Book Review

The Correspondence Course in Accountancy Offered by The Syracuse Extension Institute of Accountancy, Inc. Volumes 1 and 2. (Syracuse, New York, 1922.)

This course comprises some fifty lessons, beginning with the most elementary consideration of bookkeeping and proceeding to such advanced studies as cost accounting, auditing and the technique of financial and statistical reports. The text, which is contained in three volumes (the last of which is still in preparation) has been written by John A. Powelson, A. B., C. P. A.

Throughout the text and the auxiliary material there is evidence of the most thoughtful and painstaking effort to make the course thoroughly practical. The course is logically arranged and is well calculated to give the student an excellent general knowledge of accountancy. The text is well written and is to be commended for its lucidity. A fairly thorough review reveals no cause for criticism of the accounting principles and practices taught.

A very interesting and valuable feature of the course is a series of ten booklets on "How to Study at Home," written by Professor Mark May, psychologist. These cover such topics as Planning the Campaign, Study Habits, Concentration, Learning and Memorizing, and Mental Fatigue. It is well recognized by those who are familiar with correspondence courses generally that a large number, perhaps the majority, of those who undertake the work fall by the wayside, largely

through the lack of mental stimulus. These booklets, which are supplemented in a practical way by the introductions to lessons 1 to 18 (Volume 1) showing how to study each lesson, should have a salutary effect in sustaining the interest of the student and in helping him to study in such a manner as to make the course really beneficial.

To summarize, one is impressed with the practicality of the course, as regards both subject matter and presentation.

The Town Hall Bulletin of January 15, 1923, devotes some space to sayings of former prominent men whose lives and works are commemorated by the dedication of chairs in the Town Hall. Included among the list of those whose birthdays fall in January is the following:

"Charles Waldo Haskins, January 11, 1852. 'Accounting as a progressive science, must be the same yesterday, today, tomorrow, except that as a development it is older and wiser as time goes on.'"

At a luncheon for Dodge Brothers Dealers held at the Pennsylvania Hotel, New York, Tuesday, January 9, 1923, which some of our members from the Executive Offices were privileged to attend, one of the features of the entertainment following the luncheon was a car-assembling contest. Two teams of eight men each, composed of veteran employes of Dodge Brothers, were chosen for this performance because of long and faithful service as well as skill. The two teams were designated and costumed: one as the blue team; the other as the white team. From the various parts comprising a Dodge Brothers car each team, at a given signal, began the work of assembly. The blue team put the car together, started the en-
