Bulletin Change

Beginning with this, the January, 1930, number, the Bulletin will be issued quarterly instead of monthly, as in the past.

In the intervals, items of interest to members of the organization will be disseminated by means of an internal news letter.

This change, it is hoped, will make possible the publication of technical articles more interesting in character, and at the same time will keep members of the organization currently informed on personal and professional matters in which they have an interest.
