auditor with no previous connection to the audit a clear understanding of the work performed (including the nature, timing, extent and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.
- Provides enhanced guidance on matters that should be documented, including guidance on documentation that should be retained.
- States that oral explanations on their own do no represent sufficient support for the work the auditor performed or conclusions the auditor reached, but may be used by the auditor to clarify or explain information contained in the audit documentation.
- Requires the auditor to document audit evidence that is identified as being contradictory or inconsistent with the final conclusions, and how the auditor addressed the contradiction or inconsistency.
- Requires that the auditor assemble the audit documentation to form the final audit engagement file within 60 days following the report release date. After this date, the SAS requires the auditor not to delete or discard existing audit documentation, and appropriately document any subsequent additions.
- Specifies a minimum file retention period of five years from the report release date.

.03 Examples of audit documentation are audit programs, analyses, memoranda, letters of confirmation and representation, abstracts or copies of entity documents, and schedules or commentaries prepared or obtained by the auditor. Audit documentation may be in paper form, electronic form or other media.

.04 The audit documentation should be sufficient to (*a*) enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent and results of auditing procedures performed, and the evidence obtained; (*b*) indicate the engagement team member(s) who performed and reviewed the work; and (*c*) show that the accounting records agree or reconcile with the financial statements or other information being reported on.

.05 In determining the nature and extent of the documentation for a particular audit area or auditing procedure, the auditor should consider the following factors:

- Risk of material misstatement associated with the assertion, or account or class of transactions
- Extent of judgment involved in performing the work and evaluating the results

- Nature of the auditing procedure
- Significance of the evidence obtained to the assertion being tested
- Nature and extent of exceptions identified
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or evidence obtained

General Considerations

.06 The following are some general considerations on audit documentation content that may be helpful.

- Audit documentation should be sufficiently intelligible, clear and neat so that another auditor who has had no previous connection to the audit can review the workpapers and understand:
  - — The nature, timing, and extent of auditing procedures performed to comply with SASs and applicable legal and regulatory requirements;
  - — The results of the audit procedures performed and the audit evidence obtained;
  - — The conclusions reached on significant matters; and
  - — That the accounting records agree or reconcile with the audited financial statements or other audited information.
- The content of an individual working paper or group of related papers should include identification of the (1) source of the information presented (for example, fixed assets ledger, cash disbursements journal), (2) the nature and extent of the work done and conclusions reached (by symbols and legend, narrative, or a combination of both), and (3) appropriate cross-references to other working papers.
- Before completion of the engagement, all questions or exceptions in the working papers should be resolved. If for some reason the auditor must leave the assignment without resolving all items, he should provide an open items listing on a separate temporary paper for the in-charge auditor's attention. An unresolved exception or incomplete explanation in the working papers may be construed by some as indication of an inadequate audit.
- Information and comments in the audit documentation generally represent statements of fact and professional conclusions. Accordingly, language should be clear and free from such vague judgmental adjectives as *good* or *bad*. Conclusions should be supported by documented facts, especially if they concern the adequacy of the client's records.
- Working papers should be viewed as an integrated presentation of information. The auditor should cross-reference working papers to call attention to interaccount relationships and to reference a paper to other working papers summarizing or detailing related information.
- The preparer should view the working papers as if he were the in-charge auditor. All inferences and conclusions should be supported in the working papers and no misleading or irrelevant statements should be made.
- It is preferable to have negative figures in audit documentation indicated by parentheses instead of red figures to preserve their identity if the papers are photocopied or microfilmed.

Specific Considerations

.07 Audit documentation should include abstracts or copies of significant contracts or agreements that were examined to evaluate the account for significant transactions. Additionally, audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested.

.08 Furthermore, the auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Significant audit findings or issues include, but are not limited to, the following:

- Significant matters involving the selection, application, and consistency of accounting principles with regard to the financial statements, including related disclosures. Such matters include, but are not limited to (1) accounting for complex or unusual transactions or (2) accounting estimates and uncertainties and, if applicable, the related management assumptions.
- Results of auditing procedures that indicate that the financial statements or disclosures could be materially misstated or a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- Circumstances that cause significant difficulty in applying auditing procedures that the auditor considered necessary.
- Findings that could result in modification of the auditor's report.
- Audit adjustments. For purposes of this section, an audit adjustment is a correction of a misstatement of the financial information that is identified by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial information.

.09 SAS No. 103 amends SAS No. 59, *The Auditors' Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341). The amendment adds a requirement for the auditor to document:

- The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern
- The work performed in connection with the auditors evaluation of management's plans
- The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated
- The consideration and effect of that conclusion on the financial statements, disclosures, and the audit report

Timesaving Considerations

.10 There are a number of ways to save time and avoid unnecessary detail in audit documentation preparation. The following examples may be helpful.

- Whenever possible, have the client's employees prepare schedules and analyses. (This, of course, presupposes that the client has the necessary personnel to prepare the materials.)
- Use of a detailed audit program may eliminate the need for lengthy comments in the audit documentation on the scope of audit procedures. (However, some believe that such comments are still necessary when a detailed program is used; this is a matter of individual firm judgment.)
- Analyze asset (or liability) accounts and their related expense or income accounts on the same working paper. Examples include property, plant, and equipment, accumulated depreciation and related depreciation expense; notes receivable, accrued interest receivable and interest income; notes

payable, accrued or prepaid interest, and interest expense; and accrued taxes and related provisions for tax expense.

- Avoid unnecessary computations. For example, if only the totals are meaningful and can be tested by a single independent computation, check the total and avoid unnecessary checking of details.
- Consider using carryforward analyses for accounts that tend to remain constant each year or vary only in accordance with a constant predetermined formula. Examples may include long-term assets and related depreciation or amortization such as plant, equipment, and intangibles, long-term debt with predetermined payment schedules, and capital stock.
- Consider using adding machine tapes instead of writing separate lists. Enter names or explanations on the tapes, when appropriate.
- Use symbols (tick marks) whenever possible, especially when the same symbol applies to several working papers.

Symbols (Tick Marks)

.11 When using symbols, it should be helpful to consider the following basic concepts:

- Symbols are merely a shorthand means of explaining a work step performed on a particular item of data. Symbols serve as means of conserving time and space and, if properly used, may ease review of the audit documentation.
- For a working paper to be clear to a reviewer or other reader, each symbol must be clearly explained. The explanation may be located on the same page as the items subjected to the work step, or on a separate legend that is clearly cross-referenced to and from the page that presents the applicable items.
- Symbols should be kept simple, distinctive and clear so they can be quickly written by the preparer and easily identified by a reviewer.

.12 Applying these basic concepts is not that simple. Various auditors have conflicting notions about symbols. For example, some believe a set of standardized symbols can expedite preparation and review. Others believe that a set of standardized symbols is impractical because it lacks flexibility. Because it is generally agreed that symbols are an effective timesaver, it is desirable for firms to establish and communicate a policy on their use to maximize their potential effectiveness.

.13 Commonly used symbols, as noted, should be simple and distinctive, not elaborate hieroglyphics. The most common are variations on a simple checkmark—for example, a checkmark with a slash, a checkmark with a circle at the end, a double checkmark, and any one of these within a circle. This abbreviated listing alone provides eight distinctive tick marks. Symbols may also include circled letters or numbers.

[*The next page is 6401.*]

AAM Section 6400
Organization and Filing (Indexing)

.01 Some auditors organize their audit documentation during the course of an engagement into general categories such as the following:

- Planning and administration.
- Internal control understanding and assessment of control risk.
- Substantive test audit documentation arranged in order of the balance sheet and income statement classifications.
- Trial balances, consolidating working papers, journal entries (adjustments, reclassifications, eliminations for consolidation), and potential entries.
- Draft reports, financial statements, and notes.
- Programs, checklists, and questionnaires (some keep these as separate units, others interfile them among working papers by statement classifications).
- General matters such as current minutes, contracts, and articles of incorporation that may apply to future engagements as well as current work.

Under this approach, actual indexing and filing would be deferred until the conclusion of the engagement.

Predetermined Indexing

.02 Other practitioners and firms may use a predetermined indexing approach so that working papers can be indexed while the field work is still in progress. This offers the following advantages:

- Better control over audit documentation during the performance of field work.
- Constant arrangement of audit documentation in logical order to aid in review.
- Less time required in assembling and binding them into indexed files.
- Quicker access to specific audit documentation after it is filed.

.03 Predetermined indexing involves establishing a standard code for each section of the audit documentation, using letters and numbers, or numbers only. For example—

	Two Possible Alternatives	
Working trial balance—assets	B/S-A	T/B-1
Working trial balance—liabilities	B/S-L	T/B-2
Working trial balance—income & expense	P/L	T/B-3
Cash summary schedule	A	10
Receivables summary schedule	B	20
Inventory summary schedule	C	30

.04 Predetermined indexing requires recognition of the need for flexibility to meet unanticipated audit documentation needs or specialized industry requirements and it requires care to avoid undue complexity. Excessively complex references may obstruct rather than ease audit documentation preparation, cross-referencing and filing. Accordingly, it is helpful to develop an organizational plan adaptable to each section of the audit documentation. For example, some accountants classify working papers as lead schedules, primary detail, and secondary detail which might result in the following classification scheme for the above examples for cash:

	Using Letters and Numbers	*Using Only Numbers*
Lead schedule	(A)	(10)
Primary detail schedules	(A-1) (A-2) etc.	(10-1) (10-2) etc.
Secondary detail schedules	(A-1-1) (A-1-2) (A-1-3)	(10-1-1) (10-1-2)
	(A-2-1) (A-2-2) (A-2-3)	(10-2-1) (10-2-2)

.05 Predetermined (standardized) indexing systems may be printed on separate pages for reference during the performance of field work and insertion in the front of audit documentation binders or files when the work is completed. Some firms have their uniform indexing systems printed directly on their file or binder covers.

.06 A well-organized indexing system need not be too complex. On a fairly small engagement, the indexing system may be a lead schedule divider tab between each major group of accounts with the name of the account on it (for example, cash or accounts receivable) with the related workpapers filed behind the lead schedule without being individually indexed. At the completion of the engagement, the pages can be consecutively numbered within each account group (for example, 1 of 10, 2 of 10, etc.), since there typically are not numerous or complex layers of supporting schedules, extensive cross-referencing can be avoided.

.07 On large engagements, particularly those with detailed charts of accounts, firms may consider it necessary to develop more complex indexing systems. In one such system, standard index number series are assigned as follows:

Current audit documentation	1000—7000
Permanent file	7100—9999

.08 In this system, each index number consists of four digits, with the addition decimals if necessary. Numbers ending with double zero are reserved for lead schedules whose total agrees with a line item on the working trial balance (index 1400). Single zeros are used for specific types of accounts (such as 2010, petty cash funds).

.09 Certain index numbers can be permanently assigned to each major financial statement classification. For instance, index 2000 may be assigned to cash. If various bank accounts exist, the cash schedules are assigned index numbers 2002, 2003, etc. Documentation such as supporting confirmations and lists of outstanding checks would be assigned index numbers commencing with 2001.1, 2001.2, etc. As for the permanent audit documentation file, index 9300, for example, may be assigned to internal control. Accordingly, flowcharts and related questionnaires would be assigned index numbers in that series.

Current and Permanent Files

.10 Audit documentation files are generally classified as current files and permanent (continuing) files. Current files contain information that is pertinent to a single engagement. Permanent files include information relevant to several recurring engagements. Some firms have their binder or file covers preprinted as current or permanent accompanied by pertinent portions of their uniform audit documentation indexes.

.11 A common challenge to many auditors is to keep the permanent file complete and current, and free from outdated or irrelevant materials that belong in an inactive file of superseded materials.

.12 Some auditors who have confronted one too many unwieldy permanent files believe all audit documentation should be classified as current with certain materials designated as matters of continuing interest to be carried forward each year until they become outdated. Under this approach, a firm may preprint its complete index on one type of file or binder cover and provide space to indicate whether specific contents are continuing or carry forward in nature.

.13 The permanent files should be reviewed and updated, as needed, annually. Examples of documents that may be found in permanent files are listed in AAM section 6400.16.

Practice Tip

The audit documentation files should contain copies of final executed documents. Any drafts or unsigned versions of documents should be replaced with final versions.

Audit Documentation Retention

.14 In December 2005, the AICPA's Auditing Standards Board issued SAS No. 103, *Audit Documentation*, (AICPA, *Professional Standards*, vol. 1, AU sec. 339) which supersedes SAS No. 96, of the same name. SAS No. 103 states that the auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than five years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period. SAS No. 103 is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted.

.15 Determining the proper periods for retaining records is a major decision for practitioners. Records should be preserved for only as long as they serve a useful purpose or until all legal requirements are met. Record retention periods vary among firms; however, retention periods should generally correspond with the longest statute of limitations prevailing in each state for breach of contract, breach of fiduciary duty, and professional liability claims.

.16 Audit documentation may be retained permanently or for periods corresponding with the longest state statute of limitations, as noted above. Generally, certain audited financial statement workpaper data, such as accounts receivable confirmations are destroyed after ten years. Examples of audit documentation that should be retained permanently include auditor's reports, reports filed with the SEC, tax returns for current clients, and audit documentation for current clients. Some firms divide the retention period into two parts, records are first filed in the office and later placed in storage (for example, three years in the office and then permanently in storage). Other records, such as audit documentation files for former clients, may be retained for three years in the office, seven years in storage and then destroyed after the retention period. No material should be destroyed without the specific approval of the engagement partner. An annual schedule should be established for reviewing and purging firm data. Since there is substantial variation in the retention periods used by firms, each firm should carefully consider its requirements and consult with legal counsel before adopting a retention period.

.17 For further guidance on record retention, see the AICPA *Management of an Accounting Practice Handbook.*

Ownership and Confidentiality of Audit Documentation

.18 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes.

.19 The auditor has an ethical and in some situations a legal obligation to maintain the confidentiality of client information. Because audit documentation contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

.20 The auditor should adopt reasonable procedures to prevent unauthorized access to the audit documentation.

.21 The auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his practice or to satisfy any legal or regulatory requirements for record retention. Such period should not be shorter than five years from the report release date.

Index Topics

.22 The following is a list of topics to consider in developing a standard index for audit documentation. This list is detailed, but is by no means all-inclusive. For example, specialized industries such as life insurance and banking need other specialized topics. Several of the topics may be eliminated, condensed or expanded, depending on the auditor's needs and preferences. Topics that some auditors prefer to include in both the permanent and current files or only in the permanent files are followed by the letter (P).

Planning and administration

- Time & Budget data
- General correspondence & memos
- Planning memos—current
- Planning notes & confirm copies for use in next engagement
- Engagement letters
- Schedules & analyses to be prepared by client
- Minutes
- Checklist of an administrative nature if required by firm policy

Audit or work program (Note 1)

Matters of continuing concern

- Client's industry—background (P)
- Description & brief history of client (P)
- Data & ratio analysis of client's operations (P)
- Client's facilities (P)
- Articles of incorporation (P)
- Bylaws (P)
- Current contracts & agreements (P)
  - — Debt agreements (P)
  - — Leases (P)
  - — Labor contracts (P)
  - — Agreements with officers & key people (P)

  - — Pension plans (P)
  - — Profit-sharing plans (P)
  - — Stock warrants (P)
  - — Stock options (P)
  - — Other agreements (P)
  - — Client's accounting policies & procedures (P)
  - — Carryforward analyses (Note 2)

Internal control

- Internal control questionnaire, narrative, flowcharts, etc. (Note 3)
- Initial assessment of control risk memos
- Tests of controls

Reports, financial statements and footnotes, trial balances, and assembly sheets

- Reports & financial statements (including letter, if any, on reportable conditions in internal control)
- Consolidating working papers
- Consolidation eliminating entries
- Trial balance
- Adjusting journal entries
- Reclassification journal entries
- Recap of possible adjusting entries
- Assembly sheets supporting footnote disclosures (if the information is not included elsewhere in the audit documentation)
- Disclosure checklists (if required by firm policy)
- supporting schedules (if required for reports to regulatory bodies or other reports)
- Tax return information & work sheets (Note 4)

Assets

- Cash
- Marketable securities (and related income)
- Notes receivable (and related interest)
- Accounts receivable
  - — Summary and analyses
  - — Confirmation procedures (Note 2 and 5)
- Allowance for doubtful accounts & notes (Note 2)
- Inventories
  - — Summary and analysis
  - — Price tests, cost & market

- — Obsolescence review
- — Observation, test counts & cutoff data
- — LIFO determinations

- Prepaid expenses
- Other current assets
- Investments
- Property, plant & and accumulated depreciation, depletion & amortization (Note 2)
- Intangible deferred charges & amortization (Note 2)
- Other assets
- Intercompany accounts

Liabilities

- Notes payable (and related interest)
- Accounts payable
- Accrued liabilities other than income taxes
- Accrued income taxes (current & deferred), related provisions & credits (Note 2)
  - — Federal
  - — State & local
- Other current liabilities
- Long-term debt (including current maturities and capitalized leases) (Note 2)
- Other long-term liabilities
- Deferred income (Note 2)

Commitments and contingencies

- Attorney's letters
- Abstractors of commitments & contingencies noted during review of minutes, contracts & agreements, confirmation responses, etc.
- Subsequent events review
- Management representation letter

Equity (capital accounts) (Note 2)

- Capital stock
- Additional paid-in capital
- Treasury stock
- Retained earnings
- Partnership capital

Revenue and expenses

- Operating revenues
- Cost of sales
- Selling, general & administrative
- Other operating expenses
- Other income
- Other expense
- Extraordinary & unusual items
- Secondary schedules
  - — Maintenance & repairs
  - — Taxes other than income taxes
  - — Rents
  - — Royalties
  - — Advertising costs
  - — Legal fees
  - — Interest expense recap

Notes to User:

1. Alternate practices of filing audit programs include:
   (a) Putting the program in a binder that is separate and distinct from current and permanent files.
   (b) Putting the Signed off program in the current file.
   (c) Keeping a master copy of the program in the permanent file with the signed off copies dispersed among the related audit documentation segments in the current file.
2. Certain classifications may lend themselves to carry-forward audit documentation. Examples include allowances for doubtful accounts, brief summaries of confirmation response statistics, accumulated depreciation and amortization, deferred income taxes and open tax positions, long-term debt, and capital accounts.
3. Internal control questionnaires may be filed as separate binders or as part of current of permanent files.
4. Some firms and practitioners keep tax return preparation working papers in files that are completely separate from other types of engagement working papers.
5. For situations involving voluminous responses or bulk inventory listings, the bulk materials may be filed in separate binders that are cross referenced to the pertinent audit documentation (for example: accounts receivable, accounts payable, and inventory).

Correspondence, Confirmations & Representations

> These samples are presented for illustrative purposes only. They are intended as mere conveniences for users of this Manual who may want points of departure when designing their own formats to meet their individual needs. These illustrations are neither all inclusive nor are they prescribed minimums. Auditors and accountants are to rely on professional standards and their individual professional judgment in determining what may be needed in the circumstances.

TABLE OF CONTENTS

[*The next page is 7101.*]

AAM Section 7100

Control of Confirmations and Correspondence

.01 Generally, clients prepare correspondence and confirmation requests on their own letterhead and submit to the auditor the signed originals and copies. The auditor may obtain one or more copies to serve as file copies for the current audit documentation, second requests and manuscript copies for the next engagement.

.02 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.03 The negative form requests the recipient to respond only of he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (*a*) the combined assessed level of inherent and control risk is low, (*b*) a large number of small balances is involved, and (*c*) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration.

.04 The confirmation requests should be reviewed to the extent the auditor considers necessary. For example, the auditor may perform the following for accounts receivable confirmation requests before they are mailed:

- Compare the names and addresses to the client's records.
- Compare balances per confirmation requests to the subsidiary ledger.

.05 The requests would then be stuffed in envelopes and submitted to the post office under the auditor's control.[1]

.06 The auditor controls the mailings and receipt of responses so that the confirmation process is independent of the client.

.07 Mailing envelopes have the auditor's office or post office box number as the return address so that undeliverable letters are returned to the auditor and not to the client. For mailings, the auditor may provide the envelopes or affix a label on the client's envelope that covers the client's return address and replaces it with the auditor's address.

.08 Reply envelopes addressed to the auditor are enclosed with the request letter. Reply envelopes generally have prepaid postage to encourage responses. Some auditors also use codes on the reply envelopes so that responses may be sorted by engagement before the mail is opened. This feature may be particularly useful when there are several engagements that involve voluminous mailings.

---

[1] In April 2007 the AICPA issued Auditing Interpretation No. 1, "Use of Electronic Confirmations," of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06). This interpretation states that properly controlled electronic confirmations may be considered to be reliable audit evidence and discusses auditor considerations when using electronic confirmations.

.09 If the client objects to use of the auditor's name and address, some auditors suggest that a post office box in the client's name be used, with the returns to be opened under the auditor's control for the confirmation process, and that the post office be instructed that after the box is closed subsequent mail be forwarded to the auditor.

[*The next page is 7201.*]

AAM Section 7200

Requests for Confirmations and Related Materials

Wording of Confirmation Request Forms

.01 Forms and correspondence used for confirmation requests should state clearly that the client is requesting that a reply be sent to the CPA. Forms and correspondence used for information requests for engagements other than audits should not refer to "an audit." They should also use the term "accountant(s)" rather than "auditors." Suggested wording follows:

> Please send the following information to our certified public accountants (*name and address of accountants*) who are performing accounting services for the company.

.02 The samples of correspondence in this section include language that refers to auditors and an audit of the client's financial statements on the assumption that an audit is being performed. This language needs to be modified if services other than an audit are being performed.

.03 Request for Bank Cutoff Statement

[*Prepared on Client's Letterhead*]

[*Date*]

Financial Institution Official
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of (*name of client*) as of (*balance-sheet date*) and for the (*period*) then ended, we request that you send the following information directly to our auditors (*name and address of auditors*) as of close of business (*balance-sheet date*):

1. The information requested on the enclosed standard form(s) to confirm account balance information with your financial institution.
2. For the account numbers listed below, statement(s) of our account(s) and the related paid checks for the period from (*balance-sheet date*) to (*two weeks subsequent to the balance-sheet date*) inclusive.

Account Number	*Account Name*
____________________	____________________
____________________	____________________
____________________	____________________
____________________	____________________

Sincerely,
[*Name of Customer*]

____

By: ____________________

____

Notes: (A) This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

(B) The request should be sent at least ten days prior to the audit date so the bank will be able to provide the information requested and to render the cutoff statements as requested. If the request does not reach the bank before the cutoff date, the cutoff statement will include transactions after that date.

(C) The letter may also include requests for:

- Confirmation of all securities or other items held for the clients account as of the closing date for collection or safekeeping, or as agent or trustee (a listing should be provided including titles and account numbers).
- Confirmation of the list of authorized signers for the above accounts. (This may have been previously requested at a preliminary date in connection with assessment of control risk.)

.04 Standard Form to Confirm Account Balance Information With Financial Institutions

STANDARD FORM TO CONFIRM ACCOUNT BALANCE INFORMATION WITH FINANCIAL INSTITUTIONS

____
CUSTOMER NAME

Financial Institution's Name and Address [ ] [ ]

We have provided to our accountants the following information as of the close of business on ________________, 20_____, regarding our deposit and loan balances. Please confirm the accuracy of the information, noting any exceptions to the information provided. If the balances have been left blank, please complete this form by furnishing the balance in the appropriate space below.* Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other deposit and loan accounts we may have with you comes to your attention, please include such information below. Please use the enclosed envelope to return the form directly to our accountants.

1. At the close of business on the date listed above, our records indicated the following deposit balance(s):

ACCOUNT NAME	ACCOUNT NO.	INTEREST RATE	BALANCE*

2. We were directly liable to the financial institution for loans at the close of business on the date listed above as follows:

ACCOUNT NO./ DESCRIPTION	BALANCE*	DATE DUE	INTEREST RATE	DATE THROUGH WHICH INTEREST IS PAID	DESCRIPTION OF COLLATERAL

______________________________ ______________________________
(Customer's Authorized Signature) (Date)

The information presented above by the customer is in agreement with our records. Although we have not conducted a comprehensive, detailed search of our records, no other deposit or loan accounts have come to our attention except as noted below.

.05 Request for Confirmation of Petty Cash Fund and Advances to Employees

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors, (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of the petty cash fund (or amount of advances) in your possession as of December 31, 20XX which was shown by our records as $________.

Please indicate in the space provided below whether the amount above agrees with your records. If not, please send the auditors any information you have that will help them reconcile the difference.

After signing and dating your reply, please return it directly to the auditors. A stamped, addressed enveloped is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

____

The foregoing information is in agreement with my records as of December 31, 20XX with the following exceptions (if any):

____

____

____

Date: ________________________________ Signed: ________________________________

.06 Securities and Cash in Custodian or Trust Accounts

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Custodian or Trustee*]
[*Address*]

Our auditors, (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the enclosed list of securities owned at (*date*) and the amount of principal and income of cash held by you at that date for each of the following accounts [Notes (B) & (C)]:

(If a list is not obtained from the client, the auditor should complete the following for each account:

	Name of Account	Account No. [Note (A)]	Amount Held
1.	______________________	________________________	________________________
2.	______________________	________________________	________________________
3.	______________________	________________________	________________________)

Please also indicate to the auditors whether to your knowledge any of the securities are pledged or otherwise encumbered.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Notes: (A) Use the custodian or trustee's account number.

(B) This letter may be expanded, if necessary, to request cutoff statements of activity (principal and interest) in the accounts.

(C) Sometimes this request is combined with a request for cutoff bank statements and the standard form to confirm account balance information with financial institutions. However, it may be more practical to send separate letters because a bank's commercial banking and trust departments are usually separate operations.

.07 Securities Held by Brokers

[*Prepared on Client's Letterhead*]

[*Date*]

[*Broker's Name*]
[*Address*]

In connection with the audit of our financial statements, please send directly to our auditors (*name and address of auditors*), a statement of our account(s) with you as of (*date*), indicating the following information:

1. Securities held by you for our account.

2. Securities out for transfer to our name.

3. Any amounts payable to or due from us.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Notes: (A) The request should be sent so it reaches the broker sufficiently in advance of the listing date for the broker to respond in a practical manner.

(B) It may be helpful to include the account number(s) used by the broker for the client's account(s).

.08 Sample Receipts for Return of Cash or Securities Counted by Auditor's Representative, and Cutoff Bank Statements Received Directly by the Auditors

Cash Count

The above detailed items were counted in my presence and returned to me intact by (*individual's name*), representative of (*auditor's firm name*).

(*Date and Time*) Custodian: ______________________________
(Custodian's Signature)

Securities Count

Received intact from (*individual's name*), representative of (*auditor's firm name*), the securities listed above contained in Box ______ of the (*name of bank or custodian*) which were counted by him or her in my presence (or presented to him or her for count).

Date and Time: ____________________ Signed: ______________________________

Title: ______________________________

Cutoff Bank Statement(s)

Received intact from (*individual's name*), representative of (*auditor's firm name*), the cutoff bank statements and related paid checks for the period from __________ to __________ (*periods indicated*) for the accounts listed below:

Date and Time: ____________________ Signed: ______________________________

Title: ______________________________

Notes: (A) Receipt(s) should be written and signed in *ink.*

(B) For counts of petty cash funds, the receipt may be written directly on the bottom of the petty cash-count working paper. For security counts and returns of cutoff bank statements, the receipt may be prepared as a separate working paper.

.09 Accounts Receivable—Positive

[*Prepared on Client's Letterhead*]

[*Customer Name*]
[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors (*name and address of auditors*) the amount of your indebtedness to us which according to our records as of (*date*) amounted to $________.

If the amount shown is in agreement with your records. Please check "A" below.

If the amount is not in agreement with your records, please check and complete "B" below.

After checking the appropriate response, please sign and date your reply and mail it directly to our auditors in the enclosed envelope. DO NOT SEND ANY PAYMENTS to our auditors.

Very truly yours,

[*Client's Authorized Signature*]

A ____________ The balance above agrees with my records.

B ____________ My records show a balance of $________.

The difference may be due to the following:

____

____

____

____
[*Signed by*]

____
[*Date*]

.10 Accounts Receivable—Negative

[*May be a sticker or stamp used on client's statements to customers*]

PLEASE CHECK THIS STATEMENT

If this statement is *not correct* please write promptly (using the enclosed envelope), giving details of any differences, directly to our auditors,

[Name of auditors]

____

[Address of auditors]

____

who are now conducting an audit of our financial statements.

If you do not write to our auditors, they will consider this statement to be correct.

Remittances should NOT be sent to the auditors.

Notes: (A) A negative confirmation may also be requested in letter form using similar wording.

(B) The auditor should consider sending confirmation requests at the time of the client's regular monthly billings. Coordination of confirmation procedures with the client's routine preparation and mailing of statements may offer efficiency to both the auditor and client.

(C) Negative confirmation requests may be used as substantive procedure to reduce audit risk *only* when three conditions exist: (1) the combined assessed level of inherent and control risk is low, (2) a large number of small balances is involved, and (3) the auditor has no reason to believe that the recipients of the request are unlikely to give them consideration.

.11 Notes Receivable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors (*name and address of auditors*) are performing an audit of our financial statements. Accordingly, please confirm directly to our auditors the amount of your indebtedness due us as of (*date*), which our records show as follows:

Type of indebtedness	______________________
Initial date of indebtedness	______________________
Original amount of indebtedness	______________________
Unpaid principal	______________________
Interest rate	______________________
Interest paid to	______________________
Periodic payments required	______________________
Description of collateral	______________________

If the above information is in agreement with your records, please so indicate by signing in the place provided below and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please so note in the space provided the particulars shown in your records and any information which may help reconcile the difference from our records. **Payments should not be sent to the auditors.**

Very truly yours,

[*Client's Authorized Signature*]

The above information is correct as of (*date*) with the following exceptions (if any):____________________

____

____

____

____

____

____

Signed: ________________________________ Date: ________________________________

.12 Inventories Held by Warehouses or Others When Listing Is Not Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please send directly to our auditors the following information about merchandise held in your custody for our account at (*date*):

1. Quantities on hand; for each lot please indicate the following:
   - *a.* Lot number (list each lot separately)
   - *b.* Date received
   - *c.* Kind of merchandise
   - *d.* Unit of measure or package
     - (1) Number of units
     - (2) Kind of units (box, can, crate, quart, pound, dozen, etc.)
2. A statement about how you determined the above requested quantities; specify whether they were determined by physical count, weight or measure, or if they represent your book record.
3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.
4. Statement of any known liens against this merchandise.
5. Amount of unpaid charges, if any, as of (*date*).

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

.13 Inventories Held by Warehouses or Others When Listing Is Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about the merchandise held by you for our account as of (*date*):

1. The correctness of the quantities shown on the enclosed listing of such merchandise prepared from our records (a second copy is enclosed for your files). If the enclosed listing differs from the quantities you held for us as of (*date*), please include details of the specific differences in your response to our auditors.

2. Your statement on how you determined the correctness of the quantities you are confirming; please specify whether determined by physical count, weight or measure, or whether the quantities are from your records.

3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.

4. Statement of any known liens against these goods.

5. Amount of any unpaid charges as of (*date*).

Please mail your reply directly to (*name and address of auditors*). A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

.15 Pension Plan Actuarial Information

FASB Statement No. 132R, *Employers' Disclosures about Pensions and Other Postretirement Benefits—an amendment of FASB Statements No. 87, 88, and 106* (AC P16 and P40), provides reduced disclosure requirements for nonpublic companies. Part C of this letter assumes companies have elected the reduced disclosures allowed by that statement. Paragraph 8 of FASB Statement No. 132 describes the reduced disclosure requirements. For companies not electing the reduced disclosures, information required for disclosure can be obtained from Parts B and D of the letter.

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Actuary*]
[*Address*]

In connection with the audit of our financial statements for the period ending (*balance-sheet date*) by our independent auditors (*name and address of auditors*), please furnish them the information described below as it pertains to the XYZ Pension Plan, which is a defined benefit plan. For your convenience in response to those requests, you may supply pertinent sections, properly signed and dated, of your actuarial report, or pension expense report, if they are available and if they contain the requested information.

A. Please provide a brief description of the following:

1. The employee group covered.
2. The benefit provisions of the plan used in the calculation of the net periodic pension cost for the period and of the accumulated benefit obligation and the projected benefit obligation at the end of the period. Please identify any such benefit provisions that had not taken effect in the year. Please also provide the date of the most recent plan amendment included in your calculation. Please identify any participants or benefits excluded from the calculations, such as benefits guaranteed under an insurance or annuity contract.
3. The percentages of the plan's assets that are invested in debt securities, equity securities, real estate, and any additional classifications of investment. Please identify the target compositions, if any, for the aforementioned classifications of investment groups.
4. A narrative description of the plan's investment policies and strategies, and the basis used to determine the expected long-term rate of return on plan assets.
5. The method and the amortization period, if any, used for the following:
    a. Calculation of a market-related value of plan assets, if different from the fair value.
    b. Amortization of any transition asset or obligation.
    c. Amortization of unrecognized prior service cost.
    d. Amortization of unrecognized net gain or loss.
6. Any substantive commitments for benefits that exceed the benefits defined by the written plan that are included in the calculations.
7. Determination of the value of any insurance or annuity contracts included in the assets.
8. Nature and effect of significant plan amendments and other significant matters affecting comparability of net periodic pension cost, funded status, and other information for the current period with that for the prior period.
9. The following information relating to the employee census data used in calculating the benefit obligations and pension cost:
    a. The source and nature of the data is ____________________ and the date as of which the census data was collected is ___________________.
    b. The following information concerning participants:

Participants	Number of Persons	Compensation (if applicable)
Currently receiving payments	________	________
Active with vested benefits	________	________
Terminated with deferred vested benefits	________	________
Active without vested benefits	________	________
Other (describe)	________	________

***Note:** If information is not available for all the above categories, please indicate the categories that have been grouped and describe any group or groups of participants excluded from the above information.*

c. Information for the following individuals contained in the census:

Participant's Name or Number	Age or Birth Date	Sex	Salary	Date Hired or Years of Service

***Note to Auditor:** The auditor should select information from employer records to compare with the census data used by the actuary. In addition, the auditor may wish to have the actuary select certain census data from his/her files to compare with the employer's records.*

B. Please provide the following information on the net periodic pension cost for the period ending on __________:

1. Service cost* $__________
2. Interest cost* __________
3. Expected return on assets* __________
4. Other components* __________
   a. Amortization of unrecognized net loss or (gain) from earlier periods __________
   b. Amortization of unrecognized prior service cost __________
   c. Amortization of the remaining unrecognized net obligation or (asset) existing at the date of the initial application of FASB Statement No. 87—transition obligation or (asset) __________
   d. Amount of loss (or gain) recognized due to a settlement or curtailment. __________
   e. Net total of components ($a + b + c + d$) $__________
5. Net periodic pension cost: ($1 + 2 - 3 + 4e$) $__________
6. The above measurement of the net periodic pension cost is based on the following assumptions:
   Weighted-average discount rate ________%
   Weighted-average rate of compensation increase ________%
   Weighted-average expected long-term rate of return on plan assets ________%

   Please describe the basis on which the above rates were selected and whether the basis is consistent with the prior period.

   Please briefly describe the other assumptions used in the above measurement.

* FASB recently issued Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*. FASB Statement No. 158 amends FASB Statements No. 87, 88, 106, and 132(R). The intent of the statement is to improve financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year end balance sheet, with some exceptions. An employer with publicly traded equity securities is required to disclose the status of a defined pension plan as of the fiscal year ending after December 15, 2006. A entity without publicly traded equity securities should disclose the status of the plan for fiscal years ending after December 15, 2006, but before June 15, 2007.

7. The calculations of the items shown in B1 and B5 are based on the following:

    Asset information at __________

    Census data __________

    Measurement date (must not be more than three months before the end of the last fiscal year) __________

    Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in B1 to B5.

C. Please provide the following information for disclosure in the financial statements for the period ending ____________:

	Estimated
1. Projected Benefit Obligation	$__________
2. Fair Value of Plan Assets	__________
3. Funded Status of the Plan (2-1)	__________
4. Employer Contributions to the Plan	__________
5. Participant Contributions to the Plan	__________
6. Benefits Paid	__________
7. (Accrued) or prepaid pension cost in the company financial statements	__________
8. The amount of any intangible asset or liability that is recognized pursuant to paragraph 35 may result in a temporary difference, as defined by FASB Statement No. 109, *Accounting for Income Taxes*. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to paragraphs 35–39 of Statement 109.	__________
9. The amount of any accumulated other comprehensive income or liability that is recognized pursuant to paragraph 35 may result in a temporary difference, as defined by FASB Statement No. 109, *Accounting for Income Taxes*. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to paragraphs 35–39 of Statement 109.	__________
10. The amount included in other comprehensive income for the period arising from a change in the minimum pension liability recognized in accordance with FASB Statement No. 158, *Employers' Accounting for Post Retirement Benefit Plans*.	__________
11. The above amount of the projected benefit obligation is measured based on the following assumptions:	
Weighted-average discount rate	__________%
Weighted-average rate of compensation increase	__________%
Please provide a brief description of the other assumptions used in the measurement.	
12. The calculation of the items shown in C1 to C10 is based on the following:	
Asset information at	__________
Census data at	__________
Measurement date (must be not more than three months before the current fiscal year end)	__________

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in C1 to C10.

13. Please describe any significant events noted subsequent to the current year's measurement date and as of the date of your reply to this request and the effects of those events, such as a large plant closing, which could materially affect the amounts shown in C1 to C10.

14. Please describe any significant transactions between the employer or related parties and the plan during the period, including, if applicable, the amounts and types of securities of the employer and related parties included in plan assets and the amount of future annual benefits covered by insurance contracts issued by the employer or related parties.

D. Please provide an analysis for the period showing beginning amounts, additions, reductions, and ending amounts of the:*

1. Projected benefit obligation, ____________
2. Fair value of plan assets, ____________
3. Unrecognized prior service cost, ____________
4. Unrecognized net loss (gain), ____________
5. Net transition obligation (asset), and ____________
6. Accumulated benefit obligation (ending amount only). ____________

E. Please provide our independent auditors with descriptions and the amounts of gains or losses from combinations, divestitures, settlements, curtailments or termination benefits during the year, such as:

1. Purchases of annuity contracts,
2. Lump-sum cash payments to plan participants,
3. Other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation, and eliminates significant risks related to the obligation and assets,
4. Any events that significantly reduced the expected years of future service of employees,
5. Any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service, or
6. Any special or contractual termination benefits offered to employees.

F. Please provide the amounts of anticipated cash payments for benefits for each of the next five years, as well as the expected aggregate amount of benefit payments for the subsequent five-year period (years six through ten).

G. Was all of the information above determined in accordance with FASB Statement Nos. 87, 88, and 89 (including the FASB's Guides to Implementation of Statements 87 and 88 and the American Academy of Actuaries', "An Actuary's Guide to Compliance with Statement of Financial Accounting Standards No. 87") to the best of your knowledge? If not, please describe any differences.

H. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.

Please mail your response directly to [*Audit Firm's Name and Address*] in the enclosed return envelope as soon as possible, but no later than [*Date*].

Very truly yours,

____

[*Client's Authorized Signature*]

* See footnote * in paragraph .15, Pension Plan Actuarial Information.

.16 Pension Plan Assets Held by Trustee

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Trustee or Custodian*]
[*Address*]

Our auditors (*name and address of auditor*) are conducting an audit of our financial statements. Accordingly, please provide our auditors directly with a listing of the assets including market values as of (*date*) for our employees' pension trust (*title and trustee's account number*).

Please also provide the auditors with the following information about our employees' pension trust for the period from (*beginning of period*) to (*end of period*) [see note below]:

1. Contributions by the Company during the above period.
2. Contributions by employees during the above period.
3. Payments to beneficiaries during the above period.
4. Any unpaid fees due for services rendered to (*balance-sheet date*).

Please send your reply directly to our auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Note: A listing of the assets might not be requested if one had already been received by the client. In that case, the auditor might want the trustee to confirm the total market value per the listing.

.17 Notes Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements.

Accordingly, please confirm directly to them the following information relating to our note(s) payable to you, as of (*date*):

Date of note	________
Original amount	$________
Unpaid principal	
Balance	$________
Periodic payments required	$________
Payment periods	________
Maturity date	________
Interest rate	________%
Date to which interest has been paid	________
Amount and description of collateral	________
Description of terms, for example, demand provisions, prepayment penalties, etc.	________
Any other direct or contingent liabilities to you ("None" or description)	________

If the above information is in agreement with your records at that date, please so indicate by signing in the place provided below and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please note in the space provided the particulars shown in your records and any information which may help reconcile the difference from our records.

Very truly yours,

[*Client's Authorized Signature*]

____

The above information is correct as of (*date*) with the following exceptions (*if any*): ____________________

____

Date: ______________________________ Signature: ______________________________

Title: ______________________________

.18 Mortgage Debt

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Creditor or Trustee*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about our mortgage indebtedness to you as of (*date*):

1. Original amount $________
2. Date of note ________
3. Unpaid principal balance $________
4. Interest rate ________%
5. Terms for payment of principal ________
6. Date to which interest has been paid ________
7. Nature of mortgage and description or address of property mortgaged ________
8. Amounts on deposit with you in escrow for:
   a. Insurance $________
   b. Real estate taxes $________
9. Amounts paid during the period (*dates from and to*) for:
   a. Insurance $________
   b. Taxes $________
10. Amounts on deposit with you for the "reserve for repairs" $________
11. The nature of defaults, if any ________
12. Description of terms, e.g., prepayment penalties, demand provisions, etc. ________

A return envelope is enclosed for your reply.

Very truly yours,

[*Client's Authorized Signature*]

Note: Many of the items requested will vary with the circumstance of the particular mortgage or other debt involved. The above sample assumes the indenture involves an escrow arrangement for insurance and real estate taxes and a deposit account for repairs.

.19 Accounts Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors (*name and address of auditors*), the amount of our liability to you as of (*date*). Please attach a statement of our account due. If no balance is due, please attach a statement of our account showing payments made.

Please mail your reply directly to (*name of auditors*). A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

____

Our records indicate that a balance of $_________ was from (*name of client*) at (*date*).

.20 Obligation to Lessor

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessor*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements as of (*balance-sheet date*) and for the (*time period*) then ended. In connection with this audit, please provide directly to our auditors the following information as of (*balance-sheet date*) regarding the lease dated (*date lease was executed*) of (*brief identification of property under lease*) which we are leasing from you:

1. Inception and expiration dates for the lease period, from ______________ to ______________
2. Amount of monthly rent ______________
3. Renewal options (if any):
   a. Dates of renewal period, from ______________ to ______________
   b. Amount of monthly rent for renewal ______________
4. Purchase options (if any):
   a. Amount of purchase price ______________
   b. Inception and expiration dates of option, from ______________ to ______________
   c. Percent of monthly rent (if any) applicable towards purchase price ______________
5. Dates and descriptions of amendments or supplementary understandings, if any, to the lease mentioned above.
6. The amount of outstanding delinquent payments, if any.
7. A statement that there are no defaults, or the nature of defaults, if any.

A return envelope is enclosed for your reply.

Very truly yours,

[*Client's Authorized Signature*]

____

Note: The content of this type of letter will vary based on the auditor's professional judgment in the circumstances. To provide additional illustrative language, the above letter is not made parallel with the illustration at AAM section 7200.23.

.21 Property Out on Lease

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessee*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements as of (*balance-sheet date*) and for the (*time period*) then ended. In connection with this audit, please confirm directly to our auditors the following information regarding the lease dated (*execution date of lease*) of (*brief identification of property under lease*) which you are leasing from us:

1. Inception and expiration dates of lease period from ______________ to ______________
2. Amount of monthly rent ______________
3. Total rent payments made ______________
4. Date of last payment ______________

A return envelope is enclosed for your reply.

[*Client's Authorized Signature*]

____

Notes: (A) If the leased property is of a mobile or portable nature such as a bulldozer or television camera, the confirmation may also include a request for specific serial numbers of significant equipment.

(B) In certain circumstances, the auditor may wish to consider confirming additional information such as renewal options, purchase options, and amendments or supplementary understandings.

.22 Register—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Registrar*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of the close of business (*balance-sheet date*) about each class of our preferred and common stock:

1. Authorized number of shares ______________
2. Issued number of shares ______________
3. Outstanding number of shares ______________

Please also indicate the amount of any unpaid registrar fees due you as of (*balance-sheet date*).

A return envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

The above information agrees with our records at (balance-sheet date) with the following exceptions:_____

____

____

____

____

Signed: ____ Date: ____

[*Name and Title*]

Notes: (A) It may be helpful to include the registrar's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) The above illustration assumes the client has a separate transfer agent (see AAM section 7200.25).

.23 Transfer Agent—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Transfer Agent*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of (*balance-sheet date*) about each class of our preferred and common stock:

1. Authorized number of shares ________________
2. Number of shares issued and outstanding ________________
3. Number of outstanding shares registered in the name of our Company ________________

Please also indicate the amount of any unpaid transfer agent fees due you as of (*balance-sheet date*).

A return envelope is enclosed for your convenience.

Very truly yours,

[*Authorized Signature for Client*]

The above information agrees with our records at (*balance-sheet date*) with the following exceptions: ______

____

____

____

____

Signed: ______________________________ Date: ______________________________

[*Name and Title*]

Notes: (A) It may be helpful to include the transfer agent's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) Depending on the auditor's judgment in the circumstances the confirmation request may also include inquiries about such matters as (i) the number of shares issued to each of specifically mentioned officers and directors, (ii) specified information about shareholders owning more than a stated percent of the total outstanding shares, and (iii) amounts deposited during the year for the payment of dividends.

.24 Request for Confirmation of Money Market Fund

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors, (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of our money market fund account(s) as of (*date*).

Please indicate in the space provided below the account number(s) and balance(s) of our account(s) per your records.

Please sign and date your reply and return it directly to the auditors. A stamped, self-addressed envelope is enclosed for your convenience.

Very truly yours,

.25 Confirmation of Contingent Liabilities

[*Date*]

Financial Institution Official†
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of (*name of customer*) as of (*balance-sheet date*) and for the (*period*) then ended, we have advised our independent auditors of the information listed below, which we believe is a complete and accurate description of our contingent liabilities, including oral and written guarantees, with your financial institution. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other contingent liabilities, including oral and written guarantees, from your financial institution comes to your attention, please include such information below.

Name of Maker	Date of Note	Due Date	Current Balance

Interest Rate	Date Through Which Interest is Paid	Description of Collateral	Description of Purpose of Note

Information related to oral and written guarantees is as follows:

____

____

____

____

Please confirm whether the information about contingent liabilities presented above is correct by signing below and returning this directly to our independent auditors (*name and address of CPA firm*).

Sincerely,
[*Name of Customer*]

____

By: _____________________________
[*Authorized Signature*]

† This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements. Some official institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

Dear CPA Firm:

The above information listing contingent liabilities, including oral and written guarantees, agrees with the records of this financial institution.[‡] Although we have not conducted a comprehensive, detailed search of our records, no information about other contingent liabilities, including oral and written guarantees, came to our attention. [Note exceptions below or in an attached letter.]

[*Title*]

[‡] If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.26 Confirmation of Compensating Balances

[*Date*]

Financial Institution Official[11]
First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of (*name of customer*) as of (*balance-sheet date*) and for the (*period*) then ended, we have advised our independent auditors that as of the close of business on (*balance-sheet date*) there (were) (were not) compensating balance arrangements as described in our agreement dated (*date*). Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other compensating balance arrangements between (*name of customer*) and your financial institution comes to your attention, please include such information below. Withdrawal by (*name of customer*) of the compensating balance (was) (was not) legally restricted at (*date*). The terms of the compensating arrangements at (*date*) were:

EXAMPLES:

1. The Company has been expected to maintain an average compensating balance of 20 percent of its average loan understanding, as determined from the financial institution's ledger records adjusted for estimated average uncollected funds.

2. The Company has been expected to maintain an average compensating balance of $100,000 during the year, as determined from the financial institution's ledger records without adjustment for uncollected funds.

3. The Company has been expected to maintain a compensating balance, as determined from the financial institution's ledger records without adjustment for uncollected funds, of 15 percent of its outstanding loans plus 10 percent of its unused line of credit.

4. The Company has been expected to maintain as a compensating balance noninterest bearing time deposits of 10 percent of its outstanding loans.

In determining compliance with compensating balance arrangements, the Company uses a factor for uncollected funds of _____ (business) (calendar) days.[1]

There (were the following) (were no) changes in the compensating balance arrangements during the (*period*) and subsequently through the date of this letter.

The Company (was) (was not) in compliance with the compensating balance arrangements during the (*period*) and subsequently through the date of this letter.

There (were the following) (were no) sanctions (applied or imminent) by the financial institution because of noncompliance with compensating balance arrangements.[2]

---

[11] This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the compensating balance arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

[1] Not applicable if compensating balances are based on the financial institution's ledger records without adjustment for uncollected funds. If some other method is used for determining collected funds for compensating balance purposes, the method used should be described.

[2] Applicable only if the financial institution has applied sanctions during the (*period*) or notified the Company that sanctions may be applied. Indicate details.

During the (*period*), and subsequently through the date of this letter, (no) (the following) compensating balances were maintained by the Company at the financial institution on behalf of an affiliate, director, officer, or any other third party and (no) (the following) third party maintained compensating balances at the bank on behalf of the Company. (Withdrawal of such compensating balances (was) (was not) legally restricted.)

Please confirm whether the information about compensating balances presented above is correct by signing below, and returning this letter directly to our independent auditors (*name and address of CPA Firm*).

Sincerely,

.28 Related-Party Confirmation

In certain situations, the auditor may want to confirm the existence of related parties with directors, principal officers, major shareholders, or others. For example, a company does not have adequate controls and processes in place to identify related party transactions and the auditor has not otherwise been satisfied as to the extent of related party transactions. The following is an illustrative related party confirmation letter that an auditor may use when the auditor is not otherwise satisfied as to the extent of related party transactions.

[*Date*]

[*Name of Director, Principal Officer or Major Stockholder*]
[*Address*]

Dear [*Name*]:

In connection with an audit of our financial statements, please furnish answers to the attached questionnaire, sign your name, and return the questionnaire in the enclosed stamped, addressed envelope directly to our auditors (*name and address of auditors*). The questionnaire is designed to provide the auditors with information about the interests of officers, directors, and other related parties in transactions with the Company.

Please answer all questions. If the answer to any question is "yes," please explain. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions. Thank you for your cooperation.

Sincerely,

____
[*Client's Authorized Signature*]

____
[*Title*]

[*Client Name*]

Related-Party Questionnaire

Please answer all questions. If the answer to any question is "Yes," explain. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions.

1. Have you or any related-party of yours had any interest, direct or indirect, in any sales, purchases, transfers, leasing arrangements or guarantees or other transactions since (*beginning of period of audit*) to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?

2. Do you or any related-party of yours have any interest, direct or indirect, in any pending or incomplete sales, purchases, transfers, leasing arrangements, guarantees or other transactions to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) is, or is to be, a party?

3. Have you or any related-party of yours been indebted to the Company (or specify any pension, retirement, savings, or similar plan provided by the client) at any time since (*beginning of period of audit*)? Please exclude amounts due for purchases on usual trade terms and for ordinary travel and expense advances.

The answers to the foregoing questions are correct to the best of my knowledge and belief.

______________________________	______________________________

See definitions which follow.

Definitions

Company: Parent company, any subsidiary or investee for which investments are accounted for by the equity method

Related Party: Any (1) party (other than the Company) of which you are an officer, director, or partner or are, directly or indirectly, the beneficial owner of 10 percent or more of the voting interests; (2) any trust or other estate in which you have a substantial beneficial ownership or for which you serve as a trustee or in a similar fiduciary capacity; (3) any member of your immediate family; and (4) other party with which you may deal if you (or the other party) control or can significantly influence the other to an extent that either of you might be prevented from fully pursuing your own separate interests.

Control: Possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a party, whether through ownership, by contract, or otherwise.

Party: An individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or an unincorporated organization.

Beneficial Owner: Party who enjoys, or has the right to secure, benefits substantially equivalent to those of the ownership of securities, even though the securities are not registered in the party's name. Examples of beneficial ownership include securities held for the party's benefit in the name of others, such as nominees, custodians, brokers, trustees, executors and other fiduciaries; a partnership of which the person is a partner; and a corporation for which the party owns substantially all of the stock. Shares (1) held (individually or in a fiduciary capacity) by the party's spouse, the party's or his or her spouse's minor children, or a relative of the party or his or her spouse who shares the same home with the party; or (2) as to which the party can vest or revest title in himself or herself at once or at some future time are also considered as being beneficially owned.

AAM Section 7300
Inquiries to Legal Counsel[A]

.01 Illustrative Inquiry Letter to Legal Counsel[B]

[*Prepared on Client's Letterhead* (see Note C)]

[*Date* (see Note D)]

[*Name of Lawyer*]
[*Address of Lawyer*]

Dear ____________________ :

In connection with an audit of our financial statements at (*balance-sheet date*) and for the (*period*) then ended, management of the Company has prepared, and furnished to our auditors (*name and address of auditors*), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (*balance-sheet date*) and during the period from that date to the date of your response.

Pending or Threatened Litigation

(excluding unasserted claims)

> [Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.]

Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments

(considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

> [Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.]

Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

> [The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

Very truly yours,

[*Authorized Signature for Client*]

Notes: (A) If a client has not needed to retain legal counsel, the auditor may express an unqualified opinion on the financial statements even though he has not obtained a letter from legal counsel of the Company. In these circumstances, the auditor should obtain written representation from the Company that legal counsel has not been retained for matters concerning business operations that may involve current or prospective litigation.

(B) Extracted from AU section 337, the appendix to *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* . [See Note D.]

(C) Auditors should carefully consider the provisions of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, (AICPA, *Professional Standards*, vol. 1) in drafting this letter.

(D) Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client should consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

.02 Illustrative Inquiry Letter to Legal Counsel If Management Has Not Provided Details About Pending or Threatened Litigation

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lawyer*]
[*Address of Lawyer*]

In connection with an audit of our financial statements at (*balance-sheet date*) and for the (*period*) then ended, please furnish to our auditors (*name and address of auditors*), the information requested below for which you have been engaged to provide legal consultation or representation.

Pending or Threatened Litigation, Claims and Assessments

(excluding unasserted claims and assessments)

Please furnish a list of all pending or threatened litigation, claims, and assessments your firm is handling on our behalf including the following:

1. The nature of the litigation (including the amount of monetary or other damages sought).

2. The progress of the case to date.

3. How management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement).

4. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.

Unasserted Claims and Assessments

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosing concerning such possible claim or assessment, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5, as a matter of professional responsibility to us. *Please specifically confirm to our auditors that our understanding is correct*.

We have represented to our auditors that there are no unasserted claims which are not specifically identified in this letter that you advised us are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5.

(If unasserted claims exist, management's listed information should include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted; and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.)

Please furnish our auditors any explanation you consider necessary to supplement the foregoing information, including an explanation of these matters as to which your views may differ from those stated.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the organization, such as guarantees of indebtedness of others.]

Very truly yours,

[*Authorized Signature for Client*]

Notes: (A) Auditors should carefully consider the provisions of AU section 337 in drafting this letter.

(B) Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client should consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

(C) If a client has not needed to retain legal counsel, an unqualified opinion may be expressed on the financial statements even though a letter from legal counsel has not been obtained. In these circumstances, a written representation should be obtained from the Company that legal counsel has not been retained for matters concerning its operations that involve current or prospective litigation.

.03 Improving Inquiry Techniques

If inquiries to legal counsel are not sufficiently detailed or specific, deficiencies in attorneys' responses may result. A conference between the auditor and the attorney may be necessary to clarify the attorney's written response and AU section 337, paragraph .10 provides for such a conference. However, to improve the auditor's ability to receive all of the information necessary to complete his/her audit, he/she may wish to consider the following matters in an inquiry to legal counsel:

a. A request that the attorney specify the effective date of his/her response if it is other than the date of the reply.

b. A request that the attorney mail the response so that it will be received by a certain date.

c. A request that the nature of any litigation specifically identify (i) the proceedings, (ii) the claim(s) asserted, (iii) the amount of monetary damages sought, or if no amounts are indicated in preliminary case filings, a statement to that effect, and (iv) the objectives sought by the plaintiff, if any, other than monetary or other damages, such as performance or discontinued performance of certain actions.

d. A request that the attorney avoid such vague phrases as "meritorious defenses," "without substantial merit," and "reasonable chance" in expressing an opinion on the outcome of litigation.

e. If an opinion cannot be expressed on the outcome of litigation, a request that the attorney so state together with his/her reasons for that position.

f. A request that the attorney specify to what extent potential damages are covered by insurance. (It may be possible to obtain the opinion of the insurer's counsel regarding the applicability of insurance coverage.)

g. A request that the attorney provide a summary of material litigation, claims, and assessments settled during the period.

h. A statement that confirmation of the understanding regarding disclosure of unasserted claims and assessments is an integral part of the audit inquiry and that failure to so confirm will require a follow-up contact.

i. A statement that the attorney's response will not be quoted or referred to in the financial statements without first consulting with him/her.

[*The next page is 7401.*]

AAM Section 7400

Management Representations and Representation Letters

.01 AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), requires an auditor to obtain written representations from management for all financial statements and periods covered by the auditor's report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.*

.02 Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. Such representations from management are part of the evidential matter the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit.

Specific Representations

.03 In connection with an audit of financial statements presented in accordance with generally accepted accounting principles, specific representations should relate to the following matters:

Financial Statements

a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

b. Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.

Completeness of Information

c. Availability of all financial records and related data.

d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.

e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.

f. Absence of unrecorded transactions.

---

* The AICPA recently released Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*). Auditors may find this practice aid useful when conducting audits in accordance with generally accepted auditing standards (GAAS). This TPA discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The TPA indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.

Recognition, Measurement, and Disclosure

g. Management's belief that the effects of any uncorrected financial statement misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.[†] (A summary of such items should be included in or attached to the letter.)[‡]

h. Management's acknowledgement of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.

i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.

j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.

l. Information concerning related-party transactions and amounts receivable from or payable to related parties.

m. Guarantees, whether written or oral, under which the entity is contingently liable.

n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties.*

o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies* (AC C59).[|]

q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.

s. Compliance with aspects of contractual agreements that may affect the financial statements.

Subsequent Events

t. Information concerning subsequent events.

The representation letter ordinarily should be tailored to include additional appropriate representations from management concerning matters specific to the entity's business or industry.

[†] If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example,

"We do not agree that items XX and XX constitute misstatements because [*description of reasons*]."

[‡] AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated.

[|] If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see Auditing Interpretation No. 6, "Client Has Not Consulted a Lawyer" of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1, AU sec. 9337.15–.17).

Materiality Considerations

.04 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements.

Addressing and Dating

.05 The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report.

Management's Signatures

.06 The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity.

Scope Limitations

.07 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or withdraw from the engagement. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

Illustrative Representation Letter—Audit of Financial Statements

.08 The following letter, which relates to an audit of financial statements prepared in conformity with generally accepted accounting principles, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report, for example, "balance sheets of XYZ Company as of December 31, 20X1 and 20X0, and the related statements of income and retained earnings and cash flows for the years then ended." The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited.

.09 If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . ." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allocations discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

.10 The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

.11 Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in AU section 316, *Consideration of Fraud in a Financial Statement Audit*, (AICPA, *Professional Standards*, vol. 1) and related parties, in footnote 1 of AU section 334, *Related Parties* (AICPA, *Professional Standards*, vol. 1). To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

.12 The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of AU section 333.

.13 Illustrative Representation Letter

[*Prepared on Client's Letterhead*]

[*Date*]

To [*Independent Auditor*]

We are providing this letter in connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the (consolidated) financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, (as of [*date of auditor's report*],) the following representations made to you during your audit(s):

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted the United States of America.
2. We have made available to you all—
   a. Financial records and related data.
   b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
   a. Management,
   b. Employees who have significant roles in internal control, or
   c. Others where the fraud could have a material effect on the financial statements.
8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
10. The following have been properly recorded or disclosed in the financial statements—
    a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

b. Guarantees, whether written or oral, under which the company is contingently liable.

c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (AICPA, *Technical Practice Aids*). (Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.)

11. There are no—

a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies.*[1]

c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

[*Add additional representations that are unique to the entity's business or industry.* (See paragraph .07 and Appendix B, "Additional Illustrative Representations," of AU section 333).]

[*Add any representations related to new accounting or auditing standards that are being implemented for the first time.*]

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____

[*Name of Chief Executive Officer and Title*]

____

[*Name of Chief Financial Officer and Title*]

Notes: Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about:

- The appropriateness of the measurement methods, including related assumptions used by management in determining the fair value and the consistency in application of the methods.
- The completeness and adequacy of disclosures related to fair values.
- Whether subsequent events require adjustments to the fair value measurements and disclosures included in the financial statements.

[1] In the circumstances discussed in footnote 7 of AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), this representation might be worded as follows: We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with FASB Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

.14 Illustrative Representation Letter—Audit of Personal Financial Statements

[*Date*]

[*To the Independent Auditor*]

We are providing this letter in connection with your audit of the statement of financial condition of James and Jane Person as of [*date*] and the related statement of changes in net worth for the [*period*] then ended for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the financial condition and changes in the net worth, of James and Jane Person in conformity with generally accepted accounting principles. We confirm that we are responsible for the fair presentation in the statement of financial condition and changes in net worth in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report),*] the following representations made to you during your audit.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.
2. We have made available to you all financial records and related data.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
4. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
5. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
6. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
   a. Us.
   b. Others where the fraud could have a material effect on the financial statements.
7. We have no knowledge of any allegations of fraud or suspected fraud affecting us received in communications from analysts, regulators, short sellers, or others.
8. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
9. The following have been properly recorded or disclosed in the financial statements:
   a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
   b. Guarantees, whether written or oral, under which we are contingently liable.
   c. Significant estimates and material concentrations known to us that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6. [*Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.*]

10. There are no—
    a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
    b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*.[2]
    c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.
11. We have satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.
12. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

To the best of our knowledge and belief, no events have occurred subsequent to the statement of financial condition date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____

(James Person)

____

(Jane Person)

[2] Footnote 7 of AU section 333 states that if a lawyer has not been consulted regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments. In the circumstances discussed in footnote 7 to AU section 333, this representation might be worded as follows:

> We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

.15 Illustrative Representation Letter to Other Accountants

[*Firm's Letterhead*]

[*Date*]

____

____

____

In connection with the report you have been requested to reissue on the financial statements of ____________ ______________ [*client's name*] for the year ended __________________________ [*date*], which statements are to be included comparatively with similar statements for the year ended __________________________ [*date*], we make the following representations.

We have audited (or reviewed or compiled) the balance sheet of __________________________ [*client's name*] as of __________________________ [*balance-sheet date*] and the related statements of earnings, retained earnings, and cash flows for the year then ended. Our procedures in connection with the engagement did not disclose any events or transactions subsequent to __________________________ [*predecessor's balance-sheet date*] which, in our opinion, would have a material effect upon the financial statements, or which would require mention in the notes to the financial statements of __________________________ [*client's name*] for the year then ended.

Should anything come to our attention prior to the date our report is issued which, in our judgment, would have a material effect upon the financial statements covered by your report, we shall notify you promptly.

Very truly yours,

____

[*Engagement Partner's Signature*]

____

Note: If any matters come to the firm's attention that may require revision of the previous financial statements, they should be included in a separate paragraph after approval by the engagement partner.

.16 Letter to Other Accountants Upon Whose Work We Plan to Rely

[*Firm's Letterhead*]

[*Date*]

____

____

____

We are auditing the financial statements of __________________________ [*client's name*], __________________________ [*parent company*]. The financial statements of __________________________ [*other accountants' client's name*] that you are auditing are to be included in the financial statements of __________________________ [*client's name*]. We will rely on your report on the financial statements in expressing an opinion on the (consolidated) financial statements of __________________________ [*client's name*] (and subsidiaries). In that connection, we will refer to your report.

Please confirm to us that your firm is independent with respect to __________________________ [*client's name*] and __________________________ [*other accountant's client's name*] within the meaning of Rule 101 of the Code of Professional Conduct of the American Institute of Certified Public Accountants.

Please provide us promptly, in writing, with the following information in connection with your current examination of the financial statements of __________________________ [*other accountant's client's name*] with respect to:

1. Related-party transactions or other matters that have come to your attention. We are aware of the following related parties: __________________________ [*names of known related parties*].

2. Any limitation on the scope of your examination that is related to the financial statements of __________________________ [*client's name*], or that limits your ability to respond to this inquiry.

Please update your letter to indicate any additional matters of the type designated above that have come to your attention through the date of your report on the financial statements of __________________________ [*other accountants' client's name*].

Very truly yours,

____

.17 Illustrative Updating Management Representation Letter

The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of AU section 333. Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

[*Firm's Letterhead*]

[*Date*]

To [*Auditor*]

In connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [*date of previous representation letter*]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [*date of latest balance sheet reported on by the auditor*] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

AAM Section 7500
Communication With Audit Committees

.01 Illustrative Communication With Audit Committees

Addressee:[*]

Statement on Auditing Standards (SAS) No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) issued by the AICPA Auditing Standards Board requires the auditor to communicate certain matters to those charged with governance. Those charged with governance includes those responsible for overseeing the strategic direction of the entity and obligations related to the accountability of the entity including the oversight of the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards (GAAS). The following comments regarding the scope and results of our audit of (*name of client*) for the year ended December 31, 20X2 will assist you in overseeing the financial reporting and disclosure process for which management is responsible.

Scope of Audit

Our responsibility is to express an opinion on the financial statements based on our audit. This audit is to be conducted in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation.

Results of Audit

This part of the letter would address the following:

1. Management's choice of significant accounting policies and their application. This includes methods proposed for new transactions or events, significant unusual transactions, or controversial areas such as equity investments, off-balance-sheet financing or revenue recognition.

2. Procedures used by management to determine accounting estimates and the data the auditor has considered to determine the reasonableness of the estimates.[1]

3. Adjustments arising from the audit that could, in his judgment, either individually or in the aggregate, have a significant effect on the entity's financial reporting process.

---

[*] SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements. Those charged with governance means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. For entities with a board of directors, the term encompasses the term board of directors or audit committee used elsewhere in generally accepted auditing standards.

[1] In January 2003, the Auditing Standards Board issued AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1), which states that certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. According to AU section 328.50, the auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.

4. Uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
5. In connection with a Securities Exchange Commission engagement, the auditor's judgments about the quality, not just the acceptability, of the entity's accounting principles as applied in its financial reporting. (See AU section 380.11 for further information.)
6. Other information presented by management that is included with the entity's audited financial statements. The auditor should discuss the nature of his/her responsibility for such information with the audit committee,* including procedures performed, if any, and the results.
7. Nature of and circumstances surrounding any disagreements with management about the application of GAAP, the determination of accounting estimates, or scope of the audit that could be significant to the entity's annual reporting.
8. Auditor's views about any accounting or auditing matters discussed by management with other auditors (opinion shopping).
9. Major discussions by management with the auditor about the initial or continued retention of the auditor.
10. Any serious difficulties encountered in conducting the audit.

This report is intended solely for the information and use of the audit committee,* management and others in the organization (or specified regulatory agency) and is not intended to be and should not be used by anyone other than these specified parties.

[*Signature*]

[*Date*]

* See footnote * in paragraph .01, Illustrative Communication With Audit Committees.

.02 Report on Reportable Conditions[2]

[*Date of Auditor's Report on the Financial Statements*]

In planning and performing our audit of the financial statements of the ________________ (*client's name*) for the year ended ________________ (*financial statement date*), we considered its internal control in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on internal control. However, we noted the following matters involving internal control and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design and operation of internal control that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Bank Reconciliations

Bank reconciliations have been prepared for the operating cash account, but they have not been in agreement with the general ledger, often by as much as ________________ . At ________________, the general ledger balance varied from the bank reconciliation by $________________ .

In prior years, the bank reconciliations did not reconcile exactly to the general ledger; however, the variances were not as significant as in 20XX. To maintain effective internal controls over cash, it is critical that bank accounts be reconciled to the general ledger monthly with differences identified and resolved immediately. At the present time, an adjusting journal entry should be made to bring the general ledger balance into agreement with the reconciled balance.

