Problems of Profit Determination Encountered by Government Contractors

(continued from page 10)

He is also faced with some problems in accounting theory. Should he accrue a fee on performance because the engineers say that the product will reach a certain performance when only a final test will prove that such a performance has been achieved? Should he wait for the test, thereby increasing or decreasing profit possibly as much as a million dollars at one time? These are major decisions which accountants can and do argue pro and con.

Having thus arrived at the fee rate to accrue and the costs believed to be reimbursable, the accountant can proceed to prepare his financial statements. At this point, he still has to worry about whether the Renegotiation Board will take part of it away from him.