Accounts Payable

A listing of accounts payable as of ________________ could not be produced to support the general ledger amount. We were able to reconcile accounts payable to the general ledger amount by reviewing computer-generated payable listings dated ________________, along with examining unpaid invoices at the time of our field work.

As indicated in previous letters to the Board, accounts payable has been an ongoing problem due to the fact that the accounts payable listing is not reconciled to the general ledger monthly. Proper recording of accounts payable is a key to maintaining adequate financial statements. Whether computer-generated or manually

---

[2] In May 2006, the AICPA's Auditing Standards Board issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), which supersedes SAS No. 60. SAS No. 112 requires the auditor to communicate, in writing, to management and those charged with governance, significant deficiencies and material weaknesses identified in an audit. SAS No. 112 is effective for audits of financial statements ending on or after December 15, 2006; earlier implementation is permitted. If applying SAS No. 112, the first paragraph of this report should be replaced with the following:

> In planning and performing our audit of the financial statements of the __________ (*client's name*) as of and for the year ended ____________ (*financial statement date*), in accordance with auditing standards generally accepted in the United States of America, we considered (*client's name*) internal controls over financial reporting (*internal control*) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.
>
> Our consideration on internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.
>
> A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.
>
> We consider the following deficiencies to be significant deficiencies in internal control:

prepared, a detailed accounts payable listing should be reconciled monthly to the general ledger balance. All reconciliations should be reviewed and approved by someone other than the preparer, with the reviewer being responsible for ensuring that all differences are resolved.

Property and Equipment

Documentation provided to support the changes in property and equipment was not in agreement with the changes in the general ledger balances, for some categories, by as much as ______. Also, the computer-generated list of property and equipment was not in agreement with the total property and equipment recorded in the general ledger; therefore, this listing was not a useful resource.

The property and equipment computer listing should be reviewed, revised, and reconciled to the general ledger. Changes in property and equipment should be recorded timely and the detailed property and equipment listing should be reconciled to the general ledger balances monthly.

The procedures for recording fixed asset additions and deletions should be reviewed to determine their adequacy. Adjusting journal entries with regard to trade-ins, sales and other retirements of fixed assets should be reviewed by the Treasurer or someone other than the person preparing the entry. Examples of problems encountered include improper capitalization of assets when a like kind exchange or trade-in is involved and improper recording of gain or loss on sale of assets.

An annual or biannual physical inventory of equipment is an effective management tool to help maintain detail property and equipment records and strengthen controls of safeguarding equipment. The Board should consider making a physical inventory a standard procedure.

This report is intended solely for the information and the use of the Board of Directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

____

[*Engagement Partner*]

.03 Report on Reportable Conditions That Also Identifies a Material Weakness[3]

[*Date of Auditor's Report on the Financial Statements*]

In planning and performing our audit of the financial statements of the ________________ (*client's name*) for the year ended ________________ (*financial statement date*), we considered its internal control in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on internal control. However, we noted the following matters involving internal control and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design and operation of internal control that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Accrued Vacation

Although accrued vacation has not been recorded on the financial statements, the amount of accrued vacation must be considered in determining the fair presentation of the financial statements. The year end analysis of accrued vacation had a balance significantly lower than the prior year's balance. The details of the analysis were traced to the "attendance control cards." We found (1) the number of days earned on the listing did not agree to that recorded in the cards, (2) individuals were reported in the cards with earned vacation but were not on the listing, and (3) some of the cards appeared to not have been maintained.

Detailed records of vacation days earned and used by employees should be timely and accurately maintained. At least annually, these days should be converted to dollar amounts. Management should review the conversion and consider reporting this liability on the financial statements for complete recognition of liabilities.

Discussions with the Office Manager revealed that not all employees are required to notify her when they use vacation days. All employees should be required to inform the Office Manager of all vacation days taken. Employees should also be asked to periodically review their vacation records with the Office Manager and to indicate their agreement by signing the records.

Bad Debts

During 20XX, the Board approved the write-off of accounts receivable of about ________. The write-off was charged to revenue rather than to bad-debt expense.

---

[3] In May 2006, the AICPA's Auditing Standards Board issued SAS No. 112 which supersedes SAS No. 60. SAS No. 112 requires the auditor to communicate, in writing, to management and those charged with governance, significant deficiencies and material weaknesses identified in an audit. SAS No. 112 is effective for audits of financial statements ending on or after December 15, 2006; earlier implementation is permitted. If applying SAS No. 112, the first paragraph of this report should be replaced with the following:

> In planning and performing our audit of the financial statements of the __________ (*client's name*) as of and for the year ended ____________ (*financial statement date*), in accordance with auditing standards generally accepted in the United States of America, we considered (*client's name*) internal controls over financial reporting (*internal control*) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.
>
> Our consideration on internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.
>
> A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.
>
> We consider the following deficiencies to be significant deficiencies in internal control:

Procedures for recording bad debt write-offs should be reviewed for adequacy. All adjusting entries should be reviewed by the Treasurer or a member of management other than the person preparing the journal entry.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe that the following reportable condition is a material weakness.[4]

Blank Checks

Blank checks are maintained in an unlocked cabinet along with the check signing machine.

Blank checks and the check signing machine should be locked in separate locations so as to prevent the embezzlement of funds.

This report is intended solely for the information and use of the Board of Directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

____
[*Engagement Partner*]

[*The next page is 7601.*]

[4] If applying SAS No. 112, this paragraph should be replaced with the following:
A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. We believe that the following deficiency constitutes a material weakness:

AAM Section 7600
Reliance Letter

.01 Illustrative Reliance Letter

Addressee:

The following is in response to your letter to our firm dated ________ .

We performed an audit of ABC Company's balance sheet dated December 31, 20X0, and the related statements of income, retained earnings, and cash flow for the year then ended. The financial statements were audited as of the financial statement date and the audit procedures performed were completed on March 28, 20X1 (*audit report date*). No additional audit procedures were performed subsequent to March 28, 20X1.

The audit was conducted in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. However, a properly designed and executed audit may not detect a material irregularity. For example, generally accepted auditing standards do not require that an auditor authenticate documents, nor is an auditor trained to do so. Also audit procedures that are effective for detecting a misstatement that is unintentional may not be effective for a misstatement that is intentional and is concealed through collusion between client personnel and third parties or among management or employees of the client.

We understand that you intend to rely on the report and associated statements in connection with (*describe as precisely as possible the transaction in connection with which the third party intends to rely on the report and statements*). It should be noted that the audit procedures performed in order to render an opinion on the financial statements of ABC Company may not be adequate or appropriate for this purpose. Because of the limitations inherent in the audit process we may not have detected all material misstatements. Accordingly, our audit was not intended for your benefit and should not be taken to supplant the inquiries and procedures that you should take to satisfy yourself as to ABC Company's credit-worthiness. We recommend that you perform your own due diligence investigation which should include but not be limited to the following steps (*itemize*). We emphasize that this list of procedures may not be all inclusive and that we cannot provide any assurance that the procedures we have mentioned will be sufficient for your purposes.

AAM Section 7700
Proposal Letter

.01 Illustrative Proposal Letter

[*Date*]

____

____

____

We appreciate this opportunity to present a proposal for (*nature of services*) and a brief description of our firm and services.

Our firm was formed in 20___. We have _____ partners and _____ staff and support personnel working with clients in accounting and auditing, taxation, and various consulting services. Although we serve all size clients, our clientele consists primarily of small and medium-size businesses such as yours.

Our professional objectives are to provide the highest quality services on a timely basis. As a member of the AICPA Division for Firm's Private Companies Practice Section, our accounting and auditing practice has been subjected to a review by another firm of CPAs. We received an unqualified opinion as a result of that review. We extend our client relationships to include ongoing contact and services to achieve our services objectives.

We have extensive experience in the ___________ industry. This experience and related understanding of your industry's operations permit us to design, perform, and complete engagements for your company effectively and at a reasonable cost.

Our services include the following:

- Accounting, Auditing, and Attestation Services

  Our accounting, auditing, and attestation services include annual or special audits, compilations and reviews of financial statements, and the examination and review of financial and other information under the attestation standards. We accompany our report on audited financial statements with a reportable conditions letter and a management letter that include suggestions to correct internal control weaknesses and recommendations for operational efficiencies. Our purpose in making these suggestions is to help you accomplish your operational objectives. These suggestions often result in cost savings.

- Tax Services

  We offer diversified tax services, including assistance in all phases of federal, state, and local income taxes; estate, inheritance, and gift taxes; and payroll and other taxes. These services include tax return preparation, tax research, and representation of clients at administrative proceedings before the various taxing authorities. The objectives of our tax services are to minimize taxes and potential problems.

- Consulting Services

  Our consulting services are designed to assist clients in improving efficiency and profitability. Our approach offers assistance in such areas as developing plans for problem identification or implementing more effective operating controls, evaluating information systems and installing or upgrading data processing systems.

____________________, an audit partner, will be primarily responsible for your engagement.

As you requested, our proposal is for ____________________ (*state nature of services*).

We estimate that our fees for the proposed services will be approximately $_______, plus out-of-pocket expenses, billable as the work progresses. Our fees are based on time spent on the engagement. Should we encounter any unforeseen circumstances requiring additional time, you will be notified promptly of the situation.

Our fee estimate is based on the assumption that your personnel will prepare certain schedules and analyses for us. We also anticipate their assistance in locating invoices and other documents for our examination.

Our firm is organized and staffed to help you satisfy our business needs. Please call ___________ with questions about this proposal.

Very truly yours,

____

Audit Risk Alert—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
AUDIT RISK ALERT—2006/07

This Audit Risk Alert, prepared by the AICPA staff, is intended to help you identify the significant business risks that may result in the material misstatement of your client's financial statements. This Alert provides CPAs with an overview of recent economic, business, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Senior Manager
Accounting and Auditing Publications

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant business risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and current accounting, auditing, and professional developments.

.02 This Alert is intended to assist auditors of both public and nonpublic companies. As such, references to AICPA *Professional Standards* (Generally Accepted Auditing Standards [GAAS] and Public Company Accounting Oversight Board [PCAOB] Professional Standards) are included. In citing the professional standards, references are made to the AICPA *Professional Standards* publication and the AICPA's *PCAOB Standards and Related Rules* publication, depending upon the applicable professional standard. Additionally, when referencing professional standards, this Alert cites section numbers and not the original Statement number, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients,* is referred to as AU section 317 of the AICPA *Professional Standards*.

.03 For a thorough discussion of recent developments and key issues in the area of independence and ethics, see the AICPA Audit Risk Alert *Independence and Ethics Alert—2006/07* (product no. 022477kk), and for a thorough discussion of recent Securities and Exchange Commission (SEC) and PCAOB developments, see the AICPA Audit Risk Alert *SEC and PCAOB Alert—2006/07* (product no. 022497kk). Both Alerts can be obtained by calling the AICPA at (888) 777-7077 or by going online at www.cpa2biz.com.

AICPA Industry Audit Risk Alerts

.04 To help auditors understand the relevant industry, regulatory, and other external factors, as well as business risks affecting their clients, the AICPA has developed industry-specific Audit Risk Alerts that can be used in conjunction with this Alert. The current list of AICPA industry Alerts is presented below. To obtain these Alerts, call the AICPA at (888) 777-7077 or go online at www.cpa2biz.com.

1. *Bank, Credit Unions and Other Depository and Lending Industry Developments—2006/07* (product no. 022297kk)
2. *Construction Contractors Industry Developments—2006/07* (product no. 022317kk)
3. *Employee Benefit Plans Industry Developments—2006* (product no. 022416kk)
4. *Government Auditing Standards and Circular A-133 Audits—2006* Circular A-133 Audits (product no. 022456kk)
5. *Health Care Industry Developments—2006/07* (product no. 022347kk)
6. *High-Technology Industry Developments—2006/07* (product no. 022407kk)
7. *Independence and Ethics Alert—2006/07* (product no. 022477kk)
8. *Insurance Industry Developments—2006/07* (product no. 022357kk)
9. *Investment Companies Industry Developments—2006/07* (product no. 022367kk)
10. *Manufacturing Industry Developments—2006/07* (product no. 022377kk)
11. *Not-for-Profit Organizations Industry Developments—2006* (product no. 022426kk)
12. *Real Estate Industry Developments—2006/07* (product no. 022397kk)
13. *Securities Industry Developments—2006/07* (product no. 022387kk)
14. *State and Local Governmental Developments—2006* (product no. 022436kk)

.05 In addition, the AICPA publishes the following Alerts:

1. *Compilation and Review Alert—2006/07* (product no. 022307kk)
2. *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)

New Pronouncements and Other Guidance

Recent Auditing and Attestation Pronouncements and Related Guidance

.06 Presented in the following table is a list of auditing, attestation, and related guidance issued since the publication of last year's Alert. For information on recently issued auditing and attestation standards, quality control standards, and related guidance that may have been issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm and the PCAOB Web site at www.pcaobus.org (public company audits only). As a reminder, AICPA auditing and attest standards are applicable only to audits and attestation engagements of nonissuers.

.07 You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, which is issued by the AICPA's Auditing Standards Team and is available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Authoritative+Standards+and+Related+Guidance+for+Non-Issuers/default.htm

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) Statement on Standards for Attestation Engagements (SSAE) No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20) (December 2005)	These standards established two categories of professional requirements that are identified by specific terms. The words *must* or *is required* are used to indicate an unconditional requirement. The word *should* is used to indicate a presumptively mandatory requirement. The words *may, might, could,* and *should consider* represent actions that auditors have a professional obligation to consider. The provisions of SAS No. 102 and SSAE No. 13 were effective upon issuance. It is the Auditing Standards Board's intention to make conforming changes to AICPA literature over the next several years to remove any language that would imply a professional requirement where none exists.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) (December 2005)	SAS No. 103 supersedes SAS No. 96 and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
SASs No. 104–No. 111, The Risk Assessment Standards (March 2006)	See "The Risk Assessment Standards" section in this Alert.
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) (May 2006)	The new standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) (November 2006)	This SAS amends the following SASs: SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150); SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316); SAS No. 101, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1, AU sec. 328); SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a*

(continued)

	Going Concern (AICPA, *Professional Standards*, vol. 1, AU sec. 341); SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342); SAS No. 1, AU Section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1; and SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). The amendments in paragraphs 1 through 5 of this SAS are effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted. The amendments in paragraphs 7 through 14 of this SAS are effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted.
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) (December 2006)	The new standard supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A), as amended. It establishes and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements. Although this Statement applies regardless of an entity's governance structure or size, particular considerations apply where all of those charged with governance are involved in managing an entity. It is effective for periods beginning on or after December 15, 2006.
SSAE No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) (November 2006)	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attest engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13.
AICPA Technical Practice Aid section 8100.01–.02 (Nonauthoritative)	The title of section 8100.01 is "Determining the Effective Date of a New Statement on Auditing Standards for Audits of a Single Financial Statement," and the title of section 8100.02 is "Determining the Effective Date of a New Statement on Auditing Standards for Audits of Interim Periods."
PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.

PCAOB Conforming Amendment to AT 101.04*f*, *Attest Engagements, Conforming Amendment to PCAOB Related Auditing and Professional Practice Standards Resulting from the Adoption of the Auditing Standard No. 4* (AICPA, *PCAOB Standards and Related Rules*, AT sec.101.04*f)* (February 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	The conforming amendment states that Auditing Standard No. 4 must be used for reporting on whether a material weakness continues to exist for any purpose other than a company's internal use.
PCAOB Report on the Initial Implementation of Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules,* AU sec. 300) (November 2005) (Applicable to audits conducted in accordance with PCAOB standards only)	This report reaffirms and amplifies previous guidance issued by the PCAOB in May 2005. The report focuses on reasons the PCAOB found audits performed were not always as efficient and effective as Auditing Standard No. 2 intended. The report also explains certain aspects of Auditing Standard No. 2, such as the terms *more than remote* and *strong indicators*.
PCAOB Overview of Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist (*AICPA, *PCAOB Standards and Related Rules*) (April 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	This overview provides additional information on the provisions of Auditing Standard No. 4.
PCAOB Staff Questions and Answers, Adjustments to Prior-Period Financial Statements Audited by a Predecessor Auditor (AICPA, *PCAOB Standards and Related Rules*, AU sec. 100.08) (June 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	The guidance explains that if prior-period financial statements that require adjustments were audited by a predecessor auditor, either the successor auditor or the predecessor auditor may audit the adjustments so long as the auditor is independent and registered with the PCAOB. The guidance continues to address questions regarding when the predecessor auditor audits the prior-period financial statement adjustments, when the successor auditor audits the prior-period financial statement adjustments, and when the successor auditor has not yet completed an audit of the current-period financial statements.

(continued)

PCAOB Staff Audit Practice Alert No. 1, *Matters Relating to Timing and Accounting for Options Grants* (AICPA, *PCAOB Standards and Related Rules*, sec. 400.01) (July 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	This issuance was prompted by recent reports and disclosures about issuer practices related to the granting of stock options, including the *backdating* of such grants. The guidance identifies existing standards that could bear on auditors' work and applies them to the issues that have been raised regarding companies' stock option granting practices, but it does not establish new requirements.
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (October 2006) (Applicable to audits conducted in accordance with PCAOB standards only)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to Financial Accounting Standards Board Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

Recent Accounting Pronouncements and Related Guidance

.08 Presented in the following table is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the Financial Accounting Standards Board (FASB) Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 155	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Statement No. 156	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*
FASB Statement No. 157	*Fair Value Measurements*
FASB Statement No. 158	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Interpretation No. 48	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB Emerging Issues Task Force (EITF) Issues	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.
FASB Staff Positions (FSPs)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs. Some of the recently issued FSPs address issues relating to FASB Statements No. 143 and No. 150, among others, and FASB Interpretation 46(R).

AICPA Technical Practice Aid (TPA) sections 2130.09–.35 (December 2005) (Nonauthoritative)	This TPA discusses various topics on the application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer,* to debt securities.
AICPA TPA sections 5600.07–.17 (November 2005) (Nonauthoritative)	This TPA discusses various lease topics.
AICPA TPA sections 6910.16–.20 (January 2006) (Nonauthoritative)	This TPA discusses nonregistered investment partnerships topics.

Recent Independence and Ethics Pronouncements

.09 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain that Alert to be aware of independence and ethics matters that will affect their practice.

Understanding the Entity and Its Environment and Assessing Risks

.10 An auditor should obtain an understanding of relevant industry, regulatory, and other external factors that may affect his or her client. These factors include:

- Industry conditions
- The regulatory environment encompassing, among other matters, relevant accounting pronouncements
- The legal and political environment
- Other external factors, such as general economic conditions

.11 The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive).

.12 The auditor should understand the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies or through the setting of inappropriate objectives and strategies. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.13 After gaining an understanding of the entity and its environment, the auditor needs to make risk assessments at the financial statement and relevant assertion levels based on that understanding.

.14 Presented in this Alert are current business, economic, regulatory, accounting, and auditing matters that may affect your clients. Reading about these matters and properly addressing them will help you gain a better understanding of your client's environment, will help you better assess risks of material misstatement of the financial statements, and will ultimately strengthen the integrity of your audits.

Certain Business and Economic Developments

Declining Housing Market and the Possibility of Rising Interest Rates

.15 Housing starts, a key indicator of economic performance, have been dropping. Median sale prices of existing homes have been dropping also. In addition, there is a high inventory of unsold homes. The issuing of construction permits has dropped to its lowest level since 1997, indicating a continued cooling of the housing market ahead. The consensus forecast for 2007 U.S. housing is 1.775 million units, down from an estimated 1.902 million units this year. Forecasters expect continued declines in 2008. Interest rate levels will significantly affect the future of the housing market. Buyers' confidence and fear of falling prices will also be big factors affecting the market's future. The cooling of the housing market will affect many businesses and may need to be considered in audit planning.

.16 If the economic and business environment weakens, risks to businesses and auditors multiply. Those risks include:

- Risk of fraudulent financial reporting and improper accounting estimates
- Impairment and recoverability risks
- Viability and liquidity risks
- High debt levels and collectibility of receivables
- Inventory obsolescence

.17 Auditors should have a solid understanding of the AICPA's professional standards, including AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1); AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1); AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1); and AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1).

.18 Auditors of public companies should remember that Item 303 of Regulation S-K requires SEC registrants to disclose in Management's Discussion and Analysis changes in accounting estimates that (1) have a material effect on the financial condition or results of operations of the company or trends in earnings or (2) would cause reported financial information not to be necessarily indicative of future operating results or of future financial condition.

Possible Interest Rate Increases

.19 Predicting future interest rate levels is difficult. The Federal Reserve is still concerned about inflation, which makes future interest rate increases possible. Some possible auditor considerations include:

- Significant changes in, and the volatility of, general interest rates increase the inherent risk for the valuation of investments and derivatives whose value is significantly affected by interest rates.

- Auditors may need to determine that the recorded value of an investment or derivative utilizes reasonable interest rates in those cases in which interest rates affect the valuation of the investment or derivative.

Pension Protection Act

.20 On August 17, 2006, the Pension Protection Act was signed into law. In addition to expanding and improving defined contribution plans such as IRAs and 401(k) plans, the purpose of the Act is to strengthen the federal pension insurance program. The provisions of the Act are effective for fiscal years beginning after December 31, 2007.

.21 The major provisions of this legislation that may affect companies with pension plans are:

- Increased premiums and contributions required for underfunded plans and companies that terminate their plans. Requirements for accurate measurement and reporting of benefit obligation liabilities
- A prohibition on promising additional benefits to employees until they are funded
- Closure of loopholes that permitted companies to defer contributions to underfunded plans

.22 For technical explanations of the provisions of the Pension Protection Act, see www.house.gov/jct/x-38-06.pdf.

Stock Option Backdating

.23 News surrounding a number of companies participating in stock option backdating has recently surfaced, and some companies have announced restatements of previously issued financial statements. As a result, this may lead to legal and other contingencies requiring the recognition of an additional expense or disclosure in the financial statements. Auditors should be alert to possible risks associated with their clients' option grants and consider the following:

- Understanding the status and results of any investigations relating to the timing of options grants
- Making direct inquiries of members of management and the board of directors who should have knowledge of matters related to the granting and accounting for stock options
- Obtaining clients' public information related to the timing of options grants
- Understanding the terms and conditions of plans or policies under which options are granted (in particular, terms that allow exercise prices that are not equal to the market price on the date of grant or that delegate authority for option grants to management)
- Recognizing patterns of transactions or conditions that may indicate higher levels of inherent risk in the period under audit. Such patterns or conditions may include:
  - — Very high levels of option grants in relation to shares outstanding
  - — Situations in which option-based compensation is a large component of executive compensation
  - — Highly variable grant dates
  - — Patterns of significant increases in stock prices following the issuance of option grants
  - — High levels of stock-price volatility

Certain Auditing Issues and Developments

Defining Professional Requirements

.24 In December 2005, the Auditing Standards Board (ASB) issued SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards,* vol. 1, AU sec. 120), and SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards,* vol. 1, AT sec. 20). These provisions were effective upon issuance, and these standards established categories of professional requirements that are identified by specific terminology. The definition of these terms describes the degree of your responsibility when complying with professional standards. In addition, these terms are substantially similar to those defined by the PCAOB Interim Professional Auditing Standards Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards* (AICPA, *PCAOB Standards and Related Rules*). These sharply defined terms will result in the clarification of standards, so consider paying significant attention to them.

.25 When the terms *must* or *is required* are used in a standard, they indicate that you have an unconditional requirement to comply, in all cases, with that standard. If the term *should* is used in a standard, a presumptively mandatory requirement has been indicated. That is, you are expected to comply. In rare circumstances, you may depart from the requirement providing you document the justification on how you were able to sufficiently achieve the objectives of the requirement by performing alternative procedures.

.26 These standards also apply to explanatory material contained in the text of authoritative standards providing explanations and guidance on the professional requirements or identifying and describing other procedures or actions. Lastly, the terms *may, might,* and *could* are used in explanatory material and are there to assist you in your consideration when exercising professional judgment in performing your engagement.

Private Company Audit Documentation

.27 Over the course of the last four years, certain business failures and frauds have highlighted the need for auditors to focus more diligently on audit documentation and working paper retention. In response to this need, the ASB strengthened audit documentation requirements by issuing SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards,* vol. 1, AU sec. 339), in December of 2005. SAS No. 103 superseded SAS No. 96, *Audit Documentation,* and amended SAS No. 1, Section 530, *Dating of the Independent Auditor's Report* (AICPA *Professional Standards*, vol. 1, AU sec. 530). As a result, SAS No. 103 clarified, modified, and enhanced guidance for auditors to follow when documenting their work during the audits of private companies. The Statement is effective for audits of private company financial statements for periods ending on or after December 15, 2006, with earlier application permitted. While it is strongly recommended that auditors read the full text of the standard, a summary of some important revisions brought forth by the issuance of SAS No. 103 follows, along with suggestions to consider when implementing the guidance.

.28 Audit documentation is required to be sufficient so that an *experienced auditor*[1] who is not previously involved in the audit would understand the nature, timing, extent, and results of the auditing procedures performed, along with the evidence obtained and conclusions reached on significant matters. Keep in mind that if an objective reviewer of the documentation has to ask basic questions about the audit, the documentation probably does not contain the required content.

.29 Oral explanations alone cannot be used to support an auditor's work or conclusions but may still be used to clarify or explain the information included in the documentation. Therefore, if verbal justification is needed to support your work, it may suggest that your working papers lack sufficient documentation and do not contain all the information and linkages necessary to ensure that the required procedures were performed and that the proper evidence was obtained.

---

[1] Statement on Auditing Standards (SAS) No. 103, *Audit Documentation* (AICPA, *Professional Standards,* vol. 1, AU sec. 339), defines an *experienced auditor* as one who possesses competencies and skills that would have enabled him or her to perform the audit.

.30 When audit evidence contradicts or is inconsistent with your audit conclusions regarding significant issues or findings, SAS No. 103 provides guidance. The auditor should document and explain the contradictions that were addressed and how conclusions were formed. In addition, SAS No. 103 specifically addresses how you would document the oral discussions you had with your client's management or individuals overseeing the financial reporting process.

.31 Historically, the date of the auditor's report has been the last day an auditor completed his or her fieldwork. Under SAS No. 103 guidance, it is critical to note that you *should not* date your report earlier than the date you obtained sufficient appropriate audit evidence to support your opinion. Therefore, your audit documentation should have been reviewed, the financial statements should have been prepared (including disclosures), and management should have asserted its responsibility for those statements. At times, your report date may still correspond to your last day of fieldwork, but this synchronization may not always occur. If your report is dated subsequent to your fieldwork, the time period subject to subsequent events work will increase. This requirement will ordinarily result in a closer timing between the date of your report and the date you grant your client permission to use your report (report release date) in connection with the financial statements.

.32 Within *60 days* following the report release date (also known as the documentation completion date), an auditor should complete the assembling of the audit file or files. Subsequent document deletions are *prohibited*, and subsequent additions are subject to the guidance in AU section 390, *Consideration of Omitted Procedures After the Report Date* (AICPA, *Professional Standards*, vol. 1); and AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AICPA, *Professional Standards*, vol. 1), as amended. Here are some suggestions to consider to assist in meeting this requirement:

- Getting it right the first time will reduce the efforts needed to assemble the final audit file or files later, so try to clearly document the audit
- While your audit is in progress and documentation is updated, discard superseded memos and files instead of waiting until the end
- Try to complete the audit on a timely basis so you may better manage your responsibility for subsequent events procedure
- Make sure that you and/or your staff have adequately scheduled your review time to meet the 60-day deadline
- Be aware of any applicable state laws or other documentation requirements that may apply because some jurisdictions have accelerated final documentation deadlines

.33 Audit documentation retention should not be shorter than *five years* from the report release date, but statutes, regulations, or your firm's quality control policies may specify a longer retention period. Some suggestions to consider when addressing document retention are:

- Engaging an objective third party to make specific recommendations to your policies and current documentation approach
- Determining if your audit files are safe and retrievable
- Assessing the functionality of current software programs in future environments because you may need to retain old hardware or purchase new software
- Being aware of state or regulator retention requirement periods that are longer than five years and adjusting your policies and documentation approach accordingly

.34 One final point to consider when implementing the guidance under SAS No. 103 is the use of the terms *must, should,* and *may*. Keep in mind your professional responsibilities as they relate to these terms, as described in SAS No. 102.

The Risk Assessment Standards

Statement on Auditing Standard	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*	Amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230) as amended
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95*, Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	Amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150)
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision*	This statement supersedes SAS No. 1, section 310, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 310) and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes section 313, *Substantive Tests Prior to the Balance-Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350).

Some Highlights of the New Risk Assessment Standards

.36 Whether due to errors or fraud, the new risk assessment standards require the auditor to understand and respond to risks of material misstatements. That understanding should identify risks to your client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework at www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what you have previously done. Implementation of the SASs will most likely result in significant changes to your firm's audit methodologies and the training of your personnel. Therefore, it is recommended that you allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526) at www.cpa2biz.com.

New Companion Audit Guide

.37 In December 2006, the AICPA issued an Audit Guide titled *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456). This Guide helps practitioners understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The Guide can be ordered by calling the AICPA at 888-777-7077 or going online at www.cpa2biz.com.

Communicating Internal Control Related Matters

.38 In May 2006, the ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006.

.39 The standard requires that auditors (1) evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses, and (2) communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

.40 Some general examples of potential control deficiencies that you might find are:

- Lack of segregation of duties in the cash management function
- Management override of controls by owners of privately held companies or by project managers in the invoice approval process
- Inadequate monitoring of the financial accounting process to detect deficiencies in internal control by management
- Lack of client expertise in preparing financial statements

.41 The AICPA has published the Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist you in the implementation of this standard.

Auditing Variable Interest Entities

.42 FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities*, continues to present a challenge for accountants to understand. Last year's Alert discussed the issuance of five important FASB Staff Positions (FSPs) that provided additional guidance for this revised Interpretation. Subsequently, another FSP, FASB Interpretation No. 46(R)-6, *Determining the Variability to Be Considered in Applying FASB Interpretation No. 46(R)* (April 13, 2006), was issued this year. While referring directly to the authoritative guidance is strongly recommended, the AICPA issued Technical Practice Aid (TPA) 1400.29, "Consolidated

Versus Combined Financial Statements under FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities*" (www.aicpa.org/download/acctstd/FIN_46_R_TPAs.pdf), to assist you in tackling some of this guidance.

Variable Interest Entities Auditing Procedures

.43 Deciding whether a variable interest entity (VIE) needs to be consolidated is an ongoing process for your client. Determining that your client has appropriately addressed the provisions in FASB Interpretation No. 46 (R) is an ongoing process for you. Some important questions to consider in determining if your client (the primary beneficiary) must consolidate follow:

- Does the potential VIE have a sufficient equity investment at risk?
- Can the potential VIE finance its activities without additional support?
- Do the equity investors in the potential VIE lack any of the three characteristics of a controlling financial interest?
- Do the equity investors participate in the decision-making process of the potential VIE?
- Do the equity investors share in the returns and absorb losses generated by the potential VIE?
- If you previously determined that an entity does not meet the consolidation criteria, have new facts and circumstances occurred that may cause you to reconsider your assessment?

.44 In addition to the above, readers should consider referring to the AICPA's Practice Alert 2005-1, *Auditing Procedures With Respect to Variable Interest Entities*, for detailed steps and procedures when auditing VIEs. Excerpts from this document appeared in last year's Alert, and a complete copy can be obtained at www.aicpa.org/download/auditstd/pract_alert/pa_2005_1.pdf.

.45 Because FASB Interpretation No. 46(R) includes related party arrangements within its scope, you will need to consider the involvement of related parties as defined in FASB Statement No. 57, *Related Party Disclosures*, along with the guidance in AU section 334, *Related Parties* (AICPA, *Professional Standards*, vol. 1). To better assist you, the AICPA developed a nonauthoritative toolkit that addresses related parties and their transactions. A copy can be obtained at www.aicpa.org/news/relpty1.html.

Certain Accounting Issues and Developments

SEC Staff Accounting Bulletin 108

.46 On September 13, 2006, the SEC released Staff Accounting Bulletin (SAB) No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.47 There have been two common approaches used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (the rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (the iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but which nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.48 The staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.49 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

Related FASB Project

.50 The FASB has received inquiries about the application of SAB No. 108 to the private sector. Public companies must adhere to the requirements of SAB No. 108. Private companies are not bound by SAB No. 108. As a result, concern was expressed that diversity will exist in the private sector relating to the determination of materiality associated with errors caused by the carryover or reversal of prior year misstatements. The FASB staff is currently drafting a proposed FSP that will provide guidance on how to evaluate and account for the correction of errors identified from the quantification of misstatements associated with the carryover or reversing effects of prior year misstatements on current year financial statements. See the FASB Web site at www.fasb.org for the status of this project.

FASB Statement No. 157

.51 FASB Statement No. 157, *Fair Value Measurements,* defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements because the FASB previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice.

.52 Note that FASB Statement No. 157 does not tell accountants how to specifically value assets and liabilities, nor does it tell accountants what judgments to make when developing estimates of the inputs that go into valuation techniques.

FASB Statement No. 158

.53 FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans,* improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multi-employer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity or changes in unrestricted net assets of a not-for-profit organization. This Statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.54 An entity with publicly traded equity securities shall initially apply the requirement to recognize the funded status of a benefit plan (paragraph 4) and the disclosure requirements (paragraph 7) as of the end of the fiscal year ending after December 15, 2006. An employer without publicly traded equity securities shall initially apply the requirement to recognize the funded status of a benefit plan (paragraphs 4 and 8) and the disclosure requirements (paragraphs 7 and 10) as of the end of the fiscal year ending after June 15, 2007.

FASB Interpretation No. 48

.55 FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, clarifies and expands the accounting and financial reporting for uncertainties related to income taxes. This Interpretation is applicable to all business enterprises, whether they are taxable businesses or tax-exempt organizations. Tax positions taken by any entity that may represent potential future obligations to a taxing authority (for example, IRS or state revenue department) may have to be recorded under this Interpretation. FASB Interpretation No. 48 also applies to tax-exempt organizations with net operating loss or a net operating loss carryover for unrelated business income tax purposes, and tax positions taken in allocating expenses through joint venture and other business relationships with taxable entities.

.56 The AICPA has issued a practice guide about FASB Interpretation No. 48. It is available at www.aicpa.org/fin48guide.

On the Horizon

.57 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.58 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Public Company Accounting Oversight Board (PCAOB)	www.pcaobus.org or www.pcaob.com
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has links to the other standard-setting bodies listed above.

Auditing Pipeline—Nonpublic Companies

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly In Conformity With Generally Accepted Accounting Principles*

.59 The ASB has issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles* [AICPA, Professional Standards, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed Statement, which can be obtained at www.fasb.org.

Proposed SSAE Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.60 In January 2006, the ASB issued a revised exposure draft of a proposed SSAE that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). In May 2006, the PCAOB announced plans to amend certain aspects of PCAOB Auditing Standard No. 2 to improve its implementation. Because the forthcoming changes to the PCAOB standard will be relevant to the revision of AT section 501, the ASB has decided to defer the issuance of final revised AT section 501 until the PCAOB issues its amendments and the ASB has time to consider them.

Auditing Pipeline—Public Companies

.61 Guidance issued by the PCAOB is included in the section of this Alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For pending projects for both the PCAOB and the SEC, readers may refer to the *SEC and PCAOB Alert—2006/07* (product no. 022497kk), mentioned previously.

Accounting Pipeline

.62 Following are accounting pronouncements currently in the exposure process. Some of the proposed pronouncements discussed in the prior year Alert have not been finalized as of the date of this writing, and thus are included again.

Proposed FASB Statement, Earnings per Share—an amendment of FASB Statement No. 128

.63 This proposed Statement would amend FASB Statement No. 128, *Earnings per Share*, to clarify guidance for mandatorily convertible instruments, the treasury stock method, contracts that may be settled in cash or shares, and contingently issuable shares. Specifically, the proposed Statement would:

- Amend the computational guidance for FASB Statement No. 128 for calculating the number of incremental shares included in diluted shares when applying the Treasury Stock method
- Eliminate the provisions of FASB Statement No. 128 that allow an entity to rebut the presumption that contracts with the option of settling in either cash or stock will be settled in shares
- Require that shares that will be issued upon conversion of a mandatorily convertible security be included in the weighted-average number of ordinary shares outstanding used in computing basic earnings per share from the date when conversion becomes mandatory

Proposed FASB Statement, Accounting for Transfers of Financial Assets—an amendment of FASB Statement No. 140

.64 The exposure draft *Accounting for Transfers of Financial Assets* (Transfers Project) is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed Statement seeks to:

- Clearly specify the permitted activities of a qualifying special-purpose entity (QSPE)
- Address practice issues related to which arrangements should be considered and how they should be considered in the legal isolation analysis
- Eliminate the prohibition on a QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferrer
- Revise the methodology used to initially measure at fair value interests related to transferred financial assets held by a transferrer
- Clarify guidance related to when rollovers of beneficial interests are permitted within a QSPE

.65 At its July 26, 2006 meeting, the FASB decided to combine the servicer discretion project (which addressed issues relating to the waiver of due-on-sale, collateral substitution, and foreclosed asset activities) into the Transfers Project. The FASB expects to issue a final Statement, which would amend FASB Statement No. 140, in the second quarter of 2007. See the FASB Web site for complete information.

Proposed FASB Statements, Business Combinations—a replacement of FASB Statement No. 141 *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries—a replacement of ARB No. 51

.66 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. Among the main proposals are that:

- All acquisitions of businesses be measured at the fair value of the business acquired
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations

.67 Exposure drafts on business combinations—purchase method procedures and noncontrolling interests—were issued on June 30, 2005. Auditors should visit the FASB Web site for expected issuance dates.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.68 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, that is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonpublic Companies" section of this Alert) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

FASB Project on Derivative Disclosures

.69 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities,* has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, which would allow a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft was issued on December 8, 2006, titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133.* The comment deadline is March 2, 2007. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. The proposed disclosures will be effective for both interim and annual reporting periods ending after December 15, 2007, with early application encouraged. At initial adoption, disclosures for earlier periods presented for comparative purposes will be encouraged but not required. Disclosures for earlier periods presented for comparative purposes will be required beginning in the first year after the year of initial adoption. Auditors can monitor the progress of this project on the FASB's Web site.

Proposed FASB Emerging Issues Task Force Issues and FSPs

.70 ***Proposed FASB Emerging Issues Task Force (EITF) Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.71 ***Proposed FASB Staff Positions.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

Resource Central

.72 The following are various resources that practitioners may find beneficial.

Publications

.73 The Audit Guide *Analytical Procedures* (product no. 012556kk) gives guidance on the effective use of analytical procedures with an emphasis on analytical procedures as substantive tests. This 2006 Guide includes SAS No. 56 concepts and definitions, a questions-and-answers section, an illustrative case study, and a new appendix that includes useful financial ratios.

.74 In the Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2006) (product no. 012526kk), you will find an overview of derivatives and securities as well as case studies to help you better understand how to audit derivative instruments.

.75 The Audit Guide *Auditing Revenue in Certain Industries* (2006) (product no. 012516kk) assists auditors in fulfilling their professional responsibilities with regard to auditing assertions about revenue. In this edition, you will find:

- Discussions on responsibilities of management, boards of directors, and audit committees for reliable financial reporting
- Summaries on key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP or GAAS updated for SAS No. 99
- Circumstances and transactions that may signal improper revenue recognition
- Procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition

.76 The Audit Risk Alert *Compilation and Review—2006/07* (product no. 022307kk) updates CPAs on recent practice issues and professional standards that affect these types of engagements.

.77 The Audit Risk Alert *Independence and Ethics Alert—2006/07* (product no. 022477kk) will inform you of recent developments in the area of independence and ethics for accountants. Specifically, this Alert will help you understand your independence requirements under the AICPA Code of Professional Conduct and certain other rule-making and standard-setting bodies. A compact "plain English" digest of AICPA independence rules is also included. This Alert includes information on guidance on the performance of nonattest services to attest clients, SEC independence rules, PCAOB independence and ethics activities, and Government Accountability Office independence rules.

.78 The *SEC and PCAOB Alert—2006/07* (product no. 022497kk) will prove useful for accountants working in public companies, auditors of public companies, or just the interested accountant who would like to remain current on issues affecting public companies. This Alert provides preparers and auditors with a detailed overview of recent developments at the SEC and PCAOB with respect to financial reporting and auditing matters.

.79 The AICPA *Audit and Accounting Manual* (2006) (product no. 005136kk) is developed exclusively for small- and medium-size CPA practices. This unique manual explains and demonstrates useful techniques and procedures for conducting compilation, review, and audit engagements—from planning, to internal control, to accountants' reports.

.80 The *Accounting Trends & Techniques, 60th Edition* (product no. 009898kk) is the must-have resource for any CPA who frequently creates or uses financial reports. Filled with current reporting techniques and methods used by the nation's top organizations, this 650-page AICPA best-seller will provide the guidance you need to improve your accounting preparation and procedures.

AICPA reSOURCE: Accounting and Auditing Literature

.81 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. If you prefer to have access to the entire library, that is also available. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards,* TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.82 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.83 AICPA CPExpress (formerly InfoBytes), offered exclusively through cpa2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 for nonmembers) for a new subscription and $119 ($319 for nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24 hours a day, seven days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.84 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

Chief Financial Officer Quarterly Roundtable Series

.85 The Chief Financial Officer (CFO) Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of hot topics that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.86 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Satisfaction Center

.87 To order AICPA products, receive information about AICPA activities, and find answers to your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.88 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.89 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Compilation and Review Alert—2006/07

CURRENT ACCOUNTING
REPORTING AND PRACTICE ISSUES

NOTICE TO READERS
COMPILATION AND REVIEW ALERT—2006/07

This *Compilation and Review Alert—2006/07* is intended to provide CPAs with an update on recent practice issues and professional standards that affect compilation and review engagements. The document has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the AICPA.

Written by J. Russell Madray, CPA

Edited by Lori L. Pombo, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgements

The Accounting and Auditing Publications Team would like to thank the members of the Accounting and Review Services Committee and its chair, Tom Ratcliffe, and Michael Glynn, Technical Manager, AICPA Audit and Attest Standards, for their invaluable contributions to this year's Alert. In addition, we would like to thank the following individuals for their help in reviewing this year's Alert:

Ahava Goldman, Technical Manager, AICPA Audit and Attest Standards

Charles Landes, Vice President, AICPA Professional Standards

Sue Lieberum, Senior Technical Manager, AICPA Peer Review Program

Lisa Snyder, Director, AICPA Professional Ethics Division

Our special thanks to J. Russell Madray who developed and wrote this Alert.

How This Alert Will Help You

.01 The *Compilation and Review Alert—2006/07* is a crucial tool, designed to help you as you plan and perform your 2006 and 2007 compilation and review engagements. The Alert discusses recent Standards for Accounting and Review Services (SSARS) developments, addresses emerging practice issues, points out pitfalls that frequently occur in compilation and review engagements, and provides valuable current accounting developments.

.02 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections of the codification and not the numbered statements, as appropriate. For example, SSARS No. 1 is referred to as AR section 100 of the AICPA *Professional Standards*.

The U.S. Business Environment

.03 In planning your compilation and review engagements, you need to understand the economic conditions facing your client's industry. Economic activities relating to such factors as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and the labor market are likely to have an impact on your client.

.04 The bad news is the U.S. economy has slowed more dramatically than most economists expected, leaving it more vulnerable to a recession. The economy has shifted into a slower gear because of several factors, including the cooler housing market, the toll of once-surging energy prices, and the impact of the Federal Reserve's two-year string of interest rate increases. In fact, growth is getting closer to what some economists describe as the "stall speed," at which an unexpected shock such as a terrorist strike or a hurricane might be enough to trigger a recession. A mathematical model of the economy developed by Federal Reserve economist Jonathan Wright puts the chances of a recession over the next year at about 40 percent.

.05 And with recession risks rising, some Federal Reserve officials are becoming uneasy about the outlook. Although they remain on guard against the dangers of higher inflation, they say they're also paying more attention to the threats to growth. But most economists and Federal Reserve officials still expect the economy to avoid recession, helped by increased exports and business spending. Except for housing, the rest of the economy is healthy and robust.

.06 Unfortunately, one of the biggest wild cards is the magnitude of the housing slowdown. New-home sales in August were 17 percent below a year earlier and the median selling price was down 1.3 percent, the first year-over-year drop since 2003. Existing home sales were the lowest since early 2004, and prices fell for the first time in 11 years. Housing-related industries, including builders, mortgage brokers, and furniture makers, have shed some 40,000 jobs since March, according to Moody's Economy.Com, Inc., in West Chester, Pennsylvania. In the 1990-1991 housing slump, housing-related industries shed 825,000 jobs, or about 35,000 a month.

.07 Consumer spending will also take a hit as falling house prices discourage homeowners from borrowing against equity gains. Home equity withdrawal fell to an annual rate of $497 billion in the second quarter, from $649 billion in the first quarter and $817 billion in the final quarter of 2005, according to calculations supplied by the Federal Reserve. A fall in home prices across the nation would pose a significant threat to consumer spending. And the one-two punch of a slowing housing market and the large announced auto-production cuts by GM, Ford, and Chrysler is really going to slow the economy, according to some economists.

Small Business Confidence

.08 Private companies are a significant element of the U.S. economy. In fact, according to the National Federation of Independent Businesses (NFIB), four of five employing businesses have fewer than 20 people working in them, and only 17,000 of the nation's 4.9 million corporations are registered with the Securities and Exchange Commission (SEC). And, according to the White House, small and young companies create two-thirds of the net new jobs in our economy, and they employ half of all private-sector workers.

.09 In August, Discover Business Card released the results of the inaugural *Discover Small Business Watch*, a new monthly index of economic confidence of the nation's 22 million small businesses with five or fewer employees. The *Discover Small Business Watch* is based upon survey data compiled by Rasmussen Reports, a leading independent public opinion polling company.

.10 Among the key findings, the survey found that small business owners are more optimistic about the current state of the economy when compared to the general population, with 39 percent of small business owners rating the economy as "excellent" or "good," versus the 34 percent of the general population. However, nearly 60 percent of small business owners surveyed believed that economic conditions in the country are getting worse.

.11 In addition, an inaugural survey of more than 600 private business owners in the United States whose companies employ at least 50 people showed decidedly mixed views on the current and future state of the U.S. economy. Compiled by Rasmussen Reports, the *Matrix Founders Index* is a quarterly barometer of attitudes and opinions from those who have founded or acquired their own businesses. In the premier survey, entrepreneurs fairly evenly rated the U.S. economy as excellent (27 percent), good (26 percent), fair (24 percent), and poor (23 percent). They also were split about how well they expect the economy to perform in the near term: 43 percent thought the economy was getting better with 47 percent holding a contrary view. However, 29 percent felt that the United States was currently in a recession.

.12 Overall, the economic outlook is uncertain, which means you should pay close attention to how economic factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and the labor market will affect your clients and your compilation and review engagements this year.

Current SSARS Developments

.13 There have been no SSARS issued since the publication of last year's Alert; however, the Accounting and Review Services Committee (ARSC) is currently working on several projects which will be completed in the near future. They are summarized as follows.

Future SSARS Exposure Draft, *Elimination of Certain References to Statements on Auditing Standards and Incorporation of Appropriate Guidance Into Statements on Standards for Accounting and Review Services*

.14 In many instances, SSARSs refer the practitioner to Statements on Auditing Standards (SASs). However, for many practitioners, compilations and reviews represent the highest level of service performed and, therefore, those practitioners may be unfamiliar with the auditing literature. The ARSC determined that it would be in the best interest of practitioners performing compilations and reviews as well as in the public interest if certain references to the auditing literature were eliminated from the SSARSs. To accomplish this, the ARSC is currently developing an exposure draft of a proposed SSARS that will eliminate those references to auditing literature from SSARSs and, if deemed appropriate, guidance similar to that originally referenced will be incorporated into the SSARSs.

.15 Although the ARSC is still considering amendments to be included in the proposed standard, it is expected that it will amend AR section 100, *Compilation and Review of Financial Statements*; AR section 200, *Reporting on Comparative Financial Statements*; AR section 300, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms*; and AR section 400, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2). In addition, all affected Interpretations will be conformed or withdrawn. Those affected Interpretations are:

- Interpretation No. 11, "Reporting on Uncertainties," in AR section 9100, *Compilation and Review of Financial Statements: Accounting and Review Services Interpretations of Section 100* (AICPA, *Professional Standards*, vol. 2), by deleting the reference to AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 2), and instead referring to the revised AR section 100 guidance

- Interpretation No. 15, "Differentiating a Financial Statement Presentation From a Trial Balance," in AR section 9100, by deleting the "typical titles" for financial statements and instead referencing the examples of financial statement titles included in AR section 100.04 as revised by the proposed Statement

- Interpretation No. 4, "Discovery of Information After the Date of the Accountant's Report," in AR section 9100, which is expected to be withdrawn

.16 The exposure draft is expected to be issued in the December 2006/January 2007 time frame. A final Statement, if approved, would be effective for compilations and reviews of financial statements for periods ending on or after December 15, 2007. Early application would be permitted.

Future SSARS Exposure Draft, *Omnibus Statement on Standards for Accounting and Review Services—2007*

.17 The ARSC is currently developing a draft Omnibus Statement on Standards for Accounting and Review Services. Although the ARSC is still considering amendments to be included in the proposed standard, it is expected that it will:

- Revise AR sections 100, 200, and 300 to conform to the terminology utilized by other standard setters, including the Auditing Standards Board (ASB) by replacing the term *nonpublic entity* with the term *nonissuer*.
- Clarify the objective of a compilation engagement and expand the definition in AR section 100.
- Revise AR section 100 to incorporate the guidance in Interpretation No. 12, "Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles" in AR section 9100 (AICPA, *Professional Standards*, vol. 2), with respect to evaluating the adequacy of disclosure in financial statements prepared in conformity with an other comprehensive basis of accounting (OCBOA) and expand on such guidance.
- Revise AR section 100 to provide guidance with respect to the accountant's consideration of subsequent events in a compilation or review engagement.

.18 The ARSC plans to expose the proposed standard in the December 2006/January 2007 time frame.

ARSC's Consideration of Independence in a Compilation Engagement

.19 As a result of the evolving complexity of the Independence Standards as codified in the *AICPA Code of Professional Conduct*, the ARSC issued a Discussion Memorandum/Survey in October 2005 to obtain the input of CPAs, their clients, and third-party users of compiled financial statements as to the need for independence when performing compilation engagements. The purpose of the Discussion Memorandum/Survey was to elicit comments before the ARSC further considered the independence requirements related to compilation engagements. During the seven months that the Discussion Memorandum/Survey was available, the ARSC received over 4,300 responses.

.20 Eighty-two percent of those who responded to the survey were CPAs in public practice; 11 percent were CPAs in industry; 1 percent of the respondents indicated that they were third-party users of compiled financial statements; and 5 percent responded "other." The majority of those who responded "other" were, upon review, identified to be third-party users of compiled financial statements. Of those who responded that they were CPAs in public practice, 84 percent were from firms with ten or fewer partners.

.21 The ARSC identified the most significant issues as follows:

1. Whether the ARSC should amend AR section 100 to state that independence is not required in a compilation engagement.
2. Whether the ARSC should amend AR section 100 to allow the accountant to disclose, in the compilation report, the reasons for the independence impairment.

.22 Accordingly, the ARSC scheduled a public hearing in May 2006 to discuss these issues and the results of the following survey questions.

.23 ***Question:*** *Should the ARSC amend SSARS No. 1 to state that independence is not required in a compilation engagement and accordingly delete the requirement that the accountant disclose when he or she is not independent?*

.24 The survey provided the following responses to this question:

Yes	41.8 percent
No	50.1 percent
Undecided/Need More Information	6.9 percent
Not affected by this issue	1.2 percent

.25 In addition, the ARSC noted that 48 percent of CPAs in public practice; 57 percent of CPAs in industry; 77 percent of third-party users; and 66 percent of "other" respondents answered *no* to the above question.

.26 During the public meeting to discuss the results of the survey, the ARSC considered the above responses. In addition, the ARSC considered the potential for third-party users to be misled as to the accountant's independence if the report was silent as to an independence impairment. The ARSC concluded that since, other than the titles, review and audit reports are silent as to independence since accountants/auditors must be independent to perform those engagements, that a very real possibility exists that third-party users would assume that accountants were independent if the compilation report was silent. The ARSC concluded that it would be inappropriate to revise AR section 100 to state that independence is not required in a compilation engagement and, accordingly, delete the requirement that the accountant disclose when he or she is not independent. The ARSC also discussed the results of the following survey question:

.27 ***Question:*** *If the existing independence requirements with respect to compilation engagements are retained, should the ARSC consider amending SSARS No. 1 to allow the accountant to describe the reason(s) for a lack of independence in the accountant's compilation report?*

.28 The survey provided the following responses to this question.

Yes	57.9 percent
No	32.5 percent
Not Sure/Don't Know	9.6 percent

.29 In addition, the ARSC noted that 56 percent of CPAs in public practice; 67 percent of CPAs in industry; 88 percent of third-party users; and 63 percent of "other" respondents answered *yes* to the above question.

.30 During the public meeting to discuss the results of the survey, the ARSC considered the above responses. The ARSC was especially moved by the response of the third-party users and the "other" respondents. The ARSC determined that more information was needed as to what those users of compiled financial statements would want to see in compilation results. Therefore, the ARSC has reached out to the American Bankers Association in order to facilitate a meeting. That meeting, which is tentatively scheduled for September 2007, will serve as the basis for a broader project on the accountant's compilation report.

Current Practice Issues

Conceptual Framework for AICPA Independence Standards

.31 The Professional Ethics Executive Committee (PEEC) has adopted a "Conceptual Framework for AICPA Independence Standards" (Conceptual Framework) (AICPA, *Professional Standards*, vol. 2, ET sec.

100.01), and a related revision to "Other Considerations" of Interpretation No. 101-1, "Interpretation of Rule 101" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02) under Rule 101, *Independence*, of the Code of Professional Conduct (the Code). The provisions of the Conceptual Framework for AICPA Independence Standards and the related revision to "Other Considerations" of Interpretation No. 101-1 are effective for all independence decisions made after April 30, 2007. Earlier application is encouraged.

Revision to Interpretation No. 101-1

.32 The PEEC recognizes that it is impossible to enumerate all circumstances in which the appearance of independence might be questioned. Therefore, in the absence of an independence interpretation or ruling under Rule 101 that addresses a particular circumstance, a member should evaluate whether that circumstance would lead a reasonable person aware of all the relevant facts to conclude that there is an unacceptable threat to the member's and the firm's independence. When making that evaluation, members should refer to the risk-based approach described in the Conceptual Framework for AICPA Independence Standards. If the threats to independence are not at an acceptable level, safeguards should be applied to eliminate the threats or reduce them to an acceptable level. In cases in which threats to independence are not at an acceptable level, thereby requiring the application of safeguards, the threats identified and the safeguards applied to eliminate the threats or reduce them to an acceptable level should be documented.

Conceptual Framework

.33 The Conceptual Framework describes the risk-based approach to analyzing independence matters that is used by the PEEC when it develops independence standards. Under that approach, a member's relationship with a client is evaluated to determine whether it poses an unacceptable risk to the member's independence. Risk is unacceptable if the relationship would compromise (or would be perceived as compromising by an informed third party having knowledge of all relevant information) the member's professional judgment when rendering an attest service to the client. Key to that evaluation is identifying and assessing the extent to which a threat to the member's independence exists and, if it does, whether it would be reasonable to expect that the threat would compromise the member's professional judgment and, if so, whether it can be effectively mitigated or eliminated. Under the risk-based approach, steps are taken to prevent circumstances that threaten independence from compromising the professional judgments required in the performance of an attest engagement.

.34 Professional standards of the AICPA require independence for all attest engagements. The PEEC bases its independence interpretations and rulings under ET section 100 of the AICPA's Code on the concepts in this framework. However, in certain circumstances, the PEEC has determined that it is appropriate to prohibit or restrict certain relationships notwithstanding the fact that the risk may be at an acceptable level. For example, the PEEC has determined that a covered member should not own even an immaterial direct financial interest in an attest client.

.35 Because the Conceptual Framework describes the concepts upon which the AICPA's independence interpretations and rulings are based, it may assist AICPA members and others in understanding those interpretations and rulings. In addition, the Conceptual Framework should be used by members when making decisions on independence matters that are not explicitly addressed by the Code. Under no circumstances, however, may the framework be used to overcome prohibitions or requirements contained in the independence interpretations and rulings.

.36 The risk-based approach entails evaluating the risk that the member would not be independent or would be perceived by a reasonable and informed third party having knowledge of all relevant information as not being independent. That risk must be reduced to an acceptable level to conclude that a member is independent under the concepts in this framework. Risk is at an acceptable level when threats are at an acceptable level, either because of the types of threats and their potential effect, or because safeguards have sufficiently mitigated or eliminated the threats. Threats are at an acceptable level when it is not reasonable to expect that the threat would compromise professional judgment.

.37 The risk-based approach involves the following steps:

a. *Identifying and evaluating threats to independence*—Identify and evaluate threats, both individually and in the aggregate, because threats can have a cumulative effect on a member's independence. If threats are identified but, due to the types of threats and their potential effects, such threats are considered to be at an acceptable level (that is, it is not reasonable to expect that the threats would compromise professional judgment), the consideration of safeguards is not required. If identified threats are not considered to be at an acceptable level, safeguards should be considered as described in the Conceptual Framework.

b. *Determining whether safeguards already eliminate or sufficiently mitigate identified threats and whether threats that have not yet been mitigated can be eliminated or sufficiently mitigated by safeguards*—Different safeguards can mitigate or eliminate different types of threats, and one safeguard can mitigate or eliminate several types of threats simultaneously. When threats are sufficiently mitigated by safeguards, the threats' potential to compromise professional judgment is reduced to an acceptable level. A threat has been sufficiently mitigated by safeguards if, after application of the safeguards, it is not reasonable to expect that the threat would compromise professional judgment.

.38 If no safeguards are available to eliminate an unacceptable threat or reduce it to an acceptable level, independence would be considered impaired.

> **Help Desk**—The Conceptual Framework can be found at www.aicpa.org/about/code/et_100.html and the revised "Other Considerations" section in Interpretation No. 101-1 can be found at www.aicpa.org/about/code/et_101.html#et_101.02.

Preparing Financial Statements for Audit by Another Firm

.39 In today's environment, primarily driven by independence concerns, a client may engage an accountant (or his or her firm) other than the independent auditor, as an advisory accountant to assist management in certain recurring accounting or reporting functions (for example, bookkeeping or assistance in preparing financial statements or notes, performing fair value impairment tests, or assistance in preparing regulatory filings). In this capacity, the advisory accountant may be frequently asked to provide advice on the application of accounting principles or to assist management in formulating its accounting positions prior to discussing such positions with its auditor.

.40 In order to provide guidance to accountants who are engaged as advisory accountants and to help those accountants understand their obligation to consult with the auditor under AU section 625, *Reports on the Application of Accounting Principles,* as amended (AICPA, *Professional Standards*, vol. 1), the ASB issued an interpretation in January 2005.

.41 According to paragraph .08 of Interpretation No. 1, "Requirement to Consult With the Continuing Accountant," in AU section 9625 (AICPA, *Professional Standards*, vol. 1), an important distinction to consider in overcoming the presumptive requirement to consult with the auditor is the nature of the engagement and whether the services are recurring as contrasted to periodic. A recurring engagement may constitute the effective outsourcing of certain controllership or other financial reporting functions that would typically not be indicative of opinion shopping and would typically allow the nonauditor accountant to have complete access to management. If you are engaged in the capacity of an advisory accountant, you nonetheless should be alert to any instances in which the client attempts to use you to "opinion shop." You should establish an understanding with the client that includes a statement that the responsibility for the proper accounting treatment rests with management, who should consult with their auditor, and that the client, along with you, will notify the auditor and members of any governance body (such as audit committee) of the arrangement.

.42 You should document your conclusion that consultation with the auditor was not considered necessary under the circumstances. Additionally, you should comply with the other requirements of AU section 625, including AU section 625.08, which requires you to:

- Obtain an understanding of the form and substance of the transaction(s);
- Review applicable generally accepted accounting principles (GAAP);
- If appropriate, consult with other professionals or experts; and
- If appropriate, perform research or other procedures to ascertain and consider the existence of creditable precedents or analogies.

.43 Another question that often arises in these circumstances is whether the advisory accountant must report on the financial statements that are prepared and submitted to be audited by another firm. According to Interpretation No. 21, "Applicability of SSARS No. 1 When Performing Controllership or Other Management Services" in AR section 9100 (AICPA, *Professional Standards*, vol. 2), if you are in the practice of public accounting and provide an entity (who is not an issuer) with services such as those above (including submitting financial statements), you must follow the performance and communication requirements of AR section 100, including any requirement to disclose a lack of independence. In other words, any financial statements you submit as a result of these services that will be used by a third party (as defined in AR section 100.04), even if they are only submitted to the auditor, should generally be accompanied by an appropriate compilation report.[1]

Proposed SQCS, *A Firm's System of Quality Control*

.44 In September 2005, a task force was formed to review the Statements on Quality Control Standards (SQCS) and determine if and how they should be amended, in light of the changes in the quality control environment in the past two years, and with the goal of harmonization with International Statement of Quality Control Standard (ISQC) No. 1, *Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.* The task force is comprised of members from the ASB, the ARSC, the Peer Review Board and the Center for Public Companies Audit Firms Peer Review Committee.

.45 At its June 2006 meeting, the ASB requested that the task force consider the need to revise existing standards (specifically AU section 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards* [AICPA, *Professional Standards*, vol. 1]) to converge with International Standards on Auditing (ISA) 220, *Quality Control for Audits of Historical Financial Information*. The SQCSs and ISQC No. 1 apply at the firm level, while ISA 220 and AU section 161 apply to the engagement. The task force is also considering whether revisions to the attestation standards and SSARSs (AR section 100.70–.72) are necessary, and if so, their nature and extent.

.46 In July 2006, the ASB issued an exposure draft of a proposed SQCS, *A Firm's System of Quality Control*. The exposure draft introduces a proposed SQCS that will replace all existing SQCSs. This proposed SQCS establishes standards and provides guidance for a CPA firm's responsibilities for its system of quality control for its accounting and auditing practice. It describes elements of quality control and other matters essential to the effective design, implementation, and maintenance of the system. The proposed SQCS also sets forth the meaning of certain terms used in SQCSs issued by the ASB in describing the professional requirements imposed on firms and practitioners-in-charge.

.47 The proposed SQCS deals comprehensively with a firm's quality control practices in the areas of audits, reviews and compilations, and other attestation engagements. It places an unconditional obligation

[1] Interpretation No. 21, "Applicability of SSARS No. 1 When Performing Controllership or Other Management Services," in AR section 9100 (AICPA, *Professional Standards*, vol. 2) provides an option to a report under AR section 100 when an accountant engaged to perform controllership or other management services is in the practice of public accounting and is also an owner or employee of the client.

on a firm to establish a system of quality control designed to provide it with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the reports issued by the firm or engagement partners are appropriate in the circumstances.

.48 The proposed SQCS defines the engagement quality control review and requires firms to establish criteria to determine which engagements are to be subject to an engagement quality control review. It also provides guidance on policies and procedures for performing engagement quality control reviews. An engagement quality control review should include a review of the financial statements or other subject matter information and the report, and, in particular, consideration of whether the report is appropriate. The proposed SQCS states that an engagement quality control review also should include any of the following:

1. A discussion with the practitioner-in-charge
2. A review of selected working papers relating to the significant judgments the engagement team made and the conclusions they reached, or
3. Both discussion and review

.49 The decision to review selected working papers in addition to or instead of discussion with the practitioner-in-charge depends on the complexity of the engagement and the risk that the report might not be appropriate in the circumstances.

.50 In addition, the proposed SQCS:

- Defines the terminology the ASB will use to describe the degrees of responsibility that the requirements in SQCSs impose on firms. There are two categories of requirements:
  1. *Unconditional requirements.* The firm is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SQCSs use the words *must* or *is required* to indicate an unconditional requirement.
  2. *Presumptively mandatory requirements.* The firm is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the firm may depart from a presumptively mandatory requirement provided the firm documents its justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SQCSs use the word *should* to indicate a presumptively mandatory requirement.
- Requires a firm to document its quality control policies and procedures. The extent of the documentation is based on the size, structure, and nature of the firm's practice.
- Requires a firm's system of quality control to address each of the following elements:
  1. Leadership responsibilities for quality within the firm ("tone at the top");
  2. Independence, integrity, objectivity, and other legal and ethical requirements;
  3. Acceptance and continuance of client relationships and specific engagements;
  4. Human resources (formerly personnel management);
  5. Engagement performance and engagement documentation; and
  6. Monitoring.
- Recognizes the importance of a quality-oriented internal culture, and requires firms to assign its management responsibilities so that commercial considerations do not override the objectives of the

system of quality control, and to design its policies and procedures addressing personnel performance evaluation, compensation, and promotion to demonstrate the firm's overarching commitment to quality.

- Provides more detailed guidance on independence, and requires a written confirmation of compliance with independence requirements from all firm personnel at least annually.
- Provides more detailed guidance on client acceptance and continuance, and requires documentation of the resolution of significant issues.
- Provides more detailed guidance on engagement supervision and review, engagement documentation, and consultation policies and procedures.
- Requires policies and procedures for resolving differences of opinion, including a requirement that reports must not be issued until the differences of opinion are resolved.
- Requires annual monitoring procedures. Firms are required to assign responsibility for monitoring to a person of appropriate authority, and are required to evaluate deficiencies and communicate recommendations for remedial action.
- Requires policies and procedures for dealing appropriately with complaints and allegations of noncompliance with professional standards or with the firm's system of quality control.

.51 The exposure draft can be obtained at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Exposure+Drafts+of+Proposed+Statements/A_Firms_System_of_Quality_Control.htm. The exposure period ended on September 30, 2006. Letters of comment received on the exposure draft can be viewed at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Exposure+Drafts+of+Proposed+Statements/A+Firms+System+of+Quality+Control. A final standard is expected to be issued in the second quarter of 2007.

Business Risks Associated With Accounting and Review Services

.52 As the underwriter of the AICPA Professional Liability Insurance Program, Continental Casualty Company (CNA) provides professional liability insurance to more than 24,000 CPA firms nationwide. According to CNA, a longstanding problem in defending accountants' malpractice claims has been client disputes regarding scope of services. Oftentimes, claimants allege that their CPA failed to advise them on a specific issue or failed to provide a service that they thought was being provided, and that they suffered damages as a result.

.53 In addition, CNA has noted that in malpractice claims arising from engagements for general accounting or bookkeeping services to small businesses, often a central issue in the claim is the lack of an explicit understanding with the client regarding the scope of services being provided. Many of these claims arise from embezzlement losses suffered by the client. CPAs that issue engagement letters in this practice area often include the disclaimer included in sample engagement letters in the appendixes to SSARS, which reads as follows:

> Our engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, we will inform the appropriate level of management of any material errors and of any evidence or information that comes to our attention during the performance of our compilation procedures, that fraud may have occurred. In addition, we will report to you any evidence or information that comes to our attention during the performance of our compilation procedures, regarding illegal acts that may have occurred unless they are clearly inconsequential.

.54 Although such language is helpful, according to CNA, by itself the language does not provide adequate protection to practitioners from such embezzlement-related claims. The reasons for this include the following:

- Claims typically allege that the CPA failed to detect and report to management issues that might indicate embezzlement is occurring, rather than actual evidence of embezzlement. Examples include the untimely posting of receipts, unexplained bank account reconciliation items, repeated payments to vendors that the client hadn't used previously, or unusually high credit card charges.

- Claims also allege that the CPA failed to timely alert the client to obvious internal control weaknesses, such as a lack of segregation of duties, and that, had they done so, the client would have addressed the problem and prevented subsequent embezzlement.

- In addition, claims allege that CPAs failed to detect fraud in engagements that included periodic or regular reconciliation of the client's bank statement against their check register. In these claims, the clients frequently allege that the CPA failed to note that the payee name on one or more of the canceled checks did not match the payee name on the check register, or that the signature on the checks did not match those on file at the client as authorized signatories. In many cases, the CPA did not review the checks either because they considered this to be outside of the scope of their engagement responsibilities or because the checks were not provided with the bank statement. The client simply presumed that the CPA would receive the checks and compare the payees and signatures on the checks to the check register and signatures on file to check for possible fraud.

- Last, claims allege that the CPA had knowledge of internal control weaknesses and indicators of possible fraud or embezzlement by virtue of their ongoing handling of the client's books and records and contacts with the client's employees. This allegation is typically supported by statements pointing out the CPA's multiyear relationship with the client and extensive contacts with the client through ongoing monthly work.

.55 The bottom line is, although engagement letters are very important, you should make it clear to your client that it is management's responsibility to prevent and detect fraud. An effective way to do this is to educate your client as to the importance of internal control in the prevention of fraud. You are then in a position to work with your client in a separate consulting engagement to improve the client's internal control. One advantage is the client's increased awareness of the importance of internal control, which will aid in the design of suitable controls. Controls will result in the reduction of the risk of fraud and errors. In addition, this exercise clarifies management's responsibility to prevent and detect fraud, thereby reducing your legal risk.

Letter Requests From Lenders and Mortgage Brokers

.56 AICPA members have contacted the AICPA to clarify their professional ethical obligations when asked for "comfort letters" by lenders and mortgage brokers. Depending on how practitioners respond to such requests, they may be at risk for failing to comply with AICPA professional standards. In these situations, a number of CPAs may violate professional standards unknowingly; others may cave in to brokers' threats to undermine the CPA-client relationship. CPAs can ethically and effectively address these situations if they are aware of and stick to their professional obligations.

.57 Many CPAs think of a comfort letter as a letter from a CPA to a company involved in a bond offering, an initial public offering (IPO), or a stock placement, that allows the company to assure the underwriter concerning the offering document and the company's financial reports. These letters are discussed in AU section 634, *Letters to Underwriters and Certain Other Requesting Parties* (AICPA, *Professional Standards*, vol. 1).

.58 The comfort letters at issue are similar in intent. These letters are usually associated with stated income loans, which are mortgages that do not require borrowers to document their income. Such loans usually are sought by borrowers whose income sources are difficult to verify or fluctuate from year to year. Self-employed people and individuals with investment income or with sales jobs of varying commissions often apply for stated income loans. Lenders, lacking documentation to support borrowers' income claims, take on the risk that borrowers' claims are inadequate. Because of the higher risk, lenders charge higher interest rates. To gain more comfort in extending loans, some lenders look to the borrowers' CPA for assurance about the stated income amount.

.59 In an effort to minimize their risk, brokers typically ask CPAs to vouch for their clients with a letter supporting clients' claims relating to income and their self-employment. If they arise, these situations can place you at risk in two ways. First, your response must be in compliance with professional standards. If you point out to the broker that reporting on solvency in this situation would be unethical or that a request requiring examining a personal balance sheet and earnings forecast would be expensive, the broker may exert pressure by threatening to suggest that the client change CPAs.

.60 You can protect yourself against the risks associated with these situations, but first you must understand what is and is not permissible. Attestation Interpretation No. 2, "Responding to Requests for Reports on Matters Relating to Solvency" in AT section 9101, *Attest Engagements: Attest Engagements Interpretations of Section 101* (AICPA, *Professional Standards*, vol. 1), provides guidance to the practitioner when he or she receives such requests. Essentially, this Interpretation states that you should not provide any form of assurance relating to matters of solvency, but there are services that you may perform. If a mortgage broker or lender really wants an attest report from you, then you may audit, review, or compile the personal financial statements of the borrower, you may report on pro forma or prospective financial information of the borrower, or you may perform and provide to the client and lender an agreed-upon procedures report, as long as the agreed-upon procedures do not provide any assurance on matters relating to solvency. Brokers tend to ask for as much assurance as they can get without understanding or knowing the cost or consequences. However, once you explain to your client and the broker the cost entailed, they typically back off their request. Instead, the brokers may be satisfied with a simple letter from you acknowledging that the income reported to the broker or lender is the amount that has been reported to the Internal Revenue Service (IRS) on the tax return. Obviously, the client would need to agree to have you send such a letter.

.61 In these situations, you can avoid risk by sticking to your professional responsibilities, following professional standards and not caving in to undue pressure. Also, many insurance providers are aware of this practice and as a result have developed sample letters or templates for CPAs to use in these situations. You should contact your insurance provider and inquire whether they have any additional guidance or sample letters that you could use for these requests.

Current Accounting and Reporting Issues

Handling GAAP Departures

.62 If, in the course of a compilation or review engagement, you become aware of a material departure from GAAP or OCBOA, you have the following three possible courses of action:

- Persuade the client to revise the financial statements (usually the preferred course of action).
- Refer to the material departure in the compilation or review report.
- Withdraw from the engagement (if you believe the client's intent is to mislead financial statement users).

Report Modification Is Adequate

.63 If you decide that the departures can be adequately described in the report, a modified report can be issued. The modification consists of adding a separate paragraph to the report in which the departure is described. In addition, in a compilation report, the accountant adds a sentence at the end of the second paragraph indicating that he or she became aware of a departure from GAAP or OCBOA. In a review report, the accountant revises the third paragraph by adding "with the exception of the matters described in the following paragraphs" prior to the statement that the accountant is not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with GAAP or OCBOA. If known to you, the effect of the departure on the financial statements should be disclosed in the separate paragraph. If the effect of the departure is not known, however, you are not required to determine the effect. When the effect is not known, you must state this fact in the separate paragraph. The following is an example of this additional paragraph:

> Generally accepted accounting principles require that income taxes be accrued. Management has informed us that the Company has not accrued income taxes in the accompanying financial statements, and the effects of this departure from generally accepted accounting principles has not been determined.

Report Modification Is Inadequate

.64 In some circumstances, you may conclude that it would be inadequate to simply add a separate paragraph (or paragraphs) to the report to explain the departure (or departures). If you conclude that the modification to the standard report is not adequate to describe the effects of the departure, AR section 100 states that you should withdraw from the engagement and provide no further services on the financial statements. In addition, you should consider consulting legal counsel and your professional liability carrier.

.65 Generally, you would reach such a conclusion when it appears that the client's intention is to deceive users of the financial statements. Although it is difficult to provide specific guidance for determining when it is inappropriate to issue a report, Interpretation No. 6, "Withdrawal From Compilation or Review Engagement," in AR section 9100 (AICPA, *Professional Standards*, vol. 2) provides the following two illustrations of situations in which the accountant considers whether the client's intent is to deceive users of the financial statements:

1. The client may have entered into a number of leasing arrangements that might be required to be capitalized under Financial Accounting Standards Board (FASB) Statement No. 13, *Accounting for Leases*. The client may not wish to capitalize such leases and may not have determined the effect of this departure from GAAP. However, the client may be willing to disclose in the financial statements information such as the nature of the leased property, the payments required under the leases, and other important terms of the leases. In those circumstances, the accountant is not likely to conclude that the departure was undertaken with the intention of misleading users, even though the effect of the departure is not quantified in the financial statements or the accountant's report.

2. The client may have failed to provide for doubtful accounts and probable sales returns in the face of significant adverse business and economic conditions and may be unwilling to acknowledge that an adjustment should be considered. This might cause the accountant to question whether other information the client provided is incorrect, incomplete, or otherwise unsatisfactory. Also, the accountant's general knowledge of the entity's business and related matters might lead him or her to conclude that this position indicates an intent to mislead users, particularly if the effects of the departure are not determined.

Common Peer Review Findings

Recurring Deficiencies Noted in Compilation and Review Engagements

.66 In 2005, the AICPA Peer Review Program reported approximately 9,500 peer reviews, of which approximately 5,000 pertained to compilation and review engagements. The importance of the peer review findings cannot be overemphasized. The following is a summary of some of the most recent significant deficiencies that an accountant should keep in mind when planning and staffing compilation and review engagements.

Significant Deficiencies

.67 Significant deficiencies include matters that are normally material to understanding the report or financial statements or represent critical SSARS procedure. An engagement with a significant deficiency is normally considered substandard, although careful judgment is required when forming a conclusion. Although this list is not all-inclusive, it does contain the most common, recurring deficiencies. In addition, we have included practical examples and explanations of these deficiencies that you should try to avoid.

Reports, Financial Statement Measurement, Presentation, and Disclosure

Deficiency	*Practical Example*
Departures from standard wording where the report does not contain the critical elements of the applicable standards	It is not uncommon to see compilation and review reports with no reference to the SSARSs in those reports.
Issuance of a review report when the accountant is not independent with respect to the client	Although an accountant may report on compiled financial statements if he or she is not independent (by modifying the compilation report), the accountant may not issue a review report if he or she is not independent. In all cases in which the CPA issues an "assurance" report (audit or review) on the financial statements, the CPA must be independent with respect to the client in order to perform the engagement (i.e., modifying the review report for a lack of independence is inappropriate).
Failure to disclose lack of independence in a compilation report	Although an accountant may report on compiled financial statements when he or she is not independent, the SSARSs require modification of the compilation report to clearly indicate this lack of independence by adding a one-sentence paragraph to the compilation report, specifically, "I am [We are] not independent with respect to XYZ Company."
Failure to disclose the omission of substantially all disclosures	A CPA may compile financial statements with disclosures omitted as long as the omission of disclosures is clearly indicated in the compilation report and the disclosures are not omitted with the intent to "mislead" those who might reasonably be expected to use the financial statements. A third paragraph should be added to the compilation report as follows: Management has elected to omit substantially all the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.
Failure to disclose the omission of the statement of cash flows in financial statements prepared in accordance with GAAP	Pursuant to the guidance in FASB Statement No. 95, *Statement of Cash Flows*, if financial statements include both a balance sheet and an income statement, the statement of cash flows should be provided for each

	period that the income statement is provided. Given this fact, the statement of cash flows needs to be provided when the CPA reviews financial statements (or the failure to include the statement of cash flows should be disclosed as a departure from GAAP in the accountant's review report); the same issue or result would exist when the CPA compiles full-disclosure financial statements. However, if the CPA compiles financial statements in which management elects to omit substantially all disclosures, the omitted statement of cash flows can be "referenced" in the paragraph that reports the fact that disclosures have been omitted, as follows: Management has elected to omit substantially all the disclosures and the statement of cash flows required by generally accepted accounting principles. If the omitted disclosures and statement were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.
Failure to disclose an OCBOA for financial statements compiled without disclosure, where the basis of accounting is not readily determinable from reading the report	Interpretation No. 12, "Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles," in AR section 9100, provides example language that should be added to the end of the first paragraph of the compilation report in these circumstances. For tax-basis financial statements, the wording is as follows; similar wording should be added to compilation reports prepared on the cash/modified-cash basis: The financial statements have been prepared on the accounting basis used by the Company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles. *Practice Note:* Interpretation No. 12 also contains "model" report wording for review reports issued on OCBOA financial statements.
Failure to disclose, in the accountant's report, a material departure from professional standards (examples include the nonconsolidation of appropriate subsidiaries with a parent company's financial statements; omission of significant income tax provisions in interim financial statements; omission of significant disclosures related to material defined employee	Material departures should be identified in the compilation or review report. For compilation reports, wording should be added to the end of the second paragraph as follows: However, we did become aware of a departure from generally accepted accounting principles that is described in the following paragraph. In review reports, the third paragraph of the review report should be modified as follows:

(continued)

benefit plans; or nonrecognition of significant deferred income)	Based on our review, with the exception of the matter described in the following paragraph, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles. Then a GAAP departure paragraph should be added as the final paragraph in both compilation and review reports.
Inclusion of material balances that are not appropriate for the basis of accounting used	One of the major concerns pertaining to this deficiency relates to compilations/reviews of cash/modified-cash basis financial statements. It is not uncommon to see trade receivables recorded in these financial statements. If the receivables are recognized in the statements, then the "offsetting credit" relates to the fact that revenues are being recognized as they are earned (accrual basis). CPAs are reminded that they may "cross the line" when modifying the cash basis of accounting so that the financial statements essentially are accrual-based financial statements rather than cash/modified-cash basis financial statements. Also, it still is not uncommon to see start-up expenses (i.e., organization costs) capitalized and amortized in GAAP-basis financial statements. CPAs are reminded that, pursuant to the provisions of SOP 98-5, *Reporting on the Costs of Start-Up Activities*, these type costs should be expensed as incurred in GAAP-basis financial statements (although they still should be capitalized and amortized in tax-basis financial statements). Including start-up expenses as an asset in GAAP-basis financial statements is inappropriate. As a final example, it is inappropriate to include a provision for tax in financial statements of a partnership. Since a partnership is a *flow-through* entity in which taxes are paid by the partners, there should be no provision for tax related to the *distribution to partners* so that the partners can cover their pro rata share of the tax liability. *Practice Note*: This listing of practical examples is not inclusive. CPAs are reminded to be very careful not to confuse personal and business financial assets when preparing and reporting on financial statements of a proprietorship.
Failure to include a material amount or balance necessary for the basis of accounting used (examples include the omission of material accruals, failure to provide for material losses or doubtful accounts, or failure to provide for material deferred income taxes)	Essentially, this is an issue of a departure from GAAP or OCBOA, as discussed above. For example, if a provision for tax is not included in the financial statements of a C Corporation or the accrual of compensated absences is omitted from GAAP-basis financial statements. These departures, if material, should result in modification of the compilation or review report to indicate that the departure exists.

Significant departures from the financial statement formats prescribed by industry accounting and audit guides	In many cases, this deficiency is prevalent if CPAs are preparing and reporting on financial statements of clients in "special industries" in which they try to "fit" the standard financial statement formats for use in these industries. For example, for health care clients, there is a requirement for a "performance indicator" to be included in the financial statements. As another example, not-for-profit organizations have a statement of activities (rather than an income statement) in which all changes in net assets during a reporting period are reflected in that statement. If CPAs try to utilize formats that are applicable to the "normal" business entities, it is not uncommon for some of the special industry guidance not to be followed. You should refer to the appropriate AICPA audit and accounting guides when financial statements are being compiled or reviewed.
Omission of disclosures of significant accounting policies applied (GAAP or OCBOA)	As a result of significant changes in disclosure requirements in recent years, CPAs need to be careful not to "copy last-year" disclosures in current-year financial statements. Some of the required policy note disclosures are often easily missed. Commonly missed policy note disclosures include the nature of operations, use of estimates, advertising costs, shipping and handling costs, basis of accounting for receivables (and the bad debts associated with those receivables). All significant accounting policies should be included in GAAP and OCBOA financial statements.
Improper accounting of a material transaction (for example, recording a capital lease as an operating lease)	This is another GAAP departure issue. These departures, if material, should result in modification of the compilation or review report to indicate that the departure exists.
Misclassification of a material transaction or balance	You should make sure that items, transactions, and events are classified appropriately in the financial statements.
Failure to segregate the statement of cash flows into the components of operating, investing, and financing activities	It is not uncommon to see amounts misclassified within the three sections. For example, "advances to owners" should be classified as an investing activity, while "advances from owners" should be classified as a financing activity—it is not appropriate to "net" the items.
Omission of significant required disclosures related to material financial statement balances or transactions	Always use a current disclosure checklist applicable to the basis of accounting used.
Omission of a statement of income and retained earnings when referred to in the report	The compilation or review report should refer to the actual financial statements included in the presentation. CPAs are reminded to modify your report if certain statements are not included in the financial statements. Also, the statement of retained earnings is not a required financial statement.

(continued)

Omission of significant matters related to the understanding of the financial statements (the cumulative material effect of a number of deficiencies)	This deficiency occurs if several minor deficiencies result in a cumulative material effect on the financial statements when viewed in the aggregate.

SSARS Procedures and Documentation

Deficiency	*Practical Example*
Failure to document the matters covered in the accountant's inquiries and analytical procedures in review engagements	Inquiries and analytical procedures provide the basis for the limited assurance expressed in the review report, and must be documented. AR section 100 contains a list of required documentation for a review engagement, including the requirement to document significant expectations.
Failure to obtain a client management representation letter for a review engagement	A management representation letter is required in all review engagements. These letters are not required in compilation engagements.
Failure to include, in a management-use-only engagement letter, required language for communicating the understanding of the engagement for financial statements that are prepared for management use only, except for the failure to refer to the level of responsibility on supplementary information, which is not a significant deficiency	Refer to AR section 100 for a list of requirements for a management-use-only compilation engagement letter.

.68 Although there are many recurring deficiencies noted in peer review, the accountant can take steps to avoid them by keeping these common mistakes in mind during the planning and performance of future compilation and review engagements.

Accounting Pronouncements and Guidance Update

.69 Presented below is a list of recently issued accounting pronouncements and other guidance issued since the publication of last year's Alert. For summaries of these pronouncements, or to obtain copies of them, visit the applicable Web site of the issuing body. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 155	*Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140*
FASB Statement No. 156	*Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*

FASB Statement No. 157	*Fair Value Measurements*
FASB Statement No. 158	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Interpretation No. 48	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.

AICPA Technical Practice Aid 2130.36–2130.37 (May 2006) (Nonauthoritative)	"Impact on Cash Flows on a Group of Loans Accounted for as a Pool in Accordance with SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*"
AICPA Technical Practice Aid 1400.32 (June 2006) (Nonauthoritative)	"Parent-Only Financial Statements and Relationship to GAAP"

.70 Some of the standards are summarized below. These summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard.

FASB Statement No. 157, *Fair Value Measurements*

.71 This Statement defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice.

.72 The changes to current practice resulting from the application of this Statement relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurements.

.73 This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year.

.74 The provisions of this Statement should be applied prospectively as of the beginning of the fiscal year in which this Statement is initially applied, except as follows. The provisions of this Statement should be applied retrospectively to the following financial instruments as of the beginning of the fiscal year in which this Statement is initially applied (a limited form of retrospective application):

1. A position in a financial instrument that trades in an active market held by a broker-dealer or investment company within the scope of the AICPA Audit and Accounting Guides for those industries that was measured at fair value using a blockage factor prior to initial application of this Statement.
2. A financial instrument that was measured at fair value at initial recognition under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, using the transaction price in accordance with the guidance in footnote 3 of Emerging Issues Task Force (EITF) Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities," prior to initial application of this Statement.
3. A hybrid financial instrument that was measured at fair value at initial recognition under FASB Statement No. 133 using the transaction price in accordance with the guidance in FASB Statement No. 133 (added by FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments*) prior to initial application of this Statement.
4. The transition adjustment, measured as the difference between the carrying amounts and the fair values of those financial instruments at the date this Statement is initially applied, should be recognized as a cumulative-effect adjustment to the opening balance of retained earnings (or other appropriate components of equity or net assets in the statement of financial position) for the fiscal year in which this Statement is initially applied.

FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*

.75 This Statement improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity or changes in unrestricted net assets of a not-for-profit organization. This Statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.76 This Statement requires an employer that is a business entity and sponsors one or more single-employer defined benefit plans to:

1. Recognize the funded status of a benefit plan—measured as the difference between plan assets at fair value (with limited exceptions) and the benefit obligation—in its statement of financial position. For a pension plan, the benefit obligation is the projected benefit obligation; for any other postretirement benefit plan, such as a retiree health care plan, the benefit obligation is the accumulated postretirement benefit obligation.

2. Recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost pursuant to FASB Statements No. 87, *Employers' Accounting for Pensions*, or No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*. Amounts recognized in accumulated other comprehensive income, including the gains or losses, prior service costs or credits, and the transition asset or obligation remaining from the initial application of FASB Statements No. 87 and No. 106, are adjusted as they are subsequently recognized as components of net periodic benefit cost pursuant to the recognition and amortization provisions of those Statements.

3. Measure defined benefit plan assets and obligations as of the date of the employer's fiscal year-end statement of financial position (with limited exceptions).

4. Disclose in the notes to financial statements additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation.

.77 This Statement also applies to a not-for-profit organization or other entity that does not report other comprehensive income. This Statement's reporting requirements are tailored for those entities.

.78 This Statement amends FASB Statements No. 87; No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*; No. 106, and No. 132 (revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits*; and other related accounting literature. Upon initial application of this Statement and subsequently, an employer should continue to apply the provisions in FASB Statements No. 87, No. 88, and No. 106 in measuring plan assets and benefit obligations as of the date of its statement of financial position and in determining the amount of net periodic benefit cost.

.79 The required date of adoption of the recognition and disclosure provisions of this Statement differs for an employer that is an issuer of publicly traded equity securities (as defined) and an employer that is not. For purposes of this Statement, an employer is deemed to have publicly traded equity securities if any of the following conditions are met:

1. The employer has issued equity securities that trade in a public market, which may be either a stock exchange (domestic or foreign) or an over-the-counter market, including securities quoted only locally or regionally.

2. The employer has made a filing with a regulatory agency in preparation for the sale of any class of equity securities in a public market.

3. The employer is controlled by an entity covered by items 1 or 2.

.80 An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006.

.81 An employer without publicly traded equity securities is required to recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after June 15, 2007.

.82 However, an employer without publicly traded equity securities is required to disclose the following information in the notes to financial statements for a fiscal year ending after December 15, 2006, but before June 16, 2007, unless it has applied the recognition provisions of this Statement in preparing those financial statements:

1. A brief description of the provisions of this Statement.
2. The date that adoption is required.
3. The date the employer plans to adopt the recognition provisions of this Statement, if earlier.

.83 The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. If in the last quarter of the preceding fiscal year an employer enters into a transaction that results in a settlement or experiences an event that causes a curtailment of the plan, the related gain or loss pursuant to FASB Statements No. 88 or No. 106 is required to be recognized in earnings or changes in unrestricted net assets of that quarter.

.84 Earlier application of the recognition or measurement date provisions is encouraged; however, early application must be for all of an employer's benefit plans. Retrospective application of this Statement is not permitted.

FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*

.85 This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes.* This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.86 The evaluation of a tax position in accordance with this Interpretation is a two-step process. The first step is recognition: The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement: A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.87 Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one of the following:

1. An increase in a liability for income taxes payable or a reduction of an income tax refund receivable
2. A reduction in a deferred tax asset or an increase in a deferred tax liability
3. Both items 1 and 2

.88 An enterprise that presents a classified statement of financial position should classify a liability for unrecognized tax benefits as current to the extent that the enterprise anticipates making a payment within one year or the operating cycle, if longer. An income tax liability should not be classified as a deferred tax liability unless it results from a taxable temporary difference (that is, a difference between the tax basis of an asset or a liability as calculated using this Interpretation and its reported amount in the statement of financial position). This Interpretation does not change the classification requirements for deferred taxes.

.89 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109 is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this Interpretation.

.90 This Interpretation is effective for fiscal years beginning after December 15, 2006. Earlier application of the provisions of this Interpretation is encouraged if the enterprise has not yet issued financial statements, including interim financial statements, in the period this Interpretation is adopted.

Recent AICPA Independence and Ethics Pronouncements

.91 The AICPA *Independence and Ethics Alert—2006/07* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. Some recent developments pertain to gifts and entertainment, requests for client records, and the Conceptual Framework, which was mentioned earlier in this Alert. The Independence and Ethics Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain that Alert to be aware of independence and ethics matters that will affect their practice.

On the Horizon

.92 Practitioners should keep abreast of accounting and reporting developments and upcoming guidance that may affect engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP. The AICPA General *Audit Risk Alert—2006/07* (product no. 022337kk) summarizes some of the more significant outstanding exposure drafts.

.93 Additionally, the following table lists the various standard-setting bodies' Web sites where information regarding outstanding exposure drafts may be obtained. Also see Appendix A, "Additional Web Resources," of this Alert for a more complete list.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/index.htm
AICPA Accounting and Review Services Committee (ARSC)	www.aicpa.org/members/div/auditstd/index.htm
Governmental Accounting Standards Board (GASB)	www.gasb.org
Financial Accounting Standards Board (FASB)	www.fasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site at www.aicpa.org. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft email list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed above.

SSARS Pipeline

.94 The AICPA ARSC is currently working on the following potential new projects.

Potential Project on Planning and Supervision

.95 Rule of Conduct 201, *General Standards* (AICPA, *Professional Standards*, vol. 2) of the AICPA Code states:

> A member shall comply with the following standards and with any interpretations thereof by bodies designated by Council.
>
> *a. Professional Competence*. Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.
>
> *b. Due Professional Care*. Exercise due professional care in the performance of professional services.
>
> *c. Planning and Supervision*. Adequately plan and supervise the performance of professional services.
>
> *d. Sufficient Relevant Data*. Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.96 Currently, the guidance for planning and supervising with respect to a compilation or review engagement is included in Interpretation No. 5, "Planning and Supervision" (AICPA, *Professional Standards*, vol. 2) in AR section 9100. That Interpretation states that although AU section 311, *Planning and Supervision*, does not govern engagements to compile or review financial statements of a nonpublic entity, an accountant may wish to consider the auditing standards or other reference sources, such as textbooks and articles, when he or she needs additional information on planning and supervision. The ARSC will consider issuing a proposed SSARS that would provide guidance on planning and supervising a compilation or review engagement. The ARSC tentatively plans to expose such a proposed SSARS during the third quarter of 2007.

Potential Project on Use of Terms

.97 In December 2005, the ASB issued SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards*, and Statement on Standards for Attestation Engagements (SSAE) No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements.* Those standards define the terminology the ASB will use to describe the degrees of responsibility that the requirements impose on the auditor or the practitioner. The standards define two categories of professional requirements—"unconditional requirements" (indicated by the words *must* or *is required*) and "presumptively mandatory requirements" (indicated by the word *should*). The ARSC will consider issuing a proposed SSARS that would define the terminology the ARSC will use to describe the degrees of responsibility that the SSARS impose on the accountant. The ARSC tentatively plans to expose such a proposed SSARS during the fourth quarter of 2007.

Potential Recodification of SSARS

.98 The ARSC is considering a reorganization of the Codification of Statements on Standards for Accounting and Review Services. The resulting Codification would be organized as follows:

- SSARSs hierarchy
- Guidance with respect to compilations of financial statements
- Guidance with respect to reviews of financial statements
- Guidance with respect to compilations of specified elements, accounts, or items of a financial statement
- Guidance with respect to compilations of pro forma financial information

The ARSC tentatively plans to expose a proposed SSARS during the fourth quarter of 2007.

Potential Reconsideration of SSARS No. 6

.99 In September 1986, the ARSC issued SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AICPA, *Professional Standards*, vol. 2, AR sec. 600). AR section 600 provides an exception from AR section 100 for personal financial statements that are included in written personal financial plans prepared by an accountant, and specifies the form of written report required under the exemption. The ARSC has been deliberating whether the exemption is appropriate. If the ARSC concludes that revisions to AR sec. 600 are appropriate, it is anticipated that such revisions will be exposed for public comment during the third quarter of 2007.

Potential Project on Harmonization With International Standards

.100 The ARSC is aware that the International Audit and Assurance Standards Board (IAASB) has issued International Standard on Review Engagements 2400, *Engagements to Review Financial Statements.* The ARSC plans to review that standard and consider whether the SSARSs should be amended to harmonize with the International Standard. If the ARSC concludes that revisions to SSARSs is appropriate, it is anticipated that such revisions would be exposed for public comment during the fourth quarter of 2007.

Potential Practice Aid for Bookkeeping Engagements

.101 During a September 2006 ARSC meeting, representatives of Continental Casualty Company provided several observations for consideration regarding bookkeeping services:

- Bookkeeping services of varying scope are provided routinely by most sole practitioners and small CPA firms. Approximately 17 percent of all billings reported by CPAs insured in the AICPA Professional Liability Insurance Program arise from this practice area.
- Between 2001 and 2005, approximately 5 percent of all malpractice claims in the AICPA Program arose from bookkeeping engagements.
- AICPA Professional Standards do not specifically address the provision of bookkeeping services. SSARS provides explicit guidance only with respect to the compilation and review of financial statements.

.102 Based on CNA's claim experience, it would appear that practitioners would find useful additional guidance both in performing these services and in establishing an understanding with the client regarding the scope of services provided and the limitations of the CPA's responsibilities to the client in performing services. Accordingly, the ARSC will work with the AICPA's Accounting and Auditing Publications Team to produce a practice aid for bookkeeping engagements.

Accounting Pipeline

Proposed FASB Statements, Business Combinations *and* Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries

.103 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. All acquisitions of businesses will be measured at the fair value of the business acquired

2. Substantially all the assets acquired and liabilities assumed of the acquired business will be recognized and measured at their fair values at the acquisition date

3. Entities that follow U.S. GAAP and international standards will apply substantially the same accounting requirements for their business combinations

.104 Exposure drafts on business combinations—purchase method procedures and noncontrolling interests—were issued on June 30, 2005. Practitioners should visit the FASB Web site for expected issuance dates.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.105 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental enterprises that are presented in conformity GAAP in the United States. The GAAP hierarchy is currently presented in AICPA SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1, AU sec. 411), as amended.

.106 The FASB is responsible for identifying the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental enterprises that are presented in conformity with GAAP. The FASB believes that the GAAP hierarchy should be directed specifically to enterprises because it is the enterprise (not its auditor) that is responsible for selecting accounting principles for financial statements that are presented in conformity with the GAAP hierarchy. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

Proposed FASB Statement, Accounting for Transfers of Financial Assets

.107 The exposure draft *Accounting for Transfers of Financial Assets* (Transfers Project) is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The proposed Statement seeks to (1) clearly specify the permitted activities of a qualifying special-purpose entity (QSPE), (2) address practice issues related to which arrangements should be considered and how they should be considered in the legal isolation analysis, (3) eliminate the prohibition on a

QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor, (4) revise the methodology used to initially measure at fair value interests related to transferred financial assets held by a transferor, and (5) clarify guidance related to when rollovers of beneficial interests are permitted within a QSPE. At its July 26, 2006, meeting, the FASB decided to combine the servicer discretion project (which addressed issues relating to the waiver of due-on-sale, collateral substitution, and foreclosed asset activities) into the Transfers Project. The FASB expects to issue a final Statement, which would amend FASB Statement No. 140, in the second quarter of 2007. See the FASB Web site at www.fasb.org for complete information.

Proposed FASB Statement, The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115

.108 The fair value option project has two phases. First, this proposal represents Phase 1, which addresses the fair value option for certain financial assets and financial liabilities. Second, Phase 2 will consider permitting the fair value option for certain nonfinancial assets and nonfinancial liabilities and some of the financial assets and financial liabilities excluded from the scope of Phase 1.

.109 The proposed Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur. The proposed statement has specific financial presentation requirements to display fair values and those values that are measured using other measurement techniques. The proposed Statement would amend FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, to require that securities reported at fair value in accordance with FASB Statement No. 115 satisfy the specific financial statement presentation requirements. The planned effective date is for years beginning after December 15, 2006. Visit the FASB Web site at www.fasb.org for additional information.

AICPA Resource Central

On the Bookshelf

.110 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements (product numbers appear in parentheses):

- *Compilation and Review Engagements—Essential Questions and Answers* (product no. 006622kk)
- *Review Engagements: New and Expanded Guidance on Analytical Procedures and Inquiries* (product no. 006618kk)
- *Accounting Trends and Techniques—2006* (product no. 009898kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- *Understanding and Implementing SSARS No. 8* (product no. 006612kk)

Audit and Accounting Manual

.111 The *Audit and Accounting Manual* (as of July 1, 2006) (product no. 005136kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. The manual contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; engagement letters; and management representation and confirmation letters, among other items.

AICPA's reSOURCE Online Accounting and Auditing Literature

.112 Get access—any time, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides, Audit Risk Alerts, and *Accounting Trends and Techniques*. To subscribe to this essential service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.113 The AICPA has developed a number of continuing professional education (CPE) courses that might be valuable to CPAs performing compilation and review engagements. Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.114 The AICPA has made significant enhancements to its online CPE library. Because these enhancements dramatically improve the functionality as well as the appearance of the product, the AICPA has also changed the name to CPExpress (formerly *AICPA InfoBytes*). CPExpress contains cutting-edge training and CPE with one- to two-credit courses and 24/7 access. A wide variety of basic, intermediate and advanced level courses are included pertaining to accounting and auditing, consulting services, management, personal development, taxation, and ethics. You can utilize an interactive CPE tracking tool that automatically tracks courses completed and offers the ability to enter and track other CPE courses taken. You can also print CPE certificates on demand, upon completing each course or at any time in the future and return to the same course as many times as you want for ongoing reference after you have earned CPE. To register or learn more, visit www.cpa2biz.com/CS2000/Products/CPA2BIZ/CPExpress.htm.

Member Satisfaction Center

.115 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

AICPA Technical Hotline and Ethics Hotline

.116 Technical questions about GAAP, OCBOA, accounting, auditing, compilation engagements, review engagements, or other technical matters may be addressed to the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research the question and respond with their answer. The Technical Hotline can be reached at (888) 777-7077.

.117 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. The Ethics Hotline can be reached at (888) 777-7077.

Webcasts

.118 When planning your engagements, you can join the many practitioners who have participated in AICPA webcasts. Webcasts are an exceptional way to stay current on today's professional issues. Led by recognized experts, webcasts provide complete briefings on a variety of pertinent practice topics. During a two-hour live webcast, participants have the opportunity to e-mail and ask questions of expert panelists.

.119 When planning your 2006–2007 compilation and review engagements, you need to make sure you, your colleagues, and your staff are aware of any special issues related to upcoming engagements. By viewing the Compilation and Review Risk Alert Webcast, you'll get a complete briefing on current Compilation and Review engagement issues. You will also take away a greater understanding of how to make your 2006-2007 Compilation and Review engagements more effective.

.120 The Compilation and Review Risk Alert Webcast, which was held live on November 21, 2006, is directly relevant to 2006/2007 year-ends. To purchase the archived webcast in CD format, go to: www.cpa2biz.com/CS2000/Products/CPA2BIZ/Webcast/Compilation+and+Review+Risk+Alert+Strategic+Briefing+2006+2007+Webcast.htm. CPE credit is available for participating in this Webcast.

Web Sites[2]

AICPA Online and CPA2biz

.121 AICPA Online, at www.aicpa.org, offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2Biz at www.cpa2biz.com offers all the latest AICPA products, the Audit Risk Alerts, Audit and Accounting Guides, the professional standards, and CPE courses.

.122 This Alert replaces the *Compilation and Review Alert—2005/06*. The *Compilation and Review Alert* is published annually. As you encounter issues that you believe warrant discussion in next year's Alert, please feel free to share those with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to lpombo@aicpa.org or write to:

Health Care Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
HEALTH CARE INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of health care organizations with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Zachary T. Donahue, CPA
Senior Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA wishes to thank the members of the AICPA Health Care Expert Panel and the Chair of that panel, Rick Corcoran, for their assistance and contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your health care industry audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The health care industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. This data further demonstrates the economic growth the U.S. has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent during its last 10 meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting, and in response to shaky financial market conditions, the Federal Reserve announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. The Federal Reserve then announced on August 17, 2007 that financial market conditions had deteriorated, and tighter credit conditions and increased uncertainty has the potential to restrain economic growth. The Federal Open Market Committee (FOMC) is closely monitoring the situation and is prepared to act as necessary to mitigate adverse effects on the economy arising from the disruptions in financial markets. Shortly after this August 17th release, the Federal Reserve approved actions to decrease the discount rate at the Federal Reserve Banks of Boston, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, Minneapolis, Kansas City, Dallas, and St. Louis from 6.25 percent to 5.75 percent. This narrows the spread between the primary credit rate and the target federal funds rate to 50 basis points. Auditors should remain alert to developments in the financial markets and how it may affect your audit engagements.

Industry Trends and Conditions

Centers for Medicare and Medicaid Services

.13 On August 1, 2007, the Centers for Medicare and Medicaid Services (CMS) issued a final rule that takes significant steps to improve the accuracy of Medicare's payment under the acute care hospital inpatient prospective payment system (IPPS), while providing additional incentives for hospitals to engage in quality improvement efforts. The IPPS payment reforms would restructure the inpatient diagnosis-related groups (DRGs) to account more fully for the severity of each patient's condition. In addition, the rule includes important provisions to ensure that Medicare no longer pays for the additional costs of certain preventable conditions (including certain infections) acquired in the hospital. Auditors should be aware of the impact this change will have on health care organizations. Visit the CMS Web site at www.cms.hhs.gov/AcuteInpatientPPS/IPPS/list.asp for further information.

Sarbanes-Oxley Act and Not-for-Profit Health Care Organizations

.14 Since the issuance of the Sarbanes-Oxley Act, several states' legislators, regulators, and other elected or appointed officials have sought to duplicate or extend its provisions to nonpublic companies and their auditors on the state level. The AICPA formed a Special Committee on State Regulation to assist with responses to state issues resulting from the Sarbanes-Oxley Act.

.15 To obtain an overview of accounting reform state legislative activity, go to the AICPA Web site at www.aicpa.org/statelegis/index.asp. If you are an issuer subject to the provisions of Sarbanes-Oxley, you can get information about some of the recent Securities and Exchange Commission (SEC) activities to implement Sarbanes-Oxley in the *SEC and PCAOB Alert—2007/08* (product no. 022497kk).

.16 The Public Company Accounting Oversight Board (PCAOB) issued Auditing Standard No. 5, effective July 2007. See "Recent Auditing and Attestation Pronouncements and Related Guidance" below for further discussion.

Health Care Technological Developments

.17 New technologies are continually being developed that may have a significant affect on future financial results of health care organizations. Your health care industry clients may be expanding their investment in technology in ways that may have received less attention. For example, your clients may want to achieve greater staff efficiency and productivity, improve patient care quality and safety, increase compliance with regulatory requirements, update facility and equipment modernization, and update information processing and sharing. Increasingly, individuals seek health information online before consulting with medical professionals. Additionally, researchers are working on new technologies that could lead to the development of devices allowing individuals to take certain measurements (blood pressure, temperature, heart rate) at home and then transmit that information electronically to their medical professional, which could reduce the number of necessary trips to their medical professional's office. Increasing use of technology by health care organizations includes electronic medical records, bar coding medical supplies, computerized physician ordering systems and bedside laboratory testing. The U.S. Department of Health and Human Services (HHS) continues to announce efforts to promote the use of information technology (IT) in health care, including initiatives to promote creation of electronic health records (EHR) for Americans. The American Health Information Community recently recommended that EHR adoption be its top priority and made plans to standardize secure and widely available solutions for accessing current and historical laboratory results and interpretations in the near future.

.18 As you plan your audits, consider in particular the effects of IT on internal control and your ability to sufficiently assess the associated risks of material misstatement. Auditors should consider the guidance in AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1) regarding the effect of IT on internal control.

.19 Auditors may find their health care organization clients are using off-balance-sheet financing arrangements, such as operating leases, to finance IT equipment acquisitions. Auditors should determine that the accounting guidance in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (FASB Statement) No. 13, *Accounting for Leases*, as amended and interpreted for classification of leases as operating leases, capital leases, or sale-type leases, is being followed. FASB Statement No. 13, paragraph 1, states that a lease is an agreement conveying the right to use property, plant, and equipment (land or other depreciable assets), usually for a stated period of time. Emerging Issues Task Force (EITF) Issue No. 01-8, "Determining Whether an Arrangement Contains a Lease," provides guidance on how to determine whether an arrangement contains a lease that is within the scope of FASB Statement No. 13. Governmental health care entities should also consider the guidance in Governmental Accounting Standards Board (GASB) Statement No. 13, *Accounting for Operating Leases with Scheduled Rent Increases*.

.20 A number of SEC registrants recently restated their financial statements relating to lease accounting. Specifically, restatements occurred related to the amortization of leasehold improvements; recognition of rent when lease terms of an operating lease contain what is referred to as rent holidays; and incentives related to leasehold improvements. The Chief Accountant of the SEC issued a letter in February 2005 to the AICPA's Chairman of the Center for Public Company Audit Firms. The letter clarified the SEC staff's interpretation of certain accounting issues and their application under generally accepted accounting principles (GAAP) relating to operating leases. The letter focused on specific concerns regarding the appropriate accounting for operating leases; restatements resulting from the correction of errors that deviate from the lease accounting standards; and clear and concise disclosures of both operating and capital leases. Non-SEC registrants should also ensure compliance with the lease accounting standards and related interpretations set forth by the FASB and make any necessary restatements or corrections.

.21 Auditors of nongovernmental entities should consider the guidance in Statement of Position (SOP) 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, (AICPA, *Technical Practice Aids*, ACC sec. 10,720), on accounting for the costs of computer software developed or obtained for internal use and for determining whether the costs of computer software developed for internal use are capitalizable.

Complex Financing Structures, Investments, and Access to Capital

.22 Some health care organizations are dependent on external sources of funds to satisfy their capital needs. Many health care organizations finance acquisitions, additions, and renovations with long-term debt. Health care organizations may have more complex structures that use swaps or other derivative instruments to meet their financing objectives, such as changing their liabilities from fixed-rate borrowings to variable rate borrowings, or vice versa. Auditors should determine that the method specified by generally accepted accounting principles (GAAP) to determine the value of derivatives is being followed. When auditing derivatives, auditors should follow the guidance in AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1). In addition, auditors should follow the guidance in the AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

.23 Interpretation No. 1, "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist," (AICPA, *Professional Standards*, vol. 1, AU sec. 9332.01–.04) which interprets AU section 332, provides guidance regarding the adequacy of audit evidence with respect to the existence and valuation assertions in confirmations received from third parties, where a readily determinable fair value does not exist, and the auditor determines auditing procedures should include verifying the existence and testing the measurement of the investments. For example, an entity may have an investment in a hedge fund that is reported at fair value for which a readily determinable fair value does not exist. Further, the hedge fund may own interests in investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. As part of the auditor's procedures in accordance with AU section 332, an auditor typically would satisfy the existence assertion through confirmation with the hedge fund, examination of legal documents, or other means. In confirming existence, the auditor may request the hedge fund to indicate or confirm the fair value of the entity's investment in the hedge fund, including the fair value of investments held by the hedge fund. In some circumstances, the hedge fund will not provide detailed information about the basis and method for measuring the entity's investment in the hedge fund, nor will they provide information about specific investments held by the hedge fund. This interpretation illustrates examples of information auditors may receive in a third-party confirmation (in the aggregate or on a security-by-security basis) and provides interpretative guidance for auditors about the adequacy of audit evidence provided in those examples.

.24 A number of health care organizations are entering into build-to-suit transactions. Auditors should consider the guidance in EITF Issue No. 97-10, "The Effect of Lessee Involvement in Asset Construction." EITF Issue No. 97-10 is not limited to build-to-suit real estate projects; it applies to all asset construction projects with lessee involvement.

.25 As discussed in EITF Issue No. 97-10, if the health care organization is a lessee and has substantially all of the construction period risks, then the lessee is considered the owner of the asset during the construction period. The transaction is effectively a sale and leaseback of assets and is within the scope of FASB Statement No. 98, *Accounting for Leases: Sale-Leaseback Transactions Involving Real Estate, Sales-Type Leases of Real Estate, Definition of Lease Term, and Initial Direct Costs of Direct Financing Leases*. Evaluation of whether the lessee has substantially all of the construction period risks is based on a test similar to the 90 percent recovery-of-investment test described in FASB Statement No. 13 as well as six special provisions contained in EITF Issue No. 97-10.

Changes to Risk Profiles in Provider Contracts

.26 The negotiated contracts between health care systems and managed care companies can be complex and could be changing the historical risk profiles in those contracts. Auditors should consider the effect of any changes, whether to full risk, away from full risk, or new payment methodologies on fee-for-service on the financial statements when auditing their health care industry clients. Auditors should also consider the need to perform additional auditing procedures, including a careful review of the contract terms. These contracts can increase the difficulty in properly estimating and accounting for revenue under these arrangements.

Costs of Providing Health Care Services

.27 Governments and private employer providers of health care insurance continue to focus on the costs of health care. A number of employers announced reductions or eliminations of health care coverage to employees or retirees. There are government- and private-sector initiatives to promote consumer-directed health care and to expand use of health savings accounts. These changes can lead to increased costs to collect and higher bad debts.

Uninsured Patients

.28 Uninsured patient charges, billings, and collections have been in the spotlight in recent years. Your health care organization clients may be continuing to evaluate their policies and procedures for providing patient care for the uninsured. Auditors should be aware of the impact of changes to these policies and procedures and how this may affect the assessment of risks of material misstatements.

Legislative and Regulatory Developments

.29 This section of the alert provides brief summaries of some of the regulations issued and regulatory publications released since the writing of last year's alert that may affect your clients in the health care industry. The brief summaries provided in this section of the alert are for informational purposes only. Please refer to the full text of the regulations and other documents that are discussed.

SEC

Executive Compensation and Related Person Disclosure

.30 In November 2006, the SEC adopted amendments to the disclosure requirements for executive and director compensation, related person transactions, director independence and other corporate governance matters, and security ownership of officers and directors. These amendments apply to disclosure in proxy and information statements, periodic reports, current reports, and other filings under the Securities Exchange Act of 1934 and to registration statements under the Exchange Act and the Securities Act of 1933. These amendments are intended to make proxy and information statements, reports, and registration statements easier to understand. Furthermore, they are designed to provide investors with a clearer and more complete picture of the compensation earned by a company's principal executive officer, financial officer, highest paid executive officers, and members of its board of directors.

.31 Companies must comply with these disclosure requirements in Form 8-K for triggering events that occur on or after November 7, 2006, and in Forms 10-K and 10-KSB for fiscal years ending on or after December 15, 2006. Other provisions apply and may be found on the SEC's Web site at www.sec.gov/rules/final/2006/33-8732a.pdf.

.32 In December 2006, the SEC adopted amendments to the disclosure requirements for executive and director compensation. The amendments to Item 402 of Regulations S-K and S-B revise Summary Compensation Table and Director Compensation Table disclosure with respect to stock awards and option awards to provide disclosure of the compensation cost of awards over the requisite service period, as described in FASB FAS No. 123 (revised 2004) *Share-Based Payment* (FAS 123R). Additional information may be found on the SEC's Web site at www.sec.gov/rules/final/2006/33-8765.pdf.

Continuing Disclosure Filings Under SEC Rule 15c2-12—DisclosureUSA

.33 Because of the SEC rule 15c2-12 (17 CFR 240.15c2-12), issuers and other obligated persons of most municipal securities offerings over set dollar amounts make *continuing disclosures* of annual financial information and disclosures of certain, specific *material events*. In the past, issuers and other obligated persons usually have submitted documents with those disclosures in hardcopy format directly to each of the nationally recognized municipal securities information repositories (NRMSIRs) and applicable state information depositories (SIDs).

.34 In 2004, DisclosureUSA.org began operating as an Internet-based "electronic post office" for those filings. Instead of mailing numerous hard copies to NRMSIRs and SIDs, issuers and other obligated persons and their dissemination agents may instead submit documents in any computer file format to DisclosureUSA.org at no charge. Those who currently do not wish to file electronic documents may instead file paper documents for a small fee. DisclosureUSA.org will send the filings to each NRMSIR and applicable SID. The SEC staff issued an Interpretative Letter authorizing the use of DisclosureUSA.org to meet the continuing disclosure requirements and encourages that use. The SEC is expected to consider mandating the use of DisclosureUSA for all rule 15c2-12 filings. In September 2005, DisclosureUSA announced that 2,150 users had registered at the central post office Web site in the first 12 months the site was live. During that time period, they received filings from every U.S. state, Washington D.C., Puerto Rico, and the U.S. Virgin Islands.

.35 Instructions for making electronic and paper filings are at www.DisclosureUSA.org. The SEC staff Interpretative Letter is available on the SEC Web site at www.sec.gov/info/municipal/texasmac090704.pdf. The SEC Office of Municipal Securities release, "Tips for Making Continuing Disclosure Filings" is available on the SEC Web site at www.sec.gov/info/municipal/discfiletips.htm.

.36 Auditors may want to consider advising their clients who are issuers and conduit borrowers to consider the use of DisclosureUSA.org for their SEC Rule 15c2-12 filings. Although DisclosureUSA allows the submission of electronic documents in any computer file format, the NRMSIRs and SIDs convert the files to an Adobe Acrobat Portable Document Format (PDF) before releasing them to requesting parties. Auditors may want to consider recommending to auditees that they submit their filings to DisclosureUSA in a PDF file to reduce the possibility of subsequent data corruption. The PDF also facilitates the security of financial statements and other information that many entities post on their Internet sites.

Office of Inspector General

Medicare and State Health Care Programs: Fraud and Abuse

.37 In August 2006, the Office of Inspector General (OIG) issued the final rule, "Medicare and State Health Care Programs: Fraud and Abuse; Safe Harbors for Certain Electronic Prescribing and Electronic Health Records Arrangements Under the Anti-Kickback Statute." As required by the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (MMA), this final rule establishes a new safe harbor under the federal antikickback statute for certain arrangements involving the provision of electronic prescribing technology. Specifically, the safe harbor would protect certain arrangements involving hospitals, group practices, and prescription drug plan sponsors and Medicare Advantage (MA) organizations that provide to specified recipients certain nonmonetary remuneration in the form of hardware, software, or IT and necessary training services used solely to receive and transmit electronic prescription information. This regulation became effective October 10, 2006.

Publications: Work Plan and Semiannual Report

.38 The OIG of HHS investigates and monitors the Medicare and Medicaid programs. On the HHS OIG Web site at www.oig.hhs.gov, you can access two publications that can be helpful in obtaining information about current projects and investigative activities of the OIG: the OIG Work Plan Fiscal Year 2007 (Work Plan) and the OIG October 1, 2006 to March 31, 2007 Semiannual Report.

.39 The work plan includes a section with ongoing and proposed OIG projects planned for CMS. The projects planned for CMS are presented by categories that include hospitals (Medicare and Medicaid); home health (Medicare); nursing homes (Medicare); managed care (Medicare); physicians and other health professionals (Medicare); Medicaid administration, including upper payment limit programs; and other services (Medicare and Medicaid).

.40 For a summary of the activities of the OIG for the six-month period ended March 31, 2007, including notable criminal enforcement actions, civil settlements, and administrative sanctions, see the OIG Semiannual Report.

Centers for Medicare and Medicaid Services

Services Provided to Undocumented Aliens

.41 Section 1011 of the MMA, Federal Reimbursement of Emergency Health Services Furnished to Undocumented Aliens, provides $250 million per year for fiscal years 2005–2008 for payments to eligible providers for emergency health services provided to undocumented aliens and other specified aliens. Two-thirds of the funds will be divided among all 50 states and the District of Columbia based on their relative percentages of undocumented aliens. One-third will be divided among the six states with the largest number of undocumented alien apprehensions.

.42 From the respective state allotments, payments will be made directly to hospitals, certain physicians, and ambulance providers for some or all of the costs of providing emergency health care required under Section 1867 and related hospital inpatient, outpatient, and ambulance services to eligible individuals. Eligible providers may include an Indian Health Service facility, whether operated by the Indian Health Service or by an Indian tribe or tribal organization. A Medicare critical access hospital is also a hospital under the statutory definition. Payments under Section 1011 may only be made to the extent that care was not otherwise reimbursed (through insurance or otherwise) for such services during that fiscal year.

.43 Payments may be made for services furnished to certain individuals described in the statute as (1) undocumented aliens, (2) aliens who have been paroled into the United States at a U.S. port of entry for the purpose of receiving eligible services, and (3) Mexican citizens permitted to enter the United States for not more than 72 hours under the authority of a biometric, machine-readable, border-crossing identification card (also referred to as a *laser visa*) issued in accordance with the requirements of regulations prescribed under a specific section of the Immigration and Nationality Act.

U.S. Department of Health and Human Services

Value-Driven Health Care

.44 HHS has focused a spotlight on health care transparency. They feel consumers deserve to know the quality and cost of their health care, and they feel health care transparency provides consumers with the necessary information, and the incentive, to choose health care providers based on value.

.45 According to the HHS Web site, www.hhs.gov/valuedriven, health care transparency is built on four interconnected cornerstones.

1. **Connect the systems:** Every medical provider has some system for health records. Increasingly, those systems are electronic. Standards need to be identified so all health information systems can quickly and securely communicate and exchange data.

2. **Measure and publish quality:** Every case and every procedure has an outcome. Some are better than others. To measure quality, we must work with doctors and hospitals to define benchmarks for what constitutes quality care.

3. **Measure and publish price:** Price information is useless unless cost is calculated for identical services. Agreement is needed on what procedures and services are covered in each episode of care.

4. **Create positive incentives:** All parties—providers, patients, insurance plans, and payers—should participate in arrangements that reward both those who offer and those who purchase high quality, competitively priced health care.

.46 HHS published the final rule, *HIPAA Administrative Simplification: Enforcement*, in the February 16, 2006 *Federal Register* to impose civil monetary penalties on entities that violate the rules adopted by HHS to implement HIPAA Administrative Simplification provisions. The final rule provides that in the context of the HIPAA rules, a covered entity generally could be held liable for a civil monetary penalty based on the actions of any agent acting within the scope of the agency. A business associate will often be an agent of a covered entity. A covered entity that complies with the HIPAA rules governing business associates will not be held liable for a business associate's actions that violate the rules. If the covered entity does not enter into the requisite arrangements or contracts or does not take reasonable steps to cure a breach or end a violation by the business associate, it could be held liable for the actions of the business associate.

IRS

Community Benefit Survey

.47 In May 2006, the IRS sent a questionnaire to approximately 500 tax-exempt hospitals inquiring how they provide and report benefits to the community. Providing community benefit is required for hospitals seeking and retaining tax-exempt status under section 501(c)(3) of the Internal Revenue Code. In July 2007, the IRS released an interim report summarizing the responses to the questionnaire. According to the report, nearly all hospitals reported that they provided various types of community benefit. Although 97 percent of the responding hospitals said they have a written uncompensated care policy, there was no clear definition of what constitutes "uncompensated care." This lack of uniformity in definitions and reporting called for a separate schedule for hospitals on Form 990. As a result, the IRS recently released a discussion draft of that form to include a new Schedule H, where hospitals will report how they provide community benefit. The executive summary of the report is located at www.irs.gov/charities/charitable/article/0,,id=172267,00.html.

Redesigned Form 990 for Tax-Exempt Organizations

.48 In June 2007, the IRS released its draft Form 990. The discussion draft constitutes a significant redesign of the Form, which has not been overhauled since 1979. The IRS anticipates using the redesigned form for the 2008 tax year (returns filed in 2009). The proposed redesign does not affect the other forms in the IRS Form 990 series. The redesigned form is based on enhancing transparency, promoting tax compliance, and minimizing the burden on the filing organization. Additional information is located at www.irs.gov/charities/article/0,,id=171216,00.html.

Accounting Issues and Developments

FASB Interpretation No. 48

.49 FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes,* clarifies and expands the accounting and financial reporting for uncertainties related to income taxes. This FASB interpretation is applicable to all business enterprises whether they are taxable businesses or tax-exempt organizations. Tax positions taken by any organization that may represent potential future obligations to a taxing authority (IRS or state revenue department) may have to be recorded under this interpretation. For not-for-profit organizations, examples of tax positions that are subject to FASB Interpretation No. 48 include (1) a decision not to file a Form 990-T or state income tax return; (2) a decision not to characterize an activity as an unrelated business; (3) using an allocation method for expenses between related and unrelated activities; and (4) classifying an entity or a transaction as tax exempt. FASB Interpretation No. 48 also applies to tax-exempt organizations with net operating loss or a net operating loss carryover for unrelated business income tax purposes and tax positions taken in allocating expenses through joint venture and other business relationships with taxable entities.

FASB Staff Position (FSP) 126-1

.50 In October 2006, the FASB issued FASB Staff Position (FSP) FAS 126-1, *Applicability of Certain Disclosures and Interim Reporting Requirements of Obligors for Conduit Debt Securities*. This FSP clarifies the definition of a public entity in certain accounting standards to include entities that are conduit bond obligors for conduit debt securities that are traded in a public market. Most not-for-profit health care organizations that issue tax-exempt debt through governmental authorities fall under this definition of public entity. The FSP, effective for fiscal periods beginning after December 15, 2006, details the accounting standards impacted by the new definition.

.51 One significant impact of this FSP is its amendment of Accounting Principles Board (APB) Opinion No. 28, *Interim Financial Reporting*, requiring that not-for-profit health care organizations that issue quarterly financial information and are within the scope of the FSP to follow the reporting requirements of APB Opinion No. 28. In general, APB Opinion No. 28 requires that the operating results for each interim period be based on the accounting principles and practices used by an organization in preparing its latest annual financial statements unless a change in an accounting practice or policy has been adopted in the current year.

Accounting for Advanced Refunding of Debt

.52 Many health care organizations extinguish debt through a process often referred to as an advanced refunding. FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, provides guidance on the accounting for advanced refunding of debt, both for the debt to be treated as extinguished and also for the transfer of the U.S. government securities to the refunding escrow to accomplish the advanced refunding. Application of the statement's provisions generally requires health care organizations to obtain a legal opinion confirming the legal isolation of the transferred assets and the release of the health care organization as the primary obligor of the debt. The legal isolation criteria and the release from being the primary obligor must both be satisfied before an entity can derecognize the transferred assets and the extinguished debt.

Managed Investment Portfolios

.53 Health care organizations often outsource the management of their investment portfolios to third party investment managers. In some cases, the health care organization places restrictions on the trading activities of the third party investment manager such that management maintains control over investment decisions (for example, determining when to buy or sell specific securities). In other cases, there are no such restrictions placed on the third party investment manager. In situations where restrictions have not been imposed, management of the health care organization typically may not assert that they have the intent and ability to hold any impaired investments (that is, fair value is less than cost) until recovery. Without the intent and ability to hold an impaired security until anticipated recovery, the health care organization would be precluded from considering the severity and duration of the impairment in making the determination as to whether the impairment is "other-than-temporary." Accordingly, for not-for-profit health care organizations that classify their externally managed investment portfolio as "other-than-trading," any impairment would be considered other-than-temporary. Other-than-temporary impairment losses are included within the performance indicator, and a new cost basis for the related securities is established.

.54 Not-for-profit health care organizations that outsource the investment management function and classify their investment portfolios as other-than-trading should review the investment management agreements and determine the appropriate accounting treatment for any impaired securities. Many health care organizations are considering designating their investment portfolio as "trading." For trading securities, unrealized gains and losses on investments are included in the performance indicator, making it unnecessary to consider whether any impairments are other-than-temporary.

Other-Than-Temporary Impairment

.55 In February 2007, the SEC clarified existing guidance on asset impairment contained within SEC Staff Accounting Bulletin (SAB) No. 59, *Other-Than-Temporary Impairment of Certain Investments in Debt and Equity Securities*. Although SAB No. 59 contains several factors which must be considered in any determination of an other-than-temporary impairment, one key factor centers on an entity's intent and ability to hold an investment whose fair value is below cost ("impaired securities") for a sufficient period of time to allow for a potential recovery in that investment's fair value. Prior to the SEC's recent clarification of the SAB, the question was whether or not an entity could truly assert both a positive intent and ability to retain impaired securities until those securities' fair value recovers for investments managed by outside portfolio managers, where manager restrictions on selling impaired securities did not exist. Through its SAB No. 59 clarification, the SEC has made it clear that for any investment managed by an external portfolio manager, where restrictions are not placed on that manager with regard to selling impaired securities, an entity can no longer assert that it has both the positive intent and ability to hold impaired securities through potential recovery. This clarification has a potentially significant impact on any entity's classification and accounting for investments, as certain investments that may have historically been classified as other-than-trading may be more appropriately classified as trading.

.56 From an accounting perspective, FASB Statement No. 124, *Accounting for Certain Investments in Debt and Equity Securities by Not-for-Profit Organizations* and Chapter 4, "Investments," of AICPA Audit and Accounting Guide *Health Care Organizations*, prescribe the proper accounting for investments held by not-for-profit entities based on their classification. (Furthermore, FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, provides relevant guidance for the cash flows statement impact of accounting for investments.) Specifically, for investments classified as "trading," both unrealized investment gains and losses must be recognized as a component of net income. For investments classified as other-than-trading, unrealized investment gains and losses must be recognized as a component of unrestricted changes in net assets (or restricted changes in net assets for donor restricted funds which may be held in foundations, with the exception of other-than-temporary unrealized losses, which are recognized immediately as a component of the performance indicator (excess of revenues over expenses).

Quantifying Misstatements

.57 On September 13, 2006, the SEC released SAB No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. Although the guidance is directed at registrants, it is also important for auditors of registrants as they consider and quantify the effects of misstatements in financial statements. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.58 Two methods have commonly been used to quantify such errors. Under one method, the rollover approach, the error is quantified as the amount by which the current year income statement is misstated. The other common method, the iron curtain approach, quantifies the error as the cumulative amount by which the current year balance sheet is misstated. Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but that nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.59 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.60 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was, and continues to be, immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in SAB No. 108. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

.61 Since the issuance of SAB No. 108, the FASB has received inquiries about the application of SAB No. 108 to the private sector since they are not bound by SAB No. 108. The inquiries raised concerns that diversity will exist in the private sector relating to the determination of materiality associated with errors caused by the carryover or reversal of prior-year misstatements.

.62 On March 13, 2007, the FASB exposed for comment proposed FASB Staff Position Financial Accounting Standard (FSP FAS) No. 154-a, *Considering the Effects of Prior-Year Misstatements When Quantifying Misstatements in Current-Year Financial Statements*, which proposed guidance on how to evaluate and account for the correction of errors identified from the quantification of misstatements associated with the carryover or reversing effects of prior-year misstatements on current year financial statements. This proposed FSP applied to nongovernmental entities that are not subject to the requirements of SAB No. 108, which includes privately held entities and not-for-profit organizations. In absence of this guidance, private companies would not be permitted to have the same opportunity to clean up their balance sheets for passed prior-year audit adjustments without restating prior years, as allowed for public companies under SAB No. 108. The comment period for this FSP ended on April 30, 2007, and in its August 1, 2007 FASB Board Meeting, the FASB decided not to issue a final FSP and removed the project from its agenda.

Recent Auditing and Attestation Pronouncements and Related Guidance

.63 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal* *of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.64 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See "AICPA Risk Assessment Standards" in this alert.

(continued)

SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue date: December 2005	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective for periods ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.

Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA TPA TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice alert responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice alert provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.65 In December 2006, the Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.66 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.67 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.68 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.69 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.70 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management, and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.

- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Will Affect Practice

.71 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses, and communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.72 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.73 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.74 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.75 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor's time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.76 Another issue that may cause concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[1] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.77 The new requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.78 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

---

[1] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

AICPA Risk Assessment Standards

.79 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

(continued)

SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.80 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks to the client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.81 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.82 In May 2007, the ASB issued two practice aids related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.83 Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.84 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, Dating of the Auditor's Report and Related Practical Guidance

.85 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.86 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.87 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information which it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements

.88 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scalable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.89 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.90 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.91 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*

AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.92 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the health care industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

Fair Value Measurements

FASB Statement No. 157

.93 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.94 Prior to this statement, there were different definitions of fair value and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying generally accepted accounting principles (GAAP). FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

FASB Statement No. 159

.95 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and No. 157.

.96 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

On the Horizon

.97 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the health care industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.98 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+ Professional+Conduct/Professional+ Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Overhaul Project—AICPA Audit and Accounting Guide Health Care Organizations

.99 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Health Care Organizations*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.100 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives.
- Structural and drafting improvements to make the standards easier to read and understand.
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities.
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards.

.101 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.102 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.103 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.104 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the

GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www. fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.105 Guidance issued by the PCAOB is included in "Recent Auditing and Attestation Pronouncements and Related Guidance" in this alert. For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.106 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.107 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.108 In June 2005, the FASB and IASB (the Boards) issued a number of exposure drafts for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The Boards expect to issue final statements during the third quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.109 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.110 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement*

No. 115, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.111 In December 2006, the FASB issued an exposure draft entitled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.112 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.113 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the Boards are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The Boards are considering modifications to the treasury stock method and several scoping issues in which one of the Boards have issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The Boards are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.114 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information, but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the codification and retrieval project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.115 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in this alert in "Auditing Pipeline—Nonissuers") to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.116 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.117 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.118 The following are various resources that practitioners engaged in the health care industry may find beneficial.

Publications

.119 Practitioners may find the following publications useful with respect to the health care industry.

- Audit and Accounting Guide *Health Care Organizations* (2007) (product no. 012617kk)
- Audit and Accounting Guide *Not-for-Profit Organizations* (2007) (product no. 012647kk)
- Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)

- *Accounting Trends and Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.120 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.121 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.122 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.123 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.124 To register or learn more, visit www.cpa2biz.com.

Webcasts

.125 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts.

Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.126 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.127 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.128 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.129 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.130 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.131 The AICPA sponsors an annual Health Care Conference in the fall. The Health Care Conference is a two-day conference designed to update attendees on recent developments related to the health care industry. The National Health Care Industry Conference is an unparalleled opportunity to gain the information and techniques you need to know to stay on top of trends to benefit your practice and your client offerings. With access to some of the nation's top health care specialists, you'll get up-to-the-minute information on the latest developments in health care issues. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.132 The Governmental Audit Quality Center (GAQC) is a firm-based voluntary membership Center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC's primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm's governmental audits.

.133 The mission of the Governmental Audit Quality Center is to:

- Raise awareness about the importance of governmental audits.
- Serve as a comprehensive resource provider on governmental audits for member firms.
- Create a community of firms that demonstrates a commitment to governmental audit quality.
- Provide Center members with an online forum tool for sharing best practices as well as discussions on audit, accounting, and regulatory issues.
- List member firms to enable purchasers of governmental audit services to identify firms that are members.
- Provide information about the Center's activities to other governmental audit stakeholders.

.134 For more information about the GAQC visit gaqc.aicpa.org.

AICPA Center for Audit Quality

.135 The CAQ (formerly the Center for Public Company Audit Firms [CPCAF]) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.136 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ visit thecaq.aicpa.org.

AICPA Industry Expert Panel—Health Care

.137 For information about the activities of the Health Care Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_healthcare.htm.

Industry Web Sites

.138 The Internet covers a vast amount of information that may be valuable to auditors of health care organizations, including current industry trends and developments. Some of the more relevant sites for auditors with health care clients include those shown in the following table:

Organization	*Web Site*
Healthcare Financial Management Association	www.hfma.org
The Catholic Health Association of the United States	www.chausa.org
Federation of American Hospitals	www.americashospitals.com
Centers for Medicare and Medicaid Services	www.cms.hhs.gov
U.S. Department of Health and Human Services	www.hhs.gov

.139 This Audit Risk Alert replaces *Health Care Industry Developments—2006/07*.

.140 The Audit Risk Alert *Health Care Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to zdonahue@aicpa.org or write to:

Zachary T. Donahue, CPA

Insurance Industry Developments—2006/07

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS

INSURANCE INDUSTRY DEVELOPMENTS—2006/07

This Audit Risk Alert is intended to provide auditors of insurance company financial statements with an overview of recent economic, technical, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Amy M. Eubanks, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Reggie Adamson,
Lincoln Financial Group

Douglas L. Bartlett,
RSM McGladrey, Inc.

Darryl Briley,
KPMG LLP

Donald A. Doran,
PricewaterhouseCoopers LLP

Kathleen N. Enright,
Allstate Insurance Company

Gary France,
Lincoln Financial Group

Kim Kushmerick, AICPA

Richard Lynch,
Ernst & Young LLP

Susan McGrath,
Veris Consulting, LLC

Monica Monson,
Ernst & Young LLP

Holly Ownby,

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your insurance industry audits. The information delivered by this Alert assists you in achieving a more comprehensive understanding of the business, economic, and regulatory environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the insurance industry and can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry information.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk). This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this Alert.

.04 ***References to Professional Standards.*** When referring to the professional standards, this Alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Economic and Industry Developments

.05 AU section 311A, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), and AU section 311, *Planning and Supervision* (AICPA, *Public Company Accounting Oversight Board [PCAOB] Standards and Related Rules*), provide guidance for auditors regarding the specific procedures that should be considered in planning an audit. These sections state that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics. The auditor should also consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit.

.06 Presented in this Alert are current business, economic, regulatory, accounting, and auditing matters that may affect your clients. Reading about these matters and properly addressing them as necessary will help you gain a better understanding of your client's environment and help you better assess risks of material misstatement of the financial statements, which will strengthen audit integrity.

The State of the Economy

.07 When planning and performing audit engagements, auditors need to understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the company's financial statements being audited.

.08 A number of factors that could upset economic growth, possibly affecting your client's operations and therefore possibly affecting audit risk, include:

- Rising interest rates during most of the year
- Unstable oil prices
- Dangerously high and rising consumer debt levels

- Inflation concerns
- A softening housing boom in some markets

.09 The U.S. real gross domestic product, which is the broadest measure of economic activity, increased at an annual rate of 5.6 percent during the first quarter of 2006 but slowed to a growth rate of 2.6 percent in the second quarter and 2.0 percent in the third quarter of 2006, according to the Bureau of Economic Analysis. The continued deceleration in growth into the third quarter is due, among other factors, to an acceleration in imports; a larger decrease in residential fixed investment; and decelerations in private inventory investment, personal consumption expenditures for services, and state and local government spending that were partly offset by upturns in equipment and software, personal consumption expenditures for durable goods, and federal government spending.

.10 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, and down from rates experienced in the prior year and the lowest since 2001.

.11 After a period of rising rates, the Federal Reserve kept its target for the federal funds rate at 5.25 percent during its last four meetings (August through December 2006). The Federal Reserve stated, "Economic growth has slowed over the course of the year, partly reflecting a substantial cooling of the housing market. Although recent indicators have been mixed, the economy seems likely to expand at a moderate pace on balance over coming quarters." The Federal Reserve cautioned that "readings on core inflation have been elevated and the high level of resource utilization has the potential to sustain inflation pressures. However, inflation pressures seem likely to moderate over time, reflecting reduced impetus from energy prices, contained inflation expectations, and the cumulative effects of monetary policy actions and other factors restraining aggregate demand."

Economic Impact of Hurricanes Katrina and Rita

.12 It has been over a year since Hurricanes Katrina and Rita hit the Gulf Coast region causing catastrophic damage. The natural disasters disrupted the nation's economic growth, caused unprecedented damage, and resulted in significant private insurer losses. According to the Insurance Services Office, Inc. (ISO), Hurricane Katrina alone resulted in estimated insured losses of $40.6 billion. A year later, the United States has experienced a mild hurricane season and the Gulf Coast region continues to rebuild and recover.

Industry Trends and Conditions—Property and Casualty Sector

.13 The U.S. property and casualty insurance industry reported extraordinary performance in the first half of 2006. The industry combined ratio was 92 percent[1] for the first half of 2006, with an expected return on equity of 14.5 percent for the year, according to the Insurance Information Institute (I.I.I.). Insurance companies were affected by record catastrophe losses in 2005; however, reduced hurricane activity during 2006 has contributed to favorable 2006 operating results, resulting in restored levels of policyholder surplus.[2] According to the ISO, the industry consolidated surplus increased by $19.7 billion or 4.6 percent in the first half of 2006, from its year-end 2005 level.

.14 However, the industry continues to face a number of ongoing challenges including but not limited to the following:

- The possibility of above average catastrophe losses due to variable weather conditions
- A continued soft market for rates with the exception of property-related coverages

---

[1] A combined ratio of 92 means that for every dollar of premium income that insurers earned during the first half of 2006, 92 cents exited in the form of claims payments, claims reserves, and expenses. The remaining 8 cents is underwriting profit.

[2] Policyholder surplus is a measure of claims paying capacity or capital.

- Slow growth environment, driven in part by lower loss costs, that can lead to price competition
- Margin pressures as regulators limit insurers' recovery of the costs of catastrophes or reinsurance

Commercial Market

.15 Survey data released by The Council of Insurance Agents and Brokers indicates the commercial property and casualty market continued to soften during the third quarter of 2006. Coverage is plentiful, and policies are being sold at low prices, reflecting the supply surplus in a buyers' market. Average premium rates for all commercial accounts decreased 5.3 percent during the third quarter of 2006. As premium prices fall and underwriters become more eager for new business, insurers are beginning to be more aggressive in pricing and more liberal with policy terms. This survey data released by The Council of Insurance Agents and Brokers reported that one respondent commented insurers are even becoming interested in properties generally considered unattractive, such as car dealers, restaurants, and not-for-profits. In contrast to the overall soft commercial property and casualty market, premium prices have escalated and capacity shrunk for catastrophe-exposed property throughout 2006. Catastrophe-prone property continues to experience historic high premium levels, making it difficult to secure coverage, and deductibles and exclusions continue to rise, specifically in coastal areas.

.16 In response to increased competitive market forces, an auditor can evaluate if the client has implemented liberal policy terms, added unattractive clients, or expanded its product mix. Is product classification and valuation appropriate, considering these management assertions may become more complex if policy terms are altered? Unattractive clientele increase the risk of loss surrounding potential claim payouts, which can affect valuation complexity. Furthermore, if new products have been rapidly developed in response to changing market conditions, an auditor may consider if there has been proper management review of long-term product strategies. A company's product mix may have a significant effect on the variability of loss reserves. New products can add to the subjectivity of the loss-reserving process because of a company's lack of experience with the new product and relative lack of relevant historical data.

.17 An auditor can refer to AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*), which states that the auditor's objective when evaluating accounting estimates is to obtain sufficient competent evidential matter to provide reasonable assurance that:

- All accounting estimates that could be material to the financial statements have been developed.
- Those accounting estimates are reasonable in the circumstances.
- The accounting estimates are presented in conformity with applicable accounting principles and are properly disclosed.

Personal Lines

.18 ***Automobile Insurance.*** The I.I.I. estimates that the average premium expenditure will drop by 0.5 percent in 2007 compared with 2006. Reductions are possibly due to decreasing claim frequency coupled with only modest increases in claim severity throughout 2006. In 2006 as compared with 2005, claim frequency decreased between three percent and five percent, and the average cost per claim, which includes the cost of medical care and property damage, only rose two percent to four percent. The increase in cost per claim is modest despite the ever-increasing costs of medical care, which significantly affects automobile insurance pricing. Other reasons price reductions may occur in 2007 include competitive marketplaces, safer vehicles and roads, aggressive fraud-fighting efforts, and improvements in underwriting technology that can better assess the risk a particular driver represents. Changing demographics of the U.S. population are also contributing to cost reductions because millions of baby boomers are now considered to be in what insurers consider their safest driving years.

.19 The auditor can evaluate the effect of the aforementioned variables on a client's operations. Evidence or expectations of increased competition, market saturation, or declining demand may lead to loosened underwriting standards and increased margin pressure. Additionally, implementation issues could surround newly implemented underwriting technology. AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*), describes the objectives and components of internal control and explains how an independent auditor should consider internal control in planning and performing an audit. Among other matters, the auditor can evaluate client operational internal controls, including but not limited to the sufficiency of controls surrounding IT advances and applicable manual procedures.

.20 ***Property Insurance.*** Many insurance companies suffered significant catastrophe losses in 2005. Some affected insurance companies had solvency ratings considered for downgrade and took actions to protect their ratings, including replacing lost capital by issuing debt or equity securities. At the same time, rating agencies' views on how to evaluate catastrophe exposure risk continue to evolve. Rating agencies have also revised their views on capital requirements and the assumptions incorporated in the various exposure models. Insurance companies are taking action to reduce their risk to catastrophes by purchasing reinsurance, which is becoming increasingly expensive as rates harden in response to demand, raising rates. Insurance companies are also trying to reduce their exposure through nonrenewals or changes in coverage or underwriting criteria.

.21 Some of the entities designed to help insurers manage catastrophe risk have levied assessments on companies and insureds. In Florida, Citizens Property Insurance Corporation, the state-run insurer of last resort, became the state's largest home and condominium insurer. This is unsettling because the corporation was established to be an insurer of last resort rather than a major market player. A large number of high-risk clients backed by one state-run insurer depicts a plethora of undesirable clientele; economic insolvency could permeate this particular property market segment if catastrophe strikes again. In response to rising costs, consumer groups are placing increased pressure on politicians and regulators.

.22 Many insurers make flood insurance available to their customers through the National Flood Insurance Program (NFIP) offered by the federal government. The huge volume of claims, driven by the 2005 storms, primarily Hurricane Katrina, was unprecedented and resulted in congressional action to fund NFIP payments. During 2005 and 2006, the U.S. Congress passed several bills increasing the borrowing authority of the NFIP to provide funds for payment of existing claims. Congress is currently conducting a review of payment practices by NFIP service carriers, and some members of Congress have indicated they would not agree to additional increases in borrowing authority unless significant reforms are made to the NFIP. A bill to overhaul the program died in a Senate committee when Congress adjourned in December 2006. Practitioners should remain alert to the status of this issue.

The Impact of the 2005 Hurricane Season on the Property and Casualty Sector

.23 In 2006, insurance companies experienced significant cash outflows as they paid claims generated by the 2005 catastrophes. As noted previously, the ISO estimates that the property and casualty insurance industry will pay out an estimated $40.6 billion on claims related to Hurricane Katrina alone compared with Hurricane Andrew of 1992, which resulted in approximately $21.6 billion in payments. The ISO also estimates that overall insured losses for damage to homes, vehicles, and businesses damaged in 2005 by hurricanes are $57 billion. Readers should be aware that property catastrophe risk exposure is becoming increasingly popular with hedge funds as an alternative for portfolio diversification to enhance returns. Some hedge funds are even establishing their own reinsurance companies. Some audit risks that may be present on audit engagements as a result of the turbulent 2005 hurricane season are presented in the next section for consideration on your engagements.

Potential Audit Risk Area—Claims Expense and Loss Reserves

.24 ***Claim and claim expense payments.*** In most cases, claim and claim expense payments originate with evidence of loss that may include signed proofs of loss, releases, medical bills, repair bills or estimates of repair costs, or invoices for fees of independent adjusters (for reinsurers, this evidence may be a notice of loss or broker's advice). When these documents are received, they are reviewed and analyzed for accuracy, consistency, and coverage under the associated policy before payment is authorized.

.25 ***Liabilities for the cost of unpaid claims, including estimates of the cost of claims incurred but not reported, are accrued when insured events occur.*** Under generally accepted accounting principles (GAAP), the liability for unpaid claims is based on the estimated ultimate cost of settling the claims (that is, the total payments expected to be made) and should include the effects of inflation and other social and economic factors.

.26 Under GAAP, consideration should be given to the guidance in Financial Accounting Standards Board Statement of Financial Accounting Standards (FASB Statement) No. 5, *Accounting for Contingencies*; FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*; FASB Interpretation No. 14, "Reasonable Estimation of the Amount of a Loss—an interpretation of FASB Statement No. 5;" Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*; SOP 94-5, *Disclosures of Certain Matters in the Financial Statements of Insurance Enterprises*, as amended by SOP 01-5, *Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification*; and the Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 87, *Contingency Disclosures on Property/Casualty Insurance Reserves for Unpaid Claim Costs,* which governs accounting and reporting if property liability loss reserves qualify as loss contingencies. Additional guidance can be found in SAB No. 92, *Accounting and Disclosures Relating to Loss Contingencies*, and SEC Financial Reporting Release No. 20, *Rules and Guide for Disclosures Concerning Reserves for Unpaid Claims and Claim Adjustment Expenses of Property-Casualty Underwriters* (SEC Release No. 6559, vol. 49 of the Federal Register, page 47,594).

.27 Under Statutory Accounting Principles (SAP), Statement of Statutory Accounting Principle (SSAP) No. 55, *Unpaid Claims, Losses and Loss Adjustment Expenses*, provides that the liability for unpaid losses and loss adjustment expenses shall be based upon the estimated cost of settling claims incurred (including the effects of inflation and other social and economic factors), using past experience adjusted for current trends and any other factors that would modify past experience. SSAP No. 62, *Property and Casualty Reinsurance*, and SSAP No. 65, *Property and Casualty Contracts*, provide guidance on reinsurance accounting and accounting for contracts having certain features, such as claims-made policies and high deductible policies, respectively.

.28 ***Auditing Considerations.*** Due to the increased number and complexity of transactions surrounding claims and claim expenses, especially following a catastrophic year such as 2005, inherent risk surrounding the recording and payout of claims can increase. Auditors should evaluate their client's response and adherence to criteria and related internal controls surrounding expenses.

.29 The identification of changes surrounding valuation variables and consideration of their effect on losses are critical audit steps. The evaluation of these factors includes the involvement of specialists and input from various operating departments within the company such as marketing, underwriting, actuarial, reinsurance, and legal. Readers should remember that losses are only accrued for events that have occurred; catastrophe reserves are not allowed in anticipation of future events.

.30 AU section 342 (AICPA, *Professional Standards*, vol. 1; AICPA *PCAOB Standards and Related Rules*) states that the auditor should obtain an understanding of how management developed the accounting estimates included in the financial statements. Claims expense and loss reserve estimates are significant variables on an insurance company's financial statements. Accordingly, regardless of the approach used to audit claims expense and loss reserve estimates, the auditor should gain an understanding of how management develops estimates. Additionally, Chapter 4 and Appendix A of the AICPA Audit and Accounting Guide *Property and Liability Insurance Companies*, which incorporates SOP 92-4, *Auditing Insurance Entities' Loss Reserves*, is an additional source of guidance. Moreover, Interpretation No. 2, "Evaluating Differences in Estimates," in AU section 9312A, *Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312A* (AICPA, *Professional Standards*, vol. 1), and Interpretation No. 2, "Evaluating Differences in Estimates," in AU section 9312, *Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312* (AICPA, *PCAOB Standards and Related Rules*), clarifies guidance for evaluating differences in estimates.

.31 Auditors can also refer to AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), as well as noting current practitioner prohibitions and restrictions that exist related to the performance of nonaudit services for audit clients, including certain actuarial services. Practitioners should be aware of and comply with these prohibitions and restrictions, including the AICPA independence rules, SEC independence rules, PCAOB independence rules, new National Association of Insurance Commissioners (NAIC) rules describing qualifications of an independent CPA included in the Annual Financial Reporting Model Regulation (Model Audit Rule) effective for 2010 statutory audits, and rules passed by the U.S. Government Accountability Office (GAO), state licensing boards, and others.

Potential Audit Risk Area—Reinsurance Recoverables

.32 FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, provides guidance on the recording and reporting of recoveries of losses that are reinsured. Consideration should be given to the terms of the reinsurance agreements and the creditworthiness of the reinsurer. Significant payment terms may be material to liquidity and required capital levels. Some reinsurers have had to stop writing new business as a result of the strain on capital caused by losses relating to Hurricane Katrina. Whether you are the auditor of the ceding company or the assuming company, careful attention needs to be paid to the stress Hurricane Katrina has placed on the reinsurance business.

Potential Audit Risk Area—Going-Concern Sensitivities

.33 As discussed previously, insurance companies have faced significant payout of claims during the year due to the 2005 hurricanes. An auditor can evaluate applicable agency ratings; lowered ratings can cause financial hardship for insurers. Moreover, as reinsurance rates rise, it becomes more difficult and costly for insurance companies to reduce their exposure. Many insurance companies have cancelled policies, and in some cases have stopped writing new business in catastrophe-prone areas. As a matter of course, insurance companies lacking geographically diverse clientele are more sensitive to environmental effects (such as hurricanes), which could lead to questions about an entity's going-concern assumption. Finally, lack of product line diversification can increase going-concern risks. It is important to consider your client's lines of business; businesses, home, and automobile policies are largely affected by weather variables.

.34 ***Auditing Considerations.*** AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), requires auditors to evaluate, as part of every audit, whether there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, not to exceed one year beyond the financial statement date. A significant consideration in the auditor's evaluation of an insurance companies' ability to continue as a going concern is whether the company complies with regulatory risk-based capital requirements. SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), requires that auditors communicate with those charged with governance events or conditions that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. This new SAS is effective for audits of financial statements for periods beginning on or after December 15, 2006.

Industry Trends and Conditions—Life and Health Sector

.35 Attractive 12-month equity market returns and the demand for benefit guarantees have resulted in a favorable current market for equity-linked annuity and life insurance products offered by life insurers. However, a historically lower level of general market interest rates may reduce the opportunity for growth in earnings and surplus of fixed interest life and annuity products. Life insurers have responded to these challenges by offering creative financial options in addition to traditional mortality, morbidity, and investment returns as a part of basic product offerings.

.36 Overall, sales of individual life insurance policies have been flat for several years, but universal life products continue to experience double-digit growth, largely on the success of no-lapse guarantee products. The large number of quality life insurers competing for distribution may result in pressure on margins, transfer of certain valuable services to distributors, and the addition of more risky policyholder option features. Also, increased regulatory costs and the need for frequent product innovation are increasing administration costs for insurers.

.37 The U.S. life insurance industry is generally well capitalized, with healthy asset quality. However, certain important elements that may affect an auditor's risk assessment include but are not limited to the following:

- Though improving, historically low investment yields may result in flat to negative profitability of in-force business and slower growth in surplus.
- Lack of available historical experience to be utilized by companies in pricing and reserving for recently issued policyholder financial options continues to affect the level of regulatory scrutiny and availability of reinsurance capacity.
- While many regulators seem to be in favor of a more principles-based approach to reserving for no-lapse guarantees, there has not yet been general agreement on a move to principles-based reserving. There remain large reserving needs for many of these contracts, causing a need to fund the statutory strain. The auditor can refer to AU section 342 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*), which provides guidance on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates. In evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate and based on that understanding should use one or a combination of approaches included in AU section 342 (AICPA, *Professional Standards*, vol. 1; AICPA, *PCAOB Standards and Related Rules*).
- Hedging programs developed by insurers in recent years to manage exposures to policyholder financial options have not been tested in more volatile markets. Additionally, increased volatility adds to the cost of hedging strategies, which could either reduce insurers' profitability or result in additional risk. The auditor can refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*), which provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in debt and equity securities.

General Market Interest Rates and Interest Spread Compression

.38 Although improving recently, general market interest rates remained relatively low for an extended period of time, which has resulted in a continuing decline in portfolio rates of return. This is an important issue for insurers with fixed interest annuity and life insurance products. For many life insurers, portfolio rates have approached levels needed to support minimum rates guaranteed to policyholders; therefore, some insurers have limited ability to reduce crediting rates in the event of further declines in portfolio yields. Previously, most insurers had been able to adjust crediting rates, and the recent rise in market interest rates has resulted in new money rates not significantly different from portfolio rates. Further moderate increases could improve insurers' profitability, but a significant and sustained increase in new money rates could result in a disintermediation between assets and liabilities and other-than-temporary impairments of invested assets.

.39 Much attention has been given to the topic of other-than-temporary impairments, particularly those that may arise from increases in general market interest rates or increases in sector spreads. Other-than-temporary impairments may significantly affect life insurers' earnings as interest rates increase, causing certain securities to be impaired. Companies may need to record an impairment even if a decision to sell has not been made. One factor in not recording an impairment is whether the company has the positive intent and ability to hold these impaired securities until recovery or maturity. This may limit their ability to sell the securities. There may be situations under which a change in facts and circumstances would allow companies to subsequently change their intent to hold the securities until forecasted recovery.

.40 Statutory accounting does not subject insurers to this impairment model. Rather, impairments related to interest rates or sector spreads are recorded when there is an intent to sell the related security. For additional information on other-than-temporary impairments, see the discussion regarding "Security Valuation Developments" in the "Audit and Accounting Issues and Developments" section of this Alert.

Regulatory and Legislative Issues and Developments

Regulatory Risk—General Governmental

.41 Many industry executives believe, notwithstanding the catastrophe losses incurred by property casualty insurers, that regulatory risk is the biggest challenge faced by insurance companies. Whenever new laws are passed, there is risk of noncompliance due to error or oversight. Auditors need to keep abreast of the developing legislation because changes can affect management's assertions.

.42 Currently, the use of credit-scoring for ratings is still opposed by regulators in certain jurisdictions. Debate continues over regulatory modernization, rate regulation, and a greater role for federal regulation. Additionally, after several failed attempts, Congress may still consider other proposals to establish a trust fund to resolve asbestos injury liabilities. Of the many regulatory issues and developments, some significant issues and developments to consider on your audit engagements are presented in the following paragraphs.

Modernizing Insurance Regulation

.43 While the insurance industry has traditionally been regulated by individual states, many in the industry view the current system of state regulation as overly complex, costly to comply with, and anticompetitive and burdensome in that it slows the process of bringing new products to the marketplace. In response, reform proposals have been introduced to modernize insurance regulation. According to a December 2006 I.I.I. update, reform proposals are currently moving in two directions: (1) a dual federal and state system where insurance companies could choose between the state system and a national regulatory structure or (2) modernization of the current state system. Optional federal charter bills (bills that would give insurers the ability to choose between state and federal regulation similar to the banking industry) were introduced in the House of Representatives and the Senate during the last session. If similar bills, in either of the reform directions, are introduced in the future, they could significantly affect insurance regulation. Auditors should remain alert to the progress of these reform initiatives.

.44 Additionally, the McCarran-Ferguson Act is under renewed scrutiny from a number of sources. The McCarran-Ferguson Act, signed into law in 1945, declared states would continue to regulate insurance and granted insurers a limited exemption from federal antitrust legislation. The exemption in the McCarran-Ferguson Act permits insurers to jointly develop common insurance forms and share loss data to help them price policies. A bill was introduced in early 2006 curtailing the insurance industry's exemptions under the McCarran-Ferguson Act. Auditors should remain alert to the potential for further developments regarding this issue.

Industry Investigations

.45 Over the past several years, there have been investigations of industry practices by the SEC, the U.S. Justice Department, the New York Attorney General, and others focused on industry broker compensation practices, including prohibiting the payment of contingent commissions by insurers to brokers, and, by certain companies, bid-rigging schemes, improper accounting for finite reinsurance transactions, and improper reporting of premiums to avoid assessments. For further information, see the discussion of "Reinsurance Arrangements" in the "Audit and Accounting Issues and Developments" section of this Alert.

Terrorism Risk Insurance Act

.46 Congress passed the Terrorism Risk Insurance Act (TRIA) in November 2002 after the September 11, 2001, terrorist attack. TRIA provided for a program that, in the event of a major terrorist attack, allows the insurance industry and federal government to share losses according to a specific formula. This program allowed development of a terrorism insurance market as insurers' losses are limited. The Terrorism Risk Insurance Extension Act of 2005 provided for an extension for two additional years, expiring at the end of 2007. Whether this legislation will be further extended is uncertain. If TRIA is not renewed, carriers may have a significant increase in retained catastrophe loss exposure from terrorist acts, especially with respect to worker's compensation coverage for which the exposure cannot be excluded. Further details of the Terrorism Risk Insurance Extension Act of 2005 are included in the "Terrorism Insurance Developments" section of this Alert.

Property and Casualty Sector—Assessment Facts and Circumstances

.47 Elevated hurricane activity over several prior seasons has increased assessments levied by state-sponsored residual market insurers, high-risk insurance pools, catastrophe funds, and similar structures (structures). Many states have structures that provide coverage (including reinsurance) in high-risk areas or for high-risk insureds. Certain of these structures operate as insurance companies, reinsurance companies, or both and have the ability to assess insurers[3] operating in their respective state in the event that the structure's fund has insufficient amounts to pay claims.

.48 Auditors may need to determine if their client has identified all of the structures that could result in future assessments and gain an understanding of all structures that could materially affect the client. To gain an understanding, an auditor can either directly contact the structure or access the structures' Web sites to obtain the necessary regulatory information about the plan's operations to assess the reasonableness of the assessments recorded in the financial statements. Some structures to consider are included in the following table.

Structures to Consider	*Web Site*
Citizens Property Insurance Corporation of Florida (Florida Citizens)	www.citizensfla.com
Florida Hurricane Catastrophe Fund (FHCF)	www.sbafla.com/fhcf
Texas Windstorm Insurance Association (TWIA)	www.twia.org

[3] Insurers can directly surcharge their customers to recoup any surcharges made against them by the structures. Specific accounting is discussed later in this section.

Structures to Consider	*Web Site*
Louisiana Citizens Property Insurance Corporation	www.lacitizens.com
The Mississippi Windstorm Underwriting Association (MWUA)	www.msplans.com/mwua
The Mississippi Residential Property Insurance Underwriting Association (MRPIUA)	www.msplans.com/MRPIUA
Alabama Insurance Underwriting Association (AIUA)	www.alabamabeachpool.org

.49 Changing requirements of structures that affect how such structures are organized or funded increase the risks associated with regulatory compliance, accounting practice, and auditing considerations surrounding management's assertions. A crucial step toward obtaining audit assurance is to be aware of potential pitfalls surrounding assessment facts and circumstances during the planning stages of the audit and thereafter. Some questions to consider are listed in the following paragraphs.

.50 ***Has the client properly identified the type of assessment category (or categories) levied by the regulatory structure?*** SOP 97-3, *Accounting by Insurance and Other Enterprises for Insurance-Related Assessments*, defines four guaranty-fund assessment categories, namely, retrospective-premium-based, prospective-premium-based, prefunded-premium-based, or administrative assessments.[4] Under SAP, SSAP No. 35, *Guaranty Fund and Other Assessments*, does not distinguish between retrospective- and prospective-premium-based assessments and instead treats all premium-based assessments similarly to the retrospective-premium-based assessments described in SOP 97-3. Structures levy assessments based upon specific regulation. For example, Florida Citizens and Louisiana Citizens Property Insurance Corporation both levy retrospective-premium-based assessments. Other structures may levy different types of assessments. Problems in determining the proper assessment type can affect whether an insurer has applied the appropriate accounting and disclosure because the assessment type affects the timing of recorded liabilities and related disclosures. For example, if a structure is limited to annual assessment caps with remainders recovered through future years' assessments, those future assessments may be categorized as either retrospective or prospective for GAAP reporting, depending on the specific structure and state regulations.

.51 ***Has the client maintained compliance with current legislation?*** Lack of compliance can skew management's assertions. For example, under SAP, Interpretation No. 03-01, "Application of SSAP No. 35 to the Florida Hurricane Catastrophe Fund," which provided 2003 guidance specific to the FHCF, has not been updated for 2004 FHCF legislative changes, which now require insurers to act as agents. Insurers now collect assessments from policyholders, rather than being initially liable for the assessment and passing this cost on through additional premiums as was previously the case. Interpretation No. 03-01 is no longer authoritative for assessments levied by the FHCF and is currently being revised by the NAIC. Lack of familiarity with this new legislation could cause an overstatement of liabilities. Paragraph 10 of SSAP No. 35 states that when the reporting entity acts as an agent and (1) the assessment is reflected as a separately identifiable item on the billing to the policyholder and (2) remittance of the assessment by the reporting entity to the state or federal agency is contingent upon collection from the insured, the liability for fees and assessments rests with the policyholder rather than with the reporting entity, and the assessment is not reported in the insurer's statement of operations. Your client's obligation may be to collect and subsequently remit the fee or assessment.

.52 ***Has the client inappropriately applied analogous interpretation of GAAP or SAP?*** In the aforementioned example, the interpretation passed was applicable only to the FHCF. The auditor should be alert that any structure-specific guidance is not inappropriately applied by analogy to other structures.

[4] For additional discussion, see SOP 97-3, *Accounting by Insurance and Other Enterprises for Insurance-Related Assessments*.

.53 ***Has the assessment met all requirements for recognition?*** Management's assertions of completeness and valuation (including related presentation and disclosure) are affected by difficulties surrounding timing and estimation. In accordance with GAAP, in paragraph 10 of SOP 97-3, the following three criteria must be met for your client to recognize liabilities for insurance-related assessments:

1. Has an assessment been imposed or information of a probable assessment levy occurred prior to the issuance of the financial statements (this includes the subsequent events period)?

2. Did the event obligating an entity to pay an imposed or probable assessment occur on or before the date of the financial statements? Note that the term *event* may mean more than one event per paragraph 36 of SOP 97-3. For example, for natural catastrophe retrospective-premium-based assessments, the triggering events are both the occurrence of the catastrophe and the writing of the premium that obligates the entity for the assessment liability.

3. Is the amount of the assessment reasonably estimable?

.54 ***Has the client accounted for SAP and GAAP timing recognition differences that arise due to the type of assessment?*** As mentioned previously, under SAP, SSAP No. 35 rejects some of the guidance in SOP 97-3 and does not distinguish between retrospective- and prospective-premium-based assessments. Instead, all premium-based assessments are accounted for in a manner similar to retrospective-premium-based assessments, as described in SOP 97-3. Note that in certain instances, SAP does parallel FASB Statement No. 5 accounting because paragraph 6 of SSAP No. 35 states that loss-based assessments are presumed probable when the losses on which the assessments are expected to be based are incurred.

.55 ***Has management's methodology for valuing assessment liabilities been consistent from period to period?*** Current practice allows (but does not require) the discounting of aggregate obligations if the amount or timing of payments are "fixed or reliably determinable." Due to increased assessments over the past several years, management's consistency surrounding discounting choices needs to be carefully evaluated. The auditor should also note if all necessary disclosures relating to FASB Statement No. 5, FASB Interpretation No. 14, and SOP 94-6 are present.

.56 ***Has the client properly managed delays in obtaining information used in the estimates?*** In some cases, current-year assessments are based upon prior-year data, and delays may occur obtaining assessment valuation information. Under GAAP, paragraph 3 of FASB Interpretation No. 14 states that when no estimate within a given range is better than another, the liability should be the minimum amount in the range. Under SAP, paragraph 10 of SSAP No. 5, *Liabilities, Contingencies and Impairments of Assets*, states that when the reasonable estimate of the loss is a range, the amount in the range that is considered the best estimate shall be accrued. However, when in management's opinion no amount within management's estimate of the range is a better estimate than any other amounts, the midpoint (mean) of management's estimate in the range shall be accrued. If management determines that the high end of the range cannot be quantified, a range does not exist, and management's best estimate should be accrued.

.57 ***Has the client accounted for assessments not officially levied by applicable structures?*** Paragraph 16 of SOP 97-3 states that an entity need not be formally notified of an assessment by a structure to make a reasonable estimate of its liability. Auditors may need to note if clients have included assessments in the reporting period to avoid unrecorded liabilities. Paragraph 16 continues to state that entities subject to assessments may have to make assumptions about future events, such as when the fund will incur costs and pay claims that will determine the amounts and the timing of assessments. Similarly, under SAP, SSAP No. 35 provides that entities subject to assessments may have to make assumptions about future events, such as when the fund making the assessment will incur costs and pay claims to determine the amounts and the timing of assessments.

.58 ***Has the client waited for board of director (or other authoritative) approval to recognize assessments levied, or not yet levied, by applicable structures?*** Authoritative approval is not the trigger that determines loss as defined in FASB Statement No. 5. Contingent liabilities are recorded when probable and reasonably estimable. Clients need to determine whether an assessment is probable and measurable and then, consistent with the provisions of FASB Statement No. 5, determine if recognition or disclosure is warranted. Similarly, paragraph 4 of SSAP No. 35 requires that a liability should be recognized when (1) information available prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and (2) the amount of the liability can be reasonably estimated.

.59 ***Has the client accounted for SAP and GAAP timing differences when recognizing and valuing potential future policyholder premium surcharges and premium tax offsets?*** For property and casualty companies, the majority of contracts are of short duration. Under GAAP, paragraph 22 of SOP 97-3 states that assets are recognized for recoveries of amounts based on current laws and projections of future premium collection or policy surcharges from in-force policies (with appropriate valuation allowances established). This does not include expected renewals of short-duration contracts but does include assumptions as to persistency rates for long-duration contracts. In-force policy restriction applied to a short-duration contract product line usually means that asset recognition is limited. However, under SSAP No. 35, an asset may be recognized (gross) for premium tax credits and for policyholder surcharges that will be collected in the future to the extent the asset is probable of realization (with appropriate valuation allowance being recorded).

.60 ***Has the client recognized policyholder surcharges for amounts that are, in substance, pass-through funds?*** Policy surcharges are recognized for in-force policies when appropriate. However, some structures require the insurer to collect policyholder surcharges from insureds for state (and other structure) assessments for future premiums and to remit the surcharge to the state or other regulatory body on behalf of the policyholder. Paragraph 26 of SOP 97-3 clarifies that amounts for receivables and surcharges collected that pass through the insurance entity to the state or other regulatory body should not be recorded as revenues and that amounts due or paid are not expensed. Under SAP, SSAP No. 35 provides that such surcharges shall not be reported in the insurer's statement of operations when both of the following conditions are met:

1. The assessment is reflected as a separately identifiable item on the billing to the policyholder.

2. Remittance of the assessment by the reporting entity to the state or federal agency is contingent upon collection from the insured.

.61 ***Is the transaction related to an assessment or reinsurance?*** Certain structures operate as both assessors and reinsurers. Under GAAP, assessments should be accounted for under SOP 97-3, and reinsurance transactions and certain involuntary pools should be accounted for under FASB Statement No. 113. Under SAP, assessments should be accounted for under SSAP No. 35; reinsurance transactions under SSAP No. 62; and certain involuntary pools under SSAP No. 63, *Underwriting Pools and Associations Including Intercompany Pools*. Insurers ceding business under reinsurance agreements would record ceded premiums for premiums paid to the fund and ceded losses (not assessment liabilities) for recoveries from the fund.

.62 ***Have reinsurance contract variables been properly evaluated?*** As with all insurance contracts, risk transfer criteria need to be analyzed and the asset needs to be evaluated for collectibility from the reinsurance structure. Timely collectibility may be in question if a reinsurance structure's fund is depleted, which may be the case for some structures after recent catastrophes, although ultimate collectibility may not be at risk if the structure of the fund provides for the assessment of all insurers writing business in the affected state until such time as the fund is replenished. The contract should also state how amounts recoverable are calculated. There also should be consideration whether there is an obligation for the ceding company to repay the reinsurance structure if the ceding company does not collect the amount from policyholders through future policy surcharges. For additional information on reinsurance, see the "Reinsurance Arrangements" section of this Alert.

Life and Health Sector—Guarantees and Other Developments

Minimum Guaranteed Death Benefits and No-Lapse Guarantee Mortality Features

.63 Variable annuity products that contain minimum guaranteed death benefits (MGDBs) or guaranteed minimum income benefits (GMIBs) pose additional consideration, which include the following:

- Companies may experience general account charges for the payout of these benefits (upon either death or annuitization, as applicable) when the market value of the separate account assets is not sufficient to support the level of benefit payment.

- GAAP and SAP may require insurers to establish reserves for variable annuity guarantees on these products, thereby placing strain on capital strength.

.64 The NAIC's Risk Based Capital C3 Phase II initiative requires cash-flow testing for annuities or other products with exposure to interest-rate risks. Interest-rate risk may increase if there is a duration mismatch between assets and liabilities. Testing includes multiple scenarios with various interest rate fluctuations to determine whether reserves are adequate. This testing may cause some life insurers to increase their capital requirements for interest-sensitive products.

.65 Companies that issue universal life insurance with no-lapse guarantee mortality features are subject to the provisions of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts*, and should establish liabilities in addition to account balances if amounts assessed each period for the feature are expected to result in profits in earlier years followed by losses in subsequent years.

.66 SOP 03-1 contains guidance for accounting for MGDBs, GMIBs, and no-lapse guarantee features. These features are also addressed in FASB Staff Position (FSP) FAS 97-1, *Situations in Which Paragraphs 17(b) and 20 of FASB Statement No. 97,* "Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments," *Permit or Require the Accrual of an Unearned Revenue Liability*, and in AICPA Technical Practice Aid (TPA) section 6300.08, "Definition of an Insurance Benefit Feature." Management should be familiar with all of these pronouncements in applying the guidance in SOP 03-1. Auditors should also gain an understanding of these pronouncements, depending upon the circumstances at their clients.

Regulation XXX/AXXX Considerations

.67 State insurance regulators adopted regulation XXX in 2000 to provide for the cost of renewal guarantees in term insurance products. Later, universal life no-lapse guarantees based on the payment of minimum premiums were also covered by this regulation. In 2003, state regulators adopted AXXX, intended to capture secondary guarantees covered by other policy designs. It states, "Reserves need to be established for the guarantees provided by a policy." In many cases, life insurers have transferred the reserve requirements under these regulations to off-shore reinsurance companies. As a result of significant growth in term insurance renewal guarantees and universal life no-lapse guarantees, some knowledgeable parties predict that the availability and cost of bank letters of credit backing offshore reinsurance could be severely affected within the intermediate future. Also, subsequent interpretation of these new regulations may result in some insurers being required to post additional statutory reserves to cover no-lapse guarantees.

.68 The NAIC formally adopted a change to AXXX that affects policies written after the effective date of July 1, 2005. It is anticipated that the change to AXXX will result in higher capital and reserve requirements, price increases for universal life policies with secondary guarantees, and revised product designs. Some life insurers are expected to use affiliated reinsurance relationships to cede these additional reserves, thereby decreasing the effect on earnings and return on equity. The change to AXXX will be in effect for two years, at which point it is expected that a principles-based approach for determining statutory reserves will be in place. On June 1, 2006, the NAIC legal staff ruled that state insurance commissioners may include lapse rates in their interpretation of Actuarial Guideline 38 when they formulate reserve requirements, and several key regulators are on record of supporting this action. This ruling may allow insurers to hold lower reserves while industry regulators and actuarial groups continue to work on a permanent rule to adopt principle-based reserving practices for statutory purposes. However, the timing and certainty of principles-based practices are not definite and probably will not occur within the upcoming audit year.

Recent SAP

.69 The NAIC continues to create and clarify statutory accounting guidance for insurance enterprises through its ongoing maintenance process. The most recent NAIC *Accounting Practices and Procedures Manual* (Manual) was published by the NAIC as of March 2006. For Manual subscribers, modifications made subsequent to the publication of the Manual are available from the NAIC Web site at www.naic.org. Insurance laws and regulations of the state insurance departments require insurance companies domiciled in those states to comply with the guidance provided in the Manual, except as otherwise prescribed or permitted by state law or regulation.

.70 The 2006 Manual contains two new SSAPs adopted during 2005 and effective for implementation as of January 1, 2006:

1. SSAP No. 90, *Accounting for the Impairment or Disposal of Real Estate Investments*, replaces paragraphs 9, 10, and 19 of SSAP No. 40, *Real Estate Investments*, and provides statutory accounting guidance concerning when and how to account for an impairment or disposal on a real estate investment or long-lived assets associated with discontinued operations in light of the guidance set forth in FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*.

2. SSAP No. 93, *Accounting for Low Income Housing Tax Credit Property Investments*, requires that investments in Low Income Housing Tax Credit properties be carried at the lower of amortized cost or fair value, a change to the previous requirement of using the equity method of accounting for these types of investments under SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies*.

.71 In 2005, SSAP No. 62 was amended to require additional reinsurance information to be disclosed in new reinsurance interrogatories beginning with the 2005 annual statement. During 2006, the reinsurance interrogatory requirement was further amended by limiting the reinsurance contracts to be included in this interrogatory to those contracts having an underwriting effect, written premium ceded, or loss and loss expense reserves ceded greater than five percent of the prior year surplus, effective for 2007. The current limitation of three percent of surplus remains in effect for 2006 reporting. Beginning in 2006, these new reinsurance interrogatories are required to be included as accompanying supplemental schedules to the annual audited financial statements of insurance companies. It was proposed that the information included in the supplemental schedules to the audited financial statements be limited to reinsurance contracts entered into, renewed, or amended on or after January 1, 1994. During the 2006 Winter NAIC meeting, the SAP Working Group adopted this proposed change to narrow the scope of disclosure to reinsurance contracts entered into, renewed, or amended on or after January 1, 1994. The disclosures will be included in the 2006 audited financial statements for the first time. This limitation to post-1994 contracts does not apply to the disclosures in the annual statement interrogatories; therefore, information included in the annual statement interrogatories may be different than disclosures in the audited financial statements, depending on whether the company has any pre-1994 contracts.

.72 As of the date of this writing, the following new SSAPs will become effective in 2007:

1. SSAP No. 95, *Exchanges of Nonmonetary Assets, A Replacement of SSAP No. 28—Nonmonetary Transactions*, adopts the guidance in FASB Statement No. 153, *Exchanges of Nonmonetary Assets—an amendment*

of APB Opinion No. 29, which introduces the concept of commercial substance in nonmonetary exchanges of similar productive assets. SSAP No. 95 allows for an exception to measuring exchanges of nonmonetary assets at fair value when the nonmonetary exchange of similar productive assets does not have commercial substance. This SSAP should be applied prospectively and is effective for periods beginning after January 1, 2007.

2. SSAP No. 96, *Settlement Requirements for Intercompany Transactions, An Amendment to SSAP No. 25—Accounting for and Disclosures about Transactions with Affiliates and Other Related Partie*s, requires that terms of transactions between related parties be defined in a written agreement and that the agreement must provide for timely settlement of amounts owed, including specified due dates. Any amounts owed to the reporting entity over 90 days past the due date or not specifically addressed in a written agreement should be non-admitted. This SSAP was approved as final at the NAIC 2006 Winter meeting. The NAIC SAP Working Group agreed to revise the effective date from January 1, 2007, to December 31, 2007.

.73 Since the adoption of SSAP No. 88, *Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 46*, in 2005, a number of implementation questions have arisen from the industry and regulators. In response to these inquiries, the SAP Working Group is in the process of finalizing an implementation guide that will be adopted as an appendix to SSAP No. 88. This appendix will be in the form of a series of questions and answers and should clarify the intent of the guidance and ensure that insurance companies are properly recording the value of subsidiary, controlled, and affiliated entities.

.74 Additionally, six new interpretations were adopted during 2005 and incorporated into the revised Manual. As of the date of this writing, five new interpretations have been adopted that are effective for 2006. Additionally, several *nonsubstantive* revisions to various SSAPs and changes to the appendices were made during 2005 and 2006 by the NAIC.

Federal Medicare Part D Prescription Drug Programs

.75 The Medicare Prescription Drug Improvement and Modernization Act of 2003 established a new voluntary Medicare Prescription Drug Program (Medicare Part D) for which benefits started on January 1, 2006. The benefit has a $250 deductible for 2006 with $50 annual increases each year after. For 2006, the initial coverage limit is $2,250 with $10 annual increases each year after. The coinsurance percentage associated with initial coverage is 25 percent. Finally, the benefit has an out-of-pocket threshold and an associated secondary coinsurance percentage. After total costs paid by the enrollee (including the deductible and the coinsurance under the initial coverage limit) exceed the out-of-pocket threshold, the enrollee is only responsible for a proportion (namely, the coinsurance percentage) of any further drug costs. For 2006, the out-of-pocket threshold is $3,600 with $50 annual increases each year after. The coinsurance percentage associated with costs above the out-of-pocket threshold is five percent

.76 There are provisions in the regulations that authorize certain types of alternative benefit designs as long as the benefits provided are certified as being actuarially equivalent to the standard design. The regulations also permit a prescription drug plan (PDP) sponsor to offer enhanced alternative coverage, in which at least one key aspect of the benefit design (deductible, cost sharing, or initial coverage limit) is richer than the standard plan. Such additional benefits are referred to as *supplemental benefits* in the regulations. Many companies are expected to develop enhanced alternative coverages that provide insurance benefits for claims above the initial coverage limit, even though the standard out-of-pocket threshold may not have yet been satisfied. The Centers for Medicare & Medicaid Services (CMS) will reimburse PDP sponsors for 80 percent of all claims above the out-of-pocket threshold. To the extent that the PDP sponsor's adjusted allowable risk corridor costs vary in either direction from a target amount, there is risk sharing between the CMS and the PDP sponsor. No sharing occurs if actual costs are within 2.5 percent of the target. A 75 percent and 25 percent sharing occurs for costs between 2.5 percent and 5 percent of the target. Costs in excess of 5 percent of the target are shared 20 percent and 80 percent by the PDP sponsor and CMS, respectively.

Accounting and Auditing Considerations

.77 In this section is a list of several factors that the auditor may need to be aware of when auditing Medicare Part D Programs.

.78 ***Contract classification.*** How should the underlying contract with the beneficiary be classified under FASB Statement No. 60? The underlying contract with the beneficiary in Medicare Part D Programs generally provides health insurance (prescription drug) coverage for periods of one calendar year with premiums adjustable annually.

.79 ***Premiums.*** How should premiums be recognized? Premiums paid by the beneficiary, either directly to the plan sponsor or through withholding from Social Security checks and remitted from Medicare, are composed of up to three components:

1. The base beneficiary premium is a fixed amount that, for the standard benefit plan, is intended on average to represent 25.5 percent of the program costs.

2. The supplemental benefit premium is a fixed amount, applicable only to an enhanced alternative coverage, representing the additional cost of supplemental benefits.

3. The late enrollment fee is a penalty assessed to beneficiaries who enroll outside of the normal enrollment windows, reflecting the possibility of adverse selection.

.80 ***Incurred Claims.*** How should claim costs be accrued? In accordance with FASB Statement No. 60, losses should be accrued as incurred.

.81 ***Risk Sharing.*** How should risk corridor payments be accounted for? Medicare Plan D Programs provide a risk-sharing arrangement whereby actual results for the plan sponsor are compared to the targeted results anticipated in the plan sponsor's bid accepted by Medicare. Threshold limits for payments to or from Medicare will be determined based upon symmetric risk corridors around the target amount as discussed above.

.82 Because of the unique nature of Medicare Part D Programs, there have been two methods utilized in practice for accounting for the risk corridor payments:

1. A retrospective refund arrangement under paragraph 44 of FASB Statement No. 60, based on the experience to date following a model based on FASB Emerging Issues Task Force (EITF) Issue No. 93-14, "Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprises" (EITF Issue No. 93-14 is based on EITF Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises," and identifies the guidance in EITF Topic No. D-35, "FASB Staff Views on Issue No. 93-6, *Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises*," related to EITF Issue No. 93-6 as relevant guidance for applying EITF Issue No. 93-14).

2. A retrospective premium adjustment on a retrospectively rated contract in accordance with paragraph 14 of FASB Statement No. 60. This paragraph indicates that if the ultimate premium is reasonably estimable, the estimated ultimate premium shall be recognized as revenue over the period of the contract. Retrospective premiums should be estimated at the beginning of the plan year based upon actuarially determined models, and adjustments should be made based upon revisions to those estimates in each reporting period. Retrospective premium adjustments estimated for the portion of the policy period that has expired shall be considered and immediately recorded as an adjustment to premium. Paragraph 14 of FASB Statement No. 60 also requires that if the ultimate premium cannot

be reasonably estimated, the cost recovery method or deposit method may be used until the ultimate premium can be reasonably estimated.

.83 Either method will yield the same result for an annual period of a calendar-year financial reporting enterprise because the Medicare Part D programs are annual contracts for calendar-year periods. The two methods differ in the determination of a payable or receivable balance at the end of interim reporting periods.

.84 The auditor should consider if a policy decision has been made about which model to follow for allocating the impacts of the risk-sharing provision between interim periods and if the accounting policy has been applied for similar contracts with mandatory experience rating provisions.

.85 ***SAP***. The NAIC Emerging Accounting Issues Working Group adopted Interpretation No. 05-05, "Accounting for Revenues Under Medicare Part D Coverage", at its national meeting in December 2005. This Interpretation provides guidance to life and health insurers on how to present various funds to be received under the Medicare Part D Program. Interpretation No. 05-05 requires the application of existing SAP (SSAP No. 47, *Uninsured Plans*; SSAP No. 66, *Retrospectively Rated Contracts*; and SSAP No. 54, *Individual and Group Accident and Health Contracts*, depending upon the nature of the funds received).

Terrorism Insurance Developments

.86 The market for terrorism risk insurance was severely disrupted by the events of September 11, 2001. Those events resulted in reinsurers choosing to no longer cover terrorism risk or to offer coverage only at very high rates. On November 26, 2002, the president signed TRIA into law. TRIA, which became effective immediately, established a temporary federal program of shared public and private compensation for insured commercial property and casualty losses resulting from acts of terrorism.

.87 Accordingly, terrorism exclusions on existing insurance policies were removed, and all policyholders had the ability to secure coverage for terrorism risk through mandatory offer requirements placed on insurers. TRIA placed the federal government temporarily in the terrorism risk reinsurance business because the program was written to sunset on December 31, 2005. However, the Terrorism Risk Insurance Extension Act of 2005 (Amendments) was signed into law on December 22, 2005. The Amendments extend the Terrorism Risk Insurance Program (TRIP), established by TRIA, through December 31, 2007. Additionally, the Amendments further limit the lines of business that can participate in the TRIP, adding to existing exclusions (medical malpractice, reinsurance, life and health, crop, financial guaranty, and flood) the following lines: commercial auto, burglary and theft, surety, professional liability (as distinguished from directors and officers liability coverage), and farm owners multiple peril coverages. Thus, these lines are no longer required to participate in TRIP.

.88 Under the original program, once an insurer has suffered a loss equal to its deductible, the U.S. Treasury will cover 90 percent of the losses above the deductible. The insurer's deductible increases over the life of the program. In 2004, the deductible was equal to 10 percent and increased to 15 percent of direct earned premium in 2005. TRIA also provides the U.S. Treasury with the authority to recoup federal payments via policyholder surcharges. The maximum amount of any potential policyholder surcharge that can be imposed is three percent per year. A summary of the major changes as a result of the Amendments is as follows:

- The Amendments increase the insurer deductible for the 2006 program year to 17.5 percent of the prior calendar year direct earned premiums; for the 2007 program year, the deductible increases to 20 percent of the prior calendar year direct earned premiums (the insurer deductible for the 2005 program year was 15 percent of the prior program year's direct earned premium).
- The Amendments increase the industry aggregate retention amount for 2006 and 2007 program years to: the lesser of $25 billion and the aggregate amount of insured losses for all insurers for the 2006

program year, and the lesser of $27.5 billion and the aggregate amount of insured losses for all insurers for the 2007 program year (the industry aggregate retention for the 2005 program year was $15 billion).

- For the 2006 program year, the Amendments establish a program trigger of $50 million in aggregate industry insured losses resulting from certified acts occurring after March 31, 2006. For the 2007 program year, the Amendments establish a program trigger of $100 million in aggregate industry insured losses resulting from certified acts occurring during the 2007 program year.
- Subject to the new program trigger, the Amendments maintain the federal share of compensation under the program at 90 percent of the portion of the amount of insured losses exceeding the applicable deductible for the 2006 program year, while reducing the federal share to 85 percent of the portion of the amount of insured losses exceeding the applicable deductible for the 2007 program year.
- The 2005 Amendments maintain the annual cap on insured losses at $100 billion for both the 2006 and 2007 program years.

.89 Auditors may need to remain alert to developments in this area and, depending on what laws are in place, assess effects to disclosures, liability accruals, and subsequent events for 2006 fiscal year ends. The concern is that, in the absence of TRIA, it is likely that terrorism exclusions will again become the norm for commercial line policies and that private reinsurers are not likely to fill the reinsurance capacity void if TRIA expires after December 31, 2007.

.90 The NAIC members have adopted a model bulletin to provide guidance to insurers related to rate filings and policy language that state regulators would find acceptable to protect U.S. businesses from acts of terrorism. They have also developed Model Disclosure Forms 1 and 2 to assist insurers in complying with TRIA. The model disclosure forms may be used and modified by insurers to meet their obligation under the rules, provide policyholders with the status of current coverage, and, in some cases, make a selection regarding future insurance coverage for acts of terrorism. Insurers must comply with state law and TRIA and are encouraged to review the disclosure forms in light of their current policy language, state legal requirements, and the provisions of the TRIA Amendments and TRIP.

Reminder—Consideration of the Examiners Handbook

.91 The Model Audit Rule states that auditors shall consider the procedures in the NAIC *Financial Condition Examiners Handbook* (Examiners Handbook) in the conduct of the audit as the independent certified public accountant deems necessary. Although the AICPA supports increased communication with regulators and a better understanding of the financial examination process and procedures, it does not require auditors to perform procedures from the Examiners Handbook that they would not have otherwise performed as part of a generally accepted auditing standards (GAAS) audit. This revision of the Model Audit Rule places emphasis on giving consideration to the procedures contained in the Examiners Handbook. In planning the audit, auditors may consider incorporating into their planning documentation that they have given consideration to the Examiners Handbook procedures as they deemed necessary. In the conduct of financial examinations, examiners review, use, and rely upon the audit working papers.

Internal Control Issues and Developments

Enterprise Risk Management

.92 Enterprise risk management (ERM) continues to be a topic of interest among insurance company management and rating agencies. ERM is an extension of risk-based capital concepts and includes all aspects of business operations that involve risk—insurance risk, investment risk, and operating and financial risk.

In recent years, rating agencies began to encourage insurers to adopt advanced risk management practices and expressed their intent to evaluate the processes and techniques by which companies manage risk exposure as an integral part of their qualitative review of the company's business practices. In October 2005, Standard & Poor's (S&P) announced it would begin specifically analyzing insurers' ERM capabilities and consider those results when assigning ratings. S&P provided evaluation components to be analyzed and refined its ERM quality definitions in June 2006. Since S&P's actions, other rating agencies have commented on their position and views of ERM and how their ratings process already does or will include an assessment of advanced risk management practices. As the implementation of ERM evolves at insurance companies, related rating criteria are likely to change also.

Committee of Sponsoring Organizations of the Treadway Commission Internal Control and ERM Frameworks

.93 In 1992, the Committee of Sponsoring Organizations of the Treadway Commission (COSO) developed a model for evaluating internal controls titled *Internal Control—Integrated Framework* (COSO Framework). More recently, passage of the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley) and the subsequent establishment of the PCAOB have continued the relevance of the COSO Framework because it broadly serves as the accepted method for management to maintain systems of internal control. In September 2004, COSO issued *Enterprise Risk Management—Integrated Framework*. This framework expands on internal control, providing a more comprehensive focus on the broader subject of ERM. Although it does not replace the COSO Framework (though it does encompass it), organizations can use this ERM framework both to satisfy their internal control needs and to move toward a more complete risk management process. Among other aspects, the auditor may want to be familiar with the framework paradigm, which consists of four objectives (strategic, operations, reporting, and compliance) superimposed over eight components: (1) internal environment, (2) objective setting, (3) event identification, (4) risk assessment, (5) risk response, (6) control activities, (7) information and communication, and (8) monitoring.[5]

New Internal Control Guidance for Smaller Public Companies

.94 As a result of the enactment of Sarbanes-Oxley, public companies and other organizations were prompted to turn their attention to evaluating internal control over financial reporting. Many smaller public companies found they needed assistance in applying the concepts of the COSO Framework, and COSO responded by initiating a project in January 2005 to assist smaller companies in implementing the COSO Framework.

.95 The new guidance, released July 11, 2006, is titled *Internal Control Over Financial Reporting—Guidance for Smaller Public Companies.* The objective of this guidance is to help smaller public companies and their auditors apply the COSO Framework in connection with assessing and reporting on the effectiveness of internal control over financial reporting. This new guidance consists of three volumes:

1. The executive summary volume provides a high-level summary for boards of directors and senior management.

2. The fundamental principles and examples volume includes an overview of internal control over financial reporting in smaller companies; 20 fundamental principles drawn from the COSO framework, along with related attributes (characteristics associated with and supporting a principle) and approaches (describing how smaller companies can apply a principle); and examples of how smaller companies can apply the principles cost-effectively.

[5] Paragraph .25 of AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*), requires that, in all audits, the independent accountant obtain an understanding of each of the five components of internal control (the control environment, risk assessment, control activities, information and communication, and monitoring) sufficient to plan the audit.

3. The tools volume contains illustrative tools, including templates, to help management evaluate internal control and determine whether the company has effectively applied the principles. This third volume may provide smaller companies with some additional ideas about how controls can be effectively documented.

.96 Although the guidance was drafted for use by smaller public companies, the principles are equally applicable to large and small nonpublic companies, governmental agencies, and not-for-profit organizations. COSO recognizes that methods for applying the COSO Framework can and should differ for smaller businesses and identified the following themes for specific attention by smaller companies:

- The *control environment* is very important and sets the tone for internal control in a company. In smaller companies, the actions of management and its demonstrated commitment to effective governance and internal control are often more transparent than they are in larger companies.
- In identifying necessary controls, a company should consider the *risks* to reliable financial reporting and then identify controls required to mitigate those risks. Rather than focusing on mandating specific controls, the focus should be on linking those risks to the financial statement assertions and account balances that might be affected.
- *Control activities* require some minimum level of formalization. This is necessary so that everyone understands their responsibilities, how the controls operate, and the importance of the control process.
- *IT* can enable effective internal control. Although IT often has been cited as a source of control risk, small companies can take advantage of IT to promote more effective control.
- *Monitoring* the effectiveness of internal control can take place in many different forms in smaller companies. This includes the ongoing monitoring that may already be in place, including monitoring by executives who have direct and explicit knowledge of the activities of the business. Management often relies on these controls in smaller companies.
- Employees should understand the risks, objectives, and their *personal responsibility for controls*. Even smaller companies can implement effective procedures so that when employees note control problems or deviations from acceptable practices, they can report these findings to the appropriate person before the problems or deviations become significant issues for the company.

.97 A free copy of the executive summary of *Internal Control Over Financial Reporting—Guidance for Smaller Public Companies*, which contains the 20 fundamental principles mentioned previously, can be downloaded from www.coso.org/publications.htm.

COSO Request for Proposal on Monitoring Procedures

.98 On October 17, 2006, COSO issued a request for proposal to develop guidance on the monitoring component of the COSO Framework. The project is scheduled to be completed by the end of 2007. The guidance is expected to describe the objectives of the monitoring component of the internal control framework, provide guidance on how ongoing and separate monitoring can meet the needs of Sarbanes-Oxley compliance, include cost-effective examples of monitoring activities for large and small companies, and provide monitoring tools and techniques to assist companies in their evaluation and assessment. For more information on the request for proposal, please visit www.coso.org.

SEC and PCAOB Update

.99 Auditors may access the *SEC and PCAOB Alert—2006/07* (product no. 022497kk) for more comprehensive coverage of recent developments at the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

SEC Proposed Guidance on Internal Control Over Financial Reporting

.100 During May 2006, the SEC announced a number of steps it would be taking to improve implementation of the internal control requirements of Section 404 of the Sarbanes-Oxley Act of 2002 (Section 404). These steps included issuing interpretive guidance to assist management and working with the PCAOB to revise and approve pertinent issues within Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*).

.101 Subsequently, on December 13, 2006, the SEC held an open meeting in which it voted to propose for public comment interpretive guidance for management regarding the evaluation of internal control over financial reporting. The guidance was released on December 20, 2006, as proposed rule Release No. 33-8762 and can be accessed at www.sec.gov/rules/proposed/2006/33-8762.pdf. The proposal is clear that companies evaluating internal controls in accordance with this new guidance would satisfy the Sarbanes-Oxley annual evaluation requirement. The proposed guidance intends to assist management in planning and performing its annual evaluation of internal control over financial reporting and reduce unnecessary costs and burdens while still maintaining the benefits of Section 404. The guidance is principle based. The two overarching principles are that:

1. Management should evaluate the design of implemented controls to determine whether they adequately address the risk that a material misstatement in the financial statements would not be prevented or detected in a timely manner.

2. Management should gather and analyze evidence about the operation of its controls based on its assessment of the risk associated with those controls.

.102 The proposed guidance sets forth an approach by which management can perform a top-down, risk-based evaluation of internal control over financial reporting and is designed to be scaleable to allow smaller companies to tailor their evaluations of internal control to fit their size and complexity. Until this point, management has relied extensively on the standards written for auditors in implementing Section 404. The proposed rule also proposed amendments to Rule 2-02(f) of Regulation S-X to require only one opinion on the effectiveness of internal control over financial reporting. The auditor's attestation of management's evaluation required under Section 404(b) of the Sarbanes-Oxley Act would be subsumed within the auditor's opinion on the effectiveness of the company's internal controls. The proposed rule is open for public comment until February 27, 2007.

Further Relief From Section 404 Requirements for Smaller and Newly Public Companies

.103 On December 15, 2006, the SEC adopted an extension of Section 404 compliance dates for nonaccelerated filers. Nonaccelerated filers were scheduled to begin including both management's assessment and an auditor's attestation to management's assessment on the effectiveness of internal control over financial reporting in their annual reports for fiscal years ending on or after July 15, 2007. Nonaccelerated filers will now provide management's report on internal control over financial reporting in its annual reports for fiscal years ending on or after December 15, 2007, and are not required to file the auditor's attestation report until filing an annual report for fiscal years ending on or after December 15, 2008. Management's report included in a nonaccelerated filer's annual report during the filer's first year of compliance with the Section 404(a) requirements will be considered *furnished* rather than filed.

.104 Relief was also provided to newly public companies. A company will not become subject to the internal control over financial reporting requirements until it either has been required to file an annual report for the prior fiscal year with the SEC or had filed an annual report with the SEC for the prior fiscal year. The transition period intends to allow newly public companies to focus on their initial securities offerings and prepare for their first annual report without the additional burden of Section 404 compliance. The SEC press release and final rule (Release No. 33-8760) can be accessed at www.sec.gov/news/press/2006/2006-210.htm. The following table is included in the SEC press release and summarizes the revised compliance dates.

	Accelerated Filer Status[6]	*Revised Compliance Dates and Final Rules Regarding the Internal Control Over Financial Reporting Requirements* — *Management's Report*	*Auditor's Attestation*
U.S. Issuer	Large Accelerated Filer OR Accelerated Filer	Already complying (annual reports for fiscal years ending on or after November 15, 2004)	Already complying (annual reports for fiscal years ending on or after November 15, 2004)
	Nonaccelerated Filer	Annual reports for fiscal years ending on or after December 15, 2007	Annual reports for fiscal years ending on or after December 15, 2008
Foreign Issuer	Large Accelerated Filer	Annual reports for fiscal years ending on or after July 15, 2006	Annual reports for fiscal years ending on or after July 15, 2006
	Accelerated Filer	Annual reports for fiscal years ending on or after July 15, 2006	Annual reports for fiscal years ending on or after July 15, 2007
	Nonaccelerated Filer	Annual reports for fiscal years ending on or after December 15, 2007	Annual reports for fiscal years ending on or after December 15, 2008
U.S. or Foreign Issuer	Newly Public Company	Second Annual Report	Second Annual Report

PCAOB

.105 On December 19, 2006, the PCAOB held an open meeting where it voted unanimously to propose for public comment the following:

- Proposed auditing standard, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, to supersede the current Auditing Standard No. 2
- Proposed auditing standard, *Considering and Using the Work of Others in an Audit*, to replace current interim standards in AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*) and the direction within Auditing Standard No. 2 relating to using the work of others
- Proposed Independence Rule 3525, *Audit Committee Pre-approval of Services Related to Internal Control Over Financial Reporting*
- Proposed amendments to PCAOB Interim Standards

[6] Effective December 27, 2005, the SEC created a new category of companies called *large accelerated filers* and adjusted the definition of *accelerated filers*. A company is now an accelerated filer if its aggregate worldwide market value of voting and nonvoting common equity held by nonaffiliates is $75 million or more but less than $700 million and, as of the last business day of its most recently completed second fiscal quarter and the company has been subject to the reporting requirements of the Securities Exchange Act of 1934 for at least 12 calendar months, has filed at least one annual report, and is not a small-business issuer. A company is a large accelerated filer if it meets the last three aforementioned requirements and has an aggregate worldwide market value of voting and nonvoting common equity held by nonaffiliates of $700 million or more as of the last business day of the issuer's most recently completed second fiscal quarter. A nonaccelerated filer does not meet aforementioned Exchange Act Rule 12-b-2 requirements for accelerated or large accelerated filers and is therefore not required to file its annual and quarterly reports on an accelerated basis.

.106 The proposed auditing standard, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, is written to be much shorter and easier to read than Auditing Standard No. 2; however, it does not diminish any of the existing principles in Auditing Standard No. 2. Provisions of the new standard emphasize the importance of risk assessment and direct auditors to focus on the most important controls (controls with the greatest potential to prevent or detect material misstatements). The proposed standard, among other things, removes the requirement to evaluate management's assessment process; clarifies the role of materiality (including interim materiality) in the audit; directs the auditor to tailor the audit for smaller and less complex companies; recalibrates walkthrough requirements; and revises the definitions of significant deficiency, material weakness, and strong indicators of material weakness.

.107 The proposed auditing standard, *Considering and Using the Work of Others in an Audit*, allows the auditor to use the work of others for both the internal control and financial statement audits, eliminating barriers to the integration of the two audits. The proposed standard provides a single framework for using the work of others based on the auditor's evaluation of the combined competence and objectivity of others and the subject matter being tested. The principal evidence provision previously included in Auditing Standard No. 2 is eliminated in this proposed standard.

.108 Auditors can access the complete PCAOB press release, briefing paper, proposed standards, and statements on the PCAOB Web site at www.pcaob.org/Rules/Docket_021/index.aspx. Public comments are due by February 26, 2007.

The NAIC's Sarbanes-Oxley Initiative Update

.109 During the Fall 2006 meeting, the NAIC adopted changes to the Model Audit Rule related to Sarbanes-Oxley, with the majority of those changes being effective for 2010. Beginning in 2003, the NAIC had been reviewing the requirements of Sarbanes-Oxley and formed several subgroups to carefully consider incorporating certain aspects of Sarbanes-Oxley into the Model Audit Rule. Sarbanes-Oxley consists of 11 titles; the key titles of interest to the NAIC have been Titles II, III, and IV. These titles relate to auditor independence (Title II), corporate responsibility (including audit committees) (Title III), and enhanced financial disclosures (Title IV). Enhanced financial disclosures include management's assertion relative to the effectiveness of its internal control over financial reporting and the auditor's attestation report on management's assertion.

.110 Significant changes made to the Model Audit Rule related to Sarbanes-Oxley include:

- Section 7: The time allowed to serve in the capacity as the lead or coordinating audit partner was decreased from seven to five consecutive years with a new five year break in service (previously two years), effective beginning with year 2010 statutory audits.
- Section 7: There is a list of non-audit services that cannot be performed by the auditor in conjunction with the audit (the prohibitions generally agree with those designated by the SEC) effective for year 2010 statutory audits.
- Section 11: Auditors should prepare a written report communication of any unremediated material weaknesses that the insurer will furnish the domiciliary commissioner, effective beginning with year 2010 statutory audits. The current Model Audit Rule requires the auditor to prepare a report of significant deficiencies and material weaknesses in the insurer's internal control structure noted by the auditor during the audit. The AICPA NAIC Task Force has, for several years, undertaken efforts to confirm that states will accept the reporting of only those significant deficiencies and material weaknesses that are unremediated as of the balance sheet date, and it will continue to do so until the year 2010 effective date of the revised Model Audit Rule. For more information, see the section of this Alert titled "Reporting Significant Deficiencies and Material Weaknesses in Internal Control to Insurance Regulators."

- Section 14: There are new specifications for the responsibilities of audit committees and the required qualifications of audit committee members, effective January 1, 2010. The premium threshold that triggers the requirement for independent audit committee members is $300 million assumed and direct premiums. The premium range for a majority of independent audit committee members is $300 to $500 million. The requirement for a supermajority of independent audit committee members is $500 million in premiums.

- Section 16: Regarding Management's Report of Internal Control Over Financial Reporting, every insurer is required to file an audited financial report that has annual direct written and assumed premiums of $500 million or more shall prepare a report of the insurers' or group of insurers' internal control over financial reporting and file it with the Commissioner, effective December 31, 2010. The Model Audit Rule also includes a list of what should be included in Management's Report of Internal Control Over Financial Reporting. This report is prepared by management and is not audited.

.111 At the September 2006 meeting, the NAIC adopted an Implementation Guide that was developed to assist insurers, auditors, and regulators in implementing the changes to the Model Audit Rule related to Sarbanes-Oxley. Auditors and preparers may want to be familiar with the Implementation Guide because it is a good supplement to the Model Audit Rule and provides interpretive guidance and clarifications of the terms used. The Implementation Guide will be maintained as a new appendix to the NAIC Manual.

Reporting Significant Deficiencies and Material Weaknesses in Internal Control to Insurance Regulators[7]

.112 In May 2006, the AICPA Auditing Standards Board (ASB) issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. This SAS is effective for audits of financial statements for periods ending on or after December 15, 2006. SAS No. 112 requires the auditor to evaluate identified control deficiencies and determine if they individually or when combined are significant deficiencies or material weaknesses. These terms are defined consistent with PCAOB Auditing Standard No. 2. The term *reportable condition* is no longer used. The SAS also requires that these communications now be in writing. The language definitions of significant deficiencies or material weaknesses in internal control have been referenced to SAS No. 112 in Section 11 of the revised Model Audit Rule; however, the change will not take place until the revisions to the Model Audit Rule are effective in 2010. As a result, the AICPA issued A Statutory Framework for Reporting Significant Deficiencies and Material Weaknesses in Internal Control to Insurance Regulators (Statutory Framework). The Statutory Framework was developed by members of the AICPA NAIC Task Force and AICPA staff and outlines a suggested framework for auditors to follow when reporting internal control deficiencies related to financial reporting identified during the course of an annual audit of statutory financial statements in accordance with SAS No. 112. For purposes other than satisfying Section 11 of the Model Audit Rule, the auditor also has to consider any additional reporting requirements of SAS No. 112 and SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A).[8] Even when no significant deficiencies or material weaknesses are identified, several states[9] (Florida, Idaho, Illinois, Maine, New York, North Carolina, Puerto Rico, and

[7] This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply SASs. If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

[8] As mentioned previously, SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A), and is effective for audits of financial statements for periods beginning on or after December 15, 2006.

[9] For purposes of this framework, the term *states* includes other jurisdictions that are members of the NAIC.

Vermont captive insurers) have a requirement that a letter be filed stating no material weaknesses have been identified.

.113 Section 11 of the Model Audit Rule requires that, in addition to the annual audited financial statements, each insurer provide the Insurance Department with a written report prepared by the accountant describing significant deficiencies in the insurer's internal control structure noted by the accountant during the audit. While the current Model Audit Rule still specifically references SAS No. 60, auditors must follow SAS No. 112, when effective, for definitions and guidance on the reporting requirements. If significant deficiencies are noted, the written report should be filed annually by the insurer with the Insurance Department generally within 60 days following the filing of the annual audited financial statements. The insurer is required to provide a description of remedial actions taken or proposed to correct significant deficiencies if the actions are not described in the auditor's report.[10] The Statutory Framework can be accessed on the AICPA's Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Practice+Aids+and+Tools/.

Year-End Auditing Considerations

.114 For year-end 2006 reporting, the AICPA NAIC Task Force will again undertake efforts to determine whether individual states will again accept reporting of only those significant deficiencies and material weaknesses related to statutory-basis financial reporting of which the auditor becomes aware during the course of the audit that are unremediated as of the balance sheet date as being in compliance with the requirements of Section 11 of the Model Audit Rule. The AICPA NAIC Task Force will continue this effort until the revised Model Audit Rule is effective in 2010. Updated information on the confirmation process will be available from Kim Kushmerick at the AICPA (kkushmerick@aicpa.org).

Audit and Accounting Issues and Developments

Reinsurance Arrangements

.115 During the past several years, the New York Attorney General's office, the SEC, several state insurance departments, and other governmental and regulatory bodies have been investigating the use of finite risk reinsurance contracts[11] and whether companies have properly accounted for these products. Several companies have restated previously issued financial statements to change their accounting for reinsurance arrangements, and some insurance company executives have been indicted or are the subject of enforcement actions. Reinsurance accounting and reporting—in particular, the question of what constitutes an acceptable transfer of risk and whether side agreements having accounting consequences exist between ceding and assuming companies—continue to be important issues requiring careful analysis.

.116 FASB Statement No. 113 and EITF Topic No. D-34, "Accounting for Reinsurance: Questions and Answers about FASB Statement No. 113," continue to be the primary sources of guidance used to determine whether a contract transfers risk and meets the conditions for reinsurance accounting. In May 2006, the FASB

---

[10] State laws may vary, and thus it is necessary that companies and their auditors verify reporting requirements by reference to domiciliary state laws and regulations. For example, some states require the filing of the SAS No. 60 report at the same time the audited financial statements are filed.

[11] Finite or financial reinsurance contracts limit the risk (and rewards) of the underlying business transferred from the ceding company to the reinsurer, often through adjustable features within the reinsurance contract that alter the cash flows between the parties based on the level of losses ceded. Although finite reinsurance may restrict the amount of insurance risk transferred to the assuming company, the contract must still transfer significant insurance risk as defined by FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, and the reinsurer must still be exposed to a reasonable possibility of a significant loss if the contract is to qualify for reinsurance accounting. By transferring less risk to the reinsurer, the insurer receives coverage on potential claims at a lower cost than traditional reinsurance. Due to the highly complex structure of these limited risk agreements, there can be abuses where no risk is transferred (such as a disguised loan), and the auditor should be alert to such agreements.

issued an invitation to comment on "Bifurcation of Insurance and Reinsurance Contracts for Financial Reporting" (applies to policyholders, insurers, and reinsurers), with a comment deadline of August 2006. The invitation to comment asked for comments from buyers and sellers of insurance and reinsurance contracts and the users of their financial statements about the possible bifurcation of those contracts. At its December 6, 2006, meeting, the FASB decided that it would no longer pursue the issue of bifurcation of insurance and reinsurance contracts for financial reporting as part of its discussions relating to its insurance risk transfer project. The FASB decided the risk transfer project should focus on developing enhanced insurance and reinsurance disclosures that highlight any risk-limiting features included in those contracts, and to also work on developing additional language around the current FASB Statement No. 113 guidance to increase the level of risk transfer required for a contract to be accounted for as insurance. Information on the status of this project can be found on the FASB's Web site at www.fasb.org/project/insurance_risk_transfer.shtml.

.117 The AICPA Insurance Expert Panel drafted a white paper that was sent to the FASB in November 2003 identifying certain risk transfer issues with respect to the application of risk transfer tests to certain contracts and differing interpretations as to the scope of the FASB Statement No. 113, paragraph 11, exception to the requirement that contracts accounted for as reinsurance expose the reinsurer to a reasonable possibility of significant loss. The white paper outlines issues identified in practice with possible responses, but does not include recommendations. It is available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_insurance.htm. The AICPA reiterated the issues in the white paper in their comment letter in response to the FASB invitation to comment on "Bifurcation of Insurance and Reinsurance Contracts for Financial Reporting."

.118 EITF Issue No. 93-6, EITF Issue No. 93-14, and EITF Topic No. D-35 represent guidance on required accruals when future rights and obligations under a multiple-year contract change based on loss experience to date.

.119 SOP 98-7, *Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk*, should be used to determine the appropriate method of accounting for contracts that do not meet the requirements for reinsurance accounting under FASB Statement No. 113. SOP 98-7 outlines the appropriate accounting for contracts based on whether the contract transfers:

- Only significant timing risk
- Only significant underwriting risk
- Neither significant timing nor underwriting risk
- An indeterminate risk

.120 Other accounting standards continue to have implications for transactions involving reinsurance arrangements. For example, FASB Interpretation No. 46, "Consolidation of Variable Interest Entities—an interpretation of ARB No. 51," may necessitate counterparties to reinsurance arrangements placed in certain kinds of structures or entities (for example, catastrophe bond structures) to consider consolidation of these structures or entities. In addition, certain reinsurance contracts may contain embedded derivatives that require accounting in accordance with FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. Auditors may want to review FASB Statement No. 133 Implementation Issue No. B36, *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments*, which addresses embedded derivatives in modified coinsurance and coinsurance with funds-withheld arrangements and other contracts with similar provisions where, for example, a return under the contract is calculated based on a referenced pool of assets. This implementation issue, which was last updated in June 2006, can be accessed on the FASB Web site at www.fasb.org/derivatives/issuindex.shtml.

.121 As products become more advanced and complex, careful consideration is required to determine whether the contracts are being accounted for appropriately based on a complete understanding of the facts and circumstances. Alternative risk transfer products and finite risk covers usually present complex issues with respect to evaluating the contracts for risk transfer under FASB Statement No. 113. Auditors may need to assess whether companies have adequate internal controls to identify and analyze complex reinsurance agreements to determine the proper accounting.

Some Additional Auditing Considerations

.122 Auditors of companies with significant reinsurance contracts also may consider directing procedures under AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*) toward these arrangements to identify any of the following:

- Contracts back-dated to avoid retroactive reinsurance accounting on coverage of losses that had already been incurred
- Side agreements to reimburse the reinsurer for covered losses or to return profits under a contract in a different accounting period
- *Linked* contracts where losses experienced under one will be reimbursed under another in the future and which should be considered together in the risk transfer analysis
- Contracts whose terms do not make economic sense and indicate a side agreement, or *linkage*, with another contract that should be considered in the accounting evaluation
- Exclusive reinsurance arrangements with offshore assuming companies that raise consolidation questions
- Commutations where the settlements are not in accordance with contract terms and suggest a noncontractual agreement on the allocation of profits and losses

.123 Paragraph .02 of AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *Professional Standards*, vol. 1; and for audits conducted in accordance with PCAOB standards: AICPA, *PCAOB Standards and Related Rules*), states that an independent auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he is aware at the time. Are company disclosures with respect to significant reinsurance agreements in accordance with FASB Statement No. 113, and are disclosures with respect to ongoing regulatory investigations, if any, adequate?

New NAIC Reinsurance Disclosure and Filing Requirements

.124 Reinsurance issues have taken center stage at the NAIC as regulators react to former New York State Attorney General's investigations of finite reinsurance, as well as allegations that undisclosed side agreements between ceding and assuming companies contributed to some property-casualty insolvencies. During 2005, the NAIC's SAP Working Group exposed updates to SSAP No. 62 that would expand disclosure requirements related to ceded reinsurance. These disclosures, which are also included as interrogatories in the annual statement, require detailed information about specific ceded reinsurance contracts.

.125 The new disclosures were included in response to interrogatories in the 2005 annual statement filings. During 2006, the reinsurance interrogatory requirement was further amended by limiting the reinsurance contracts to be included in this interrogatory to those contracts having an underwriting effect, written premium ceded, or loss and loss expense reserves ceded greater than five percent of the prior year surplus, effective for 2007. The current limitation of three percent of surplus remains in effect for 2006 reporting. Beginning in 2006, these new reinsurance interrogatories are required to be included as accompanying supplemental schedules to the annual audited financial statements of insurance companies. As discussed briefly in this Alert, during the 2006 Winter NAIC meeting, the SAP Working Group adopted this proposed change to narrow the scope of disclosure to reinsurance contracts entered into, renewed, or amended on or after January 1, 1994. The disclosures will be included in the 2006 audited financial statements for the first time. This limitation to post-1994 contracts does not apply to the disclosures in the annual statement interrogatories. The new financial statement disclosures include:

- Whether any quota share reinsurance contracts include provisions that would limit the reinsurer's losses below the stated quota share percentage (for example, a deductible, loss ratio corridor, loss cap, aggregate limits, or similar provisions). If such contracts exist, management is required to disclose whether the limiting provisions have had an effect on ceded losses
- Whether any significant contracts contain any of six specific contractual features often associated with finite reinsurance arrangements[12]
- Whether there are any significant contracts with related parties, other than approved pooling arrangements
- Whether any contracts are accounted for as reinsurance under SAP and as deposits under GAAP, or vice versa, and if so, why

.126 For contracts meeting the first three bulleted criteria, management is further required to disclose (1) a summary of the reinsurance contract terms, (2) a brief discussion of management's principal objectives in entering into the agreement, including the economic purpose to be achieved, and (3) the aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income.

.127 In addition to the expanded disclosures, the NAIC has adopted a supplemental filing requiring the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) to separately attest to the appropriateness of the accounting procedures applied to the company's ceded reinsurance arrangements. Supplement 20-1, "Reinsurance Attestation Supplement: Attestation of Chief Executive Officer and Chief Financial Officer Regarding Reinsurance Agreements," shall be filed by March 1 and requires the CEO and CFO to make representations related to:

- The existence of any side agreements
- Whether management has documented its risk transfer analysis and such documentation is available for review
- The company's compliance with SSAP No. 62
- Whether appropriate internal controls are in place to monitor reinsurance

SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*

.128 Issued by the AICPA's Accounting Standards Executive Committee in September 2005, SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*, provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in FASB Statement No. 97.

.129 SOP 05-1 defines an internal replacement as a modification in product benefits, features, rights, or coverages that occurs by the exchange of a contract for a new contract or by amendment, endorsement, or

---

[12] The six specific contractual features are (1) contact terms greater than two years when the contract is noncancelable by the reporting entity, (2) cancellation provisions that trigger an obligation on the reporting entity to enter into a new reinsurance agreement with the reinsurer, (3) aggregate stop loss reinsurance coverage, (4) an unconditional or unilateral right by either party to commute the treaty, (5) a provision permitting reporting or payment of losses less frequently than on a quarterly basis, and (6) any features designed to delay timely reimbursement to the ceding entity.

rider to a contract, or by the election of a feature or coverage within a contract. Modifications that result from the election by the contract holder of a benefit, feature, right, or coverage that was within the original contract are not internal replacements subject to this guidance as long as all of the conditions listed in paragraph 9 of the SOP are met:

- The election is made in accordance with terms fixed or specified within narrow ranges in the original contract.
- The election of the benefit, feature, right, or coverage is not subject to any underwriting.
- The insurance enterprise cannot decline to provide coverage or adjust the pricing of the benefit, feature, right, or coverage.
- The benefit, feature, right, or coverage had been accounted for since the inception of the contract.

.130 SOP 05-1 introduces the terms *integrated* and *nonintegrated contract features* and specifies that nonintegrated features do not change the base contract and are to be accounted for in a manner similar to a separately issued contract. Integrated features are evaluated in conjunction with the base contract.

.131 Contract modifications that result in a replacement contract that is substantially unchanged from the replaced contract should be accounted for as a continuation of the replaced contract (that is, unamortized deferred acquisition costs and other balances associated with the replaced contract continue to be deferred and amortized or earned in connection with the replacement contract). A contract is substantially unchanged if all of the conditions in paragraph 15 of SOP 05-1 are met:

- The insured event, risk, or period of coverage of the contract has not changed (that is, there are no significant changes in the kind and degree of mortality risk, morbidity risk, or other insurance risk, if any).
- The nature of the investment return (for example whether determined based on formulae specified in the contract, pass through of actual performance, or at the discretion of the insurer), if any, has not changed between the insurance enterprise and the contract holder.
- No additional deposit, premium, or charge relating to the original benefit or coverage, in excess of amounts specified or allowed in the original contract, is required to effect the transaction; or if there is a reduction in the original benefit or coverage, there is a reduction in the deposit, premiums, or charges that is at least equal to the corresponding reduction in benefits or coverage.
- There is no net reduction in the contract holder's account value (or cash surrender value, if any) other than for distributions to the contract holder or designee or charges related to newly purchased benefits or coverages.
- There is no change in the participation or dividend features of the contract, if any.
- There is no change in the amortization method or revenue classification of the contract.

.132 An internal replacement that is determined to result in a replacement contract that is substantially changed from the replaced contract should be accounted for as an extinguishment of the replaced contract. Unamortized deferred acquisition costs, unearned revenue liabilities, and deferred sales inducement assets associated with contracts that have substantially changed should not be deferred in connection with the replaced contract.

.133 Unamortized deferred acquisition costs and the present value of future profits continue to be subject to premium deficiency testing in accordance with the provisions of FASB Statement No. 60.

.134 The notes to the financial statements should describe the accounting policy applied to internal replacements, including whether the company has availed itself of the alternative application guidance outlined in paragraphs 18 and 19 of SOP 05-1 and, if so, for which kinds of internal replacement transactions. SOP 05-1 is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. Retrospective application of SOP 05-1 to previously issued financial statements is not permitted. Initial application of SOP 05-1 should be as of the beginning of an entity's fiscal year. Additionally, disclosure of the effect of the change on retained earnings as of the date of adoption is required. If the financial statements of the year of adoption are presented separately or included in comparative financial statements, the notes to the financial statements should disclose the fact that SOP 05-1 has been adopted and the effective date of adoption, and the nature of any differences in accounting principles or financial statement presentation applicable to the financial statements presented that resulted from adoption of SOP 05-1.

.135 A number of questions have been raised by auditors and insurers regarding the implementation of SOP 05-1. As a result, a task force made up of members of the SOP 05-1 Task Force and the Insurance Expert Panel has been formed to review questions submitted and to determine whether interpretive guidance, in the form of TPAs, is warranted. The FASB held a public roundtable meeting on January 30, 2007, and decided not to delay the effective date of SOP 05-1. Therefore, SOP 05-1 is effective for internal replacements occurring in fiscal years beginning after December 15, 2006.

Security Valuation Developments

.136 Under GAAP, paragraph 16 of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities,* states that individual securities classified as either available-for-sale or held-to-maturity must be assessed to determine whether a decline in fair value below the amortized cost basis is other than temporary. If such a decline is judged to be other than temporary, the cost basis of the individual security is written down to fair value as the new cost basis, with the amount of the writedown included in earnings (that is, accounted for as a realized loss). The new cost basis should not be changed for subsequent recoveries in fair value.

.137 Additionally, for other-than-temporary impairment analysis conducted in periods beginning after December 15, 2005, FSP FAS 115-1 and FAS 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, nullifies the guidance in paragraphs 10 through 18 of the FASB precursor issuance EITF Issue No. 03-1, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments," carries forward EITF Issue No. 03-1 cost method and disclosure requirements; supersedes EITF Topic No. D-44, "Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value;" and refers to existing other-than-temporary impairment guidance, including Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock,* and SAB No. 59, *Accounting for Noncurrent Marketable Equity Securities*. The FSP also amends FASB Statements No. 115 and No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*, and APB Opinion No. 18.

Scope

.138 In short, FSP FAS 115-1 and FAS 124-1 provides guidance on determining (1) when an investment is considered impaired, (2) whether that impairment is other than temporary, and (3) measurement and timing of an impairment loss. The guidance is applicable to debt and equity securities that are within the scope of FASB Statements No. 115 and No. 124 and securities excluded from those Statements and not accounted for under the equity method pursuant to APB Opinion No. 18 (for example, cost-method investments). As indicated in paragraph 127(b) of FASB Statement No. 115, insurance companies are required to report equity securities at fair value, even if they do not meet the scope criteria in paragraph 3 of FASB Statement No. 115. Therefore, the FSP also applies to all equity securities held by insurance companies. Additionally, the outside form of the investment determines the accounting. For example, an investment in mutual fund shares is equity, even if the mutual fund consists mostly of debt securities. Finally, investments that require bifurcation and separate accounting for host instruments under paragraph 12 of FASB Statement No. 133 are included.

Year-End Accounting and Auditing Issues

.139 A significant amount of insurers' investment portfolios are invested in fixed-income investments. Accordingly, insurers are exposed to the potential for a decline in portfolio market value should long-term interest rates rise, leading to unrealized losses and potentially to surplus declines. With the Federal Reserve increasing the federal funds rates throughout 2005 and half of 2006 and energy price increases contributing to inflation worries, many institutional investors, including insurers, believe that long-term rates may be headed higher. All those in the insurance industry will be closely watching the movement of long-term rates in 2007.

.140 Additionally, the interest rate increase is coupled with rising credit quality concerns surrounding certain asset-backed investments. The auditor can evaluate if management has considered the separate or combined effect of these market forces on a potential impairment. The situation could create a more complex auditing environment surrounding security valuation and potential impairment for 2006.

Accounting and Auditing Guidance

.141 FASB Statement No. 115 should continue to be followed along with FSP FAS 115-1 and FAS 124-1. Note that FSP FAS 115-1 and FAS 124-1 provides impairment indicators that should be used in evaluating whether an event or change in circumstances has occurred during the reporting period that may have a significant adverse effect on the fair value of the investment. The auditor can evaluate if management has considered that the definition of *other-than-temporary* does not necessarily mean permanent. The FSP does not provide guidance on making an other-than-temporary assessment. Instead, one must apply other guidance such as in FASB Statement No. 115. Additionally, SEC SAB Topic 5M, *Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities,* states that there are numerous factors to be considered when evaluating for other-than-temporary impairment. Factors include, but are not limited to, the length of time and extent to which the market value has been below cost and the intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value. Another variable is the financial condition and near-term prospects of the issuer, which includes any specific events that may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment that could affect future earnings potential of the issuer. Other sources of guidance include paragraph 6 of APB Opinion No. 18 and EITF Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets." The FASB special report, *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities: Questions and Answers*, is also relevant.

.142 FSP FAS 115-1 and FAS 124-1 states that in periods subsequent to the recognition of an other-than-temporary impairment loss for debt securities, an investor must account for the other-than-temporarily impaired debt security as if the debt security had been purchased on the measurement date of the other-than-temporary impairment. That is, the discount or reduced premium recorded for the debt security, based on the new cost basis, would be amortized over the remaining life of the debt security in a prospective manner based on the amount and timing of future estimated cash flows.

.143 When an investor has decided to sell an impaired available-for-sale security and the investor does not expect the fair value of the security to fully recover prior to the expected time of sale, the security is deemed other-than-temporarily impaired in the period in which the decision to sell is made. However, an investor must recognize an impairment loss in the period the decision is made rather than when the actual sale occurs. This incorporates the concept from EITF Topic No. D-44. The aforementioned information does not preclude impairment evaluation of securities that are not planned on being held to recovery. Paragraph 14 of FSP FAS 115-1 and FAS 124-1 states that "an investor shall recognize an impairment loss when the impairment is deemed other than temporary even if a decision to sell has not been made." For further information, see SEC SAB Topic 5M. Finally, FSP FAS 115-1 and FAS 124-1 states that for post-impairment income recognition, income must be recognized on expected, not contractual, cash flows.

.144 Related auditing considerations include evaluation of management's current and former practices regarding FASB Statement No. 115 securities, accounting practice consistency among periods, and rationale for any practice changes in the areas surrounding FSP FAS 115-1 and FAS 124-1. The issue of tainting could occur under certain circumstances; for example, a pattern of selling securities that were intended to hold until recovery, or sales occurring soon after intent to hold decisions. Documentation continues to be paramount with regard to these issues. In December 2005, the ASB issued SAS No. 103, *Audit Documentation*, (AICPA, *Professional Standards*, vol. 1, AU sec. 339). This SAS supersedes SAS No. 96 of the same name and amends paragraphs .01 and .05 of SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530.01 and .05). SAS No. 103 is effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. Public issuers can refer to Auditing Standard No. 3, *Audit Documentation* (AICPA, *PCAOB Standards and Related Rules*). Finally, unsubstantiated changes in management practice need to be carefully questioned for appropriateness under the aforementioned GAAP literature listed in this section.

Statutory Accounting

.145 Under SAP, determining whether impairment has occurred on an investment under the NAIC Manual is similar to GAAP. Management needs to consider all available evidence in determining whether an impairment exists and if that impairment is other than temporary. For each type of investment, specific measurement criteria are set out in the SSAPs. Differences do arise between GAAP and SAP regarding the timing of an impairment loss for securities subject to EITF Issue No. 99-20. Additionally, under SAP, impairments related to interest rates or sector spreads are recorded when there is an intent to sell the related security.

.146 The NAIC Manual requires that a loss be realized for other-than-temporary impairments of the value of investments. Significant judgment is involved in determining whether a decline in fair value is temporary or reflects conditions that are more persistent. Evidence should support management's assertion that a decline in fair value is only temporary. At the Fall 2006 NAIC meeting, the Emerging Accounting Issues Working Group voted to adopt the disclosure requirements of FSP FAS 115-1 and FAS 124-1, effective for 2006. At that time, the Emerging Accounting Issues Working Group exposed an interpretation that incorporates portions of the FSP. During the Winter NAIC meeting, the Emerging Accounting Issues Working Group confirmed its tentative consensus, with modifications, as final. The finalized interpretation, Interpretation No. 06-07, "Definition of Phrase 'Other Than Temporary,'" incorporates portions of FSP FAS 115-1 and 124-1 (paragraphs 6, 7, and 11), rejects other concepts (paragraphs 1–5, 8–10, 12–15, and 19), and adopts certain aspects of the consensus reached in Interpretation No. 02-07, "Definition of Other Than Temporary."

Quantifying Misstatements

.147 On September 13, 2006, the SEC released SAB No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. Although the guidance is directed at registrants, it is also important for auditors as they consider and quantify the effects of misstatements in financial statements. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.148 Two approaches have commonly been used to quantify such errors. Under one approach, the error is quantified as the amount by which the current year income statement is misstated (the rollover approach). The other common approach quantifies the error as the cumulative amount by which the current year balance sheet is misstated (the iron curtain approach). Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but that nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.149 The staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.150 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was and continues to be immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in the SAB. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

.151 Auditors should be aware if their clients are following appropriate disclosure requirements under GAAP and SAP, respectively, for any adjustments made as a result of SAB No. 108. Additionally, auditors should note the FASB has announced a project to address the process of quantifying misstatements in current year financial statements arising from the carryover or reversal of prior period errors for the purpose of evaluating materiality. At the time of this writing, the FASB is drafting a proposed FSP to address this issue. In response to SAB No. 108, changes may be made to the recently issued Risk Assessment Standards, which are discussed in the next section. Specifically, changes may be made to SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312).

FASB Statement No. 133 Implementation Guidance

.152 The Derivatives Implementation Group helped the FASB staff answer significant questions that companies face when implementing FASB Statement No. 133.

.153 The FASB staff has issued guidance on numerous FASB Statement No. 133 implementation issues, and this guidance can be obtained from the FASB Web site at www.fasb.org. Following is a listing of the insurance-product-related topics that were addressed, together with a brief discussion of the nature of each issue and the date of FASB clearance. This list is intended to highlight to auditors of insurance companies those areas where the application of FASB Statement No. 133 may be required. In addition to the issues listed below, several other FASB Statement No. 133 implementation issues are applicable to companies operating in all industries; such issues also may be relevant to an audit of an insurance company.

Topic	*Guidance*
A16—Definition of a Derivative: Synthetic Guaranteed Investment Contracts (March 14, 2001)	Synthetic guaranteed investment contracts meet the definition of *derivatives* in accordance with paragraph 6 of FASB Statement No. 133.
B7—Embedded Derivatives: Variable Annuity Products and Policyholder Ownership of Assets (revised September 25, 2000)	Traditional variable annuity products do not contain embedded derivatives that warrant separate accounting under FASB Statement No. 133, even though the insurer, rather than the policyholder, actually owns the assets.
B8—Embedded Derivatives: Identification of the Host Contract in a Nontraditional Variable Annuity Contract (revised September 25, 2000)	Nontraditional variable annuity contracts are distinguished from traditional variable annuity contracts by the fact that investment risk associated with the assets backing the nontraditional variable annuity contracts is shared

	between the issuer and the policyholder. The host contract for a nontraditional variable annuity contract is the traditional variable annuity portion of the contract (that is, without the nontraditional embedded components).
B9—Embedded Derivatives: Clearly and Closely Related Criteria for Market Adjusted Value Prepayment Options (December 6, 2000)	The economic characteristics and risks of the embedded derivative (market-adjusted value prepayment option) in a market value annuity contract are clearly and closely related to the economic characteristics and risks of the host contract and, therefore, need not be bifurcated in accordance with paragraph 12 of FASB Statement No. 133.
B10—Embedded Derivatives: Equity-Indexed Life Insurance Contracts (revised June 16, 2006)	The existence of a death benefit provision does not exclude the entire equity-indexed life insurance contract from being subject to FASB Statement No. 133 for either the issuer or the policyholder because the policyholder can obtain an equity-linked return by exercising the surrender option before death.
B25—Embedded Derivatives: Deferred Variable Annuity Contracts with Payment Alternatives at the End of the Accumulation Period (revised December 19, 2001)	Deferred variable annuity contracts may contain minimum benefit guarantees in either the accumulation or payout phases of the contract. This issue provides derivative accounting guidance for four separate minimum guarantee scenarios.
B26—Embedded Derivatives: Dual-Trigger Property and Casualty Insurance Contracts (March 14, 2001)	A property and casualty contract that provides for the payment of benefits and claims as a result of both an identifiable insurable event and changes in a variable would not contain an embedded derivative instrument that is required to be separately accounted for under FASB Statement No. 133 provided (1) benefits and claims are paid only if an identifiable insurable event occurs (for example, theft or fire), (2) the amount of the payment is limited to the amount of the policyholder's incurred insured loss, and (3) the loss is not virtually certain to occur.
B27—Embedded Derivatives: Dual-Trigger Financial Guarantee Contracts (revised March 26, 2003)	A financial guarantee insurance contract for which payment of a claim is triggered only by the occurrence of the insured's credit losses exceeding a specified level on its loans held (though the amount of the payment is affected by the credit losses in a customized pool of loans by third parties exceeding the same specified level) is an insurance contract that is not subject to FASB Statement No. 133 requirements because it indemnifies the insured for its actual losses incurred above a specified level. A provision limiting claims in the event the insured's credit losses exceed the credit losses in a referenced pool or index of consumer loans represents a type of deductible, rather than an embedded derivative that warrants separate accounting under FASB Statement No. 133.

(continued)

B28—Embedded Derivatives: Foreign Currency Elements of Insurance Contracts (revised March 26, 2003)

Contracts that pay claims in a currency different from the one in which the loss is measured at a predetermined contract exchange rate are not deemed to have an embedded foreign currency derivative.

B29—Embedded Derivatives: Equity-Indexed Annuity Contracts with Embedded Derivatives (revised June 16, 2006)

Equity-indexed annuities that contain *point-to-point* or *ratchet design* features qualify as contracts with embedded equity derivatives that must be bifurcated and reported at fair value in accordance with paragraph 12 of FASB Statement No. 133.

B30—Embedded Derivatives: Application of Statement 97 and Statement 133 to Equity-Indexed Annuity Contracts (revised June 16, 2006)

Equity-indexed annuities contain a debt instrument with an embedded (equity option) derivative. Upon receipt of the consideration for the equity-indexed contract, the issuer is required to allocate a portion of the consideration to the derivative and the remainder to a fixed annuity host contract. Interest credited and changes in the fair value of the derivative should be recognized in earnings. The host contract should be accreted to the minimum account value at the end of the contract using the effective yield method. A minimum liability shall not be recorded if, prior to the maturity of the contract, the aggregate of the host account value and the market value of the derivative is less than the value of the contract on a FASB Statement No. 97 basis (that is, without bifurcating the derivative).

B31—Embedded Derivatives: Accounting for Purchases of Life Insurance (revised March 27, 2006)

FASB Technical Bulletin No. 85-4 prescribes the accounting for life insurance contracts commonly referred to as COLI (corporate-owned life insurance), BOLI (business-owned life insurance), and key-man insurance. This accounting treatment is applicable even though these insurance contracts include derivative-like provisions that would otherwise require separate accounting as derivatives under paragraph 12 of FASB Statement No. 133.

B36—Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments (revised June 16, 2006)

An instrument that incorporates credit risk exposures that are either unrelated or only partially related to the creditworthiness of that instrument's obligor has an embedded derivative that is not considered *clearly and closely related* to the economic characteristics and risks of the host contract. B36 affects the accounting for credit-linked notes that incorporate a third party's credit (or default) risk and modified coinsurance arrangements between reinsurers and ceding insurance companies and similar arrangements, which typically include a provision for passing a return that is linked to the performance of investments held by the ceding company to the reinsurer.

The scope of B36 encompasses any receivable or payable where the interest is determined by reference to an actual pool of assets (unless the

	pool were comprised entirely of risk-free debt securities or real estate) or determined by any index other than a *pure* interest rate index.
C1—Scope Exceptions: Exception Related to Physical Variables (February 17, 1999)	If a contract contains a payment provision that requires the issuer to pay to the holder a specified dollar amount based on a financial variable, the contract is subject to the requirements of FASB Statement No. 133 because it would not meet the exclusion in paragraph 10(e)(1) of FASB Statement No. 133.
G4—Cash Flow Hedges: Hedging Voluntary Increases and Interest Credited on an Insurance Contract Liability (revised September 25, 2000)	FASB Statement No. 133 would permit an insurance company to qualify for cash-flow hedge accounting if it is hedging the possibility that it may need to voluntarily increase the interest rate used to credit interest on certain whole life, universal life, repetitive premium variable annuity, and single premium variable annuity contract liabilities. However, to qualify for cash-flow hedge accounting, changes in the hedged interest payments attributable to the hedged risk must be sufficiently correlated with the changes in the cash flows of the hedging derivative.

Reminder—Actuarial Data Integrity

.154 The NAIC *Annual Statement Instructions: Property and Casualty* requires coordination among the auditor, the appointed actuary, and management and may potentially require additional procedures for the auditor related to claim loss and loss adjustment expense data. Section 9 of the instructions, "Scope of Examination and Report of Independent Certified Public Accountant," states:

> The insurer shall also require that the independent certified public accountant subject the data used by the appointed actuary to testing procedures. The auditor is required to determine what historical data and methods have been used by management in developing the loss reserve estimate and whether he or she will rely on the same data or other statistical data in evaluating the reasonableness of the loss reserve estimate. After identifying the relevant data, the auditor should obtain an understanding of the controls related to the completeness, accuracy, and classification of loss data and perform testing as (to) the understanding of the controls related to the completeness, accuracy, and classification of loss data, and perform (other) testing (as) the auditor deems appropriate. Through inquiry of the appointed actuary, the auditor should obtain an understanding of the data identified by the appointed actuary as significant. It is recognized that there will be instances when data identified by the appointed actuary as significant to his or her reserve projections would not otherwise have been tested as part of the audit, and separate testing would be required. Unless otherwise agreed among the appointed actuary, management and the auditor, the scope of the work performed by the auditor in testing the claims data in the course of the audit would be sufficient to determine whether the data tested is fairly stated in all material respects in relation to the statutory financial statements taken as a whole. The auditing procedures should be applied to the claim loss and defense and cost containment expense data used by the appointed actuary and would be applied to activity that occurred in the current calendar year (e.g., tests of payments on claims paid during the current calendar year).

.155 There may be circumstances in which data deemed significant by the appointed actuary are not included as part of the statutory financial statement audit. This may result in a need for additional testing outside the scope of the statutory audit to comply with the NAIC data integrity requirements. The conclusion regarding the need for the auditor to perform additional procedures should be agreed with management, after discussion with the appointed actuary. Additional procedures needed to fulfill the NAIC requirement for data integrity could be accomplished through an Agreed-Upon Procedures report, performed in accordance with AICPA professional standards. In October 2004, the American Academy of Actuaries Committee on Property & Liability Financial Reporting published a paper on this area titled *Data Testing Requirement in 2004 P/C Annual Statement Instructions: Guidance For Actuaries Signing Statements of Actuarial Opinions on Loss and Loss Expense Reserves*. The paper can be found on the American Academy of Actuaries Web site at www.actuary.org.

Reminder—Access to CPA Audit Documentation

.156 An external auditor is required by the NAIC Model Audit Rule to provide timely access to or copies of audit documentation when requested by regulators.

.157 Interpretation No. 1, "Providing Access to or Copies of Audit Documentation to a Regulator," in AU section 9339, *Audit Documentation: Auditing Interpretations of Section 339* (AICPA, *Professional Standards*, vol. 1, AU sec. 9339.01–.15; AICPA, *PCAOB Standards and Related Rules*, AU sec. 9339.01–.15, respectively), addresses the responsibilities of an auditor when a regulator requests access to audit documentation. Auditors should note that PCAOB Auditing Standard No. 3, *Audit Documentation* (AICPA, *PCAOB Standards and Related Rules*), supersedes AU section 339 (AICPA, *PCAOB Standards and Related Rules*) for audits of public companies and other issuers.

.158 The AICPA's task force on NAIC matters has worked actively with subgroups consisting of designated regulators and NAIC representatives to pursue ways to increase the examiners' reliance upon the statutory audit and use of underlying audit documentation. Suggested protocols were forwarded to the Financial Examiners Handbook Technical Group for consideration of possible revisions to the Examiners Handbook and have been incorporated into the most recent version of the Handbook. Additionally, letters were sent to chief examiners in the states apprising them of the new process.

.159 The AICPA NAIC Task Force helped to establish the four-step process to provide a protocol for financial examiners who are having difficulty pursuing a resolution of (1) questions with respect to a firm's individual engagement to perform a statutory audit, (2) difficulties in gaining access to working papers, or (3) the regulator concerns about the work performed by the CPA. If a financial examiner determines that an additional response is required, after informing appropriate management, the financial examiner would contact the following individuals in this suggested order, as needed:

1. The engagement partner
2. The designated national firm representative (included on the NAIC Web site)
3. Chair of the insurer's audit committee
4. State board of accountancy, ethics (or quality review) committee, or other regulatory bodies deemed appropriate

.160 Firms or individual practitioners performing statutory audits of regulated insurance entities that wish to designate a national firm representative and have not already done so should contact NAIC representatives at (816) 783-8006 or (816) 783-8132.

Recent Auditing and Attestation Pronouncements and Related Guidance

.161 Presented in the following table is a list of recent auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org.

.162 The PCAOB establishes auditing and attestation standards for audits of public companies. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2006/07* (product no. 022497kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) Statement on Standards for Attestation Engagements (SSAE) No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20) Issue Date: December 2005 (Not applicable to audits conducted in accordance with PCAOB standards)	These standards established two categories of professional requirements that are identified by specific terms. The words *must* or *is* required are used to indicate an unconditional requirement. The word *should* is used to indicate a presumptively mandatory requirement. The words *may, might, could,* and *should consider* represent actions that auditors have a professional obligation to consider. The provisions of SAS No. 102 and SSAE No. 13 were effective upon issuance. It is the ASB's intention to make conforming changes to AICPA literature over the next several years to remove any language that would imply a professional requirement where none exists.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue Date: December 2005 (Not applicable to audits conducted in accordance with PCAOB standards)	SAS No. 103 supersedes SAS No. 96, *Audit Documentation*, and amends SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530). This standard is effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted. This SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation. See the "SAS No. 103, Audit Documentation" section in this Alert.
SASs No. 104 through No. 111, the Risk Assessment Standards Issue Date: March 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	See the "AICPA Risk Assessment Standards" section in this Alert.

(continued)

SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue Date: May 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1, AU secs. 150, 316, 328, 333, 341, 341A, 342, and 560) Issue Date: November 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	This standard: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120); • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316. 35 and .46) to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks; • Replaces throughout the SASs *completion of field work* with the term *date of the auditor's report*; and • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report.
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit, and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication.
SSAE No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006 (Not applicable to audits conducted in accordance with PCAOB standards)	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attest engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20).

AICPA TPA section 8100.01–.02 (Nonauthoritative)	The title of section TIS 8100.01 is "Determining the Effective Date of a New Statement on Auditing Standards for Audits of a Single Financial Statement,," and the title of TIS section 8100.02 is "Determining the Effective Date of a New Statement on Auditing Standards for Audits of Interim Periods."
PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* Issue Date: February 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.
PCAOB Conforming Amendment to AT 101.04*f*, *Attest Engagements, Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting from the Adoption of the Auditing Standard No. 4* Issue Date: February 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The conforming amendment states that Auditing Standard No. 4 must be used for reporting on whether a material weakness continues to exist for any purpose other than a company's internal use.
PCAOB Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees Issue Date: April 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The rules include general rules with respect to ethics and independence, restrict certain types of tax services a registered public accounting firm may provide to its audit clients, and prohibit contingent fee arrangements for any services a registered public accounting firm provides to its audit clients in order to maintain its independence.
PCAOB Report on the Initial Implementation of Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance section 300) Issue Date: November 2005 (Applicable to audits conducted in accordance with PCAOB standards only)	This report reaffirmed and amplified previous guidance issued by the PCAOB in May 2005. The report focuses on reasons the PCAOB found audits performed were not always as efficient and effective as Auditing Standard No. 2 intended. The report also explains certain aspects of Auditing Standard No. 2 such as the terms *more than remote* and *strong indicators*.

(continued)

PCAOB Overview of Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* Issue Date: April 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	This overview provides additional information on the provisions of Auditing Standard No. 4.
PCAOB Staff Questions and Answers, *Adjustments to Prior-Period Financial Statements Audited by a Predecessor Auditor* Issue Date: June 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The guidance explains that if prior period financial statements that require adjustments were audited by a predecessor auditor, either the successor auditor or the predecessor auditor may audit the adjustments as long as the auditor is independent and registered with the PCAOB. The guidance continues to address questions regarding when the predecessor auditor audits the prior period financial statement adjustments, when the successor auditor audits the prior period financial statement adjustments, and when the successor auditor has not yet completed an audit of the current period financial statements.
PCAOB Staff Audit Practice Alert No. 1, *Matters Relating to Timing and Accounting for Options Grants* Issue Date: July 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	This issuance was prompted by recent reports and disclosures about issuer practices related to the granting of stock options, including the *backdating* of such grants. The guidance identifies existing standards that could bear on auditors' work and applies them to the issues that have been raised regarding companies' stock option granting practices. It does not establish new requirements.
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards only)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment,* which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

SAS No. 103, *Audit Documentation*

.163 In December 2005, the ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). This SAS supersedes SAS No. 96 of the same name. Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.

.164 The SAS also amends paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), as amended. The amendment requires that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the company's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Consider how this guidance affects the process followed on your engagements (including the review of audit documentation and financial statements, obtaining management's representations, and analyzing subsequent events) and how this affects the date of the audit report.

AICPA Risk Assessment Standards

.165 In March 2006, the AICPA ASB issued eight SASs that provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")*	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU sec. 230).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards	This statement amends SAS No. 95, Generally Accepted Auditing Standards (AU sec. 150).
SAS No. 106, *Audit Evidence*	This statement supersedes SAS No. 31, *Evidential Matter* (AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU sec. 312A).
SAS No. 108, *Planning and Supervision*	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AU sec. 310); and supersedes SAS No. 22, *Planning and Supervision* (AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* (AU sec. 313); and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling	This statement amends SAS No. 39, *Audit Sampling* (AU sec. 350).

Key Provisions of the New Standards

.166 The SASs emphasize the link between understanding the entity, assessing risks, and the design of further audit procedures. The SASs introduce the concept of risk assessment procedures, which are deemed necessary to provide a basis for assessing the risk of material misstatement. Risk assessment procedures, along with further audit procedures, which consist of tests of controls and substantive tests, provide the audit evidence to support the auditor's opinion of the financial statements. According to the SASs, the auditor should perform risk assessment procedures to gather information and gain an understanding of the entity and its environment, including its internal controls. These procedures include inquiries, analytical procedures, and inspection and observation. Assessed risks and the basis for those assessments should be documented; therefore, auditors may no longer default to maximum control risk for an entity's risk assessment without documenting the basis for that assessment. The SASs also require auditors to consider and document how the risk assessment at the financial statement level affects individual financial statement assertions, so that auditors may tailor the nature, timing, and extent of their audit procedures to be responsive to their risk assessment. It is anticipated that generic audit programs will not be appropriate for all audit engagements because risks vary among entities.

Effective Date and Implementation

.167 The SASs are effective for audits of financial statements for periods beginning on or after December 15, 2006; earlier application is permitted. In most cases, implementation of the SASs will result in an overall increased work effort by the audit team, particularly in the year of implementation. It is also anticipated that to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

New Companion Audit Guide

.168 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This Guide will help auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The Guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Recent Independence and Ethics Pronouncements

.169 The AICPA *Independence and Ethics Alert—2006/2007* (product no. 022477kk) contains a complete update on new independence and ethics pronouncements. This Alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this Alert to be aware of independence and ethics matters that will affect their practice.

.170 The AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) and other AICPA industry-specific Alerts contain summaries of recent pronouncements not included here. To obtain copies of other AICPA Alerts, contact AICPA Service Center Operations at (888) 777-7077 or go online at www.cpa2biz.com.

Recent Accounting Pronouncements and Related Guidance

.171 Presented in this section is a list of recent accounting pronouncements and related guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

COSO Internal Control Over Financial Reporting—Guidance for Smaller Public Companies	The guidance provides a set of 20 basic principles representing the fundamental concepts associated with and drawn directly from the five components of internal control described in the COSO Internal Control Framework.

.172 Of the pronouncements and other guidance listed in the previous table, those having particular significance to the insurance industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2006/07* and other AICPA industry-specific Alerts also contain summaries of recent pronouncements not discussed here. To obtain copies of AICPA literature, call the AICPA Service Center Operations at (888) 777-7077 or go online at www.cpa2biz.com.

FASB Statement No. 157, *Fair Value Measurements*

.173 In September 2006, the FASB issued FASB Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted.

FSP FTB 85-4-1, *Accounting for Life Settlement Contracts by Third-Party Investors*

.174 This FSP provides initial and subsequent measurement guidance and financial statement presentation and disclosure guidance for investments by third-party investors in life settlement contracts. As noted in paragraph 5 of the FSP, an investor may elect to account for its investment in life settlement contracts using either the investment method or the fair value method. This FSP also amends certain provisions of FASB Technical Bulletin No. 85-4, *Accounting for Purchases of Life Insurance*, and FASB Statement No. 133.

.175 The guidance in this FSP shall be applied to fiscal years beginning after June 15, 2006. An investor shall apply the guidance prospectively for all new life settlement contracts. At the date of adoption, an investor shall make a one-time irrevocable election to account for its currently held life settlement contracts on an instrument-by-instrument basis using either the fair value method or the investment method and recognize a cumulative-effect adjustment to beginning retained earnings.

EITF Issue No. 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements"

.176 This EITF issue addresses how an employer should account for the deferred compensation or postretirement benefit aspects of split-dollar life insurance arrangements. The EITF issue pertains to entities with endorsement split-dollar life insurance arrangements that provide the employee with a specified benefit that is not limited to the employee's active service period (that is, it extends into postretirement). The structure of a split-dollar life insurance arrangement can be complex and varied. In a typical endorsement split-dollar arrangement, the employer owns the policy and all rights of ownership, including the right to terminate the policy at any time. As a benefit of employment, the institution endorses over to the employee (the employee designates a beneficiary) a portion of the specified benefit.

.177 The EITF concluded that the specified benefit associated with the endorsement split-dollar life insurance arrangement has not been settled upon entering into such an arrangement and as a result, the employer should recognize a liability for future benefits based on the substantive agreement with the employee. Therefore, the use of an investment product to fund a deferred compensation arrangement does not prevent the need to accrue the obligation presented by the deferred compensation arrangement; note that a liability for the benefit obligation has not been settled through the purchase of an endorsement-type policy. The consensus in this EITF issue is effective for fiscal years beginning after December 15, 2007, with earlier application permitted.

EITF Issue No. 06-5, "Accounting for Purchases of Life Insurance—Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4"

.178 EITF Issue No. 06-5, "Accounting for Purchases of Life Insurance—Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4," concluded on three issues. First, when determining the amount that can be realized in an insurance contract, the policyholder should consider any additional amounts, beyond the cash surrender value, included in the contractual terms of the policy. Second, the amount that can be realized under the insurance contract should be determined based on the assumed surrender value at the individual policy or certificate level, unless all policies (or certificates) are required to be surrendered as a group. Any amounts that are recoverable by the policyholder at the discretion of the insurance company should be excluded from the amount that could be realized. Third, in measuring the cash surrender value, the task force concluded when it is appropriate to discount the cash surrender value. This EITF issue is effective for fiscal years beginning after December 15, 2006. Earlier application is permitted as of the beginning of a fiscal year for periods in which interim or annual financial statements have not yet been issued.

On the Horizon

.179 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the insurance industry or that may result in significant changes. Read the AICPA general *Audit Risk Alert—2006/07* for a more complete list of ongoing auditing and accounting projects. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.180 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
National Association of Insurance Commissioners (NAIC)	www.naic.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonpublic Companies

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*

.181 The ASB has issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed Statement, which can be obtained at www.fasb.org.

Proposed SSAE Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.182 In January 2006, the ASB issued a revised exposure draft of a proposed SSAE that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned earlier, in December 2006, the PCAOB exposed for public comment a proposed auditing standard, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* to supersede the current Auditing Standard No. 2. Because the forthcoming changes to Auditing Standard No. 2 will be relevant to the revision of AT section 501, the ASB has decided to defer to issuance of final revised AT section 501 until the PCAOB issues their amendments and the ASB has time to consider them.

Auditing Pipeline—Public Companies

.183 Guidance issued by the PCAOB is included in the section of this Alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." Readers may also refer to the "SEC and PCAOB Update" section of this Alert for a brief overview of some significant ongoing SEC and PCAOB projects. For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2006/07* (product no. 022497kk), mentioned previously.

Accounting Pipeline

.184 Presented below are accounting pronouncements currently in the exposure process. Some of the proposed pronouncements discussed in the prior year Alert have not been finalized as of the date of this writing, and thus are included below.

FASB Risk Transfer Project

.185 As mentioned in the "Reinsurance Arrangements" section of this Alert, the FASB issued an invitation to comment on "Bifurcation of Insurance and Reinsurance Contracts for Financial Reporting" in May 2006 with a comment period that ended in August 2006. The purpose of the invitation to comment was to gather input from buyers and sellers of insurance and reinsurance contracts and the users of their financial statements about the possible bifurcation of those contracts. The FASB was seeking to gather information about whether bifurcation of certain contracts and accounting for the financing element as a deposit would improve financial reporting by providing users of financial statements with better information about the economic substance of insurance arrangements.

.186 At its December 6, 2006, meeting, the FASB decided that it would no longer pursue the issue of bifurcation of insurance and reinsurance contracts for financial reporting as part of its discussions relating to its insurance risk transfer project. The FASB decided the risk transfer project should focus on developing enhanced insurance and reinsurance disclosures that highlights any risk-limiting features included in those contracts, and to also work on developing additional language around the current FASB Statement No. 113 guidance to increase the level of risk transfer required for a contract to be accounted for as insurance. Information on the status of this project can be found on the FASB's Web site at www.fasb.org/project/insurance_risk_transfer.shtml.

FASB Project on Derivative Disclosures

.187 FASB Statement No. 133 has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, allowing a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft was issued on December 8, 2006, titled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment deadline is March 2, 2007. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. The proposed disclosures will be effective for both interim and annual reporting periods ending after December 15, 2007, with early application encouraged. At initial adoption, disclosures for earlier periods presented for comparative purposes will be encouraged but not required. Disclosures for earlier periods presented for comparative purposes will be required beginning in the first year after the year of initial adoption. Auditors can monitor the progress of this project on the FASB's Web site.

FASB Business Combination Projects—Insurance Overview

.188 On June 30, 2005, the FASB, jointly with the International Accounting Standards Board (IASB), issued for comment two exposure drafts: proposed Statements of Financial Accounting Standards, *Business Combinations—a Replacement of FASB Statement No. 141*, and *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries—a replacement of ARB No. 51*. The FASB's target date for issuing the final standards is mid-2007. The FASB and IASB will review the target effective dates of the Statements near the end of deliberations.

.189 In these proposed Statements, the FASB plans to revise the existing guidance on the application of the purchase method. The following are among the main proposals:

1. Business combinations would be measured and recognized as of the acquisition date at the fair value of the acquiree. This would apply to step acquisitions and partial acquisitions (those in which less than 100 percent of the equity interests in the acquiree are acquired at the acquisition date).

2. The assets acquired and liabilities assumed would be measured and recognized at their fair values as of the acquisition date, with limited exceptions.

3. A new definition of a business would amend the definition provided in International Financial Reporting Standard (IFRS) 3, *Business Combinations*, and nullify the definitions provided in EITF Issue No. 98-3, "Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business," and FASB Interpretation No. 46.

4. In a step acquisition, the acquirer would remeasure its preacquisition noncontrolling equity investments to fair value at the acquisition date and would recognize any gain or loss in income.

5. If the acquisition date fair value of the acquirer's interest in the acquiree exceeds the fair value of the consideration transferred for that interest, the excess would first be recognized as a reduction of any goodwill until goodwill is reduced to zero then any remaining excess would be recognized in income.

6. Any measurement period adjustments to the provisional values recognized for the assets acquired and liabilities assumed would be recognized as if the accounting for the business combination had been completed at the acquisition date. Therefore, comparative information for prior periods would be adjusted.

.190 ***Short-Duration Contracts***. The business combinations exposure draft states that short-duration insurance contract claim liabilities assumed in a business combination should be measured at fair value at the date of acquisition. Paragraph A49 of the business combinations exposure draft explains that FASB Statement No. 60, as amended by paragraph D13 of the exposure draft, requires an expanded presentation that splits the fair value of acquired insurance contracts into two components:

1. A liability measured in accordance with the insurer's accounting policies for short-duration insurance contracts that it issues.

2. An intangible asset, representing the fair value of the contractual rights and obligations acquired, to the extent that the liability does not reflect that fair value. This intangible asset is excluded from the scope of FASB Statement No. 142, *Goodwill and Other Intangible Assets*, and FASB Statement No. 144. After the business combination, the acquirer is required to measure that intangible asset on a basis consistent with the measurement of the related insurance liability.

.191 The business combinations exposure draft also provides guidance for "Day 2" accounting in paragraph 36. After initial recognition, contingencies shall be accounted for as follows:

a. A contingency that would be accounted for in accordance with FASB Statement No. 5 if it were acquired or incurred in an event other than a business combination shall continue to be measured at fair value with any changes in fair value recognized in income in each reporting period.

b. All other contingencies shall be accounted for in accordance with GAAP. For example:

1. A contingency that is a financial instrument shall be accounted for in accordance with applicable financial instrument guidance.
2. A contingency that is an asset or liability arising from an insurance contract shall be accounted for in accordance with FASB Statement No. 60, as amended (including the intangible asset, if any, recognized for the difference between the amounts recognized on the acquisition date at fair value and the amounts that would be recognized in accordance with FASB Statement No. 60).

FASB Fair Value Option Project

.192 In the FASB's fair value project, it is considering whether to permit entities a one-time election to report certain financial instruments (and perhaps similar nonfinancial instruments) at fair value with the changes in fair value included in earnings. The fair value option project has been divided into two phases. This proposal, issued January 25, 2006 and titled *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115,* represents phase one of the project. The exposure draft's comment period ended April 10, 2006. Phase one addresses the fair value option for certain financial assets and financial liabilities. Phase two will consider permitting the fair value option for certain nonfinancial assets and nonfinancial liabilities and some of the financial assets and financial liabilities excluded from the scope of phase one.

.193 The proposed Statement would create a fair value option under which an entity may irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and financial liabilities on a contract-by-contract basis, with changes in fair value recognized in earnings as those changes occur. The proposed Statement has specific financial presentation requirements to display fair values and those values that are measured using other measurement techniques. The proposed Statement would amend FASB Statement No. 115 to require that securities reported at fair value in accordance with FASB Statement No. 115 satisfy the specific financial statement presentation requirements.

.194 The exposure draft noted that insurance and reinsurance contracts that are financial instruments, as discussed in FASB Statements No. 60, No. 97, and No. 113, would be included in the scope of the fair value option project. Questions have been submitted to the FASB asking which insurance and reinsurance contracts would be considered financial instruments, and recommending that the final guidance clearly state the criteria to be used in determining which insurance and reinsurance contracts should be designated as financial instruments to avoid significant inconsistency in application of this Statement. During the FASB's redeliberations which began in August 2006, the FASB tentatively decided that insurance and reinsurance contracts that meet the definition of a financial instrument will remain in the scope of phase one, and the scope of phase one will be expanded beyond insurance and reinsurance contracts that are financial instruments to also include insurance contracts that do not prohibit settlement of the insurer's obligation by payment to a third-party provider of goods or services rather than by payment to the insured or other claimant.

.195 The FASB tentatively projects a final Statement for phase one will be issued during the first quarter of 2007. FASB activity on phase two will begin after a final Statement has been issued for phase one. Visit the FASB Web site at www.fasb.org/project/index.shtml for additional information.

FASB Financial Guarantee Insurance Project

.196 The objective of this project is to provide guidance with respect to the timing of claim liability recognition, premium recognition (including accounting for installment premiums), and the related amortization of deferred policy acquisition costs, specifically for financial guarantee contracts issued by insurance companies that are not accounted for as derivative contracts under FASB Statement No. 133. A financial guarantee contract guarantees the holder of a financial obligation the full and timely payment of principal and interest when due and is typically issued in conjunction with municipal bond offerings and certain structured finance transactions. The goal is to reduce diversity in accounting by financial guarantee insurers, thereby enabling users to better understand and more readily compare the insurers' financial statements. An exposure document is expected to be issued by the FASB in the first quarter of 2007.

IASB and FASB Modified Joint Project on Accounting for Insurance Contracts

.197 The IASB and the FASB have agreed to approach a project on accounting for insurance contracts using the modified joint approach. The IASB will issue for public comment a discussion paper containing its tentative decisions on the accounting for insurance contracts. The FASB plans to seek input from its constituents on the IASB's preliminary views by issuing an invitation to comment containing the IASB discussion paper. The feedback received on that invitation to comment will be used by the FASB in deciding whether to add to its agenda a joint project with the IASB to develop a comprehensive standard on accounting for insurance contracts. The IASB expects to issue its discussion paper in the first quarter of 2007; the FASB also expects to issue its invitation to comment during the first quarter 2007.

FASB Exposure Draft, Accounting for Transfers of Financial Assets

.198 The exposure draft *Accounting for Transfers of Financial Assets* is a revision of a June 2003 exposure draft, *Qualifying Special-Purpose Entities and Isolation of Transferred Assets*, and would amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*. The proposed Statement seeks to:

1. Clearly specify the permitted activities of a qualifying special-purpose entity (QSPE).
2. Address practice issues related to which arrangements should be considered and how they should be considered in the legal isolation analysis.
3. Eliminate the prohibition on a QSPE's ability to hold passive derivative financial instruments that pertain to beneficial interests held by a transferor.
4. Revise the methodology used to initially measure at fair value interests related to transferred financial assets held by a transferor.
5. Clarify guidance related to when rollovers of beneficial interests are permitted within a QSPE.

.199 At its October 18, 2006 meeting, the FASB continued redeliberations on the exposure draft and discussed whether and how to amend the isolation guidance in FASB Statement No. 140. The FASB decided to amend the isolation criteria in paragraph 9(a) of FASB Statement No. 140 for consolidated financial statements that include a transferor by requiring that the legal analysis treat all of the involvements in the transferred financial assets by any entity that is included in the consolidated financial statements being presented as if those involvements were made by the transferor. In order for a parent entity of a transferor to meet the isolation requirement, an isolation analysis must conclude that the transferred financial assets would be beyond the reach of all of the entities (and their creditors) included in the financial statements being presented, using the assumption that all of the involvements of the entities were made by the transferor. The FASB expects to issue a final Statement, which would amend FASB Statement No. 140, in the second quarter of 2007. See the FASB Web site for complete information.

Proposed FASB Statement, The Hierarchy of Generally Accepted Accounting Principles

.200 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1). However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonpublic Companies" section of this Alert) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

.201 At the August 2006 meeting, the FASB discussed certain GAAP hierarchy issues that were raised by constituents subsequent to redeliberations on the FASB exposure draft *The Hierarchy of Generally Accepted Accounting Principles.* The FASB decided that:

- The grandfathering provisions related to EITF Issues and SOPs in SAS No. 69 should not be included in the final Statement.
- EITF D-Topics will be explicitly included in category (c) of the GAAP hierarchy. Additionally, a footnote will be added that states that SEC observer comments are accounting principles for SEC registrants.
- A near-final version of the proposed Statement, including all of the FASB's decisions made during redeliberations, will be posted to the Web site.

.202 Again, the FASB staff will coordinate with the AICPA and the PCAOB in order to ensure that each of the documents has a uniform effective date.

Derivatives TPA

.203 The Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments Task Force and AICPA staff have issued a working draft of the TPA titled "Convertible Debt, Convertible Preferred Shares, Warrants, and Other Equity-Related Financial Instruments." This TPA is nonauthoritative, is a working draft, and reflects existing authoritative literature as of December 1, 2006. It can be accessed at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/Working+Draft+of+Convertible+Debt+Convertible+Preferred+Shares+Warrants+and+Other+Equi.htm.

Proposed FASB EITFs and FSPs

.204 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.205 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/proposed_fsp.shtml for complete information.

Resource Central

.206 The following are various resources that practitioners engaged in the insurance industry may find beneficial.

Publications

.207 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- Audit and Accounting Guide *Life and Health Insurance Entities*. This Guide summarizes applicable practices and delivers "how-to" advice for handling almost every type of financial statement. It describes relevant matters, conditions, and procedures unique to the insurance industry and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- Audit and Accounting Guide *Property and Liability Insurance Companies*. This Guide summarizes applicable practices and delivers "how-to" advice for handling almost every type of financial statement. It describes relevant matters, conditions, and procedures unique to the insurance industry and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit*. This Guide will assist practitioners in applying the auditing standards related to the assessment of risk in an audit of financial statements. This Guide provides both authoritative and nonauthoritative guidance on applying the audit risk standards and addresses. The Guide also provides guidance on, among other things:

  — Key concepts underlying the auditor's risk assessment process

  — Understanding the client, its environments, and its internal control

  — Linking risk assessment and the design of further audit procedures

  — Performing further audit procedures

  — Evaluating audit findings, audit evidence, and internal control deficiencies

  In addition, the Guide offers many useful appendixes and an in-depth illustrative case study. Plus, the existing Audit Guide titled *Consideration of Internal Control in a Financial Statement Audit* has been incorporated into this new Guide.

- Audit Guide *Analytical Procedures*. You will receive guidance on the effective use of analytical procedures with an emphasis on analytical procedures as substantive tests. This 2006 Guide includes AU section 329 (AICPA, *Professional Standards*, vol. 1) concepts and definitions, a questions-and-answers section, an illustrative case study, and a new appendix that includes useful financial ratios.

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*. In this Guide, you will find an overview of derivatives and securities in addition to case studies to help you better understand how to audit derivative instruments.

- Audit Guide *Auditing Revenue in Certain Industries*. This Guide assists auditors in fulfilling their professional responsibilities with regard to auditing assertions about revenue. In this edition, you will find:

  — Discussions on responsibilities of management, boards of directors, and audit committees for reliable financial reporting

  — Summaries on key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP

  — Circumstances and transactions that may signal improper revenue recognition

  — Procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition

- General *Audit Risk Alert—2006/07* (product no. 022337kk). This Alert will help you plan and perform your audits by identifying the significant business risks that may result in the material misstatement of your client's financial statements.

- *Compilation and Review Alert—2006/07* (product no. 022307kk). This Alert updates CPAs on recent practice issues and professional standards that affect these types of engagements.

- *Independence and Ethics Alert—2006/07* (product no. 022477kk). This Alert will inform you of recent developments in the area of independence and ethics for accountants. Specifically, this Alert will help you understand your independence requirements under the AICPA Code of Professional Conduct and certain other rule-making and standard-setting bodies. A compact "plain English" digest of AICPA independence rules is also included. This alert includes information on guidance on the performance of nonattest services to attest clients, SEC independence rules, PCAOB independence and ethics activities, and GAO independence rules.

- *SEC and PCAOB Alert—2006/07* (product no. 022497kk). This Alert will prove useful for accountants working in public companies, auditors of public companies, or just the interested accountant who would like to remain current on issues affecting public companies. This Alert provides preparers and auditors with a detailed overview of recent developments at the SEC and PCAOB with respect to financial reporting and auditing matters.

- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk). This Alert summarizes the eight risk assessment standards, highlights significant new requirements found in the standards, and helps you understand the many new requirements, including the following:

  — Auditors are to gather a sufficient understanding of the client and its environment, including its internal control, to allow for the better development of a tailored audit approach.

  — Auditors are to have an adequate basis of his or her audit approach, eliminating the default to a maximum control risk assessment.

  This easy-to-read Alert gives you the right amount of information you will need to gain an understanding of the standards to begin incorporating the standards into your audit programs.

- AICPA Audit and Accounting Practice Aid *Illustrative Disclosures on Derivative Loan Commitments* (product no. 006642kk). SEC SAB No. 105, *Application of Accounting Principles to Loan Commitments*, emphasizes that registrants should disclose their accounting policy for derivative loan commitments in accordance with APB Opinion No. 22. This Practice Aid provides illustrative disclosures under SEC Regulation S-K, Item 303; SEC Regulation S-K, Item 305; APB Opinion No. 22; FASB Statement No. 133; and FASB Statement No. 107.

- *Checklists and Illustrative Financial Statements for Life and Health Insurance Entities* (product no. 008956kk). This practice aid is invaluable to anyone who prepares financial statements and reports for life and health insurance companies. These disclosure checklists have been designed to help you prepare financial statements and assist you in determining the adequacy of disclosures in the financial statements you are auditing.

- *Checklists and Illustrative Financial Statements for Property and Liability Insurance Entities* (product no. 008966kk). This practice aid is invaluable to anyone who prepares financial statements and reports for property and liability insurance companies. These disclosure checklists have been designed to help you prepare financial statements and assist you in determining the adequacy of disclosures in the financial statements you're auditing.

- *Audit and Accounting Manual* (product no. 005136kk) is developed exclusively for small- and medium-size CPA practices. This unique manual explains and demonstrates useful techniques and procedures for conducting compilation, review, and audit engagements—from planning to internal control to accountants' reports.

- *Accounting Trends & Techniques, 60th Edition* (product no. 009898kk). This is the must-have resource for any CPA who frequently creates or uses financial reports. Filled with current reporting techniques and methods used by the nation's top organizations, this 650-page AICPA bestseller will provide the guidance you need to improve your accounting preparation and procedures.

AICPA reSOURCE: Accounting and Auditing Literature

.208 AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.209 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following. Visit www.cpa2biz.com for a complete list of CPE courses.

- *AICPA's Annual Accounting and Auditing Update Workshop* (2006 Edition) (product no. 736182kk [text] or 187190 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736773kk [text] or 186754 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

Online CPE

.210 AICPA CPExpress (formerly InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 for nonmembers) for a new subscription and $119 ($319 for nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.211 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.212 The CFO Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.213 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Satisfaction Center

.214 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.215 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.216 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

* * * *

.217 This Audit Risk Alert replaces *Insurance Industry Developments—2005/06*.

.218 The Audit Risk Alert *Insurance Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to aeubanks@aicpa.org or write to:

AAM Section 8050

Bank, Credit Union, and Other Depository and Lending Institution Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS

BANK, CREDIT UNION, AND OTHER DEPOSITORY AND LENDING INSTITUTION INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of banks, credit unions, and other depository and lending institutions with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits of financial institutions and other lenders. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards***. When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The financial institutions industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty has the potential to restrain economic growth. Then at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 basis points to 5.25 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

Industry Trends and Conditions

The State of the Financial Institution Industry

.13 According to the Federal Deposit Insurance Corporation (FDIC) Quarterly Banking Profile issued for the first quarter of 2007, higher credit expense at large institutions and narrower net interest margins at smaller institutions caused a decrease in earnings of FDIC-insured institutions during the quarter. Industry net income was $36 billion for the first quarter of 2007, which is 2.5 percent less than the earnings posted in the first quarter of 2006. This is the largest year-over-year decline in quarterly earnings since 2001. Much of the decrease in income was attributable to a change in the way earnings were reported in the aftermath of large corporate restructurings. Lower operating results at a number of institutions also contributed to the earnings drop. Evidence of pressure on earnings was widespread as a majority of institutions reported lower quarterly net income.

.14 Average return on assets (ROA) for institutions for the first quarter of 2007 was 1.21 percent, compared to 1.34 percent in the first quarter of 2006. Fifty-nine percent of all institutions experienced a decline in quarterly ROA. This is the lowest first quarter ROA for the industry since 2001.

.15 Provisions for loan losses totaled $9.2 billion in the first quarter of 2007. This reflects a 54.6 percent increase compared to the first quarter of 2006. Noninterest expense also increased $3 billion during 2007 as several large banks reported higher payroll expenses. Increased interest income helped to offset these higher costs.

.16 Auditors should consider the pressures financial institutions are facing when planning and performing the audit engagement. Auditors have a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Paragraph .32 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), explains that when obtaining information about the entity and its environment, an auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud. Paragraph .33 of AU section 316 lists three conditions generally present when fraud exists: incentive or pressure to perpetrate fraud, an opportunity to carry out the fraud, and attitude or rationalization to justify the fraudulent action.

The State of the Banking Industry

.17 According to the FDIC's Quarterly Banking Profile, at the end of March 2007 there were 8,650 FDIC-insured commercial banks and savings institutions reporting financial results, which represented a net decline of 31 institutions compared to reporting institutions at the end of 2006. There were 41 new banks reporting during the first quarter while 72 institutions were absorbed by mergers. One FDIC-insured bank, with $15.3 million in assets, failed during the quarter. The FDIC's "problem list" increased during the quarter from 50 to 53 institutions.

.18 Total deposits grew by $70 billion, which was the smallest quarterly increase since the third quarter of 2003. Domestic deposits increased by $63.3 billion during the quarter. Interest bearing account deposits grew by $43.8 billion, which outweighed a decline in noninterest bearing deposits.

.19 As lending markets continue to show weak results, banking executives are searching for alternative uses for excess capital. Since the beginning of 2007, the challenge has been to find appropriate assets to maximize excess capital. The trend, thus far, is to utilize assets outside of the usual industry capital allocations. Banks are beginning to invest in investments like embedded derivates, which are riskier than loans. This is being done in an attempt to deploy excess capital. Another result of increased capital is the issuance of larger dividends to shareholders. The impact of increased dividends to shareholders is a decrease in each respective institution's retained earnings.

The State of Credit Unions

.20 In a June 21, 2007, letter to members, the Chairman of the National Credit Union Administration (NCUA) reported that the condition of the credit union industry remains sound. This statement is based on data from call reports submitted to the association by all federally insured credit unions. The letter points out that very strong share growth, increasing net worth dollar levels, and lower delinquency and charge-off loan ratios have all contributed to the sound state of the credit union industry. The letter explained that loan growth this quarter continued to come from the real estate portfolio. Credit unions that hold real estate portfolios are urged to continue to offer members sound products.

.21 Credit unions are encouraged to continue to assess their asset-liability management and liquidity management planning processes. Auditors should be aware of management's asset-liability and liquidity management processes when performing the audit. Understanding such processes will assist the auditor in the risk assessment. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors on analytical procedures used during the planning phase of the audit and those used as substantive tests.

NCUA and Financial Crimes Enforcement Network Host First Ever Joint Seminar on Bank Secrecy Act Compliance Programs

.22 The NCUA and Financial Crimes Enforcement Network (FinCEN) recently held a joint Web-based seminar titled "BSA: A Year in Review and Setting the Table for 2007." The goal of the seminar was to educate credit unions about their Bank Secrecy Act (BSA) obligations. More than 2,000 members of the credit union industry participated in the seminar.

The State of Financial Service Companies[1]

.23 Finance companies provide lending and financing services to consumers (consumer financing) and to business enterprises (commercial financing). A number of finance companies engage solely in consumer or commercial financing activities; others provide both types. Examples of financial service companies include insurance companies, businesses that provide financing to entice the purchase of goods, and consumer finance companies.

.24 Numerous state and federal statutes affect finance companies' operations. Some statutes apply only to specific types of activities. Regulations affecting finance companies generally are limited to matters such as loan amounts, repayment terms, interest rates, and collateral; they generally do not address financial accounting and reporting.

Delinquencies Increase in Latest Mortgage Bankers Association National Delinquency Survey

.25 The delinquency rate for mortgage loans on 1-to-4-unit residential properties stood at 5.12 percent of all loans outstanding in the second quarter of 2007 on a seasonally adjusted basis, up 28 basis points from the first quarter of 2007 and up 73 basis points from 1 year ago, according to the Mortgage Bankers Association (MBA) National Delinquency Survey.

.26 The delinquency rate does not include loans in the process of foreclosure. The percentage of loans in the foreclosure process was 1.40 percent of all loans outstanding at the end of the second quarter, which is an increase of 12 basis points from the first quarter of 2007 and 41 basis points from 1 year ago.

.27 The rate of loans entering the foreclosure process was 0.65 percent on a seasonally adjusted basis, 7 basis points higher than the previous quarter and up 22 basis points from 1 year ago. This quarter's foreclosure starts rate is the highest in the history of the survey, with the previous high being last quarter's rate.

[1] Practitioners may also find the AICPA's Audit Risk Alert *Insurance Industry Developments—2006/2007* helpful when auditing financial service companies. This alert will help you plan and perform your audits by identifying the significant business risks that may result in the material misstatement of your client's financial statements.

.28 Similar to last quarter, the national delinquency and foreclosure rates are being driven by what is taking place in a few large states. Additionally, the performance of prime and subprime adjustable rate mortgages (ARMs) is contributing significantly to the overall results.

.29 As reported in the June 13, 2007, issue of *American Banker*, financial service companies will continue to reach out to the nation's rapidly growing minority community. Financial service companies are focusing on smaller cities such as Albany, New York, and Toledo, Pennsylvania, as alternatives to competing for immigrant deposits in metropolitan cities like New York City or Los Angeles.

The State of Mortgage Banking

.30 *American Banker* recently reported that home resales hit a 4-year low due to continued price decline. Many in the housing industry believe the decline in resales signifies a protracted housing slump. Another issue contributing to sluggish home sales is the rising number of foreclosures of properties financed with subprime debt. Auditors should consider the current real estate climate when conducting an audit of a mortgage company. Awareness of the business environment in which the institution operates could provide valuable insight on loan policies and the organization's internal controls. For example, mortgage companies that are subsidies of insured depository institutions are subject to increased scrutiny from underwriters. Pressure from reduced home sales could entice management to override internal controls. For example, a mortgage banking manager may be enticed to circumvent the company's loan application review policies to make a loan to a high risk borrower. AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1), provide guidance for the auditor's consideration of an entity's internal control in an audit of financial statements. As home sales decline, many financial institutions may begin to aggressively cut expenses. Per AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), auditors have a responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time not to exceed one year from the date of the financial statements being audited.

.31 Auditors should also consider whether the institution is considering or in the process of restructuring its loan origination or securitization departments. The auditor may refer to Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards Nos. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, and 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, for guidance. Additional guidance for public companies is included in Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 100, *Restructuring and Impairment Charges*, which provides guidance on the accounting for and disclosure of certain expenses and liabilities commonly reported in connection with restructuring activities and business combinations and the recognition and disclosure of asset impairment charges.

.32 On June 8, 2007, the Federal Financial Institutions Examination Council (FFIEC), which consists of the Board of Governors of the Federal Reserve System, FDIC, NCUA, Office of the Comptroller of the Currency (OCC), and Office of Thrift Supervision (OTS), published final illustrations of consumer information intended to assist institutions as they implement the consumer protection portion of the interagency guidance on nontraditional mortgage product risks. The three illustrations present examples of the types of information contemplated in the guidance. Institutions have discretion in determining whether to tailor and use the illustrations provided.

Federal Reserve Panel Announcement

.33 In June 2007, the Federal Reserve Board announced the panelists for its public hearing under the Home Ownership and Equity Protection Act. They include key players in the home mortgage market, including the subprime sector lenders, brokers, secondary market participants, consumer advocacy and community development organizations, academics and researchers, and state regulators.

.34 The focus of the public hearing is to gather information on how to develop rules to stop fraud and abusive practices in the home mortgage market. The rules must be drafted to sharply and clearly avoid the unintended consequence of restricting consumers' access to responsible subprime credit. Several states are expected to participate in the hearing to draft updated rules on predatory lending.

Small Banks Begin to Enter the Mortgage Sector

.35 As reported in the June 22, 2007, edition of *American Banker*, the recent decline of the subprime mortgage sector could allow smaller banks to emerge as players in the mortgage sector. Many of the national and large regional banks are consumed with problems and damage control as a result of risky lending. In the past, this sector was dominated by conglomerate banks.

Subprime Mortgage Update

.36 On May 17, 2007, Ben S. Bernanke, Chairman of the Board of Governors of the Federal Reserve System, commented that the rise in delinquencies among subprime ARMs was due to several causes. These causes include rising interest rates, moderate economic growth, decline in the housing market, and regional economic problems.

.37 Bernanke noted that the practices of several mortgage originators to loosen underwriting standards contributed to the problems in the subprime market. As the underlying pace of mortgage originations slowed but the demand for securities with high yield rates strengthened, some lenders loosened underwriting standards. The loosened standards undoubtedly contributed to defaults occurring within a few months of origination. Bernanke explained that mortgages sold generally pass a large amount of risk to the investor, rather than being borne primarily by the company that originated the loan, which may have contributed to the loosening of underwriting standards. In addition to weakened standards, incentive structures that tied originator revenue to the number of loans finalized, instead of the quality of loans made, are also a cause for concern.

.38 Despite subprime woes, Bernanke indicated that the market had shown signs of self-correction. Although credit spreads on new subprime securities have risen, the volume of subprime mortgage backed securities issued has slowed. That does not mean that the subprime market has evaporated. Although some subprime lenders have gone out of business, other entities such as hedge funds and investment banks have started to purchase subprime mortgage backed securities. Importantly, Bernanke pointed out that the majority of troubled lenders have not been institutions with federally maintained deposits.

.39 Auditors may need special skills or knowledge to plan and perform auditing procedures for institutions that deal with subprime mortgages. This is very important when considering whether an institution has disclosed its subprime lending activities properly. AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1), states that for some derivatives and securities, generally accepted accounting principles (GAAP) may prescribe presentation and disclosure requirements. Furthermore, AU section 332 advises the auditor to consider the form, arrangement, and content of the financial statements (including the notes) when evaluating the adequacy of presentation and disclosure. Auditors may also consider using a specialist when determining how to audit an entity that deals in derivatives. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance on the use of a specialist during an engagement.

Subprime Strategies

.40 The rapid growth of subprime mortgages has led to the equally rapid growth of subprime mortgage repossessions. Subprime mortgage repossessions occur when a borrower who is unable to make payments must surrender the mortgage to the lender. There are several strategies that lenders can use to help ensure that they survive subprime meltdown. Examples of subprime strategies include retaining sufficient capital to withstand some subprime turn around; maximizing liquidity and if necessary cutting costs; maintaining a strong credit position; having written plans; and being willing to take action against any broker that puts together fraudulent loans.

.41 There is growing speculation that the problems and risks associated with subprime mortgages, for example, increased risk of past due credit card payments, may spread to other financial transactions. According to a June 25, 2007, article in the *Wall Street Journal* titled "Beyond Subprime, Risks Abound," the bond market is one industry that is already feeling the pressure from subprime mortgages. According to Emerging Portfolio Fund Research Global, investors pulled more than $1 billion out of high yield bond funds in the 2 weeks leading up to the June 2007 article. Another concern is the way ARMs will react as subprime woes continue to trickle down the mortgage industry.

.42 Auditors may consider the overall impact of an entity's portfolio of subprime mortgages when auditing the financial statements of a financial institution. The auditor may consider the institution's internal controls as well as policies that affect the management of subprime mortgages, for instance, the amount reported as the allowance for loan and lease losses.

Subprime Foreclosures

.43 Recently the OCC expressed concern over foreclosures due to subprime mortgages, pointing out that the cost of foreclosure extends not only to the borrower, but also to the local communities that may experience a decline in property value and those in the community who may want to refinance or obtain new financing. Leaving a property vacant during foreclosure can create a negative cycle of disinvestment and lead to decline in an entire community. On June 26, 2007, the OCC released an *Insights* report titled "Foreclosure Prevention: Improving Contact with Borrowers." The report is based on strategies banks are using to prevent foreclosures and mitigate credit loss. The OCC believes that early contact with borrowers is critical to minimizing the detrimental effects of foreclosure. If banks are able to keep homeowners in their homes, they prevent credit losses and maintain customer relationships. Another factor that is helping reduce the number of foreclosures is the use of third parties, such as nonprofits or other interested parties. As a result of third party involvement, many nonprofits are offering counseling services to at-risk homeowners across the nation. The OCC offers three strategies that financial institutions may use to reach borrowers who are behind in their mortgage payments. The first two strategies involve direct customer contact by a loan officer or interested third party, such as a nonprofit counseling agency. The third strategy depends on the borrower using a toll-free telephone number to call the loan servicer or a counseling agency. The full text of this *Insights* report can be accessed at www.occ.treas.gov/cdd/Foreclosure_Prevention_Insights.pdf.

.44 On Sept. 4, 2007, the federal financial institution regulators and the Conference of State Bank Supervisors issued a joint statement on loss mitigation strategies for servicers of residential mortgages. This statement encourages federally regulated institutions and state-supervised entities that service mortgage loans to pursue strategies to mitigate losses while preserving homeownership to the extent possible and appropriate. As a number of adjustable-rate mortgages reset, concerns remain that borrowers subject to these significant payment shocks and increased payments will be more likely to default on the loan.

.45 In the statement, the agencies acknowledge that many subprime and other mortgage loans are sold or transferred, commonly into securitization trusts, with the servicing for these securitized loans maintained by the originating institution. Questions have arisen in recent months on the ability of servicers to restructure loans in jeopardy of foreclosure without nullifying the prior sale for accounting purposes under FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The statement reminds institutions that this authority is governed by the terms of contract documents, typically referred to as pooling and servicing agreements.

.46 This statement urges servicers to use the authority that they have under the governing documents to take appropriate steps when an increased risk of default is identified, including the following:

- Proactively identifying borrowers at heightened risk of delinquency or default, such as those with impending interest rate resets
- Contacting borrowers to assess their ability to repay
- Assessing whether there is a reasonable basis to conclude that default is "reasonably foreseeable"
- Exploring, where appropriate, a loss mitigation strategy that avoids foreclosure or other actions that result in a loss of homeownership

.47 The releases can be found at the FDIC Web site at www.fdic.gov/news/news/financial/2007.

Final Statement on Subprime Lending

.48 On June 29, 2007, the federal financial regulatory agencies (Board of Governors of the Federal Reserve System, FDIC, NCUA, OCC, and OTS) issued the *Statement on Subprime Mortgage Lending* to address issues related to ARMs. The statement can be accessed at www.federalreserve.gov/boarddocs/press/bcreg/2007/20070629/default.htm. The agencies' primary concern is the possibility of "rate or payment shock" to the borrower that may result from the expiration of a fixed introductory rate to an adjustable variable rate for the duration of the loan. The statement is also designed to protect consumers from unfair, deceptive, and other predatory practices and to ensure that consumers are provided with clear and balanced information about the risks of subprime loans.

.49 The statement addresses the need for financial institutions to maintain strong controls to manage the risks associated with these products. Institutions should develop strong controls that monitor whether actual practices are consistent with established policies and procedures. The controls should address compliance and safe guard consumer information concerns. Examples of important controls institutions may adopt include establishing criteria for hiring and training personnel, entering and maintaining relationships with third parties, and conducting ongoing due diligence on third parties.

.50 The statement describes the prudent safety and soundness and consumer protection standards that financial institutions can employ to ensure that loans are made to customers who can afford to make the payments. These standards include a fully indexed, fully amortized qualification for borrowers and cautions on risk-layering features, including an expectation that stated income and reduced documentation should be accepted only if there are documented mitigating factors that clearly minimize the need for verification of a borrower's repayment capacity. Consumer protection standards include clear and balanced product disclosures to customers and limits on prepayment penalties that allow for a reasonable period of time, typically at least 60 days, for customers to refinance prior to the expiration of the initial fixed interest rate period without penalty. It should be noted that there is no supervisory expectation for institutions to waive contractual terms with regard to prepayment penalties on existing loans. The statement reinforces the April 17, 2007, interagency *Statement on Working with Borrowers*, which encouraged institutions to work constructively with residential borrowers who are financially unable or reasonably expected to be unable to meet contractual payment obligations on their home loans. Workout arrangements that are consistent with safe and sound lending practices are generally in the long-term best interest of both the financial institution and the borrower. Auditors should be aware of and document their understanding of an institution's policies in relation to workout arrangements and potential foreclosures. The auditor should determine if the financial institution is properly disclosing any workout agreements it may have with clients. Auditors may refer to AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *Professional Standards*, vol. 1), when considering whether an institution has adequately disclosed the risk of foreclosure as a contingency.

Legislative and Regulatory Developments

Watters v. Wachovia—Where the Supreme Court Decision May Lead U.S. Banks

.51 In an April 2007 decision, the U.S. Supreme Court asserted that the National Bank Act and certain OCC regulations "preempt" state consumer protection laws that subject a national bank's operating subsidy to certain state licensing, reporting, and supervisory requirements. This decision was made even though many in Congress and industry question whether the OCC and OTS are equipped to properly regulate the consumer protection side of business regulation. Federal regulations have, historically, carried an automatic blanket exemption from state consumer protection regulations, and this is an advantage over local banks.

.52 As a result of the decision, state regulators must take a "hands-off" approach when dealing with national bank chains. In addition to that approach, there are questions about what a state can regulate when dealing with the "business of banking." Another interesting consideration is the fact that the OCC and federal courts have not defined what constitutes the business of banking as that business relates to national banks. Readers should remain alert to any developments.

New Regulator for Fannie Mae, Freddie Mac, and the Federal Home Loan Banks

.53 On May 22, 2007, the House of Representatives voted 313 to 104 to approve legislation HR 1427 that would create a new regulator for Fannie Mae, Freddie Mac, and the Federal Home Loan Banks. Included in the bill was an amendment that forbids government-sponsored enterprises from purchasing mortgages from sellers that do not hold social security numbers. The amendment passed 217 to 205; it is yet to be voted on by the Senate. Readers should remain alert to any developments.

BSA and USA PATRIOT Act Regulations

.54 The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (USA PATRIOT Act) was passed to strengthen our nation's ability to combat terrorism and prevent and detect money laundering activities in all financial institutions. In March 2006, the USA PATRIOT Act was renewed, making permanent several sun setting provisions, extending two provisions until 2009, and incorporating a number of new right protections. Money laundering provisions of the USA PATRIOT Act described here were made permanent.

.55 Broad authority to develop anti-money laundering regulations applicable to each of the various segments of the financial services industry was delegated to the Treasury Department. Discussed in the following paragraphs are sections of the USA PATRIOT Act that directly relate to financial institution practices.

.56 Section 312 of the USA PATRIOT Act requires U.S. financial institutions to establish due diligence policies, procedures, and controls reasonably designed to detect and report money laundering through correspondent accounts of foreign banks and private banking accounts of non-U.S. citizens. On January 4, 2006, FinCEN issued a final regulation implementing Section 312 of the USA PATRIOT Act. The final rule took effect on February 3, 2006, and superseded the interim final rule issued in July 2002. On March 30, 2006, FinCEN extended the applicability date required by the January 4, 2006, final rule from April 4, 2006, to July 5, 2006, for new accounts opened by U.S. financial institutions. The effective date for existing accounts to comply with the January 4, 2006, final rule remains October 2, 2006. Highlights of the final rule include, among other matters, a requirement for U.S. financial institutions to apply due diligence to correspondent accounts maintained for certain foreign financial institutions and private banking accounts maintained for foreign individuals. The rule also establishes scope requirements.

.57 Sections 313(a) and 319(b) of the USA PATRIOT Act add sections 103.177 and 103.185 to the BSA regulations and are intended to prevent money laundering and terrorist financing through correspondent accounts maintained by U.S. financial institutions on behalf of foreign banks. Auditors should be aware of the guidelines as noted in sections 313(a) and 319(b) that do the following:

- Prohibit financial institutions from establishing, maintaining, administrating, or managing a correspondent account in the United States for, or on behalf of, a foreign shell bank.
- Require financial institutions to take reasonable steps to ensure that correspondent accounts of foreign banks are not used to indirectly provide banking services to a foreign shell bank.

- Require financial institutions to maintain records in the United States identifying the owners of each nonpublicly traded foreign bank that maintains an account in the United States and the bank's U.S. agent authorized to accept service of legal process.
- Require financial institutions to close accounts for, and cease transactions with, any foreign bank for which they are unable to obtain the required information or to assure themselves that the correspondent account is not being used to indirectly provide services to a foreign shell bank.
- Require financial institutions to maintain records for five years after an account is closed.

.58 Section 314 of the USA PATRIOT Act adds sections 103.100 and 103.110 to the BSA regulations, which establish procedures that encourage information sharing between governmental authorities and financial institutions and among financial institutions themselves. Section 314 requires a financial institution to do the following:

- Diligently search records and documents to determine whether the institution maintains or has maintained accounts or engaged in transactions with an entity or person listed in a request submitted by the FinCEN. The records search must cover all current accounts, accounts opened in the past 12 months, and financial transactions that occurred in the past 6 months.
- Notify FinCEN if an account or transaction is detected.
- Appoint a contact person.
- Maintain adequate procedures to ensure confidentiality of FinCEN requests.

.59 Section 326 of the USA PATRIOT Act requires the Secretary of the Treasury to jointly prescribe with each of the agencies, the SEC, and the Commodity Futures Trading Commission, a regulation that, at a minimum, requires financial institutions to (1) implement reasonable procedures to verify the identity of any person seeking to open an account, to the extent reasonable and practicable, (2) maintain records of the information used to verify the person's identity, and (3) determine whether the person appears on any lists of known or suspected terrorists or terrorist organizations provided to the financial institution by any government agency. This final "know your customer" regulation applies to banks, savings associations, credit unions, private banks, and trust companies.

.60 Section 326 also contains procedures for examining each domestic and foreign banking organization's customer identification program (CIP). The procedures are designed to help financial institutions fully implement the new CIP requirements and facilitate a consistent supervisory approach among the federal financial institutions regulatory agencies. On April 28, 2005, the agencies issued *Interagency Interpretive Guidance on Customer Identification Program Requirements*. This was issued to provide interpretive guidance with respect to the CIP rule.

The "Death Penalty Law"

.61 Congress is expected to vote on a new law that many in the banking industry have labeled the "Death Penalty Law." The proposed law gets its name from the nature and severity of punishment if a federally chartered financial institution is convicted of money laundering. If convicted, the financial institution will lose its charter and close. If the institution is state chartered, its insurance coverage will be terminated.

.62 Many top bank executives are lobbying the U.S. Congress in an effort to slow the passage of legislation. This is being done because executives believe the new law creates an unreasonable standard for financial institutions. For more information, access www.bankersonline.com/articles/bhv01n03/bhv01n03a10.html. AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1), provides guidance on the auditor's responsibility when a possible illegal act, for example, an unauthorized transaction, is detected.

Basel II Update

.63 On December 26, 2006, the federal bank and thrift regulatory agencies issued a notice of proposed rulemaking (NPR) seeking comment on possible modifications to the risk based capital standards for all banks, bank holding companies, and savings associations not covered under the risk based capital framework proposed in the Basel II NPR. Comments were accepted through March 26, 2007. It should be noted that Basel II is not all inclusive because it only affects the largest banking institutions.

.64 The federal bank and thrift agencies recommend the following modifications:

- Modernize the risk based capital rules to ensure that the capital framework is able to reliably measure risk in the banking system.
- Mitigate the differences that may arise as a result of differences in capital requirements between banks that adopt Basel II and those banks that continue to apply existing capital rules.
- Ensure that implementation is simple for banks that are subject to the existing risk based capital rules.

.65 This NPR allows banking organizations to early adopt the modifications or remain subject to the agencies' current risk based capital rules. For more information, visit www.fdic.gov/news/news/financial/2006/fil06111.html.

.66 The federal bank and thrift regulatory agencies have also sought comment on proposed guidance describing the agencies' expectations and concerns about the adoption of Advanced Internal Ratings Based (IRB) Approach for credit risk and the Advanced Measurement Approaches (AMA) for operation risk under the Basel II capital framework. The proposed guidance also establishes standards for supervisory review and capital assessment under Pillar 2 of the Basel II framework. Highlights of the proposal are summarized in the following list:

- The proposed guidance is required for banking organizations that implement the proposed Basel II framework.
- The proposed new guidance should provide more direction in instances where prudential issues or industry standardization is of significant importance.
- The guidance should also provide banks with a clear description of the essential components of an acceptable IRB framework.
- The guidance also highlights supervisory standards that banks can follow to implement and maintain an AMA framework for regulatory capital purposes.
- Pillar 2 has three fundamental objectives: comprehensive supervisory assessment of capital adequacy, bank compliance with regulatory capital requirements, and bank implementation of an internal capital adequacy assessment process.
- It is important to note that the proposed guidance should not be construed as the agencies' predisposition of the Basel II NPR.

Banking Agencies Reach Agreement on Basel II Implementation

.67 The Federal Reserve, OCC, OTS, and FDIC reached an agreement regarding the implementation of Basel II in the United States. The agreement resolves the remaining major issues and should lead to finalization of a rule that implements advanced approaches for computing large banks' risk based capital requirements.

.68 The agencies agree that rules implementing the advanced approach should be finalized expeditiously and should be consistent in most regards to international approaches. The agencies also agree that two transition periods will be required to fully implement the rules. Highlights of the agencies' release are included in the following list:

- The agreement retains the NPR's transitional floor periods.
- At the end of the second transition year period, the agencies intend to publish a study that evaluates the new framework to determine if there are any material deficiencies.
- The agencies have agreed to eliminate language in the NPR concerning the 10 percent limitation on aggregate reductions in risk based capital requirements.
- The agencies believe the annual review process is consistent with recommendations of the U.S. Government Accountability Office and that it provides a prudent framework for managing the implementation of Basel II in the United States.
- The agencies also agreed to proceed with the issuance of a proposed rule that would allow all noncore banks to adopt a standardized approach under Basel II. This would eliminate the adoption of Basel 1AA.

Proposed Update of Section 12 of the Code of Federal Regulations 563.81

.69 The OTS recommended a rule change to Section 12 of the Code of Federal Regulations (CFR) 563.81. The proposal serves as a final revision of Section 12 of CFR 563. The final rule updates regulations that require savings associations to obtain approval before they may include subordinated debt securities or mandatorily redeemable preferred stock in supplementary (tier 2) capital. The final rule removes several unnecessary or outdated requirements and conforms other provisions, such as maturity period requirements and purchaser restrictions. The final rule also reconciles conflicting rules, adds appropriate statutory references, and rewrites the rule in plain language. The effective date for the final rule is April 1, 2007.

FDIC Improvement Act Filers

.70 Banking regulators continue to assess the requirements for nonpublic and nonaccelerated FDIC Improvement Act (FDICIA) filers under Part 363 of the FDICIA. FDIC is currently revising Part 363. Readers are advised to monitor the progress of the revision. In anticipation of the changes to Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the AICPA's Auditing Standards Board (ASB) decided to defer the issuance of the revised AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting* (AICPA, *Professional Standards*, vol. 1), until the PCAOB issued its amendments and the ASB has time to consider them. On July 25, 2007, the PCAOB issued Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), which is effective for audits of internal control over financial reporting required by Section 404(b) of the Sarbanes-Oxley Act of 2002 for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted at any point after SEC approval. When Auditing Standard No. 5 becomes effective, it will supersede Auditing Standard No. 2. In the interim, to avoid inconsistencies between AT section 501 and SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which was issued in May 2006, the following conforming changes were made to AT section 501 to bring that standard into conformity with corresponding aspects of AU section 325:

- Deleting the term *reportable condition* and its definition
- Replacing the definition of the term *material weakness*

- Introducing the terms *control deficiency* and *significant deficiency* and their related definitions
- Replacing the guidance on evaluating control deficiencies with the relevant guidance from AU section 325
- Replacing the term *audit committee* with the term *those charged with governance*, defined in AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), to describe the party to whom the practitioner must communicate significant deficiencies and material weaknesses
- Identifying areas in which a control deficiency ordinarily is at least a significant deficiency in internal control
- Identifying indicators of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control
- Requiring the practitioner to communicate to management and those charged with governance, in writing, significant deficiencies and material weaknesses

.71 The ASB conferred with the banking regulators on the decision to temporarily "freeze" the AT section 501 project until the PCAOB completed its revisions to Auditing Standard No. 5. Now that the standard is issued, the AT section 501 task force has resumed its work and plans to issue an exposure draft in late 2007 or early 2008. In the interim, banking regulators have indicated that they will continue to apply their previous guidance to nonpublic FDICIA institutions and nonaccelerated public FDICIA institutions subject to the FDICIA internal control reporting requirements. The FDIC has not issued any official guidance to this effect, but the FDIC's Financial Institution Letter FIL-122-2004, which outlines the requirements for nonpublic and nonaccelerated public FDICIA filers, is relevant. Auditors are urged to consult the FDIC Web site (www.fdic.gov) for official communications.

Reminder of Supervisory Guidance for Financial Institutions Affected by Hurricane Katrina

.72 On February 5, 2007, the FFIEC issued *Reminder of Supervisory Guidance for Financial Institutions Affected by Hurricane Katrina* for immediate release. The intent of the guidance is to remind financial institutions in the U.S. Gulf Coast region that the guidance outlined in Hurricane Katrina Examiner Guidance remains in effect and should be referred to when making decisions regarding payment deferrals, loan refinancing, extensions, restructurings, or other payment programs. Although loan workout programs may involve protracted payment plans, ultimately the loan should be repaid.

.73 The agencies and state supervisory authorities in Alabama, Louisiana, and Mississippi continue to remind financial institutions doing business in the Gulf Coast region that working constructively with borrowers is in the best interest of both the financial institution and the customer.

The SEC's Executive Compensation and Related Person Disclosure

.74 The SEC issued Release No. 33-8732A on August 29, 2006, which adopts amendments to the disclosure requirements for executive and director compensation, related person transactions, director independence, and other corporate governance matters and security ownership of officers and directors. These amendments apply to disclosure in proxy and information statements, periodic reports, current reports, and other filings under the Securities Exchange Act of 1934 and to registration statements under the Securities Exchange Act of 1934 and the Securities Act of 1933. The SEC is also adopting a requirement that disclosure under the amended items generally be provided in plain English. This rule is effective November 7, 2006.

.75 Additionally, on August 29, 2006, the SEC requested additional comments on a proposed amendment to the disclosure requirements for executive and director compensation, which would require disclosure for three additional highly compensated employees. The full text of the release can be viewed at www.sec.gov/rules/proposed/2006/33-8735.pdf.

SEC Disclosure Questions and Answers on Executive Compensation and Related Person Disclosure Transition

.76 Additionally, the SEC has published a set of questions and answers (Q&A) representing the staff's views on questions it has received regarding issuers' transition to compliance with the amendments and new rules adopted by the SEC in the Executive Compensation and Related Person Disclosure rulemaking. The nine Q&A cover the effective date of the new rules and early compliance with the new rules. The Q&A can be found at www.sec.gov/divisions/corpfin/faqs/execcompqa.pdf.

FDIC Rule Revisions

.77 The FDIC issued a final rule repealing Part 349 of the FDIC Rules and Regulations, Reports and Public Disclosure of Indebtedness of Executive Officers and Principal Shareholders to a State Nonmember Bank and Its Correspondent Banks. Auditors should note that repeal of the rule does not eliminate restrictions on loans made to bank executive officers and shareholders. The repeal does eliminate reporting requirements and public disclosure of insider loans.

.78 The FDIC issued a final rule on Part 328 of the FDIC Rules and Regulations, *Advertisement of Membership*. Recent amendments to the Federal Depository Insurance Reform Act of 2005 required the FDIC to prescribe an official sign that all FDIC-insured depository institutions would be required to display. The amended rule accomplishes that requirement and provides for other changes to the regulation.

.79 The FDIC also issued final rules to amend Part 327 of the FDIC Rules and Regulations. The first rule creates a new system for risk based assessments and sets assessment rates as of January 1, 2007. The other rule sets the designated reserve ratio at 1.25 percent. The amendments were made to implement the Federal Depository Insurance Reform Act of 2005. The rules are designed to make the insurance assessment system's reaction to changes in an institution's risk profile more efficient. The final rule took effect January 1, 2007.

.80 On October 16, 2006, the FDIC Board of Directors approved a final rule to implement the One Time Assessment Credit as required by the Federal Depository Insurance Reform Act of 2005. Under the final rule, eligible institutions will share in an aggregated 1-time deposit insurance assessment credit of $4,707,580,238.19. The final rule outlines who is eligible for the 1-time credit as well as the guidelines when applying the credit. The final rule took effect on November 17, 2006.

Revised Interagency Policy Statement on the Allowance for Loan and Lease Losses

.81 The OCC, Board of Governors of the Federal Reserve System, FDIC, OTS, and NCUA have revised the banking agencies' 1993 policy statement on the allowance of loan and lease losses (ALLL).

.82 The agencies' revised their policy in an effort to be more consistent with GAAP and more recent supervisory guidance. The two major revisions to the agencies' 1993 policy statement are as follows:

1. The extension of applicability to credit unions

2. A frequently asked questions section designed to assist institutions in complying with GAAP and ALLL guidance

.83 The revised policy statement applies to all depository institutions (except U.S. branches and agencies of foreign banks) that are supervised by the OCC, Board of Governors of the Federal Reserve System, FDIC, OTS, and the credit unions insured and supervised by the NCUA. U.S. branches and agencies of foreign banks continue to be subject to any separate guidance issued by their respective supervisory agency.

.84 The revised policy reiterates key concepts and requirements included in GAAP and existing ALLL guidance. The principal sources of guidance include FASB Statement Nos. 5, *Accounting for Contingencies*, and 114, *Accounting by Creditors for Impairment of a Loan—an amendment of FASB Statements No. 5 and 15*. The FASB also issued an article that presents Q&A to provide specific guidance on the application of ALLL policy. For more information, please visit www.fdic.gov/news/news/financial/2006/fil06105a.pdf. The FASB is also working on a project to address disclosures related to the allowance for loan losses for financing receivables (loans and finance leases pursuant to FASB Statement No. 13, *Accounting for Leases*). For more information, visit the FASB Web site at www.fasb.org.

.85 Because ALLL represents one of the most significant estimates in a financial institution's financial statements (and regulatory reports), auditors should develop an understanding of the estimation methodology of the institution. It is important to note that the auditor's primary concern is to determine, through audit procedures, that the loan loss estimate is not materially misstated. AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors when auditing accounting estimates as described above. AU section 342 details how important it is for the independent auditor to gain an understanding of the methods used by management to make accounting estimates. The section also describes how the auditor might evaluate the reasonableness of estimates during testing.

.86 The auditor typically achieves objectives for auditing the allowances by testing management's estimates of the allowance based on available and relevant information regarding loan collectibility. The auditor is not responsible for estimating the amount of the allowance or ascertaining the collectibility of each, or any, specific loan included in an institution's loan portfolio. However, the auditor's objective of audit procedures for credit losses is to obtain sufficient appropriate audit evidence that the loan loss estimate is not materially misstated. Some questions include the following:

- Are the allowance for loan losses and the allowance for credit losses on off-balance sheet credit exposures reasonably estimated in accordance with GAAP to cover the amount of probable credit losses inherent in the loan portfolio and in off-balance sheet financial instruments, respectively, at the balance sheet date?
- Are controls over the allowance estimation process operating effectively?
- Is the allowance calculation properly documented and in accordance with current accounting and regulatory guidance?
- Are disclosures adequate?
- Is the allowance excessive, or does it imply shortfall?
- Is there directional consistency between credit quality indicators (for example, charge-offs versus delinquencies, and loan-loss provision levels versus allowance levels)?

Commercial Real Estate Update

.87 Major commercial real estate (CRE) sectors include office, hotel, industrial, multifamily, and retail. According to the FDIC, CRE debt measured $3 trillion in the first quarter of 2007, compared to $2.3 trillion in 2006. The real estate industry continues to grow, albeit at a slower rate compared to 2006. The CRE market has maintained its strength despite the consumer housing slowdown.

.88 On December 12, 2006, the FDIC, OCC, and Board of Governors of the Federal Reserve System issued joint *Guidance on Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices*. The guidance reminds institutions that strong risk management practices and appropriate levels of capital are essential elements of a sound CRE lending program, particularly when an institution has a large concentration in CRE loans. Highlights include the following:

- There is growing concern that rising CRE concentrations may expose the institutions to unanticipated earnings and capital volatility in the event of adverse changes in the general CRE market.
- Guidance issued by the institutions addresses sound risk management practices for concentrations of CRE lending.
- The guidance includes criteria for supervisors, including numerical indicators for institutions with potentially significant CRE loan concentrations that may warrant more scrutiny.
- The guidance is not intended to limit banks' CRE lending because banks serve an important role in their communities by supplying credit for business and real estate development.

CRE Examination Issues and Best Practices

.89 Recently the FDIC issued an article on CRE underwriting and loan administration practices, recurring examination issues, and best practices for managing CRE portfolios in the current business environment. It is important to note that many institutions are experiencing moderate to rapid growth in CRE lending portfolios. As a result, many of the financial institutions consider such portfolios as a viable market niche. Larger financial institutions continue to use pricing advantages over smaller community banks in other areas, such as home equity lines or customer financing. Smaller community banks use their knowledge of the local market and borrowers to compete with the larger institutions.

.90 The FDIC is very concerned about the trends in underwriting and management in CRE lending. During a recent examination, it was noted that the most worrisome findings were a lack of construction supervision, weak appraisal review programs, inadequate knowledge of lending markets, and poor loan structuring. It was also noted that most institutions failed to properly monitor their CRE portfolios properly or failed to comply with the requirements of Part 365 of FDIC Rules and Regulations, *Real Estate Lending Standards*.

.91 Although many institutions have increased their exposure to CRE lending risks, they have not implemented an adequate monitoring system. Some institutions did not know what percentages of their CRE portfolio investments were concentrated as low, moderate, or more risky. Common monitoring deficiencies include failure to do the following:

- Establish exposure limits
- Prepare reports that provide sufficient relevant information
- Prepare timely concentration reports
- Track exceptions
- Track aggregate loan amounts
- Consider commitment amounts when computing loan to value limits

.92 FDIC examiners also feel that many institutions overlook the importance of market analysis. In some cases, the examiners determined that institutions had not bothered to perform market analysis of key lending areas. It was also noted that loan to value limits were not established as a supervisory tool. There were a number of instances noted by the examiners of loans structured with weak or lenient loan terms. Conditions included the following:

- Over-reliance on collateral values instead of cash flow
- Liberal use of interest or other reserves

- Loans with balloon maturities secured by undeveloped land
- Letters of credit and unsecured loans granted for the purpose of investing in real estate developments (primarily in the Southeastern United States)

.93 Lastly, examiners noted that many institutions did not maintain proper oversight over the appraisal process. The following findings were noted during the examination:

- Missing or incomplete internal reviews of appraisals
- Inadequate appraisals or violations of FDIC Rules and Regulations concerning appraisals
- Loan funding prior to receipt and review of appraisals
- Including the proposed loan amounts on appraisal engagement letters
- Extending funds to customers based on future gross sell-out values of real estate projects

.94 Although the examiners noted several deficiencies, they also discovered several "best practices" that institutions may consider implementing to control their CRE lending portfolios. Examples of the best practices are as follows:

- The Board of Directors should approve the scope of lending activities and the way real estate loans are processed, serviced, and collected. Market conditions, concentrations, and lending activity should be monitored on a consistent basis, with timely and adequate reports made to the Board of Directors.
- Internal and external factors should be considered during the formation of loan policies. Examples of factors to consider include the organization's size, strategic plan, and the expertise of the institution's staff.
- Prudent underwriting standards should be developed. The standards should consider the capacity of the borrower and the income from the underlying property to service the debt.
- Lending policies should reflect the level of risk that is acceptable to the institution's Board of Directors. Clearly measurable limits that include maximum loan amounts, maturities by type of property, amortization schedules, pricing structure, and loan to value limits should be reflected.
- Loan administration policies and procedures should address the type and frequency of financial statements required based on the type of loan. Collateral evaluations, adequate construction inspections, and other requirements may also be useful.

.95 Historically, financial institutions have generally suffered severe losses as a result of the loss of expected cash flows due to loan defaults and inadequate collateral. For example, significant credit losses on real estate loans have occurred, due largely to downturns in regional and national real estate markets but also because of other general economic conditions and higher risk lending activities. Therefore, the auditor needs to assess the existence, valuation, and ownership of the collateral supporting the client's receivables and to determine if the internal control systems have been properly designed and are effective. The auditor can observe the CRE lending at the client and plan accordingly. Some issues auditors may want to consider include, but are not limited to, those described in the following sections.

.96 Certain real estate loan arrangements, in which the lender has virtually the same risks and potential rewards as those of the owners of the property, should be classified and accounted for as investments in real estate and not CRE loans. Certain acquisition, development, and arrangements should be accounted for as investments in either real estate (in conformity with FASB Statement Nos. 66, *Accounting for Sales of Real Estate*, and 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*) or real estate joint ventures (in conformity with the provisions of Statement of Position [SOP] 78-9, *Accounting for Investments in Real Estate Ventures* [AICPA, *Technical Practice Aids*, ACC sec. 10,240]; FASB Staff Position [FSP] SOP 78-9-1, "Interaction of AICPA Statement of Position 78-9 and EITF Issue No. 04-5;" Emerging Issues Task Force [EITF] Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights;" and FASB Statement No. 34, *Capitalization of Interest Cost*, as amended by FASB Statement No. 58, *Capitalization of Interest Cost in Financial Statements That Include Investments Accounted for by the Equity Method*). Additionally, provisions of FASB Interpretation No. (FIN) 46(R), *Consolidation of Variable Interest Entities (revised December 2003)*, should be considered for real estate held joint ventures or partnerships. FIN 46(R) clarified the application of Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to certain entities in which equity investors do not have the characteristics of a controlling interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support.

.97 The federal banking and thrift agencies and the NCUA require real estate appraisals for properties over defined limits. Many fair values will be based on valuations by independent appraisers.[2] In applying audit procedures to real estate loans, the independent accountant can evaluate the fair value of the underlying collateral (including those held for sale) and note contents of loan files that include collateral description and valuation. The auditor often relies on representations of independent experts, particularly appraisers and construction consultants, to assist in the assessment of real estate collateral. AU section 336 provides guidance in this area. Independent appraisals may be considered acceptable audit evidence. The quality of appraisals varies, however, and in some instances, the independent accountant may have reason to believe certain assumptions underlying appraisals are unrealistic. The independent accountant needs to understand and consider the approaches and assumptions used in obtaining the appraised value. The current downturn in the real estate market increases audit risk surrounding the valuation of receivables; the institution will have to absorb losses between actual and appraised values if credit quality deteriorates and borrowers default.

.98 Additionally, AU section 342 provides guidance on auditing accounting estimates (such as estimates of fair values, discussed previously, and estimates of loan losses). AU section 342 discusses how an independent accountant obtains an understanding of how management developed estimates, concentrating on the key factors and assumptions used. It also discusses how the independent accountant evaluates the reasonableness of those estimates. AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance on auditing fair value measurements and disclosures contained in financial statements.

.99 Auditors should note management's general attitude toward CRE lending policies when considering an institution's internal controls. Strong CRE lending policies and a diligent Board of Directors could assist the independent auditor when assessing control risk. Auditors should refer to AU sections 314 and 318 for guidance when considering an entity's internal controls. Auditors should also consider management's attitude toward CRE lending policies and internal controls as they relate to the management representation letter. For guidance on management representations, auditors should refer to AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1).

Market Risk Capital and the Applicability of Market Risk Capital Rules

.100 The July 18, 2007, edition of the Financial Institution Letter (FIL-64-2007) reminds financial institutions that reporting a significant amount of trading assets on the institution's balance sheet or increasing the percentage of assets reported as trading may subject that institution to the market risk capital requirements of Part 325, Appendix C of the FDIC's Rules and Regulations. This rule applies to banks with trading activity of $1 billion or more, or at least 10 percent or more of total assets. Trading activity is usually reported on an institution's quarterly call report.

---

[2] On June 22, 2006, the Federal Deposit Insurance Corporation, Federal Reserve Board, Office of the Comptroller of the Currency, Office of Thrift Supervision, and National Credit Union Administration released an interagency statement and frequently asked questions regarding revisions made to the Uniform Standards of Professional Appraisal Practice (USPAP). Under the agencies' appraisal regulations, regulated institutions must ensure that appraisals supporting federally related transactions adhere to USPAP. The interagency statement provides an overview of the USPAP revisions and the ramifications of these revisions to regulated institutions' compliance with the agencies' appraisal regulations.

.101 Financial institutions should be aware of the implications and potential impact of FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. Application of FASB Statement No. 159 could result in institutions meeting the market risk capital requirements. The market risk capital rules require institutions to have certain risk management systems in place prior to the performance of any trading activity that is above $1 billion or at least 10 percent of total assets. Institutions that are subject to market risk capital requirements are required to measure their market risk using value-at-risk models. In addition to risk management systems, institutions should contact the FDIC in preparation for compliance with the market risk capital requirements.

.102 Auditors should consider the institution's risk management systems and controls if the institution meets the market risk capital requirements as outlined in Appendix C of the FDIC's Rules and Regulations. The auditor may inquire about the institution's risk management systems when considering the entity's internal controls. The auditor should consider whether the entity's risk management systems can be circumvented by collusion or fraud. AU sections 314 and 318 may provide some guidance when considering the entity's risk management systems. Auditors may also consider using a specialist if the institution is implementing the capital risk requirements for the first time. AU section 336 may provide guidance for the auditor considering the use of a specialist.

Audit and Attestation Issues and Developments

Fraud in the Industry

Money Laundering

.103 The U.S. Departments of Treasury, Justice, and Homeland Security joined together in issuing the 2007 National Money Laundering Strategy, a report detailing efforts to dismantle money laundering rings and terrorist financing networks and bring these criminals to justice. The 2007 strategy is based on data and analysis from the 2006 Money Laundering Threat Assessment.

.104 The 2007 strategy builds on initiatives and programs pioneered in preceding National Money Laundering Strategies. The Assistant Attorney General believes that implementation of a sound strategy is the key to success in the fight against money laundering and that constant searching by criminals for new ways to launder and hide dirty money is evidence of successful regulatory and law enforcement efforts to safeguard the banking system. With an aim at continuing these robust efforts, the 2007 strategy places an emphasis on bolstering the efficiency of the anti-money laundering processes currently in place.

.105 The 2007 strategy focuses on leveling the playing field internationally, helping to ensure that U.S. financial institutions are not disadvantaged through the implementation of controls and standards to combat money laundering and terrorist financing. Indeed, money laundering is a global threat that the United States is working to address through international bodies, including the Financial Action Task Force, and through direct private sector outreach in regions around the world. More information is available at www.treas.gov/press/releases/hp386.htm.

.106 When obtaining an understanding of a financial institution's internal control system, auditors may consider controls that focus on money laundering. AU sections 314 and 318 provide guidance on an independent auditor's consideration of an entity's internal control in an audit of financial statements.

Mortgage Fraud

.107 Lower interest rates helped create the housing boom of the early 2000s. Consumers and investors took advantage of lower interest rates to purchase, upgrade, or invest in the real estate market. To keep up with demand and work with borrowers, certain financial institutions created new, nontraditional mortgage products that increased the dollar amount of mortgage individuals who were willing to finance to purchase real estate. In effect, the products turned the real estate market into a "golden egg" search as investors armed with excess capital searched for investments.

.108 The new mortgage products also opened the door for unscrupulous individuals who figured out ways to manipulate circumstances to their advantage. For example, a mortgage broker could bundle several subprime mortgages and sell them to an unsuspecting buyer. Another example of fraud in the mortgage industry is the use of false property appraisals.

.109 In the spring of 2007, the FBI had 1,036 pending mortgage fraud investigations, a substantial increase compared to prior years. Most types of mortgage fraud fall into two categories:

- Fraud for property that typically involves a borrower who will overstate income or asset values on his or her financial statement to qualify for a property loan. When the borrower fails to met the mortgage payment, he or she sells the property at a profit based on appreciation.
- Fraud for profit that involves complicated schemes and is generally harder to detect. These types of fraud usually involve several members, including some insiders.

.110 In addition to understanding the client and proper audit planning, auditors should be alert for possible indicators that could be signs of fraud. In performing the audit, auditors should consider whether the institution has done the following:

- Established a system to monitor concentration of risk by broker and project
- Performed internal audits of loan origination documentation
- Established clearly defined quality control programs
- Established dual controls over loan origination and fund disbursement
- Conducted background checks on new employees
- Provided ongoing employee training and oversight

.111 AU sections 314 and 318 require the auditor to obtain an understanding of internal control that will enable the auditor to identify the types of potential misstatements of management's assertions, consider factors that affect the risk of material misstatement, design tests of controls where applicable, and design substantive tests. As the auditor gains an understanding of an entity's internal control, he or she may determine areas where fraud could occur. See AU section 316 for guidance on fraud related issues when conducting a financial statement audit. AU section 317 may also be useful to auditors when conducting an audit of an institution's financial statements. Auditors should also consider management's attitude toward CRE lending policies and internal controls as they relate to the management representation letter. For guidance on management representations, auditors should refer to AU section 333.

Revised Bank Secrecy Act/Anti-Money Laundering Examination Manual

.112 On August 24, 2007, the FFIEC released the revised Bank Secrecy Act/Anti-Money Laundering (BSA/AML) Examination Manual (manual). The revised manual reflects the commitment of the federal and state banking agencies and the FinCEN to provide consistent guidance on risk based policies, procedures, and processes for banking organizations to comply with the BSA and safeguard operations from money laundering and terrorist financing. The 2007 edition clarifies supervisory expectations since the July 28, 2006, update.

.113 On November 9, 2006, FinCEN released an advisory to alert financial institutions of some of the potential money laundering risks associated with providing financial services to shell companies. Although many shell companies are formed for legitimate reasons, others have been used for illicit purposes. Shell companies provide an opportunity for foreign or domestic entities to move money by wire transfer or other methods, whether directly or through a correspondent banking relationship, without company owners disclosing their true identities or the nature of the transaction. Billions of dollars have been moved globally by shell companies. Banks often face the following challenges when filing suspicious activity reports involving shell companies:

- Inability to obtain information necessary to identify originator or beneficiaries of wire transfers
- Payments that do not state a specific purpose or contract number
- Multiple high volume payments or transfers between shell companies with no apparent legitimate business purpose
- An unusually large number and variety of beneficiaries that receive wire transfers from one company
- Goods or services listed on transfer reports that do not match the industry in which the entity works

.114 To safeguard against the risk of money laundering by shell companies, financial institutions should assess the risks involved with each shell company relationship and take steps to ensure that the risks are appropriately and effectively identified and managed in accordance with their BSA obligations. All financial institutions should periodically evaluate internal policies, controls, systems, and training programs designed to prevent, detect, and report possible money laundering involving shell companies. Auditors may consider documenting the controls an entity has in place concerning money laundering and other suspicious activity when documenting their understanding of internal controls. See AU sections 314 and 318 for guidance on the independent auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards (GAAS).

.115 On July 13, 2007, FinCEN issued guidance for financial institutions with account relationships that law enforcement may have an interest in ensuring remain open, notwithstanding suspicious or potential criminal activity in connection with the account. The intent of the guidance is to combat money laundering terrorist financing and other crimes. FinCEN acknowledges that the right to open or close an account remains with each financial institution, each using their standards and policies.

.116 When a law enforcement agency requests that an account remain open, it should be in writing. The requests should come from the U.S. Attorneys Office or be issued by a supervisory agent. The written request should indicate that the agency has requested the account remain open and the purpose of the request. The request should also state the duration for which the account should remain open, which should not exceed six months. Although there is no record keeping requirement under the BSA for this type of correspondence, FinCEN recommends that financial institutions maintain such requests. If the financial institution is aware that the account is under investigation, FinCEN recommends the institution contact law enforcement before making any decision regarding the status of the account. Auditors should be aware of the institution's policies, procedures, and processes that address identification of suspicious activity in accordance with the BSA/AML compliance program.

.117 On June 22, 2007, the FDIC Chairman applauded FinCEN for addressing the need to tailor administration of the BSA to the many different risk profiles of community banks. The Chairman welcomed the continued opportunity to continue working with FinCEN and other regulatory agencies to ensure that BSA guidance and procedures are efficient and effective for all banks.

.118 Financial institutions often face common problems when it comes to the BSA. Examples include a lack of written policies, failure to conduct periodic transaction reviews in a timely matter, lack of an independent and sufficiently knowledgeable reviewer, and failure to include overall integrity of the program within the review.

Third Party Risks

.119 The FDIC is increasingly concerned with the use of third party entities that act as agents between consumers and financial institutions, especially community banks. Although third party entities can provide a valuable service to consumers and financial institutions, they can also increase the risk faced by the financial institutions. Successful third party relationships start with understanding of potential risks and proper strategic management. For example, a team of risk management examiners could discover suspicious activity reports during an engagement. The information and evidence they uncover could also provide evidence of unfair or deceptive practices. That evidence could be very useful to compliance auditors.

.120 The term *third party* is broadly defined to include any entity or individual that has entered into a business relationship with an insured depository institution. Examples of third parties include banks (affiliated or not), a regulated institution, and a nonregulated institution, foreign or domestic. Third parties are usually deeply involved in the delivery of financial services to the consumer. The third party can be positioned either directly or indirectly between the financial institution and the consumer. The FDIC is concerned that the use of third parties in financial transactions increases the level of risk for financial institutions and creates potential adverse effects for consumers. The FDIC believes that third party risks transcend all examination disciplines and necessitate close communication between examination teams.

.121 As the role and scope of financial services expands, so to does the role of the third party. Listed below are some pervasive examples of services provided by third parties. Auditors should be aware and document these relationships when performing an audit:

- Perform functions on the institution's behalf.
- Provide customer access to various products and services.
- Increase the financial institution's revenue through the third party's products, such as loan review or asset and liability management.

.122 Some of the risks associated with third party involvement are based on the underlying activity itself, for example, helping consumers secure loans. Other types of risk associated with third party involvement are less noticeable. It is important to remember that a more complex financial service has the potential to increase third party risk. Third party risk is described in the following broad categories:

- Strategic risk is described as the risk that arises from ill-advised business decisions or the failure to implement consistent business strategies that could mitigate potential risk. In general, financial transactions should provide a return commensurate with the level of risk they expose the financial institution to.
- Reputation risk is the risk of negative public perception that is often caused by breaches in institution policy or standards. Negative publicity from a third party, even one not involved with the institution, can be harmful.
- Transaction risk is the risk that the institution will not be able to deliver products and services to the customer. Auditors should be aware of weak controls that could affect the institution's ability to conduct business.
- Credit risk is the risk that a third party or other creditor necessary to the third party relationship is unable to comply with the terms of the contractual agreement. Auditors may examine documents that confirm the institution monitors third party activities to ensure that credit risk is understood and is within established limits.
- Compliance risk is the risk that the institution or other third party is not in compliance with the rules, laws, regulations, and internal policies of contractual obligations. Company oversight serves as a key control for compliance risk.

- Other risks include liquidity, interest rate shifts, rapid price changes, and foreign currency rate changes. Before an institution enters into a third party relationship, it is important for the institution to consider potential risks.

.123 Each institution's audit department should provide comprehensive, independent reviews of all third party arrangements, as well as any underlying activities. Findings should be presented to the institution's Board of Directors as soon as possible to ensure that appropriate action is taken. During an audit of a financial institution that conducts transactions with third parties, auditors should evaluate the results of audit procedures carefully. The auditor may encounter specific information that may raise questions concerning possible illegal acts. AU section 317 lists the following as examples of possible illegal acts:

- Unauthorized transactions or improperly recorded transactions
- Unusual payment of fines or penalties to government or regulatory entities
- Large payments to consultants, affiliates, or employees
- Excessive sales commissions or agent fees
- Unexpected payments made to government officials
- Failure to file tax returns or pay government duties or similar fees that are common in the financial industry

.124 Furthermore, AU section 317 states that auditors who become aware of information concerning a possible illegal act should obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effects on the financial statements. The auditor should contact management one level above those involved. Based on the results of the additional testing and the responses from management one level higher than those involved, the auditor may be forced to issue a qualified or even an adverse audit opinion.

.125 AU section 326, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1), states the auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit. Auditors should be aware of the institution's third party arrangements and test them to support their audit opinion.

Accounting Issues and Developments

FASB Statement No. 157

.126 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This statement defines fair value and expands disclosures about fair value measurements. The statement applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The statement does not expand the use of fair value in any new circumstances.

.127 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB's Web site at www.fasb.org. The following items are common areas in a financial institution that may be affected by FASB Statement No. 157:

- Other real estate (required to be carried at lower of cost or fair value less costs to sell)
- Loans evaluated under FASB Statement No. 114 (observable market price or the fair value of collateral)
- Loans held for sale
- Interest rate lock commitments
- Derivatives
- Intangibles and goodwill
- Assets acquired and liabilities assumed in purchased business
- Securities
- Servicing rights (SRs)
- Branches held for sale
- FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, footnote disclosures

FASB Statement No. 159

.128 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The statement permits an entity to elect the fair value option on an instrument-by-instrument basis, and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement Nos. 107 and 157.

.129 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB's Web site at www.fasb.org.

SOP 07-01, *Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*

.130 In June 2007, the Accounting Standards Executive Committee (AcSEC) issued SOP 07-01, *Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* (AICPA, *Technical Practice Aids*, ACC sec. 10,930). The SOP provides guidance for auditors when trying to determine whether an entity is within the scope of the AICPA Audit and Accounting Guide Investment Companies. In addition, the SOP also contains disclosure requirements for parent companies and equity method investors in investment companies that retain investment company accounting in the parent company's consolidated financial statements or the financial statements of an equity method investor. The SOP is effective for fiscal years beginning on or after December 15, 2007, with earlier application encouraged.

FASB Interpretation No. 48

.131 FIN 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.132 The evaluation of a tax position in accordance with this interpretation is a two-step process. The first step is recognition. The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.133 Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one or both of the following:

1. An increase in a liability for income taxes payable or a reduction of an income tax refund receivable
2. A reduction in a deferred tax asset or an increase in a deferred tax liability

.134 An enterprise that presents a classified statement of financial position should classify a liability for unrecognized tax benefits as current to the extent that the enterprise anticipates making a payment within one year, or within the operating cycle if it is longer. An income tax liability should not be classified as a deferred tax liability unless it results from a taxable temporary difference (that is, a difference between the tax basis of an asset or a liability as calculated using this interpretation and its reported amount in the statement of financial position). This interpretation does not change the classification requirements for deferred taxes.

.135 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109 is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this interpretation.

FSP FIN 48-1, "Definition of Settlement in FASB Interpretation No. 48"

.136 On May 2, 2007, the FASB issued FSP FIN 48-1, "Definition of Settlement in FASB Interpretation No. 48." This FSP amends FIN 48 to provide guidance on how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits.

.137 Specifically, the FSP amends FIN 48 to clarify that a tax position could be effectively settled upon examination by a taxing authority. Assessing whether a tax position is effectively settled is a matter of judgment. When making a settlement determination, an enterprise should make a position-by-position assessment for all positions in a particular tax year.

.138 The guidance outlined in the FSP shall be applied upon the initial adoption of FIN 48. An enterprise that applied FIN 48 in a manner consistent with the provisions of this FSP would continue to apply the provisions in this FSP from the date of initial adoption of FIN 48. An enterprise that did not apply FIN 48 in a manner consistent with this FSP is required to retrospectively apply the provisions in this FSP to the date of the initial adoption of FIN 48.

.139 To help financial statement preparers, auditors, and tax advisers meet this new requirement, the Accounting Standards, Auditing and Attest Standards, and Tax Teams have developed a practice guide on accounting for uncertain tax positions under FIN 48. Tax positions can only be recognized if they meet a more-likely-than-not threshold of being realized if challenged by a taxing authority with full knowledge of the facts. If this level of certainty is not met, no tax benefit can be booked. Even if it is met, only the amount that has a greater than 50 percent chance of being sustained may be booked. Specific financial statement disclosures are required with respect to uncertain tax positions. The AICPA's 13-page practice guide includes highlights of FIN 48 and its implications for in-house accountants, auditors, and tax advisers. It is not authoritative but is intended to assist members in quickly understanding the requirements of FIN 48. The practice guide is available without charge to all AICPA members. For more information, please visit the AICPA Web site at www.aicpa.org.

Deferred Acquisition Costs on Internal Replacements

.140 In September 2005, AcSEC issued SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications of Exchanges of Insurance Contracts* (AICPA, *Technical Practice Aids*, ACC sec. 10,920). The SOP provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically outlined in FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. This SOP was effective for internal replacements occurring in fiscal years beginning after December 15, 2005, with earlier adoption encouraged. Retrospective application to previously issued financial statements is not permitted.

Request to Withdraw SEC SAB No. 105

.141 SAB No. 105, *Application of Accounting Principles to Loan Commitments*, was released in 2004 to address questions about the proper valuation of loan commitments that are derivatives under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by FASB Statement No. 149, *Amendment to Statement 133 on Derivative Instruments and Hedging Activities*. SAB No. 105 intends to prohibit entities from incorporating expected future cash flows related to the associated servicing on a loan underlying a derivative loan commitment, or any other internally developed intangible asset, in valuing a commitment.

.142 The MBA believes that the release of FASB Statement No. 159 broadens the scope of SAB No. 105 by permitting entities to report nonderivative loan commitments at fair value beginning in 2008 for most companies. This includes commitments to originate nonmortgage loans. There is also the belief that many people may undoubtedly conclude that SAB No. 105 correctly applies GAAP to derivative loan commitments; therefore, it must also be correct to apply the SAB to other loan commitments, regardless of the fair value guidance of FASB Statement No. 157.

.143 Because FASB Statement No. 157 requires reporting entities to incorporate the cash flows that market participants would consider in pricing loan commitments, which is contrary to the guidance in SAB No. 105, an entity's valuation models produce more accurate representations of fair values of loan commitments than would be true if the cash flows were excluded. Based on this belief, the MBA believes the SAB should be withdrawn as soon as possible to avoid the risk of widespread confusion in implementation of FASB Statement Nos. 157 and 159. On July 6, 2007, the MBA formally requested a meeting with the SEC to discuss withdraw of SAB No. 105. Auditors and banking professionals should monitor this situation.

Securitization and Sale of Nontraditional Products

.144 Higher yielding nonconforming or nontraditional products as well as subprime loans are being securitized and sold in the secondary market. Upon securitization, derivatives are being added to make the securities more attractive to investors. Auditors need to carefully evaluate those derivatives to see whether they qualify as passive derivatives permitted for a qualifying special-purpose entity (QSPE) under FASB Statement No. 140. Note that FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments*, amended FASB Statement No. 140 to eliminate the prohibition on a QSPE from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. For additional information, see the section of this alert titled "Changes to FASB Statement No. 140."

Obtaining Legal Opinions

.145 Increased numbers of securitizations means an increased need for legal opinions. Paragraph 27 of FASB Statement No. 140 states that "[t]he nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law." After the issuance of FASB Statement No. 140, the ASB issued Interpretation No. 1, "The Use of Legal Interpretations As Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140," of AU section 336. Readers may wish to refer to that auditing interpretation when evaluating the need to obtain a legal opinion.

Changes to FASB Statement No. 140

.146 Effective for fiscal years starting subsequent to September 15, 2006, with early application permitted in certain cases, FASB Statement No. 140 has been amended by two new FASB Statements, FASB Statement Nos. 155 and 156, *Accounting for Servicing of Financial Assets*. Another exposure draft, *Accounting for Transfers of Financial Assets*, will also affect FASB Statement No. 140 and is expected to be issued during the fourth quarter of 2007.

.147 FASB Statement No. 155 amends FASB Statement No. 133 to permit fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to FASB Statement No. 133 requirements. Consequently, the statement resolves issues surrounding FASB Statement No. 133's Implementation Issue No. D1, "Recognition and Measurement of Derivatives: Application of Statement 133 to Beneficial Interests in Securitized Financial Assets," and amends FASB Statement No. 140 in the process.

The Old FASB Statement No. 140	*FASB Statement No. 155 Influence*
Paragraphs 35(c)(2) and 40	Amended by paragraphs 4 and 5 of FASB Statement No. 155

Background. Derivatives Implementation Group (DIG) Implementation Issue No. D1 allowed a temporary exemption for derivative accounting for beneficial interests in QSPEs and stated, "Holders of beneficial interests in securitized financial assets that are not subject to paragraph 14 or paragraph 362 of FASB Statement No. 140 are not required to apply FASB Statement No. 133 to those beneficial interests until further guidance is issued."

FASB Statement No. 140 Prohibition. The old FASB Statement No. 140 prohibited a QSPE from holding a derivative financial instrument that pertained to a derivative beneficial interest (or a beneficial interest that included an embedded derivative).

Why? Before the prohibition, the Implementation Issue No. D1 temporary exemption discussed above allowed entities to circumvent derivative accounting by transferring derivatives or hybrids into QSPEs.

FASB No. 155 Amendments to FASB No. 133.

- Amends paragraph 14 to eliminate the temporary exemption for interests in securitized financial assets provided by Implementation Issue No. D1. (Prospective application required: Implementation Issue No. D1 guidance remains effective for instruments recognized prior to the effective date of FASB Statement No. 155.)
- Amends paragraph 14 to require interest holders to evaluate whether instruments are freestanding derivatives or a hybrid financial instrument subject to FASB Statement No. 133 bifurcation requirements.
- Amends paragraph 14 to clarify that concentrations of credit risk in the form of subordination are not embedded derivatives. This is important because if redistributed credit risk constituted an embedded derivative, many securitizations would have been affected.

Amendment to FASB Statement No. 140. Amends paragraphs 35 and 40 of FASB Statement No. 140 to eliminate the prohibition. Because the Implementation Issue No. D1 temporary exemption was eliminated, the prohibition is no longer necessary because each interest holder needs to evaluate whether instruments are freestanding derivatives or hybrid financial instruments subject to FASB Statement No. 133 bifurcation requirements. Evaluation of all potential derivative instruments categories in securitizations is now captured. Because securitizations provide many ways to redistribute to investors the cash flows of the underlying assets, the potential exists for many securitization interests to be hybrid financial instruments.

FASB Statement No. 133 contains an impracticability exception, which FASB Statement No. 155 retained. (If an entity is unable to reliably identify and measure an embedded derivative that must be bifurcated, the entire contract must be measured at fair value with changes in fair value recognized in earnings. Although this exception has been used rarely, it may now be used more frequently due to the complexity of instruments that will no longer receive the temporary exemption under Implementation Issue No. D1.)

.148 FASB Statement No. 156 also amends FASB Statement No. 140 with respect to the accounting for the servicing of financial assets. FASB Statement No. 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract. The statement also requires that all separately recognized SRs be initially measured at fair value, if practicable. For each class of separately recognized servicing assets and liabilities, the guidance permits an entity to choose either of the following subsequent measurement methods: (1) the amortization of servicing assets or liabilities in proportion to and over the period of estimated net servicing income or net servicing loss or (2) the reporting of servicing assets or liabilities at fair value at each reporting date and reporting changes in fair value in earnings in the period in which the changes occur. The guidance also requires additional disclosures for all separately recognized SRs.

.149 Concepts surrounding FASB Statement No. 156 changes to FASB Statement No. 140 are summarized below. Not all changes are included. For complete guidance, refer to the standard.

The Old FASB Statement No. 140	*FASB Statement No. 156 Influence*
Paragraph 10 states, "Upon *completion* of any transfer (including sales)"	Amended by paragraph 4(c) of FASB Statement No. 156
Continue to carry in the statement of financial position any retained interest in the transferred asset, including *servicing assets*, beneficial interests in assets transferred to a QSPE in a securitization, and retained undivided interests.	Initially recognize and measure at *fair value*, if practicable servicing assets and servicing liabilities that require recognition under the provisions of paragraph 13.
Allocate the previous carrying amount between the assets sold, if any, and the *retained interests*, if any, based on *their relative fair values* at the date of transfer.	Allocate the previous carrying amount between the assets sold, if any, and the interests that *continue to be held by the transferor*, if any, based on their relative fair values at the date of transfer. Continue to carry in the statement of financial position any interest it continues to hold in the transferred assets, including, if applicable, beneficial interests in assets transferred to a QSPE in a *securitization* and any *undivided interests.*
Paragraphs 11 and 56, "Sales" (other paragraphs are involved as well.)	Amended by paragraph 4(d) and 4(j) of FASB Statement No. 156
Describes sale treatment. Derecognize all assets sold and recognized all assets obtained and liabilities incurred. SRs are recorded at allocated carrying amounts and treated as retained interests in transferred assets; hence the term *retained interest* is used.	Adds servicing assets to the definition of proceeds. The proceeds from a sale include SRs. Therefore, the gain or loss on sale is altered by the value of the SR and depends in part on both (*a*) the previous carrying amount of the financial assets involved in the transfer, allocated between the assets sold and the retained interests that continue to be held by the transferor based on their relative fair value at the date of transfer, and (*b*) the proceeds received. The phrase *interests that continue to be held by the transferor* has replaced the term *retained interest* throughout FASB Statement No. 140. FASB Statement No. 156 requires SRs to be initially recorded at fair value and treated as sale proceeds, if applicable, not as retained interests.

The Old FASB Statement No. 140	*FASB Statement No. 156 Influence*
Paragraph 13, "Recognition and Measurement for Obligations Undertaken"	Amended by paragraph 4(e) and 4(f) of FASB Statement No. 156
For transfers/sales, recognize SRs unless the assets were transferred to a QSPE in a guaranteed mortgage securitization, and all resulting securities are retained and classified as held to maturity debt under FASB Statement No. 115. To recognize servicing rights, use the relative allocation method at the date of obligation and amortize using the amortization method only. *For purchases/assumptions*, the SRs should be initially measured at fair value, presumptively at the price paid and then subsequently value the right using amortization method only.	*For all situations*. Always initially value servicing rights at fair value, if practicable. This includes all transfers (accounted for as sales), transfers of financial assets to QSPE in a guaranteed mortgage securitization in which the transferor retains all securities and classified them as available for sale or trading; or purchases/assumptions (transactions that do not relate to financial assets of the servicer or its consolidated affiliates). Paragraph 13 is also amended to discuss the new choice of two methods for subsequent valuation, the fair value method, and the former amortization method.
Paragraph 17, Overview of Disclosures (Description not inclusive)	Amended by paragraph 4(h) of FASB Statement No. 156 Overview (Description not inclusive)
• Collateral disclosures • For SR under amortization method (only method allowed) — Disclose SR recognized and subsequently amortized (only method allowed). — Disclose fair value of recognized SRs and fair value methodology. — Disclose valuation allowance activity. — Disclose risk characteristics of the underlying financial assets used to stratify SRs for purposes of measuring impairment.	• Collateral disclosures are unchanged. • For SR under amortization method, similar disclosures to column one. (However, note that disclosures surrounding the activity for each class and respective location of income statement changes, as well as valuation techniques, are now required.) • New for SR under fair value method: — Activity for each class and where the changes are reported in the income statement. — Description of valuation techniques or other methods used to estimate fair value of each class. — Fair value for each class at beginning and end for each class measured under the amortization method. • New for both methods: — Management's basis for determining its classes of servicing assets/liabilities (relates to the choice of two subsequent valuation methods per paragraph 13A). — Amount of fees earned each period. — Disclosure surrounding inherent risks of SRs and instrument used to mitigate fair value income statement effects.

FASB Projects Updates for FASB Statement No. 140

.150 The FASB issued proposed FSP FAS 140-d, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions," on July 24, 2007. The objective of the proposed FSP is to provide implementation guidance on whether there are circumstances that would permit a transfer of a financial asset separately from repurchase financing. A repurchase financing is a repurchase agreement relating to a previously transferred asset between the same counterparties. The repurchase financing may be agreed upon at the time of the initial transfer or may occur at a later date. The comment period for this project runs through September 14, 2007. The FASB plans to address comments received and issue a final FSP during the fourth quarter of 2007. For more information on this FASB project, please visit the following Web site: www.fasb.org/project/repurchase_financing_agreements.shtml.

.151 The FASB is also working a project that addresses practice issues related to the permitted activities of a QSPE, isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve the comparability of financial statements. The FASB decided that removing the QSPE concept from FASB Statement No. 140 is an approach worthy of research. The FASB recommends that staff consider amending paragraph 9(b) on the remaining criteria in paragraph 9 be included in the research for this project. The FASB expects to issue an exposure draft containing potential amendments to FASB Statement No. 140 in the fourth quarter of 2007. For more information, please visit the following Web site: www.fasb.org/project/transfers_of_financial_assets.shtml.

Clarification of FASB Statement No. 140

.152 On June 15, 2007, members of the U.S. House of Representatives Committee on Financial Services sent a letter to the Chairman of the SEC. The representatives are concerned with current lending practices and the recent collapse of the subprime market. Specifically, the representatives are concerned with the number of foreclosures and the impact of FASB Statement No. 140 on loan modifications. One solution presented by the representatives was to make loan modifications and, where possible, forbear foreclosure.

.153 The representatives asked for SEC expertise on FASB Statement No. 140. They asked if FASB Statement No. 140 clearly addresses whether a loan held in trust can be modified when default is reasonably foreseeable or only once a delinquency or default has already occurred. The representatives believe that the lack of clarity may be leading some institutions to withhold making some loan modifications that may benefit borrowers and bondholders for fear of being in violation FASB Statement No. 140. The SEC is currently looking into this issue. For more information on this issue, readers should refer to the SEC Web site at www.sec.gov.

.154 On July 24, 2007, the SEC responded to the Committee on Financial Services. The letter outlined one approach servicers may take in response to anticipated residential mortgage loan defaults. The approach is to modify the terms of the mortgage loan when default is "reasonably foreseeable," rather than when a default or delinquency has already occurred. The letter also explains that said loan modifications undertaken when loan default is reasonably foreseeable should be consistent with the nature of modification activities that would have been permitted if a default had occurred.

The Hybrid and Servicing Ripple Effect

.155 In addition to the effects on FASB Statement No. 140 discussed in the previous section, the implementation of FASB Statements No. 155 and No. 156 will affect a number of GAAP issues, including but not limited to DIG Issues, EITF Issues, and Technical Bulletins.

FASB Statement No. 158

.156 FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity or changes in unrestricted net assets of a not-for-profit organization. This statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.157 The required date of adoption of the recognition and disclosure provisions of this statement differs for an employer that is an issuer of publicly traded equity securities (as defined) and an employer that is not. An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006. An employer without publicly traded equity securities is required to recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after June 15, 2007.

Ratification of EITF Issue Nos. 06-4 and 06-5

.158 In September 2006, the FASB ratified EITF Issue Nos. 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements" and 06-5, "Accounting for Purchases of Life Insurance—Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, *Accounting for Purchases of Life Insurance*." EITF Issue No. 06-4 requires that policyholders recognize a liability for the postretirement benefits provided through endorsement split-dollar life insurance. The liability to recognize is dependent upon whether the company is deemed to have promised a death benefit to the participant or to maintain the split-dollar arrangement for the participant's benefit. EITF Issue No. 06-5 provides guidance for calculating policy amounts that could be realized and recognized as assets on the policyholder's balance sheet. Both EITF Issue Nos. 06-4 and 06-5 will be effective for fiscal years beginning after December 15, 2007. The company does not anticipate that these issues will have a material effect on its financial statements.

EITF Issue No. 06-10

.159 The EITF reached consensus that an employer should recognize a liability for post retirement benefits related to a collateral assignment split-dollar life insurance arrangement in accordance with FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, or Option 12 if the employer has agreed to maintain a life insurance policy on the employee during retirement. Examples of evidence to be considered when determining the arrangement include written agreements, communication between the employee and employer, and past practices of the employer. Similarly, if the employer has provided the employee with a death benefit, the employer should accrue a liability for the actuarial present value of the future death benefit as of the employee's expected retirement date, in accordance with FASB Statement No. 106 or Option 12. The consensus for EITF Issue No. 06-10, "Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements," is effective for fiscal years beginning after December 15, 2007, included interim periods within those fiscal years.

Other Literature Important to Financial Institutions

.160 FASB Statement No. 156 also amends paragraphs 9 and 10 of FASB Technical Bulletin No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*; paragraph 8(h) of SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others* (AICPA, *Technical Practice Aids*, ACC sec. 10,850); the FASB Special Report titled *A Guide to Implementation of Statement 140 on Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—Questions and Answers—Fourth Edition (cumulative); Special Report on Statement 140 on Accounting for Transfers and Servicing* *of Financial Assets and Extinguishments of Liabilities Index of All Q&As Affected by Statement 156 As of March 17, 2006*; and sections of the AICPA Audit and Accounting Guide *Depository and Lending Institutions: Banks and Savings Intuitions, Credit Unions, Finance Companies, and Mortgage Companies.*

FSP FIN 39-1

.161 FSP FIN 39-1, "Amendment of FASB Interpretation No. 39," issued in April 2007, amended certain aspects of FIN 39, *Offsetting of Amounts Related to Certain Contracts*. The FSP amends paragraph 10 of FIN 39 to permit a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against fair value amounts, including amounts that approximate fair value, recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. This FSP applies to instruments that meet the definition of a derivative in FASB Statement No. 133, including those that are not included in the scope of FASB Statement No. 133 (for example, a financial guarantee or weather derivatives), and indicates that application of the guidance in the FSP is an accounting policy decision and should be consistently applied. Upon adoption of this FSP, a reporting entity is permitted to change its accounting policy to offset or not offset fair value amounts recognized for derivative instruments under master netting arrangements.

.162 The FSP is effective for fiscal years beginning after November 15, 2007, with early application permitted, and is applied as a change in accounting principle through retrospective application for all financial statements presented, unless it is impracticable to do so.

FSP FAS 140-2, Paragraphs 40(b) and 40(c)

.163 Paragraph 35 of FASB Statement No. 140 provides conditions that must be met for a trust or other legal entity to be considered a QSPE. One condition is that a QSPE may hold only passive derivative financial instruments that pertain to beneficial interests issued or sold to parties other than the transferor, its affiliates, or its agents.

.164 Constituents have questioned whether paragraphs 40(b) and 40(c) would require a QSPE to become disqualified if the amount of beneficial interests held by outside parties is reduced to less than the total notional amount of the related derivative financial instruments because of events that were not anticipated at the inception of the QSPE. Constituents have also questioned whether purchases of beneficial interests by the transferor, its affiliates, or its agents in connection with treasury, market-making, or trading activities would disqualify a qualifying QSPE.

.165 FSP FAS 140-2, "Clarification of the Application of Paragraphs 40(b) and 40(c) of FASB Statement No. 140," answers these questions by concluding that paragraph 40(b) and 40(c) requirements must be met when beneficial interests are *initially* issued by the QSPE or when a passive derivative financial instrument needs to be replaced upon the occurrence of a specified event *outside the control* of the transferor, its affiliates, or its agents. For additional specifics, see the FSP available at www.fasb.org, which was effective upon issuance on November 5, 2005.

DIG Issues

.166 FASB Statement No. 155 amends paragraphs 14, 16, 44, and 200A-D of FASB Statement No. 133. Consequently, the following DIG issues are affected: DIG Implementation Issue Nos. A1, B1, B2, B4, B5, B6, B10, B11, B15, B17, B20, B23, B24, B29, B30, B35, B36, B37, B39, C4, and D1. FASB Statement No. 156 amends footnote 9 to paragraph 21 as well as paragraph 56 of FASB Statement No. 133. The statement affects DIG Implementation Issue Nos. B12, B36, D1, F1, F8, and J7.

FASB Implementation Issue No. B-40

.167 In January 2007, the FASB posted Implementation Issue No. B40, "Embedded Derivatives: Application of Paragraph 13(b) to Securitized Interests in Prepayable Financial Assets," which clarifies the circumstances in which a securitized interest in prepayable financial assets would not be subject to the conditions in paragraph 13(b) of FASB Statement No. 133. They responded that a securitized interest in prepayable financial assets would not be subject to the conditions in paragraph 13(b) of FASB Statement No. 133 if it meets both of the following criteria:

- The right to accelerate the settlement of the securitized interest cannot be controlled by the investor.
- The securitized interest itself does not contain an embedded derivative (including an interest-rate-related derivative) for which bifurcation would be required other than an embedded derivative that results solely from the embedded call options in the underlying financial assets.

.168 The objective of this guidance is to provide a narrow scope exception from paragraph 13(b) of FASB Statement No. 133 for securitized interests that contain only an embedded derivative that is tied to the prepayment risk of the underlying prepayable financial assets and that meet the criteria listed in the previous paragraph. For more information, please visit the following Web site: www.fasb.org/derivatives/issueb40.

EITF Issues

.169 FASB Statement No. 155 affects EITF Issue Nos. 85-9, 85-29, 86-15, 86-28, 90-19 , 96-12, 97-15 98-5, 99-20, 00-19, 03-7, instrument C of Issue No. 90-19, and 88-11. FASB Statement No. 156 affects EITF Issues No. 85-13, 87-34, 88-11 (nullified), 88-22, 89-2, 90-18, 90-21, 90-2, 02-9, 02-12, and Topic D-69.

Hybrid Financial Instruments

.170 FASB Statement No. 133 requires transactions to be evaluated for embedded derivatives. If the derivative is present, it has to be bifurcated if the following three criteria are met: (1) the economics of the derivative are not clearly and closely related to the economics of the host instrument, (2) the instrument is not measured at fair value through earnings, and (3) the terms of the derivative meet the definition of a derivative under FASB Statement No. 133. The host is accounted for based on applicable literature (for example, cost amortization) while the derivative is accounted for at fair value through earnings unless it is designated as a FASB Statement No. 133 hedge.

.171 If an embedded derivative is present but not closely and clearly related to its host instrument, the entity must apply FASB Statement No. 155. The statement allows the entity a choice in accounting for embedded derivates requiring bifurcation. An entity can elect to either bifurcate the embedded derivative or carry the entire instrument at fair value with changes that pass through the income statement. Thus far, holders of embedded derivatives have been disappointed in the choices.

.172 FASB Statement No. 155 is effective for all financial instruments acquired or issued after the beginning of the fiscal year that begins after September 15, 2006. Auditors should be aware that FASB Statement No. 155 applies to securities purchased after adoption or securities that have a remeasurement event, for example, a business combination. Only securities purchased after adoption are evaluated to determine if there is an embedded derivative and whether or not that derivative should be bifurcated from its host.

FASB Statement No. 156

.173 FASB Statement No. 156 amends FASB Statement No. 140 with respect to the accounting for separately recognized servicing assets and servicing liabilities. The statement requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract under certain circumstances.

.174 FASB Statement No. 156 requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. It permits an entity to choose either of the amortization or fair value methods for each class of separately recognized servicing assets and servicing liabilities.

.175 At its initial adoption, it permits a one-time reclassification of available-for-sale securities to trading securities by entities with recognized SRs, without calling into question the treatment of other available-for-sale securities under FASB Statement No. 115, provided that the available-for-sale securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or servicing liabilities that a servicer elects to subsequently measure at fair value.

.176 The statement also requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities.

.177 An entity should adopt this statement as of the beginning of its first fiscal year that begins after September 15, 2006. For more information, please visit the FASB Web site at www.fasb.org.

Recent Auditing and Attestation Pronouncements and Related Guidance

.178 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.179 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.

SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325A). It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.

(continued)

Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee pre-approval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.

(continued)

PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 300—Report on the Initial Implementation of Auditing Standard No. 2") Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers , *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction • Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)

PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.180 In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.181 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.182 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.183 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.184 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.185 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.186 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses, and communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.187 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.188 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.189 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.190 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.191 Another issue that may cause concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[3] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

[3] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

.192 The new requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.193 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.194 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).

SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.195 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks to the client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.196 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.197 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.198 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because, since management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.199 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) discusses whether the provisions of SAS No. 103 related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.200 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.201 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.202 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information which it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.203 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scaleable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.204 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.205 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.206 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB Emerging Issues Task Force (EITF) Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.
FASB Staff Positions (FSPs) (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA Statement of Position (SOP) 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.

(continued)

TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.207 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the financial institutions industry are discussed throughout this alert. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

On the Horizon

.208 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the financial institutions industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.209 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.210 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives.
- Structural and drafting improvements to make the standards easier to read and understand.
- Inclusion, in the explanatory material of the standards, special considerations related to audits of public entities and small entities.
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards.

.211 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.212 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.213 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.214 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled Amendment to Statement on Auditing Standards No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.215 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.216 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.217 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.218 In June 2005, the FASB and IASB (the Boards) issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The Boards expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*

- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.219 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.220 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.221 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007 and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.222 The FASB is working on a project to amend FASB Statement No. 140 to address issues related to the permitted activities of a QSPE, isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.223 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.224 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information, but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.225 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA AU section 411. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in AU section 411, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.226 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.227 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.228 The following are various resources that practitioners engaged in the depository and lending institutions industry may find beneficial.

Publications

.229 Practitioners may find the following publications useful with respect to the depository and lending industry:

- Audit and Accounting Guide *Depository and Lending Institutions: Banks and Savings Institutions, Credit Unions, Finance Companies, and Mortgage Companies* (2007) (product no. 012737kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)

- Audit Guide *Auditing Derivative Instruments Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Compilation and Review—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist and Illustrative Financial Statements for Depository and Lending Institutions* (product no. 008916kk)
- Audit and Accounting Practice Aid *Illustrative Disclosures on Derivative Loan Commitments* (product no. 006642kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.230 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.231 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

Among the many courses, *Audits of Banks and Other Financial Institutions* (self study) (product no. 733440) specifically relates to the banking and lending institutions industry. Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.232 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.233 To register or learn more, visit www.cpa2biz.com.

Webcasts

.234 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.235 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.236 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.237 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.238 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.239 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.240 The AICPA sponsors an annual conference on banks and savings institutions in the winter. The National Conference on Banks & Savings Institutions is a three-day conference designed to update attendees on recent developments related to all banking operations. This is the only conference where both community banks and large banking institutions can acquire the critical understanding of current banking issues on emerging audit, accounting, and regulatory developments. Speakers will focus on issues and updates as well as forecasts and trends in the banking industry. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA CAQ

.241 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.242 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Depository Institutions

.243 For information about the activities of the Depository Institution Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_depository.htm.

Industry Web Sites

.244 The Internet covers a vast amount of information that may be valuable to auditors of financial institutions, including current industry trends and developments. Some of the more relevant sites for auditors with financial institution clients include those shown in the following table.

Organization	*Web Site*
Federal Deposit Insurance Corporation	www.fdic.gov
Financial Crimes Enforcement Network	www.fincen.gov
Mortgage Bankers Association	www.mbaa.org
National Credit Union Administration	www.ncua.gov
Office of the Comptroller of the Currency	www.occ.treas.gov

.245 The financial institution practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.246 This Audit Risk Alert replaces *Bank, Credit Union, and Other Depository and Lending Institution Industry Developments—2006/07*.

.247 The Audit Risk Alert *Bank, Credit Union, and Other Depository and Lending Institution Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to kbiser@aicpa.org or write to:

Kenneth R. Biser, CPA

Employee Benefit Plans Industry Developments—2007

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
EMPLOYEE BENEFIT PLANS INDUSTRY DEVELOPMENTS—2007

This Audit Risk Alert, prepared by the AICPA staff, is intended to provide auditors of financial statements of employee benefit plans with an overview of recent economic, industry, regulatory, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. This publication was reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Linda C. Delahanty
Technical Manager
Audit and Attest Standards

Acknowledgments

The AICPA staff wishes to thank the members of the AICPA Employee Benefit Plans Expert Panel; the AICPA Employee Benefit Plans Audit Guide Revision Task Force; and the Office of the Chief Accountant (OCA), Employee Benefits Security Administration (EBSA) of the U.S. Department of Labor (DOL) for their contributions to this Alert.

2006–2007 Employee Benefit Plans Expert Panel

Marilee P. Lau, *Chair*

Kristin Tveit
Michele Weldon
Alice Wunderlich

How This Alert Helps You

.01 This Alert helps you plan and perform your employee benefit plan audits. It provides information on current industry developments and emerging practice issues as well as current auditing, accounting, and regulatory developments affecting employee benefit plans. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate.

.02 ***References to Professional Standards.*** When referring to the professional standards, this Alert may cite the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients,* is referred to as AU section 317 of the AICPA *Professional Standards*.

> **Help Desk—**See the AICPA publication *Audit Risk Alert—2006/07* (product no. 022337kk) for general guidance. For a thorough discussion of recent developments and key issues in the area of independence and ethics, see the AICPA Audit Risk Alert *Independence and Ethics Alert—2006/07* (product no. 022477kk). For a thorough discussion of recent Securities and Exchange Commission (SEC) and Public Company Accounting Oversight Board (PCAOB) developments, see the AICPA Audit Risk Alert *SEC and PCAOB Alert—2006/07* (product no. 022497kk). These Alerts can be obtained by calling the AICPA at (888) 777-7077 or by going online at www.cpa2biz.com. It is important to point out that for Employee Retirement Income Security Act of 1974 (ERISA) engagements, the DOL has separate independence standards that may be more restrictive than those of the AICPA. See paragraph A.88 in Appendix A of the AICPA Audit and Accounting Guide *Employee Benefit Plans*, with conforming changes as of March 1, 2007 (EBP Guide) (product no. 012597kk), for a listing of the DOL's independence standards.

Hot Topics

Pension Protection Act of 2006

.03 On August 17, 2006, President Bush signed into law the Pension Protection Act of 2006 (PPA), which is the most comprehensive pension reform legislation since ERISA was enacted in 1974. The PPA, which comprises approximately 400 pages, will lead many companies to change the way their plans are designed and administered, amend plan documents, increase plan funding, and make additional plan disclosures in regulatory filings and to plan participants.

Audit Considerations as a Result of the PPA

.04 Plan sponsors and administrators will need to understand the effects of the new law on their plans and to seek professional advice and assistance in implementing the new requirements. Plan auditors will also need to understand the effects of the new law and consider modifications to the audit approach. Certain changes are effective now or in 2007, but most changes are effective for plan years that begin in 2008 or later.

.05 The PPA is extensive, and certain provisions will affect the plan audit. The AICPA Employee Benefit Plan Audit Quality Center has prepared a summary analysis of key provisions of the PPA, which is available online at www.ebpaqc.aicpa.org. Notable provisions of the PPA that will require auditor attention as the audit is planned and performed include the following:

- Effective in 2007, all employer contributions to a defined-contribution (DC) plan must vest no slower than the schedule that currently applies to matching contributions (the 3-year cliff or 6-year graded schedule). The new vesting rules apply only to contributions made in plan years beginning on or after January 1, 2007, but can also be applied to past contributions.
- It permanently extends a number of employee benefit provisions that were part of the 2001 Economic Growth and Tax Relief Reconciliation Act that had been set to expire in 2010, including increased contribution limits, faster vesting, catch-up contributions, and Roth contributions.
- It provides miscellaneous rules addressing administration of plans including new benefit statement requirements. Quarterly benefit statements must be provided to participants who have the right to direct investments in a plan, and annually to those who do not.

- It provides new annuity rules for defined benefit pension plans and money purchase pension plans effective beginning in 2008. Participants must be offered a new *qualified optional survivor annuity*.
- It revises rollover and plan distribution rules.
- There are new rules encouraging automatic enrollment in 401(k) plans.
- In 2008, safe harbor automatic enrollment is allowed.
- It revises the rules that govern employer funding of defined benefit pension plans that will require the auditor to gain an understanding of the impact of the changes when reviewing the actuarial valuation. The PPA revised many rules surrounding defined benefit plans.
- It provides for new rules related to funding, withdrawal liability, and disclosures for multiemployer plans.
- It created a new plan design, DB(k), to become effective beginning in 2010.
- Plans will be required to be amended to conform to the PPA by the end of the 2009 plan year. Collectively bargained plans have until the end of the 2011 plan year.
- It includes new DOL Safe Harbor guidelines to be issued to provide Section 404(c) protection to plan sponsors for participants who fail to make an affirmative election if the contributions are invested in a default investment option.
- It provides for a new prohibited transaction exemption (PTE) for investment advice from a fiduciary advisor to DC plan participants under an *eligible investment advice arrangement*. It also establishes a new independent audit requirement for DC plans with eligible investment advice arrangements with respect to compliance with applicable requirements for such arrangements. Be alert to the issuance of guidance from the DOL on how this requirement is to be fulfilled.
- Beginning in 2007, it provides for more diversification rights of investments in publicly traded employer securities to participants in a DC plan.

.06 The above highlights serve only as a brief summary of provisions of the PPA that will affect the plan auditor. The auditor will need to be familiar with the PPA to address certain changes in his or her audit approach. While many of the changes are effective for plan years beginning in 2008, auditors should learn more about the immediate impact on the plans they audit and gain an understanding of the intention of management to effectively and efficiently plan and prepare for future audits.

Financial Accounting Standards Board Staff Position AAG INV-1 and SOP 94-4-1

.07 In December 2005, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*.[1]

[1] The financial statement presentation and disclosure guidance in paragraphs 8–11 of Financial Accounting Standards Board (FASB) Staff Position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*, is effective for financial statements for plan years ending after December 15, 2006. The revised definition of fully benefit responsive in paragraph 7 of the FSP shall be effective for all investment contracts as of the last day of the annual period ending after December 15, 2006. Earlier application is permitted for fiscal years in which annual financial statements have not been issued. If comparative financial statements are presented, the guidance in that FSP shall be applied retroactively to all prior periods presented. If an investment contract is considered fully benefit responsive under the revised definition as of the last day of the annual period ending after December 15, 2006, that contract shall be considered fully benefit responsive for all periods presented, provided that contract would have been considered fully benefit responsive in accordance with the then-existing provisions of this Statement of Position (SOP).

.08 This FSP provides (1) a definition of fully benefit-responsive investment contracts and (2) guidance with respect to the financial statement presentation and disclosure of fully benefit-responsive investment contracts.

.09 This FSP amends the guidance in AICPA Statement of Position (SOP) 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans*, with respect to the definition of fully benefit responsive and the presentation and disclosure of fully benefit-responsive investment contracts; SOP 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans;* and paragraph 10(h) of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to effectively remove the scope exception provided for fully benefit-responsive investment contracts reported at contract value in accordance with SOP 94-4. Appendix B of the FSP shows the amendments to SOP 94-4, SOP 92-6, and FASB Statement No. 133.

Financial Statement Presentation and Disclosure Requirements

.10 Defined-benefit health and welfare benefit plans should report investment contracts at fair value. Defined-contribution plans, including both health and welfare and pension plans, should report all investments (including derivative contracts) at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts. An investment contract is considered fully benefit responsive for purposes of this SOP if certain criteria are met for that contract, analyzed on an individual basis. See paragraph 3.19 of the EBP Guide for such criteria.

.11 The statement of net assets available for benefits of the plan shall present amounts for (1) total assets, (2) total liabilities, (3) net assets reflecting all investments at fair value, and (4) net assets available for benefits. The amount representing the difference between 3 and 4 shall be presented on the face of the statement of net assets available for benefits as a single amount, calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to each fully benefit-responsive investment contract from fair value to contract value. The statement of changes in net assets available for benefits shall be prepared on a basis that reflects income credited to participants in the plan and net appreciation or depreciation in the fair value of only those investment contracts that are not deemed to be fully benefit responsive.

.12 Defined-contribution plans, including both health and welfare, and pension plans shall disclose the following in connection with fully benefit-responsive investment contracts, in the aggregate:

1. A description of the nature of those investment contracts, how they operate, and the methodology for calculating the interest crediting rate, including the key factors that could influence future average interest crediting rates, the basis for and frequency of determining interest crediting rate resets, and any minimum interest crediting rate under the terms of the contracts. This disclosure should explain the relationship between future interest crediting rates and the amount reported on the statement of net assets available for benefits representing the adjustment for the portion of net assets attributable to fully benefit-responsive investment contracts from fair value to contract value.

2. The average yield earned by the plan for all fully benefit-responsive investment contracts (which may differ from the interest rate credited to participants in the plan) for each period for which a statement of net assets available for benefits is presented. This average yield shall be calculated by dividing the annualized earnings of all fully benefit-responsive investment contracts in the plan (irrespective of the interest rate credited to participants in the plan) by the fair value of all fully benefit-responsive investment contracts in the plan.

Help Desk—The average yield should be based on the investment income from the investments in the fund (not the crediting rate) as of the last day of the period, annualized, divided by the fair value of the investments as of the last day of the period. In situations where there are material unsettled trades as of year end, consideration should be given to adjusting the investment earnings for the estimated amount relating to those unsettled trades.

3. The average yield earned by the plan for all fully benefit-responsive investment contracts with an adjustment to reflect the actual interest rate credited to participants in the plan for each period for which a statement of net assets available for benefits is presented. This average yield shall be calculated by dividing the annualized earnings credited to participants in the plan for all fully benefit-responsive investment contracts in the plan (irrespective of the actual earnings of those investments) by the fair value of all fully benefit-responsive investment contracts in the plan.

   Help Desk—The average yield should be based on the amounts credited to participants in the fund as of the last day of the period, annualized, divided by the fair value of the investments in the fund as of the last day of the period. Note that even though the numerator is the earnings credited to participants in the fund (crediting rate) based on contract value, the denominator is based on the fair value, not the contract value, of the investments.

4. A description of the events that limit the ability of the plan to transact at contract value with the issuer (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives), including a statement as to whether the occurrence of those events that would limit the plan's ability to transact at contract value with participants in the plan is probable or not probable. The term *probable* is used in this Statement consistent with its use in FASB Statement No. 5, *Accounting for Contingencies*.

5. A description of the events and circumstances that would allow issuers to terminate fully benefit-responsive investment contracts with the plan and settle at an amount different from contract value.

   Help Desk—See Appendix D of this Alert for Technical Practice Aids (TPAs) that provide guidance on implementing this FSP and for illustrative financial statements. The complete FSP can be viewed on the FASB Web site at www.fasb.org.

Related Auditing Issues

.13 The valuation of investment contracts in accordance with the FSP is the responsibility of the plan sponsor. The plan sponsor can look to an outside service provider to assist in the mechanics of the valuation. The plan sponsor must have sufficient information to evaluate and independently challenge the valuation. Plan sponsors may need to work with the various service providers (for example, trustee or custodian, investment advisor, or recordkeeper) surrounding the investment contracts to determine which service provider will assist in the mechanics of the valuation. Auditors should recommend to plan sponsors that discussions with service providers happen early in the audit planning process to ensure the investment contract valuation will be completed in time for filing deadlines.

.14 For full-scope audits of plans with investments in investment contracts, auditors should gain an understanding of the valuation methodology during planning through discussion with clients and service providers and review of valuation documentation. The auditor should review and test the significant assumptions and underlying data used in the valuation of the investment contracts. Additional guidance can also be found in the AICPA Practice Aid titled *Alternative Investments—Audit Considerations: A Practice Aid for Auditors.*

Related TPAs

.15 The AICPA has issued three TPAs to provide additional guidance when implementing FSP AAG INV-1 and SOP 94-4-1. See Appendix D of this Alert to view the TPAs.

Risk Assessment Standards

.16 In March 2006, the AICPA's Auditing Standards Board (ASB) issued 8 SASs. SASs No. 104–No. 111 were issued together and are known as the *risk assessment standards,* applying to audits conducted in accordance with Generally Accepted Auditing Standards (GAAS). While the new risk assessment standards include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The primary objective of the SASs is to provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements; further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels; and improving the linkage between the risks, controls, audit procedures, and conclusions. They are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier application permitted. A table listing the 8 SASs and their effects on existing standards follows.

Statement on Auditing Standard	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures ("Due Professional Care in the Performance of Work")	This Statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AU section 230).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards	This Statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150).
SAS No. 106, *Audit Evidence*	This Statement supersedes SAS No. 31, *Evidential Matter* (AU section 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*	This Statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312A).
SAS No. 108, *Planning and Supervision*	This Statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AU section 310), and supersedes SAS No. 22, *Planning and Supervision* (AU section 311).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*	This Statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*	This Statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AU section 313), and, together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AU section 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39, Audit Sampling*	This Statement amends SAS No. 39, Audit Sampling (AU section 350).

Some Important Highlights of the New Risk Assessment Standards

.17 Whether due to errors or fraud, the new risk assessment standards require the auditor to understand and respond to risks of material misstatements. That understanding should identify risks to your client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to maximum control risk. While this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing. See the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework at www.coso.org/key.htm. These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what you have previously done. Implementation of the SASs will most likely result in significant changes to your firm's audit methodologies and the training of your personnel. Therefore, it is recommended that you allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessments* (product number 022526kk) at www.cpa2biz.com.

New Companion Audit Guide

.18 In December 2006, the AICPA issued an Audit Guide titled *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This Guide helps practitioners understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The Guide can be ordered by calling the AICPA at 888-777-7077 or going online at www.cpa2biz.com.

Employee Benefit Plan Considerations

.19 The following paragraphs offer a brief description of the fundamental audit concepts described in the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement* and examples of how these concepts may be applied in your audits of employee benefit plans.

.20 ***Reasonable assurance.*** GAAS requires the auditor to "obtain reasonable assurance about whether the financial statements are free from material misstatement." SAS No. 104 clarifies that reasonable assurance is a high but not absolute level of assurance. For example, the auditor may obtain reasonable assurance in an employee benefit plan audit by gathering evidence that:

- Hard to value investments such as real estate, limited partnerships, and private placement equities are valued at fair market value.
- The completeness objective has been achieved with respect to employer contributions.
- Pensions and annuities paid and benefits paid have been accurately calculated and have been properly shown on the plan's financial statements.
- The benefit obligations determined by the plan's actuary appear reasonable and significant changes are understood by the auditor.
- Expenses paid by the plan are reasonable and necessary.

.21 ***Audit risk and the risk of material misstatement.*** The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole. Audit risk is the risk that the financial statements are materially misstated and the auditor fails to detect such a misstatement or appropriately modify the audit opinion. The auditor should perform the audit to reduce audit risk to a low level. The auditor should assess the risk of material misstatement (in other words, the combined assessment of inherent and control risks) as a basis for further audit procedures. In an employee benefit plan, the following should be considered:

- An overall materiality level for the plan should be determined. The determination of what is material to the users is a matter of professional judgment.
- The impact of current developments in the financial markets as they relate to the valuation of plan investments.

- Whether the risk of material misstatement would be high for areas such as: investments, contributions, and benefits paid.

.22 ***Materiality and tolerable misstatement.*** Audit materiality represents the maximum amount that the auditor believes the financial statements could be misstated and still fairly present the plan's net assets available for benefits and the changes in net assets available for benefits. Tolerable misstatement is the maximum known error within the financial statements that you are willing to accept. The following areas are typically the most material areas in a benefit plan's financial statements:

- Investments (and cash in a health and welfare plan)
- Benefits paid (in a health and welfare plan)
- Pensions and annuities paid (in a pension plan)
- Contributions

.23 Care should be taken by the auditor in determining the maximum level of tolerable error in these areas. Other balances in an employee benefit plan (for example, cash in a pension plan) are not normally material to a plan's financial statements; therefore, errors might be significant in relation to the account balance but still would be below the tolerable error established for that account. Whereas an error in cash that is below tolerable misstatement may not cause the auditor to modify the auditor's opinion, the auditor should consider the inherent risk within the class of transactions as a qualitative factor that could affect materiality considerations.

.24 ***Financial statement assertions.*** Assertions are management's implicit or explicit representations regarding the recognition, measurement, presentation, and disclosure of information in the financial statements. Assertions fall into three categories: (1) classes of transactions, (2) account balances, and (3) presentation and disclosure. Certain significant risks at the assertion level for an employee benefit plan include the following:

- Investments exist, are valued at fair value, and are shown properly by investment type in the statement of net assets available for benefits and are properly disclosed.
- Claims for pensions and other benefit payments have been properly approved or denied and, if approved, have been paid in accordance with the plan document.
- Employer contribution income is properly recognized and is complete with respect to any accruals, including amounts due at the end of the period, a valuation for amounts deemed uncollectible, and the present value of any employer withdrawal liability (for multiemployer plans).
- Participant data used to calculate plan benefit obligation are complete.
- Transactions with parties in interest have been properly shown in the plan's financial statements.
- Plan expenses have been recorded in the proper amount, in the proper accounting period and in accordance with the plan document.

.25 ***Internal control.*** Internal control is a process designed to provide reasonable assurance about the achievement of the plan's objectives. These objectives fall into three categories: financial reporting, operations, and compliance with laws and regulations. The five interrelated components of internal control are the control environment, risk assessment, information and communication systems, control activities, and monitoring. Specific controls that an employee benefit auditor may test include:

- Assessing whether plan's management has controls in place to maintain compliance with applicable rules and regulations (for example, DOL, Pension Benefit Guaranty Corporation (PBGC), IRS, or PCAOB)

- Ensuring that the plan has a system for paying and denying pensions or health claims
- Ensuring that all investment income has been received and recorded appropriately
- Ensuring that the plan actuary has utilized the appropriate data in calculating the present value of plan obligations
- Assessing whether plan personnel have the capability to prepare the plan's financial statements
- Ensuring that employer and employee contributions are complete and accurate
- Ensuring that securities lending activity has been appropriately accounted for

.26 The auditor's understanding of internal control involves determining whether and how specific controls may prevent or detect and correct material misstatements.

.27 ***Information technology.*** A client's use of information technology (IT) may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, compliance objectives, and operating units or business functions. In an employee benefit plan audit, the auditor may decide to test whether:

- The client's IT system is being properly utilized to determine participant data (for example, payroll and employee information) and pension and health benefit payments
- A database system is being properly utilized to check for duplicate payments, improper utilization, and other payments made in the health care payment system
- Pension credits earned are being properly accounted for and utilized in calculating the payment of benefits
- Passwords are utilized by the plan and appropriate restrictions exist to prevent or detect fraud
- The IT system is accurately allocating shared expenses between plans that share facilities and other expenses

.28 ***Audit evidence.*** Audit evidence is all the information the auditor uses to arrive at the conclusions that support the opinion on the audit. Audit evidence is cumulative in nature. Audit evidence must be sufficient and appropriate. Sufficient and appropriate audit evidence in an employee benefit plan audit as part of the overall risk assessment would include, but would not be limited to:

- Reading the minutes of meetings of plan trustees and designing audit steps based on the actions taken during those meetings
- Interviewing the plan's administrator regarding internal controls
- Conducting SAS No. 99 interviews with nonaccounting personnel
- Obtaining a Type II SAS No. 70 letter from the service provider who processes plan activity
- For full scope audits, obtaining confirmation of securities held by the plan's investment custodian, and testing investment valuations on the plan's investments
- Testing the trustees' and plan employees' expense reimbursement forms

Help Desk—The AICPA has developed and published an Audit Guide titled *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk) to aid in implementing the new risk assessment standards. This Guide can be purchased by contacting the AICPA CPA2BIZ Service Center at 888-777-7077 or online at www.cpa2biz.com.

Limited-Scope Certifications

.29 Under DOL regulations, certain assets held by a bank, trust company, or similar institution or by a regulated insurance company and related investment information do not have to be audited provided the institution certifies the information. All noninvestment activity of the plan, such as participant allocations, contributions, benefit payments, and expenses, are subject to audit. Paragraphs 7.65, 7.66, and 13.26 in the EBP Guide provide guidance for limited-scope audit procedures and reporting.

.30 The Form 5500 instructions state that current value means fair market value where available. Otherwise, current value means the fair value as determined in good faith under the terms of the plan by a trustee or a named fiduciary assuming an orderly liquidation at the time of the determination. Refer to ERISA Section 3(26). Plan management should instruct the institutions certifying investment information for purposes of limited-scope audits to certify as to the current value of investments at the date of the plan's year end and to exclude any investments that are not valued at fair value as of the plan's year end.

.31 It is the plan administrator's responsibility to prepare the financial statements and footnote disclosures in accordance with GAAP. The AICPA Audit Issues Task Force is currently discussing certain revisions to paragraphs 7.65 and 7.66 of the EBP Guide to help clarify guidance. Be alert for the issuance of additional guidance.

Alternative Investments

.32 Alternative investments are investments for which a readily determinable fair value does not exist (that is, investments that are not listed on national exchanges or over-the-counter markets, or for which quoted market prices are not available from sources such as financial publications, the exchanges, or the National Association of Securities Dealers Automated Quotations System [NASDAQ]). These investments include private investment funds meeting the definition of an investment company under the provisions of the AICPA Audit and Accounting Guide *Investment Companies* (product no. 012625kk), such as:

- Hedge funds
- Private equity funds
- Real estate funds
- Venture capital funds
- Commodity funds
- Offshore fund vehicles
- Funds of funds
- Bank common and collective trust funds

.33 Collectively, these types of investment funds are referred to herein as *alternative investments.* Alternative investments may be structured as limited partnerships, limited liability corporations, trusts, or corporations. Investors in alternative investments include pension plans. Many invest a small percentage of their total investments, while others invest a substantial percentage of their total investments in these vehicles. In addition, the underlying investments of the alternative investments can range from marketable securities to complex or illiquid investments. Alternative investments can present challenges with respect to obtaining sufficient appropriate audit evidence in support of the existence and valuation assertions because of the lack of a readily determinable fair value for these investments and the limited investment information generally provided by fund managers.

.34 When auditing alternative investments, it is important to understand the client's process related to valuation. This includes, but is not limited to, determining the nature of the underlying investments, understanding how often plan management interacts with fund manager(s) of such investments, the availability of audited financial statements for such investments, and Type II SAS 70 reports on the determination of unit values of such investments. Obtaining a confirmation from the trustee, custodian, or investment manager that contains fair values does not constitute valuation testing. For further guidance, refer to Interpretation No. 1 of AU section 328, "Auditing Interests in Trusts Held by a Third-Party Trustee and Reported at Fair Value."

.35 Additional guidance can also be found in the AICPA Practice Aid titled *Alternative Investments—Audit Considerations: A Practice Aid for Auditors*. This Practice Aid addresses challenges associated with auditing investments for which a readily determinable fair value does not exist.

.36 Auditors need to determine that they have obtained sufficient and competent audit evidence to support the existence and valuation assertions related to alternative investments. In the event that such evidence is not obtained, consideration of modifications to the audit opinion may be required.

AICPA Resources and Projects

The AICPA Employee Benefit Plan Audit Quality Center

.37 The AICPA Employee Benefit Plan Audit Quality Center (the Center) is a firm-based, voluntary membership Center created in March 2003 with the goal of promoting quality employee benefit plan audits. Center member firms demonstrate their commitment to ERISA audit quality by joining the Center and agreeing to adhere to its membership requirements. The Center now has over 1,300 members in all 50 states, the District of Columbia, the U.S. Virgin Islands, and Puerto Rico.

.38 Recent reviews performed by the DOL's EBSA have shown a difference in the quality of ERISA audits performed by Center member firms compared with those performed by nonmember firms. To help members meet the challenges of performing quality audits in the employee benefit plan area, the Center:

- Monitors activities of standard setters, the DOL, stakeholder groups, and others and communicates this information to its members via periodic E-Alerts
- Develops valuable tools and resources—such as audit preparedness and planning checklists and schedules, auditor guidelines for preparing proposals, "Topix" primers, and more—that are sent to members and developed and archived on the Center's Web site
- Sponsors "Live Forum" and "Roundtable Discussion" member-only conference calls to share important information and answer participant questions on a wide range of technical and practice topics
- Provides an online member forum for sharing ideas, best practices, and questions with other members
- Develops information for auditors to share with plan stakeholders regarding issues of importance to plan auditors, such as the importance of plan sponsors and trustees monitoring their TPAs
- Serves as a single voice for Center members to the DOL

.39 Visit the Center Web site at www.aicpa.org/ebpaqc to see a complete list of Center members and to preview Center benefits. For more information, contact the Center at ebpaqc@aicpa.org.

Guide Overhaul Project

Description and Background

.40 The EBP Guide was last issued in 1991. The Guide has not been revised or amended, other than for conforming changes, since then. Since 1991, significant changes have occurred in the types of retirement plans offered by employers, the way plans are administered, and the types of plan investments. Many of these changes have resulted in accounting issues that are not contemplated in the existing Guide. In 2004, a task force began work on a project to revise the EBP Guide.

Tentative Conclusions

.41 Some of the tentative conclusions reached by AcSEC in discussing the accounting issues for the EBP Guide are listed in the following sections. The tentative conclusions are subject to change as AcSEC continues to deliberate the accounting issues and are not considered guidance. Visit the AICPA Web site for updates on this AcSEC project at www.aicpa.org.

.42 ***Accounting for contributions receivable for defined benefit pension plans.*** Minimum contributions required should be accrued, and any excess amounts would be considered a Type II subsequent event unless there were evidence of a formal commitment as of the balance sheet date. When the issue is drafted for the EBP Guide, it should be expanded to discuss all of the factors listed in paragraph 10 of FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans,* with emphasis placed on the formal commitment.

.43 ***Accounting for contributions receivable for DC pension plans.*** Additional guidance should be included in the Guide discussing factors that should be reviewed in determining whether contributions should be recorded due to an obligation resulting from a formal commitment under paragraph 10 of FASB Statement No. 35. Additional information about the relationship between employees and employer as compared to defined benefit plans should also be included.

.44 ***Accounting for contributions receivable for defined benefit health and welfare benefit plans.*** A receivable from the employer should be accrued equal to the liability for employees' claims recorded prior to plan's year end. A receivable from the employer should be accrued equal to the liability for incurred but not reported (IBNR) employee claims if, as of the date of the financial statements, there is a legal or contractual requirement for the employer to fund this amount.

.45 ***Employee deferral and related matching contributions for DC plans.*** It would be rare that this amount would be significant; therefore, this issue will not be included in the Guide.

.46 ***Accounting for excess employee contributions.*** Excess employee contributions should be recorded as a liability in the year in which they were contributed to the plan (in accordance with paragraph 3.31 of the EBP Guide) with the corresponding debit side of the entry being netted against contributions received. Additionally, disclosure thereof should be presented in the notes to the financial statements.

.47 ***Presentation of investment income from commingled investment funds.*** The Guide should express two views. One is that dividends and distributions should be considered investment income and shown separately from changes in fair value. The second is that dividends should only be considered investment income and shown separately from changes in fair value.

.48 ***Disclosures for limited partnerships and similar investments.*** Additional disclosures should be made relating to limited partnerships and similar investments. The Guide should clarify that these disclosures apply to certain types of investments that are hard to value or not liquid (alternative investments). If the information for the disclosures cannot be obtained or is prohibited from being disclosed, that should be disclosed as well. AcSEC also noted that the task force should look at the disclosures required by the FASB Fair Value project.

.49 ***Current developments and plans.*** AcSEC will continue its discussions of issues at a future meeting.

Audit Issues

Recent Auditing Pronouncements

.50 Presented in the following section is a list of auditing and attestation pronouncements and related guidance issued since the publication of last year's Alert. For information on auditing and attestation standards and related guidance issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. For audits of issuers, such as Form 11-K audits, see the section "Form 11-K Audits" of this Alert. As a reminder, AICPA auditing and attest standards are applicable only to audits and attestation engagements of nonissuers.

.51 You may also look for announcements of newly issued standards in the *CPA Letter, Journal of Accountancy,* and the quarterly electronic newsletter *In Our Opinion,* which is issued by the AICPA's Auditing Standards team and is available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion/.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (May 2006)	The new standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006. See Appendix B of this Alert for further guidance.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (November 2006)	This SAS amends SAS No. 95, *Generally Accepted Auditing Standards*; SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*; SAS No. 101, *Auditing Fair Value Measurements and Disclosures*; SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*; SAS No. 57, *Auditing Accounting Estimates*; "Subsequent Events" of SAS No. 1, *Codification of Auditing Standards and Procedures;* and SAS No. 85, *Management Representations*. The amendments in paragraphs 1–5 of this SAS are effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted. The amendments in paragraphs 7–14 of this SAS are effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted.
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (December 2006)	The new standard supersedes SAS No. 61, *Communication With Audit Committees*. It establishes and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements. Although this Statement applies regardless of an entity's governance structure or size, particular considerations apply where all of those charged with governance are involved in managing an entity. It is effective for periods beginning on or after December 15, 2006.

(continued)

AICPA TPA sections 8100.01–.02 (Nonauthoritative)	"Determining the Effective Date of a New Statement on Auditing Standards for Audits of a Single Financial Statement" and "Determining the Effective Date of a New Statement of Auditing Standards for Audits of Interim Periods."

.52 As necessary, auditors should obtain and understand the complete text of the applicable standards and other guidance. You should visit the applicable Web site for complete information.

SAS No. 103, *Audit Documentation*

.53 Paragraphs 5.17–5.24 of the EBP Guide provide the background of SAS No. 103, *Audit Documentation*. In documenting the nature, timing, and extent of audit procedures performed, SAS No. 103 requires that the auditor record:

- Who performed the work and the date such work was completed
- Who reviewed specific audit documentation and the date of such review

.54 This documentation can be performed manually or electronically depending on the nature of the workpapers.

.55 In addition, SAS No. 103 requires that identifying characteristics of the specific items tested be documented. This includes the following:

- For a detail test of participants, this includes their name and employer number. Care should be given when using the entire social security number of a participant due to privacy and confidentiality issues.
- For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor should record the scope of the procedures and identify the population (for example, all distributions over $XX from the benefit payment register).
- For a procedure requiring inquiries of specific plan or entity personnel (for example, fraud and illegal act inquiries), the auditor should record the dates of the inquiries, the names and job designations of the plan or entity personnel, and the inquiry made.
- For a procedure requiring systematic sampling from a population of documents, the auditor should identify the documents selected by recording their source, the starting point and the sampling interval.

Dating of the Auditor's Report

.56 SAS No. 103 also provides guidance regarding the dating of an audit report. Paragraph 23 of SAS No. 103 states that the auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate evidence to support the opinion. Sufficient appropriate evidence includes that the audit documentation has been reviewed; that all testing procedures have been completed; and that the plan's financial statements, including disclosures, have been prepared and management has asserted that it has taken responsibility for them. The timing of the review of the Form 5500 may affect the dating of the audit report. If the Form 5500 has not been prepared prior to release of the financial statements, the auditor should consider obtaining a draft of the Form 5500 to prevent differences from arising after the report has been issued. If differences arise additional procedures may have to be performed and the report possibly reissued for reconciling items.

.57 The auditor's responsibility with regard to the Form 5500 is outlined in AU section 550, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards,* vol. 1), as amended. In accordance with AU section 550, the auditor's responsibility for the information does not extend beyond the financial information identified in his or her report, and the auditor has no obligations to perform any procedures to corroborate other information contained in the document. However, the auditor should read the information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. If the auditor concludes that there is a material inconsistency, he or she should determine whether the financial statements, his or her report, or both require revision. If he or she concludes that they do not require revision, he or she should request the client to revise the other information contained in the Form 5500.

.58 The final assembly of the audit file should be completed within 60 days following the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a shorter period of time in which this process should be completed. SAS No. 103 also provides guidance in the event that changes to documentation after the assembly of the audit work papers is required.

SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit*

.59 SAS No. 112 provides guidance to enhance your ability to identify and evaluate control deficiencies during an audit and then communicate to management and those charged with governance those deficiencies that you believe are significant deficiencies or material weaknesses. See Appendix B of this Alert for further guidance specific to employee benefit plans.

SAS No. 114, *The Auditor's Communication With Those Charged With Governance*

.60 SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A), as amended. The new SAS requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit. It also establishes standards and provides guidance on (1) which matters should be communicated, (2) to whom they should be communicated, and (3) the form and timing of the communication. SAS No. 114 is applicable for audits of the financial statements of all nonissuers and is effective for audits of financial statements for periods beginning on or after December 15, 2006.

> **Help Desk—**The requirement for the auditor to communicate with those charged with governance are included in other SASs. SAS No. 114 does not change the requirements in those standards, including the requirements in SAS No. 112 to communicate in writing to management and those charged with governance control deficiencies identified during an audit that upon evaluation are considered significant deficiencies or material weaknesses. See Appendix A of SAS No. 114 for a complete list of requirements included in other SASs.

Auditing Plan Fees and Expenses

.61 Most defined benefit plans and many DC plans pay administrative expenses out of plan assets. As plan sponsors look for ways to decrease operating costs, it is becoming more common to amend benefit plans to allow for the payment of the expenses out of the plan. In certain instances, forfeitures are used to pay plan expenses. The auditor's responsibilities with respect to testing administrative expenses are detailed in paragraphs 12.10 and 12.11 of the EBP Guide. Typically, plan expenses are below materiality levels in a benefit plan audit and, therefore, are not subject to significant detailed testing. Often, auditors gain assurance over expense balances using other audit procedures such as substantive analytics. Irrespective of the materiality level, auditors need to gain an understanding of the expenses that are allowed to be paid by the plan according to the plan document.

.62 Auditors should be especially aware of fees paid by one plan on behalf of another plan resulting from errors or inappropriate allocations. In addition, auditors should be aware of fees paid by the plan for certain services (actuarial fees) that may relate to services provided to the plan sponsor. Expenses paid by the plan that are not allowed by the plan document or excessive fees, no matter how immaterial, may be deemed a prohibited transaction requiring further testing and disclosure as described in paragraph 11.13 of the EBP Guide.

.63 In addition, any fees or expenses paid to related parties need to be considered for disclosure under FASB Statement No. 57, *Related Party Disclosures.* In certain instances, it may be difficult to understand the nature of the expenses being paid by the plan due to the netting of expenses against income or other "hidden" arrangements. In these situations, the auditor may determine that additional inquiries with management and the service providers or review of service provider agreements may assist in understanding the fee arrangements. Also, refer to the DOL-issued publication *Understanding Retirement Plan Fees and Expenses* to better understand and evaluate plan fees and expenses.

Separately Managed Accounts

.64 Some plans have accounts at a trust company, insurance company, or similar institution consisting of individual plan assets that are managed by an investment manager specifically for the plan. Often, these separately managed accounts are mistaken for pooled investment vehicles (for example, insurance company pooled separate accounts [PSAs], mutual funds, or common collective trusts). A review of the underlying investment agreement with the investment manager or discussions with the service providers will typically reveal whether the investment is a pooled or separately managed vehicle. Individual assets of a separately managed account are held in the name of the plan and should be audited in a manner similar to other individual investments held directly by the plan. The auditing objectives and procedures described in paragraphs 7.15 and 7.16 of the EBP Guide apply to individual assets and activity for a separately managed account. Such individual investments are also subject to the reporting requirements in paragraphs 2.14, 3.22, or 4.39 of the EBP Guide. In addition, these investments would be considered individual investments for purposes of reporting on Form 5500, Schedule H, line 4i—*Schedule of Assets (Held at End of Year)* and line 4j—*Schedule of Reportable Transactions.*

Unitized Trusts

.65 In certain instances, the recordkeeper of a separately managed account will maintain a net asset value per unit or *unitization* for the account. Purchases and sales of the account on behalf of the plan sponsor will be transacted at that net asset value per unit. For plan auditors to test the value of the purchases and sale transactions, the auditor will need to be comfortable with the price (net asset value per unit) at which the transactions were executed. The auditor should gain an understanding of the process to calculate the net asset value per unit through review of pertinent investment agreements, discussion with the service provider, or review of service provider's SAS No. 70 report. The auditor should then determine the level of testing required to gain comfort over the unit values. The accumulation of the net asset value per unit may be covered by the SAS No. 70 report, which may be used to reduce the scope of substantive testing.

.66 Unitization is also typically used when employer stock or guaranteed investment contracts are offered as an investment option in DC plans. A cash or money market component is added to the investment for liquidity purposes, and the transaction activity is unitized.

Unaudited PSA Accounts

.67 Pooled separate accounts (PSAs) are very common benefit plan investments and are similar to mutual funds except that they are issued by insurance companies and are not publicly traded like mutual funds. Usually PSAs have audited financial statements; however, for certain insurance companies, audited PSA financial statements are not available, and, therefore, the valuation and investment activity is not tested.

.68 Where there are no audited PSA financial statements, paragraphs 7.52 and 7.16 in the EBP Guide states that the auditor should obtain a copy of the service auditor's report (SAS No. 70 report) if available, but the Guide does not discuss how to perform the substantive testing.

.69 While the best and ultimate solution may be for plan sponsors to require insurance companies to provide audited financial statements on the funds in which their plans invest, there are currently situations where plans have most of their investments in unaudited PSAs.

.70 When a PSA does not have audited financial statements, the auditor may consider the following:

1. Confirm existence of the underlying investments of the PSA on a security-by-security basis.
2. Test valuation of the underlying investments in the PSA.
3. Gain an understanding of the process to calculate the net asset value per unit.
4. Determine the level of testing required to gain comfort over the unit values.

.71 For transaction information during the year, consider performing the following:

1. Obtain, review and assess the insurance company PSA SAS No. 70 report, if available. See Chapter 6 of the EBP Guide for further guidance on the use of SAS No. 70 reports.
2. Test investment activity (such as, purchases and sales).
3. Test investment income through analytics or detailed testing.
4. If no SAS No. 70 report is available, consider expanding testing procedures.

Investments Reported as 103-12 Entities as Required by the DOL

.72 Many limited partnerships, hedge funds, and other pooled funds such as group trusts elect to file with the DOL as a 103-12 entity. DOL regulation 29 CFR 2520.103-12 provides an alternative method of reporting for plans that invest in an entity, other than a master trust investment account, common/collective trust (CCT), or PSA, whose underlying assets include *plan assets* (within the meaning of DOL regulation 29 CFR 2510.2-101) of two or more plans that are not members of a related group of employee benefit plans. Making this determination can be complicated and may necessitate legal or other specialized industry consultation. Generally, a 103-12 entity will operate based on its legal structure (according to its operating agreements) in the form of a financial services product such as a trust or a limited partnership. Typically, audited financial statements are required by the entity's operating agreement and are prepared in accordance with GAAP in a format following industry standards consistent with the entity's operations. For example, a 103-12 entity that operates as a limited partnership would prepare financial statements in accordance with GAAP for limited partnerships. See paragraph A.56 of the EBP Guide for guidance on the filing requirements for 103-12 entities.

.73 To determine the auditing procedures for a plan's investment in a 103-12 entity, the auditor needs to understand the legal structure (for example, limited partnership or trust) and follow the auditing procedures as described in paragraphs 7.60 (limited partnerships) or 7.20–7.22 (CCTs) in the EBP Guide.

Self-Directed Investments

.74 Plan sponsors of participant-directed DC plans continue to allow participants to expand their control over investment decisions through self-directed investments, which are sometimes referred to as self-directed brokerage accounts. These features allow participants to select any investment they choose without oversight from the plan administrator or investment committee. Self-directed investments are different from participant-directed investment fund options. Participant-directed investment fund options allow the participant to select from among various available alternatives and to periodically change that selection. The alternatives are usually fund vehicles, such as registered investment companies (that is, mutual funds), commingled funds of banks, or insurance company PSAs providing varying kinds of investments (for example, equity funds and fixed income funds). Paragraphs 7.61–7.63 of the EBP Guide provide additional guidance on self-directed features. Also, see paragraphs 7.59 and 7.60 of the EBP Guide if the self-directed assets consist of alternative investments such as limited partnerships, hedge funds, or private equity funds.

Help Desk—Auditors should note that when a SAS No. 70 report is available, it often does not cover the self-directed investments. In addition, auditors should obtain a reconciliation of the self-directed investment balances according to the trustee or custodian to the amount recorded in the financial statements.

Help Desk—The Form 5500 Schedule H, line 4i—*Schedule of Assets Held (At End of Year)* allows one line item reporting for self-directed assets except for investments in hard-to-value assets such as limited partnerships, joint ventures, and real estate. See Form 5500 Schedule H instructions for further detail.

Auditing Health and Welfare Plans

.75 Health and welfare plans present unique audit challenges. They continue to be more complex and more expensive to audit than other types of plans. The administration of health claims payments has always been complicated, and the requirements for more timely claims processing, appeal decisions, and the privacy requirements under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) have added to these complexities. Standard audit programs for employee benefit plans should be tailored to the unique nature of health and welfare plans.

.76 Before performing a health and welfare plan audit, it is critical for the auditor to obtain a clear understanding of the plan. It is important to note that the audit requirement is of the plan and not of the trust. Therefore, the auditor needs to understand the benefits offered by the plan and should consider the following:

- Which benefits are fully insured versus self-insured
- Who the providers are and the elements of the contractual arrangement with the plan
- For self-insured claims, how the various claims are administrated and adjudicated; how fees are charged; and if the benefit payment is recognized when the check is written, when check is presented for payment, or when check has cleared the bank
- For insured benefits, how the premiums are determined and billed, and if the contract requires or provides for premium stabilization reserves or experience-rated adjustments
- What the funding arrangement is for each benefit offered (for example, paid from trust like the VEBA, taxable trust, 401(h) account or general assets of plan sponsor), and frequency of payment (daily, monthly, quarterly, or annually)
- What information systems are used to support the plan operations and which of those are in-house systems or outsourced

.77 When answering these questions, the auditor should consider the responses with regard to all covered participants (that is, active participants, dependents, terminated employees under the Consolidated Omnibus Budget Reconciliation Act (COBRA), and retirees). Understanding the various benefits offered, the service providers, and the control environment are integral to developing the audit approach and the sampling methodology.

.78 This section is intended to describe certain areas unique to health and welfare benefit plans, including suggested audit procedures[2] such as:

1. HIPAA privacy concerns
2. Health and welfare claims and potential problems
3. Contracts with benefit service providers
4. Rebates receivable
5. Accumulated eligibility credits
6. Actuarial data and census information
7. Stop-loss coverage
8. Premium stabilization reserves
9. COBRA
10. Health savings accounts and health reimbursement arrangements

1. HIPAA Privacy Concerns

.79 HIPAA established standards for the privacy and protection of individually identifiable electronic health information as well as administrative simplification standards. HIPAA includes protection for those who move from one job to another, who are self-employed, or who have preexisting medical conditions. It places requirements on employer-sponsored group health plans, insurance companies, and health maintenance organizations.

.80 The rules include standards to protect the privacy of individually identifiable health information. The rules (applicable to health plans, health care clearinghouses, and certain health care providers) present standards with respect to the rights of individuals who are the subjects of this information, procedures for the exercise of those rights, and the authorized and required uses and disclosures of this information. These are the first-ever national standards to protect medical records and other personal health information.

Business Associates Agreements

.81 HIPAA requires that plan sponsors enter into a business associates agreement with any of their service providers that have access to any protected health information (PHI). If asked to sign such confidentiality, indemnification, or business associates agreements, auditors need to take special care in reviewing these agreements. Often, the auditor may not agree with certain language in the agreement, resulting in delays in the audit until mutually agreeable language is determined. Many of the representations are very broad. The agreements generally require that the auditor hold the claim processor harmless from any actual or threatened action arising from the release of information without limitation of liability. In addition, the agreements may require the auditor to hold the client harmless as well. This last indemnification will most likely contradict provisions in the engagement letter between the auditor and the client. Before entering into any confidentiality agreements, the agreement should be reviewed by the auditor's legal counsel. Auditors need to keep in mind that the testing of claims by a third-party administrator could be delayed as a result of the request to sign such an agreement and should plan the timing of the audit accordingly. If the auditor is unable to obtain access to records as a result of not signing a confidentiality agreement or a third-party administrator's refusal to provide access under any circumstances, a scope limitation could result.

---

[2] Some of the audit procedures noted may be more extensive than what is required by generally accepted auditing standards (GAAS).

Audit Documentation

.82 As previously noted, HIPAA requires that plan sponsors enter into a business associates agreement with any of their service providers that have access to PHI. Accordingly, an auditor is considered a business associate and, after entering into a business associates agreement, should be permitted access to the necessary information required by professional standards to opine on a plan's financial statements. HIPAA regulations allow for the auditors' working papers to contain PHI; however, PHI in working papers obligates the auditing firm to comply with the HIPAA privacy laws and business associates agreement provisions to maintain the privacy of the PHI, which includes:

- Restricting access to the working papers
- Providing an accounting of disclosures of PHI
- Reporting to the sponsor any misuse of PHI by the accounting firm

.83 AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), (SAS No. 103) provides guidance to auditors on documentation requirements. See paragraphs 5.17–5.24 of the EBP Guide for guidance.

.84 *De-identified* health information is not subject to HIPAA. To be considered de-identified under HIPAA, information in work papers should not contain:

- Names
- Dates (such as birth date, admission date, discharge date, and date of death)
- Age if 90 or over
- Social security numbers (or block out all except last four digits)
- Telephone and fax numbers
- E-mail addresses
- Medical record numbers
- Health plan beneficiary numbers
- Account numbers

2. Health and Welfare Claims and Potential Problems

.85 The auditor should have a basic understanding of the terms of the plan and have the skill and knowledge to test that claims are being properly adjudicated. It is not expected that the auditor would have the knowledge of a skilled billing claims specialist or a skilled medical specialist when claims are processed by a third-party administrator. The auditor should be aware, however, of the typical problems that a health and welfare plan might experience when processing claims. The auditor should be aware of any processing problems that the plan is experiencing with claims and should discuss what the plan is doing to correct these issues with the plan administrator. See Appendix G of this Alert for claims testing information. Potential problems may include:

- Unbundling (charging for performance of multiple procedures when only one procedure was performed) or upcoding (charging for a higher level of service than the procedure actually performed)
- Fictitious services or unnecessary services performed by providers
- Duplicate claims or duplicate coverage

- Kickbacks
- Nontransmittal of rebates and discounts to the plan

.86 When testing health and welfare claims, some errors typically found include:

- ***Eligibility.*** Testing for eligibility is different from those procedures for a pension or 401(k) plan. In many cases the person receiving the benefit is different from the actual participant. Audit procedures may include verifying the coverage elected by the participant at the date of service. Many plans allow coverage for a spouse, dependents, or other family members. Most problems with eligibility relate to a participant who terminates and whose eligibility ceased before the date of service for which the claim was filed.
- ***Wrong individual.*** The claim was paid for the wrong person. This occurs when two or more participants have the same or similar names. Claims are also paid for the wrong family member.
- ***Other errors.*** These may occur in the diagnosis code, the Current Procedural Terminology or Healthcare Common Procedure Coding System code,[3] or in the information in the claims form.

3. Contracts With Benefit Service Providers

.87 For any contracts the plan has with a benefit service provider, the reconciliation of the amounts due to or from the benefit service provider should be examined to determine if the amounts are appropriate. Any amounts due from the benefit provider should be classified as a receivable in the statement of net assets, and amounts due to the provider would normally be shown in the financial statements with the other benefit obligations of the plan.

4. Rebates Receivable

.88 If there are rebates receivable from a service provider, those rebates should be examined to determine if the correct amount for the appropriate periods of time has been reflected in the proper period. In addition, the auditor should gain an understanding of the service contracts and apply procedures to determine if all rebates have been received by the plan. These include rebates from prescription drug programs or excess premiums paid over claims incurred under certain contractual arrangements with insurance companies. Finally, the auditor should consider the propriety of the rebate. For example, if the payment vehicle for the claims receiving the rebate was the Voluntary Employees' Beneficiary Association (VEBA) trust account, receipt of the rebate by the plan sponsor and deposit of such rebate into a nontrust account may not be appropriate.

5. Accumulated Eligibility Credits

.89 Many plans cover participants when they are terminated or otherwise unemployed. Single employer plans often cover up to 30 days after employment ends. Multiemployer plans can cover up to 60 days or longer after employment ends. In the construction industry, where work is seasonal, hour banks are often used to provide insurance coverage for the months when the participant does not work. If the plan permits accumulated eligibility credits, there should be an obligation recorded for those credits. The auditor should determine whether the plan provides for accumulated eligibility credits and should determine if the obligation has been properly calculated, reported, and disclosed in the financial statements in accordance with paragraph 23 of SOP 01-2, *Accounting and Reporting by Health and Welfare Benefit Plans*.

---

[3] Physicians' Current Procedural Terminology (CPT) is a listing of descriptive terms and identifying five-digit codes for reporting medical services and procedures. The Health Care Financing Administration (HCFA) developed level II and level III codes in its Healthcare Common Procedure Coding System (HCPCS codes) to bill for supplies and services not covered by a CPT code (level I).

6. Actuarial Data and Census Information

.90 The actuarial data and census information furnished by the health and welfare plan sponsor to the actuary, especially when the plan covers retirees, is as important as the data used in a defined benefit pension plan. The auditor should gain assurance through confirmation or other audit procedures to ensure that the actuarial data and census information furnished to the actuary is complete and accurate.

7. Stop-Loss Coverage

.91 One way for a plan to protect itself against excessive losses is to purchase stop-loss insurance. Stop-loss insurance can be either specific or aggregate. Specific stop-loss insurance protects the plan against claims that exceed a predetermined maximum per person or per family. All claims above the specific stop-loss amount (for example, $25,000) are normally reimbursed at 100 percent up to a limit contained in the plan. Aggregate stop-loss coverage reimburses the plan when total eligible claims exceed a predetermined aggregate, such as 125 percent of expected claims.

.92 The auditor should gain an understanding of the stop-loss coverage that a plan has and should test that claims have been properly filed against the policy within the period specified by the policy.

8. Premium Stabilization Reserves

.93 In some fully insured or minimum premium arrangements, an insurance company may require a contract holder to maintain a premium stabilization reserve. Such reserves are usually adjusted by the insurance company at the end of the policy year. The annual adjustment is often the computed difference, or some factor thereof, between actual claims experience of the insurer and premiums paid by the contract holder. Generally, premium stabilization reserves are held in the general assets of the insurance company and are used to pay future premiums of the contract holder. If the premium stabilization reserve is certain to provide future benefits to the plan, the reserve is reported as an asset of the plan. In some cases, the contract holder may liquidate the premium stabilization reserve via cash payment from the insurance company. In other cases, the premium stabilization reserve is forfeited by the contract holder in the event of termination of coverage. Criteria for realization of the reserve should be considered when evaluating the existence of the asset.

9. COBRA

.94 Many health and welfare plans are required to provide continuation of benefits upon termination of employment through COBRA. This continuation of benefits may be considered a postemployment or postretirement obligation, depending upon the terms of participation. In accordance with SOP 01-2, the benefit obligation associated with COBRA would be equal to the actuarial present value of the cost of such benefits, less the present value of expected participant contributions for such benefits. Many plans require that participants pay the estimated full cost of health benefits provided under COBRA. In such situations, the net cost to the plan sponsor for such benefits is zero, thus the plan would not recognize an obligation. If the plan sponsor subsidizes the cost of health benefits under COBRA, an obligation should be recognized by the plan to the extent that all criteria required by FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits*, FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, or both, are satisfied.

.95 In many cases, the collection of COBRA contributions and payment of COBRA benefits are performed by third-party administrators. The administration of these benefits should be understood, so accounting for all COBRA activity is included in the financial statements of the plan. In the event that benefits provided by COBRA are self-insured, the obligation for claims IBNR should include COBRA participants.

Notices for COBRA Continuation Health Care Coverage

.96 The DOL has published final rules clarifying the requirements for notices under COBRA for employees, employers, and plan administrators. The rules provide guidance and model notices for workers and family members to continue their group health care coverage. Under COBRA, most group health plans must give employees and their families the opportunity to elect a temporary continuation of their group health coverage when coverage would otherwise be lost for reasons such as termination of employment, divorce, or death. COBRA requires that certain notices be given before individuals can elect COBRA coverage. The plan administrator must give employees and spouses a general notice explaining COBRA when the employees and spouses first become covered under the plan. When an event occurs that would trigger a right to elect COBRA coverage, either the employer or the employee and his or her family members must notify the plan of the event. Finally, when the plan receives this notice, the plan must notify individuals of their COBRA rights and allow them to elect continuation coverage. Model notices contained in the regulation are available for download from the EBSA's Web site at www.dol.gov/ebsa.

10. Health Savings Accounts and Health Reimbursement Arrangements

.97 Individuals enrolled in certain high-deductible health plans can establish HSAs to receive tax-favored contributions (from either the employee or employer). The contribution made to the HSA is distributed on a tax-free basis to pay or reimburse qualifying[4] health expenses, may be used for future expenses, or may be used (on a taxable basis) for nonhealth purposes. Funds held in the HSA can be used to pay premiums for long-term care insurance and health insurance premiums while receiving unemployment benefits or continuation benefits under COBRA. The HSA's funds are required to be held by an insurance company or trustee (bank).

.98 When HSAs or HRAs are standalone, they have no audit requirement. However, HSAs and HRAs that are components of a health and welfare plan are subject to audit, as are the other components of that health and welfare plan, provided that the plan in question is subject to ERISA's audit requirement. In Field Assistance Bulletins (FABs) 2004-1 and 2006-2, the DOL addressed various questions concerning HSAs, including the issue of whether HSAs established in connection with employment-based group health plans constitute *employee welfare benefit plans* for purposes of Title I of ERISA. See these FABs and paragraph 4.06 in the EBP Guide for further information about HSAs and HRAs.

Eligible Compensation and Payroll Data

Eligible Compensation

.99 Plan documents specify the various aspects of compensation (for example, base wages, overtime, and bonuses) that are considered in the calculation of plan contributions for DC plans and in the determination of benefits in a defined benefit plan. Testing of payroll data should address the determination of eligible compensation for individual employees and comparison of the definition of eligible compensation used in the calculation to the plan document. Because this process is generally not included in the payroll testing of the plan sponsor or in SAS No. 70 type 2 reports, a comparison of eligible compensation per the plan document to eligible compensation used in plan operations is necessary.

.100 The auditor should examine the definition of compensation used to determine whether the method used is allowable within the Internal Revenue Code (IRC). An employer may use any definition of compensation that satisfies IRC section 414(s), which does not allow a method of determining compensation if that method discriminates in favor of highly compensated employees. Salary deferrals do not have to be included in the definition of compensation if the plan specifically provides for this limitation.

---

[4] This refers to qualified health expenses as defined under Internal Revenue Code section 213(d).

Payroll Data

.101 If one audit firm performs both the plan audit and corporate audit, there may be some efficiencies to be achieved surrounding the testing of payroll. While testing of the payroll area may have been performed in conjunction with the corporate audit, all of the assertions surrounding payroll relevant to the plan audit may or may not have been tested. The plan auditor needs to understand which assertions surrounding payroll were tested during the corporate audit to determine the scope of payroll testing required for the plan audit.

.102 For example, payroll testing performed for a corporate audit may include only high-level analytics with limited documentation of the control environment or performance of substantive procedures and may be insufficient to satisfy the payroll testing requirements for a plan audit. Often, payroll processing is outsourced to an outside service provider that may have a SAS No. 70 type 1 report, which provides a description of procedures and controls but does not have a SAS No. 70 type 2 report, which also includes testing of the procedures and controls and can be used to reduce the scope of substantive testing. There are some payroll service providers that have a SAS No. 70 type 2 report. However, the SAS No. 70 type 2 reports often have extensive user controls that must be present at the plan sponsor and be tested by the plan auditor to rely on the SAS No. 70 type 2 report. Paragraph 10.05 of the EBP Guide describes procedures the auditor should consider to test payroll in conjunction with the plan audit. Also see Appendix H of this Alert for guidance on payroll auditing.

.103 In certain circumstances, the plan sponsor may issue an integrated Rule 404 report under PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, AU sec. 320), that includes tests of controls surrounding the payroll area. The report should be reviewed carefully by the plan auditor to determine its usefulness in reducing the scope of testing for the plan audit. Plan auditors should be aware that while they may be able to rely on key controls tested by the corporate auditor to reduce the scope of payroll testing for the plan audit, key controls tested by management may not be used to reduce the scope of the payroll testing for the plan audit.

.104 If the plan sponsor has an internal audit department that has performed work on payroll data that is relevant to the audit, and if it is efficient to incorporate their work into the audit, AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *Professional Standards*, vol. 1), provides guidance on what the auditor needs to consider when making use of the internal auditors' work in the plan audit.

Actuarial Reports for Defined Benefit Plans

.105 Several economic and demographic assumptions are used in actuarial valuations for defined benefit plans to determine funding requirements and the actuarial present value of accumulated plan benefits in accordance with FASB Statement No. 35. One of the most significant economic assumptions is the discount rate. There are two approaches that can be used to select the discount rate. The most commonly used approach is to reflect the long-term expected rate of return on assets. This amount is generally stable from one year to the next. Based on recent economic trends, the range of discount rates used is 7 percent to 8.5 percent for 2006 calendar year-end plans. When this approach is used, the rate selected will generally be the same as that used for funding purposes. The plan auditors should not assume that the FASB Statement No. 35 discount rate under this approach will be the same as the FASB Statement No. 87, *Employers' Accounting for Pensions*, expected long-term rate of return on assets or the FASB Statement No. 87 discount rate. In most cases, the plan discount rate will be different than either of the FASB Statement No. 87 rates. Care should be taken to determine if the proper amount is disclosed in the benefit plan's financial statements.

.106 The second approach that may be used to select the FASB Statement No. 35 discount rate is to select a rate that reflects an insurance company's purchase rates as of the benefit information date. Because this is a settlement type of rate, it may be similar to (but not necessarily the same) as the FASB Statement No. 87 discount rate. A discount rate selected on this basis can be expected to change from year to year to reflect changes in the long-term interest rate markets.

.107 The most significant demographic assumptions used to determine the actuarial present value of accumulated plan benefits include mortality rates, turnover, retirement, marriage statistics, and form of payment or type of benefit elections. With the increase in life expectancies, the mortality assumption should be improving. Certain mortality tables used by actuaries include the 1983 GAM table, 1994 GAM, UP 1994, and RP-2000 tables. The 1983 GAM table is a required table for certain of the calculations to determine minimum funding requirements under ERISA through 2006. It has been common practice to use the same table for FASB Statement No. 35 purposes as is required for minimum funding purposes. It can therefore be expected that the 1983 GAM table will be used frequently for 2006 audits. Beginning in 2007, the new table that will be required for minimum funding purposes will be based on the RP-2000 table.

.108 Because older mortality tables such as 1983 GAM are becoming outdated and will no longer be used for ERISA purposes after 2006, auditors should consider challenging the use of such tables for purposes of determining the FASB Statement No. 35 liability beginning in 2007. It is possible that the use of the 1983 GAM table may continue to be acceptable depending on the plan's experience; however, most plans will be changing to use the 1994 GAM, UP 1994, or the recent RP-2000 tables for their mortality assumptions.

.109 Regardless of the assumption used, each assumption must be individually reasonable. Plan administrators should review actual plan experience with assumptions used periodically to determine if any changes should be made. The following should also be considered as plan auditors review actuarial valuations:

- Trends and nature of benefit distributions (for example, lump sum versus annuity) should be considered. A plan that predominantly pays lump sum benefits will have a higher cost than an equivalent plan that pays annuities. To properly value the plan's liabilities, there must be assumptions used to reflect the cost of the lump sum benefits. If there are only assumptions that reflect annuities, the lump sum benefits will be undervalued.
- Whether there has been a shift in the plan population over time should be considered. This could warrant a different assumption for turnover or retirement if, for example, participants are retiring much earlier or later than assumed.
- Whether there have been recent plan mergers or acquisitions should be considered. In the case of a plan merger, all assumptions should be reviewed for their continued reasonableness because the assumptions used for one plan may not be appropriate for the plan being merged.
- Whether there have been any plan benefit formula changes or a freezing of the plan should be considered. Changes in plan benefits available may affect anticipated turnover and retirement patterns. These assumptions should be reviewed if the plan is amended to change benefits.
- Whether consistent gains and losses are generated each year should be considered. If yes, this may indicate that assumptions are not reasonable based on actual experience.
- When reviewing an actuarial report, consideration should be given to:
  - *a.* Consistency of benefits accumulated each year (auditors should expect changes if there has been a plan merger, acquisition, or significant plan provision change)
  - *b.* Benefit payments in the roll forward of accumulated plan benefits should match the amount per the statement of changes in net assets (to properly match these amounts, it is necessary to understand if the beginning of the year or end of the year information is used for the actuarial valuation)

c. The asset value on the financial statements should match the asset value shown in the actuarial report

d. Inclusion of impact of a change in plan provisions and impact of merger, spin-off, or acquisition

.110 It is also important to note that the assumption of salary increases is not relevant for FASB Statement No. 35 because FASB Statement No. 35 is based on the disclosure of the actuarial present value of accumulated plan benefits, which does not take into account future salary increases.

The Use of Beginning-of-Year Benefit Information Date

.111 The presentation of the financial statement information and the footnotes are affected by the benefit information date selected for disclosure. The preferred approach is to use an end-of-year benefit information date. If this is done, the present value of accumulated plan benefits will be as of the same date as the net assets. In this case, at a minimum, there will be two statements of net assets available for benefits and one statement of changes in net assets. There will be two corresponding statements (or disclosure in the footnotes) of the present value of accumulated plan benefits and one statement of changes. Examples of this are shown in Exhibits D-1, D-2, D-3, and D-4 of the EBP Guide.

.112 However, if beginning-of-year benefit information is used, the date of the benefit information in the actuarial report may not match the date at which net assets are presented. For example, for financial statements presented as of December 31, 2006, and December 31, 2005, the actuarial valuation will be as of January 1, 2006. For the benefit information to match the statement of net assets, the present value of accumulated plan benefits should be presented as of December 31, 2005 (one day earlier). Typically, this will not cause a material misstatement unless there was a plan amendment that took place on January 1, 2006. In that case, the effect of the amendment must be removed. As shown in the EBP Guide, when beginning-of-year benefit information is used, two statements of net assets and two statements of changes would be included. Only a single year of present value of accumulated plan benefits is required with a reconciliation from the prior year. Examples of this are shown in Exhibits D-1, D-7, and D-8 of the EBP Guide.

Medicare Prescription Drug, Improvement, and Modernization Act

.113 The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 provides for subsidies payable from the government to an employer or a health care plan that provides drug benefits that are at least actuarially equivalent to the Medicare Part D benefits. Depending upon the type of plan, the benefit obligations should either reflect or not reflect the effect of these subsidies.

.114 For a single employer plan, the subsidies are generally payable to the employer and not to the plan. As a result, the employer's obligation is reduced, but the plan's obligation has not been reduced. In determining the employer's obligations according to FASB Statement No. 106 for the employer's financial statements, the benefit obligation is reduced to reflect the effect of the subsidy. Because the plan's obligation is not reduced, it is not appropriate for the plan to show the same FASB Statement No. 106 obligation that was reported by the employer. In these circumstances, two valuations are required. One valuation is needed for the employer's reporting under FASB Statement No. 106, and a second valuation (without removing the effect of the subsidy) is required to report the plan's obligations. Auditors need to be sure that the second valuation is being used for the plan's financial statements and that the plan is not reporting the same obligation as the employer.

.115 For a multiemployer plan, the subsidies are due to the plan. Therefore, the obligations reported by the multiemployer plan should reflect the effect of the Medicare subsidy. Unlike the single employer plan, there is no FASB Statement No. 106 reporting required for employers participating in the multiemployer plan. Therefore, there is only one valuation required for multiemployer plans, and that valuation should reflect the reduced obligation that reflects the Medicare subsidy.

Allocation Testing for DC Plans

.116 One of the objectives of auditing procedures applied to individual participant accounts of a DC plan is to provide the auditor with a reasonable basis for concluding whether net assets and transactions have been properly allocated to participant accounts in accordance with the plan documents. Each type of participant account activity during the year (for example, contributions, income allocations, expense allocations, and forfeiture allocations) should be taken into consideration in the determination of auditing procedures. In a limited-scope audit, the allocation of investment income to individual accounts is not certified by the trustee or custodian and should be tested by the auditor, taking into consideration reliance on a SAS No. 70 type 2 report, if available. See Chapter 10 of the EBP Guide for further discussion of auditing participant data.

Missing Participant Data

.117 With recent trends in plan mergers as a result of corporate actions, a number of plan sponsors have been experiencing difficulties in maintaining all pertinent participant data relating to census data and benefit payments. Often, plan sponsors do not maintain the proper detail supporting the deferred vested benefits for defined benefit plans. Lapses in maintaining data can also be caused by a change in service providers (for example, actuaries or other third-party administrators). ERISA requires plans to maintain records that are detailed enough to determine benefits due or that may become due. When auditors are unable to obtain the necessary information to test participant data or benefit payments, this could be considered a restriction on the scope of the audit. According to AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), restrictions on the scope of the audit, whether imposed by the client or by circumstances (such as the timing of his or her work, the inability to obtain sufficient competent evidential matter, or an inadequacy in the accounting records), may require the auditor to qualify his or her opinion or to disclaim an opinion. In these situations, the auditor will need to determine how significant the restriction on the scope of the audit is to the overall engagement to determine the effect on the auditor's report.

.118 The missing participant data issue is exacerbated when there is a change in auditor, especially for defined benefit plans. Often, the predecessor auditor has been auditing the participant data for years and is comfortable with the cumulative audit knowledge. However, if the participant data have not been maintained, the successor auditor may have a scope limitation. Auditors should take special care in determining if there are any missing participant data prior to accepting a new benefit plan engagement.

.119 Auditors should recommend that a plan sponsor consult with legal counsel and consider contacting the DOL prior to attaching a qualifier or disclaimer of opinion relating to a Form 5500 filing for a benefit plan.

Analytical Procedures as Substantive Tests

.120 For all audits of financial statements in accordance with GAAS, analytical procedures should be applied to some extent for the purposes of assisting the auditor in planning the nature, timing, and extent of other auditing procedures and as an overall review of the financial information in the final review stage of the audit. In some cases, however, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives. Analytical procedures may be used as substantive tests to obtain evidential matter about particular assertions related to account balances or classes of transactions. See Appendix F of this Alert for further guidance on the use of analytical procedures in employee benefit plan audits.

On the Horizon—Auditing

.121 Auditors should keep abreast of auditing developments and upcoming guidance that may affect their engagements. Presented in the following section is brief information about some ongoing projects that have particular significance to employee benefit plans or that may result in very significant changes. Read the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) for a more complete list of ongoing auditing and accounting projects. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.122 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and your membership and subscriber number in the message. The AICPA Web site also has links to the other standard-setting bodies listed in the previous table.

Auditing Pipeline—Nonpublic Companies

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.123 The ASB has issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69*, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 411). The ASB decided to coordinate the provisions and effective date of this exposure draft with the FASB proposed Statement, which can be obtained at www.fasb.org.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.124 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). In May 2006, the PCAOB announced plans to amend certain aspects of PCAOB Auditing Standard No. 2 to improve its implementation. Because the forthcoming changes to the PCAOB standard will be relevant to the revision of AT section 501, the ASB has decided to defer the issuance of a final AT standard until the PCAOB issues their amendments and the ASB has time to consider them.

Auditing Pipeline—Public Companies

.125 For pending projects for both the PCAOB and the SEC, readers may refer to the *SEC and PCAOB Alert—2006/07* (product no. 022497kk), mentioned previously.

AICPA Peer Review Developments—Recurring Deficiencies Found in Employee Benefit Plan Audits

.126 The AICPA, working with the EBSA, has made a concerted effort to improve the guidance and training available to auditors of employee benefit plans. The AICPA self-regulatory teams continue to be concerned about deficiencies noted on audits of employee benefit plans, and practitioners need to understand that severe consequences can result from inadequate plan audits, including loss of membership in the AICPA and loss of license. Some recurring deficiencies found in employee benefit plan audits include:

- Inadequate testing of participant data
- Inadequate testing of investments, particularly when held by outside parties
- Inadequate disclosures related to participant-directed investment programs
- Failure to understand testing requirements on a limited-scope engagement
- Inadequate consideration of prohibited transactions
- Incomplete description of the plan and its provisions
- Inadequate or missing disclosures related to investments
- Failure to properly report on a DOL limited-scope audit
- Improper use of limited-scope exemption because the financial institution did not qualify for such an exemption
- Inadequate or missing disclosures related to participant data
- Failure to properly report on or include the required supplemental schedules relating to ERISA and the DOL

.127 The EBP Guide provides guidance concerning areas of noted deficiencies.

Form 11-K Audits

Form 8-K Requirements for Form 11-K Filers

.128 For an employee benefit plan required to file Form 11-K, the SEC staff has historically expected a change in a plan's auditor to be reported on Form 8-K; however, plans that filed their financial statements as part of the plan sponsor's annual report (as provided for in Exchange Act Rule 15d-21) have not been expected to report changes in its auditors on Form 8-K. This requirement was discussed at the April 4, 2006, AICPA SEC Regulations Committee meeting. While the SEC staff unofficially stated that all employee stock purchase, savings, or similar plans that change auditors are not required to file a Form 8-K (regardless of whether it files its annual financial statements on Form 11-K or as part of the plan sponsor's annual report), the committee observed that, under Section 1000.08(m), "Notification of the Commission or Resignations and Dismissals from Audit Engagements for Commission Registrants," of the PCAOB Interim Quality Control Standards, an independent registered public accounting firm is required to report the termination of the auditor-client relationship for any SEC registrant, which is defined to include employee benefit plans that file Form 11-K. The SEC staff agreed to discuss its position on Form 8-K reporting by employee benefit plans with the PCAOB staff. Until authoritative guidance is provided by the SEC that provides a specific exemption, public accounting firms should continue to provide "five-day" letters to comply with PCAOB requirements for a change in auditor of a plan that files a Form 11-K. An employee benefit plan whose financial statements are filed as an amendment to the sponsor's Form 10-K does not meet the definition of an *SEC Engagement* and would therefore fall outside the scope of Section 1000.08(m).

Preapproval of Employee Benefit Plan Audits

.129 In December 2005, the SEC issued "Current Accounting and Disclosures Issues in the Division of Corporation Finance" to provide guidance regarding the preapproval of audits of employee benefit plans. Section II.R.3 is summarized in the following paragraph.

.130 An employee benefit plan may be an affiliate of a registrant as its plan sponsor. The SEC's independence rules related to pre-approval surround services provided to the issuer and the issuer's subsidiaries but not services provided to other affiliates of the issuer that are not subsidiaries. Therefore, the independence rules do not require the audit committee of the plan sponsor to pre-approve audits of the employee benefit plans, although the audit committee is encouraged to do so. When employee benefit plans are required to file Form 11-K, those plans are separate issuers under the Exchange Act; as a result, those issuers are subject to the preapproval requirements. This pre-approval can be provided by either the audit committee of the plan sponsor or the appropriate entity overseeing the activities of the employee benefit plan, such as the trustee, plan administrator or responsible party. The SEC's rules require that all fees, including fees related to audits of employee benefit plans, paid to the principal auditor be included in the company's fee disclosures, regardless of whether the audit committee of the company pre-approved those fees. As part of the exercise to gather the information for the required fee disclosures, the audit committee should be made aware of all fees paid to the principal auditor, including those related to audits of the employee benefit plans. The company may elect to separately indicate in their disclosures those fees paid to the principal auditor that were not subject to the pre-approval requirements. Registrants and their auditors are reminded that the financial statements included in a Form 11-K must be audited by an independent auditor that is registered with the PCAOB, and the audit report must refer to the standards of the PCAOB rather than GAAS.

Audit Reports—Following Two Sets of Standards

SEC Requirements

.131 The SEC requires employee stock purchase, savings, and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to Section 15(d) of the

Securities Exchange Act of 1934. Reports on Form 11-K must be filed with the SEC within 90 days after the end of the fiscal year of the plan, provided that plans subject to ERISA file the plan financial statements within 180 days after the plan's fiscal year end.

Applicable Audit Standards

.132 Plans that are required to file Form 11-Ks are deemed to be *issuers* under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the PCAOB. These plans may also be subject to ERISA and must submit to the DOL an audit in accordance with GAAS promulgated by the AICPA's ASB. It is our understanding that the SEC will not accept an audit report that references GAAS, and the DOL will not accept an audit report that does not reference GAAS.

Performance and Reporting Requirements

.133 Based on AICPA staff discussions with the SEC and PCAOB staff to seek clarification of the performance and reporting requirements for audits of 11-K filers, firms will need to conduct their audits of these 11-K plans in accordance with two sets of standards and prepare two separate audit reports: an audit report referencing PCAOB standards for Form 11-K filings with the SEC and a separate audit report referencing GAAS for DOL filings. The PCAOB and SEC staff believes that an opinion issued in accordance with PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*), does not allow a reference to GAAS, hence a "dual" standard report is not appropriate and will not be accepted by the SEC.

.134 Any questions regarding performance and reporting requirements of audits of financial statements of Form 11-K filers should be directed to the SEC Division of Corporation Finance, OCA at (202) 942-2960. See the EBP Guide, paragraph 13.19, for an example of an opinion for an 11-K audit.

PCAOB Standards and Conforming Amendments

.135 As a result of the Sarbanes-Oxley Act of 2002, both U.S. and non-U.S. public accounting firms wishing to prepare or issue reports, or to play a substantial role in the preparation or issuance of such reports, on U.S. public companies must be registered with the PCAOB and comply with the standards and rules of the PCAOB. The PCAOB's standards and rules apply to registered public accounting firms and their associated persons in connection with their audits of the financial statements of issuers, as defined in Section 2(a)(7) of the Sarbanes-Oxley Act, and those firms' auditing and related attestation practices. Plans that are required to file Form 11-K are deemed to be *issuers* under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the PCAOB. The PCAOB does not intend to suggest that registered public accounting firms and their associated persons must comply with the PCAOB's standards and rules in auditing nonissuers. Auditors who fall within the PCAOB's scope should understand and follow the standards, rules, and other requirements of the PCAOB. All PCAOB standards and rules must be approved by the SEC before taking effect.

PCAOB Auditing Standard No. 4

.136 Since the publication of last year's Alert, the PCAOB has issued PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* (AICPA, *PCAOB Standards and Related Rules*). This standard applies if auditors report on the elimination of a material weakness in a company's internal control over financial reporting. The standard establishes a voluntary engagement that would be performed at the election of the company.

> **Help Desk—**For information on auditing standards and related guidance issued subsequent to the writing of this Alert, please refer to the PCAOB Web site at www.pcaobus.org (audits of issuers only).

Accounting Issues

Recent Accounting Pronouncements

.137 Presented in the following table is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)* An employer without publicly traded equity securities is required to recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after June 15, 2007. However, an employer without publicly traded equity securities is required to disclose certain information in the notes to financial statements for a fiscal year ending after December 15, 2006, but before June 16, 2007, unless it has applied the recognition provisions of this Statement in preparing those financial statements.
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115* This Statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157, *Fair Value Measurements*.
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* This Interpretation is effective for fiscal years beginning after December 15, 2006. Earlier application of the provisions of this Interpretation is encouraged if the enterprise has not yet issued financial statements, including interim financial statements, in the period this Interpretation is adopted.
FASB Emerging Issues Task Force (EITF) Issues (Various dates)	Go to www.fasb.org/eitf/ for a complete list of EITF Issues.
FSPs (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.

FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*

.138 FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109,* clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.139 This Interpretation is effective for fiscal years beginning after December 15, 2006. Earlier application of the provisions of this Interpretation is encouraged if the enterprise has not yet issued financial statements, including interim financial statements, in the period this Interpretation is adopted.

FASB Statement No. 157, *Fair Value Measurements*

.140 FASB Statement No. 157, *Fair Value Measurements,* defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements because the FASB previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice.

.141 This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year.

FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*

.142 FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R),* improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity or changes in unrestricted net assets of a not-for-profit organization. This Statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.143 An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006.

.144 An employer without publicly traded equity securities is required to recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after June 15, 2007.

.145 However, an employer without publicly traded equity securities is required to disclose certain information in the notes to financial statements for a fiscal year ending after December 15, 2006, but before June 16, 2007, unless it has applied the recognition provisions of this Statement in preparing those financial statements.

Help Desk—FASB Statement No. 158 will result in testing of investment amounts at the plan sponsor. Such testing by the plan sponsor audit team would not preclude the plan auditor from performing a limited-scope audit of the plan.

.146 When the auditor audits both the plan sponsor and the plan, coordination of investment testing with the plan sponsor audit team may be useful. If the plan auditor does not audit the plan sponsor, consideration should be given to inquiring of the client if any issues arose during the audit of the plan sponsor when auditing investments.

Securities Lending Transactions

.147 Under FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, plans that engage in securities lending should present the assets received in return for the securities, as well as the exchanged securities, on the statement of net assets available for benefits. The plan should also recognize its obligation to return the collateral in the statement of net assets available for benefits. The exchanged securities, as well as the assets received for them (if an investment), should be reported on the ERISA-required supplemental schedule of assets (held at end of year) with the appropriate disclosures.

.148 For securities lending arrangements within a master trust, footnote disclosure of the master trust investments should include the collateral pledged as well as an offsetting liability for the return of the collateral. Because plan investments in a master trust are recorded as a single line item on the plan's statements of net assets, securities lending in the master trust would not be reflected on the face of the plan's financial statements. Often, auditors are unaware that the plan has entered into these transactions because the trustee or custodian nets the collateral assets against the collateral liabilities and because the only indication is the existence of "other income" on the statements. Auditors should ask the plan sponsor and service providers about the existence of a securities lending arrangement and review plan documents to determine the proper auditing procedures. It is important to note that the terms of security lending agreements vary; therefore, it is recommended that auditors obtain a copy and review the security lending agreements to gain an understanding of the security lending arrangements entered into by the plan sponsor.

.149 Securities loaned under a securities lending program at the end of the year should be reported on the Form 5500 Schedule H, line 4i—*Schedule of Assets (Held at End of Year)*. If the transferee has the right by custom or contract to sell or repledge the security loaned, a notation should be made in column (c) of the plan's Form 5500 Schedule H, line 4i—*Schedule of Assets (Held at End of Year)* showing there is a restriction on transferability of the loaned securities. If the transferee does not have the right by custom or contract to sell or repledge the security loaned, no such notation is required on the plan's Form 5500 Schedule H, line 4i—*Schedule of Assets (Held at End of Year).*

On the Horizon—Accounting

.150 Auditors should keep abreast of accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to employee benefit plans or that may result in very significant changes. Read the AICPA general *Audit Risk Alert—2006/07* (product no. 022337kk) for a more complete list of ongoing auditing and accounting projects. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.151 Refer to the table in the section "On the Horizon—Auditing" in this Alert for a listing of various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. Many more accounting and auditing projects exist in addition to those discussed there. Readers should refer to information provided by the various standard-setting bodies for further information.

Accounting Pipeline

.152 Presented in the following list are accounting pronouncements currently in the exposure process.

Proposed FASB Statement, *The Hierarchy of Generally Accepted Accounting Principles*

.153 This proposed Statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, that is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonpublic Companies" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final Statement.

FASB Project on Derivative Disclosures

.154 FASB Statement No. 133 has been criticized by certain analysts, auditors, investors, and others for lacking transparent disclosures, which would allow a user of the financial statements to assess the overall risk of derivatives on a reporting entity from both a quantitative and qualitative perspective. An exposure draft was issued on December 8, 2006, titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment deadline is March 2, 2007. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133. The proposed disclosures will be effective for both interim and annual reporting periods ending after December 15, 2007, with early application encouraged. At initial adoption, disclosures for earlier periods presented for comparative purposes will be encouraged but not required. Disclosures for earlier periods presented for comparative purposes will be required beginning in the first year after the year of initial adoption. Auditors can monitor the progress of this project on the FASB Web site.

Proposed FASB EITFs and FSPs

.155 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.156 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Regulatory Developments

2006 Form 5500 Series

.157 The DOL, IRS, and the PBGC have released the 2006 Form 5500 return/reports, schedules, and instructions to be used by employee benefit plans for plan year 2006 filings. The IRS has also released the

Form 5500-EZ return and instructions to be used by certain one-participant retirement plans for plan year 2006 filings.

.158 The modifications to the Form 5500 for plan year 2006 are described under "Changes to Note" in the 2006 instructions. Modifications to the Form 5500 Annual Report for 2006 include the following.

> ***Form 5500.*** (1) The lines 6 and 7 instructions on counting participants and beneficiaries in welfare benefit plans have been expanded to include the definition of when an individual is no longer a participant or beneficiary. (2) The instructions covering small and large pension plans, under the Pension Benefit Plan Filing Requirements, have been clarified for attaching the pages of Schedule SSA to Form 5500. Filers should attach only one page 1. Filers can attach more than one page 2 as necessary.
>
> ***Schedule B.*** (1) The instructions for lines 1d(2)(a), 1d(2)(c), and 6a have been modified because the PPA changed the interest rate to be used in calculating a plan's current liability for the 2006 plan year. (2) The PPA provides funding relief for certain defined benefit plans (other than multiemployer plans) maintained by a commercial passenger airline or by an employer whose principal business is providing catering services to a passenger airline. Special instructions have been added for this provision, allowing eligible plans to be funded using an alternative funding schedule based on a 17-year amortization of unfunded liabilities.
>
> ***Schedules H and I.*** The TIPs in the instructions for lines 4a and 4d of Schedules H and I have been updated to refer to the revised Voluntary Fiduciary Correction Program (VFCP), which was published in the Federal Register on April 19, 2006. The TIPs also explain that applicants that satisfy both the VFCP requirements and the condition of PTE 2002-51 are relieved from the obligation to file the Form 5330 with the IRS.
>
> ***Schedule P.*** The IRS no longer requires the filing of Schedule P, *Annual Return of Fiduciary of Employee Benefit Trust.*

.159 Modifications to the Form 5500-EZ Annual Report for 2006 include the following:

- The IRS has eliminated the filing requirement for the Schedule P, *Annual Return of Fiduciary of Employee Benefit Trust.*
- Instructions have been added for new line 10i for funding (see IRC section 412).

> **Help Desk**—The official government-printed forms are available by calling (800) TAX-FORM (800-829-3676). In addition, EBSA publications may be ordered by calling (866) 444-EBSA (3272). Information, copies of the forms, schedules, and instructions are available on the EBSA's Web site at www.efast.dol.gov. Filers should monitor the ERISA Filing Acceptance System (EFAST) Web site for information on approved software vendors when completing 2006 Forms 5500 by computer and for electronic filing options. Filers may contact the EFAST Help Line for general assistance by calling (866) 463-3278.

2006 Form M-1 for Multiple Employer Welfare Arrangements

.160 On December 7, 2006, the DOL published the 2006 Form M-1 annual report for multiple employer welfare arrangements (MEWAs). Plan administrators may use EBSA's online filing system to expedite processing of the form.

.161 MEWAs are arrangements that offer medical benefits to the employees of two or more employers or to their beneficiaries. The annual filing date for the 2006 Form M-1 is March 1, 2007. In addition, administrators can request an automatic 60-day extension to May 1, 2007. The 2006 form is virtually identical to the previous year's form.

.162 The online filing system is available on the DOL's Web site. It allows filers to complete the form and submit it at no cost. The online form can be completed in multiple sessions and can be printed for the filer's records. The Web site includes a user manual, Frequently Asked Questions, and a link to submit questions electronically.

> **Help Desk—**To use the online filing process, go to www.askebsa.dol.gov/mewa/. Technical assistance for the online filing system is also available by calling (202) 693-8600. Information about the Form M-1 and how to fill it out is available on the Web site or by calling (202) 693-8360. Paper copies of the form may be obtained by calling EBSA's toll free number at (866) 444-EBSA (3272) or visiting the Web site at www.dol.gov/ebsa and clicking on "Forms/Doc Requests."

Correspondence From EFAST or the DOL OCA

.163 Plan administrators often receive correspondence from the DOL regarding the Form 5500 filed for their pension and welfare benefit plans. These letters are generated by both the EFAST processing center in Lawrence, KS, and the DOL's OCA in Washington, DC. Auditors are often asked by their clients to assist in the resolution of issues contained in these government letters.

EFAST-Generated Correspondence

.164 Each year, plan administrators complete and submit to the DOL a Form 5500 for each of their qualified employee benefit plans. Large plans (and certain small pension plans) also require an annual audit, and the independent auditor's report and audited financial statements become an integral part of the Form 5500 filing.

.165 Once completed, the Form 5500 is filed with the DOL's EFAST processing center in Lawrence, KS. EFAST uses sophisticated electronic technologies to review each filing before acceptance. The DOL, IRS, and the PBGC have created a variety of edit tests designed to check for things such as completeness, accuracy, timeliness, internal consistency, missing schedules or attachments, and failure to answer mandatory questions. If deficiencies or discrepancies are identified after subjecting Form 5500 filings to these multiagency edit tests, the EFAST system generates a letter addressed to the plan administrator that identifies the problem(s) and provides 30 days to make any necessary corrections. After 30 days, if the filing remains deficient, EFAST will generate a second letter in a final attempt to perfect the filing. At the end of a second 30-day period, the Form 5500 filings post to the ERISA database. Those filings still containing errors or omissions are flagged for further review by the DOL's OCA, the IRS, and the PBGC.

Correspondence From the OCA

.166 The DOL's OCA has the responsibility for enforcing ERISA reporting and disclosure requirements. This includes ensuring that the Form 5500 filings are filed timely and correctly and determining whether plan audits are performed in accordance with professional auditing and regulatory standards. The OCA routinely queries the ERISA database and targets for review Form 5500 filings that satisfy certain criteria, including those filings in which processing errors went uncorrected and those with improperly prepared auditor's reports. The OCA staff reviews the Form 5500 filings and requests copies of working papers that support audit engagements. If the OCA staff identifies problems, a formal enforcement process commences with the issuance of a Notice of Rejection (NOR) against the plan administrator.

.167 Upon receipt of an NOR, the plan administrator has 45 days to make any necessary corrections to the Form 5500 filing. This may involve the auditors having to correct their audit reports or even perform additional fieldwork in audit areas where work was previously not performed or deemed by the DOL to be insufficient. At the end of the 45-day period, if the Form 5500 filing remains deficient, the DOL issues a Notice of Intent to Assess a Penalty (NOI), potentially subjecting the plan administrator to civil penalties of up to

$1,100 per day (imposed from the day after the original due date of the filing). As a policy matter, however, most deficiencies are penalized at $150 per day with penalties capped at $50,000.

.168 When plan administrators receive an NOI, they have 35 days to submit to the DOL a Statement of Reasonable Cause, submitted under penalty of perjury, in which they set forth any reasons why the penalty should be abated in part or in full. It is important to note that traditionally the DOL will not consider abatement of any penalties in cases where deficiencies still exist. If the plan administrator fails to comply with the requirements of the NOI, the penalty becomes a final agency action, and the plan administrator forfeits all appeal rights.

.169 After the DOL reviews the Statement of Reasonable Cause, the agency issues a Notice of Determination that contains the final penalty amount assessed against the plan administrator. The plan administrators may choose to pay the penalty amount or, within 35 days as provided for in the letter, file an "Answer" with the administrative law judge that appeals the penalty.

Important Reminders

.170 Plan administrators should make all efforts to respond timely and thoroughly to all correspondence they receive from the EFAST processing center. Failure to do so may result in future enforcement correspondence from the DOL's OCA. The DOL's penalty process contains rigid timeframes, and DOL officials do not have latitude to extend the deadlines contained in any correspondence. Plan administrators should also be aware that they may receive future enforcement correspondence from the IRS or PBGC regarding any unresolved filing issues.

.171 Plan auditors often assist their clients in responding to the various DOL penalty notices. To respond on behalf of their clients, plan auditors must be authorized to do so pursuant to a duly executed, notarized power of attorney. Any questions regarding the DOL penalty process should be directed to the OCA at (202) 693-8360.

EBSA-Enhanced Programs to Assess Plan Audit Quality

.172 The EBSA continues its enhanced programs aimed at assessing and improving the quality of employee benefit plan audits. According to the EBSA, 48 public accounting firms audit more than 100 plans that cover approximately 80 percent of plan assets subject to audit. The balance of the more than 70,000 ERISA audits is performed by nearly 10,000 different CPA firms, 8,200 of whom perform 5 audits or fewer. The EBSA utilizes both top-down and bottom-up strategies in selecting and evaluating ERISA audits.

.173 First, the EBSA conducts periodic inspections of firms with substantial ERISA audit practices. The EBSA staff meets with firm management, reviews firm policies and procedures that relate to employee benefit plan audits, and conducts onsite reviews of a sample of ERISA audit engagements. This top-down approach will provide the EBSA with more efficient means of evaluating the quality of audit work performed by these large firms and ensure that findings and recommendations are communicated to those in a position to effect any necessary changes. To date, the EBSA has completed five such reviews.

.174 Next, for firms with small- to medium-sized employee benefit plan audit practices, the EBSA focuses its in-house work on reviewing copies of selected audit working papers. When circumstances warrant, the scope of the EBSA's reviews is expanded to additional audit areas. To date, the EBSA has conducted approximately 900 of these desk reviews.

.175 In instances in which deficient audit work is identified, the related Form 5500 filings are subject to rejection, and auditors potentially face referral to the AICPA's Professional Ethics Division or State Board of Public Accountancy.

.176 Finally, the EBSA has expanded its enforcement efforts dealing with fiduciary breaches to include determining whether plan auditors may be considered as *knowing participants*. An auditor is considered a knowing participant if at least one of the three following elements is present:

- The plan auditor took affirmative action to further the violation.
- The plan auditor helped in concealing the violation.
- The plan auditor failed to act when required to do so by applicable professional standards.

DOL Fiduciary Education Initiatives

.177 The DOL is committed to providing employers and service providers with clear and easy-to-access information on how to comply with federal employment laws. Such information and guidance are often referred to as *compliance assistance*, which is a cornerstone of the DOL's mission.

.178 The DOL's fiduciary education initiatives include nationwide educational seminars to help plan sponsors understand rules and meet their responsibilities to workers and retirees, thereby improving their financial security. Also included are the following DOL-issued publications:

Meeting Your Fiduciary Responsibilities. To meet their responsibilities as plan sponsors, employers need to understand some basic rules, specifically ERISA. ERISA sets standards of conduct for those who manage an employee benefit plan and its assets (called fiduciaries). This publication provides an overview of the basic fiduciary responsibilities applicable to retirement plans under the law.

Understanding Retirement Plan Fees and Expenses. This booklet will help retirement plan sponsors better understand and evaluate their plan's fees and expenses. While the focus is on fees and expenses involved with 401(k) plans, many of the principles discussed in the booklet will also have application to all types of retirement plans.

401(k) Plan Fee Disclosure Tool. This is a form that provides employers with a handy way to make cost-effective decisions and compare the investment fees and administrative costs of competing providers of plan services.

Selecting an Auditor for Your Employee Benefit Plan. Federal law requires employee benefit plans with 100 or more participants to have an audit as part of their obligation to file the Form 5500. This booklet will assist plan administrators in selecting an auditor and reviewing the audit work and report.

Selecting and Monitoring Pension Consultants—Tips for Plan Fiduciaries. ERISA requires that fiduciaries of employee benefit plans administer and manage their plans prudently and in the interest of the plan's participants and beneficiaries. In carrying out these responsibilities, plan fiduciaries often rely heavily on pension consultants and other professionals for help. To encourage the disclosure and review of more and better information about potential conflicts of interest, the DOL and the SEC have developed a set of questions to assist plan fiduciaries in evaluating the objectivity of the recommendations provided, or to be provided, by a pension consultant.

Tips for Selecting and Monitoring Service Providers for Your Employee Benefit Plan. Business owners are responsible for ensuring that their 401(k) plans comply with federal law and rely on other professionals to assist them with their plan duties. Selecting a service provider is one of the most important responsibilities of a plan sponsor. The EBSA has prepared this set of tips to assist business owners in carrying out these responsibilities.

Reporting and Disclosure Guide for Employee Benefit Plans. This Guide is intended to be used as a quick reference tool for certain basic reporting and disclosure requirements under ERISA.

Help Desk—Further information regarding DOL publications and the dates and locations of upcoming educational programs may be found on the EBSA's Web site at www.dol.gov/ebsa.

Delinquent Filer Voluntary Compliance Program

.179 The Delinquent Filer Voluntary Compliance (DFVC) Program is designed to encourage plan administrators to file overdue annual reports by paying reduced penalties. Established in 1995 and revised in March 2002, the program offers incentives for delinquent plan administrators to voluntarily comply with ERISA's annual reporting requirements.

Change in Mailing Address

.180 In April 2006, the DOL announced new addresses to be used for the DFVC Program. The new addresses are provided in the following table. Mail submitted to the former address will be returned, unopened, to the sender.

Standard Mail	*Private Delivery Service*
DFVC Program—DOL P.O. Box 70933 Charlotte, NC 28272-0933	DFVC Program—DOL QLP Wholesale Lockbox—NC 0810 1525 West WT Harris Blvd. Charlotte, NC 28262

Program Eligibility

.181 Eligibility in the DFVC Program continues to be limited to plan administrators with filing obligations under Title I of ERISA who comply with the provisions of the program and who have not been notified in writing by the DOL of a failure to file a timely annual report under Title I of ERISA. Form 5500-EZ filers and Form 5500 filers for plans without employees (as described in 29 CFR 2510.3-3(b) and (c)) are not eligible to participate in the DFVC Program because such plans are not subject to Title I.

Program Criteria

.182 Participation in the DFVC Program is a two-part process. First, file with the EBSA a complete Form 5500 Series annual return/report, including all schedules and attachments, for each year relief is requested. Special simplified rules apply to "top hat" plans and apprenticeship and training plans. Second, submit to the DFVC Program the required documentation and applicable penalty amount. The plan administrator is personally liable for the applicable penalty amount, and, therefore, amounts paid under the DFVC Program shall not be paid from the assets of an employee benefit plan.

Penalty Structure

.183 ***Per day penalty.*** The basic penalty under the program is $10 per day for delinquent filings.

Per filing cap. The maximum penalty for a single late annual report is $750 for a small plan (generally a plan with fewer than 100 participants at the beginning of the plan year) and $2,000 for a large plan.

Per plan cap. This cap is designed to encourage reporting compliance by plan administrators who have failed to file an annual report for a plan for multiple years. The per plan cap limits the penalty to $1,500 for a small plan and $4,000 for a large plan regardless of the number of late annual reports filed for the plan at the same time. There is no "per administrator" or "per sponsor" cap. If the same party is the administrator or sponsor of several plans required to file annual reports under Title I of ERISA, the maximum applicable penalty amounts would apply for each plan.

Small plans sponsored by certain tax-exempt organizations. A special per plan cap of $750 applies to a small plan sponsored by an organization that is tax-exempt under IRC section 501(c)(3). The $750 limitation applies regardless of the number of late annual reports filed for the plan at the same time. However, it is not available if, as of the date the plan files under the DFVC Program, there is a delinquent annual report for a plan year during which the plan was a large plan.

"Top hat" plans and apprenticeship and training plans. The penalty amount for "top hat" plans and apprenticeship and training plans is $750.

IRS and PBGC Participation

.184 Although the DFVC Program does not cover late filing penalties under the IRC or Title IV of ERISA, the IRS and PBGC agreed to provide certain penalty relief for delinquent Form 5500s filed for Title I plans where the conditions of the DFVC Program have been satisfied.

> **Help Desk—**Questions about the DFVC Program should be directed to EBSA by calling (202) 693-8360. For additional information about the Form 5500 Series, visit the EFAST Internet site at www.efast.dol.gov or call the EBSA Help Desk toll-free at (866) 463-3278.

VFCP

.185 The VFCP encourages voluntary compliance by self-correcting violations of the law. The program also helps plan officials understand the law and gives immediate relief from payment of excise taxes under a class exemption.

.186 In April 2006, the EBSA expanded and simplified the VFCP to help employers and their professional advisors voluntarily correct violations of the law for employee benefit plans. This update to the VFCP reflects public comments and includes:

- Expansion and simplification of eligible transactions
- Streamlined documentation and clarified eligibility requirements
- A model application form
- Clarification of what constitutes *under investigation*, allowing more entities to qualify for the program
- Relief from civil penalties for transactions involving health and welfare plans

.187 Under the VFCP, employers may voluntarily correct specific ERISA violations. Applicants must fully correct any violations, restore to the plan any losses or profits with interest, and distribute any supplemental benefits owed to eligible participants and beneficiaries. A "no action" letter is given to plan officials who properly correct violations.

.188 The DOL also provides applicants conditional relief from payment of excise taxes for certain VFCP transactions under a class exemption related to the VFCP. The amended class exemption was also published in the Federal Register in April 2006.

> **Help Desk—**For more information about the VFCP Program, contact a local EBSA regional office through its toll-free number (866) 444-EBSA (3272) or visit the DOL online at www.dol.gov/ebsa.

EBSA Outreach and Customer Service Efforts

> **Help Desk—**The EBSA continues to encourage auditors and plan filers to call its Division of Accounting Services at (202) 693-8360 with ERISA-related accounting and auditing questions. Questions concerning the filing requirements and preparation of Form 5500 should be directed to the EBSA's EFAST Help Desk at its toll-free number (866) 463-3278.

.189 In addition to handling technical telephone inquiries, the EBSA is involved in numerous outreach efforts designed to provide information to practitioners to help their clients comply with ERISA's reporting and disclosure requirements. The agency's outreach efforts continue to focus on plan audit quality, the current Form 5500, the EFAST Processing System, and other agency-related developments. Questions regarding these outreach efforts should be directed to the OCA at (202) 693-8360. Practitioners and other members of the public may also wish to contact the EBSA at its Web site at www.dol.gov/ebsa. The Web site also provides information on EBSA's organizational structure, current regulatory activities, and customer service and public outreach efforts.

Timeliness of Remittance of Participant Contributions Remains an Enforcement Initiative for the EBSA

.190 The EBSA continues to focus on the timeliness of remittance of participant contributions in contributory employee benefit plans. Participant contributions are plan assets on the earliest date that they can reasonably be segregated from the employer's general assets. The latest date that pension plans can be segregated is the 15th business day of the month following the month in which the participant contributions are withheld or received by the employer. The latest date that welfare plans can be segregated is 90 days from the date on which such amounts are withheld or received by the employer.

Reporting of Late Remittances

.191 Failure to remit or untimely remittance of participant contributions constitutes a prohibited transaction under ERISA section 406, regardless of materiality. Such transactions constitute either a use of plan assets for the benefit of the employer or a prohibited extension of credit. In certain circumstances, such transactions may even be considered an embezzlement of plan assets.

.192 Information on all delinquent participant contributions should be reported on line 4a of either Schedule H or Schedule I of the Form 5500, regardless of the manner in which they have been corrected. In addition, plan administrators should correct the prohibited transaction with the IRS by filing a Form 5330 and paying any applicable excise taxes.

.193 Beginning with the 2003 Form 5500, information on delinquent participant contributions is no longer required to also be reported on line 4d of Schedule G. For large plans that are subject to the audit requirement, delinquent participant contributions reported on line 4a that constitute prohibited transactions (excluding those that have been corrected under the VFCP and for which the conditions of PTE 2002-51 have been satisfied) may be reported on a separate supplemental schedule to be attached to the Form 5500 and reported on by the Independent Qualified Public Accountant (IQPA).

.194 ERISA and DOL regulations require additional information to be disclosed in supplemental schedules. Some of this information is required to be covered by the auditor's report. AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1), provides guidance on the form and content of reporting when the auditor submits a document containing information accompanying the basic financial statements. If the auditor concludes that the plan has entered into a prohibited transaction and the transaction has not been properly disclosed in the required supplemental schedule, the auditor should (1) express a qualified opinion or an adverse opinion on the supplemental schedule if the transaction is material to the financial statements or (2) modify his or her report on the supplemental schedule by adding a paragraph to disclose the omitted transaction if the transaction is not material to the financial statements. See Chapter 11, "Party in Interest Transactions," of the EBP Guide for further discussion of prohibited transactions.

.195 Plan officials faced with remitting delinquent participant contributions should consider applying to the DOL's VFCP. Plans that fully comply with the program, including satisfaction of the conditions of Prohibited Transaction Exemption (PTE) 2002-51, should expect the following:

- To receive a "no action" letter issued by the DOL that provides for no imposition of Section 502(l) penalties
- To receive relief from the excise tax provisions of the IRC
- To continue to report the occurrence and amount of the corrected delinquent remittances on line 4a of either Schedule H or Schedule I (but not on line 4d or Schedule G)
- To not be required to report such transactions as supplemental information if the plan is required to be audited because the transactions are not considered to be prohibited transactions

.196 The EBSA's Web site, www.dol.gov/ebsa, contains useful information about the VFCP, including a fact sheet, an FAQ section, and a sample "no action" letter.

Reporting of Delinquent Loan Repayments

.197 Generally speaking, participant loan repayments are not subject to the DOL's participant contribution regulation (29 CFR 2510.3-102). Accordingly, their delinquent remittance is not reported on line 4a of either Schedule H or Schedule I. However, delinquent remittance of participant loan repayments is a prohibited transaction.

.198 In Advisory Opinion 2002-2A, the DOL concluded that, while not subject to the participant contribution regulation, participant loan repayments paid to or withheld by an employer for purposes of transmittal to an employee benefit plan are sufficiently similar to participant contributions to justify, in the absence of regulations providing otherwise, the application of principles similar to those underlying the final participant contribution regulation for the purpose of determining when such repayments become assets of the plan. Specifically, the Advisory Opinion concluded that participant loan repayments paid to or withheld by an employer for purposes of transmittal to the plan become plan assets as of the earliest date on which such repayments can reasonably be segregated from the employer's general assets.

.199 Accordingly, the DOL will not reject a Form 5500 report based solely on the fact that delinquent forwarding of participant loan repayments is included on line 4a of the Schedule H or Schedule I. Filers that choose to include such participant loan repayments on line 4a must apply the same supplemental schedule and IQPA disclosure requirements to the loan repayments as apply to delinquent transmittals of participant contributions.

.200 Delinquent forwarding of participant loan repayments is eligible for correction under the VFCP and PTE 2002-51 on terms similar to those that apply to delinquent participant contributions.

> **Help Desk—**For questions or further information, contact the Office of Regulations and Interpretations at the DOL at (202) 693-8500 or the EBSA's Web site at www.dol.gov/ebsa.

DOL Final Rule on Electronic Filing of the Form 5500 and Proposed Changes to the 2008 Form 5500

.201 On July 21, 2006, the EBSA published in the Federal Register a final regulation requiring plans to file Form 5500 annual reports electronically, beginning with 2008 plan year filings due in 2009. Simultaneously, the EBSA, along with the IRS and the PBGC, proposed changes to the forms that will be processed under the new electronic system.

.202 The wholly electronic filing system will be streamlined, cost effective, and more efficient for plans. It will also increase the accuracy of information used by the public and the government. Under the final rule, the electronic filing requirement will be effective for plan years starting on or after January 1, 2008. This will give plans and service providers time to adapt to the new electronic system and any changes to the Form 5500.

.203 Among the proposed revisions to the Form 5500 are (1) creation of a new short form for small plans whose assets are held in easy-to-value investments with regulated financial institutions, (2) increased transparency of plan-related fees and expenses, (3) improved information on the funding of defined benefit plans, and (4) realignment of the reporting rules of 403(b) plans (subject to Title I) to be compatible with those of 401(k) plans. The new system will also customize the information required to be filed to the type of plan involved in each filing.

> **Help Desk—**The text of the final rule and the proposed changes to the Form 5500 are available on the EBSA Web site at www.dol.gov/ebsa.

DOL Proposes PPA Revisions to the Form 5500 Annual Report for 2008

.204 On December 8, 2006, the EBSA, IRS, and PBGC announced proposed supplemental revisions to the 2008 Form 5500.

.205 The proposed revisions implement amendments to ERISA's annual reporting and pension funding requirements and the IRC enacted them as part of the PPA. The proposal supplements a more general revision of the 2008 Form 5500 proposed by the agencies in July 2006. The supplemental proposal would replace the Schedule B, *Actuarial Information*, filed by defined benefit pension plans with separate actuarial schedules for multiemployer plans and single-employer plans.

.206 The supplemental proposal would also add questions to the Schedule R, *Retirement Plan Information*, to collect new information on defined benefit pension plans required under the PPA.

.207 Finally, the supplemental proposal would establish the Form 5500-SF, which was part of the agencies' July 2006 proposal, as the simplified report required by PPA for plans with fewer than 25 participants.

.208 These proposed revisions would be effective for 2008 plan year filings.

DOL Abandoned Individual Account Plan Final Regulations and Class Exemption

.209 On April 21, 2006, the DOL published in the Federal Register three regulations to facilitate the termination of, and distribution of benefits from, individual account pension plans that have been abandoned by their sponsoring employers. Significant business events, such as bankruptcies, mergers, acquisitions, and other similar transactions affecting the status of an employer, too often result in employers, particularly small employers, abandoning their individual account pension plans (for example, 401(k) plans). When this happens, custodians such as banks, insurers, and mutual fund companies are left holding the assets of these abandoned plans but do not have the authority to terminate such plans and make benefit distributions, even in response to participant demands. In these situations, participants and beneficiaries have great difficulty accessing the benefits they have earned.

Overview of Regulations

.210 The regulations establish standards for determining when a plan is abandoned, simplify procedures for winding up the plan and distributing benefits to participants and beneficiaries, and provide guidance on who may initiate and carry out the winding-up process.

Plan Abandonment

.211 A plan will generally be considered abandoned if no contributions to or distributions from the plan have been made for a period of at least 12 consecutive months and, following reasonable efforts to locate the plan sponsor, it is determined that the sponsor no longer exists, cannot be located, or is unable to maintain the plan.

Determinations of Abandonment

.212 Only a qualified termination administrator (QTA) may determine whether a plan is abandoned under the regulations. To be a QTA, an entity must hold the plan's assets and be eligible as a trustee or issuer of an individual retirement plan under the IRC (bank, trust company, mutual fund family, or insurance company).

Termination and Winding-Up Process

.213 The regulations establish specific procedures that QTAs must follow, including:

- Notifying the EBSA prior to and after terminating and winding up a plan
- Locating and updating plan records
- Calculating benefits payable to participants and beneficiaries
- Notifying participants and beneficiaries of the termination and their rights and options
- Distributing benefits to participants and beneficiaries
- Filing a summary terminal report

.214 A QTA is not required to amend a plan to accommodate the termination, and the rules include model notices that the QTA may use.

Rollover Safe Harbor for Missing Participants

.215 The regulations establish a fiduciary safe harbor for the investment of rollover distributions from terminated plans to IRAs for missing participants.

Fiduciary Liability and Annual Reporting Relief

.216 QTAs that follow the regulation will be considered to have satisfied the prudence requirements of ERISA with respect to winding-up activities.

.217 The regulations provide annual reporting relief, under which QTAs are not responsible for filing a Form 5500 Annual Report on behalf of an abandoned plan, either in the terminating year or any previous plan years. The QTA must complete and file a summary terminal report at the end of the winding-up process.

Class Exemption

.218 The exemption would cover transactions where the QTA selects and pays itself for the following:

- Services rendered prior to becoming a QTA
- Services in connection with terminating and winding up an abandoned plan
- Distributions from abandoned plans to IRAs or other accounts maintained by the QTA resulting from a participant's failure to provide direction

Administration

.219 The Abandoned Plan Program is administered by the EBSA's national and regional offices. Notifications under the program should be sent by e-mail to qtanotices@dol.gov or by mail to:

Abandoned Plan Coordinator
U.S. Department of Labor
Employee Benefits Security Administration
Office of Enforcement
200 Constitution Avenue, NW, Suite 600
Washington, DC 20210
Tel. (202) 693-8466

Contact Information

.220 For information regarding the Abandoned Plan Program, contact the DOL at (866) 444-EBSA (3272). For questions about the regulations, contact the EBSA's Office of Regulations and Interpretations at (202) 693-8500. For questions about the class exemption, contact the EBSA's Office of Exemption Determinations at (202) 693-8540.

DOL Consultant Advisor Program

.221 The EBSA has initiated a new enforcement project, the Consultant Advisor Program (CAP), that focuses on the receipt of improper, undisclosed compensation by pension consultants and other investment advisers. The EBSA's investigations will seek to determine whether the receipt of such compensation violates ERISA because the adviser or consultant used its position with a benefit plan to generate additional fees for itself or its affiliates. The agency may also need to investigate individual plans to address such potential violations as failure to adhere to investment guidelines and improper selection or monitoring of the consultant or adviser. The CAP will also seek to identify potential criminal violations such as kickbacks or fraud.

Independence Request for Information

.222 On September 11, 2006, the EBSA published in the Federal Register a Request for Information (RFI) concerning whether the DOL should amend its guidelines on the independence of accountants who audit employee benefit plans. The RFI contained a list of 15 specific questions. Recognizing that these questions may not address all issues relevant to the independence of accountants who audit employee benefit plans, interested parties were invited to submit comments on other issues that they believe are pertinent to the DOL's consideration of new or additional independence guidelines.

.223 The DOL comment period for the RFI closed on December 11, 2006, and the DOL has received 27 comments to date. The DOL continues to evaluate the comments to identify common themes, and the project remains an important DOL initiative.

EBSA's Proposed Rule on Default Investment Alternatives for Participant-Directed Plans

.224 On September 27, 2006, the DOL published a proposed rule in the Federal Register to make it easier for fiduciaries of 401(k) plans and other participant-directed defined-contribution plans to adopt automatic enrollment design features. The proposed rule is the first major regulation resulting from the PPA signed into law by President Bush on August 17, 2006.

.225 The proposal implements provisions of the PPA to provide relief to plan fiduciaries who invest the assets of participants in *qualified default investment alternatives* in the absence of participant investment direction.

.226 Upon adoption, the rule will remove a major impediment to automatic enrollment programs created by employers. Default investment alternatives under the proposed regulation are intended to encourage the investment of employee assets in appropriate investment vehicles for long-term retirement savings.

.227 The proposed rule and a fact sheet detailing the proposed rule can be found on the EBSA's Web site at www.dol.gov/ebsa.

EBSA's Final Amendment on Securities Lending Exemption

.228 On October 30, 2006, the EBSA adopted a final class exemption expanding the opportunities for securities lending between employee benefit pension plans and banks and broker-dealers. The exemption consolidates two existing class exemptions and provides conditions to safeguard the assets of plans involved in securities lending transactions. The updated requirements will permit pension plans to earn additional income by lending securities from their portfolios to a greater universe of permissible borrowers.

.229 Under the exemption, the categories of permissible borrowers have been expanded to include broker-dealers and banks of the United Kingdom, Canada, and certain other foreign broker-dealers and banks. In addition, the types of collateral that may be offered to plans for securities lending transactions have been broadened to include negotiable certificates of deposits payable in the United States, mortgage-backed securities, the British pound, the Canadian dollar, the Swiss franc, Japanese yen, the Euro, securities issued by Multilateral Development Banks, rated foreign sovereign debt, and irrevocable letters of credit issued by certain foreign banks.

.230 If the plan's U.S.-domiciled lending agent agrees to indemnify the plan against losses resulting from a borrower's default, the final exemption permits a plan to accept any other type of collateral currently permitted by the SEC under Rule 15c3-3 of the Securities and Exchange Act of 1934.

.231 The final exemption revokes and replaces Prohibited Transaction Exemptions 81-6 and 82-63.

Model Notice of Pending Election of Multiemployer Plan Status

.232 On December 1, 2006, the DOL published in the Federal Register a model notice that may be used by employee benefit plans that elect to be treated as multiemployer plans under the ERISA.

.233 The PPA amended ERISA to permit certain plans that elected to be single-employer plans to revoke that election and allow other plans to elect to be treated as multiemployer plans provided that notice of the election is furnished to participants and other interested parties no later than 30 days before the election. The notice must describe, among other things, the principal differences between ERISA's guarantee programs and benefit restrictions for single-employer and multiemployer plans.

.234 Plan administrators may use the model notice to fulfill their notice obligations when making an election, and elections must be made with the PBGC within one year after the enactment of the PPA.

.235 A copy of the model notice is available through the EBSA Web site at www.dol.gov/ebsa.

EBP Resources

.236 These are employee benefit plan-related educational courses, Web sites, publications, and other resources available to CPAs.

Related Publications

.237 The following are some of the AICPA publications that deliver valuable guidance and practical assistance as potent tools to be used on your employee benefit plan engagements:

- AICPA Audit and Accounting Guide *Employee Benefit Plans*, with conforming changes as of March 1, 2007 (product no. 012597kk) provides easy-to-follow guidance to prepare, audit, and report on financial statements of employee benefit plans.
- *Accounting Trends & Techniques—Employee Benefit Plans*, second edition (product no. 006624kk) offers the same kind of powerful help that the AICPA's *Accounting Trends and Techniques, 60th Edition* (product no. 009898kk) does. This comprehensive book illustrates a wide range of employee benefit plan financial statement disclosures and auditors' reports for both full-scope and limited-scope audits. The publication also includes a chapter dedicated to illustrative management letters and management letter comments. Look for a revised second edition to be released this summer.
- *SAS No. 70 Reports and Employee Benefit Plans* (product no. 061061kk) provides you with guidance on the use of SAS No. 70 reports in your employee benefit plan audits. In practice, auditors of employee benefit plans have continued to raise questions about how SAS No. 70 reports should be considered in their audits and the auditing procedures that should be applied to these reports to increase their reliability as audit evidence.
- These practice aids, developed by the AICPA's Accounting and Auditing Publications staff, are invaluable to anyone who prepares financial statements and reports (the 2007 checklists will be available this summer):

  a. *Checklists and Illustrative Financial Statements for Defined Benefit Pension Plans* (product no. 008996kk) (2007 product no. 008997kk)

  b. *Checklists and Illustrative Financial Statements for Defined Contribution Pension Plans* (product no. 009006kk) (2007 product no. 009007kk)

  c. *Checklists and Illustrative Financial Statements for Health and Welfare Benefit Plans* (product no. 009016kk) (2007 product no. 0090157kk)

Web Casts

.238 ***Strategic Industry Briefing—Employee Benefit Plans***. The April 30, 2007, Web cast *Strategic Industry Briefing—Employee Benefit Plans* was an AICPA strategic briefing that addressed current industry developments and emerging practice issues relating to employee benefit plans. Participants learned about current accounting, auditing, and regulatory developments, including the impact of recently issued pronouncements on both preparers and auditors of employee benefit plans. Speakers included Marcus J. Aron, CPA; Marilee Lau, CPA; and Michele Weldon, CPA. This Web cast is available on CDROM (product no. 780102kk).

Conferences

AICPA Employee Benefit Plans Accounting, Auditing and Regulatory Update Conference

.239 This high level forum lets you interact with expert auditors and members of the DOL. The 2007 *Employee Benefit Plan Accounting, Auditing and Regulatory Update* Conference will be held December 12 through 13, 2007, in Washington, DC. For more information, visit the Web site at www.cpa2biz.com/conferences.

National Conference on Employee Benefit Plans

.240 Each spring, the AICPA sponsors a National Conference on Employee Benefit Plans that is specifically designed to update auditors, plan administrators, and plan sponsors on various topics, including recent and proposed employee benefit plan legislative and regulatory issues, and significant accounting, auditing, and tax developments. The 2008 National Conference on Employee Benefit Plans will be held May 12 through 15, 2008, in Las Vegas, NV. For a conference brochure, please call (888) 777-7077 and request brochure G50038. For more information, visit the Web site at www.cpa2biz.com/conferences.

Education Courses

.241 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working on employee benefit plan engagements. Those courses include:

- Audits of 401(k) Plans
- Employee Benefit Plans: Audit and Accounting Essentials
- Form 5500: Prepare It Fast—File It Right...The 1st Time
- SAS No. 70 Auditing Guidance
- Online CPE: AICPA InfoBytes

Service Center Operations

.242 To order AICPA products, receive information about AICPA activities, and find help answering your membership questions, call the AICPA Service Center Operations at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.243 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.244 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.245 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2Biz.com offers all the latest AICPA products, including Audit Risk Alerts, Audit and Accounting Guides, *Professional Standards*, and CPE courses.

Other Helpful Web Sites

.246 Additional information on matters addressed in this Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this Alert.

.247 This Audit Risk Alert replaces *Employee Benefit Plans Industry Developments—2006*.

.248 The Audit Risk Alert *Employee Benefit Plans Industry Developments* is published annually. As you encounter audit and industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be greatly appreciated. You may e-mail these comments to ldelahanty@aicpa.org or write to:

Appendix B

Evaluating Control Deficiencies in an Employee Benefit Plan Audit (Applying SAS No. 112)

SAS No. 112 provides guidance to enhance your ability to identify and evaluate control deficiencies during an audit and then communicate to management and those charged with governance those deficiencies that you believe are significant deficiencies or material weaknesses. Auditors should be aware that the nature of the employee benefit plan environment is likely to give rise to the written communications required by SAS No. 112.

The standard has two unconditional requirements:

- The auditor must evaluate identified control deficiencies and determine whether those deficiencies, individually or in combination, are significant deficiencies or material weaknesses.
- The auditor must communicate, in writing, significant deficiencies and material weaknesses to management and those charged with governance. This communication includes significant deficiencies and material weaknesses identified and communicated to management and those charged with governance in prior audits but not yet remediated.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

When conducting an audit of historical financial statements, you are not required to perform procedures to identify control deficiencies. However, during the course of the audit, you may become aware of deficiencies in the design or operation of the entity's internal control. Your awareness of control deficiencies will vary with each audit and will be influenced by the nature, timing, and extent of audit procedures performed, as well as other factors. The results of your substantive procedures may cause you to reevaluate your earlier assessment of internal control.

Evaluating Internal Control Deficiencies

A control deficiency may be considered just a deficiency. More severe deficiencies are significant deficiencies, and the most severe deficiencies are material weaknesses.

Definitions of Significant Deficiency and Material Weakness

A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles (GAAP) such that there is more than a remote[1] likelihood that a

---

[1] The term *remote likelihood* as used in the definitions of the terms *significant deficiency* and *material weakness* has the same meaning as the term *remote* as used in Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*. Paragraph 3 of FASB Statement No. 5 states:
