ACCOUNTING STANDARDS DIVISION

15,000	Listing of Issues Papers . . . . .	50,701
--------	------------------------------------	--------

## HOW TO USE THIS VOLUME

### Scope of the Volume . . .

This volume, which is a reprint of the looseleaf edition of *Technical Practice Aids*, includes selected Accounting and Auditing Publications Technical Questions and Answers, Statements of Position—Accounting, Statements of Position—Auditing and Attestation, AcSEC Practice Bulletins, and a list of Issues Papers of the Accounting Standards Division of the American Institute of Certified Public Accountants.

### How This Volume Is Arranged . . .

The contents of this volume are arranged as follows:

Accounting and Auditing Publications Technical Questions and Answers

Introduction

Financial Statement Presentation

Assets

Liabilities and Deferred Credits

Capital

Revenue and Expense

Specialized Industry Problems

Specialized Organizational Problems

Audit Field Work

Auditors' Reports

Statements of Position—Accounting

Statements of Position—Auditing and Attestation

Practice Bulletins

Issues Papers of the Accounting Standards Division

### How to Use This Volume . . .

The arrangement of material is indicated in the general table of contents at the front of the volume. There is a detailed table of contents covering the material within each major division.

The major divisions are subdivided into sections, each with its own section number. With respect to Technical Questions and Answers, within each section, each Technical Question and Answer is decimally numbered. For example, section 9430.02, *Reporting on Companies With Different Fiscal Years*, is the second Technical Question and Answer in section 9430. When a Technical Question and Answer is deleted, its number is reserved. Reserved sections are deleted permanently if no future Technical Questions and Answers are expected for a particular topic.

Authoritative pronouncements are referenced in the Technical Questions and Answers, whenever possible, to support the guidance provided. The following list explains the references and cites the publications containing the authoritative literature:

AC	An accounting section from FASB <i>Accounting Standards Current Text</i>
ACC	Statements of Position—Accounting contained in AICPA <i>Technical Practice Aids</i>
AR	Accounting and Review Services standard or interpretation contained in AICPA <i>Professional Standards</i> , vol. 2
AT	Attestation standard or interpretation contained in AICPA <i>Professional Standards</i> , vol. 1
AU	Auditing standard or interpretation contained in AICPA <i>Professional Standards</i> , vol. 1
AUD	Statements of Position—Auditing and Attestation contained in AICPA <i>Technical Practice Aids</i>
EITF	A summary of the proceedings of the Emerging Issues Task Force contained in the FASB <i>EITF Abstracts</i>
ET	Section from the Code of Professional Conduct of the AICPA contained in AICPA <i>Professional Standards</i> , vol. 2
GAFRS	An accounting section from the GASB <i>Codification of Governmental Accounting and Financial Reporting Standards</i>
PB	Practice Bulletins of the AICPA Accounting Standards Division contained in AICPA <i>Technical Practice Aids</i>

**Note:** Generally, abbreviations are not used to reference AICPA Audit and Accounting Guides. Each guide is published separately and is also included in the AICPA *Audit and Accounting Guides* subscription service.

The TIS topical index for the Technical Questions and Answers uses the key word method to facilitate reference to the inquiries. This index is arranged alphabetically by subject, with references to section numbers.

Statements of Position—Accounting are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

The ACC topical index for the Statements of Position—Accounting facilitates reference to the Statements. This index is arranged alphabetically by subject, with references to section and paragraph numbers.

Statements of Position—Auditing and Attestation are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

Practice Bulletins are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

A list of Issues Papers of the Accounting Standards Division, in chronological order, is included in a separate division.

# **ACCOUNTING AND AUDITING PUBLICATIONS TECHNICAL QUESTIONS AND ANSWERS (NONAUTHORITATIVE)**

## **Introduction**

The AICPA Accounting and Auditing Publications group has been engaged in a continuing effort to improve this publication. Our goal is to provide a publication that contains relevant and accurate questions and answers that will be a source of helpful nonauthoritative guidance to our members. The existing questions and answers in this section are subjected to ongoing review for technical accuracy and relevance. A key element of this ongoing review process is the feedback that is received from practitioners. We ask for and appreciate your corrections and suggestions with regard to this publication. # ACCOUNTING AND AUDITING PUBLICATIONS TECHNICAL QUESTIONS AND ANSWERS (NONAUTHORITATIVE)

## Notice to Readers

The questions and answers in this section of the AICPA TECHNICAL PRACTICE AIDS are based on selected practice matters identified by the staff of the AICPA's Technical Hotline, the Accounting and Auditing Publications group, and various other bodies within the AICPA.

This material has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the American Institute of Certified Public Accountants. **These answers are not sources of established accounting principles as described in Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, nor are they sources of authoritative generally accepted auditing standards.**

## Section 1100

### ***Statement of Financial Position***

#### **.03   Unclassified Balance Sheet for Venture With Limited Life**

*Inquiry*—A corporation has recently been organized with the sole purpose of constructing a shopping center which will take several years to complete, after which the company will be liquidated. The company uses the completed contract method to recognize income, and will have only one operating cycle. Would an unclassified balance sheet be appropriate?

*Reply*—An unclassified balance sheet would be more appropriate than a classified one in this situation. The sole purpose of the corporation is to construct the shopping center, and the appropriate time frame for reporting purposes, by definition, becomes the time required to complete the project, rather than an arbitrary one-year period.

#### **.06   Classification of Idle Property**

This Question and Answer is currently being revised.

#### **.07   Comparative Statement Disclosures**

*Inquiry*—When financial statements of the prior period are presented on a comparative basis with financial statements of the current period, should the notes to the comparative financial statements disclose details for the prior year?

*Reply*—Generally, in practice notes to comparative financial statements are also comparative if they present details of items on the financial statements or are otherwise pertinent. For example, details of notes payable outstanding at the end of each period are normally disclosed, but the future maturities disclosure need only be disclosed for the current year. [Amended June 1995.]

#### **.08   Classification of Outstanding Checks**

*Inquiry*—Should the amount of checks that have been issued and are out of the control of the payor but which have not cleared the bank by the balance sheet date be reported as a reduction of cash?

*Reply*—Yes. A check is out of the payor's control after it has been mailed or delivered to the payee. The balance sheet caption "cash" should represent an amount that is within the control of the reporting enterprise, namely, the amount of cash in banks plus the amount of cash and checks on hand and deposits in transit minus the amount of outstanding checks. Cash is misrepresented if outstanding checks are classified as liabilities rather than a reduction of cash.

#### **.12   Classification of Inventory Stored in a Grain Elevator**

*Inquiry*—Should the operator of a grain elevator report in its financial statements grain owned by others and stored in its grain elevator?

*Reply*—No. Grain stored for others should not be included on the balance sheet of a grain elevator operator. SAS No. 1, section 901, *Public Warehouses—Controls and Auditing Procedures for Goods Held*, paragraph 13 (AU 901.13), states that goods held for others by a warehouseman are not owned by the warehouseman and should not appear in his financial statements. The same is true for grain stored for others by a grain elevator.

**.14 Classification of Convertible Debt**

*Inquiry*—A company has debt that is convertible into common stock of the company at the option of the company. The debt by its terms is considered long-term debt in the classified balance sheet. The company intends to call the debt and issue the common stock within one year of the balance sheet date. Should this debt be classified as a current liability?

*Reply*—No. The expected call of the debt securities will not consume current assets or increase current liabilities, and accordingly should continue to be classified as a long-term obligation.

The general principle underlying the classification of debt in a debtor's principal balance sheet should be based on facts existing at the date of the balance sheet rather than on expectations. ARB No. 43, Chapter 3A, *Current Assets and Current Liabilities*, paragraph 7 (AC B05.402), states that "the term current liabilities is used principally to designate obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets, or the creation of other current liabilities."

---

[The next page is 161.]

## Section 1200

### Income Statement

#### .01 Disclosure of Revenues of an Agent

*Inquiry*—Company A is in the business of arranging sales of used cars for which service it receives a commission based on an established fee schedule. Company A receives title to the cars sold but simultaneously transfers title to the car buyer. Company A warrants main engine components for thirty days after date of sale.

The following presentations of revenue in the income statement are being considered:

Commissions Earned	<u>\$20,000</u>
or	
Sales	\$ 300,000
Cost of Sales	<u>(280,000)</u>
Gross Profit (or Net Commissions)	\$ 20,000

What is the proper presentation of revenue?

*Reply*—Since Company A is operating as a broker, Company A should report Commissions Earned rather than Sales. However, Company A could disclose above the Commissions Earned figure, without showing a deduction, the amount of sales, as follows:

Sales Arranged	<u>\$300,000</u>
Commissions Earned	\$ 20,000
Expenses, etc.	XXX

Company A should also make proper provision for the cost of warranties.

#### .04 Statement Title When There Is a Net Loss

*Inquiry*—What title is suggested for the "Statement of Income" when a "net loss" exists in one or more years?

*Reply*—Companies included in the annual survey entitled *Accounting Trends & Techniques* ("Trends") file with the Securities and Exchange Commission. Accordingly, their annual reports include a three year statement of income. If a current year net loss is shown in the income statement, the "Trends" companies usually describe the statement of income as the "Statement of Operations." They occasionally use the title "Statement of Income (Loss)" and very rarely use the title "Statement of Loss."

Some companies always use "Statement of Operations" since the heading will be the same whether there is a "net loss" or "net income."

#### .05 Presentation of Reimbursed Payroll Expense

*Inquiry*—One company of a controlled group, in addition to its own operations, acts as a "paymaster" for the entire group. This company records the entire payroll of all members in the group on its general ledger to facilitate reconciliation with state and federal payroll tax returns. Each member of the

group reimburses the “paymaster” for its share of payroll and payroll taxes and records management fee expense while the paymaster records it as management fee income.

Should the reimbursement be classified as other income in the separate income statement of the “paymaster” company?

*Reply*—No. The reimbursement should be allocated as a reduction of payroll and payroll tax expense because this approach would more accurately present the “paymaster” company’s expenses for its own operations.

---

[The next page is 201.]

## Section 1300

### Statement of Cash Flows

#### .03 Comparative Statements of Cash Flows

**Inquiry**—Is it necessary to provide a statement of cash flows for both the current and prior periods if comparative income statements are presented, but only the current balance sheet is presented?

**Reply**—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3, (as amended by FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*) (AC C25.101), states:

A business enterprise (except for defined benefit plans and certain other employee benefit plans or for certain investment companies), that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Therefore, if a balance sheet is presented, a statement of cash flows should be presented for both current and prior periods if income statements are presented for such periods. [Amended]

#### .05 Statement of Cash Flows for Annual Report With Balance Sheet Only

**Inquiry**—When only a statement of financial position is presented, is it necessary that the auditor's opinion be qualified relative to the omission of the statement of cash flows?

**Reply**—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3, (as amended by FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*) (AC C25.101), states:

A business enterprise (except for defined benefit plans and certain other employee benefit plans or for certain investment companies), that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Therefore, when a statement of financial position is not accompanied by a statement of operations, there is no need for presentation of a statement of cash flows, and no comment on the absence of such a statement is necessary. [Amended]

#### .08 Effect of Change in Depreciation Method on Statement of Cash Flows

**Inquiry**—A company which formerly depreciated its equipment on an accelerated basis has changed to the straight-line method. The cumulative effect of this change, net of tax, was a \$100,000 increase in income for the current year. How should this change be shown on the statement of cash flows?

**Reply**—The cumulative effect should be shown on the statement of cash flows under cash flows from operating activities as a reconciling item between

net income and net cash provided by operating activities, if the indirect method is used. If the direct method is used, the cumulative effect should be shown as a reconciling item on the reconciliation of net income to net cash provided by operating activities. [Amended]

## **.10 Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles**

**Inquiry**—When an entity prepares its financial statements on a comprehensive basis of accounting other than generally accepted accounting principles (GAAP), is a statement of cash flows required?

**Reply**—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3, (as amended by FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*) (AC C25.101), states:

A business enterprise (except for defined benefit plans and certain other employee benefit plans or for certain investment companies), that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

SAS No. 62, *Special Reports*, paragraph 7 (AU 623.07), states, in part:

Terms such as “balance sheet,” “statement of financial position,” “statement of income,” or “statement of operations,” and “statement of cash flows,” or similar unmodified titles are generally understood to be applicable only to financial statements that are intended to present financial position, results of operations, or cash flows in conformity with generally accepted accounting principles.

Interpretation 14 of SAS No. 62 (AU 9623.92) states, in part:

While a statement of cash flows is not required in presentations using the cash, modified cash, or income tax basis of accounting, if a presentation of cash receipts and disbursements is presented in a format similar to a statement of cash flows or if the entity chooses to present such a statement . . . the statement should either conform to the requirements for a GAAP presentation or communicate their substance.

## **.11 The Effect of a Prior Period Adjustment on the Statement of Cash Flows When Single Period Statements Are Presented**

**Inquiry**—How would a prior period adjustment be presented in the statement of cash flows if single period statements are presented?

**Reply**—FASB Statement No. 16, *Prior Period Adjustments*, paragraph 16a (A35.106), states that “prior period adjustments shall, in single period statements, be reflected as adjustments of the opening balance of retained earnings.” A corresponding prior period adjustment will normally result in a change in the beginning balance of an asset or liability account. FASB Statement No. 95, *Statement of Cash Flows*, paragraph 32 (AC C25.132), states, in part:

Information about all investing and financing activities of an enterprise during a period that affected recognized assets or liabilities but that did not result in cash receipts or cash payments in the period shall be reported in related disclosures.

Therefore, the difference in an account between the current balance sheet and that same account in the restated beginning balance sheet (even if not presented) that resulted from the prior period adjustment, should be reflected in the related footnote disclosures and clearly referenced to the statement of cash flows. [Amended]

### **.13 Classification of Increase in Cash Value of Officers' Life Insurance in Statement of Cash Flows**

*Inquiry*—How should the increase in cash surrender value of officers' life insurance be classified in the statement of cash flows?

*Reply*—An increase in the cash surrender value of officers' life insurance would normally be presented as an investing outflow if the increase in cash value is less than the related premium paid. If the increase in cash value exceeds the premium paid, the premium paid is an investing outflow and the remainder of the increase in cash value would be presented as a reconciling item on the reconciliation of net income to net cash provided by operating activities.

### **.15 Presentation of Cash Overdraft on Statement of Cash Flows**

*Inquiry*—A company has accounts at three separate banks. One of the bank accounts is in an overdraft position at year end, thus it is shown as a liability on the balance sheet. Does the company show as cash and cash equivalents on the statement of cash flows only the two accounts with the positive balances or does it show the net cash (the three accounts combined) at the end of the year as its cash and cash equivalents?

*Reply*—The amount that will be shown on the statement of cash flows is the two accounts with the positive balances. Per FASB Statement No. 95, *Statement of Cash Flows*, paragraph 7 (AC C25.105), "The total amounts of cash and cash equivalents at the beginning and end of the period shall be the same amounts as similarly titled line items or subtotals shown in the statements of financial position . . ." The net change in overdrafts during the period is a financing activity.

### **.16 Purchase of Inventory Through Direct Financing**

*Inquiry*—An automobile dealer purchases its inventory from a manufacturer which finances purchases through a finance subsidiary. The finance subsidiary pays the manufacturer directly on behalf of the dealer. Cash is not disbursed by the dealer until the automobiles are sold.

Under the provisions of FASB Statement No. 95, *Statement of Cash Flows* (AC C25), how should the purchases of inventory be reported by the automobile dealer in the statement of cash flows?

*Reply*—A statement of cash flows reports an enterprise's cash receipts and cash payments during the period. Transactions that do not involve cash receipts and cash payments should be excluded from the statement of cash flows. Noncash investing and financing transactions should be reported in separate disclosures.

The purchases of inventory described above do not involve a cash flow by the automobile dealer until the automobiles are sold and the dealer pays the finance subsidiary under the financing arrangement. Therefore, only the cash outflows from payments to the finance subsidiary should be included in the body of the statement of cash flows.

Payments made to the finance subsidiary of the manufacturer should be classified as operating cash outflows in accordance with FASB Statement No. 95, paragraph 23(a) (AC C25.121), which defines operating cash outflows to include principal payments on accounts and notes payable to suppliers for goods acquired for resale.

### **.17 Omission of Reconciliation of Net Income to Cash Flow From Operations**

*Inquiry*—When an accountant is requested to compile financial statements that omit substantially all of the disclosures required by GAAP, [SSARS 1, *Compilation and Review of Financial Statements*, paragraph 19 (AR 100.19)] would the omission of the schedule, “reconciliation of net income to net cash flow from operating activities” required by the direct method of reporting cash flows under FASB Statement No. 95, *Statement of Cash Flows* (AC C25), be considered a departure from GAAP?

*Reply*—Yes. Under the direct method of reporting net cash flows from operating activities, the separate schedule reconciling net income to net cash flow from operating activities is a required part of the cash flow statement. If the schedule is omitted, the accountant should modify his compilation report to disclose a departure from GAAP in accordance with SSARS 1, paragraph 40 (AR 100.40).

### **.18 Presentation on the Statement of Cash Flows of Distributions From Investees With Operating Losses**

*Inquiry*—An entity carries an investment in a limited partnership interest under the equity method of accounting. The partnership had operating losses during the year, but a positive cash flow allowed the partnership to distribute funds to its investors. Would receipt of that distribution by the entity be classified on the statement of cash flows as cash inflows from investing activities or as cash inflows from operating activities?

*Reply*—FASB Statement No. 95, *Statement of Cash Flows* (AC C25), requires dividends received (returns on investments) to be classified as cash inflows from operating activities. Receipts from returns of investments are classified as cash inflows from investing activities.

Distributions to investors from investees should be presumed to be returns on investments and be classified by the investor as cash inflows from operating activities, similar to the receipt of dividends. That presumption can be overcome based on the specific facts and circumstances. For example, if the partnership sells assets, the distribution to investors of the proceeds of that sale would be considered a return of investment and be classified by the investor as cash inflows from investing activities.

### **.19 Classification of Payments on Equipment Finance Note**

*Inquiry*—Under the provisions of FASB Statement No. 95, *Statement of Cash Flows*, paragraph 32 (AC C25.134), noncash investing and financing transactions are to be disclosed in related narrative form or summarized in a schedule. An example of a transaction of this type would be an acquisition of equipment in a transaction in which an enterprise borrows money from a financial institution for the purchase of equipment and the financial institution remits the money directly to the vendor. In a transaction of this nature, should the payments of principal be presented as an outflow in the financing or investing section of the cash flow statement?

*Reply*—Payments on the aforementioned notes would be recorded as financing outflows per FASB Statement No. 95, paragraph 20b (AC C25.118b).

### **.20 Direct vs. Indirect Method for Statement of Cash Flows**

*Inquiry*—A company has decided to present its statement of cash flows using the direct method for the current year although the indirect method was used

in the prior year. Would this change require an explanatory paragraph noting a lack of consistency in the financial statements?

**Reply**—No. A change in the presentation for the statement of cash flows from the indirect to direct method (or vice versa) is considered a change in classification rather than a consistency problem. SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph 16 (as amended) (AU 420.16) states:

Classifications in the current financial statements may be different from classifications in the prior year's financial statements . . . material changes in classification should be indicated and explained in the financial statements or notes. These changes . . . ordinarily would not need to be referred to in the independent auditor's report.

If the statement of cash flows is presented for the prior period, it should be restated using the direct method approach for comparative purposes. In addition, disclosure should be made indicating the prior period restatement.

## **.21 Presentation of Financing Transaction on Statement of Cash Flows**

**Inquiry**—A buyer contracts to purchase real estate. The lender gives the buyer a check made payable to the buyer for a loan to purchase the property. The buyer in turn endorses the check over to the seller. How should this financing transaction be presented on the buyer's statement of cash flows?

**Reply**—This transaction should be treated as a cash receipt by the buyer since the buyer was named as payee on the check. The amount of the check should be reported on the statement of cash flows even though the buyer did not convert the check to currency or deposit it in his or her bank account. The cash receipt belongs to the payee named on the check. The buyer should present the amount of the check as "Proceeds From Borrowings" as a cash inflow from financing transactions and "Purchase of Real Estate" as a cash outflow from investing activities.

## **.22 Negative Amortization of Long-Term Debt in Cash Flows Statement**

**Inquiry**—The cash repayments on a long-term loan are less than the interest expense for the period. The amount of the interest expense not paid becomes part of the principal balance (negative amortization). How should the negative amortization be shown on the cash flows statement?

**Reply**—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 28 (AC C25.126), footnote 13, indicates:

Adjustments to [reconcile] net income to determine net cash flow from operating activities shall reflect accruals for interest earned but not received and interest incurred but not paid.

The negative amortization should therefore be treated as an adjustment to net income to remove the effect of this noncash expense. Disclosure should also be considered.

---

[The next page is 261.]

## Section 1400

### ***Consolidated Financial Statements***

#### **.02 Consolidation of Corporation and Proprietorship**

*Inquiry*—How should the financial statements of a corporation and a proprietorship be consolidated?

*Reply*—This answer assumes that 100% of the corporation capital stock is owned by the proprietorship. If not, the proportion of the net equity of the corporation applicable to the interest of the minority should appear on the balance sheet between liabilities and equity, and on the income statement as a subtraction following the provision for income taxes.

As in any consolidation, the stockholders' equity of the subsidiary corporation should be eliminated against the investment of the parent (the proprietorship). Any net earnings of the subsidiary corporation subsequent to its acquisition and not recorded on the books of the parent should be reflected in the consolidated net equity, which, since the parent is a sole proprietorship, will be a single figure. As income taxes are assessed against the owner as an individual, rather than against the proprietorship, no provision is made for income taxes beyond those payable by the corporation. However, a footnote should disclose such omission, and if it is anticipated that funds will have to be withdrawn from the proprietorship to meet future taxes on income earned to date, this too should be disclosed, with an estimate of the amount thereof if practicable. Of course, provision should be made for elimination of profits to the extent that they may be reflected in consolidated inventories or in other consolidated assets.

#### **.06 Combined and Separate Financial Statements**

*Inquiry*—Company A and Company B are new car dealers with A selling an American made car and B selling a foreign made car. One individual owns 100% of the outstanding stock of both companies.

Both companies A and B are at the same location with separate buildings for sales staffs. Company A maintains the parts and service departments for both companies with the parts inventory, warranty and service receivables of Company B on Company A's books. In return, Company B pays Company A a per car fee for services to be performed on each new car sold by B.

Company A maintains the only used car inventory on the lot adjacent to Company B's building. Each time B receives a used car in trade, it is sold to Company A at the wholesale fair market value.

Although there is a differentiation in sales staffs, management, accounting, secretarial, and other related services are performed by the same staff out of both buildings, and Company B pays a monthly fee for services performed.

Company A has income for the year, but Company B has a loss for the period. Combined financial statements will be prepared, but is it also necessary to provide combining statements for the individual companies?

*Reply*—ARB No. 51, *Consolidated Financial Statements*, paragraph 22 (AC C51.121), states in part:

There are circumstances, however, where combined financial statements (as distinguished from consolidated statements) of commonly controlled companies are likely to be more meaningful than their separate statements. For example, combined financial statements would be useful where one individual owns a controlling interest in several corporations which are related in their operations.

Combined financial statements of the companies would be appropriate, and there is no necessity for presenting separate statements for the companies.

Unfortunately, Accounting Research Bulletin No. 51 (AC C51) makes no statement as to appropriate presentation of the stockholder's equity section of a combined balance sheet. Appropriate disclosure, therefore, may depend upon the circumstances. Either on the statement of financial position, or in a note, there should be disclosure for each company of their number of shares of stock that are authorized and outstanding, and the par value. While under some circumstances it might not be necessary to disclose the allocation of retained earnings between the two companies, other circumstances may exist under which such disclosure would be required—e.g., if the losses of either company have been so severe that an insolvent condition might be anticipated.

#### **.07 Reporting on Company Where Option to Acquire Control Exists**

*Inquiry*—Corporation A acquired debentures from Corporation B convertible into common voting stock within ten years at \$1 per share. Corporation A also has an option to purchase additional shares at \$1 per share upon conversion to bring A's holdings in B up to 51% of the total outstanding shares. Corporation A also has the right to appoint a majority of Corporation B's Board of Directors and has done so. Other intercompany transactions are negligible.

May each company issue separate financial statements, or are consolidated statements required? What disclosures would be necessary?

*Reply*—At present there is no ownership of one company by the other, and consolidation would not be proper. Further, since intercompany transactions (other than interest on the debentures) are negligible, combined statements would probably not be particularly useful.

Corporation A should disclose in its financial statements the terms under which it may obtain controlling stock ownership of Corporation B, the amount of interest received, that no other intercompany transactions are significant, and that it presently has the right to and does appoint a majority to Corporation B's Board of Directors. It should also present summarized information as to the assets, liabilities, and operating results of Corporation B, or include B's financial statements with its report.

Corporation B, in addition to disclosing the interest rate and maturity of the convertible debentures, should disclose Corporation A's conversion and option privileges and should disclose that Corporation A has the right to and has appointed a majority to Corporation B's Board of Directors.

#### **.19 Consolidation of Limited Partnerships**

*Inquiry*—Company A, a privately held real estate developer and operator, conducts a portion of its business through limited partnerships in which it is a general partner. The limited partnerships are structured so that Company A,

the general partner, has a 5 percent interest in profits and losses, shares in two-thirds of the cash flow from operations after the limited partners receive their guaranteed payments, and has full authority to operate, manage, refinance, and sell. Should Company A consolidate the limited partnerships?

*Reply*—SOP No. 78-9, *Accounting for Investments in Real Estate Ventures*, paragraph 9, (ACC 10,240.09), states that consolidation is appropriate “only if the substance of the partnership or other agreements provide for control by the general partners.” Since the general partner has full authority to operate, manage, refinance, and sell, the general partner controls the operations of the limited partnerships and should consolidate the limited partnerships.

## **.21 Minority Interest Guarantee**

*Inquiry*—Company A is the majority shareholder and Company B the minority shareholder in Company C. B has guaranteed the debt of C by irrevocable letters of credit. B's share of the net losses of C exceeds its share of C's net assets. Since B guaranteed C's indebtedness, should this be reported as an asset in the consolidated financial statements of A and C?

*Reply*—B's guarantee is similar to a contingent asset and should not be included in the consolidated financial statements of A and C other than through note disclosure. Accordingly, there would be no amount reflected in the consolidated balance sheet for the minority interest, since B's share of the net losses of C exceeds its share of C's net assets. (See ARB No. 51, *Consolidated Financial Statements*, paragraph 15 (AC C51.116).)

If the creditor of C requires B to perform on its guarantee, then B, for accounting purposes, would have a claim against C. After this takes place, a liability to B would be reported in the consolidated financial statements of A and C. [Amended]

## **.22 Intervening Intercompany Transactions Between Subsidiary's and Parent's Year-End**

*Inquiry*—A parent company has a December 31 year-end and its wholly owned subsidiary has a November 30 year-end. The two companies generally have substantial intercompany sales and purchases which are recorded by each company as they occur. The parent uses the subsidiary's November 30 year-end statement to prepare the consolidated financial statements.

The intervening intercompany transactions, which occur between December 1 and December 31, create intercompany account balances which do not eliminate upon consolidation due to the difference in year-ends of the parent and its subsidiary. How should these intervening transactions be accounted for in the consolidated financial statements?

*Reply*—In discussing differences in fiscal periods, ARB No. 51, *Consolidated Financial Statements*, paragraph 4 (AC C51.107), states, “where the difference is not more than about three months, it usually is acceptable to use, for consolidation purposes, the subsidiary's statements for its fiscal period; when this is done, recognition should be given by disclosure, or otherwise, to the effect of intervening events which materially affect the financial position or results of operations.”

When a subsidiary's fiscal year differs from that of the parent, intercompany accounts may not agree. Transactions in the interval between the subsidiary's year-end and the parent's year-end must be analyzed and appropriate consolidation entries prepared.

A practical approach to preparing these consolidation entries would be to reverse the intervening intercompany transactions in the parent company's accounts but not in the subsidiary's accounts. A summary of these intervening transactions could then be disclosed in a note to the consolidated financial statements.

### **.23 Conforming Subsidiary's Inventory Pricing Method to Its Parent Company's Method**

*Inquiry*—A parent company uses the first-in, first-out (FIFO) cost assumption to price its inventory, while its subsidiary uses the last-in, first-out (LIFO) cost assumption to price its inventory. Must the subsidiary's inventory method be changed to conform to the FIFO method used by its parent company in consolidated financial statements?

*Reply*—There is no requirement under generally accepted accounting principles for the subsidiary to conform its inventory pricing method with the parent company's method. Consolidated statements may be presented with the subsidiary using LIFO and the parent using FIFO. Also, separate subsidiary only statements may be presented on the LIFO basis.

### **.24 Classification of Minority Interest**

*Inquiry*—Where should minority interest be classified in a consolidated balance sheet?

*Reply*—The authoritative literature does not provide definitive guidance on the classification of minority interest. In practice, minority interest is presented as a liability, a component of stockholders' equity or as a separate category between liabilities and stockholders' equity.

The AICPA's *Accounting Trends & Techniques* is a compilation of data obtained by a survey of 600 annual reports to stockholders, undertaken for the purpose of analyzing the accounting information disclosed in such reports. Most companies included in the survey that reflected a minority interest caption presented it as part of noncurrent liabilities or between liabilities and stockholders' equity.

### **.25 Issuance of Parent Company Only Financial Statements**

*Inquiry*—FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, paragraph 15 (AC 182.102), precludes preparation of parent company financial statements for issuance to stockholders as the financial statements of the primary reporting entity. Are there any circumstances under which parent company financial statements may still be prepared?

*Reply*—Yes. ARB No. 51, *Consolidated Financial Statements*, paragraph 24 (AC C51.123), states: "In some cases parent company statements may be needed, in addition to consolidated statements, to indicate adequately the position of bondholders, other creditors, or preferred stockholders of the parent. Consolidated statements, in which one column is used for the parent company and other columns for particular subsidiaries or groups of subsidiaries often are an effective means of presenting the pertinent information."

### **.26 Consolidated Versus Combined Financial Statements**

*Inquiry*—S Corporation has 2000 common shares and 1000 preferred shares outstanding. The preferred shareholders have the same rights as the common shareholders, except the right to vote. Of the 2000 common shares outstanding,

1000 shares are owned by P Corporation and 1000 shares are owned by I (an individual) who also owns all of the outstanding common shares of P Corporation. The preferred shares of S Corporation are owned by an outside party. Should P Corporation consolidate S Corporation for financial reporting purposes?

*Reply*—ARB No. 51, *Consolidated Financial Statements*, as amended by FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries* (AC C51), states that to “justify the preparation of consolidated statements, the controlling financial interest should rest directly or indirectly in one of the companies included in the consolidation.” In this situation P does not control S directly or indirectly and therefore consolidation is not appropriate. Combined financial statements could be presented if the circumstances are such that combined financial statements of S Corporation and P Corporation are more meaningful than separate financial statements.

## **.27    Subsidiary Financial Statements**

*Inquiry*—FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, paragraph 61 (AC C51.101), indicates that “consolidated rather than parent-company financial statements are the appropriate general-purpose financial statements.” May subsidiary-only financial statements be issued without consolidated financial statements?

*Reply*—Yes. Generally accepted accounting principles do not preclude issuance of subsidiary-only statements. Care should be taken to include all disclosures required by FASB Statement No. 57, *Related Party Disclosures* (AC R36), FASB Statement No. 109, *Accounting for Income Taxes*, paragraph 49 (AC C51.108A), and other relevant pronouncements (AC R36.105-106).

### ***Financial Statements Prepared Under An Other Comprehensive Basis Of Accounting (OCBOA)***

---

For nonauthoritative guidance about OCBOA financial statements, consult the AICPA's publication entitled, *Preparing and Reporting on Cash- and Tax-Basis Financial Statements*. This book is intended to alert the reader to some of the most frequently-encountered issues faced by accounting professionals in dealing with cash- and tax-basis financial statements and provides suggestions and insight into how these issues are resolved in practice. To order this publication, call the AICPA at 1-888-777-7077.

---

#### **.04 Terminology for OCBOA Financial Statements**

*Inquiry*—(1) If an entity presents financial statements under an other comprehensive basis of accounting, may GAAP financial statement titles be used?

(2) What should be the caption for “net income” or “net loss,” and may the corporation use “retained earnings”?

*Reply*—(1) No. SAS No. 62, *Special Reports*, paragraph 7 (AU 623.07), states that unmodified GAAP financial statement titles are not acceptable for use in OCBOA financial statements. The paragraph contains a few examples of appropriate financial statement titles (for example, *Statement of Assets and Liabilities Arising from Cash Transactions* and *Statement of Income—Statutory Basis*). However, the examples presented in the authoritative literature were not meant to be all-inclusive and are not the only acceptable titles. Equally acceptable titles would be *Balance Sheet—Cash Basis* or *Statement of Operations—Income Tax Basis*. The selection of specific financial statement titles is a matter of judgment; any modified title would fulfill the requirements of SAS No. 62 (AU 623) as long as it is clear that the financial statements are not prepared in accordance with GAAP.

(2) The authoritative literature is silent regarding the captions to be used within OCBOA financial statements. Therefore, there is no requirement to modify standard GAAP financial statement captions in OCBOA financial statements. If modifications are desired, common examples for cash basis financial statements are *Excess of revenue collected over expenses paid*, *Excess of expenses paid over revenue collected*, and *Accumulated excess of revenue over expenses paid*. For tax-basis financial statements, acceptable modifications include *Retained earnings—income tax basis* and *Net income—tax basis*. [Amended February 1995.]

#### **.05 Substantial Support for Modifications in Cash Basis**

*Inquiry*—Many nonprofit organizations, partnerships, and small businesses prepare their financial statements on a modified cash basis of accounting. Which modifications of the cash basis of accounting have “substantial support” under SAS No. 62, *Special Reports*, paragraph 4c (AU 623.04c)?

*Reply*—The cash basis of accounting and modifications of the cash basis are not formalized in accounting literature. Modifications have evolved through common usage and practice.

Modifications of the cash basis of accounting to record depreciation on plant and equipment and to accrue income taxes were recognized in SAS No. 62, paragraph 4c (AU 623.04c). Ordinarily a modification would have “substantial support” if the method is equivalent to the accrual basis of accounting for the particular item and if the method is not illogical. For example, generally income tax accruals are derived from the tax payable or receivable on the entity’s income tax return(s). An illogical method would be recording revenue on the accrual basis and recording purchases and other costs on the cash basis.

If modifications to the cash basis of accounting do not have substantial support, the auditor should include an explanatory paragraph in his or her report (preceding the opinion paragraph) and should include in the opinion paragraph the appropriate modifying language and a reference to the explanatory paragraph.

If the modifications are so extensive that the modified “cash-basis” statements are, in the auditor’s judgment, equivalent to financial statements on the accrual basis, the statements should be considered GAAP basis. The auditor should use the standard form of report (SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08)), modified as appropriate because of departures from generally accepted accounting principles (SAS No. 58, paragraphs 49 through 54 (AU 508.49–54)). For example, financial statements that are presented in conformity with generally accepted accounting principles, except that material leases are not capitalized (FASB Statement No. 13, *Accounting for Leases* (AC L10), are considered GAAP-basis financial statements containing a GAAP departure. [Amended February 1995.]

## Section 1600

### ***Personal Financial Statements***

#### **.03 Social Security Benefits—Personal Financial Statements**

*Inquiry*—Do social security benefits to be received based on the future life expectancy of an individual qualify as an asset in personal financial statements?

*Reply*—No. Statement of Position (SOP) 82-1, *Accounting and Financial Reporting for Personal Financial Statements*, paragraph 26 (ACC 10,350.26), indicates that nonforfeitable rights to receive future sums must meet certain criteria to be accounted for as assets. One of these criteria is that the rights must not be contingent on the individual's life expectancy or the occurrence of a particular event, such as disability or death. In this example, because the social security benefits are contingent on the individual's life expectancy, they do not qualify as a recognizable asset for the personal financial statements.

---

[The next page is 551.]

## Section 1800

### ***Notes to Financial Statements***

#### **.03 Disclosure of Change in Fiscal Year**

*Inquiry*—What disclosure in the financial statements is necessary when a company changes its fiscal year?

*Reply*—Generally accepted accounting principles do not specifically require disclosure of a change in the fiscal year. However, disclosure of such a change is generally considered necessary to make the financial statements meaningful to users. [Amended]

#### **.04 Derivatives**

*Inquiry*—FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), requires certain disclosures for investments made in derivative financial instruments. Some entities have indirect investments in derivatives because they invest in mutual funds that include derivatives in their portfolios. Do these disclosure requirements apply only to direct investments in such instruments or do they apply to indirect investments as well?

*Reply*—No. FASB Statement No. 119 (AC F25) does not require disclosure of indirect investments in derivatives. This topic was specifically addressed by the FASB during the preparation of FASB Statement No. 119 (AC F25). The FASB's position differs from the GASB's conclusion in GASB Technical Bulletin No. 94-1, *Disclosures about Derivatives and Similar Debt and Investment Transactions*, paragraph 4, which states: "... the disclosures ... are applicable if the entity is exposed to risk by indirectly ... holding ... derivatives, such as through participation in a mutual fund. ..."

## Section 2110

### Cash

#### .02 Checks Held at Balance Sheet Date

*Inquiry*—It is the practice of a company to eliminate its recorded accounts payable balance at the end of each month by writing checks to all of its trade vendors prior to the end of the month. To prevent overdrafts that would result from this practice, the company retains possession of the checks and only mails them to the vendors after the end of the month, when sufficient funds are available to satisfy them.

How should these held checks be accounted for by the company at month end?

*Reply*—At month end the aggregate dollar amount of held checks should be added back to cash and accounts payable. Checks which have not left the custody of the company should not reduce the company's recorded cash or accounts payable balances because they have not been tendered to the vendor to satisfy the debt.

#### .06 Disclosure of Cash Balances in Excess of Federally Insured Amounts

*Inquiry*—Should the existence of cash on deposit with banks in excess of FDIC-insured limits be disclosed in the financial statements?

*Reply*—The existence of uninsured cash balances should be disclosed if the uninsured balances represent a significant concentration of credit risk. Credit risk is defined in FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, paragraph 7 (AC F25.107), as "the possibility that a loss may occur from the failure of another party to perform according to the terms of a contract." As a result, bank statement balances in excess of FDIC-insured amounts represent a credit risk.

A concentration of credit risk exists if an entity has exposure with an individual counterparty or groups of counterparties. For example, a material uninsured cash balance with a single bank should generally be disclosed. In contrast, numerous immaterial uninsured cash balances on deposit with several banks may not require disclosure. The threshold for "significance" is a matter of judgment and will vary with individual circumstances.

An example of disclosure for this circumstance might be:

The Company maintains its cash accounts primarily with banks located in Alabama. The total cash balances are insured by the FDIC up to \$100,000 per bank. The Company has cash balances on deposit with two Alabama banks at December 31, 1996 that exceeded the balance insured by the FDIC in the amount of \$1,100,000.

---

[The next page is 761.]

## Section 2120

### Temporary Investments

#### .05 Depreciation on Building Held for Investment

*Inquiry*—A corporation purchased a building and intends to sell it within six months. It is accounted for as an investment rather than a fixed asset. Should the building be depreciated?

*Reply*—No. Depreciation is the systematic allocation of an asset's cost over the asset's service period. Because the building will be recovered through sale rather than through operations, accounting for the building is a process of valuation rather than allocation. FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC 108.122), concludes that long-lived assets to be disposed of should not be depreciated during the period they are held for disposal. The asset should be reported at the lower of carrying amount or fair value less cost to sell.

The fair value of an asset is the amount at which the asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The cost to sell an asset to be disposed of are generally the incremental direct costs to transact the sale of the asset, such as broker commissions, legal and title transfer fees, and closing costs that must be incurred before legal title can be transferred. Costs generally excluded for cost to sell an asset to be disposed of are insurance, security services, utility expenses, and other costs of maintaining the asset.

#### .06 Accounting for Preferred Dividends Received on Investments in Common Stock

*Inquiry*—A company received dividends on its investment in common stock of another company in the form of preferred stock. How should the dividend be recorded?

*Reply*—The assets and related dividend income should be recorded at fair value. APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, paragraph 18 (AC N35.105), states that in general, accounting for nonmonetary transactions should be based on the fair values of the assets or services involved which is the same basis as that used in monetary transactions and that a nonmonetary asset received in a nonreciprocal transfer should be recorded at the fair value of the asset received. (ARB No. 43, chapter 7B, *Stock Dividends and Stock Split-ups* (AC C20), discusses accounting for stock dividends by the recipient; however, the scope of that pronouncement specifically excludes distributions of a different class of shares from that owned.) [Amended June 1995.]

---

[The next page is 811.]

## Section 2130

### *Receivables*

#### **.05 Out-of-Pocket Costs Incurred by a Law Firm**

*Inquiry*—A law firm incurs certain out-of-pocket costs on behalf of its clients. If the law firm's efforts on behalf of the client are successful, these costs are recovered from the client in addition to the legal fees. If the case is lost, the costs are absorbed by the law firm. How should these costs be treated by the law firm?

*Reply*—These out-of-pocket costs should be reported as an asset in the financial statements of the law firm (for example, in an account called "client costs receivable"). At each balance sheet date, the law firm should apply the criteria in FASB Statement No. 5, *Accounting for Contingencies*, paragraph 3 (AC C59.104) to determine whether a loss contingency should be accrued.

If an asset is recorded, an allowance for unrecoverable client disbursements should be established representing the estimated amount of such costs that will not be realized. If these out-of-pocket costs become uncollectible because a case is lost, they should be written off against the allowance. [Amended June 1995]

#### **.07 Requirement for Doubtful Accounts Allowance**

*Inquiry*—Do generally accepted accounting principles require an enterprise to establish an allowance for doubtful accounts even though management, based on analysis of the receivables and past charge-off experience, believes that no accounts are uncollectible at the balance sheet date?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies*, paragraph 22 (AC C59.128), states that "the conditions under which receivables exist usually involve some degree of uncertainty about their collectibility, in which case a contingency exists . . ." FASB Statement No. 5, paragraph 8 (AC C59.105), would require an accrual of a loss by a charge to income if both of the following conditions exist:

- a. "Information available prior to issuance of the financial statements indicates that it is probable that an asset has been impaired . . . at the date of the financial statements." and
- b. "The amount of loss can be reasonably estimated."

If both conditions are not met, an allowance for doubtful accounts would not be required. Further, there is no requirement to disclose the absence of a loss accrual. If the conditions are met, an accrual for the loss should be recognized even though the specific receivables that are uncollectible may not be identifiable.

---

[The next page is 861.]

## Section 2140

### *Inventories*

#### **.01 Warehousing Included in Cost of Inventory**

*Inquiry*—A client deals in wholesaling and retailing automotive tires for foreign cars. Most of the inventory is imported, and it is valued on the company's records at the actual inventory cost plus freight-in. At year-end, the warehousing costs are prorated over cost of goods sold and ending inventory. The company's auditor believes the warehousing costs should not be capitalized to inventory, but the entire amount should be expensed in the year the costs are incurred. Are warehousing costs considered to be product costs or period costs?

*Reply*—Statement 3 of Chapter 4, ARB No. 43 states in part:

As applied to inventories, cost means in principle the sum of the applicable expenditures and charges directly or indirectly incurred in bringing an article to its existing condition and location.

Kieso and Weygandt, *Intermediate Accounting*, 9<sup>th</sup> Edition states:

Product costs are those costs that "attach" to the inventory and are recorded in the inventory accounts. These costs are directly connected with the bringing of goods to the place of business of the buyer and converting such goods to a saleable condition. Such charges would include freight charges on goods purchased, other direct costs of acquisition and labor, and other production costs incurred in processing the goods up to the time of sale. It would seem proper also, to allocate to inventories a share of any buying costs or expenses of a purchasing department, storage costs, and other costs incurred in storing or handling goods before they are sold (i.e., warehousing costs). Because of the practical difficulties involved in allocating such costs and expenses, however these items are not ordinarily included in valuing inventories.

Costs of delivering the goods from the warehouse would be considered a selling expense and should not be allocated to the goods that are still in the warehouse.

#### **.02 Obsolete Items in Inventory—I**

*Inquiry*—A client purchased in bulk various inventories of stock material. This material is used to produce various specialized parts used in electronic equipment. The bulk purchase took place some eighteen months ago, and less than ten percent of these inventories have been used. The client claims that there may be some obsolete stock on hand from this bulk purchase, but an eighteen months period is not enough time to effectively determine the complete degree of obsolescence because the highly specialized nature of the product line may not lead to renewed orders until periods beyond one or more operating cycles. Based on the information available to the client, about one-third of the original bulk purchase will be written off because of obsolescence. For the remaining inventories, the client will present a representation letter indicating that he believes the remaining inventory not to be obsolete.

There may be more obsolete inventory than the client is willing to admit. The poor turnover of such items is the chief reason for concern. Pricing the inventory at the lower of cost or market will be difficult. The nature of the inventory (many small items at low unit cost) and its poor turnover make obtaining market prices difficult.

What is the responsibility of auditors, not being inventory experts, in determining the extent of obsolescence?

*Reply*—Sections 331.09 to 331.13 of Statement on Auditing Standards No. 1 discuss evidential matter for inventories. These sections of SAS No. 1 do not define the auditor's responsibility for quality of inventory. However, the third standard of field work would require the auditor to obtain sufficient competent evidential matter regarding inventory quality in connection with determining whether or not the inventories are presented in accordance with generally accepted accounting principles. This evidential matter might include the opinion of other experts, for example an electronics engineer, with respect to the quality of the inventories in this case.

Over the eighteen-month period since the inventories were purchased, less than ten percent have been utilized. Such a usage rate indicates that the client has close to an estimated fifteen year supply of these inventories. This would indicate that little or no value should be assigned to these inventories.

### **.03 Obsolete Items in Inventory—II**

*Inquiry*—Accounting Research Bulletin No. 43, Chapter 4, "Inventory Pricing," Statement 1 defines inventory as,

"The aggregate of those items of tangible personal property which (1) are held for sale in the ordinary course of business, (2) are in process of production for such sale, or (3) are to be currently consumed in the production of goods or services to be available for sale."

Is it correct to assume that obsolete items which are not currently consumed in the production of "goods or services to be available for sale," are not classified as inventory?

*Reply*—It is correct to conclude that obsolete items are excludable from inventory. Cost attributable to such items is "nonuseful" and "nonrecoverable" cost (except for possible scrap value) and should be written off if a perpetual inventory is maintained or simply excluded from the inventory count if cost of sales is derived solely by means of taking a physical inventory count at the end of a period.

### **.04 Airplanes Chartered While Held for Sale**

*Inquiry*—A company purchases airplanes for sale to others. However, until they are sold, the company charts and services the planes. What would be the proper way to report these airplanes in the company's financial statements?

*Reply*—The primary use of the airplanes should determine their treatment on the balance sheet. Since the airplanes are held primarily for sale, and chartering is only a temporary use, the airplanes should be classified as current assets. However, depreciation would not be appropriate if the planes are considered inventory. ARB No. 43, Chapter 4, *Inventory Pricing*, states in part that the term inventory "excludes long-term assets subject to depreciation accounting, or goods which, when put into use, will be so classified."

If the use period were to exceed one year, reclassification to fixed assets and recognition of depreciation expense would be appropriate under generally accepted accounting principles (GAAP). [Amended]

### **.05 Valuation of Rebuilt Airplane Parts Inventory**

This Question and Answer is currently being revised.

## .06 Inventory of Meat Packer

**Inquiry**—A client engaged in the meat packing business uses the “National Provisioner Daily Market Service” quotations in valuing its inventories. The client contends that these quotations, adjusted for freight differentials, reflect an accurate approximation of actual costs and, in lieu of a complete cost accounting system, should be considered as cost for inventory valuation. Is this method of inventory valuation acceptable for meat packers?

**Reply**—Meat packing companies generally value their work in process and finished goods inventories at market price less cost to bring to market in accordance with ARB No. 43, Chapter 4 (AC I78), *Inventory Pricing*. Live animals and whole carcasses are carried at lower of cost or market. Many companies use quoted costs such as the National Provisioner quotations which are estimated costs of producing a particular cut of meat adjusted for the fluctuating daily livestock prices and other factors. These quoted prices must be further adjusted by the individual meat packers to take into account individual factors such as freight and storage.

## .08 Valuing Precious Metals Inventory Used in Manufacturing Applications

**Inquiry**—Should inventories of precious metals used in manufacturing applications (for example, diamonds used in drill bits, plutonium or uranium used in steel fabrication, or titanium used in paint manufacturing) be valued at market or at the lower of cost or market?

**Reply**—These inventories should be valued at the lower of cost or market in accordance with ARB No. 43, Chapter 4, *Inventory Pricing*, Statement 5, paragraph 8 (AC I78.109). The excess of market value over cost may be disclosed.

The exception to “lower of cost or market” that allows precious metals to be recorded at market on the balance sheet does not apply to these industrial applications because the metals will be used in the manufacturing process rather than held for immediate sale and do not meet the other conditions specified in ARB No. 43, Chapter 4, Statement 9 (AC I78.119), which states:

Only in exceptional cases may inventories properly be stated above cost. For example, precious metals having a fixed monetary value with no substantial cost of marketing may be stated at such monetary value; any other exceptions must be justifiable by inability to determine appropriate approximate costs, immediate marketability at quoted market price, and the characteristic of unit interchangeability. Where goods are stated above cost, this fact should be fully disclosed.

[Amended June 1995.]

## .09 Standard Cost for Inventory Valuation

**Inquiry**—A client uses standard costs for valuing inventory. What disclosure is necessary in the financial statements regarding inventory valuation?

**Reply**—Ordinarily, standard costs should be adjusted to a figure which approximates the lower of cost or market. If this is done, then it is appropriate to use standard costs for financial reporting purposes. This is usually the case where standards are currently and frequently adjusted.

ARB No. 43, Chapter 4, *Inventory Pricing*, states in the footnote to paragraph 6:

Standard costs are acceptable if adjusted at reasonable intervals to reflect current conditions so that at the balance sheet date standard costs reasonably approximate costs computed under one of the recognized bases. In such cases, descriptive language should be used which will express this relationship, as, for instance, "approximate costs determined on the first-in first-out basis," or, if it is desired to mention standard costs, "at standard costs, approximating average costs."

Accordingly, if in this particular case standard costs do in fact approximate the lower of cost or market, then disclosure along the lines indicated in the above reference is adequate.

On the other hand, if the difference between standard costs and the lower of cost or market is material, then mere footnote disclosure will not cure the known statement imperfection.

### **.11 Average Cost Method for Subsidiary**

*Inquiry*—Company A and all of its subsidiaries, except one, determine the cost of inventories by the last-in, first-out method (LIFO). The one subsidiary uses an average cost method. Is the average cost method acceptable for determining the cost of inventory? Is it acceptable for one subsidiary to use the average cost method and Company A and the other subsidiaries to use the LIFO method?

*Reply*—The average cost method is an acceptable method for determining the cost of inventory. An entity may use more than one method to determine the cost of inventory provided the methods are disclosed.

### **.12 Classification of Replacement Parts Under a Maintenance Agreement**

*Inquiry*—Company A has entered into a maintenance agreement with Company B, an unrelated party, to provide maintenance and service for specialized computer equipment leased by Company B to third parties. The maintenance contract between A and B requires that A maintain a spare/replacement parts inventory for the equipment. Company A has no use for these parts other than to fulfill the obligation under its contract with Company B. The term of the contract between Company A and Company B is for several years.

Most of the spare parts (i.e., circuit boards) are of a repairable nature, and it is expected that as A replaces a part, A will have the removed part refurbished, at its own cost. The refurbished parts will be available for future use as necessary.

Should Company A classify the refurbished replacement parts as inventory? Should Company A's investment in the parts be amortized?

*Reply*—Company A should classify the refurbished replacement parts as inventory. Inventory costs should not be amortized; a loss in their utility should be reflected as a charge against revenues of the period in which it occurs, as discussed in ARB No. 43, Chapter 4, *Inventory Pricing*, paragraph 8.

### **.13 Classification of Slow-Moving Inventory**

*Inquiry*—A client, engaged in an oil field related industry, has slow-moving products that are not considered obsolete. The inventory is properly stated at the lower of cost or market. The client plans to continue selling the inventory

on hand but will cease manufacturing the specialized product. Based on current sales estimates and demand for the product, it appears likely that the client will be able to sell all of the items in the inventory over a period of about four years. Is it correct to classify a portion of the slow-moving inventory as a long-term asset in the client's classified balance sheet?

**Reply**—The portion of the slow-moving inventory not reasonably expected to be realized in cash during the client's normal operating cycle should be classified as a long-term asset in the company's classified balance sheet. ARB No. 43, chapter 3A, *Working Capital*, paragraph 4, states that the term "current assets" is used to designate cash or resources commonly identified as those that are reasonably expected to be realized in cash or sold during the normal operating cycle of the business.

#### **.14 Disclosure of LIFO Reserve**

**Inquiry**—Should a company using the last-in, first-out (LIFO) method of inventory valuation be required to disclose the LIFO reserve in its financial statements or in the accompanying footnotes?

**Reply**—Yes. The Accounting Standards Division Issues Paper, *Identification and Discussion of Certain Financial Accounting and Reporting Issues Concerning LIFO Inventories*, addresses this matter in section 2, paragraphs 24 through 28. Paragraph 28 indicates that the task force voted (9 yes, 0 no) that either the LIFO reserve or replacement cost and its basis for determination should be disclosed. Paragraph 26 states that the Securities and Exchange Commission (SEC) requires companies whose securities trade publicly to disclose this information [Regulation S-X, section 210.5-02.6(c)] and that many nonpublic companies also disclose this information.

SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, paragraph 11 (AU 411.11), states that in the absence of a pronouncement covered by Rule 203 of the Rules of Conduct of the AICPA Code of Professional Conduct or another source of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances. Other accounting literature includes, for example, AICPA Issues Papers, FASB Statements of Financial Accounting Concepts, International Accounting Standards of the International Accounting Standards Committee; GASB Statements, Interpretations, and Technical Bulletins; Technical Information Service Inquiries and Replies included in AICPA *Technical Practice Aids*; pronouncements of other professional associations or regulatory agencies, and accounting textbooks, handbooks, and articles. [Amended June 1995.]

#### **.16 Accounting and Reporting for Changes in Inventory Policy**

**Inquiry**—In 19X4, a health care entity capitalizes in inventory supplies that in previous years were expensed. What is the proper accounting and reporting treatment for this event?

**Reply**—The accounting treatment of capitalizing supplies is in conformity with the guidance provided in the AICPA Audit and Accounting Guide *Audits of Providers of Health Care Services*, paragraph 8.04. This paragraph states that supplies for a health care entity should be accounted for in a manner similar to methods used by other business organizations. When material, this amount should be capitalized and, when immaterial, judgment for the proper accounting treatment should be exercised.

If the amounts of unrecorded supplies inventory in prior years were immaterial, the entity need not report the capitalization of supplies inventory in 19X4 as a change in accounting principle. APB Opinion No. 20, *Accounting Changes*, paragraph 8(a) (AC A06.106) states, "... neither (a) initial adoption of an accounting principle in recognition of events or transactions occurring for the first time or that previously were immaterial in their effect ... is a change in accounting principle."

However, if unrecorded supplies inventories in the prior years were material, and therefore should have been capitalized, an error has occurred, and the guidance in APB Opinion No. 20, paragraphs 36 and 37 (AC A35.105), concerning prior period adjustments should be followed.

---

[The next page is 1161.]

## Section 2210

### ***Fixed Assets***

#### **.01 Settlement of Mortgage Installment on Real Estate Between Buyer and Seller**

*Inquiry*—A company purchased an office building subject to the seller's assumable mortgage. The closing of the transaction occurred in the middle of a month which was between payment dates on the mortgage. The closing statement reflected a credit from the seller to the buyer for the interest that accrued on the mortgage from the last payment date until the date of the closing. How should this credit be accounted for by the buyer?

*Reply*—The buyer would treat the accrued interest credit as a reduction of interest expense for the first month of ownership. When the buyer makes the first interest payment after the closing, the credit will offset the full month's interest paid and thus reduce the buyer's net interest expense to the amount attributable to the period that the property was owned by the buyer. [Amended June 1995.]

#### **.02 Broker's Commission Received by Purchaser of Property as Purchase Price Concession**

*Inquiry*—A corporation ("purchaser") is engaged in negotiations to purchase real property. During the negotiations, the purchaser was unwilling to accept the seller's best offer. To induce the purchaser to agree to the sale, the broker agreed to rebate a portion of the seller-paid commission to the purchaser.

Would this rebate be considered income to the purchaser or a reduction of the cost of the property acquired?

*Reply*—The "rebate" received from the broker should be accounted for as a reduction of the cost of the property rather than as income. Income should not be recognized on a purchase. The receipt of the rebate was part of the acquisition of the real estate and, when netted against the purchase price, reflects the amount the purchaser was willing to pay for the property. [Amended June 1995.]

#### **.06 Valuation of Cattle Herd**

*Inquiry*—A client, in the business of raising and selling cattle, has not been in business long enough to develop enough cost information to reliably value the cattle raised by them. Each cow costs \$2,000 or more and has an estimated salvage value of about \$300 at the end of its productive breeding life. The client has adopted a life of seven years for its breeding herd based on the various ages of the cows.

The client proposes to price the cattle raised as follows:

##### *Purchased calves*

When a cow is purchased with a "calf at side," twenty percent of the purchase price is allocated to the calf. An additional \$50 is allocated to the calf every six months for the first eighteen months. At eighteen months of age, the cows are considered mature enough for breeding and are then either sold or placed in the breeding herd and depreciated.

*Raised calves*

Since the mother is maintained principally for breeding and is expected to produce one calf each year, the calf birthed and raised is allocated one year's depreciation of the mother, plus \$50 at birth. An additional \$50 is allocated every six months for the first eighteen months.

The problem of valuing the cattle is compounded by the fact that cattle purchased for breeding and those purchased for sale are not separated, and any cow may be sold at any time. What improvements could be made in the pricing scheme, and how should the breeding herd and the herd held for sale be shown on the balance sheet?

*Reply*—Rather than setting an average breeding life of seven years for the breeding herd, it would appear more reasonable to set an estimated age at which a cow should be fully depreciated and to depreciate the cost of each cow over the remaining estimated years of life. Also, instead of allocating twenty percent of the purchase price of the cow to the calf "at side," it would be better to determine the percent applicable to the calf on the basis of the number of expected additional calves for that cow.

In valuing the calves, if the \$50 figure is a reasonable estimate of six months of costs, the method seems reasonable. However, instead of allocating one year's depreciation of the mother plus \$50 at birth, it might be better to allocate only the depreciation plus the direct expenses of birth such as veterinarian's fees, etc.

Since it is difficult to determine which of the cattle are "inventory" and which are "fixed assets," it might not be appropriate in this case to classify the assets and liabilities as current or long-term in the balance sheet.

**.07 Costs of Ski Slopes and Lifts**

*Inquiry*—A company has developed a piece of land into a skiing resort. The company has cut the trees, cleared and graded the land and hills, and constructed ski lifts and platter pulls.

Should the tree cutting, land clearing, and grading costs of constructing the ski slopes be capitalized to land? If so, are these costs amortizable?

Should the clearing and grading costs connected with the construction of the ski lifts and platter pulls be capitalized to this equipment and depreciated?

*Reply*—All expenditures incurred which are made for the purpose of making the land suitable for its intended use or purpose (whether that use be for the construction of a ski lodge, lifts, slopes, platter pulls, or other facilities) are properly capitalizable as land costs, and land is not subject to depreciation. During the course of clearing the land to make it useful for the purpose acquired, salable timber may be recovered, and since the clearing costs are capital items, amounts realized from the sale of the timber may properly be credited to the land account. Recurring maintenance of right-of-way (i.e., the slope and ski-lift areas) would be properly treated as a period cost. [Amended]

**.08 Restaurant Dishes and Silverware**

*Inquiry*—Should a base stock inventory of silverware and dishes be shown on the balance sheet of a restaurant as a fixed asset? In the base stock method, the base stock is recorded at an unchanging amount and additions to the stock

are charged to expenses for the period. Inasmuch as fixed assets are specific items which are subject to depreciation (except land), and the base stock is an approximate figure for many items and is not depreciated, it would seem that the base stock should not be classified as a fixed asset.

**Reply**—Various publications recommending treatment for large stocks of short-lived, replaceable assets such as silverware and dishes indicate that the assets should be valued on the basis of physical inventories at year-end, with used equipment being valued at 50% of current cost, and unused equipment valued at full cost. This, in effect, assigns an average useful life of two years for the equipment. It is recommended that such assets be included in fixed assets.

The classification in the balance sheet should not depend upon the method of valuing the assets. Therefore, regardless of the method of valuation, the assets should be included in fixed assets. If the valuation differs materially from the depreciated cost of individual goods on hand at year-end, the presentation is not in accordance with generally accepted accounting principles.

### **.09 Appraisal Value for Mailing Lists**

This Question and Answer is currently being revised.

### **.13 Effect of Future Transfer on Accounting for Land**

**Inquiry**—A nonprofit health care corporation has agreed to a future transfer of title in its operating property (land and a hospital) to the city in which the property is located. The transfer will occur in 30 years. Under such circumstances, is it appropriate to amortize the cost of land over a period of 30 years?

**Reply**—APB Opinion No. 17, *Intangible Assets*, paragraph 22, states in part:

Accounting for the cost of a long-lived asset after acquisition normally depends on its estimated life. The cost of assets with perpetual existence, such as land, is carried forward as an asset without amortization, and the cost of assets with finite lives is amortized by systematic charges to income.

Accordingly, the cost of land should not be amortized.

The agreement between the corporation and the city should be disclosed in notes to the corporation's financial statements.

### **.15 Capitalization of Cost of Dredging Log Pond**

**Inquiry**—Corporation A operates a log pond and dredged the pond during the year at a cost of \$350,000. Thus, the useful life of the log pond was extended several years. Should the dredging cost be expensed or capitalized?

**Reply**—FASB Concepts Statement No. 3, *Elements of Financial Statements of Business Enterprises*, paragraph 89, states, in part, "... many assets yield their benefits to an enterprise over several periods . . . . Expenses resulting from their use are normally allocated to the periods of their estimated useful lives (the periods over which they are expected to provide benefits) by a 'systematic and rational' allocation procedure, for example, by recognizing depreciation or other amortization."

Since the dredging cost will benefit future periods, Corporation A should capitalize the cost and amortize it in a systematic and rational manner over the estimated period of benefit. [Amended]

### **.18 Revaluation of Assets**

**Inquiry**—Company A acquired a material amount of treasury stock resulting in a stockholders' equity deficit. Since state law (where Company A is in-

corporated) prohibits the impairment of legal capital, Company A revalued certain of its assets at fair market value. Should Company A record depreciation for the revalued assets based on historical cost or fair market value?

*Reply*—APB Opinion No. 6, *Status of Accounting Research Bulletins*, paragraph 17 (AC D40.102), states:

The Board is of the opinion that property, plant and equipment should not be written up by an entity to reflect appraisal, market or current values which are above cost to the entity. This statement is not intended to change accounting practices followed in connection with quasi-reorganizations or reorganizations. This statement may not apply to foreign operations under unusual conditions such as serious inflation or currency devaluation. However, when the accounts of a company with foreign operations are translated into United States currency for consolidation, such write-ups normally are eliminated. Whenever appreciation has been recorded on the books, income should be charged with depreciation computed on the written up amounts.

An opinion expressed on the financial statements of Company A should be qualified or adverse because the write-up of assets is a departure from generally accepted accounting principles.

## **.20 Compounding Capitalized Interest**

*Inquiry*—Company A is constructing a building for its own use. The company capitalized interest cost on the average amount of accumulated expenditures for the asset during the current year end. The building was completed in the next year. Should the company capitalize interest on the average amount of expenditures for the assets that were made during the current period only or the average amount of accumulated expenditures for the asset during the period including the expenditures made in the prior period, which already includes capitalized interest cost?

*Reply*—FASB Statement No. 34, *Capitalization of Interest Cost*, paragraph 13 (AC I67.110), states in part, the amount capitalized in an accounting period shall be determined by applying an interest rate to the average amount of accumulated expenditures for the asset during the period. Paragraph 57 further states, “the Board concluded that compounding is conceptually consistent with its conclusion that interest on expenditures for the asset is a cost of acquiring the asset.” Accordingly, the rate should be applied to the average of all the accumulated expenditures.

## **.22 Fixed Asset Partially Acquired With Grant Funds**

This Question and Answer is currently being revised.

## **.25 Capitalization of Interest Costs Incurred by Subsidiary**

*Inquiry*—A subsidiary with an asset qualifying for interest capitalization under FASB Statement No. 34, *Capitalization of Interest Cost* (AC I67), incurs its entire interest cost from a loan from its parent.

What is the extent of interest that may be appropriately capitalized?

*Reply*—FASB Statement No. 34, paragraph 13 (AC I67.111), states in part, that the amount capitalized in an accounting period shall be determined by applying an interest rate to the average amount of accumulated expenditures for the asset during the period. FASB Statement No. 34, paragraph 15 (AC I67.113), further states that in separately issued financial statements of a parent company, consolidated subsidiary, or unconsolidated subsidiary, the amount of interest cost that may be capitalized is limited to the total amount of interest cost (including interest on intercompany debt) incurred by the separate entity.

Such financial statements should disclose related party transactions as required by FASB Statement No. 57, *Related Party Disclosures* (AC R36). [Amended]

**.27 Construction of Asset—Foreign Currency Transaction Gains/Losses**

*Inquiry*—A company is constructing a building in the United States for its own use. In order to finance the cost of the building, a loan denominated in a foreign currency is obtained from a bank in a foreign country. The company is appropriately capitalizing interest incurred as part of the cost of the building in accordance with FASB No. 34, *Capitalization of Interest Cost* (AC I67). However, the company wants to also capitalize as part of the cost of the building any foreign currency transaction gains or losses it incurs as a result of the loan with the bank in the foreign country. The company's rationale is that the transaction gains or losses relate specifically to the building and therefore should be considered part of the cost of the building. Is this appropriate?

*Reply*—No. According to FASB Statement No. 52, *Foreign Currency Translation*, paragraph 15 (AC F60.122):

Foreign currency transactions are transactions denominated in a currency other than the entity's functional currency. Foreign currency transactions may produce receivables or payables that are fixed in terms of the amount of foreign currency that will be received or paid. A change in exchange rates between the functional currency and the currency in which a transaction is denominated increases or decreases the expected amount of functional currency cash flows upon settlement of the transaction. That increase or decrease in expected functional currency cash flows is a foreign currency transaction gain or loss that generally shall be included in determining net income for the period . . . .

Thus, even though the loan was obtained to construct the building, the transaction gains and losses are not part of the cost of the building, but are a result of the change in the exchange rate and are included in income each period in which the exchange rate fluctuates. [Amended]

[The next page is 1261.]

## Section 2220

### Long-Term Investments

#### .01 Equity Method When Current Direct Ownership Less Than Twenty Percent

*Inquiry*—Company A purchased a 19% stock ownership interest in B. The company also made a loan to B which is convertible into stock of B and is secured by shares of C (B's subsidiary). For as long as the loan is outstanding, Company A will have several seats on B's board. The company also has options to purchase shares of C.

Is the company required to report its investment in B under the equity method?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 17, states that the ability to exercise the type of influence contemplated in the Opinion may be indicated in several ways such as representation on the board of directors and investment (direct or indirect) of 20% or more in the voting stock of an investee.

The company would own only 19% of the outstanding voting stock. Although it is not indicated whether the conversion feature of the loan may result in ownership of 20% or more, or whether the board seats would allow A to significantly influence the voting at meetings of B's board of directors, the overall impact of the proposed transaction could demonstrate that the company has the ability to exercise significant influence over the investee. Therefore, the equity method should be followed in accounting for the investment.

#### .03 Equity Method for Investee Following Completed Contract Method

*Inquiry*—A client, a contractor who follows the percentage of completion method for income recognition, has entered into a joint venture. The joint venture follows the completed contract method in its financial statements. The client accounts for his investment in the joint venture on the equity basis. May the client recognize his share of the venture's income (determined on the percentage of completion method) even though the venture will not recognize income until the contract is completed?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 3f, states:

"Earnings or losses of an investee" and "financial position of an investee" refer to net income (or net loss) and financial position of an investee determined in accordance with accounting principles generally accepted in the United States.

Both the completed contract method and the percentage of completion method are generally accepted, and the investor should not change the investee's method of accounting from completed contract to percentage of completion in applying the equity method. If the investee's financial statements are prepared on a comprehensive basis of accounting other than GAAP, the investor

should eliminate material variances from GAAP in applying the equity method, in accordance with SOP No. 78-9, *Accounting for Investments in Real Estate Ventures*, paragraph 24. [Amended]

#### **.05 Assuming Pro Rata Share of Venture's Revenues and Expenses**

*Inquiry*—A company has entered into a joint venture with another venturer. Would it be permissible for the company to include in its income its pro rata share of each of the revenue and expense accounts of the venture?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19c, states:

The investment(s) in common stock should be shown in the balance sheet of an investor as a single amount, and the investor's share of earnings or losses of the investee(s) should ordinarily be shown in the income statement as a single amount except for the extraordinary items as specified in (d) below.

However, AICPA Interpretation No. 2 of APB Opinion No. 18, "Investments in Partnerships and Ventures" relating to accounting for investments in unincorporated joint ventures states in part:

... because the investor-venturer owns an undivided interest in each asset and is proportionately liable for its share of each liability, the provisions of paragraph 19-c may not apply in some industries. For example, where it is the established industry practice (such as in some oil and gas venture accounting), the investor-venturer may account in its financial statements for its *pro rata* share of the assets, liabilities, revenues, and expenses of the venture.

Terminology such as "should ordinarily" contained in the above reference indicates that picking up the share of the joint venture on a line by line item, while it may be unusual, would not necessarily be prohibited. Guidance for transactions of this type relating to real estate can be found in SOP No. 78-9, *Accounting for Investments in Real Estate Ventures*, paragraph 11 (ACC 10,240.11). [Amended]

#### **.08 Acquisition of Subsidiaries by Exchange of Assets With No Book Value**

*Inquiry*—A client, a computer services company, acquired fifty percent of the capital stock of a corporation in exchange for rights to computer programs. The cost of these programs had been expensed by the client. Another party acquired the remaining fifty percent of the stock for \$150,000. The client recorded this transaction as a debit to investments in subsidiaries and a credit to earnings of \$150,000.

A similar transaction, an exchange of rights to computer programs for capital stock with a stated value of \$200,000, occurred later. Investments in subsidiaries was debited and earnings was credited for \$200,000.

The subsidiaries are accounted for under the equity method.

Can the earnings recorded on the exchange of expensed computer programs for common stock be reflected in parent company financial statements, or do generally accepted accounting principles require elimination?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19 (AC 182.109) states in part, "The difference between consolidation and the equity method lies in the details reported in the financial statements. Thus, an investor's net income for the per-

iod and its stockholders' equity at the end of the period are the same whether an investment in a subsidiary is accounted for under the equity method or the subsidiary is consolidated . . . ." Intercompany profit eliminations under the equity method is discussed in AICPA Interpretation No. 1 of APB Opinion No. 18, "Intercompany Profit Elimination Under Equity Method (AC I82.501)," and states in part, "All intercompany transactions are eliminated in consolidation, but under the equity method intercompany profits or losses are normally eliminated only on assets still remaining on the books of an investor or an investee."

Both APB Opinion No. 18, paragraph 19 (AC I82.109), and AICPA Interpretation No. 1 of APB Opinion No. 18 (AC I82.501), indicate that the intercompany gain (\$150,000 and \$200,000) recorded by the investor company would be eliminated under the equity method.

In the second case, measuring the value of the computer programs by the \$200,000 stated value of the stock may not be appropriate, and the auditor should try to satisfy himself concerning the estimated values assigned to the tangible and intangible assets contributed by the other stockholders. (See APB Opinion No. 18, paragraph 19n and APB Opinion No. 16, *Business Combinations*, paragraph 88.)

#### **.09 Market Value of Unregistered Stock**

*Inquiry*—A company needs a monthly valuation of its securities at market. Among the securities to be valued are some lettered securities that contain a three-year restriction against sale. These lettered securities consist of 7 1/2% convertible debentures maturing in five years and common stock which had to be purchased as a unit. Common stock which is unrestricted is being freely traded and is presently selling at three times the cost of the restricted common.

What is the generally accepted accounting method of valuing the lettered securities?

*Reply*—The valuation of unregistered stock is discussed in the SEC's Codification of Financial Reporting Policies, Sec. 404.04.a (ASR 113).

In general the valuation of such stock is difficult. The relationship between the current value of unregistered stock and of similar stock which is available for sale on the exchanges or over the counter will vary for many reasons, including particularly the period for which it may be expected to remain unregistered, and the volatility and thinness of market of stock being traded.

Methods of valuation are not, strictly speaking, accounting functions. The valuation of securities is primarily a function of appraisers and stockbrokers. A broker knowledgeable as to the company involved will frequently be in a position to suggest a discount percentage appropriate to the restrictions imposed upon sale of a particular security. Such percentage will vary with the type of restriction and with the nature of the market for the unrestricted security of that issuer.

In determining how much credibility to assign to evidence of valuation of an asset, it is necessary to evaluate the competence and experience of the individual appraiser, his knowledge of the field, and the individual asset involved.

#### **.11 Equity Method for Investments in Limited Partnerships and Unincorporated Joint Ventures**

*Inquiry*—Corporation A owns investments ranging from 20% to more than 50% in several limited partnerships and unincorporated joint ventures. Is Cor-

poration A required to use the equity method to account for its investments? If Corporation A uses the equity method for its investments, should the auditors of Corporation A examine the financial statements of each separate investee?

**Reply**—AICPA Interpretation No. 2 of APB Opinion No. 18, "Investments in Partnerships and Ventures," states:

APB Opinion No. 18 applies only to investments in common stock of corporations and does not cover investments in partnerships and unincorporated joint ventures (also called undivided interests in ventures). Many of the provisions of the Opinion would be appropriate in accounting for investments in these unincorporated entities, however, as discussed below.

Partnership profits and losses accrued by investor-partners are generally reflected in their financial statements as described in paragraphs 19-c and 19-d. Likewise, most of the other provisions of paragraph 19 would be appropriate in accounting for a partnership interest, such as the elimination of intercompany profits and losses (see paragraph 19-a).

\* \* \*

Generally, the above discussion of partnerships would also apply to unincorporated joint ventures, particularly the elimination of intercompany profits and the accounting for income taxes. However, because the investor-venturer owns an undivided interest in each asset and is proportionately liable for its share of each liability, the provisions of paragraph 19-c may not apply in some industries. For example, where it is the established industry practice (such as in some oil and gas venture accounting), the investor-venturer may account in its financial statements for its *pro rata* share of the assets, liabilities, revenues, and expenses of the venture.

AICPA Interpretation No. 2 of APB Opinion No. 18, seems to imply that the same factors (a controlling financial interest, the ability to exercise significant influence over operating and financial policies, or the lack of control or ability to exercise significant influence) that determine the method used by an investor to account for its investments in corporate common stock would also determine the method used by an investor to account for its investments in unincorporated entities. The one exception stated in AICPA Interpretation No. 2 of APB Opinion No. 18, that an investor may account for its *pro rata* share of the assets, liabilities, revenues, and expenses of an unincorporated joint venture, is based on industry practices. Accordingly, Corporation A's method of accounting for its investments would depend on the circumstances.

SAS No. 1, section 332, *Long-Term Investments*, paragraph 5 (AU Section 332.05), relates to investments accounted for by either the cost method or the equity method and states, in part, that:

Evidential matter pertaining to the carrying amount of long-term investments, income and losses attributable to such investments, and capital and other transactions of the investee may be available in the form of audited financial statements, unaudited financial statements, market quotations, or other evidential matter.

## **.12 Investor's Share of Losses in Excess of Its Investment**

**Inquiry**—Company A's share of the losses of a real estate venture exceeds its investment in the venture. How should Company A account for its investment?

*Reply*—SOP No. 78-9, *Accounting for Investments in Real Estate Ventures* (ACC section 10,240), recommends that the equity method be used to account for investments in corporate or noncorporate real estate ventures. APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19i (AC I82.109), states:

An investor's share of losses of an investee may equal or exceed the carrying amount of an investment accounted for by the equity method plus advances made by the investor. The investor ordinarily should discontinue applying the equity method when the investment (and net advances) is reduced to zero and should not provide for additional losses unless the investor has guaranteed obligations of the investee or is otherwise committed to provide further financial support for the investee.\* If the investee subsequently reports net income, the investor should resume applying the equity method only after its share of that net income equals the share of net losses not recognized during the period the equity method was suspended.

Accordingly, the investor should reflect its investment at a zero amount and disclose in a note to the financial statements the amount of its share of investee losses in excess of the zero amount.

If the investor is committed to provide further financial support to the investee, the investor should show the excess of its share of investee losses over its investment and advances as a liability up to the amount of its commitment.

### **.13 A Change in Circumstances Using the Equity Method of Accounting for an Investment**

*Inquiry*—An investor had guaranteed obligations of an investee and the investor's share of losses of this investee have exceeded the carrying amount of the investment on the investor's book in a prior year. This procedure is in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19i (AC I82.109). In the current year, the investee fully paid the obligation which was guaranteed by the investor; accordingly, the investor will no longer guarantee the obligations of the investee and, therefore, will not record its share of the investee's losses.

- (1) Does this constitute a change of accounting principles?
- (2) How should the liability recorded on the investor's books be accounted for?

*Reply*—(1) This is not a change in accounting principles. According to APB Opinion No. 20, *Accounting Changes*, paragraph 8 (AC A06.106), an "adoption or modification of an accounting principle necessitated by transactions or events that are clearly different in substance from those previously occurring" is not a change in accounting principles. The situation described is a change in circumstances and not a change in accounting principles.

(2) The liability recorded on the investor's books should be reversed in the current year and reported in the income statement with appropriate footnote disclosure.

---

\* An investor should, however, provide for additional losses when the imminent return to profitable operations by an investee appears to be assured. For example, a material, nonrecurring loss of an isolated nature may reduce an investment below zero even though the underlying profitable operating pattern of an investee is unimpaired. [APB Opinion No. 18, paragraph 19i, footnote 10 (AC I82.109, footnote 11).]

#### **.14 Equity Method—Effect of Unrecorded Equity in Losses on Additional Investment**

*Inquiry*—Company A purchased 40 percent of Company B for \$100,000. Company A did not guarantee the debt of Company B. Subsequent to the investment by A, B incurred large operating losses and A ceased to record equity in B's losses after its investment in B was reduced to zero. A few years later, A purchased an additional 5 percent interest in B. Should Company A offset the amount of this additional investment by the unrecorded equity in losses of Company B?

*Reply*—No. Company A's additional investment would not be offset by the unrecorded equity in Company B's losses because A's unrecorded equity in those losses is not attributable to the block of shares in comprising the additional 5 percent interest.

#### **.15 Accounting for Distribution From Joint Venture**

*Inquiry*—A corporation invests in a joint venture which is involved in real estate. The joint venture is a corporation and it is not controlled by the corporate investor. It accounts for this investment in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (AC I82). The joint venture incurred losses over the next few years. That resulted in the investment account on the corporation's books to decline to zero. At this point, the joint venture paid the corporation a cash distribution. How should the corporation account for this distribution?

*Reply*—APB Opinion No. 18 (AC I82), states that the investor ordinarily shall discontinue applying the equity method when the investment (and net advances) is reduced to zero and shall not provide for additional losses unless the investor has guaranteed obligations of the investee or is otherwise committed to provide financial support for the investee.

In this situation, the corporate investor in the joint venture should account for the cash distributions received as income if the distribution is not refundable by agreement or by law and the investor is not liable for the obligations of the joint venture and is not otherwise committed to provide financial support to the joint venture.

#### **.17 Tax Basis Accounting—Use of Equity Method**

*Inquiry*—Can an investor who prepares its financial statements in accordance with U.S. generally accepted accounting principles (GAAP) use the equity method of accounting for an investment in the common stock of an investee that presents its financial statements on the income tax basis of accounting if the investment would otherwise qualify for the equity method?

*Reply*—APB Opinion No. 18, *Equity Method of Accounting for Investments in Common Stock*, paragraph 10 (AC I82), states, "Under the equity method, an investor recognizes its share of earnings or losses of an investee in the periods for which they are reported by the investee in its financial statements." APB Opinion No. 18, paragraph 3 (AC I82.404), defines the earnings or losses of an investee as the "net income (or net loss) . . . of an investee determined in accordance with accounting principles generally accepted in the United States."

If the investment qualifies for equity method accounting, the investor must adjust the investee's tax basis financial statements to GAAP basis to determine its share of earnings or losses. If the adjustment cannot be determined, and the amounts are material, it would be considered a GAAP exception.

---

## Section 2230

### ***Noncurrent Receivables***

#### **.02 Balance Sheet Classification of Deposit on Equipment to Be Purchased**

*Inquiry*—What is the appropriate balance sheet classification of a deposit on machinery which is to be purchased within one year?

*Reply*—ARB No. 43, Chapter 3A, *Current Assets and Current Liabilities*, paragraph 6, states, "This concept of the nature of current assets contemplates the exclusion from that classification of such resources as: (a) cash and claims to cash that are restricted as to withdrawal or use for other than current operations, are designated for expenditure in the acquisition or construction of noncurrent assets, or are segregated for the liquidation of long-term debts." Accordingly, the deposit on equipment should be classified as a noncurrent asset even though the equipment will be purchased within one year.

---

[The next page is 1391.]

## Section 2240

### **Cash Surrender Value of Life Insurance**

#### **.01 Balance Sheet Classification of Life Insurance Policy Loan**

*Inquiry*—A company has secured a short-term loan from an insurance company against the cash surrender value of its life insurance policies.

In paragraph 6(d), Chapter 3A of ARB No. 43, cash surrender value of life insurance policies is excluded from the classification of a current asset. This reference does not appear to recommend a different classification if the cash value may have been fully borrowed from the insurance company.

Is it proper to classify a readily liquid asset as noncurrent and simultaneously show the related borrowings as a current liability?

*Reply*—Paragraph 6 of Chapter 3A of Accounting Research Bulletin No. 43 states in part:

This concept of the nature of current assets contemplates the exclusion from that classification of such resources as . . . (d) cash surrender value of life insurance policy.

Note 3 to paragraph 7 of this Chapter states:

Loans accompanied by pledge of life insurance policies would be classified as current liabilities when, by their terms or by intent, they are to be repaid within twelve months. The pledging of life insurance policies does not affect the classification of the asset any more than does the pledging of receivables, inventories, real estate, or other assets as collateral for a short-term loan. However, when a loan on a life insurance policy is obtained from the insurance company with the intent that it will not be paid but will be liquidated by deduction from the proceeds of the policy upon maturity or cancellation, the obligation should be excluded from current liabilities.

Paragraph 7-1 of Accounting Principles Board Opinion No. 10 states:

It is a general principle of accounting that the offsetting of assets and liabilities in the balance sheet is improper except where a right of setoff exists.

Therefore, if a company takes out policy loans from the insurance company on life insurance policies which it owns and if there is no intention to repay the loan during the ensuing operating cycle of the business, such loan may be excluded from current liabilities. Furthermore, as the owner of a policy normally has the right to offset the loan against the proceeds received on maturity or cancellation of the policy, it is appropriate to apply the amount of the loan in reduction of the cash surrender value, with disclosure of the amount so offset.

#### **.02 Disclosure of Life Insurance on Principal Stockholders**

*Inquiry*—A client corporation maintains life insurance policies on its principal stockholders which will provide for the repurchase of the stock in the event of a stockholder's death. The cash surrender value of these policies appears on the balance sheet. Is further disclosure necessary?

*Reply*—The rule of informative disclosure requires that the essential facts respecting firm commitments for purchase of a corporation's own stock pursuant to a buy-sell agreement, be set forth in a footnote to the financial statements.

Below is an example of a footnote describing such a situation which might appear on the balance sheet in reference to the cash surrender value account:

The company is the owner and beneficiary of key-man life insurance policies carried on the lives of X, Y, and Z bearing face value amounts of \$500,000, \$500,000 and \$450,000 respectively. No loans are outstanding against the policies, but there is no restriction in the policy regarding loans.

The life insurance contracts are accompanied by mandatory stock purchase agreements to the amount of the proceeds of the life insurance. In the event of the insured's death, the "fair market value" of the stock will, by previous action, be established by the X Appraisal Company. The insured's estate will be obligated to sell, and the company will be obligated to purchase the insured's stock up to the appraisal value of the stock or the proceeds of insurance, whichever is the lesser. The purpose is to protect the company against an abrupt change in ownership or management.

### **.03 Omission of Cash Surrender Value of Life Insurance from Assets**

*Inquiry*—Clearly, cash surrender values of life insurance may be included among the assets in the balance sheet of an enterprise. Is this mandatory, or may management elect to omit this item from the assets on the theory that its inclusion will be misleading since the insurance is carried for the purpose of covering the loss it is anticipated will be sustained as a result of the death of a key official?

*Reply*—If the enterprise retains all valuable contract rights incident to ownership of the life insurance policy, then it is mandatory from the standpoint of full accountability to reflect the asset status of the cash surrender value of the policy. Not to reflect the cash surrender value would be tantamount to creating a hidden reserve which would be contrary to generally accepted accounting principles.

### **.04 Corporation's Policy on Life of Debtor Corporation's Officer**

*Inquiry*—A client took out a straight life insurance policy on the life of an officer of another corporation which is indebted to the client. The client corporation hopes to receive the proceeds of the insurance policy tax free and has not deducted the yearly premium payments as expenses. The officer is over 65 years old, and, therefore, there is a great possibility he will die prior to the full payment of the outstanding balance of the corporation's debt. The prior CPA reported the accumulated premium payments on the Balance Sheet as "Investment in Life Insurance."

Is it proper to show total premiums paid as an investment under these circumstances?

*Reply*—Where a corporation takes out a life insurance policy on the life of a debtor corporation's officer (assuming that there is an insurable interest), the manner of accounting for the premiums should not differ from the manner of accounting for premiums paid on the life of the corporation's own officer. The premiums should be broken down between the expense and the cash surrender value elements. Accordingly, the accumulated premiums account should be analyzed to determine the cash surrender value as at the balance sheet date, the expense portion for the period under audit, and the remaining portion which should be treated as a correction of prior period earnings. See Accounting Principles Board Opinion No. 20, *Accounting Changes*, for a discussion of correction of an error.

[The next page is 1451.]

## Section 2250

### *Intangible Assets*

#### **.02 Change in Amortization Period for Contingent Consideration Carried as Goodwill**

*Inquiry*—A company in a purchase transaction acquired a service business at a purchase price in excess of identifiable tangible and intangible assets. The excess purchase price, paid for customers' lists, going concern value, goodwill, etc., is reflected on the balance sheet. The original purchase agreement provided for additional payments which were dependent upon the operations of the acquired company in subsequent years. An additional \$100,000 became due three years from the date of the original purchase.

Because of the nature of the service business, the purchaser tentatively decided on the date of acquisition to adopt a ten year life for amortization purposes. The ten-year write-off period originally chosen does not represent the actual life of the excess but only a judgmental estimate. The additional \$100,000 is payable only because the acquired company has demonstrated continued earning power. Because of this evidence as to the continued value of the excess purchase price, the company determined to write off the excess (comprising the unamortized balance of the original amount plus the \$100,000) over a term of fifteen years from the date of payment of the additional \$100,000.

Is the amortization of goodwill and other intangible assets, in accordance with generally accepted accounting principles?

*Reply*—Paragraph 80 of Accounting Principles Board Opinion No. 16 states as follows:

Additional consideration may be contingent on maintaining or achieving specified earnings levels in future periods. When the contingency is resolved and additional consideration is distributable, the acquiring corporation should record the current fair value of the consideration issued or issuable as additional cost of the acquired company. The additional costs of affected assets, usually goodwill, should be amortized over the remaining life of the asset.

Paragraph 31 of APB Opinion No. 17 states in part:

A company should evaluate the periods of amortization continually to determine whether later events and circumstances warrant revised estimates of useful lives. If estimates are changed, the unamortized costs should be allocated to the increased or reduced number of remaining periods in the revised useful life but not to exceed forty years after acquisition.

This also is in accordance with paragraph 31 of APB Opinion No. 20.

It is appropriate to adjust the estimate of the period benefited by the intangible assets at the date the contingent consideration is determined. Such amortization period may not exceed forty years from the date of the original acquisition. The revised life should be applied to the unamortized balance of the originally recorded intangible, as well as to the additional payment being

made, on a straight line basis in accordance with paragraph 30 of APB Opinion No. 17. If the intangibles can be broken down between general "goodwill" and other intangibles, the estimated lives for the various intangible assets may differ.

#### **.04 Appraisal Value of Intangible Assets**

*Inquiry*—A client who operates several Community Antenna Television systems wishes to value the CATV systems in the statement of financial position at an appraisal value based on a fixed amount per subscriber. Could such a value be properly presented on the financial statements?

*Reply*—APB Opinion No. 6, *Status of Accounting Research Bulletins*, paragraph 17, states in part, "The Board is of the opinion that property, plant and equipment should not be written up by an entity to reflect appraisal, market, or current values which are above cost to the entity." APB Opinion No. 17, *Intangible Assets*, paragraph 25, states in part, "Intangible assets acquired singly should be recorded at cost at date of acquisition."

Therefore, whether the assets involved are tangible or intangible, it would not be in accordance with generally accepted accounting principles to state such assets at appraised values in excess of cost. [Amended]

#### **.05 Reporting Write-Off of Unamortized Goodwill**

*Inquiry*—Corporation A has reviewed the estimated life of goodwill, which is being amortized, and decided that the unamortized balance of goodwill should be written off in the current year. The write-off is caused by significant changes in manufacturing techniques and other circumstances which indicate that the unamortized goodwill has no future benefits. How should the write-off be reported?

*Reply*—In accordance with APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, paragraph 23(a), which refers specifically to the write-down or the write-off of intangibles, the write-off of goodwill would not be reported as an extraordinary item. Assuming that the amount of the write-off is material, the write-off should be reported in accordance with APB Opinion No. 30, paragraph 26. Paragraph 26 states:

A material event or transaction that is unusual in nature or occurs infrequently but not both, and therefore does not meet both criteria for classification as an extraordinary item, should be reported as a separate component of income from continuing operations. The nature and financial effects of each event or transaction should be disclosed on the face of the income statement or, alternatively, in notes to the financial statements. Gains or losses of a similar nature that are not individually material should be aggregated. Such items should not be reported on the face of the income statement net of income taxes or in any manner inconsistent with the provisions of paragraphs 8 and 11 of this Opinion or in any other manner that may imply that they are extraordinary items. Similarly, the earnings per share effects of those items should not be disclosed on the face of the income statement.

#### **.06 Accounting Treatment of Agreements Not to Compete**

*Inquiry*—A company enters into an agreement with an outgoing officer whereby the company will make future periodic payments to the officer in return for the officer's agreement not to compete with the company for the period coinciding with the payments.

Would it be appropriate for the company to record a liability for the total future payments to the former officer and a corresponding intangible asset for the covenant?

**Reply**—The authoritative literature does not provide specific guidance for the treatment of executory contracts, which require future consideration upon the occurrence of certain events.

FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 36, specifies that a characteristic of a liability is that “the transaction or other event obligating the entity has already happened.” Since the event that gives rise to the company’s obligation is the former officer’s forbearance from competition, many accountants believe that the transaction should be recorded prospectively, as the payments are “earned” by the former officer. They would disclose the contractual obligation as a commitment in the company’s notes to its financial statements.

Concepts No. 6, paragraph 26 provides that a characteristic of an asset is that “it embodies a probable future benefit. . . .” Accordingly, the company would only record an intangible asset if the payment to the former officer preceded the period of forbearance.

#### **.07 Write-Off of Goodwill on Date of Purchase**

**Inquiry**—An investor purchased a significant interest in an equity investee and at the same time guaranteed its obligations. The subsequent share of the investee’s losses plus advances exceeded the carrying amount of the investment. The investor purchased the remaining interest and assumed responsibility for the obligations of the investee. The purchase price of the remaining interest was in excess of the sum of the fair values of the identifiable assets acquired less liabilities assumed, which implied goodwill. If the parent determines that the goodwill has no value can it immediately be written off?

**Reply**—No. Goodwill is defined as the excess of the purchase price over the fair value of the identifiable assets acquired. APB Opinion No. 17, *Intangible Assets*, requires goodwill to be capitalized and amortized over its useful life. To reduce the carrying amount of goodwill, it is usually necessary to establish that the economic conditions and factors which gave rise to the goodwill no longer exist, or that the period benefited by such factors and conditions has expired. Since sufficient time has not elapsed to demonstrate either of these conditions, it would be improper to write off the goodwill.

---

[The next page is 1501.]

## Section 2260

### ***Other Assets***

#### **.03 Legal Expenses Incurred to Defend Patent Infringement Suit**

*Inquiry*—A company is sued for patent infringement. Should the cost to defend the patent be capitalized or expensed?

*Reply*—The choice of capitalizing or expensing depends on the outcome of the lawsuit. FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 247 (AC V18.401), states "... the legal and other costs of successfully defending a patent from infringement are 'deferred legal costs' only in the sense that they are part of the cost of retaining and obtaining the future economic benefit of the patent."

If defense of the patent lawsuit is successful, costs may be capitalized to the extent of an evident increase in the value of the patent. Legal costs which relate to an unsuccessful outcome should be expensed.

## Section 3100

### **Current Liabilities**

#### **.01 Estimated Liability for Unemployment Claims**

*Inquiry*—Under state law, a corporation has a choice of the method to pay unemployment insurance contributions. The corporation may pay a percentage of gross wages or may reimburse the state employment commission directly for actual unemployment claims. A client chose to reimburse the state for the actual claims which may arise. If no claims against the client are filed, may the client record an expense and a liability for unemployment claims?

*Reply*—The estimated unemployment insurance costs should be accrued currently based on the client's estimated or past history of unemployment. Unemployment insurance cost should be related to the period worked by the employees. Not recording unemployment costs until claims are actually filed would result in a mismatching of revenues and expenses. Such an approach would be unacceptable under generally accepted accounting principles.

#### **.03 Accounting for Possible Refunds of Leasing Fees**

*Inquiry*—A company franchises distributorships for home and office oxygen inhalator units. The licensees lease the units from the company and pay an initial leasing fee for each unit before receipt of the unit. As stipulated in the franchise agreement, the licensee is entitled to a refund, upon termination of the franchise agreement and return of the units, of a specified amount of the initial leasing fee depending on the period of time that the units are leased out. When units are returned they can usually be redistributed with little or no repair. Is there a liability for the return of a portion of the initial leasing fees?

*Reply*—The returned units can usually be redistributed with little or no repair. Therefore, accounting for these units would be similar to accounting for returnable containers. Because the licensee pays the initial leasing fee prior to delivery of the units, there is no receivable to be offset by an "allowance account" for the estimated refunds, and so the amounts for estimated refunds should be shown as a liability.

#### **.04 Date for Accrual of Tax Penalties**

*Inquiry*—A company has received certain billings from the federal government for interest and penalties for late filing of federal withholding taxes. Some of these notices were received prior to the balance sheet date, while other notices were received after the balance sheet date, but in either case they apply to periods prior to the balance sheet date. Should liabilities for the interest and penalties be shown on the balance sheet?

*Reply*—SAS No. 1, section 560, *Subsequent Events*, paragraph 3 (AU 560.03), states in part:

All information that becomes available prior to the issuance of the financial statements should be used by management in its evaluation of the conditions on which the estimates were based. The financial statements should be adjusted for any changes in estimates resulting from the use of such evidence.

Therefore, provision should be made for any billings received for penalties on late filing of federal withholding taxes which were required to be filed prior to the balance sheet date. Similarly, any such interest should be provided for up to the balance sheet date. Interest accrued subsequent thereto would be an expense of the following period.

### **.08 Reporting Accrued Compensation Cost**

*Inquiry*—An entity, which will be presenting comparative financial statements, failed to implement FASB Statement No. 43, *Accounting for Compensated Absences* (AC C44), until the current year. (It was required to have been adopted for fiscal years beginning after December 15, 1980.)

According to the entity's management, the condition of the books and records makes restating the earlier of the two years presented impracticable. Instead, it intends to include the cumulative effect in net income in the current year.

Management represents that the accounting treatment should parallel that of APB Opinion No. 20, *Accounting Changes*, paragraph 20 (AC A06.116), which states, "... The amount shown in the income statement for the cumulative effect of changing to a new accounting principle is the difference between (a) the amount of retained earnings at the beginning of the period of a change and (b) the amount of retained earnings that would have been reported at that date if the new accounting principle had been applied retroactively for all periods which would have been affected and by recognizing only the direct effects of the change and related income tax effect."

The auditor states that this should be treated as the correction of an error, and, as such, must result in the restatement of the earlier year of the comparative presentation.

Is the auditor correct?

*Reply*—Assuming that the amounts of unaccrued compensation costs were material in prior years, so that prior year statements were in error, the auditor is correct. If, however, the matter became material for the first time in the current year, then application of APB Opinion No. 20 (AC A06 and A35), i.e., a cumulative effect adjustment, would be appropriate.

The transition guidance in FASB Statement No. 43 (AC C44) permitted the cumulative effect to be included in net income in the year in which the Statement was first applied if it was not practicable to restate any prior year. However, the first year of application would have to have been for fiscal years beginning after December 15, 1980. The exception would not apply to initial application after that date.

### **.09 Accrual for Employer Co-Insurance Arrangements**

*Inquiry*—A company pays for the medical expenses of its active employees but purchased "stop-gap" or "excess of loss" insurance to cover medical expenses exceeding \$10,000, lifetime benefit, per employee. What amount, if any, should the company accrue to cover its liability?

*Reply*—Although FASB Statement No. 5, *Accounting for Contingencies* (AC C59), excludes employment-related costs, that accounting guidance may be appropriate for this situation. FASB Statement No. 5, paragraph 8 (AC C59.105), states that an accrual for a loss contingency is required if the loss is probable and the amount of the loss can be reasonably estimated. Medical expenses incurred by the employee during the reporting period should be ac-

crued. This includes expenses incurred during the reporting period but submitted after the balance sheet date. The accrual should be based on all relevant data (including statistical data), the company's historical experience, and its expectations of the future. Some of this data may be available from insurance administrators or actuaries.

## **.10 Compensated Absences**

*Inquiry*—A company with a June 30 year end has a sick pay policy that states that an employee employed for at least three months is entitled to ten sick days annually. The employee is entitled to these days as of January 1 and any unused sick days as of December 31, are paid to these workers. Should the company accrue a liability as of June 30 for the unused sick days of these workers?

*Reply*—Yes. FASB Statement No. 43, *Accounting for Compensated Absences* (AC C44), indicates that sick pay that is customarily paid even though the absence from work is not actually the result of an illness, should not be considered sick pay in applying the provisions of paragraph 7 (AC C44.105) of that Statement. In considering necessity for making an accrual, the four criteria in paragraph 6 (AC C44.104) should be considered.

In determining the amount of the accrual, the guidance in FASB Statement No. 5, *Accounting for Contingencies* (AC C59), concerning the probability of future payment should be considered. Specifically, the company should consider its payment history and employee turnover in calculating the accrual.

In this example, if an employee had taken three days through June 30, the remaining accrual would be seven days. If this example were modified, and the days were earned on a pro rata basis throughout the year, the company would record a liability for the expected payment to be made to the employee for only the accumulated right through June 30. With the same three days taken through June 30, the company would have an accrual for the remaining two days in the June 30 financial statements.

---

[The next page is 2021.]

## Section 3200

### Long-Term Debt

#### .06 Amortization Period for Placement Fee When Mortgage Refinanced

*Inquiry*—A company paid a \$100,000 mortgage placement fee for an eighteen year mortgage. Ten months later, it became apparent that a refinancing of a significantly larger mortgage would be needed. The company negotiated a commitment with a bank for a larger mortgage to be placed one year from the date of this agreement. At the time of the commitment, in accordance with APB Opinion No. 17, paragraph 31 (AC I60.112), which deals with intangible assets, the company reduced the amortization period of the placement fee to the expected remaining period of the original mortgage.

Two months before the closing date of the original mortgage, at which time almost the entire prepaid mortgage fee had been amortized, the bank was unable to make the loan and exercised an option to extend the closing date of the old mortgage and the placement date of the new mortgage for six more months.

Should the amortization period now be extended to the new settlement date?

*Reply*—The mortgage placement fee should not be viewed as an intangible asset but as a deferred charge under APB Opinion No. 21. It is an amortizable cost incurred to secure the mortgage.

The unamortized amount of the fee at the time when the bank exercises the option should be amortized over the remaining six month period. The reasons for the exercise of the option do not change the fact that the period benefited has been extended. The change should be treated as a change in accounting estimate, in accordance with APB Opinion No. 20 (AC A06). If the new mortgage is placed before the end of the six month option period, any balance of the fee should then be written off in accordance with APB Opinion No. 26 (AC D14) and FASB Statement No. 4 (AC D14) which deal with early extinguishment of debt. [Amended]

#### .09 Financial Statement Presentation of "Pay Any Day" Loans

*Inquiry*—Corporation A finances its purchases of equipment through "pay any day" loans. Under this type of financing arrangement, the borrower signs a note and security agreement which sets forth the amount financed, the finance charge, and the amount of monthly payment. This instrument differs from a conditional sales contract or "add-on" loan. The "add-on" loan is a contract calling for a specified number of payments, including interest, and therefore the liability is the total amount to be repaid over the life of the contract; whereas, the "pay any day" loan, or note and security agreement is a simple interest loan and the agreement shows the finance charge in order to disclose the amount of interest that will be paid if each installment payment is made on its exact due date.

What is the appropriate financial statement presentation of "pay any day" loans?

*Reply*—A "pay any day" loan can be recorded and reported in the financial statements at its face amount plus accrued interest because it is in effect a term loan with interest charged at the current rate. The amount of the loan, if any, expected to be paid within one year would be shown as a current liability.

### **.10 Determining the Allocation for Lease Payments for a Lease Capitalized at Fair Market Value**

*Inquiry*—According to FASB Statement No. 13, *Accounting for Leases*, paragraph 10, a lessee accounting for a capital lease, records an asset and an obligation equal to the present value of the minimum lease payments at the beginning of the lease term, excluding any portion of the payments which represent executory costs (e.g., insurance and taxes) which will be paid by the lessor. However, if this amount is greater than the fair market value of the leased property, the amount recorded as the asset and obligation should be fair market value. When the asset and obligation are recorded at the fair market value, since the interest rate is not known, how should the amount for the lease payments be recorded?

*Reply*—FASB Statement No. 13, paragraph 12, states in part, during the lease term, each minimum lease payment shall be allocated between a reduction of the obligation and interest expense so as to produce a constant periodic rate of interest on the remaining balance of the obligation. This is the “interest” method described in the first sentence of APB Opinion No. 21, *Interest on Receivables and Payables*, paragraph 15, and in APB Opinion No. 12, *Omnibus Opinion*—1967, paragraphs 16 and 17.

When the asset to be recorded based on the present value of the minimum lease payments exceeds the fair market value of the asset, it is usually because the incremental borrowing rate used to determine present value is lower than the interest rate implicit in the lease.

### **.11 Effect of Sales Taxes on the Determination of Present Value of Minimum Lease Payments**

*Inquiry*—A company leases a machine for \$14,000 a month for 72 months. The monthly invoice received from the lessor includes the stipulated monthly rent plus a charge for state sales taxes. The lease does not meet the 90 percent criterion of a capital lease (i.e., the present value of the minimum lease payments excluding executory costs equals or exceeds 90 percent of the fair value of the leased property) if sales taxes are excluded from minimum lease payments. The criterion is met if both the rent and sales taxes are included as minimum lease payments.

Should the minimum lease payments include sales taxes?

*Reply*—Practice in this area varies. FASB Statement No. 13, *Accounting for Leases*, paragraph 5(j)(i) defines, in part, minimum lease payments as the payments that the lessee is obligated to make or can be required to make in connection with the leased property. However, “. . . the lessee’s obligation to pay (apart from rental payments) executory costs such as insurance, maintenance, and taxes in connection with leased property shall be excluded.” Many accountants interpret this to mean that all taxes, including sales taxes, levied on lease payments are considered executory costs since the lessor is merely acting as a collection agent for the taxing authority.

Other accountants believe that only taxes other than sales taxes (such as property taxes) should be excluded from the minimum lease payments because sales taxes are often capitalized as part of the cost of purchased assets. FASB Statement No. 13, paragraph 60 states that the provisions of this Statement derive from the view that a lease that transfers substantially all of the benefits and risks incident to ownership should be accounted for as the acquisition of an asset and the incurrence of an obligation.

Because the authoritative pronouncements do not specifically address whether sales taxes should be included as part of minimum lease payments, practice varies and should be determined by the company's general policy for accounting for sales taxes on purchased assets.

Regardless of which approach is used, in order to properly apply the 90 percent test referred to in FASB Statement No. 13, paragraph 7(d) (AC L10.103), the components of the numerator and denominator should be the same. For example, if the sales taxes are included as part of the minimum lease payments (the numerator) then the sales taxes should be included in the fair value of the leased asset (the denominator).

## **.12 Balance Sheet Classification of Revolving Line of Credit**

*Inquiry*—A company has a revolving line of credit with a bank. The company is only required to make monthly interest payments. No principal payments are required. In the event the credit line is terminated, the principal is due 12 months after the date of termination.

Should the principal amount be classified as current or long-term in a classified balance sheet?

*Reply*—ARB No. 43, Chapter 3A, *Current Assets and Current Liabilities*, paragraph 7 (AC B05.402), states that liabilities whose regular and ordinary liquidation is expected to occur within a relatively short period of time, usually 12 months, are intended for inclusion in the current liability classification. If the line of credit has not been terminated at the balance sheet date, the principal amount should be classified as long-term, unless the company intends to repay the outstanding debt within 12 months.

## **.13 Uncertainty Arising From Violation of Debt Agreement**

*Inquiry*—At the end of 19X1, a company was in violation of its long-term debt covenant and was unable to obtain a waiver from the bank. It therefore reclassified its debt to current and appropriate footnote disclosures were made. During 19X2, the violation was cured. What is the proper classification of the debt in the company's 19X2 comparative financial statements?

*Reply*—FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor* (AC B05), states that the current liability classification is intended to include long-term obligations that are or will be callable by the creditor because the debtor either violates the debt agreement or does not cure a violation within a specified grace period. Accordingly, such callable obligations should be classified as current liabilities unless the creditor waives or loses the right to demand payment.

Since the violation was cured in 19X2, the debt should be classified as long-term in the 19X2 financial statements. The debt should not be reclassified to long term in the 19X1 financial statements because it was a current liability based on the facts existing at the 19X1 balance sheet date.

## **.15 Disclosure of Five-Year Maturities on Long-Term Debt**

*Inquiry*—A company entered into a 10-year loan agreement with a lender. The mortgage note contains a variable interest rate based on prime plus one percent. In accordance with FASB Statement No. 47, *Disclosure of Long-Term Obligations* (AC C32), the company will disclose the maturities on the debt for each of the next five succeeding years. Should the disclosure include principal and interest?

*Reply*—No. The required disclosure of the amount of scheduled repayments for each of the five succeeding fiscal years relates only to principal repayments and should not include interest. Disclosure is also called for when interest rates vary with the prime rate.

**.16 Amortization of Premium or Discount in Investment Securities With an Early Call Date**

*Inquiry*—Investment securities may be acquired at par value, at a premium, or at a discount. If the investment securities have an earlier call date, how should the amortization of premium or accretion of discount be recorded?

*Reply*—FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated With Originating or Acquiring Loans and Initial Direct Costs of Leases* (AC L20), applies to the accounting for discounts, premiums, and commitment fees associated with the purchase of loans and other debt securities such as corporate bonds. In accordance with FASB Statement No. 91, paragraph 19 (AC L20.118), “the calculation of the constant effective yield necessary to apply the interest method shall use the payment terms required by the loan contract, and prepayments of principles shall not be anticipated to shorten the loan term.” Accordingly, the period of amortization or accretion is from the purchase date to the maturity date. As provided by FASB Statement No. 91, paragraph 19 (AC L20.118), in order to amortize the premium or accrete the discount to an early call date, the enterprise must hold a large number of similar loans for which prepayments are probable and the timing and amount of prepayments can be reasonably estimated.

**.17 Disclosure of Covenant Violation and Subsequent Bank Waiver**

*Inquiry*—At the balance-sheet date, an entity was in violation of certain provisions of the loan covenant associated with its long-term debt. Under the terms of the loan agreement, the obligation is now callable by the creditor. Subsequent to the balance-sheet date, the bank waived its right to demand repayment for more than one year from the balance-sheet date. Therefore the loan remained classified as long-term, per FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor*, paragraph 5 (AC B05.109A). Does the covenant violation and subsequent bank waiver need to be disclosed in the financial statements?

*Reply*—The authoritative literature applicable to nonpublic entities does not address disclosure of debt covenant violations existing at the balance-sheet date that have been waived by the creditor for a stated period of time. Nevertheless, disclosure of the existing violation(s) and the waiver period should be considered for reasons of adequate disclosure. If the covenant violation resulted from nonpayment of principal or interest on the debt, inability to maintain required financial ratios, or other such financial covenants, that information may be vital to users of the financial statements even though the debt is not callable. If the lender has waived the right for greater than one year but retained the future covenant requirements (i.e., covenant requirements will have to be met at interim dates during the next 12 months), the accounting and disclosure provisions of EITF Issue No. 86-30, *Classification of Obligations When a Violation Is Waived by the Creditor*, apply.

For SEC registrants, Regulation S-X, Article 4, Section 210.4-08(c), requires disclosure of the amount of the obligation and the period of waiver whenever a creditor has waived its right to call the debt for a stated period of time.

---

[The next page is 2471.]

## Section 3400

### Contingent Liabilities

#### .01 Contested Liability

*Inquiry*—A company acquired the entire outstanding stock of another company several years ago. The acquired company was reorganized under IRS Code Section 334(b)(2) causing its building and equipment to be written up in value. Inventory was later written down.

An unpaid portion of the original purchase price is claimed by the former owners of the acquired company, but this is contested by the acquiring company on the grounds that the value of the acquired company's stock was misrepresented.

The acquired company's shareholders intend to sue the acquiring company for the unpaid balance, but a suit has not yet been filed. How should the amount due under the original purchase contract and the possible suit be reflected on the acquiring company's financial statements?

*Reply*—Because the possibility of a suit exists, footnote disclosure describing the entire dispute should be made, including legal counsel's comment that no suit is pending at this time. The amount due under the original purchase contract, plus accrued interest, should still be reported as a liability. No adjustments should be made in the acquiring company's financial records until the dispute is settled or legal counsel advises that a statute of limitations effectively bars filing of the suit in question and the company is not legally liable to pay the debt.

#### .02 Disclosure of Agreement Between Corporation and Its Shareholders

*Inquiry*—Corporation A, a closely held entity, has an agreement with its shareholders under which Corporation A could become obligated to purchase a certain number of shares of stock of deceased shareholders at book value. Should Corporation A disclose this agreement in its financial statements?

*Reply*—Corporation A should disclose the terms of the agreement in a note to its financial statements since it is a contingent liability.

#### .04 Accounting for Issuance of Cents Off Coupons

*Inquiry*—A client includes with its consumer product a coupon for cents off on the next purchase of the product. Should the coupon be accounted for as a reduction of the selling price when the second product is sold?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies*, paragraph 4(f), would consider the possible future coupon claims as a loss contingency to be evaluated as a future event. More than likely, the redemption of some or all of the coupons would be considered a probable event under FASB Statement No. 5, paragraph 3. The amount to be accrued and charged to earnings at the time the first product is sold should be based on a reasonable estimate of the amount of coupons expected to be presented for redemption. This estimate could be based on experience in previous promotions.

**.06 Change in Accounting Estimate for Discounted Receivables**

*Inquiry*—A company is contingently liable under guarantees of discounted receivables upon their default for nonpayment. In the past year the volume of defaults has increased. If the company increases its allowance for defaults as a result of such experience, how should the increase in the allowance be reflected in the financial statements?

*Reply*—The increase in the allowance represents a change in accounting estimate and should “be accounted for in . . . the period of change,” in accordance with APB Opinion No. 20, *Accounting Changes*, paragraph 31. Prior periods should not be restated, nor should pro forma information be presented.

APB Opinion No. 20, paragraph 33, states that disclosure “is not necessary (but) is recommended if the effect of a change in the estimate is material.”  
[Amended]

---

[The next page is 2571.]

## Section 3500

### Commitments

#### .01 Accounting for Contract to Cut Timber

*Inquiry*—A corporation is engaged in the forest products industry and purchases timber under both “pay as cut” (specifies a rate the buyer will pay per unit of volume cut) and “lump sum” (buyer pays a fixed amount for the right to cut timber on a specific tract of land). The corporation agrees to purchase timber on land which is identified in the contract. The exact amount of timber purchased can vary in total footage as well as species due to the nature of the goods. Is it proper to recognize the transactions as assets and liabilities on the balance sheet?

*Reply*—It would be improper to recognize a contract to cut timber as an asset and a liability unless the contract, at the time it was entered into, resulted in the purchase of the timber.

A distinction must be made between a contract that is executory in nature and one in which a sale and a purchase of lumber has occurred. Evidence of a purchase would be the transfer of title to the lumber at the time the contract is signed. Such a transfer usually occurs with lump sum contracts and may occur under pay as cut contracts if they include performance guarantees or risk of monetary damages if not performed. Therefore, those contracts would generally be recognized as assets and liabilities.

Receiving title at the time the timber is cut rather than at the time the contract is signed makes the contract executory. It is generally accepted practice to adequately disclose the nature and amounts of commitments relating to executory contracts in the notes to financial statements. Therefore, pay as cut contracts without performance guarantees or risk of monetary damages would generally not be recognized as assets and liabilities until performance occurs. [Amended]

#### .02 Liability Under Foreign Bank's Letter of Payment Guarantee

*Inquiry*—A client, an import-export firm, agreed to purchase goods from a foreign manufacturer. The agreement calls for advance payment with the goods being delivered over the twelve-month period following the date of the agreement. The client arranged to make this advance payment through a letter of credit issued by a U.S. bank. The U.S. bank has received a letter of payment guarantee issued by a bank in the foreign country. If the supplier fails to make shipments under the terms of the agreement, the U.S. bank will look to the foreign bank for any unpaid advances owed to the U.S. bank by the client. The U.S. bank will look to the client for payment of all amounts represented by shipments to the client under the terms of the agreement.

Is the client directly liable for the amount advanced by the U.S. bank through its letter of credit, or does the client become liable only as the goods are received and payment is due the U.S. bank?

*Reply*—The client is directly liable for the amount advanced to the foreign supplier. It appears from the description of the transactions that the foreign

bank is contingently liable if the supplier does not perform under the agreement. The offsetting asset would be classified as an "Advance to Suppliers." Additional footnote disclosure of the financial arrangements would also be required.

#### **.04 Recognition of Losses on Purchase Commitments**

*Inquiry*—ARB No. 43, Chapter 4, *Inventory Pricing*, Statement 10 (AC I78) states: "Accrued net losses on firm purchase commitments for goods for inventory, measured in the same way as are inventory losses, should, if material, be recognized in the accounts and the amounts thereof separately disclosed in the income statement."

Does this statement mean that the measurement of losses cannot be done on an item by item basis but must only be done if there is an overall net loss on purchase commitments?

*Reply*—Net losses apply to specific purchase commitments and contracts, and not necessarily to components of major categories of inventories, as discussed in ARB No. 43, Chapter 4, Statement 7 (AC I78).

#### **.05 Letters of Credit**

*Inquiry*—Should a company report its outstanding letters of credit as a liability in the financial statements?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies*, paragraphs 18 (AC C59.120) and 19 (AC C59.120), requires disclosure of unused letters of credit. They are commitments and should not be reported as a liability in the financial statements. [Amended]

#### **.06 Covenants Imposed by Loan Agreements**

*Inquiry*—Restrictive covenants under certain loan agreements of Company A require the Company to maintain a special level of working capital, limit the amount of additional debt that it can incur, and restrict the amount of retained earnings available for dividend payments. Should the restrictive covenants be disclosed?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies* (AC C59), SAS No. 32, *Adequacy of Disclosure of Financial Statements* (AU 431), and ATB No. 1, paragraph 69(4) require the disclosure of restrictive covenants. The discussion of disclosure of restricted retained earnings in ARS No. 7, page 203, states: "When there is more than one type of restriction, disclosure of the amount of retained earnings, so restricted, may be based on the most restrictive covenants likely to be effective in the immediate future. In other words, restrictions seldom, if ever, pyramid in amount." By analogy, disclosing only the most restrictive covenants applying to dividend distributions would also apply to other restrictive covenants. [Amended]

#### **.07 Disclosure of Unused Lines of Credit**

*Inquiry*—Should nonpublic companies disclose the existence of unused lines of credit that are available as of the balance sheet date?

*Reply*—Although public companies are required [pursuant to SEC Regulation S-X, section 210.5-02.19(b)] to disclose significant unused lines of credit for short-term financing in the notes, there is no such explicit requirement for nonpublic companies under generally accepted accounting principles. However, under certain circumstances, disclosure by nonpublic companies may be advisable based on the general principle of adequate disclosure.

SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, paragraph 4 (AU 411.04), states that the notes, as well as the financial statements, should be "... informative of matters that may affect their use, understanding, and interpretation." In addition, SAS No. 32, *Adequacy of Disclosure in Financial Statements*, paragraph 2 (AU 431.02), emphasizes:

An independent auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he is aware at the time.

[Amended June 1995.]

---

[The next page is 2671.]

## Section 3600

### ***Deferred Credits***

#### **.01 Balance Sheet Presentation of Unearned Revenue**

*Inquiry*—A client, a motor club with an insurance company subsidiary, has annually contended that unearned insurance premiums and membership dues should be presented on the consolidated balance sheet as deferred income immediately preceding the members' equity and should not be included in the amount for total liabilities. The client recognizes the revenues on the insurance premiums and membership dues on a pro rata basis over the period covered by the insurance policy and the memberships, therefore, the auditors have maintained that the unearned portion of the insurance premiums and membership dues represent a liability on the part of the client to render services in the future.

Is it appropriate to show these unearned premiums and dues outside the liability section of the balance sheet?

*Reply*—FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 84, indicates that amounts received for goods or services in advance are not treated as revenue of the period in which they are received but as revenue of the period or periods in which they are earned. These amounts are carried as "unearned revenue"—that is, liabilities to transfer goods or render services in the future—until the earning process is complete. Therefore, the unearned portions of the insurance premiums and membership dues represent liabilities to provide services in the future. While the description of the liabilities might vary, to present the unearned premiums and membership dues outside of the liability section of the balance sheet would be inappropriate.

## Section 4110

### *Issuance of Capital Stock*

#### **.01 Expenses Incurred in Public Sale of Capital Stock**

*Inquiry*—A closely held corporation is issuing stock for the first time to the public.

How would costs, such as legal and accounting fees, incurred as a result of this issue, be handled in the accounting records?

*Reply*—Direct costs of obtaining capital by issuing stock should be deducted from the related proceeds, and the net amount recorded as contributed stockholders' equity. Assuming no legal prohibitions, issue costs should be deducted from capital stock or capital in excess of par or stated value.

Such costs should be limited to the direct cost of issuing the security. Thus, there should be no allocation of officers' salaries, and care should be taken that legal and accounting fees do not include any fees that would have been incurred in the absence of such issuance. [Amended]

#### **.02 Stock Issued for No Consideration**

*Inquiry*—A corporation issued stock without receiving any consideration and set up goodwill to offset the credit to capital stock. Was this transaction properly recorded?

*Reply*—This is primarily a legal rather than an accounting question, and it would be advisable to obtain legal advice as to the effect of such issuance. If such stock were legally issued, the appropriate entry would be to show the offset as discount on capital stock issued. Goodwill should only be recognized when acquired, in accordance with paragraphs 24 through 26 (AC I60.105–107) of Accounting Principles Board Opinion No. 17. [Amended]

#### **.03 Stock Issued for Accounting and Management Services**

*Inquiry*—A newly formed corporation is going public and wishes to issue shares of stock for certain services, such as accounting, legal, underwriting, printing, etc.

How should the value for these services be set up on the books of the corporation?

*Reply*—It would be appropriate to record the stock issued at the fair value of the stock or services rendered, whichever is the more clearly evident. The recipients should be able to furnish evidence as to such fair value. Since the amounts the Securities and Exchange Commission might consider to be fair value cannot be predicted, a consultation with the staff of the Commission might be advisable before formal submission of the financial statements. [Amended]

#### **.07 Expenses Incurred in Withdrawn Public Offering**

*Inquiry*—What is the proper accounting for the costs of a public offering that was withdrawn?

*Reply*—Accounting Research Study No. 15, *Stockholders' Equity*, page 23, discusses accounting for stock issue costs. The Study states that such costs are usually deducted from contributed portions of equity, that is, capital stock or capital in excess of stated or par value, as a reduction in the proceeds from the sale of securities.

Since there were no proceeds from a sale of securities to offset the costs, the costs should be charged to current year's income, but not as an extraordinary item.

#### **.08 Balance Sheet Presentation of Mandatory Redeemable Preferred Stock**

*Inquiry*—Should mandatory redeemable preferred stock be reflected in the equity section of the balance sheet?

*Reply*—The Securities and Exchange Commission has addressed this question in Regulation S-X, section no. 210.5-02.28. This regulation states that mandatory redeemable preferred stock is not to be included in amounts reported as stockholders' equity.

Although nonpublic companies are not required to follow Regulation S-X, it would be appropriate for them to do so in most cases. However, practice varies.

FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 62, states all classes of equity depend to some extent on enterprise profitability for distribution of enterprises assets, and no class of equity carries an unconditional right to receive future transfers of assets from the enterprise except in liquidation, and then only after liabilities have been satisfied.

This characteristic of equity is generally not found in mandatory redeemable preferred stock. If the stock is redeemable at a specific date or at the option of the holder, debt classification as suggested by Regulation S-X seems most appropriate. Some financial statements present mandatory redeemable preferred stock in a category between liabilities and equity. However, facts and circumstances in nonpublic entities (e.g., certain stock issued for estate planning purposes) may justify equity classification of certain mandatory redeemable preferred stock. [Amended]

#### **.09 Costs Incurred to Acquire Treasury Stock**

*Inquiry*—A company has incurred legal and accounting costs arising from the acquisition of treasury stock. How should the costs be classified in the company's financial statements?

*Reply*—There is no authoritative literature on this particular subject. Some accountants believe that costs associated with the acquisition of treasury stock should be treated in a manner similar to stock issue costs. Stock issue costs are usually accounted for as a deduction from the gross proceeds of the sale of stock. Costs associated with the acquisition of treasury stock may be added to the cost of the treasury stock.

#### **.10 Costs Incurred in Shelf Registration**

*Inquiry*—A public company incurs legal and other fees in connection with an SEC filing for a stock issue it plans to offer under a shelf registration. How should the company account for these costs?

*Reply*—The costs should be capitalized as a prepaid expense. When securities are taken off the shelf and sold, a portion of the costs attributable to the securities sold should be charged against paid in capital. Any subsequent costs

incurred to keep the filing “alive” should be charged to expense as incurred. If the filing is withdrawn, the related capitalized costs should be charged to expense.

#### **.11 Default on Stock Subscribed**

*Inquiry*—A company entered into a stock subscription agreement to sell its stock. The agreement called for three monthly payments of \$10,000 after which the stock would be issued. Although the first payment was received by the company, the subscriber subsequently defaulted on the remaining two payments. According to the agreement, any payments made by the subscriber towards the stock subscription are not refundable. How should the company account for the retention of the first \$10,000 payment?

*Reply*—The payment should be recorded as an addition to shareholders' equity (i.e., a credit to paid-in capital). According to APB Opinion No. 9, *Reporting the Results of Operations*, paragraph 28, capital transactions shall be excluded from the determination of net income or the results of operations.

---

**[The next page is 3121.]**

## Section 4120

### ***Reacquisition of Capital Stock***

#### **.03 Repurchase of Stock in Excess of Retained Earnings and Additional Paid-in Capital**

*Inquiry*—A corporation has contracted to repurchase, over a period, some of its own stock. The corporation does not have sufficient retained earnings and additional paid-in capital from which to charge the excess of amounts paid over par value. How should this repurchase be reflected in the company's financial statements?

*Reply*—In many states, it would not be legal for a corporation to repurchase shares of its own stock at a cost greater than the amount of retained earnings of the corporation. Competent legal advice as to the effect of the agreement should be obtained. This may be an executory contract, with only amounts currently being paid for considered as repurchases. If this be the case, only amounts disbursed are to be recognized in the accounts, with an offset to treasury stock. There should of course be disclosure in a note to the financial statements of the date, number of shares, and amounts of future payments under the contract. Such future payments would thus include the interest factor, which would be an additional cost of the stock, rather than being interest expense.

However, if legal counsel advises that this is in fact a completed contract and enforceable, the full amount should be shown (excluding interest) as treasury stock, with an offsetting liability. Again, there should be footnote disclosure of the nature of the liability and of the interest rate and maturity dates. Under these circumstances, the interest would be included as a current expense. [Amended]

#### **.05 Purchase of Treasury Shares for an Amount in Excess of Market Price**

*Inquiry*—A corporation enters into an agreement to purchase a major block of its shares from one of its shareholders at a price in excess of its current market price. These shares represent the controlling interest in the corporation. The purchase price of the treasury stock does not include any other rights or privileges. At what value should the corporation record the treasury stock?

*Reply*—FASB Technical Bulletin 85-6, *Accounting for a Purchase of Treasury Shares and Costs Incurred in Defending Against a Takeover Attempt* (AC C23), states that transactions do arise in which an acquisition of an enterprise's stock may take place at prices different from routine transactions in the open market. A block of shares representing a controlling interest will generally trade at a price in excess of market, and a large block of shares may trade at a price above or below the current market price depending on whether the buyer or seller initiates the transaction. A company's acquisition of its shares in those circumstances is solely a treasury stock transaction and is properly accounted for at the purchase price of the treasury shares.

In this situation, since the purchase price does not include amounts attributable to items other than the shares purchased, the entire purchase price should be accounted for as the cost of treasury shares.

---

**[The next page is 3201.]**

## Section 4130

### ***Warrants***

#### **.03 Warrants Reacquired**

*Inquiry*—Company A issued, in a prior year, stock warrants with a subordinated note. The value of the warrants as determined at the date of issuance was added to capital in excess of par value and recorded as deferred loan costs to be amortized over the term of the loan. Company A plans to reacquire the warrants for \$110,000. Should the \$110,000 be:

- (a) accounted for as additional cost of the loan and amortized over the remaining term of the loan, or
- (b) accounted for as a capital transaction and deducted from capital in excess of par value, or
- (c) accounted for in some other manner?

*Reply*—The purchase price of the warrants should be deducted from either capital in excess of par value or retained earnings.

---

[The next page is 3341.]

## Section 4150

### ***Stock Dividends and Stock Splits***

#### **.01 Stock Dividends of Closely-Held Corporation**

*Inquiry*—A corporation has about two hundred stockholders with the board of directors controlling about 80% of the stock. There is virtually no buying or selling of the company's stock and the price of trades has been constant at a level suggested by management.

The company has followed a policy of issuing stock distributions (usually 10 or 20%) and capitalizing them at par because there is not sufficient retained earnings to capitalize at estimated market value. The issuance of stock distributions is an integral part of the company's philosophy and policy with regard to employee morale and maintaining a relatively fixed trading value for the stock in the absence of a market.

Earnings have been increasing at 10% to 20% per year and cash dividends have remained constant. Stock distributions provide a means for returning earnings to stockholders without the tax impact of cash dividends.

Accounting Research Bulletin No. 43 states that stock dividends in amounts of less than 20% to 25% or of a recurring or frequent nature should be accounted for by capitalizing the estimated market value of the stock. The Bulletin also states that in cases of closely-held companies, it is to be presumed that the intimate knowledge of the corporation's affairs possessed by the shareholders would preclude any such implications as referred to in paragraph 10 of Chapter 7, Section B (AC C20.103), and that there is no need to capitalize earned surplus other than to meet legal requirements.

Under these circumstances, is it required that the stock dividends be capitalized at the estimated market value of the stock?

*Reply*—Since only 20% of the corporation's stock is not controlled by the board of directors, it is likely that these minority shareholders would not have intimate knowledge of the corporation's affairs, as contemplated in paragraph 12, Chapter 7, Section B (AC C20.105) of Accounting Research Bulletin No. 43, which excludes closely-held corporations from the provisions of paragraph 10 (AC C20.103). Accordingly, the requirements of paragraph 10 would apply. The stock dividends should be capitalized at the selling price of the stock with a corresponding charge to retained earnings. [Amended]

#### **.02 Stock Dividend Affecting Market Price of Stock**

*Inquiry*—A company issued a 10% stock dividend. May the dividend be treated as a stock split if the dividend resulted in a drop in the market price of the stock?

*Reply*—Paragraph 13 in Chapter 7, Section B of Accounting Research Bulletin No. 43 (AC C20.106) states, in part, "On the basis of a review of market action in the case of shares of a number of companies having relatively recent stock distributions, it would appear that there would be few instances involving

the issuance of additional shares of less than, say, 20% or 25% of the number previously outstanding where the effect would not be such as to call for the procedure referred to in paragraph 10 (AC C20.103)." Paragraph 10 (AC C20.103) requires a transfer from retained earnings to the category of permanent capitalization in an amount equal to the fair value of the additional shares issued.

In order to treat the 10% "stock dividend" as a "split-up effected in the form of a dividend," the company would have to demonstrate that the additional shares issued is "large enough to materially influence the unit market price of the stock" as indicated in paragraph 13 (AC C20.106).

---

**[The next page is 3401.]**

## Section 4160

### ***Contributed Capital***

#### **.01 Payment of Corporate Debt by Stockholders**

*Inquiry*—Three shareholders own stock in Corporations A and B. They agree to personally pay a debt of Corporation A by giving the creditor stock in Corporation B. How should this transaction be recorded on the books of Corporation A?

*Reply*—The payments by the three stockholders of Corporation A's debt would represent an additional contribution by the stockholders to Corporation A. This can be recorded as a credit to "additional capital." [Amended]

#### **.02 Forgiveness of Debt by Principal Owner**

*Inquiry*—The sole owner of a corporation forgives a loan that the corporation owes to him. What is the appropriate accounting treatment for this transaction?

*Reply*—APB Opinion No. 26, *Early Extinguishment of Debt*, deals with debt extinguishments which are ordinarily treated as extraordinary items. APB Opinion No. 26, paragraph 20, footnote 1 (AC L35.105, footnote 2) states, however, that extinguishment transactions between related enterprises may be in essence capital transactions.

---

[The next page is 3501.]

## Section 4200

### ***Retained Earnings***

#### **.01 Foreign Currency Translation—Retained Earnings**

*Inquiry*—A parent company is translating a foreign subsidiary's financial statements for consolidation purposes. It is the second year of operation for the subsidiary. How should retained earnings be translated?

*Reply*—For assets and liabilities, FASB Statement No. 52, *Foreign Currency Translation*, paragraph 12, requires the use of the exchange rate at the balance sheet date. For revenues, expenses, gains, and losses, the exchange rate at the dates on which those elements are recognized shall be used. However, an appropriately weighted average exchange rate for the period may be used to translate the income statement.

In year two, net income or loss would be translated at the weighted average exchange rate for the current year and accumulated with the historical opening translated retained earnings. It should be noted there may be a number of other transactions that may affect the subsidiary's retained earnings including the declaration of dividends.

---

[The next page is 3551.]

## Section 4210

### Dividends

#### .01 Write-off of Liquidating Dividends

*Inquiry*—Quite a few years ago, cash dividends were distributed to stockholders in excess of earnings. The company would now like to “clean up” the stockholders’ equity section of the balance sheet by removing the account “Prior Years’ Liquidation Dividends” which is shown as a reduction of the capital stock account. Can the liquidating dividends account be written off against “retained earnings” or “paid in capital in excess of par value”?

*Reply*—Essentially, this question is a legal one as to whether cash distribution to stockholders in excess of earnings in prior years may be charged to earnings in subsequent years. When liquidating dividends are declared, the charge is made to accounts such as “capital repayment,” “capital returned,” or “liquidating dividends” which appear on the balance sheet as offsets to paid-in capital. By this treatment, the amount of capital returned as well as the amount of capital originally paid in can be disclosed. Perhaps the wisest thing to do under the circumstances is to consult legal counsel to determine whether the write-off proposed is legal under the corporate statutes of the state. Perhaps it is legally permissible, under the laws of incorporation, to reduce the par or stated value of the corporation’s stock, thereby creating a reduction surplus which may then be used retroactively to absorb the original deficit, on the ground that the excess payments were dividends in partial liquidation.

#### .04 Accrual of Preferred Dividends

*Inquiry*—A corporation has cumulative preferred stock. It has not paid any dividends on this stock in the last three years. Should the corporation accrue the preferred dividends in arrears?

*Reply*—Generally, preferred stock contains a cumulative provision whereby dividends omitted in previous years must be paid prior to the payment of dividends on other outstanding shares. Since dividends do not become a corporate liability until declared, no accrual is needed. FASB Statement No. 129, *Disclosure of Information about Capital Structure* (AC C24), requires entities to disclose within its financial statements (either on the face of the statement of financial position or in the notes thereto) the aggregate and per-share amounts of arrearages in cumulative preferred dividends. Furthermore, FASB Statement No. 128, *Earnings per Share*, paragraph 9 (AC E11.104), states that dividends accumulated for the period on cumulative preferred stock (whether or not earned) should be deducted from income from continuing operations and also from net income when computing earnings per share. If there is a loss from continuing operations or a net loss, the amount of the loss should be increased by those preferred dividends. Preferred dividends that are cumulative only if earned should be deducted only to the extent that they are earned.

If preferred dividends are not cumulative, only the dividends declared should be deducted. In all cases, the effect that has been given to preferred dividends in arriving at income available to common stockholders in computing basic earnings per share should be disclosed for every period for which an income statement is presented. [Amended September 1997]

---

[The next page is 3631.]

## Section 4230

### ***Capital Transactions***

#### **.02 Exchange of No Par Common Shares for Par Value Preferred Shares**

*Inquiry*—The shareholders of Corporation A exchanged their no par common shares for preferred shares with a par value to “freeze” the value of stock ownership for estate tax purposes. How should the difference between the carrying basis of the preferred shares and the carrying basis of the common shares be accounted for?

*Reply*—The difference should be charged or credited to additional paid-in capital. If there is no additional paid-in capital, any “debit” balance should first be charged to retained earnings and any remaining “debit” balance should be described in the financial statements as a discount on preferred stock. However, in many states the law requires that issued stock must be fully paid and nonassessable and therefore, if the par value of the preferred shares exceeds the market value of the common shares this exchange may have legal implications that should be considered. [Amended]

#### **.03 Use of Stockholder’s Assets to Repay Corporate Loan**

*Inquiry*—The sole owner of a corporation agreed to collateralize the company’s bank loan with personal assets. As a result of financial difficulties, the company’s bank loan was called and its owner agreed to sell his personal assets collateralizing the company’s loan, to repay the bank debt. What is the appropriate accounting of this transaction?

*Reply*—The monies used to repay the bank loan are in substance a further capital infusion by the individual, which increases his investment in the company. The company would eliminate its liability to the bank and credit paid-in capital.

## Section 5100

### Revenue Recognition

#### .01 Equipment Sales Net of Trade-Ins

*Inquiry*—A Client who deals in heavy equipment records all sales at net of trade-ins. Is this an acceptable accounting practice?

*Reply*—Support for the accounting treatment for trade-ins which this client follows could not be found. Sales should be credited with the nominal or stated contract price, and the difference between (a) the trade-in allowance and (b) the amount determined by pricing the trade-in at net realizable value minus normal profit margin should be treated as a sales allowance or discount. The traded-in equipment should be set up in inventory at an amount which, when reconditioning costs are added, will allow a margin approximating a normal profit when the sale is made.

#### .02 Rights to Broadcast Time Received for Services

*Inquiry*—An advertising agency creates and sells jingles and station identifications to radio and television stations. The agency receives broadcast time credit as part payment. This broadcast time is then resold by the agency to its clients. Should this broadcast time be recognized by the advertising agency:

1. when the agency bills the radio or television station, or
2. when it is subsequently sold to advertisers?

*Reply*—The broadcast time credit should be recognized as income when the services are billed to the station. It may be necessary to estimate the value of the credits. A corresponding asset account should be charged. This asset would be relieved as the broadcast time is sold by the advertising agency. [Amended]

#### .04 Discounts on Prepaid Funeral Arrangement Plans

*Inquiry*—An incorporated mortuary sells pre-need funeral plans in addition to rendering current mortuary services. These pre-need funeral plans are sold at a discount in order to be attractive to the public. All monies received from the sale of these plans are placed in a trust fund which has been set up at a local bank. The bank is the trustee of the trust and makes investments as it sees fit. The pre-need funeral plan agreements stipulate that all income earned by the trust belong to the mortuary, and withdrawals of such income from the trust may be made by the mortuary periodically. In return for the feature of the agreements calling for the mortuary's entitlement to the trust fund income, purchasers of the pre-need plans are permitted to buy the plans at a substantial discount. The agreements also provide for fully-covered funeral benefits in certain cases, although the plans may not be fully paid at time of death. Another advantage to the purchasers is that the costs of their funerals will not be influenced by increases in the cost of living index.

Certain expenses are met by the mortuary in the selling of its pre-need funeral plans; these are recorded monthly in a separate expense account in its general ledger. Trust fund income earned is also recorded monthly in the mortuary's general ledger, in a separate income account. As pre-need plans are

utilized by persons who had purchased them earlier, the special discounts mentioned in the preceding paragraph are recorded in a separate expense account in the mortuary's general ledger. It should be emphasized here that such discounts are not reflected as an expense in the mortuary's operations until such time the plans are actually used, whereas the expenses of the sales of the plans and the income earned by the trust affect operations currently, with no dependency whatsoever on the deaths of the purchasers or holders of the plans.

In order to achieve a better matching of expenses with revenues accruing from the sales of plans, could the trust fund income or the excess of trust fund income over the expenses of selling the plans be deferred until the plans are utilized? Or could the special discounts be charged to income at some date prior to the utilization of the plans?

*Reply*—It would be more acceptable to currently accrue or recognize selling expenses, fees and commissions, and trust fund income rather than use the “completed contract” or deferral accounting approach. If it is a fact that costs of furnishing services commonly exceed the trust funds expended at time of utilizing a plan, current provision should be made on an estimated basis for the potential or possible losses (more accurately, estimated excess of future servicing costs over monies to be released from trust to defray same) on plans not utilized as yet at the balance sheet date.

The special discounts are more in the nature of sales adjustments rather than costs or expenses.

**.07 One-Cent Sales**

*Inquiry*—A client in the fast food business has a “one-cent sale” once a week. For example, the sale might be two cheeseburgers for the price of one (60¢) plus one cent. The company would record the transaction as follows:

Cash (.60 + .01) .....	\$ .61
Advertisement Expense .....	.59
Sales (.60 × 2) .....	\$1.20

The company makes this entry so that their “food costs” are not distorted, but should an adjustment be made at the end of the year for financial reporting purposes eliminating this advertising expense against sales?

*Reply*—The practice of crediting sales and charging advertising expense for the difference between the normal sales price and the “bargain day” sales price of merchandise is not acceptable for financial reporting. Realization of the full sales price cannot properly be imputed under such conditions. To do so would seem to imply that the same quantities would have been sold if the price had not been reduced.

It might however be appropriate to adjust the cost of sales and charge advertising for the cost of the one-cent hamburger. Such cost of sales should include only out-of-pocket expenses.

**.08 Life Membership Fees in a Club**

*Inquiry*—A company is engaged in a service club enterprise. What is the proper accounting for life membership fees?

*Reply*—The life membership fees should be allocated over the time the individual may be expected to require the services of the club.

#### **.10 Members of Country Club Assessed for Debt Retirement**

*Inquiry*—A country club has voted to impose a special yearly assessment on its membership for ten years. The proceeds are to be used to retire a first mortgage on the property of the club.

The assessment is being imposed on all members including voting certificate holders and nonvoting associate members.

Is the proper accounting treatment of this transaction a contribution to capital, or are dues to be reflected in the annual income statement?

*Reply*—When billing the assessments each year, the receivables from the members can be shown as an asset with a credit to income for the special assessment. Such amounts might then be appropriated to a special membership equity, perhaps entitled “appropriation for retirement of debt.” The financial statements should disclose that the directors had voted a special assessment for ten years and the amount of assessment per year. The first or the last year for the assessment, or both, should also be disclosed.

#### **.11 Excise Tax on Club Dues**

*Inquiry*—The members of certain private clubs must pay a federal excise tax in addition to their annual dues. Should the clubs record, as revenues, the dues net of the excise tax, or should revenues include both dues and taxes?

*Reply*—A club, in collecting excise taxes on dues, is acting as no more than an agent or conduit for the federal government. The amounts paid to the club by members to be turned over as excise taxes should not be construed as dues, and to show them as such on the income statement is erroneous.

#### **.14 Recognition of Fees Earned on Construction Mortgage Placements**

*Inquiry*—A client is in the business of bringing lenders and borrowers together for a fee. When a construction mortgage has been arranged and agreed to, it would appear that the client has earned its fee. However, because of the terms of the fee arrangement, there is some doubt as to when the income should be recognized.

The following is a summary of the types of transactions involved:

##### **1. Negotiable Note**

The company receives a negotiable note in payment of its fees. Generally the note is unsecured and non-interest-bearing and is payable over the same period as the construction draws on the related mortgage are to be made.

##### **2. Nonnegotiable Note**

The terms of the nonnegotiable note are comparable to the negotiable note.

##### **3. Commitment Letter, Not Contingent on Future Events**

The company receives a letter from the borrower indicating that the lender and the borrower have agreed on the terms of the mortgage. In addition, the letter states that the borrower agrees to pay the company a fixed fee by a specified date for services rendered in arranging the loan.

4. Commitment Letter, Contingent on Future Draws

The company receives commitment letters from the borrower as described in No. 3 above. However, the commitment letters state that a certain amount of the fee will not be paid unless or until certain construction draws are received from the lender.

When should revenue be recognized as earned by the client?

*Reply*—Revenue recognition is discussed in FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraphs 83 and 84.

Applying the guidelines of Concepts No. 5, paragraphs 83 and 84, to the specific situations, revenue would be recognized as follows:

1. Negotiable Note

Income would be recognized when the services have been performed and billed which may be prior to receipt of the negotiable note.

2. Nonnegotiable Note

The terms of the nonnegotiable note are comparable to the negotiable note, and revenue would be recognized in a similar manner.

3. Commitment Letter, Not Contingent on Future Events

Such a letter would be evidence that the services have been rendered and are now "billable"; therefore, the fee has been earned and income should be recognized.

4. Commitment Letter, Contingent on Future Draws

From the description, it appears that the agreement between the client, borrower, and lender in this case is such that the parties do not consider all the services rendered until actual borrowings take place even though the client need not physically do anything else. In such a situation, a portion of the fees should be deferred until the stipulated draw provisions have been met.

## .16 Rental Revenue Based on Percentage of Sales

*Inquiry*—A supermarket built an addition to its store to house a liquor store. The rent to the liquor store is to be a percent of its sales. On its income statement, would it be proper for the supermarket to include the liquor store sales as though they were their own sales? The rent would then appear as a gross margin.

*Reply*—No. In accordance with FASB Statement No. 13, paragraph 1 (AC L10.101), this transaction meets the definition of a lease, which is "... the right to use property, plant, or equipment (land or depreciable assets or both) usually for a stated period of time."

The revenue received from the liquor store represents rental income to the supermarket and it would be inappropriate for the supermarket to include as its sales the sales of the liquor store. However, it would be appropriate for the supermarket to include the rental income as part of its gross revenues. [Amended June 1995.]

## .20 Payment for Termination of License Agreement

*Inquiry*—A research and development company holds numerous patents. The company derives its income from the sale of products which utilize its pa-

tents as well as from the licensing of the patents, for which it receives royalties, and also from the sale of patent rights, for which it receives a single payment for the term of the license.

A licensee desired to terminate its license, since it was no longer using the technology contained in the company's patent, and paid to the company a lump sum termination payment. This payment approximated the amount the company would have earned during the remaining years of the license agreement. How should the termination payment be reflected in the company's financial statements?

*Reply*—The transaction is similar to sale of a license for the remaining life of a patent and should be accounted for in the same manner. If this is the sole license for a patent, any remaining unamortized cost of such patent should be written off at this time. If the license represents only a portion of the use of the patent, an appropriate portion of the remaining unamortized cost should be written off. The proceeds should be included in this year's current operations, and there should be disclosure that a major source of income from licensing agreements is being terminated.

## **.25 Finished Parts Held by Manufacturer for Customers**

*Inquiry*—Corporation A, a subcontractor, manufactures precision parts to customers' specifications. Parts produced by Corporation A are inspected by a customer's quality control representative and then held in a secured area in Corporation A's plant. Corporation A is entitled to full contract payment on parts inspected and held in the secured area. Historically, there has been a short time span between completion date and scheduled shipment date, but recently production efficiency has improved to the extent that contracts are completed significantly in advance of scheduled shipment dates. Based on the recent experience of Corporation A, what is the proper date for revenue recognition?

*Reply*—FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 83, states in part:

"Revenues are not recognized until earned. An entity's revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues . . . ."

Revenue should be recognized at the time of inspection and delivery to the secured areas, since the realization criteria have been met. Corporation A should disclose the method followed for income recognition as part of its disclosure of accounting policies.

## **.28 Revenue From Private Label Sales**

*Inquiry*—Corporation A produces certain products that are sold under Corporation B's label. Corporation B reimburses Corporation A for all direct costs of raw material, ingredients, and packaging plus 10¢ per pound processing fee. Corporation A prepares an invoice for each shipment which itemizes the various direct costs plus 10¢ per pound processing fee. Should Corporation A record the total invoice amount as a sale or should it record the processing fee as revenue and the reimbursed direct costs as a reduction of expenses?

*Reply*—Corporation A should probably record the total invoice amount as a sale. Accounting for contracts of this type would be treated similar to cost-plus-fixed-fee contracts discussed in ARB No. 43, Chapter 11A, *Cost-Plus-Fixed-Fee Contracts*. [Amended]

**.31 Accounting for Zero Coupon Bonds**

*Inquiry*—A client purchased a 20-year zero coupon treasury bond for \$189, with a maturity value of \$1,000, at an 8½% yield to maturity.

- (1) What authoritative pronouncement would provide guidance for this transaction?
- (2) How is the interest income computed for financial reporting purposes?

*Reply*—(1) APB Opinion No. 21, *Interest on Receivables and Payables*, would apply. APB Opinion No. 21, paragraph 2, states that, “The principles discussed in this Opinion are applicable to receivables and payables which represent contractual rights to receive money or contractual obligations to pay money on fixed or determinable dates, whether or not there is any stated provision for interest . . . Examples are secured and unsecured notes, debentures, bonds . . .”

(2) APB Opinion No. 21, paragraph 15, states that, “the difference between the present value and the face amount should be amortized to reflect the interest income over the life of the note in such a way as to result in a constant rate of interest when applied to the amount outstanding at the beginning of any given period.” This is the “interest” method described in APB Opinion No. 12, *Omnibus Opinion*, paragraphs 16 and 17. However, other methods of amortization may be used if the results obtained are not materially different from those which would result from the “interest” method.

The following is an example of the application of the interest method. To calculate the semi-annual amount, multiply the purchase price by 4¼% (half of 8½%) to arrive at the adjusted cost basis for the first six-month period. Then repeat this calculation for the next six-month period using the adjusted cost basis. The total amount of income (accrual) in the first year will be \$16.40. Each year the cost basis is increased by the amount of income (accrual) reported in the previous year, as indicated in the following example:

<i>Semi-Annual Period</i>	<i>Your Purchase Price or Adjusted Cost Basis</i>	<i>½ Purchase YTM</i>	<i>Accrual During Period</i>	<i>Adjusted Cost Basis at End of Period</i>
1	\$189.00	4.25%	\$8.03	\$197.03
2	197.03	4.25%	8.37	205.40
3	205.40	4.25%	8.73	214.13
4	214.13	4.25%	9.10	223.23

The interest income would be reported annually for financial reporting purposes. If the bond is held to maturity, there will be no gain or loss. If sold prior to maturity any gain or loss is determined by the difference between the adjusted cost basis and the selling price.

**.33 Operating Lease With Rental Payments Rebated Against Purchase Price**

*Inquiry*—A lessor corporation leases construction equipment for periods of six to eighteen months under short-term cancellable leases. The leases provide

that during the first six months, 100 percent of the rentals paid may be applied toward the purchase price of the equipment if the lessee decides to purchase the equipment; during the next three months the percentage drops to 80 percent, and after nine months 60 percent may be applied toward the purchase price. The leases do not qualify as capital leases. How should the lessor account for the leases and the respective rebates?

*Reply*—The authoritative literature does not address this matter. The lessor should record rental income until the lessee decides to purchase the equipment. The lessor should then record the sale of the equipment net of the applicable rebate. The amount recorded as rental income should not be reclassified as sales proceeds.

### **.35 Involuntary Conversion—Recognition of Gain**

*Inquiry*—A tornado virtually destroys a company's building on June 12, 19X0. The company has insurance and expects to be reimbursed for costs incurred to refurbish the building. The company's fiscal year-end is June 30, 19X0. On August 15, 19X0, prior to the issuance of the financial statements, the company receives a check in excess of the carrying amount of the building. Should the company recognize the gain on the involuntary conversion in the June 30, 19X0 financial statements?

*Reply*—No. Since the company was reimbursed for an amount in excess of the carrying amount of the building there was no loss to record on June 30, 19X0. The gain, which was received on August 15, 19X0, was a gain contingency on June 30, 19X0. Per FASB Statement No. 5, *Accounting for Contingencies*, paragraph 17, contingencies that might result in gains usually are not reflected in the accounts since to do so might be to recognize revenue prior to its realization.

### **.36 Sales of Investment to Minority Stockholder**

*Inquiry*—A corporation enters into an agreement to sell an investment accounted for on the equity method to a minority stockholder in return for his shares in the corporation. The fair value of the investment exceeds its book value. Would the corporation recognize a gain on this transaction or would the excess be credited to equity?

*Reply*—APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, paragraph 18, states that a transfer of a nonmonetary asset to a stockholder or to another entity in a nonreciprocal transfer should be recorded at the fair value of the asset transferred, and that a gain or loss should be recognized on the disposition of the asset. APB Opinion No. 29, paragraph 18 also indicates that the fair value of an entity's own stock reacquired may be a more clearly evident measure of the fair value of the asset distributed in a nonreciprocal transfer if the transaction involves acquiring stock for the treasury or retirement.

The corporation should recognize as a gain, in the year in which the transaction occurs, the excess of the fair value of the investment transferred over its carrying amount.

### **.37 Sales Price Based on Future Revenue**

*Inquiry*—A company sold one of its direct-mail catalog offices for cash plus a percentage of revenue to be earned over the next five years. The sales agreement limits the percentage of revenue to a stipulated maximum. Management believes the maximum will be earned within the five-year period. When should revenue from this transaction be recorded?

*Reply*—According to FASB Statement No. 5, *Accounting for Contingencies*, paragraph 17, revenues from “Contingencies that might result in gains usually are not (recognized) prior to (their) realization.”

Unless it is assured that adequate revenue will be earned to cause payment of the contingent portion of the sales price, the contingent portion of the sales price should only be accrued as earned. The accuracy and reasonableness of management’s projections must be ascertained. If realization is assured, which would be relatively infrequent, revenue should be recorded as of the date of the sale using the present value of the projected cash receipts in accordance with APB Opinion No. 21, *Interest on Receivables and Payables*.

### **.38 Subsequent Event Related to Vendor-Specific Objective Evidence for Software Revenue Recognition**

*Inquiry*—Vendor-specific objective evidence (VSOE) of fair value may be established by management after the balance sheet date but before the issuance of the financial statements, either by separate sales or by establishment of a price by a pricing committee. May an entity use such evidence to recognize revenue at the balance sheet date in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—No. Establishment of VSOE after the balance sheet date is a Type II subsequent event, as discussed in SAS No. 1, section 560, *Subsequent Events* (AU 560). As a result, revenue should be deferred at the balance sheet date in accordance with paragraph 12 of SOP 97-2 (ACC 10,700.12), as amended by SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions* (ACC 10,770). However, if subsequent to the balance sheet date, management merely compiles evidence that existed at the balance sheet date, that evidence should be used to assess whether there is sufficient VSOE (in accordance with paragraph 10 of SOP 97-2 [ACC 10,700.10]) to recognize revenue at the balance sheet date.

### **.39 Software Revenue Recognition for Multiple-Element Arrangements**

*Inquiry*—Software vendors may execute more than one contract or agreement with a single customer. Should separate contracts or agreements be viewed as one multiple-element arrangement when determining the appropriate amount of revenue to be recognized in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—A group of contracts or agreements may be so closely related that they are, in effect, parts of a single arrangement. The form of an arrangement is not necessarily the only indicator of the substance of an arrangement. The existence of any of the following factors (which are not all-inclusive) may indicate that a group of contracts should be accounted for as a single arrangement:

- The contracts or agreements are negotiated or executed within a short time frame of each other.
- The different elements are closely interrelated or interdependent in terms of design, technology, or function.
- The fee for one or more contracts or agreements is subject to refund or forfeiture or other concession if another contract is not completed satisfactorily.

- One or more elements in one contract or agreement are essential to the functionality of an element in another contract.
- Payment terms under one contract or agreement coincide with performance criteria of another contract or agreement.
- The negotiations are conducted jointly with two or more parties (for example, from different divisions of the same company) to do what in essence is a single project.

#### **.40 Software Revenue Recognition Related to Year 2000 Compliant Software**

*Inquiry*—Is a commitment to deliver in the future a Year 2000 compliant version of a software product to an existing customer or to a customer that is acquiring a non-Year 2000 compliant version considered an upgrade right or specified upgrade in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—Yes. The criteria of SOP 97-2 (ACC 10,700) related to specified upgrades apply whether or not the commitment is contained under a warranty provision. Given the ramifications of non-Year 2000 compliant software, special attention should be given to paragraphs 13 and 14 of SOP 97-2 (ACC 10,700.13 and .14). Further, the Securities and Exchange Commission released an Interpretation in August 1998 titled, *Statement of the Commission Regarding Disclosure of Year 2000 Issues and Consequences by Public Companies, Investment Advisors, Investment Companies, and Municipal Securities Issuers*. Part of that Interpretation states, “Year 2000 issues may affect the timing of revenue recognition in accordance with (SOP 97-2 [ACC 10,700]). For example, if a vendor licenses a product that is not Year 2000 compliant and commits to deliver a Year 2000 compliant version in the future, the revenue from the transaction should be allocated to the various elements—the software and the upgrade. Entities should also consider FASB Statement No. 48, *Revenue Recognition When the Right of Return Exists* (AC R75), relating to any product return issues such as for products containing hardware and software, including whether the necessary conditions have been met to recognize revenue in the period of sale, whether that revenue should be deferred, or whether an allowance for sales return should be provided.” In such situations, a vendor generally would be required to defer all revenue until it delivers the upgraded (compliant) version.

#### **.41 Effect of Prepayments on Software Revenue Recognition**

*Inquiry*—Paragraph 29 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.29), states that if a fee on a software arrangement with extended payment terms is not fixed or determinable at the outset of an arrangement revenue should be recognized as payments become due. Should a vendor recognize revenue for amounts (related to an arrangement with extended payment terms) received directly from customers (without the software vendor's participation in its customers' financing arrangements) in advance of scheduled payments?

*Reply*—Yes, provided all other requirements of revenue recognition in SOP 97-2 (ACC 10,700) are met.

**.42 Extended Payment Terms and Software Revenue Recognition**

*Inquiry*—A software vendor with a fiscal year ending September 30 enters into a licensing arrangement and simultaneously delivers its product to a customer on September 29. Payment terms are as follows: \$600,000 due thirty days from September 29; \$400,000 due thirteen months from September 29. The licensing fee is not fixed or determinable because a significant portion of the fee is due more than one year after delivery of the software and the vendor cannot overcome the presumption in paragraph 28 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28). How much revenue should the vendor recognize during the current fiscal year ending September 30?

*Reply*—None. Paragraph 29 of SOP 97-2 (ACC 10,700.29) requires that the vendor recognize revenue as payments from customers become due (assuming all other conditions for revenue recognition in the SOP are met). In this situation, \$600,000 should be recognized as revenue on October 29 when the payment becomes due and the remaining \$400,000 should be recognized twelve months later on October 29 of the following fiscal year.

**.43 Corrections of Errors in Computer Software (Bug Fixes)**

*Inquiry*—A software vendor licenses software products to customers. Customers may elect to obtain postcontract customer support (PCS) from the software vendor as an element of the software arrangement, or customers may choose not to obtain PCS. In order to satisfy its warranty obligations, the software vendor provides bug fixes (free of charge) that are necessary to maintain compliance with published specifications to those customers that do not obtain PCS from the software vendor.

Paragraph 31 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.31), states, "...obligations related to warranties for defective software, including warranties that are routine, short-term, and relatively minor, should be accounted for in conformity with FASB Statement No. 5." However, the SOP's glossary (ACC 10,700.149) indicates that PCS may include services such as the correction of errors (for example, bug fixing). If a software vendor provides bug fixes (under warranty obligations) free of charge that are necessary to maintain compliance with published specifications, should the software vendor account for the estimated costs to correct the bugs in accordance with FASB Statement No. 5, *Accounting for Contingencies* (AC C59), or should the vendor consider the practice of providing bug fixes free of charge part of PCS (which may result in the deferral of revenue)?

*Reply*—In this situation, the software vendor should account for the estimated costs to provide bug fixes (that are necessary to maintain compliance with published specifications) in accordance with FASB Statement No. 5 (AC C59).

**.44 Postcontract Customer Support During the Deployment Phase of Computer Software**

*Inquiry*—A software vendor enters into an arrangement with a customer to deliver its software product and to provide postcontract customer support (PCS). The product will be deployed in stages. The stipulated term of the PCS period begins six months after delivery of the product, though the vendor has

a history of regularly making available to all customers the services or unspecified upgrades/enhancements normally associated with PCS as soon as its products are delivered. (That is, the customer receives any upgrades/enhancements released by the vendor during the six-month period after product delivery.) The PCS rate inherent in the licensing fee increases over time based on the customer's deployment of the product. After three years, the predetermined renewal rate for PCS for a fully deployed license is set at a stipulated rate multiplied by the aggregate list price (as established at the inception of the arrangement) of the licensed product, regardless of the status of the deployment efforts. The vendor does not have vendor-specific objective evidence (VSOE) of fair value of the PCS when the product is less than fully deployed because the only PCS sold separately is the renewal of PCS (that is, the predetermined renewal rate). Is PCS considered to commence at the date of product delivery or six months after delivery? Should the vendor consider the PCS predetermined renewal rate to be VSOE of fair value for PCS?

*Reply*—In this situation, the PCS arrangement commences upon product delivery because the customer receives any upgrades/enhancements released by the vendor during the six-month period after product delivery. In addition, the predetermined renewal rate is the only indicator of fair value because it is the only arrangement under which PCS is sold separately, and therefore, it should be used to establish VSOE of fair value of the PCS. In this situation, the vendor should initially defer the portion of the arrangement fee related to the three and one-half years of PCS provided under the arrangement based on the predetermined renewal rate.

---

[The next page is 4121.]

## Section 5210

### ***Depreciation and Depletion***

#### **.02 Disclosure of Depreciation Expense**

*Inquiry*—APB Opinion No. 12 states that the financial statements should disclose depreciation “expense” for a period. Does “expense” mean the total amount of depreciation accrued (i.e. credited to the allowance for depreciation account) for the period or the amount actually expensed after allowing for depreciation included in overhead apportioned to inventories?

*Reply*—In concerns such as public utilities and trading or commercial enterprises, determination of the total provision for depreciation is usually simple since the amounts of depreciation are generally identified in the expense accounts. In manufacturing concerns, however, there are difficulties in determining the amount of depreciation to be disclosed. Depreciation is usually included in overhead which in turn is distributed over a number of departments and products and finds its way ultimately into cost of sales through inventory accounts. To determine the amount of depreciation which is included as a part of the cost of merchandise sold may require an extensive and usually impracticable, if not impossible, analysis of cost accounts. The auditor usually solves the problem by suggesting that the amount of depreciation charged to manufacturing costs and to expense accounts be taken as representing the amount charged to income. Obviously, this method does not correctly state the depreciation charge which was recovered through sale of goods in which depreciation was an element of cost. From a practical standpoint, in view of the indicated difficulty, if not impossibility, of determining the exact amount of depreciation included in cost of sales, it has become recognized practice to report the amount of depreciation charged in the statement of income as that which has been charged to manufacturing costs and to expense accounts, even when amounts of depreciation included in inventories at the beginning and end of the period vary sufficiently to affect depreciation included in cost of sales. Such practice also is acceptable to the Securities and Exchange Commission.

#### **.04 Depreciation of Clothing Rented to Individuals**

*Inquiry*—Company A maintains a stock of tuxedos, shoes and related items which are rented to individuals. Management estimates that this stock will have a useful life of approximately two years. Additional stock will be purchased from time to time as required. At the end of each fiscal year, a complete physical inventory is taken of all items on hand. What is the most appropriate accounting treatment for the stock of rental clothing?

*Reply*—The clothing represents a fixed asset to be depreciated over its estimated life. The estimated life should be adjusted periodically to reflect experience and should not exceed two years. The depreciation charge should be computed monthly based on inventory at the beginning of the period plus additions during the current year.

Logically it seems that loss and retirement of clothing will relate to that clothing first purchased. Accordingly the first-in first-out basis would appropriately account for such loss and retirement.

**.05 Classification of Costs of Constructing a Golf Course**

*Inquiry*—How should the costs of constructing a golf course be broken down into depreciable and nondepreciable classifications?

*Reply*—For the costs incurred in constructing a golf course, those expenditures made to change the land itself, exclusive of buildings, should be treated as permanent improvements to the land and are not, therefore, depreciable. These costs would include clearing the land, building fairways, changing the contour of the earth by moving and filling, building sand traps, and creating water hazards. If trees are planted, and their lives can be estimated, it would appear to be proper to depreciate these over such lives. In the absence of any reasonable estimate, trees and shrubs should be carried at cost. Any structures such as buildings, shacks or stands should be depreciated along with the costs of any vehicles such as trucks or carts, and any equipment used. A watering system should be depreciated as it is made of material that will not last indefinitely.

**.08 Additional First Year Depreciation**

*Inquiry*—A corporation reports depreciation expense on its financial statements at the same amount that it claims on its income tax return. If that amount included the maximum \$10,000 deduction for additional first year depreciation (election to expense recovery property) allowed for tax purposes, whereas, normal depreciation was \$18,000, would the financial statements be in conformity with generally accepted accounting principles?

*Reply*—ARB No. 43, chapter 9C, *Depreciation*, paragraph 5, states, in part: “. . . depreciation accounting, a system which aims to distribute the cost or other basic value of tangible capital assets, less salvage (if any), over the estimated useful life of the unit . . . in a systematic and rational manner . . .” Accordingly, if any arbitrary additional first year depreciation amount is included in the financial statements and it is material, it would be a departure from generally accepted accounting principles. Refer to SAS No. 58, *Reports on Audited Financial Statements*, paragraph 50, and SAS No. 47, *Audit Risk and Materiality in Conducting an Audit*, paragraph 6, for guidance on materiality. [Amended]

**.09 Amortization of Leasehold Improvement**

*Inquiry*—A zoological society leases property in the city zoo for concession stands. The society plans to construct a new building, which will house several concession stands, on the leased property. When construction is complete the title to the building will be turned over to the city. How should the building be accounted for by the zoological society?

*Reply*—The construction of a building on leased property is considered a leasehold improvement. A leasehold improvement is a permanent improvement or betterment that increases the usefulness of the leased property and will revert to the lessor at the end of the lease term. The costs of such improvements are normally amortized either over the life of the improvement or the lease term, whichever is shorter.

---

[The next page is 4201.]

## Section 5220

### ***Interest Expense***

#### **.01 Deferral of Payment of Interest**

*Inquiry*—A client experienced problems in meeting its current obligations and reached an agreement with its primary creditor concerning several mortgage loans. Under the agreement, the interest rate on these loans will, for the present, be reduced from 10 percent to 8 percent, but the lender has the option in the future of increasing the interest rate to 11 percent to recover the foregone interest. At the maturity date, any unpaid interest calculated at the original 10 percent rate will be due.

How should the interest expense be recorded on the client's financial statements?

*Reply*—Interest should be accrued at the rate of 10 percent, the original rate under the mortgage loans. This debit would represent the interest expense charged to income. The credit would be segregated between current liabilities (an amount representing the 8 percent rate) and noncurrent liabilities (an amount representing the "deferred interest").

#### **.03 Computation of Interest Expense on Long-Term Redeemable Bonds**

*Inquiry*—A bank has issued four year non-negotiable savings bonds with interest of 7 percent for the first year,  $7\frac{1}{2}$  percent for the second year, 8 percent for the third year and  $8\frac{1}{2}$  percent for the fourth year. The depositor has the option to request that he be paid his interest on a semi-annual or annual basis, but few do so, and the normal procedure is that the interest will be compounded and left on deposit for the four years.

If a bond is redeemed prior to maturity, interest is paid to the bondholder at the rate of 5 percent per annum for the period that the bond was held, less 90 days. Few instances of bond redemption prior to maturity are anticipated.

Which of the following methods of accounting for interest expense is appropriate?

(1) Accrue interest at 7 percent for the first year,  $7\frac{1}{2}$  percent for the second year (plus the compounding factor), 8 percent for the third year (plus the compounding factor), and  $8\frac{1}{2}$  percent for the fourth year (plus the compounding factor), making a debit to the interest expense and a credit to the accrued interest payable on four year bonds.

(2) Determine the total amount of interest that will be due to the holder upon the maturity of the bond and accrue a pro rata share of this amount for each month of the four year period that the bond is in effect.

*Reply*—A rate of interest should be used which reflects the bank's liabilities and assumes that the bondholders will not redeem their bonds and not withdraw the interest prior to maturity. This is essentially the second approach above.

**.05 Amortization of Prepaid Interest on Discounted Notes**

*Inquiry*—An equipment leasing company will use as of the beginning of the year the interest method to amortize prepaid interest on new discounted notes. But it will continue to use the straight-line method to amortize prepaid interest on notes discounted earlier. Is the adoption of the interest method on a prospective basis a change in accounting principle?

*Reply*—APB Opinion No. 21, *Interest on Receivables and Payables*, paragraph 15, states that the interest method of amortization should be used but that other methods of amortization may be used if the results obtained are not materially different from those which would result from the interest method.

If the results in earlier periods would not have differed materially by using the interest method, the interest method may be adopted for the new notes, disclosed, and not be reported as a change in accounting principle.

If the results in earlier periods would have been materially different by using the interest method, the interest method should be adopted for the old and new notes, and be reported as a correction of an error.

**.06 Imputed Interest on Shareholder Loans**

*Inquiry*—A section of the Internal Revenue Code requires, under certain circumstances, that a company impute interest on demand loans made to a shareholder of the company. Would this also be required under generally accepted accounting principles? If not, must it be disclosed and would there be an effect on the deferred income tax accounts?

*Reply*—No. APB Opinion No. 21, *Interest on Receivables and Payables*, paragraph 2, states that the opinion applies to receivables and payables which represent contractual rights to receive money or contractual obligations to pay money on fixed or determinable dates. Imputed interest would not be required on demand loans since they have no fixed or determinable due date.

However, disclosure of this transaction would be required under FASB Statement No. 57, *Related Party Transactions*.

There would be no effect on the deferred income tax accounts since this would be considered a permanent difference.

**.07 Imputed Interest on Note Exchanged for Cash Only**

*Inquiry*—If an enterprise receives cash in exchange for a non-interest bearing long-term note payable with a stated amount equal to the cash received, must interest be imputed on the note in accordance with APB Opinion No. 21, *Interest on Receivables and Payables* (AC I69)?

*Reply*—If there are rights or privileges other than cash attendant to the exchange, the value of such rights or privileges should be given accounting recognition pursuant to APB Opinion No. 21, paragraph 7 (AC I69.104). If the note is issued solely for cash (that is, the cash received is equivalent to the face amount of the note) and no other right or privilege is exchanged, it is presumed to have a present value at issuance measured by the cash proceeds exchanged. [Amended June 1995.]

---

[The next page is 4281.]

## Section 5230

### ***Employee Benefit Plans***

#### **.06 Deferred Compensation Payable To Surviving Spouse**

*Inquiry*—Corporation A and its president entered into an employment contract. The contract stipulated that if the president died while employed by Corporation A, Corporation A would pay \$500 a month to the president's widow for the rest of her life. Shortly after the contract was signed, the president died. The present value of the estimated future payments by Corporation A to the president's widow is \$X. Should Corporation A accrue the \$X?

*Reply*—Under APB Opinion No. 12, *Omnibus Opinion—1967*, paragraphs 6–8, the estimated amounts to be paid under a compensation contract would normally be accrued over the period of active employment. The president's death accelerates recognition of a liability that is reasonably determinable from actuarial tables. Accordingly, the present value of the estimated future payments not previously recognized should be accrued and recognized as an expense.

#### **.09 Deferred Compensation Arrangement Funded by Life Insurance Contracts**

*Inquiry*—A company has a deferred compensation contract with one of its employees. In accordance with APB Opinion No. 12, *Omnibus Opinion—1967*, paragraph 6, the estimated amount of future payments was accrued over the period of active employment. The company purchases a life insurance policy on the employee, naming the company as beneficiary. May the cash surrender value earned on the policy be offset against the liability for the deferred compensation arrangement?

*Reply*—No. FASB Technical Bulletin No. 85-4, *Accounting for Purchases of Life Insurance*, paragraph 2, specifies that the cash surrender value on a life insurance contract should be reported on the balance sheet as an asset with any changes in that value reflected as an adjustment of insurance expense for the period. No right of offset or other deviations from the above accounting would be appropriate regardless of the funding objective pertaining to the purchase of the insurance contract, as stated in FASB Technical Bulletin No. 85-4, paragraph 1, footnote 1.

---

[The next page is 4381.]

## Section 5240

### Cost Allocation

#### .01 Transfer Pricing Between Manufacturing Division and Selling Division

*Inquiry*—X Company has two branches, both of which manufacture and sell the same type of items. In one transaction, Branch A made a sale of \$100,000. Branch B shipped the merchandise for this sale to Branch A. This merchandise had a cost on Branch B's books of \$70,000. How should the revenues and costs of this sale be allocated between Branches A and B?

*Reply*—When intracompany sales take place, revenues and costs are allocated by establishing transfer prices. In this case, the transfer price is the price Branch B will charge Branch A for the merchandise. Transfer prices must be set in such a way as to benefit the company as a whole, and consideration must be given to the effects the transfer prices will have on management decisions.

There are basically two methods of setting transfer prices: cost or market price. There are, however, many variations of these methods.

The transfer price could be based on standard cost of production, standard cost plus a return on investment, actual cost, variable cost, marginal cost, or simply a price negotiated by the divisions.

If there are outside suppliers of this product, the market price may be used as the transfer price. Market prices have the advantage of being relatively objective and, therefore, less subject to argument. Market prices may encourage the branches to consider market forces and outside opportunities which, to a certain extent, may be beneficial to the company. It is often difficult, however, to find market prices which accurately reflect the opportunity costs of intracompany sales.

Where intracompany transactions account for a large share of the division's sales, transfer prices must be chosen carefully so that each division is encouraged to operate for the good of the company as a whole. Where intracompany sales occur only occasionally and are not an important part of the division's activities, the choice of transfer prices is not as critical, and it may be easiest to negotiate a price or simply allow one of the divisions a "sales commission." In any event, the financial statements of the branches should be footnoted to disclose the treatment of the transaction.

No matter which transfer pricing method is chosen, the results on the company's financial statements will be the same, sales of \$100,000 and costs of goods sold of \$70,000, since the intracompany sale will be eliminated in the consolidation.

#### .10 Sale of Research and Development Technology

*Inquiry*—A company has incurred material research and development costs in the current year. Subsequent to the balance sheet date but prior to issuance of the financial statements, the company commenced negotiations and sold the research and development technology to an unrelated company. May the company capitalize the incurred research and development costs in its annual financial statements in light of the subsequent sale?

*Reply*—No. FASB Statement No. 2, *Accounting for Research and Development Costs*, paragraph 12, states that research and development costs should be expensed when incurred. There is no justification for capitalizing the costs because the technology will be sold. The company should disclose the subsequent sale of the research and development technology in the footnotes to its financial statements if the amount is material.

---

[The next page is 4501.]

## Section 5260

### ***Estimated Losses***

#### **.01 Recognition of Estimated Losses on Uncompleted Contracts**

*Inquiry*—An engineering firm manufactures and sells telemetry components on the basis of bids previously submitted to customers. In some cases, engineering time is required to modify a component to customer specifications. Since the amount of required engineering time is not known at the time a bid is submitted, costs to complete a particular job may exceed the bid price. The firm completes all jobs.

Presently all costs that accumulate on a particular job (direct materials, labor, and applied manufacturing and engineering overhead) are charged to that job and treated as work in process, even though the costs may exceed the selling price. Once the job is completed, it is taken out of work in process inventory and treated as costs of completion in the month that the job is shipped. Therefore, a loss on a job is recognized only when the job is shipped. When cost to complete a job is expected to exceed the bid price, what disclosure should be made on the balance sheet?

*Reply*—The problem faced by the firm is not primarily one of disclosure but rather that of satisfying the generally accepted accounting principle of “providing for losses which are reasonably certain to occur.”

It is assumed that the firm is accounting on the completed-contract basis. With regard to construction companies using this method of accounting, ARB No. 45, *Long-Term Construction-Type Contracts*, paragraph 11 states, “Although the completed-contract method does not permit the recording of any income prior to completion, provision should be made for expected losses in accordance with the well established practice of making provision for foreseeable losses.” The same concept applies to companies accounting under the percentage-of-completion method (*ibid.*, par. 6).

A possible journal entry to recognize the loss would be a charge to “Estimated Loss on Uncompleted Contracts” while crediting “Estimated Liability for Loss on Uncompleted Contracts.” This estimated liability could then be deducted from any excess of accumulated costs over related billings (or added to any liability arising from billings in excess of accumulated costs) for balance sheet purposes. If the loss is not deductible for tax purposes, part of the income tax paid should be set up as a deferred charge.

---

[The next page is 4551.]

## Section 5290

### Other Expenses

#### .02 Classification of Expenses Which Are Taxable to Employees

*Inquiry*—An amendment to the Internal Revenue Code requires, under certain circumstances, that an employer include as income, the fair value for the use of a company automobile, in the employee's wage and tax statement (Form W-2).

Should this be reported in the company's statement of income as compensation to employees?

*Reply*—No. The fair value is the amount the employee would have paid to use the car if the employee had owned it. The employer should report, as automobile expenses, the amount of actual expenses it incurred as owner of the car.

#### .04 Accounting for Relocation Costs

*Inquiry*—A corporation is relocating its production facilities to a different location. May the costs of relocating be capitalized?

*Reply*—A related matter is discussed in FASB Emerging Issues Task Force (EITF) Issue 88-10, *Costs Associated with Lease Modification or Termination*, where the question of whether any costs, particularly moving costs, incurred by a lessee in connection with changing from one lease to another lease may be deferred and amortized over the new lease term, is answered. In the discussion of EITF Issue 88-10, EITF task force members agreed that the predominant practice is to charge the costs of moving from a former location to expense as incurred. The SEC observer at the EITF discussion noted that as a general rule, the SEC staff would object to the deferral of moving costs. Additionally, one of the primary characteristics of an asset as defined by FASB Concepts Statement No. 6, *Elements of Financial Statements*, is that an asset embodies a probable future benefit that involves a capacity, singly, or in combination with other assets, to contribute directly or indirectly to future net cash inflows. The costs of relocation do not embody any future benefit and they should therefore be expensed when incurred.

#### .05 Accrual of Audit Fee

*Inquiry*—A CPA has been engaged to audit the financial statements of a client company. The audit is being conducted after year end. Is it proper to accrue the audit fee as an expense of the year under audit?

*Reply*—According to FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 145, "The goal of accrual accounting is to account in the periods in which they occur for the effects on an entity of transactions and other events and circumstances, to the extent that those financial effects are recognizable and measurable." The audit fee expense was incurred in the period subsequent to year end. Therefore, it is properly recorded as an expense in the subsequent period. However, fees incurred in connection with planning the audit, together with preliminary procedures (e.g., confirmation work) would be accruable for the year under audit.

**.06 Accounting for a Lease Trial Period**

*Inquiry*—A lease agreement allows a prospective lessee the free use of newly introduced specialized equipment for 30 days prior to entering into a long-term lease agreement for the equipment. The prospective lessee is not committed to enter into a long-term lease agreement at the beginning or during the 30-day trial period and there is no economic penalty to the lessee if the lessee does not enter into that agreement. How should the prospective lessee account for the 30-day trial period?

*Reply*—The 30-day trial period is part of the lessor's marketing strategy. Therefore, the lessee should not report any lease expense during the 30-day trial period. If the lessee subsequently enters into the lease arrangement, the date of inception should begin on the first day of the lease with no accounting recognition given to the trial period.

---

**[The next page is 4801.]**

## Section 5400

### ***Extraordinary Items***

#### **.01 Loss on Abandonment of Sales Project**

*Inquiry*—A company is engaged primarily in commercial and agricultural land sales, but some retail land sales and condominium sales are also made. The company acquired a retail land sales project under an agreement stating that, if the company did not desire to pursue the project, the property would be returned with no liability to the company.

The company invested a considerable amount of money in the project, but because of the declining state of the economy, the company decided to return the project to the original owner before any sales had been made.

Does the abandonment of the project represent a disposal of a segment of the business, an unusual and nonrecurring extraordinary loss, or an ordinary loss?

*Reply*—Paragraph 13 of Accounting Principles Board Opinion No. 30 describes a segment of the business as “. . . a component of an entity whose activities represent a separate major line of business or class of customer.” Paragraph 20 of the Opinion sets forth the two criteria for classification of an event or transaction as an extraordinary item. Although the criterion of infrequency of occurrence is met, it does not appear that the unusual nature criterion, described as “the possession of a high degree of abnormality, and of a type clearly unrelated to, or only incidentally related, to the ordinary and typical activities of the entity,” portrays this transaction.

If the company's formal decision to disengage itself from retail land sales applies to its entire retail land sales operation, the write-off should be considered as part of the sale of a segment of a business, but the segment to be accounted for must be the whole retail land sales operation. Otherwise, the write-off should be accounted for in accordance with paragraph 26 of APB Opinion No. 30 as a material transaction that occurs infrequently, but does not meet the criterion for classification as unusual in nature.

#### **.02 Sale of Cotton Futures Commitment Contracts**

*Inquiry*—A textile manufacturer entered into firm purchase commitments for cotton at a very favorable price. At the present time, the corporation has an unusually long position of purchase commitments at a low fixed price. Some of these contracts may be sold at a tremendous profit which is extremely material in relation to normal operating income. This results from the tremendous increase in cost of raw cotton during recent months. The corporation has not sold such commitment contracts in the past; nor does it anticipate selling such contracts in the future.

Will the sale of cotton futures commitment contracts be considered an extraordinary item?

*Reply*—Paragraphs 19–22 of Accounting Principles Board Opinion No. 30 discuss the criteria for extraordinary items. In order to be classified as an extraordinary item, an event or transaction would have to be both unusual in

nature and infrequent in occurrence. The transaction would not meet the “unusual nature” test. Making a commitment for future delivery of cotton to insure a source of supply would be part of the normal operations of a textile manufacturer. Any resulting gain or loss would therefore be considered ordinary. Although the corporation has not sold such commitment contracts in the past; nor does the corporation anticipate selling such contracts in the future, any gain realized on the sale of such a contract should not be considered an extraordinary item under APB Opinion No. 30. However, it should be shown as a separate line item in the income statement in accordance with paragraph 26 of the Opinion.

#### **.04 Reporting the Proceeds From Life Insurance on an Officer**

*Inquiry*—A company received the life insurance proceeds on the death of its president before the end of its fiscal year and intends to report the amount in its income statement as an extraordinary item. Would this be in conformity with generally accepted accounting principles?

*Reply*—No. APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, paragraph 20, states that “extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence.” The receipt of insurance proceeds from an officer’s life insurance policy is an infrequent occurrence, but it is not unusual in nature. Since it does not meet *both* the criteria of unusual and infrequent it does not qualify as an extraordinary item.

APB Opinion No. 30, paragraph 26, states “a material event or transaction that is unusual in nature *or* occurs infrequently but not both, and, therefore, does not meet both criteria for classification as an extraordinary item, should be reported as a separate component of income from continuing operations.”

---

[The next page is 4851.]

## Section 5500

### **FASB Statement No. 128, Earnings per Share**

#### **.02 Earnings Per Share of Wholly-Owned Subsidiaries**

*Inquiry*—The annual report of a holding company with five wholly owned subsidiaries shows the consolidated net income and earnings per share of the companies. If the report also includes the individual income statements of the five subsidiaries, is it necessary to include individual earnings per share figures?

*Reply*—Paragraph 6 of FASB Statement No. 128, *Earnings per Share* (AC E11), does not require presentation of earnings per share in statements of wholly owned subsidiaries.

Therefore, it is not necessary to show earnings per share figures for the subsidiaries. [Amended September 1997]

#### **.03 Weighted Average Shares Outstanding for an Interim Period**

*Inquiry*—A company retired some of its common stock during the first quarter of its fiscal year. Should earnings per share for the interim period be based on annualized weighted average shares outstanding or the weighted average shares outstanding during the period?

*Reply*—The earnings per share computation should be based on the weighted average shares outstanding during the interim period, and not on an annualized weighted average. See the illustration in FASB Statement No. 128, *Earnings per Share*, appendix C, for an example computation of the weighted average shares outstanding for an interim period. [Amended September 1997]

#### **.13 Shares Held as Collateral Under Subscription Agreement**

*Inquiry*—A corporation had 150,000 shares of common stock outstanding and granted options for an additional 50,000 shares. The options were exercised, and shares were issued upon execution of a subscription agreement and a note for the total option price payable in ten annual installments. Counsel has advised that under state law shares acquired under such a subscription agreement are entitled to full vote and dividends even though they are not fully paid and are held as security under the agreement. The corporation cannot enforce payment for the shares under the agreement. If the purchaser defaults, the company just does not release the shares.

The corporation has no other options, warrants, convertible debentures or other potentially dilutive securities outstanding.

After the exercise of the options as described above, how should the earnings per share be calculated?

*Reply*—Since the shares have been issued and are merely being held as collateral in connection with the subscription agreement, and based upon the fact that the shares issued under the agreement are entitled to full vote and dividend rights, earnings per share should be computed using 200,000 shares outstanding. [Amended June 1995]

**.15 Stock Dividend Declared But Not Paid at Balance-Sheet Date**

*Inquiry*—A client declared a 5 percent stock dividend to shareholders of record in December, 19X4, payable in 19X5. In calculating the weighted average number of shares outstanding for determining the earnings per share for 19X4, how should this stock dividend apply?

*Reply*—FASB Statement No. 128, *Earnings per Share*, paragraph 54 (AC E11.147), requires the computations of basic and diluted EPS to be adjusted retroactively for all periods presented to reflect a change in capital structure resulting from a stock dividend. Therefore, the 5 percent stock dividend should be considered as being outstanding for every month of 19X4, as well as for every month of every preceding period presented. [Amended September 1997]

---

[The next page is 4891.]

## Section 5600

### Leases

#### .04 Accounting for Subleases

**Inquiry**—A corporation leased a building and, ultimately, subleased half of the space to a third party with the lease agreement between the two original parties remaining in effect. Management believed that a fairer presentation was made by netting the rental income from the sublease against its own minimum lease payments. Is the corporation properly accounting for its leased property and sublease income?

**Reply**—No. FASB Statement No. 13, *Accounting for Leases*, paragraph 39 (AC L10.135), states that the original lessee, as sublessor, shall continue to account for the obligation related to the original lease as before. The sublease shall be accounted for in accordance with FASB Statement No. 13, paragraphs 7 (AC L10.103) and 8 (AC L10.104), depending upon which of the criteria the original lease met. If the original lease is an operating lease, the original lessee shall account for both it and the new lease as operating leases.

#### .05 Deferral of Rental Expense Until Occupancy

**Inquiry**—An entity entered into a lease agreement under an operating lease for a three-year term. The entity was prevented from occupying the premises under lease until several months after the lease term began because the premises weren't ready for their intended use. During that period, the entity underwent activities necessary to get the premises ready for use, such as constructing leasehold improvements and obtaining the necessary Certificate of Occupancy. May the lease payments during that period be deferred and charged to expense over the period the premises were occupied?

**Reply**—While the authoritative accounting literature does not address this question specifically, it appears from the sources discussed below that rental expense under an operating lease should be recorded from the date the lessee takes possession or control of the leased property. Until that time, any rental payments maybe deferred.

1. FASB Technical Bulletin No. 88-1, *Issues Relating to Accounting for Leases* (AC L10.527A–.527F), which addresses, among other things, the accounting for scheduled rent increases in an operating lease, states in paragraph 2(a) (AC L10.527B), rental payments should be recognized as expense when the “*lessee take possession of or controls the physical use of the property.*” If the rent increases are due to the lessee’s use of additional space, paragraph 2(b) (AC L10.527B) states “the escalated rents should be considered rental expense . . . and recognized in . . . the years the lessee has control over the use of additional leased property” (emphasis added).

The entity obtained control over the premises to use as it wished only after it received the certificate of occupancy. This supports deferring the initial rental payments and charging them to expense after that date.

2. FASB Technical Bulletin No. 85-3, *Accounting for Operating Leases With Scheduled Rent Increases* (AC L10.525-527), discusses the accounting for rent inducements or "rent holidays." It too focuses on the period in which the leased property is *physically employed* to record rent expense rather than the period in which the rental payment is *due*. The leased property was "physically employed" only after the certificate of occupancy was obtained.
3. Under the present accounting model, certain costs may be added to an asset's acquisition cost until an asset is ready for its intended use. For example, under FASB Statement No. 34, *Capitalization of Interest Costs* (AC I67), interest may be classified as part of a qualifying asset's acquisition cost during the period the entity is undergoing the activities necessary to get those assets ready for use. By analogy, costs incurred by a lessee to get the leased premises ready for its intended use, including rental costs, may be deferred.

#### **.06 Recognition of Marketing Expense Related to Lease**

*Inquiry*—A company that leases out security monitoring systems also sells, to the lessee, related equipment used with the monitoring system. As part of a marketing strategy to encourage the leasing of the security monitoring system, the related equipment is sold at a loss. May the loss be deferred and amortized over the noncancellable lease term of the security monitoring system?

*Reply*—No. The loss should be recognized when it occurs as a marketing expense.

## Section 6130

### ***Finance Companies***

#### **.01 Amortization of Discount on Receivables of Consumer Finance Companies**

*Inquiry*—A client in the consumer finance business loans money for short periods of time. What method should be used to amortize discounts on such loans?

*Reply*—In determining income from loans receivable which have been issued at a discount, the required method of income recognition for any such discount is the interest method, as described in FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* (AC L20), and as required by the AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraphs 2.10, 2.11, and 2.13. [Amended]

#### **.02 Method of Recognizing Revenue From Finance Charges**

*Inquiry*—A finance company would like to establish a policy of recognizing 15% of the finance charges on discount loans as revenues in the first month of the loan and recognizing the balance of such charges as yield adjustments as the receivables are liquidated. Is this an acceptable method of recognizing revenues from finance charges?

*Reply*—No. The AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 2.13, requires that the interest (actuarial) method should be used to account for interest income in accordance with FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Cost of Leases* (AC L20). In addition, FASB Statement No. 91, paragraph 5 (AC L20.104), requires that certain direct loan acquisition costs be deferred and treated as yield adjustments in applying the interest method. [Amended]

#### **.03 Method of Recognizing Revenue From Service Charges**

*Inquiry*—A company finances insurance premiums of individuals through various insurance agents. The company's policy is to receive completed premium finance agreements directly from the insurance agents. The amount financed includes a finance charge and a nonreturnable service charge. The finance charge is recognized in income by the interest method.

How should the service charge be recognized on the records of the company?

*Reply*—In accordance with the AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 2.18, the service charge should also be recognized in income over the life of the related loan as an adjustment of yield using the interest method in accordance with FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* (AC L20). [Amended]

**.04 Method of Recognizing Revenue From Commissions on Loan Insurance**

*Inquiry*—A finance company receives commissions for loan insurance. How should the company recognize commission revenues?

*Reply*—The AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 5.21, states that the insurance commissions received by finance companies from independent insurers should be credited to a deferred income account when received and systematically amortized over the life of the related insurance contracts. The method of commission amortization should be consistent with the method of premium income recognition for that type of policy in accordance with FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises* (AC In6). [Amended]

**.05 Disclosure of Contractual Maturities of Direct Cash Loans**

*Inquiry*—AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 2.44, calls for disclosure of contractual maturities of direct cash loans. At December 31, 19X1, a company has only three loans outstanding of \$36,000 each, payable monthly as follows: 12 installments of \$3,000 each; 24 installments of \$1,500 each; and 36 installments of \$1,000 each. How would these contractual maturities properly be shown?

*Reply*—Appropriate disclosure of the amounts to be received would be: 19X2, \$66,000; 19X3, \$30,000; and 19X4, \$12,000. Refer to the Audit and Accounting Guide *Audits of Finance Companies*, appendix A, Note B, for an illustration of such disclosure. [Amended]

**.06 Balance Sheet Presentation of Subordinated Debt**

*Inquiry*—A consumer finance company, whose financial statements are used only by the company and its banks, would like to include subordinated debt in its balance sheet with the caption "Total Subordinated Notes and Shareholders' Equity." The company believes that presentation would show more clearly the position of the banks with respect to other creditors. Would the presentation be acceptable if the statements were clearly labeled, "For the Use of Banks and Bankers Only"?

*Reply*—No. Although the total of subordinated long-term debt and stockholders' equity is important to creditors of finance companies, the prominent presentation of this total in balance sheets causes many users of financial statements to interpret this amount as total stockholders' equity, and, for this reason, its use is not acceptable.

The proposed balance sheet presentation would not be in conformity with generally accepted accounting principles even if the financial statements are clearly and conspicuously labeled, "For the Use of Banks and Bankers Only." [Amended]

---

[The next page is 5371.]

## Section 6140

### Not-For-Profit Organizations

#### .01 Inventory Valuation for a Not-for-Profit Scientific Organization

*Inquiry*—A not-for-profit scientific organization produces products that are sold at a price less than cost. The difference between cost and sale proceeds is covered by contributions. The not-for-profit organization reports inventories in its financial statements at an arbitrary amount and discloses that fact on the face of the financial statements. Is this accounting appropriate?

*Reply*—No. Accounting Research Bulletin No. 43, Chapter 4, *Inventory Pricing*, paragraph 8 (AC I78.109) states:

A departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as its cost. Where there is evidence that the utility of goods, in their disposal in the ordinary course of business, will be less than cost, whether due to physical deterioration, obsolescence, changes in price levels, or other causes, the difference should be recognized as a loss of the current period. This is generally accomplished by stating such goods at a lower level commonly designated as *market*.

Accordingly, inventories should be valued at lower of cost or market and not at an arbitrary amount. The fact that the difference between the sales proceeds and the costs is covered by contributions does not change the application of the requirements of ARB No. 43 (AC I78.109). [Amended June 1995]

#### .02 Income Recognition of Membership Dues by Not-for-Profit Organization

*Inquiry*—A local not-for-profit organization collects membership dues and does not provide any services to its members in return for the dues. It records the dues as contributions and recognizes them as revenue in the period they are received. The organization provides services, such as seminars, group insurance, etc., to its members at an extra cost.

Is this the appropriate accounting method?

*Reply*—Yes. This organization qualifies as a not-for-profit organization under the definition in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC No5). Accordingly, FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, paragraph 8 (AC C67.108), would require that the dues be recognized as contributions revenue when received since the members receive no benefits from the dues. If the member did receive benefits from those dues, dues revenue would be recognized over the period of membership (AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, paragraph 5.16). [Amended June 1995]

#### .03 Lapsing of Time Restrictions on Receivables That are Uncollected at Their Due Date

*Inquiry*—Paragraph 15 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC No5.144), provides that “receipts of unconditional promises to give with payments due in future periods shall be

reported as restricted support unless explicit donor stipulations or circumstances surrounding the receipt of a promise make clear that the donor intended it to be used to support activities of the current period. For example, receipts of unconditional promises to give cash in future years generally increase temporarily restricted net assets.” Paragraph 167 notes that “most unconditional promises to give with payments due in future periods will be recognized as temporarily restricted support with time restrictions that expire in the periods those payments are due. That recognition should avoid misunderstandings that some respondents said would occur if promises to give due in future periods were recognized as unrestricted revenue and were perceived by users of financial statements as currently available funds.”

Do time restrictions on contributions receivable lapse when the receivable is due or when it is collected?

**Reply**—Time restrictions on contributions receivable lapse when the receivable is due. (In some cases, the due date may be explicitly stated. In other cases, circumstances surrounding receipt of the contribution may make clear the implicit due date. In yet other cases, the due date may be unclear. NPOs should consider the facts and circumstances surrounding the promise to give to determine the due date, if any.)

#### **.04 Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets are Met Before the Receivables are Due**

**Inquiry**—Paragraph 14 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC No5.143), provides that “a restriction on an organization’s use of the assets contributed results either from a donor’s explicit stipulation or from circumstances surrounding the receipt of the contribution that make clear the donor’s implicit restriction on use.” These are purpose restrictions. Paragraph 15 provides that “receipts of unconditional promises to give with payments due in future periods shall be reported as restricted support unless explicit donor stipulations or circumstances surrounding the receipt of a promise make clear that the donor intended it to be used to support activities of the current period. For example, receipts of unconditional promises to give cash in future years generally increase temporarily restricted net assets.” These are time restrictions. Footnote 5 to paragraph 17 provides as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions is recognized in the period in which the last remaining restriction has expired. Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired. Time restrictions implied on gifts of long-lived assets expire as the economic benefits of the acquired assets are used up; that is, over their estimated useful lives. In the absence of donor stipulations specifying how long donated assets must be used or an organization’s policy of implying time restrictions, restrictions on long-lived assets, if any, or cash to acquire long-lived assets expire when the assets are placed in service.

NPOs may receive promises to give contributions that are restricted by donors for investment in long-lived assets. In some circumstances, the assets may be placed in service, and the purpose restrictions met, prior to the due date of the contribution. For example, an NPO may have a capital campaign, asking for commitments to contribute over the next five years so the organization can build a new facility. A donor may promise to give \$100,000 in five years in response to that request.

Are the restrictions met when the assets are placed in service or when the receivable is due?

**Reply**—NPOs should consider the facts and circumstances surrounding the promise to give and whether those facts and circumstances indicate that the donor intended the contribution to be used to support activities of the current period, with constructing the building or placing it in service considered activities of the current period. If circumstances indicate that the donor intended to support activities of the current period, there is no time restriction and footnote 5 of FASB Statement No. 116 (AC No5.147) would not be applicable, unless a restriction was placed on the contribution other than constructing the building. If circumstances indicate that the donor's intent is not to support activities of the current period, there are both a time restriction and a purpose restriction. In conformity with footnote 5 of FASB Statement No. 116 (AC No5.147), the effect of the expiration of restrictions is recognized in the period in which the last remaining restriction has expired.

#### **.05 NPO Accounting for Loans of Cash That are Interest Free or That Have Below-Market Interest Rates**

**Inquiry**—FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC No5), defines a *contribution* as “an unconditional transfer of cash or other assets to an entity or a settlement or cancellation of its liabilities in a voluntary nonreciprocal transfer by another entity acting other than as an owner.” Some NPOs receive loans of cash that are interest free or that have below-market interest rates.

Should interest expense and contribution revenue be reported for loans of cash to NPOs that are interest free or that have below-market interest rates?

**Reply**—Interest expense and contribution revenue should be reported in connection with loans of cash to NPOs that are interest free or that have below-market interest rates (regardless of whether the loan is between related parties). Those contributions should be measured at fair value, which is the difference between the fair value of the loan at market rates and the fair value of the loan at its stated rate. The corresponding entry would be to interest income for the donor and to interest expense for the donee.

##### *Example 1*

On January 1, 1998, an NPO with a December year end receives an interest-free loan of \$200,000, payable on December 31, 2000. The purpose of the loan is to pay operating expenses and the appropriate imputed rate of interest is 6 percent.

1/1/98

db. Cash	200,000	
cr. Loan payable		168,000
cr. Contribution revenue—restricted		32,000

(Receipt of cash; liability reported at the fair value of the loan using the present value of \$200,000 due in three years, discounted at 6 percent.)

12/31/98

db. Interest expense	10,000	
cr. Loan payable		10,000

(Accretion of loan using the effective interest method.)

Specialized Industry Problems

db. Restricted net assets	10,000	
cr. Unrestricted net assets		10,000

(Reclassification due to lapse of restriction.)

12/31/99

db. Interest expense	10,600	
cr. Loan payable		10,600

(Accretion of loan using the effective interest method.)

db. Restricted net assets	10,600	
cr. Unrestricted net assets		10,600

(Reclassification due to lapse of restriction.)

12/31/00

db. Interest expense	11,400	
cr. Loan payable		11,400

(Accretion of loan using the effective interest method.)

db. Restricted net assets	11,400	
cr. Unrestricted net assets		11,400

(Reclassification due to lapse of restriction.)

db. Loan payable	200,000	
cr. Cash		200,000

(Payment of the loan.)

Example 2

On January 1, 1998, an NPO with a December year end receives an interest-free loan of \$200,000, payable on demand. The purpose of the loan is to pay operating expenses and the appropriate imputed rate of interest is 6 percent. The loan is repaid on December 31, 2000.

1/1/98

db. Cash	200,000	
cr. Loan payable		200,000

(Receipt of cash.)

12/31/98

db. Interest expense	12,000	
cr. Contribution revenue		12,000

(Contribution revenue for below-market rate of interest on loan [loan balance x interest rate: \$200,000 x .06].)

12/31/99

db. Interest expense	12,000	
cr. Contribution revenue		12,000

(Contribution revenue for below-market rate of interest on loan [loan balance x interest rate: \$200,000 x .06].)

12/31/00

db. Interest expense	12,000	
cr. Contribution revenue		12,000

(Contribution revenue for below-market rate of interest on loan [loan balance x interest rate: \$200,000 x .06].)

db. Loan payable	200,000	
cr. Cash		200,000

(Payment of the loan.)

## **.06 Functional Category of Cost of Sales of Contributed Inventory**

**Inquiry**—How should the cost of sales of contributed inventory be reported? For example, should it be reported as a separate supporting service, as program, or as fundraising?

**Reply**—Cost of sales of contributed inventory should be reported as the cost of a separate supporting service, unless the item sold is related to a program activity, in which case, cost of sales is reported as a cost of a program activity. Cost of sales of contributed inventory should not be reported as fundraising.

## **.07 Functional Category of Costs of Special Events**

**Inquiry**—Paragraph 13.06 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* provides that “fund-raising costs, including the cost of special fund-raising events, are incurred to persuade donors to make contributions to an organization and should be expensed as incurred.” Paragraph 13.30 provides that “*fund-raising activities* involve inducing potential donors to contribute money....They include publicizing and conducting fund-raising campaigns...and conducting special fund-raising events....” Paragraph 13.18 provides guidance on accounting for special events and provides that “organizations may report the gross revenues of special events and other fund-raising activities with the cost of direct benefits to donors (for example, meals and facilities rental) displayed either (1) as a line item deducted from the special event revenues or (2) in the same section of the statement of activities as are other programs or supporting services *and allocated, if necessary, among those various functions.*” [*Emphasis added.*]

Should all costs of special fund-raising events, such as costs of direct donor benefits that are provided in exchange transactions, be reported as fund-raising?

**Reply**—The discussion of special fund-raising events in paragraphs 13.06, 13.18, and 13.30 of the Guide provide that some, but not necessarily all, costs of special fund-raising events should be reported as fundraising. Certain costs of special fund-raising events, such as costs of direct donor benefits that are provided in exchange transactions, should be reported in categories other than fundraising.

## .08 Functional Category of the Costs of Direct Donor Benefits

*Inquiry*—NPOs may hold special events that provide donor benefits. For example, an organization may hold a special event and provide a meal to donors, which would be a direct donor benefit. Paragraphs 13.17 to 13.22 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* provide guidance on reporting the costs of special events, including the costs of direct donor benefits. Paragraph 13.15 provides that, if cost of sales relates to an item that is program related, cost of sales should be reported as program expense. Otherwise, cost of sales could be reported as a separate supporting service. Also, footnote 10 to paragraph 5.12 of the Guide provides that the cost of premiums provided that are greater than nominal in value should be reported as cost of sales. However, the Guide provides no guidance concerning the functional category in which the costs of direct donor benefits should be reported in circumstances in which the benefits are not program related, beyond providing that they should be reported as a supporting service.

In which functional category should the costs of direct donor benefits that are not program related be reported?

*Reply*—The costs of donor benefits that are not program related and that are provided in exchange transactions should be reported as a separate supporting category, such as cost of sales, and should not be reported as fundraising.

The costs of donor benefits that are not program related and that are provided in transactions that are other than exchange transactions, such as a fund-raising dinner for which there is no charge to attend, should be reported as fundraising.

## .09 Reporting Bad Debt Losses

*Inquiry*—Paragraph 20 of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC No5.118), provides that expenses should be reported as decreases in net assets.

Paragraph 25 (AC No5.122) provides that “a statement of activities may report gains and losses as net amounts if they result from peripheral or incidental transactions or from other events and circumstances that may be largely beyond the control of the organization and its management.”

Paragraph 5.56 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* provides that, if the fair value of contributions arising from unconditional promises to give cash or noncash assets decreases subsequent to initial measurement because of changes in the quantity or nature of assets expected to be received, the decrease should be recognized as expenses or losses (bad debt) in the period(s) in which the expectation changes.<sup>1</sup>

May bad debt losses be netted against contribution revenue?

*Reply*—Bad debt losses are prohibited from being netted against contribution revenue under paragraph 25 of FASB Statement No. 117 (AC No5.122) because losses are permitted to be netted only against gains, and not against revenues.

---

<sup>1</sup> The Guide's provision that certain decreases in the fair value of contributions arising from unconditional promises to give should be accounted for as losses, rather than as expenses, is an accounting convention. This convention provides that, in circumstances in which the net assets related to receivables are represented as restricted net assets, decreases in net assets should be reported as decreases in restricted net assets, rather than as decreases in unrestricted net assets.

**.10 Consolidation of Political Action Committee**

*Inquiry*—Some not-for-profit organizations are related to other not-for-profit organizations that perform political activities that the reporting organization does not wish to perform, perhaps because performing those activities may threaten the reporting organization's tax exempt status, the reporting organization is precluded from conducting such activities, or for other reasons. For example, a membership organization may establish and sponsor a political action committee (PAC) whose mission is to further the interests of the membership organization. The resources held by the PAC are used for the purposes of the membership organization and the governing board of the PAC is appointed by the board of the membership organization.

Does SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations* (ACC 10,610), require consolidation of PACs in the circumstances described above?

*Reply*—SOP 94-3 (ACC 10,610) requires consolidating PACs in the circumstances described above. Under SOP 94-3 (ACC 10,610), the threshold issues pertaining to the circumstances described above are whether there is (1) control through a majority voting interest in the board of the PAC and (2) an economic interest. In the circumstances described above, both are present. Control through a majority voting interest in the board of the PAC exists because the governing board of the PAC is appointed by the board of the membership organization. An economic interest exists because the PAC holds significant resources that must be used for the purposes of the membership organization.

---

## Section 6300

### ***Insurance Companies***

#### **.01 Recognition of Commission Income by Insurance Agency**

*Inquiry*—Insurance agents and brokers receive commissions on the insurance policies that they place for their clients with insurance companies. Commissions consist of a percentage of the premiums that the clients pay for the policies. On policies that are cancelled before the end of their term, usually one year, the insurance company charges back the portion of the commissions related to the unearned premiums to the originating agent or broker. In addition, some brokers may receive contingent commissions from underwriters based on the profitability of policies placed with an underwriter. How should an insurance agent or broker account for revenue from such commissions?

*Reply*—Commissions should be recognized on the date on which (a) the client is afforded protection under the policy (effective date), (b) the premium due under the policy can be reasonably estimated, and (c) the premium is billable to the client. A provision should be made for expected adjustments relating to policy cancellations when they can be reasonably estimated in accordance with FASB Statement No. 5, *Accounting for Contingencies* (AC C59). Contingent commissions should generally be recognized when the insurance agent or broker is notified by the underwriter of the amount to be received. [Amended]

#### **.02 Method of Recognizing Revenue From Commissions on Credit Life Insurance**

*Inquiry*—Under arrangements with a lending institution, an insurance agency provides credit life insurance to mortgagors. The borrower pays the premium for the entire term of the insurance (as much as eight years) when the loan is made, and the insurance agency remits to the insurance company this entire sum less a commission.

Should this commission income be recognized when it is received, or should it be recognized over the term of the policy?

*Reply*—Generally, credit life insurance appears to have more of the characteristics of casualty insurance than it does of life insurance. In particular, from the agent's viewpoint, payment for the policy usually occurs in a lump sum from which agent commissions are deducted. Generally, the efforts of the agency in connection with any individual policy terminate when collection is made or, at least, when the proceeds from the collections are remitted to the insurance company. It would therefore seem that the recognition of income should occur when proceeds of the policy are received.

However, as there is a potential liability for returned premiums, it would appear that a reasonable allowance should be provided at this time for estimated commissions on the portion of the policies that may be cancelled in future years. Most finance companies should have adequate statistics upon which to base such estimates. If the finance company is new, there may be statistics available from similar enterprises.

**.03 Recognition of Income on Unclaimed Refunds Due Policyholders on Policy Cancellations**

*Inquiry*—An insurance agency has a material amount of accounts payable legally due to policyholders who have cancelled their insurance prior to the end of the policy term. The company does not notify these policyholders that these amounts are due them. When, if ever, should these credits be taken into income?

*Reply*—These accounts payable should continue to be reported as liabilities until such time as the individuals involved legally lose their claim to these amounts. Legal counsel should be consulted for an opinion as to whether these amounts would have to be paid over to the state under an escheat law.

Consideration should also be given to the appropriateness of notifying these policyholders that this money is due them.

**.04 Reserve for Future Claims of Title Insurance Company**

*Inquiry*—A title insurance company must place part of its premiums in a reserve for future claims. When should this reserve be recognized as income?

*Reply*—The jurisdiction under which a title insurance company operates usually requires that a stipulated percentage of premiums collected must be deferred in an unearned premium account. Generally, the unearned premium is taken into income over a ten-year period since most claims against title policies tend to occur during this ten-year period. However, actual claims are not charged to the unearned premium account. Actual claims are charged against income (title claims account) with the credit to "Reserve for Claims." The reserve for claims represents reported claims that have surfaced. The unearned premium account is intended to cover unsurfaced claims.

---

## Section 6400

### **Health Care Organizations**

#### **.04 Hospital as Collecting Agent for Physicians**

*Inquiry*—Under an agreement with several physicians, a hospital acts as collecting agent for the physicians' fees, and the physicians, in return, provide professional services at the hospital. These physicians are not employees; payroll taxes are not paid for them, and the hospital cannot exercise any of the prerogatives of an employer. To enable it to collect the physicians' Medicare fees, the hospital holds valid assignments. Should the amounts collected as physicians' fees be included in the income and expenses of the provider hospital?

*Reply*—No. As discussed in the AICPA Audit and Accounting Guide *Health Care Organizations*, paragraph 3.02, health care organizations may receive and hold assets owned by others under agency relationships; for example, they may perform billing and collection services for physicians. In accepting responsibility for those assets, an organization incurs a liability to the principal under the agency relationship to return the assets in the future. In the example above, the hospital is functioning as a conduit with respect to the physicians' fees. As a result, the fees should be reported as a liability to the physicians and not recognized in the statement of revenues and expenses. Agency funds are reported as unrestricted assets. [Amended September 1997]

#### **.12 General Obligation Bonds Issued for Current Use by City Owned Hospital**

*Inquiry*—A hospital is a city municipal enterprise. The city council issued general obligation bonds to provide funds for the hospital's operations, without restriction. The hospital's assets will not be used to pay principal or interest on the bonds. Should the general obligation bond liability be reported in the hospital's financial statements?

*Reply*—No. The AICPA Audit and Accounting Guide *Health Care Organizations*, paragraph 7.15, states that if a health care organization has no obligation to make payments of principal and interest on the debt, the organization should not reflect the liability on its balance sheet. The proceeds from the bond issue are contributions from the city. Therefore, the hospital should not report the bonds as a liability in its financial statements. [Amended September 1997]

#### **.16 Disclosure Required in Consolidated or Combined Financial Statements**

*Inquiry*—What disclosures are required when consolidated or combined financial statements are issued?

*Reply*—The entities being consolidated or combined should be appropriately identified and the basis for combining or consolidating the entities, including the nature of the interrelationship of the entities, should be disclosed in the notes to the financial statements. Governmental entities are required to follow the accounting and disclosure provisions of GASB Statement No. 14, *The Financial Reporting Entity* (GAFRS section 2100). [Amended June 1995]

**.17 Elimination of Profit on Intercompany Sales**

*Inquiry*—ARB No. 51, *Consolidated Financial Statements*, paragraph 6 (AC C51.109), addresses the elimination of intercompany profit or loss on assets remaining within a combined or consolidated group. FASB Statement No. 71, *Accounting for the Effects of Certain Types of Regulation*, paragraph 16 (AC Re6.126), indicates the following with regard to intercompany profit:

Profit on sales to regulated affiliates shall not be eliminated in general purpose financial statements, if both of the following criteria are met:

- a. The sales price is reasonable.
- b. It is probable that, through the rate-making process, future revenue approximately equal to the sales price will result from the regulated affiliate's use of the products.

Since health care providers are, in certain cases, reimbursed for operating costs, it is possible that, assuming they meet certain related party tests under third-party regulations, an entity could receive reimbursement on intercompany sales that include a profit. Thus, one could argue that under that circumstance, it would not be appropriate to eliminate profit on intercompany sales using the criteria set forth in FASB Statement No. 71 (AC Re6).

*Reply*—In some instances health care organizations may encounter situations where they fall under FASB Statement No. 71, paragraph 5 (AC Re6.115). Generally, however, as explained in FASB Statement No. 71, paragraph 62 (AC Re6.115, footnote 6), the normal Medicare and Medicaid arrangements are excluded from the scope of FASB Statement No. 71 (AC Re6) on the basis that the "regulator" is also a party to the contract. Accordingly, gains or losses on sale of assets within the group should be eliminated in combined or consolidated financial statements. However, these gains or losses would be recognized and disclosed as appropriate in the separate financial statements of the members of the group.

**.19 Offsetting of Limited Use Assets**

*Inquiry*—Can limited-use assets of one entity be offset against the related liability of another entity in combined or consolidated financial statements?

*Reply*—Unless a right of setoff exists as defined in FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10), assets, in general, should not be offset against related liabilities in any financial statement presentation. [Amended]

**.20 Format of Combined or Consolidated Financial Statements**

*Inquiry*—When presenting combined or consolidated financial statements of various health care entities, is there a prescribed or recommended presentation format?

*Reply*—No. The sample financial statements contained in the AICPA Audit and Accounting Guide *Health Care Organizations*, do not prescribe the format of statements. In addition, no single format for combined or consolidated financial statements has been considered appropriate in all circumstances.

**.25 Accounting for Transfer of Assets From Not-for-Profit to For-Profit Entities**

*Inquiry*—How should subsequent transfers of assets, evidenced as additional investment, from not-for-profit entities to for-profit entities be accounted for by the transferee and transferor?

*Reply*—Additional investments in for-profit entities (subsequent to the original transfer of assets) should be reflected by the transferee as an increase in capital stock and/or paid-in capital. The transferor would record a corresponding increase in its investment account in the for-profit entity, if a financial interest was received (e.g., additional capital stock).

## **.26 Transfer of Assets From Subsidiary For-Profit Entity to Not-for-Profit Stockholder Parent**

*Inquiry*—How should transfers of assets from a “subsidiary” for-profit entity (F) to a not-for-profit entity (N) that is a minority stockholder of F be recorded?

*Reply*—This transaction would generally be recorded as a dividend, which would be reported as a reduction in F’s retained earnings. Any dividend in excess of retained earnings is a “liquidating” dividend; as such, it would be reported as a reduction in F’s paid-in capital account. If N accounts for its investment in F using the equity method, then the not-for-profit entity would report all dividends received as a reduction of its investment account, in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (AC 182). If N’s investment in F is accounted for using the cost method, because the conditions for applying the equity method are not met, the dividends would be reported as income.

## **.28 Valuation of Assets Transferred Between Related Entities Under Common Control**

*Inquiry*—At what value should the transfers of assets between related entities under common control be recorded by the transferee?

*Reply*—Assets transferred from one related entity under common control to another generally would not be recorded by the transferee at the fair value at the date of transfer, but rather at the carrying value of the transferring entity. This treatment is consistent with the guidance prescribed by Interpretation No. 39 of APB Opinion No. 16, *Transfers and Exchanges Between Enterprises Under Common Control* (AC B50.645–.648).

## **.29 Timing of Recording Transfers Between Related Entities**

*Inquiry*—When should a transfer of assets between related entities be recorded—only when the transfer is actually made, or at some earlier point?

*Reply*—In most situations, transfers should be recorded at the time they are formally obligated to occur (formal board resolutions, legal notes, passage of title to real estate, etc.). This would be the case when each of the entities have independent governance, and the timing of the transfer is controlled by the governing board of the transferor. Yet, in situations where there is clear, common control of the related entities, it would be appropriate to record transfers at the time when both (a) the transfer amount is known and (b) the receiving entity is given control over the timing of the transfer.

## **.30 Accounting for Transactions Involving Medicaid Voluntary Contribution or Taxation Programs**

*Inquiry*—The Medicaid program is set up on a state-by-state basis to provide medical assistance to the indigent. Although state-administered, the program is actually a joint federal and state program for which the federal government picks up a portion of the cost. Under this arrangement, the federal government “matches” a percentage of the total amount paid by the state to health care providers. This matching is referred to as federal financial participation.

States have attempted to increase the amount of federal matching funds for which they are eligible by increasing the amount of medical assistance they provide. In order to pay for the increased medical assistance, some states have imposed a tax on health care organizations and/or sought donations or other voluntary payments from them. As a result, the states have been able to generate additional federal matching funds without expending additional state funds. How should a health care organization account for these taxes or donations made to the state?

*Reply*—Congress has passed legislation prohibiting the use of health care organization taxes or donations except in limited situations.

The accounting for these types of programs is dependent on the individual facts and circumstances. For example, if there is a guarantee that specific monies given to the state by the health care organization will be 'returned' to the organization from the state, those amounts should be recorded as receivables. In addition, if the health care organization has met all requirements to be legally entitled to additional funds from the state, the revenue/gain should be recognized.

However, if the monies go into a pool with other contributions which are then disbursed based on factors over which the health care organization has little or no control, the payments should be recognized as an expense. Any subsequent reimbursements would be recognized as revenue/gain when the provider is entitled to them and payment is assured.

Care should be taken to avoid delayed recognition of expenses or to improperly recognize contingent gains. Because of complexities involved, it may be necessary to consult with legal counsel.

### .32 Use of Pooling-of-Interests Method

*Inquiry*—How, if at all, should APB Opinion No. 16, *Business Combinations* (AC B50), be applied to business combinations involving not-for-profit health care organizations?

*Reply*—APB Opinion No. 16 (AC B50) explicitly addresses only business combinations that involve transfers of ownership interests. However, the AICPA Audit and Accounting Guide *Health Care Organizations* (the Guide), paragraph 1.33, states that "circumstances exist under which reporting on the combination of two or more not-for-profit organizations . . . by the pooling of interests method better reflects the substance of the transaction than reporting by the purchase method. Therefore, not-for-profit organizations are, under certain circumstances, permitted to report by the pooling-of-interest method, even though they generally do not issue common stock. Such circumstances include the combination of two or more entities to form a new entity without the exchange of consideration."

Paragraph 11.28 of the Guide also states that APB Opinion No. 16 (AC B50) "may provide a useful framework" when evaluating similar transactions entered into by not-for-profit health care business organizations that are similar to a pooling of interests, such as a transaction involving change in control but no exchange of consideration (for example, a change in sole corporate member).

However, because not-for-profit health care entities do not issue common stock and there is no private ownership, they are subject to different laws and practice regarding control and governance. Therefore, the provisions of APB Opinion No. 16 (AC B50) cannot be applied literally. If the transaction is deemed similar to a pooling of interests, no step-up in basis is required. Accord-

ing to paragraph 1.34 of the Guide, an example of acceptable practice in such circumstances is to report the assets, liabilities, and net asset balances of the combined entities as of the beginning of the year and disclose the information that would be required to be disclosed for a pooling of interests under APB Opinion No. 16 (AC B50).

---

**Note:** The FASB is working on a project regarding *Business Combinations*. The results of this project could significantly affect the use of the pooling-of-interests method. The timing of this project has not yet been established.

---

### **.33 Accounting for a Joint Operating Agreement**

**Inquiry**—Two not-for-profit health care systems enter into a Joint Operating Agreement whereby both (the Venturers) agree to jointly operate and control certain of their hospitals while sharing in the operating results and residual interest upon dissolution based upon an agreed-upon ratio. Neither of the Venturers receives cash or other monetary assets as part of entering into the Agreement. How should the Venturers account for the Agreement?

**Reply**—Joint Operating Agreements are similar to joint ventures and typically are characterized by factors such as:

- Common purpose (e.g., to share risks and rewards; to develop a new market, health service or program; to pool resources)
- Joint funding: all parties contribute resources toward its accomplishment
- Defined relationship: typically governed by an agreement
- Joint control: control is not derived from holding a majority of the voting interest

Even though the Agreement does not provide for a separate legal entity (such as a corporation or partnership), the same principles apply. For example, since there is joint control (i.e., neither party controls the venture), consolidation would not be appropriate. Instead, such agreements should be accounted for similar to a corporate joint venture using the equity method of accounting (see AICPA Interpretation No. 2 of APB Opinion No. 18, *Investments in Partnerships and Ventures* [AC I82.512], or APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* [AC I82]). Since the transaction did not reflect the culmination of the earnings process, the Venturers' basis in the investment would be recorded at net book value.

---

[The next page is 5841.]

## Section 6500

### ***Extractive Industries***

#### **.03 Disclosure of Contingent Liability for Royalties**

*Inquiry*—A company is forming a new subsidiary company which is purchasing the assets of an existing coal mining partnership. The total consideration is \$2,000,000, which is to be paid in the following manner:

- (1) \$750,000 in cash at the time of closing, which is considered as payment for coal land owned in fee, mining equipment, supplies, and other real estate, all of which have a fair market value of at least \$750,000.
- (2) \$1,250,000 to be paid as an overriding royalty of 10¢ per ton for all coal mined by the purchaser on the properties both owned and leased, acquired from the sellers or on any subsequently acquired properties.

Should the \$1,250,000 be recorded as a liability on the statement of financial position? If the \$1,250,000 is recorded as a liability and reduced monthly at the time that the 10¢ per ton overriding royalty is paid, how should the asset account be amortized?

*Reply*—It would be improper to reflect the total amount of the stipulated overriding royalty as a liability in the financial statements with a correlative charge being made to an asset account. The only possible rationale for setting these amounts up immediately, is to base such treatment on the contentions that (a) from a going concern standpoint, it is likely the total amount in question will eventually be paid; and (b) the transaction is viewed as involving a “premium” or “purchase price” undertaken to be paid for the acquisition of a leasehold. This rationale is erroneous since no immediate payment for the leasehold rights is made.

The \$1,250,000 is a contingent liability—a commitment entirely conditioned on the actual mining of coal. Accordingly, royalties should be accrued as a liability only when, and to the extent that, tonnage (to which the royalty applies) is actually mined. In the purchase agreement, there is a liability on the overriding royalty if no coal is mined.

The rule of informative disclosure requires that the essential facts concerning the property acquisitions be indicated in a footnote to the statements, including an adequate explanation as to the nature and amount of the company’s contingent liability.

Although there are instances where royalty payments are reflected as administrative or selling expense, in this case the royalties are paid for the right to mine the coal. The royalty cost may be viewed as a direct burden on production cost and should be accumulated as part of the cost of coal mined. The royalty cost then would be matched with revenues at the point of sale, as part of the cost of coal sold.

---

[The next page is 5941.]

## Section 6600

### *Real Estate*

#### **.01 Method of Recognizing Revenue from Commissions by Real Estate Brokerage Firm**

*Inquiry*—A client is a real estate broker and also manages real estate. The client is the exclusive broker for all its affiliates and acts as broker for outside parties as well. All of the affiliates invest in raw land for appreciation and occasionally improve and subdivide parcels. None of the properties are extensive enough to be considered “retail land sales companies.” Sales are probably half for second home sites and half for larger parcels bought for investment. Sales are usually for cash with an occasional mortgage taken by the seller. The client usually receives a gross brokerage commission of 10%-15% which is shared with its salesmen and co-brokers, retaining an average of 5%. Commissions are received at closing and co-brokers are paid shortly after the closing. Salesmen draw against firm purchase and sale agreements and are credited with the commission on closing. If a buyer fails to complete a purchase, his deposit is usually retained by the client in lieu of the brokerage commission, which legal counsel indicates is permitted under law.

The client records brokerage commission income when a firm purchase and sale agreement is accepted. This is an agreement which specifies price and all terms of sale, has no unusual or difficult conditions, and is secured by a deposit of 10% or more of the purchase price. This method was adopted by the client to more closely match revenues and expenses. Indirect selling expenses, including advertising, are treated as period costs. The costs of co-brokerage and salesmen’s commissions are also accrued at that time. The client’s contention is that the earnings process has been substantially completed, and the wait until closing (usually 30-90 days but occasionally longer) is a legal formality rather than an integral part of the broker’s work. Very few sales are not closed, and the price and terms of sale rarely change. From an audit point of view, many of the open sales at year-end have closed by completion of the audit field work. The client’s financial statements do disclose the method of accounting employed for brokerage commissions.

Is this present method of accounting for brokerage commissions considered acceptable?

*Reply*—Revenue recognition is discussed in FASB Concepts Statement No. 5, *Recognition and Measurement of Business Enterprises*, paragraphs 83 and 84. Paragraph 83 states in part:

“Revenues are not recognized until earned. An entity’s revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues.”

Therefore, the client’s method of accounting for commission income at the time when a firm purchase and sale agreement is entered into would be acceptable. However, because of state laws governing real estate operations, recognition of

commission income might have to be postponed, depending on the particular legal requirements of a given state, until such time as the broker is legally entitled to receive that commission.

### **.03 Accounting for Sale of Property With Option to Repurchase**

*Inquiry*—A corporation sold a parcel of land to a bank. The corporation has an option to repurchase the land for a period of three years. The corporation received the full purchase price at the time of sale.

What is the proper accounting treatment for this transaction?

*Reply*—The conclusion in FASB Statement No. 66, *Accounting for Sales of Real Estate*, paragraph 26, is that a transaction whereby a seller has an obligation or an option to repurchase the property must be accounted for as a financing, leasing, or profit sharing arrangement. A right of first refusal based on a bona fide offer by a third party is ordinarily not an obligation or an option to repurchase.

### **.04 Method of Recognizing Profit on Sale of Undeveloped Land With a Release Provision**

*Inquiry*—One hundred acres of undeveloped land was sold for \$10,000 per acre for a total consideration of \$1,000,000. The buyer made a cash down payment of \$250,000, and the balance of \$750,000 is payable in three annual installments of \$250,000. The agreement has a release provision that title to the acreage will be released to the buyer on a basis of 115% of the sales price. Therefore, of the \$250,000 down payment, \$217,000 would be applicable to the release of 21.7 acres, and the balance of \$33,000 would be applicable to the remaining acreage. At this point, there would be a balance due on the sales agreement of \$750,000 against which \$33,000 would apply. The buyer would have this privilege every year, and the only security would be the land underlying the agreement.

What is the proper accounting treatment?

*Reply*—FASB Statement No. 66, *Accounting for Sales of Real Estate*, paragraph 15 (AC Re1.115), states:

If the amounts applied to unreleased portions do not meet the initial-and continuing-investment criteria as applied to the sales value of those unreleased portions, profit shall be recognized on each released portion when it meets the criteria in paragraph 5 as if each release were a separate sale.

Paragraph 5 (AC Re1.105) states, in part:

Profit on real estate sales transactions shall not be recognized by the full accrual method until all of the following criteria are met:

- a. A sale is consummated.
- b. The buyer's initial and continuing investments are adequate to demonstrate a commitment to pay for the property.
- c. The seller's receivable is not subject to future subordination.
- d. The seller has transferred to the buyer the usual risks and rewards of ownership in a transaction that is in substance a sale and does not have a substantial continuing involvement with property.

Presumably, the tests referred to would have to be met continuously; that is, at the time of closing and at each release date.

The relationship of the \$33,000 to the \$750,000 is not sufficient “to constitute an adequate initial and continuing investment” related to the unreleased property. Therefore, “profit should be recognized as if each release were a separate sale” as stated in paragraph 15 (AC Re1.115). [Amended]

#### **.07 Accounting for Nonmonetary Exchange of Land**

*Inquiry*—A real estate company is engaged in developing residential communities, but they occasionally sell undeveloped parcels of land. The company has entered into an agreement whereby it will exchange land zoned for industrial use having a cost basis of \$10,000 for residential land having a fair value of \$50,000.

Is it proper to record the land received at \$50,000 and recognize a gain of \$40,000?

*Reply*—APB Opinion No. 29, paragraph 21(a) (AC N35.108a), indicates that “an exchange of a product or property held for sale in the ordinary course of business for a product or property to be sold in the same line of business to facilitate sales to customers . . .” does not culminate an earnings process. This exchange represents only a shift in real estate held as inventory. Therefore, the exchange should be reported on the basis of the recorded amount of the nonmonetary asset given up, \$10,000.

---

[The next page is 6151.]

## Section 6700

### Construction Contractors

#### .01 Distinction Between Long-Term and Short-Term Construction Contracts

*Inquiry*—A construction company considers all contracts that are less than one year in duration as short-term contracts and accounts for them on a completed contract method. Long-term contracts are accounted for on the completed-contract method or the percentage of completion method depending on other factors.

Does the distinction made by the company conform with generally accepted accounting principles?

*Reply*—SOP No. 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, paragraph 31 (ACC 10,330.31), and the AICPA Audit and Accounting Guide *Construction Contractors*, page 123, state that the completed-contract method may be used as the basic accounting method only if the financial position and results of operations reported on that basis would not vary from those resulting from the use of the percentage-of-completion method, “for example, in circumstances in which an entity has primarily short-term contracts.” SOP No. 81-1, paragraph 31 (ACC 10,330.31), also states that an entity using the completed-contract method as its basic accounting method should depart from that policy for a single contract or a group of contracts not having the features described in the paragraph. Thus, it appears that the distinction made by the company conforms to generally accepted accounting principles. [Amended]

#### .10 Payments for Landfill Rights

*Inquiry*—A construction contractor pays for rights allowing the contractor to extract a specified volume of landfill from a third party's property for a period of three years. How should the payment for landfill rights be classified in the contractor's balance sheet?

*Reply*—Until the landfill is extracted, the contractor should classify the payment for landfill rights as a deferred charge. The portion of the landfill payment related to the volume of landfill extracted should be reclassified as project costs. A deferred charge remaining at the termination of the agreement should be written off as an expense.

---

[The next page is 6351.]

## Section 6910

### *Investment Companies*

#### **.03 Basis for Valuation of Investments in Rental Property**

*Inquiry*—An investment company has substantial investments in assets other than securities, particularly rental real estate. The AICPA Audit and Accounting Guide *Audits of Investment Companies*, discusses only the valuation of investments in securities. In the regulations to the Investment Company Act of 1940, however, Rule 2a-4, paragraph (a)(1) states, "Portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and other securities and assets shall be valued at fair value as determined in good faith by the board of directors of the registered company." How should the investment in rental property be reported?

*Reply*—The AICPA Audit and Accounting Guide *Audits of Investment Companies*, paragraph 1.30, states that values and changes in values are as important to investors as the investment income earned. That is because interests in investment companies are traditionally bought and sold at current net asset values. Therefore, as stated in paragraph 1.30, investment companies report their securities at value, defined as the quoted market price for securities for which market quotations are readily available, or as an estimate of fair value as determined in good faith by the board of directors for other securities. SEC *Codification of Financial Reporting Policies*, Sec. 404.03.b.iv., offers guidance on valuing securities in good faith.

Accordingly, the rental property in this client's portfolio should be accounted for at fair value.

Paragraph 9.08 of the guide contains an example of an independent auditor's report used for expressing an opinion on financial statements in which securities' values have been estimated by the board of directors in the absence of readily ascertainable market values. [Amended June 1995.]

---

[The next page is 6471.]

## Section 6930

### **Employee Health and Welfare Benefit Funds**

#### **.01 Computation of Liability for Accumulated Eligibility Credits**

*Inquiry*—A self-insured fund charges its members premiums of \$50 per month per individual to participate in the plan. Accumulated eligibility credits for future benefits are as follows: 400 members, 3 months; 500 members, 6 months; 800 members, 9 months; and 0 members, 12 months. Would the following computation of liability for accumulated eligibility credits be acceptable?

400 members × 3 months × \$50 .....	\$ 60,000
500 members × 6 months × \$50 .....	150,000
800 members × 9 months × \$50 .....	360,000
Liability for accumulated eligibility credits .....	<u>\$570,000</u>

*Reply*—No; the above computation is incomplete. Statement of Position No. 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans*, paragraph 43 (ACC 10,530.48), states that the obligation for accumulated eligibility credits should consider assumptions for mortality and expected employee turnover or other appropriate adjustments, to reflect the obligation at the amount expected to be paid. [Amended June 1995]

#### **.02 Disclosure of Maintenance of Benefits Provision**

*Inquiry*—A self-insured fund is covered by an agreement under which the employers are subject to a maintenance of benefits provision. The employers are required to maintain a cash reserve of approximately one month's cost of operations. The employers are required to maintain such a reserve for existing unreported claims for any member eligible through the financial statement date under any circumstances, whether there be a strike, industry-wide layoff, or fund termination.

The AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, indicates in paragraphs 4.101 and 4.104 that claims incurred, but not reported, and future payment of benefits based on participant's accumulated eligibility arising from hours accumulated should be presented as liabilities in the financial statements of the plan. How should the maintenance of benefits provision be shown?

*Reply*—For multiemployer plans that have not yet adopted Statement of Position No. 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans* (ACC 10,530), potential benefit claims should be reflected as "estimated health claims incurred but not reported" and "estimated future benefits based on participant's accumulated eligibility" on the statement of net assets available for benefits. The cash account should be segregated to disclose the portion related to this obligation. There should also be adequate disclosure of the maintenance of benefits provision of the agreement.

For plans that have adopted Statement of Position No. 92-6 (ACC 10,530), potential benefit claims (incurred but not reported [IBNR] and accumulated

eligibility credits) should be reflected as benefit obligations on the face of one or more financial statements. They should not be shown as liabilities on the statement of net assets available for benefits. [Amended June 1995]

### .03 Financial Statement Presentation of Underwriting Deficits

*Inquiry*—The administrator of an employee health and welfare benefit plan has questioned an item on the plan's statement of net assets available for benefits. The item appears in the liabilities section as follows:

Reserve for underwriting deficit—(Note 3) \$10,000

Note 3 reads as follows:

Reserve for underwriting deficit represents a liability with the XYZ Life Insurance Company for claims paid in excess of premiums during the current policy year. This liability will be applied to reduce any refunds which may accrue in the future. Such a refund was received during the current year.

The related debit to the credit setting up the liability was to "Underwriting Deficit," and is included in health claims deductions in the "Statement of Changes in Net Assets Available for Benefits."

The administrator takes the position that this item should be excluded entirely from the financial statements because:

1. The policy provides that any underwriting deficit in one policy year is not immediately recoverable by the insurance company but only recoverable against underwriting "gains" of succeeding years, if any.
2. Upon cancellation of the policy by the underwriter, the fund is relieved of any liability for any unrecovered underwriting deficit existing on date of cancellation.
3. Although there were usually underwriting "gains" in past years, there is no assurance that future underwriting "gains" will occur to permit recovery of the deficit.

Should the underwriting loss be reflected in the financial statements in the year in which it occurs?

*Reply*—Yes, if certain criteria are met. For multiemployer plans that have not yet adopted Statement of Position No. 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans* (ACC 10,530), the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraphs 4.99 and 4.100, discusses accrued experience rating adjustments. The Audit and Accounting Guide, paragraph 4.100, states:

Experience ratings, determined by the insurance company or by estimates, may also result in a premium deficit. Premium deficits should be recorded as a liability of the plan (or a reduction of a deposit, if applicable) if (a) it is probable that the deficit will be applied against the amounts of future premiums or experience-rating refunds and (b) the amount can be reasonably estimated. If no accrual is made for premium deficit because one or both of the conditions are not met, or if an exposure to loss exists in excess of the amount accrued, disclosure of the premium deficit should be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred.

A footnote states that considerations in determining whether it is probable that a premium deficit will be applied against future premiums or refunds include (a) the extent to which the contract with the insurance company requires payment of such deficits and (b) whether the plan intends to transfer coverage to another insurance company.

The way in which the so-called “underwriting deficits” offset against underwriting “gains” indicates that the “underwriting deficits” are comparable to the situation discussed in the audit and accounting guide. Therefore, if it is probable that there will be future “underwriting gains” under the contract, the “underwriting deficits” should be reported as a liability with accompanying footnote disclosure.

For plans that have adopted Statement of Position No. 92-6, paragraph 42 (ACC 10,530.47), states that premium deficits that meet the above criteria should be included in the plan’s benefit obligations. They should not be shown as liabilities on the plan’s statement of net assets available for benefits. [Amended June 1995.]

#### **.04 Definition of “Current” for Discount Rate Calculation**

*Inquiry*—FASB Statement No. 87, *Employers’ Accounting for Pensions*, paragraph 44 (AC P16.138), states, “Assumed discount rates shall reflect the rates at which pension benefits could be effectively settled. It is appropriate in estimating those rates to look to available information about rates implicit in current prices of annuity contracts that could be used to effect settlement of the obligation . . . .” What date should be used for measurement of a current price?

*Reply*—The “current price” of an annuity may be determined as of the date upon which the measurement of the plan assets and obligations is based. That date is generally determined in accordance with FASB Statement No. 87, paragraph 52 (AC P16.148), which states “measurements of plan assets and obligations . . . shall be as of the date of the financial statements or, if used consistently from year to year, as of a date not more than three months prior to that [financial statement] date.”

---

[The next page is 6521.]

Section 6935

Profit Sharing and Pension Plans

.02 Depreciation of a Real Estate Investment Owned by a Defined Benefit Pension Plan

*Inquiry*—A defined benefit pension plan has invested in real estate which owns and receives rents from various stores in a shopping center. The financial statements include an expense for depreciation based on original cost. FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, paragraph 11 (AC Pe5.110), requires that plan investments in real estate be presented at their fair value at the reporting date. Consequently, by providing for depreciation expense, the unrealized appreciation on this asset is increased.

Should depreciation expense be reflected for this plan investment?

*Reply*—No. Depreciation expense is normally an adjustment of the valuation of fixed assets reported at cost, in accordance with FASB Statement No. 35, paragraph 14 (AC Pe5.113), which requires plan assets used in plan operations to be presented at cost less accumulated depreciation or amortization. Accordingly, since plan investments in real estate are to be reported at fair value, there is no requirement to provide for depreciation expense.

.03 Computation of Net Appreciation/Depreciation in Fair Value of Investments

*Inquiry*—FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, paragraph 15 (AC Pe5.114), requires the statement of changes in net assets available for benefits to include separate disclosure of the net appreciation (depreciation) in fair value for each significant class of investments. The AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraphs 3.25(a) and 4.38 or 4.105(a), requires the same disclosure for defined contribution plans and employee health and welfare benefit plans. How can this amount be computed?

*Reply*—FASB Statement No. 35, paragraph 15, footnote 7 (AC Pe5.114, footnote 10), states that the net appreciation (depreciation) in the fair value of investments should include both realized and unrealized gains (losses). This amount may be computed by aggregating the realized and unrealized gains and losses for each individual security. However, this would be quite time-consuming if the plan has a large portfolio of investments. As an alternative, the following formula may be used to compute the net appreciation (depreciation) in the fair value of investment:

Market value at 12/31/X1 .....	\$XXX
Less: Total proceeds of assets sold in 19X2 .....	< XX>
Add: Total cost of assets purchased in 19X2 .....	XX
Less: Market value at 12/31/X2 .....	<XXX>
Net appreciation/depreciation in fair value of investments .....	<u><u>\$XXX</u></u>

**.04 Benefits Payable to Terminated Participants of a Defined Contribution Plan**

*Inquiry*—Should benefits payable to terminated participants of a defined contribution [such as profit sharing or 401(k)] plan be classified as a liability in the plan financial statements?

*Reply*—No. Classifying benefits payable to participants as a liability is inappropriate because, by definition, net assets available for benefits (the difference between plan assets and liabilities) represents benefits owed to all participants—both active and terminated. Therefore, only amounts owed to nonparticipants (that is, third parties) should be classified as liabilities.

However, benefits payable to terminated participants should be disclosed in accordance with paragraph 3.28 of the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, which states:

The financial statements should also disclose, if applicable—

- m.* Amounts allocated to accounts of persons who have elected to withdraw from the plan but have not yet been paid. These amounts should not be reported as a liability on the statement of net assets available for benefits, in financial statements prepared in conformity with generally accepted accounting principles. A footnote to reconcile the audited financial statements to the Form 5500 may be necessary to comply with ERISA . . . .

[Amended June 1995]

---

[The next page is 6551.]

## Section 6940

### Franchisors

#### .01 Method of Accounting for Sale of Territorial Franchise Right

*Inquiry*—A client sells territorial franchise rights to region managers for \$30,000 with ten percent taken in cash and the remainder as a note. The region manager in turn sells franchises in his territory. The note is payable at the rate of \$1,000 per franchise sold in the territory but is due in three years regardless of the number of franchises sold.

The collectibility of the notes depends on the performance of the region managers. The company has been able to resell territories of managers who have been unsuccessful, and the down payments have been refunded in these instances.

What is the proper method of accounting for these franchise fees and the related costs of selling the territories?

*Reply*—In discussing initial franchise fees for area franchises, FASB Statement No. 45, *Accounting for Franchise Fee Revenue*, paragraph 8 (AC Fr3.104), states: "... revenue ordinarily shall be recognized when all material services or conditions relating to the sale(s) have been substantially performed or satisfied by the franchisor." In FASB Statement No. 45, paragraph 5 (AC Fr3.101), the Board defines substantial performance as follows:

... Substantial performance for the franchisor means that (a) the franchisor has no remaining obligation or intent—by agreement, trade practice, or law—to refund any cash received or forgive any unpaid notes or receivables; (b) substantially all of the initial services of the franchisor required by the franchise agreement have been performed; and (c) no other material conditions or obligations related to the determination of substantial performance exists ...

Therefore, the sale of the regions is not a completed transaction which would allow the recognition of income when the sale is made (i.e., when the down payment and notes are received) since the company's practice of refunding down payments to region managers and, in effect, excusing nonpayment of their notes would violate item (a) above.

Since payment of the notes is on the basis of specific performance (i.e., at the rate of \$1,000 per franchise sold in the region), as a practical matter, a reasonable basis for recognizing deferred revenue would be over the estimated number of franchises to be opened in a region.

With regard to the costs of selling the territories, FASB Statement No. 45, paragraph 17 (AC Fr3.113), states:

Direct (incremental) costs relating to franchise sales for which revenue has not been recognized ordinarily shall be deferred until the related revenue is recognized; however, the deferred costs shall not exceed anticipated revenue less estimated additional related costs. Indirect costs of a regular and recurring nature that are incurred irrespective of the level of sales, such as general, selling, and administrative costs, shall be expensed as incurred. Costs yet to be incurred shall be accrued and charged against income no later than the period in which the related revenue is recognized ...

Therefore, deferral and amortization of costs "incurred to produce the region sales" could be accounted for in a manner similar to the deferral and recognition of revenue discussed in the preceding paragraph. The operating expenses of the company should be charged off as a period cost. [Amended]

## **.02 Revenue Recognition for Franchisors**

*Inquiry*—A franchise agreement is entered into whereby the franchisor agrees to provide to a franchisee the technical information necessary to manufacture a product. In addition, the franchisor agrees to provide consultation needed to produce the product for the next five years. The agreement states that 80 percent of the franchise fee is to be paid in the first year of the agreement, and five percent is to be paid in each of the next four years. How should the franchisor recognize the revenue from this agreement?

*Reply*—This issue is addressed in FASB Statement No. 45, *Accounting for Franchise Fee Revenue* (AC Fr3). Paragraph 7 (AC Fr3.103), states that "if it is probable that the continuing fee will not cover the cost of the continuing services to be provided by the franchisor and a reasonable profit on those continuing services, then a portion of the initial franchise fee shall be deferred and amortized over the life of the franchise. The portion deferred shall be an amount sufficient to cover the estimated cost in excess of continuing franchise fees and provide a reasonable profit on the continuing services." This Statement defines continuing franchise fee as "consideration for the continuing rights granted by the franchise agreement and for general or specific services during its life."

In the above situation, it is unlikely the five percent of revenues the franchisor will receive in years two through five is sufficient to cover the costs, and a reasonable profit, on the raw materials and services provided. Therefore, the franchisor should defer a portion of the first year's franchise fee and amortize it over the next four years at a rate that will cover costs and provide a reasonable profit.

---

[The next page is 6601.]

## Section 6950

### ***State and Local Governmental Units***

#### **.18 Accounting for the Issuance of Zero-Coupon Bonds and Other Deep Discount Debt by a Governmental Entity**

*Inquiry*—A governmental entity issues zero-coupon bonds due in 10 years. Even though bond interest and principal is not due until the end of the bond's term, a sinking fund was established. When should interest expense be recognized and principal payments be deducted from the debt?

*Reply*—The treatment by governmental entities of the bond discount related to deep-discount debt has not been specifically addressed in authoritative literature. As discussed in *Governmental Accounting, Auditing and Financial Reporting*, by the Government Finance Officers Association, the accrual of principal and interest payments for zero-coupon bonds and other deep-discount debt is not recommended because the requirement that payments be due "early in the next year" is not met. The face amount of the debt less the discount presented as a direct deduction should be presented in the general long-term debt account group. The net value of the bonds should be accreted (the discount reduced) over the life of the bonds in the long-term debt account group. This presentation shows what amount would be payable if the debt were required to be paid today. The interest method provides an acceptable means of amortizing the discount. However, the straight line amortization method may also be used if its application would not produce amounts that differ materially from those that would be achieved if the interest method were applied.

#### **.21 Auditor's Reports on Local Governments**

*Inquiry*—A state law referring to the audit of local governments requires every auditor's report to state that the audit was conducted in accordance with generally accepted auditing standards and with the auditing standards prescribed by the state auditor. The law also requires the auditor's report to conform with the standard report form and to contain a reference to a report of comments and recommendations.

May a CPA include such wording in the opinion if he or she has followed the standards prescribed by the state auditor and he or she has included a report of comments and recommendations?

*Reply*—A CPA may state in the report that the audit has been conducted in accordance with generally accepted auditing standards and with the standards prescribed by the state treasurer if the audit was in fact conducted in conformity with these standards.

Also a CPA may include in the auditor's report a reference to a report of comments and recommendations if such a report has in fact been issued. [Amended June 1995.]

#### **.22 State Accounting Guide Differs From GAAP**

*Inquiry*—Are reports on financial statements conforming to the State accounting guide requirements considered special reports under SAS No. 62, *Special Reports* (AU 623)?

*Reply*—Yes. Reports on financial statements conforming to the State accounting guide requirements are considered special reports. SAS No. 62, paragraph 4 (AU 623.04), states that a basis of accounting that an entity uses to comply with the requirements or financial reporting provisions of a government regulatory agency to whose jurisdiction it is subject is a comprehensive basis of accounting other than generally accepted accounting principles. SAS No. 62, paragraph 8 (AU 623.08), illustrates a special report for financial statements filed solely with the regulatory agency. [Amended June 1995.]

---

[The next page is 6701.]

## Section 6960

### ***Colleges and Universities***

#### **.12 Allocation of Overhead**

*Inquiry*—A private college has many individual restricted programs funded from federal, state and private contributions. One of the programs was charged a \$97,000 overhead expense amount, with the credit going to revenue in another program. Is it appropriate under generally accepted accounting principles to record revenue based on the overhead allocation?

*Reply*—No, it is inappropriate. The allocation of overhead is an interprogram transaction that should not be reported as revenue of the program providing the services but rather as a reduction of expense of such program. For additional information related to this topic, see the AICPA's Audit and Accounting Guide *Not-for-Profit Organizations*, paragraph 16.03. [Amended June 1995]

---

[The next page is 6851.]

## Section 6980

### ***Brokers and Dealers***

#### **.01 Auditor's Report on Internal Control for Broker-Dealers**

*Inquiry*—Some state regulatory agencies are requesting that their name be included in the restrictive paragraph of the auditor's report on internal accounting control for broker-dealers. Because most broker-dealers must comply with Securities and Exchange Commission (SEC) regulations, the report on internal accounting control from their auditors includes a report on the additional requirements of Rule 17a-5(g) as well as a report on their study and evaluation as part of an audit. The restriction paragraph of the report illustrated in the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities*, appendix D, therefore includes the SEC as a designated recipient of the report and reads as follows:

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*designated self-regulatory organization*], and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and should not be used for any other purpose.

One state agency suggested revising the paragraph to reflect other agencies as recipients as follows:

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*designated self-regulatory organization*], and other regulatory agencies and should not be used for any other purpose.

Is this proposed revised wording appropriate in view of the fact that not all regulatory agencies use the SEC's Rule 17a-5(g) criteria or other established criteria for the evaluation of the adequacy of internal control procedures for their purposes?

*Reply*—No. The above suggested wording is not appropriate because the report would then be distributable to all other non-SEC regulatory agencies, and as stated, most agencies, including those of the 50 states, do not establish criteria in reasonable detail and in terms susceptible to objective application for the auditor's study, evaluation and report on the control procedures for the agencies' purposes. [Amended September 1997]

---

[The next page is 6901.]

## Section 6990

### ***Common Interest Realty Associations***

#### **.01 Personal Property of Timeshares**

*Inquiry*—Should a common interest realty association (CIRA) that is a timeshare development report as assets personal property that it owns and uses as internal unit furnishings for timeshare units.

*Reply*—Yes. The AICPA Audit and Accounting Guide *Common Interest Realty Associations*, paragraph 2.01, provides that common property includes personal property that is owned by the CIRA and used on common real property. Paragraph 2.11 of the Guide provides that “CIRAs should recognize common personal property, such as furnishings, recreational equipment, maintenance equipment, and work vehicles, that is used by the CIRA in operating, preserving, maintaining, repairing, and replacing common property and providing other services, as assets.” Personal property that is owned by a CIRA and used as internal unit furnishings for timeshare units is common personal property that is used by the CIRA in providing other services.

## Section 7200

### Partnerships

#### .01 Balance Sheet Presentation of Drawings in Excess of Capital Contributions

*Inquiry*—Two partners each contributed capital of \$100 to form a partnership for the construction of a shopping center. The partnership has obtained several loans to fund the construction, but no payments on these loans are due for two years. The partners each withdrew excess funds of \$50,000 from the partnership out of the proceeds of the loans.

How would the balance sheet show the \$200 of capital and \$100,000 of withdrawals?

*Reply*—Whether the \$50,000 payments to the partners are permissible depends on the terms of the construction loan commitment. If the partnership agreement is silent concerning these payments, and they are, in fact, not loans to the partners, the \$50,000 withdrawn by each partner represents drawings in anticipation of profits. As drawing accounts, they would normally be closed to the partners' capital accounts. In the situation presented, it would result in a "negative" capital account for each partner in the amount of \$49,900 in the partners' equity section of the balance sheet. Full disclosure of the circumstances causing the negative balance should also be included.

#### .02 Provision for Income Taxes on Partnership Income

*Inquiry*—A partnership agreement provides that in computing net profits, there will be a provision for income taxes, and the amount of the provision for income taxes will be considered an expense of the partnership. In the preparation of the income statement, would the net profit figure after income taxes be considered as having been determined according to generally accepted accounting principles?

*Reply*—Between themselves, partners may agree to compute net profits in any fashion they wish; but for financial presentation purposes, a provision for income taxes should not be set up. The absence of this item in the financial statement can be explained in the form of a footnote to the income statement. If the income statement shows a net profit figure after income taxes, the statement is not prepared in accordance with generally accepted accounting principles.

#### .07 Accounting for Syndication Costs of Limited Partnerships

*Inquiry*—How should the amounts paid to attorneys, accountants or engineers; commissions paid to selling agents; fees paid to regulatory bodies; and printing costs for a private offering of a limited partnership be accounted for? Should they be deferred and amortized similar to organization costs in a corporation?

*Reply*—No. Organization costs of a corporation are normally considered to be the initial legal and other fees paid to incorporate a business in a particular state and are normally an immaterial amount.

The expenses referred to in the inquiry are similar in nature to stock issue costs such as underwriting discounts, professional fees and other expenses clearly and directly attributable to receiving proceeds of the shares issued by a corporation. These costs would be a reduction of paid-in capital in an offering of stock. Accordingly, these costs should be a reduction of capital contributed by the partners in a limited partnership.

#### **.08 Income Allocation of Limited Partnership**

*Inquiry*—A real estate limited partnership allocates the depreciation deduction entirely to the limited partners in accordance with the provisions of the partnership agreement. This is done in order to induce investment in the venture by the limited partners. Would such an allocation in the financial statements conform with generally accepted accounting principles (GAAP)?

*Reply*—Yes. Allocation of partnership income is determined by the partnership agreement. Therefore, in computing the income allocable to the limited and general partners, the depreciation deduction may be allocated entirely to the limited partners, in financial statements prepared in conformity with GAAP.

---

[The next page is 7351.]

## Section 7400

### ***Related Parties***

#### **.06 Exchange of Interest Bearing Note for Non-Interest Bearing Note**

*Inquiry*—Corporation A has an interest bearing note receivable from an officer/shareholder. Corporation A plans to exchange the present note for a non-interest bearing note. Should the non-interest bearing note be discounted in accordance with APB Opinion No. 21?

*Reply*—Yes. The non-interest bearing note should be discounted in accordance with APB Opinion No. 21, and there should be recognition of compensation or a dividend distribution, depending on what the unstated right or privilege represents.

---

[The next page is 7401.]

## Section 7500

### ***Estates and Trusts***

#### **.01 Trust Funds for Perpetual Care of Cemetery**

*Inquiry*—In accordance with state laws, a cemetery conducting business as a closely held corporation is required to set aside in a perpetual trust, with a corporate trustee, a certain amount from the sales proceeds of lots and crypts to be used for the perpetual care of the cemetery. The cemetery has no recourse to the principal of the trust, but receives all income earned by the trust assets. Before the state law was enacted, the cemetery made contributions to a similar trust as part of the contract of sale of lots. The cemetery contends that assets deposited with the trustee should not be reflected as part of its financial position because it has no claim to the corpus of the trust. Is this an appropriate method to account for such a trust?

*Reply*—The cemetery management is technically correct in contending that the assets deposited with the trustee should not be reflected as part of the financial position of the cemetery. Situations analogous to that of the cemetery include escrow funds held by an escrow company which are shown in a separate statement; trust funds established by third parties under which a college or university has a beneficial interest only in the resulting income, the trust corpus in such case not being included as an asset in the balance sheet of the college or university; and employees' pension, health, and welfare funds which are reflected in a separate statement.

Although the cemetery's balance sheet need not reflect the trust fund assets, the balance sheet should reflect the cemetery's agency obligation(s), i.e., the cemetery's liability either by contract or statute to pay over certain portions of monies received or receivable to the trustee.

The accounting treatment is the same whether the cemetery has entered into a contract to establish a trust or whether the cemetery's obligation to do so is required by statute.

Footnote disclosure of amounts held in trust, income from which is used in whole or in part to meet the cemetery's commitments respecting perpetual care, would be desirable but not mandatory in order to make the statements not misleading (unless the statute itself calls for such disclosure). If footnote disclosure concerning the trust fund assets is made, the cemetery could also reiterate its policy or procedure of promptly remitting monies to the trustee in connection with cash and deferred payment transactions.

None of the AICPA's official Bulletins or Opinions have dealt specifically with the matter of accountability for, and presentation of, funds or property received by an accounting entity in various somewhat related capacities, i.e., as custodian, bailee, factor, depository, agent to receive and pay over, stockholder, or trustee. Technically, the trust funds are not required to be reported by any accounting entity other than the trust.

## Section 7600

### ***Business Combinations—General***

#### **.01 Date of Acquisition of a Company**

*Inquiry*—A corporation acquired a company for cash in March, subject to the same basic terms as negotiated orally in early January. It would like to designate December 31, the previous year-end of the acquired company, as the acquisition date, subject to imputed interest. The written contract does not specifically mention the date effective control passes to the acquiring company, although the December 31 balance sheet was prepared in accordance with Accounting Principles Board Opinion No. 16, paragraph 88(c) in anticipation of the acquisition.

Would it be proper to use December 31 of the previous year as the effective date of control of acquired company?

*Reply*—If the terms of the plan of combination were announced in writing or otherwise formally made known to the stockholders of the acquired company in early January, it would be appropriate to use, for accounting purposes, a balance sheet as of that date or any later balance sheet near the date of the cash payment with appropriate adjustment for imputed interest on the cash payment. If the December 31 balance sheet would not differ materially from a balance sheet prepared in early January, the December 31 balance sheet might be used.

Paragraph 93 of APB Opinion No. 16, states:

The Board believes that the date of acquisition of a company should ordinarily be the date assets are received and other assets are given or securities are issued. However, the parties may for convenience designate as the effective date the end of an accounting period between the dates a business combination is initiated and consummated.

Paragraph 46 of APB Opinion No. 16, states, in part:

A plan of combination is initiated on the earlier of (1) the date that the major terms of a plan, including the ratio of exchange of stock, are announced publicly or otherwise formally made known to the stockholders of any one of the combining companies (2) the date that stockholders of a combining company are notified in writing of an exchange offer.

It is assumed that there were no dividends, redemptions of stock, or other transactions between the acquired company and its stockholders between December 31 and the date the assets were taken over by the purchaser. It is also assumed that the fair market value (rather than book value) of the assets of the acquired company, which must be determined in order to properly allocate the purchase price, did not change appreciably between December 31 and the date of initiation of the transaction.

#### **.02 Date of Consummation of a Business Combination**

*Inquiry*—A client signed an agreement on June 30 for the acquisition of another company. The agreement calls for a closing date to be held only after the buyer receives financial statements of the seller for past years, and the seller receives a ruling from the Internal Revenue Service that the transaction

will not be taxable. It is anticipated that these conditions will be met within sixty days of the signing of the agreement at which time stock will be exchanged.

The company's year ends on June 30, and the auditor is in the process of examining the financial statements of the client. The auditor believes that the two companies have effectively combined their interests as of the year-end. According to the requirements of Accounting Principles Board Opinion No. 16, paragraph 47g, was the combination consummated before the end of the client's fiscal year?

*Reply*—APB Opinion No. 16 does not define the term “consummated” as it is used in paragraph 47g. However, in that the two companies have effectively combined their interests before the end of the year, and the two conditions to the agreement were not major obstacles, paragraph 47g would not preclude the auditor from considering the transaction as consummated before the end of the year.

### **.03 Financial Statement Presentation of Agreement to Acquire Company**

*Inquiry*—A client has entered into an agreement to acquire fifty percent of the stock of a corporation. To finance the acquisition, the company has arranged for a third party, a bank, to acquire the fifty percent interest in the corporation, and the company will purchase these shares from the bank over a five-year period. The price to be paid the bank for these shares has been fixed, subject only to changes in the prevailing interest rates.

When the bank acquires the fifty percent ownership, the by-laws of the corporation will be changed, and the client will be allowed to control half the seats of the board of directors.

Should the contract with the bank be considered an executory contract with the investment recorded only as the shares are acquired from the bank, or should the entire obligation be recorded on the client's financial statements?

*Reply*—The date of an acquisition in which the acquisition is being financed by an outside party depends primarily upon the date on which the principal rights of ownership are acquired. It would appear that the principal rights of ownership of equity securities are the rights to realize future gains in value and to be subject to future losses in value of the investee. Under the contract in question, the client has the right, subject to payment of the agreed amounts, to obtain the benefit of future earnings of the investee; and further, any losses in value of the purchased securities will be borne by the client. The principal attributes of ownership have been acquired by the company, and, therefore, the 50% interest and the related liability should be shown on the company's balance sheet.

### **.04 Conditions for Pooling of Interests Method**

*Inquiry*—If any of the seven conditions set forth in paragraph 47 of Accounting Principles Board Opinion No. 16 are not met, a business combination must be treated as a purchase.

Condition “a” of this paragraph requires:

The combination is effected in a single transaction or is completed in accordance with a specific plan within one year after the plan is initiated.

Condition “g” requires:

The combination is resolved at the date the plan is consummated . . .

Is a combination resolved when a specific plan is initiated, completed, or consummated?

*Reply*—Paragraph 47(g) states that the existence of any provision for future issuance of stock or other compensation subsequent to the date a combination is consummated (based on market prices or earnings subsequent to consummation) would require that the combination be accounted for as a purchase. Paragraph 47(a) requires that the combination must be effected within one year following the initiation of the plan. The word “consummated” in subparagraph “g” should be read to include both the phrase “effected in a single transaction” and “completed” as used in subparagraph “a”.

This means that there may be conditions at the date of initiation of a plan as to the number of shares which may be issued. However, as long as these conditions are met by date of consummation of the plan and such date of consummation is not more than one year after the date of initiation, pooling of interest accounting is not precluded. The definition of consummation of a plan is discussed in Accounting Interpretation No. 4 of APB Opinion No. 16.

### .05 Accounting for Acquisition Costs Incurred in Merger

*Inquiry*—In acquiring Corporation B, Corporation A incurred certain legal, accounting, printing, and other costs. These costs were capitalized and are being amortized over a forty-year period. Corporation B also incurred similar costs which were capitalized and are being amortized.

Consolidated financial statements are being prepared with the acquired Corporation B as an operating subsidiary of the acquiring Corporation A.

Were the merger costs properly handled, or should they be adjusted at this time?

*Reply*—Interpretation 33 of Accounting Principles Board Opinion No. 16 relates to costs of maintaining an “acquisitions department,” and states:

All “internal” costs associated with a business combination are deducted as incurred in determining net income under APB Opinion No. 16. This answer applies to costs incurred for both “poolings” (see paragraph 58) and “purchases” (see paragraph 76). Naturally, costs incurred in unsuccessful negotiations are also deducted as incurred.

Paragraph 76 specifies that in a business combination accounted for by the purchase method the cost of a company acquired includes the *direct* costs of acquisition. These direct costs, however, are “out-of-pocket” or incremental costs rather than recurring internal costs which may be directly related to an acquisition. The direct costs which are capitalized in a purchase therefore include, for example, a finder’s fee and fees paid to outside consultants for accounting, legal, or engineering investigations or for appraisals, etc. All costs related to effecting a pooling of interests, including the direct costs listed above, are charged to expense as specified in paragraph 58.

Costs of printing securities should reduce the fair value assigned to the securities, in accordance with paragraph 76 of APB Opinion No. 16.

The language in paragraph 76 and interpretation 33 indicates that the direct costs incurred by the acquiring corporation may be capitalized, but the costs incurred by the target (acquired) company may not. Therefore, the costs should have been expensed by Corporation B under APB Opinion No. 16. This should now be treated as a correction of an error under APB Opinion No. 20, *Accounting Changes*, and accounted for as a prior period adjustment.

The costs incurred by Corporation A should have been considered as part of the cost of investment and not necessarily capitalized and amortized separately.

**.06 Exchange of Stock Involving Companies Under Common Control**

*Inquiry*—Individual Y owns 100% of Corporation A and Corporation B. Individual Y exchanges his stock in Corporation A for 100 additional shares in Corporation B, thus creating a parent-subsidiary relationship. Prior to this transaction the assets, liabilities, and stockholders' equity of A and B were as follows:

Company A

Assets .....	<u>\$500,000</u>
Liabilities .....	\$100,000
Common stock, no par value, 200 shares authorized and issued ...	100,000
Retained earnings .....	<u>300,000</u>
Total .....	<u>\$500,000</u>

Company B

Assets .....	<u>\$ 50,000</u>
Liabilities .....	\$ 20,000
Common stock, no par value, 1,000 shares authorized, 100 shares issued and outstanding .....	20,000
Retained earnings .....	<u>10,000</u>
Total .....	<u>\$ 50,000</u>

How should Company B account for and record this transaction?

*Reply*—The exchange would be accounted for in accordance with AICPA Interpretation No. 39 of APB Opinion No. 16, "Transfers and Exchanges Between Companies Under Common Control," which stipulates that an exchange of stock involving companies under common control "would be accounted for at historical cost in a manner similar to that in pooling of interests accounting."

Company B would record this transaction as follows:

Investment in A .....	400,000
Common stock of B. ....	100,000
Retained earnings of A .....	300,000

This entry records B's investment in A at the carrying amount of A's stock (\$100,000 + \$300,000). The separate account for retained earnings of A is established to emphasize that the retained earnings are not a source of dividends to B's stockholder, as is often true in a statutory merger.

This entry also reflects the underlying theory of pooling accounting—the combining of stockholder interests concept (APB Opinion No. 16, *Business Combinations*, paragraph 53)—while recognizing the separate corporate identity of the pooled subsidiary. APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, holds that the total stockholders'

equity of the parent company should equal the total stockholders' equity shown in the consolidated financial statements. Paragraph 19 of that Opinion states, in part, "The difference between consolidation and the equity method lies in the details reported in the financial statements. Thus, an investor's net income for the period and its stockholders' equity at the end of the period are the same whether an investment in a subsidiary is accounted for under the equity method or the subsidiary is consolidated (except as indicated in paragraph 19i)."

#### **.08 Shareholder Contribution of Land**

*Inquiry*—What value should be recorded for land contributed to a corporation by its sole shareholder?

*Reply*—Generally, a shareholder who owns more than 50 percent of a corporation is deemed to be a controlling shareholder. Accordingly, the land should be recorded at the shareholder's historical cost as discussed in AICPA Interpretation No. 39 of APB Opinion No. 16, "Transfers and Exchanges Between Companies Under Common Control." [Amended]

#### **.09 Use of Stepped-Up Basis in Recording Acquisition of Majority Interest**

*Inquiry*—Company A is 100 percent owned by a family. The family also owns a 43 percent interest in Company B, with the remaining 57 percent owned by unrelated third parties. Company A purchases the 57 percent interest in Company B paying more than net book value and shortly thereafter the remaining 43 percent interest in Company B is transferred to Company A. If A then combines with B, can A use a stepped-up basis in recording the net assets of B?

*Reply*—Yes. The 57 percent interest that was acquired from an unrelated party should be accounted for by the purchase method according to APB Opinion No. 16, *Business Combinations*, paragraph 11, which states, "the purchase method accounts for business combination as the acquisition of one company by another. The acquiring company records as its cost the acquired assets less liabilities assumed."

The 43 percent interest that was owned by the family and transferred to Company A should be recorded at the family's predecessor basis according to AICPA Interpretation No. 39 of APB Opinion No. 16, "Transfers and Exchanges Between Companies Under Common Control," which states that assets and liabilities transferred between entities under common control be accounted for at historical cost in a manner similar to that in pooling of interests accounting.

---

[The next page is 7531.]

## Section 7610

### ***Purchase Method***

#### **.01 Acquisition of Parent Company by Subsidiary**

*Inquiry*—Company A owns seventy percent of the outstanding voting common stock of Company B. A “downstream” merger, whereby Company B, the subsidiary, would acquire the assets of Company A, is planned. The transaction would be recorded following the purchase method of accounting. Some controversy has arisen over whether Company B can be the surviving corporation after the transaction is completed. Could the subsidiary company become the survivor company after the merger?

*Reply*—In Accounting Interpretation No. 20 to Accounting Principles Board Opinion No. 16, concerning the acquisition of minority interest, the following statement appears:

Whether a parent acquires the minority or a subsidiary acquires its parent, the end result is a single shareholder group, including the former minority shareholders, owning the consolidated net assets.

In a “downstream” merger the effect of the transaction is that the stockholder group is increased by acquisition of the former minority shareholders of the subsidiary. The transaction should be accounted for as if the surviving company were the parent, rather than the subsidiary. The subsidiary should, therefore, adjust its accounts to reflect any difference between the parent’s equity and unamortized cost to the parent of its investment in the subsidiary (including the effect of any difference between the fair value of the stock held by minority shareholders at date of the combination and the net equity position of such minority in the surviving company).

The stockholders’ equity of the surviving company should be adjusted to reflect the stockholders’ equity of the former parent, after giving effect to acquisition of the former minority interest. If the resulting capital account is less than the par or stated value of the capital stock of the survivor, an appropriate transfer must be made from retained earnings.

Whether the former parent or the former subsidiary is the surviving company is a legal matter, not an accounting matter and, therefore, is not subject to Accounting Principles Board pronouncements. Accounting for the transaction, however, should follow the substance of the transaction. The accounting for the surviving company should, therefore, be the same whether it is the parent or the subsidiary that survives.

#### **.02 Income of Acquired Company Pending Approval of Merger by Regulatory Agency**

*Inquiry*—Corporation A executed a stock purchase agreement in January, 19X5, whereby A would purchase the stock of Corporation B. This purchase must be approved by the Interstate Commerce Commission. A and B also entered into a temporary management agreement which was approved by the

ICC effective March 1, 19X5. Under this temporary management agreement, A will operate B until the ICC rules on the purchase. Any income or losses of B during the term of the agreement will be credited or charged to A regardless of the ruling of the ICC. How should Corporation A account for the operations of B during the temporary management period?

*Reply*—The profit or loss under the temporary management agreement should be accounted for by the acquiring company in accordance with paragraphs 93 and 94 of Accounting Principles Board Opinion No. 16. As indicated in paragraph 93 of the Opinion, using March 1, 19X5, as the effective date of acquisition would require an adjustment of the cost of the acquired company and net income otherwise reported to compensate for recognizing income before consideration was transferred. Income of the acquired company included in consolidation would have to be reduced by imputed interest as provided in the last sentence of paragraph 93. Paragraph 94 also indicates, "... income of an acquiring corporation for the period in which a business combination occurs should include income of the acquired company after the date of acquisition by including the revenue and expenses of the acquired operations based on the cost to the acquiring corporation."

#### **.06 Purchase of Corporation With Negative Net Worth**

*Inquiry*—Corporation A will purchase 100% of Corporation B by issuing its stock to the stockholders of Corporation B. The stock will have a value of approximately \$3,900. The balance sheet of Corporation B at the time of purchase will have a negative net worth of approximately \$700. Should Corporation A record its investment at \$3,900 with subsequent equity adjustments to be made in the future as they occur, or should Corporation A record the investment at zero and show the \$3,900 as "Unamortized Excess Cost Over Net Assets of Subsidiary at Date of Acquisition" which would be amortized over a period of years?

*Reply*—It is assumed that the combination of Corporation A and B is being accounted for as a purchase, because all the criteria for pooling of interests accounting have not been met. Corporation A should record the investment at \$3,900; the consolidation entry to eliminate the investment would result in "goodwill" of \$4,600 because of the \$700 negative net worth at acquisition. The equity adjustments referred to would only be required if Corporation A prepared "parent company only" financial statements for issuance to its stockholders as "the financial statements of the primary reporting entity" (see paragraph 14 of Accounting Principles Board Opinion No. 18).

The application of the purchase method is discussed in some detail beginning with paragraph 66 of APB Opinion No. 16. Paragraphs 87-89 deal with recording assets acquired and liabilities assumed, which should, essentially, be recorded at fair market values. Any excess of cost over net assigned values should be reported as goodwill and amortized in accordance with paragraphs 27-31 of APB Opinion No. 17, *Intangible Assets*.

#### **.08 Allocation of Purchase Price to Assets**

*Inquiry*—Corporation A was formed for the purpose of acquiring from Corporation B certain assets and its name. Corporation A will not assume any of Corporation B's liabilities. The terms of the purchase agreement state that for the assets being sold by the seller, the buyer shall pay a purchase price of \$400,000, which shall be allocated as follows: \$50,000 to real estate, \$250,000

to equipment, and the balance to all other assets. The other assets include accounts receivable, prepaid expense items, a truck, and merchandise inventories.

The real estate and equipment values are based on appraisals by reputable appraisers. The receivables are at book value, the prepaid items are computed, and the truck is of small value. When all these assets have been considered, the balance of the purchase price allocable to inventory is considerably below its value.

Should the values assigned to the real estate and equipment be reduced in order to record the inventory at the value placed on it by the company, or should the stated values for real estate and equipment be used and the balance of purchase price allocated to the remaining assets?

*Reply*—Paragraphs 88 and 91 of Accounting Principles Board Opinion No. 16 would require that cash, receivables, and inventory be set up at estimated realizable value at date of the purchase. The balance of the purchase price should be assigned to the real estate and equipment, after allowing appropriate values for any miscellaneous accounts. Use for accounting purposes of values arbitrarily assigned in the purchase agreement would under the circumstances be contrary to generally accepted accounting principles as expressed in paragraph 91.

#### **.09 Allocation of Purchase Price to Assets Purchased in Bulk**

*Inquiry*—A corporation purchased all the assets of another company consisting of inventory (parts and supplies), machinery and equipment, dies, furniture and fixtures, etc. Detailed schedules supported such assets but no amounts or values were assigned by the seller.

The corporation has elected to value the inventory at fair market value or at original cost of the seller, whichever is lower. The records of seller are available to establish costs. The machinery and equipment, dies and furniture and fixtures are to be assigned values at estimates so that the total assigned cost equals the total purchase price. No goodwill is deemed to exist. The assets are material balance sheet items.

Is this treatment of assigning values for the bulk purchase of assets in accordance with generally accepted accounting principles?

*Reply*—Paragraph 68 of Accounting Principles Board Opinion No. 16 states that a bulk purchase of assets is treated in the same manner as a business combination under the purchase method. The proper method of allocating costs to the individual assets in a purchase is discussed in paragraphs 87 through 92 of APB Opinion No. 16.

Paragraph 88(c) indicates that inventories of raw material should be valued at current replacement cost, while finished goods should be valued at estimated selling price less cost of disposal and an allowance for a reasonable profit for the selling effort of the acquiring corporation. While in many cases this will agree substantially with the cost basis as shown on the records of the seller, such cost basis should not be used automatically. Further, fair market value to the purchaser must provide an allowance for the cost of disposal and a normal profit margin.

If the balance to equal the purchase price is less than the sum of replacement costs of the machinery and equipment, dies, and furniture and fixtures, the balance of course should be assigned to such tangible fixed assets on the basis

of current replacement costs. If, however, such costs do not exhaust the purchase price, the balance being paid for is presumably for some intangible asset. If such intangible asset is being recognized, it must be amortized over an appropriate period not to exceed forty years. [Amended]

#### **.10 Asset Values Stated in Purchase Agreement**

*Inquiry*—Can a purchase agreement, which identifies specific assets of the acquired company and sets their purchase prices, govern the valuation of these assets in accounting for a business combination, or must the acquirer adhere to the valuation principles stated in paragraphs 87 (AC B50.145) and 88 (AC B50.146) of Accounting Principles Board Opinion No. 16 despite the agreement?

*Reply*—For purposes of recording the business combination, the provisions of paragraphs 87 (AC B50.145) and 88 (AC B50.146) of APB Opinion No. 16 should be followed and cannot be circumvented by the purchase agreement.

#### **.14 Value of Receivables Purchased Decreased at Closing Date**

*Inquiry*—A purchaser of an enterprise found that the value of the accounts receivable, included in the total assets to be purchased, had decreased at the closing date of the agreement. The seller holds the buyer to the original agreement price for the business.

What is the proper treatment on the books of the purchaser for the excess paid for accounts receivable?

*Reply*—A bargained price measures an outlay deemed prudent by the purchaser at the time of consummating a transaction. The difference in accounts receivable should not be written off as a loss immediately. The difference either represents a claim upon the seller (which could be set up as a receivable) on the ground that a certain amount of receivables were bargained and not received, or the excess paid represents additional goodwill, a premium the purchaser was willing to pay for future profit expectations.

#### **.16 Amortization of Cost of Long-Term Land Leases Acquired**

*Inquiry*—A real estate investment trust, is acquiring substantially all of the net assets of a company whose principal holdings are improved rental real estate. The combination is being accounted for as a purchase.

The assets being acquired include several favorable long-term (99 years) land leases. The amount at which these leases are being recorded was derived by taking the capitalized economic value of the property as if owned and subtracting the capitalized value of the lease to arrive at the total economic value of the lessee's interest. The depreciated value of the improvements was then deducted to determine the residual leasehold value of the land.

What would be the period of amortization of the long-term land leases under these circumstances?

*Reply*—Any value assigned to the leased property should not exceed the current appraised value of the property account less its residual value at termination of the lease (discounted to present value), and reduced by any favorable (to the sublessee) factors of current subleases. Such value may be amortized over the life of the lease.

#### **.19 Step Up in Basis of a Company's Assets as a Result of a Change in Its Ownership**

*Inquiry*—Corporation A purchased the total outstanding stock of Corporation B and elected, under section 338 of the Internal Revenue Code, to treat the

transaction as a purchase of assets. The effect of the transaction and election was to increase (step up) the carrying amounts of the assets of Corporation B to their fair values for tax purposes based on the purchase price (the subsidiary's liabilities plus the amount Corporation A paid for its stock) paid by Corporation A. Is a similar step up in basis acceptable for financial reporting purposes?

*Reply*—APB Opinion No. 16, *Business Combinations*, provides guidance on accounting for the purchase of the stock of one company by another in consolidated financial statements, and requires that the assets and liabilities of an acquired company be stated, for that purpose, at their fair values at the date of acquisition. The authoritative literature does not address the step up of the carrying amounts of assets in the separate accounts of an acquired company to reflect the purchase of its stock by another entity or group of stockholders. However, an AcSEC Issues Paper, “*Push Down*” Accounting, contains an advisory conclusion that the values assigned to an acquired company's assets and liabilities under APB Opinion No. 16 for consolidated financial statement purposes in an acquisition involving at least a 90 percent change in ownership may be used (“pushed down”) in the separate financial statements of the acquired company. The methods for determining the fair values of the assets and liabilities in a business combination required to be accounted for as a purchase are described in APB Opinion No. 16, paragraphs 87 and 88.

## **.20 Accumulated Depreciation in a Purchase Business Combination**

*Inquiry*—In a purchase business combination, a used market did not exist for certain plant and equipment to be used, therefore, it was valued at replacement cost new less estimated accumulated depreciation in accordance with APB Opinion No. 16, *Business Combinations*, paragraph 88, footnote 11. Should the estimated accumulated depreciation be recorded by the acquirer as a contra account to the plant and equipment, which would be shown at replacement cost new?

*Reply*—No. Replacement cost new less estimated accumulated depreciation is a method used to approximate the current fair value of a used asset. Only the net amount should be shown on the balance sheet.

## **.21 Reduction of Carrying Value of Restricted Long-Term Equity Securities**

*Inquiry*—Corporation P purchased corporation S for a price substantially below the fair value of S Corporation's net assets. The sole assets of Corporation S are long-term equity securities which are restricted from being sold for a three year period by a contractual agreement. Should these securities be reduced by a proportionate part of the excess fair value over cost?

*Reply*—Yes. APB Opinion No. 16, *Business Combinations*, paragraph 91, states that the values assigned to net assets acquired should not exceed the cost of the acquired company. An excess over cost should be allocated to reduce proportionally the values assigned to noncurrent assets (except long-term investments in marketable securities).

FASB Interpretation No. 16, *Clarification of Definitions and Accounting for Marketable Equity Securities that Become Nonmarketable*, paragraph 6, states that if a restricted security cannot qualify for sale within one year or market price quotations are not available for unrestricted shares of the same class, the security is considered nonmarketable.

The equity securities owned by Corporation S should be reduced by a proportionate share of the excess fair value over cost because they are nonmarketable and do not meet the exception in APB Opinion No. 16, paragraph 91.

## **.22 Negative Goodwill in Unclassified Balance Sheet**

*Inquiry*—APB Opinion No. 16, *Business Combinations*, paragraph 91, discusses an excess of acquired net assets over cost, which should be allocated to reduce proportionately the values assigned to noncurrent assets (except for long-term investments in marketable securities) in determining their fair values. What is the appropriate accounting in a situation involving an unclassified balance sheet?

*Reply*—The allocation process under APB Opinion No. 16, paragraph 91, would focus on the nature of the assets regardless of whether a classified or unclassified balance sheet is presented, and would allocate the excess to long lived assets, except for investments in marketable securities.

## **.23 Sale of Parent Stock in Subsidiary to Minority Shareholder**

*Inquiry*—A parent company owns 80 percent and an unrelated minority owns the remaining 20 percent of a subsidiary. The parent sells 10 percent of its ownership in the subsidiary to the minority shareholder for an amount in excess of what the parent paid for that stock.

Would the parent record a gain for the amount received in excess of carrying value (based on the equity method)? If so, would that gain be eliminated in consolidation, or remain on the consolidated income statement?

*Reply*—Authoritative literature does not address this specific situation. However, Interpretation No. 39 to APB Opinion No. 16, *Transfers and Exchanges Between Companies Under Common Control*, states that the acquisition of all or part of the shares held by the minority interest of a subsidiary is never considered a transaction between enterprises under common control and should be accounted for as a purchase. Therefore, a transaction in the opposite direction, i.e., the minority interest acquires the stock of the subsidiary held by the parent, also should be accounted for as a purchase.

Any amount received by the parent in excess of its carrying value (based on the equity method) would be recorded as a gain, in the consolidated statements. The "gain" should be shown as a transfer from consolidated equity to the minority interest.

## **.24 Acquisition of Minority Interest**

*Inquiry*—A parent corporation (P) has a wholly-owned subsidiary (S), who in turn owns 90 percent of another company (C). The remaining 10 percent (minority interest) is held by stockholders who are outside the corporate structure. P paid \$220,000 to acquire the minority interest shares of C. How would this acquisition be accounted for by P?

*Reply*—Interpretation No. 26 of APB Opinion No. 16, *Acquisition of Minority Interest*, states that the acquisition of some or all of the stock held by minority stockholders of a subsidiary—whether acquired by the parent, the subsidiary itself, or another affiliate—should be accounted for by the purchase method. Thus, purchase accounting applies when (a) a parent exchanges its common

stock or assets or debt for common stock held by minority shareholders of its subsidiary, (b) the subsidiary buys as treasury stock the common stock held by minority shareholders, or (c) another subsidiary of the parent exchanges its common stock or assets or debt for common stock held by the minority shareholders of an affiliated subsidiary.

Based on the above, P would account for this acquisition by the purchase method. The \$220,000 would be allocated proportionately to 10 percent of the fair value of the assets and liabilities acquired in the same manner as under the purchase method described in APB Opinion No. 16, *Business Combinations*.

## Section 7620

### ***Applicability of Pooling of Interests Method***

#### **.03 Affiliate Acquiring Interest in Company Wholly Owned by Parent**

*Inquiry*—A client owns 45 percent of a foreign holding company, with the balance owned by unrelated parties. The foreign company wishes to acquire a 65 percent interest in a U.S. operating company. This operating company will be sold to a U.S. holding company which is presently 100 percent owned by the client. The selling price will be substantially above the foreign company's cost.

What method of accounting should be used to reflect these transactions?

*Reply*—Because the client owns 45 percent of the foreign holding company's stock, the equity method of accounting for this investment would be appropriate. In APB Opinion No. 18, paragraph 17, the Board concluded that in order to achieve a reasonable degree of uniformity in application, an investment (direct or indirect) of 20 percent or more of the voting stock of an investee should lead to a presumption that, in the absence of evidence to the contrary, an investor has the ability to exercise significant influence over an investee.

Interpretation 39 to Opinion No. 16 should be followed in accounting for the "sale" of the 65 percent interest to the U.S. 100 percent owned subsidiary. APB Opinion No. 16 deals with accounting for business combinations. The interpretation discusses transfers and exchanges between companies under common control, which is similar to this situation.

Interpretation 39 states:

In general, paragraph 5 excludes transfers and exchanges that do not involve outsiders. For example, a parent company may transfer the net assets of a wholly owned subsidiary into the parent company and liquidate the subsidiary, which is a change in legal organization but not a change in the entity. Likewise, a parent may transfer its interest in several partially owned subsidiaries to a new wholly owned subsidiary, which is again a change in legal organization but not in the entity. Also, a parent may exchange its ownership or the net assets of a wholly owned subsidiary for additional shares issued by the parent's partially owned subsidiary, thereby increasing the parent's percentage of ownership in the partially owned subsidiary but leaving all of the existing minority interest outstanding.

Interpretation 39 states, "None of the above transfers or exchanges is covered by APB Opinion No. 16," and, "The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting." But, the acquisition of all or part of the outstanding shares held by the minority interest would be accounted for by the purchase method.

#### **.04 Combination of Related Companies—I**

*Inquiry*—An individual owns two corporations. It is desirable to maintain only one corporate structure, therefore the brother and sister corporations are being merged. Would the pooling of interests method be appropriate?

*Reply*—Paragraph 5 of APB Opinion No. 16 states in part:

The term business combination in this Opinion excludes a transfer by a corporation of its net assets to a newly formed substitute corporate entity chartered by the existing corporation and a transfer of net assets or exchange of shares between companies under common control . . . such as between a parent corporation and its subsidiary or between two subsidiary corporations of the same parent.

Accounting Interpretation No. 39 of APB Opinion No. 16 illustrates the application of paragraph 5, and indicates, "The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting."

### **.05 Combination of Related Companies—II**

*Inquiry*—Company A is a real estate holding corporation owning land and buildings, forty percent of which are occupied by Company B.

The shareholders of Company A are the spouses of two of the three shareholders of Company B. The third shareholder is also related by marriage to the other two shareholders of Company B and married to the daughter of one of the shareholders of Company A.

The book value of A's assets are about ten percent of those of B.

Voting preferred stock was issued to effect the merger of Company A with Company B. Company B then set up the real estate corporation as a separate division, mortgaged the property, and used the funds in its operations.

Is the merger of Company A with Company B to be treated as a pooling of interests or a purchase?

*Reply*—Paragraph 5 of APB Opinion No. 16, *Business Combinations*, states, "The term business combination in this Opinion excludes a transfer by a corporation of its net assets to a newly formed substitute corporate entity chartered by the existing corporation and a transfer of net assets or exchange of shares between companies under common control . . . such as between a parent corporation and its subsidiary or between two subsidiary corporations of the same parent."

Interpretation No. 39 of Opinion No. 16 deals with transfers and exchanges between companies under common control. The following excerpts are from that interpretation: "In general, paragraph 5 excludes transfers and exchanges that do not involve outsiders . . . . The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting." Therefore, even though voting preferred stock was issued (which would preclude a pooling under paragraph 47b of APB Opinion No. 16), the merger of A should be treated in a manner similar to a pooling of interests if the family relationship is such that the companies were deemed to be under common control. If the family relationship leads to the conclusion that the companies are not under common control, then the merger would come under the provisions of APB Opinion No. 16 and purchase accounting would be required. However, in the absence of evidence to the contrary, the close family relationship among the stockholders would lead to the conclusion that A and B are under common control; therefore, Interpretation No. 39 would apply, and the transaction should be recorded in a manner similar to a pooling of interests.

### **.06 Combination of Related Companies—III**

*Inquiry*—The Stock of Parent Company was held by four family members. Several years ago, the operating assets of two divisions were transferred to two newly formed corporations, A and B, in exchange for their stock. One family member exchanged his Parent stock for a minority interest in A and another exchanged his Parent stock for a minority interest in B.

Early this year, A and B were combined in a pooling of interests transaction, forming AB. Recently, AB was combined with the original Parent. The 2 family members holding AB stock will receive stock of Parent. Parent has only one class of stock.

Would the treatment of the combination of AB and Parent as pooling of interest be in accordance with APB Opinion No. 16?

*Reply*—Interpretation No. 39 of APB Opinion No. 16 dealing with business combinations involving transfers and exchanges between companies under common control states:

In general, paragraph 5 excludes transfers and exchanges that do not involve outsiders. For example, a parent company may transfer the net assets of a wholly owned subsidiary into the parent company and liquidate the subsidiary, which is a change in legal organization but not a change in the entity. Likewise, a parent may transfer its interest in several partially owned subsidiaries to a new wholly owned subsidiary, which is again a change in legal organization but not in the entity. Also, a parent may exchange its ownership or the net assets of a wholly owned subsidiary, thereby increasing the parent's percentage of ownership in the partially owned subsidiary but leaving all of the existing minority interest outstanding.

None of the above transfers or exchanges is covered by APB Opinion No. 16. The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting.

It should be noted, however, that purchase accounting applies when the effect of a transfer or exchange is to acquire all or part of the outstanding shares held by the minority interest of a subsidiary (see paragraph 43). The acquisition of all or part of a minority interest, however acquired, is never considered a transfer or exchange by companies under common control. (See Interpretation No. 26 of APB Opinion No. 16, "Acquisition of Minority Interest.")

The case described involves companies under common control because of ownership by the parent company and family members, and, therefore, the combination should be accounted for at historical cost.

### **.07 Combination of Related Companies—IV**

*Inquiry*—Corporation A acquired Corporation B in an exchange of common stock. Corporation B is owned by two individuals in the amounts of 60 percent and 40 percent of the stock issued. Corporation B owned 12 percent of Corporation A before acquisition. The two individuals who own Corporation B, own stock of Corporation A and, including their beneficial ownership through the stock which Corporation B owns in Corporation A, they own over 50 percent of Corporation A.

How would this acquisition be classified and reflected on the records of the acquiring corporation?

*Reply*—It is assumed that the interest in Corporation A of each of the two individuals who own Corporation B are roughly in the same proportion to each other as is their ownership of Corporation B.

Paragraph 5 of APB Opinion No. 16 excludes from the definition of a business combination the transfer of net assets or exchange of shares between companies under common control. Paragraph 5 seems to apply whether the common control was exercised by a corporation or by individuals.

Although APB Opinion No. 16 does not address itself to the proper accounting for a combination of such companies, it would be appropriate to apply the pooling of interests method. However, certain of the disclosures required for a pooling of interests in business combinations would not be required for mergers of companies under common control. Such combinations should reflect generally any costs of acquisition that were incurred by the joint owner, but which were not reflected on the books of the companies being combined. Interpretation No. 39 of APB Opinion No. 16 relates to transfer and exchanges between companies under common control and can be used as a basis for application of the pooling of interests method.

### **.08 Acquisition of a Division of Another Company**

*Inquiry*—A company is acquiring a division of another company. APB Opinion No. 16, paragraph 5, reads in part, “The conclusions of this section apply equally to business combinations in which one or more companies become subsidiary corporations, one company transfers its net assets to another, and each company transfers its net assets to a newly formed corporation.”

Is this transaction excluded from APB Opinion No. 16, and, if not, what method of accounting should be used?

*Reply*—The first sentence of APB Opinion No. 16, paragraph 5, states, “This section covers the combination of a corporation and one or more incorporated or unincorporated businesses; both incorporated and unincorporated enterprises are referred to in this section as companies.” The division should be viewed as an “unincorporated enterprise” because whether the other company chose to operate under a divisional or parent-subsidiary structure is largely a matter of management preference and form over substance. Therefore, this acquisition is covered by APB Opinion No. 16 and the purchase method should be used.

### **.09 Pooling of Interest Following Abandonment of Previous Attempt to Merge**

*Inquiry*—A year ago Company A was acquired by Company B in an exchange of stock. A condition of this exchange was that Company B would register its stock with the SEC within one year. If such a registration was not completed, the shareholders of the two companies would again be separate, autonomous, and unrelated entities.

Company B was unable to register its stock and the exchange of stock was subsequently reversed. Company A is now contemplating combining with another company.

One of the conditions for using the pooling of interest method for business combinations is stated in paragraph 46 of APB Opinion No. 16 as follows:

Each of the combining companies is autonomous and has not been a subsidiary or division of another corporation within two years before the plan of combination is initiated.

Was Company A a subsidiary of Company B?

*Reply*—Although Company A had been involved in an attempted business combination which was abandoned after one year, the failure of the transaction would indicate that the company had not in fact been a division or subsidiary of another company. Therefore, the requirement of paragraph 46 of APB Opinion No. 16 would not preclude a subsequent business combination from being accounted for as a pooling of interest.

#### **.10 Business Combination Following a “Spin-Off”**

*Inquiry*—A company which owns 100 percent of two subsidiaries is considering combining with another company through an exchange of stock. Prior to any combination, however, the company intends to spin-off to its present stockholders the capital stock of the two subsidiaries. These two subsidiaries account for approximately 50 percent of the gross revenue of the combined enterprise. Would the combination, after the spin-off, qualify as a pooling of interest or as a purchase under APB Opinion No. 16?

*Reply*—Paragraph 47c of APB Opinion No. 16 (AC B50.106c) states that in order to be considered a pooling of interest, “none of the combining companies changes the equity interest of the voting common stock in contemplation of effecting the combination either within two years of the date the combination is initiated or between the dates the combination is initiated and consummated; changes in contemplation of effecting the combination may include distributions to stockholders and additional issuances, exchanges, and retirements of securities.”

Therefore, in accordance with paragraph 47c of APB Opinion No. 16 (AC B50.106c), the transaction must be considered a “purchase.” [Amended June 1995.]

#### **.11 Pooling of Interest Following Acquisition of Treasury Stock**

*Inquiry*—A company has decided that it is over-capitalized and wishes to acquire treasury shares in order to reduce its capitalization. Assuming that the number of shares acquired is material as contemplated by the Interpretation No. 20 of APB Opinion No. 16, will the company be precluded from entering pooling of interest business combination for a period of two years? If the company decides to accomplish this reduction in capitalization by a pro rata redemption of outstanding shares, is it similarly precluded from entering pooling of interests business combinations for two years?

*Reply*—Interpretation No. 20 relates to paragraphs 47(c) and (d) of APB Opinion No. 16.

Paragraph 47(d) states, “Each of the combining companies reacquires shares of voting common stock only for purposes other than business combinations, and no company reacquires more than a normal number of shares between the dates the plan of combination is initiated and consummated.” In determining intent, both in subparagraphs (c) and (d) of paragraph 47 and subparagraph (a) of paragraph 46, it is presumed that a transaction is in contemplation of the business combination if it occurs within two years prior to the initiation of the plan.

As stated in the Interpretation to APB Opinion No. 16, paragraph 47(d), this presumption may be overcome if it is shown that the shares have been or will be reissued in stock option or other compensation plans or as payments in purchase combinations. It will also be overcome if the stock is resold prior to the business combination.

However, if the stock is not reissued, it should be evident that some of the stockholders are being paid in cash, rather than receiving stock of the combined company or that some stockholders have been paid in cash for part of their stock. APB Opinion No. 16 expressly precludes pooling of interests accounting when stockholders of either of the combining companies are paid in part by cash.

The Interpretation of APB Opinion No. 16, paragraph 47(d), lists specific purposes for acquiring treasury stock which would not prohibit pooling of interests accounting treatment: stock option or compensation plans, stock dividends declared, "purchase" business combinations, and resolving existing contingent share agreements from a prior business combination. Each of these purposes is similar in that they all include a subsequent distribution of the stock. In other words, the company is reacquiring the stock for some subsequent business purpose. "Over-capitalization" as a specific purpose differs from these examples because the company is not acquiring these shares for a subsequent business purpose.

Therefore, treasury stock acquisitions to avoid over-capitalization is a business purpose which will prevent pooling of interests accounting for business combinations for two years. This assumes that the violation has not been "cured" by resale of these shares prior to consummation.

A pro rata redemption of shares is, in substance, the same as an acquisition of treasury stock. Accordingly, the company will also be ineligible to enter pooling of interests business combinations for two years if it chooses this method to reduce its capitalization.

Also see the SEC's Codification of Financial Reporting Policies, Sec. 201.02 (ASRs 146 and 146A).

## **.12 Exchange of Shares Between Companies Under Common Control**

*Inquiry*—The voting common stock of Corporations A and B are owned by the same interests but not in the same proportion. In addition, B has outstanding nonvoting common stock which is identical to the voting common stock, except for the voting privilege. None of the holders of the voting stock own nonvoting stock, although members of their families and family related trusts are owners of part of the nonvoting stock with the balance being held by key employees and others. It is proposed that B remain in existence but that all of its voting stock be acquired by A in exchange for voting stock of A. The nonvoting stock will not be exchanged.

Based upon current financial statements, the nonvoting interest in B represents approximately 35 percent of the stockholders' equity in that corporation and would represent approximately 20 percent of the combined stockholders' equity.

What is the proper accounting for the combination of these two companies?

*Reply*—Paragraph 5 of APB Opinion No. 16 excludes from the term "business combination" an exchange of shares between companies under common control. Such a combination, although thus excluded from the provisions of APB Opinion No. 16, should generally be accounted for in the same manner as a pooling of interests. Even if the combination of the two companies should be considered a business combination subject to APB Opinion No. 16, allowing the nonvoting stock of one of the companies to remain outstanding would not result

in a business combination being accounted for as a purchase, if all other conditions indicated use of the pooling method. Interpretation No. 39 of APB Opinion No. 16 discusses transfers and exchanges between companies under common control.

### **.13 Effect on Pooling of Interests of Contingently Issued Shares Held in Escrow**

*Inquiry*—A client and another company have agreed to a plan of combination which is intended to meet all of the criteria for pooling of interests accounting.

The client's attorneys have prepared a preliminary draft of an indemnity-escrow agreement which may provide for deposit in escrow of 30 percent of the total shares to be issued to affect the combination, to secure, compensate, and indemnify the issuer regarding breach of certain warranties and other matters coming within the type of "general management representation" as referred to in Interpretation 30 of APB Opinion No. 16.

One of the requirements stated in paragraph 47 of APB Opinion No. 16 is:

- g. The combination is resolved at the date the plan is consummated and no provisions of the plan relating to the issue of securities or other consideration are pending.

This condition means that (1) the combined corporation does not agree to contingently issue additional shares of stock or distribute other consideration at a later date to the former stockholders of a combining company, or (2) the combined corporation does not issue or distribute to an escrow agent common stock or other consideration which is to be either transferred to common stockholders or returned to the corporation at the time the contingency is resolved.

An agreement may provide, however, that the number of shares of common stock issued to effect the combination may be revised for the later settlement of a contingency at a different amount than that recorded by a combining company.

Interpretation No. 14 of APB Opinion No. 16 states:

The only contingent arrangement permitted under paragraph 47-g is for settlement of a contingency pending at consummation, such as the later settlement of a lawsuit. A contingency arrangement would also be permitted for an additional income tax liability resulting from the examination of "open" income tax returns.

Interpretation No. 30 states:

The most common type of contingency agreement not prohibited in a pooling by paragraph 47g is the "general management representation" which is present in nearly all business combinations. In such a representation, management of a combining company typically warrants that the assets exist and are worth specified amounts and that all liabilities and their amounts have been disclosed. The contingency agreement usually calls for an adjustment in the total number of shares exchanged up to a relatively small percentage (normally about 10%) for variations from the amounts represented, but actual adjustments of the number of shares are rare.

Would the 30 percent of the shares to be issued held in escrow preclude the use of the pooling of interests method?

*Reply*—The contingencies covered in Interpretation No. 14 are more susceptible of quantification than those discussed in Interpretation No. 30. The 10 percent referred to in No. 30 should not be viewed as a ceiling if the escrow shares are earmarked for contingencies, such as those discussed in No. 14. However, No. 30 also states:

... the contingency agreement is merely a device to provide time for the issuing company to determine that the representations are accurate so it does not share risks arising prior to consummation. Although the time required will vary with circumstances, these determinations should be completed within a few months following consummation of the combination. In any case, the maximum time should not extend beyond the issuance of the first independent audit report on the company making the representations following consummation of the combination.

#### **.14 Issuance of Stock for Contingent Earnings Rights of Acquired Company's Stockholders**

*Inquiry*—Corporation A plans to combine with Corporation B, with A being the surviving corporation. A will issue its shares of stock to the stockholders of B. B also has a preexisting obligation to certain of its shareholders who have certain contingent earnings rights requiring issuance of additional common stock. Corporation A has agreed to assume this obligation and will issue shares of its own stock to these stockholders. May this merger be treated as a pooling of interest?

*Reply*—The issuance of A's common shares to the holders of the contingent earnings rights would not prohibit using the pooling of interests method to account for the business combination. Issuing common stock for this obligation is similar to assuming or exchanging common stock for a debt security. Therefore, it would be proper to apply that part of APB Opinion No. 16, paragraph 47, which states, "... a corporation issuing stock to effect the combination may assume the debt securities of the other company or may exchange substantially identical securities or voting common stock for other outstanding equity and debt securities. ..."

#### **.15 Pooling of Interests Precluded by Agreement to Redeem Stock**

*Inquiry*—Corporation A, a personal holding company, has an agreement with its sole shareholder to redeem the corporation's stock at fair market value on the date of the shareholder's death.

Corporation B, whose stock is publicly traded, proposes to merge with A. All stockholders will exchange their stock for voting common stock in the resulting Corporation AB.

Assuming that the exchange of stock meets all other requirements for a pooling of interests, would the assumption of the redemption agreement by AB negate the pooling under the "contingent bailout" or "planned transaction" provisions of APB Opinion No. 16?

Also, if pooling is permissible, would the result be changed if AB amended the agreement to provide a specific redemption price not related to the fair market value of the stock at the death of A's shareholder?

*Reply*—Paragraphs 48a and 48b of APB Opinion No. 16 specify that a combined corporation may not agree to retire or reacquire any of the common stock issued to effect the combination or enter into financial arrangements for

the benefit of the former stockholders of a combining company if a business combination is to be accounted for by the pooling of interests method. Furthermore, Interpretation No. 21 of the Opinion states, in part, that the critical factor in meeting the conditions of APB Opinion No. 16, paragraphs 48a and 48b, is that the voting common stock issued to effect a business combination remains outstanding outside the combined corporation without arrangements on the part of any of the corporations involving the use of their financial resources to "bailout" former stockholders of a combining company or to induce others to do so.

These references lead to the conclusion that pooling of interests accounting would not be permitted under these circumstances despite the preexistent aspect of the agreement with A's sole stockholder.

---

**[The next page is 7831.]**

## Section 7630

### ***Application of Pooling of Interests Method***

#### **.02 Exchange of Stock on a Share for Share Basis With Different Stated Values**

*Inquiry*—Corporation A merged with Corporation B, leaving Corporation A as the survivor. The terms of the merger stated that the shareholders of Corporation B would exchange their stock on a “share for share basis” for the stock of Corporation A. The stock of Corporation B has a stated value and was sold originally at \$.05 per share, but the stock of Corporation A has a stated value of \$.10 per share. When Corporation A issued its stock for Corporation B’s stock on a “share for share basis,” the net effect resulted in Corporation A’s stock being issued at a discount of \$.05 per share.

What is the proper statement presentation for this transaction?

*Reply*—APB Opinion No. 16, *Business Combinations*, paragraph 53, states in part, “The amount of outstanding shares of stock of the combined corporation at par or stated value may exceed the total amount of capital stock of the separate combining companies; the excess should be deducted first from the combined other contributed capital and then from the combined retained earnings.”

Since the merger was effected by an exchange of stock on a “share for share basis,” it is assumed that pooling of interests accounting would be appropriate. Based upon the above quotation, a sufficient amount should be transferred from the combined other contributed capital and then from the combined retained earnings in order to reflect A’s capital at the number of shares outstanding times \$.10 per share.

## Section 8200

### ***Internal Control***

#### **.02 Determining Accuracy of Cash Collections for Coin-Operated Machines**

*Inquiry*—How can the accuracy of the cash collections be determined for a chain of laundromats with several thousand machines? The coin-operated machines do not employ the use of meters, counters, locked boxes, or any other devices that would provide a basis for control.

*Reply*—One method to determine if the machines' receipts are being surrendered intact is to occasionally fill selected coin-operated machines with marked coins. The subsequent collections can then be reviewed to make sure the same coins have been turned in. It may also be possible to correlate revenues with consumption of water and electricity by these machines. Furthermore, it may be possible to determine the expected revenues from an installation and the extent to which the machines are being used by observation of the activities of selected installations.

#### **.04 Communication With Audit Committee**

*Inquiry*—An auditor has been engaged to perform an audit on a small, privately-held company. It has only two owners and no audit committee or other oversight group. Does the auditor have the responsibility to communicate certain matters to the owners under SAS No. 61, *Communication With Audit Committees*?

*Reply*—SAS No. 61 requires that an auditor communicate certain matters related to the conduct of an audit to those who have responsibility for oversight of the financial reporting process. Some of the items that need to be communicated relate to the auditor's responsibility under generally accepted auditing standards (GAAS), significant accounting policies, management judgments and accounting estimates, significant audit adjustments, disagreements with management, etc.

The communications required by SAS No. 61 are applicable to (1) entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee) and (2) all Securities and Exchange Commission (SEC) engagements.

Since the company has no oversight group and the engagement is not an SEC engagement, the auditor has no SAS No. 61 responsibility on this engagement.

---

[The next page is 8491.]

## Section 8220

### Sampling

#### .01 Application of SAS No. 39

*Inquiry*—When should the auditor apply the audit sampling principles in SAS No. 39?

*Reply*—Audit sampling is only one of many tools used by auditors to obtain sufficient, competent evidential matter to support an opinion regarding financial statements. SAS No. 39 outlines design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used—

- in performing tests of controls that provide an audit trail of documentary evidence,
- in substantive testing to test details of transactions and balances, and
- in dual purpose tests that test a control that provides documentary evidence of performance and whether the recorded monetary amount of transactions or balances is correct.

Thus, the portion of SAS No. 39 pertaining to tests of controls (paragraphs 31 through 42) applies when sampling techniques are used to test the operating effectiveness of the controls. The portion of SAS No. 39 pertaining to substantive tests (paragraphs 15 through 30) applies when sampling techniques are used to test details of transactions or balances.

SAS No. 39 defines audit sampling as “the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.” A key to understanding that definition is the *intent* of the auditor in applying the audit procedure. As noted in footnote 1 of SAS No. 39, the auditor may examine less than 100 percent of the items comprising an account balance or class of transactions for reasons *other than* evaluating a characteristic of the balance or class. For example, the auditor is not performing audit sampling in the following situations:

- An auditor traces several sales transactions through a client’s accounting system to gain an understanding of the manner in which transactions are processed. SAS No. 39 would not apply because the auditor’s intent was to gain an understanding of the processing of these transactions by the accounting system, not to evaluate a characteristic of all sales transactions processed by the accounting system.
- The auditor might examine several large sales invoices that comprise a significant portion of the account balance and leave the remaining portion of the balance untested or test the remaining items by other means, such as the application of analytical procedures. Again, SAS No. 39 does not apply because the auditor does not intend to evaluate all items in the account balance based on the examination of the large items.

Another consideration in determining whether SAS No. 39 is applicable to circumstances in which an auditor examines less than 100 percent of the items comprising an account balance or class of transactions is the purpose of the test being applied. If he intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, the auditor should follow the guidance in SAS No. 39. For example, if the auditor intends to examine selected sales invoices to draw a conclusion as to whether sales are overstated, he should apply audit sampling as described in SAS No. 39—he intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to the remaining invoices, he is not sampling according to SAS No. 39—his examination of the large items is not intended to lead him to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the combined results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed related to overstatement of sales.

In determining whether SAS No. 39 applies to a given audit procedure, the auditor should also consider the population in which he is interested. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables and employee receivables. Each of these populations can be tested using a different audit strategy. The sampling concepts in SAS No. 39 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

### **.03 Adequate Size for Nonstatistical Samples**

*Inquiry*—Is there a rule-of-thumb for determining an adequate size for nonstatistical samples for substantive audit tests?

*Reply*—There is no rule-of-thumb that is appropriate for all applications. SAS No. 39 imposes no requirement to use quantitative aids, such as sample size tables, to determine sample size. Nor does SAS No. 39 impose a rule regarding minimum sample size. Just as before the issuance of SAS No. 39, judgment is the key. Auditors often use benchmarks or starting points such as sample sizes used in prior years or in similar circumstances in other audit engagements in determining what sample size is appropriate for a given sampling application. Paragraph 23 of SAS No. 39 lists factors that influence the auditor's judgment in determining sample size. Those factors include—

- Tolerable misstatement allowable.
- The risk of incorrect acceptance.
- The characteristics of the population (e.g., the variability of the amounts of items in the population and the expected misstatement in the population).

If the auditor considered factors such as these in determining sample size in prior years or in other engagements, there may be no reason to believe that sample sizes based on these benchmarks or starting points are inadequate. Individual firms or auditors often prefer to set their own rules regarding a benchmark or starting point for determining sample size. SAS No. 39 does not prohibit such policies. It merely alerts the auditor to factors he should consider in judging the adequacy of sample size.

#### **.04 Documentation Requirements of SAS No. 39**

*Inquiry*—Does SAS No. 39 impose any new documentation requirements?

*Reply*—No, SAS No. 39 contains no new specific documentation requirements. The documentation standards set forth in the statements on auditing standards dealing with documentation apply to audit sampling applications just as they apply to other auditing applications. For example, SAS No. 22, *Planning and Supervision*, states that the auditor should prepare a written audit program and SAS No. 41, *Working Papers*, requires the auditor to prepare working papers that record the work that the auditor has done and the conclusions that he has reached concerning significant matters. Thus, with regard to audit sampling applications, the auditor's audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. The auditor's record of the work performed might include—

- The definition of the population and the sampling unit, including how the auditor considered completeness of the population.
- The definition of misstatement.
- The method of sample selection.
- A list of misstatements identified in the sample.
- An evaluation of the result of the sampling application.
- Conclusions reached by the auditor.

#### **.05 Methods to Select Representative Sample**

*Inquiry*—What are some selection methods that can be used to select a representative sample?

*Reply*—There is no requirement in SAS No. 39 that random sampling selection methods be used. Representative sampling methods used by auditors include—

- Haphazard sampling.
- Systematic sampling.
- Random-number sampling.

Haphazard sampling consists of selecting sampling units without any conscious bias, that is, without any special reason for including or omitting items from the sample. Haphazard sampling does not imply that units can be selected in a careless manner. Rather, a haphazard sample is selected in a manner that can be expected to be representative of the population. For example, where the physical representation of the population is a file cabinet drawer of vouchers, a haphazard sample of all vouchers processed for the year 19XX might include any of the vouchers that the auditor pulls from the drawer, regardless of each voucher's size, shape, location, or other physical features. The auditor using haphazard selection should be careful to avoid distorting the sample by selecting, for example, only unusual or physically small items or by omitting items such as the first or last items in the physical representation of the population.

Systematic sampling consists of determining a uniform interval, and one item is selected throughout the population at each of the uniform intervals from the starting point.

Random-number sampling entails matching random numbers generated by a computer or selected from a random-number table with, for example, document numbers.

Another method sometimes used in practice is block sampling. Block sampling consists of selecting groups of sequential transactions (for example, all vouchers processed on several selected dates). Using block samples may be inefficient because in order for a block sample to be adequate to lead to an audit conclusion, a relatively larger number of blocks should be selected. If an auditor decides to use block sampling, he should exercise special care to control sampling risk in designing his sample.

---

**[The next page is 8521.]**

## Section 8310

### ***Evidential Matter: Securities***

#### **.02 Confirmation of Securities Held in Street Name**

*Inquiry*—A CPA firm has been engaged to perform the initial audit of a pension plan and trust. Most of the trust assets are investments held in street name by a brokerage house. Some negotiable bearer bonds, held in a bank, are in denominations not traceable to the trust account since the bond may represent investments by more than one customer. In addition to its monthly account statements the broker will certify details and ownership of investments at the statement date and will permit examination of certain of its internal records. The bank will also certify details and ownership of investments held for the trust.

Would the fact that the securities are held in “street name” and in some cases in denominations which cannot be traced to the trust’s account preclude obtaining sufficient competent evidential matter on which to base an opinion on the financial statements of the pension plan and trust?

*Reply*—Statement on Auditing Standards No. 31 discusses evidential matter. Physical inspection and count of the securities in this case appear to be impracticable; therefore, evidential matter concerning the securities would presumably consist primarily of confirmations received from the brokerage houses and other financial institutions which have possession of the securities. Whether or not confirmations would represent sufficient evidence is really a matter for the auditor’s professional judgment. [Amended]

---

[The next page is 8571.]

## Section 8320

### ***Evidential Matter: Inventories***

#### **.01 Reliance on Observation of Inventories at an Interim Date**

*Inquiry*—Although its fiscal year ends on March 31, a client has always counted its physical inventory on December 31. The March 31 ending inventory has always been calculated by the gross profit method which has proven over the past to be quite accurate. No perpetual inventory records are kept.

Can the auditor rely on an observation of inventory that takes place three months prior to the balance sheet date?

*Reply*—SAS No. 1, section 331, *Receivables and Inventories*, paragraphs 9–12, discusses evidential matter regarding inventories. SAS No. 1, section 331, paragraph 10, states, “When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor’s observation procedures usually can be performed either during or after the end of the period under audit.” SAS No. 1, section 331, paragraph 12, states in part, “. . . it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate test of intervening transactions.”

Normally, observing an inventory-taking on December 31 when a client has a March 31 year-end and perpetual records are used as the basis of the March 31 inventories, would present no unusual problems since the tests of intervening transactions referred to in SAS No. 1, section 331, paragraph 12, usually can be readily applied. However, if the client keeps no perpetual records of inventory, the tests of the intervening transactions would, in effect, cause the auditor to create the perpetual records as a basis for the March 31 inventory.

#### **.02 Observation of Physical Inventory on a First Audit**

*Inquiry*—A company maintains large inventories of tractor parts in five different locations. The quantities of each part may be quite small, averaging six or seven pieces; but there are approximately 5000 different parts on hand, some as much as twenty years old. The company has been taking complete physical inventories at the end of each year. In the past, the parts inventories have been valued at the current catalogue prices.

A CPA has been engaged to perform the company’s first audit. What procedures may be followed in establishing the value of the parts inventory?

*Reply*—It would appear necessary under sections SAS No. 1, section 331, *Receivables and Inventories*, paragraphs 1 (AU 331.01) and 9 (AU 331.09), and SAS No. 58, *Reports on Audited Financial Statements*, paragraphs 40 through 44 (AU 508.40 through .44), that the auditor observe the client’s count of the parts inventory. Presumably tests should be made in each of the five locations.

Inventory pricing should be based on historical cost, rather than current selling price. While it may not be practicable to determine cost individually for the large number of parts on hand, it might be appropriate to determine the ratio of cost to catalogue price to obtain an approximation of the cost of current

inventory. Also, some allowance, based on experience, should be made for obsolescence. Presumably a part will have little current value if there is a probability it will not be sold within five years. Costs of warehousing items for such a period may often approach the discounted value of the sales price.

Based upon observations and upon discussions with the client's employees, the auditor may be able to obtain some impressions as to the reliability of the earlier inventories. This would be supported by a comparison of this year's inventory with the prior year's, and by knowledge of sales and production in the current year. [Amended]

### **.03 Cost of Inventories Acquired from Principal Stockholder**

*Inquiry*—A corporation purchased merchandise from a stockholder who owns 99 percent of the corporation's stock and executed a chattel mortgage in favor of the stockholder. The merchandise was acquired by the stockholder prior to the formation of the corporation.

How can the CPA be sure the purchase price of this merchandise is reasonable?

*Reply*—The "seller's" cost can be ascertained through the examination of his cost records, invoices, etc., and comparing his total cost with the selling price to the corporation. Also, the taking of inventory can be observed and verified against physical quantities and classifications of inventory, against transfer documents and against the transferor's cost records and invoices. If the latter records are not available, the auditor can price the inventory at the current replacement cost which can be obtained by reference to recent invoices, communication with suppliers, or references to recent merchandise catalogs.

A basic consideration in this case is the fact that, upon incorporation, there is a continuance of beneficial interest in the inventory transferred and in the proceeds from its eventual disposition by virtue of the chattel mortgage and the 99 percent stock ownership. Accordingly, the transferor's cost should be carried over and continued on the books of the newly organized corporation.

### **.04 Reliance on Estimates of Coal Inventories by Experts**

*Inquiry*—An electric utility maintains a large stockpile of coal. The auditors rely on the calculations of an engineering firm in their test of this inventory. The amount of coal by weight is estimated by multiplying the volume of the coal pile, calculated in cubic feet, by the estimated average density of the coal, measured in pounds per cubic foot. The calculated amount is then compared with the utility's perpetual inventory records, and, if the variance is not considered material, the perpetual inventory is accepted as the accurate amount.

Because of the uncertainties involved in this method, particularly in the estimation of the average density of the coal, the engineers are reluctant to render an opinion on the amount of coal on hand. Other methods of calculating the amount of coal such as the "two coal-pile" theory are uneconomical.

In all cases, this inventory is a material item in the accounts of the utility. What alternative auditing procedures might be used in these circumstances?

*Reply*—While a slight change in density of the coal might result in a change in computed quantity of coal on hand, the effect would most likely not be material in relation to the balance sheet or statement of operations of the utility

company. Perhaps, using the criteria of statistical sampling, the engineers would be willing to state that there is a X% probability that the quantity of coal is a certain amount plus or minus X% (or some other measure of variability).

#### **.05 Dates of Observation of Inventories Which Are Kept on Perpetual Records**

*Inquiry*—A retail dealer in tires and tubes has twenty-two stores. Each month the dealer takes inventory at two stores. The dealer's auditor has observed the inventory taking at ten locations. To avoid the need for extra help at year end, January 31, the auditor proposes to visit the remaining locations shortly after December 31 and:

- Count the tires on hand at that time
- Reconcile the count back to the daily report at December 31.

Do the above described procedures constitute an adequate observation of inventories?

*Reply*—Section 331.09-.14 of Statement on Auditing Standards No. 1 discusses evidential matter for inventories. Section 331.10 states:

When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor's observation procedures usually can be performed either during or after the end of the period under audit.

Presumably the dealer has the necessary perpetual records which allow the taking of inventory at two stores each month during the year. Therefore, the proposed procedures would be acceptable and meet the requirement for inventory observation.

#### **.06 Observation of Consignment Inventories Stored in Public Warehouse**

*Inquiry*—Corporation A sells supplies and equipment for manufacturing jewelry. Silver on consignment from a supplier is kept in a vault adjacent to where Corporation A keeps its silver inventory. The supplier employs an independent warehouse firm to protect the consigned silver. The bonded employee of the warehouse firm has sole access to the consignment silver and performs the duties of warehouse manager for Corporation A. The warehouse firm pays the salary of the bonded employee but is reimbursed by Corporation A. Since the possibility for substitutions between Corporation A's silver inventories and the consignment silver exists, the auditors of Corporation A, in conducting a physical observation of Corporation A's silver inventories, also want to conduct a physical observation of the consignment silver. Is it necessary for the auditors of Corporation A to observe the consignment silver?

*Reply*—SAS No. 1, section 331.14, and SAS No. 1 section 901.24-.28 (as amended by SAS No. 43) deal with controls and auditing procedures for owner's goods stored in public warehouses. Section 901.28 makes reference to section 331.14 which provides that obtaining direct confirmation from the custodian is acceptable, except that supplemental procedures are to be applied in cases where such inventories represent a significant proportion of the client's current assets or total assets. Among the steps recommended for the auditor to follow, to the extent considered necessary, is the observation of physical counts of the goods wherever practicable and reasonable.

Because of the relationship which Corporation A has with the warehouse and the bonded employee, and the possibility for substitutions of inventory between Corporation A and the supplier, the auditors should observe the consignment inventory and Corporation A's inventory at the same time.  
[Amended]

---

[The next page is 8671.]

## Section 8330

### ***Evidential Matter: Fixed Assets***

#### **.01 Verification of Real Estate Ownership**

*Inquiry*—What procedures may be followed in the verification of real property accounts? Is it sufficient to examine the documents involved in the purchase of the property, to examine the real estate tax bills, and to communicate with the holders of any mortgages or trusts secured by the property? Should the client be required to assume the expense of a title search by an attorney?

*Reply*—It is generally conceded that examination of public records which contain the history of transactions relating to realty, as well as the current status of that property, is normally the function of an attorney or title company rather than that of an auditor. Accordingly if it is feasible for the client to obtain a letter from an attorney or title company which defines the interest the company holds in the land based upon a title search, this appears to be the best evidence available as to title and encumbrances.

If this procedure is too costly, then the following other audit procedures may supply sufficient indicia of title as to enable the auditor to assume that the client does, in fact, own the land subject to named liens.

1. Compare legal description of land found in deed with that found in the title insurance policy, abstract of deed, tax receipts, etc.
2. Verify current payment of carrying expenses of land in question, such as insurance premiums, tax payments, payments to mortgagee, etc.
3. Examine any rent receipts which may show evidence of continuing ownership.
4. Visit the land in question, if this is practicable.
5. Request an attorney's letter describing any conveyances or encumbrances of real property that may have been effected during the period covered in the audit, as well as his opinion regarding present status of title.
6. Obtain statement from client as to condition of title and encumbrance.
7. Check municipal or county records for evidence of ownership.

Use of a property map in connection with undertaking these procedures would also be helpful.

#### **.02 Examination of Assets of a Rental Company**

*Inquiry*—A lessor is in the business of leasing autos, large trucks, tractors, and trailers. Is it necessary for the auditors to make physical observations of

the rolling stock which is scattered across the country? What other audit procedures might be employed in the verification of this equipment? Must the titles to all equipment be examined?

*Reply*—It is not necessary, unless some extraordinary situation or circumstances were brought to light, to examine titles to all the equipment. Random test verifications of title certificates or proper registration of vehicles should be made. The fact that the client is receiving rent for the vehicles and is currently making payments on its time-purchase contracts would also be verified in regular course. Any tax and insurance payments which the client is required to make in connection with the vehicles can be checked. Also, test confirmations of possession of vehicles with the lessee should be made. Audit responsibility would not necessarily extend to physical observation of the equipment at its numerous shifting locations.

---

[The next page is 8731.]

## Section 8340

### ***Evidential Matter: Confirmation Procedures***

#### **.03 Confirmation of Balances Due on Loans**

*Inquiry*—A bank arranges mortgage loans whereby the borrower instructs the bank to make payments to the contractor or developer. Payment booklets, which specify the periodic amounts due, are sent twice yearly to the borrower. In addition, each borrower receives an annual statement which shows his total yearly payments as well as the various yearly charges. Many of the debtors are unable to verify the correctness of the accrued charges and are unable to check the outstanding balances of their loans because of the complex interest rates. How can these loan balances be confirmed when the debtor cannot determine the total amount of the debt?

*Reply*—While the debtor may not be able to calculate the balance of the loan due, there are details of the loan which he should know and which can be confirmed. A request that the debtor confirm the original amount of the loan and the payments he has made would properly serve the purpose of a confirmation. Confirmation of the interest rate might also be requested as this affects the balance of the loan and should be known by the debtor.

#### **.09 Insurance Claims**

*Inquiry*—Should a CPA communicate with an insurance company, or the insurance company's attorneys, when trying to obtain evidence about insured claims outstanding against a client?

*Reply*—The CPA should obtain evidence about claims outstanding (1) from the client and (2) by communicating with the client's lawyer in accordance with SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AU 337). The CPA may encounter situations where neither the client nor the client's lawyer is able to provide sufficient information regarding outstanding claims handled by insurance companies. In those situations, he or she may consider communicating directly with the insurance company or its attorneys appropriate. [Amended]

#### **.10 Letter of Inquiry to Client's Attorney**

*Inquiry*—When a CPA requested a client to send a letter of inquiry to the client's attorney, the client objected because the attorney would charge for answering the letter of inquiry. The client also believed that an inquiry about legal matters was not necessary because it had not used the services of its attorney in the current year for any matters concerning litigation, claims or assessments. Rather, the client paid fees to its attorney in connection with other matters such as corporate registrations. Do generally accepted auditing standards require that a letter of inquiry be sent to the attorney?

*Reply*—No. SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims and Assessments* (AU 337), requires that a letter of inquiry be sent to those attorneys with whom management consulted concerning litigation, claims, and assessments. The auditor should obtain evidence about management's assertions by reviewing invoices received from the attorney and related

cash disbursements and correspondence files. If information contrary to management's assertion is discovered, the auditor should request management to send an inquiry letter to the attorney. Further, the auditor should consider the effects of the erroneous assertion on the ability to rely on other management representations.

In situations where no letter of inquiry is sent to the client's attorney, the auditor should consider including in the client representation letter a specific representation that no attorney had been consulted regarding litigation, claims, and assessments. [Amended]

### **.11 Receivables in Cash Basis Financial Statements**

*Inquiry*—If accounts receivable and escrow balances are included in modified cash basis financial statements, should the accounts receivable and escrow balances be confirmed?

*Reply*—The generally accepted auditing standards, including confirmation, that apply to financial statements prepared in conformity with generally accepted accounting principles apply to modified cash basis financial statements.

---

[The next page is 8991.]

## Section 8900

### ***Predecessor/Successor Auditors***

#### **.01 Communications Between Predecessor Accountant and Successor Auditor**

*Inquiry*—An accountant is engaged to audit the current year's financial statements of a company. In the prior year, the company's financial statements were reviewed by another accountant. Is the successor auditor required to communicate with the predecessor accountant?

*Reply*—No. SAS No. 84, *Communications Between Predecessor and Successor Auditors* (AU 315), footnote 3, states "When the most recent financial statements have been compiled or reviewed in accordance with the AICPA Statements on Standards for Accounting and Review Services, the accountant who reported on those financial statements is not a predecessor auditor. Although not required by this Statement, in these circumstances the successor auditor may find the matters described in paragraphs 8 and 9 useful in determining whether to accept the engagement."

#### **.02 Communications Between Predecessor and Successor Auditors**

*Inquiry*—A client has decided to restate, for comparative purposes, the statement of changes in financial position reported on by the predecessor auditor to a statement of cash flows. The predecessor's audit report will not be presented.

- (1) Must the successor auditor notify the predecessor auditor as part of his or her procedures to prepare or evaluate restatements permitted or mandated by new accounting standards?
- (2) How will the restatement affect the successor auditor's report?

*Reply*—SAS No. 84, *Communications Between Predecessor and Successor Auditors*, paragraph 21 (AU 315.21), states:

If during an audit, the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should request that the client inform the predecessor auditor of the situation and to arrange for the three parties to discuss this information and attempt to resolve the matter.

In cases where revisions result from an accounting change required or permitted by a new FASB or AICPA Pronouncement, the successor auditor is not required to consult with the predecessor auditor. However, the successor may find that communication with the predecessor auditor is desirable in order to obtain any additional information and/or workpapers that may be needed to prepare or evaluate the restatement. To maintain audit efficiency, such communications may be made as part of the successor auditor's routine request for review of selected workpapers.

SAS No. 58, *Reports on Audited Financial Statements*, paragraph 83, as amended by SAS No. 64, *Omnibus Statement on Auditing Standards—1990* (AU 508.83), provides guidance for the form and content of the successor auditor's report when the prior period statements have been restated. Additional language may also be included if the successor auditor wishes to comment on the appropriateness of the restatement. Additional illustrations may be found in the AICPA Financial Report Survey, "Illustrations of Departures From the New Standard Auditor's Report on Financial Statements of Business Enterprises" (June 1990), pages 49–50.

### **.03 Communications With a Predecessor Auditor Who Has Ceased Operations<sup>1</sup>**

*Inquiry*—SAS No. 84, *Communications Between Predecessor and Successor Auditors*, paragraph 3, requires a successor auditor to attempt certain communications with the predecessor auditor prior to acceptance of an engagement. How should a successor fulfill this responsibility when the predecessor has ceased operations?

*Reply*—Even when the predecessor has ceased operations, SAS No. 84 obligates a successor to attempt certain communications with the predecessor prior to acceptance of an engagement. The successor should attempt the required communications, about matters that the successor believes will assist him or her in determining whether to accept the engagement, with the individual who had final responsibility for the audit (for example, the engagement partner). If the successor is unable to communicate with that individual or receives a limited response, the successor should consider the implications in deciding whether to accept the engagement.

### **.04 Unavailability of the Working Papers of a Predecessor Auditor Who Has Ceased Operations**

*Inquiry*—A successor auditor must obtain sufficient competent evidential matter to afford a reasonable basis for expressing an opinion on the financial statements under audit. The successor's audit may be facilitated by reviewing the predecessor auditor's working papers. What is the effect on the successor's audit when the working papers of a predecessor who has ceased operations are not available for review?

*Reply*—Sufficient competent evidential matter to afford a reasonable basis for expressing an opinion on the financial statements includes sufficient evidence about matters of continuing audit and accounting significance, such as beginning balances, consistency in the application of accounting principles and contingencies. When the working papers of a predecessor who has ceased operations are not available, the evidence normally obtained by reviewing the working papers must be obtained by performing other audit procedures. If the successor is unable to obtain sufficient competent evidential matter to express an opinion on the financial statements, the successor should qualify or disclaim an opinion because of the inability to perform procedures that the successor considers necessary in the circumstances, not because of the unavailability of the predecessor's working papers.

---

<sup>1</sup> SSARS 4, *Communication Between Predecessor and Successor Accountants*, provides guidance to a successor accountant who decides to communicate with a predecessor accountant regarding acceptance of an engagement to compile or review the financial statements of a nonpublic company. In situations in which the predecessor has ceased operations and the successor decides to engage in such communications, the guidance in this paragraph may be useful.

**.05 Significant Audit Procedures Performed by a Predecessor Auditor Who Has Ceased Operations**

*Inquiry*—If a predecessor auditor has performed significant audit procedures, such as the observation of inventory or the confirmation of accounts receivable, and subsequently has ceased operations, to what extent may this work be used by the successor auditor?

*Reply*—Because a report on the financial statements has not been issued by the predecessor and the successor cannot complete the procedures required by SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors*, the successor can neither assume responsibility for the work of the predecessor nor issue a report that reflects divided responsibility for the audit, as described in SAS No. 1, section 543. The successor must perform audit procedures sufficient to afford a reasonable basis for an opinion on the financial statements under audit. However, review of the predecessor's working papers may have an effect on the nature, timing and extent of those procedures.

**.06 Successor Auditor Becomes Aware of Information That Leads Him or Her to Believe That Financial Statements Reported On by a Predecessor Auditor Who Has Ceased Operations May Be Materially Misstated**

*Inquiry*—What actions should a successor auditor take when he or she becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor auditor who has ceased operations may be materially misstated?

*Reply*—When the successor becomes aware of information that leads him or her to believe that the financial statements reported on by a predecessor who has ceased operations may be materially misstated, the successor should advise management of the information and request that management determine whether the financial statements require restatement. In making such a determination, management may find it useful to discuss the information with the individual who had final responsibility for the audit of those financial statements (for example, the engagement partner). If management determines that the financial statements require restatement, the successor should request that management disclose the information to the party responsible for winding up the affairs of the predecessor firm. The successor also should request that management consider whether action should be taken to prevent future reliance on the financial statements.

If, in the successor's judgment, management does not respond appropriately to his or her requests, the successor should advise the audit committee, or others with equivalent authority and responsibility, regarding the information and management's response. If, in the successor's judgment, the audit committee does not respond appropriately to his or her communication, the successor should consider resigning as the entity's auditor. The successor would be well advised to consult with his or her attorney in determining an appropriate course of action.

**.07 Reports on Audited Financial Statements Presented With Prior-Period Financial Statements Audited by a Predecessor Auditor Who Has Ceased Operations**

*Inquiry*—If the prior-period financial statements audited by a predecessor auditor who has ceased operations are presented for comparative purposes with current-period audited financial statements, how is the successor auditor's report affected?

*Reply*—The answer depends on (1) whether the prior-period financial statements have been restated and (2) whether the entity files annual financial statements with the Securities and Exchange Commission (SEC).

- a. If the prior-period audited financial statements are *unchanged*, the successor should indicate in the introductory paragraph of his or her report (1) that the financial statements of the prior period were audited by another auditor, (2) the date of the predecessor's report, (3) the type of report issued by the predecessor, and (4) if the report was other than a standard report, the substantive reasons therefor. SAS No. 58, *Reports on Audited Financial Statements*, paragraph 74, indicates that the successor should not name the predecessor in the report. An example of the reference that would be added to the introductory paragraph of the successor's report is presented below.

The financial statements of ABC Company as of December 31, 19X1, were audited by other auditors whose report dated March 31, 19X2, expressed an unqualified opinion on those statements.

A reference to the predecessor's report should be included even when the predecessor's report on the prior-period financial statements is reprinted and accompanies the successor's report, because reprinting does not constitute reissuance of the predecessor's report in accordance with SAS No. 58, paragraph 71.

- b. If the prior-period financial statements *have been restated*, the successor should follow the guidance in the preceding point *a*, indicating that the predecessor reported on the financial statements of the prior period before restatement. In addition, the successor should consider the guidance in paragraph .06.

If the successor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor may report on the adjustments in accordance with the guidance in SAS No. 58, paragraph 74 (AU 508.74). In determining the nature, timing and extent of procedures, the successor should consider that a predecessor who has ceased operations cannot perform the procedures to evaluate the appropriateness of the restatement adjustments as described in SAS No. 1, section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

If the successor does not perform sufficient procedures to satisfy himself or herself as to the restatement adjustments, the note to the financial statements describing the restatement adjustments should be marked *unaudited*.

- c. If the entity files annual financial statements with the SEC, the SEC staff has indicated that, in annual reports (on Form 10-K and to shareholders), the predecessor's report on the prior-period financial statements should be reprinted with a legend, in lieu of the manual signature, indicating (1) that the report is a copy of the report issued by the predecessor and (2) that the predecessor has discontinued performing auditing and accounting services, and, if applicable, that it has filed for protection from creditors under the Bankruptcy Code. A sample legend, for cases in which the predecessor has filed for bankruptcy, is presented below.

The report that appears below is a copy of the report issued by the company's previous independent auditor [name of firm]. That firm has filed for protection from creditors under Chapter 11 of the Bankruptcy Code on [date], and has discontinued performing auditing and accounting services.

The successor should refer to the predecessor's report in his or her report, as described in the preceding point *a*. If the prior-period financial statements have been restated, the SEC staff has indicated that it is ordinarily sufficient for the successor to audit only the restatement adjustments and report on them in accordance with the guidance in the preceding point *b*; in unusual circumstances, the restated prior-period financial statements may have to be audited.

**.08 Reports on Audited Financial Statements of a Nonpublic Entity Presented With Prior-Period Financial Statements Compiled or Reviewed by a Predecessor Accountant Who Has Ceased Operations**

*Inquiry*—If the prior-period financial statements that have been compiled or reviewed by a predecessor accountant who has ceased operations are presented for comparative purposes with current-period audited financial statements, how is the successor auditor's report affected?

*Reply*—The answer depends on whether the prior-period financial statements have been restated.

- a.* If the prior-period financial statements are unchanged, the successor's report should make reference in a separate paragraph to the predecessor's report on the prior-period financial statements. This paragraph should include (1) a statement of the service performed in the prior period, (2) a statement that the predecessor has ceased operations, (3) the date of the report on the service performed, (4) a description of any modifications of that report, and (5) a statement that the service was less in scope than an audit and does not provide the basis for the expression of an opinion on the financial statements taken as a whole. Reference to the predecessor's report should not include the name of the predecessor. Examples of additional paragraphs for compiled and reviewed prior-period financial statements are presented below.

*Compiled Prior Period Financial Statements*

The 19X1 financial statements were compiled by other accountants who have ceased operations, and their report thereon, dated February 1, 19X2, stated they did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

*Reviewed Prior-Period Financial Statements*

The 19X1 financial statements were reviewed by other accountants who have ceased operations, and their report thereon, dated March 1, 19X2, stated they were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

- b. If the prior-period financial statements *have been restated*, the restated prior-period financial statements should be compiled, reviewed, or audited and reported on accordingly. In addition, the successor should consider the guidance in paragraph .06.

**.09 Reports on Compiled or Reviewed Financial Statements Presented With Prior-Period Financial Statements Compiled, Reviewed, or Audited by a Predecessor Accountant Who Has Ceased Operations**

*Inquiry*—If prior-period financial statements that have been compiled, reviewed, or audited by a predecessor accountant who has ceased operations are presented for comparative purposes with current-period compiled or reviewed financial statements, how is the successor accountant's report affected?

*Reply*—The answer depends on whether the prior-period financial statements have been restated.

- a. If the prior-period financial statements were *compiled or reviewed and are unchanged*, the successor should add a paragraph to his or her report on the current-period financial statements that includes (1) a statement that the financial statements of the prior period were compiled or reviewed by another accountant who has ceased operations, (2) the date of the predecessor's report, (3) a description of the standard form of disclaimer or limited assurance, as applicable, included in the report, and (4) a description or a quotation of any modifications of the standard report and of any paragraphs emphasizing a matter regarding the financial statements. Reference to the predecessor's report should not include the name of the predecessor. Examples of additional paragraphs for compiled and reviewed prior-period financial statements are presented below.

*Compiled Prior-Period Financial Statements*

The 19X1 financial statements of XYZ Company were compiled by other accountants who have ceased operations and whose report dated February 1, 19X2, stated that they did not express an opinion or any other form of assurance on those statements.

*Reviewed Prior-Period Financial Statements*

The 19X1 financial statements of XYZ Company were reviewed by other accountants who have ceased operations and whose report dated March 1, 19X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

If the prior-period financial statements were *audited and are unchanged*, the successor should add a paragraph to his or her report on the current-period financial statements that indicates (1) that the financial statements of the prior period were audited by another accountant who has ceased operations, (2) the date of the predecessor's report, (3) the type of opinion issued by the predecessor, (4) if the opinion was other than unqualified, the substantive reasons therefor, and (5) that no auditing procedures were performed after the date of the predecessor's report. Reference to the predecessor's report should not include the name of the predecessor. An example of such a paragraph is presented below.

The financial statements for the year ended December 31, 19X1, were audited by other accountants who have ceased operations, and they expressed an unqualified opinion on them in their report dated March 1, 19X2, but they have not performed any auditing procedures since that date.

- b. If the prior-period financial statements *have been restated*, the restated prior-period financial statements should be compiled, reviewed or audited and reported on accordingly. In addition, the successor should consider the guidance in paragraph .10.

**.10 Successor Accountant's Responsibilities Under SSARSs When He or She Becomes Aware That Prior-Period Financial Statements Reported On by a Predecessor Accountant Who Has Ceased Operations May Require Revision**

*Inquiry*—SSARS No. 4, *Communications Between Predecessor and Successor Accountants*, paragraph 10, provides guidance to a successor accountant who, during an engagement to compile or review current-period financial statements, becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor accountant may require revision. SSARS 4, paragraph 10 states that the successor should request that his or her client communicate this information to the predecessor. How may the successor fulfill this responsibility when the predecessor has ceased operations?

*Reply*—When the successor becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor accountant may require revision, the successor should request that the client advise the party responsible for winding up the affairs of the predecessor firm. If the client refuses to communicate with the predecessor or if the successor is not satisfied with the predecessor's course of action, the successor would be well advised to consult with his or her attorney.

## Section 9210

### Accounting Changes

#### .02 Change in Accounting for Pre-Operating Costs

*Inquiry*—A client, whose stock is not presently traded publicly, anticipates making a public offering. The offering probably would occur sometime after the end of the fiscal year.

The client presently defers pre-operating costs of new retail stores. They wish to change the method of accounting for preoperating cost to expensing such costs as they are incurred.

May the client restate the prior year's financial statements under the provisions of APB Opinion No. 20, *Accounting Changes*, paragraph 29 (AC A06.125 and A35.114)?

*Reply*—The special exemption provisions of APB Opinion No. 20, paragraph 29 (AC A06.125 and A35.114), apply only to those cases where there is a "forthcoming public offering" of shares of equity security of a company. The Board concluded in such cases that the "financial statements for all prior periods presented may be restated retroactively . . ." The exemption is available only once for changes made at the time a company's financial statements are first used for any of the purposes stated in the paragraph.

If the client makes the change in its financial statements for the current year, the provisions of APB Opinion No. 20 (AC A06) which require cumulative effect reporting should be applied. APB Opinion No. 20, paragraph 29 (AC A06.125 and A35.114), would be applicable at the time the client began to prepare its financial statements in connection with the public offering. At that time, the prior years presented in the registration statement would have to be restated. In this connection, normally more than one prior year's income statement is required. The client would not be precluded from making the change in the current year, but accounting for the change would be different.

#### .03 Change in Service Lives of Fixed Assets

*Inquiry*—A reevaluation of the lives of depreciable property resulted in an increase in the remaining lives of certain properties. The company would like to include the cumulative, net of tax, effect of this change in income. Is this in accordance with generally accepted accounting principles?

*Reply*—APB Opinion No. 20, *Accounting Changes* (AC A06), is quite specific regarding the treatment of changes in estimated service lives of depreciable assets. Such a change is considered a change in an accounting estimate and should be recorded prospectively, that is, in the period of the change and future periods as appropriate. Therefore, the proposed accounting would not be in accordance with generally accepted accounting principles. If the change in service lives of depreciable property were accounted for as suggested, the independent auditors would have to issue a qualified or adverse opinion depending upon materiality of the item.

**.09 Change in Reporting Entity**

*Inquiry*—SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraphs 7 through 9 (AU 420.07–.09), discusses the applicability of the consistency standard to a change in the reporting entity, which is a special type of change in accounting principle. Are SAS No. 1, section 420, paragraphs 7(b) and (c) (AU 420.07(b) and (c)), which state that a change in reporting entity results when there is a change in the specific entities included in consolidated or combined financial statements, and paragraph 9 (AU 420.09), which states that “a change in reporting entity does not result from the creation, cessation, purchase or disposition of a subsidiary,” contradictory?

*Reply*—No. The creation, cessation, purchase, or disposition of a subsidiary or other business unit is a factual change in the legal structure of the entity and therefore does not require recognition in the auditor’s report. Changes that require recognition in the auditor’s report are those that can be arbitrarily made by management.

**.10 Change From Generally Accepted Accounting Principles (GAAP) to An Other Comprehensive Basis of Accounting (OCBOA) or From OCBOA to GAAP**

*Inquiry*—A company that has previously issued financial statements prepared in accordance with GAAP has decided to change to the income tax basis (or vice versa). How should the change in accounting basis be accounted for and reported in the financial statements and how does the change impact the auditor’s or accountant’s report?

*Reply*—Accounting issues:

Authoritative literature does not address accounting for a change in accounting basis. APB Opinion No. 20, *Accounting Changes* (AC A06), provides guidance for reporting accounting changes within the same basis. However, the situation described above is considered to be a change in accounting basis rather than an accounting change.

When only current year financial statements are presented, it is common practice to present the effect of the change in the accounting basis by showing beginning retained earnings as previously reported with an adjustment to convert to the new basis. Although not as common in practice, precedent also exists for either showing opening retained earnings on the new basis or showing the effects of the change as a cumulative-effect adjustment in the income statement.

However, if comparative financial statements are presented, the prior year(s) should be restated and presented under the basis to which the company has changed. Restatement is necessary to ensure comparability with all periods presented.

In both cases, the change in accounting basis should be disclosed in the notes to the financial statements.

—Reporting issues:

Auditing literature states that a change in accounting basis does not represent a lack of consistency and, consequently, that report modification is not required. However, the literature allows for the inclusion of an explanatory paragraph in the auditor’s report to emphasize a matter regarding the financial statements.

A summary of the relevant authoritative references follows:

SAS No. 58, *Reports on Audited Financial Statements*, as amended, paragraph 16 (AU 508.16)—*Lack of Consistency*, indicates that the consistency reference in the auditor's report refers to consistent application of principles within a basis of presentation. The standards do not address the consistent use of a basis of presentation; therefore, a change in accounting basis does not require the auditor to modify the report for a lack of consistency.

Also, SAS No. 62, *Special Reports*, as amended, footnote 35 (AU 623.31, footnote 35)—*Circumstances Requiring Explanatory Language in an Auditor's Special Report*, indicates that a change from GAAP to an OCBOA does not represent a lack of consistency in accounting principles and states, in part, that an auditor may wish to add an explanatory paragraph to highlight a difference in the basis of presentation in the current year from that used in the prior year. Footnote 35 (AU 623.31, footnote 35) does not address changes from an OCBOA to GAAP or whether an explanatory paragraph is suggested for both single-period and comparative statements. However, the auditor may consider adding an explanatory paragraph in each of these situations.

SAS No. 58, paragraph 19 (AU 508.19), indicates that an auditor reporting on GAAP financial statements may wish to emphasize an accounting matter affecting the comparability of financial statements with those of the preceding period. SAS No. 62, paragraph 31 (AU 623.31) provides that an auditor reporting on OCBOA statements may wish to modify the report to emphasize a matter similar to reporting on GAAP statements.

A sample explanatory paragraph for an audit report on comparative financial statements in the year of change to an OCBOA follows:

(explanatory paragraph)

As discussed in Note A to the financial statements, in 19X4 the Company adopted a policy of preparing its financial statements on the accrual method of accounting used for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles. Accordingly, the accompanying financial statements are not intended to present financial position and results of operations in conformity with generally accepted accounting principles. The financial statements for 19X3 have been restated to reflect the income tax basis of accounting accrual method adopted in 19X4.

Accountants performing review or compilation engagements may also consider adding an explanatory paragraph for these basis changes. [Amended February 1995.]

## **.12 Comparative Statements From Equity Method to Consolidation**

*Inquiry*—In 19X1, a nonpublic entity owned 40 percent of a subsidiary and accounted for the subsidiary using the equity method. During 19X2, the entity acquired an additional 30 percent of the subsidiary and prepared consolidated financial statements. When presenting comparative financial statements for 19X1 and 19X2, should the 19X1 statements be restated from the equity method to a consolidated basis for comparability with 19X2?

*Reply*—No. ARB No. 51, *Consolidated Financial Statements*, paragraph 10 (AC C51.111), discusses the accounting for step-acquisitions for nonpublic entities, and implies that consolidated financial statements are presented only in the year an entity obtains control of a subsidiary.

---

[The next page is 9751.]

## Section 9320

### Uncertainties

#### .06 Possible Effect of Divorce Proceedings on Credit Rating

*Inquiry*—A client and his wife who are co-owners and co-managers of a business are involved in divorce proceedings. The auditor believes a divorce will adversely affect the business's credit rating. Is it necessary to include a reference in the financial statements to the divorce proceedings and their potentially adverse effects?

*Reply*—The auditor should not include references in his report to currently litigated divorce proceedings. The independent auditor should refrain from mentioning the client's involvements of a personal nature which might effectively disparage (or even stimulate the slander of) his business reputation or credit standing. It is possible that a divorce settlement could adversely affect the credit standing of the client, but in the absence of a final determination of the litigation or a determinative event which directly affects the financial condition of the entity under audit, the rule of informative disclosure does not compel the independent accountant to contribute in advance to a possible adverse effect on the client's credit standing.

#### .08 Going Concern Problem—Financial Statements Prepared on the Income Tax Basis of Accounting

*Inquiry*—A client prepares its financial statements on the income tax basis of accounting. The client is experiencing financial difficulties and its ability to continue as a going concern is questionable. Since the financial statements are prepared on "an other comprehensive basis of accounting," must the CPA's audit report include an explanatory paragraph that refers to this uncertainty?

*Reply*—Yes. SAS No. 62, *Special Reports*, paragraph 31b (AU 623.31b), states:

If the auditor has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statements, the auditor should add an explanatory paragraph after the opinion paragraph of the report only if the auditor's substantial doubt is relevant to the presentation.

SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU 341), applies to audits of financial statements prepared either in accordance with generally accepted accounting principles (GAAP) or in accordance with other comprehensive bases of accounting. Therefore, when the auditor concludes that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period, regardless of the basis of accounting, the auditor should include an explanatory paragraph (following the opinion paragraph) to reflect that conclusion. [Amended]

#### .09 Audit Report for Development Stage Enterprise

*Inquiry*—Is an explanatory paragraph in the auditor's report for a going concern uncertainty always required for a development stage enterprise because there is doubt as to recovery of costs from future operations?

*Reply*—No. A going concern uncertainty does not automatically arise because an enterprise is in the development stage. In accordance with SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU 341), the auditor should consider whether the results of the procedures performed (in planning, gathering evidence relative to the various audit objectives, and completing the audit) identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If such conditions or events are identified, the auditor should consider management's plan to deal with the adverse effects of the conditions and events (such as financing or additional capital infusion), and assess the likelihood that such plans can be effectively implemented.

If the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for one year after the balance sheet date remains after considering conditions, events and management's plans, the going concern issue should be adequately disclosed in the financial statements, and the auditor's report should include an explanatory paragraph to reflect this conclusion. [Amended]

---

[The next page is 9851.]

## Section 9330

### ***Subsequent Events***

#### **.01 Failure to Remit Withholding Taxes in Subsequent Period**

*Inquiry*—In the course of an examination of the financial statements, the auditor has discovered that in the period subsequent to the balance sheet date the company has not remitted to the appropriate agencies the taxes currently withheld from employees' wages. Assuming the amount is material, is it necessary that this matter be disclosed in the auditor's report?

*Reply*—Section 560.03 of Statement on Auditing Standards No. 1 states in part:

The first type [of subsequent events] consists of those events that provide additional evidence with respect to conditions that existed at the date of the balance sheet and affect the estimates inherent in the process of preparing financial statements . . . . The financial statements should be adjusted . . . .

Section 560.05 of SAS No. 1 states in part:

The second type consists of those events that provide evidence with respect to conditions that did not exist at the date of the balance sheet being reported on but arose subsequent to that date. These events should not result in adjustment of the financial statements. Some of these events, however, may be of such a nature that disclosure of them is required to keep the financial statements from being misleading.

Even if it is determined that the financial statements are not directly affected, it is possible that the situation indicated future serious difficulties that might require disclosures.

If the delinquent obligations are not evidence of serious financial difficulties, there usually would be no reason why obligations incurred subsequent to the balance sheet date need be reported in financial statements as of such date. In such a case, it should be expected that the delinquent payments will soon be remitted. [Amended]

#### **.02 Disclosure of Note Receivable Covering Previous Account of Bankrupt Company**

*Inquiry*—Company A reports on a fiscal year ending January 31. Company A's accounts receivable include a material amount due from a bankrupt company. To avoid legal action, several individuals formed a new company. The new company and the individuals signed a note which would pay the accounts receivable of the bankrupt company over a three year period. The note was signed on March 1, subsequent to the balance sheet date. Should the note receivable, assumed to be collectible, be presented in the balance sheet at January 31?

*Reply*—Section 560 of Statement on Auditing Standards No. 1 deals with subsequent events. Paragraph 560.07 states, "Subsequent events affecting the realization of assets such as receivables and inventories or the settlement of estimated liabilities ordinarily will require adjustment of the financial statements . . . because such events typically represent the culmination of condi-

tions that existed over a relatively long period of time." Accordingly, the accounts receivable should be reported as a note receivable at January 31, with adequate disclosure of the financial arrangements made after the balance sheet date.

### **.03 Discovery of Potential Liability in Subsequent Period**

*Inquiry*—In the period subsequent to the balance sheet date, the auditors discovered that an employee of the client had used a company purchase order to obtain merchandise for his personal business. This transaction resulted in a material potential liability of the client. Negotiations with the creditor ensued and the client's attorney was successful in securing a complete release from any obligation on the part of the client.

Is it necessary to disclose this matter on the client's financial statements?

*Reply*—According to section 560.03-.04 of Statement on Auditing Standards No. 1, the resolution of this matter appears to constitute a subsequent event which is evidence of a condition that existed at the balance sheet date, but since no transaction in fact occurred which involved the client, it is not necessary to disclose the matter in the financial statements. However, a condition which did affect the client and which did exist at the balance sheet date is the future legal costs of settling the matter. Provisions for these costs (if they are material) should be made on the financial statements, and the reasons for incurring these costs should be disclosed.

### **.04 Settlement of Pending Litigation in Subsequent Period**

*Inquiry*—The field work for an audit of financial statements for a year ended December 31 was completed on May 22. Pending litigation on December 31, in which the client was the plaintiff, was settled on May 10, resulting in a gain to the client. Should the settlement be recognized in the financial statements for the year ended December 31, in accordance with SAS No. 1, section 560, *Subsequent Events*, as a type I subsequent event?

*Reply*—No. SAS No. 1, section 560, applies only to loss contingencies, not gain contingencies. The settlement should be recognized on May 10, because the settlement occurred on that date. FASB Statement No. 5, *Accounting for Contingencies*, paragraph 17, states, "Contingencies that might result in gains usually are not recorded in the accounts since to do so might be to recognize revenue prior to its realization. Adequate disclosure shall be made of contingencies that might result in gains but care shall be exercised to avoid misleading implications as to likelihood of realization."

---

## Section 9410

### ***Audited Financial Statements***

#### **.02   Going Concern Assumption for Venture With Limited Life**

*Inquiry*—A corporation has recently been organized with the sole purpose of constructing a shopping center which will take several years to complete, after which the company will be liquidated. The company uses the completed contract method to recognize income and will have only one operating cycle.

Should there be an explanatory paragraph in the auditor's report now or near the final years of operations on the assumption that after a certain fixed period it will no longer be a "going concern"?

*Reply*—SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, requires that an explanatory paragraph (following the opinion paragraph) be included in the audit report when the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. A reasonable period of time is defined as "a period of time not to exceed one year beyond the date of the financial statements being audited." Therefore, when the auditor has substantial doubt that the corporation will continue as a going concern for one year from the date of the financial statements under audit, an explanatory paragraph (following the opinion paragraph) reflecting that conclusion should be included in the audit report.

However, if the corporation has presented its financial statements on the assumption of liquidation, SAS No. 59 does not apply and therefore an explanatory paragraph reflecting the auditor's conclusion that substantial doubt exists about the corporation's ability to continue as a going concern is not necessary. [Amended]

#### **.03   Opinion on Balance Sheet Only**

*Inquiry*—Occasionally, a client will request from a CPA only an audited balance sheet with footnotes even though the CPA has examined and reported on all the financial statements. The usual purpose of this statement is for presentation by the client to a supplier for securing credit.

In complying with such a request, one CPA furnishes the client with the balance sheet, the notes to all the financial statements, and the following report:

We have audited the accompanying balance sheet of X Company as of December 31, 19XX. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence support-

ing the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 19XX, in conformity with generally accepted accounting principles.

Does such a practice satisfy the CPA's reporting obligation according to SAS No. 58, *Reports on Audited Financial Statements*?

*Reply*—SAS No. 58, paragraphs 33 and 34, permit the expression of an opinion on a balance sheet only. In expressing such an opinion, the explanatory and scope paragraphs need not refer to the audit of related statements which are not being presented. The only information necessary to the readers of this report would concern the audit of the balance sheet.

The notes to the financial statements which do not pertain to the balance sheet should be omitted. However, if depreciable property is a significant portion of assets, the disclosures required by APB Opinion No. 12, *Omnibus Opinion—1967*, paragraph 5, should be considered necessary for fair presentation of the balance sheet. Disclosure as to pension plans, except for the amount of expense for the current year, would also be appropriate. [Amended]

#### **.04 Opinion on Balance Sheet With Disclaimer on Income Statement**

*Inquiry*—A CPA firm has been engaged to perform the initial audit of a company. Since the firm did not observe the inventory taking at the beginning of the period and it is not practicable for it to satisfy itself by other means as to the beginning inventory, the firm plans to issue an opinion only on the balance sheet and disclaim an opinion on the income statement. Would this be in accordance with SAS No. 58, *Reports on Audited Financial Statements*, paragraph 33?

*Reply*—Since the engagement involves a scope limitation, SAS No. 58, paragraph 33, does not apply because that pertains to audits that are unrestricted. SAS No. 58, paragraph 5, however, would apply and concludes, "The auditor may express an unqualified opinion on one of the financial statements and express a qualified or adverse opinion or disclaim an opinion on another if the circumstances warrant." If the independent auditor has not satisfied himself by means of other auditing procedures with respect to opening inventories, he should either qualify or disclaim an opinion on the income statement.

If an opinion is disclaimed on the income statement, a disclaimer on the statement of cash flows would also be required as illustrated in SAS No. 58, paragraph 67. [Amended]

#### **.06 Reference in Financial Statements to Auditor's Report**

*Inquiry*—Audited financial statements often contain a note such as:

The accompanying notes are an integral part of this financial statement.  
or a note sometimes reads

The accompanying notes and auditor's report are an integral part of this financial statement.

The only difference between the two notes is the inclusion of the phrase, "and auditor's report." Is a reference to the auditor's report necessary?

*Reply*—SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph 2, as amended by SAS No. 58, *Reports on Audited Financial Statements*, in discussing the distinction between responsibilities of the auditor and management states, “The financial statements are management’s responsibility.” Therefore, the auditor’s report cannot be an integral part of the financial statements, and it is inappropriate to include it by reference. [Amended]

#### **.09 Arrangement of References to Financial Statements in Auditor’s Report**

*Inquiry*—The examples of auditor’s opinions in the Statements on Auditing Standards all seem to refer to the statement of financial position first, followed by the statement of results of operations, and finally the statement of cash flows. Is it necessary that the financial statements be presented in this order and the statements be referred to in the auditor’s report in this order?

*Reply*—The order in which the financial statements are referred to in the independent auditor’s report need not follow the order in which the statements are physically arranged. The suggested standard report such as shown in SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08), can be used regardless of the order in which the financial statements are presented. [Amended]

#### **.13 Classification of Certain Callable Obligations**

*Inquiry*—In some situations in which there is a violation of a debt agreement that makes a long-term obligation callable, management continues to classify the obligation as long-term because it asserts that it is probable that the violation will be cured during the grace period, while the auditor does not agree with that assertion. In such a situation, does an uncertainty exist that might cause the auditor to add an explanatory paragraph (after the opinion paragraph) to his report?

*Reply*—No. FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor* (AC B05), requires that long-term obligations be classified as current liabilities if they are, or will be, callable because of the debtor’s violation of a provision of the debt agreement unless certain conditions are met. These conditions occur when (1) the creditor waives or loses the right to demand payment for more than one year from the balance sheet date or (2) it is probable that the violation will be cured within the grace period specified in the loan agreement.

The circumstances described above do not constitute an uncertainty as described in SAS No. 58, *Reports on Audited Financial Statements* (AU 508), because they do not involve matters expected to be resolved at a future date (SAS No. 58, paragraph 29 (AU 508.29)). If the auditor, on the basis of evidence available to him, disagrees with management’s assertion, a qualified (“except for”) or adverse opinion because of a departure from generally accepted accounting principles should be considered. [Amended]

#### **.14 Compilation of Supplementary Schedules in Audited Financial Statements**

*Inquiry*—When supplementary schedules are included with audited financial statements in an auditor-submitted document, can these schedules be compiled in accordance with SSARS 1, *Compilation and Review of Financial Statements*, paragraph 43 (AR 100.43)?

*Reply*—No. It would not be appropriate to refer to the accounting and review services literature to report on the accompanying information in this situation. If such schedules accompany financial statements audited in accordance with generally accepted auditing standards, the guidance in SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AU 551), should be followed. SAS No. 29, paragraph 6d (AU 551.06d), states that the auditor should either express or disclaim an opinion on the information, depending on whether it has been subjected to the auditing procedures applied in the audit of the basic financial statements.

### **.15 Condensed Financial Statements of a Nonpublic Entity**

*Inquiry*—A client prepares condensed financial statements that name the auditor and state that they have been derived from audited financial statements. The condensed statements incorporate the audited financial statements by reference and indicate such statements and auditor's report thereon may be obtained. Must the auditor report on the condensed financial statements?

*Reply*—SAS No. 42, *Reporting on Condensed Financial Statements and Selected Financial Data*, paragraph 7 (AU 552.07), states that an auditor need not report on the condensed financial statements provided they are included in a document containing audited financial statements or incorporating such statements by reference to information filed with a regulatory agency. Many accountants believe that if the condensed financial statements of a nonpublic entity refer to the audited statements and location where they may be obtained, an auditor need not report on such condensed statements.

---

[The next page is 10,551.]

## Section 9430

### ***Signing and Dating Reports***

#### **.01 Use of Successor Firm Name in Signing Registration Statement**

*Inquiry*—A CPA firm has been requested to provide an opinion on the consolidated financial statements of a client covering a five-year period. During this five-year period, the CPA firm has undergone several changes in its organization and its name:

1. Opinions for the first two years were issued by John Doe & Co.
2. In the third year, the accounting practice merged with another firm and the opinions for years three and four were signed by Doe, Roe & Co. Primary responsibility for the client was retained by the partners of John Doe & Co.
3. This partnership was later dissolved and the opinion in year five was signed by John Doe & Co., who, under the dissolution agreement, retained the working papers for this client.

Since it is impracticable to obtain the consent of each partner of the dissolved partnership, may the opinion on the five-year statements be issued by John Doe & Co.?

*Reply*—This situation is discussed in Statement on Auditing Standards No. 58, *Reports on Audited Financial Statements*, footnote 21 (AU 508.65, footnote 21). Since the partners of John Doe & Co., as it presently exists, retained primary responsibility for the publicly held company in question during the merger period, and since the firm is a successor in interest to the engagement and has retained all working papers for this client, it appears that, after consideration of these circumstances, the statements of consolidated income for the five-year period may be released solely in the name of John Doe & Co. [Amended]

#### **.02 Reporting on Companies With Different Fiscal Years**

*Inquiry*—A CPA has a client whose fiscal year ends on June 30. A parent company of this client now wishes to go public and must file consolidated financial statements with the SEC. The parent company, however, observes a fiscal year ending on December 31.

The CPA has been asked by the parent to provide financial statements with an auditor's opinion for the year ending December 31, 19X3. To do this, the auditor must assemble figures for the period January 1, 19X3, to June 30, 19X3, from the financial statements for the year ended June 30, 19X3, and figures for the period July 1, 19X3, to December 31, 19X3, from the financial statements for the year ended June 30, 19X4.

The CPA has been having difficulty in segregating the financial information into these six-month periods because of the condition of the accounting records. Furthermore, the inventories were not observed nor were the receivables confirmed at the December 31 dates.

Under these conditions, should the CPA express his opinion for the year ended June 30, 19X3, and disclaim an opinion for the six months ended December 31, 19X3?

*Reply*—In order for an auditor to express an opinion on financial statements for prior periods, it is generally not necessary to observe all audit procedures required for the most recent financial statements. SAS No. 58, *Reports on Audited Financial Statements*, paragraph 24, footnote 13 (AU 508.24, footnote 13) (in referring to absence of confirmation of receivables and observation of inventories) indicates that the omission of these procedures at the beginning of the year is not required to be disclosed in situations where the independent auditor has satisfied himself by other auditing procedures. However, he may wish to disclose the circumstances of the engagement and briefly describe the other procedures.

Generally, if the client's records are reasonably well kept and the auditor has satisfied himself as to year-end financial statements, review of ratios of sales to cost of sales and determination that accruals have been properly recognized at the interim date will enable an auditor to satisfy himself that the financial statements at an intervening interim date are fairly presented. On the other hand, if no perpetual inventory records are kept and if the client has not prepared inventories as of the interim date, it may not be practicable to reconstruct such inventory, and a disclaimer of opinion must be expressed on the reconstructed statements. In such circumstances, it would appear necessary that the auditor indicate in a middle paragraph that, due to the fact that he was not engaged to make an audit of financial statements as of such date until June 30, 19X4, he was not in a position to observe the amount of inventory at such date and is unable to satisfy himself thereto by the application of other auditing procedures. If this be the case, the SEC would probably be willing to accept combined income statements based on statements of the subsidiary company as of a date six months different than the parent and to accept unconsolidated balance sheets, with the balance sheet of the subsidiary being presented as of its appropriate year-end. The absence of correspondence with debtors and creditors would probably not cause similar problems. [Amended]

## .05 Signing of Independent Auditor's Report

*Inquiry*—Should the independent auditor's report be manually signed?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08), indicates that one of the basic elements of the report is "the manual or printed signature of the auditor's firm."

Although SAS No. 58 (AU 508) does not require a manual signature, Department of Labor and Securities and Exchange Commission regulations require manual signatures in certain circumstances.

---

[The next page is 10,751.]

## Section 9510

### ***Special Reports***

#### **.01 Determination of Sales Price Based on Auditor's Report**

*Inquiry*—A CPA has been designated by a contract of sales to prepare a statement of “net current assets” and a statement of net income of the selling firm. Both are elements in the determination of the sales price.

A disagreement has arisen between the seller and the buyer as to the pricing of the inventory which represents the major portion of the “net current assets.” The seller relies on a formula represented as “heretofore agreed . . .” The buyer demands a formula “based upon good accounting practice.”

The CPA believes he may have to submit two inventory values to comply with the contract provisions—one to describe the “net current assets” which will use the formula set forth in the contract, and a second using the normal pricing methods of prior years. There is a major variation between the two. The formula in the contract was not represented as being based on good accounting methods but was developed by management after the date of their latest audit.

Can the CPA express an unqualified opinion on each of the two statements if different price bases are used provided full disclosure is made?

*Reply*—This is a special report situation and these are special circumstances in which the auditor may have a certain reporting latitude he might not otherwise have. Since seller and buyer were both parties to the contract, the CPA was designated by the contract to prepare specified statements, and the contract apparently describes a special formula to be used in pricing inventories, the CPA would ordinarily perform strictly according to the terms of the engagement and report on one set of statements as being fairly presented or correctly presented in accordance with the specified contractual formula.

However, since the CPA is aware of the basic disagreement between seller and buyer, he might be much more helpful towards ultimately resolving the issue if he were to prepare statements on both bases.

The auditor may properly report on the two statements prepared in accordance with different inventory pricing bases, full disclosure, of course, being assumed. A more significant question, under the circumstances, is whether he has (or can obtain) consent from both parties modifying the terms of the engagement to allow preparation of the statements on a dual basis.

#### **.03 Audit of Sales for Percentage-of-Sales Lease Agreements**

*Inquiry*—Tenants' lease agreements with a large shopping center provide for a minimum annual rental plus a percentage rent for sales in excess of a certain dollar amount. In accordance with the leases, the shopping center has engaged the services of a CPA to verify that sales exceeding the specified minimum base are being reported. If the CPA is satisfied that the internal control of a tenant is good, may he rely on copies of sales tax returns filed with the state as sufficient evidence for his examination? Is any further verification necessary if a tenant submits a written confirmation of its annual sales from its CPA?

*Reply*—The degree of reliance which the auditor can place on the work of a tenant's CPA will depend upon many considerations such as those described in section 543 of Statement on Auditing Standards No. 1. Comparison of the sales figure reported to the client with the figure reported on the tenant's sales tax return would not in itself be sufficient verification, and additional procedures will be necessary.

An audit program suitable for determining the annual sales of the tenants will have to be highly flexible. Flexibility is required so as to enable the field auditors involved to adjust the audit procedures employed from store to store, as dictated by changes in types of merchandise sold, selling policies employed, sufficiency of records maintained, adequacy of internal control, etc. Accordingly, the depth of the examination will vary to some extent with almost every tenant audited.

Procedures might include examining weekly cash reports submitted by store managers and comparing these reports with general ledger entries, bank statements, and state and federal tax returns, and test checking consecutively numbered sales invoices.

Perhaps the most important documents to play a role in such an examination of the tenants' sales will be the lease agreements which provide the very basis for such examination and which may well contain restrictions on the number and type of records and reports that each tenant will be required to make available.

#### **.07 Statement of Cash Receipts and Disbursements**

*Inquiry*—What is the appropriate language for audit, review, and compilation reports on a statement of cash receipts and disbursements?

*Reply*—Report language will vary depending on the level of service performed. A statement of cash receipts and disbursements is a financial statement prepared under an other comprehensive basis of accounting (see SAS No. 62, *Special Reports* (AU 623.04), and SSARS 1, *Compilation and Review of Financial Statements* (AR 100.04)). It is a pure cash-basis financial statement that summarizes cash activity of the entity, including the individual sources and uses of cash, and may be the only financial statement prepared for the period.

Audit reports on this financial statement should contain a separate paragraph that states the cash receipts and disbursements basis of accounting is being used and that it represents a comprehensive basis of accounting other than GAAP (see SAS No. 62, paragraph 5(d) [AU 623.05(d)]). This extra paragraph is not required for full-disclosure compilation and review reports as long as the notes state the basis of accounting used and describe how that basis differs from GAAP (see Interpretation No. 12 of SSARS 1 (AR 9100.42)). A compilation report on financial statements that omit substantially all disclosures must also describe the basis of accounting used if such disclosure is not provided on the face of the statements or in an attached note (see Interpretation No. 12 of SSARS 1 (AR 9100.43)).

Illustrations of audit, review, and compilation reports on statements of cash receipts and disbursements follow:

##### **A) Audit**

We have audited the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the statements of cash receipts and disbursements are free of material misstatement. An audit includes examining on a test basis, evidence supporting the amounts and disclosures in the statements of cash receipts and disbursements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the statements of cash receipts and disbursements. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, the financial statements have been prepared on the cash receipts and disbursements basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, on the basis of accounting described in Note X.

**B) *Review***

I (We) have reviewed the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the cash receipts and disbursements basis of accounting described in Note X.

**C) *Compilation With Full Disclosure***

I (We) have compiled the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

**D) *Compilation With Substantially All Disclosures Omitted***

I (We) have compiled the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the cash receipts and disbursements basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the informative disclosures ordinarily included in financial statements prepared on the cash receipts and disbursements basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusion about the Company's cash receipts and disbursements. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[Amended February 1995.]

### **.08 Statutory Basis Financial Statements Differ From GAAP**

*Inquiry*—Financial statements filed with a state regulatory agency are prepared on a statutory basis which differs from generally accepted accounting principles (GAAP). How should the accountant report on the financial statements if he knows they will be distributed to third parties other than the regulatory agency?

*Reply*—A practical way of handling this situation can be found in SAS No. 62, *Special Reports*, paragraph 5, footnote 4 (AU 623.05, footnote 4), which refers to amended SAS No. 1, section 544, *Lack of Conformity With Generally Accepted Accounting Principles* (AU 544). In accordance with SAS No. 1, section 544, paragraph 4 (AU 544.04), the auditor's report would take the following format:

- The first paragraph would be the standard introductory paragraph.
- The second paragraph would be the standard scope paragraph.
- The third paragraph would be an explanation in full of the differences between GAAP and the state mandated policies, or alternatively, a brief description of the differences with a reference to a footnote identifying these differences in detail.
- The fourth paragraph would be the qualified or adverse opinion regarding the application of GAAP.
- The fifth paragraph would be an opinion stating whether the financial statements are presented in conformity with the prescribed basis of accounting mandated by the state regulatory agency.

[Amended]

### **.13 Report Distribution Restriction Related to Financial Statements Prepared on a Basis of Accounting Prescribed in an Agreement**

*Inquiry*—An auditor was asked to report on special purpose financial statements of a corporation prepared in conformity with a basis of accounting that departs from GAAP and that does not constitute an other comprehensive basis of accounting. Certain assets, such as receivables, inventories, and other properties, have been valued on a basis specified in the agreement (fair market value). Must the auditor issue a report containing a paragraph that restricts the distribution of the report?

*Reply*—Yes. SAS No. 62, *Special Reports*, paragraph 29(g) (AU 623.29(g)), states that in such circumstances, a paragraph restricting the distribution of the report to those within the entity, to the parties to the contract or agreement, for filing with a regulatory agency, or to those with whom the entity is negotiating directly is required.

**.14 Liquidation Basis Financial Statements**

*Inquiry*—The stockholders of a corporation adopted a plan of complete liquidation. The liquidation will occur over a period of three years. What constitutes the basic financial statements following the adoption of the plan, and on what basis should those statements be presented?

*Reply*—Auditing Interpretation No. 8 of SAS No. 58, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting (AU 9508.33-.38)," states that a liquidation basis of accounting may be considered generally accepted accounting principles for entities in liquidation or for which liquidation appears imminent.

The financial statements of entities adopting a plan of liquidation may be presented with financial statements of a prior period that were prepared on a going concern assumption. The basic financial statements following the adoption of a plan of liquidation consist of a statement of net assets in liquidation, and the related statement of changes in net assets in liquidation.

---

[The next page is 10,851.]

## Section 9520

### ***Reliance on Others***

#### **.01 Definition of “Principal Auditor”**

*Inquiry*—In the situation where one auditor relies on the work of another auditor, the term “principal auditor” is used. How is the term “principal auditor” defined?

*Reply*—The “principal auditor” is the auditor expressing an opinion on the financial statements of the parent company or on the consolidated financial statements of several companies, while the “other independent auditor” expresses an opinion on the financial statements of a subsidiary, division, or branch whose statements are being incorporated therein. The term “primary auditor” is also used in this connection as the equivalent of “principal auditor.”

#### **.02 Responsibility for Audit of Dividend Fund Managed by Agent**

*Inquiry*—A mutual fund employs a management company to act as its dividend disbursing agent and transfer agent. Dividend checks to the individual shareholders of the mutual fund are drawn from a “dividend disbursing agency fund.” This account, however, does not appear as an asset or liability on the books of either the mutual fund or the management company.

Is it the responsibility of the mutual fund’s auditors or the management company’s auditors to audit the dividend disbursing agency fund?

*Reply*—Since it is one of the primary responsibilities of the management company for the mutual fund, to draw and pay individual dividend checks to the fund’s shareholders, it would be appropriate for, if not incumbent upon, the management company’s auditors, in connection with their audit, to see that this function is being properly discharged, even though the account from which these checks are disbursed does not appear as an asset or liability on the books of either the fund or the management company.

#### **.04 Reliance on State Grain Inspectors for Inventory Measurements**

*Inquiry*—A grain company operates several storage elevators. The company maintains perpetual inventory records for all facilities—both at the elevators and the home office. State grain inspectors measure the stored grain and in effect perform the same audit functions as the CPA firm. Past experience has been that the differences between the measurements of the state inspectors, the CPA firm, and the perpetual inventory records are immaterial. The state inspectors are qualified with years of experience. Can the CPA firm accept the findings of the state inspectors as adequate inventory observation in accordance with generally accepted auditing standards?

*Reply*—Auditing Interpretation No. 1 of SAS No. 58, “Report of an Outside Inventory-Taking Firm as an Alternative Procedure for Observing Inventories,” especially paragraphs .05 and .06 can be applied to this situation: The CPA firm could use the measurements and calculations of the state grain inspectors but not as a complete substitute for its own independent inventory observation.

**.06 Use of Other Auditors' Work When They Are Not Independent**

*Inquiry*—SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors*, provides guidance when part of the audit is performed by other independent auditors. How does the lack of independence of the other auditors affect the use of their work and reports by the principal auditor?

*Reply*—In these circumstances, the work and reports of the other auditors cannot be used in accordance with SAS No. 1, section 543. The responsibility for the audit report on the financial statements rests solely with the principal auditor.

Therefore, judgments about assessments of inherent and control risk, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the principal auditor.

The principal auditor, however, may use his or her judgment in evaluating the work of the other auditors who are lacking in independence in the way he or she would consider the work performed by internal auditors.

**.07 Reference to Other Auditors in Accompanying Information Report**

*Inquiry*—An audit report is based in part on the report of other auditors. If the principal auditor makes reference to other auditors' work in the audit report, must the report on accompanying information, which includes data audited by other auditors, include a reference to other auditors' work?

*Reply*—Yes. If a portion of the financial statements was audited by other auditors and the principal auditor's report refers to the other auditors, the principal auditor's report on the accompanying information, which includes data audited by other auditors, also should refer to other auditors' work.

## Section 9530

### ***Limited Scope Engagements***

#### **.01 Auditor's Report if Inventories Not Observed—I**

*Inquiry*—Clients sometimes impose restrictions on their auditors with regard to the observation and testing of inventory because of the costs involved, yet they still want an opinion from the auditor. What type of opinion can be issued in such circumstances when the inventory is 10 percent or more of total assets?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraphs 20–26 (AU 508.20–26) and 61–63 (AU 508.61–63), indicates that if either confirmation of receivables or observation of inventories is omitted because of a restriction imposed by the client, and such inventories or receivables are material, the auditor should modify the scope paragraph and indicate clearly in an explanatory paragraph the limitations on his work and, generally, should disclaim an opinion on the financial statements taken as a whole.

The word “generally” may be interpreted to exclude those situations in which inventories or receivables are material, but are not sufficiently material to require a disclaimer of opinion. SAS No. 58, paragraph 23, would appear to govern in such situations. The materiality of inventory would depend on other factors than just the ratio of inventory to total assets, involving among others the ratio of inventory not examined to stockholders' equity for a statement of financial position and the ratio of inventory to income before taxes for a statement of operations. Unless circumstances are unusual, it is doubtful that inventories could be considered not material if they amount to as much as 10 percent of total assets.

It is conceivable that there might be circumstances where, although the scope of the audit omitted observation of inventories which were in excess of 10 percent of total assets, a qualified opinion on the financial statements might be appropriate. [Amended]

#### **.02 Auditor's Report if Inventories Not Observed—II**

*Inquiry*—An auditor has been engaged by a corporation on a limited scope basis. The engagement does not include any independent verification of the inventory. The auditor will not be present at any physical inventory taking and the pricing and clerical accuracy of the inventory will not be tested. The inventory is material in relation to the other accounts on the client's financial statements.

What type of opinion can the auditor give under these circumstances?

*Reply*—The disclaimer of opinion in SAS No. 58, *Reports on Audited Financial Statements*, paragraph 63 (AU 508.63), is appropriate when the scope limitation precludes inventory observation and any other audit tests of the inventories.

The example shown in SAS No. 58, paragraph 63 (AU 508.63), is as follows:

(Introductory paragraph)

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained

earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.

(Second (scope) paragraph of standard report should be omitted)

(Explanatory paragraph)

The Company did not make a count of its physical inventory in 19X2 or 19X1, stated in the accompanying financial statements at \$..... as of December 31, 19X2, and at \$..... as of December 31, 19X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 19X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

(Disclaimer paragraph)

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements. [Amended]

## .06 Distinctions Between Scope Limitations

*Inquiry*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 24 (AU 508.24), states in part: "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements."

SAS No. 58, paragraph 24, footnote 13 (AU 508.24, footnote 13), states: "Circumstances such as the timing of his work may make it impracticable or impossible for the auditor to accomplish these procedures. In this case, if he is able to satisfy himself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of his work, and his report need not include a reference to the omission of the procedures or to the use of alternative procedures . . . ."

Based on the above excerpts, what is an appropriate auditor's report in each of the following situations:

Auditor is not permitted to confirm receivables but is able to satisfy himself by other means?

Auditor is not permitted to observe inventories but is able to satisfy himself by other means?

Is there a distinction between a client-imposed limitation regarding receivables or inventories and other client-imposed scope limitations?

*Reply*—If a client refuses to permit confirmation of receivables but the auditor is able to satisfy himself by other means, the auditor may express an unqualified opinion.

If a client refuses to permit observation of inventories but the auditor is able to satisfy himself (except as to physical quantities) by other means, the auditor cannot express an unqualified opinion. The client-imposed restriction does not enable the auditor to "make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions" in accordance with SAS No. 1, section 331, *Receivables and Inventories*, paragraph 12 (AU 331.12). SAS No. 58, paragraph 24, footnote 13 (AU 508.24, footnote 13), contemplates circumstances that are not related to any client-imposed restrictions, and are not within the control of either the client or the auditor.

SAS No. 58, paragraph 23 (AU 508.23), states: "The auditor's decision to qualify his opinion or disclaim an opinion because of a scope limitation depends on his assessment of the importance of the omitted procedure(s) to his ability to form an opinion on the financial statements being audited. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the financial statements. If the potential effects relate to many financial statement items, this significance is likely to be greater than if only a limited number of items is involved." Client-imposed limitations on confirmation of receivables and observation of inventories, and scope limitations in other areas should be evaluated on the basis of SAS No. 58, paragraph 23 (AU 508.23). Since SAS No. 1, section 331, is still in effect, the evidential matter requirements for receivables and inventories would generally cause auditors to treat scope limitations on these items differently from other scope limitations. The final determination of how to report client-imposed scope limitations can only be made by the independent auditor involved after considering all the surrounding circumstances. [Amended]

### **.07 Inadequate Internal Control and Financial Records**

*Inquiry*—How should the auditor report that he has been unable, because of inadequate internal control and financial records, to satisfy himself that all transactions were recorded?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 22 (AU 508.22), which deals with scope limitations, states, in part:

Restrictions on the scope of his audit, whether imposed by the client or by circumstances such as the timing of his work, the inability to obtain sufficient competent evidential matter, or an inadequacy in the accounting records, may require him to qualify his opinion or to disclaim an opinion. In such instances, the reasons for the auditor's qualification of opinion or disclaimer of opinion should be described in his report.

A disclaimer of opinion in this situation would be appropriate under SAS No. 58 (AU 508) if the effects of the inadequacy of internal control and the accounting records are sufficiently pervasive. Otherwise, a qualified opinion may be appropriate. [Amended]

### **.09 Letter of Audit Inquiry Not Sent to Client's Legal Counsel**

*Inquiry*—If a client refuses to send a letter of audit inquiry to its legal counsel, can the auditor express an unqualified opinion on the client's financial statements?

*Reply*—SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph 6 (AU 337.06), states:

... the auditor should request the client's management to send a letter of inquiry to those lawyers with whom they consulted concerning litigation, claims, and assessments.

SAS No. 12, paragraph 7 (AU 337.07), indicates certain other procedures that might also disclose litigation, claims, and assessments. Failure to send a letter of audit inquiry to legal counsel, when otherwise indicated, is a scope limitation which would ordinarily require the auditor to express other than an unqualified opinion.

**.10 Effect of Generally Accepted Accounting Principles (GAAP)  
Departures on Limited Scope Engagements**

*Inquiry*—The auditor of a company is unable to observe physical inventory at year end due to a restriction imposed by the client. Because the inventory is material, the auditor plans to issue a disclaimer of opinion on the financial statements in accordance with SAS No. 58, *Reports on Audited Financial Statements*, paragraph 61 (AU 508.61).

The auditor also discovers significant mathematical errors in the client's last-in, first-out (LIFO) provision in the prior year. The auditor advises the client to report the error as a prior period adjustment in accordance with APB Opinion No. 20, *Accounting Changes* and APB Opinion No. 9, *Reporting the Results of Operations* (as amended by FASB Statement No. 16, *Prior Period Adjustments*). If the client refuses to do so, the auditor is now faced with a GAAP departure and a disclaimer of opinion—both related to the company's inventory.

How would the GAAP departure affect the auditor's disclaimer of opinion?

*Reply*—Assuming the auditor decided not to withdraw from the engagement, the guidance in SAS No. 58, paragraph 61 (AU 508.61), should be followed. That paragraph discusses disclaimers of opinion and states that the auditor "... should also disclose any other reservations he has regarding fair presentation in conformity with generally accepted accounting principles."

---

[The next page is 11,201.]

## Section 9600

# Compilation and Review Engagements

### .01 Compiled Financial Statements Not Adjusted

**Inquiry**—An accountant processes client input on a computer and produces monthly statements that do not include adjustments for changes in inventories, prepayments, and accruals, and do not include notes. Adjustments are recorded annually. Can the accountant state in his report that adjustments to make the statements not misleading have not been made?

**Reply**—No. The specific departures from GAAP must be disclosed. SSARS 1, *Compilation and Review of Financial Statements*, paragraphs 39 and 41 (AR 100.39 and .41), are clear that the accountant must consider whether a modified report is adequate to disclose the departures. SSARS 1, paragraph 40 (AR 100.40) describes the form of report when the accountant concludes that a modified report is appropriate. The departures should be disclosed in a separate paragraph, including the effects of the departures on the financial statements, if known to the accountant, or he should state that the effects have not been determined.

### .02 Inquiries for a Review Engagement

**Inquiry**—SSARS 1, *Compilation and Review of Financial Statements*, Appendix A (AR 100.52), lists certain suggested inquiries for a review engagements. Is a “yes” or “no” response sought?

**Reply**—Appendix A (AR 100.52) states that the list is not intended to serve as a checklist, but to describe the general areas in which inquiries might be made. The inquiries in Appendix A (AR 100.52) are presented for illustrative purposes only. They do not necessarily apply to every engagement, nor are they meant to be all-inclusive. The accountant has to bear in mind that he must achieve limited assurance about the financial statements. His inquiry and analytical procedures should be designed to provide him with that assurance. A review should not be treated as a mechanical exercise to obtain “yes” or “no” answers to the illustrative inquiries. The accountant should exercise professional judgment based on all relevant circumstances in designing his inquiries and evaluating responses. While some of the inquiries can be answered “yes” or “no,” others cannot because they are asking “what are the procedures . . .”

### .04 Financial Statements Marked As “Unaudited”

**Inquiry**—Should each page of compiled or reviewed financial statements of nonpublic companies be marked “unaudited”?

**Reply**—No. SSARS 1, *Compilation and Review of Financial Statements* (AR 100), does not require that each page of compiled or reviewed financial statements of a nonpublic entity be marked as “unaudited.” Before SSARS 1 (AR 100) was issued, it was common practice to mark each page as “unaudited”; however, this practice was discontinued after SSARS 1 (AR 100) was issued because the phrase “unaudited” does not communicate to the reader the financial statement service performed.

SSARS 1 (AR 100) does require, however, that each page of the financial statements include a reference such as "See Accountant's Compilation Report" (AR 100.16) or "See Accountant's Review Report" (AR 100.34), as appropriate. [Amended February 1995]

### **.08 Supplementary Information**

*Inquiry*—Are supporting schedules of balance sheet or income statement accounts considered supplementary information? If so, what are the reporting requirements in a review or compilation engagement?

*Reply*—SSARS 1, *Compilation and Review of Financial Statements*, paragraph 43 (AR 100.43), pertains to reporting on supplementary information that accompanies the basic financial statements in a review or compilation engagement. The basic financial statements are usually considered to be the balance sheet, statement of income, statement of retained earnings or changes in stockholders' equity, and statement of cash flows. Descriptions of accounting policies and notes to financial statements are also considered part of the basic financial statements and are usually identified as such, for example, by a legend on the balance sheet, etc., indicating that the notes are an integral part of the financial statements. If supporting schedules of balance sheet or income statement accounts are not identified as being part of the basic financial statements, they are considered supplementary information.

If the information does not accompany the basic financial statements, it is not supplementary information. Under SSARS 1, paragraph 4 (AR 100.04), it does not meet the definition of a financial statement, and therefore, the accountant does not have a reporting obligation. However, the accountant may want to issue a report to clarify his or her responsibility. This can be done by modifying the standard compilation report (SSARS 1, paragraph 17 (AR 100.17)) to refer to the schedules. [Amended]

### **.09 Application of SSARS 3 to Certain Companies Required to File With Regulatory Bodies**

*Inquiry*—Some nonpublic entities, as defined in SSARS 2, *Reporting on Comparative Financial Statements*, paragraph 1, footnote 2 (AR 200.01, footnote 2), such as privately owned brokers or dealers in securities, may be required to include unaudited financial statements in a form prescribed by a regulatory body concerned with the sale or trading of securities, such as the National Association of Securities Dealers or the New York Stock Exchange. Does the first sentence of SSARS 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms*, paragraph 2 (AR section 300.02), preclude an accountant from using the alternative form of report illustrated in SSARS 3 (AR 300) in those circumstances?

*Reply*—No. SSARS 3, paragraph 2, excludes from the definition of a prescribed form those forms "... concerned with the sale or trading of securities." In that context, "securities" refers to those issued or to be issued by the entity submitting the prescribed form. Accordingly, an accountant is not precluded in the circumstances described in this question from using the alternative form of compilation report illustrated in SSARS 3 if the entity is not submitting the prescribed form in connection with the actual or contemplated sale or trading of its own securities.

**.10 Review of Financial Statements Included in a Prescribed Form**

*Inquiry*—SSARS 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms*, paragraph 3, states that “in the absence of a requirement or a request for a review report on the financial statements included in a prescribed form, the following form of standard compilation report may be used when the unaudited financial statements of a nonpublic entity are included in a prescribed form that calls for departure from generally accepted accounting principles . . .” Can an accountant perform a review of financial statements included in a prescribed form that are presented on a basis other than generally accepted accounting principles?

*Reply*—A review can be performed on the financial statements included in a prescribed form prepared under any comprehensive basis of accounting (as defined in SAS No. 62, *Special Reports*, paragraph 4), but SSARS 1, *Compilation and Review of Financial Statements*, reporting standards would apply, not those in SSARS 3. SSARS 3, paragraph 1, states in part:

The requirements of SSARS 1 and SSARS 2 are applicable when the unaudited financial statements of a nonpublic entity are included in a prescribed form. This statement amends SSARS 1 and SSARS 2 to provide for an alternative form of standard compilation report when the prescribed form or related instructions call for departure from generally accepted accounting principles by specifying a measurement principle not in conformity with generally accepted accounting principles or by failing to request the disclosures required by generally accepted accounting principles.

Accordingly, where the prescribed form calls for the departures referred to above, a review report expressing limited assurance under SSARS 1 would be appropriate provided that, as required by SSARS 1, paragraph 40, the review report discloses the departures from generally accepted accounting principles, including the departures called for by the prescribed form.

**.11 Computer Generated Financial Statements**

*Inquiry*—A firm recently purchased a new computer which will enable it to have some of its clients access this computer via a phone terminal in their office. The client will input all information into the firm’s computer including journal entries and will be able to prepare its own financial statements which will be received via the client’s phone terminal. No one in the accounting firm directly inputs data into the computer or sees the financial statements. Is the accounting firm required to attach a compilation report for this type service?

*Reply*—No. If the client directly inputs data from its office into the computer and generates the financial statements in the client’s office directly from the computer, the firm does not have a reporting responsibility. However, if the financial statements are generated by the CPA in the firm’s office, there is a reporting responsibility as discussed in SSARS 1, *Compilation and Review of Financial Statements*, paragraph 7. [Amended]

**.12 Use of Other Comprehensive Basis of Accounting (OCBOA) for Interim Financial Statements and Generally Accepted Accounting Principles (GAAP) for Annual Financial Statements**

*Inquiry*—What are the reporting implications when a client uses OCBOA for interim financial statements and GAAP for annual statements?

*Reply*—A privately-held company may use OCBOA for interim financial statements and GAAP for annual financial statements. However, the report on interim financial statements should be prepared in accordance with the requirements of SAS No. 62, *Special Reports* (AU 623).

For publicly-traded companies, APB Opinion No. 28, *Interim Financial Reporting*, paragraph 10, states in part, "the results for each interim period shall be based on the accounting principles and practices used by an enterprise in the preparation of the latest annual financial statements unless a change in an accounting practice or policy has been adopted in the current year." Therefore, for publicly-held companies, OCBOA reporting for interim financial statements would not be allowed. [Amended]

#### **.14 Uncertainties/Going Concern Problems**

*Inquiry*—SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU 341), provides guidance on that subject as it would affect the auditor's report under SAS No. 58, *Reports on Audited Financial Statements* (AU 508). What is the appropriate guidance on how to deal with uncertainties under the statements on standards for accounting and review services?

*Reply*—SSARS 1, *Compilation and Review of Financial Statements*, footnote 18 (AR 100.40, footnote 18), states that "normally, neither an uncertainty nor an inconsistency in the application of accounting principles would cause the accountant to modify the standard report provided the financial statements appropriately disclose such matters." Accordingly, disclosure of this uncertainty in a footnote to the financial statements would satisfy this requirement. SSARS 1, footnote 18 (AR 100.40, footnote 18), further states, "nothing in this statement, however, is intended to preclude the accountant from emphasizing in a separate paragraph of his report a matter regarding the financial statements."

The last two paragraphs of Interpretation No. 11 of SSARS 1 (AR 9100.33 through .40), "Reporting on Uncertainties," indicates there is no requirement to disclose an uncertainty in the accountant's report, under certain conditions, when management has elected to omit substantially all disclosures required by generally accepted accounting principles. [Amended]

#### **.15 Consistency**

*Inquiry*—A correction of an error in previously issued financial statements is treated as a prior period adjustment, in accordance with FASB Statement No. 16, *Prior Period Adjustments* (AC A35). SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph 11 (AU 420.11), discusses a correction of an error in principle and states that a change from an accounting principle that is not generally accepted to one that is generally accepted, including correction of a mistake in the application of a principle, is a correction of an error. Although this type of change in accounting principle should be accounted for as the correction of an error, the change requires recognition in the auditor's report through the addition of an explanatory paragraph. How is this consistency issue treated in compilation and review engagements?

*Reply*—SSARS 1, *Compilation and Review of Financial Statements*, footnote 18 (AR 100.40, footnote 18), states that "Normally, neither an uncertainty, including an uncertainty about an entity's ability to continue as a going con-

cern, nor an inconsistency in the application of accounting principles would cause the accountant to modify the standard report provided the financial statements appropriately disclose such matters." Accordingly, disclosure of this inconsistency in a footnote to the financial statements would satisfy this requirement. SSARS 1, footnote 18 (AR 100.40, footnote 18), further states, "... nothing in this statement, however, is intended to preclude an accountant from emphasizing in a separate paragraph of his or her report a matter regarding the financial statements." [Amended]

#### **.16 Reference to Accountant's Report in Notes to Financial Statements**

*Inquiry*—SSARS 1, *Compilation and Review of Financial Statements*, paragraphs 16 and 34 (AR 100.16 and .34), requires that each page of the financial statements compiled or reviewed by the accountant include a reference such as "See Accountant's Compilation (or Review) Report."

Does this requirement extend to the related notes to the financial statements?

*Reply*—The application of this requirement varies in practice.

Some accountants believe that since the related notes to financial statements are an integral part of the basic financial statements, at least the first page of the notes should include a reference to the accountant's report.

Other accountants believe that if the basic financial statements, other than footnote disclosures, contain a statement indicating that the notes to financial statements are an integral part of the statements, it is not necessary to include a reference to the accountant's report on note pages.

#### **.18 Bank Engaged a CPA Firm to Compile a Financial Statement of Another Entity**

*Inquiry*—A bank has engaged a CPA firm to compile a balance sheet for another entity. The bank has possession of the books and records of the entity. Can the firm issue a compilation report under such circumstances?

*Reply*—There is nothing in the Statements on Standards for Accounting and Review Services which precludes the CPA firm from issuing a compilation report under such circumstances. However, SSARS 1, *Compilation and Review of Financial Statements*, paragraph 11 (AR 100.11), states: "To compile financial statements, the accountant should possess a general understanding of the nature of the entity's business transactions, the form of its accounting records, the stated qualifications of its accounting personnel, the accounting basis on which the financial statements are to be presented, and the form and content of the financial statements." Due to the nature of the engagement, the CPA firm may not be able to attain a sufficient level of understanding of the entity's business as required by SSARS 1, paragraph 11 (AR 100.11), to issue a compilation report on the balance sheet, nor obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed, as required by Rule 201(D) of the AICPA Code of Professional Conduct (ET 201.01D). (See SSARS 1, paragraph 3 (AR 100.03)). [Amended]

#### **.19 Issuance of an Audit Report on Financial Statements Which Have Already Been Reviewed**

*Inquiry*—If an accountant has issued a review report on a set of financial statements may he later issue an audit report on the same set of financial statements?

*Reply*—Yes. Interpretation No. 3 of SSARS 1, *Compilation and Review of Financial Statements* (AR 9100.06 through .12), states that SSARS 1 does not prohibit the accountant from accepting an engagement to perform a higher level of service with respect to financial statements that have been previously compiled or reviewed.

## **.20 Reissuance When Not Independent**

*Inquiry*—An accountant performed a review in the prior year and a compilation in the current year. He was independent in the prior year but impaired his independence in the current year. May he reissue his review report on the prior year financial statements?

*Reply*—Yes. SSARS 2, *Reporting on Comparative Financial Statements*, paragraph 8 (AR 200.08), states in part, "A continuing accountant who performs a lower level of service with respect to the financial statements of the current period should either (a) include as a separate paragraph of his report a description of the responsibility assumed for the financial statements of the prior period . . . or (b) reissue his report on the financial statements of the prior period." The separate paragraph referred to in item (a), above, includes a statement that the accountant has not performed any procedures in connection with the prior period review engagement after the date of his review report as reflected in the example in SSARS 2, paragraph 12 (AR 200.12).

## **.22 Reporting on Financial Statements Submitted by Management**

*Inquiry*—A corporation's chief financial officer has been asked to prepare and submit his employer's financial statements to a bank. May the CFO use the standard compilation report?

*Reply*—No. The compilation report is inappropriate. A compilation report is used by an outside accountant to report upon financial statements that are the representation of another party, namely, the management of a nonpublic company. The compilation report describes the outside accountant's limited responsibility and inability to express an opinion or any other form of assurance based on the limited procedures performed. The CFO, on the other hand, is a part of management and is intimately involved in the preparation of the financial statements. A CFO has direct responsibility for the design and operation of the accounting system, the design and operation of most control procedures and much of the control environment.

There are no standards on how a company's CFO should report on the company's financial statements when those statements are transmitted to third parties. However, it seems appropriate for a CFO to issue a report stating management's responsibility for the financial statements. Such a report might be modeled after the management responsibility letter typically contained in annual reports and may be worded as follows:

The accompanying balance sheet of Company X as of December 31, 19XX and the related statements of income, retained earnings and cash flows for the year then ended have been prepared by management who is responsible for their integrity and objectivity. These statements have not been compiled, reviewed or audited by outside accountants.

Company X maintains an internal control structure designed to provide reasonable assurance that assets are safeguarded and that transactions are properly executed, recorded and summarized to produce reliable records and reports.

To the best of management's knowledge and belief, the statements and related information were prepared in conformity with generally accepted accounting principles, and are based on recorded transactions and management's best estimates and judgments.

Signature as chief financial officer

## **.24 Issuing a Compilation Report With Substantially All Disclosures Omitted After Issuing a Report on Financial Statements Containing Full Disclosure**

*Inquiry*—A client wants to submit financial statements with substantially all disclosures omitted to one of its vendors. May the accountant issue a compilation report on those financial statements with substantially all disclosures omitted, if he or she previously issued an audit, review, or compilation report on financial statements with full disclosure for the same reporting period?

*Reply*—Generally, yes. This issue is not specifically addressed by the authoritative literature. However, SSARS 1, paragraph 19 (AR 100.19), provides indirect guidance on this matter. It states that an accountant may compile financial statements that omit substantially all disclosures provided the omission of the disclosure is clearly indicated in the report and is not, to the accountant's knowledge, undertaken with the intention of misleading those who might reasonably be expected to use the financial statements.

If the accountant believes that the client's intent is to mislead users, the accountant should *not* comply with the request. However, if the accountant concludes that it is not the client's intent to mislead users, it would be appropriate to compile financial statements with substantially all disclosures omitted after having compiled, reviewed, or audited full-disclosure financial statements.

Some practitioners are reluctant to compile financial statements they have previously audited or reviewed because the accountant's compilation report will read:

I have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

They conclude that the disclaimer in the report would be misleading to financial statement users in these circumstances because the accountant has, in fact, audited or reviewed the financial statements. They believe the aforementioned disclaimer precludes the accountant from compiling financial statements after auditing or reviewing them. The disclaimer in the compilation report, however, is intended to be engagement-specific and, therefore, refers only to the financial statements that accompany the accountant's report. Therefore, the disclaimer language does not present a reporting problem for the current engagement.

---

[The next page is 11,301.]

## Section 9900

### Other Reporting Issues

#### .02 Furnishing Unbound Reports to Clients

*Inquiry*—A CPA gets numerous requests from clients for a set of unbound financial statements along with the usual bound sets. The unbound copy is usually reproduced on their copying machines for periodic distribution to suppliers and others. Should the CPA continue to provide these unbound statements?

*Reply*—This practice is dangerous since the CPA is assisting in the reproduction of his report without control over such reproduced copies. It would be preferable if he agreed to provide any additional copies of the report which may be required, thus controlling the assembly of the reproduced reports.

#### .03 Dates on Cover for Financial Statements

*Inquiry*—SAS No. 26, *Association With Financial Statements*, paragraph 15, specifies that an auditor's report disclose that prior year financial statements presented for comparative purposes are unaudited. Is it appropriate to include the dates of both the current year and prior year financial statements on the cover of the financial statements?

*Reply*—Both years may be included on the cover if the financial statements for the prior year are referred to as unaudited. [Amended]

#### .06 Break-Even Financial Statements

*Inquiry*—Company A requested compiled financial statements with an inventory reported so that the financial statements would reflect no profit or loss ("break-even financial statements"). How would this affect the accountant's compilation report?

*Reply*—"Break-even financial statements" are not in accordance with generally accepted accounting principles. Accordingly, the independent accountant would have to express a reservation in his compilation report because of the departure from generally accepted accounting principles as required by SSARS 1, *Compilation and Review of Financial Statements*, paragraph 40.

#### .07 Financial Statements Cover Period Longer Than Twelve Months

*Inquiry*—Is it acceptable for an auditor to express an opinion on financial statements covering a period longer than twelve months?

*Reply*—It is acceptable provided the title of the financial statements is descriptive of the period covered and the auditor's report clearly indicates the period covered by the financial statements.

#### .08 Title of Auditors' Report

*Inquiry*—Does the auditor's opinion require a title?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08), states, "... The basic elements of the report are the following: a. A title that includes the word independent . . ." Footnote 3 of SAS No. 58 (AU 508.08, footnote 3) states, "This Statement does not require a title for an auditor's report if the auditor is not independent . . ." Therefore, if the auditor is independent, the auditor's opinion must have a title which includes the word independent.

**.09 Compilation of Pro Forma Information**

*Inquiry*—Statement on Standards for Attestation Engagements, *Reporting on Pro Forma Financial Information*, provides guidance on the examination and review of pro forma financial information. May an accountant issue a compilation report on pro forma information if the related historical financial statements are compiled?

*Reply*—Yes. Although the Statement on Standards for Attestation Engagement is silent with regard to compilation of pro forma information, it does not proscribe issuance of a compilation report on pro forma information.

**.10 Distinction Between Internal and General Use of Financial Statements**

*Inquiry*—Are financial statements differentiated between internal and general use in the professional reporting literature?

*Reply*—Internal use by management and general use of financial statements are no longer differentiated for historical financial statements. However, the distinction between general and internal use is made for financial forecasts and projections.

**.14 Part of Audit Performed by Another Independent Auditor Who Has Ceased Operations**

*Inquiry*—If an auditor who has ceased operations audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in an entity's financial statements, may the principal auditor make reference in his or her report to the audit of that auditor or assume responsibility for that auditor's work in accordance with SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors*?

*Reply*—The principal auditor may make reference to the audit of another auditor, or assume responsibility for that auditor's work, only if the other auditor has issued an audit report and the principal auditor has completed the procedures required by SAS No. 1, section 543 prior to the time that the other auditor ceased operations. The procedures described in SAS No. 1, section 543 cannot be appropriately performed after the other auditor has ceased operations. In situations in which the principal auditor cannot use the work of the other auditor in accordance with SAS No. 1, section 543, the principal must perform audit procedures sufficient to afford a reasonable basis for an opinion on the financial statements under audit. However, review of the other auditor's working papers may have an effect on the nature, timing, and extent of those procedures.

**.21 Fiscal Years for Tax and Financial Reporting Purposes Differ**

*Inquiry*—Can an entity have different fiscal years for tax and reporting purposes?

*Reply*—There is no requirement in the accounting literature for the tax and the financial reporting year-end to be the same. However, having different fiscal years complicates further any interperiod tax allocation the entity may have.

**.22 Location Where Report is Issued**

*Inquiry*—Is there a requirement to indicate the city and state where an accountant's report is issued?

*Reply*—The AICPA professional standards do not include such a requirement. However, some SEC regulations require the disclosure. For example, SEC Regulation S-X, section 210.2-02, states, in part, “. . . the Accountant’s Report shall indicate the city and state where issued.”

## **.23 Distinction Between Supplemental Information and Basic Financial Statement Information in an Auditor-Submitted Document**

*Inquiry*—What is an appropriate means of distinguishing between information to be considered a part of the basic financial statements and supplementary information in an auditor-submitted document?

*Reply*—If the basic financial statements refer to specific information (i.e., ‘See Exhibit A—Schedule of Operating Expenses’), such information is considered to be a part of the basic statements and is presumed to have been subjected to the auditing procedures applied to the basic financial statements. This information is therefore not required to be reported on separately and should not be referred to in the auditors’ report. Any additional information presented with the basic financial statements, but not referred to in such statements, should be considered supplementary information unless described otherwise. Such supplementary information should be reported on in accordance with the requirements of SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AU 551).

## **.24 Required Presentation of the Statement of Stockholders’ Equity**

*Inquiry*—Is the statement of stockholders’ equity required when financial position and results of operations are presented?

*Reply*—Disclosure of changes in capital accounts and retained earnings is required. According to APB Opinion No. 12, *Omnibus Opinion—Capital Changes*, paragraph 10 (AC C08.102), “when both financial position and results of operations are presented, disclosure of changes in the separate accounts comprising stockholders’ equity (in addition to retained earnings) . . . is required to make the financial statements sufficiently informative. Disclosure of such changes may take the form of separate statements or may be made in the basic financial statements of notes thereto.”

## **.25 Use of Singular v. Plural Terminology for Accountants and Auditors**

*Inquiry*—In reporting on audited, reviewed, or compiled financial statements, should accountants use singular or plural terminology when referring to themselves?

*Reply*—Use of plural or singular terminology is not addressed in the professional standards. Illustrative auditors’ reports in Statements on Auditing Standards use plural terminology, while the accountants’ reports in Statements on Standards for Accounting and Review Services use both singular and plural.

In practice, sole practitioners often use singular terms; firms that have one partner with professional staff use both singular and plural; and firms that have more than one partner most often use plural. However, the use of singular or plural references to the accountant or auditor is purely discretionary. For ease of report preparation, firms should be consistent in their use of singular or plural in all reports.

**.26 Compilation and Review—Comparative Financial Statements**

*Inquiry*—A nonpublic entity's financial statements for the year ended December 31, 19X1 were compiled by a predecessor accountant. Management had elected to omit substantially all of the disclosures and the statement of cash flows required by generally accepted accounting principles (GAAP).

A successor auditor is engaged to audit the 19X2 financial statements, and the client has asked the auditor to include the 19X1 compiled financial statements for comparative purposes with the 19X2 financial statements.

Is the successor auditor permitted to do this?

*Reply*—No. SSARS 2, *Reporting on Comparative Financial Statements*, paragraph 5 (AR 200.05), states that compiled financial statements that omit substantially all of the disclosures required by GAAP are not comparable to financial statements that include such disclosures.

The 19X1 financial statements would need to be revised to include the statement of cash flows and all disclosures required by GAAP. Either the predecessor or the successor accountant would then need to at least compile the full disclosure financial statements for 19X1.

# STATEMENTS OF POSITION ACCOUNTING

## Introduction

Statements of Position of the Accounting Standards Division present the conclusions of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. SAS No. 69 is effective for audits of financial statements for periods ending after March 15, 1992. An entity following an accounting treatment as of March 15, 1992, need not change to an accounting treatment specified in a Statement of Position whose effective date is before March 15, 1992. For Statements of Position whose effective date is subsequent to March 15, 1992, and for entities initially applying an accounting principle after March 15, 1992, the accounting treatment specified by that Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

**Section 10,060*****Statement of Position 75-2  
Accounting Practices of Real Estate  
Investment Trusts***

[Recommendation to Financial Accounting Standards Board]

**AICPA**

American Institute of Certified Public Accountants  
1211 Avenue of the Americas, New York, New York 10036 (212) 575-6200

June 27, 1975

Marshall S. Armstrong, CPA  
Chairman  
Financial Accounting Standards Board  
High Ridge Park  
Stamford, Connecticut 06905

Dear Mr. Armstrong:

The accompanying Statement of Position presents recommendations of the Accounting Standards Division on *Accounting Practices of Real Estate Investment Trusts*. It was prepared on behalf of the Division by the Accounting Standards Executive Committee for consideration by the Financial Accounting Standards Board and for such action as the Board deems appropriate. The scope of the Statement is restricted to REITs, although it is acknowledged that the conclusions therein may also be appropriate for companies which are not REITs.

The Statement takes the position that the allowance for losses on loans and foreclosed properties should now be determined based on an evaluation of the recoverability of individual loans and properties and, in this evaluation, the principle of providing for all losses when they become evident should now require the inclusion of all holding costs, including interest, in determining such losses.

The individual evaluation of the loans and foreclosed properties should be made, according to the Statement, as of the close of all annual and interim stockholder reporting periods. This may well result in a need to increase or decrease the allowance for losses with a corresponding charge or credit to income. However, in the case of foreclosed property which the REIT elects to hold as a long-term investment, the Statement concludes that the net realizable value of such property at the date of foreclosure becomes its new basis, and sub-

sequent increases in market values of such properties should generally not be recorded until the time of a later exchange transaction which confirms the amount of any increase.

The Statement also takes the position that recognition of interest revenue should be discontinued when it is not reasonable to expect that the revenue will be received and enumerates conditions which should now be regarded as establishing a presumption that the recording of interest should be discontinued.

Finally, the Statement concludes that commitment fees should be amortized over the combined commitment and loan period, and provides guidance with respect to appropriate accounting by a REIT for operating support from its adviser.

The Division would appreciate being advised as to the Board's proposed action on the recommendations set forth in this Statement of Position.

Sincerely yours,

STANLEY J. SCOTT  
Chairman  
Accounting Standards Division

cc: Securities and Exchange Commission

**NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## **ACCOUNTING PRACTICES OF REAL ESTATE INVESTMENT TRUSTS<sup>[\*]</sup>**

### **INTRODUCTION**

.01 Real estate investment trusts (REITs) have in recent years assumed an increasingly important role in the real estate industry. REITs are business trusts and are generally publicly-held. They employ equity capital, coupled with substantial amounts of debt financing, in making real estate loans and investments.

.02 A REIT, if it so elects, will not be required to pay Federal corporate income taxes (other than that on "tax preference" items) if, among other things, at least 90% of its taxable income, as defined, is distributed to its shareholders. This Statement, however, is not restricted to those REITs which have elected such tax treatment.

.03 The accounting problems discussed in this Statement of Position may also be encountered by other companies which are not REITs but which are engaged in the business of making loans on or investing in real estate. The conclusions in this Statement of Position may, therefore, also be appropriate for those companies. However, the accounting practices of companies which are not REITs are beyond the scope of this Statement of Position.

.04 REITs have engaged in a variety of lending and investing activities, some of which are listed below.

*Construction loans* are generally short-term first mortgage loans to finance the construction of residential, commercial or industrial properties. Interest revenue on such loans is usually accrued and added to the loan balance, which is paid from the proceeds of permanent financing.

*Development loans* are short-term first mortgage loans to finance site development costs. They are usually paid from proceeds of a construction loan.

*Land acquisition loans* are first mortgage loans to finance the acquisition (not the development) of sites.

---

<sup>[\*]</sup> [Footnote deleted.]

*Long and intermediate term loans* are generally conventional mortgage loans to finance completed properties.

*Purchase leasebacks* consist of the simultaneous purchase and leaseback to the seller of real estate properties.

*Equity investments in real estate* are direct ownership interests, under a variety of forms, in improved or unimproved real estate.

*Junior mortgage loans* are real estate loans subject to the lien of a prior mortgage.

*Wrap-around loans* are junior mortgage loans to provide an owner with funds without disturbing a prior first mortgage loan which, for various reasons, is not liquidated.

*Gap loans* are junior mortgage loans to finance a temporary spread between amounts advanced and amounts committed under a prior first mortgage loan.

*Warehousing loans* are short-term loans secured by the pledge of mortgage loans.

.05 In connection with real estate loans, a REIT may issue a commitment, which is an agreement to make a mortgage loan in the future at specified terms.

.06 A REIT's financial success is often dependent upon external factors, among which are the operations of its contractor-borrowers, the availability to those contractors of long-term mortgage funds when projects are completed, and the general condition of the real estate industry. The success of the REIT is also dependent upon its ability to obtain financing at rates less than that earned on its portfolio of investments.

.07 Considerable attention has recently been given to the accounting practices of REITs, particularly those which relate to loans which are in default or may become in default. This Statement of Position addresses certain of those practices.

## LOSSES FROM LOANS

[.08-.29] [Effectively superseded by FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*, and FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of.*]<sup>[1], [2]</sup>

## ASSETS AFFECTED BY TROUBLED DEBT RESTRUCTURINGS

[.29A-.29C] [Effectively superseded by FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*, and FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of.*]

## DISCONTINUANCE OF INTEREST REVENUE RECOGNITION

.30 While some REITs argue that recognition of interest revenue should never be discontinued, it seems clear that there is no sound basis in theory or

---

<sup>[1]</sup> [Footnote deleted.]

<sup>[2]</sup> [Footnote deleted.]

practice for such a position, since it is well established in accounting that if sufficient doubt or uncertainty exists as to realization, recognition may not be appropriate.

.31 In practice, the recognition of interest revenue has usually been discontinued at one of the following points:

- (1) When the amount of any final loss can be determined with a high degree of precision (e.g., upon final settlement).
- (2) Upon the occurrence of certain specified events (e.g., interest or principal is a certain number of days past due, cost overruns are at a certain percentage, foreclosure proceedings are being initiated, etc.)
- (3) When judgment—often involving an evaluation of total loan recoverability, including estimated recoverability from foreclosure and sale—indicates that any additional interest would not be realized.

.32 Postponing the discontinuance of interest recognition until a loss can be determined with a high degree of precision is in conflict with general practice and theory.

.33 A common practice is to discontinue the recognition of interest upon the occurrence of certain specified events. Its attractiveness lies in the ability to determine objectively if the criteria have been met and, as a result, it is presumed there would be a greater uniformity in the reported results of REITs following this practice.

.34 Opponents of this practice acknowledge that specific criteria may be useful in identifying potential problem loans but believe that arbitrary rules cannot be a substitute for management's judgment. It is argued that even though a loan may meet an established criterion for the discontinuance of interest recognition, it is still possible that the loan and the interest will ultimately be collected; thus, to discontinue recognition in such a situation is as incorrect as recognizing interest when it is clear it will not be collected.

.35 The Division believes that the recognition of interest revenue should be discontinued when it is not reasonable to expect that the revenue will be received. The Division also believes that certain conditions, such as any one of the following, should now be regarded as establishing a presumption (which may be overcome if other facts clearly refute the presumption) that the recording of interest should be discontinued.

- (1) Payments of principal or interest are past due.
- (2) The borrower is in default under the terms of the loan agreement.
- (3) Foreclosure proceedings have been or are expected to be initiated.
- (4) The credit-worthiness of the borrower is in doubt because of pending or actual bankruptcy proceedings, the filing of liens against his assets, etc.
- (5) Cost overruns and/or delays in construction cast doubt on the economic viability of the project.
- (6) The loan has been renegotiated.

These conditions may also be an indication that an allowance for losses should be provided.

.36 The Division supports the view that the discontinuance of interest revenue recognition is related to the question of realization and, consequently,

such recognition should not be resumed, nor should unrecorded interest be recognized, until it is evident that the principal and interest will be collected.

.37 Some believe that even though the recognition of interest is discontinued, interest revenue should be “grossed up” with an offsetting charge to an expense account. They believe that this presentation will more clearly reflect the planned income from the portfolio as well as the deviations, in the form of provisions for possible losses, from that plan.

.38 Others maintain that since the interest recognition was discontinued because realization was doubtful, it would not be appropriate to include such amounts in interest revenue in the financial statements because such a presentation would contradict economic reality. The Division supports this view.

### COMMITMENT FEES

[.39-.46] [Effectively superseded by FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*.]<sup>[3]</sup>

### OPERATING SUPPORT OF THE REIT BY THE ADVISER

.47 Various methods are or have been employed by advisers to insure a certain return to the REIT for certain periods. Some of these methods are summarized below.

- (1) Purchasing a loan or a property at an amount in excess of market value
- (2) Forgiving indebtedness
- (3) Reducing advisory fees
- (4) Providing required compensating balances
- (5) Making outright cash payments

.48 In situations of this type, few would challenge the need for disclosure of the nature of the relationship between the REIT and its adviser and the nature and amount of the transactions between them. The accounting for the transaction, however, is not quite as clear.

.49 Some believe that operating support given to a REIT by its adviser can be determined to be either income or a contribution to capital on the basis of the form of the transaction.

.50 Others hold that such support should always be accounted for as income since it is difficult, if not impossible, to distinguish items of income from capital contributions. In some cases, for example, determining what the terms of an “arms-length” transaction would be might pose significant problems. Distinguishing between the types of operating support would also pose problems—why, for example, should a loan purchased at more than market value by the adviser be viewed differently from a reduction in the advisory fee?

.51 The Division believes that in the present framework of generally accepted accounting principles, appropriate accounting by a REIT for operating support from its adviser would include the following:

---

[3] [Footnote renumbered and deleted.]

- (1) Adjustment of any assets (or liabilities) which will be transferred between the companies to current market value as of the date of the transaction.
- (2) Recognition, as income or as a reduction of advisory fees, of the operating support effectively obtained, with full disclosure of (a) the relationship between the parties and (b) the nature and amount of the transactions.

.52 The effect of such transactions, when material, should be reported separately in the income statement.

# ***Statement of Position 76-3 Accounting Practices for Certain Employee Stock Ownership Plans***

[Recommendation to the Financial Accounting Standards Board]

## **AICPA**

American Institute of Certified Public Accountants  
1211 Avenue of the Americas, New York, New York 10036 (212) 575-6200

December 20, 1976

Marshall S. Armstrong, CPA  
Chairman  
Financial Accounting Standards Board  
High Ridge Park  
Stamford, Connecticut 06905

Dear Mr. Armstrong:

The accompanying Statement of Position presents recommendations of the Accounting Standards Division on *Accounting Practices for Certain Employee Stock Ownership Plans* (ESOPs). It was prepared on behalf of the Division by the Accounting Standards Executive Committee for consideration by the Financial Accounting Standards Board and for such action as the Board deems appropriate.

The Statement deals primarily with accounting and reporting issues that have arisen with respect to those ESOPs that borrow funds from a bank or other lender to acquire shares of stock in the employer company or that issue notes to existing shareholders in exchange for shares of stock. However, certain conclusions in the Statement are also applicable to ESOPs that have not entered into such transactions.

The Statement's major recommendations are briefly summarized below:

- An obligation of an ESOP should be recorded as a liability in the financial statements of the employer when the obligation is covered by either a guarantee of the employer or a commitment by the employer to make future contributions to the ESOP sufficient to meet the debt service requirements.
- The offsetting debit to the liability recorded by the employer should be accounted for as a reduction of shareholders' equity.
- The liability recorded by the employer and the offsetting debit should both be reduced as the ESOP makes payments on the debt.

- The amount contributed or committed to be contributed to an ESOP with respect to a given year should be charged to expense by the employer; the compensation and interest elements of the contribution should be separately reported.
- All shares held by an ESOP should be treated as outstanding shares in the determination of earnings per share. Dividends paid on those shares should be charged to retained earnings.
- Any additional investment tax credit should be accounted for as a reduction of income tax expense in the year in which the contribution to the ESOP is charged to expense.

The Division would appreciate being advised as to the Board's proposed action on the recommendations set forth in this Statement of Position.

Sincerely yours,

Raymond C. Lauver  
Chairman  
Accounting Standards Division

cc: Securities and Exchange Commission

**NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## **ACCOUNTING PRACTICES FOR CERTAIN EMPLOYEE STOCK OWNERSHIP PLANS**

### **INTRODUCTION**

.01 The Employee Retirement Income Security Act of 1974 describes an Employee Stock Ownership Plan (ESOP) as a qualified stock bonus plan, or a combination stock bonus and money purchase pension plan, designed to invest primarily in "qualifying employer securities."<sup>1</sup> Qualifying employer securities include the employer's stock and its other marketable obligations. The essential differences between an ESOP and other qualified stock bonus plans are that (a) an ESOP is permitted, in certain circumstances, to incur liabilities in the acquisition of employer securities and (b) the employer may be permitted to increase his maximum allowable investment tax credit by as much as an additional 1½% if that amount is contributed to an ESOP.

.02 In some cases, funds are borrowed from a bank or other lender by the ESOP and are used to acquire shares of stock in the employer company. The stock may be outstanding shares, treasury shares, or newly issued shares, and is held by the ESOP until it is distributed to the employees. (In some cases, an ESOP may issue notes to existing shareholders in exchange for qualifying employer securities.) The stock may be allocated to individual employees even though it may not be distributed to them until a future date. The debt of the ESOP is usually collateralized by a pledge of the stock and by either a guarantee of the employer or a commitment by the employer to make future contributions to the ESOP sufficient to meet the debt service requirements. The employer company makes annual contributions to the ESOP that are deductible for tax purposes, subject to the limitations of the Internal Revenue Code. Cash contributions and dividends received are used by the ESOP to:

- (a) Satisfy the annual amortization of the outstanding debt principal.
- (b) Satisfy the annual interest costs on such debt.
- (c) Obtain short-term investments to provide for liquidity.
- (d) Pay other expenses.

<sup>1</sup> Employee Retirement Income Security Act of 1974, Title II, Subtitle B, Section 2003.

- (e) Acquire additional shares of the employer company's stock, to the extent of the excess, if any, over that required by (a) through (d) above.

.03 Several accounting and reporting issues have arisen with respect to those ESOPs that borrow funds from a bank or other lender to acquire shares of stock in the employer company, or that issue notes to existing shareholders in exchange for shares of stock.<sup>2</sup> These issues are being dealt with in practice in different ways. This Statement of Position has been issued because the Division believes it is desirable to narrow the range of alternative accounting practices in this area.

.04 Final regulations clarifying the rights and duties of the parties affected by an ESOP have not been issued by the Internal Revenue Service. Readers of this Statement of Position should also be cognizant of the content of such regulations, when they are issued.

## **ACCOUNTING FOR AN OBLIGATION OF AN ESOP GUARANTEED BY THE EMPLOYER**

### **Recording an ESOP's Obligation in the Employer's Financial Statements**

.05 The Division believes that an obligation of an ESOP should be recorded as a liability in the financial statements of the employer when the obligation is covered by either a guarantee of the employer or a commitment by the employer to make future contributions to the ESOP sufficient to meet the debt service requirements. The employer's guarantee or commitment is, in substance, the assumption of the ESOP's debt and the related obligation to reduce that debt. The employer has assumed these obligations either (a) to buy back its own shares (in the case where the ESOP uses the loan proceeds to acquire previously outstanding shares) or (b) to finance additional working capital or other fund needs (in the case where the ESOP uses the loan proceeds to acquire previously unissued or treasury shares from the employer).

.06 It does not follow from the above that assets held by an ESOP should be included in the financial statements of the employer. Ownership of these assets rests in the employees, not in the employer.

### **Recording the Offsetting Debit to the Recorded Liability**

.07 The Division believes that the offsetting debit to the liability recorded by the employer should be accounted for as a reduction of shareholders' equity. Therefore, when new shares are issued to the ESOP by the employer, an increase in shareholders' equity should be reported only as the debt that financed that increase is reduced. (The offsetting debit in shareholders' equity in this case is akin to the unearned compensation discussed in APB Opinion No. 25, paragraph 14.) When outstanding shares, as opposed to unissued shares, are acquired by the ESOP, shareholders' equity should similarly be reduced by the offsetting debit until the debt is repaid.

### **Reducing the Recorded Liability**

.08 The Division believes that the liability recorded by the employer should be reduced as the ESOP makes payments on the debt. The liability is

---

<sup>2</sup> This Statement of Position does not deal directly with ESOPs that might invest in qualifying employer securities other than equity securities.

initially recorded because the guarantee or commitment is in substance the employer's debt. Therefore, it should not be reduced until payments are actually made. Similarly, the amount reported as a reduction of shareholders' equity should be reduced only when the ESOP makes payments on the debt. These two accounts should move symmetrically.

### **MEASURING COMPENSATION EXPENSE**

.09 The Division believes that the amount contributed or committed to be contributed to an ESOP with respect to a given year should be the measure of the amount to be charged to expense by the employer.<sup>3</sup> Such contributions measure the amount of expense irrevocably incurred whether or not they are used concurrently to reduce the debt guaranteed by the employer.

.10 Since the debt of the ESOP is, in substance, the employer's debt, the Division believes that the employer should report separately the compensation element and the interest element of the annual contribution, and should disclose the related interest rate and debt terms in the footnotes to the financial statements. However, a significant minority within the Division believes that the entire annual contribution should be reported as compensation expense.

### **REPORTING DIVIDENDS PAID AND EARNINGS PER SHARE**

.11 The Division believes that all shares held by an ESOP should be treated as outstanding shares in the determination of earnings per share. An ESOP is a legal entity holding shares issued by the employer, whether or not those shares have been allocated to employee accounts.

.12 Dividends paid on shares held by an ESOP should be charged to retained earnings. Such dividends should not be included at any time in compensation expense.

.13 A minority within the Division believes that when trust debt proceeds are transferred to the employer corporation, a transaction of a predominantly financing nature has occurred. The minority believes that shares should be considered outstanding for earnings per share calculations only to the extent that they become constructively unencumbered by repayments of debt principal. To do otherwise, according to this minority view, would result in an inconsistent and initially excessive effect on earnings per share in that the total number of shares purchased by the ESOP would be immediately included in the calculation of earnings per share, even though the related compensation expense would be spread over a period of time on the basis of the employer's contribution to the trust. Consistent with this position, the minority would also charge dividends to retained earnings only to the extent that trust shares are unencumbered. Any remaining balance would be reported as additional compensation expense in the period the dividends were declared.

### **OTHER MATTERS**

#### **Investment Tax Credit**

.14 The Division believes that the additional investment tax credit should be accounted for (to the extent that it is available and utilized) as a reduction of income tax expense in the same year in which the contribution to the ESOP

---

<sup>3</sup> This conclusion is also applicable to ESOPs that have not borrowed funds from a bank or other lender (or issued notes to existing shareholders) to acquire shares of stock in the employer company.

is charged to expense, irrespective of the accounting for the normal investment tax credit on property acquisitions.<sup>4</sup> This additional credit arises from the contribution to the ESOP, not solely from the property acquisitions of the employer.<sup>5</sup>

**Section 10,240*****Statement of Position 78-9  
Accounting for Investments in  
Real Estate Ventures***

[Proposal to Financial Accounting Standards Board]

**AICPA****American Institute of Certified Public Accountants**

1211 Avenue of the Americas, New York, New York 10036 (212) 575-6200

December 29, 1978

Donald J. Kirk, CPA  
Chairman  
Financial Accounting Standards Board  
High Ridge Park  
Stamford, Connecticut 06905

Dear Mr. Kirk:

The accompanying statement of position, *Accounting for Investments in Real Estate Ventures*, has been prepared on behalf of the division by the AICPA Committee on Real Estate Accounting and approved by the AICPA Accounting Standards Executive Committee.

The statement presents the division's recommendations on accounting for investments in real estate ventures (corporate joint ventures, general and limited partnerships, and undivided interests). The recommendations are primarily an application of the existing authoritative accounting literature to the specialized accounting problems related to such investments and are intended to narrow the range of alternative practices.

Representatives of the division are available to discuss this proposal with you or your staff at your convenience.

Sincerely,

Arthur R. Wyatt  
Chairman  
Accounting Standards Division

cc: Securities and Exchange Commission

[The next page is 18,553.]

**NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## **ACCOUNTING FOR INVESTMENTS IN REAL ESTATE VENTURES**

### **INTRODUCTION**

**.01** Ownership of real estate or real estate development projects by two or more entities may take several forms. The most common forms are as follows:

- a. *A corporate joint venture*—a corporation owned and operated by a small group of ventures to accomplish a mutually beneficial venture or project, as described in paragraph 3 of APB Opinion 18, *The Equity Method of Accounting for Investments in Common Stock*.
- b. *A general partnership*—an association in which each partner has unlimited liability.
- c. *A limited partnership*—an association in which one or more general partners have unlimited liability and one or more partners have limited liability. A limited partnership is usually managed by the general partner or partners, subject to limitations, if any, imposed by the partnership agreement.
- d. *An undivided interest*—an ownership arrangement in which two or more parties jointly own property, and title is held individually to the extent of each party's interest.

In this statement of position, the terms *real estate venture* and *venture* apply to all of the ownership arrangements described in this paragraph.

**.02** These forms of ownership differ in legal form and economic substance, and the authoritative accounting literature dealing with the specialized accounting problems related to such investments is limited. In practice, those accounting problems are dealt with in a variety of ways, and the division believes narrowing the range of those alternative practices is desirable.

**.03** This statement of position presents the division's recommendations on accounting for investments in real estate ventures in financial statements prepared in conformity with generally accepted accounting principles. It does not apply to regulated investment companies and other entities that are required to account for investments at quoted market value or fair value.

## THE APPLICABILITY OF THE EQUITY METHOD OF ACCOUNTING

### Corporate Joint Ventures

.04 APB Opinion 18 requires investments in corporate joint ventures to be accounted for by the equity method and includes guidance for applying that method in the financial statements of the investor. That opinion applies to corporate joint ventures created to own or operate real estate projects.

.05 Paragraph 3 of APB Opinion 18 states that "an entity which is a subsidiary of one of the 'joint venturers' is not a corporate joint venture." A subsidiary, according to that opinion, refers to

... a corporation which is controlled, directly or indirectly, by another corporation. The usual condition for control is ownership of a majority (over 50 percent) of the outstanding voting stock. The power to control may also exist with a lesser percentage of ownership, for example, by contract, lease, agreement with other stockholders, or by court decree.

Accordingly, an investment in a corporate subsidiary that is a real estate venture should be accounted for by the investor-parent using the principles applicable to investments in subsidiaries rather than those applicable to investments in corporate joint ventures. Minority shareholders in such a real estate venture should account for their investment using the principles applicable to investments in common stock set forth in APB Opinion 18 or in FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. [Revised, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

### General Partnerships

.06 The staff of the American Institute of Certified Public Accountants issued an interpretation of APB Opinion 18 in November, 1971, which concludes that many of the provisions of APB Opinion 18 are appropriate in accounting for investments in certain unincorporated entities. The division believes that the principal difference, aside from income tax considerations, between corporate joint ventures and general partnerships is that the individual investors in general partnerships usually assume joint and several liability. The division believes, however, that the equity method enables non-controlling investors in general partnerships to reflect the underlying nature of their investments in those ventures as well as it does for investors in corporate joint ventures. Accordingly, the division believes that investments in noncontrolled real estate general partnerships should be accounted for and reported under the equity method. This recommendation requires the one-line equity method of presentation in both the balance sheet and the statement of income.<sup>1</sup> Paragraph 19 of APB Opinion 18 should be used as a guide in applying the equity method. Investors in general partnerships should provide for income taxes on the profits accrued on their investment in the partnership regardless of the tax basis used in the partnership return. Differences between the investor's tax basis of the investment and the reported amount of the investment in the financial statements of the investor that will result in taxable or deductible amounts in future years (temporary differences) should be accounted for in conformity with FASB Statement No. 109, *Accounting for Income Taxes*. [Revised, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

---

<sup>1</sup> Pro rata consolidation is not appropriate except in the limited circumstances described in paragraph .11.

.07 The division believes a general partnership that is controlled, directly or indirectly, by an investor is, in substance, a subsidiary of the investor. APB Opinion 18 states that the usual condition for control of a corporation is ownership of a majority (over 50 percent) of the outstanding voting stock. However, if partnership voting interests are not clearly indicated, a condition that would usually indicate control is ownership of a majority (over 50 percent) of the financial interests in profits or losses (see paragraph .25). The power to control may also exist with a lesser percentage of ownership, for example, by contract, lease, agreement with other partners, or by court decree. On the other hand, majority ownership may not constitute control if major decisions such as the acquisition, sale, or refinancing of principal partnership assets must be approved by one or more of the other partners. The division believes that a controlling investor should account for its investment under the principles of accounting applicable to investments in subsidiaries. Accordingly, intercompany profits and losses on assets remaining within the group should be eliminated. A noncontrolling investor in a general partnership should account for its investment by the equity method and should be guided by the provisions of paragraph 19 of APB Opinion 18.

### Limited Partnerships

.08 The division believes that the accounting recommendations for use of the equity method of accounting for investments in general partnerships are generally appropriate for accounting by limited partners for their investments in limited partnerships. A limited partner's interest may be so minor that the limited partner may have virtually no influence over partnership operating and financial policies. Such a limited partner is, in substance, in the same position with respect to the investment as an investor that owns a minor common stock interest in a corporation, and, accordingly, accounting for the investment using the cost method may be appropriate. Under the cost method, income recognized by the investor is limited to distributions received, except that distributions that exceed the investor's share of earnings after the date of the investment are applied to reduce the carrying value of the investment. Differences between the investor's tax basis of the investment and the reported amount of the investment in the financial statements of the investor that will result in taxable or deductible amounts in future years (temporary differences) should be accounted for in conformity with FASB Statement No. 109, *Accounting for Income Taxes*. [Revised, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.09 The rights and obligations of the general partners in a limited partnership are different from those of the limited partners. Some believe that general partners should be deemed to have the controlling interest in a limited partnership. However, if limited partners have important rights, such as the right to replace the general partner or partners, approve the sale or refinancing of principal assets, or approve the acquisition of principal partnership assets, the partnership may not be under the control, directly or indirectly, of the general partnership interests. The division believes that the general partners are in control and should account for their investments in accordance with the recommendations in paragraph .07 only if the substance of the partnership or other agreements provides for control by the general partners.

.10 The division believes that if the substance of the partnership arrangement is such that the general partners are not in control of the major operating and financial policies of the partnership, a limited partner may be in control. An example could be a limited partner holding over 50 percent of the total part-

nership interest. A controlling limited partner should be guided in accounting for its investment by the principles for investments in subsidiaries. Noncontrolling limited partners should account for their investments by the equity method and should be guided by the provisions of paragraph 19 of APB Opinion 18, as discussed in paragraphs .06 and .07, or by the cost method, as discussed in paragraph .08, as appropriate.

### **Undivided Interests**

.11 In an interpretation of APB Opinion 18 issued by the staff of the American Institute of Certified Public Accountants in November, 1971, the staff concluded that most of the provisions of paragraph 19 of APB Opinion 18 generally would be appropriate in accounting for partnerships and unincorporated ventures, but that if

... the investor-venturer owns an undivided interest in each asset and is proportionately (i.e., severally) liable for its share of each liability, the provisions of the equity method set forth in paragraph 19(c) of the Opinion may not apply in some industries. For example, where it is the established industry practice ... , the investor-venturer may account in its financial statements for its *pro rata* share of the assets, liabilities, revenues, and expenses of the venture.

If real property owned by undivided interests is subject to joint control by the owners, the division believes that investor-venturers should not present their investments by accounting for their *pro rata* share of the assets, liabilities, revenues, and expenses of the ventures. Such property is subject to joint control if decisions regarding the financing, development, sale, or operations require the approval of two or more of the owners. Most real estate ventures with ownership in the form of undivided interests are subject to some level of joint control. Accordingly, the division believes that such investments should be presented in the same manner as investments in noncontrolled partnerships. If, however, the approval of two or more of the owners is not required for decisions regarding the financing, development, sale, or operations of real estate owned and each investor is entitled to only its *pro rata* share of income, is responsible to pay only its *pro rata* share of expenses, and is severally liable only for indebtedness it incurs in connection with its interest in the property, the investment may be presented by recording the undivided interest in the assets, liabilities, revenue, and expenses of the venture.

## **GENERAL MATTERS**

### **Disclosure**

.12 The division believes that investors in real estate ventures should be guided by the provisions of paragraph 20 of APB Opinion 18 in determining the disclosures to be made in their financial statements.

### **Statement of Cash Flows**

.13 FASB Statement No. 95, *Statement of Cash Flows*, governs the form and content of statements of cash flows. [Revised, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

## **INVESTOR ACCOUNTING FOR LOSSES**

### **General**

.14 Some investors have suggested that their equity in losses of a real estate venture need not be recorded under the equity method of accounting as

long as the value of their investment has not been impaired; for example, if it is expected that the venture's assets can be sold for more than their carrying value. The division believes that investors should record their share of the real estate venture's losses, determined in conformity with generally accepted accounting principles, without regard to unrealized increases in the estimated fair value of the venture's assets.

**Accounting for an Investor's Share of Losses in Excess of Its Investment, Including Loans and Advances**

.15 The division believes that an investor that is liable for the obligations of the venture or is otherwise committed to provide additional financial support to the venture should record its equity in real estate venture losses in excess of its investment, including loans and advances.<sup>2</sup> The following are examples of such circumstances:

- a. The investor has a legal obligation as a guarantor or general partner.
- b. The investor has indicated a commitment, based on considerations such as business reputation, intercompany relationships, or credit standing, to provide additional financial support. Such a commitment might be indicated by previous support provided by the investor or statements by the investor to other investors or third parties of the investor's intention to provide support.

.16 An investor in a real estate venture should report its recorded share of losses in excess of its investment, including loans and advances, as a liability in its financial statements.

.17 If an investor does not recognize venture losses in excess of its investment, loans, and advances and the venture subsequently reports net income, the investor should resume applying the equity method only after its share of such net income equals the share of net losses not recognized during the period in which equity accounting was suspended.

.18 If it is probable that one or more investors cannot bear their share of losses, the remaining investors should record their proportionate shares of venture losses otherwise allocable to investors considered unable to bear their share of losses.<sup>3</sup> When the venture subsequently reports income, those remaining investors should record their proportionate share of the venture's net income otherwise allocable to investors considered unable to bear their share of losses until such income equals the excess losses they previously recorded. The division also believes that an investor who is deemed by other investors to be unable to bear its share of losses should continue to record its contractual share of losses unless it is relieved from the obligation to make payment by agreement or operation of law.

.19 The division believes that the accounting by an investor for losses otherwise allocable to other investors should be governed by the provisions of

---

<sup>2</sup> An investor, though not liable or otherwise committed to provide additional financial support, should provide for losses in excess of investment when the imminent return to profitable operations by the venture appears to be assured. For example, a material nonrecurring loss of an isolated nature, or start-up losses, may reduce an investment below zero through the underlying profitable pattern of an investee is unimpaired.

<sup>3</sup> This recommendation does not apply for real property jointly owned and operated as undivided interests in assets if the claims or liens of investor's creditors are limited to investors' respective interests in such property.

FASB Statement No. 5 relating to loss contingencies. Accordingly, the investor should record a proportionate share of the losses otherwise allocable to other investors if it is probable that they will not bear their share. In this connection, the division believes that each investor should look primarily to the fair value of the other investors' interests in the venture and the extent to which the venture's debt is nonrecourse in evaluating their ability and willingness to bear their allocable share of losses.<sup>4</sup> However, there may be satisfactory alternative evidence of an ability and willingness of other investors to bear their allocable share of losses. Such evidence might be, for example, that those investors previously made loans or contributions to support cash deficits, possess satisfactory financial standing (as may be evidenced by satisfactory credit ratings), or have provided adequately collateralized guarantees.

#### **Loss in Value of an Investment, Including Loans and Advances, Other Than a Temporary Decline**

.20 A loss in value of an investment other than a temporary decline should be recognized. Such a loss in value may be indicated, for example, by a decision by other investors to cease providing support or reduce their financial commitment to the venture. Loans and advances should be evaluated under FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*. [Revised, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

### **OTHER ACCOUNTING MATTERS RELATED TO THE USE OF THE EQUITY METHOD**

#### **Eliminating Interentity Profits and Losses**

.21 As noted elsewhere in this statement, APB Opinion 18 should be used as a guide when applying the equity method. Paragraph 19(a) of that opinion provides that, in applying the equity method, intercompany profits and losses should be eliminated until realized by the investor or investee as if the investee company were consolidated. The division believes that intercompany profit should be eliminated by the investor in relation to the investor's ownership interest in the investee, except that an investor that controls the investee and enters into a transaction with the investee should eliminate all of the intercompany profit on assets remaining within the group.

.22 The AICPA industry accounting guide, *Accounting for Profit Recognition on Sales of Real Estate*,<sup>\*</sup> sets out similar rules in paragraph 58:

A sale of property in which the seller holds or acquires an equity interest in the buyer should result in recognizing only the part of the profit proportionate to the outside interest in the buyer. No profit should be recognized if the seller controls the buyer . . . until realized from transactions with outside parties through sale or operations of the property.

.23 The division believes that if a transaction with a real estate venture confirms that there has been a loss in the value of the asset sold that is other

---

<sup>4</sup> An investor may not be able to apply the general rule to an investment in an undivided interest because the extent to which the interests of other investors are encumbered by liens may not be known.

<sup>\*</sup> The Financial Accounting Standards Board has extracted the specialized accounting and reporting principles and practices contained in this AICPA Accounting Guide, see FASB Statement No. 66, *Accounting for Sales of Real Estate*, October 1982.

than temporary and that has not been recognized previously, the loss should be recognized on the books of the transferor.

### **Accounting Principles Used by the Venture**

.24 In the real estate industry, the accounts of a venture may reflect accounting practices, such as those used to prepare tax basis data for investors, that vary from generally accepted accounting principles. If the financial statements of the investor are to be prepared in conformity with generally accepted accounting principles, such variances that are material should be eliminated in applying the equity method.

### **Allocation Ratios for the Determination of Investor Income**

.25 Venture agreements may designate different allocations among the investors of the venture's (a) profits and losses, (b) specified costs and expenses, (c) distributions of cash from operations, and (d) distributions of cash proceeds from liquidation. Such agreements may also provide for changes in the allocations at specified times or on the occurrence of specified events. Accounting by the investors for their equity in the venture's earnings under such agreements requires careful consideration of substance over form and consideration of underlying values as discussed in paragraph .19. The division believes that in order to determine the investor's share of venture net income or loss, such agreements or arrangements should be analyzed to determine how an increase or decrease in net assets of the venture (determined in conformity with generally accepted accounting principles) will affect cash payments to the investor over the life of the venture and on its liquidation. The division believes that specified profit and loss allocation ratios should not be used to determine an investor's equity in venture earnings if the allocation of cash distributions and liquidating distributions are determined on some other basis. For example, if a venture agreement between two investors purports to allocate all depreciation expense to one investor and to allocate all other revenues and expenses equally, but further provides that irrespective of such allocations, distributions to the investors will be made simultaneously and divided equally between them, there is no substance to the purported allocation of depreciation expense.

### **Accounting for a Difference Between the Carrying Amount of an Investment in a Real Estate Venture and the Underlying Equity in Net Assets**

.26 Differences between the carrying amount of an investment in a real estate venture and the investor's equity in the underlying net assets recorded by the venture may arise, for example, from unrecognized profit on transfers of real estate to the venture or differences in accounting methods. In addition, differences may arise from the acquisition of an investment in a venture at a price different from the investor's share of the net assets as recorded on the books of the venture.

.27 Differences that arise from a business combination with a venture accounted for as a purchase should be accounted for in accordance with the provisions of APB Opinion 16. The division believes that an excess of the cost of the investment acquired over the equity in the underlying net assets usually would be ascribed to the fair values of real property interest owned by the venture. Any cost in excess of amounts assigned to identifiable tangible or intangible assets acquired is an intangible asset that should be amortized in a systematic manner related to the purpose of the venture. Because of the limited life and limited purpose usually inherent in real estate ventures, the division believes that the benefits from such an intangible asset generally decline as the property is sold or depreciated, and therefore amortization of

that intangible asset should be recorded in relation to cost of sales or depreciation. The period of amortization should not, however, exceed forty years.

.28 Paragraph 19(b) of APB Opinion 18 provides that the difference between the cost of an investment and the amount of the underlying equity in net assets of the investee "should affect the determination of the amount of the investor's share of earnings or losses of an investee as if the investee were a consolidated subsidiary." The differences should be recognized by the investor as an adjustment to the amount of the venturer's depreciation, cost of sales, or other expenses, as appropriate, in recording income or loss from the venture on the equity basis.

### ACCOUNTING BY THE INVESTOR FOR CERTAIN TRANSACTIONS WITH A REAL ESTATE VENTURE

#### Capital Contributions

.29 *Contribution of Cash.* If all investors contribute cash at the formation of the real estate venture, each investor should record its investment at the amount of the cash contributed.

.30 *Contribution of Real Estate.* The division believes an investor that contributes real estate to the capital of a real estate venture generally should record its investment in the venture at the investor's cost (less related depreciation and valuation allowances) of the real estate contributed, regardless of whether the other investors contribute cash, property, or services. The division believes that an investor should not recognize profit on a transaction that in economic substance is a contribution to the capital of an entity, because a contribution to the capital of an entity is not the culmination of the earnings process. The division understands, however, that some transactions, structured in the form of capital contributions, may in economic substance be sales. The recommendations in paragraph .36 of this statement on accounting for sales of real estate to a venture by an investor apply to those transactions. An example of such a transaction is one in which investor A contributes to a venture real estate with a fair value of \$2,000 and investor B contributes cash in the amount of \$1,000 which is immediately withdrawn by investor A, and, following such contributions and withdrawals, each investor has a 50 percent interest in the venture (the only asset of which is the real estate). Assuming investor A is not committed to reinvest the \$1,000 in the venture, the substance of this transaction is a sale by investor A of a one-half interest in the real estate in exchange for cash. A minority of the division disagrees with the conclusion that an investor contributing real estate to a real estate venture should record its investment at the cost of the real estate contributed. They believe that profit recognition by such an investor to the extent of the other investors' interests in the profits and losses of the venture may be appropriate if the other investors contribute cash or other hard assets (such as marketable securities) for their interests and the investor contributing the real estate has no continuing involvement with the real estate that would require deferral of profit under the AICPA industry accounting guide, *Accounting for Profit Recognition on Sales of Real Estate*.<sup>\*</sup> The majority of the division believes that unless the investor that contributes real estate to the venture withdraws cash (or other hard assets) and has no commitment to reinvest, such a transaction is not the culmination of an earnings process.

---

<sup>\*</sup> The Financial Accounting Standards Board has extracted the specialized accounting and reporting principles and practices contained in this AICPA Accounting Guide, see FASB Statement No. 66, *Accounting for Sales of Real Estate*, October 1982.

.31 An investor contributing property to a venture may obtain a disproportionately small interest in the venture based on a comparison of the carrying amount of the property with the cash contributed by the other investors. That situation might indicate that the investor contributing the property has suffered a loss that should be recognized.

.32 *Contribution of Services or Intangibles.\** The division believes the accounting considerations that apply to real property contributed to a partnership or joint venture also apply to contributions of services or intangibles. The investor's cost of such services or intangibles to be allocated to the cost of the investment should be determined by the investor in the same manner as for an investment in a wholly owned real estate project.

### Income From Loans or Advances to a Venture

.33 Interest on loans and advances that are in substance capital contributions (for example, if all the investors are required to make loans and advances proportionate to their equity interests) should be accounted for as distributions rather than as interest income by the investors.

.34 An investor-lender that does not capitalize interest on its own real estate construction and development projects should account for interest on loans and advances that are not in substance capital contributions in accordance with the recommendations in this paragraph.

- a. All interest income on the investor's loans or advances to the venture should be deferred if either of the following conditions is present.
  - (i) Collectibility of the principal or interest is in doubt. This condition may exist if adequate collateral and other terms normally required by an independent lender are not present.
  - (ii) There is a reasonable expectation that the other investors will not bear their shares of losses, resulting in uncertainty as to the lender's share of the venture's related interest expense.
- b. If neither of the conditions in (a) is present and either the venture has recorded interest as an expense or the venture has capitalized the interest but in order to conform to the investor's accounting policies, the investor has recorded its equity in the income or loss of the venture as if the venture had charged the interest to expense, the entire interest income accrued on loans or advances to a venture should be recorded as earned.
- c. If the conditions in (a) or (b) are not present, a portion of interest income from loans and advances to a venture should be deferred based on the investor's percentage interest in the profits and losses of the venture. However, an evaluation similar to that discussed in paragraphs .18 and .19 for recording the investor's share of losses should be made to avoid recording as interest income amounts that may ultimately be borne as losses by the investor making the loan.

[.35] [Effectively superseded by FASB Statement No. 34, *Capitalization of Interest Cost*.]

---

\* The provisions of this paragraph do not apply to real estate syndication activities in which the syndicators receive or retain partnership interests. Such activities are discussed in SOP 92-1, *Accounting for Real Estate Syndication Income* [section 10,500].

### **Sales of Real Estate to a Venture**

.36 Sales of real estate by an investor to a real estate venture are subject to all of the provisions set forth in the AICPA industry accounting guide, *Accounting for Profit Recognition on Sales of Real Estate*.

### **Sales of Services to a Venture**

.37 If services are performed for a venture by an investor and their cost is capitalized by the venture, profit may be recognized by the investor to the extent attributable to the outside interests in the venture if the following conditions are met:

- a. The substance of the transaction does not significantly differ from its form.
- b. There are no substantial uncertainties about the ability of the investor to complete performance (as may be the case if the investor lacks experience in the business of the venture) or the total cost of services to be rendered.
- c. There is a reasonable expectation that the other investors will bear their share of losses, if any.

The method of recognizing income from services rendered should be consistent with the method followed for services performed for unrelated parties.

### **Purchases of Real Estate or Services From a Venture**

.38 An investor should not record as income its equity in the venture's profit from a sale of real estate to that investor; the investor's share of such profit should be recorded as a reduction in the carrying amount of the purchased real estate and recognized as income on a pro rata basis as the real estate is depreciated or when it is sold to a third party. Similarly, if a venture performs services for an investor and the cost of those services is capitalized by the investor, the investor's share of the venture's profit in the transaction should be recorded as a reduction in the carrying amount of the capitalized cost.

## **ACCOUNTING FOR THE SALE OF AN INTEREST IN A REAL ESTATE VENTURE**

.39 The division believes that a sale of an investment in a real estate venture (including the sale of stock in a corporate real estate venture) is the equivalent of a sale of an interest in the underlying real estate and should be evaluated under the guidelines set forth in the AICPA industry accounting guide, *Accounting for Profit Recognition on Sales of Real Estate*.

[.40] [Effectively superseded by FASB Statement No. 66, *Accounting for Sales of Real Estate*.]

## **TRANSITION**

.41 The division recommends applying this statement of position to financial statements issued for fiscal years and interim periods beginning after De-

\* The Financial Accounting Standards Board has extracted the specialized accounting and reporting principles and practices contained in this AICPA Accounting Guide, see FASB Statement No. 66, *Accounting for Sales of Real Estate*, October 1982.

cember 24, 1978. Adjustments resulting from a change in accounting method to comply with the recommendations in this statement should be applied retroactively, if material, and, to enhance comparability between periods, financial statements presented for the periods affected should be restated for as many periods as is practicable to give retroactive effect to such adjustments and to changes in presentation. The division encourages earlier application of the recommendations in this statement for fiscal years beginning before December 25, 1978, in financial statements not previously issued.

**Section 10,330****Statement of Position 81-1  
Accounting for Performance of  
Construction-Type and Certain  
Production-Type Contracts**

July 15, 1981

[Proposal to the Financial Accounting Standards Board]

**NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

**Introduction**

.01 This statement of position provides guidance on the application of generally accepted accounting principles in accounting for the performance of contracts for which specifications are provided by the customer for the construction of facilities or the production of goods or for the provision of related services. Changes in the business environment have increased significantly the variety and uses of those types of contracts and the types of business enterprises that use them. In the present business environment, diverse types of contracts, ranging from relatively simple to highly complex and from relatively short- to long-term, are widely used in many industries for construction, production, or provision of a broad range of goods and services. However, existing principles related to accounting for contracts were written in terms of long-term construction-type contracts, and they are not stated in sufficient detail for the scope of activities to which they presently are applied. Those activities range far beyond the traditional construction-type activity (the design and physical construction of facilities such as buildings, roads, dams, and bridges) to include, for example, the development and production of military and commercial aircraft, weapons delivery systems, space exploration hardware, and computer software. The accounting standards division believes that guidance is now needed in this area of accounting.

## The Basic Accounting Issue

.02 The determination of the point or points at which revenue should be recognized as earned and costs should be recognized as expenses is a major accounting issue common to all business enterprises engaged in the performance of contracts of the types covered by this statement. Accounting for such contracts is essentially a process of measuring the results of relatively long-term events and allocating those results to relatively short-term accounting periods. This involves considerable use of estimates in determining revenues, costs, and profits and in assigning the amounts to accounting periods. The process is complicated by the need to evaluate continually the uncertainties inherent in the performance of contracts and by the need to rely on estimates of revenues, costs, and the extent of progress toward completion.

## Present Accounting Requirements and Practices

.03 The pervasive principle of realization and its exceptions and modifications are central factors underlying accounting for contracts. APB Statement 4\* states:

Revenue is generally recognized when both of the following conditions are met: (1) the earnings process is complete or virtually complete, and (2) an exchange has taken place. [Paragraph 150]

Revenue is sometimes recognized on bases other than the realization rule. For example, on long-term construction contracts revenue may be recognized as construction progresses. This exception to the realization principle is based on the availability of evidence of the ultimate proceeds and the consensus that a better measure of periodic income results. [Paragraph 152]

The exception to the usual revenue realization rule for long-term construction-type contracts, for example, is justified in part because strict adherence to realization at the time of sale would produce results that are considered to be unreasonable. The judgment of the profession is that revenue should be recognized in this situation as construction progresses. [Paragraph 174]

.04 Accounting Research Bulletin No. 45 (ARB No. 45), *Long-Term Construction-Type Contracts*, issued by the AICPA Committee on Accounting Procedure in 1955, describes the two generally accepted methods of accounting for long-term construction-type contracts for financial reporting purposes:

- *The percentage-of-completion method* recognizes income as work on a contract progresses; recognition of revenues and profits generally is related to costs incurred in providing the services required under the contract.
- *The completed-contract method* recognizes income only when the contract is completed, or substantially so, and all costs and related revenues are reported as deferred items in the balance sheet until that time.

The units-of-delivery is a modification of the percentage-of-completion method of accounting for contracts.

---

\* Statement of Position 93-3, *Rescission of Accounting Principles Board Statements*, rescinds APB Statement No. 4. FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, discusses matters similar to those in APB Statement No. 4. [Footnote added to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

- *The units-of-delivery method* recognizes as revenue the contract price of units of a basic production product delivered during a period and as the cost of earned revenue the costs allocable to the delivered units; costs allocable to undelivered units are reported in the balance sheet as inventory or work in progress. The method is used in circumstances in which an entity produces units of a basic product under production-type contracts in a continuous or sequential production process to buyers' specifications.

The use of either of the two generally accepted methods of accounting involves, to a greater or lesser extent, three key areas of estimates and uncertainties: (a) the extent of progress toward completion, (b) contract revenues, and (c) contract costs. Although the ultimate amount of contract revenue is often subject to numerous uncertainties, the accounting literature has given little attention to the difficulties of estimating contract revenue. [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.05 ARB No. 45, paragraph 15, describes the circumstances in which each method is preferable as follows:

The committee believes that in general when estimates of costs to complete and extent of progress toward completion of long-term contracts are reasonably dependable, the percentage-of-completion method is preferable. When lack of dependable estimates or inherent hazards cause forecasts to be doubtful, the completed-contract method is preferable.

Both of the two generally accepted methods are widely used in practice. However, the two methods are frequently applied differently in similar circumstances. The division believes that the two methods should be used in specified circumstances and should not be used as acceptable alternatives for the same circumstances. Accordingly, identifying the circumstances in which either of the methods is preferable and the accounting that should be followed in the application of those methods are among the primary objectives of this statement of position. This statement provides guidance on the application of ARB No. 45 and does not amend that bulletin.

.06 In practice, methods are sometimes found that allocate contract costs and revenues to accounting periods on (a) the basis of cash receipts and payments or (b) the basis of contract billings and costs incurred. Those practices are not generally accepted methods of accounting for financial reporting purposes. However, those methods are appropriate for other purposes, such as the measurement of income for income tax purposes, for which the timing of cash transactions is a controlling factor. Recording the amounts billed or billable on a contract during a period as contract revenue of the period, and the costs incurred on the contract as expenses of the period, is not acceptable for financial reporting purposes because the amounts billed or billable on a contract during a period are determined by contract terms and do not necessarily measure performance on the contract. Only by coincidence might those unacceptable methods produce results that approximate the results of the generally accepted method of accounting for contracts that are appropriate in the circumstances.

## **Other Pronouncements and Regulations Affecting Contract Accounting**

.07 Accounting Research Bulletin No. 43, chapter 11, "Government Contracts," prescribes generally accepted principles in three areas of accounting

for government contracts. Section A of that chapter deals with accounting problems arising under cost-plus-fixed-fee contracts. Section B deals with certain aspects of the accounting for government contracts and subcontracts that are subject to renegotiation. Section C deals with problems involved in accounting for certain terminated war and defense contracts. Those pronouncements govern accounting for contracts in the areas indicated.

.08 The pricing and costing of federal government contracts are governed by cost principles contained in procurement regulations such as the Federal Procurement Regulation (FPR) and the Defense Acquisition Regulation (DAR). Also, most major government contractors are subject to cost accounting standards issued by the Cost Accounting Standards Board (CASB). CASB standards apply to the cost accounting procedures that government contractors use to allocate costs to contracts; CASB standards are not intended for financial reporting.

.09 Accounting for contracts for income tax purposes is prescribed by the Internal Revenue Code and the related rules and regulations. The methods of accounting for contracts under those requirements are not limited to the two generally accepted methods for financial reporting. For numerous historical and practical reasons, tax accounting rules and regulations differ from generally accepted accounting principles. Numerous nonaccounting considerations are appropriate in determining income tax accounting. This statement deals exclusively with the application of generally accepted accounting principles to accounting for contracts in financial reporting. It does not apply to income tax accounting and is not intended to influence income tax accounting.

## Need for Guidance

.10 Because of the complexities and uncertainties in accounting for contracts, the increased use of diverse types of contracts for the construction of facilities, the production of goods, or the provision of related services, and present conditions and practices in industries in which contracts are performed for those purposes, additional guidance on the application of generally accepted accounting principles is needed. This statement of position provides that guidance. Appendix A contains a schematic chart showing the organization of the statement.

## Scope of Statement of Position

.11 This statement of position applies to accounting for performance of contracts for which specifications are provided by the customer for the construction of facilities or the production of goods or the provision of related services that are reported in financial statements prepared in conformity with generally accepted accounting principles.<sup>1</sup> Existing authoritative accounting literature uses the terms "long-term" and "construction-type" in identifying the types of contracts that are the primary focus of interest. The term "long-term" is not used in this statement of position as an identifying characteristic because

---

<sup>1</sup> This statement is not intended to apply to "service transactions" as defined in the FASB's October 23, 1978 Invitation to Comment, *Accounting for Certain Service Transactions*. However, it applies to separate contracts to provide services essential to the construction or production of tangible property, such as design, engineering, procurement, and construction management (see paragraph .13 for examples).

other characteristics are considered more relevant for identifying the types of contracts covered. However, accounting for contracts by an entity that primarily has relatively short-term contracts is recommended in paragraph .31 of this statement. The scope of the statement is not limited to construction-type contracts.

## Contracts Covered

.12 Contracts covered by this statement of position are binding agreements between buyers and sellers in which the seller agrees, for compensation, to perform a service to the buyer's specifications.<sup>2</sup> Contracts consist of legally enforceable agreements in any form and include amendments, revisions, and extensions of such agreements. Performance will often extend over long periods, and the seller's right to receive payment depends on his performance in accordance with the agreement. The service may consist of designing, engineering, fabricating, constructing, or manufacturing related to the construction or the production of tangible assets. Contracts such as leases and real estate agreements, for which authoritative accounting literature provides special methods of accounting, are not covered by this statement.

.13 Contracts covered by this statement include, but are not limited to, the following:

- Contracts in the construction industry, such as those of general building, heavy earth moving, dredging, demolition, design-build contractors, and specialty contractors (for example, mechanical, electrical, or paving).
- Contracts to design and build ships and transport vessels.
- Contracts to design, develop, manufacture, or modify complex aerospace or electronic equipment to a buyer's specification or to provide services related to the performance of such contracts.
- Contracts for construction consulting service, such as under agency contracts or construction management agreements.
- Contracts for services performed by architects, engineers, or architectural or engineering design firms.

.14 Contracts not covered by this statement include, but are not limited to, the following:

- Sales by a manufacturer of goods produced in a standard manufacturing operation, even if produced to buyers' specifications, and sold in the ordinary course of business through the manufacturer's regular marketing channels if such sales are normally recognized as revenue in accordance with the realization principle for sales of products and if their costs are accounted for in accordance with generally accepted principles of inventory costing.
- Sales or supply contracts to provide goods from inventory or from homogeneous continuing production over a period of time.
- Contracts included in a program and accounted for under the program method of accounting. For accounting purposes, a program consists of

---

<sup>2</sup> Specifications imposed on the buyer by a third party (for example, a government or regulatory agency or a financial institution) or by conditions in the marketplace are deemed to be "buyer's specifications."

a specified number of units of a basic product expected to be produced over a long period in a continuing production effort under a series of existing and anticipated contracts.<sup>[3]</sup>

- Service contracts of health clubs, correspondence schools, and similar consumer-oriented organizations that provide their services to their clients over an extended period.
- Magazine subscriptions.
- Contracts of nonprofit organizations to provide benefits to their members over a period of time in return for membership dues.

**.15** Contracts covered by this statement may be classified into four broad types based on methods of pricing: (a) fixed-price or lump-sum contracts, (b) cost-type (including cost-plus) contracts, (c) time-and-material contracts, and (d) unit-price contracts. A fixed-price contract is an agreement to perform all acts under the contract for a stated price. A cost-type contract is an agreement to perform under a contract for a price determined on the basis of a defined relationship to the costs to be incurred, for example, the costs of all acts required plus a fee, which may be a fixed amount or a fixed percentage of the costs incurred. A time-and-material contract is an agreement to perform all acts required under the contract for a price based on fixed hourly rates for some measure of the labor hours required (for example, direct labor hours) and the cost of materials. A unit-price contract is an agreement to perform all acts required under the contract for a specified price for each unit of output. Each of the various types of contracts may have incentive, penalty, or other provisions that modify their basic pricing terms. The pricing features of the various types are discussed in greater detail in Appendix B.

## Definition of a Contractor

**.16** The term “contractor” as used in this statement refers to a person or entity that enters into a contract to construct facilities, produce goods, or render services to the specifications of a buyer either as a general or prime contractor, as a subcontractor to a general contractor, or as a construction manager.

## Definition of a Profit Center

**.17** For the purpose of this statement, a “profit center” is the unit for the accumulation of revenues and costs and the measurement of income. For business enterprises engaged in the performance of contracts, the profit center for accounting purposes is usually a single contract; but under some specified circumstances it may be a combination of two or more contracts, a segment of a contract or of a group of combined contracts. This statement of position provides guidance on the selection of the appropriate profit center. The accounting recommendations, usually stated in terms of a single contract, also apply to alternative profit centers in circumstances in which alternative centers are appropriate.

## Application and Effect on Existing Audit Guides and SOPs

**.18** This statement of position presents the division’s recommendations on accounting for contracts (as specified in paragraphs .11 to .17) in all indus-

---

<sup>[3]</sup> [Footnote deleted to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

tries. The recommendations in this statement need not be applied to immaterial items. Two existing AICPA Audit and Accounting Guides, *Construction Contractors* and *Audits of Federal Government Contractors*, provide additional guidance on the application of generally accepted accounting principles to the construction industry and to federal government contracts, respectively. The recommendations in this statement take precedence in those areas. [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.19 The guidance on contract accounting and financial reporting in *Audits of Federal Government Contractors* is essentially consistent with the recommendations in this statement. Since the recommendations in this statement provide more comprehensive and explicit guidance on the application of generally accepted accounting principles to contract accounting than does the guide, *Audits of Federal Government Contractors*, the guide incorporates this statement as an appendix. The provisions of that guide should be interpreted and applied in the context of the recommendations in this statement. [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.20 This statement is not intended to supersede recommendations on accounting in other AICPA industry accounting or audit guides or in other statements of position.

## The Division's Conclusions

### Determining a Basic Accounting Policy for Contracts

.21 In accounting for contracts, the basic accounting policy decision is the choice between the two generally accepted methods: the percentage-of-completion method including units of delivery and the completed-contract method. The determination of which of the two methods is preferable should be based on a careful evaluation of circumstances because the two methods should not be acceptable alternatives for the same circumstances. The division's recommendations on basic accounting policy are set forth in the sections on "The Percentage-of-Completion Method" and "The Completed-Contract Method," which identify the circumstances appropriate to the methods, the bases of applying the methods, and the reasons for the recommendations. The recommendations apply to accounting for individual contracts and to accounting for other profit centers in accordance with the recommendations in the section on "Determining the Profit Center." As a result of evaluating individual contracts and profit centers, a contractor should be able to establish a basic policy that should be followed in accounting for most of his contracts. In accordance with the requirements of APB Opinion No. 22, *Disclosure of Accounting Policies*, a contractor should disclose in the note to the financial statements on accounting policies the method or methods of determining earned revenue and the cost of earned revenue including the policies relating to combining and segmenting, if applicable. Appendix C contains a summary of the disclosure requirements in this statement.

### The Percentage-of-Completion Method

.22 This section sets forth the recommended basis for using the percentage-of-completion method and the reasons for the recommendation. Under most

contracts for construction of facilities, production of goods, or provision of related services to a buyer's specifications, both the buyer and the seller (contractor) obtain enforceable rights. The legal right of the buyer to require specific performance of the contract means that the contractor has, in effect, agreed to sell his rights to work-in-progress as the work progresses. This view is consistent with the contractor's legal rights; he typically has no ownership claim to the work-in-progress but has lien rights. Furthermore, the contractor has the right to require the buyer, under most financing arrangements, to make progress payments to support his ownership investment and to approve the facilities constructed (or goods produced or services performed) to date if they meet the contract requirements. The buyer's right to take over the work-in-progress at his option (usually with a penalty) provides additional evidence to support that view. Accordingly, the business activity taking place supports the concept that in an economic sense performance is, in effect, a continuous sale (transfer of ownership rights) that occurs as the work progresses. Also under most contracts for the production of goods and the provision of related services that are accounted for on the basis of units delivered, both the contractor and the customer obtain enforceable rights as the goods are produced or the services are performed. As units are delivered, title to and the risk of loss on those units normally transfer to the customer, whose acceptance of the items indicates that they meet the contractual specifications. For such contracts, delivery and acceptance are objective measurements of the extent to which the contracts have been performed. The percentage-of-completion method recognizes the legal and economic results of contract performance on a timely basis. Financial statements based on the percentage-of-completion method present the economic substance of a company's transactions and events more clearly and more timely than financial statements based on the completed-contract method, and they present more accurately the relationships between gross profit from contracts and related period costs. The percentage-of-completion method informs the users of the general purpose financial statements of the volume of economic activity of a company.

### ***Circumstances Appropriate to the Method***

.23 The use of the percentage-of-completion method depends on the ability to make reasonably dependable estimates. For the purposes of this statement, "the ability to make reasonably dependable estimates" relates to estimates of the extent of progress toward completion, contract revenues, and contract costs. The division believes that the percentage-of-completion method is preferable as an accounting policy in circumstances in which reasonably dependable estimates can be made and in which all the following conditions exist:

- Contracts executed by the parties normally include provisions that clearly specify the enforceable rights regarding goods or services to be provided and received by the parties, the consideration to be exchanged, and the manner and terms of settlement.
- The buyer can be expected to satisfy his obligations under the contract.
- The contractor can be expected to perform his contractual obligations.

.24 For entities engaged on a continuing basis in the production and delivery of goods or services under contractual arrangements and for whom contracting represents a significant part of their operations, the presumption is that they have the ability to make estimates that are sufficiently dependable

to justify the use of the percentage-of-completion method of accounting.<sup>4</sup> Persuasive evidence to the contrary is necessary to overcome that presumption. The ability to produce reasonably dependable estimates is an essential element of the contracting business. For a contract on which a loss is anticipated, generally accepted accounting principles require recognition of the entire anticipated loss as soon as the loss becomes evident. An entity without the ability to update and revise estimates continually with a degree of confidence could not meet that essential requirement of generally accepted accounting principles.

**.25** Accordingly, the division believes that entities with significant contracting operations generally have the ability to produce reasonably dependable estimates and that for such entities the percentage-of-completion method of accounting is preferable in most circumstances. The method should be applied to individual contracts or profit centers, as appropriate.

- a. Normally, a contractor will be able to estimate total contract revenue and total contract cost in single amounts. Those amounts should normally be used as the basis for accounting for contracts under the percentage-of-completion method.
- b. For some contracts, on which some level of profit is assured, a contractor may only be able to estimate total contract revenue and total contract cost in ranges of amounts. If, based on the information arising in estimating the ranges of amounts and all other pertinent data, the contractor can determine the amounts in the ranges that are most likely to occur, those amounts should be used in accounting for the contract under the percentage-of-completion method. If the most likely amounts cannot be determined, the lowest probable level of profit in the range should be used in accounting for the contract until the results can be estimated more precisely.
- c. However, in some circumstances, estimating the final outcome may be impractical except to assure that no loss will be incurred. In those circumstances, a contractor should use a zero estimate of profit; equal amounts of revenue and cost should be recognized until results can be estimated more precisely. A contractor should use this basis only if the bases in (a) or (b) are clearly not appropriate. A change from a zero estimate of profit to a more precise estimate should be accounted for as a change in an accounting estimate.

An entity using the percentage-of-completion method as its basic accounting policy should use the completed-contract method for a single contract or a group of contracts for which reasonably dependable estimates cannot be made or for which inherent hazards make estimates doubtful. Such a departure from the basic policy should be disclosed.

### ***Nature of Reasonable Estimates and Inherent Hazards***

**.26** In practice, contract revenues and costs are estimated in a wide variety of ways ranging from rudimentary procedures to complex methods and

---

<sup>4</sup> The division recognizes that many contractors have informal estimating procedures that may result in poorly documented estimates and marginal quality field reporting and job costing systems. Those conditions may influence the ability of an entity to produce reasonably dependable estimates. However, procedures and systems should not influence the development of accounting principles and should be dealt with by management as internal control, financial reporting, and auditing concerns.

systems. Regardless of the techniques used, a contractor's estimating procedures should provide reasonable assurance of a continuing ability to produce reasonably dependable estimates.<sup>5</sup> Ability to estimate covers more than the estimating and documentation of contract revenues and costs; it covers a contractor's entire contract administration and management control system. The ability to produce reasonably dependable estimates depends on all the procedures and personnel that provide financial or production information on the status of contracts. It encompasses systems and personnel not only of the accounting department but of all areas of the company that participate in production control, cost control, administrative control, or accountability for contracts. Previous reliability of a contractor's estimating process is usually an indication of continuing reliability, particularly if the present circumstances are similar to those that prevailed in the past.

.27 Estimating is an integral part of contractors' business activities, and there is a necessity to revise estimates on contracts continually as the work progresses. The fact that circumstances may necessitate frequent revision of estimates does not indicate that the estimates are unreliable for the purpose for which they are used. Although results may differ widely from original estimates because of the nature of the business, the contractor, in the conduct of his business, may still find the estimates reasonably dependable. Despite these widely recognized conditions, a contractor's estimates of total contract revenue and total contract costs should be regarded as reasonably dependable if the minimum total revenue and the maximum total cost can be estimated with a sufficient degree of confidence to justify the contractor's bids on contracts.

.28 ARB No. 45 discourages the use of the percentage-of-completion method of accounting in circumstances in which inherent hazards make estimates doubtful. "Inherent hazards" relate to contract conditions or external factors that raise questions about contract estimates and about the ability of either the contractor or the customer to perform his obligations under the contract. Inherent hazards that may cause contract estimates to be doubtful usually differ from inherent business risks. Business enterprises engaged in contracting, like all business enterprises, are exposed to numerous business risks that vary from contract to contract. The reliability of the estimating process in contract accounting does not depend on the absence of such risks. Assessing business risks is a function of users of financial statements.

.29 The present business environment and the refinement of the estimating process have produced conditions under which most business entities engaged in contracting can deal adequately with the normal, recurring business risks in estimating the outcome of contracts. The division believes that inherent hazards that make otherwise reasonably dependable contract estimates doubtful involve events and conditions that would not be considered in the ordinary preparation of contract estimates and that would not be expected to recur frequently, given the contractor's normal business environment. Such hazards are unrelated to, or only incidentally related to, the contractor's typical activities. Such hazards may relate, for example, to contracts whose validity is seriously in question (that is, which are less than fully enforceable), to contracts whose completion may be subject to the outcome of pending legislation

---

<sup>5</sup> The type of estimating procedures appropriate in a particular set of circumstances depends on a careful evaluation of the costs and benefits of developing the procedures. The ability to produce reasonably dependable estimates that would justify the use of the percentage-of-completion method as recommended in paragraph .25 does not depend on the elaborateness of the estimating procedures used.

or pending litigation, or to contracts exposed to the possibility of the condemnation or expropriation of the resulting properties. Reasonably dependable estimates cannot be produced for a contract with unrealistic or ill-defined terms or for a contract between unreliable parties. However, the conditions stated in paragraph .23 for the use of the percentage-of-completion method of accounting, which apply to most bona fide contracts, make the existence of some uncertainties, including some of the type described in ARB No. 45, paragraph 15, unlikely for contracts that meet those conditions. Therefore, the division believes that there should be specific, persuasive evidence of such hazards to indicate that use of the percentage-of-completion method on one of the bases in paragraph .25 is not preferable.

## **The Completed-Contract Method**

.30 This section sets forth the recommended basis for using the completed-contract method and the reasons for the recommendation. Under the completed-contract method, income is recognized only when a contract is completed or substantially completed. During the period of performance, billings and costs are accumulated on the balance sheet, but no profit or income is recorded before completion or substantial completion of the work. This method precludes reporting on the performance that is occurring under the enforceable rights of the contract as work progresses. Although the completed-contract method is based on results as finally determined rather than on estimates for unperformed work, which may involve unforeseen costs and possible losses, it does not reflect current performance when the period of a contract extends beyond one accounting period, and it therefore may result in irregular recognition of income. Financial statements based on this method may not show informative relationships between gross profit reported on contracts and related period costs.

### ***Circumstances of Use***

.31 The completed-contract method may be used as an entity's basic accounting policy in circumstances in which financial position and results of operations would not vary materially from those resulting from use of the percentage-of-completion method (for example, in circumstances in which an entity has primarily short-term contracts). Although this statement does not formally distinguish on the basis of length between long-term and short-term contracts, the basis for recording income on contracts of short duration poses relatively few problems. In accounting for such contracts, income ordinarily is recognized when performance is substantially completed and accepted. Under those circumstances, revenues and costs in the aggregate for all contracts would be expected to result in a matching of gross profit with period overhead or fixed costs similar to that achieved by use of the percentage-of-completion method. For example, the completed-contract method, as opposed to the percentage-of-completion method, would not usually produce a material difference in net income or financial position for a small plumbing contractor that performs primarily relatively short-term contracts during an accounting period; performance covers such a short span of time that the work is somewhat analogous to the manufacture of shelf production items for sale. An entity using the completed-contract method as its basic accounting policy should depart from that policy for a single contract or a group of contracts not having the features described in this paragraph and use the percentage-of-completion method on one of the bases described in paragraph .25. Such a departure should be disclosed.

.32 The completed-contract method is preferable in circumstances in which estimates cannot meet the criteria for reasonable dependability discussed in the section on the percentage-of-completion method or in which there are inherent hazards of the nature of those discussed in that section. An entity using the percentage-of-completion method as its basic accounting policy should depart from that policy and use the completed-contract method for a single contract or a group of contracts only in the circumstances described in paragraph .25.

.33 The use of the completed-contract method is recommended for the circumstances described in paragraphs .31 and .32. However, for circumstances in which there is an assurance that no loss will be incurred on a contract (for example, when the scope of the contract is ill-defined but the contractor is protected by a cost-plus contract or other contractual terms), the percentage-of-completion method based on a zero profit margin, rather than the completed-contract method, is recommended until more precise estimates can be made. The significant difference between the percentage-of-completion method applied on the basis of a zero profit margin and the completed-contract method relates to the effects on the income statement. Under the zero profit margin approach to applying the percentage-of-completion method, equal amounts of revenue and cost, measured on the basis of performance during the period, are presented in the income statement; whereas, under the completed-contract method, performance for a period is not reflected in the income statement, and no amount is presented in the income statement until the contract is completed. The zero profit margin approach to applying the percentage-of-completion method gives users of general purpose financial statements an indication of the volume of a company's business and of the application of its economic resources.

### **Determining the Profit Center**

.34 The basic presumption should be that each contract is the profit center for revenue recognition, cost accumulation, and income measurement. That presumption may be overcome only if a contract or a series of contracts meets the conditions described for combining or segmenting contracts. A group of contracts (combining), and a phase or segment of a single contract or of a group of contracts (segmenting) may be used as a profit center in some circumstances. Since there are numerous practical implications of combining and segmenting contracts, evaluation of the circumstances, contract terms, and management intent are essential in determining contracts that may be accounted for on those bases.

### **Combining Contracts**

.35 A group of contracts may be so closely related that they are, in effect, parts of a single project with an overall profit margin, and accounting for the contracts individually may not be feasible or appropriate. Under those circumstances, consideration should be given to combining such contracts for profit recognition purposes. The presumption in combining contracts is that revenue and profit are earned, and should be reported, uniformly over the performance of the combined contracts. For example, a group of construction-type contracts may be negotiated as a package with the objective of achieving an overall profit margin, although the profit margins on the individual contracts may vary. In those circumstances, if the individual contracts are performed and reported in different periods and accounted for separately, the reported profit margins in those periods will differ from the profit margin contemplated in the negotiations for reasons other than differences in performance.

**.36** Contracts may be combined for accounting purposes only if they meet the criteria in paragraphs .37 and .38.

**.37** A group of contracts may be combined for accounting purposes if the contracts

- a. Are negotiated as a package in the same economic environment with an overall profit margin objective. Contracts not executed at the same time may be considered to have been negotiated as a package in the same economic environment only if the time period between the commitments of the parties to the individual contracts is reasonably short. The longer the period between the commitments of the parties to the contracts, the more likely it is that the economic circumstances affecting the negotiations have changed.
- b. Constitute in essence an agreement to do a single project. A project for this purpose consists of construction, or related service activity with different elements, phases, or units of output that are closely interrelated or interdependent in terms of their design, technology, and function or their ultimate purpose or use.
- c. Require closely interrelated construction activities with substantial common costs that cannot be separately identified with, or reasonably allocated to, the elements, phases, or units of output.
- d. Are performed concurrently or in a continuous sequence under the same project management at the same location or at different locations in the same general vicinity.
- e. Constitute in substance an agreement with a single customer. In assessing whether the contracts meet this criterion, the facts and circumstances relating to the other criteria should be considered. In some circumstances different divisions of the same entity would not constitute a single customer if, for example, the negotiations are conducted independently with the different divisions. On the other hand, two or more parties may constitute in substance a single customer if, for example, the negotiations are conducted jointly with the parties to do what in essence is a single project.

Contracts that meet all of these criteria may be combined for profit recognition and for determining the need for a provision for losses in accordance with ARB No. 45, paragraph 6. The criteria should be applied consistently to contracts with similar characteristics in similar circumstances.

**.38** Production-type contracts that do not meet the criteria in paragraph .37 or segments of such contracts may be combined into groupings such as production lots or releases for the purpose of accumulating and allocating production costs to units produced or delivered on the basis of average unit costs in the following circumstances:<sup>[6]</sup>

- a. The contracts are with one or more customers for the production of substantially identical units of a basic item produced concurrently or sequentially.
- b. Revenue on the contracts is recognized on the units-of-delivery basis of applying the percentage-of-completion method.

---

<sup>[6]</sup> [Footnote deleted to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

### ***Segmenting a Contract***

**.39** A single contract or a group of contracts that otherwise meet the test for combining may include several elements or phases, each of which the contractor negotiated separately with the same customer and agreed to perform without regard to the performance of the others. If those activities are accounted for as a single profit center, the reported income may differ from that contemplated in the negotiations for reasons other than differences in performance. If the project is segmented, revenues can be assigned to the different elements or phases to achieve different rates of profitability based on the relative value of each element or phase to the estimated total contract revenue. A project, which may consist of a single contract or a group of contracts, with segments that have different rates of profitability may be segmented if it meets the criteria in paragraph .40, paragraph .41, or paragraph .42. The criteria for segmenting should be applied consistently to contracts with similar characteristics and in similar circumstances.

**.40** A project may be segmented if all the following steps were taken and are documented and verifiable:

- a. The contractor submitted bona fide proposals on the separate components of the project and on the entire project.
- b. The customer had the right to accept the proposals on either basis.
- c. The aggregate amount of the proposals on the separate components approximated the amount of the proposal on the entire project.

**.41** A project that does not meet the criteria in paragraph .40 may be segmented only if it meets all the following criteria:

- a. The terms and scope of the contract or project clearly call for separable phases or elements.
- b. The separable phases or elements of the project are often bid or negotiated separately.
- c. The market assigns different gross profit rates to the segments because of factors such as different levels of risk or differences in the relationship of the supply and demand for the services provided in different segments.
- d. The contractor has a significant history of providing similar services to other customers under separate contracts for each significant segment to which a profit margin higher than the overall profit margin on the profit is ascribed.<sup>7</sup>
- e. The significant history with customers who have contracted for services separately is one that is relatively stable in terms of pricing policy rather than one unduly weighted by erratic pricing decisions (responding, for example, to extraordinary economic circumstances or to unique customer-contractor relationships).

---

<sup>7</sup> In applying the criterion in paragraph .41(d), values assignable to the segments should be on the basis of the contractor's normal historical prices and terms of such services to other customers. The division considered but rejected the concept of allowing a contractor to segment on the basis of prices charged by other contractors, since it does not follow that those prices could have been obtained by a contractor who has no history in the market.

- f. The excess of the sum of the prices of the separate elements over the price of the total project is clearly attributable to cost savings incident to combined performance of the contract obligations (for example, cost savings in supervision, overhead, or equipment mobilization). Unless this condition is met, segmenting a contract with a price substantially less than the sum of the prices of the separate phases or elements would be inappropriate even if the other conditions are met. Acceptable price variations should be allocated to the separate phases or elements in proportion to the prices ascribed to each. In all other situations a substantial difference in price (whether more or less) between the separate elements and the price of the total project is evidence that the contractor has accepted different profit margins. Accordingly, segmenting is not appropriate, and the contracts should be the profit centers.
- g. The similarity of services and prices in the contract segments and services and the prices of such services to other customers contracted separately should be documented and verifiable.

.42 A production-type contract that does not meet the criteria in paragraphs .40 or .41 may also be segmented and included in groupings such as production lots or releases for the purpose of accumulating and allocating production costs to units produced or delivered on the basis of average unit cost under the conditions specified in paragraph .38.

## **Measuring Progress on Contracts**

.43 This section describes methods of measuring the extent of progress toward completion under the percentage-of-completion method and sets forth criteria for selecting those methods and for determining when a contract is substantially completed. Meaningful measurement of the extent of progress toward completion is essential since this factor is used in determining the amounts of estimated contract revenue and estimated gross profit that will be recognized as earned in any given period.

### **Methods of Measuring Extent of Progress Toward Completion**

.44 In practice, a number of methods are used to measure the extent of progress toward completion. They include the cost-to-cost method, variations of the cost-to-cost method, efforts-expended methods, the units-of-delivery method, and the units-of-work-performed method. Those practices are intended to conform to ARB No. 45, paragraph 4.<sup>8</sup> Some of the measures are sometimes made and certified by engineers or architects, but management should review and understand the procedures used by those professionals.

.45 Some methods used in practice measure progress toward completion in terms of costs, some in terms of units of work, and some in terms of values

---

<sup>8</sup> ARB No. 45, paragraph 4, states:

The committee recommends that the recognized income [under the percentage-of-completion method] be that percentage of estimated total income, either:

(a) that incurred costs to date bear to estimated total costs after giving effect to estimates of costs to complete based upon most recent information, or

(b) that may be indicated by such other measure of progress toward completion as may be appropriate having due regard to work performed.

Costs as here used might exclude, especially during the early stages of a contract, all or a portion of the cost of such items as materials and subcontracts if it appears that such an exclusion would result in a more meaningful periodic allocation of income.

added (the contract value of total work performed to date). All three of these measures of progress are acceptable in appropriate circumstances. The division concluded that other methods that achieve the objective of measuring extent of progress toward completion in terms of costs, units, or value added are also acceptable in appropriate circumstances. However, the method or methods selected should be applied consistently to all contracts having similar characteristics. The method or methods of measuring extent of progress toward completion should be disclosed in the notes to the financial statements. Examples of circumstances not appropriate to some methods are given within the discussion of input and output measures.

### ***Input and Output Measures***

.46 The several approaches to measuring progress on a contract can be grouped into input and output measures. Input measures are made in terms of efforts devoted to a contract. They include the methods based on costs and on efforts expended. Output measures are made in terms of results achieved. They include methods based on units produced, units delivered, contract milestones, and value added. For contracts under which separate units of output are produced, progress can be measured on the basis of units of work completed. In other circumstances, progress may be measured, for example, on the basis of cubic yards of excavation for foundation contracts or on the basis of cubic yards of pavement laid for highway contracts.

.47 Both input and output measures have drawbacks in some circumstances. Input is used to measure progress toward completion indirectly, based on an established or assumed relationship between a unit of input and productivity. A significant drawback of input measures is that the relationship of the measures to productivity may not hold, because of inefficiencies or other factors. Output is used to measure results directly and is generally the best measure of progress toward completion in circumstances in which a reliable measure of output can be established. However, output measures often cannot be established, and input measures must then be used. The use of either type of measure requires the exercise of judgment and the careful tailoring of the measure to the circumstances.

.48 The efforts-expended method is an input method based on a measure of the work, such as labor hours, labor dollars, machine hours, or material quantities. Under the labor-hours method, for example, extent of progress is measured by the ratio of hours performed to date to estimated total hours at completion. Estimated total labor hours should include (a) the estimated labor hours of the contractor and (b) the estimated labor hours of subcontractors engaged to perform work for the project, if labor hours of subcontractors are a significant element in the performance of the contract. A labor-hours method can measure the extent of progress in terms of efforts expended only if substantial efforts of subcontractors are included in the computation. If the contractor is unable to obtain reasonably dependable estimates of subcontractors' labor hours at the beginning of the project and as work progresses, he should not use the labor-hours method.

.49 The various forms of the efforts-expended method generally are based on the assumption that profits on contracts are derived from the contractor's efforts in all phases of operations, such as designing, procurement, and management. Profit is not assumed to accrue merely as a result of the acquisition of material or other tangible items used in the performance of the contract or the awarding of subcontracts. As previously noted, a significant drawback of

efforts-expended methods is that the efforts included in the measure may not all be productive.

.50 Measuring progress toward completion based on the ratio of costs incurred to total estimated costs is also an input method. Some of the costs incurred, particularly in the early stages of the contract, should be disregarded in applying this method because they do not relate to contract performance. These include the costs of items such as uninstalled materials not specifically produced or fabricated for the project or of subcontracts that have not been performed. For example, for construction projects, the cost of materials not unique to the project that have been purchased or accumulated at job sites but that have not been physically installed do not relate to performance.<sup>9</sup> The costs of such materials should be excluded from costs incurred for the purpose of measuring the extent of progress toward completion. Also, the cost of equipment purchased for use on a contract should be allocated over the period of its expected use unless title to the equipment is transferred to the customer by terms of the contract. For production-type contracts, the complement of expensive components (for example, computers, engines, radars, and complex "black boxes") to be installed into the deliverable items may aggregate a significant portion of the total cost of the contract. In some circumstances, the costs incurred for such components, even though the components were specifically purchased for the project, should not be included in the measurement before the components are installed if inclusion would tend to overstate the percentage of completion otherwise determinable.

.51 The acceptability of the results of input or output measures deemed to be appropriate to the circumstances should be periodically reviewed and confirmed by alternative measures that involve observation and inspection. For example, the results provided by the measure used to determine the extent of progress may be compared to the results of calculations based on physical observations by engineers, architects, or similarly qualified personnel. That type of review provides assurance somewhat similar to that provided for perpetual inventory records by periodic physical inventory counts.

### ***Completion Criteria Under the Completed-Contract Method***

.52 As a general rule, a contract may be regarded as substantially completed if remaining costs and potential risks are insignificant in amount. The overriding objectives are to maintain consistency in determining when contracts are substantially completed and to avoid arbitrary acceleration or deferral of income. The specific criteria used to determine when a contract is substantially completed should be followed consistently and should be disclosed in the note to the financial statements on accounting policies. Circumstances to be considered in determining when a project is substantially completed include, for example, delivery of the product, acceptance by the customer, departure from the site, and compliance with performance specifications.

## **Income Determination—Revenue Elements**

.53 Estimating the revenue on a contract is an involved process, which is affected by a variety of uncertainties that depend on the outcome of a series of

---

<sup>9</sup> The cost of uninstalled materials specifically produced, fabricated, or constructed for a project should be included in the costs used to measure extent of progress. Such materials consist of items unique to a project that a manufacturer or supplier does not carry in inventory and that must be produced or altered to meet the specifications of the project.

future events. The estimates must be periodically revised throughout the life of the contract as events occur and as uncertainties are resolved.

.54 The major factors that must be considered in determining total estimated revenue include the basic contract price, contract options, change orders, claims, and contract provisions for penalties and incentive payments, including award fees and performance incentives. All those factors and other special contract provisions must be evaluated throughout the life of a contract in estimating total contract revenue to recognize revenues in the periods in which they are earned under the percentage-of-completion method of accounting.

### ***Basic Contract Price—General***

.55 The estimated revenue from a contract is the total amount that a contractor expects to realize from the contract. It is determined primarily by the terms of the contract and the basic contract price. Contract price may be relatively fixed or highly variable and subject to a great deal of uncertainty, depending on the type of contract involved. Appendix B describes basic contract types and major variations in the basic types. The total amount of revenue that ultimately will be realized on a contract is often subject to a variety of changing circumstances and accordingly may not be known with certainty until the parties to the contract have fully performed their obligations. Thus, the determination of total estimated revenue requires careful consideration and the exercise of judgment in assessing the probabilities of future outcomes.

.56 Although fixed-price contracts usually provide for a stated contract price, a specified scope of the work to be performed, and a specified performance schedule, they sometimes have adjustment schedules based on application of economic price adjustment (escalation), price redetermination, incentive, penalty, and other pricing provisions. Determining contract revenue under unit-price contracts generally involves the same factors as under fixed-price contracts. Determining contract revenue from a time-and-material contract requires a careful analysis of the contract, particularly if the contract includes guaranteed maximums or assigns markups to both labor and materials; and the determination involves consideration of some of the factors discussed below in regard to cost-type contracts.

### ***Basic Contract Price—Cost-Type Contracts***

.57 Cost-type contracts have a variety of forms (see Appendix B). The various forms have differing contract terms that affect accounting, such as provisions for reimbursable costs (which are generally spelled out in the contract), overhead recovery percentages, and fees. A fee may be a fixed amount or a percentage of reimbursable costs or an amount based on performance criteria.<sup>10</sup> Generally, percentage fees may be accrued as the related costs are incurred, since they are a percentage of costs incurred, and profits should therefore be recognized as costs are incurred. Cost-type contracts often include provisions for guaranteed maximum total reimbursable costs or target penalties and rewards relating to underruns and overruns of predetermined target prices, completion dates, plant capacity on completion of the project, or other criteria.

.58 One problem peculiar to cost-type contracts involves the determination of the amounts of reimbursable costs that should be reflected as revenue. Under some contracts, particularly service-type contracts, a contractor acts sol-

---

<sup>10</sup> Cost-type government contracts with fees based on a percentage of cost are no longer granted under government regulations.

ely in the capacity of an agent (construction manager) and has no risks associated with costs managed. This relationship may arise, for example, if an owner awards a construction management contract to one entity and a construction contract to another. If the contractor, serving as the construction manager, acts solely as an agent, his revenue should include only the fee and should exclude subcontracts negotiated or managed on behalf of the owner and materials purchased on behalf of the owner.

**.59** In other circumstances, a contractor acts as an ordinary principal under a cost-type contract. For example, the contractor may be responsible to employees for salaries and wages and to subcontractors and other creditors for materials and services, and he may have the discretionary responsibility to procure and manage the resources in performing the contract. The contractor should include in revenue all reimbursable costs for which he has risk or on which his fee was based at the time of bid or negotiation. In addition, revenue from overhead percentage recoveries and the earned fee should be included in revenue.

### ***Customer-Furnished Materials***

**.60** Another concern associated with measuring revenue relates to materials furnished by a customer or purchased by the contractor as an agent for the customer. Often, particularly for large, complex projects, customers may be more capable of carrying out the procurement function or may have more leverage with suppliers than the contractor. In those circumstances, the contractor generally informs the customer of the nature, type, and characteristics or specifications of the materials required and may even purchase the required materials and pay for them, using customer purchase orders and checks drawn against the customer's bank account. If the contractor is responsible for the nature, type, characteristics, or specifications of material that the customer furnishes or that the contractor purchases as an agent of the customer, or if the contractor is responsible for the ultimate acceptability of performance of the project based on such material, the value of those items should be included as contract price and reflected as revenue and costs in periodic reporting of operations. As a general rule, revenues and costs should include all items for which the contractor has an associated risk, including items on which his contractual fee was based.

### ***Change Orders***

**.61** Change orders are modifications of an original contract that effectively change the provisions of the contract without adding new provisions. They may be initiated by either the contractor or the customer, and they include changes in specifications or design, method or manner of performance, facilities, equipment, materials, sites, and period for completion of the work. Many change orders are unpriced; that is, the work to be performed is defined, but the adjustment to the contract price is to be negotiated later. For some change orders, both scope and price may be unapproved or in dispute. Accounting for change orders depends on the underlying circumstances, which may differ for each change order depending on the customer, the contract, and the nature of the change. Change orders should therefore be evaluated according to their characteristics and the circumstances in which they occur. In some circumstances, change orders as a normal element of a contract may be numerous, and separate identification may be impractical. Such change orders may be evaluated statistically on a composite basis using historical results as modified by current conditions. If such change orders are considered by the parties to be a normal element within the original scope of the contract, no

change in the contract price is required. Otherwise, the adjustment to the contract price may be routinely negotiated. Contract revenue and costs should be adjusted to reflect change orders approved by the customer and the contractor regarding both scope and price.

.62 Accounting for unpriced change orders depends on their characteristics and the circumstances in which they occur. Under the completed-contract method, costs attributable to unpriced change orders should be deferred as contract costs if it is probable that aggregate contract costs, including costs attributable to change orders, will be recovered from contract revenues. For all unpriced change orders, recovery should be deemed probable if the future event or events necessary for recovery are likely to occur. Some of the factors to consider in evaluating whether recovery is probable are the customer's written approval of the scope of the change order, separate documentation for change order costs that are identifiable and reasonable, and the entity's favorable experience in negotiating change orders, especially as it relates to the specific type of contract and change order being evaluated. The following guidelines should be followed in accounting for unpriced change orders under the percentage-of-completion method.

- a. Costs attributable to unpriced change orders should be treated as costs of contract performance in the period in which the costs are incurred if it is *not* probable that the costs will be recovered through a change in the contract price.
- b. If it is probable that the costs will be recovered through a change in the contract price, the costs should be deferred (excluded from the cost of contract performance) until the parties have agreed on the change in contract price, or, alternatively, they should be treated as costs of contract performance in the period in which they are incurred, and contract revenue should be recognized to the extent of the costs incurred.
- c. If it is probable that the contract price will be adjusted by an amount that exceeds the costs attributable to the change order and the amount of the excess can be reliably estimated, the original contract price should also be adjusted for that amount when the costs are recognized as costs of contract performance if its realization is probable. However, since the substantiation of the amount of future revenue is difficult, revenue in excess of the costs attributable to unpriced change orders should only be recorded in circumstances in which realization is assured beyond a reasonable doubt, such as circumstances in which an entity's historical experience provides such assurance or in which an entity has received a bona fide pricing offer from a customer and records only the amount of the offer as revenue.

.63 If change orders are in dispute or are unapproved in regard to both scope and price, they should be evaluated as claims (see paragraphs .65 to .67).

### ***Contract Options and Additions***

.64 An option or an addition to an existing contract should be treated as a separate contract in any of the following circumstances:

- a. The product or service to be provided differs significantly from the product or service provided under the original contract.
- b. The price of the new product or service is negotiated without regard to the original contract and involves different economic judgments.

- c. The products or services to be provided under the exercised option or amendment are similar to those under the original contract, but the contract price and anticipated contract cost relationship are significantly different.

If an option or addition to an existing contract does not meet any of the above conditions, it may be combined with the original contract if it meets the criteria in paragraph .37 or .38. Exercised options or additions that do not meet the criteria for treatment as separate contracts or for combining with the original contracts should be treated as change orders on the original contracts.

### **Claims**

.65 Claims are amounts in excess of the agreed contract price (or amounts not included in the original contract price) that a contractor seeks to collect from customers or others for customer-caused delays, errors in specifications and designs, contract terminations, change orders in dispute or unapproved as to both scope and price, or other causes of unanticipated additional costs. Recognition of amounts of additional contract revenue relating to claims is appropriate only if it is probable that the claim will result in additional contract revenue and if the amount can be reliably estimated. Those two requirements are satisfied by the existence of all the following conditions:

- a. The contract or other evidence provides a legal basis for the claim; or a legal opinion has been obtained, stating that under the circumstances there is a reasonable basis to support the claim.
- b. Additional costs are caused by circumstances that were unforeseen at the contract date and are not the result of deficiencies in the contractor's performance.
- c. Costs associated with the claim are identifiable or otherwise determinable and are reasonable in view of the work performed.
- d. The evidence supporting the claim is objective and verifiable, not based on management's "feel" for the situation or on unsupported representations.

If the foregoing requirements are met, revenue from a claim should be recorded only to the extent that contract costs relating to the claim have been incurred. The amounts recorded, if material, should be disclosed in the notes to the financial statements. Costs attributable to claims should be treated as costs of contract performance as incurred.

.66 However, a practice such as recording revenues from claims only when the amounts have been received or awarded may be used. If that practice is followed, the amounts should be disclosed in the notes to the financial statements.

.67 If the requirements in paragraph .65 are not met or if those requirements are met but the claim exceeds the recorded contract costs, a contingent asset should be disclosed in accordance with FASB Statement No. 5, paragraph 17.

### **Income Determination—Cost Elements**

.68 Contract costs must be identified, estimated, and accumulated with a reasonable degree of accuracy in determining income earned. At any time during the life of a contract, total estimated contract cost consists of two components: costs incurred to date and estimated cost to complete the contract. A company should be able to determine costs incurred on a contract with a relatively high degree of precision, depending on the adequacy and effectiveness of its cost accounting system. The procedures or systems used in accounting for

costs vary from relatively simple, manual procedures that produce relatively modest amounts of detailed analysis to sophisticated, computer-based systems that produce a great deal of detailed analysis. Despite the diversity of systems and procedures, however, an objective of each system or of each set of procedures should be to accumulate costs properly and consistently by contract with a sufficient degree of accuracy to assure a basis for the satisfactory measurement of earnings.

### **Contract Costs**

.69 Contract costs are accumulated in the same manner as inventory costs and are charged to operations as the related revenue from contracts is recognized. Contract costs generally include all direct costs, such as materials, direct labor, and subcontracts, and indirect costs identifiable with or allocable to the contracts. However, practice varies for certain types of indirect costs considered allocable to contracts, for example, support costs (such as central preparation and processing of job payrolls, billing and collection costs, and bidding and estimating costs).

.70 Authoritative accounting pronouncements require costs to be considered period costs if they cannot be clearly related to production, either directly or by an allocation based on their discernible future benefits.

.71 Income is recognized over the term of the contract under the percentage-of-completion method or is recognized as units are delivered under the units-of-delivery modification and is deferred until performance is substantially complete under the completed-contract method. None of the characteristics peculiar to those methods, however, require accounting for contract costs to deviate in principle from the basic framework established in existing authoritative literature applicable to inventories or business enterprises in general.

.72 A contracting entity should apply the following general principles in accounting for costs of construction-type and those production-type contracts covered by this statement. The principles are consistent with generally accepted accounting principles for inventory and production costs in other areas, and their application requires the exercise of judgment.

- a. All direct costs, such as material, labor, and subcontracting costs, should be included in contract costs.
- b. Indirect costs allocable to contracts include the costs of indirect labor, contract supervision, tools and equipment, supplies, quality control and inspection, insurance, repairs and maintenance, depreciation and amortization, and, in some circumstances, support costs, such as central preparation and processing of payrolls. For government contractors, other types of costs that are allowable or allocable under pertinent government contract regulations may be allocated to contracts as indirect costs if otherwise allowable under GAAP.<sup>11</sup> Methods of allocating indirect costs should be systematic and rational. They include, for example, allocations based on direct labor costs, direct

---

<sup>11</sup> The AICPA Audit and Accounting Guide *Audits of Federal Government Contractors*, states, "Practice varies among government contractors concerning the extent to which costs are included in inventory. Some contractors include in inventory all direct costs and only certain indirect costs. . . . Other contractors record as inventory all costs identified with the contract, including an allocation of general and administrative . . . expenses." The guide points out that many accountants believe that the practice of allocating general and administrative expenses to contract costs, which is permitted under the completed-contract method by ARB No. 45, paragraph 10, may appropriately be extended to government contracts because they believe that "costs incurred pursuant to a government contract are associated directly with the contract's revenue, and both should be recognized in the same period." [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

labor hours, or a combination of direct labor and material costs. The appropriateness of allocations of indirect costs and of the methods of allocation depend on the circumstances and involve judgment.

- c. General and administrative costs ordinarily should be charged to expense as incurred but may be accounted for as contract costs under the completed-contract method of accounting<sup>12</sup> or, in some circumstances, as indirect contract costs by government contractors.<sup>13</sup>
- d. Selling costs should be excluded from contract costs and charged to expense as incurred unless they meet the criteria for precontract costs in paragraph .75.
- e. Costs under cost-type contracts should be charged to contract costs in conformity with generally accepted accounting principles in the same manner as costs under other types of contracts because unrealistic profit margins may result in circumstances in which reimbursable cost accumulations omit substantial contract costs (with a resulting larger fee) or include substantial unallocable general and administrative costs (with a resulting smaller fee).
- f. In computing estimated gross profit or providing for losses on contracts, estimates of cost to complete should reflect all of the types of costs included in contract costs.
- g. Inventoriable costs should not be carried at amounts that when added to the estimated cost to complete are greater than the estimated realizable value of the related contracts.

Interest costs should be accounted for in accordance with FASB Statement No. 34, *Capitalization of Interest Cost*.

### **Precontract Costs**

.73 In practice, costs are deferred in anticipation of future contract sales in a variety of circumstances. The costs may consist of (a) costs incurred in anticipation of a specific contract that will result in no future benefit unless the contract is obtained (such as the costs of mobilization, engineering, architectural, or other services incurred on the basis of commitments or other indications of interest in negotiating a contract), (b) costs incurred for assets to be used in connection with specific anticipated contracts (for example, costs for the purchase of production equipment, materials, or supplies), (c) costs incurred to acquire or produce goods in excess of the amounts required under a contract in anticipation of future orders for the same item, and (d) learning, start-up, or mobilization costs incurred for anticipated but unidentified contracts.

.74 Learning or start-up costs are sometimes incurred in connection with the performance of a contract or a group of contracts. In some circumstances, follow-on or future contracts for the same goods or services are anticipated. Such costs usually consist of labor, overhead, rework, or other special costs that must be incurred to complete the existing contract or contracts in progress and

<sup>12</sup> Paragraph 10 of ARB No. 45, *Long-Term Construction-Type Contracts*, states:

When the completed-contract method is used, it may be appropriate to allocate general and administrative expenses to contract costs rather than to periodic income. This may result in a better matching of costs and revenues than would result from treating such expenses as period cost, particularly in years when no contracts were completed.

<sup>13</sup> See the discussion of the AICPA Audit and Accounting Guide *Audits of Federal Government Contractors*, in footnote 11. [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

are distinguished from research and development costs.<sup>14</sup> A direct relationship between such costs and the anticipated future contracts is often difficult to establish, and the receipt of future contracts often cannot reasonably be anticipated.

.75 The division recommends the following accounting for precontract costs:

- a. Costs that are incurred for a specific anticipated contract and that will result in no future benefits unless the contract is obtained should not be included in contract costs or inventory before the receipt of the contract. However, such costs may be otherwise deferred, subject to evaluation of their probable recoverability, but only if the costs can be directly associated with a specific anticipated contract and if their recoverability from that contract is probable.\*
- b. Costs incurred for assets, such as costs for the purchase of materials, production equipment, or supplies, that are expected to be used in connection with anticipated contracts may be deferred outside the contract cost or inventory classification if their recovery from future contract revenue or from other dispositions of the assets is probable.
- c. Costs incurred to acquire or produce goods in excess of the amounts required for an existing contract in anticipation of future orders for the same items may be treated as inventory if their recovery is probable.
- d. Learning or start-up costs incurred in connection with existing contracts and in anticipation of follow-on or future contracts for the same goods or services should be charged to existing contracts.<sup>[15]</sup>
- e. Costs appropriately deferred in anticipation of a contract should be included in contract costs on the receipt of the anticipated contract.
- f. Costs related to anticipated contracts that are charged to expenses as incurred because their recovery is not considered probable should not be reinstated by a credit to income on the subsequent receipt of the contract.

### **Cost Adjustments Arising from Back Charges**

.76 Back charges are billings for work performed or costs incurred by one party that, in accordance with the agreement, should have been performed or incurred by the party to whom billed. These frequently are disputed items. For example, owners bill back charges to general contractors, and general contractors bill back charges to subcontractors. Examples of back charges include charges for cleanup work and charges for a subcontractor's use of a general contractor's equipment.

.77 A common practice is to net back charges in the estimating process. The division recommends the following procedures in accounting for back charges:

- Back charges to others should be recorded as receivables and, to the extent considered collectible, should be applied to reduce contract costs.

---

<sup>14</sup> FASB Statement No. 2, *Accounting for Research and Development Costs*, requires that research and development costs be charged to expense when incurred.

\* SOP 98-5, *Reporting on the Costs of Start-Up Activities*, amends this SOP by requiring precontract costs that are start-up costs to be expensed as incurred. SOP 98-5 is effective for financial statements for fiscal years beginning after December 15, 1998. This SOP will be updated to reflect the provisions of SOP 98-5 nearer to the pronouncement's effective date. See section 10,750.

<sup>[15]</sup> [Footnote deleted to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

However, if the billed party disputes the propriety or amount of the charge, the back charge is in effect a claim, and the criteria for recording claims apply.

- Back charges from others should be recorded as payables and as additional contract costs to the extent that it is probable that the amounts will be paid.

### ***Estimated Cost to Complete***

.78 The estimated cost to complete, the other component of total estimated contract cost, is a significant variable in the process of determining income earned and is thus a significant factor in accounting for contracts. The latest estimate may be determined in a variety of ways and may be the same as the original estimate. Practices in estimating total contract costs vary, and guidance is needed in this area because of the impact of those practices on accounting. The following practices should be followed:

- a. Systematic and consistent procedures that are correlated with the cost accounting system should be used to provide a basis for periodically comparing actual and estimated costs.
- b. In estimating total contract costs, the quantities and prices of all significant elements of cost should be identified.
- c. The estimating procedures should provide that estimated cost to complete includes the same elements of cost that are included in actual accumulated costs; also, those elements should reflect expected price increases.
- d. The effects of future wage and price escalations should be taken into account in cost estimates, especially when the contract performance will be carried out over a significant period of time. Escalation provisions should not be blanket overall provisions but should cover labor, materials, and indirect costs based on percentages or amounts that take into consideration experience and other pertinent data.
- e. Estimates of cost to complete should be reviewed periodically and revised as appropriate to reflect new information.

### **Computation of Income Earned for a Period Under the Percentage-of-Completion Method**

.79 Total estimated gross profit on a contract, the difference between total estimated contract revenue and total estimated contract cost, must be determined before the amount earned on the contract for a period can be determined. The portion of total revenue earned or the total amount of gross profit earned to date is determined by the measurement of the extent of progress toward completion using one of the methods discussed in paragraphs .44 to .51 of this statement. The computation of income earned for a period involves a determination of the portion of total estimated contract revenue that has been earned to date (earned revenue) and the portion of total estimated contract cost related to that revenue (cost of earned revenue). Two different approaches to determining earned revenue and cost of earned revenue are widely used in practice. Either of the alternative approaches may be used on a consistent basis.<sup>16</sup>

<sup>16</sup> The use of Alternative A in the discussion and in the presentation of some of the provisions of this statement is for convenience and consistency and is not intended to imply that Alternative A is the preferred approach.

**Alternative A**

.80 The advocates of this method believe that the portion of total estimated contract revenue earned to date should be determined by the measurement of the extent of progress toward completion and that, in accordance with the matching concept, the measurement of extent of progress toward completion should also be used to allocate a portion of total estimated contract cost to the revenue recognized for the period. They believe that this procedure results in reporting earned revenue, cost of earned revenue, and gross profit consistent with the measurement of contract performance. Moreover, they believe that, if there are no changes in estimates during the performance of a contract, the procedure also results in a consistent gross profit percentage from period to period. However, they recognize that a consistent gross profit percentage is rarely obtained in practice because of the need to be responsive in the accounting process to changes in estimates of contract revenues, costs, earned revenue, and gross profits. In accordance with this procedure, earned revenue, cost of earned revenue, and gross profit should be determined as follows:

- a. *Earned Revenue* to date should be computed by multiplying total estimated contract revenue by the percentage of completion (as determined by one of the acceptable methods of measuring the extent of progress toward completion). The excess of the amount over the earned revenue reported in prior periods is the earned revenue that should be recognized in the income statement for the current period.
- b. *Cost of Earned Revenue* for the period should be computed in a similar manner. Cost of earned revenue to date should be computed by multiplying total estimated contract cost by the percentage of completion on the contract. The excess of that amount over the cost of earned revenue reported in prior periods is the cost of earned revenue that should be recognized in the income statement for the current period. The difference between total cost incurred to date and cost of earned revenue to date should be reported on the balance sheet.
- c. *Gross Profit* on a contract for a period is the excess of earned revenue over the cost of earned revenue.

**Alternative B**

.81 The advocates of this method believe that the measurement of the extent of progress toward completion should be used to determine the amount of gross profit earned to date and that the earned revenue to date is the sum of the total cost incurred on the contract and the amount of gross profit earned. They believe that the cost of work performed on a contract for a period, including materials, labor, subcontractors, and other costs, should be the cost of earned revenue for the period. They believe that the amount of costs incurred can be objectively determined, does not depend on estimates, and should be the amount that enters into the accounting determination of income earned. They recognize that, under the procedure that they advocate, gross profit percentages will vary from period to period unless the cost-to-cost method is used to measure the extent of progress toward completion. However, they believe that varying profit percentages are consistent with the existing authoritative literature when costs incurred do not provide an appropriate measure of the extent of progress toward completion. In accordance with Alternative B, earned revenue, cost of earned revenue, and gross profit are determined as follows:

- a. *Earned Revenue* is the amount of gross profit earned on a contract for a period plus the costs incurred on the contract during the period.
- b. *Cost of Earned Revenue* is the cost incurred during the period, excluding the cost of materials not unique to a contract that have not been used for the contract and costs incurred for subcontracted work that is still to be performed.
- c. *Gross Profit* earned on a contract should be computed by multiplying the total estimated gross profit on the contract by the percentage of completion (as determined by one of the acceptable methods of measuring extent of progress toward completion). The excess of that amount over the amount of gross profit reported in prior periods is the earned gross profit that should be recognized in the income statement for the current period.

## Revised Estimates

.82 Adjustments to the original estimates of the total contract revenue, total contract cost, or extent of progress toward completion are often required as work progresses under the contract and as experience is gained, even though the scope of the work required under the contract may not change. The nature of accounting for contracts is such that refinements of the estimating process for changing conditions and new developments are continuous and characteristic of the process. Additional information that enhances and refines the estimating process is often obtained after the balance sheet date but before the issuance of the financial statements; such information should result in an adjustment of the unissued financial statements. Events occurring after the date of the financial statements that are outside the normal exposure and risk aspects of the contract should not be considered refinements of the estimating process of the prior year but should be disclosed as subsequent events.

.83 Revisions in revenue, cost, and profit estimates or in measurements of the extent of progress toward completion are changes in accounting estimates as defined in APB Opinion No. 20, *Accounting Changes*.<sup>17</sup> That opinion has been interpreted to permit the following two alternative methods of accounting for changes in accounting estimates:

- *Cumulative Catch-up*. Account for the change in estimate in the period of change so that the balance sheet at the end of the period of change and the accounting in subsequent periods are as they would have been if the revised estimate had been the original estimate.
- *Reallocation*. Account for the effect of the change ratably over the period of change in estimate and subsequent periods.

Although both methods are used in practice to account for changes in estimates of total revenue, total costs, or extent of progress under the percentage-of-completion method, the cumulative catch-up method is more widely used. Accordingly, to narrow the areas of differences in practice, such changes should be accounted for by the cumulative catch-up method.

---

<sup>17</sup> Paragraph 31 of APB Opinion No. 20, *Accounting Changes*, requires that "the effect of a change in accounting estimate should be accounted for in (a) the period of change if the change affects that period only or (b) the period of change and future periods if the change affects both."

.84 Although estimating is a continuous and normal process for contractors, the second sentence of APB Opinion No. 20, paragraph 33, recommends disclosure of the effect of significant revisions if the effect is material.<sup>18</sup>

### Provisions for Anticipated Losses on Contracts

.85 When the current estimates of total contract revenue and contract cost indicate a loss, a provision for the entire loss on the contract should be made. Provisions for losses should be made in the period in which they become evident under either the percentage-of-completion method or the completed-contract method. If a group of contracts are combined based on the criteria in paragraph .37 or .38, they should be treated as a unit in determining the necessity for a provision for a loss. If contracts are segmented based on the criteria in paragraph .40, .41, or .42 of this statement, the individual segments should be considered separately in determining the need for a provision for a loss.

.86 Losses on cost-type contracts, although less frequent, may arise if, for example, a contract provides for guaranteed maximum reimbursable costs or target penalties. In recognizing losses for accounting purposes, the contractor's normal cost accounting methods should be used in determining the total cost overrun on the contract, and losses should include provisions for performance penalties.

.87 The costs used in arriving at the estimated loss on a contract should include all costs of the type allocable to contracts under paragraph .72 of this statement. Other factors that should be considered in arriving at the projected loss on a contract include target penalties and rewards, nonreimbursable costs on cost-plus contracts, change orders, and potential price redeterminations. In circumstances in which general and administrative expenses are treated as contract costs under the completed-contract method of accounting, the estimated loss should include the same types of general and administrative expenses.

.88 The provision for loss arises because estimated cost for the contract exceeds estimated revenue. Consequently, the provision for loss should be accounted for in the income statement as an additional contract cost rather than as a reduction of contract revenue, which is a function of contract price, not cost. Unless the provision is material in amount or unusual or infrequent in nature, the provision should be included in contract cost and need not be shown separately in the income statement. If it is shown separately, it should be shown as a component of the cost included in the computation of gross profit.

.89 Provisions for losses on contracts should be shown separately as liabilities on the balance sheet, if significant, except in circumstances in which related costs are accumulated on the balance sheet, in which case the provisions may be deducted from the related accumulated costs. In a classified balance sheet, a provision shown as a liability should be shown as a current liability.

---

<sup>18</sup> APB Opinion No. 20, paragraph 33, states, "The effect on income before extraordinary items, net income and related per share amounts of the current period should be disclosed for a change in estimate that affects several future periods, such as a change in service lives of depreciable assets or actuarial assumptions affecting pension costs. Disclosure of the effect on those income statement amounts is not necessary for estimates made each period in the ordinary course of accounting for items such as uncollectible accounts or inventory obsolescence; however, disclosure is recommended if the effect of a change in the estimate is material."

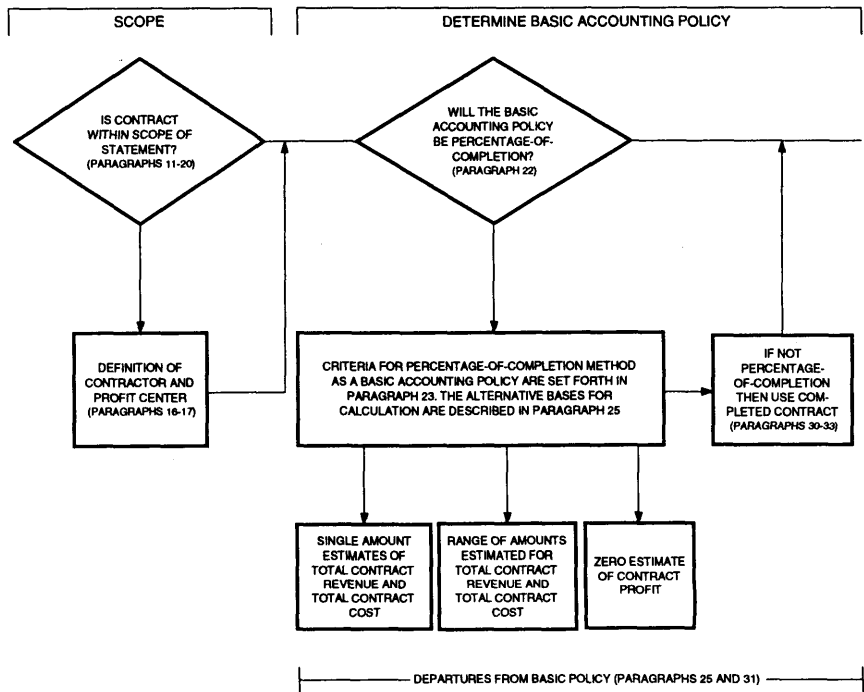

## Transition

**.90** An accounting change from the completed-contract method or from the percentage-of-completion method to conform to the recommendations of this statement of position should be made retroactively by restating the financial statements of prior periods. The restatement should be made on the basis of current information if historical information is not available. If the information for restatement of prior periods is not available on either a historical or current basis, financial statements and summaries should be restated for as many consecutive prior periods preceding the transition date of this statement as is practicable, and the cumulative effect on the retained earnings at the beginning of the earliest period restated (or at the beginning of the period in which the statement is first applied if it is not practicable to restate any prior periods) should be included in determining net income for that period (see paragraph 20 of APB Opinion No. 20, *Accounting Changes*).

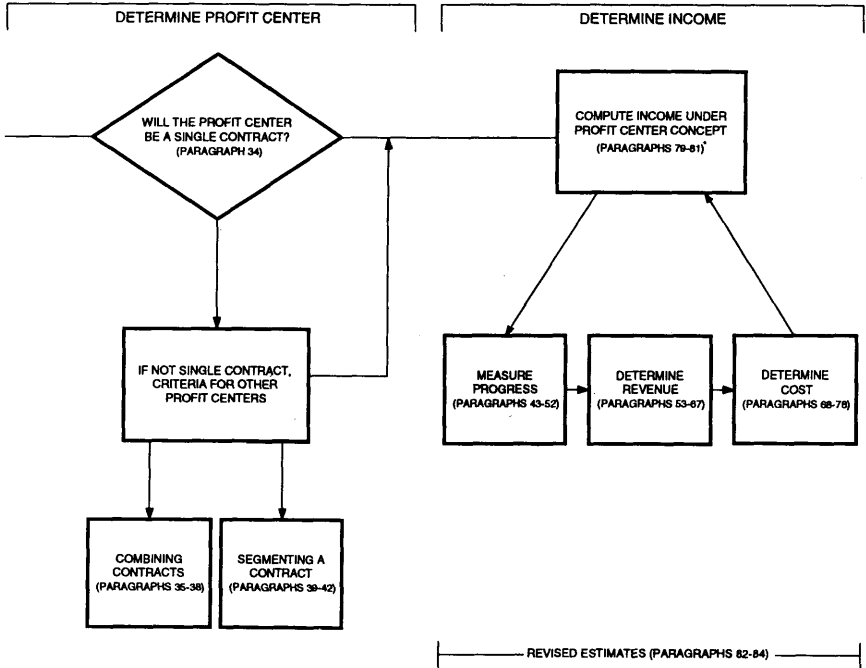

**.91** Accounting changes to conform to the recommendations of this statement of position, other than those stated in paragraph .90, should be made prospectively for contracting transactions, new contracts, and contract revisions entered into on or after the effective date of this statement. The division recommends the application of the provisions of this statement for fiscal years, and interim periods in such fiscal years, beginning after June 30, 1981. The division encourages earlier application of this statement, including retroactive application to all contracts regardless of when they were entered into. Disclosures should be made in the financial statements in the period of change in accordance with APB Opinion No. 20, paragraph 28.

## Appendix B

### Types of Contracts

Four basic types of contracts are distinguished on the basis of their pricing arrangements in paragraph .15 of this statement: (a) fixed-price or lump-sum contracts, (b) time-and-material contracts, (c) cost-type (including cost-plus) contracts, and (d) unit-price contracts. This appendix describes the basic types of contracts in greater detail and briefly describes common variations of each basic type.

### Fixed-Price or Lump-Sum Contracts

A fixed-price or lump-sum contract is a contract in which the price is not usually subject to adjustment because of costs incurred by the contractor. Common variations of fixed-price contracts are:

1. *Firm fixed-price contract*—A contract in which the price is not subject to any adjustment by reason of the cost experience of the contractor or his performance under the contract.
2. *Fixed-price contract with economic price adjustment*—A contract which provides for upward or downward revision of contract price upon the occurrence of specifically defined contingencies, such as increases or decreases in material prices or labor wage rates.
3. *Fixed-price contract providing for prospective periodic redetermination of price*—A contract which provides a firm fixed-price for an initial number of unit deliveries or for an initial period of performance and for prospective price redeterminations either upward or downward at stated intervals during the remaining period of performance under the contract.
4. *Fixed-price contract providing for retroactive redetermination of price*—A contract which provides for a ceiling price and retroactive price redetermination (within the ceiling price) after the completion of the contract, based on costs incurred, with consideration being given to management ingenuity and effectiveness during performance.
5. *Fixed-price contract providing for firm target cost incentives*—A contract which provides at the outset for a firm target cost, a firm target profit, a price ceiling (but not a profit ceiling or floor), and a formula (based on the relationship which final negotiated total cost bears to total target cost) for establishing final profit and price.
6. *Fixed-price contract providing for successive target cost incentives*—A contract which provides at the outset for an initial target cost, an initial target profit, a price ceiling, a formula for subsequently fixing the firm target profit (within a ceiling and a floor established along with the formula, at the outset), and a production point at which the formula will be applied.
7. *Fixed-price contract providing for performance incentives*—A contract which incorporates an incentive to the contractor to surpass stated performance targets by providing for increases in the profit to the extent that such targets are surpassed and for decreases to the extent that such targets are not met.

8. *Fixed-price level-of-effort term contract*—A contract which usually calls for investigation or study in a specific research and development area. It obligates the contractor to devote a specified level of effort over a stated period of time for a fixed dollar amount.<sup>1</sup>

## Time-and-Material Contracts

Time-and-material contracts are contracts that generally provide for payments to the contractor on the basis of direct labor hours at fixed hourly rates (that cover the cost of direct labor and indirect expenses and profit) and cost of materials or other specified costs. Common variations of time and material contracts are:

1. Time at marked-up rate.
2. Time at marked-up rate, material at cost.
3. Time and material at marked-up rates.
4. Guaranteed maximum cost—labor only or labor and material.

## Cost-Type Contracts

Cost-type contracts provide for reimbursement of allowable or otherwise defined costs incurred plus a fee that represents profit. Cost-type contracts usually only require that the contractor use his best efforts to accomplish the scope of the work within some specified time and some stated dollar limitation. Common variations of cost-plus contracts are

1. *Cost-sharing contract*—A contract under which the contractor is reimbursed only for an agreed portion of costs and under which no provision is made for a fee.
2. *Cost-without-fee contract*—A contract under which the contractor is reimbursed for costs with no provision for a fee.
3. *Cost-plus-fixed-fee contract*—A contract under which the contractor is reimbursed for costs plus the provision for a fixed fee.
4. *Cost-plus-award-fee contract*—A contract under which the contractor is reimbursed for costs plus a fee consisting of two parts: (a) a fixed amount which does not vary with performance and (b) an award amount based on performance in areas such as quality, timeliness, ingenuity, and cost-effectiveness. The amount of award fee is based upon a subjective evaluation by the government of the contractor's performance judged in light of criteria set forth in the contract.
5. *Cost-plus-incentive-fee contract (Incentive based on cost)*—A contract under which the contractor is reimbursed for costs plus a fee which is adjusted by formula in accordance with the relationship which total allowable costs bear to target cost. At the outset there is negotiated a target cost, a target fee, a minimum and maximum fee, and the adjustment formula.
6. *Cost-plus-incentive-fee contract (Incentive based on performance)*—A contract under which a contractor is reimbursed for costs plus an in-

centive to surpass stated performance targets by providing for increases in the fee to the extent that such targets are surpassed and for decreases to the extent that such targets are not met.<sup>2</sup>

### Unit-Price Contracts

Unit-price contracts are contracts under which the contractor is paid a specified amount for every unit of work performed. A unit-price contract is essentially a fixed-price contract with the only variable being units of work performed. Variations in unit-price contracts include the same type of variations as fixed-price contracts. A unit-price contract is normally awarded on the basis of a total price that is the sum of the product of the specified units and unit prices. The method of determining total contract price may give rise to unbalanced unit prices because units to be delivered early in the contract may be assigned higher unit prices than those to be delivered as the work under the contract progresses.

## Section 10,350

# **Statement of Position 82-1 Accounting and Financial Reporting for Personal Financial Statements**

October 1, 1982

[Amendment to AICPA Industry Audit Guide *Audits of Personal Financial Statements*]

### **NOTE**

This statement of position significantly amends the recommendations on accounting principles in the AICPA Industry Audit Guide, *Audits of Personal Financial Statements* (1968), for personal financial statements dated June 30, 1983, or after.

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## **Introduction**

.01 This statement of position deals with the preparation and presentation of personal financial statements, that is, financial statements of individuals or groups of related individuals (families). Personal financial statements are prepared for individuals either to formally organize and plan their financial affairs in general or for specific purposes, such as obtaining of credit, income tax planning, retirement planning, gift and estate planning, or public disclosure of their financial affairs. Users of personal financial statements rely on them in determining whether to grant credit, in assessing the financial activities of individuals, in assessing the financial affairs of public officials and candidates for public office, and for similar purposes.

.02 The 1968 AICPA Industry Audit Guide, *Audits of Personal Financial Statements*, supported historical cost as the primary basis of measurement for personal financial statements and recommended the presentation of estimated current values as additional information. The preface to that guide stated that "generally accepted accounting principles and auditing standards developed

for commercial enterprises are applicable in general to personal financial statements.” However, the increasing use of personal financial statements and experience with the use of the guide suggested the need to reassess those conclusions in light of the purposes for which personal financial statements are prepared, the users to whom they are directed, and the ways in which they are used. This statement of position is the result of that reassessment; it supersedes the accounting provisions of the 1968 AICPA Industry Audit Guide, *Audits of Personal Financial Statements*, in accordance with the transition and effective date set forth in paragraph .33 of this statement of position.

## Basis of Presentation of Personal Financial Statements

.03 The primary focus of personal financial statements is a person’s assets and liabilities, and the primary users of personal financial statements normally consider estimated current value information to be more relevant for their decisions than historical cost information. Lenders require estimated current value information to assess collateral, and most personal loan applications require estimated current value information. Estimated current values are required for estate, gift, and income tax planning, and estimated current value information about assets is often required in federal and state filings of candidates for public office.

.04 The accounting standards division therefore believes personal financial statements should present assets at their estimated current values and liabilities at their estimated current amounts at the date of the financial statements. Paragraph .12 of this statement of position defines estimated current values of assets. Paragraph .27 defines estimated current amounts of liabilities. This statement of position explains how the estimated current values of assets and the estimated current amounts of liabilities should be determined and applied in the preparation and presentation of personal financial statements.<sup>1</sup>

## Presentation of Personal Financial Statements

### The Reporting Entity

.05 Personal financial statements may be prepared for an individual, a husband and wife, or a family.

### The Form of the Statements

.06 Personal financial statements consist of—

- a. *A statement of financial condition.* This is the basic personal financial statement. It presents the estimated current values of assets, the estimated current amounts of liabilities, estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases, and net worth at a specified date. The term *net worth* should be used in the statement to designate the difference between total assets and total liabilities, after deducting estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases.

---

<sup>1</sup> The division recognizes that users of personal financial statements may sometimes request certain historical cost information. This statement of position does not prohibit supplemental presentation of such information.

- b. *A statement of changes in net worth.* This statement presents the major sources of increases and decreases in net worth. It should present the major sources of increases in net worth: income, increases in the estimated current values of assets, decreases in the estimated current amounts of liabilities, and decreases in estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases. It should present the major sources of decreases in net worth: expenses, decreases in the estimated current values of assets, increases in the estimated current amounts of liabilities, and increases in estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases. One statement combining income and other changes is desirable because of the mix of business and personal items in personal financial statements. The presentation of a statement of changes in net worth is optional.
- c. *Comparative financial statements.* The presentation of comparative financial statements of the current period and one or more prior periods may sometimes be desirable. Such a presentation is more informative than the presentation of financial statements for only one period. The presentation of comparative financial statements is optional.

Illustrative financial statements are presented in appendix A [paragraph .34] to this statement of position.

## The Methods of Presentation

.07 Assets and liabilities and changes in them should be recognized on the accrual basis, not on the cash basis.

.08 The most useful and readily understood presentation of assets and liabilities in personal financial statements is by order of liquidity and maturity, without classification as current and noncurrent, since the concept of working capital applied to business enterprises is inappropriate for personal financial statements.

.09 If personal financial statements are prepared for one of a group of joint owners of assets, the statements should include only the person's interest as a beneficial owner, as determined under the property laws of the state having jurisdiction. If property is held in joint tenancy, as community property, or through a similar joint ownership arrangement, the legal status of the separate equities of the parties may not be evident. In that case, the person may require legal advice to determine whether an interest in the property should be included among the person's assets and, if so, the proper allocation of the equity in the property under the applicable state laws.

.10 Business interests that constitute a large part of a person's total assets should be shown separately from other investments. The estimated current value of an investment in a separate entity, such as a closely held corporation, a partnership, or a sole proprietorship, should be shown in one amount as an investment if the entity is marketable as a going concern. Assets and liabilities of the separate entity should not be combined with similar personal items.

.11 The estimated current values of assets and the estimated current amounts of liabilities of limited business activities not conducted in a separate

business entity, such as an investment in real estate and a related mortgage, should be presented as separate amounts, particularly if a large portion of the liabilities may be satisfied with funds from sources unrelated to the investment.

## **Guidelines for Determining the Estimated Current Values of Assets and the Estimated Current Amounts of Liabilities**

### **General**

.12 Personal financial statements should present assets at their estimated current values and liabilities at their estimated current amounts. The estimated current value of an asset in personal financial statements is the amount at which the item could be exchanged between a buyer and seller, each of whom is well informed and willing, and neither of whom is compelled to buy or sell. Costs of disposal, such as commissions, if material, should be considered in determining estimated current values.<sup>2</sup> The division recognizes that the estimated current values of some assets may be difficult to determine and the cost of obtaining estimated current values of some assets directly may exceed the benefits of doing so; therefore, the division recommends that judgment be exercised in determining estimated current values.

.13 Recent transactions involving similar assets and liabilities in similar circumstances ordinarily provide a satisfactory basis for determining the estimated current value of an asset and the estimated current amount of a liability. If recent sales information is unavailable, other methods that may be used include the capitalization of past or prospective earnings, the use of liquidation values, the adjustment of historical cost based on changes in a specific price index, the use of appraisals, or the use of the discounted amounts of projected cash receipts and payments.

.14 In determining the estimated current values of some assets (for example, works of art, jewelry, restricted securities, investments in closely held businesses, and real estate), the person may need to consult a specialist.

.15 The methods used to determine the estimated current values of assets and the estimated current amounts of liabilities should be followed consistently from period to period unless the facts and circumstances dictate a change to different methods.

### **Receivables**

.16 Personal financial statements should present receivables at the discounted amounts of cash the person estimates will be collected, using appropriate interest rates at the date of the financial statements.

### **Marketable Securities**

.17 Marketable securities include both debt and equity securities for which market quotations are available. The estimated current values of such securities are their quoted market prices. The estimated current values of securities traded on securities exchanges are the closing prices of the securities

---

<sup>2</sup> Paragraph .27 defines the estimated current amount of a liability.

on the date of the financial statements (valuation date) if the securities were traded on that date. If the securities were not traded on that date but published bid and asked prices are available, the estimated current values of the securities should be within the range of those prices.

.18 For securities traded in the over-the-counter market, quotations of bid and asked prices are available from several sources, including the financial press, various quotation publications and financial reporting services, and individual broker-dealers. For those securities, the mean of the bid prices, of the bid and asked prices, or of the prices of a representative selection of broker-dealers quoting the securities may be used as the estimated current values.

.19 An investor may hold a large block of the equity securities of a company. A large block of stock might not be salable at the price at which a small number of shares were recently sold or quoted. Further, a large minority interest may be difficult to sell despite isolated sales of a small number of shares. However, a controlling interest may be proportionately more valuable than minority interests that were sold. Consideration of those factors may require adjustments to the price at which the security recently sold. Moreover, restrictions on the transfer of a security may also suggest the need to adjust the recent market price in determining the estimated current value.<sup>3</sup>

## Options

.20 If published prices of options are unavailable, their estimated current values should be determined on the basis of the values of the assets subject to option, considering such factors as the exercise prices and length of the option periods.

## Investment in Life Insurance

.21 The estimated current value of an investment in life insurance is the cash value of the policy less the amount of any loans against it. The face amount of life insurance the individuals own should be disclosed.

## Investments in Closely Held Businesses

.22 The division recognizes that the estimated current values of investments in closely held businesses usually are difficult to determine. The problems relate to investments in closely held businesses in any form, including sole proprietorships, general and limited partnerships, and corporations. As previously stated, only the net investment in a business enterprise (not its assets and liabilities) should be presented in the statement of financial condition. The net investment should be presented at its estimated current value at the date of the financial statement. Since there is usually no established ready market for such an investment, judgment should be exercised in determining the estimated current value of the investment.

.23 There is no one generally accepted procedure for determining the estimated current value of an investment in a closely held business. Several procedures or combinations of procedures may be used to determine the esti-

---

<sup>3</sup> For further discussion on valuing marketable securities, see the AICPA Audit and Accounting Guide *Audits of Investment Companies*, paragraphs 2.27 through 2.34, "Basic Methods of Valuing Securities." [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

mated current value of a closely held business, including a multiple of earnings, liquidation value, reproduction value, appraisals, discounted amounts of projected cash receipts and payments, or adjustments of book value or cost of the person's share of the equity of the business.<sup>4</sup> The owner of an interest in a closely held business may have entered into a buy-sell agreement that specifies the amount (or the basis of determining the amount) to be received in the event of withdrawal, retirement, or sale. If such an agreement exists, it should be considered, but it does not necessarily determine estimated current value. Whatever procedure is used, the objective should be to approximate the amount at which the investment could be exchanged between a buyer and a seller, each of whom is well informed and willing, and neither of whom is compelled to buy or sell.

### **Real Estate (Including Leaseholds)**

.24 Investments in real estate (including leaseholds) should be presented in personal financial statements at their estimated current values. Information that may be used in determining their estimated current values includes—

- a. Sales of similar property in similar circumstances.
- b. The discounted amounts of projected cash receipts and payments relating to the property or the net realizable value of the property, based on planned courses of action, including leaseholds whose current rental value exceeds the rent in the lease.
- c. Appraisals based on estimates of selling prices and selling costs obtained from independent real estate agents or brokers familiar with similar properties in similar locations.
- d. Appraisals used to obtain financing.
- e. Assessed value for property taxes, including consideration of the basis for such assessments and their relationship to market values in the area.

### **Intangible Assets**

.25 Intangible assets should be presented at the discounted amounts of projected cash receipts and payments arising from the planned use or sale of the assets if both the amounts and timing can be reasonably estimated. For example, a record of receipts under a royalty agreement may provide sufficient information to determine its estimated current value. The cost of a purchased intangible should be used if no other information is available.

### **Future Interests and Similar Assets**

.26 Nonforfeitable rights to receive future sums that have all the following characteristics should be presented as assets at their discounted amounts:

- The rights are for fixed or determinable amounts.
- The rights are not contingent on the holder's life expectancy or the occurrence of a particular event, such as disability or death.
- The rights do not require future performance of service by the holder.

Nonforfeitable rights that may have those characteristics include—

- Guaranteed minimum portions of pensions.

---

<sup>4</sup> The book value or cost of a person's share of the equity of a business adjusted for appraisals of specific assets, such as real estate or equipment, is sometimes used as the estimated current value.

- Vested interests in pension or profit sharing plans.
- Deferred compensation contracts.
- Beneficial interests in trusts.
- Remainder interests in property subject to life estates.
- Annuities.
- Fixed amounts of alimony for a definite future period.

## Payables and Other Liabilities

.27 Personal financial statements should present payables and other liabilities at the discounted amounts of cash to be paid. The discount rate should be the rate implicit in the transaction in which the debt was incurred. If, however, the debtor is able to discharge the debt currently at a lower amount, the debt should be presented at the lower amount.<sup>5</sup>

## Noncancellable Commitments

.28 Noncancellable commitments to pay future sums that have all the following characteristics should be presented as liabilities at their discounted amounts:

- The commitments are for fixed or determinable amounts.
- The commitments are not contingent on others' life expectancies or the occurrence of a particular event, such as disability or death.
- The commitments do not require future performance of service by others.

Noncancellable commitments that may have those characteristics include fixed amounts of alimony for a definite future period and charitable pledges.

## Income Taxes Payable

.29 The liability for income taxes payable should include unpaid income taxes for completed tax years and an estimated amount for income taxes accrued for the elapsed portion of the current tax year to the date of the financial statements. That estimate should be based on the relationship of taxable income earned to date to total estimated taxable income for the year, net of taxes withheld or paid with estimated income tax returns.

## Estimated Income Taxes on the Differences Between the Estimated Current Values of Assets and the Estimated Current Amounts of Liabilities and Their Tax Bases

.30 A provision should be made for estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases, including consideration of negative tax bases of tax shelters, if any. The provision should be computed as if the estimated current values of all assets had been realized and the estimated current amounts of all liabilities had been liquidated on the statement

---

<sup>5</sup> For a further discussion of the setting of a discount rate for payables and other liabilities, see APB Opinion 21, *Interest on Receivables and Payables*, paragraph 13.

date, using applicable income tax laws and regulations, considering recapture provisions and available carryovers. The estimated income taxes should be presented between liabilities and net worth in the statement of financial condition. The methods and assumptions used to compute the estimated income taxes should be fully disclosed. Appendix B [paragraph .35] to this statement of position illustrates how to compute the provision.

## Financial Statement Disclosures

**.31** Personal financial statements should include sufficient disclosures to make the statements adequately informative. The disclosures may be made in the body of the financial statements or in the notes. The following enumeration is intended not to be all-inclusive but simply indicative of the nature and type of information that ordinarily should be disclosed:

- a.* A clear indication of the individuals covered by the financial statements
- b.* That assets are presented at their estimated current values and liabilities are presented at their estimated current amounts
- c.* The methods used in determining the estimated current values of major assets and the estimated current amounts of major liabilities or major categories of assets and liabilities, since several methods are available, and changes in methods from one period to the next
- d.* If assets held jointly by the person and by others are included in the statements, the nature of the joint ownership
- e.* If the person's investment portfolio is material in relation to his or her other assets and is concentrated in one or a few companies or industries, the names of the companies or industries and the estimated current values of the securities
- f.* If the person has a material investment in a closely held business, at least the following:
  - The name of the company and the person's percentage of ownership
  - The nature of the business
  - Summarized financial information about assets, liabilities, and results of operations for the most recent year based on the financial statements of the business, including information about the basis of presentation (for example, generally accepted accounting principles, income tax basis, or cash basis) and any significant loss contingencies
- g.* Descriptions of intangible assets and their estimated useful lives
- h.* The face amount of life insurance the individuals own
- i.* Nonforfeitable rights that do not have the characteristics discussed in paragraph .26, for example, pensions based on life expectancy
- j.* The following tax information:
  - The methods and assumptions used to compute the estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities

and their tax bases and a statement that the provision will probably differ from the amounts of income taxes that might eventually be paid because those amounts are determined by the timing and the method of disposal, realization, or liquidation and the tax laws and regulations in effect at the time of disposal, realization, or liquidation

- Unused operating loss and capital loss carryforwards
  - Other unused deductions and credits, with their expiration periods, if applicable
  - The differences between the estimated current values of major assets and the estimated current amounts of major liabilities or categories of assets and liabilities and their tax bases
- k. Maturities, interest rates, collateral, and other pertinent details relating to receivables and debt
- l. Noncancellable commitments that do not have the characteristics discussed in paragraph .28, for example, operating leases

.32 Generally accepted accounting principles other than those discussed in this statement of position may apply to personal financial statements. For example, FASB Statement No. 5, *Accounting for Contingencies*, and related amendments and interpretations, provide guidance on accounting for contingencies, and FASB Statement No. 57, *Related Party Disclosures*, provides guidance on related-party disclosures.

## Transition and Effective Date

.33 The accounting standards division recommends that the provisions of this statement of position should apply to personal financial statements dated June 30, 1983, or after. Comparative statements of prior periods should be restated to comply with the provisions of this statement of position.

Appendix A

Illustrative Financial Statements

James and Jane Person  
Statements of Financial Condition  
December 31, 19X3 and 19X2

	<i>December 31,</i>	
	<i>19X3</i>	<i>19X2</i>
Assets		
Cash	\$ 3,700	\$ 15,600
Bonus receivable	20,000	10,000
Investments		
Marketable securities (Note 2)	160,500	140,700
Stock options (Note 3)	28,000	24,000
Kenbruce Associates (Note 4)	48,000	42,000
Davekar Company, Inc. (Note 5)	550,000	475,000
Vested interest in deferred profit sharing plan	111,400	98,900
Remainder interest in testamentary trust (Note 6)	171,900	128,800
Cash value of life insurance (\$43,600 and \$42,900), less loans payable to insurance companies (\$38,100 and \$37,700) (Note 7)	5,500	5,200
Residence (Note 8)	190,000	180,000
Personal effects (excluding jewelry) (Note 9)	55,000	50,000
Jewelry (Note 9)	40,000	36,500
	<u>\$1,384,000</u>	<u>\$1,206,700</u>

	<i>December 31,</i>	
	<i>19X3</i>	<i>19X2</i>
Liabilities		
Income taxes—current year balance	\$ 8,800	\$ 400
Demand 10.5% note payable to bank	25,000	26,000
Mortgage payable (Note 10)	98,200	99,000
Contingent liabilities (Note 11)		
	<u>132,000</u>	<u>125,400</u>
Estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases (Note 12)	239,000	160,000
Net worth	<u>1,013,000</u>	<u>921,300</u>

The accompanying notes are an integral part of these financial statements.

James and Jane Person

Notes to Financial Statements

**Note 1.** The accompanying financial statements include the assets and liabilities of James and Jane Person. Assets are stated at their estimated current values, and liabilities at their estimated current amounts.

**Note 2.** The estimated current values of marketable securities are either (a) their quoted closing prices or (b) for securities not traded on the financial statement date, amounts that fall within the range of quoted bid and asked prices.

Marketable securities consist of the following:

				<u>December 31, 19X3</u>		<u>December 31, 19X2</u>	
				<u>Number of</u>	<u>Estimated</u>	<u>Number of</u>	<u>Estimated</u>
				<u>shares or</u>	<u>current</u>	<u>shares or</u>	<u>current</u>
				<u>bonds</u>	<u>values</u>	<u>bonds</u>	<u>values</u>
<u>Stocks</u>							
Jaiven Jewels, Inc.	1,500	\$ 98,813					
McRae Motors, Inc.	800	11,000	600	\$ 4,750			
Parker Sisters, Inc.	400	13,875	200	5,200			
Rosenfield Rug Co.			1,200	96,000			
Rubin Paint Company	300	9,750	100	2,875			
Weiss Potato Chips, Inc.	200	20,337	300	25,075			
		<u>153,775</u>		<u>133,900</u>			
<u>Bonds</u>							
Jackson Van Lines, Ltd. (12% due 7/1/X9)	5	5,225	5	5,100			
United Garvey, Inc. (7% due 11/15/X6)	2	1,500	2	1,700			
		<u>6,725</u>		<u>6,800</u>			
		<u>\$160,500</u>		<u>\$140,700</u>			

**Note 3.** Jane Person owns options to acquire 4,000 shares of stock of Winner Corp. at an option price of \$5 per share. The option expires on June 30, 19X5. The estimated current value is its published selling price.

**Note 4.** The investment in Kenbruce Associates is an 8% interest in a real estate limited partnership. The estimated current value is determined by the projected annual cash receipts and payments capitalized at a 12% rate.

**Note 5.** James Person owns 50% of the common stock of Davekar Company, Inc., a retail mail order business. The estimated current value of the investment is determined by the provisions of a shareholders' agreement, which restricts the sale of the stock and, under certain conditions, requires the company to repurchase the stock based on a price equal to the book value of the net assets plus an agreed amount for goodwill. At December 31, 19X3, the agreed amount for goodwill was \$112,500, and at December 31, 19X2, it was \$ 100,000.

A condensed balance sheet of Davekar Company, Inc., prepared in conformity with generally accepted accounting principles, is summarized below:

	<i>December 31,</i>	
	<i>19X3</i>	<i>19X2</i>
Current assets	\$3,147,000	\$2,975,000
Plant, property, and equipment—net	165,000	145,000
Other assets	120,000	110,000
Total assets	<u>3,432,000</u>	<u>3,230,000</u>
Current liabilities	2,157,000	2,030,000
Long-term liabilities	400,000	450,000
Total liabilities	<u>2,557,000</u>	<u>2,480,000</u>
Equity	<u>\$ 875,000</u>	<u>\$ 750,000</u>

The sales and net income for 19X3 were \$ 10,500,000 and \$125,000 and for 19X2 were \$9,700,000 and \$80,000.

**Note 6.** Jane Person is the beneficiary of a remainder interest in a testamentary trust under the will of the late Joseph Jones. The amount included in the accompanying statements is her remainder interest in the estimated current value of the trust assets, discounted at 10%.

**Note 7.** At December 31, 19X3 and 19X2, James Person owned a \$300,000 whole life insurance policy.

**Note 8.** The estimated current value of the residence is its purchase price plus the cost of improvements. The residence was purchased in December 19X1, and improvements were made in 19X2 and 19X3.

**Note 9.** The estimated current values of personal effects and jewelry are the appraised values of those assets, determined by an independent appraiser for insurance purposes.

**Note 10.** The mortgage (collateralized by the residence) is payable in monthly installments of \$815 a month, including interest at 10% a year through 20Y8.

**Note 11.** James Person has guaranteed the payment of loans of Davekar Company, Inc., under a \$500,000 line of credit. The loan balance was \$300,000 at December 31, 19X3, and \$400,000 at December 31, 19X2.

**Note 12.** The estimated current amounts of liabilities at December 31, 19X3, and December 31, 19X2, equaled their tax bases. Estimated income taxes have been provided on the excess of the estimated current values of assets over their tax bases as if the estimated current values of the assets had been realized on the statement date, using applicable tax laws and regulations. The provision will probably differ from the amounts of income taxes that eventually might be paid because those amounts are determined by the timing and the method of disposal or realization and the tax laws and regulations in effect at the time of disposal or realization.

The estimated current values of assets exceeded their tax bases by \$850,000 at December 31, 19X3, and by \$770,300 at December 31, 19X2. The excess of estimated current values of major assets over their tax bases are—

	<i>December 31,</i>	
	<i>19X3</i>	<i>19X2</i>
Investment in Davekar Company, Inc.	\$430,500	\$355,500
Vested interest in deferred profit sharing plan	111,400	98,900
Investment in marketable securities	104,100	100,000
Remainder interest in testamentary trust	97,000	53,900

## Appendix B

### Computing the Excess of the Estimated Current Values of Assets Over Their Tax Bases and the Estimated Income Taxes on the Excess

This appendix relates to the preceding illustrative financial statements of James and Jane Person (Appendix A) and illustrates how to compute the excess of the estimated current values of assets over their tax bases and the provision for estimated income taxes on the excess.<sup>1</sup>

The excess or deficit of the estimated current values of major assets or categories of assets over their tax bases should be disclosed.<sup>2</sup> The provision for estimated income taxes should be presented in the statement of financial condition between liabilities and net worth.

The assumptions and the tax basis information used in computing the excess of the estimated current values of assets over their tax bases and the estimated income taxes on the excess depend on the facts, circumstances, tax laws and regulations, and assumptions that apply to the individual or individuals for whom the financial statements are prepared. The facts, circumstances, tax laws and regulations, and assumptions used in the following are illustrative only.

---

<sup>1</sup> The provision for estimated income taxes should also reflect tax consequences that result from differences between the estimated current amounts of liabilities and their tax bases.

<sup>2</sup> Differences between the estimated current amounts of major liabilities or categories of liabilities and their tax bases should also be disclosed.

Statements of Position

Description	(A) Estimated current values	(B) Tax bases	Excess of (A) over (B)	Effective income tax rates	Amount of estimated income taxes	Assumptions used
Cash	\$ 3,700	\$ 3,700	—	—	—	No tax effect.
Bonus receivable	20,000	—	\$ 20,000	50%	\$ 10,000	Maximum tax rate.
Investments						
Marketable securities	160,500	56,400	104,100	36%	37,500	Weighted average of short-term and long-term capital gain rates based on composition of portfolio.
Stock options	28,000	20,000	8,000	50%	4,000	Short-term capital gain rate.
Kenbruce Associates	48,000	24,000	24,000	38%	9,100	Weighted average of short-term and long-term capital gain rates.
Davekar Company, Inc.						Long-term capital gain rate.
Vested interest in deferred profit sharing plan	550,000	119,500	430,500	20%	86,100	Maximum tax rate.
	111,400	—	111,400	50%	55,700	
Remainder interest in testamentary trust	171,900	74,900	97,000	26%	25,600	Weighted average of short-term and long-term capital gain rates.
Cash value of life insurance	5,500	5,500	—	—	—	No tax effect.
Residence	190,000	190,000	—	—	—	No tax effect.
Personal effects	55,000	30,000	25,000	20%	5,000	Long-term capital gain rate.
Jewelry	40,000	10,000	30,000	20%	6,000	Long-term capital gain rate.
	<u>\$1,384,000</u>	<u>\$534,000</u>	<u>\$850,000<sup>1</sup></u>		<u>\$239,000<sup>2</sup></u>	

<sup>1</sup> The excess or deficit of the estimated current values of major assets or categories of assets over their tax bases should be disclosed.

<sup>2</sup> This amount should be presented in the statement of financial condition between liabilities and net worth.

## Section 10,390

# ***Statement of Position 85-3 Accounting by Agricultural Producers and Agricultural Cooperatives***

April 30, 1985

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## **Introduction**

.001 This statement discusses accounting by agricultural producers and agricultural cooperatives that intend to present financial statements in conformity with generally accepted accounting principles. The issues discussed are—

- Accounting for inventories by producers
- Accounting for development costs of land, trees and vines, intermediate-life plants, and animals
- Accounting by patrons for product deliveries to cooperatives
- Accounting by cooperatives for products received from patrons
- Accounting for investments in and income from cooperatives

This statement does not apply to personal financial statements of agricultural producers or statements prepared on a comprehensive basis of accounting other than generally accepted accounting principles, for example, the income tax or the cash basis of accounting. This statement also does not apply to growers of timber; growers of pineapple and sugarcane in tropical regions; raisers of animals for competitive sports; or merchants or noncooperative processors of agricultural products that purchase commodities from growers, contract harvesters, or others serving agricultural producers.

## Definitions

.002 For purposes of this statement, the following definitions apply.

*Advances.* Generally used in marketing and pooling cooperatives to denote amounts paid to patrons prior to final settlement; for example, amounts paid to patrons on delivery of crops.

*Agricultural cooperatives.* See paragraphs .006 through .022.

*Agricultural producers.* See paragraphs .003 through .005.

*Assigned amounts.* Amounts used to record products delivered by patrons of a marketing cooperative operating on a pooling basis, and the related liability to patrons if the ultimate amounts to be paid to patrons are determined when the pool is closed. These amounts may be established on the basis of current prices paid by other buyers (sometimes referred to as "field prices"), or they may be established by the cooperative's board of directors. The assigned amounts are sometimes referred to as "established values."

*Cash advance method.* A method of accounting for inventories of a marketing cooperative operating on a pooling basis. Under this method, inventories are accounted for at the amount of cash advances made to patrons. (This is sometimes referred to as the "cost advance method.")

*Commercial production.* The point at which production from an orchard, vineyard, or grove first reaches a level that makes operations economically feasible, based on prices normally expected to prevail.

*Crop development costs.* Costs incurred up to the time crops are produced in commercial quantities, including the costs of land preparation, plants, planting, fertilization, grafting, pruning, equipment use, and irrigation.

*Crops.* Grains, vegetables, fruits, berries, nuts, and fibers grown by agricultural producers.

*Exempt and nonexempt cooperatives.* Cooperatives classified according to their federal income tax status. Both types are permitted to deduct from taxable income patronage distributed or allocated on a qualified basis to patrons to the extent that the distributions represent earnings of the cooperative derived from business done with or for the patrons. In addition, cooperatives meeting the requirements of Internal Revenue Code section 521 (exempt cooperatives) are permitted to deduct (1) limited amounts paid as dividends on capital stock and (2) distributions to patrons of income from business done with the U.S. government or its agencies and income from nonpatronage sources.

*Farm price method.* A method of accounting for inventories at the sales prices in the nearest local market for the quantities that the producer normally sells less the estimated costs of disposition.

*Futures contract.* A standard and transferable form of contract that binds the seller to deliver to the bearer a standard amount and grade of a commodity to a specific location at a specified time. It usually includes a schedule of premiums and discounts for quality variation.

*Growing crop.* A field, row, tree, bush, or vine crop before harvest.

*Grove.* Fruit or nut trees planted in geometric patterns to economically facilitate care of the trees and harvest of the fruit or nuts.

*Harvested crop.* An agricultural product, gathered but unsold.

*Livestock.* Registered and commercial cattle, sheep, hogs, horses, poultry, and small animals bred and raised by agricultural producers.

*Market order prices.* Prices for raw products established by federal or state agencies.

*Marketing cooperative.* A cooperative that markets the products (crops, live-stock, and so on) produced by its patrons.

*Member and nonmember (of a cooperative).* A member is an owner-patron who is entitled to vote at corporate meetings of a cooperative. A nonmember patron is not entitled to voting privileges. A nonmember patron may or may not be entitled to share in patronage distributions, depending on the articles and bylaws of the cooperative or on other agreements.

*Net realizable value.* Valuation of inventories at estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation.

*Orchard.* Fruit trees planted in geometric patterns to economically facilitate care of the trees and harvest of the fruit.

*Patron.* Any individual, trust, estate, partnership, corporation, or cooperative with or for whom a cooperative does business on a cooperative basis, whether a member or nonmember of the cooperative association.

*Patronage.* The amount of business done with a cooperative by one of its patrons. Patronage is measured by either the quantity or value of commodities received from patrons by a marketing cooperative and the quantity or value of the goods and services sold to patrons by a supply cooperative.

*Patronage allocations.* Patronage earnings distributed, or allocated, to individual patrons on the basis of each patron's proportionate share of total patronage. Such allocations, which include notification to the patron, may be made on a qualified or nonqualified basis.

*Patronage earnings.* The excess of a cooperative's revenues over its costs arising from transactions done with or for its patrons. Generally a significant portion of those earnings is allocated to the cooperative's patrons in the form of cash, allocated equities, or both.

*Pools.* Accounting control centers used for determining earnings and patronage refunds due to particular patrons.

Open pools are accounting control centers that are not closed at the end of each accounting period. Open pools are sometimes used by marketing cooperatives for crops that may not be sold for two or more years after their receipt from patrons.

A single pool cooperative determines net proceeds or patronage refunds on the basis of overall operating results for all commodities marketed during an accounting period.

A multiple pool cooperative determines net proceeds or patronage refunds on the basis of separate commodities, departments, or accounting periods.

*Progeny.* Offspring of animals or plants.

*Raised animals.* Animals produced and raised from an owned herd, as opposed to purchased animals.

*Recurring land development costs.* Costs that do not result in permanent or long-term improvements to land, for example, maintenance costs that occur annually or periodically.

*Retains.* Amounts determined on a per-unit basis or as a percentage of patronage earnings that are withheld by cooperatives from distributions and allocated to patrons' capital accounts.

*Supply cooperative.* A cooperative that supplies to its patrons goods and services used by them in producing their products.

*Unit livestock method.* Accounting for livestock by using an arbitrary fixed periodic charge. For raised animals the amount is accumulated by periodic increments from birth to maturity or disposition. For purchased animals the arbitrary fixed periodic amount is added to the acquisition cost until maturity or disposition of the animal.

*Vineyards.* Grapevines planted in patterns for commercial cultivation and production.

*Written notice of allocation.* Any capital stock, revolving fund certificate, retain certificate, certificate of indebtedness, letter of advice, or other written notice to the recipient that states the dollar amount allocated to the patron by the cooperative and the portion that constitutes a patronage dividend.

## Agricultural Producers

.003 In this statement, farmers and ranchers are referred to as “agricultural producers,” a term that includes, for example, those who raise crops from seeds or seedlings, breed livestock (whether registered or commercial), and feed livestock in preparation for slaughter. The term excludes, for example, merchants and processors of agricultural products who purchase commodities from growers, contract harvesters, or others serving agricultural producers, although they are covered by the term “agribusiness” as it is generally used. The term also excludes growers of timber and raisers of animals for competitive sports, although some of the accounting principles discussed in this statement may apply to such activities.

.004 Agricultural producers use every form of business organization, from sole proprietorship to a large publicly held corporation. They engage in numerous activities, for example:

- Growing wheat, milo, corn, and other grains
- Growing soybeans, vegetables, sugar beets, and sugarcane
- Growing citrus fruits, other fruits, grapes, berries, and nuts
- Growing cotton and other vegetable fibers
- Operating plant nurseries
- Breeding and feeding cattle, hogs, and sheep, including animals for wool production
- Operating dairies
- Operating poultry and egg production facilities
- Breeding horses
- Raising mink, chinchilla, and similar small animals

In addition, the operations of agricultural producers often involve various combinations of those activities. Agricultural practices and products may vary still further because of differences in temperature, soil, rainfall, and regional economics. Farm products may be used in related activities, such as the feeding of hay and grain to livestock, or they may be marketed directly by the producer. Producers often sell products in accordance with government programs or through agricultural cooperatives. Marketing strategies may include forward contracts or commodity futures contracts to reduce the risks of fluctuations in market prices.

.005 Agricultural producers often borrow to finance crop development costs and the costs of acquiring facilities and equipment.

## Agricultural Cooperatives

[.006-.008] [Deleted to remove outdated information.]

.009 Section 1141(j) of the Agricultural Marketing Act of 1929, as amended, contains the following definition of a cooperative association:

The term "cooperative association" means any association in which farmers act together in processing, preparing for market, handling, and/or marketing the farm products of persons so engaged, and also means any association in which farmers act together in purchasing, testing, grading, processing, distributing, and/or furnishing farm supplies and/or farm business services. Provided, however, that such associations are operated for producers or purchasers and conform to one or both of the following requirements:

First. That no member of the association is allowed more than one vote because of the amount of stock or membership capital he may own therein; and

Second. That the association does not pay dividends on stock or membership capital in excess of 8 per centum per annum.

And in any case to the following:

Third. That the association shall not deal in farm products, farm supplies, and farm business services with or for nonmembers in an amount greater in value than the total amount of such business transacted by it with or for members. All business transacted by any cooperative association for or on behalf of the United States or any agency or instrumentality thereof shall be disregarded in determining the volume of member and nonmember business transacted by such association.

.010 A cooperative typically has the following characteristics:

- a. Assets are distributed periodically to patrons on a patronage basis. In certain situations, however, assets in the amount of net-of-tax earnings may be accumulated by the cooperative and may or may not be allocated to patrons' accounts.
- b. Members control the organization in their capacity as patrons and not as equity investors.
- c. Membership is limited to patrons.
- d. The return that can be paid on capital investment is limited.
- e. At least 50 percent of the cooperative's business is done on a patronage basis.

.011 Virtually all agricultural cooperatives meet the definition of cooperatives that is used to determine eligibility for borrowing from the banks for cooperatives and for exemption from the annual reporting requirements of the Securities and Exchange Act of 1934. Failure to meet the definition, however, does not necessarily prevent an entity from being considered as operating on a cooperative basis under subchapter T of the Internal Revenue Code.

.012 The main difference between cooperatives and other business enterprises is that cooperatives and their patrons operate as single economic units to accomplish specific business purposes, such as the marketing of farm products, the purchase of supplies, or the performance of services for the benefit of the patrons. The aim is to reduce costs, increase sales proceeds, and share risks through the increased bargaining power that results from the patrons' combined resources and buying power.

.013 The patron's role as an investor is secondary and incidental to his business relationship with the cooperative.

.014 If certain requirements are met, the Internal Revenue Code permits cooperatives tax deductions for earnings allocated to their patrons. Earnings not so allocated are taxed at corporate income tax rates. Cooperatives may use other terms for earnings, such as "margins," "net proceeds," or "savings."

.015 Another difference between cooperatives and other business corporations is that the cooperative's bylaws usually require it to distribute assets to patrons, or allocate to patrons' accounts amounts equal to its earnings, on the basis of their patronage. Distributions to patrons are different from dividend payments to stockholders in other corporations. The distribution of earnings on the basis of patronage has been termed the "price adjustment theory."

.016 Under the price adjustment theory, a cooperative agrees to do business at cost. In a purchasing cooperative, for example, a patron may be charged more than cost at the time of purchase; however, the cooperative normally must return to the patron all amounts received in excess of cost, including costs of operation and processing.

.017 Both exempt and nonexempt cooperatives are subject to federal income taxes on patronage earnings that are not distributed in cash or allocated on a qualified basis. Nonexempt cooperatives are subject to income taxes on earnings arising from sources other than patronage.

.018 Cooperatives generally try to buy or sell at the current market price. Periodically, they determine total costs and make distributions to patrons in the form of cash, certificates, or other notices of allocation based on the excess of revenues over costs.

.019 The two major types of cooperatives are supply cooperatives and marketing cooperatives. *Supply cooperatives* obtain or produce such items as building materials, equipment, feed, seeds, fertilizer, and petroleum products for their patrons. *Marketing cooperatives* provide means for agricultural producers to process and sell their products.

.020 Services related to those functions are provided by some supply and marketing cooperatives; they are also provided by separate associations known as *service cooperatives*, which provide such services as trucking, storage, accounting, and data processing. A special type of service cooperative is a *bargaining cooperative*, which serves its members by negotiating with processors on their behalf.

.021 Many marketing cooperatives commingle patrons' fungible products in pools. The excess of revenues over costs for each pool is allocated to patrons on the basis of their pro rata contributions to the pool, which may be determined by the number of units delivered, the volume of product delivered, or another equitable method.

.022 The members of *local cooperatives* are agricultural producers whose activities are generally centralized. The members of *federated cooperatives* are other cooperatives whose activities are regional. Some cooperatives have both individual producers and other cooperatives as members.

## Accounting for Inventories of Crops by Agricultural Producers

.023 Previously existing accounting literature does not specifically cover accounting by agricultural producers, and available material is predominantly

tax oriented. Accounting Research Bulletin (ARB) No. 43, chapter 4, provides the following information about accounting for inventories:

### STATEMENT 9

Only in exceptional cases may inventories properly be stated above cost. For example, precious metals having a fixed monetary value with no substantial cost of marketing may be stated at such monetary value; any other exceptions must be justifiable by inability to determine appropriate approximate costs, immediate marketability at quoted market price, and the characteristic of unit interchangeability. Where goods are stated above cost this fact should be fully disclosed.

#### *Discussion*

It is generally recognized that income accrues only at the time of sale, and that gains may not be anticipated by reflecting assets at their current sales prices. For certain articles, however, exceptions are permissible. Inventories of gold and silver, when there is an effective government-controlled market at a fixed monetary value, are ordinarily reflected at selling prices. A similar treatment is not uncommon for inventories representing agricultural, mineral, and other products, units of which are interchangeable and have an immediate marketability at quoted prices and for which appropriate costs may be difficult to obtain. Where such inventories are stated at sales prices, they should of course be reduced by expenditures to be incurred in disposal, and the use of such basis should be fully disclosed in the financial statements.

.024 Accounting Principles Board (APB) Statement No. 4, chapter 6, paragraph 16, states the following:

Revenue is sometimes recognized on bases other than the realization rule. For example, on long-term construction contracts revenue may be recognized as construction progresses. This exception to the realization principle is based on the availability of evidence of the ultimate proceeds and the consensus that a better measure of periodic income results. Sometimes revenue is recognized at the completion of production and before a sale is made. Examples include certain precious metals and farm products with assured sales prices. The assured price, the difficulty in some situations of determining costs of products on hand, and the characteristic of unit interchangeability are reasons given to support this exception.

Statement of Position 93-3, *Rescission of Accounting Principles Board Statements* [section 10,560], rescinds APB Statement No. 4. FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, discusses matters similar to those in APB Statement No. 4. [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.025 Accounting Research Study (ARS) 13, chapter 9, page 156, states—

#### *Market as the Accounting Basis of Inventories*

Exceptional cases exist in which it is not practicable to determine an appropriate cost basis for products. A market basis is acceptable if the products (1) have immediate marketability at quoted market prices that cannot be influenced by the producer, (2) have characteristics of unit interchangeability, and (3) have relatively insignificant costs of disposal. The accounting basis of those kinds of inventories should be their realizable value, calculated on the basis of quoted market prices less estimated direct costs of disposal. Examples are precious metals produced as joint products or by-products of extractive processes and fresh dressed meats produced in meat packing operations.

Paragraph 67 of FASB Concepts Statement No. 5 also discusses measurement of assets at current market value. [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

## Diversity in Practice

.026 Published financial statements reveal several ways that agricultural producers account for growing crops:

- Charging costs to operations when they are incurred
- Including crop development costs in deferred charges and amortizing them
- Stating costs on the balance sheet at unchanging amounts substantially less than the costs incurred and charging all current costs to operations when they are incurred
- Deferring all costs and writing them off at harvest or, for perennial crops, over the estimated productive life of the planting

Agricultural producers report harvested crops using the farm price method, at cost (LIFO, FIFO, or average cost), and at the lower of cost or market.

Some producers use the farm price method (market) to account for inventories of harvested crops. Other agricultural producers, particularly those whose securities are publicly held, account for harvested crops at the lower of cost or market.

## Pros and Cons

.027 A study of accounting for producers' inventories involves an examination of chapter 4, statement 9, of ARB No. 43, which has been used as authority for accounting for producers' inventories at market.

.028 Some accountants believe that many producers cannot determine costs, and some believe that market is an appropriate valuation, whether or not cost data are available. Many accountants believe that users of producers' financial statements would find them less useful if inventories were valued at the lower of cost or market.

.029 Other reasons for the preference for market value are its long established use and the need to identify separately the gains and losses attributable to the production cycle and the marketing function, which is discussed in paragraph .035.

.030 For most business activities, the accounting literature requires an exchange of goods or services before income is recognized. That precludes accounting for inventories of unsold goods at market unless market value is less than cost. The principal exceptions to that rule are identified in chapter 9 of ARS 13 as "metals produced as joint products or by-products of extractive processes and fresh dressed meats produced in meat packing operations." Those products have unique cost identification problems. Chapter 9 of ARS 13 further states that carrying products at market is acceptable if those products "(1) have immediate marketability at quoted market prices that cannot be influenced by the producer, (2) have characteristics of unit interchangeability, and (3) have relatively insignificant costs of disposal."

.031 The first of the three conditions in ARB No. 43, statement 9, is the inability to determine costs. While many producers may not keep detailed cost records, costs usually either are available or can be determined with acceptable accuracy.

.032 Accountants who favor accounting for producers' inventories at market recognize that ARB No. 43 requires an *inability* to determine appropriate approximate costs. They point out, however, that the discussion interprets the statement to apply when "appropriate costs may be *difficult* to obtain" [emphasis added]. They also note that APB Statement No. 4,<sup>\*</sup> chapter 6, referred to the "difficulty in some situations of determining costs of products" as a partial justification for the use of market price. Thus, they interpret statement 9 as allowing the use of market if costs are difficult to determine, not only if they are impossible to determine.

.033 A major argument for accounting for inventories at market is the availability of established markets that provide quoted market prices for most agricultural commodities. However, because variations in grade and quantity, distance from central markets, shipping hazards, and other restrictions may affect the ultimate realization of quoted market prices for agricultural products, there are often serious difficulties in determining the market price for a given product in a given place. Also, many products have no central market with established prices, and determination of their market prices may be subjective and incapable of verification.

.034 While ARS 13 does not cover inventories of agricultural products, it questions the appropriateness of accounting for inventories at market even if an established market exists. The study notes that present principles appear to allow the use of market price in accounting for inventories of precious metals if there is a fixed selling price and insignificant marketing cost regardless of whether it is practicable to determine costs. The study states—

The apparent preferential treatment may have originally been considered appropriate because metals having fixed monetary values clearly demonstrated the "immediate marketability at quoted market prices and the characteristic of interchangeability" required in the cases in which it is impracticable to determine costs. Further question as to why preferential treatment was originally accorded to precious metals might now be considered academic. Silver no longer has a fixed monetary price, and gold has a fluctuating free market price for nonmonetary purposes. That raises questions as to whether the inventory basis for gold and silver should now be considered the same as for other metals produced as by-products or joint products.

.035 Some proponents of accounting for agricultural producers' inventories at market distinguish the production of a crop from its marketing; they believe that delays in the disposal of a harvested crop are due principally to the producer's desire to sell the commodities later at a higher price. They contend that, in order to separate the results of the two functions, the inventories should be accounted for at market prices after they are harvested. They point out that both functions are likely to cause significant gains and losses. Some opponents counter that the same argument can be made for many nonagricultural enterprises that are not permitted to recognize income at the end of production.

.036 The securities of most agricultural producers are not traded publicly, and their financial statements are prepared primarily for management and lenders. Advocates of the use of market prices contend that lenders are concerned with the market price of inventories to be used as collateral. Moreover,

---

<sup>\*</sup> Statement of Position 93-3, *Rescission of Accounting Principles Board Statements* [section 10,560], rescinds APB Statement No. 4. [Footnote added to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

most producers are not required to use cost information for income tax purposes. Thus, some accountants argue that determining cost for financial statements is an unproductive additional burden to the producer. Conversely, cost advocates point out that both public and nonpublic producers require long-term financing, and cost-basis financial statements may provide better information for those purposes.

.037 Some accountants believe that it is difficult to argue persuasively for charging the periodic costs of growing crops to expense as they are incurred since a valuable asset is being developed. Some contend that the use of a fixed amount less than cost violates existing principles of accounting for assets. Others believe it is acceptable and consistent with a market basis of accounting to account for growing crops at net realizable value or at no value.

### Division Conclusions

.038 All direct and indirect costs of growing crops should be accumulated and growing crops should be reported at the lower of cost or market.

.039 An agricultural producer should report inventories of harvested crops held for sale at (a) the lower of cost or market or (b) in accordance with established industry practice, at sales price less estimated costs of disposal, when all the following conditions exist:

- The product has a reliable, readily determinable and realizable market price.
- The product has relatively insignificant and predictable costs of disposal.
- The product is available for immediate delivery.

## Accounting for Development Costs of Land, Trees and Vines, Intermediate-Life Plants, and Animals

.040 Development costs of land, trees and vines, intermediate-life plants, and animals are different from costs incurred in raising crops for harvest, which were discussed in the previous section, "Accounting for Inventories of Crops by Agricultural Producers."

.041 Land development generally includes improvements to bring the land into a suitable condition for general agricultural use and to maintain its productive condition. Some improvements are permanent; some have a limited life. Permanent land developments include, for example, clearing, initial leveling, terracing, and construction of earthen dams; they involve changes to the grade and contour of the ground and generally have an indefinite life if they are properly maintained. Limited-life developments usually include such items as water distribution systems and fencing and may also include the costs of wells, levees, ponds, drain tile, and ditches, depending on the climate, topography, soil conditions, and farming practices in the area.

.042 Orchards, vineyards, and groves generally develop over several years before they reach commercial production. Production continues for varying numbers of years, depending on such influences as type of plant, soil, and climate. During development, the plants normally require grafting, pruning, spraying, cultivation, or other care.

.043 Intermediate-life plants have growth and production cycles of more than one year but less than those of trees and vines. They include, for example,

artichokes, various types of berries, asparagus, alfalfa, and grazing grasses. Development costs of intermediate-life plants include the cost of land preparation, plants, and cultural care until the plant, bush, or vine begins to produce in commercial quantities.

.044 The terms *livestock* and *animals* are used interchangeably and are meant to include cattle, sheep, hogs, horses, poultry, and other small animals. The development of animals requires care and maintenance of the breeding stock and their progeny until their transfer from the brood herd. Animals purchased before maturity also require care and maintenance to ready them for productive use or sale. The animals are ultimately identified for transfer to breeding herds, dairy herds, or other productive functions, are selected for sale, or are transferred to a feeding or other marketing operation.

### Diversity in Practice

.045 Development costs of land, trees and vines, intermediate-life plants, and animals are accounted for in the following ways:

- Charged to operations when they are incurred
- Included in deferred charges
- Included on the balance sheet at fixed amounts substantially less than the costs incurred, with all or a majority of the current costs charged to operations as they are incurred
- Capitalized and amortized over the estimated productive life of the animal, tree, vine, or plant
- Carried at market values

.046 In the case of annual field crops that are planted and harvested in the same accounting period, producers generally match costs with revenues. When the growing cycle continues beyond the accounting period, costs often are not matched with revenues.

.047 Few significant diversities of practice are apparent in the financial statements primarily because of lack of disclosure. However, some agricultural producers charge land development costs to expense based on provisions of the income tax laws.

.048 In accounting for development costs of trees and vines, some producers agree that the costs should be capitalized and depreciated over the expected productive life, but the costs to be capitalized and those to be charged to expense are not identified uniformly. Income tax concepts have had a strong influence on accounting practices for those development costs.

.049 Crops from intermediate-life plants have generally been accounted for in the same way as annual crops, with no distinctions for variations in the periods of development and productivity.

.050 Many livestock producers charge the costs of developing animals to expense without regard to their productive lives or future use or sales value. Animals are sometimes reported at cost and other times at market values. Some producers use the unit livestock method, and in many instances, the annual unit cost increments are below market and probably below cost.

### Pros and Cons

.051 Some accountants believe that large-scale improvements that transform the land to new and better uses are permanent land improvements to be

capitalized and that subsequent modifications and improvements are necessary and should be classified as period expenses.

.052 Others believe that it is difficult, or nearly impossible, to distinguish between permanent, limited-life, and recurring land development costs. Land improvements that an owner has made over many years tend to lose their original characteristics. Such improvements are usually accompanied by increasingly intensive land use over relatively long periods. Prior improvements are modified, improved on, or eliminated, and the resulting land configuration and use are noticeably changed. The characteristics of continuing land improvements accomplished over long periods are given as justification for classifying those costs as recurring.

.053 Many accountants believe that all direct and related indirect costs of land development, such as leveling, clearing of brush, terracing, and installation of drain tile, should be capitalized. They further believe that land development costs that waste away or diminish in efficiency through use, such as drainage tile, should be depreciated or amortized over the number of seasons that the land can reasonably be expected to produce without renovation or renewal of the particular development.

.054 It is generally agreed that development costs of orchards, vineyards, and groves should be capitalized, but there is no agreement on the specific costs that should be capitalized. Many believe it necessary to capitalize only those costs that the income tax laws require to be capitalized.

.055 Some accountants believe that all direct and indirect costs for orchards, vineyards, and groves incurred during the development period should be capitalized until commercial production is achieved. Others believe all such costs, except annual maintenance costs, should be capitalized. All agree that capitalized costs should be depreciated or amortized over the useful life of the plantings.

.056 Accounting practices for development costs of intermediate-life plants are inconsistent. Producers who deduct expenses before revenues are realized for intermediate-life plants and orchardists and vineyardists who do not want to capitalize development costs and depreciate them over the estimated productive life of the developed asset are motivated by the same reasons. The question of capitalization and depreciation is similar for producers of intermediate-life plants and for producers of trees and vines. The principal distinctions are in development period and productive life. For example, orchard trees may require four to seven years before nominal production, while limited production may occur during the first year of such crops as alfalfa, some berries, and asparagus.

.057 Some accountants have resisted accumulating development costs for growing animals, based on the difficulty and expense of accumulating such information and, in some instances, the problem of identifying individual animals or groups and categories of animals. Instead of cost, the unit livestock method or a market value has been used for assigning amounts to the animals at each level of maturity in the belief that such accounting methods, if consistently applied, would not adversely affect income recognition.

.058 Others believe that all direct and indirect development costs of raising livestock should be accumulated and capitalized until the livestock have reached maturity and have been selected for breeding or other productive purposes. Many believe that income-producing livestock should be depreciated on the basis of their expected productive lives.

## Division Conclusions

**.059** Permanent land development costs should be capitalized and should not be depreciated or amortized, since they have, by definition, an indefinite useful life.

**.060** Limited-life land development costs and direct and indirect development costs of orchards, groves, vineyards, and intermediate-life plants should be capitalized during the development period and depreciated over the estimated useful life of the land development or that of the tree, vine or plant.

**.061** All direct and indirect costs of developing animals should be accumulated until the animals reach maturity and are transferred to a productive function. At that point the accumulated development costs, less any estimated salvage value, should be depreciated over the animals' estimated productive lives.

**.062** All direct and indirect development costs of animals raised for sale should be accumulated, and the animals should be accounted for at the lower of cost or market until they are available for sale. Agricultural producers should report animals available and held for sale (a) at the lower of cost or market or (b) in accordance with established industry practice at sales price, less estimated costs of disposal, when all of the following conditions exist:

- There are reliable, readily determinable and realizable market prices for the animals.
- The costs of disposal are relatively insignificant and predictable.
- The animals are available for immediate delivery.

## Accounting for Patrons' Product Deliveries to Marketing Cooperatives Operating on a Pooling Basis

**.063** Agricultural marketing cooperatives process and market their patrons' products. There are frequently good bases for recording transfers of products between cooperatives and their patrons. For example, dairy cooperatives record transfers of products on the basis of market order prices, and grain cooperatives record transfers of products on the basis of readily determined cash prices. Many cooperatives, therefore, transfer patrons' products at market prices, and the transactions are treated as purchases by the cooperatives and as sales by the patrons.

**.064** However, cooperatives operating on a pooling basis may receive products from their patrons without paying a fixed price to the patrons. A cooperative may assign amounts to products based on current prices paid by other buyers or on amounts established by the cooperative's board of directors, or it may assign no amount. The cooperative estimates a liability to patrons equal to the assigned amount for the delivered product, and it usually pays this liability on a short-term basis. The excess of revenues over the assigned amounts and operating costs at the end of a pool period, which may be a week, a month, a year, or longer, is paid or allocated to patrons. Assets equal to that excess may be distributed to the patrons or retained by the cooperative.

**.065** The different accounting methods used by pooling cooperatives have been developed to satisfy provisions of their bylaws and contractual arrange-

ments with patrons and to provide equitable methods of settlement from pool period to pool period, as well as among the various classes of patrons. For pooling cooperatives, accounting methods have been developed to allow the use of the single-pool or multiple-pool methods of accounting.

## Diversity in Practice

.066 Significant information about the accounting practices of patrons in recording the delivery of raw products to marketing cooperatives is scarce. Among the practices used are recognition (1) at the estimated net return, presumably at the time of delivery, and (2) at the time of sale by the cooperative to an outside party. Those two examples provide the extremes, one recognizing the delivery to the cooperative as a sale and the other continuing to carry the product as inventory of the producer until it is sold by the cooperative. Transfer prices for products delivered to cooperatives are established in diverse ways:

- At market order price or governmental support price
- At market price
- At an assigned amount determined by the cooperative's board of directors to approximate market price
- At the amount of advances
- At cost to the producer
- At no amount until the cooperative advises the producer of the expected proceeds from the ultimate disposition of the product

.067 Cooperatives that receive products from patrons and pay their patrons a firm market price, at or shortly after delivery, treat the payments as purchases. In those situations the prices are paid regardless of the amount of the cooperatives' earnings. Those cooperatives normally report inventories at the lower of cost or market. However, pooling cooperatives estimate amounts due to patrons at the time of delivery, and those amounts are later adjusted on the basis of the pool's earnings. This presents a significant accounting problem. The following paragraphs discuss only the accounting issues that result from deliveries of products by patrons to cooperatives operating on a pooling basis.

.068 In cooperatives operating on a pooling basis, products delivered by patrons are commingled with other patrons' products, processed, and marketed. Earnings from the sale of finished products are returned to patrons, either in cash or in some form of equity, whether or not those earnings were determined on the basis of current market prices at the time of delivery. Many cooperatives value patrons' products at assigned amounts (usually current market prices) set by the board of directors at delivery. A corresponding estimated liability is accrued for amounts due to patrons. At the end of the pool period, the pool's net earnings are credited to amounts due patrons on a patronage basis.

.069 Some cooperatives cannot determine the market prices of patrons' products when they receive them because of limited cash purchases by other processors. They are usually cooperatives that process and market a high percentage of limited specialty crops. Many of those cooperatives account for inventories of goods in process and finished goods at net realizable value, determined by deducting estimated completion and disposition costs from the

estimated sales value of the processed inventory, because a reliable price for the unprocessed product is not available to account for inventories at the lower of cost or market. Furthermore, many cooperatives must determine net realizable value to comply with bylaw provisions and contractual obligations and to facilitate equitable pool settlements from pool period to pool period and among various classes of patrons.

.070 A 1973 survey by the National Council of Farmer Cooperatives indicated that many marketing cooperatives use net realizable value to account for inventories. An excerpt from an article on this subject prepared for the council's legal, tax, and accounting committee appears below.

The National Council of Farmer Cooperatives made a survey of the inventory valuation methods used by its marketing cooperatives. The results of this survey confirm what has been the private belief of most cooperative accountants, that the net realizable market value method is perhaps the most widely used and accepted method of inventory valuation by marketing cooperatives. This survey reflects the responses of 49 cooperatives and, in summary, indicates that the following inventory methods are in use.

<u>Method</u>	<u>Cooper- atives</u>	<u>Sales (In Thousands)</u>	<u>% of Total Sales</u>
Net realizable market value	24	\$2,310,938	48%
Lower of cost or market, using field price as the established value of raw product	8	630,898	13
Net realizable market value and lower of cost or market, using field price as the established value of raw product	5	802,867	17
Cost	2	53,400	1
Rev. Rul. 69-67*	7	367,469	8
Other	3	621,925	13
	<u>49</u>	<u>\$4,787,497</u>	<u>100%</u>

\* Note: Rev. Rul. 69-67 refers to the cash advance method.

.071 The net realizable value method of accounting for inventories permits the recognition of the pool's estimated net earnings at the end of the fiscal period in which the patrons supply their crops to the cooperative or when pools are closed. Inventories are stated at net realizable value, and the amounts due to patrons are credited with the earnings. The net realizable value method of accounting for inventories permits the closing of the pools and provides equitable treatment to patrons if the cooperative transfers the inventories forward to the next period's pool at estimated market value.

.072 Some marketing cooperatives receive products from patrons without assigning amounts to them. During the year, cash is advanced to patrons on the basis of anticipated earnings. Inventories are recorded at amounts advanced plus costs of processing, and patrons' products are valued at the amount of advances made to the date of the financial statements. This is commonly called the "cash advance method."

## Authoritative Literature

.073 The primary source of authoritative guidance for accounting for inventories that result from deliveries of products by patrons to cooperatives has been ARB No. 43.

## Pros and Cons

.074 A transaction is usually completed when a patron delivers his product to a cooperative. The patron's product is commingled with that of other patrons, and title and individual risk of loss have passed. Some accountants believe that no accounting is necessary at the time of delivery because the transfer price is frequently not known until some later date. Nevertheless, accrual basis accounting calls for reporting the transaction according to the best information available at the time. While greater accuracy may be achieved by waiting for the cooperative to advise the patron of the net proceeds, the handicap of not having current financial information could outweigh the benefit of greater accuracy, and the lack of consistency in reporting could be confusing to the users of the financial statements.

.075 Some accountants argue that pooling cooperatives should not use an assigned amount for products received from patrons for financial accounting and reporting purposes because the amounts may not be reliable and the patrons may be paid more or less than that amount at the end of the pool period. Others argue that the use of an assigned amount permits the establishment of a tentative liability due patrons and allows inventories to be stated at the lower of cost or market. The method also facilitates allocation of pool proceeds to patrons.

.076 Some accountants believe that the net realizable value method of accounting for inventories is unacceptable because it anticipates cooperative earnings. Further, they believe that future selling prices and disposition costs are too uncertain to base accounting on them. Alternatively, those who favor the use of the net realizable value method believe that the problems of determining net realizable value do not differ from those of determining market under the lower of cost or market method. They also consider the method to be acceptable in accounting for pools because it enables the cooperative to settle pools annually and to comply with bylaw provisions and contractual obligations. In essence, they claim, the inventory is transferred to the next period's pool on an equitable basis.

.077 Some accountants believe that cooperatives may record products received from patrons at assigned amounts and then account for the inventories at net realizable value. That method permits the closing of pools at least annually on an equitable basis. Others believe that, if assigned amounts are used on receipt of the product, the inventories should be accounted for at the lower of cost or market.

.078 Some accountants favor the cash advance method of accounting for inventories. They believe that the only product cost that should be accounted for is the total of cash advanced to patrons to the date of the financial statements, because the cooperative has no liability to pay more unless more is earned. Others favor the cash advance method because the Internal Revenue Service has held in several rulings that pooling cooperatives should use that method in tax computations. Others reject the cash advance method because advances to patrons are primarily determined on availability of cash, the per-

centage of the pool production sold to the date of the financial statements, and short-term inventory loan restrictions rather than on the value of products received. Further, they reject the method because the amount and timing of advances are generally subject to the board of directors' action and may vary from period to period.

## **Division Conclusions**

### ***Accounting by Patrons for Products Delivered to Pooling Cooperatives***

.079 If control over the future economic benefits relating to the product has passed, which ordinarily is evidenced by the transfer of title, and if a price is available by reference to contemporaneous transactions in the market, or if the cooperative establishes an assigned amount, a delivery to the cooperative should be recorded as a sale by the patron at that amount on the date of delivery. If there is a reasonable indication that the proceeds from the cooperative will be less than the market price or the assigned amount, the lower amount should be used.

.080 If control over the future economic benefits relating to the product has passed, which ordinarily is evidenced by the transfer of title, and there are neither prices determined by other market buyers nor amounts assigned by the cooperative, or if such amounts are erratic, unstable, or volatile, the patron should record the delivery to the cooperative as a sale at the recorded amount of the inventory and should record an unbilled receivable. If there is a reasonable indication that the proceeds from the cooperative will be less than the receivable, the lower amount should be used.

.081 If title has not passed, the identity of the individual patron's product is maintained by the cooperative, and the price to the patron is to be based on the identified product's sale, the transaction is not complete, and the product should be included in the patron's inventory until it is sold by the cooperative, at which time the patron should record the sale.

.082 Advances are financing devices and should be treated as reductions in the unbilled receivable and should not be used as amounts for recording sales.

### ***Accounting by Pooling Cooperatives for Products Received From Patrons***

.083 If the boards of directors of agricultural marketing cooperatives operating on a pooling basis with no obligation to pay patrons fixed prices (pooling cooperatives) assign amounts that approximate estimated market to unprocessed products received from patrons, the assigned amounts are cost and should be charged to cost of goods sold and credited to amounts due patrons. The inventories should be accounted for at the lower of cost or market or, as described more fully in paragraph .084, at net realizable value. When assigned amounts are used, they should approximate estimated market of unprocessed products delivered by patrons (an example of inventories at lower of cost or market is provided in the appendix [paragraph .107], column A). The method used and the dollar amounts assigned to members' products should be disclosed.

.084 If the boards of directors of pooling cooperatives assign amounts to products received from patrons, the cooperatives should use those assigned amounts in determining the estimated amounts due patrons. Such cooperatives

may use net realizable value for determining pool proceeds, transferring inventory amounts to subsequent pools, or for other purposes (an example is provided in the appendix [paragraph .107], column B). The method used and the dollar amounts assigned to members' products should be disclosed.

**.085** If the boards of directors of pooling cooperatives do not assign amounts that approximate market to unprocessed products received from patrons, the cooperatives should account for inventories at net realizable value (an example is provided in the appendix [paragraph .107], column C). Because amounts that approximate estimated market are not assigned to products received from patrons, cost of goods sold will not include a charge for unprocessed products under this method.

**.086** Pooling cooperatives should not use the cash advance method to account for inventories.

## Accounting for Investments in and Income From Cooperatives

**.087** Member patrons of cooperatives can be producers or other cooperatives. Member patrons provide most of the capital required by cooperatives. The capital usually represents long-term investments acquired through initial cash investments, retains, or noncash patronage allocations. Voting rights for those investments are usually based on one-member-one-vote or limited weighted voting rather than on the number or amount of securities or other evidence of equity ownership held. The investments are made primarily to obtain an economical source of supply or marketing services and not on the expectation of a return on investment. The sale of such investments, other than back to the issuing cooperative, is usually restricted or prohibited.

### Diversity in Practice

**.088** Investments in cooperatives are generally carried by producers at cost, at cost plus declared retains, at cost plus estimated retains, or at an amount less than cost.

**.089** Most cooperatives carry their investments in other cooperatives at cost if they are purchased or at face amount if they are received in other than purchase transactions (retains or noncash patronage allocations). However, they usually write the investments down to estimated net realizable value if evidence indicates they will be unable to recover the full carrying amount of the investments. That practice has been endorsed in Accounting Research Bulletin 2, issued by the National Society of Accountants for Cooperatives, which states—

Investments in cooperatives made by user patrons for the purpose of providing capital for operations of the investee cooperative should be carried at cost, if purchased, or at face value if received in transactions other than purchases such as non-cash patronage dividends. Such investments should be written down to an appropriate amount if reliable evidence indicates that their value has been permanently impaired.

It should be noted that in most instances accounting for investments in other cooperatives (including banks for cooperatives and other cooperative financing organizations, such as the National Rural Utilities Cooperative Finance Corporation) on the basis outlined above results in investment carrying values equal to the equity values of the investing cooperative's interest in the investee

cooperatives; therefore, it would appear that the basis outlined complies with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, to the extent that the intent of the opinion is applicable to investments of cooperatives. In the infrequent instances where the investor's share of unallocated retained earnings of an investee cooperative is material to the investor, the principles set forth in APB Opinion No. 18 should be applied.

.090 Cooperatives that invest in other cooperatives usually recognize allocated equities in the cooperative investor's fiscal year within which written notice of allocation is received, and the investment is carried at cost plus allocated equities. That method of revenue recognition conforms with federal income tax requirements. It is the most practical method of reporting because many investee cooperatives issue financial statements and determine patronage allocations only at the close of their accounting years. Many cooperatives do that because they find determination of patronage allocations to be complex and time consuming, since their operations may include both marketing and supply functions, as well as several departments under each function.

.091 Diversity in practice has developed in accounting for unallocated equities. Some patrons who hold at least a 20 percent ownership interest recognize their interest in unallocated equities in accordance with APB Opinion No. 18. Others do not recognize unallocated equities, primarily because the equity ownership percentage changes according to patronage and because voting is usually based on the one-member-one-vote principle, which does not necessarily provide significant influence. Interpretation and application of APB Opinion No. 18 may become more significant in financial reporting for cooperatives because 1978 changes in the Internal Revenue Code, relating to the investment tax credit, may encourage cooperatives to reduce distributions of assets to patrons and increase unallocated net after-tax earnings for the purchase of assets.

.092 Most patrons recognize their patronage allocations when they are notified, which conforms with federal income tax reporting requirements. Other patrons accrue patronage allocations on the basis of the cooperatives' interim financial statements.

.093 Presentation of patronage allocations in patrons' financial statements is also diverse. Some patrons recognize patronage allocations as reductions of purchase or interest costs on purchases from supply or financing cooperatives or as increases in sales for deliveries to marketing cooperatives. Other patrons recognize all patronage allocations as nonoperating income.

## Authoritative Literature

.094 Authoritative literature on marketable investments—Statement of Financial Accounting Standards No. 12,\* *Accounting for Certain Marketable Securities*, and FASB Interpretation No. 16, *Clarification of Definitions and Accounting for Marketable Equity Securities That Become Nonmarketable*—has little applicability to investments in cooperatives. Investments in cooperatives are not equity securities and usually are not readily marketable, and transfer or sale, other than back to the issuing cooperative, is usually restricted

---

\* FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, supersedes FASB Statement No. 12. [Added to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

or prohibited. Current accounting literature supports the carrying of long-term investments, such as nonmarketable investments in agricultural cooperatives, at cost if the value of the investments is not impaired. Carrying amounts are reduced when the investor becomes unable to recover the full carrying amounts. APB Opinion No. 18 requires the equity method of accounting for investments in which the investor has significant influence over an investee's operating and financial policies.

.095 The significance of investments by patrons results primarily from the purchasing or marketing rights and participation in the operating earnings. As such, the operations of cooperatives have many of the attributes of corporate joint ventures or partnerships.

## Pros and Cons

.096 Some accountants argue that the investment in a cooperative is in substance a long-term investment and, as such, should be carried at cost or at cost plus allocated equities. Others believe that the investments should be discounted to their present value. The carrying amounts would be adjusted downward as required by generally accepted accounting principles when the patron becomes unable to recover the full carrying amounts.

.097 Those that support discounting of investments in cooperatives to present value believe that it results in satisfactory presentation in the financial statements because allocated equities are usually not redeemed or are redeemed over a long period. However, others believe that patrons contribute amounts to cooperatives not as investments but to obtain supply or marketing sources, and the allocated equities represent a proportionate share of the cooperative's earnings for the period of patronage. That is similar to accounting for equities in partnerships or corporate joint ventures, in which undistributed earnings are recognized for accounting purposes on the same basis as for federal income tax reporting. Proponents of the stated amount method also believe that it produces symmetry, since the investee records the issuance of securities or book credits at par or face amounts rather than on the basis of discounted values. They argue further that the method conforms with the underlying price-adjustment theory of cooperatives, which holds that such allocated equities are merely reductions of the cost of supply purchases or increases in the proceeds of products marketed through the cooperative and that they should therefore be reflected in the patrons' results of operations.

.098 Accountants who believe that a cooperative's unallocated losses should not be recognized by the patrons base their contention on the premise that operating losses may indicate temporary rather than permanent declines in value because they may result from identifiable, isolated, or nonrecurring events. Accordingly, they should not be recognized. Furthermore, because many investor cooperatives determine patronage allocations on the basis of financial statement reporting rather than federal income tax reporting, some accountants argue that financial statement recognition by investor cooperatives of unallocated losses will cause the payment of federal income taxes by the investor cooperative that would not otherwise be payable and such taxes will not be recoverable if the losses are later allocated. That adverse effect is the result of federal income tax regulations that limit the patronage refund deduction to the lesser of the patronage refund "paid" and the patronage refund "allowable," as determined in accordance with federal income tax rules and regulations.

.099 Those who believe that unallocated losses should be recognized argue that patrons must recognize allocated losses for consistent reporting, much as if the investment were in a corporate joint venture or partnership rather than a cooperative. They further contend that failure to recognize unallocated losses permits manipulation of earnings because patrons often serve on the cooperative's board of directors or can influence the board of directors, which has the authority to determine the portions, if any, of the losses that will be allocated to patrons.

.100 Accountants who believe that unallocated equities should not be recognized by the patrons generally contend that APB Opinion No. 18 does not apply because equity ownership generally does not convey voting control and because ownership interests in unallocated equities may be temporary, being subject to changes in patronage participation and the redemption of equities. However, others argue that APB Opinion No. 18 should apply to all investments in cooperatives in which the patrons hold at least 20 percent of the equity securities, regardless of the one-member-one-vote requirement and the fact that ownership interests may change. They believe that the patron frequently has significant influence due to patronage volume, assured representation on the board of directors, or other means.

.101 Some accountants believe that patronage allocations should be recognized in the accounting period in which the supply is purchased or the product is marketed, since those transactions are the source of the patronage allocations and are adjustments of the price at which the supply is purchased or the product marketed. Others believe that the accrual of estimated patronage allocations is impractical because many cooperatives do not determine patronage allocations during interim periods and the amount of the allocations usually cannot be determined from the cooperatives' interim financial statements. Further, existing federal income tax rules and regulations, as well as the bylaws of most investee cooperatives, require the investee's patronage allocations to be included in taxable income in the period the investor is notified of the patronage allocation. This requirement may cause adverse tax effects for investors.

.102 Some accountants argue that allocated and unallocated equities should be reflected in the statement of operations as reductions of costs or increases in proceeds because such amounts result from the transactions by which supplies are purchased, interest is paid, or products are sold. Accordingly, the proponents believe that the equities should be reported in the same manner as the original transactions to report sales, cost of sales, and operating expenses. Other accountants believe that the allocations should be reported as other income rather than as increases or decreases in sales, cost of sales, or operating expenses; they argue that including the allocations in sales, cost of sales, or operating expenses could misstate gross profit or expenses.

## **Division Conclusions**

.103 Investments in cooperatives should be accounted for at cost, including allocated equities and retains. The carrying amount of an investment in a cooperative should be reduced if the patron is unable to recover the full carrying value of the investment. Losses unallocated by the investee may indicate such an inability, and, at a minimum, the excess of unallocated losses over unallocated equities should be recognized by the patron based on the patron's proportionate share of the total equity of the investee cooperative, or any other appropriate method, unless the patron demonstrates that it is probable that the carrying amount of the investment in the cooperative can be fully recovered.

**.104** Patrons should recognize patronage refunds either—

- a.* When the related patronage occurs if it is then probable that (1) a patronage refund applicable to the period will be declared, (2) one or more future events confirming the receipt of a patronage refund are expected to occur, (3) the amount of the refund can be reasonably estimated, and (4) the accrual can be consistently made from year to year or
- b.* On notification by the distributing cooperative.

The accrual should be based on the latest available reliable information and should be adjusted on notification of allocation.

**.105** Either (1) the classification of the allocations in the financial statements should follow the recording of the costs or proceeds or (2) the allocations should be presented separately.

## Effective Date and Transition

**.106** The Accounting Standards Division recommends application of this statement to financial statements prepared for fiscal years, and interim periods in such fiscal years, beginning after June 15, 1985. Accounting changes to conform to the recommendations of this statement should be made prospectively for transactions or activities occurring on or after the effective date of this statement. Application for earlier years, including retroactive application, is encouraged for all transactions or activities regardless of when they occurred. Disclosures should be made in the financial statements in the period of change in accordance with APB Opinion No. 20, *Accounting Changes*.

## Appendix

### Accounting by Pooling Cooperatives for Products Received From Patrons

The following illustrates the statement of net earnings prepared under each of two possible methods of accounting for inventories (columns A and B), the statement of net proceeds prepared under the net realizable value method (column C), and the respective statements of amounts due patrons, if such latter statement is included in the financial statements. (See paragraphs .083, .084, and .085.) Column A demonstrates the lower of cost or market method with patrons' raw product being charged to cost of production at assigned amounts. Column B demonstrates the net realizable value method with patrons' raw product being charged to cost of production at assigned amounts. Column C demonstrates the net realizable value method when no amounts are assigned to patrons' raw product; therefore, there is no charge to cost of production for patrons' raw product. The assumed facts are as follows:

Sales	\$129,630
Beginning inventory	
Net realizable value	31,128
Lower of cost or market	28,380
Assigned value of patrons' raw product received	56,500
Ending inventory	
Net realizable value	35,596
Lower of cost or market	32,360
Income taxes	1,250
Other costs and expenses	56,580
Amounts paid to patrons, retains, and non-patronage earnings	74,430
Amounts due patrons at beginning of year	
Lower of cost or market method	8,910
Net realizable value method	11,748

Statements of Net Earnings (columns A and B)

Statement of Net Proceeds (column C)

	Inventories Valued At		
	Lower of Cost or Market—A	Net Realizable Value—B	Net Realizable Value—C
Sales	\$129,630	\$129,630	\$129,630
Costs and expenses (I)	109,100	108,702	52,202
Earnings before income taxes	20,530	20,928	—
Proceeds before income taxes	—	—	77,428
Income taxes	1,250	1,250	1,250
Net earnings	<u>\$ 19,280</u>	<u>\$ 19,678</u>	
Net proceeds			<u>\$ 76,178</u>
I. Beginning inventory	\$ 28,380	\$31,218	\$31,218
Assigned value of patrons' raw product received	56,500	56,500	—
Ending inventory	(32,360)	(35,596)	(35,596)
Other costs and expenses	56,580	56,580	56,580
	<u>\$109,100</u>	<u>\$108,702</u>	<u>\$ 52,202</u>

## Statements of Amounts Due Patrons

	Inventories Valued At		
	Lower of Cost or Market—A	Net Realizable Value—B	Net Realizable Value—C
Amounts due patrons at beginning of year	\$ 8,910	\$11,748	\$11,748
Net earnings	19,280	19,678	—
Net proceeds	—	—	76,178
Assigned value of patrons' raw product received	56,500	56,500	—
	84,690	87,926	87,926
Less amounts paid to patrons, retains, and non-patronage earnings	74,430	74,430	74,430
Amounts due patrons at end of year	<u>\$10,260</u>	<u>\$13,496</u>	<u>\$13,496</u>

Under the two inventory methods presented, the difference in amounts due patrons at the end of the year results from the difference in the ending inventory valuations, illustrated as follows:

Inventories of finished goods and goods in process at:	
Net realizable value	\$35,596
Lower of cost or market	<u>(32,360)</u>
	3,236
Amounts due patrons at end of year on lower of cost or market basis	<u>10,260</u>
Amounts due patrons at end of year on net realizable value basis	<u>\$13,496</u>

## Section 10,430

# **Statement of Position 88-1 Accounting for Developmental and Preoperating Costs, Purchases and Exchanges of Take-off and Landing Slots, and Airframe Modifications**

September 30, 1988

### **NOTE**

This statement of position amends chapter 3 of the AICPA Industry Audit Guide, *Audits of Airlines*.

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## **Industry Developments**

### **Deregulation**

.01 In 1981, when the AICPA Industry Audit Guide, *Audits of Airlines*, was issued, airlines were regulated by the Civil Aeronautics Board (CAB). However, the Airline Deregulation Act of 1978 (ADA) terminated the CAB's authority over rates and route access on January 1, 1983, and its responsibility for evaluating the fitness of new entrants on January 1, 1985.

.02 In addition to liberalizing the general provisions for awarding certificates to new airlines, the ADA established new provisions for automatic market entry and issuance of experimental certificates on a temporary basis. Other provisions eased restrictions on suspension and reduction of service and expedited market entry and exit. As a result, the ADA has enabled many new entrants to gain access to domestic markets and has allowed trunk, local service, and commuter carriers to expand and otherwise alter their service patterns. Airlines are now classified as certificated scheduled (route) airlines, certificated nonscheduled (charter) airlines, air-cargo airlines, and intrastate airlines. Within the route airline classification, airlines are now identified as major, national, regional, and air-taxi operators.

.03 In addition, the ADA transferred responsibility for overseeing airline operations to the Department of Transportation (DOT). The DOT has assumed responsibility for both monitoring the air safety and fitness characteristics of the various airlines and approving merger proposals and sales of airline routes. In this new competitive environment, marketing strategies, pricing of tickets, and costs of service have become important business issues for the airlines.

## **International Air Transportation**

.04 Airline operations between countries continue to be governed by specific bilateral agreements between the countries. The access of U.S. airlines to routes between the United States and other countries requires the approval of the respective countries for both landing rights at specified airports and frequency of flights.

.05 The International Air Transport Association (IATA), a voluntary organization of international airlines, was established in 1946 to negotiate international air fares, cargo rates, conditions of service, and ancillary matters. The Federal Aviation Act required U.S. airlines participating in such an organization to obtain approval from the CAB. In 1946, the CAB granted U.S. airlines immunity from antitrust laws, permitting them to participate in IATA conferences for the purpose of establishing fares and rates. Agreements reached by the airlines at those meetings are subject to the approval of the respective governments.

.06 In anticipation of deregulation in the United States, IATA established two types of airline participation: one deals with facilitation matters and is mandatory for all members; the other sets fares and rates for air transportation. Participation in the latter is optional, but a member choosing to participate in fare and rate conferences must do so for all areas served.

## **Air Transport Association of America (ATA)**

.07 Founded in 1936, the Air Transport Association of America is a trade and service organization representing member U.S.-scheduled airlines. The joint interests of the airlines as an industry are expressed through a system of councils and related committees on which airline and ATA representatives work together.

.08 Because travel agent sales constitute a significant portion of the airline business, the ATA designed the Area Settlement Plan (ASP), which is operated by the Airlines Reporting Corporation. The plan enables each travel agent to submit one sales report to an area processing center that then distributes the agent's sales and receivable transactions to the respective airlines. Because the dollar volumes involved and competitive needs for sales information are substantial, the ASP program requires continuous monitoring and updating. This service is provided to the airlines and travel agents by the ATA.

.09 Other plans, called bank settlement plans (BSPs), have been established recently in Japan, the United Kingdom, the Federal Republic of Germany, and other countries. The BSPs, although not identical to the ASP, contain many of the same features.

## **Regional Airline Association**

.10 The Regional Airline Association, formerly the Commuter Airline Association, is the national association of member airlines engaged in scheduled air transportation of passengers and cargo in local, feeder, and short-haul

markets throughout the United States and its territories. In addition, the association's finance and accounting committee has developed a uniform system of accounts for regional airline use.

## Regulations and Reporting

.11 Although the CAB is no longer in existence, airline accounting information continues to be reported to the DOT in conformity with the Uniform System of Accounts and Reports (USAR) previously issued by the CAB. The USAR consists of a list of titles and account numbers and instructions for their use. DOT—and, previously, CAB—policy has been to conform its accounting requirements to generally accepted accounting principles.

.12 Financial data and reports based on the USAR must be filed with the DOT on Form 41 quarterly and annually. Securities and Exchange Commission filings and annual financial reports frequently follow the wording and captions of the USAR accounts.

## Computerized Reservation Systems (CRSs)

.13 Computerized reservation systems (CRSs) developed by several airlines (CRS vendors) have significantly affected the industry. The systems are marketed to travel agents as an efficient method of accessing airline schedules and information regarding hotels, car rentals, and so forth. The CRSs permit the agency user to, among other things, check seat availability, make reservations, and print tickets for flights on participating domestic and international airlines. In 1984, the CAB ordered the elimination of display preference in the systems for all participating airlines (those paying a fee to participate) and required CRS vendors to charge uniform booking fees for airline users of CRSs, based on the level of service received. Nonparticipating airline schedules are also included in the CRSs for informational purposes.

.14 The CRS vendors receive booking fees per segment from participating airlines on which flights are booked and user fees from the travel agencies. Some airlines have contracted with CRS vendors to process all of their reservations through the CRS vendors' reservation systems, thereby eliminating the need for the airlines' in-house reservation systems.

.15 The CRSs increase the amount of information that may be captured online at the time the reservation is booked. This information normally includes passenger name, ticket number, the travel agent selling the ticket, itinerary, class of service, and price.

## Marketing Arrangements

.16 One of the developments in the deregulated environment is the *hub and spoke strategy* that has been adopted by many airlines. Under this concept, the airline identifies certain cities as hub cities to serve both long-haul flights and connecting short-haul flights. This strategy has led carriers operating from a hub city to enter into agreements with other carriers to coordinate flight schedules at the hub city to facilitate the interchange of passengers. The advantage to both airlines is that each feeds passengers to the other. The agreements may include joint promotion and advertising efforts, use of the major carrier's reservation system, and dual designation of flights in a CRS or other reservation systems and the official airline guide. The dual designation

of flights (that is, a national or regional flight arriving at or departing the hub city using the same flight number as the major carrier) is the subject of controversy within the industry.

### Commissions

.17 Before deregulation, commissions to travel agents were limited to amounts authorized by the CAB or foreign governments. Since deregulation, a myriad of commission arrangements has evolved both domestically and internationally. In addition to basic commissions, travel agents may be entitled to incentive commissions for certain routes, travel periods, and defined volumes. The independent accountant should consider the increasingly significant cost of travel agents' commissions when designing compliance and substantive tests of commissions expense.

### Accounting Issues

.18 The guidance presented in this statement modifies certain aspects of the guide and addresses issues that have developed as a result of deregulation.

### Developmental and Preoperating Costs

.19 Developmental and preoperating costs are as follows:

*Developmental costs* include those types of costs directly related to the development of new routes (or extension of existing routes), such as advertising and promotion expenses, related travel and incidental expenses, and expenses of regulatory proceedings.

*Preoperating costs* include flight crew training, maintenance training, prerenue flight expenses, insurance, and depreciation. Like developmental costs, preoperating costs relate directly to specific preoperating projects, such as preparation for operation of new routes . . . or integration of new types of aircraft . . .

[Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.20 Before deregulation, costs meeting the foregoing criteria for developmental and preoperating costs were normally deferred and amortized over the expected period of benefit, generally two-to-five years. In that regulated environment, the expected future benefit and recoverability of such costs was generally not in doubt.

.21 Under the ADA, new domestic routes can be obtained more readily without regulatory delay, and there is presently little domestic protection against new entrants. The designation of additional U.S. cities as gateway cities with direct service to various international cities, as well as the increased competition over traditional international routes, has altered the historical competitive relationship and earnings potential that previously existed on given routes. Therefore, the future benefits to be derived from new routes may be uncertain in the present operating environment.

### Division's Conclusions

.22 Because of the current deregulated environment and the uncertainty regarding the recoverability of route developmental costs, the majority of the Accounting Standards Executive Committee (AcSEC) believes that developmental costs, other than advertising costs, related to preparation of operations of new routes should not be capitalized, as previously permitted under the guide. (Advertising costs should be accounted for in conformity with the gui-

dance in SOP 93-7, *Reporting on Advertising Costs* [section 10,590].) Route expansion or alteration has become a recurring activity among the airlines, and any related cost is considered a normal and recurring cost of conducting business. [As amended, effective for financial statements for years beginning after June 15, 1994, by Statement of Position 93-7.] (See section 10,590.)

.23 Preoperating costs related to the integration of new types of aircraft would continue to be eligible to be capitalized, as permitted in the guide.\*

.24 A minority of AcSEC believes that the current accounting model permits the capitalization of developmental costs. They believe that the airline industry should not be precluded from capitalizing those costs.

.25 After the decision has been made to defer certain preoperating costs, questions arise about the appropriate cost-accumulation periods (in other words, the end-of-the-deferral period) and the date on which amortization of deferred costs should begin. Generally, current practice is to terminate the cost-deferral period and, consequently, begin the cost-amortization period on the date scheduled air service commences. AcSEC believes that it is inappropriate to defer preoperating costs after the new aircraft type is ready to be placed in service and that the amortization period for such costs should begin when the new aircraft is ready to be placed in service.\*

## Take-Off and Landing Slots

.26 New entrants to a market and airlines expanding in markets need gates, and take-off and landing slots available to them at the airports in those markets. At certain airports, the frequency of take-offs and landings at all times is generally at capacity. At other airports, the slots during popular travel times are at capacity.

.27 Because an airline cannot enter a market where no slots are available, the DOT has adopted a rule under which airlines may sell or trade slots. These transactions frequently include the sale of or access to gates for the acquiring airlines. Although slots, particularly those in high-demand time periods, have always had intrinsic value, the DOT policy of transferability through sale or exchange has made the slot a salable right.

## Division's Conclusions

.28 When airlines buy slots, the recorded asset is an identifiable intangible asset that should be accounted for in conformity with Accounting Principles Board Opinion No. 17, *Intangible Assets*. When establishing a policy for amortization of the cost of such intangible assets, the following factors should be considered:

- The accelerated pace of change in the airline industry and the effects of competition among airports
- The uncertainty of the continuation of the current governmental policy regarding sale of and access to landing slots

---

\* SOP 98-5, *Reporting on the Costs of Start-Up Activities*, amends this SOP (a) to require that preoperating costs be expensed as incurred rather than capitalized, and (b) to delete paragraph 25. SOP 98-5 is effective for financial statements for fiscal years beginning after December 15, 1998. This SOP will be updated to reflect the provisions of SOP 98-5 nearer to the pronouncement's effective date. See section 10,750.

- The terms of existing facility leases at airports
- Probability of new airport construction to serve the same metropolitan area
- Traffic patterns and trends and local operating restrictions

.29 When an airline exchanges slots with another airline, the slots acquired in the exchange are nonmonetary assets that should be recorded in conformity with APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, and amortized in accordance with APB Opinion No. 17.

### **Airframe Modifications**

.30 Historically, airlines have undertaken major programs to modify interior configurations of certain aircraft types—including the reconfiguration and replacement of seats, galley equipment, and storage space—in response to market forces and passenger demands. Since deregulation, such changes have been more frequent.

### **Division's Conclusions**

.31 If the modifications enhance the usefulness of the aircraft, the costs associated with the changes should be capitalized and depreciated over the estimated useful life of the aircraft or the modifications, whichever is less. The cost of the replaced asset net of accumulated depreciation and anticipated recovery value should be charged to income in the current period. However, detailed records may often be inadequate to permit identification of the cost of the replaced asset; therefore, estimates may be required.

### **Effective Date**

.32 The conclusions in this statement of position should be applied to transactions initiated after September 30, 1988, although earlier application is encouraged. Restatement of previously issued financial statements is not permitted.

## Section 10,450

### ***Statement of Position 90-3 Definition of the Term Substantially the Same for Holders of Debt Instruments, as Used in Certain Audit Guides and a Statement of Position***

February 13, 1990

#### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

### **Scope**

.01 This Statement of Position provides guidance for determining whether two debt instruments are *substantially the same*. The recommendations herein are limited to transactions involving a sale and purchase or exchange of debt instruments between entities who hold the debt instruments as an asset. The term *debt instruments* is used in this statement of position to include instruments usually considered to be securities such as notes, bonds, and debentures, as well as other evidence of indebtedness such as money market instruments, certificates of deposit, mortgage loans, commercial loans, and commercial paper, that often are not referred to as securities. Debt instruments also include evidence of indebtedness that represents aggregations of debt instruments, such as mortgage-backed certificates.

.02 The conclusions in this statement of position are not intended to modify, in any way, Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*. Paragraph 42 of SFAS No. 15 discusses certain situations in which troubled debt restructurings may involve substituting debt of other business enterprises, individuals, or governmental units for that of the troubled debtors. The accounting principles in paragraph 42 of SFAS No. 15 are not affected by this statement of position. Also, this

statement of position is not intended to apply to situations in which financial institutions originate or buy whole loan mortgages and exchange those loans for a participation certificate issued by government-sponsored enterprises or agencies (FHLMC, FNMA, or GNMA) representing direct ownership of the same mortgages. However, the statement of position does apply to exchanges of participation certificates.

.03 The recommendations in this statement of position amend AICPA Industry Audit Guide *Audits of Banks* (Bank Audit Guide)<sup>1</sup> and Audit and Accounting Guide *Audits of Brokers and Dealers in Securities* (Broker-Dealer Guide).

## Background

.04 The preface of the Bank Audit Guide (May 1994) stated that certain issues affecting the banking industry were not included in the guide or were under study by the AICPA or the FASB. One of those issues related to the definition of the term *substantially the same* as used in the guide.<sup>2</sup>

.05 In paragraphs 5.19 and 5.20 of the Bank Audit Guide (May 1994), the term *substantially the same* was used in describing wash sales as follows:<sup>3</sup>

Bank supervisory agencies currently prescribe that investment security gains and losses be recognized according to the completed transaction method. In practice, serious questions develop about the proper definition of "completed transactions" when securities are sold with the intent to reacquire the same or *substantially the same* securities, most often to obtain income tax or other benefits. In such transactions, known as "wash sales," the period of time between sale and reacquisition varies. It is often very short, especially when readily marketable securities are involved. In some cases, the security or evidence of ownership of the security remains in the possession of the seller or his agent; only brokers' advices provide evidence of the sale and reacquisition.

In a sale, the risks and opportunities of ownership are transferred for a reasonable period of time; such a transfer is necessary to constitute realization and permit recognition of revenue. Therefore, when a bank sells a security and concurrently reinvests the proceeds from the sale in the same or *substantially the same* security, no sale should be recognized, since the effect of the sale and repurchase transaction leaves the bank in essentially the same position as before, notwithstanding the fact that the bank has incurred brokerage fees and taxes. When the proceeds are not reinvested immediately, but soon thereafter, the test is whether the bank was at risk for a reasonable period of time to warrant recognition of a sale. The period of time cannot be defined exactly; rather, the type of securities involved and the circumstances of the particular transaction should enter into the determination of what constitutes a reasonable period of time. For example, a day may be appropriate for a quoted stock or bond that has a history of significant market price fluctuations over short periods of time. Similarly, a bank's liquidity requirements may require that a

---

<sup>1</sup> The AICPA Audit and Accounting Guide *Banks and Savings Institutions*, incorporated and superseded Statement of Position (SOP) 90-3 to the extent SOP 90-3 amended previous editions of the Bank Audit Guide and the AICPA Audit and Accounting Guide *Audits of Savings Institutions*. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

<sup>2</sup> See footnote 1. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

<sup>3</sup> See footnote 1. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

long-term bond be replaced by a short-term money market instrument; but, a week later, the bank's liquidity requirements may change, and reacquisition of the bond previously sold may be a reasonable business decision, wholly independent of the previous decision to sell the bond. [*Emphasis added.*]

.06 The terms *substantially the same*, *substantially similar*, and *substantially identical* are also used to describe a factor that is considered in determining whether a sale of a debt instrument under an agreement to repurchase should be accounted for as a sale and a purchase or as a financing transaction. Dollar repurchase—dollar reverse repurchase agreements involve similar but not identical securities. The terms of the agreements often provide data to determine whether the securities are similar enough to make the transaction in substance a borrowing and lending of funds or whether the securities are so dissimilar that the transaction is a sale and purchase of securities.

.07 A dollar repurchase—dollar reverse repurchase agreement is an agreement (contract) to sell and repurchase or to purchase and sell back securities of the same issuer but not the original securities. Fixed coupon and yield maintenance dollar agreements comprise the most common agreement variations. In a fixed coupon agreement, the seller and buyer agree that delivery will be made with securities having the same stated interest rate as the interest rate stated on the securities sold. In a yield maintenance agreement, the parties agree that delivery will be made with securities that will provide the seller a yield that is specified in the agreement.

[.08] [Paragraph deleted, August 1991, by the Audit and Accounting Guide *Audits of Savings Institutions*.]

.09 The term *substantially identical* is also used by brokers and dealers in discussing repurchase transactions. The AICPA Audit and Accounting Guide, *Audits of Brokers and Dealers in Securities* states the following in paragraph 1.40:

A repurchase transaction, commonly known as a repo transaction, is a sale of security coupled with an agreement by the seller to repurchase the same or *substantially identical* security at a stated price . . . .

A reverse repurchase agreement, known as a reverse repo, is the purchase of a security at a specified price with an agreement to resell the same or *substantially identical* security at a definite price at a specific future date. [*Emphasis added.*]

The Broker/Dealer Guide does not provide any guidance for determining whether the securities are *substantially identical*.

.10 Because of the lack of an authoritative definition of *substantially the same*, alternative accounting practices have developed or may develop for the exchange of *substantially the same* assets.

## Current Accounting Practices

.11 The issue of whether two debt instruments are *substantially the same* is generally encountered in connection with determining whether a transaction involving debt instruments results in a sale or a financing, for example, the sale of a debt instrument under an agreement to repurchase another debt instrument. If the debt instrument to be repurchased is *substantially the same* as a debt instrument sold, it may be viewed as a financing transaction. However, if the debt instrument to be repurchased is viewed as not being *substantially the same*, that transaction is generally recorded as a sale with a commitment to buy another debt instrument.

.12 Two debt instruments can differ in a variety of ways, such as the obligor, maturity, interest rate, and yield. If two debt instruments are exchanged and many of the characteristics of the instruments differ, for example, exchange of a U.S. Treasury bill for a mortgage-backed security, virtually all would agree that a transaction has taken place that requires accounting recognition as a sale, not a financing. In contrast, if two debt instruments are exchanged and most of the characteristics of the instruments are the same, many would view the exchange as involving *substantially the same* securities prohibiting accounting recognition, for example, the exchange of two GNMA securities bearing the identical contractual interest rate that are collateralized by similar pools of mortgages resulting in approximately the same yield. Thus, the issue to resolve is how similar the characteristics of two debt instruments have to be viewed as *substantially the same*.

## Conclusions

.13 To minimize diversity in practice, the AICPA Banking Committee, Savings and Loan Associations Committee, and Stockbrokerage and Investment Banking Committee believe the definition of *substantially the same* should be narrow. Therefore, the committees have concluded that for debt instruments, including mortgage-backed securities, to be *substantially the same*, all the following criteria must be met:<sup>4</sup>

- a. The debt instruments must have the same primary obligor, except for debt instruments guaranteed by a sovereign government, central bank, government-sponsored enterprise or agency thereof, in which case the guarantor and terms of the guarantee must be the same.<sup>5</sup>
- b. The debt instruments must be identical in form and type so as to give the same risks and rights to the holder.<sup>6</sup>
- c. The debt instruments must bear the identical contractual interest rate.
- d. The debt instruments must have the same maturity except for mortgage-backed pass-through and pay-through securities for which the mortgages collateralizing the securities must have similar remaining weighted average maturities (WAMs) that result in approximately the same market yield.<sup>7</sup>

---

<sup>4</sup> See footnote 1. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

<sup>5</sup> The exchange of pools of single-family loans would not meet this criterion because the mortgages comprising the pool do not have the same primary obligor, and would therefore not be considered *substantially the same*. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of recent authoritative literature, April 1996.]

<sup>6</sup> For example, the following exchanges would not meet this criterion: GNMA I securities for GNMA II securities; loans to foreign debtors that are otherwise the same except for different U.S. foreign tax credit benefits (because such differences in the tax receipts associated with the loans result in instruments that vary "in form and type"); commercial paper for redeemable preferred stock. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of recent authoritative literature, April 1996.]

<sup>7</sup> For example, the exchange of a "fast-pay" GNMA certificate (that is, a certificate with underlying mortgage loans that have a high prepayment record) for a "slow-pay" GNMA certificate would not meet this criterion because differences in the expected remaining lives of the certificates result in different market yields. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of recent authoritative literature, April 1996.]

- e. Mortgage-backed pass-through and pay through securities must be collateralized by a similar pool of mortgages, such as single-family residential mortgages.
- f. The debt instruments must have the same aggregate unpaid principal amounts, except for mortgage-backed pass-through and pay-through securities, where the aggregate principal amounts of the mortgage-backed securities given up and the mortgage-backed securities reacquired must be within the accepted "good delivery" standard for the type of mortgage-backed security involved.<sup>8</sup>

## Effective Date and Transition

.14 The conclusions of this statement of position should be applied prospectively to transactions entered into after March 31, 1990. Earlier application to transactions occurring in periods for which financial statements have not been issued is encouraged. However, previously issued annual or interim financial statements should not be restated.

---

<sup>8</sup> Participants in the mortgage-backed securities market have established parameters for what is considered acceptable delivery. These specific standards are defined by the Public Securities Association (PSA) and can be found in *Uniform Practices for the Clearance and Settlement of Mortgage-Backed Securities and Other Related Securities*, which is published by PSA. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of recent authoritative literature, April 1996.]

## Section 10,460

# **Statement of Position 90-7 Financial Reporting by Entities in Reorganization Under the Bankruptcy Code**

November 19, 1990

### NOTE

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances. However, an entity need not change an accounting treatment followed as of March 15, 1992 to the accounting treatment specified in this Statement of Position.

## Introduction

.01 This statement of position (SOP) was prepared by the Task Force on Financial Reporting by Entities in Reorganization Under the *Bankruptcy Code* to provide guidance on financial reporting by entities that have filed petitions with the *Bankruptcy Court* and expect to reorganize as going concerns under *Chapter 11* of title 11 of the United States Code ("Chapter 11").<sup>1</sup>

## Petition, Proceeding, and Plan

.02 An entity enters reorganization under Chapter 11 by filing a petition with the Bankruptcy Court, an adjunct of the United States District Courts. The filing of the *petition* starts the *reorganization proceeding*. The goal of the proceeding is to maximize recovery by creditors and shareholders by preserving it as a viable entity with a going concern value. For that purpose, the entity prepares a *plan of reorganization* intended to be confirmed by the court. The plan provides for treatment of all the assets and liabilities of the debtor, which might result in forgiveness of indebtedness. For the plan to be confirmed and the reorganization proceedings thereby concluded, the consideration to be received by parties in interest under the plan must exceed the consideration they would otherwise receive on liquidation of the entity under *Chapter 7* of the

<sup>1</sup> A glossary of defined terms, which are in *italics* when they first appear in the text, is in paragraph .69.

Bankruptcy Code. The court may confirm a plan even if some classes of creditors or some of the stockholders have not accepted it, provided that it meets standards of fairness required by Chapter 11 to the dissenting class of creditors or the dissenting stockholders.

.03 The plan is the heart of every Chapter 11 reorganization. The provisions of the plan specify the treatment of all creditors and equity holders upon its approval by the Bankruptcy Court. Moreover, the plan shapes the financial structure of the entity that emerges.

.04 Chapter 11 provides that, unless a *trustee* is appointed, the debtor has the exclusive right to file a plan for the first 120 days of the case, or such longer or shorter time as the Bankruptcy Court decrees, for cause. If a plan is filed within the exclusive period, additional time is provided to allow the debtor to obtain plan acceptance. The appointment of the trustee immediately terminates the debtor's exclusive right to file a plan, and any party in interest may then do so.

.05 Except to the extent that specific debts are determined by the Bankruptcy Court not to be discharged by the plan, the provisions of a *confirmed plan* bind the debtor, any entity issuing securities under the plan, any entity acquiring assets under the plan, and any creditor, equity security holder, or general partner in the debtor, regardless of whether the *claim* is impaired under the plan and whether such creditor, equity security holder, or general partner has accepted the plan. A claim is impaired if, subject to certain rights to cure defaults, its legal rights are affected adversely by the plan.

.06 In general, except as provided in the plan or in the order confirming the plan, confirmation of the plan discharges the debtor from all preconfirmation claims and terminates all rights and interest of equity security holders or general partners as provided for in the plan.

.07 The Bankruptcy Court confirms a plan if it finds all of the following:

- The plan and the plan proponent have complied with various technical requirements of the Bankruptcy Code.
- Disclosures made in soliciting acceptance of the plan have been adequate.
- Dissenting members of *consenting classes of impaired claims* would receive under the plan at least the amount they would have received under a Chapter 7 proceeding.
- Claims entitled to priority under the Bankruptcy Code will be paid in cash.
- Confirmation of the plan is not likely to be followed by liquidation or further reorganization.
- At least one class of impaired claims, apart from insiders, has accepted the plan.
- The plan proponent has obtained the consent of all impaired classes of claims or equity securities, or the plan proponent can comply with the *cram-down provisions* of the Bankruptcy Code. (Under the cram-down provisions, the court may confirm a plan even if one or more classes of holders of impaired claims or equity securities do not accept it, as long as the court finds the plan does not discriminate unfairly and is fair and equitable to each *nonconsenting class* impaired by the plan.)

.08 In general, a *secured claim* is deemed to be treated fairly and equitably if it remains adequately collateralized and will receive a stream of payments whose discounted value equals the amount of the secured claim on the effective date of the plan. In general, an *unsecured claim* is deemed to be treated fairly and equitably if it receives assets whose discounted value equals the allowed amount of the claim, or if the holder of any claim or equity security interest that is junior to the dissenting class will not receive or retain any assets under the plan. Similarly, an equity security interest is deemed fairly and equitably treated if that interest receives assets whose discounted value equals the greatest of any fixed liquidation preference, any fixed redemption price, or the value of such interest, or if no junior equity security interest will receive any assets under the plan.

## Reorganization Value

.09 An important part of the process of developing a plan is the determination of the *reorganization value* of the entity that emerges from bankruptcy. Reorganization value generally approximates fair value of the entity before considering liabilities and approximates the amount a willing buyer would pay for the assets of the entity immediately after the restructuring. The reorganization value of an entity is the amount of resources available and to become available for the satisfaction of postpetition liabilities and *allowed claims* and interest, as negotiated or litigated between the *debtor-in-possession* or trustee, the creditors, and the holders of equity interests. Reorganization value includes the sum of the value attributed to the reconstituted entity and other assets of the debtor that will not be included in the reconstituted entity. Reorganization value and the terms of the plan are determined only after extensive arms-length negotiations or litigation between the interested parties. Before the negotiations, the debtor-in-possession, creditors, and equity holders develop their own ideas on the reorganization value of the entity that will emerge from Chapter 11. Several methods are used to determine the reorganization value; however, generally it is determined by discounting future cash flows for the reconstituted business that will emerge from Chapter 11 and from expected proceeds or collections from assets not required in the reconstituted business, at rates reflecting the business and financial risks involved.

## The Disclosure Statement

.10 A *disclosure statement* approved by the court is transmitted to all parties entitled to vote on the plan at or before the time their acceptance of the plan is solicited. The disclosure statement provides information that enables them to make informed judgments about the plan.

.11 No postpetition solicitation of acceptance of a plan may be made unless by the time of the solicitation a disclosure statement previously approved by the Bankruptcy Court has been sent to those whose acceptance is required. The disclosure statement must contain adequate information, which is defined in the Bankruptcy Code as information that would enable a hypothetical reasonable investor typical of holders of claims or interests of the relevant class to make an informed judgment about the plan, as far as it is reasonably practicable to provide in light of the nature and history of the *emerging entity* and the condition of the emerging entity's records. Examples of the kinds of items that may be included in disclosure statements to provide such information include a summary of the reorganization plan, historical and

prospective financial information, and a pro forma balance sheet reporting the reorganization value and the capital structure of the emerging entity.

.12 What constitutes adequate information depends on the circumstances of the entity in Chapter 11, the nature of the plan, and the sophistication of the various classes whose acceptance is required. Although a valuation is not required for a Bankruptcy Court's approval of a disclosure statement, the instances in which valuations are not made are generally restricted to those in which the reorganization value of the emerging entity is greater than the liabilities or in which holders of existing voting shares retain more than 50 percent of the emerging entity's voting shares when the entity emerges from reorganization.

.13 After reorganization proceedings have started, acceptances of a plan may not be solicited by any person without a disclosure statement approved by the court, but acceptances obtained before the proceedings started may be counted if (a) they were solicited in compliance with applicable nonbankruptcy law governing the adequacy of disclosure or (b) there is not any applicable nonbankruptcy law but there was in fact adequate information provided at the time of the prebankruptcy solicitation of acceptances of the plan.

## Current Literature and Reporting Practices

.14 The current financial reporting literature provides no specific guidance for financial reporting by entities in reorganization proceedings. Entities generally continue to apply the financial reporting principles they applied before filing petitions; these principles usually do not adequately reflect all changes in the entity's financial condition caused by the proceeding. The financial statements prepared while entities are in Chapter 11 reorganization are therefore not as useful to users of financial statements as they should be. For example, the Bankruptcy Code allows the debtor to reject executory contracts such as leases and take-or-pay contracts. Some entities report the resulting claims at the estimated amounts of the allowed claims, while others report them at the estimated amounts at which they will be settled.

.15 Another area in which reporting is diverse during the Chapter 11 reorganization is the classification of liabilities. Some entities report all *prepetition liabilities* as current, whereas others report them as long-term debt or as a separate item between current and long-term liabilities. Financial Accounting Standards Board (FASB) Statement No. 6, *Classification of Short-Term Obligations Expected to Be Refinanced*, states that all short-term obligations resulting from transactions in the normal course of business that are due in customary terms, such as trade payables, advance collections, and accrued expenses, are to be classified as current liabilities. However, FASB Statement No. 6 does not address reporting by entities in Chapter 11 reorganization whose unsecured debt may not be paid without approval of the Bankruptcy Court and therefore may neither be paid within one year, or the operating cycle, if longer, nor satisfied with current assets.

.16 Further, the financial reporting literature provides no specific guidance for financial reporting by entities emerging from Chapter 11 reorganization under confirmed plans. As a result, practice is diverse. For example, FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*, in footnote 4, and FASB Technical Bulletin No. 81-6, *Applicability of Statement 15 to Debtors in Bankruptcy Situations*, indicate that State-

ment No. 15 does not apply to troubled debt restructurings in which debtors restate their liabilities generally under the purview of the Bankruptcy Court. A majority of reorganizations of businesses result in general restructuring of liabilities, and considerable confusion exists on how to report the restructured liabilities. FASB Interpretation No. 2, *Imputing Interest on Debt Arrangements Made under the Federal Bankruptcy Act*, states that Accounting Principles Board (APB) Opinion 21, *Interest on Receivables and Payables*, should apply to cases under the Bankruptcy Code. However, that interpretation was superseded by FASB Statement No. 15. An analysis of reporting by entities emerging from bankruptcy indicates that some report their debt at discounted amounts and others follow the guidelines in FASB Statement No. 15.

.17 There is no specific guidance on whether an emerging entity should restate assets. For example, some restate their assets—though there generally is no net write-up—through quasi-reorganizations, and others do not. An analysis of reporting by emerging entities indicates that some eliminate deficits in their retained earnings by reducing additional paid-in capital while others retain such deficits.

## Scope

.18 This statement of position applies to financial reporting both by entities that have filed petitions with the Bankruptcy Court and expect to reorganize as going concerns under Chapter 11 and by entities that have emerged from Chapter 11 (emerging entities) under confirmed plans.

.19 It does not apply to entities that restructure their debt outside Chapter 11, to governmental organizations, or to entities that liquidate or adopt plans of liquidation under the Bankruptcy Code.

## Conclusions

.20 The following is a summary of the conclusions reached by the Accounting Standards Division. They should be read in conjunction with the discussion of conclusions, which follows this summary and explains the basis for the conclusions.

## Financial Reporting During Reorganization Proceedings

.21 Entering a reorganization proceeding, although a significant event, does not ordinarily affect or change the application of generally accepted accounting principles followed by the entity in the preparation of its financial statements. However, the needs of financial statement users change, and thus changes in the reporting practices previously followed by the entity are necessary.

.22 An objective of financial statements issued by an entity in Chapter 11 should be to reflect its financial evolution during the proceeding. For that purpose, the financial statements for periods including and subsequent to filing the Chapter 11 petition should distinguish transactions and events that are directly associated with the reorganization from the ongoing operations of the business.

## Balance Sheet

.23 The balance sheet of an entity in Chapter 11 should distinguish prepetition liabilities subject to compromise from those that are not (such as

fully secured liabilities that are expected not to be compromised) and *postpetition liabilities*. Liabilities that may be affected by the plan should be reported at the amounts expected to be allowed, even if they may be settled for lesser amounts. If there is uncertainty about whether a secured claim is *undersecured*, or will be impaired under the Plan, the entire amount of the claim should be included with prepetition claims subject to compromise; such a claim should not be reclassified unless it is subsequently determined that the claim is not subject to compromise.

**.24** Prepetition liabilities, including claims that become known after a petition is filed, should be reported on the basis of the expected amount of the allowed claims in accordance with FASB Statement No. 5, *Accounting for Contingencies*, as opposed to the amounts for which those allowed claims may be settled. Claims not subject to reasonable estimation should be disclosed in the notes to the financial statements based on the provisions of FASB Statement No. 5. Once these claims satisfy the accrual provisions of FASB Statement No. 5, they should be recorded in the accounts in accordance with the first sentence of this paragraph.

**.25** Debt discounts or premiums as well as debt issue costs should be viewed as valuations of the related debt. When the debt has become an allowed claim and the allowed claim differs from the net carrying amount of the debt, the recorded amount should be adjusted to the amount of the allowed claim (thereby adjusting existing discounts or premiums, and deferred issue costs to the extent necessary to report the debt at this allowed amount). The gain or loss resulting from the entries to record the adjustment should be classified as *reorganization items*, as discussed in paragraph .27. Premiums and discounts as well as debt issuance cost on debts that are not subject to compromise, such as fully secured claims, should not be adjusted.

**.26** Liabilities subject to compromise should be segregated from those that are not subject to compromise on the balance sheet. The principal categories of the claims subject to compromise should be disclosed in the notes to the financial statements. Circumstances arising during reorganization proceedings may require a change in the classification of liabilities between those subject to compromise and those not subject to compromise. Liabilities not subject to compromise should be further segregated into current and noncurrent classifications if the entity presents a classified balance sheet.

## Statement of Operations

**.27** The statement of operations should portray the results of operations of the reporting entity while it is in Chapter 11. Revenues, expenses (including professional fees), realized gains and losses, and provisions for losses resulting from the reorganization and restructuring of the business should be reported separately as reorganization items, except for those required to be reported as discontinued operations and extraordinary items in conformity with APB Opinion 30, *Reporting the Results of Operations*.

**.28** Some entities defer professional fees and similar types of expenditures until the plan is confirmed and then reduce gain from debt discharge to the extent of the previously deferred expenses. Others accrue professional fees and similar types of expenditures upon the filing of the Chapter 11 petition. Still others expense professional fees and similar types of expenditures as incurred. The task force concluded that professional fees and similar types of expenditures directly relating to the Chapter 11 proceeding do not result in as-

sets or liabilities and thus should be expensed as incurred and reported as reorganization items.

.29 Interest expense should be reported only to the extent that it will be paid during the proceeding or that it is probable that it will be an allowed priority, secured, or unsecured claim. Interest expense is not a reorganization item. The extent to which reported interest expense differs from stated contractual interest should be disclosed. The task force understands that the staff of the Securities and Exchange Commission (SEC) prefers that SEC registrants disclose this parenthetically on the face of the statement of operations.

.30 Interest income earned by an entity in Chapter 11 that it would not have earned but for the proceeding (normally all interest income) should be reported as a reorganization item.

## Statement of Cash Flows

.31 Reorganization items should be disclosed separately within the operating, investing, and financing categories of the statement of cash flows. This presentation can be better accomplished by the use of the direct method of presenting the statement. If the indirect method is used, details of operating cash receipts and payments resulting from the reorganization should be disclosed in a supplementary schedule or in the notes to the financial statements.

## Condensed Combined Financial Statements

.32 Consolidated financial statements that include one or more entities in reorganization proceedings and one or more entities not in reorganization proceedings should include condensed combined financial statements of the entities in reorganization proceedings. The combined financial statements should be prepared on the same basis as the consolidated financial statements.

.33 Intercompany receivables and payables of entities in reorganization proceedings should be disclosed in the condensed combined financial statements. In addition, the propriety of the carrying amounts of intercompany receivables from entities in Chapter 11 should be evaluated.

## Earnings Per Share

.34 Earnings per share should be reported, when required, in conformity with APB Opinion 15, *Earnings Per Share*. If it is probable that the plan will require the issuance of common stock or common stock equivalents, thereby diluting current equity interests, that fact should be disclosed.

## Financial Reporting When Entities Emerge From Chapter 11 Reorganization

.35 Entities whose plans have been confirmed by the court and have thereby emerged from Chapter 11 should apply the reporting principles in the following paragraphs as of the confirmation date or as of a later date when all material conditions precedent to the plan's becoming binding are resolved.

## Fresh-Start Reporting

.36 If the reorganization value of the assets of the emerging entity immediately before the date of confirmation is less than the total of all postpetition liabilities and allowed claims, and if holders of existing voting shares immediately before confirmation receive less than 50 percent of the voting shares of

the emerging entity, the entity should adopt fresh-start reporting upon its emergence from Chapter 11. The loss of control contemplated by the plan must be substantive and not temporary. That is, the new controlling interest must not revert to the shareholders existing immediately before the plan was filed or confirmed.

.37 While the court determines the adequacy of the disclosure statement, entities that expect to adopt fresh-start reporting should report information about the reorganization value in the disclosure statement, so that creditors and stockholders can make an informed judgment about the plan. The most likely place to report the reorganization value is in the pro forma balance sheet that is commonly part of the disclosure statement. Because reorganization value may not have been allocated to individual assets concurrently with the preparation of the pro forma balance sheet included in the disclosure statement in some cases, it may be necessary to include in the pro forma balance sheet a separate line item to reflect the difference of the total reorganization value of the emerging entity over recorded amounts. When possible, reorganization value should be segregated into major categories.

.38 Entities that adopt fresh-start reporting in conformity with paragraph .36 should apply the following principles:

- The reorganization value of the entity should be allocated to the entity's assets in conformity with the procedures specified by APB Opinion 16, *Business Combinations*, for transactions reported on the basis of the purchase method. If any portion of the reorganization value cannot be attributed to specific tangible or identified intangible assets of the emerging entity, such amounts should be reported as the intangible asset identified as "reorganization value in excess of amounts allocable to identifiable assets." This excess should be amortized in conformity with APB Opinion 17, *Intangible Assets*. There usually are overriding pertinent factors that should be considered in determining the proper amortization period of this asset that would generally result in a useful life of substantially less than forty years. At a minimum, the same considerations used in determining the reorganization value should be applied in determining the period of amortization.
- Each liability existing at the plan confirmation date, other than deferred taxes, should be stated at present values of amounts to be paid determined at appropriate current interest rates.
- Deferred taxes should be reported in conformity with generally accepted accounting principles. Benefits realized from preconfirmation net operating loss carryforwards should first reduce reorganization value in excess of amounts allocable to identifiable assets and other intangibles until exhausted and thereafter be reported as a direct addition to paid-in capital.
- Changes in accounting principles that will be required in the financial statements of the emerging entity within the twelve months following the adoption of fresh-start reporting should be adopted at the time fresh-start reporting is adopted.

.39 The financial statements of the entity as of and for the period immediately preceding the date determined in conformity with the guidance in paragraph .35 should reflect all activity through that date in conformity with the guidance in paragraphs .21 through .34. Additionally, the effects of the ad-

justments on the reported amounts of individual assets and liabilities resulting from the adoption of fresh-start reporting and the effects of the forgiveness of debt should be reflected in the predecessor entity's final statement of operations. Forgiveness of debt, if any, should be reported as an extraordinary item. Adopting fresh-start reporting results in a new reporting entity with no beginning retained earnings or deficit. When fresh-start reporting is adopted, the notes to the initial financial statements should disclose the following:

- Adjustments to the historical amounts of individual assets and liabilities.
- The amount of debt forgiveness.
- The amount of prior retained earnings or deficit eliminated.
- Significant matters relating to the determination of reorganization value, such as—
  - The method or methods used to determine reorganization value and factors such as discount rates, tax rates, the number of years for which cash flows are projected, and the method of determining *terminal value*.
  - Sensitive assumptions—that is, assumptions about which there is a reasonable possibility of the occurrence of a variation that would have significantly affected measurement of reorganization value.
  - Assumptions about anticipated conditions that are expected to be different from current conditions, unless otherwise apparent.

## Comparative Financial Statements

.40 Chapter 2A of Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*, state the following in paragraph 1:

The presentation of comparative financial statements in annual and other reports enhances the usefulness of such reports and brings out more clearly the nature and trends of current changes affecting the enterprise.

Paragraph 3 of that chapter requires comparative financial statements that are presented to be comparable from year to year, with any exceptions to comparability being clearly disclosed. Fresh-start financial statements prepared by entities emerging from Chapter 11 will not be comparable with those prepared before their plans were confirmed because they are, in effect, those of a new entity. Thus, comparative financial statements that straddle a confirmation date should not be presented.<sup>2</sup>

## Reporting by Entities Not Qualifying for Fresh Start

.41 Entities emerging from Chapter 11 that do not meet the criteria in paragraph .36 do not qualify for a fresh start. Liabilities compromised by confirmed plans should be stated at present values of amounts to be paid, determined at appropriate current interest rates. Forgiveness of debt, if any, should be reported as an extraordinary item.

---

<sup>2</sup> The SEC and other regulatory agencies may require the presentation of predecessor financial statements. However, such presentations should not be viewed as a continuum because the financial statements are those of a different reporting entity and are prepared using a different basis of accounting, and, therefore, are not comparable. Attempts to disclose and explain exceptions that affect comparability would likely result in reporting that is so unwieldy it would not be useful.

.42 Because this statement of position applies to financial reporting for entities that enter and intend to emerge from Chapter 11 reorganization, quasi-reorganization accounting should not be used at the time of the reorganization.

## Discussion of Conclusions

### Reporting Prepetition Liabilities

.43 The task force believes that entities in Chapter 11 reorganization should segregate liabilities subject to compromise from those that are not subject to compromise. Therefore, prepetition liabilities that may be impaired by a plan and that are eligible for compromise because they are either unsecured or undersecured should be separately classified and designated in the balance sheet as prepetition liabilities subject to compromise, because that provides the most meaningful presentation while in Chapter 11 reorganization.

.44 The financial reporting literature does not specifically address the balance sheet classification issues that result from filing a petition. Guidance for classifying liabilities as current in a classified balance sheet is provided in paragraph 7 of ARB No. 43, chapter 3A, which states the following:

The term *current liabilities* is used to designate obligations whose liquidation is reasonably expected to require the use of existing resources properly classified as current assets, or the creation of other current liabilities . . . .

Trade payables that are incurred in the normal course of business are usually classified as current in classified balance sheets because they meet the ARB No. 43 criteria cited above. However, filing a petition generally causes the payment of unsecured or undersecured prepetition liabilities to be prohibited before the plan is confirmed. The Chapter 11 reorganization ending in confirmation of a plan typically takes more than one year or one operating cycle, if longer.

.45 It might be argued that prepetition liabilities classified as current in a classified balance sheet, such as trade payables, should retain that classification under the provisions of FASB Statement No. 6, *Classification of Short-Term Obligations Expected to Be Refinanced*. That Statement requires all short-term liabilities incurred in the normal course of business and due in customary terms to be classified as current. Other short-term liabilities are excluded from the current liability classification under FASB Statement No. 6 if the entity intends to refinance the obligations on a long-term basis and such intent is supported by the facts. However, FASB Statement No. 6 does not address what occurs when a petition is filed.

.46 FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor*, amended paragraph 7 of ARB No. 43, chapter 3A, by requiring current liabilities classification in a classified balance sheet for long-term liabilities that, by their terms, are due on demand or will be due on demand within one year, or the operating cycle, if longer. This definition also includes long-term liabilities that are or will be callable by the creditor because of a violation of a provision of the debt agreement. The *automatic stay provisions* of Chapter 11 make it unnecessary to reclassify prepetition long-term liabilities even though prepetition creditors might demand payment or there is a violation of a covenant in the debt agreement.

.47 Prepetition liabilities should be reported at the amounts of allowed claims—that is, at the amount allowed by the court, even though such liabilities may not be paid in full.

.48 When prepetition claims become known after a petition is filed (for example, a claim resulting from the rejection of an operating lease), they should be reported at the estimated amounts of the allowed claims. Some believe that such prepetition claims should be reported at estimates of the settlement amounts. However, these prepetition claims should be reported at an amount allowed by the court because that is the amount of the liability until it is settled and the use of allowed amounts is consistent with the amounts at which other prepetition liabilities are stated and thereby provides comparability among the various kinds of claims.

## Statement of Operations

.49 Losses as a result of restructuring or disposal of assets directly related to reorganization proceedings are best included as reorganization items to the extent that they are not otherwise reported as part of the results of discontinued operations in conformity with APB Opinion 30, *Reporting the Results of Operations*. That does not result in reclassification of revenues and expenses from operations sold or abandoned, except those that meet the criteria in APB Opinion 30. Rather, gains or losses classified as reorganization items might include a gain or loss on disposal of assets plus related employee costs and charges or other costs directly related to the assets disposed of or the operations restructured. Also, income, expenses, realized gains, and losses that can be directly associated with the proceeding are best segregated and presented as reorganization items in the statement of operations. Examples include interest income (as indicated in paragraph .30), professional fees, and losses on executory contracts.<sup>3</sup>

.50 The task force believes that segregation of reorganization items provides meaningful disclosure and is consistent with APB Opinion 30, paragraph 26, which states the following:

A material event or transaction that is unusual in nature or occurs infrequently but not both, and therefore does not meet both criteria for classification as an extraordinary item, should be reported as a separate component of continuing operations.

## Interest Expense

.51 Certain provisions of the Bankruptcy Code may relieve the entity from its obligation to pay interest. Generally, interest on secured claims accrues only to the extent that the value of underlying collateral exceeds the principal amount of the secured claim. In addition, interest on unsecured claims does not accrue during the proceeding if the entity is insolvent; therefore, disclosure of contractual interest is considered useful because it may differ from interest actually being reported.

## Interest Income

.52 An entity in reorganization typically accumulates cash during the proceeding because it is not paying its obligations currently. The cash ultimately is distributed to creditors or others in conformity with the plan. The

---

<sup>3</sup> Appendix A [paragraph .67] illustrates a statement of operations that includes reorganization items.

amount of cash accumulated does not reflect the entity's prepetition activities, and it is not expected that such an accumulation would recur in the reorganized entity. The interest income earned during the proceeding on cash accumulated during the proceeding, therefore, is a reorganization item. To the extent that management can reasonably estimate that portion of interest income applicable to normal invested working capital, it should be reported as an operating item in the ordinary manner.

## Statement of Cash Flows

.53 FASB Statement No. 95, *Statement of Cash Flows*, requires information on the cash activity of reporting entities. The task force believes that such information is the most beneficial information that can be provided in the financial statements of an entity in Chapter 11. It also believes the direct method is the better method to provide such information by such entities.

.54 Paragraph 27 of FASB Statement No. 95 lists the operating items that should be reported separately when the direct method is used. That paragraph encourages further breakdown of those operating items if the entity considers such a breakdown meaningful and it is feasible to do so. Further identification of cash flows from reorganization items should be provided to the extent feasible. For example, interest received might be segregated between estimated normal recurring interest received and interest received on cash accumulated because of the reorganization. Appendix A [paragraph .67] illustrates a statement of cash flows for an entity operating under Chapter 11.

## Fresh-Start Reporting

.55 The effects of a plan should be included in the entity's financial statements as of the date the plan is confirmed. However, inclusion should be delayed to a date not later than the effective date if there is a material unsatisfied condition precedent to the plan's becoming binding on all the parties in interest or if there is a stay pending appeal. That might occur, for example, if obtaining financing for the plan or for the transfer of material assets to the debtor by a third party is a condition to the plan's becoming effective.

.56 Financial statements prepared as of the date after the parties in interest have approved a plan through the voting process, and issued after the plan has been confirmed by the court, should report the effects of the plan if there are no material unsatisfied conditions.

.57 An essential element in negotiating a plan with the various classes of creditors and equity interests is the determination of reorganization value by the parties in interest. The plan provides for allocating the reorganization value among the parties in interest in accordance with their legal priorities: first to secured claims to the extent of the value of the collateral securing the claims, then to claims entitled to priority under the Bankruptcy Code, and then to the various classes of unsecured debt and equity interests in accordance with their legal priorities or as the parties may otherwise agree. In the event that the parties in interest cannot agree on the reorganization value and presumably the plan of reorganization, the court may be called upon to determine the reorganization value of the entity before a plan of reorganization can be confirmed.

.58 The task force concluded that reorganization value can be a more objective measure of fair value than a purchase price in a business combina-

tion. This view is based on two factors. First, a purchase price in a nonbankruptcy business combination may exceed the fair value of the acquired entity, because such determinations may be influenced by a variety of factors unrelated to that entity. Second, in the reorganization process, extensive information available to the parties in interest, the adversarial negotiation process, the involvement of the Bankruptcy Court, the use of specialists by one or more of the parties in interest, and the fact that all elements of the determination are focused solely on the economic viability of the emerging entity result in an objective and reliable determination of reorganization value.

.59 If, based on reorganization value, the parties in interest allow the entity to survive as a going concern and emerge from Chapter 11, the financial reporting should reflect that fact. The ability to reflect reorganization value would enhance the representational faithfulness of the emerging entity's financial statements.

.60 Under the *absolute priority doctrine* of the Bankruptcy Code, if the amount of postpetition liabilities and allowed claims exceeds the reorganization value of the emerging entity, existing shareholders lose their legal right to any economic interest without the consent of creditors. Therefore, any equity interest in the emerging entity ultimately held by existing shareholders is given to them by the creditors. Among the reasons the creditors might give such shareholders equity interests in the emerging entity are to avoid the expensive and time-consuming legal proceedings necessary to implement the cram-down provisions of the Bankruptcy Code or to preserve continuity of management.

.61 Based on the factors described in paragraphs .57, .58, and .60, some would conclude that the combination of change in majority ownership and voting control—that is, loss of control by the existing shareholders, a court-approved reorganization, and a reliable measure of the entity's fair value—results in a fresh start, creating, in substance, a new reporting entity. Others believe that a change in control and the exchange of debt and equity based on reorganization value is in substance an acquisition at fair value by new shareholders in exchange for extinguishing their debt. Although the former shareholders can receive a portion of the new equity, they have lost their rights to any equity interest in the reorganized entity and receive such interest only with the consent of the real stakeholders, the creditors who will become the new shareholders. The task force concluded that under each view a new reporting entity is created and assets and liabilities should be recorded at their fair values. That is, assets should be recorded on the basis of reorganization value and liabilities should be recorded at fair value.

.62 Some believe that the recognition of reorganization value in the balance sheet of an emerging entity that meets the criteria for fresh-start reporting should be limited to no net write-up of assets, similar to the SEC staff's interpretation of FRR Section 210 (ASR 25). That view is a combination of the notion that assets and liabilities should be reported at fair value in a fresh start and the belief that assets cannot be written up in a historical cost transaction-based accounting model. The task force did not accept that view for the reasons stated in paragraph .61.

## Fair Value of Liabilities

.63 In a typical Chapter 11 reorganization, there is a general restructuring of liabilities. FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*, does not apply in a general restructuring of liabilities.

.64 A general restructuring of liabilities involves negotiation between the parties in interest. The negotiation and distribution under the confirmed plan constitutes an exchange of resources and obligations. By analogy, the guidance provided by APB Opinion 16 for recording liabilities assumed in a business combination accounted for as a purchase should be applied in reporting liabilities by an entity emerging from Chapter 11.

### Analogous Literature

.65 The task force believes that the principles of quasi-reorganization accounting are not applicable to Chapter 11 reorganizations. Some argue that such a requirement would conflict with ARB No. 43 because it would prohibit adopting an accounting procedure that is now generally accepted. The task force does not believe that is the case. ARB No. 43 relates to a procedure called a quasi-reorganization. Webster's dictionary defines *quasi* as "having some resemblance." The task force interprets ARB No. 43 to apply to situations that resemble but are not reorganizations under Chapter 11. There is no specific guidance for a legal reorganization, so practice has sometimes looked to ARB No. 43 when reporting a legal reorganization. The task force believes that is the case with many emerging entities. This statement of position provides specific guidance for all reorganizations under Chapter 11, and an analogy to ARB No. 43 is not appropriate.

### Effective Date and Transition

.66 This entire statement of position shall become effective for financial statements of enterprises that have filed petitions under the Bankruptcy Code after December 31, 1990. Additionally, for enterprises that file petitions prior to January 1, 1991, and that have plans of reorganization confirmed after June 30, 1991, paragraphs .35 through .42 of this SOP shall be applied to their financial statements. Earlier application by entities in reorganization is encouraged.

.67

## Appendix A

### Illustrative Financial Statements and Notes to Financial Statements for an Entity Operating Under Chapter 11

A-1. XYZ Company is a manufacturing concern headquartered in Tennessee, with a fiscal year ending on December 31. On January 10, 19X1, XYZ filed a petition for relief under Chapter 11 of the federal bankruptcy laws. The following financial statements (balance sheet and statements of operations and cash flows) are presented as of and for the year ended December 31.

**XYZ Company  
(Debtor-in-Possession)  
Balance Sheet  
December 31, 19X1**

<u>Assets</u>	<u>(000s)</u>
Current Assets	
Cash	\$ 110
Accounts receivable, net	300
Inventory	250
Other current assets	<u>30</u>
Total current assets	690
Property, plant and equipment, net	430
Goodwill	<u>210</u>
Total Assets	<u><u>\$1,330</u></u>

<u>Liabilities and Shareholders' Deficit</u>	<u>(000s)</u>
Liabilities Not Subject to Compromise	
Current Liabilities:	
Short-term borrowings	\$ 25
Accounts payable—trade	200
Other liabilities	50
Total current liabilities	275
Liabilities Subject to Compromise	1,100 (a)
Total liabilities	1,375
Shareholders' (deficit):	
Preferred stock	325
Common stock	75
Retained earnings (deficit)	(445)
	(45)
Total Liabilities & Shareholders' (Deficit)	\$ 1,330

(a) Liabilities subject to compromise consist of the following:

Secured debt, 14%, secured by first mortgage on building	\$ 300,000 (b)
Priority tax claims	50,000
Senior subordinated secured notes, 15%	275,000
Trade and other miscellaneous claims	225,000
Subordinated debentures, 17%	250,000
	<u>\$1,100,000</u>

(b) The secured debt in this case should be considered, due to various factors, subject to compromise.

The accompanying notes are an integral part of the financial statements.

**XYZ Company**  
**(Debtor-in-Possession)**  
**Statement of Operations**  
**For the Year Ended December 31, 19X1**  
*(000s)*

	<u>19X1</u>
Revenues:	
Sales	\$2,400
Cost and expenses:	
Cost of goods sold	1,800
Selling, operating and administrative	550
Interest (contractual interest \$5)	<u>3</u>
	<u>2,353</u>
Earnings before reorganization items and income tax benefit	<u>47</u>
Reorganization items:	
Loss on disposal of facility	(60)
Professional fees	(50)
Provision for rejected executory contracts	(10)
Interest earned on accumulated cash resulting from Chapter 11 proceeding	<u>1</u>
	<u>(119)</u>
Loss before income tax benefit and discontinued operations	(72)
Income tax benefit	<u>10</u>
Loss before discontinued operations	(62)
Discontinued operations:	
Loss from operations of discontinued products segment	<u>(56)</u>
Net loss	<u>\$ (118)</u>
Loss per common share:	
Loss before discontinued operations	\$ (.62)
Discontinued operations	<u>\$ (.56)</u>
Net loss	<u><u>\$ (1.18)</u></u>

The accompanying notes are an integral part of the financial statements.

**XYZ Company**  
**(Debtor-in-Possession)**  
**Statement of Cash Flows**  
**For the Year Ended December 31, 19X1**  
**Increase in Cash and Cash Equivalents**  
*(000s)*

	<u>19X1</u>
Cash flows from operating activities:	
Cash received from customers	\$ 2,220
Cash paid to suppliers and employees	(2,070)
Interest paid	<u>(3)</u>
Net cash provided by operating activities before reorganization items	<u>147</u>
Operating cash flows from reorganization items:	
Interest received on cash accumulated because of the Chapter 11 proceeding	1
Professional fees paid for services rendered in connection with the Chapter 11 proceeding	<u>(50)</u>
Net cash used by reorganization items	<u>(49)</u>
Net cash provided by operating activities	<u>98</u>
Cash flows from investing activities:	
Capital expenditures	(5)
Proceeds from sale of facility due to Chapter 11 proceeding	<u>40</u>
Net cash provided by investing activities	<u>35</u>
Cash flows used by financing activities:	
Net borrowings under short-term credit facility (post petition)	25
Repayment of cash overdraft	(45)
Principal payments on prepetition debt authorized by court	<u>(3)</u>
Net cash provided by financing activities	<u>(23)</u>
Net increase in cash and cash equivalents	110
Cash and cash equivalents at beginning of year	<u>—</u>
Cash and cash equivalents at end of year	<u><u>\$ 110</u></u>
Reconciliation of net loss to net cash provided by operating activities	
Net loss	\$ (118)
Adjustments to reconcile net loss to net cash provided by operating activities	
Depreciation	20
Loss on disposal of facility	60
Provision for rejected executory contracts	10
Loss on discontinued operations	56
Increase in postpetition payables and other liabilities	250
Increase in accounts receivable	<u>(180)</u>
Net cash provided by operating activities	<u><u>\$ 98</u></u>

The accompanying notes are an integral part of the financial statements.

**XYZ Company**  
**Notes to Financial Statements**  
**December 31, 19X1**

**Note X—Petition for Relief Under Chapter 11**

On January 10, 19X1, XYZ Company (the “Debtor”) filed petitions for relief under Chapter 11 of the federal bankruptcy laws in the United States Bankruptcy Court for the Western District of Tennessee. Under Chapter 11, certain claims against the Debtor in existence prior to the filing of the petitions for relief under the federal bankruptcy laws are stayed while the Debtor continues business operations as Debtor-in-possession. These claims are reflected in the December 31, 19X1, balance sheet as “liabilities subject to compromise.” Additional claims (liabilities subject to compromise) may arise subsequent to the filing date resulting from rejection of executory contracts, including leases, and from the determination by the court (or agreed to by parties in interest) of allowed claims for contingencies and other disputed amounts. Claims secured against the Debtor’s assets (“secured claims”) also are stayed, although the holders of such claims have the right to move the court for relief from the stay. Secured claims are secured primarily by liens on the Debtor’s property, plant, and equipment.

The Debtor received approval from the Bankruptcy Court to pay or otherwise honor certain of its prepetition obligations, including employee wages and product warranties. The Debtor has determined that there is insufficient collateral to cover the interest portion of scheduled payments on its prepetition debt obligations. Contractual interest on those obligations amounts to \$5,000, which is \$2,000 in excess of reported interest expense; therefore, the debtor has discontinued accruing interest on these obligations. Refer to note XX [see *Appendix B (paragraph .68), note X*] for a discussion of the credit arrangements entered into subsequent to the Chapter 11 filings.

## Appendix B

### Fresh-Start Accounting and Illustrative Notes to Financial Statements

**B-1.** The Bankruptcy Court confirmed XYZ's plan of reorganization as of June 30, 19X2. It was determined that XYZ's reorganization value computed immediately before June 30, 19X2, the date of plan confirmation, was \$1,300,000, which consisted of the following:

Cash in excess of normal operating requirements generated by operations	\$ 150,000
Net realizable value of asset dispositions	75,000
Present value of discounted cash flows of the emerging entity	<u>1,075,000</u>
Reorganization value	<u><u>\$1,300,000</u></u>

XYZ Company adopted fresh-start reporting because holders of existing voting shares immediately before filing and confirmation of the plan received less than 50% of the voting shares of the emerging entity and its reorganization value is less than its postpetition liabilities and allowed claims, as shown below:

Postpetition current liabilities	\$ 300,000
Liabilities deferred pursuant to Chapter 11 proceeding	<u>1,100,000</u>
Total postpetition liabilities and allowed claims	1,400,000
Reorganization value	<u>(1,300,000)</u>
Excess of liabilities over reorganization value	<u><u>\$ 100,000</u></u>

**B-2.** The reorganization value of the XYZ Company was determined in consideration of several factors and by reliance on various valuation methods, including discounting cash flow and price/earnings and other applicable ratios. The factors considered by XYZ Company included the following:

- Forecasted operating and cash flow results which gave effect to the estimated impact of
  - Corporate restructuring and other operating program changes
  - Limitations on the use of available net operating loss carryovers and other tax attributes resulting from the plan of reorganization and other events
- The discounted residual value at the end of the forecast period based on the capitalized cash flows for the last year of that period
- Market share and position
- Competition and general economic considerations
- Projected sales growth
- Potential profitability

- Seasonality and working capital requirements

**B-3.** After consideration of XYZ Company's debt capacity and other capital structure considerations, such as industry norms, projected earnings to fixed charges, earnings before interest and taxes to interest, free cash flow to interest, and free cash flow to debt service and other applicable ratios, and after extensive negotiations among parties in interest, it was agreed that XYZ's reorganization capital structure should be as follows:

Postpetition current liabilities	\$ 300,000
IRS note	50,000
Senior debt	275,000 (1)
Subordinated debt	175,000
Common stock	350,000
	<u>\$1,150,000 (2)</u>

(1) Due \$50,000 per year for each of the next four years, at 12% interest, with \$75,000 due in the fifth year.

(2) See paragraph B-5 for the balance sheet adjustments required to reflect XYZ Company's reorganization value as of the date of plan confirmation.

**B-4.** The following entries record the provisions of the plan and the adoption of fresh-start reporting:

Entries to record debt discharge:

Liabilities subject to compromise	1,100,000	
Senior debt—current		50,000
Senior debt—long-term		225,000
IRS note		50,000
Cash		150,000
Subordinated debt		175,000
Common stock (new)		86,000
Additional paid-in capital		215,000
Gain on debt discharge		149,000

Entries to record exchange of stock for stock:

Preferred stock	325,000	
Common stock (old)	75,000	
Common stock (new)		14,000
Additional paid-in capital		386,000

Entries to record the adoption of fresh-start reporting and to eliminate the deficit:

Inventory	50,000	
Property, plant, and equipment	175,000	
Reorganization value in excess of amounts allocable to identifiable assets	175,000	
Gain on debt discharge	149,000	
Additional paid-in capital	351,000	
Goodwill		200,000
Deficit		700,000

B-5. The effect of the plan of reorganization on XYZ Company's balance sheet, as of June 30, 19X2, is as follows:

	Adjustments to Record Confirmation of Plan			XYZ Company's Reorganized Balance Sheet
	Precon- firmation	Debt discharge	Exchange of stock	Fresh Start
<b>Assets:</b>				
<b>Current Assets</b>				
Cash	\$ 200,000	\$ (150,000)		\$ 50,000
Receivables	250,000			250,000
Inventory	175,000			225,000
Assets to be disposed of valued at market, which is lower than cost	25,000			25,000
Other current assets	25,000			25,000
	675,000	(150,000)		575,000
Property, plant, and equipment	175,000			350,000
Assets to be disposed of valued at market, which is lower than cost	50,000			50,000
Goodwill	200,000			(200,000)
Reorganization value in excess of amounts alloc- able to identifiable assets				175,000
	<u>\$1,100,000</u>	<u>\$ (150,000)</u>		<u>\$ 200,000</u>
				<u>\$1,150,000</u>
<b>Liabilities and Shareholders'</b>				
<b>Deficit:</b>				
<b>Liabilities Not Subject to Compromise Current liabilities</b>				
Short-term borrowings	\$ 25,000			\$ 25,000
Current maturities of senior debt		\$ 50,000		50,000
Accounts payable trade	175,000			175,000
Other liabilities	100,000			100,000
	300,000	50,000		350,000
<b>Liabilities Subject to Compromise</b>				
Prepetition liabilities	1,100,000	(1,100,000)		
IRS note		50,000		50,000
Senior debt, less current maturities		225,000		225,000
Subordinated debt		175,000		175,000
<b>Shareholders' deficit:</b>				
Preferred stock	325,000		\$(325,000)	
Additional paid-in capital		215,000	386,000	250,000
Common stock-old	75,000		(75,000)	
Common stock-new		86,000	14,000	100,000
Retained earnings (deficit)	(700,000)	149,000		700,000
				(149,000)
	<u>(300,000)</u>	<u>450,000</u>	<u>0</u>	<u>200,000</u>
	<u>\$1,100,000</u>	<u>\$ (150,000)</u>	<u>\$ 0</u>	<u>\$ 200,000</u>
				<u>\$1,150,000</u>

B-6. The following illustrative footnote disclosure discusses the details of XYZ Company's confirmed plan of reorganization. In this illustration a tabular presentation entitled "Plan of Reorganization Recovery Analysis" is incorporated in the footnote. The plan of reorganization recovery analysis may alternatively be presented as supplementary information to the financial statements.

## Note X—Plan of Reorganization

On June 30, 19X2, the Bankruptcy Court confirmed the Company's plan of reorganization. The confirmed plan provided for the following:

**Secured Debt**—The Company's \$300,000 of secured debt (secured by a first mortgage lien on a building located in Nashville, Tennessee) was exchanged for \$150,000 in cash and a \$150,000 secured note, payable in annual installments of \$27,300 commencing on June 1, 19X3, through June 1, 19X6, with interest at 12% per annum, with the balance due on June 1, 19X7.

**Priority Tax Claims**—Payroll and withholding taxes of \$50,000 are payable in equal annual installments commencing on July 1, 19X3, through July 1, 19X8, with interest at 11% per annum.

**Senior Debt**—The holders of approximately \$275,000 of senior subordinated secured notes received the following instruments in exchange for their notes: (a) \$87,000 in new senior secured debt, payable in annual installments of \$15,800 commencing March 1, 19X3, through March 1, 19X6, with interest at 12% per annum, secured by first liens on certain property, plants, and equipment, with the balance due on March 1, 19X7; (b) \$123,000 of subordinated debt with interest at 14% per annum due in equal annual installments commencing on October 1, 19X3, through October 1, 19X9, secured by second liens on certain property, plant, and equipment; and (c) 11.4% of the new issue of outstanding voting common stock of the Company.

**Trade and Other Miscellaneous Claims**—The holders of approximately \$225,000 of trade and other miscellaneous claims received the following for their claims: (a) \$38,000 in senior secured debt, payable in annual installments of \$6,900 commencing March 1, 19X3, through March 1, 19X6, with interest at 12% per annum, secured by first liens on certain property, plants, and equipment, with the balance due on March 1, 19X7; (b) \$52,000 of subordinated debt, payable in equal annual installments commencing October 1, 19X3, through October 1, 19X8, with interest at 14% per annum; and (c) 25.7% of the new issue of outstanding voting common stock of the Company.

**Subordinated Debentures**—The holders of approximately \$250,000 of subordinated unsecured debt received, in exchange for the debentures, 48.9% of the new issue outstanding voting common stock of the Company.

**Preferred Stock**—The holders of 3,250 shares of preferred stock received 12% of the outstanding voting common stock of the new issue of the Company in exchange for their preferred stock.

**Common Stock**—The holders of approximately 75,000 outstanding shares of the Company's existing common stock received, in exchange for their shares, 2% of the new outstanding voting common stock of the Company.

The Company accounted for the reorganization using fresh-start reporting. Accordingly, all assets and liabilities are restated to reflect their reorganization value, which approximates fair value at the date of reorganization. The following table ("Plan of Reorganization Recovery Analysis") summarizes the adjustments required to record the reorganization and the issuance of the various securities in connection with the implementation of the plan.

XYZ Company  
Plan of Reorganization  
Recovery Analysis

	Elimination of Debt and Equity	Recovery						Total Recovery	
		Surviving Debt	Cash	IRS Note	Senior Debt	Subordinated Debt	Common Stock %	Value	\$
									%
Postpetition liabilities	\$ 300,000	\$300,000							\$ 300,000 100%
Claim/Interest									
Secured debt	300,000		\$150,000	\$50,000	\$150,000				300,000 100
Priority tax claim	50,000								50,000 100
Senior debt	275,000	\$(25,000)			87,000	\$123,000	11.4%	\$ 40,000	250,000 91
Trade and other miscellaneous claims	225,000	(45,000)							
Subordinated debentures	250,000	(79,000)			38,000	52,000	25.7	90,000	180,000 80
	1,100,000						48.9	171,000	171,000 68
Preferred stockholders	325,000	(283,000)						42,000	42,000
Common stockholders	75,000	(68,000)						7,000	7,000
Deficit	(700,000)	700,000							
Total	\$1,100,000	\$200,000	\$150,000	\$50,000	\$275,000	\$175,000	100.0%	\$350,000	\$1,300,000

\* The aggregate par value of the common stock issued under the plan is \$100,000.

## Glossary

**Absolute priority doctrine.** A doctrine that provides that if an impaired class does not vote in favor of a plan, the court may nevertheless confirm the plan under the cram-down provisions of the Bankruptcy Code. The absolute priority doctrine is triggered when the cram-down provisions apply. The doctrine states that all members of the senior class of creditors and equity interests must be satisfied in full before the members of the second senior class of creditors can receive anything, and the full satisfaction of that class must occur before the third senior class of creditors may be satisfied, and so on.

**Administrative expenses (claims).** Claims that receive priority over all other unsecured claims in a bankruptcy case. Administrative claims (expenses) include the actual, necessary costs and expenses of preserving the estate, including wages, salaries, or commissions for services rendered after the commencement of the case. Fees paid to professionals for services rendered after the petition is filed are considered administrative expenses.

**Allowed claim(s).** The amount allowed by the Court as a claim against the Estate. This amount may differ from the actual settlement amount.

**Automatic stay provisions.** Provisions causing the filing of a petition under the Bankruptcy Code to automatically stay virtually all actions of creditors to collect prepetition debts. As a result of the stay, no party, with minor exceptions, having a security or adverse interest in the debtor's property can take any action that will interfere with the debtor or the debtor's property, regardless of where the property is located or who has possession, until the stay is modified or removed.

**Bankruptcy Code.** A federal statute, enacted October 1, 1979, as title 11 of the United States Code by the Bankruptcy Reform Act of 1978, that applies to all cases filed on or after its enactment and that provides the basis for the current federal bankruptcy system.

**Bankruptcy Court.** The United States Bankruptcy Court is an adjunct of the United States District Courts. Under the jurisdiction of the District Court, the Bankruptcy Court is generally responsible for cases filed under Chapters 7, 11, 12, and 13 of the Bankruptcy Code.

**Chapter 7.** A liquidation, voluntarily or involuntarily initiated under the provisions of the Bankruptcy Code, that provides for liquidation of the business or the debtor's estate.

**Chapter 11.** A reorganization action, either voluntarily or involuntarily initiated under the provisions of the Bankruptcy Code, that provides for a reorganization of the debt and equity structure of the business and allows the business to continue operations. A debtor may also file a plan of liquidation under Chapter 11.

**Claim.** As defined by Section 101(4) of the Bankruptcy Code, (a) a right to payment, regardless of whether the right is reduced to judgment, liquidated, unliquidated, fixed, contingent, matured, unmatured, disputed, undisputed, legal, secured, or unsecured, or (b) a right to an equitable remedy for breach of performance if such breach results in a right to payment, regardless of whether the right is reduced to a fixed, contingent, matured, unmatured, disputed, undisputed, secured, or unsecured right.

**Confirmed plan.** An official approval by the court of a plan of reorganization under a Chapter 11 proceeding that makes the plan binding on the debtors and creditors. Before a plan is confirmed, it must satisfy eleven requirements in section 1129(a) of the Bankruptcy Code.

**Consenting classes.** Classes of creditors or stockholders that approve the proposed plan.

**Cram-down provisions.** Provisions requiring that for a plan to be confirmed, a class of claims or interests must either accept the plan or not be impaired. However, the Bankruptcy Code allows the Court under certain conditions to confirm a plan even though an impaired class has not accepted the plan. To do so, the plan must not discriminate unfairly and must be fair and equitable to each class of claims or interests impaired under the plan that have not accepted it. The Code states examples of conditions for secured claims, unsecured claims, and stockholder interests in the fair and equitable requirement.

**Debtor-in-possession.** Existing management continuing to operate an entity that has filed a petition under Chapter 11. The debtor-in-possession is allowed to operate the business in all Chapter 11 cases unless the court, for cause, authorizes the appointment of a trustee.

**Disclosure statement.** A written statement containing information approved as adequate by the court. It is required to be presented by a party before soliciting the acceptance or rejection of a plan of reorganization from creditors and stockholders affected by the plan. Adequate information means information of a kind, and in sufficient detail, as far as is reasonably practicable in light of the nature and history of the debtor and the condition of the debtor's records, that would enable a hypothetical reasonable investor typical of holders of claims or interests of the relevant class to make an informed judgment about the plan.

**Emerging entity (reorganized entity).** An entity that has had its plan confirmed and begins to operate as a new entity.

**Impaired claims.** In determining which class of creditors' claims or stockholders' interests must approve the plan, it is first necessary to determine if the class is impaired. A class of creditors' claims or stockholders' interests under a plan is not impaired if the plan (a) leaves unaltered the legal, equitable, and contractual right of a class, (b) cures defaults that lead to acceleration of debt or equity interest, or (c) pays in cash the full amount of the claim, or for equity interests, the greater of the fixed liquidation preference or redemption price.

**Nonconsenting class.** A class of creditors or stockholders that does not approve the proposed plan.

**Obligations subject to compromise.** Includes all prepetition liabilities (claims) except those that will not be impaired under the plan, such as claims where the value of the security interest is greater than the claim.

**Petition.** A document filed in a court of bankruptcy, initiating proceedings under the Bankruptcy Code.

**Plan (plan of reorganization).** An agreement formulated in Chapter 11 proceedings under the supervision of the Bankruptcy Court that enables the debtor to continue in business. The plan, once confirmed, may affect the rights of undersecured creditors, secured creditors, and stockholders as

well as those of unsecured creditors. Before a plan is confirmed by the Court, it must comply with general provisions of the Code. Those provisions mandate, for example, that (a) the plan is feasible, (b) the plan is in the best interest of the creditors, and, (c) if an impaired class does not accept the plan, the plan must be determined to be fair and equitable before it can be confirmed.

**Postpetition liabilities.** Liabilities incurred subsequent to the filing of a petition that are not associated with prebankruptcy events. Thus, these liabilities are not considered prepetition liabilities.

**Prepetition liabilities.** Liabilities that were incurred by an entity prior to its filing of a petition for protection under the Code, including those considered by the Bankruptcy Court to be prepetition claims, such as a rejection of a lease for real property.

**Reorganization items.** Items of income, expense, gain, or loss that are realized or incurred by an entity because it is in reorganization.

**Reorganization proceeding.** A Chapter 11 case from the time at which the petition is filed until the plan is confirmed.

**Reorganization value.** The value attributed to the reconstituted entity, as well as the expected net realizable value of those assets that will be disposed before reconstitution occurs. Therefore, this value is viewed as the fair value of the entity before considering liabilities and approximates the amount a willing buyer would pay for the assets of the entity immediately after the restructuring.

**Secured claim.** A liability that is secured by collateral. A fully secured claim is one where the value of the collateral is greater than the amount of the claim.

**Terminal value.** Reorganization value calculated based on the discounting of cash flows normally consists of three parts: (a) the discounted cash flows determined for the forecast period, (b) residual value or terminal value, and (c) the current value of any excess working capital or other assets that are not needed in reorganization. Terminal or residual value represents the present value of the business attributable to the period beyond the forecast period.

**Trustee.** A person appointed by the Bankruptcy Court in certain situations based on the facts of the case, not related to the size of the company or the amount of unsecured debt outstanding, at the request of a party in interest after a notice and hearing.

**Undersecured claim (liability).** A secured claim whose collateral is worth less than the amount of the claim.

**Unsecured claim (liability).** A liability that is not secured by collateral. In the case of an undersecured creditor, the excess of the secured claim over the value of the collateral is an unsecured claim, unless the debtor elects in a Chapter 11 proceeding to have the entire claim considered secured. The term is generally used in bankruptcy to refer to unsecured claims that do not receive priority under the Bankruptcy Code.

*Director*  
*Accounting Standards*

AL GOLL,  
*Technical Manager*  
*Accounting Standards*

### **About the Task Force**

In addition to the chairman, John Robbins of Kenneth Leventhal & Company, Warren Petraglia and Alan Jacobs of Ernst & Young, and Peter Gibbons of Price Waterhouse specialize in reorganizations. Grant Newton is professor of accounting at Pepperdine University and author of a book on bankruptcy and insolvency accounting practice and procedures. Ron Orr specializes in bankruptcy proceedings with the law firm of Gibson, Dunn & Crutcher, Keith Rowden was on the FASB staff as an accounting fellow until returning to Coopers & Lybrand, and Clarence Staubs was on the SEC staff until his retirement. George F. Patterson, Jr. of Kenneth Leventhal & Company did most of the drafting.

## Section 10,500

# **Statement of Position 92-1 Accounting for Real Estate Syndication Income**

February 6, 1992

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction**

.01 This statement of position (SOP) provides guidance for the recognition of income from real estate syndication activities. Syndication activities are efforts to directly or indirectly sponsor the formation of entities that acquire interests in real estate by raising funds from investors. As consideration for their investments, the investors receive ownership of or other financial interests in the sponsored entities.

.02 The sponsored entities are generally organized as limited partnerships, trusts, or joint ventures, but they may also be organized in other forms. For convenience, the term *partnership* is used in this SOP to refer to such entities regardless of their form.

## **Scope**

.03 This SOP applies to the recognition of income from real estate syndication activities and to all entities that perform those activities. For purposes of applying the guidance in this SOP, entities that perform real estate syndication activities are syndicators regardless of whether their primary business is related to real estate syndication. Entities that may function as syndicators include real estate companies, brokers and dealers in securities, banks, savings and loan associations, insurance companies, finance companies, and entities organized solely to syndicate real estate.

.04 This SOP applies to the combined activities of entities in the consolidated or combined financial statements of syndicators, including those entities in which the syndicators have investments accounted for under the equity

method, as set forth in Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*. However, it does not apply to the separate financial statements of subsidiaries or affiliates of syndicators, unless such entities are also considered to be syndicators on the basis of the separate activities included in their consolidated or combined financial statements. For example, this SOP does not apply to the separate financial statements issued by a broker-dealer subsidiary of a syndicator if the role of the subsidiary and its subsidiaries, if any, in the transaction is limited to the sale of partnership interests.

.05 This SOP does not address accounting by the partnerships in which the interests are syndicated, and it does not apply to syndications of assets other than real estate.

## Definitions

.06 Significant terms used in this SOP are defined as follows:

*Blind pool or partially blind pool partnerships.* Partnerships in which investment units are sold before some or all of the properties to be acquired are identified.

*Flip transactions.* Transactions in which syndicators acquire ownership interests and resell them to the partnerships shortly thereafter.

*Investor notes.* Promissory notes, generally with full recourse, that are payable by investors to partnerships in connection with purchases of partnership interests.

*Ownership interests.* Title to real estate or other interests in real estate, such as partnership interests or shares in joint ventures; also, options or contracts to acquire specified real estate or real estate interests.

*Partnership notes.* Notes payable to syndicators by partnerships in connection with acquisitions of property or in payment of fees. Partnership notes may be collateralized by investor notes, mortgages, or other liens against partnership assets.

*Syndication activities.* Efforts to directly or indirectly sponsor the formation of entities that acquire interests in real estate by raising funds from investors. As consideration for their investments, the investors receive ownership or other financial interests in the sponsored entities. For purposes of applying the guidance in this SOP, all general partners in syndicated partnerships are deemed to perform syndication activities.

*Syndication (or securities-placement) fees.* Compensation, including commissions and reimbursement of expenses, for selling debt or equity interests in partnerships. Such fees are generally paid in cash, notes, or partnership interests.

## Background

.07 In order to earn commissions and fees, syndicators perform a variety of services and activities. For example, they organize partnerships, sell (syndicate) debt or equity interests in the partnerships to third parties, sell real estate to the partnerships, arrange for the partnerships to purchase real estate directly from (or sell it directly to) third parties, develop partnership properties, supervise construction of partnership properties, raise or provide funds for use by the partnerships, provide income or cash-flow guarantees to the

partnerships, and provide initial and long-term property management services to the partnerships. They also earn income from a variety of other sources, such as incentive arrangements and participations in profits on future sales of real estate by the partnerships.

**.08** Syndicators may receive cash, notes or other receivables, partnership interests, or rights to share in the proceeds of the sale or refinancing of the properties. At the time of syndication, partnerships generally pay cash to the syndicators for portions of their fees. The sources of the cash are generally initial payments by the investors to the partnerships or proceeds of borrowings secured by investor notes. Subsequent payments are expected to be made to the syndicators based on the availability of cash from installments on investor notes, partnership operations, mortgage refinancing, or sales of properties.

**.09** Syndicators may arrange for partnerships to acquire properties in the following ways:

- By acquiring ownership interests and reselling them to the partnerships in flip transactions
- By selling to the partnerships properties that the syndicators already own, or by transferring options or contracts to buy properties
- By arranging for the partnerships to acquire the properties directly from third parties

Selling prices may be greater than the syndicators' acquisition costs, or the syndicators may receive compensation for arranging the acquisitions.

**.10** In some syndication transactions, the syndicators have substantial risks of ownership in properties they sell to the partnerships or arrange for the partnerships to acquire, as indicated by some or all of the following characteristics:

- The partnerships make only nominal down payments.
- The syndicators receive partnership notes that are subject to future subordination by the partnerships to the claims of other creditors.
- The syndicators, or affiliates of the syndicators, are general partners in the partnerships.
- The syndicators are obligated to or intend to continue supporting the properties after syndication.

**.11** In some syndication transactions, the syndicators market no-load investment units.<sup>1</sup> Some syndicators that sponsor such transactions initially own the entire partnership and, after completing the syndication, generally retain an ownership interest in the partnership. Other syndicators that do not initially have an ownership interest in the partnership generally receive an ownership interest in lieu of selling commissions. In addition, syndicators that market no-load investment units pay expenses related to organization and syndication activities in excess of contractual reimbursement allowances, such as charges for lawyers and broker-dealers. Such syndicators generally expect

---

<sup>1</sup> The North American Securities Administrators' Association, Inc. (NASAA) defines a carried interest in the "Real Estate Programs" section of its *Statements of Policy* as an equity interest (other than a "promotional interest") that participates in all allocations and distributions and for which full consideration is neither paid nor to be paid. A syndication in which the syndicator receives a carried interest is known in the industry as a "no load" offering.

to recover their costs by charging fees for various other services, such as property acquisition and asset management.

.12 Investors in partnerships expect to realize appreciation, earn operating income, receive distributions of cash, obtain tax benefits, or obtain some or all of those benefits. The interests in real estate may be represented by direct ownership, mortgages, master leases, sale-leasebacks, or options to acquire real estate. Some partnership agreements require investors to pay their total capital contributions to the partnerships immediately; others require the investors to pay some cash immediately and permit them to issue investor notes to the partnerships for the balance.

## Current Practice

.13 Syndicators use various methods of accounting for income from syndications. Some recognize profit on the sales of real estate in conformity with Financial Accounting Standards Board (FASB) Statement No. 66, *Accounting for Sales of Real Estate*, and recognize additional fee income either as part of the real estate sales transactions or separately. Others believe that FASB Statement No. 66 does not apply to syndication transactions, and they either recognize all syndication profits immediately upon entering into the syndication transaction or follow methods based on discounting cash flows.

.14 Some syndicators that apply FASB Statement No. 66 to syndication transactions in which they sell real estate to the partnerships do not apply it to syndication transactions in which they do not have ownership interests in the real estate acquired by the partnerships.

.15 Some syndicators do not apply FASB Statement No. 66 to flip transactions because they believe the brief ownership period involved in a flip transaction is not substantive.

.16 Syndicators that use discounted cash-flow methods include in reported revenue the discounted amounts of expected cash flows from partnerships. The discount rates are determined by reference to the estimated market rate of interest, using APB Opinion No. 21, *Interest on Receivables and Payables*, as guidance. Discounts or premiums on notes are determined to the extent that the stated or implicit interest rates of the notes differ from the market rates of interest. Some syndicators use the stated payment periods of principal and interest in determining the timing of the expected cash flows from the notes, whereas others use anticipated payment dates corresponding to the dates on which the syndicators expect the properties to be sold.

.17 Some syndicators determine the projected depreciated cost of the properties and subtract the estimated balances of senior mortgage debt at the properties' anticipated dates of disposal (before the maturity of partnership notes). The difference is discounted to determine the amounts at which the partnership notes should be carried.

.18 Syndicators that use discounted cash-flow methods recognize the discounted amounts of notes received from partnerships as income at the time capital is raised from investors in the partnerships. In subsequent periods, discounts or premiums on the notes, if any, are recognized in income ratably using the interest method.

.19 Some syndicators recognize all revenue as of the date of syndication. Others use the guidance in FASB Statement No. 66 and, because of continuing involvement, defer recognizing some portion of the revenue.

.20 Some syndicators use the criteria in FASB Statement No. 66 to account for fee revenue from real estate syndication transactions because they believe the transactions are, in substance, sales of real estate.

.21 Some syndicators that account for fees by applying the revenue-recognition criteria in FASB Statement No. 66 exclude from the sales value of the properties, as the term *sales value* is defined in paragraph 7 of that Statement, some or all of the fees charged to the partnerships. Accordingly, they do not include the related payments of such fees in determining whether the buyers' initial and continuing investments in the properties are adequate for the seller to recognize profit in full on the sales. Other syndicators include all fees and related payments in determining sales value and in assessing whether the buyers' initial and continuing investment criteria have been met.

.22 Syndicators of blind pool or partially blind pool transactions are often entitled to nonrefundable syndication fees at the time of syndication, which would generally be before some or all of the properties are acquired by the partnerships. The general practice is to recognize nonrefundable syndication fees or partnership interests in income when received if there will be adequate fees to compensate the syndicators for whatever future services they may have to perform for the partnerships.

.23 Syndicators may receive or retain partnership interests as compensation for services. Some syndicators do not record their partnership interests, and others record them based principally on the following amounts:

- Estimated fair values
- The proportionate shares of (a) the amounts at which the syndicators carried the properties, if the syndicators had ownership interests in the properties, or (b) the partnerships' acquisition costs, if the syndicators never had ownership interests in the properties
- The costs incurred by the syndicators in excess of amounts charged to the partnerships
- Nominal amounts

## Conclusions

.24 The following conclusions should be read in conjunction with the "Discussion of Conclusions and Implementation Guidance," beginning with paragraph .40 of this SOP, which explains the bases for the conclusions and provides guidance for implementing them.

## Applicability of FASB Statement No. 66 to Syndication Activities

.25 FASB Statement No. 66 applies to the recognition of profit on the sale of real estate by syndicators to partnerships. This SOP concludes that the guidance in FASB Statement No. 66 should also be applied to the recognition of profit on real estate syndication transactions even if the syndicators never had ownership interests in the properties acquired by the real estate partnerships. For purposes of applying the profit recognition criteria of FASB Statement No. 66 to transactions in which syndicators never had such ownership interests, the syndicators should recognize profit on the transactions in the same way that they would have recognized such profit had they acquired the real estate and sold it to the partnerships.

## Determining the Sales Value of Property and Fee Income

.26 All fees charged by syndicators should be included in the determination of sales value in applying FASB Statement No. 66, except (a) fees for which future services must be performed and (b) syndication fees. FASB Statement No. 66 does not apply to the recognition of fees excluded from sales value.

.27 *Fees for Future Services.* Syndicators should recognize fees for future services when they render the services. If fees designated for future services are excessive or inadequate, they should be adjusted for accounting purposes and the adjustments should be allocated to or from the real estate sales portion of the transaction. However, the buyer's initial and continuing investment should not include cash payments on amounts reallocated from fees for future services until the services have been performed.

.28 *Syndication Fees.* Syndicators should not recognize syndication fees until the earnings process is complete and collectibility is reasonably assured. Further, if a syndicator receives or retains a partnership interest as compensation for a portion of the syndication fee, the profit recognized on that portion of the fee should not exceed the amount that would be recognized by applying partial sale accounting to the underlying partnership interest, as set forth in paragraph .38 of this SOP.

.29 If stated syndication fees are not reasonable, they should be adjusted for accounting purposes to amounts that are reasonable, and the adjustments should be allocated to or from the real estate sales portion of the transaction. Guidance on accounting for nonrefundable fees received from blind pools before property acquisition is provided in paragraph .32 of this SOP.

.30 The syndication fee for a transaction, which consists of cash and the value of any notes or partnership interests designated as consideration for the syndication fee, is reasonable if it falls within the range of syndication fees charged by independent brokers in similar transactions and is at least adequate to reimburse the syndicator for amounts paid to independent brokers or other third parties associated with the transaction. The range of reasonable fees can generally be determined by reference to various sources, including independent brokers, publicly offered transactions, and industry-monitoring reports.

.31 If, in addition to cash or notes, a syndicator receives a partnership interest as compensation for the syndication fee, the syndicator should include the value of the partnership interest in determining the reasonableness of the syndication fee. If the amount of the syndication fee is determined not to be reasonable, the fee should be adjusted for accounting purposes, as described in paragraph .29 of this SOP. However, the adjustment should not reduce the syndication fee by more than the sum of the cash and notes received for the syndication fee. Further, the syndication fee should not be adjusted if all, or substantially all, of the compensation to the syndicator consists of partnership interests received or retained, as in the no-load transactions discussed in paragraph .11 of this SOP.

## Accounting for Nonrefundable Fees Received From Blind Pools Before Property Acquisition

.32 Syndication fees received from blind pool transactions should be recognized in income ratably as the syndication partnership invests in prop-

erty acquisitions, but only to the extent that the syndication fees are nonrefundable and meet all conditions for recognition in income, as set forth in paragraphs .28 to .31 of this SOP.

### **Exposure to Losses or Costs From Syndicator Involvement and Collectibility Risk**

.33 If syndicators are exposed to future losses or costs from (a) material involvement with the properties, partnerships, or partners or (b) uncertainties regarding the collectibility of partnership notes, they should defer income recognition on syndication fees and fees for future services until the losses or costs can be reasonably estimated. Syndicators should reduce income recognized by the estimated losses or costs. The guidance in paragraphs 29 and 30 of FASB Statement No. 66 should be used in estimating potential losses or costs of support obligations. If such losses or costs cannot be estimated, the income recognized should be reduced by the maximum exposure. Paragraphs .61 to .63 of this SOP provide examples of syndicator involvement and uncertainties surrounding the collectibility of partnership notes that should be considered in recognizing real estate syndication income.

### **Allocating Cash Payments**

.34 For the purpose of determining whether buyers' initial and continuing investments satisfy the requirements for recognizing profit in full in conformity with FASB Statement No. 66, cash received by syndicators should be allocated to unpaid syndication fees before being allocated to the initial and continuing investment. After the syndication fee has been fully paid, additional cash received should be allocated to unpaid fees for future services, to the extent that those services have been performed by the time the cash is received, before being allocated to the initial and continuing investment.

.35 If, at or near the time of syndication, syndicators pay cash or unconditionally commit to pay cash to the partners or partnerships or to third parties on behalf of the partners or partnerships, the syndicators should account for those amounts as reductions of cash received from the partnerships, rather than as separate cash outlays.

### **Recognition of Partnership Interests Received or Retained**

.36 This SOP amends paragraph 32 of SOP 78-9, *Accounting for Investments in Real Estate Ventures* [section 10,240.32], which requires the investor's costs of services or intangibles contributed to a partnership or joint venture to be allocated to the cost of the investment. The following footnote is appended to paragraph 32 of that SOP immediately following the paragraph heading "Contribution of Services or Intangibles":

The provisions of this paragraph do not apply to real estate syndication activities in which the syndicators receive or retain partnership interests. Such activities are discussed in SOP 92-1, *Accounting for Real Estate Syndication Income*.

.37 *Participation in Future Profits Without Risk of Loss.* If syndicators receive or retain limited partnership interests that are subordinate for any distributions to the majority class of ownership interests, they should generally account for the interests as participations in future profits without risk of loss. Profits should be recognized when they are realized, in conformity with paragraph 43 of FASB Statement No. 66.

**.38 *Partial Sale.*** If the partnership interests received by the syndicators have the same pro rata rights as the majority class of ownership interests for all distributions, the syndicators should account for their partnership interests as retained interests from partial sales of real estate, in conformity with FASB Statement No. 66, regardless of whether the syndicators ever held title to the underlying properties. Syndication fees should be accounted for as set forth in paragraphs .28 to .31 of this SOP.

## Effective Date and Transition

**.39** The recommendations in this SOP should be applied to transactions for which the initial closing with investors occurs after March 15, 1992. Earlier application is encouraged for financial statements that have not been previously issued.

## Discussion of Conclusions and Implementation Guidance

**.40** The following discussion explains the bases for the conclusions reached in this SOP and provides implementation guidance.

### Applicability of FASB Statement No. 66 to Syndication Activities

**.41** In some syndication transactions, the syndicator acquires the properties, or options to acquire the properties, and sells them to the partnership. Paragraph 1 of FASB Statement No. 66 indicates that such real estate sales transactions are within the scope of that Statement, as follows: "This Statement establishes standards for recognition of profit on all real estate sales transactions without regard to the nature of the seller's business." Ownership interests provide evidence that syndicators are sellers of real estate, and FASB Statement No. 66 therefore applies to real estate syndication transactions in which ownership interests in properties pass from the syndicators to the partnerships. FASB Statement No. 66 does not specify the duration of ownership, so it applies as much to a brief ownership as to a lengthy one.

**.42** In other transactions, the syndicator arranges for the partnership to acquire the property from a third party without ever having acquired the property or an option to acquire the property. Although the form of such transactions differs from those described previously, the substance is the same: The syndicator is primarily compensated for arranging the acquisition of property by the partnership and for arranging the sale of partnership shares to investors. Accordingly, this SOP takes the position that the guidance in FASB Statement No. 66 should be applied to the recognition of profit on real estate syndication transactions even if the syndicators never had ownership interests in the properties acquired by the real estate partnerships.

**.43** The following describes how a syndicator should apply the profit-recognition criteria in FASB Statement No. 66 to a real estate syndication transaction in which a partnership acquires real estate from a third party rather than from the syndicator:

- The syndicator should impute a purchase of the real estate from the third party at the amount paid by the partnership to the third party. The syndicator should also impute a corresponding sale of the real estate to the partnership at the same price.

- Except for fees for which future services must be performed and syndication fees, all fees charged by the syndicator to the partnership as part of the syndication transaction should be added to the sales price in the imputed sales transaction to arrive at the deemed sales value of the real estate syndication transaction.
- The syndicator should recognize profit on the real estate syndication transaction to the extent that profit could be recognized in conformity with FASB Statement No. 66 on an otherwise identical transaction with the deemed sales value described in the preceding bullet. In determining whether the partnership would meet the initial and continuing investment criteria for recognition of profit in full on the imputed sales transaction, as described in paragraphs 11 and 12 of FASB Statement No. 66, the syndicator should include amounts paid by the partnership to the third party on the real estate sale.

Example 1b of appendix B of this SOP [paragraph .73] illustrates the accounting methods described previously.

### Determining the Sales Value of Property and Fee Income

.44 Paragraph 7 of FASB Statement No. 66 states that sales value is determined by—

- a. Adding to the stated sales price the proceeds from the issuance of a real estate option that is exercised and other payments that are *in substance additional sales proceeds*. These nominally may be management fees, points, or prepaid interest or fees that are required to be maintained in an advance status and applied against the amounts due to the seller at a later date. [*Emphasis added.*]
- b. Subtracting from the sale price a discount to reduce the receivable to its present value and by the net present value of services that the seller commits to perform without compensation or by the net present value of the services in excess of the compensation that will be received.

.45 In reviewing fees charged in connection with syndication transactions, the Real Estate Committee found that syndication fees and fees for future services are the only fees that are consistently separable from the corresponding real estate sales transaction. This SOP therefore concludes that all other fees should be included in the calculation of sales value, as described in part *a* of the foregoing quotation. This SOP also concludes that fees for future services associated with syndication transactions should be accounted for in the same manner as similar fees associated with real estate sales transactions, as described in part *b* of the foregoing quotation. Guidance on accounting for syndication fees is provided in paragraphs .28 to .31 of this SOP.

.46 *Fees for Future Services.* Fees for future services excluded from sales value include fees for managing properties and brokerage commissions on sales of properties by partnerships but do not include fees directly related to the acquisition or initial financing of syndication properties, such as cash flow guarantee fees, initial loan fees, and rent-up guarantee fees.

.47 Fees for future services that are deemed to be excessive or inadequate should be adjusted for accounting purposes. If the fees for future services are deemed to be excessive, the adjustments reduce amounts accounted for as fees for future services, and the sales value of the real estate is adjusted upward. However, until the services are performed, the syndicator remains contractu-

ally obligated to the partnership for the stated amount of the fees for future services regardless of whether they have been reallocated to sales value for reporting purposes. Payments made in consideration of such services are thus not included in the determination of the buyer's initial and continuing investment until the services are performed.

.48 Conversely, if the fees are deemed to be inadequate, the adjustments increase amounts accounted for as fees for future services. The sales value of the real estate is adjusted downward, because the real estate sales price is assumed to be overstated by the amount by which the fees for future services are understated. Furthermore, the payments made on the portion of sales value reallocated to fees for future services are not considered in evaluating whether the buyer has demonstrated a commitment to pay for the real estate, as described in paragraph 8 of FASB Statement No. 66. Profit is recognized on the amounts reallocated to the fees as the services are performed.

.49 *Syndication Fees.* This SOP recommends excluding syndication fees from sales value because they relate to the raising of equity rather than to the acquisition or operation of property. Recognition of syndication fees in income on completion of the earnings process is consistent with paragraph 11 of FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*, which states that the "enterprise managing a loan syndication (the syndicator) shall recognize loan syndication fees when the syndication is complete."

.50 Syndication fees are usually paid in cash at the time of syndication, and thus, their inclusion in sales value would unsoundly accelerate recognition of income on the real estate transaction, because the cash received would be included in calculating the down payment on the transaction, as provided in paragraph 8 of FASB Statement No. 66.

.51 This SOP recommends adjusting unreasonable stated syndication fees for accounting purposes to amounts that are reasonable, and allocating the adjustments to the real estate sales portion of the transaction. Such adjustments are necessary to account for the substance of the transaction.

.52 Syndication fees are generally based on a percentage of funds raised from investors. The variety of real estate syndication transactions precludes the applicability of a particular rate of syndication fee in all circumstances. For example, the rate may be affected by—

- The size of the offering.
- The effort expected to be required to market the offering.
- The tax consequences to the partnership and to the investors.
- The stated syndication fees in similar syndication transactions.
- Regulatory constraints.
- Any payments to independent brokers or other independent third parties associated with the transaction.
- Any costs incurred in connection with the syndication, such as the preparation of offering circulars or prospectuses.
- The choice of a public or private offering.
- The existence of competitors.

.53 If the adjustments increase amounts accounted for as syndication fees, the sales value of the real estate is adjusted downward because the real

estate sales price is considered to be overstated by the amount by which the syndication fees are understated. The adjustments reduce the sales value of the real estate, and the payments made on the portion of sales value reallocated to syndication fees are not considered in evaluating whether the partnership has demonstrated a commitment to pay for the real estate, as described in paragraph 8 of FASB Statement No. 66, because such payments do not give the partnership an increased stake in the property.

.54 Conversely, if adjustments reduce amounts accounted for as syndication fees, the sales value of the real estate is adjusted upward, and the payments made on the portion of sales value reallocated from syndication fees are accounted for as part of the partnership's initial or continuing investment in the property, because such payments create an increased stake in the property from the partnership's perspective.

.55 Example 2 in appendix B of this SOP [paragraph .73] illustrates transactions in which syndication fees are adjusted.

.56 Syndication fees should not be adjusted in transactions in which partnership interests are received or retained by the syndicators in lieu of cash syndication fees, as in the no-load transactions discussed in paragraph .11 of this SOP, because the partnership interests represent the total compensation to which the syndicator is entitled, unless additional future services are performed. To be consistent with that guidance, this SOP prohibits adjustment of the syndication fee by more than the sum of the cash and notes received for the syndication fee.

.57 *All Other Fees.* All fees charged by syndicators, other than syndication fees and fees for which future services must be performed, are included in the determination of sales value, in conformity with FASB Statement No. 66, because they cannot be consistently distinguished from the corresponding real estate transaction as discussed in paragraph .44 of this SOP.

## **Accounting for Nonrefundable Fees Received From Blind Pools Before Property Acquisition**

.58 In blind pool and partially blind pool syndications, partnerships generally pay syndication fees to syndicators, or promise to pay them, before the syndicators acquire properties for the partnerships. Such fees are usually stated separately from the property acquisition fees.

.59 Although the syndication fees may be contractually nonrefundable even if the syndicators do not ultimately locate properties to acquire, a syndicator that could not successfully complete that phase of the transaction would soon be out of business. As a result, the earnings process is incomplete until both the partnership shares are sold and the corresponding properties are acquired.

.60 If the syndicator arranges for the partnership to acquire a property in which the syndicator has or expects to have significant involvement, or if the syndicator has a history of such transactions, revenue recognition should be deferred for all fees related to all properties, in conformity with the guidance in the following section.

## **Exposure to Losses or Costs From Syndicator Involvement and Collectibility Risk**

.61 If syndicators are exposed to future losses or costs from (a) material involvement with the properties, partnerships, or partners or (b) uncertainties

regarding the collectibility of partnership notes, they should defer income recognition on syndication fees and fees for future services until the losses or costs can be reasonably estimated. This SOP recommends that the syndicators reduce income recognized by the estimated losses or costs. The guidance in paragraphs 29 and 30 of FASB Statement No. 66 is used in estimating potential losses or costs of support obligations. If such losses or costs cannot be estimated, the income recognized should be reduced by the maximum exposure.

**.62 *Involvement.*** The following scenarios describe some common forms of involvement that may expose syndicators to future losses or costs:

- The syndicator agrees to reimburse the partnership or partners for any loss of amounts invested.
- The syndicator guarantees a minimum return on amounts invested by the partnership or partners.
- The syndicator is required to operate properties belonging to the partnership or partners, or to support the operations of those properties, at its own risk.
- The syndicator is required to construct or renovate properties acquired, or to be acquired, by the partnership or partners.
- The syndicator guarantees obligations or debt of the partnership or partners.

**.63 *Collectibility.*** The following factors associated with syndication transactions may expose syndicators to future losses or costs beyond those normally associated with the collection of receivables:

- Collection may depend primarily on income, cash flows, gain on sale, or gain on refinancing, which are affected by future events that cannot be assured.
- Minimal levels of capital in the partnership, coupled with operating losses, may dilute the equity of the partnership in the property to such an extent that the risk of loss by default no longer sufficiently motivates the partnership or partners to honor their obligations to the syndicators.
- Certain partnership notes (for example, notes in payment of syndication fees) may be unsecured or may otherwise be subject to future subordination, as described in paragraph 17 of FASB Statement No. 66. Syndicators should determine whether any notes accounted for as proceeds of real estate sales are subject to future subordination, particularly if notes originally designated for payment of syndication fees are adjusted and reclassified as sales proceeds in conformity with paragraphs .28 to .31 of this SOP.

## Allocating Cash Payments

**.64** Because syndication fees have historically been paid in cash at the time of syndication, all payments should be allocated to unpaid syndication fees before being allocated to any other unpaid amounts. After the syndication fee has been fully paid, additional cash received should be allocated to unpaid fees for future services excluded from sales value, to the extent those services have been performed by the time the cash is received, before being allocated to the initial and continuing investment and to fees included in sales value. Such

additional cash received does not demonstrate an additional commitment to pay for the property, as described in paragraph 8 of FASB Statement No. 66, and applying it to the initial and continuing investment would thereby unsoundly accelerate the recognition of profit in full on the real estate sales portion of the transaction.

**.65** Some transactions provide for syndicators to both receive cash from the partnerships and pay cash to them. Payments received by syndicators in such transactions may effectively be refundable to the extent that the syndicators later make payments to the partnerships. Consequently, if the syndicators pay cash to the partnerships or unconditionally commit to pay cash at or near the time of syndication, the syndicators should account for those amounts as reductions of cash already received from the partnerships, rather than as separate cash outlays. The reductions are allocated first to partnership down payment, next to other fees excluded from sales value to the extent performed, and last to syndication fees.

### **Recognition of Partnership Interests Received or Retained**

**.66** As stated in paragraph .36 of this SOP, syndication services for which partnership interests are received or retained are not contributions of services to the partnership, as described in paragraph 32 of SOP 78-9 [section 10,240.32]. They are, instead, services for which a syndication fee is paid through receipt or retention of the partnership interest. Such accounting is consistent with the premise of this SOP that the guidance in FASB Statement No. 66 should be applied to the recognition of profit on real estate syndication transactions.

**.67** *Participation in Future Profits Without Risk of Loss.* Transfers of subordinate limited partnership interests by partnerships to syndicators are similar to transfers of rights to participate in future profits without risk of loss. The syndicators' profits are contingent upon the ability of the partnerships to produce sufficient profits to pay their majority security holders, and the syndicators are not liable for partnership losses. Paragraph 43 of FASB Statement No. 66 provides the following guidance for accounting for participations in future profits without risk of loss:

If the transaction otherwise qualifies for recognition of profit by the full accrual method, the transfer of risks and rewards of ownership and absence of continuing involvement criterion shall be considered met. The contingent future profits shall be recognized when they are realized. [Footnote omitted.]

**.68** *Partial Sale.* In general, syndicators should recognize as retained interests from partial sales of real estate those partnership interests received or retained that have the same pro rata rights as the majority class of ownership interests for all distributions. Partnership interests are typically received or retained as compensation for selling properties to partnerships, arranging sales of properties to partnerships by independent third parties, or performing other services in connection with syndication transactions.

**.69** If a syndicator receives or retains a partnership interest as compensation for syndication services performed, the syndication fee for performing the services should be accounted for as follows:

- a.** All real estate owned by the partnership should be assumed to have been sold to the partnership by the syndicator, as described in paragraph .25 of this SOP.

- b. The partnership interest received or retained by the syndicator should be accounted for as a retained interest from a partial sale of the real estate by the syndicator to the partnership, as described in paragraph .38 of this SOP.
- c. The amount of profit recognized as the syndication fee should be equal to the carrying amount of such a retained interest.

.70 Paragraph 33 of FASB Statement No. 66 states that a "sale is a partial sale if the seller retains an equity interest in the property or has an equity interest in the buyer." That Statement requires the use of partial sale accounting if properties acquired by the partnerships are owned by the syndicators before the syndication transactions. As noted in the preceding paragraph and in paragraph .25 of this SOP, even if a syndicator never owns a property and, for example, a transaction is a sale of securities, the guidance in FASB Statement No. 66 should be applied if real estate is the principal underlying asset.

.71 If a syndicator receives or retains a general partnership interest in a limited partnership as consideration for the portion of the syndication transaction classified as a real estate sale, the syndicator should recognize any associated profit in conformity with FASB Statement No. 66. Receipt or retention of a general partnership interest may expose a syndicator to losses or costs that should be evaluated as described in paragraphs .33 and .61 to .63 of this SOP.

## Appendix A

### Other Relevant Literature

A-1. This appendix provides background information on literature discussed only briefly in the body of this SOP. It also discusses literature that is not cited in the body of this SOP but that may be relevant, directly or by analogy, to the recognition of income from syndication activities.

### FASB Statement No. 5, *Accounting for Contingencies*

A-2. Paragraph 17 of FASB Statement No. 5, *Accounting for Contingencies*, states: "Contingencies that might result in gains usually are not reflected in the accounts since to do so might be to recognize revenue prior to its realization."

### FASB Statement No. 13, *Accounting for Leases*

A-3. FASB Statement No. 13, *Accounting for Leases*, specifies the accounting by lessors of residual interests in real and personal property leased under leases accounted for as sales-type and direct financing leases. In general, unguaranteed residual values are determined at the inception of the leases, thereby affecting the amounts of income to be recognized over the lease terms. Residual values are required to be reviewed at least annually, and downward adjustments made currently, if declines in estimated residual values are deemed to be other than temporary.

### FASB Statement No. 66, *Accounting for Sales of Real Estate*

A-4. Paragraphs 29 and 30 of FASB Statement No. 66 provide the following guidance for estimating potential costs of support obligations:

29. *The seller is required to initiate or support operations or continue to operate the property at its own risk, or may be presumed to have such a risk, for an extended period, for a specified limited period, or until a specified level of operations has been obtained, for example, until rentals of a property are sufficient to cover operating expenses and debt service.* If support is required or presumed to be required<sup>10</sup> for an *extended* period of time, the transaction shall be accounted for as a financing, leasing, or profit-sharing arrangement. If support is required or presumed to be required for a *limited* time, profit on the sale shall be recognized on the basis of performance of the services required. Performance of those services shall be measured by the costs incurred and to be incurred over the period during which the services are performed. Profit shall begin to be recognized when there is reasonable assurance that future rent receipts will cover operating expenses and debt service including payments due the seller under the terms of the transaction. Reasonable assurance that rentals will be adequate would be indicated by objective information regarding occupancy levels and rental rates in the immediate area. In assessing whether rentals will be adequate to justify recognition of profit, total estimated future rent receipts of the property shall be reduced by one-third as a reasonable safety

---

<sup>10</sup> Support shall be presumed to be required if: (a) a seller obtains an interest as a general partner in a limited partnership that acquires an interest in the property sold; (b) a seller retains an equity interest in the property, such as an undivided interest or an equity interest in a joint venture that holds an interest in the property; (c) a seller holds a receivable from a buyer for a significant part of the sales price and collection of the receivable depends on the operation of the property; or (d) a seller agrees to manage the property for the buyer on terms not usual for the services to be rendered, and the agreement is not terminable by either the seller or the buyer.

factor unless the amount so computed is less than the rents to be received from signed leases. In this event, the rents from signed leases shall be substituted for the computed amount . . . .

30. If the sales contract does not stipulate the period during which the seller is obligated to support operations of the property, support shall be presumed for at least two years from the time of initial rental unless actual rental operations cover operating expenses, debt service, and other contractual commitments before that time. If the seller is contractually obligated for a longer time, profit recognition shall continue on the basis of performance until the obligation expires.

## **FASB Technical Bulletin No. 88-1, *Issues Relating to Accounting for Leases***

**A-5.** Paragraphs 21 and 22 of FASB Technical Bulletin No. 88-1, *Issues Related to Accounting for Leases*, requires "wrap lease" transactions to be accounted for in the following manner:

### *Question 5*

21. An enterprise purchases an asset, leases the asset to a lessee, obtains nonrecourse financing using the lease rentals or the lease rentals and the asset as collateral, sells the asset subject to the lease and the nonrecourse debt to a third-party investor, and leases the asset back while remaining the substantive principal lessor under the original lease (commonly referred to as a wrap lease transaction). Other than as required by Statement 13, as amended by Statements 28, 66, and 98, should an enterprise ever recognize any profit on the wrap lease transaction at its inception? If not, how should the enterprise account for the transaction?

### *Response*

22. If the property involved is real estate, the provisions of Statement 98 apply to the sale-leaseback transaction. If the property involved is not real estate, the enterprise should account for the transaction as a sale-leaseback transaction. If the property involved is not real estate, the enterprise should account for the transaction as a sale-leaseback transaction in accordance with paragraphs 32-34 of Statement 13, as amended, and the lease to the end user should be accounted for as a sublease in accordance with paragraph 36 of Statement 13. Under Statement 13 the asset should be removed from the books of the original enterprise, the leaseback should be classified in accordance with paragraph 6 of Statement 13, and any gain on the transaction should be recognized or deferred and amortized in accordance with paragraph 33 of Statement 13, as amended. The enterprise would also reflect the retained residual interest, gross sublease receivable, nonrecourse third-party debt, the leaseback obligation, and the note receivable from the investor in the statement of financial position. As in accounting for a money-over-money lease transaction . . . , the sublease asset and the related nonrecourse debt should not be offset in the statement of financial position unless a right of setoff exists.

## **AICPA Statement of Position No. 78-9, *Accounting for Investments in Real Estate Ventures***

**A-6.** SOP 78-9 [section 10,240] provides guidance on accounting for investments in real estate ventures in financial statements prepared in conformity with generally accepted accounting principles. Paragraph 32 [section 10,240.32] states the following:

*Contribution of Services or Intangibles.* The division believes the accounting considerations that apply to real property contributed to a partnership or joint

venture also apply to contributions of services or intangibles. The investor's cost of such services or intangibles to be allocated to the cost of the investment should be determined by the investor in the same manner as for an investment in a wholly owned real estate project.

**A-7. Paragraph 37 [section 10,240.37] states the following:**

If services are performed for a venture by an investor and their cost is capitalized by the venture, profit may be recognized by the investor to the extent attributable to the outside interests in the venture if the following conditions are met:

- a. The substance of the transaction does not significantly differ from its form.
- b. There are no substantial uncertainties about the ability of the investor to complete performance (as may be the case if the investor lacks experience in the business of the venture) or the total cost of services to be rendered.
- c. There is a reasonable expectation that the other investors will bear their share of losses, if any.

The method of recognizing income from services rendered should be consistent with the method followed for services performed for unrelated parties.

### **FASB Emerging Issues Task Force Issue No. 85-37, *Recognition of Notes Received for Real Estate Syndication Activities***

**A-8.** Issue No. 85-37, *Recognition of Notes Received for Real Estate Syndication Activities*, discusses a number of methods of accounting for syndication transactions, including a method described as the "cash method," under which no carrying amount is recorded for notes receivable by syndicators from the partnerships except for portions of the notes that will be paid from the proceeds of the investors' contributions. The Emerging Issues Task Force (EITF) did not reach a consensus on the issue and referred it to the AICPA Real Estate Committee. However, the Securities and Exchange Commission (SEC) observer attending the EITF meeting stated that without a task force consensus, the SEC staff would challenge registrants that use a method other than the cash method. He also stated that the SEC objects to extending the 1980 AICPA Issues Paper *Accounting by Lease Brokers* to activities other than those of lease brokers. The SEC staff has also specifically objected to accretion of income on purchased, unguaranteed lease residuals and to income recognition and accretion of income on residual interests, realization of which depends on transactions whose occurrence in the future and whose terms are currently only anticipated.

### **AICPA Issues Paper, *Accounting by Lease Brokers***

**A-9.** The 1980 AICPA Issues Paper, *Accounting by Lease Brokers*, explicitly applies to equipment-leasing transactions, but the paper has been applied to real estate syndication transactions by analogy. Under lease-broker accounting, income is recognized at the inception of a lease based on cash received and the discounted amount of the expected residual (subject to an assessment of realizability). Until the FASB issued Technical Bulletin No. 86-2, *Accounting for an Interest in the Residual Value of a Leased Asset*, the residual could be accreted until realized. The amount of income to be recognized at the inception of a lease in money-over-money lease brokerage transactions was significantly restricted in FASB Technical Bulletin No. 88-1.

Appendix B

Examples

Example 1

B-1. The following examples illustrate the determination of sales value, the allocation of cash payments, and the calculation of syndication fees, as described in paragraphs .26 to .31, .34, and .35 of this SOP.

B-2. *Example 1a.* A syndicator arranges for a newly formed partnership to acquire a single-tenancy property using part of the proceeds raised through the sale of partnership interests to unrelated third parties, as follows:

- Limited partners contribute \$4,000, of which \$700 is retained for working capital, and the unrelated general partner contributes \$100.
- The partnership acquires real estate from the syndicator at the syndicator's cost of \$20,000. The partnership gives the following consideration:
  - \$3,000 in cash.
  - The assumption of a \$16,250 nonrecourse first mortgage note, payable in monthly installments over fifteen years with interest at a market rate.
  - A second mortgage note, payable to the syndicator for the balance of \$750. The second mortgage is payable on the same terms as the first mortgage.
- The cash flow on the property is currently sufficient to meet the required principal and interest payments on the first and second mortgage notes.
- In addition, the syndicator receives the following:
  - Syndication fee:

Cash	\$ 100
Note bearing a market rate of interest due in three years secured by a lien on the property that is not subject to future subordination	300
	<u>\$ 400</u>

- Other fees—rent-up fee for activities prior to acquisition (accounted for as part of sales value)

Cash	\$ 300
Note bearing a market rate of interest due in three years secured by a lien on the property that is not subject to future subordination	650
	<u>\$ 950</u>
Total fees	<u>\$ 1,350</u>

Sales Value

Purchase price	\$20,000
Other fees accounted for as part of sales value— rent-up fee for activities prior to acquisition	950
Adjusted sales value	<u>\$20,950</u>

Cash Down Payment

Per sales contract	\$ 3,000
Add: Fees paid in cash that are included in sales value	\$300
Less: Portion of syndication fee not paid in cash	<u>300</u> -0-
Adjusted cash down payment	<u>\$ 3,000</u>

Gain Calculation

Sales value	\$20,950
Syndicator's cost	20,000
Gain	<u>\$ 950</u>

Gain Recognition

Down-payment test:

$$\frac{\text{Down payment } \$3,000}{\text{Sales value } \$20,950} = 14\%$$

Required minimum down payment set forth in paragraph 54 of  
FASB Statement No. 66

15%

The sale does not meet the minimum required down-payment test for full profit recognition.

Use of the installment method<sup>2</sup> would result in profit recognition of:

$$\frac{\text{Down payment } \$3,000}{\text{Sales value } \$20,950} \times \$950 = \$136^3$$

Syndication Fee Recognition

The syndication fee of \$400 is deemed to have been received in cash and, accordingly, to have been collected. In addition, the syndicator's involvement with the property does not indicate that a funding obligation by the syndicator is likely. Therefore, the entire fee is recognizable currently. The collectibility of the balance of the amount designated as the note in payment of the syndication fee (\$300) is evaluated as part of the evaluation of the collectibility of all notes from the real estate sale.

If the \$300 note were unsecured or otherwise subject to future subordination, profit to the extent of the note would be recognized under the cost-recovery

<sup>2</sup> The method used is consistent with FASB Emerging Issues Task Force Issue No. 88-24, *Effect of Various Forms of Financing under FASB Statement No. 66*.

<sup>3</sup> Because the seller's receivable of \$1,700 (\$750 second mortgage plus \$300 designated for syndication fees plus \$650 designated for other fees) for the sales price and the fees exceeds the amount of deferred gain of \$814 (\$950 total gain less \$136 profit recognized), no additional gain is currently recognized.

method. Profit to be recognized under the installment method would thus be reduced to \$650 (\$950 total less \$300 under the cost-recovery method) and recognized as follows:

$$\frac{\text{Down payment \$3,000}}{\text{Sales value \$20,650}^4} \times \$650 = \$94$$

**B-3. Example 1b.** The same facts apply as in example 1a, except that the property is purchased from an independent third party for \$20,000.

<u>Sales Value</u>	
Same as in example 1a	<u>\$20,950</u>
<u>Cash Down Payment</u>	
Same as in example 1a	<u>\$ 3,000</u>
<u>Gain Calculation</u>	
Same as in example 1a	<u>\$ 950</u>
<u>Gain Recognition</u>	
Same as in example 1a	
The sale does not meet the minimum required down-payment test for full profit recognition.	
Use of the installment method would result in profit recognition of \$136.	

Syndication Fee Recognition  
Same as in example 1a

**B-4. Example 1c.** The same facts apply as in example 1a, except that the syndicator retains a 3 percent limited partnership interest.

<u>Sales Value</u>	
Same as in example 1a	<u>\$20,950</u>
<u>Cash Down Payment</u>	
Same as in example 1a	<u>\$ 3,000</u>
<u>Gain Calculation</u>	
Sales value	\$20,950
Syndicator's cost	\$20,000
Less: 3% limited partnership interest—partial sale	<u>112<sup>5</sup></u>
Gain	<u>\$ 1,062</u>

<sup>4</sup> In the calculation of profit under the installment method, the \$20,950 sales value determined in example 1a is reduced by the \$300 note that is being recognized under the cost-recovery method.

<sup>5</sup> The \$112 partial sale amount is computed by applying the limited partnership percentage (3 percent) to the difference between the syndicator's cost (\$20,000) and the amount of the nonrecourse first mortgage note (\$16,250) assumed at purchase by the partnership.

Gain Recognition

Down-payment test:

$$\frac{\text{Down payment } \$3,000}{\text{Sales value } \$20,950} = 14\%$$

Required minimum down payment set forth in paragraph 54 of  
FASB Statement No. 66

15%

The sale does not meet the minimum required down-payment test for full profit recognition.

Use of the installment method would result in profit recognition of—

$$\frac{\text{Adjusted cash down payment } \$3,000}{\text{Sales value } \$20,950} \times \$1,062 = \$152^6$$

Syndication Fee Recognition

Same as in example 1a

**B-5. Example 1d.** The same facts apply as in example 1a, except that the syndicator agrees to fund cash-flow deficiencies for the first three years, up to a maximum of \$1,500. In calculating the profit to be recognized based on performance of the services required (including reduction of rents by the one-third safety factor described in paragraph 29 of FASB Statement No. 66), there is a \$1,100 exposure to loss. Current forecasts indicate discounted cash-flow losses of \$500 in year 1, \$300 in year 2, \$200 in year 3, and positive cash flow thereafter. The partnership also pays an additional \$200 of the \$400 syndication fee in cash.

Sales Value

Same as in example 1a	<u>\$20,950</u>
-----------------------	-----------------

Cash Down Payment

Down payment as calculated in example 1a	\$ 3,000
Additional cash	<u>200</u>
Adjusted cash down payment	<u>\$ 3,200</u>

Gain Calculation

Gain as calculated in example 1a	\$ 950
Less: Syndicator's exposure to loss under paragraph 29 of FASB Statement No. 66	<u>1,100</u>
Gain	<u>NONE</u>

<sup>6</sup> Because the seller's receivable of \$1,700 (\$750 second mortgage plus \$300 designated for syndication fees plus \$650 designated for other fees) for the sales price and the fees exceeds the amount of deferred gain of \$910 (\$1,062 total gain less \$152 profit recognized), no additional gain is currently recognized.

Gain Recognition

Down-payment test:

$$\frac{\text{Down payment } \$3,200}{\text{Sales value } \$20,950} = 15\%$$

Required minimum down payment set forth in paragraph 54 of FASB Statement No. 66 15%

Although the sale meets the minimum required down-payment test for full profit recognition, no gain is recognizable because the exposure to loss exceeds the gain.

Syndication Fee Recognition

The syndicator would recognize \$250 in syndication fee income, which is equal to the \$400 syndication fee less the \$150 excess of the syndicator's expected funding obligation (\$1,100) over other fee income (\$950).

**Example 2**

**B-6.** The following example illustrates the adjustment of syndication fees when stated fees are not reasonable, as described in paragraphs .28 to .31 of this SOP. The property is an office building subject to lease on a long-term basis to parties with a satisfactory credit rating; cash flow is currently sufficient to service all indebtedness.

	<u>Case 1</u>	<u>Case 2</u>
Stated real estate sales price	<u>\$1,000</u>	<u>\$ 900</u>
Cost	<u>\$ 800</u>	<u>\$ 800</u>
Payments:		
Cash		
Stated syndication fees	\$ 40	\$ 140
Stated down payment	<u>100</u>	<u>0</u>
Total cash paid at closing	140	140
Assumption of existing noncourse debt for which the seller has no contingent liability	800	800
Second mortgage not payable to seller	<u>100</u>	<u>100</u>
Total payments	<u>\$1,040</u>	<u>\$1,040</u>
Required minimum down payment for full recognition of profit in conformity with FASB Statement No. 66	10%	10%
Reasonable fee <sup>7</sup>	\$ 100	\$ 100

<sup>7</sup> The syndication fee that is reasonable depends on circumstances unique to the individual transaction. The amount used in the example is not intended to serve as a benchmark for determining whether syndication fees are reasonable in practice.

	Case 1		Case 2	
	<i>Syndication Fees</i>	<i>Real Estate Sale</i>	<i>Syndication Fees</i>	<i>Real Estate Fees</i>
Stated terms	\$ 40	\$1,000	\$140	\$900
Reallocation of fees	60	(60)	(40)	40
Adjusted balances	<u>\$100</u>	<u>\$ 940</u>	<u>\$100</u>	<u>\$940</u>
			<i>Case 1</i>	<i>Case 2</i>
Syndication fee recognized in income at date of sale:				
Stated fee			\$ 40	\$140
Adjustment			60	(40)
Total			<u>\$100</u>	<u>\$100</u>
			<i>Case 1</i>	<i>Case 2</i>
Allocation of cash:				
Stated syndication fees			\$ 40	\$140
Syndication fee allocated from real estate sale			60	0
Syndication fee allocated to real estate sale			0	(40)
Adjusted syndication fee			100	100
Real estate down payment			40	40
Total Cash			<u>\$140</u>	<u>\$140</u>
			<i>Case 1</i>	<i>Case 2</i>
Cash down payment required for full profit recognition:				
10% of adjusted sales price			\$ 94	\$ 94
Real estate down payment			40	40
Additional cash required for full profit recognition			<u>\$ 54</u>	<u>\$ 54</u>
Total profit on real estate transaction:				
Adjusted sales price			\$940	\$940
Cost			800	800
Total profit			<u>\$140</u>	<u>\$140</u>
Profit on real estate sales transaction recognizable under installment method—greater of. <sup>8</sup>				
(a) $(\$40/\$940) \times \$140$			<u>\$ 6</u>	<u>\$ 6</u>
or				
(b) Total accounted for as real estate profit			\$140	\$140
Less: Second mortgage receivable			100	100
Less: Buyer's debt secured by the property for which the seller is contingently liable			0	0
Total profit recognizable on real estate sale			<u>\$ 40</u>	<u>\$ 40</u>

<sup>8</sup> The method used is consistent with FASB Emerging Issues Task Force Issue No. 88-24.

	<u>Case 1</u>	<u>Case 2</u>
Total profit recognizable at closing:		
Syndication fee	\$100	\$100
Real estate sale	<u>40</u>	<u>40</u>
Total	<u>\$140</u>	<u>\$140</u>

The remaining balance of \$100 in profit is deferred and recognized as cash payments are received by the syndicator.

Example 3

B-7. The following example illustrates the recognition of syndication fees received from blind pool transactions, as described in paragraph .32 of this SOP. The terms of the transaction are as follows:

- In June 19X1, syndication A raises \$50,000 for investment in real estate in a blind pool transaction; at the time the equity is raised, no properties have been acquired or identified for acquisition.
- The offering memorandum states that \$45,000 will be available for investment in property after payment of the following items:
  - \$3,000 in syndication fees
  - \$1,000 in expenses
  - \$1,000 set aside for working-capital funds

In addition, the offering memorandum states that it is anticipated that \$15,000 of debt financing will be obtained in connection with the property acquisition.

- In July 19X1, a property is acquired for \$15,000 cash and the assumption of an existing \$5,000 first mortgage loan. The partnership is to use an additional \$4,000 of its funds to renovate the property.

Syndication Fee Recognition

Assuming that the syndication fees to be recognized are nonrefundable and meet all conditions for recognition in income, as set forth in paragraphs .28 to .31 of this SOP, \$1,200 should be recognized in July 19X1, as follows:

Cash purchase price	\$15,000
Portion of purchase price financed with debt	5,000
Cash committed for renovation	<u>4,000</u>
Total invested	<u>\$24,000</u>

Total invested \$24,000

Cash committed for investment \$60,000

= 40%

The syndication fee to be recognized in July 19X1 is \$1,200 (40% × \$3,000 total syndication fee).

The remaining syndication fee of \$1,800 (\$3,000 total less \$1,200 recognized in July 19X1) would be recognized in income ratably as the syndication partnership invests in property acquisitions.

## Section 10,510

# Statement of Position 92-3 Accounting for Foreclosed Assets\*

April 28, 1992

### NOTE

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## Scope

.01 This Statement of Position (SOP) provides guidance on determining the balance sheet treatment of foreclosed assets<sup>1</sup> after foreclosure. (Paragraphs A-6 and A-7 of the appendix [paragraph .18] discuss the exclusion from this SOP of conclusions on the accounting treatment of results of operations related to foreclosed assets held for sale.) It applies to all reporting entities except those that account for assets at market value or fair value, such as broker-dealers, futures commission merchants, and investment companies. It applies to all assets obtained through foreclosure or repossession except for (a) inventories that are covered by chapter 4 of Accounting Research Bulletin No. 43, *Restatement and Revision of Accounting Research Bulletins*; (b) marketable equity securities that are covered by Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (Statement) No. 12, *Accounting for Certain Marketable Securities*; and (c) foreclosed real estate previously owned by the lender and accounted for under FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*. Except for the requirements in paragraphs .12 and .17, the conclusions of this SOP do not apply to in-substance foreclosed assets (see paragraph A-10 of the appendix [paragraph .18]).

\* Material appearing in footnote 2 and the indented portion of paragraph A-5 of the appendix [paragraph .18] is copyrighted by the Financial Accounting Standards Board, 401 Merritt 7, P.O. Box 5116, Norwalk, Connecticut, 06856-5116, U.S.A. It is reprinted by permission. Copies of the complete document are available from the FASB.

<sup>1</sup> As used in this SOP, the term *foreclosed assets* includes all assets received in satisfaction of a receivable in a troubled debt restructuring, as the term is used in FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*. It includes real property and personal property; equity interests in corporations, partnerships, and joint ventures; and beneficial interests in trusts.

## Background

.02 Paragraph 29 of FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*, issued in 1977, requires the following: "After a troubled debt restructuring, a creditor shall account for assets received in satisfaction of a receivable the same as if the assets had been acquired for cash." That requirement has been interpreted in diverse ways.

.03 The American Institute of Certified Public Accountants' (AICPA's) Industry Audit Guide *Audits of Stock Life Insurance Companies* requires that foreclosed real estate be carried at the lower of cost (less accumulated depreciation) or market value, net of any encumbrances. Paragraphs 17 and 21 of SOP 75-2, *Accounting Practices of Real Estate Investment Trusts* [section 10,060.17 and .21] (as amended by SOP 78-2), require that estimated losses on individual loans and properties be based on net realizable value. The guidance in the AICPA Audit and Accounting Guide *Audits of Savings Institutions* (May 1994) and in the Industry Audit Guide *Audits of Finance Companies* is consistent with SOPs 75-2 [section 10,060] and 78-2. The AICPA Industry Audit Guide *Audits of Banks* (May 1994) states that subsequent to foreclosure, a loss on foreclosed real estate should be recognized if cost cannot be recovered through sale or use, but it does not indicate how the loss is to be measured. The AICPA Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* does not address accounting for foreclosed assets.\* [Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

.04 In practice, accounting by creditors for foreclosed assets, particularly real estate assets, is diverse. After foreclosure, some enterprises continue to write down the carrying amount of foreclosed assets for subsequent, further declines in fair value; others do not. After foreclosure, some enterprises discount projected cash flows related to foreclosed assets in estimating net realizable value of those assets; others do not.

.05 Sections 4(b)(1) and 4(b)(2)(A) of the Home Owners' Loan Act of 1933 as amended by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 generally provide that the director of the Office of Thrift Supervision prescribe uniform accounting and disclosure standards for savings associations, to be used in determining associations' compliance with applicable regulations, and incorporate generally accepted accounting principles into those standards to the same degree that such principles are used to determine compliance with regulations prescribed by federal banking agencies. Section 1215 of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 also provides the following:

Before the end of the 1-year period beginning on the date of the enactment of this Act [August 9, 1989], each appropriate Federal banking agency (as defined in section 3(q) of the Federal Deposit Insurance Act) shall establish uniform accounting standards to be used for determining the capital ratios of all federally insured depository institutions and for other regulatory purposes. Each such agency shall report annually to the Chairman and ranking minority member of the Committee on Banking, Housing, and Urban Affairs of the Sen-

---

\* The AICPA Audit and Accounting Guide *Banks and Savings Institutions* superseded the Guides *Audits of Savings Institutions* and *Audits of Banks* and refers readers to FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, and SOP 92-3. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

ate and the Chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs of the House of Representatives any differences between the capital standards used by such agency and capital standards used by any other such agency. Each such report shall contain an explanation of the reasons for any discrepancy in such capital standards, and shall be published in the Federal Register.

.06 The chairman of the Federal Home Loan Bank Board (now the Office of Thrift Supervision) asked the AICPA in 1987 to address the inconsistency between banks and savings and loan associations in accounting for loans and real estate assets. The AICPA's Accounting Standards Executive Committee (AcSEC) attempted to eliminate that inconsistency in 1988 and 1989 but decided to refer the matter to the FASB at that time. On April 4, 1989, soon after AcSEC's decision to refer the matter to the FASB, the chairman of the Federal Home Loan Bank Board wrote to the chairman of the Securities and Exchange Commission (SEC) asking that the SEC or its staff remove the inconsistency for public reporting entities. The SEC has not done so.

.07 Further, the chairman of the Federal Deposit Insurance Corporation, in a letter to the FASB dated November 8, 1989, asked the FASB to assist in developing "uniform accounting standards among depository institutions." In that letter, the chairman stated that "the accounting treatment in practice for certain transactions among participants in the financial services industry seems to be more a reflection of the type of charter than the substance of the transaction." Furthermore, the chairman "urge[d] the FASB to reconcile the different accounting practices outlined in [AICPA] guides for thrifts, banks, and finance companies." In early 1990, AcSEC decided that it could deal with the inconsistencies and diversity in accounting for foreclosed assets, and this SOP is a result of that decision.

.08 AcSEC believes that all enterprises, not just financial institutions, should account for foreclosed assets held for sale the same way, except that enterprises that account for assets at market value or fair value should not change their accounting. AcSEC's primary objectives in issuing this statement of position are to reduce the inconsistencies and diversity in accounting for foreclosed assets and to improve the understandability, comparability, and relevance of amounts reported as foreclosed assets in balance sheets. Another objective is to make all of the AICPA Audit and Accounting Guides and SOPs consistent on this matter. Achieving those objectives will also address the needs of Congress and the thrift and banking regulators.

.09 This SOP affects the following AICPA statements of position and industry audit and accounting guides:

- a. *Audits of Finance Companies*
- b. *Audits of Property and Liability Insurance Companies*
- c. *Audits of Stock Life Insurance Companies*
- d. *Guide for the Use of Real Estate Appraisal Information*

[Revised to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

## Conclusions

### Held-for-Sale Presumption

.10 Most enterprises do not intend to hold foreclosed assets for the production of income but intend to sell them; in fact, some laws and regulations

applicable to financial institutions require the sale of foreclosed assets. Therefore, under this SOP, it is presumed that foreclosed assets are held for sale and not for the production of income. That presumption may be rebutted, except for in-substance foreclosed assets, by a preponderance of the evidence. If the held-for-sale presumption is not rebutted, the asset should be classified in the balance sheet as held for sale.

.11 The presumption of sale can be rebutted if (a) management intends to hold a foreclosed asset for the production of income, (b) that intent is not inconsistent with the enterprise's ability to do so or with laws or regulations, including the manner in which the laws or regulations are administered by federal or state regulatory agencies, and (c) that intent is supported by a preponderance of the evidence.

### Foreclosed Assets Held for Sale

.12 After foreclosure, foreclosed assets held for sale should be carried at the lower of (a) fair value<sup>2</sup> minus estimated costs to sell or (b) cost.<sup>3</sup> Such determination should be made on an individual asset basis. If the fair value of the asset minus the estimated costs to sell the asset is less than the cost of the asset, the deficiency should be recognized as a valuation allowance. If the fair value of the asset minus the estimated costs to sell the asset subsequently increases and the fair value of the asset minus the estimated costs to sell the asset is more than its carrying amount, the valuation allowance should be reduced, but not below zero. Increases or decreases in the valuation allowance should be charged or credited to income.<sup>4</sup>

.13 The amount of any senior debt (principal and accrued interest) to which the asset is subject should be reported as a liability at the time of foreclosure and not be deducted from the carrying amount of the asset; payments on such debt should be charged to the liability. Interest that accrues after foreclosure should be recognized as interest expense.

.14 FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, was extracted by the FASB from SOP 78-3, *Accounting for Costs to Sell and Rent, and Initial Rental Operations of Real Estate Projects*; SOP 80-3, *Accounting for Real Estate Acquisition, Develop-*

---

<sup>2</sup> Fair value, as used in this SOP, is defined in paragraph 13 of FASB Statement No. 15 as follows: The fair value of the assets transferred is the amount that the . . . [creditor] could reasonably expect to receive for them in a current sale between a willing buyer and a willing seller, that is, other than in a forced or liquidation sale. Fair value of assets shall be measured by their market value if an active market for them exists. If no active market exists for the assets transferred but exists for similar assets, the selling prices in that market may be helpful in estimating the fair value of the assets transferred. If no market price is available, a forecast of expected cash flows may aid in estimating the fair value of assets transferred, provided the expected cash flows are discounted at a rate commensurate with the risk involved.<sup>6</sup>

<sup>6</sup> Some factors that may be relevant in estimating the fair value of various kinds of assets are described in paragraphs 88 and 89 of *APB* [Accounting Principles Board] *Opinion No. 16* ["Business Combinations"], paragraphs 12-14 of *APB Opinion No. 21*, "Interest on Receivables and Payables," and paragraph 25 of *APB Opinion No. 29*, "Accounting for Nonmonetary Transactions."

<sup>3</sup> The cost of such assets at the time of foreclosure is the fair value of the asset foreclosed or repossessed. Any specific valuation allowance related to the loan should not be carried forward. This SOP provides no guidance for determining cost subsequent to foreclosure (see paragraphs A-6 and A-7 of the Appendix [paragraph .18]).

<sup>4</sup> Because the allowance is considered a valuation adjustment, insurance enterprises should report changes in the valuation allowance as realized gains and losses in income, not as unrealized gains and losses in equity.

*ment, and Construction Costs*, and the AICPA Industry Audit Guide *Accounting for Retail Land Sales*. These documents did not, in the opinion of AcSEC, apply to foreclosed real estate held for sale. AcSEC therefore believes that the fair-value test in this SOP, not the net-realizable-value test in FASB Statement No. 67, should be applied to foreclosed real estate held for sale, except when the foreclosed real estate was previously owned by the lender and accounted for under FASB Statement No. 67, in which case such foreclosed assets should be accounted for under FASB Statement No. 67.

## **Foreclosed Assets Held for the Production of Income**

.15 After foreclosure, assets determined to be held for the production of income (and not held for sale) should be reported and accounted for in the same way that they would be had the assets been acquired other than through foreclosure.

## **Change in Classification**

.16 If it is subsequently decided that a foreclosed asset classified as held for sale will be held for the production of income, the asset should be reclassified from the held-for-sale category. The reclassification should be made at the amount the asset's carrying amount would have been had the asset been held for the production of income since the time of foreclosure. Selling costs included in the valuation allowance should be reversed. The net effect should be reported in income from continuing operations in the period in which the decision not to sell the asset is made.

## **Effective Date and Transition**

.17 This SOP should be applied to foreclosed assets in annual financial statements for periods ending on or after December 15, 1992, with earlier application permitted. On initial application of this SOP, all enterprises should adjust the carrying amount of foreclosed assets held for sale to the lower of (a) the fair value of the asset minus the estimated costs to sell the asset or (b) the cost of the asset as of the date of the initial adoption of this SOP. For many enterprises, adoption of this SOP will result in a change in accounting principle. The nature of the change should be disclosed in the financial statements of the period in which the change is made. Any adjustment arising from the initial application of this SOP should be included in income from continuing operations in the period in which the change is made. No restatement of previously issued financial statements or cumulative-effect adjustment as of the beginning of the year this SOP is first applied is permitted.

## Appendix

### Discussion of Major Comments on the Exposure Draft

A-1. This appendix summarizes considerations that were deemed significant by members of AcSEC in reaching the conclusions in this SOP.

A-2. In the exposure draft, AcSEC concluded that there is a rebuttable presumption that foreclosed assets are held for sale and that foreclosed assets held for sale should be carried at the lower of cost or fair value minus the estimated costs to sell. Few respondents objected to those conclusions.

### Held-for-Sale Presumption

A-3. Some respondents requested more explanation of the circumstances under which the held-for-sale presumption could be rebutted. After considering the concerns expressed by respondents about the rebuttable presumption, AcSEC decided not to give detailed, specific guidance, thereby allowing for the exercise of judgment in determining whether the presumption is rebutted by the facts in particular circumstances.

A-4. AcSEC recognizes that some enterprises may hold foreclosed assets for several years before sale and may even operate the assets, but concludes that a holding period in excess of one year does not, in and of itself, rebut the held-for-sale presumption. Further, AcSEC notes that if the form of the foreclosed asset is a majority interest in an enterprise, FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, requires the subsidiary to be consolidated unless control is likely to be temporary.

### Fair Value

A-5. Some respondents requested guidance on the determination of fair value. AcSEC recognizes that estimating fair value requires judgment. AcSEC concluded, however, that it would be inappropriate and is unnecessary to develop a new definition of fair value in this SOP, and that the definition of fair value in FASB Statement No. 15 should be used in this SOP. Moreover, AcSEC believes that the following discussion about fair value from Statement No. 15, particularly paragraph 82, will be helpful in implementing this SOP.

#### *Concept of Fair Value*

79. Some respondents to the Exposure Draft continued to argue that all troubled debt restructurings should be accounted for as modifications of the terms of debt and that none should be accounted for as transfers of assets (paragraphs 66 and 67). Others accepted the need to account for some troubled debt restructurings as asset transfers but held that obtaining assets through foreclosure or repossession under terms included in lending agreements should be distinguished from obtaining assets in exchange for cash or in other "asset swaps." They contended that (a) only the form of the asset is changed by foreclosure or repossession, (b) the substance of a secured loan is that the lender may choose either to postpone receipt of cash or take the asset to optimize cash receipts and recovery of its investment, and (c) foreclosure or repossession is not the completion of a lending transaction but merely a step in the transaction that begins with lending cash and ends with collecting cash.

80. The Board rejected those arguments for the reasons given in paragraphs 71-77, emphasizing that an event in which (a) an asset is transferred between debtor and creditor, (b) the creditor relinquishes all or part of its claim against the debtor, and (c) the debtor is absolved of all or part of its obligation to the creditor is the kind of event that is the basis of accounting under the existing

transaction-based accounting framework. To fail to recognize an event that fits the usual description of a transaction and to recognize only the lending and collection of cash as transactions would significantly change the existing accounting framework.

81. Use of the fair value of an asset transferred to measure the debtor's gain on restructuring and gain or loss on the asset's disposal or the creditor's cost of acquisition is not adopting some kind of "current value accounting." On the contrary, that use of fair value is common practice within the existing accounting framework. Paragraph 13 of this Statement explains briefly the meaning of *fair value* and refers to *APB Opinions No. 16, No. 21, and No. 29*, which use *fair value* in the same way and provide guidance about determining fair values within the existing accounting framework. The term *fair value* is used in essentially the same way as *market value* was used in the Discussion Memorandum to denote a possible attribute to be measured at the time a debt is restructured. *Fair value* is defined in paragraph 181 of *APB Statement No. 4* as "the approximation of exchange price in transfers in which money or money claims are not involved." Although a "money claim" is necessarily involved in transferring assets to settle a payable in a troubled debt restructuring, the troubled circumstances in which the transfer occurs make it obvious that the amount of the "money claim" does not establish an exchange price. Determining fair value of the assets transferred in a troubled debt restructuring is usually necessary to approximate an exchange price for the same reasons that determining fair value is necessary to account for transfers of assets in nonmonetary transactions (*APB Opinion No. 29*).

82. That point is emphasized in this Appendix because some respondents to the Exposure Draft apparently misunderstood the concept of fair value (paragraph 11 of the Exposure Draft and paragraph 13 of this Statement) and the discounting of expected cash flows specified in those paragraphs. *Paragraph 13 permits discounting of expected cash flows from an asset transferred or received in a troubled debt restructuring to be used to estimate fair value only if no market prices are available either for the asset or for similar assets. The sole purpose of discounting cash flows in that paragraph is to estimate a current market price as if the asset were being sold by the debtor to the creditor for cash. That estimated market price provides the equivalent of a sale price on which the debtor can base measurement of a gain on restructuring and a gain or loss on disposal of the asset and the equivalent of a purchase price on which the creditor can measure the acquisition cost of the asset. To approximate a market price, the estimate of fair value should use cash flows and discounting in the same way the marketplace does to set prices—in essence, the marketplace discounts expected future cash flows from a particular asset "at a rate commensurate with the risk involved" in holding the asset. An individual assessment of expected cash flows and risk may differ from what the marketplace's assessment would be, but the procedure is the same. [Emphasis added by AcSEC.]*

83. In contrast to the purpose of paragraph 13, *AICPA Statement of Position No. 75-2*<sup>31</sup> is concerned with different measures—net realizable value to a creditor of a receivable secured by real property and net realizable value of repossessed or foreclosed property. Its method of accounting for assets obtained by foreclosure or repossession thus differs from the method specified in this Statement. It proposes discounting expected cash flows at a rate based on the creditor's "cost of money" to measure the "holding cost" of the asset until its realizable value is collected in cash. The concept of fair value in paragraph 13 does not involve questions of whether interest is a "holding cost" or "period cost" because it is concerned with estimating market price, not net realizable value, however defined. Accounting for transfers of assets in troubled debt restructurings and for the assets after transfer is, of course, governed by this Statement.

<sup>31</sup> See paragraphs 59 and 60 of this Statement.

[Note: Paragraph 13 of Statement of Position 75-2, *Accounting Practices of Real Estate Investment Trusts*, has been effectively superseded by FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*, and FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]]

## Results of Operations Related to Foreclosed Assets Held for Sale

**A-6.** In the exposure draft, AcSEC proposed that there should be no results of operations—revenues and expenses—from foreclosed assets while they are held for sale; net cash receipts related to foreclosed assets during the holding period would have been credited to the carrying amount of the asset, and net cash payments, except for capital additions and improvements, would have been charged to income as a loss on holding the foreclosed assets. Further, in the exposure draft, AcSEC concluded that no depreciation, depletion, or amortization expense should be recorded. Many respondents objected to the exclusion of the results of operating a foreclosed asset from income; many also objected to crediting net cash receipts to the carrying amount of the asset and charging net cash payments to income. They raised questions about the conservatism of such treatment, about whether the treatment was conceptually sound, and about whether it would be practical to implement. Some comment letters also raised questions about whether it is appropriate not to depreciate foreclosed assets held for sale. After considering the comments, AcSEC decided not to adopt the method proposed in the exposure draft.

**A-7.** AcSEC considered various other ways to account for operations during the period foreclosed assets are held for sale, such as—

- Reporting the net of revenues and expenses in income, including charges or credits related to changes in the valuation allowance and depreciation expense on depreciable assets, for each reporting period as a gain or loss on holding the asset.
- Reporting the net of revenues and expenses in income, including charges or credits related to changes in the valuation allowance and depreciation expense on depreciable assets held or expected to be held for more than a specified length of time (for example, one year).
- Reporting the net of revenues and expenses in income, including charges or credits related to changes in the valuation allowance, and recognizing no depreciation expense.
- Crediting or debiting the net of revenues and expenses to the asset, and recognizing no depreciation expense. Changes in the valuation allowance would be included in income.

AcSEC believes that it should consider those options further and that its ultimate decision on the treatment of operations during the period foreclosed assets are held for sale should be exposed for public comment; AcSEC intends to undertake such a project. However, because AcSEC believes that its conclusion that foreclosed assets held for sale should be carried at the lower of fair value minus estimated costs to sell or cost would not change regardless of its conclusions on operations of foreclosed assets, AcSEC decided that it should issue the guidance in this SOP now, rather than delay issuing the guidance until the results of operations issues are resolved.

## Foreclosed Assets Held for the Production of Income

**A-8.** In the exposure draft, AcSEC proposed to require that foreclosed assets held for the production of income be carried at an amount not greater than the assets' net realizable value. AcSEC decided to eliminate that statement.

### Change in Classification

**A-9.** AcSEC also decided that, on reclassification of a foreclosed asset from the held-for-sale category, the asset should be measured and recorded as if the asset had been held for the production of income since foreclosure. That decision is consistent with the consensus of the Emerging Issues Task Force in Issue 2 of Issue 90-6, where the reversal of a decision to sell an asset acquired in a business combination gives rise to an accounting as if the asset had never been held for sale.

### In-Substance Foreclosed Assets

**A-10.** Many respondents asked for specific guidance on in-substance foreclosed assets, and they asked whether the SOP would apply to such assets. AcSEC concluded that, except for paragraphs .12 and .17, the guidance in this SOP need not be applied to in-substance foreclosures for the following reasons:

- a. The accounting for in-substance foreclosed assets was not explicitly addressed in the exposure draft.
- b. AcSEC would have found it difficult to resolve issues concerning senior debt related to in-substance foreclosed assets.

However, AcSEC notes that paragraph 34 of FASB Statement No. 15; paragraph 6 of AICPA Practice Bulletin 7, *Criteria for Determining Whether Collateral for a Loan Has Been In-Substance Foreclosed* [section 12,070.06\*]; and SEC Financial Reporting Release 28, *Accounting for Loan Losses by Registrants Engaged in Lending Activities*, include accounting guidance related to in-substance foreclosed assets indicating that in-substance foreclosed assets should be accounted for in the same way as assets that have actually been foreclosed or repossessed. Further, AcSEC concluded that for purposes of applying this SOP, the held-for-sale presumption could not be rebutted for in-substance foreclosed assets. Accordingly, after in-substance foreclosure, an in-substance foreclosed asset, like a foreclosed asset held for sale, would be reported in the balance sheet at the lower of (a) fair value minus estimated costs to sell or (b) cost.

### Carrying Amount of Assets at Foreclosure

**A-11.** Some respondents expressed concerns and opinions about the carrying amount of the foreclosed assets to be recognized at foreclosure. The exposure draft indicated that the attribute to be recognized at foreclosure should be the fair value of the collateral, implying that, if at the time of foreclosure the fair value of the collateral is greater than the recorded investment in the related loan, a credit to income would result. Some respondents suggested that no such credits should be permitted and that the carrying amount of the asset recognized at foreclosure should be the lower of the fair value of the collateral or the

---

\* Practice Bulletin 7, *Criteria for Determining Whether Collateral for a Loan Has Been In-Substance Foreclosed*, was withdrawn in December 1994 by the Accounting Standards Executive Committee. [Footnote added, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

recorded investment in the loan. Notwithstanding those concerns, AcSEC notes that paragraph 28 of FASB Statement No. 15 requires that foreclosed assets be accounted for at their fair value at the time of foreclosure.

**A-12.** Some respondents also said that the definition of *fair value*, which is the definition in paragraph 13 of FASB Statement No. 15, implicitly contains a reduction for selling costs. For purposes of applying this SOP, AcSEC believes that the definition of fair value in paragraph 13 of FASB Statement No. 15 should be viewed as the cash sales/purchase price in a principal-to-principal transaction wherein no agents, dealers, brokers, or commission merchants are involved. If either principal decides to involve and pay outsiders to assist that principal, or to bring principals together, any amount paid by that principal is independent of the fair value of the asset and does not affect that fair value. Accordingly, immediately after foreclosure, a valuation allowance related to foreclosed assets held for sale should be recognized for estimated costs to sell through a charge to income.

## Offsetting of Debt

**A-13.** Contrary to what was proposed by AcSEC in the exposure draft, some respondents suggested that nonrecourse senior debt not assumed by the holder of the foreclosed asset be offset against the carrying amount of the asset. To protect its interest in the asset, the holder of the asset will have to settle the debt or have a subsequent transferee take the asset subject to the debt. If debt is offset, leverage is not portrayed, and the degree of possible gain is obscured. Moreover, offsetting nonrecourse senior debt against a foreclosed asset would be inconsistent with the manner in which such debt is portrayed when assets are purchased for cash and there is related nonrecourse debt. Therefore, AcSEC reaffirms that senior debt should not be offset against the asset.

## Transition

**A-14.** Comments were specifically requested on the transition proposed in the exposure draft. Most respondents agreed that determining the cumulative effect of the change in accounting principle would either be impossible or possible only at significant cost for enterprises that do not have available the fair value of foreclosed assets at earlier balance sheet dates, and that a restatement of previously issued financial statements or a cumulative effect adjustment should not be required. Further, AcSEC concluded that, because one of the principal objectives of this SOP is to have consistent accounting of foreclosed assets, those two alternatives should not be permitted.

## Section 10,520

# **Statement of Position 92-5 Accounting for Foreign Property and Liability Reinsurance**

June 1, 1992

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the AICPA authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction**

.01 The promulgation of rules and regulations by state insurance departments and the adoption of specialized insurance industry accounting standards by the Financial Accounting Standards Board (FASB) have resulted in considerable uniformity in accounting practices in the insurance industry in the United States. Outside the United States, insurance accounting and reporting practices vary widely. The diversity in insurance accounting and reporting practices of foreign insurance companies has led to questions on how U.S. insurance companies should account for property and liability reinsurance assumed from foreign companies (foreign reinsurance).

.02 Reinsurers assuming business from domestic companies have historically had sufficient information to monitor and account for contract results. In contrast, some reinsurers assuming business from foreign companies do not receive such information, because in some foreign jurisdictions, insurance companies' accounting and reporting practices concerning periodic recognition of revenue and incurred claims are substantially different from U.S. practices. Therefore, reinsurers assuming business from foreign ceding companies cannot always obtain sufficient information to periodically estimate earned premiums for the business assumed from the foreign ceding companies.

.03 A significant amount of reinsurance is transacted through syndicates organized by Lloyd's of London. Lloyd's syndicates report the amounts of premiums, claims, and expenses recorded in an underwriting account for a particular year to the assuming companies that participate in the syndicates. The syndicates generally keep accounts open for three years. Traditionally, three years have been necessary to report substantially all premiums associated with an underwriting year and to report most related claims, although

claims may remain unsettled after the account is closed. A Lloyd's syndicate typically closes an underwriting account by reinsuring outstanding claims on that account with a syndicate for the next underwriting year. The ceding syndicate pays the assuming syndicate an amount based on the unearned premiums and outstanding claims in the underwriting account at the date of the assumption and distributes the remaining balance to its participants.

## Current Practices

.04 Three methods are currently used in the United States to account for foreign property and liability reinsurance: the periodic method, the zero balance method, and the open year method.

### Periodic Method

.05 The periodic method of accounting for reinsurance provides for current recognition of profits and losses. It is used when ultimate premiums and the period of recognition can be reasonably estimated currently. Premiums are recognized as revenue over the policy term, and claims, including an estimate of claims incurred but not reported, are recognized as they occur. The periodic method is consistent with current practice for primary insurance and domestic reinsurance for which sufficient information is available to reasonably estimate and recognize earned premiums and related claims. (Refer to FASB Statement of Financial Accounting Standards No. 60, *Accounting and Reporting by Insurance Enterprises*.)

.06 Some foreign ceding companies maintain the information necessary to estimate earned premiums, incurred claims, and related expenses currently. As a result, U.S. reinsurers doing business with these foreign ceding companies are able to account for reinsurance assumed by applying the same periodic method of accounting that they use to account for domestic reinsurance. Although not all foreign ceding companies maintain and report current information necessary to estimate earned premiums, incurred claims, and related expenses, some U.S. reinsurers have sufficient experience with the foreign business assumed to estimate earned premiums. When earned premiums can be estimated, sufficient information usually exists to estimate incurred claims and related expenses. Anticipated results based on either the reinsurer's experience or reported data make it possible to reasonably estimate underwriting results and use the periodic method.

### Zero Balance Method

.07 Many foreign ceding companies do not maintain the information necessary to estimate earned premiums. As a result, U.S. reinsurers doing business with these foreign companies generally are not able to apply the periodic method of accounting. Some of these companies use the zero balance method, which is a modified cash basis of accounting. This method is similar to the cost recovery method described in FASB Statement No. 60, paragraph 14. Because of the inherent lag in reporting claims, profits reported by foreign ceding companies in early years often exceed the total profits that will ultimately be realized. To avoid reporting overstated profits, companies using this method adjust the records with arbitrary provisions for claims incurred in amounts that exactly offset the cash basis profits.

### Open Year Method

.08 Under the open year method, underwriting results of foreign reinsurance are not included in the income statement until sufficient information be-

comes available to provide reasonable estimates of earned premiums. The open year method is similar to the deposit method as defined in FASB Statement No. 60. Because the measurement period extends over more than one accounting period, premiums, claims, and expenses are not immediately included in operating results. Instead, they are accumulated and reported in the balance sheet as an open underwriting balance. The underwriting balance is disaggregated and reported in the income statement as premiums, claims, and expenses only when earned premiums become reasonably determinable. If it is probable that a loss has been incurred before an underwriting balance is closed, a provision for a loss generally is recorded. Examples of situations in which a provision may be recorded before an underwriting balance is closed include catastrophic losses, higher-than-expected claim frequency, significant unanticipated adverse events, or a negative open year account. The accounting treatment is similar to that for premium deficiencies described in FASB Statement No. 60, paragraph 32.

## Comparison With Practices in Other Industries

.09 Deferral of revenue occurs in industries that sell goods subject to rights of return. If a right of return exists, current recognition of a sale is not permitted unless the amount of future returns is reasonably estimable. If that amount is not reasonably estimable, recognition of income is postponed until the return privilege has substantially expired. Income recognition is also postponed for certain real estate sales through the use of the installment and cost recovery methods. Those methods are analogous to the open year method.

## Discussion

.10 Methods that defer recognition of underwriting profits raise financial accounting issues concerning (a) whether premiums and claims should be reported as income currently, even though the related underwriting balance<sup>1</sup> is deferred, and (b) whether the underwriting balance should be recorded as deferred income or as an addition to claim liabilities. Most companies that follow the zero balance method record premium and claim amounts currently and defer recognition of profits by additions to claim liabilities. Although this presentation provides timely information on the volume of business being conducted by the enterprise, the usefulness of the information is limited because the related profit margins are not also reported.

.11 Current accounting literature supports alternative methods of financial presentation when profit recognition is deferred. For example, recognition as income of both revenues and related costs is deferred under the completed contract method until the contract is substantially completed. However, if either the installment method or cost recovery method is used to defer the recognition of gain on the sale of real estate, the sale and related costs are ordinarily reported on the date of the transaction. The deferred profit is reported separately in the income statement as a deduction from sales in the year the transaction occurs and as a separate item of revenue in future years' income statements, when the profit is recognized.

.12 Proponents of presenting premiums, claims, and expenses in the income statement when the amounts are reported to the reinsurer point out

---

<sup>1</sup> The term *underwriting balance* refers to the excess of reported premiums over reported claims and expenses. This amount is not intended to represent income realized on a contract.

that excluding those amounts from the income statement until an underwriting year is closed does not reflect the economic substance of current period activities under the reinsurance contract. In response to criticism that presentation of the amounts in the income statement may cause profit margins to be misstated, they argue that disclosure of profits deferred and profits recognized provides sufficient information for users to evaluate operating results.

.13 Proponents of reporting deferred amounts in the balance sheet until the profits relating to the underwriting year are recognized point out that the income statement should reflect profit margins associated with the premium volume reported in the income statement, and that this can best be done by recognizing the related premiums in the periods the profits are recognized. They acknowledge that premiums, claims, and expenses associated with a contract in a period may be important information to users, but they argue that the information could be disclosed in the notes to the financial statements or in the statement of cash flows to avoid misstating the profit margins.

## Conclusions

.14 The periodic method should be used to account for foreign reinsurance except in the circumstance described in paragraph .15.

.15 If, due to local revenue recognition policies, the foreign ceding company cannot provide the information required by the assuming company to estimate both the ultimate premiums and the appropriate periods of recognition in accordance with U.S. generally accepted accounting principles, then the open year method should be used.<sup>2</sup> The presence of uncertainties that may be inherent in estimating earned premiums is not an acceptable basis for using the open year method. As discussed in paragraph .08, premiums, claims, commissions, and related direct taxes should not be reported currently as income under the open year method; instead, they should be included in the open underwriting balance to which they pertain. The underwriting balances should be aggregated and included in the balance sheet as a liability. Each underwriting balance should be kept open until sufficient information becomes available to record a reasonable estimate of earned premiums. The underwriting balance should be disaggregated and reported in the income statement as premiums, claims, commissions, and related direct taxes when earned premiums are reasonably determinable.

.16 If it becomes probable that a loss has been incurred before an underwriting balance is closed, a provision for the loss should be recorded.

.17 The periodic and open year methods are not interchangeable in the same circumstances. The periodic method should be used to account for foreign reinsurance. Only if reasonable estimates cannot be made currently, for the reason discussed in paragraph .15, should the open year method be used. The periodic and open year methods are not alternative accounting principles as discussed in Accounting Principles Board (APB) Opinion No. 20, *Accounting Changes*. Rather, one or the other is to be used depending on the circumstances. As such, changes between these methods are not accounting changes. In addition, changes from the periodic method to the open year method would be seldom.

---

<sup>2</sup> If the foreign ceding company maintains supplementary records that are sufficient to reasonably estimate earned premiums currently, then the U.S. assuming company should obtain the necessary information and use the periodic method to account for the foreign reinsurance.

.18 The zero balance method should not be used because it results in misstatement of the income statement by arbitrarily recognizing revenues and costs. The method also causes the profit to be reported in periods other than those in which the related premiums, claims, and expenses are reported.

## Disclosures

.19 Disclosure in the financial statements of an insurance company's accounting policies should include a description of the methods used to account for foreign reinsurance. In addition, for foreign reinsurance accounted for by the open year method, the following should be disclosed for each period for which an income statement is presented:

- The amounts of premiums, claims, and expenses recognized as income on closing underwriting balances
- The additions to underwriting balances for the year for reported premiums, claims, and expenses.

Also, the amounts of premiums, claims, and expenses in the underwriting account should be disclosed for each balance sheet presented.

## Effective Date and Transition

.20 This SOP should be applied prospectively to contracts or arrangements covered by it and entered into in fiscal years beginning on or after December 15, 1992. Retroactive application, by restating all prior years presented, is encouraged but not required.

**Section 10,530****Statement of Position 92-6  
Accounting and Reporting by Health and  
Welfare Benefit Plans****August 3, 1992****NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least a majority of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

Statement of Position (SOP) 92-6 is amended by SOP 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans*. SOP 94-4 is effective for financial statements for plan years beginning after December 15, 1994, except that the application of SOP 94-4 to investment contracts entered into before December 15, 1993, is delayed to plan years beginning after December 15, 1995. Earlier application of SOP 94-4 is encouraged. Accounting changes adopted to conform to the provisions of SOP 94-4 should be made as of the beginning of the year in which the change is adopted. The effect of initially applying SOP 94-4 should be reported in a manner similar to the cumulative effect of a change in accounting principle (APB Opinion No. 20, *Accounting Changes*, paragraph 20). Pro forma effects of retroactive application (APB Opinion No. 20, paragraph 21) are not required. Restatement of financial statements of prior years is not permitted.

**Scope**

- .01** Health and welfare benefit plans include plans that provide—
- a. Medical, dental, visual, psychiatric, or long-term health care; life insurance (offered separately from a pension plan); certain severance benefits; or accidental death or dismemberment benefits.
  - b. Benefits for unemployment, disability, vacations, or holidays.
  - c. Other benefits such as apprenticeships, tuition assistance, day care, dependent care, housing subsidies, or legal services.

This statement of position (SOP) applies to both defined-benefit and defined-contribution health and welfare benefit plans (referred to hereafter as *health and welfare benefit plans*).

**.02** Defined-benefit health and welfare plans specify a determinable benefit, which may be in the form of a reimbursement to the covered plan participant or a direct payment to providers or third-party insurers for the cost of specified services. Such plans may also include benefits that are payable as a lump sum, such as death benefits. The level of benefits may be defined or limited based on factors such as age, years of service, and salary. Contributions may be determined by the plan's actuary or be based on actual claims paid or other factors determined by the plan sponsor. Even when a plan is funded pursuant to agreements that specify a fixed rate of employer contributions (for example, a collectively bargained multiemployer plan), such a plan may nevertheless be a defined-benefit health and welfare plan if its substance is to provide a defined benefit.

**.03** Defined-contribution health and welfare plans maintain an individual account for each plan participant. They have terms that specify the means of determining the contributions to participants' accounts, rather than the amount of benefits the participants are to receive. The benefits a plan participant will receive are limited to the amount contributed to the participant's account, investment experience, expenses, and any forfeitures allocated to the participant's account. These plans also include flexible spending arrangements.

**.04** Health and welfare benefit plans generally are subject to certain fiduciary, reporting, and other requirements of the Employee Retirement Income Security Act of 1974 (ERISA). Plans that are unfunded (that is, those whose benefits are paid solely and directly out of the general assets of the employer), are fully insured (through the direct payment of premiums to the insurance company by the employer; see paragraphs .14 and .15), or are certain combinations thereof (for example, self-funded plans with stop-loss coverage; see paragraph .17) may not be required to include financial statements in their ERISA filings.<sup>1</sup> An understanding of the health and welfare benefit plan is needed to determine its accounting and reporting requirements. It is also important to consider the new forms of funding vehicles that are emerging, particularly with respect to postretirement health benefits.

**.05** This SOP describes generally accepted accounting principles (GAAP) that are particularly important to defined-benefit and defined-contribution health and welfare plans. Generally accepted accounting principles other than those discussed in this SOP may also apply. This SOP does not address the preparation of financial statements on a comprehensive basis of accounting other than GAAP; however, the presentation of a plan's benefit obligation information in GAAP-basis financial statements, as required by paragraph .20, is consistent with the disclosures required in financial statements prepared on such bases as the cash basis or modified cash basis, as defined by the requirements of financial reporting to the Department of Labor (DOL).

**.06** The most significant changes in accounting and reporting by health and welfare benefit plans that this SOP makes to the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans* are the following:

- The objective of financial reporting by a defined-benefit health and welfare plan has been clarified and is the same as the objective of financial reporting by a defined-benefit pension plan (see paragraph .19).

---

<sup>1</sup> Refer to appendix A of the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*.

- Single-employer, multiemployer, and multiple-employer defined-benefit health and welfare plans should account for and separately report benefit obligations, including postretirement benefit obligations (see paragraphs .41 through .54). Information regarding benefit obligations should be presented on the face of one or more financial statements. Note disclosure is not appropriate (see paragraph .20).
- The requirement to recognize claims incurred but not reported (IBNR) has been clarified. For a self-funded plan, the cost of IBNR includes the present value of the estimated ultimate cost of settling the claims, including estimated costs to be incurred after the financial statement date (for example, the cost of disability; see paragraph .44).
- Benefit obligations should not include death benefits actuarially expected to be paid during the active service period of participants (see paragraph .41).
- Defined-contribution health and welfare plans are distinguished from defined-benefit health and welfare plans (see paragraphs .03 and .23).
- The calculation of the obligation for accumulated eligibility credits has been clarified and generally should consider mortality rates and the probability of employee turnover (see paragraph .48).

**.07** Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, does not apply to health and welfare benefit plans; however, as set forth in the guide, the methods of valuing plan investments and requirements for financial statement disclosures are the same as those specified in FASB Statement No. 35 and are not changed by this SOP.

**.08** FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, establishes standards of financial accounting and reporting by employers for health and welfare benefits expected to be provided to a participant during retirement. While FASB Statement No. 106 does not apply to health and welfare benefit plans, this SOP adopts certain of its measurement concepts (see paragraphs .49 through .54). Terminology used in discussing postretirement benefits in this SOP is intended to follow usage and definitions provided in FASB Statement No. 106.

**.09** FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, applies to financial instruments of a pension plan other than the plan's obligation for pension benefits. This SOP conforms to the relevant disclosure requirements of FASB Statement No. 105 for financial instruments of health and welfare benefit plans other than obligations for benefits (see paragraph .58).

## Background

**.10** Plan participants may be active or terminated employees (including retirees), as well as covered dependents and beneficiaries, of a single employer or group of employers. Employer contributions may be voluntary or required under the terms of a collective bargaining agreement negotiated with one or more labor organizations. Plans may require contributions from employers and participants (contributory plans) or from employers only (noncontributory plans). During periods of unemployment, a noncontributory plan may require contributions by participants to maintain their eligibility for benefits. Benefits

may be provided through insurance contracts paid for by the plan (an insured plan), from net assets accumulated in a trust established by the plan (a self-funded plan), or both.

.11 As noted above, a plan may establish a trust to hold assets to pay all or part of the covered benefits. The assets may be segregated and legally restricted under a trust arrangement (such as a voluntary employees' beneficiary association or a 501(c)(9) trust, a 401(h) account, or other funding vehicles). Generally, if a separate trust exists, financial statements are required under ERISA. A trust always exists for a multiemployer plan. Such trustee plans with more than 100 participants generally will require an audit. For ERISA filings, the DOL will not accept an accountant's report that covers the assets of more than one plan. For example, where the assets of more than one plan are held in a 501(c)(9) Voluntary Employees' Beneficiary Association (VEBA) trust, separate reports must be prepared for each plan. If the trustee of the VEBA is a bank or trust company, and the trust holds the assets of more than one plan sponsored by a single employer or by a group of companies under common control, it is a master trust subject to the DOL's master trust filing requirements.

.12 A health and welfare plan may process benefit payments directly or it may retain a third-party administrator (see paragraph .18). In either case, a plan that is fully or partially self-funded is obligated for the related benefits (see paragraphs .41 through .54).

## Arrangements With Insurance Companies

.13 The nature of, and method of accounting for, the assets and benefit obligations of a health and welfare benefit plan may be determined by the arrangement with the insurance company. The insurance company may assume all or a portion of the financial risk (see paragraphs .14 through .17), or it may provide only administrative services (see paragraph .18) or investment management services.<sup>2</sup> It is important to have an understanding of the insurance arrangement to determine whether any or all of the risks associated with benefit payments or claims have been transferred to the insurance company. Also, other arrangements are being developed that may involve new types of contracts that involve other parties, including those involving payments to providers, risk sharing of administrative expense with carriers, and so on. Details of these arrangements must also be reviewed carefully.

.14 In a fully insured, pooled arrangement, specified benefits are covered by the insurance company. The insurance company pools the experience of the plan with that of other similar businesses and assumes the financial risk of adverse experience. In such an arrangement, a plan generally has no obligation for benefits covered by the arrangement other than the payment of premiums due to the insurance company (see paragraph .45).

.15 In a fully insured experience-rated arrangement, specified benefits are paid by the insurance company that assumes all the financial risk. Contract experience is monitored by the insurance company. Contract experience may or may not include the experience of other similar contract holders. To the extent that benefits incurred plus risk charges and administration costs are less than premiums paid, the plan is entitled to an experience-rating refund or dividend (see paragraphs .34 and .35). If the total of benefits incurred, risk charges, and administrative costs exceeds premiums, the accumulated loss

---

<sup>2</sup> Refer to chapter 7 of the guide.

is generally borne by the insurance company but may be carried over to future periods until it has been recovered (see paragraphs .46 and .47). The plan often has no obligation to continue coverage or to reimburse the carrier for any accumulated loss, although there are certain types of contracts that require additional payments by the plan.

.16 In a minimum premium plan arrangement, specified benefits are also paid by the insurance company. The insurance contract establishes a dollar limit, or *trigger point*. All claims paid by the insurance company below the trigger point are reimbursed by the plan to the insurance company. The insurance company is not reimbursed for benefits incurred that exceed the trigger point. This type of funding arrangement requires the plan to fund the full claims experience up to the trigger point. Minimum premium plan arrangements may have characteristics of both self-funded and fully insured experience-rated arrangements. Details of each arrangement must be reviewed carefully to determine the specific benefit obligations assumed by the insurance company.

.17 In a stop-loss insurance arrangement, a plan's obligation for any plan participant's claims may be limited to a fixed dollar amount, or the plan's total obligation may be limited to a maximum percentage (for example, 125 percent) of a preset expected claims level. These arrangements are commonly used with administrative service arrangements. The insurance company assumes the benefit obligation in excess of the limit. Stop-loss insurance arrangements may have characteristics of both self-funded and fully insured arrangements. Stop-loss arrangements of this type may be described by a variety of terms; therefore, details of all insurance or administrative arrangements should be reviewed carefully to determine if stop-loss provisions are included and to determine the specific benefit obligations assumed by the insurance company.

.18 In an administrative service arrangement, the plan retains the full obligation for plan benefits. The plan may engage an insurance company or other third party to act as the plan administrator. The administrator makes all benefit payments, charges the plan for those payments, and collects a fee for the services provided.

## Financial Statements of Defined-Benefit Health and Welfare Plans

.19 The objective of financial reporting by defined-benefit health and welfare plans is the same as that of defined-benefit pension plans; both types of plans provide a determinable benefit. Accordingly, the primary objective of the financial statements of a defined-benefit health and welfare plan is to provide financial information that is useful in assessing the plan's present and future ability to pay its benefit obligations when due. To accomplish that objective, a plan's financial statements should provide information about (a) plan resources and the manner in which the stewardship responsibility for those resources has been discharged, (b) benefit obligations, (c) the results of transactions and events that affect the information about those resources and obligations, and (d) other factors necessary for users to understand the information provided.<sup>3</sup>

---

<sup>3</sup> It should be recognized that (a) information in addition to that contained in a plan's financial statements is needed in assessing the plan's present and future ability to pay its benefit obligations when due and (b) financial statements for several plan years may provide more useful information in assessing the plan's future ability to pay benefit obligations than can financial statements for a single year.

**.20** The financial statements of a defined-benefit health and welfare plan prepared in accordance with GAAP<sup>4</sup> should be prepared on the accrual basis of accounting and include—

- A statement of net assets available for benefits as of the end of the plan year (see paragraphs .25 through .38).
- A statement of changes in net assets available for benefits for the year then ended (see paragraphs .39 and .40).
- Information regarding the plan's benefit obligations as of the end of the plan year (see paragraphs .41 through .54).
- Information regarding the effects, if significant, of certain factors affecting the year-to-year change in the plan's benefit obligations (see paragraphs .55 and .56).

Information regarding the benefit obligations should be presented on the face of one or more financial statements. The information should be presented in such reasonable detail as is necessary to identify the nature and classification of the obligations.<sup>5</sup>

**.21** FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*, provides that employee benefit plans other than pension plans (such as health and welfare plans, both defined benefit and defined contribution) that provide information similar to that required by FASB Statement No. 35 are not required to provide a statement of cash flows. However, FASB Statement No. 102 encourages that a statement of cash flows be included in the financial statements of an employee benefit plan when such a statement would provide relevant information about the ability of the plan to meet future obligations (for example, when the plan invests in assets that are not highly liquid or obtains financing for investments).

## Financial Statements of Defined-Contribution Health and Welfare Plans

**.22** The objective of financial reporting by a defined-contribution health and welfare plan is to provide financial information that is useful in assessing the plan's present and future ability to pay its benefits when due. To accomplish that objective, a plan's financial statements should provide information about (a) plan resources and the manner in which the stewardship responsibility for those resources has been discharged, (b) the results of transactions and events that affect the information about those resources, and (c) other factors necessary for users to understand the information provided.<sup>6</sup>

**.23** The financial statements of a defined-contribution health and welfare plan prepared in accordance with GAAP<sup>7</sup> should be prepared on the accrual basis of accounting and include—

---

<sup>4</sup> Financial statements prepared on a comprehensive basis of accounting other than GAAP should disclose information regarding benefit obligations (see paragraphs 13.19 through 13.22 of the guide, which discuss auditor's report considerations).

<sup>5</sup> The appendix (paragraph .67) of this SOP provides illustrative financial statements of two health and welfare benefit plans.

<sup>6</sup> See footnote 3.

<sup>7</sup> See footnote 4.

- A statement of net assets available for benefits of the plan as of the end of the plan year (see paragraphs .25 through .38).
- A statement of changes in net assets available for benefits of the plan for the year then ended (see paragraphs .39 and .40).

Because a plan's obligation to provide benefits is limited to the amounts accumulated in an individual's account, information regarding benefit obligations is not applicable.

## ERISA Reporting Requirements

.24 ERISA established annual reporting requirements for employee benefit plans, including health and welfare benefit plans.<sup>8</sup> The financial statements required by ERISA are a statement of assets and liabilities and a statement of changes in net assets available for benefits. The schedules required by ERISA include assets held for investment purposes, transactions with parties in interest, loans or fixed-income obligations due that are in default or uncollectible, leases that are in default or uncollectible, and reportable transactions.

## Statement of Net Assets Available for Benefits

### Investments

.25 Plan investments, whether they are in the form of equity or debt securities, real estate, or other investments (*excluding insurance contracts and fully benefit-responsive investment contracts held by defined-contribution health and welfare benefit plans*), should be reported at their fair value at the financial statement date.<sup>9</sup> The fair value of an investment is the amount that the plan could reasonably expect to receive for it in a current sale between a willing buyer and a willing seller, that is, other than in a forced or liquidation sale. Fair value should be measured by the market price if there is an active market for the investment. If there is no active market for the investment but there is a market for similar investments, selling prices in that market may be helpful in estimating fair value. If a market price is not available, a forecast of expected cash flows, discounted at a rate commensurate with the risk involved, may be used to estimate fair value.<sup>10</sup> [As amended, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

.26 Insurance contracts, as defined by FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, should be presented in the same manner as specified in the annual report filed by the plan with certain govern-

---

<sup>8</sup> ERISA annual reporting requirements, as well as the common exemptions, are described in appendix A of the guide.

<sup>9</sup> The accrual basis of accounting requires that purchases and sales of securities be recorded on a trade-date basis. However, if the settlement date is later than the financial statement date and (a) the fair value of the securities purchased or sold just before the financial statement date does not change significantly from the trade date to the financial statement date and (b) the purchases or sales do not significantly affect the composition of the plan's assets available for benefits, accounting on a settlement-date basis for such sales and purchases is acceptable.

<sup>10</sup> For an indication of the factors to be considered in determining the discount rate, see paragraph 27 of FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*. The fair value of an investment should be reported net of the brokerage commissions and other costs normally incurred in a sale, if significant (see also paragraphs 2.09 and 2.10 of the guide).

mental agencies pursuant to ERISA; that is, either at fair value or at amounts determined by the insurance enterprise (contract value). Plans not subject to ERISA should present insurance contracts as if the plans were subject to the reporting requirements of ERISA. [As amended, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)<sup>[11]</sup>

.27 Investment contracts held by defined-benefit health and welfare benefit plans should be reported at their fair values. [Paragraph added, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

.28 Defined-contribution health and welfare benefit plans provide benefits based on the amounts contributed to employees' individual accounts plus or minus forfeitures, investment experience, and administrative expenses. In such plans, plan participants have a vested interest in monitoring the financial condition and operations of the plan since they bear investment risk under these plans, and plan transactions can directly affect their benefits (for example, investment mix, and risk and return). [Paragraph added, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

.29 Plan assets of defined-contribution health and welfare benefit plans should be measured and reported at values that are meaningful to financial statement users including plan participants. The contract value of a *fully benefit-responsive* investment contract held by a defined-contribution health and welfare benefit plan is the amount a participant would receive if he or she were to initiate transactions under the terms of the ongoing plan. Defined-contribution health and welfare benefit plans should report fully benefit-responsive investment contracts at contract value, which may or may not be equal to fair value. If, however, plan management is aware that an event has occurred that may affect the value of the contract (for example, a decline in the creditworthiness of the contract issuer or third-party guarantor—if different from the contract issuer—or the possibility of premature termination of the contract by the plan), pursuant to FASB Statement No. 5, *Accounting for Contingencies*, disclosure of the event or reporting the investment at less than contract value may be appropriate. [Paragraph added, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

.30 *Benefit responsiveness* is the extent to which a contract's terms permit and require withdrawals at contract value for benefit payments, loans, or transfers to other investment options offered to the participant by the plan. Investment contracts frequently are negotiated directly between the plan and the issuer and generally prohibit assignment of contracts or their proceeds to another party. Investment contracts must transfer the risk of principal and accrued interest to a financially responsible third party (that is, they provide for all participant-initiated transactions permitted by an ongoing plan at contract value with no conditions, limits, or restrictions) to be considered fully benefit-responsive. The plan itself must also allow plan participants reasonable access to their funds. If access to funds is substantially restricted by plan provisions, investment contracts held by those plans may not be considered to be fully benefit-responsive. For example, if plan participants are allowed access at contract value to all or a portion of their account balances only upon

---

<sup>[11]</sup> [Footnote deleted to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

termination of their participation in the plan, it would not be considered reasonable access and, therefore, investment contracts held by that plan would generally not be deemed to be fully benefit-responsive. However, in plans with a single investment fund that allow reasonable access to assets by inactive participants, restrictions on access to assets by active participants consistent with the objective of the plan (for example, retirement or health and welfare benefits) will not affect the benefit responsiveness of the investment contracts held by those single-fund plans. Also, if a plan limits participants' access to their account balances to certain specified times during the plan year (for example, semiannually or quarterly) to control the administrative costs of the plan, that limitation generally would not affect the benefit responsiveness of the investment contracts held by that plan. In addition, administrative provisions that place short-term restrictions (for example, three or six months) on transfers to competing fixed income investment options to limit arbitrage among those investment options (*equity wash* provisions) would not affect a contract's benefit responsiveness. [Paragraph added, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

.31 If a plan holds multiple contracts, each contract should be evaluated individually for benefit responsiveness. If a plan invests in pooled funds that hold investment contracts, each contract in the pooled fund should be evaluated individually for benefit responsiveness. However, if the pooled fund places any restrictions on access to funds for the payment of benefits, the underlying investment contracts would not be considered fully benefit-responsive. Contracts that provide for prospective interest adjustments may still be fully benefit-responsive provided that the terms of the contracts specify that the crediting interest rate cannot be less than zero. [Paragraph added, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

.32 Information regarding a plan's investments should be presented in enough detail to identify the types of investments and should indicate whether reported fair values have been measured by quoted prices in an active market or have been determined otherwise (paragraph .58 specifies additional disclosures related to investments). [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Contributions Receivable

.33 Contributions receivable are the amounts due, as of the date of the financial statements, to the plan from employers, participants, and other sources of funding (for example, state subsidies or federal grants), each of which should be separately identified. They include amounts due pursuant to firm commitments, as well as legal or contractual requirements. With respect to employers' contributions, evidence of a formal commitment may include (a) a resolution by the employer's governing body approving a specified contribution; (b) a consistent pattern of making payments after the end of the plan year, pursuant to an established funding policy that attributes such subsequent payments to the preceding plan year; (c) a deduction of a contribution for federal income tax purposes for periods ending on or before the financial statement date; or (d) the employer's recognition as of the financial statement date of a contribution payable to the plan.<sup>12</sup> Contributions receivable should

<sup>12</sup> The existence of an accrued liability in the employer's statement of financial position or a plan's benefit obligations exceeding its net assets available for benefit obligations does not, by itself, provide sufficient support for recognition of a contribution receivable by the plan.

include an allowance for estimated uncollectible amounts. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## **Deposits With and Receivables From Insurance Companies and Other Service Providers**

.34 Whether a premium paid to an insurance company represents payment for the transfer of risk or merely represents a deposit will depend on the circumstances of the arrangement. As noted earlier, the nature of payments made to an insurance company should be analyzed to determine the extent to which financial risk has been transferred from the plan to the insurance company. Insurance companies may require that a deposit be maintained that can be applied against possible future losses in excess of current premiums. These deposits should be reported as plan assets until such amounts are used to pay premiums. Similarly, premium stabilization reserves, which exist when premiums paid to an insurance company exceed the total of claims paid and other charges, are held by an insurance company and used to reduce future premium payments. Premium stabilization reserves generally should be reported as assets of the plan until such amounts are used to pay premiums. Disclosure of the nature of this type of deposit or reserve should be made. If such reserves are forfeitable if the insurance contract terminates, this possibility should be considered in recognizing this asset. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.35 Certain group insurance contracts covering health and welfare benefit plans include a provision for a refund, at the end of the policy year, of the excess of premiums paid over the total of paid claims, required reserves, and the fee charged by the insurance company. Often such experience-rating refunds (or dividends) are not determined by the insurance company for several months after the end of the policy year. In this event, and in cases when the policy year does not coincide with the plan's fiscal year, the refund due as of the financial statement date should be reported as a plan asset if it is probable that a refund is due and the amount can be reasonably estimated. If the amount of the refund cannot be reasonably estimated, that fact should be disclosed. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.36 Service providers may require that deposits by the plan be applied against claims paid on behalf of plan participants. Such deposits should be reported as plan assets until the deposit is applied against paid claims. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## **Operating Assets**

.37 Plan assets used in plan operations (for example, buildings, equipment, furniture and fixtures, and leasehold improvements) should be reported at cost less accumulated depreciation or amortization. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## **Accrued Liabilities**

.38 A plan may have liabilities (other than for benefits) that should be accrued. Such liabilities may be for amounts owed for securities purchased, income taxes payable by the plan, or other expenses (for example, third-party administrator fees). These liabilities should be deducted to arrive at net assets available for benefits. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Statement of Changes in Net Assets Available for Benefits

.39 The statement of changes in net assets available for benefits should be presented in enough detail to identify the significant changes during the year including, as applicable—

- Contributions from employers, segregated between cash and noncash contributions. A noncash contribution should be reported at fair value at the date of the contribution. The nature of noncash contributions should be described either parenthetically or in a note.
- Contributions from participants, including those collected and remitted by the sponsor.
- Contributions from other identified sources (for example, state subsidies or federal grants).
- The net appreciation or depreciation<sup>13</sup> in fair value for each significant class of investments, segregated between investments whose fair values have been measured by quoted prices in an active market and those whose fair values have been otherwise determined.
- Investment income, excluding the net appreciation or depreciation.
- Income taxes paid or payable, if applicable.
- Payments of claims, excluding payments made by an insurance company pursuant to contracts that are excluded from plan assets.
- Payments of premiums to insurance companies to purchase contracts that are excluded from plan assets.<sup>14</sup>
- Operating and administrative expenses.
- Other changes (such as transfers of assets to or from other plans), if significant.

[Paragraph renumbered by the issuance of Statement of Position 94-4.]

.40 The list of minimum disclosures is not intended to define the degree of detail or the manner of presenting the information, and subclassifications or additional classifications may be useful. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Benefit Obligations

.41 Benefit obligations<sup>15</sup> for health and welfare benefit plans should include the actuarial present value, as applicable, of the following:

- Claims payable and currently due for active and retired participants
- Premiums due under insurance arrangements
- Claims incurred but not reported to the plan for active participants<sup>16</sup>

<sup>13</sup> Net appreciation or depreciation includes realized gains and losses on investments that were both purchased and sold during the period. Ordinarily, information regarding the net appreciation or depreciation in the fair value of investments is found in the notes to the financial statements.

<sup>14</sup> Refer to paragraphs 7.25 and 7.26 of the guide for further discussion of allocated insurance contracts.

<sup>15</sup> Administrative expenses expected to be paid by the plan (not those paid by the sponsor) that are associated with providing benefit obligations shall be reflected by appropriately adjusting the assumed rates of return. The adjustment of the assumed rates of return shall be separately disclosed.

<sup>16</sup> IBNR may be computed in the aggregate for active participants and retirees. When the IBNR for retirees is not included in the postretirement benefit obligation, it may be included in claims incurred but not reported.

- Accumulated eligibility credits for active participants
- Postretirement benefits for—
  - Retired participants, including their beneficiaries and covered dependents
  - Active or terminated participants who are fully eligible to receive benefits
  - Active participants not yet fully eligible to receive benefits

Benefits expected to be earned for future service by active participants (for example, vacation benefits) during the term of their employment should not be included. Benefit obligations should be reported as of the end of the plan year.<sup>17</sup> The effect of plan amendments should be included in the computation of the expected and accumulated postretirement benefit obligations once they have been contractually agreed to, even if some provisions take effect only in future periods. For example, if a plan amendment grants a different benefit level for employees retiring after a future date, that increased or reduced benefit level should be included in current-period measurements for employees expected to retire after that date. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.42 As noted previously (see paragraph .20), information regarding benefit obligations may be presented either in a separate statement or with other information on another financial statement. However, all the information must be located in one place. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Claims

.43 In an insured health and welfare benefit plan, claims payable and currently due and claims incurred but not yet reported to the plan will be paid by the insurance company. Consequently, they should be excluded from the benefit obligations of the plan. Benefit obligations of a self-funded plan should present the amount of claims payable and currently due for active and retired participants, dependents, and beneficiaries and IBNR for active participants. IBNR for retired participants is included in the postretirement benefit obligation.<sup>18</sup> [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.44 For a self-funded plan, the cost of IBNR should be measured at the present value, as applicable, of the estimated ultimate cost to the plan of settling the claims. Estimated ultimate cost should reflect the plan's obligation to pay claims to or for participants (for example, continuing health coverage or long-term disability), regardless of status of employment, beyond the financial statement date pursuant to the provisions of the plan or regulatory requirements. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Premiums Due Under Insurance Arrangements

.45 Benefits to participants may be provided through insurance arrangements that transfer the risks of loss or liability to an insurance company (see paragraphs .14 through .17). Group insurance contracts for health and welfare plans are usually written for a one-year period, although the contract may pro-

---

<sup>17</sup> Postretirement benefit obligations should be determined as of the end of the plan year or, if used consistently from year to year, as of a date not more than three months prior to that date, in accordance with paragraph 72 of FASB Statement No. 106.

<sup>18</sup> See footnote 16.

vide for annual renewal. The contract generally specifies, among other things, the schedule of benefits, eligibility rules, premium rate per eligible participant, and the date that premiums are due. The benefit obligations should include any obligation for premiums due but not paid. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.46** If the insurance contract requires payment of additional premiums (for example, retrospective premiums) when the loss ratio exceeds a specified percentage, an obligation for the estimated additional premiums should be included in the benefit obligations. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.47** Experience ratings determined by the insurance company or by estimates (see paragraph .15) may result in a premium deficit. Premium deficits should be included in the benefit obligations if (a) it is probable that the deficit will be applied against the amounts of future premiums or future experience-rating refunds<sup>19</sup> and (b) the amount can be reasonably estimated. If no obligation is included for a premium deficit because either or both of the conditions are not met, or if an exposure to loss exists in excess of the amount accrued, disclosure of the premium deficit should be made if it is reasonably possible that a loss or an additional loss has been incurred. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## **Accumulated Eligibility Credits**

**.48** Plans may provide for the payment of insurance premiums or benefits for a period of time for those participants who have accumulated a sufficient number of eligibility credits or hours. Eligible participants are provided with insurance coverage during periods of unemployment, when employer contributions to the plan would not otherwise provide coverage or benefits. At the financial statement date, such accumulated eligibility credits represent an obligation of the plan arising from prior employee service for which employer contributions have been received. This benefit obligation is generally determined by applying current insurance premium rates to accumulated eligibility credits or, for a self-funded plan, by applying the average cost of benefits per eligible participant to accumulated eligibility credits. In either case, the obligation for accumulated eligibility credits should consider assumptions for mortality and expected employee turnover or other appropriate adjustments, to reflect the obligation at the amount expected to be paid. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## **Postretirement Benefit Obligations**

**.49** Health and welfare benefit plans may continue to provide benefits to participants after retirement (postretirement benefits). Those benefits may commence immediately upon termination of service or payment may be deferred until the participant attains a specified age. If a plan provides postretirement benefits to participants, an estimated amount for those benefits, as described below should be included in the benefit obligations. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.50** The postretirement benefit obligation as of the measurement date is the actuarial present value of all future benefits attributed to plan participants' services rendered to that date, assuming the plan continues in effect and all assumptions about future events are fulfilled. Postretirement benefits comprise

---

<sup>19</sup> This determination should consider (a) the extent to which the insurance contract requires payment of such deficits and (b) the plan's intention, if any, to transfer coverage to another insurance company.

benefits expected to be paid to or on behalf of any retired or active *participant*, terminated participant, beneficiary, or covered dependent who is expected to receive benefits under the health and welfare benefit plan. Postretirement benefits expected to be paid to or for an active participant, beneficiary, or covered dependent who is still earning his or her postretirement benefits (that is, one who is not yet fully eligible) should be measured over the participant's credited period of service up to the date when full eligibility for benefits is attained.<sup>20</sup> [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.51 If a multiemployer health and welfare benefit plan provides postretirement benefits, the benefit obligations must include the postretirement benefit obligation. Consideration should be given to the promises currently made to employees and the history of making such payments to retirees. The fact that benefits may be reduced or even potentially eliminated would not ordinarily affect the promise made as of the end of the plan year unless the change meets the substantive plan criteria of FASB Statement No. 106 (for example, an amendment is in place or has been communicated to employees). The fact that the contributing employers of a multiemployer plan do not record a similar obligation under FASB Statement No. 106 does not affect the accounting for the obligations by the plan. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.52 The postretirement benefit obligation should be measured using the plan's written provisions to the extent possible, as well as the substantive plan if it differs from the written plan. In many health and welfare benefit plans, postretirement benefits are not defined as a specified amount for each year of service. FASB Statement No. 106, paragraphs 23 through 44, describes the measurement of the postretirement benefit obligation. For multiemployer plans that do not have date-of-hire information as required by paragraph 44 of FASB Statement No. 106, reasonable estimates thereof should be used to measure the obligation. Death or disability benefits provided outside of a pension plan (when the employee is considered to be retired) should also be included in the calculation of the postretirement benefit obligation. Benefits that are provided through an insurance contract should be excluded.<sup>21</sup> [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.53 In measuring the postretirement benefit obligation explicit assumptions must be used, each of which represents the best estimate of a particular future event. All assumptions should presume that the plan will continue in its present form, unless there is evidence to the contrary. Principal actuarial assumptions used should include—

- Discount rates, used to reflect the time value of money in determining the present value of future cash outflows currently expected to be required to satisfy the liability in the due course of business.
- The timing and amount of future postretirement benefit payments (taking into consideration per capita claims cost by age, health care cost-trend rates, current Medicare reimbursement rates, retirement age, dependency status, and mortality).

---

<sup>20</sup> For example, if a participant has worked eight years and must work another sixteen to be fully eligible for benefits after retirement, one-third of the postretirement benefits have been earned and should be included in the postretirement benefit obligation if it is probable that the employee will work the remaining sixteen years.

<sup>21</sup> Insured plans should be reviewed carefully to determine the extent to which postretirement benefits are insured. Currently, except for single-premium life insurance contracts, few, if any, insurance contracts unconditionally obligate an insurance company to provide most forms of postretirement benefits.

- Salary progression (for pay-related plans).
- The probability of payment (considering turnover, retirement age, dependency status, and mortality).
- Participation rates (for contributory plans).

[Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.54** The postretirement benefit obligation information should include the following classifications:

- Obligations related to retired plan participants, including their beneficiaries and covered dependents
- Obligations related to active or terminated participants who are fully eligible to receive benefits
- Obligations related to other plan participants not yet fully eligible for benefits

Separate disclosure for each classification for each significant benefit (for example, medical and death) may be appropriate. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Changes in Benefit Obligations

**.55** Information regarding changes in the benefit obligations within a plan period should be presented to identify significant factors affecting year-to-year changes in benefit obligations. Like the benefit obligation information (see paragraph .42), the changes should be presented within the body of the financial statements. Providing such information in the following three categories will generally be sufficient: (a) claims payable and premiums due to insurance companies, (b) IBNR and eligibility credits, and (c) postretirement benefit obligations. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.56** Minimum disclosure regarding changes in benefit obligations should include the significant effects of (a) plan amendments, (b) changes in the nature of the plan (mergers or spinoffs), and (c) changes in actuarial assumptions (health care cost-trend rate or interest rate). Changes in actuarial assumptions are to be considered as changes in accounting estimates and, therefore, previously reported amounts should not be restated. The significant effects of other factors may also be identified. These include, for example, benefits accumulated,<sup>22</sup> the effects of the time value of money (for interest), and benefits paid. If presented, benefits paid should not include benefit payments made by an insurance company pursuant to a contract that is excluded from plan assets. However, amounts paid by the plan to an insurance company pursuant to such a contract (including purchases of annuities with amounts allocated from existing investments with the insurance company) should be included in benefits paid.<sup>23</sup> If only the minimum disclosure is presented, pre-

<sup>22</sup> Actuarial experience gains or losses may be included with the effects of additional benefits accumulated rather than separately disclosed. If the effects of changes in actuarial assumptions cannot be separately determined, those effects should be included in benefits accumulated and described accordingly.

<sup>23</sup> Because of the use of different actuarial assumptions, the amount paid by the plan to an insurance company may be different from the previous measure of the actuarial present value of the related accumulated plan benefits. If that information is available, it should be presented as an actuarial experience gain or loss.

sensation in a statement format will necessitate an additional unidentified "other" category to reconcile the initial and ultimate amounts. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Additional Financial Statement Disclosures

.57 Disclosure of a health and welfare benefit plan's accounting policies should include—<sup>24</sup>

- A description of the methods and significant assumptions used to determine the fair value of investments and the reported value of insurance contracts.
- A description of the methods and significant actuarial assumptions used to determine the plan's benefit obligations. Any significant changes in assumptions made between financial statement dates and their effects should be described.

[Paragraph renumbered by the issuance of Statement of Position 94-4.]

.58 The plan's financial statements should also disclose other information.<sup>25</sup> Separate disclosures may be made to the extent that the plan provides both health and other welfare benefits. The disclosures should include, when applicable—

- A brief, general description of the plan agreement, including, but not limited to, participants covered, vesting, and benefit provisions. If a plan agreement or a description thereof providing this information is otherwise published or made available, the description in the financial statement disclosures may be omitted, provided that a reference to the other source is made.
- A description of significant plan amendments adopted during the period, as well as significant changes in the nature of the plan (for example, a plan spin-off or merger with another plan) and changes in actuarial assumptions.
- The funding policy and any changes in the policy made during the plan year. If the benefit obligations exceed the net assets of the plan, the method of funding this deficit, as provided for in the plan agreement or collective bargaining agreement, also should be disclosed.<sup>26</sup> For a contributory plan, the disclosure should state the method of determining participants' contributions.
- The federal income tax status of the plan. There is no determination letter program for health and welfare plans; however a 501(c)(9) VEBA trust must obtain a determination letter to be exempt from taxation.
- The policy regarding the purchase of contracts with insurance companies that are excluded from plan assets. Consideration should be given to disclosing the type and extent of insurance coverage, as well as the extent to which risk is transferred (for example, coverage period and claims reported or claims incurred).

---

<sup>24</sup> See Accounting Principles Board (APB) Opinion No. 22, *Disclosure of Accounting Policies*.

<sup>25</sup> Certain of the disclosures relate to plans with accumulated assets rather than those with trusts that act more as conduits for benefit payments or insurance premiums.

<sup>26</sup> If significant plan administration or related costs are being borne by the employer, that fact should be disclosed.

- Identification of investments that represent 5 percent or more of total plan assets. Consideration should be given to disclosing provisions of insurance contracts included as plan assets that could cause an impairment of the asset value upon liquidation or other occurrence (for example, surrender charges and market value adjustments).
- The amounts and types of securities of the employer and related parties included in plan assets, and the approximate amount of future annual benefits of plan participants covered by insurance contracts issued by the employer and related parties.
- Significant real estate or other transactions in which the plan and any of the following parties are jointly involved: the sponsor, the plan administrator, employers, or employee organizations.
- Unusual or infrequent events or transactions occurring after the financial statement date, but before issuance of the financial statements, that might significantly affect the usefulness of the financial statements in an assessment of the plan's present and future ability to pay benefits. For example, a plan amendment adopted after the latest financial statement date that significantly increases future benefits attributable to an employee's service rendered before that date, a significant change in the market value of a significant portion of the plan's assets, or the emergence of a catastrophic claim should be disclosed. If reasonably determinable, the effects of such events or transactions should be disclosed. If such effects are not reasonably determinable, the reasons why they are not quantifiable should be disclosed.
- Material lease commitments, other commitments, or contingent liabilities.
- The assumed health care cost-trend rate(s) used to measure the expected cost of benefits covered by the plan for the next year, a general description of the direction and pattern of change in the assumed trend rates thereafter, the ultimate trend rate(s), and when that rate is expected to be achieved.
- For health and welfare benefit plans providing postretirement health care benefits, the effect of a one-percentage-point increase in the assumed health care cost-trend rates for each future year on the postretirement benefit obligation.
- Any modification of the existing cost-sharing provisions that are encompassed by the substantive plan(s) and the existence and nature of any commitment to increase monetary benefits provided by the plan and their effect on the plan's financial statements.
- Termination provisions of the plan and priorities for distribution of assets, if applicable.
- Restrictions, if any, on plan assets (for example, legal restrictions on multiple trusts).
- For benefit-responsive investment contracts in the aggregate by investment option:
  - The average yield for each period for which a statement of net assets available for benefits is presented
  - The crediting interest rate as of the date of each statement of net assets available for benefits presented

- The amount of valuation reserves recorded to adjust contract amounts (for example, due to problems with the creditworthiness of the contract issuer or third-party guarantor)
- The fair values of fully benefit-responsive investment contracts reported at contract value, in accordance with FASB Statement No. 107
- A general description of the basis and frequency of determining crediting interest-rate resets and any minimum crediting interest rate under the terms of fully benefit-responsive investment contracts and any limitations on related liquidity guarantees (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives).
- For ERISA-covered plans, if a fully benefit-responsive investment contract does not qualify for contract-value reporting in the DOL Form 5500 but is reported in the financial statements at contract value, and the contract value does not approximate fair value, the DOL's rules and regulations require that a statement explaining the differences between amounts reported in the financial statements and DOL Form 5500 be added to the financial statements.

This list does not include information that, in accordance with ERISA requirements, must be disclosed in the schedules filed as part of a plan's annual report. It is important to note that any information required by ERISA to be disclosed in the schedules must be disclosed in the schedules; disclosure of the information in the footnotes to the financial statements but not in the schedules is not acceptable to the DOL. [As amended and renumbered, effective for financial statements for plan years beginning after December 15, 1994, by Statement of Position 94-4.] (See section 10,620.)

**.59** FASB Statement No. 105 requires all entities, including health and welfare benefit plans, to disclose information principally about financial instruments with off-balance-sheet risk. However, the disclosure requirements in paragraphs 17, 18, and 20 of FASB Statement No. 105 do not apply to (a) financial instruments of a pension plan, including plan assets, when subject to the accounting and reporting requirements of FASB Statement No. 87, *Employers' Accounting for Pensions*; (b) employers' and plans' obligations for pension benefits, postretirement health care and life insurance benefits, employee stock option and stock purchase plans, and other forms of deferred compensation arrangements; (c) insurance contracts, other than financial guarantees and investment contracts as discussed in FASB Statement Nos. 60, *Accounting and Reporting by Insurance Enterprises*, and 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*; and (d) unconditional purchase obligations subject to the disclosure requirements of FASB Statement No. 47, *Disclosure of Long-Term Obligations*. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.60** Some examples of financial instruments of employee benefit plans with off-balance-sheet risk that are included within the scope of FASB Statement No. 105 are obligations to repurchase securities sold, outstanding commitments to purchase or sell financial instruments at predetermined prices, futures contracts, and interest-rate and foreign-currency swaps. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

**.61** FASB Statement No. 105 requires entities to disclose the following information about financial instruments with off-balance-sheet credit risk:

- The face or contract amount (or notional principal amount if there is no face or contract amount)
- The nature and terms, including, at a minimum, a discussion of (a) the credit and market risk of those instruments, (b) the cash requirements of those instruments, and (c) the related accounting policy pursuant to the requirements of APB Opinion 22
- The amount of the accounting loss the entity would incur if any party to the financial instrument failed completely to perform according to the terms of the contract and the collateral or other security, if any, for the amount due proved to be of no value to the entity
- The entity's policy of requiring collateral or other security to support financial instruments subject to credit risk, information about the entity's access to that collateral or other security, and the nature and a brief description of the collateral or other security supporting those financial instruments

FASB Statement No. 105 requires entities to disclose the following information about financial instruments with concentrations of credit risk:

- Information about the (shared) activity, region, or economic characteristic that identifies the concentration
- The amount of the accounting loss due to credit risk the entity would incur if parties to the financial instruments that make up the concentration failed completely to perform according to the terms of the contracts and the collateral or other security, if any, for the amount due proved to be of no value to the entity
- The entity's policy of requiring collateral or other security to support financial instruments subject to credit risk, information about the entity's access to that collateral or other security, and the nature and a brief description of the collateral or other security supporting those financial instruments

[Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Terminating Plans

.62 The auditing interpretation "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting" (AICPA, *Professional Standards*, vol. 1, AU section 9508.33–38) contains applicable guidance regarding the auditor's reporting responsibilities for terminating plans. For purposes of this discussion, a terminating plan includes all plans about which a termination decision has been made regardless of whether the terminating plan will be replaced. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.63 When the decision has been made to terminate a plan,<sup>27</sup> or a wasting trust—that is, a plan under which participants no longer accrue benefits but that will remain in existence as long as necessary to pay already accrued benefits—exists, complete and prominent disclosure of the relevant circumstances is essential in all subsequent financial statements issued by the plan.

---

<sup>27</sup> See paragraph 12.11 of the guide, which states that the auditor should obtain from the plan trustee, administrator, or administrative agent written representation about whether there is a present intention to terminate the plan. Refer also to paragraph 10.33 of the guide, which states that the auditor should consider confirming with the plan's actuary knowledge of an intent on the part of the employer to terminate the plan.

If the decision to terminate a plan is made before the end of the plan year, it is also necessary for the plan's year-end financial statements to be prepared on the *liquidation* basis of accounting, as described below. If the decision is made after the year end but before the year-end financial statements have been issued, the decision is generally a *type two* subsequent event requiring the disclosure described in SAS No. 1, *Codification of Auditing Standards and Procedures* [section 560.05]. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.64 Plan financial statements for periods ending after the termination decision are prepared on the liquidation basis of accounting. For plan assets, changing to the liquidation basis will usually cause little or no change in values, most of which are current market values. Assets that may not be carried at market values include operating assets, insurance contracts carried at *contract values*, or large blocks of stock or other assets that cannot be readily disposed of at their quoted market prices. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.65 Benefit obligations should be determined on a liquidation basis, and their value may differ from the actuarial present value of benefit obligations reported for an ongoing plan. Consideration should be given upon termination to whether any or all benefits become vested. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

## Effective Date and Transition

.66 This SOP is effective for audits of financial statements of single-employer plans for plan years beginning after December 15, 1992, except that the application of this SOP to plans of single employers with no more than 500 participants in the aggregate is effective for plan years beginning after December 15, 1994. This SOP is effective for audits of financial statements of multiemployer plans for plan years beginning after December 15, 1995. Earlier application is encouraged. Accounting changes adopted to conform to the provisions of this SOP shall be made retroactively. Financial statements of prior plan years are required to be restated to comply with the provisions of this SOP *only* if they are presented together with financial statements for plan years beginning after December 15, 1992. If accounting changes were necessary to conform to the provisions of this SOP, that fact shall be disclosed when financial statements for the year in which this SOP is first applied are presented either alone or with financial statements of prior years. [Paragraph renumbered by the issuance of Statement of Position 94-4.]

.67\*

## Appendix

### Illustrations of Financial Statements: Employee Health and Welfare Benefit Plans

**A-1.** This appendix illustrates certain applications of the provisions of this SOP to the annual financial statements of two hypothetical health and welfare benefit plans that have assets in underlying trusts. They are—

- a.* Allied Industries Benefit Plan, a multiemployer plan that displays the benefit obligation information in separate financial statements (exhibit A).
- b.* Classic Enterprises Benefit Plan, a single-employer plan that displays the benefit obligation information on the face of the financial statements along with the net asset information (exhibit B).

**A-2.** The plan in exhibit A pays all benefits directly from plan assets. The plan in exhibit B obtains insurance for current benefits from its assets. It is assumed that both plans provide health benefits and life insurance coverage to both active and retired participants. Exhibit A also assumes that the plan provides long-term disability benefits and limited coverage during periods of unemployment based on accumulated eligibility credits.

**A-3.** The examples do not illustrate other provisions of this SOP that might apply in circumstances other than those assumed. The format presented and the wording of the accompanying notes are illustrative only and are not necessarily the only possible presentations. For purposes of illustration, two-year comparative financial statements are shown. (Generally accepted accounting principles encourage but do not require comparative financial statements; however, the alternative method of reporting under ERISA requires comparative statements of net assets available for benefits.)

---

\* Renumbered by the issuance of Statement of Position 94-4.

Exhibit A

ALLIED INDUSTRIES BENEFIT PLAN

Allied Industries Benefit Plan  
Statements of Net Assets Available for Benefits  
December 31, 19X2 and 19X1

<u>Assets</u>	<u>19X2</u>	<u>19X1</u>
Investments, at fair value (see note 3)		
U.S. government securities	\$5,000,000	\$4,000,000
Corporate bonds and debentures	2,000,000	1,600,000
Common stock	<u>1,000,000</u>	<u>600,000</u>
Total investments	<u>8,000,000</u>	<u>6,200,000</u>

Changes in actuarial assumptions	<u>260,000</u>	<u>—</u>
Balance at end of year	<u>11,000,000</u>	<u>9,665,000</u>
PLAN'S TOTAL BENEFIT OBLIGATIONS AT END OF YEAR	<u><u>\$13,550,000</u></u>	<u><u>\$11,715,000</u></u>

The accompanying notes are an integral part of the financial statements.

**Allied Industries Benefit Plan  
Notes to Financial Statements**

**NOTE 1: DESCRIPTION OF PLAN**

The following description of the Allied Industries Benefit Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a complete description of the Plan's provisions.

*General.* The Plan provides health and other benefits covering all participants in the widgets industry in the Greater Metropolis area. The Plan and related trust were established on May 8, 1966, pursuant to a collective bargaining agreement between the Allied Employers' Trade Association and the Allied Union, Local 802. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

*Benefits.* The Plan provides health benefits (medical, hospital, surgical, major medical, and dental), permanent disability benefits, and death benefits to full-time participants (with at least 450 hours of work in the industry during a consecutive three-month period) and to their beneficiaries and covered dependents. Retired employees are entitled to similar health benefits (in excess of Medicare coverage) provided they have attained at least age sixty-two and have fifteen years of service with participating employers before retirement.

The Plan also provides health benefits to participants during periods of unemployment, provided they have accumulated in the current year or in prior years credit amounts (expressed in hours) in excess of the hours required for current coverage. Accumulated eligibility credits equal to one year's coverage may be carried forward.

Health, disability, and death claims of active and retired participants, dependents, and beneficiaries are processed by the Administrator Group, but the responsibility for payments to participants and providers is retained by the Plan.

In 19X2 the board of trustees amended the Plan to increase the deductible under major medical coverage from \$100 to \$300 and to extend dental coverage to employees retiring after December 31, 19X2. The amendment will not affect participating employers' contributions to the Plan in 19X3 under the current collective bargaining agreement.

*Contributions.* Participating employers contribute 5.5 percent of wages pursuant to the current collective bargaining agreement between employers and the union (expiring February 19, 19X5). Employees and retirees may contribute specified amounts, determined periodically by the Plan's actuary, to extend coverage to eligible dependents.

*Other.* The Plan's board of trustees, as Sponsor, has the right under the Plan to modify the benefits provided to active employees. The Plan may be terminated only by joint agreement between industry and union, subject to the provisions set forth in ERISA.

**NOTE 2: SUMMARY OF ACCOUNTING POLICIES**

*A. Valuation of Investments.* The Plan's investments are stated at fair value. Securities traded on the national securities exchange are valued at the last reported sales price on the last business day of the plan year. Investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and

asked prices. For certain corporate bonds that do not have an established fair value, the Plan's board of trustees has established a fair value based on yields currently available on comparable securities of issuers with similar credit ratings.

**B. Postretirement Benefits.** The postretirement benefit obligation represents the actuarial present value of those estimated future benefits that are attributed to employee service rendered to December 31. Postretirement benefits include future benefits expected to be paid to or for (1) currently retired or terminated employees and their beneficiaries and dependents and (2) active employees and their beneficiaries and dependents after retirement from service with the participating employers. Prior to an active employee's full eligibility date, the postretirement benefit obligation is the portion of the expected postretirement benefit obligation that is attributed to that employee's service in the industry rendered to the valuation date.

The actuarial present value of the expected postretirement benefit obligation is determined by an actuary and is the amount that results from applying actuarial assumptions to historical claims-cost data to estimate future annual incurred claims costs per participant and to adjust such estimates for the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as those for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

For measurement purposes, a 9.5 percent annual rate of increase in the per capita cost of covered health care benefits was assumed for 19X3; the rate was assumed to decrease gradually to 8.0 percent for 19X8 and to remain at that level thereafter. These assumptions are consistent with those used to measure the benefit obligation at December 31, 19X1.

The following were other significant assumptions used in the valuations as of December 31, 19X2 and 19X1.

Weighted-average discount rate	8.0%—19X2; 8.25%—19X1
Average retirement age	60
Mortality	1971 Group Annuity Mortality Table

The foregoing assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of the postretirement benefit obligation.

**C. Other Plan Benefits.** Plan obligations at December 31 for health claims incurred by active participants but not reported at that date, for accumulated eligibility of participants, and for future disability payments to members considered permanently disabled at December 31 are estimated by the Plan's actuary in accordance with accepted actuarial principles. Such estimated amounts are reported in the accompanying statement of the Plan's benefit obligations at present value, based on an 8.0 percent discount rate. Health claims incurred by retired participants but not reported at year end are included in the postretirement benefit obligation.

### NOTE 3: INVESTMENTS

The Plan's investments are held by a bank-administered trust fund. During 19X2 and 19X1 the Plan's investments (including investments bought, sold, and held during the year) appreciated in value by \$300,000 and \$200,000, respectively, as follows:

Statements of Position

	19X2		19X1	
	<i>Net Increase (Decrease) in Value During Year</i>	<i>Fair Value at End of Year</i>	<i>Net Increase (Decrease) in Value During Year</i>	<i>Fair Value at End of Year</i>
Fair value as determined by quoted market price:				
U.S. government securities	\$200,000	\$5,000,000	\$ (75,000)	\$4,000,000
Corporate bonds and debentures	(25,000)	1,750,000	50,000	1,375,000
Common stocks	<u>100,000</u>	<u>1,000,000</u>	<u>200,000</u>	<u>600,000</u>
	275,000	7,750,000	175,000	5,975,000
Fair value as estimated by Plan's board of trustees:				
Corporate bonds	<u>25,000</u>	<u>250,000</u>	<u>25,000</u>	<u>225,000</u>
	<u>\$300,000</u>	<u>\$8,000,000</u>	<u>\$200,000</u>	<u>\$6,200,000</u>

The fair value of individual investments that represent 5.0 percent or more of the Plan's net assets are as follows:

	19X2	19X1
Commonwealth Power Co., 9.0% bonds due 2014 (\$500,000 face amount)	\$475,000	\$450,000
ABC Company common stock (2,000 shares)	500,000	450,000
U.S. Treasury bond, 8.5% due 19X6 (\$360,000 face amount)		350,000

**NOTE 4: BENEFIT OBLIGATIONS**

The Plans deficiency of net assets over benefit obligations at December 31, 19X2 and 19X1, relates primarily to the postretirement benefit obligation, the funding of which is not covered by the contribution rate provided by the current bargaining agreement. It is expected that the deficiency will be funded through future increases in the collectively bargained contribution rates.

The weighted-average health care cost-trend rate assumption (see note 2B) has a significant effect on the amounts reported in the accompanying financial statements. If the assumed rates increased by one percentage point in each year, it would increase the obligation as of December 31, 19X2 and 19X1, by \$2,600,000 and \$2,500,000, respectively.

**NOTE 5: OTHER MATTERS**

The trust established under the Plan to hold the Plan's assets is qualified pursuant to Section 501(c)9 of the Internal Revenue Code, and, accordingly, the trust's net investment income is exempt from income taxes. The Plan has obtained a favorable tax determination letter from the Internal Revenue Service, and the Plan sponsor believes that the Plan, as amended, continues to qualify and to operate as designed.

The accompanying notes are an integral part of the financial statements.

**Classic Enterprises Benefit Plan  
Notes to Financial Statements**

**NOTE 1: DESCRIPTION OF PLAN**

The following description of the Classic Enterprises Benefit Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a complete description of the Plan's provisions.

*General.* The Plan provides health and death benefits covering substantially all active and retired employees of Classic Enterprises (the Sponsor). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

*Benefits.* The Plan provides health benefits (medical, hospital, surgical, major medical, and dental) and death benefits to full-time employees of the Sponsor (with at least 1,000 hours of service each year) and to their beneficiaries and covered dependents. Retired employees are entitled to similar health and death benefits provided they have attained at least age fifty-five and have at least ten years of service with the Sponsor.

Current health claims of active and retired participants and their dependents and beneficiaries are provided under group insurance contracts with ABC Carrier, which are experience rated after the anniversary dates of the policies (generally March 31). Death benefits are covered by a group-term policy with DEF Carrier.

*Contributions.* The Sponsor's policy is to contribute the maximum amounts allowed as a tax deduction by the Internal Revenue Code. Under present law, the Sponsor is not permitted to deduct amounts for future benefits to current employees and retirees.

Employees and retirees may contribute specified amounts, determined periodically by the Plan's insurance companies, to extend coverage to eligible dependents.

In 19X2 the Plan was amended to increase the deductible under major medical coverage from \$100 to \$300 and to extend dental coverage to employees retiring after December 31, 19X2. The amendment is not expected to significantly affect the Sponsor's contribution to the Plan in 19X3.

*Other.* Although it has not expressed any intention to do so, the Sponsor has the right under the Plan to modify the benefits provided to active employees, to discontinue its contributions at any time, and to terminate the Plan subject to the provisions set forth in ERISA.

**NOTE 2: SUMMARY OF ACCOUNTING POLICIES**

*A. Valuation of Investments.* The Plan's investments are stated at fair value. Securities traded on the national securities exchange are valued at the last reported sales price on the last business day of the plan year. Investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and asked prices. For certain corporate bonds that do not have an established fair value, the Classic Enterprises Benefits Committee has established a fair value based on yields currently available on comparable securities of issuers with similar credit ratings.

*B. Plan Benefits.* The postretirement benefit obligation (see note 4) represents the actuarial present value of those estimated future benefits that are attributed to employee service rendered to December 31. Postretirement bene-

fits include future benefits expected to be paid to or for (1) currently retired employees and their beneficiaries and dependents and (2) active employees and their beneficiaries and dependents after retirement from service with the Sponsor. Prior to an active employee's full eligibility date, the postretirement benefit obligation is the portion of the expected postretirement benefit obligation that is attributed to that employee's service rendered to the valuation date.

The actuarial present value of the expected postretirement benefit obligation is determined by an actuary and is the amount that results from applying actuarial assumptions to historical claims-cost data to estimate future annual incurred claims costs per participant and to adjust such estimates for the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as those for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment, and to reflect the portion of those costs expected to be borne by Medicare, the retired participants, and other providers.

For measurement purposes at December 31, 19X2, a 9.5 percent annual rate of increase in the per capita cost of covered health care benefits was assumed for 19X3; the rate was assumed to decrease gradually to 8.0 percent for 19X8 and to remain at that level thereafter. These assumptions are consistent with those used to measure the benefit obligation at December 31, 19X1.

The following were other significant assumptions used in the valuations as of December 31, 19X2 and 19X1.

Weighted-average discount rate	8.0%
Average retirement age	60
Mortality	1971 Group Annuity Mortality Table

The foregoing assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of the postretirement benefit obligation.

NOTE 3: INVESTMENTS

The Plan's investments are held by a bank-administered trust fund. During 19X2 and 19X1, the plan's investments (including investments bought, sold, and held during the year) appreciated in value by \$300,000 and \$200,000, respectively, as follows:

	19X2		19X1	
	Net Increase (Decrease) in Value During Year	Fair Value at End of Year	Net Increase (Decrease) in Value During Year	Fair Value at End of Year
Fair value as determined by quoted market price:				
U.S. government securities	\$200,000	\$5,000,000	\$ (75,000)	\$4,000,000
Corporate bonds and debentures	(25,000)	1,750,000	50,000	1,375,000
Common stocks	100,000	1,000,000	200,000	600,000
	<u>275,000</u>	<u>7,750,000</u>	<u>175,000</u>	<u>5,975,000</u>
Fair value as estimated by Classic Enterprise Benefits Plan Investment Committee:				
Corporate bonds	25,000	250,000	25,000	225,000
	<u>\$300,000</u>	<u>\$8,000,000</u>	<u>\$200,000</u>	<u>\$6,200,000</u>

The fair value of individual investments that represent 5.0 percent or more of the Plan's net assets is as follows:

	19X2	19X1
Commonwealth Power Co., 9.0% bonds due 2014 (\$500,000 face amount)	\$475,000	\$450,000
ABC Company common stock (2,000 shares)	500,000	450,000
U.S. Treasury bond, 8.5% due 19X6 (\$360,000 face amount)		350,000

NOTE 4: BENEFIT OBLIGATIONS

Health costs incurred by participants and their beneficiaries and dependents are covered by insurance contracts maintained by the Plan. It is the present intention of the Sponsor and the Plan to continue obtaining insurance coverage for benefits. As stated in note 1, the Sponsor is not permitted under present tax law to deduct amounts for future benefits (beyond one year). Insurance premiums for future years in respect of the Plan's postretirement benefit obligation will be funded by Sponsor contributions to the Plan in those later years.

The postretirement benefit obligation at December 31, 19X2 and 19X1, principally health benefits, related to the following categories of participants (including their beneficiaries and dependents):

	<u>19X2</u>	<u>19X1</u>
Current retirees	\$ 3,900,000	\$3,500,000
Other participants fully eligible for benefits	2,100,000	2,000,000
Participants not yet fully eligible for benefits	5,000,000	4,165,000
	<u>\$11,000,000</u>	<u>\$9,665,000</u>

The health care cost-trend rate assumption (see note 2B) has a significant effect on the amounts reported. If the assumed rates increased by one percentage point in each year, that would increase the obligation as of December 31, 19X2 and 19X1, by \$2,600,000 and \$2,500,000, respectively.

#### NOTE 5: OTHER MATTERS

The trust established under the Plan to hold the Plan's net assets is qualified pursuant to Section 501(c)9 of the Internal Revenue Code, and, accordingly, the trust's net investment income is exempt from income taxes. The Sponsor has obtained a favorable tax determination letter from the Internal Revenue Service and the Sponsor believes that the Plan, as amended, continues to qualify and to operate as designed.

**Section 10,540****Statement of Position 93-1  
Financial Accounting and Reporting  
for High-Yield Debt Securities by  
Investment Companies**

January 28, 1993

**NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

**Introduction**

.01 High-yield debt securities consist of high-yielding corporate and municipal debt obligations. These securities are frequently referred to as *junk bonds*. The issuance of high-yield debt securities has increased significantly over the past decade. They have supplied significant capital for business expansion and corporate restructuring. These securities are inherently different from investment-grade issues. They present additional credit, liquidity, and market risks for all participants in this marketplace: holders, issuers, underwriters, and broker-dealers.

.02 Recent estimates place the U.S. high-yield debt securities market at between \$180 and \$250 billion, with over 3300 individual security issues outstanding. Mutual funds and insurance companies each hold approximately 30 percent of such securities, and pension funds hold about 15 percent.

.03 High-yield debt securities are corporate and municipal debt securities having a lower-than-investment-grade credit rating (BB+ or lower by Standard & Poor's, or Ba or lower by Moody's). Because high-yield debt securities typically are used when lower-cost capital is not available, they have interest rates several percentage points higher than investment-grade debt and often have shorter maturities.

.04 High-yield debt securities typically are unsecured and subordinate to other debt outstanding. Many issuers of high-yield debt securities are highly leveraged, with limited equity capital. That, plus a market for such securities that may not always be liquid, may increase the market risk, liquidity risk, and credit risk of those securities.

.05 High-yield debt securities may be issued or traded at significant discounts from their face amounts (principal).

.06 Interest for some high-yield debt securities is not paid currently. Instead, interest may be deferred and paid at maturity (zero-coupon bonds) or in periodic interest payments that do not commence until a specific date in the securities' life cycle (step bonds), or interest may be paid in the form of additional debt securities of the issuer bearing similar terms (payment-in-kind bonds, or PIKs).

## Market Risk

.07 In contrast to investment-grade bonds (the market prices of which change primarily as a reaction to changes in interest rates), the market prices of high-yield bonds (which are also affected by changes in interest rates) are influenced much more by credit factors and financial results of the issuer and by general economic factors that influence the financial markets as a whole.

.08 Such factors often make it difficult to substantiate the market valuation of high-yield bonds.

## Liquidity Risk

.09 The market risk is often heightened by the absence of centralized high-yield bond exchanges and relatively thin trading markets, which make it more difficult to liquidate holdings quickly and increase the volatility of the market price. There is generally no centralized or regulated procedure for pricing high-yield debt issues.

## Credit Risk

.10 Issues of high-yield debt securities are more likely to default on interest or principal than are issues of investment-grade securities. Most high-yield debt securities currently outstanding have been issued since 1985. Accordingly, there is little long-term record on how they perform over all parts of the business cycle.

.11 Adverse economic developments in 1990 and 1991 contributed to defaults on principal and interest payments by many issuers of high-yield debt securities. Those developments emphasized the need for taking great care in valuation, income recognition, and financial statement disclosure by holders of these securities.

## Current Literature

.12 Although none of the current financial reporting or auditing literature specifically addresses the issues discussed in this statement of position (SOP), various sources in that literature provide indirect guidance, including the following:

- Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*

- FASB Statement No. 95, *Statement of Cash Flows*
- FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*
- Accounting Principles Board (APB) Opinion No. 22, *Disclosure of Accounting Policies*
- APB Opinion No. 29, *Accounting for Nonmonetary Transactions*
- FASB Emerging Issues Task Force (EITF) Issue No. 86-15, *Interest-Rate Debt*
- EITF Issue No. 89-4, *Accounting for a Purchased Investment in a Collateralized Mortgage Obligation Instrument or in a Mortgage-Backed Interest-Only Certificate*
- AICPA Statement on Auditing Standards (SAS) No. 73, *Using the Work of a Specialist*
- AICPA Audit and Accounting Guide *Audits of Investment Companies*

## Scope

.13 This SOP amends the Audit and Accounting Guide *Audits of Investment Companies* and is applicable to entities to which that guide applies.

.14 This SOP addresses the following reporting and accounting issues encountered by investment companies holding high-yield debt securities in their portfolios. Securities that have no credit rating should be classified as high-yield debt securities if they otherwise have the characteristics of such securities.

- a. How should interest income from step bonds and payment-in-kind bonds be measured and reported in investment company financial statements?
- b. How should previously recorded income and purchased interest be treated when recoverability becomes doubtful in connection with defaults or potential defaults by issuers?
- c. How should additional expenditures made by investment companies in support of high-yield debt securities be accounted for?
- d. What audit procedures to determine the reasonableness of valuations of high-yield debt securities should be considered?

## Accounting for Income on Step-Interest and PIK Debt Securities

### Discussion

.15 High-yield debt securities (junk bonds) take various forms. The most common forms may include zero-coupon bonds, PIK bonds, and deep-discount step bonds.

### **PIK Bonds**

.16 Issuers of PIK bonds typically have the option at each interest payment date of making interest payments in cash or in additional debt securities. Those additional debt securities are referred to as *baby* or *bunny bonds*. Baby bonds generally have the same terms, including maturity dates and interest rates, as the original bonds (parent PIK bonds). Interest on baby bonds may also be paid in cash or in additional like-kind debt securities at the option of the issuer.

### **Step Bonds**

.17 Step bonds generally are characterized by a combination of deferred-interest payment dates and increasing interest payment amounts over the bond lives. Thus, they bear some similarity to zero-coupon bonds and to traditional debentures.

## **Current Practices: Income Recognition**

.18 Present income-recognition practices for high-yield debt securities vary.

### **PIK Bonds**

.19 The most common methods currently used for revenue recognition on PIK bonds are the effective-interest method and the market-value method.

.20 *Effective-interest method.* Under the effective-interest method, also referred to in accounting literature as the interest method, PIK bonds and the additional debt securities issued in connection with interest payments on them are treated as a combined instrument, based on the assumption that all principal amounts will be paid at maturity. Interest income is recorded by the effective interest method, so that at final maturity the bonds' carrying amount will be equal to the aggregate principal amount of the original bonds and all baby bonds received. The realizable value of the bonds' interest previously accrued and recorded is evaluated periodically. Any adjustments are recorded as charges to interest income and reserves against interest receivable.

.21 *Market-value method.* Under the market-value method, interest income is accrued daily on the basis of the face value and the stated interest rate of the PIK bond. Each day, the related interest receivable is marked to market, thereby reflecting the current economic value of interest income recognized. The market price of the parent PIK bond generally includes accrued interest. To the extent that any accrued interest is determined to have been included in the quoted market price of the parent PIK bond, it is eliminated each day to avoid double counting of interest income.

.22 Further, the interest ex-date represents the first date that a PIK bond's market value does not include an interest component and interest income is fully accrued. From that date through the payment date, generally a period of one to two weeks, the bond theoretically trades without interest. (This is similar in concept to the ex-date for traditional equity securities paying periodic dividends.) Accordingly, from the interest ex-date through the interest payment date, no adjustment is necessary to reduce the bond market value for interest.

.23 At the payment date, the basis of the baby bonds actually received is compared with the amount accrued at the interest ex-date based on the current market value of the parent bond. Because interest receivable is being marked

to market daily, no further adjustment to interest receivable generally is necessary. However, if the basis (that is, the current market value) of the baby bonds received and the accrued interest on the parent bond are different, the resulting adjustment is charged or credited to interest income.

.24 Should the reporting entity sell a PIK bond between interest payment dates, the proceeds received are allocated to interest accrued and bond basis in a manner that is consistent with the market valuation as of the trade date. The same is true for any purchases made between interest payment dates.

.25 One variation of the market-value method is to adjust the amount of interest income accrued by the interest method to the value of the bonds at the interest ex-date.

.26 A second variation is to accrue interest income daily on the basis of the coupon rate and adjust the interest income for the market value of the bonds received at the payment date only.

### **Step Bonds**

.27 Currently, two methods are most commonly followed for revenue recognition on step bonds.

.28 *Effective-interest method.* Under the effective-interest method, also referred to in accounting literature as the interest method, total expected interest—the combination of the aggregate coupon-interest payments and the original issue discount—to be earned over the life of the bond is determined and the effective-interest rate is applied to recognize interest income daily for the bond. This method ignores any adjustment of interest rates and treats the bond as a zero-coupon instrument.

.29 *Bifurcation method.* The bifurcation method assumes that the bond is a discount bond only for the portion of its life during which payment of interest is deferred. During that period, an effective-interest rate is used. For the remainder of the bond's life for which a stated coupon rate exists, the stated interest rate is used to record interest income.

## **Views on the Issues**

### **PIK Bonds**

.30 Some believe that accounting for PIK bonds should follow the guidance for monetary assets that do not pay interest periodically, such as zero-coupon bonds, and that their interest should be accounted for by accretion by the effective-interest method. That is generally considered to be the method to use in recognizing income for tax purposes. It would allow consistency between tax and financial reporting treatments.

.31 Others contend that, because of the significant uncertainties concerning the realizability of income from PIK bonds, income should reflect the current values of the underlying investments regardless of stated coupon rates. They believe that the use of current value presents a more accurate picture of the current value of income received from PIK bonds.

### **Step Bonds**

.32 Some believe that because there are differing interest payments throughout the lives of step bonds, including periods of no interest payments, step bonds have the same characteristics as zero-coupon bonds. They would therefore account for interest income by the effective-interest method.

.33 Others believe that the contractual nature of the interest payment schedules connected with these bonds should govern the accounting treatment. Thus, for periods of no interest payments, the effective-interest method should be used; when interest payments are being made, they should be used to account for income.

## Conclusions

### *PIK Bonds*

.34 Because PIK bonds generally possess many of the characteristics of zero-coupon bonds and because the effective-interest method provides the most analogous accounting treatment, it should be used to determine interest income. PIK bonds typically trade flat (that is, interest receivable is included in the market value quote obtained each day). Accordingly, that portion of the quote representing interest income needs to be identified. The sum of the acquisition amount of the bond and the discount to be amortized should not exceed the undiscounted future cash collections that are both reasonably estimable and probable. To the extent that interest income to be received in the form of baby bonds is not expected to be realized, a reserve against income should be established (that is, it should be determined periodically that the total amount of interest income recorded as receivable, plus the initial cost of the underlying PIK bond, does not exceed the current market value of those assets).

### *Step Bonds*

.35 Income on step bonds should be recognized using the effective-interest method, which is a systematic and rational method for accruing income throughout a bond's life and is not affected by the timing of cash payments. Additionally, to the extent that interest income is not expected to be realized, a reserve against income should be established. The sum of the acquisition amount of the bond and the discount to be amortized should not exceed the undiscounted future cash collections that are both reasonably estimable and probable.

### *Securities and Exchange Commission (SEC) Yield Calculations*

.36 SEC yield-formula calculations are required to be made using the specific guidelines presented in SEC Release No. 33-6753. Yields calculated that way may not be the same as the effective interest reported in the financial statements. The ultimate realizable value and the potential for early retirement of securities should be considered when computing SEC yields. Management's best estimates of ultimate realizable value must be reasonable. Because current values of many high-yield debt securities have declined significantly, computed yields for many of them may be higher than rates expected to be ultimately realized. To avoid unsound yield information, consideration should be given to capping yields of individual securities at some reasonable level and examining the underlying economic viability of the issuers.

.37 An investment company's portfolio should indicate all high-yield and restricted debt securities whose values have been estimated by its directors.

## Accounting for Accrued Income and Purchased Interest in Connection With Defaulted Debt Securities

### Discussion

.38 Interest receivable from debt securities generally comprises two distinct components: interest purchased from the previous bondholder and inter-

est accrued by the investment company during the holding period. If market prices fluctuate significantly or issues of debt securities have defaulted, a judgment to write off interest receivable may be required. Both components of interest receivable must be evaluated.

.39 Writeoffs of interest receivable differ from traditional writeoffs of trade accounts receivable. They can significantly affect an investment company's statement of operations, the performance measurement ratios of expenses to average net assets, and net investment income to average net assets.

## Current Practices

.40 Current practice for the writeoff of interest receivable is diverse. Most investment companies record the writeoff of accrued interest as a reduction of interest income. Many investment companies record the writeoff of purchased interest as an increase to the cost basis of securities, whereas others record such writeoffs as a reduction of interest income.

## Views on the Issues

.41 Many believe that, to the extent that a writeoff is related to interest recognized by the investment company, it should be treated as a reduction of interest income. They further believe that treatment of interest writeoffs as expenses would present misleading expense ratios to users of financial statements of investment companies and cause difficulties in comparisons of performance information from different investment companies. They also believe that a writeoff of purchased interest is better presented as an adjustment to the cost basis of the security, because it was incurred simultaneously and integrally with the original purchase of the investment. Additionally, because purchased interest is not recorded as income, they believe it should not be treated as an offset to revenue.

## Conclusion

.42 The portion of interest receivable on defaulted debt securities written off that was recognized as interest income should be treated as a reduction of interest income. Writeoffs of purchased interest should be reported as increases to the cost basis of the security and treated as unrealized losses until the security is sold.

.43 Those reserves should be recorded when they become probable and estimable in accordance with the guidance provided by FASB Statement No. 5, *Accounting for Contingencies*.

## Accounting for Expenditures in Support of Defaulted Debt Securities

### Discussion

.44 The market for many high-yield debt securities is relatively thin. When issuers of such securities default, the bondholders often become active in any negotiations and in the workout process. This process often results in new terms that restructure the high-yield obligations to allow the issuer to continue to meet its ongoing interest obligations and maintain some, if not all, of the principal value to the holders of the obligations.

.45 Adverse economic developments often lead to increases in the default rates of high-yield debt securities. In addition to occasional capital infusions, professional fees to legally restructure the investments are frequently incurred by the bondholders.

### **Current Practices**

.46 Current accounting and disclosure practices concerning additional capital infusions to specific projects underlying a bond issue and professional fees incurred in connection with the restructuring of debt securities held as investments are diverse. Some record expenditures for both capital infusions and professional fees as additions to the original investment cost basis; others record expenditures for professional fees as operating expenses.

### **Views on the Issues**

.47 Some believe that expenditures incurred to support the operations of a project or operator underlying a bond issue, either in the form of capital infusions or professional fees, should be charged to operations because such expenditures have no certain future economic benefit and do not increase the bond issuer's obligation payable to the bondholder. Others believe that such expenditures should be recorded as additions to the cost basis of the investment because they are made solely to enhance or protect the realizable value of the high-yield security.

### **Capital Infusions**

.48 Capital infusions are expenditures made directly to the issuer to ensure that operations are completed, thereby allowing the issuer to generate cash flows to service the debt. Such expenditures are generally nonrecurring. In certain cases, bondholders may receive additional promissory notes, or the original bond instrument may be amended to provide for repayment of the capital infusions. However, regardless of whether or not additional promissory notes are received, some believe capital infusions generate a future economic benefit. They believe that such capital infusions should in all cases be considered additions to the cost of the investment. Further, they note that, because investment companies report their investment portfolios at market values, those additional capital infusions, if treated as additions to the cost of the investment and if unaccompanied by a corresponding increase in market value, will be reflected in net assets through an increase in unrealized losses. Thus, the issue is a matter of classification between gain or loss and net investment income in the statement of operations, and such expenditures generally are viewed as a part of the cost of the investment rather than as a cost of operations.

### **Workout Expenditures**

.49 Workout expenditures under this SOP consist of professional fees (legal, accounting, appraisal) paid to entities unaffiliated with the investment company's advisor or sponsor, which generally are incurred in connection with (a) capital infusions, (b) restructurings or plans of reorganization, (c) ongoing efforts to protect or enhance an investment, or (d) the pursuit of other claims or legal actions. Some believe that such expenditures incurred to maintain an investment company's position in high-yield debt securities among other bondholders or with the issuer should be reported as operating expenses by the investment company. Others believe that such costs are also incurred principally

to maintain or prevent substantial diminution in future realizable value and therefore should be reported as additions to the cost basis.

## Conclusion

.50 All capital infusions, as defined in paragraph .48, should be recorded as additions to the cost bases of related securities because the nature of capital infusions is to enhance or prevent substantial diminution in the value of the investment.

.51 Workout expenditures that are incurred as part of negotiations of the terms and requirements of capital infusions, or that are expected to result in the restructuring of or a plan of reorganization for an investment should be recorded as realized losses. Ongoing expenditures to protect or enhance an investment, or expenditures incurred to pursue other claims or legal actions, should be treated as operating expenses.

## Audit Procedures to Be Considered in Evaluating Valuations of High-Yield Debt Securities

### Discussion

.52 Market-value risk for holders of high-yield debt securities is compounded by the relatively thin trading market in such securities, which increases price volatility and makes it difficult to liquidate holdings efficiently at any specific time. Determination of market prices is difficult given the illiquid or sometimes nonexistent trading market. Furthermore, there are no standardized procedures or central markets for pricing most high-yield debt securities. In addition, few third-party pricing services currently exist, except for those used by investment companies; these could be used by auditors to obtain market prices of issues in support of investment companies' valuations.

### Current Practices

.53 Auditors generally corroborate market values of investment companies' high-yield debt securities with independent pricing services. Some auditors use one pricing service; others obtain at least two prices for each security by using two or more services. Some auditors perform extensive procedures to determine the reasonableness of valuations obtained from pricing services; others rely on the expertise of the independent pricing services and perform only exception reviews.

.54 Based on pricing, high-yield debt securities can be viewed as being one of three types:

- a. Securities for which there is an active market and for which independent prices are readily available
- b. Securities for which the market is less active and for which limited price information is available
- c. Securities for which there is no market or a thin market and that are priced by the investment company

## Views on the Issues

.55 Some believe that the current practice of monitoring prices on an exception basis in connection with obtaining prices from independent pricing services is adequate. They believe it is common knowledge that exact measures of individual high-yield bond values do not exist because there is no central exchange. They further believe that review procedures focused on significant changes in prices would identify unsound price valuations and that, for securities whose values are estimated by the investment company's directors, the combination of reviews of an investment company's portfolio by accounting managers acts as an adequate check to ensure that pricing practices are reasonable.

.56 Others believe that more specific guidance on reviewing the reasonableness of prices used is required for auditors. They also believe there is significant diversity in the extent and frequency of reviews of the methods applied by pricing services.

## Conclusion

.57 Given the complexities of pricing high-yield debt securities, as well as the potentially volatile market conditions surrounding those securities, certain additional pricing valuation audit procedures should be considered by auditors when reviewing the valuations of high-yield debt securities. The auditor may conclude that additional procedures are not warranted based on an assessment of control procedures applied by the investment company.

.58 Pricing services may be evaluated in accordance with SAS No. 73, *Using the Work of a Specialist*. Such procedures may include the following:

- Review of the methods used for determining daily prices and the consistency of those methods from period to period
- Consideration of the experience of the individuals involved in determining prices and of the quality control procedures in place
- Review of recent trading volumes and comparison of prices to those obtained from market makers

.59 The SEC's Financial Reporting Release (FRR) 404.03(b) discusses directors' valuation of securities for which readily available market prices do not exist. FRR 404.03(c) suggests certain procedures that the auditor should consider when reviewing securities valued in good faith by directors. In addition to those procedures the auditor may also wish to consider the following:

- Review of the methods used by management to determine and update daily prices and of the consistency of this methodology from period to period and across similar securities
- Review of recent trading transactions subsequent to the reporting date to determine whether significant price changes have occurred
- Consideration of the experience of individuals involved in determining prices
- Review of procedures used to assess the credit risk of issuers

SAS No. 57, *Auditing Accounting Estimates*, provides guidance to auditors on obtaining sufficient competent evidential matter to support significant accounting estimates in audits of financial statements conducted in accordance with generally accepted auditing standards.

**.60** Furthermore, good-faith security value estimates may present the auditor with unique reporting problems. The board of directors' fair valuation procedures are designed to approximate the values that would have been established by market forces and are therefore subject to uncertainties.

**.61** The auditor should not modify the auditor's opinion if he or she concludes, based on an examination of the available evidence, that the process used to estimate value is reasonable, the documentation supportive, and the range of possible values not significant. The auditor may, however, choose to emphasize the existence of the matter by inserting an explanatory paragraph in the audit report.

## **Effective Date and Transition**

**.62** This SOP is effective for financial statements and for audits of such financial statements for fiscal years ending after December 15, 1993, and for interim periods within such years. This SOP need not be applied to financial statements for fiscal years ending before its effective date that, for comparative purposes, are provided with financial statements for fiscal years ending after its effective date. The effect of this SOP should be disclosed in the period in which it is first applied. Early application of this SOP is encouraged.

**Section 10,550****Statement of Position 93-2  
Determination, Disclosure, and Financial  
Statement Presentation of Income, Capital  
Gain, and Return of Capital Distributions by  
Investment Companies**

February 1, 1993

**NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

**Introduction**

.01 Amounts distributed by an investment company as net investment income or capital gains often are not equal to the corresponding income or gain amounts shown in the company's financial statements. The principal cause is that fund distributions are based on income and gain amounts determined in accordance with federal income tax regulations, whereas the corresponding financial statement amounts are determined in accordance with generally accepted accounting principles (GAAP). The differences created can be temporary, meaning that they will reverse in the future, or they can be permanent. Some investment companies treat portions of those distributions as a return of capital for financial statement purposes.

.02 Situations often arise that create a book return of capital but not a tax return of capital, because distributions are determined in accordance with federal income tax regulations by investment companies. Accordingly, return of capital is frequently different for GAAP and federal income tax purposes because of differences between book and tax income (see illustration 1 in the appendix [paragraph .15]).

## Securities and Exchange Commission Guidance

.03 Distributions that result in a book return of capital are currently required by section 19a-1 of the Investment Company Act of 1940, as amended, to be disclosed to shareholders by investment companies at the time of distribution. Because of the differences engendered by the current tax regulations between a book return of capital and a tax return of capital, reporting book returns of capital has become irrelevant. This statement of position (SOP) provides guidance on the disclosure of tax return of capital for financial statement purposes and should help the industry comply with the section 19a-1 requirement.

### Scope

.04 This SOP provides guidance for financial statement presentation and disclosure of distributions to shareholders, including tax return of capital, for investment companies that are registered under the Investment Company Act of 1940, as amended, and that qualify as regulated investment companies under subchapter M of the Internal Revenue Code. It amends the AICPA's Audit and Accounting Guide *Audits of Investment Companies*.

### Present Practices

.05 Investment companies' net assets consist of four components:

- a. Undistributed net investment income
- b. Undistributed net realized gains
- c. Unrealized appreciation
- d. Shareholder capital

Those components must be disclosed separately on the balance sheet or in a note to the financial statements. For financial statement purposes, an investment company has two pools from which distributions of earnings to shareholders may be made: net investment income and net realized capital gains. They traditionally have been separated in a fund's statement of operations and statement of changes in net assets and in the balance sheet analysis of net assets. This distinction helps shareholders understand the contribution of each aspect of investment activity to the investment company's overall operations. Additionally, the statement of changes in net assets presents, in comparative form, changes in net assets resulting from operations, net equalization<sup>1</sup> credits or debits, distributions to shareholders classified as distributions from net investment income, net realized gains from investment transactions and other sources, and capital share transactions.<sup>2</sup>

---

<sup>1</sup> Equalization, a book accounting practice unique to the investment company industry, prevents the continuing shareholder interest in undistributed income from being affected by changes in the number of shares outstanding by applying a portion of the proceeds from sales and costs of repurchases of capital shares to undistributed income (see *Audits of Investment Companies*, paragraph 1.32).

<sup>2</sup> For further discussion on the statement of changes in net assets presentation, see *Audits of Investment Companies*, paragraphs 5.36 and 5.37.

**.06** For tax purposes, U.S. investment companies are corporations, or business trusts treated as corporations, subject to taxation on income and net capital gains unless certain requirements are met. To maintain its favorable status as a regulated investment company and avoid federal excise tax or a tax on income, a company must comply with a complex array of tax rules on distributions. In particular, distributions of net investment income and realized capital gains by investment companies are governed principally by the requirements of subchapter M and the excise tax requirements of the Internal Revenue Code.

**.07** Tax regulations that incorporate specific rules for determining the nature of fund income and the timing of its recognition also require designation of the nature and source of distributions. Excise tax requirements, enacted as part of the 1986 Tax Reform Act, add another element of complexity by defining a measurement period for investment income and net realized capital gains that may differ from a fund's fiscal year, as well as specific dates by which distributions of such income and gains must be paid to avoid an excise tax. Accordingly, distributions may occur in excess of GAAP-basis undistributed net investment income and undistributed net realized gains, resulting in a prepayment of future earnings that does not constitute a return of capital for tax purposes.

**.08** Varied interpretations of the two-pool concept and different practices in the recognition of revenue and expense for financial statement and income- or excise-tax purposes have led to diverse reporting and disclosure practices for distributions by investment companies. In particular, investment companies have not followed a consistent approach to the determination and disclosure of a book or tax return of capital.

## Views on the Issue

**.09** For financial reporting purposes, strict application of the two-pool concept would result in a book return of capital when distributions from net investment income exceed the total of GAAP-basis undistributed net investment income from prior periods and the current period (including net equalization debits or credits for funds that practice equalization) or when distributions from net realized capital gains exceed GAAP-basis undistributed net realized capital gains from prior periods and the current period.

**.10** To avoid a book return of capital occurring when one pool is overdistributed while the other is underdistributed, an alternative treatment, which aggregates the two pools into one pool, recognizes a book return of capital only if the sum of distributions exceeds the aggregate total of undistributed net investment income and undistributed net realized capital gains. (See illustrations 2, 3A, and 3B in the appendix [paragraph .15].) Such treatment averts the need, for financial statement purposes, to charge paid-in capital due to a book return of capital caused by book-tax temporary differences. In practice under this aggregate one-pool approach, when net realized capital losses are reported for the year, no distribution of undistributed net investment income made to fulfill tax distribution requirements is considered a book return of capital.

**.11** For tax purposes, a return of capital generally occurs when distributions by an investment company exceed the aggregate amount of undistributed net investment company taxable income and net realized capital gains calculated in accordance with tax regulations—that is, distributions exceed current

tax earnings and profits when there is an accumulated tax deficit, or current and accumulated tax earnings and profits when there are accumulated tax earnings and profits. This characterization is of primary importance to the shareholders because such an event requires shareholders to adjust the tax basis of their shares and to exclude the return of capital from current taxable income.

## Conclusion

.12 Investment companies prepare their financial statements on the basis of GAAP. Although book returns of capital may occur, they have little relevance to investment company shareholders. In contrast, tax returns of capital have a high degree of relevance and must be separately reported to shareholders for income-tax purposes. To report book returns of capital when such returns have not occurred for tax purposes would be confusing to shareholders.

.13 Distributions made by investment companies often are different from the aggregate GAAP-basis financial statement total of net investment income (including net equalization credits or debits and undistributed net investment income) and accumulated net realized capital gains (total GAAP-basis net income and realized capital gains). The following accounting and reporting guidelines apply to investment company distributions.

- a. Payments to shareholders of net investment income and net realized capital gains should be charged to GAAP-basis undistributed net investment income or accumulated net realized capital gains to the extent thereof, with any excess over the total of such net investment income and realized capital gains deducted from paid-in capital, except as described in *b*, below. (See illustrations 3A and 3B in the appendix [paragraph .15].)
- b. Payments in excess of total GAAP-basis net investment income and realized capital gains may be charged to undistributed net investment income or accumulated net realized capital gains, as appropriate, to the extent that the overdistributions are the result of specific book-tax temporary differences.<sup>3</sup> Accordingly, amounts distributed in excess of total GAAP-basis net investment income and realized capital gains attributable to temporary differences should be shown as distributions in excess of such income or capital gain amounts, or both, in the statement of changes in net assets, and as accumulated distributions in excess of net investment income or realized capital gain (negative balances) in the analysis of components of net assets to the extent of the specific temporary differences. Payments in excess of total GAAP-basis net investment income and realized capital gains that are the result of permanent book-tax differences should be deducted from paid-in capital in the analysis of components of net assets. Also, if in a subsequent period a portion or all of a temporary difference becomes a permanent difference, the amount of the permanent difference should be reclassified to paid-in capital.<sup>4</sup>

---

<sup>3</sup> Among the more common items that create book-tax temporary differences are deferred capital losses due to wash sales; average cost versus specific identification cost; treatment of options, futures, and forward contracts; foreign currency gain or loss treatment (IRS Section 988); use of capital-loss carryforwards; straddles; tax accretion of market discount; defaulted bond income; and post-October 31 losses.

<sup>4</sup> Items considered permanent differences include equalization credits or debits and the expiration of capital-loss carryforwards.

- c. The primary reason(s) for any significant difference between total GAAP-basis net income and realized capital gains and actual distributions should be disclosed in the notes to the financial statements.
- d. If, at a fund's fiscal year end, a distribution is a tax return of capital, as defined in paragraph .11 of this SOP, the amount should be presented separately as such in the statement of changes in net assets and deducted from paid-in capital in the analysis of components of net assets. The distribution of capital should also be reflected in the per share table. (See illustrations 3A, 3B, and 4 in the appendix [paragraph .15].) Because certain state securities regulations may govern changes to a fund's capital accounts, consideration should be given to consulting with the board of directors/trustees and legal counsel when adjustments to capital seem appropriate.
- e. With respect to interim financial statements prepared in accordance with GAAP, if management determines that for the fund's fiscal year a tax return of capital is likely to occur, although the exact dollar amount may not be estimable, that fact should be disclosed in the interim financial statements.

## Effective Date and Transition

.14 This SOP is effective for annual financial statements for fiscal years ending after December 15, 1993, and for interim statements for periods in such years. Restatement of comparative financial statements, including the supplementary per share information, is permitted but not required. If financial statements are not restated upon adoption of this SOP, the appropriate components of capital in the statement of net assets should be reclassified to conform with paragraph .13. Early application of this SOP is encouraged. The effect of changes caused by adopting this SOP should be disclosed in the period in which it is first applied.

.15

Appendix

Illustrations

Illustration 1

Book Return of Capital but no Tax Return of Capital

Year 1	Book income	\$10
	Tax income*	15
	Distribution to shareholder	15
Year 2	Book income	15
	Tax income†	10
	Distribution to shareholder	10
	Cumulative book income	25
	Cumulative tax income	25
	Cumulative distributions to shareholder	25

\* Amount is greater because of a timing difference that increases investment company taxable income in Year 1. During Year 1, because of the distribution of taxable income to meet tax requirements and avoid payment of a tax on income, a book return of capital is created.

† Amount is less because the Year 1 timing difference reverses in Year 2. At the end of Year 2, cumulative distributions are equal to cumulative income and, on a cumulative basis, no book return of capital has occurred.

**Illustration 2****Comparison of the GAAP-Basis Two-Pool and Aggregate One-Pool Approaches With the Tax-Basis One-Pool Concept**

	<i>GAAP Basis</i>		<i>Tax-Basis One-Pool</i>
	<i>Two-Pool</i>	<i>Aggregate One-Pool</i>	
Income			
Net investment income	\$10	\$10	\$10
Net realized capital gains	<u>2</u>	<u>2</u>	<u>2</u>
Total	<u>\$12</u>	<u>\$12</u>	<u>\$12</u>
Distributions			
Net investment income	\$11	\$11	\$10
Net realized capital gains	<u>1</u>	<u>1</u>	<u>2</u>
Total	<u>\$12</u>	<u>\$12</u>	<u>\$12</u>
Book overdistribution	Yes (\$10-\$11)	No	N/A
Tax return of capital	No	No	No

In this example, although distributions of net investment income exceeded net investment income earned, net realized capital gains were underdistributed. As distributions in the aggregate did not exceed total income, the aggregate one-pool method indicates no return of capital.

Total Distributions	<u>\$18</u>	<u>\$18</u>	<u>\$17</u>	<u>\$22</u>	<u>\$15</u>

Illustrations of Notes to Financial Statements

\* Net investment income and net realized gains differ for financial statements and tax purposes primarily because of the deferral of wash-sales losses.

The character of distributions made during the year from net investment income or net realized gains may differ from their ultimate characterization for federal income tax purposes due to GAAP/tax differences in the character of income and expense recognition.

† Despite a carryforward loss, a taxable distribution of realized gains was made, which will be treated as an ordinary income distribution for federal income tax purposes.

<u>Recommended Presentation (a)</u>					
Statement of Changes:					
Distribution from net investment income	\$ 8	\$ 8	\$ 8	\$ 8	\$10
Distribution in excess of net investment income	—	—	—	—	—
Distribution from realized gains	5	5	5	5	—
Distribution in excess of realized gains	5	5	4	5	5(c)
Tax return of capital distribution	—	—	—	4(b)	—
	<u>\$18</u>	<u>\$18</u>	<u>\$17</u>	<u>\$22</u>	<u>\$15</u>
<u>Effect on Statement of Net Assets—Increase (Decrease)</u>					
Undistributed net investment income	\$ 2	\$ 2	\$ 2	\$ 2	\$—
Accumulated undistributed realized gains	(5)	(5)	(4)	(5)	5(d)
Paid-in capital	—	—	—	4(b)	(5)(d)
	<u>\$(3)</u>	<u>\$(3)</u>	<u>\$(2)</u>	<u>\$(7)</u>	<u>\$—</u>

(a) Per share data table presentation should conform to that shown in the statement of changes. Presentation of distributions is determined based on their tax-basis characteristics and then adjusted based on the source of the distributions, i.e., generally the lesser of book or tax.

(b) In the event that the \$4 overdistribution is not a tax return of capital, but merely a "spillover" distribution ("ex" date falls within fiscal period; payable date is in subsequent period), the amount would be shown as an "excess distribution" in the statement of changes and no deduction from paid-in capital would be necessary.

(c) The amount shown as a distribution in excess of net realized gains is limited by the amount of the lost capital-loss carryforward.

(d) The portion of the loss carryforward, in an amount equal to the distribution in excess of net realized gains, should be reclassified to paid-in capital.

Illustration 3B

(Aggregate One-Pool Concept)

The Effect of a Permanent Difference on Distributions and Recommended Financial Statement Presentation

	(1)(c)	(2)	(3)	(4)
Fact Situation				
GAAP Basis—				
Net investment income	\$10	\$10	\$10	\$10
Net realized gain	<u>5</u>	<u>5</u>	<u>5</u>	<u>5</u>
GAAP Income/Gain	15	15	15	15
Permanent Tax Adjustments—				
Market discount/IRC Section 988 reclassification (a)				
Net investment income	3	(3)	—	—
Realized gain/loss	(3)	3	—	—
Capital loss carryforwards:				
Used (temporary)	—	—	(5)	(5)
Expired (permanent)	<u>—</u>	<u>—</u>	<u>—</u>	<u>(—)(e)</u>
Taxable Income/Gain	<u>\$15</u>	<u>\$15</u>	<u>\$10</u>	<u>\$10</u>
Distributions as Designated During the Year:				
Net investment income	\$13	\$ 7	\$10	\$10
Realized gains	<u>2</u>	<u>8</u>	<u>—</u>	<u>—</u>
Total Distributions	<u>\$15</u>	<u>\$15</u>	<u>\$10</u>	<u>\$10</u>

	(1)(c)	(2)	(3)	(4)
<u>Recommended Presentation (b)</u>				
Statement of Changes:				
Distribution from net investment income	\$10	\$ 7	\$10	\$10
Distribution in excess of net investment income	—	—	—	—
Distribution from realized gains	2	5	—	—
Distribution in excess of realized gains	<u>3</u>	<u>3</u>	<u>—</u>	<u>—</u>
	<u>\$15</u>	<u>\$15</u>	<u>\$10</u>	<u>\$10</u>
 <u>Effect on Statement of Net Assets—Increase (Decrease)</u>				
Undistributed net investment income	\$—	\$— (d)	\$—	\$—
Accumulated undistributed realized gains	—	— (d)	5	10(e)
Paid-in capital	<u>—</u>	<u>— (d)</u>	<u>—</u>	<u>5(e)</u>
	<u>\$—</u>	<u>\$—</u>	<u>\$ 5</u>	<u>\$ 5</u>

(a) Reclassification of realized loss on foreign currency to ordinary income as required by Section 988 of the Internal Revenue Code.

(b) Per share data table presentation should conform to that shown in the statement of changes. The financial statement presentation of distributions is determined based on their tax-basis characteristics and then adjusted based on the source of the distribution, i.e., generally the lesser of book or tax.

(c) This example demonstrates the circumstances and presentation that would be involved in reclassifying realized gains on discounted securities to ordinary income when a fund chooses not to accrete market discount.

(d) The 988 reclassification will not reverse. Thus, the remaining balances in undistributed realized gains (\$3) and net investment income (\$3) have been closed to paid-in-capital with zero net effect.

(e) Expired capital-loss carryforward of \$5 should be closed out to paid-in capital.

Illustration 4

Illustrative Financial Statement Presentation of Various Distribution Situations\*

	(1)	(2)	(3)(d)	(4)
Fact Situation				
Net investment income	\$100	\$100	\$100	\$100(e)
Net equalization credits (debits)	20	20	(20)	20
GAAP income	\$120	\$120	\$ 80	\$120
Distributions during the year	\$100	\$120	\$ 80	\$115

Recommended Presentation (a)

Statement of Changes:				
Distribution from net investment income	\$100	\$100	\$ 80	\$100
Distribution in excess of net investment income	—	—	—	10
Tax return of capital distribution	—	20	—	5(f)
	\$100	\$120	\$ 80	\$115

Effect on Statement of Net Assets—  
Increase (Decrease)

Undistributed net investment income	\$ 20(b)	\$— (c)	\$—	\$10
Paid-in capital	—	\$— (c)	—	(5)
	\$ 20	\$—	\$—	\$ 5

\* Examples (1), (2), and (3) assume no book/tax differences other than equalization and no beginning balances. Example (4) is a tax-exempt fund.

Illustration of Note to Financial Statements—Applicable to Fact Situation (1)

Equalization is a permanent book/tax difference that causes a difference between investment income and distributions.

(a) Per share data table presentation should conform to that shown in the statement of changes.

(b) Distribution of investment excludes net equalization credits.

(c) Distribution of investment income and net equalization credits with tax return of capital requires presentation not only of the tax return of capital distribution, but also reclassification of equivalent amounts representing the distributed net equalization credits from undistributed net investment income to paid-in capital.

(d) Distribution of investment income with consideration of equalization debits, assuming, for example, that book and tax equalization are the same.

(e) Net of \$10 expenses.

(f) \$100 net investment income plus \$10 disallowed expenses equals \$110 net earnings and profits. Distribution of \$115 is \$100 tax-exempt, \$10 taxable, and \$5 return of capital.

## Section 10,560

# **Statement of Position 93-3 Rescission of Accounting Principles Board Statements**

March 19, 1993

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction**

.01 The Accounting Principles Board (APB) of the American Institute of Certified Public Accountants (AICPA) issued thirty-one Opinions. The APB also issued four Statements:

- a. APB Statement No. 1, *Statement by the Accounting Principles Board*, April 1962
- b. APB Statement No. 2, *Disclosure of Supplemental Financial Information by Diversified Companies*, September 1967
- c. APB Statement No. 3, *Financial Statements Restated for General Price-Level Changes*, June 1969
- d. APB Statement No. 4, *Basic Concepts and Accounting Principles Underlying Financial Statements of Business Enterprises*, October 1970

## **Conclusions**

.02 In order to make clear that APB Statement Nos. 1, 2, 3, and 4 do not, and never did, have standing as rules or standards under the AICPA's Rules of Conduct or Code of Professional Conduct and to eliminate misunderstanding and attendant confusion, and because those Statements<sup>1</sup> effectively have been superseded by pronouncements of the Financial Accounting Standards Board

<sup>1</sup> APB Statements have not been included in the FASB's *Original Pronouncements*, paperback edition, for the past several years. However, they are included in the FASB's *Original Pronouncements* loose-leaf service.

(FASB), the Accounting Standards Executive Committee (AcSEC) of the AICPA hereby formally rescinds APB Statement Nos. 1, 2, 3, and 4 enumerated in paragraph .01 hereof.

## Current Literature

.03 Opinions of the APB, to the extent that they have not been superseded by pronouncements of the FASB, are part of the literature encompassed by the AICPA's Code of Professional Conduct, specifically rule 203 thereof, and, as such, must be followed by an AICPA member's client in the preparation of its financial statements in order for the member to issue an unmodified report about whether the client's financial statements have been prepared in conformity with generally accepted accounting principles (GAAP). Thus, APB Opinions, to the extent that they have not been superseded by pronouncements of the FASB, are rules or standards that must be observed in the practice of public accountancy by members of the AICPA. The various APB Opinions contained legends explaining their authority. These are cited in appendix A [paragraph .12].

.04 In Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, APB Statements are not included in categories (a) through (d), which constitute pronouncements covered by rule 203 or by another source of established accounting principles. However, APB Statements are referred to as "other accounting literature" that may be considered in the absence of a pronouncement covered by Rule 203 or another source of established accounting principles. Other accounting literature includes, for example, FASB and Governmental Accounting Standards Board (GASB) Concepts Statements; APB Statements; AICPA Issues Papers; AICPA Technical Practice Aids; accounting textbooks; and articles. Paragraph 11 of SAS No. 69 states that FASB Statements of Financial Accounting Concepts would normally be more influential than other sources in the other accounting literature category.

.05 APB Statement Nos. 2, 3, and 4 carried the following legends:<sup>2</sup>

### *Statement 2*

This Statement is not an "Opinion of the Accounting Principles Board" as contemplated in the Special Bulletin, *Disclosure of Departures from Opinions of the Accounting Principles Board*, October 1964. It is being issued as a special report for the information and assistance of members of the Institute and others interested in the subject. The Board may issue similar Statements in the future when it appears that preliminary analyses or observations on accounting matters should be issued in advance of research and study by the Board.

### *Statements 3 and 4*

Statements of the Accounting Principles Board present the conclusions of at least two-thirds of the members of the Board, which is the senior technical body of the Institute authorized to issue pronouncements on accounting principles. This Statement is not an "Opinion of the Accounting Principles Board" covered by action of the Council of the Institute in the Special Bulletin, *Disclosures of Departures from Opinions of the Accounting Principles Board*, October, 1964.

---

<sup>2</sup> APB Statement No. 1 was the APB's commentary on the AICPA's Accounting Research Studies 1 and 3 and, as such, neither required nor carried a legend.

.06 Statements issued by the APB were never rules or standards that had to be observed by members of the AICPA in the practice of public accountancy. APB Statements are not comprehended by rule 203 of the Code of Professional Conduct. Nonetheless, some who are not familiar with the distinction between Opinions and Statements issued by the APB have cited, and continue to cite, APB Statements as being rules or standards that must be observed by members of the AICPA in the practice of public accountancy.

.07 The FASB effectively superseded APB Statement No. 2 with Statement of Financial Accounting Standards No. 14, *Financial Reporting for Segments of a Business Enterprise*. FASB Statement No. 89, *Financial Reporting and Changing Prices*, effectively superseded APB Statement No. 3. The FASB's various Statements of Financial Accounting Concepts effectively superseded APB Statement No. 4.

.08 Although APB Statement No. 3 is being rescinded because of subsequent FASB action with regard to inflation accounting, it is recognized that the FASB addressed only the presentation of partial price-level data. Since APB Statement No. 3 provided guidance for a comprehensive application of price-level adjusted financial statements, this SOP is not precluding such a presentation (to the extent it is not inconsistent with guidance in FASB Statement No. 89 regarding historical cost/constant purchasing power accounting, such as the classification of assets and liabilities as monetary or nonmonetary) should a company wish to do so.<sup>3</sup>

.09 Various APB Opinions, FASB Statements, and AICPA publications refer to APB Statements. The FASB Concepts Statements subsequently issued discuss essentially the same matters, and, therefore, this SOP has no impact on those pronouncements. In a few instances, the matter in the APB Statement is not included elsewhere in FASB pronouncements, and as indicated in appendix B [paragraph .13], AcSEC agrees with the relevant comments from those APB Statements and this rescission is not expected to affect practice. Further, various FASB Concepts Statements also refer to APB Statements. The references are listed in appendix B [paragraph .13].

.10 AcSEC believes the rescission of the APB Statements should have no effect on financial reporting and should eliminate any confusion over the status of the pronouncements.

## Effective Date and Transition

.11 This SOP is effective upon issuance.

---

<sup>3</sup> AcSEC agrees with the conclusions of the APB, expressed in paragraph 26 of APB Statement No. 3, regarding general price-level financial statements of companies operating in hyperinflationary economies. Paragraph 26 states:

The Board recognizes that the degree of inflation or deflation in an economy may become so great that conventional statements lose much of their significance and general price-level statements clearly become more meaningful, and that some countries have experienced this degree of inflation in recent years.<sup>5</sup> The Board concludes that general price-level statements reported in the local currency of those countries are in that respect in conformity with accounting principles generally accepted in the United States, and that they preferably should be presented as the basic foreign currency financial statements of companies operating in those countries when the statements are intended for readers in the United States.<sup>6</sup>

<sup>5</sup> Although the Board believes that this conclusion is obvious with respect to some countries, it has not determined the degree of inflation or deflation at which general price level statements clearly become more meaningful.

<sup>6</sup> This paragraph applies only to statements prepared in the currency of the country in which the operations reported on are conducted. Only conventional statements of foreign subsidiaries should be used to prepare historical-dollar consolidated statements.

## Appendix A

### Legends Included in APB Opinions 1 Through 31

**A-1.** APB Opinions 1 through 5, issued between 1962 and 1964, carried the following legend:

Opinions present the considered opinion of at least two-thirds of the members of the Accounting Principles Board, reached on a formal vote after examination of the subject matter. Except where formal adoption by the Council or the membership of the Institute has been asked and secured, the authority of the Opinions rests upon their general acceptability. While it is recognized that general rules may be subject to exception, the burden of justifying departures from the Board's recommendations must be assumed by those who adopt other practices. Recommendations of the Board are not intended to be retroactive, nor applicable to immaterial items.

**A-2.** APB Opinions 6 through 15, issued between 1965 and 1969, carried the following legend:

Opinions present the considered opinion of at least two-thirds of the members of the Accounting Principles Board, reached on a formal vote after examination of the subject matter.

Except as indicated in the succeeding paragraph, the authority of the Opinions rests upon their general acceptability. While it is recognized that general rules may be subject to exception, the burden of justifying departures from Board Opinions must be assumed by those who adopt other practices.

Action of Council of the Institute (Special Bulletin, *Disclosure of Departures from Opinions of the Accounting Principles Board*, October 1964) provides that:

- a. "Generally accepted accounting principles" are those principles which have substantial authoritative support.
- b. Opinions of the Accounting Principles Board constitute "substantial authoritative support."
- c. "Substantial authoritative support" can exist for accounting principles that differ from Opinions of the Accounting Principles Board.

The Council action also requires that departures from Board Opinions be disclosed in footnotes to the financial statements or in independent auditors' reports when the effect of the departure on the financial statements is material.

Unless otherwise stated, Opinions of the Board are not intended to be retroactive. They are not intended to be applicable to immaterial items.

**A-3.** APB Opinions 16 through 27, issued between 1970 and 1972, carried the following legend:

Opinions of the Accounting Principles Board present the conclusions of at least two-thirds of the members of the Board, which is the senior technical body of the Institute authorized to issue pronouncements on accounting principles.

Board Opinions are considered appropriate in all circumstances covered but need not be applied to immaterial items.

Covering all possible conditions and circumstances in an Opinion of the Accounting Principles Board is usually impracticable. The substance of transactions and the principles, guides, rules, and criteria described in Opinions should control the accounting for transactions not expressly covered. Unless otherwise stated, Opinions of the Board are not intended to be retroactive. Council of the Institute has resolved that Institute members should disclose departures from Board Opinions in their reports as independent auditors when the effect of the departures on the financial statements is material or see to it that such departures are disclosed in notes to the financial statements and, where practicable, should disclose their effects on the financial statements (Special Bulletin, *Disclosure of Departures from Opinions of the Accounting Principles Board*, October 1964). Members of the Institute must assume the burden of justifying any such departures.

**A-4.** APB Opinions 28 through 31, issued in 1973, carried the following legend:

Opinions of the Accounting Principles Board present the conclusions of at least two-thirds of the members of the Board.

Board Opinions need not be applied to immaterial items.

Covering all possible conditions and circumstances in an Opinion of the Accounting Principles Board is usually impracticable. The substance of transactions and the principles, guides, rules, and criteria described in Opinions should control the accounting for transactions not expressly covered.

Unless otherwise stated, Opinions of the Board are not intended to be retroactive.

Rule 203 of the Institute's Rules of Conduct prohibits a member from expressing his opinion that financial statements are presented in conformity with generally accepted accounting principles if the statements depart in a material respect from such principles unless he can demonstrate that due to unusual circumstances application of the principles would result in misleading statements—in which case his report must describe the departure, its approximate effects, if practicable, and the reasons why compliance with the established principles would result in misleading statements.

Pursuant to resolution of Council, this Opinion of the APB establishes, until such time as they are expressly superseded by action of FASB, accounting principles which fall within the provisions of Rule 203 of the Rules of Conduct.

## Appendix B

### References in APB Opinions, FASB Statements, and AICPA Publications to APB Statements

#### Introduction

**B-1.** Various APB Opinions, FASB Statements, and AICPA publications refer to APB Statements. Those are listed below along with references to FASB Concepts Statements discussing essentially the same matters that were subsequently issued.

**B-2.** To use the reference to revenue recognition as an illustration, APB Statement No. 4, paragraph 150, stated:

Realization principle—revenue is generally recognized when both of the following conditions are met: (1) the earning process is complete or virtually complete, and (2) an exchange has taken place . . . .

**B-3.** Paragraph 83 of the more recently issued FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, discusses revenues and gains. The FASB states that recognition involves consideration of two factors—(a) being realized or realizable and (b) being earned:

- (a) Revenues and gains generally are not recognized until realized or realizable.
- (b) Revenues are not recognized until earned . . . revenues are considered to have been earned when an entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues.

**B-4.** Another illustration is paragraph 35 of APB Statement No. 4, which lists “present characteristics and limitations of financial accounting and financial statements” and includes:

*Substance Over Form.* Although financial accounting is concerned with both the legal and economic effects of transactions and other events and many of its conventions are based on legal rules, the economic substance of transactions and other events are usually emphasized when economic substance differs from legal form.

**B-5.** Subsequently issued FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, has several paragraphs on point.

Paragraph 59—The reliability of a measure rests on the faithfulness with which it represents what it purports to represent . . . .

Paragraph 63—Representational faithfulness is correspondence or agreement between a measure or description and the phenomenon it purports to represent.

Paragraph 160 (appendix C)—Substance over form is an idea that also has its proponents, but it is not included [in the FASB Concepts Statement] because it would be redundant. The quality of reliability and, in particular, of representational faithfulness leaves no room for accounting representations that subordinate substance to form. Substance over form is, in any case, a rather vague idea that defies precise definition.

**B-6.** AcSEC believes the FASB Concepts Statements have effectively superseded the discussion of these matters in APB Statement No. 4 as well as substantially all of those listed on the following pages of this appendix.

**B-7.** In addition, the only reference to APB Statements in GASB rules appears in the *Codification of Governmental Accounting and Financial Reporting Standards* as a footnote to paragraph 1600.125, where, in a discussion of recognition of revenues and expenses in proprietary funds, a general reference is made to the more detailed discussion in APB Statement No. 4, paragraphs 147–163. Again, the rescission should have no impact.

## FASB Concepts Statements

**B-8.** Various Concepts Statements refer to APB Statement No. 4, as listed below. However, since the Concepts Statements stand on their own, superseding APB Statement No. 4 has no impact on financial reporting.

<i>Concepts Statement</i>	<i>Topic</i>
No. 1, paragraph 3	Objectives—financial reporting
No. 1, paragraph 57	Background information
No. 2, paragraph 91	Conservatism
No. 2, paragraphs 82–83	Verifiability
No. 2, paragraph 145	Background information
No. 4, footnote 2	Nonreciprocal transfers
No. 5, footnote 1	Financial statements
No. 5, footnote 4	Financial disclosure
No. 5, footnote 50	Revenue recognition
No. 5, footnote 51	Revenue recognition
No. 5, footnote 52	Revenue recognition
No. 6, footnote 52	Transactions, events, circumstances
No. 6, footnote 53	Nonmonetary transactions
No. 6, footnote 57	Expense recognition
No. 6, paragraph 153	Background information

**B-9.** A footnote to Concepts Statement No. 5 indicates that pronouncements such as APB Statement No. 4 will continue to serve their intended purpose: “They describe objectives and concepts underlying standards and practices existing at the time of their issuance.” Since the issuance of APB Statement No. 4 in 1970, it has not been updated for any subsequently issued APB or FASB pronouncement.

## Section 10,570

# **Statement of Position 93-4 Foreign Currency Accounting and Financial Statement Presentation for Investment Companies**

April 22, 1993

### NOTE

Statements of Position of the Accounting Standards Division present the conclusions of at least two thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## Introduction

.01 The purpose of this statement of position (SOP) is to provide guidance on computing and reporting foreign currency (FC) transaction gains or losses under U.S. generally accepted accounting principles for investment companies that invest in (a) securities denominated or expected to settle in currencies other than the U.S. dollar or (b) currencies other than the U.S. dollar, and for companies that have FC transactions. For illustrative purposes, this SOP assumes that the U.S. dollar is the functional currency of the reporting investment company. This guidance on accounting and financial statement presentation applies to all investment companies covered by the AICPA Audit and Accounting Guide *Audits of Investment Companies* that follow U.S. generally accepted accounting principles.

.02 Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 52, *Foreign Currency Translation*, requires that all assets, liabilities, and operations of a foreign entity be measured using the functional currency of that entity. *Functional currency* is defined as the currency of the primary economic environment in which the entity operates—that is, the currency in which the entity primarily generates and expends cash. Paragraphs 79 through 81 of FASB Statement No. 52 provide for two broad classes of foreign operations. The first class includes foreign operations that are relatively self-contained and integrated within a particular country or economic environment. For this class, the FC is the functional currency. In the second class, the day-to-day operations of the foreign entity are dependent on

the economic environment of the parent's currency, and changes in the foreign entity's individual assets and liabilities directly affect the cash flows of the parent company. For this class, the functional currency of the foreign operation is the parent company's currency. Generally, the second class of foreign operations more closely resembles that of U.S. investment companies investing primarily in foreign securities than the first class does. For instance, U.S. closed-end single-foreign-country funds generate and expend cash primarily in their local currency, yet such funds have adopted the U.S. dollar as the functional currency for financial reporting purposes because, among other reasons, cash flows related to the funds' individual assets and liabilities directly affect the U.S. dollar cash flows to shareholders (sales of fund shares are to U.S. shareholders in U.S. dollars, and dividends and distributions are paid to shareholders in U.S. dollars).

.03 Inconsistent application of the functional currency concepts of FASB Statement No. 52 by funds investing in foreign securities has contributed to a diversity of accounting practices for FC transactions. However, because these funds follow value accounting, the net increase or decrease in net assets from operations is the same under each variation although the financial statement presentations of the FC transactions differ. For instance, some funds treat the FC rate variance between the trade and settlement dates as an adjustment to cost and proceeds, whereas other funds treat it as a component of net investment income or realized FC gain or loss. Similarly, some funds include the FC gain or loss resulting from income receivable or expense payable with the related income or expense, whereas others treat it as a separate component of net investment income or realized FC gain or loss. Because the U.S. dollar is generally the reporting currency of these funds, they typically adopt the U.S. dollar as their functional currency. If the facts and circumstances warrant otherwise, a fund may conclude that a currency other than the U.S. dollar should be its functional currency. However, in the value accounting environment, that distinction does not affect the reported amounts of U.S.-dollar-denominated net assets or net changes in net assets.

.04 FC transactions are denominated in a currency other than the fund's functional currency. These transactions may produce payables and receivables that are fixed in terms of the amount of FC that will be paid or received. A change in the exchange rate between the functional currency and the FC increases or decreases the expected functional currency value upon settlement of the transaction or disposition of the security.

.05 The ongoing revaluation of investments and receivables or payables representing unsettled FC transactions is classified as unrealized FC gain or loss. On settlement (when there is actual cash flow), a realized FC gain or loss is recorded. An FC gain or loss (whether realized or unrealized) results from one or more of the following sources:

- The cost of securities held versus their carrying value based on current exchange rates
- Payables or receivables for securities bought or sold at the transaction date versus actual amounts at settlement date or payable or receivable based on current exchange rates
- Interest, dividends, and withholding taxes accrued versus the amount received or receivable based on current exchange rates
- Expenses accrued versus the amount paid or payable in FC, based on current exchange rates

- Marking to market of forward exchange contracts or foreign exchange futures contracts

.06 Each of the sources of FC gain or loss identified in paragraph .05 is discussed later in this SOP.

## Current Literature

.07 With the exception of the investment companies audit guide, FASB Statement No. 52 is the only current pronouncement available on the subject of this SOP. Paragraph 2.100 of the audit guide suggests that "foreign currency transaction gains and losses may be accounted for separately or may be combined for reporting purposes with the type of transaction that gave rise to the gain or loss." It also states, in paragraph 2.96, that the approach of not requiring separate disclosure of the portion of the changes in market value that results from FC rate changes continues to be followed in practice.

## Scope

.08 This SOP provides guidance on measurement and financial statement presentation and disclosure for foreign currency transactions by investment companies. It amends the AICPA Audit and Accounting Guide *Audits of Investment Companies*.

.09 Some funds invest in countries that are highly inflationary, as that term is defined in FASB Statement No. 52, paragraph 11. Accordingly, the separate measurement and disclosure of the FC element may not be meaningful and the disclosures recommended by this SOP may not be appropriate for such situations.

## Conclusions

.10 Each transaction denominated in an FC can initially be measured only in that currency. Any differences between originally recorded amounts and currently consummated or measured amounts in the reporting currency are a function of two factors—(a) foreign exchange rate changes and (b) changes in market prices. Those effects should be identified, computed, and reported other than for gains and losses on investments. The current guidance in paragraphs 2.96 and 2.100, which allows the practice of not separately disclosing the portion of the changes in market values of investments and realized gains and losses thereon that result from FC rate changes, continues to be permitted. However, separate reporting of such gains and losses is allowable and, if adopted by the reporting entity, should conform to the guidance presented herein.

## Securities

### Purchased Interest

.11 Purchased interest represents the interest accrued between the last coupon date and the settlement date of the purchase. It should be recorded in the functional currency as interest receivable at the spot rate on the purchase trade date, and marked to market using each valuation date's spot rate. After the settlement date, daily interest income should be accrued at the daily spot rate. It may be impractical to prepare the foregoing calculations daily, and, therefore, the use of a weekly or monthly average rate may be appropriate in

many cases, especially if the exchange rate does not fluctuate significantly. However, if the exchange rate fluctuation is significant, the calculation should be made daily.

## Marking to Market

.12 A fund investing in foreign securities generally invests in such securities to reap the potential benefits offered by the local capital market. It may also invest in such securities as a means of investing in the FC market or of benefiting from the FC rate fluctuation. The extent to which separate information regarding FC gains or losses will be meaningful will vary depending on the circumstances, and separate information may not measure with precision foreign exchange gains/losses associated with the economic risks of foreign currency exposures. An FC rate fluctuation, however, may be an important consideration in the case of foreign investments, and a reporting entity may choose to identify and separately report any resulting FC gains or losses as a component of unrealized market gain or loss on investments.

.13 The market value of securities should initially be determined in the FC and translated at the spot rate on the purchase trade date. The unrealized gain or loss between the original cost (translated on the trade date) and the market value (translated on the valuation date) comprises the following elements:

- a. Movement in market price
- b. Movement in FC rate

.14 Such movements may be combined as permitted by current guidance. If separate disclosure of the FC gains and losses is chosen, the movement in market prices should be measured as the difference between the market value in FC and the original cost in FC translated at the spot rate on the valuation date. The effect of the movement in the foreign exchange rate should be measured as the difference between the original cost in FC translated at the current spot rate and the historical functional currency cost. These values can be computed as follows:

- a. (Market value in foreign currency minus original cost in foreign currency) times valuation date spot rate equals unrealized market value appreciation or depreciation.
- b. (Cost in foreign currency times valuation date spot rate) minus cost in functional currency equals the unrealized foreign currency gain or loss.

It is recognized that the preceding formulas could be refined to isolate and report the rate change element in the changes in the gains or losses on investments between valuation dates. However, the cost of doing so would not be justified for the relatively minor improvement thereof. Furthermore, such refinement would (a) be a departure from the method required for federal income tax reporting for realized FC gains/losses on debt securities and (b) represent a departure from the practice of those investment companies that presently separately report in their financial statements the effects of foreign exchange on securities gains or losses.

.15 For short-term securities held by a fund that follows the amortized cost method of valuation, the amortized cost value should be substituted for market value in the formulas given in paragraph .14 if separate reporting is chosen by the reporting entity.

## Sale of Securities

.16 If separate reporting of FC gains and losses on sales of securities is chosen by the reporting entity, the computation of the effects of market change and the FC rate change is similar to that described in paragraph .14 above. *Market value* in the formula given in paragraph .14 should be replaced with *sale proceeds* and *valuation date* should be replaced with *sale trade date*. Accordingly—

- a. (Sale proceeds in foreign currency minus original cost in foreign currency) times sale trade date spot rate equals realized market gain or loss on sale of security.
- b. (Cost in foreign currency times sale trade date spot rate) minus cost in functional currency equals realized foreign currency gain or loss.

.17 The sale of a security results in a receivable for the security sold. The related receivable should be recorded on the trade date at the spot rate. On the settlement date, the difference between the recorded receivable amount and the actual FC received converted into the functional currency at the spot rate is recognized as a realized FC gain or loss.

## Sale of Interest

.18 Interest sold represents the accrued interest receivable between the last coupon date and the settlement date of sale of the security. The difference between the recorded interest receivable amount and the actual FC received (converted into the functional currency at the spot rate) should be recognized as a realized FC gain or loss.

## Income

### Interest

.19 Interest on securities denominated in an FC is calculated at the stated rate of interest in the FC. The interest should be accrued daily in the FC at the stated interest rate and translated into the functional currency at the daily spot rate. It may be impractical to prepare such a calculation daily, and, therefore, the use of a weekly or monthly average rate may be appropriate in many cases, especially if the exchange rate does not fluctuate significantly. However, if the exchange rate fluctuation is significant, the calculation should be made daily.

.20 The related receivable balance along with purchased interest, if any, should be accumulated in the FC and translated into the functional currency daily using the spot rate for that date. The difference between the income accrued in the functional currency and the FC receivable at the valuation date spot rate is unrealized FC gain or loss.

.21 When the interest is received and recorded in the functional currency at the spot rate on that date, the unrealized FC gain or loss should be reclassified as realized FC gain or loss.

### Accretion and Amortization

.22 Accretion of discounts and amortization of premiums on bonds should be calculated daily in the FC. The resulting amount of income or offset to income should be translated into the functional currency using that day's spot rate. The same FC amount should be recorded as an addition to cost for accre-

tion of discounts and a reduction to cost for amortization of premiums. Accordingly, cost consists of the original cost, translated at the spot rate in effect on the trade date the bond was bought and adjusted for discount accretion or premium amortization at the spot rate on the date of adjustment. As stated in paragraph .19 of this SOP, use of a weekly or monthly average rate may be appropriate in certain circumstances.

.23 On maturity, the carrying cost (including accretion or amortization) of the security in the FC equals the proceeds. However, this will not be the case in the functional currency. The original cost is translated into the functional currency at the spot rate on the trade purchase date and the accretion or amortization is translated at periodic spot rates. The proceeds are translated into the functional currency at the spot rate on the maturity date. The difference between the proceeds and the accumulated cost in the functional currency is realized FC gain or loss.

## Dividends

.24 Dividend income on securities denominated in FC should be recorded on the ex-date, at the spot exchange rate of the FC to the reporting currency on that date. The related dividend receivable should be translated into the functional currency daily at the spot rate, and the difference between the dividend accrued in the functional currency and the FC receivable at the valuation date spot rate is unrealized FC gain or loss. When the dividend is received, the unrealized FC gain or loss should be reclassified as realized FC gain or loss.

.25 The preceding approach to measuring investment income ensures that investment income accrued on foreign securities reflects the investment transaction without regard to the FC gain or loss created in the time between the accrual and collection of the income.

## Withholding Tax

.26 Whenever tax is withheld from investment income at the source, the amounts withheld that are not reclaimable should be accrued along with the related income on each income recognition date if the tax rate is fixed and known. If the tax withheld is reclaimable from the local tax authorities, it should be recorded as a receivable and not as an expense. When the investment income is received net of the tax withheld, a separate realized FC gain or loss should be computed on the gross income receivable and the accrued tax expense. If the tax rate is not known or estimable, such expense or receivable should be recorded on the date the net amount is received; accordingly, there would be no FC gain or loss. However, if a receivable is recorded, there may be an FC gain or loss through the date such receivable is collected.

## Expenses

.27 The accounting for expenses payable in an FC is identical to that for investment income receivable in an FC. An expense should be accrued as incurred and translated into the functional currency at the spot rate each day. The use of an average weekly or monthly FC rate would be acceptable if the FC rate does not fluctuate significantly. The related accrued expense balance should be accumulated in the FC and translated into the functional currency daily, using the spot rate for that date. The difference between the expense accrued in the functional currency and the related FC accrued expense balance translated into the functional currency at the valuation date spot rate is un-

realized FC gain or loss. When the expense is paid, the unrealized FC gain or loss should be reclassified as realized FC gain or loss.

## Receivables and Payables

.28 All receivables and payables that are denominated in an FC and that may relate to income or expense, or to securities sold or purchased, should be translated into the functional currency each valuation date at the spot rate on that date. The difference between that amount and the functional currency amount that was recorded at various spot rates for income and expense items, and at the trade date spot rate in the case of sales and purchases of securities, is unrealized FC gain or loss. Upon liquidation of the receivable or payable balance in an FC, the difference should be reclassified as realized FC gain or loss.

## Cash

.29 FC cash balances and movements should be accounted for in the same way that FC-denominated securities are. Every receipt of an FC should be treated as a purchase of a security and recorded in the functional currency at the spot rate on the cash receipt date. Similarly, every disbursement of an FC should be treated as a sale of a security and the appropriate functional currency cost should be released, depending on whether a specific identified cost, the first-in, first-out (FIFO) method, or an average cost is used.

.30 The acquisition of an FC does not result in any FC gain or loss. However, the disbursement of an FC results in a realized FC gain or loss that is the difference between the functional currency equivalent of the FC when it was acquired and the FC disbursement translated at the spot rate on the disbursement date. Also, as is the case with all other assets and liabilities denominated in an FC, FC cash balances should be translated on each valuation date at the spot rate on that date, resulting in unrealized FC gain or loss.

## Forward Exchange Contracts

.31 A forward exchange contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed-upon future date. A forward exchange contract can be for either hedging or speculation purposes. Funds usually enter into such contracts for hedging purposes only.

.32 If a fund enters into a forward exchange contract, the forward contract should be recorded on the inception date at the forward rate and marked to market daily.

.33 The unrealized FC gain or loss on such a contract is the difference between the FC amount valued at the forward rate (on the valuation date) and the original contracted value of the forward contract (the amount to be received or paid at expiration or settlement date). On the expiration or settlement date, the unrealized FC gain or loss should be reclassified as realized FC gain or loss. If the forward contract is meant to hedge the payable for the purchase of a security denominated in an FC, the cost of the investment purchased and the related payable that has been hedged by the forward contract should still be recorded at the spot rate on the trade date, and the payable should be translated into the functional currency daily.

Financial Statement Presentation

.34 The current practice of not separately disclosing that portion of unrealized and realized gains and losses on investments that results from FC changes continues to be permitted. All other FC gains or losses should be reported under the realized and unrealized gain or loss on investments and foreign currency section in the statement of operations. For example, realized FC gain or loss on interest and dividends should be included in the realized FC gain or loss component of net realized gain or loss. All unrealized FC gain or loss, other than those on investments, should be reported as unrealized appreciation or depreciation on translation of assets and liabilities in foreign currencies. The statement of changes in net assets and the statement of assets and liabilities should reflect the same realized and unrealized gain and loss components. However, it is permissible (a) to combine the net realized gains or losses from investments with net realized gains or losses from foreign currency transactions and (b) to combine the net unrealized appreciation (depreciation) on investments with the net unrealized appreciation (depreciation) on translation of assets and liabilities in foreign currencies and to report them as single components in those statements.

.35 If separate reporting of the unrealized and realized FC gains or losses on investments is chosen, such gains and losses should be aggregated with all other FC gains and losses and reported as described above. Notes to the financial statements should state an entity's practice of either including or excluding that portion of realized and unrealized gains and losses on investments that results from foreign currency changes with or from other foreign currency gains and losses.

.36 Taxes withheld that are not reclaimable, if any, on foreign source income should be deducted from the relevant income item and be shown either parenthetically or as a separate contra item in the income section of the statement of operations. Taxes levied on the aggregate income or capital gains of the investment company itself should be presented in a manner that is similar to that used for income taxes. The normal withholding taxes should be presented as follows:

Interest or dividend income (net of withholding taxes of \$ X)	\$XXX
or	
Interest or dividend income	\$XXX
Less withholding tax	(XXX)

Other Matters

.37 In addition to the FC risk associated with investing in foreign securities, such investments present additional risks that need to be assessed continuously by management and considered for financial statement disclosure:

- *Liquidity.* Since certain foreign markets are illiquid, market prices may not necessarily represent realizable value.
- *Size.* When market capitalization is low, a fund's share in the entire market (particularly when single-country funds are involved) or in specific securities may be proportionately very large, and the market price would not necessarily reflect the realizable value.

- **Valuation.** Because of liquidity and size problems as well as other factors, such as securities that are unlisted or securities that are thinly traded, funds would have to adopt specific fair valuation procedures for determining the values of such securities. Doing so may be difficult in a foreign environment; while others may perform the research and provide supporting documentation for fair values, the ultimate responsibility for determining the fair values of securities rests with the directors.

The disclosures suggested above are no different from those that might be required for domestic securities with the same attributes.

.38 The preceding risks may need to be disclosed in the notes to the financial statements if such factors exist in the markets in which the fund has material investments. It would also be incumbent on management to make sure that the prices provided by local sources (such as the last sale price, bid or ask, mean of bid and ask, closing price, and so on) do represent the market value of the securities. This is especially important for open-end funds or closed-end funds that allow limited redemption.

## Effective Date and Transition

.39 This SOP is effective for financial statements for fiscal years beginning after December 15, 1993, and interim periods within such years. This SOP may, but need not be, applied to financial statements for fiscal years ending before its effective date that, for comparative purposes, are provided with financial statements for fiscal years ending after its effective date. Earlier application of this SOP is encouraged.

.40

## Appendix A

### Illustrations for Separately Calculating and Disclosing the Foreign Currency Element of Realized and Unrealized Gains and Losses

Illustrations A and B apply if separate disclosures of the FC elements of unrealized and realized gains and losses on investments are chosen by the reporting entity.

#### A. Purchases and Sales

ABC Fund uses US\$ as its functional currency.

ABC buys 1,000 shares of XYZ £15.00 with a spot exchange rate of \$1.75 = £1.00.

Foreign currency (FC) cost basis = £15.00 × 1,000 = £15,000

Functional currency cost basis = £15,000 × 1.75 = \$26,250

Market gain/loss = (FC sale proceeds – FC cost) × foreign exchange (FX) rate on day of sale

Currency gain/loss = FC cost × (FX rate day of sale – FX rate day of purchase)

Assume a sale of 1,000 XYZ £12.00 and \$1.50 = £1.00:

FC proceeds	= £12.00 × 1,000	= £12,000
Functional currency proceeds	= £12,000 × 1.50	= \$18,000
Market loss	= (£12,000 – £15,000) × 1.50	= (\$ 4,500)
Currency loss	= (£15,000 × 1.50 – 1.75)	= (\$ 3,750)
Total loss		<u>(\$ 8,250)</u>

#### Proof

Functional currency proceeds	\$18,000
Functional currency cost	<u>(\$26,250)</u>
	<u>(\$ 8,250)</u>

#### B. Securities—Mark to Market

**DAY 1:** 1,000 XYZ marked to market £16.00; spot rate: \$1.85 = £1.00.

Market gain/loss = (FC current market value – FC cost) × current FX rate

Currency gain/loss = FC cost × (current FX rate – FX rate on day of purchase)

Market gain	= (£16,000 – £15,000) × 1.85	= \$1,850
Currency gain	= £15,000 × (1.85 – 1.75)	= <u>\$1,500</u>
Total gain in functional currency		= <u>\$3,350</u>

Total gain – (£16,000 × 1.85) – (£15,000 × 1.75) = \$29,600 – \$26,250 = \$3,350

Mark-to-Market Journal Entries

[Average rates may be used if fluctuations in exchange rates aren't significant]

**DAY 2:** 1,000 XYZ marked to market £17.00; spot rate: \$1.80 = £1.00.

Market gain	= (£17,000 – £15,000) × 1.80	=	\$3,600
Currency gain	= £15,000 × (1.80 – 1.75)	=	\$ 750
Total functional currency gain			<u>\$4,350</u>

Daily Journal Entries

Market gain/loss	= \$3,600 – \$1,850	=	\$1,750
Currency gain/loss	= \$750 – \$1,500	=	(\$ 750)
Day 2 gain (\$4,350 – \$3,350)		=	<u>\$1,000</u>

**C. Other Assets/Liabilities—FX Mark to Market**

Sale of 1,000 XYZ £12.00 = £12,000 receivable \$1.50 = £1.00 = \$18,000

**DAY 1:** Spot rate moves to \$1.55 = £1.00.

Currency gain	= £12,000 × (1.55 – 1.50) .05	=	\$ 600
---------------	-------------------------------	---	--------

**DAY 2:** Spot rate moves to \$1.58 = £1.00.

Currency gain	= £12,000 × (1.58 – 1.50) .08	=	\$ 960
---------------	-------------------------------	---	--------

Currency gain	<u>Day 1</u>	<u>Day 2</u>
<u>Daily Journal Entry</u>	\$600	\$360

**D. Changes Between Trade and Settlement Dates**Trade Date

Purchase 1,000 XYZ £15.00; exchange rate: \$1.75 = .00.

Cost basis: \$26,250 or £15,000

DR: sterling securities at cost	\$26,250	
CR: payables for securities purchased		\$26,250

Settlement Date

Spot rate: \$1.80 = £1.00; £15,000 is purchased at the spot rate for \$27,000.

DR: payables for securities purchased	\$26,250	
DR: realized currency gain/loss	\$ 750	
CR: cash		\$27,000

**E. Settlement Against Foreign Currency Cash Balances**

£20,000 balance is available in London.

Lot a: £10,000 purchased \$1.65 per £1.00  
\$US cost basis: \$16,500

Lot b: £10,000 purchased \$1.85 per £1.00  
\$US cost basis: \$18,500

Assume lot b will be liquidated first at \$1.80 per £1.00.

Lot b

DR: cash	\$18,000	
DR: realized currency gain/loss	\$ 500	
CR: sterling cash at cost		\$18,500
Assume one half of lot a will be liquidated at \$1.80 per £1.00.		

Lot a

DR: cash	\$ 9,000	
CR: sterling cash at cost		\$ 8,250
CR: realized currency gain/loss	\$ 750	

Realized FX gain on payable remains the same.

Between Purchase Settlement and Sale Trade Dates

Mark the holding to market, based on both local market price and daily spot rate.

**F. Sale of XYZ—Trade Date**

Sell 1,000 XYZ £18.00; exchange rate: \$1.90 = £1.00

Total proceeds: \$34,200 or £18,000

FX gain is recognized on the sale trade date based on the holding period.  
Receivable is booked at the spot rate on sale trade date.

DR: receivable for securities sold	\$34,200	
CR: sterling securities at cost ( $£15,000 \times 1.75$ )		= \$26,250
CR: realized market gain/loss ( $£18,000 - £15,000) \times 1.90$		= \$ 5,700*
CR: realized currency gain/loss ( $£15,000 \times 1.90) - 26,250$		= \$ 2,250*

Maintain local currency basis (£18,000) on the receivable record.

Between Sale Trade Date and Settlement Date

Mark the receivable to market based on the prevailing spot rate.

Sale Settlement Date

Spot rate: \$1.85 = £1.00

£18,000 is converted at the spot rate to \$33,300.

FX loss is recognized upon the receipt (settlement) of the receivable.

DR: cash	\$33,300	
DR: realized currency gain/loss	\$ 900	
CR: receivables from securities sold		\$34,200

If foreign currency cash received is to be kept as local currency:

Purchase: £18,000 \$1.85 = £1.00

Cost basis: \$33,300

DR: sterling cash at cost	\$33,300	
CR: cash		\$33,300

---

\* If separate disclosures of the FC elements of unrealized and realized gains and losses on investments are chosen by the entity.

**The ABC Fund**  
**(A Single Country Fund)**  
**Selected Notes to Financial Statements**

1. *Foreign Currency.* Amounts denominated in or expected to settle in foreign currencies (FC) are translated into United States dollars (US\$) at rates reported by a major New York City bank on the following basis:

- a. Market value of investment securities, other assets and liabilities—  
at the closing rate of exchange at the balance sheet date.
- b. Purchases and sales of investment securities, income and expenses—  
at the rate of exchange prevailing on the respective dates of such transactions (or at an average rate if significant rate fluctuations have not occurred).

*[The following paragraphs illustrate disclosures depending upon whether the fund chooses (i) to report or (ii) not to report the FC elements of realized and unrealized gains and losses on investments.]*

c(i). The Fund isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held.

Reported net realized foreign exchange gains or losses arise from sales of portfolio securities, sales and maturities of short-term securities, sales of FCs, currency gains or losses realized between the trade and settlement dates on securities transactions, the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books, and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at fiscal year end, resulting from changes in the exchange rate.

c(ii). The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Reported net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of FCs, currency gains or losses realized between the trade and settlement dates on securities transactions, the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books, and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments in securities at fiscal year end, resulting from changes in the exchange rate.

2.\* The Fund has obtained the approval of the Central Bank for the registration and conversion into FC of all proceeds of the offering to be invested in the ABC country securities markets, which by its terms ensures repatriation of such investment and the remittance of profits and dividends accruing on the investment. Notwithstanding the foregoing, the right of the Fund to repatriate its investments in ABC country securities and to receive profits, capital gains, and dividends in foreign exchange is subject to the power of the Central Bank,

---

\* Should be considered, if applicable to the respective fund.

with the approval of the President of the ABC country, to restrict the availability of foreign exchange in the imminence of, or during, an exchange crisis or in times of national emergency.

There are nationality restrictions on the ownership of certain equity securities of the ABC country companies. Based on confirmations that the Fund received from the ABC country's governmental authorities, the Fund believes that it is permitted to make certain investments through the ABC country's Trust that are otherwise available only to the ABC country.

The Fund has significant investments in the equity securities of companies located in the ABC country. Future economic and political developments in the country could adversely affect the liquidity or value, or both, of the ABC country securities in which the Fund is invested.

## Appendix C

### Bifurcation of Changes in Value of Foreign Securities

FASB Statement No. 8, *Accounting for the Translation of Foreign Currency Transactions and Foreign Currency Financial Statements*, appendix D, paragraphs 219 and 220, specifically states that the FASB did not intend to require investment companies to disclose separately the portion of the change in market value that results from foreign currency rate changes. Even though that exception is not specifically mentioned in FASB Statement No. 52, *Foreign Currency Translation*, practice has continued to follow this approach. This practice continues to be allowed by this SOP for the foreign exchange components of realized and unrealized gains or losses on securities.

On June 5, 1992, the AICPA issued a proposed SOP for comment that required, among other things, that investment companies report foreign exchange effects on realized and unrealized gains and losses separately from changes in market prices. Most commentators objected to that requirement and, accordingly, the Investment Companies Committee and AcSEC decided to make the practice voluntary and study the matter further.

The Investment Companies Committee intends to form a task force to solicit comments from preparers, auditors, regulators, and users of investment companies financial statements to address concerns of the costs to implement bifurcation of changes in value of foreign securities, to evaluate the relevance of the information provided by bifurcation, and to explore other approaches to reporting information if deemed necessary to help users assess foreign currency effects. After the task force submits its recommendations to the committee, the committee may decide to do one of the following:

- Draft an SOP to make bifurcation described in the current SOP mandatory
- Draft an SOP to modify the reporting in the current SOP and make it mandatory
- Not change the current guidance

## Section 10,580

# **Statement of Position 93-6 Employers' Accounting for Employee Stock Ownership Plans**

November 22, 1993

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Scope**

.01 This statement of position (SOP) provides guidance on employers' accounting for employee stock ownership plans (ESOPs). It applies to all employers with ESOPs, both leveraged and nonleveraged. It does not address financial reporting by ESOPs.<sup>1</sup>

.02 An ESOP is an employee benefit plan that is described by the Employee Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code (IRC) of 1986 as a stock bonus plan, or combination stock bonus and money purchase pension plan, designed to invest primarily in employer stock.

.03 This SOP supersedes American Institute of Certified Public Accountants (AICPA) SOP 76-3, *Accounting Practices for Certain Employee Stock Ownership Plans* [section 10,130], and affects certain Emerging Issues Task Force (EITF) consensuses. A list of the documents affected is provided in appendix D [paragraph .102] of this SOP.

## **Background**

.04 SOP 76-3 [section 10,130] was issued in December 1976, primarily to deal with accounting and reporting issues relevant to employers with leveraged ESOPs, and it has been the primary source of guidance on the subject.

.05 Since the issuance of SOP 76-3 [section 10,130], Congress has revised laws concerning ESOPs several times and the Internal Revenue Service (IRS) and the U.S. Department of Labor have issued many regulations covering the

---

<sup>1</sup> Financial reporting by ESOPs is discussed in the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*.

operation of plans, which actions have resulted in changes in the way ESOPs may operate and the reasons they are established by companies. Those changes, the most significant of which are described in appendix C [paragraph .101], were factors in the growth in the number of plans from fewer than 2,500 plans in 1976 to nearly 10,000 at the end of 1990.<sup>2</sup>

.06 The increase in the number of ESOPs since the issuance of SOP 76-3 [section 10,130] was matched by an increase in their complexity. It is no longer possible to describe a typical ESOP. ESOPs are used for many purposes in addition to furthering employee ownership, some of which were not contemplated when SOP 76-3 [section 10,130] was issued. These include the following:

- To fund a matching program for a sponsor's 401(k) saving plan, formula-based profit-sharing plan, and other employee benefits
- To raise new capital or to create a marketplace for the existing stock
- To replace lost benefits from the termination of other retirement plans or provide benefits under postretirement benefit plans, particularly medical benefits
- To be part of the financing package in leveraged buy-outs
- To provide a tax-advantaged means for owners to terminate their ownership
- To be part of a long-term program to restructure the equity section of a plan sponsor's balance sheet
- To defend the company against hostile takeovers

.07 The borrowing arrangements used by leveraged ESOPs have also become more diverse. When SOP 76-3 [section 10,130] was issued, most leveraged ESOPs borrowed from outside lenders, and the loan terms were relatively simple. Since then, internally leveraged ESOPs (ESOPs that borrow from the sponsor) have become more common. Furthermore, some ESOP loans are now structured so that a large portion of the debt service will be paid with dividends on shares held by the ESOP rather than with employer contributions.

.08 Employers' accounting for ESOP transactions, particularly the measurement of compensation cost and the treatment of dividends on shares held by an ESOP, has been a source of accounting controversy for many years. Even when SOP 76-3 [section 10,130] was issued, there was disagreement about some ESOP issues.<sup>3</sup> Changes in laws and regulations that apply to ESOPs and the increased diversity in the structure and purpose of ESOPs have called new attention to the limitations of SOP 76-3 [section 10,130]. Furthermore, SOP 76-3 [section 10,130] does not address some of the accounting issues presented by the new ESOPs. Although the EITF has addressed a number of ESOP issues, it has done so on an ad hoc basis.

.09 Therefore, the Accounting Standards Executive Committee (AcSEC) undertook this project to reconsider SOP 76-3 [section 10,130] and to consider current ESOP issues that are not specifically addressed in the accounting liter-

---

<sup>2</sup> Statistics from an unpublished study completed in 1991 by the National Center for Employee Ownership, Oakland, Calif.

<sup>3</sup> Paragraph 13 of SOP 76-3 [section 10,130.13] presents a minority view that disagrees with that SOP's recommendations on reporting dividends paid and earnings per share.

ature. AcSEC's objective in issuing this SOP is to enhance the relevance and representational faithfulness of financial statements of employers that sponsor ESOPs.

.10 There are two basic forms of ESOP: nonleveraged and leveraged. This SOP addresses the financial reporting for each separately.

## Conclusions

.11 The following conclusions should be read in conjunction with the "Discussion of Conclusions" beginning with paragraph .59 of this SOP. That section explains considerations that were deemed significant by members of AcSEC in reaching the conclusions.

### Leveraged ESOPs

.12 Unlike other kinds of employee benefit plans, an ESOP is permitted by ERISA to borrow from a related party or with the assistance of a related party. A leveraged ESOP borrows money to acquire shares of the employer company. The debt usually is collateralized by the employer's shares. The shares initially held by the ESOP in a suspense account are called *suspense shares*.<sup>4</sup> The debt is generally repaid by the ESOP from employer contributions and dividends on the employer's stock. As the debt is repaid, suspense shares are released from the suspense account, and the released shares must be allocated to individual accounts as of the end of the ESOP's fiscal year. The money can be borrowed by the ESOP from the sponsor, with or without a related outside loan, or directly from an outside lender. Outside loans to the ESOP are generally guaranteed by the sponsor.

### Reporting the Purchase of Shares by ESOPs

.13 An employer should report the issuance of shares or the sale of treasury shares to an ESOP when they occur and should report a corresponding charge to unearned ESOP shares, a contra-equity account. That account should be presented as a separate item in the balance sheet. Furthermore, even if a leveraged ESOP buys outstanding shares of employer stock on the market rather than from the employer, the employer should charge unearned ESOP shares and credit either cash or debt, depending on whether the ESOP is internally or externally leveraged (see paragraph .24).

### Reporting the Release of ESOP Shares

.14 ESOP shares are released for different purposes: to compensate employees directly, to settle employer liabilities for other employee benefits, and to replace dividends on *allocated shares* that are used for debt service. As ESOP shares are committed to be released, unearned ESOP shares should be credited and, depending on the purpose for which the shares are released, either (a) compensation cost, (b) dividends payable, or (c) compensation liabilities should be charged. Regardless of the account charged, the amount of the charge should be based on fair values<sup>5</sup> of *committed-to-be-released shares*.

---

<sup>4</sup> Terms defined in the glossary [paragraph .103] are in italicized type the first time they appear in this SOP.

<sup>5</sup> Paragraph .20 of this SOP contains guidance on fair value.

.15 Under this SOP, when shares are committed to be released, rather than when shares are legally released, is significant for accounting purposes. That refinement was made in recognition of the fact that ESOP shares are legally released from an ESOP's suspense account (and from serving as collateral for ESOP debt) when debt payments are made, but the employee service to which the shares released relates is continuous. Accordingly, for purposes of reporting compensation cost and satisfaction of liabilities under this SOP, accounting recognition should occur when shares are committed to be released, which may occur before the shares are legally released. Shares that have not been legally released, but that relate to employee services rendered during an accounting period (interim or annual) ending before the related debt service payment is made, should be considered committed to be released. The periods of employee service to which shares relate is generally specified in the ESOP documents.

.16 Some employers establish ESOPs that are not linked to any other employee benefit or compensation promise; therefore, the ESOP shares directly compensate the employees. For ESOP shares committed to be released to compensate employees directly, the employer should recognize compensation cost equal to the fair value of the shares committed to be released. The shares generally should be deemed to be committed to be released ratably during an accounting period as the employees perform services, and, accordingly, average fair values should be used to determine the amount of compensation cost to recognize each reporting period (interim or annual). The amount of compensation cost recognized in previous interim periods should not be adjusted for subsequent changes in the fair value of shares.

.17 Some employers agree to provide a specified or determinable benefit, such as a contribution to a 401(k) plan or to a formula profit-sharing plan, to employees and use the ESOP to partially or fully fund the benefit. Employers should recognize compensation cost and liabilities associated with providing such benefits to employees in the same manner they would had an ESOP not been used to fund the benefit. For ESOP shares committed to be released to settle liabilities for such benefits, employers should report satisfaction of the liabilities when the shares are committed to be released to settle the liability. The number of shares released to settle the liability is based on the fair value of shares as of dates specified by the employers, which are usually specified in the ESOP documents.

.18 The IRC allows employers to use dividends on ESOP shares that have been allocated to participants for debt service if participants are allocated shares of employer stock with a fair value no less than the amount of the dividends used for debt service. If shares released will include shares designated to replace *dividends on previously allocated shares used for debt service*, employers should report the settlement of the dividend payable when the shares are committed to be released to replace the dividends on shares used for debt service. (See paragraphs .21 and .22; only dividends on allocated shares should be charged to retained earnings.) The number of shares committed to be released to replace the dividends on allocated shares used for debt service is based on the fair value of shares as of dates specified by the employer, which are usually specified in the ESOP documents based on the employer's interpretation of current IRS regulations.

.19 Unearned ESOP shares should be credited as shares are committed to be released based on the cost of the shares to the ESOP. Employers should charge or credit the difference between the fair value of shares committed to

be released and the cost of those shares to the ESOP to shareholders' equity in the same manner as gains and losses on sales of treasury stock (generally to additional paid-in capital).

### ***Fair Value***

.20 The fair value of ESOP shares is needed to apply certain provisions of this SOP. The fair value of an ESOP share is the amount the seller could reasonably expect to receive for it in a current sale between a willing buyer and a willing seller, that is, other than a forced or liquidation sale. For shares that are traded, the price in the most active market should be used to measure fair value. If there is no market price, the employer's best estimate of fair value should be used. The use of independent experts may be necessary to estimate fair value. For example, the amount determined in a recent (within twelve months of the employer's year-end) independent stock valuation report may aid in determining the best estimate of fair value.

### ***Reporting Dividends on ESOP Shares***

.21 Because employers control the use of dividends on unallocated shares, dividends on unallocated shares are not considered dividends for financial reporting purposes. Dividends on unallocated shares used to pay debt service should be reported as a reduction of debt or of accrued interest payable. Dividends on unallocated shares paid to participants or added to participant accounts should be reported as compensation cost.

.22 Dividends on allocated shares should be charged to retained earnings. The dividends payable may be satisfied either by contributing cash to the participant accounts, by contributing additional shares to participant accounts, or by releasing shares from the ESOP's suspense account to participant accounts (see paragraph .18).

### ***Reporting Redemptions of ESOP Shares***

.23 Regardless of whether an ESOP is leveraged or nonleveraged, employers are required to give a put option to participants holding ESOP shares that are not readily tradable, which on exercise requires employers to repurchase the shares at fair value. Furthermore, public company sponsors sometimes offer cash redemption options to participants who are eligible to withdraw traded shares from their accounts. Employers should report the satisfaction of such option exercises as purchases of treasury stock.

### ***Reporting of Debt and of Interest***

.24 For purposes of applying this SOP, ESOP debt is characterized as follows:

- *Direct loan*—A loan made by a lender other than the employer to the ESOP. Such loans often include some formal guarantee or commitment by the employer.
- *Indirect loan*—A loan made by the employer to the ESOP, with a related outside loan to the employer.
- *Employer loan*—A loan made by the employer to the ESOP, with no related outside loan.

ESOPs with indirect loans and employer loans are often referred to as internally leveraged.

**.25** Employers that sponsor an ESOP with a direct loan should report the obligations of the ESOP to the outside lender as liabilities. Furthermore, employers should accrue interest cost on the debt and should report cash payments to the ESOP that are used by the ESOP to service debt, regardless of whether the source of cash is employer contributions or dividends, as reductions of the debt and accrued interest payable when the ESOP makes the payments to the outside lender.

**.26** Employers that sponsor an ESOP with an indirect loan should report outside loans as liabilities. Employers should not report a loan receivable from the ESOP as an asset and should, therefore, not recognize interest income on such receivable. Employers should accrue interest cost on the outside loan and should report loan payments as reductions of the principal and accrued interest payable. Contributions to the ESOP and the concurrent payments from the ESOP to the employer for debt service would not be recognized in the employer's financial statements.

**.27** Employers that sponsor an ESOP with an employer loan should not report the ESOP's note payable and the employer's note receivable in the employer's balance sheet. Accordingly, employers should not recognize interest cost or interest income on an employer loan.

### ***Earnings per Share***

**.28** For purposes of computing basic and diluted earnings per share (EPS), ESOP shares that have been committed to be released should be considered outstanding. ESOP shares that have not been committed to be released should not be considered outstanding. [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.29** Employers with ESOPs that hold convertible preferred stock may encounter unique EPS issues for diluted EPS calculations. The remainder of this section provides guidance on how to deal with some of those issues, particularly the following:

- How to determine the number of shares assumed to be outstanding in the if-converted EPS computations
- How earnings applicable to common stock in if-converted EPS computations should be adjusted for dividends on allocated shares used for debt service
- Whether prior periods' EPS should be restated for changes in conversion rates

This SOP does not provide a step-by-step discussion of how to apply the if-converted method to compute diluted EPS and does not address all possible EPS questions that may arise. FASB Statement No. 128, *Earnings per Share*, and illustrations 4 and 5 in appendix A [paragraph .99] of this SOP provide additional guidance. [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**[.30]** [Paragraph deleted to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.31** *Number of Shares Outstanding.* Under this SOP, ESOP shares are not considered outstanding until they are committed to be released. The num-

ber of common shares that would be issued on conversion of the convertible shares held by an ESOP that have been committed to be released should be deemed outstanding in the if-converted EPS computations for diluted EPS if the effect is dilutive. Convertible preferred shares held by the ESOP that have not been committed to be released should not be considered outstanding and, accordingly, would be excluded from the if-converted computations for diluted EPS. [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.32** When participants withdraw account balances containing convertible preferred shares from an ESOP, they may be entitled to receive common shares or cash with a value equal to either the fair value of the convertible preferred shares or a stated minimum value per share. Accordingly, if the value of the common stock issuable is less than the stated minimum value or the fair value of the preferred, participants may receive common shares or cash with a value greater than the value of the common shares issuable at the stated conversion rate. In determining EPS, the employer should presume that such a shortfall will be made up with shares of common stock. However, that presumption may be overcome if past experience or a stated policy provides a reasonable basis to believe that the shortfall will be paid in cash.<sup>[6]</sup> In applying the if-converted method, the number of common shares issuable on assumed conversion, which should be included in the denominator of the EPS calculation, should be the greater of (a) the shares issuable at the stated conversion rate and (b) the shares issuable if the participants were to withdraw the shares from their accounts. Shares issuable on assumed withdrawal should be computed based on the ratio of (a) the average fair value of the convertible stock or, if greater, its stated minimum value, to (b) the average fair value of the common stock. [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.33** *Adjustments to Earnings.* Employers that use dividends on allocated ESOP shares to pay debt service should adjust earnings applicable to common shares in the if-converted computation for the difference (net of income taxes) between the amount of compensation cost reported and the amount of compensation cost that would have been reported if the allocated shares had been converted to common stock at the beginning of the period.

**.34** *Changes in Conversion Rates.* Prior period EPS should not be restated for changes in the conversion rates. [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

### **Accounting for Terminations**

**.35** Upon termination of a leveraged ESOP, either in whole or in part, all outstanding debt related to the shares being terminated must be repaid or refinanced. An ESOP may repay the debt using an employer contribution to the plan, dividends on ESOP shares, the proceeds from selling suspense shares to the employer or to another party, or some combination of these. The law limits the shares employers may reacquire to the number of shares with a fair value equal to the applicable unpaid debt and requires that the remaining shares, if any, be allocated to participants.

---

<sup>[6]</sup> [Footnote deleted to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.36** If the employer makes a contribution to the ESOP or pays dividends on unallocated shares that are used by the ESOP to repay the debt, the employer should charge the debt and accrued interest payable when the ESOP makes the payment to the outside lender. Similarly, an employer sponsoring an ESOP with an indirect loan should report loan repayments as reductions of the debt and accrued interest payable.

**.37** If the ESOP sells the suspense shares and uses the proceeds to repay the debt, the employer should report the release of the suspense shares as a credit to unearned ESOP shares based on the cost of the shares to the ESOP, charge debt, and accrued interest payable, and recognize the difference in paid-in capital. However, if there is a difference between the amount paid to an outside lender and the net carrying amount of the debt, paragraph 20 of APB Opinion No. 26, *Early Extinguishment of Debt*, as amended by FASB Statement of Financial Accounting Standards No. 4, *Reporting Gains and Losses from Extinguishment of Debt*, requires that difference to be included in the employer's income when the debt is extinguished.

**.38** If an employer reacquires the suspense shares from the ESOP, the purchase of the shares should be accounted for as a treasury stock transaction. The treasury stock should be reported at the fair value of the shares at the reacquisition date. Unearned ESOP shares should be credited for the cost of the shares, and the difference should be recognized in additional paid-in capital.

**.39** If the fair value of the suspense shares on the termination date is more than the unpaid debt balance, the release of the remaining suspense shares to participants should be charged to compensation in accordance with paragraphs .14 to .18 of this SOP. That is, compensation cost should equal the fair value of the shares at the date the ESOP debt is extinguished, because that is when the shares are committed to be released.

## **Nonleveraged ESOPs**

**.40** An employer with a nonleveraged ESOP periodically contributes its shares or cash to its ESOP on behalf of employees. The shares contributed or acquired with the cash contributed, which may be outstanding shares, treasury shares, or newly issued shares, are allocated to participant accounts and held by the ESOP until distributed to the employees at a future date, such as on the date of termination or retirement. The shares of employer stock obtained by the nonleveraged ESOP must be allocated to individual participant accounts as of the end of the ESOP's fiscal year.

### ***Reporting Purchase of Shares by ESOPs***

**.41** Employers with nonleveraged ESOPs should report compensation cost equal to the contribution called for in the period under the plan. Compensation cost should be measured as the fair value of the shares contributed to or committed to be contributed to the ESOP or as the cash contributed to or committed to be contributed to the ESOP, as appropriate under the terms of the plan.

### ***Reporting Dividends on ESOP Shares***

**.42** Employers with nonleveraged ESOPs should charge dividends on shares held by the ESOPs to retained earnings, except that dividends on suspense account shares of a pension reversion ESOP should be accounted for the same way as dividends on suspense account shares of leveraged ESOPs.

## ***Reporting Redemptions of ESOP Shares***

.43 Regardless of whether an ESOP is leveraged or nonleveraged, employers are required to give a put option to participants holding ESOP shares that are not readily tradable, which on exercise requires the employer to repurchase the shares at fair value. Furthermore, public company sponsors sometimes offer cash redemption options to participants who are eligible to withdraw traded shares from their accounts, which on exercise requires the employer to repurchase the shares at fair value. Employers should report the satisfaction of such option exercises as purchases of treasury stock.

### ***Earnings per Share***

.44 All shares held by a nonleveraged ESOP should be treated as outstanding in computing the employer's EPS, except the suspense account shares of a pension reversion ESOP, which should not be treated as outstanding until they are committed to be released for allocation to participant accounts. If a nonleveraged ESOP holds convertible preferred stock, the guidance in paragraphs .29 to .34 of this SOP for leveraged ESOPs should be considered.

## ***Pension Reversion ESOPs***

.45 An employer that terminates a defined benefit pension plan may avoid part of the excise tax on an asset reversion by transferring the assets to an existing or newly created ESOP, which could be either leveraged or nonleveraged. The reverted assets may be used either to purchase shares of the employer stock or to retire existing ESOP debt.

.46 If the assets from the pension plan are used by the ESOP to purchase employer shares, the employer should report the share issuance the same way as other share issuances to an ESOP. The issuance of shares or the sale of treasury shares to the ESOP should be recognized when it occurs, and a corresponding charge to unearned ESOP shares, a contra-equity account, should be reported. If the shares are purchased on the market, the employer should similarly charge unearned ESOP shares. (The credit would be to cash.)

.47 Because the number of shares the ESOP acquires in a pension plan reversion is usually more than the IRS permits to be allocated to participant accounts in a single year, some of the shares are held in a suspense account until they are committed to be released in future years for allocation to participant accounts. The guidance in this SOP, for shares held by leveraged ESOPs, should be applied to suspense account shares.

.48 If the assets from the pension plan reversion are used to repay the debt of an existing ESOP, ESOP shares are committed to be released from suspense. In such situations, the guidance for leveraged ESOPs in this SOP should be followed. The employer should reduce the debt as it is repaid and reduce unearned ESOP shares as shares are committed to be released. How the committed-to-be-released shares are used determines what accounts are charged upon release of shares (see paragraphs .14 to .18).

## ***Issues Related to Accounting for Income Taxes***

### ***Leveraged ESOPs***

.49 For employers with leveraged ESOPs, the amount of ESOP-related expense reported under this SOP for a period may differ from the amount of

the ESOP-related income tax deduction (prescribed by income tax rules and regulations) for that period. Differences result if (a) the fair value of shares committed to be released differs from the cost of those shares to the ESOP and (b) the timing of expense recognition is different for income tax and financial reporting purposes. Such differences should be reported in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. Similar differences arise from employee stock options. Paragraph 36e of Statement No. 109 requires that the tax effects of expenses for employee stock options recognized differently for financial reporting and tax purposes be recognized in the related component of shareholders' equity.

.50 In accordance with paragraph 36e of Statement No. 109, if the cost of shares committed to be released is greater than their fair value, the employer should credit the tax effect of the amount by which the deductible expense exceeds the book expense to shareholders' equity. Conversely, if the cost of shares committed to be released is less than their fair value, the employer should charge the tax effect of the amount by which the book expense exceeds the deductible expense to shareholders' equity to the extent of previous credits to shareholders' equity related to cost exceeding fair value of ESOP shares committed to be released in previous periods.

.51 Furthermore, the tax benefit of tax-deductible dividends on allocated ESOP shares should be recorded as a reduction of income tax expense allocated to continuing operations. Under paragraph 36f of FASB Statement No. 109, the tax benefit of tax-deductible dividends on unallocated ESOP shares that are charged to retained earnings should be credited to shareholders' equity. However, because dividends on unallocated shares would not be charged to retained earnings under this SOP, paragraph 36f of Statement No. 109 would not apply to ESOP shares accounted for under this SOP.

### ***Nonleveraged ESOPs***

.52 Employers with nonleveraged ESOPs may accrue compensation cost for financial reporting purposes earlier than the cost is deductible for income tax purposes. Accruing the compensation cost earlier for financial reporting purposes creates a temporary difference under Statement No. 109.

### **Disclosures**

.53 An employer sponsoring an ESOP should disclose the following information about the plan, if applicable:

- a. A description of the plan, the basis for determining contributions, including the employee groups covered, and the nature and effect of significant matters affecting comparability of information for all periods presented. For leveraged ESOPs and pension reversion ESOPs, the description should include the basis for releasing shares and how dividends on allocated and unallocated shares are used.
- b. A description of the accounting policies followed for ESOP transactions, including the method of measuring compensation, the classification of dividends on ESOP shares, and the treatment of ESOP shares for EPS computations. If the employer has both old ESOP shares for which it does not adopt the guidance in this SOP and new ESOP shares for which the guidance in this SOP is required (see paragraphs .54 and .55), the accounting policies for both blocks of shares shall be described.

- c. The amount of compensation cost recognized during the period.
- d. The number of allocated shares, committed-to-be-released shares, and suspense shares held by the ESOP at the balance-sheet date. This disclosure should be made separately for shares accounted for under this SOP and for grandfathered ESOP shares (see paragraphs .54 and .55).
- e. The fair value of unearned ESOP shares at the balance-sheet date for shares accounted for under this SOP. (Future tax deductions will be allowed only for the ESOP's cost of unearned ESOP shares.) This disclosure need not be made for old ESOP shares for which the employer does not apply the guidance in this SOP (see paragraphs .55 and .56).
- f. The existence and nature of any repurchase obligation, including disclosure of the fair value<sup>7</sup> of the shares allocated as of the balance-sheet date, which are subject to a repurchase obligation.

## Effective Date and Transition

**.54** This SOP is effective for fiscal years beginning after December 15, 1993. The SOP should be adopted in the first interim period of an employer's fiscal year. Early application is permitted. Prospective application of the guidance in the SOP is required for shares acquired by ESOPs after December 31, 1992 (new ESOP shares) but not yet committed to be released as of the beginning of the year in which the SOP is adopted. No cumulative effect adjustment should be reported under this approach. Restatement of previously issued annual financial statements is not permitted.

**.55** Application of all of the guidance in this SOP may be elected, and is encouraged, for shares acquired by ESOPs on or before December 31, 1992 (old ESOP shares). (Selective adoption of the guidance in this SOP is not permitted.) However, employers with ESOPs that do not adopt this SOP for shares held by ESOPs on December 31, 1992, should make all of the applicable disclosures required by paragraph .53. Employers electing to adopt this SOP for old ESOP shares in the first fiscal year beginning after December 15, 1993, or in the preceding year should apply the SOP prospectively to the old ESOP shares that have not yet been committed to be released as follows:

- Employers that applied the shares allocated method described in EITF Issue No. 89-8<sup>8</sup> should apply this SOP prospectively to those shares that have not yet been committed to be released as of the beginning of the year in which the SOP is adopted. No cumulative effect adjustment should be reported under this approach.
- Employers that did not apply the shares allocated method described in EITF Issue No. 89-8 should recognize as an expense in the period of adoption the difference between (a) the cumulative ESOP expense

<sup>7</sup> See paragraph .20 for guidance on fair value.

<sup>8</sup> In EITF Issue No. 89-8, *Expense Recognition for Employee Stock Ownership Plans*, the EITF reached a consensus that ESOP shares purchased after December 15, 1989, should be accounted for under the shares allocated method, which is described in that consensus. However, the consensus allows employers with shares purchased before December 15, 1989, to account for such shares under their current methods in certain circumstances.

recognized prior to the period of adoption of this SOP and (b) the cumulative expense that would have been recognized prior to the period of adoption of this SOP under the shares allocated method ([total shares committed to be released multiplied by cost of the shares to the ESOP] less cumulative dividends on ESOP shares). That difference should be reported as the cumulative effect of a change in accounting principle in accordance with APB Opinion No. 20, *Accounting Changes*, by including the cumulative effect of the change in income and crediting unearned ESOP shares in the period the SOP is first applied. However, pro forma disclosures are not required.

Restatement of previously issued annual financial statements is not permitted.

.56 Employers electing to adopt this SOP for old ESOP shares in a fiscal year later than the first fiscal year beginning after December 15, 1993, should apply the SOP retroactively through restatement of previously issued financial statements for all years beginning after December 15, 1993. The restatement of the financial statements for the first year beginning after December 15, 1993 (the earliest year restated) should be performed in accordance with paragraph .55. If the earliest year restated is not presented in the financial statements, the beginning balance of retained earnings (and, if necessary, additional paid-in capital) for the earliest year presented should be adjusted for the effect of the restatement as of that date.

.57 For employers that adopt this SOP in a period other than the period the ESOP shares were purchased, certain shares considered outstanding for EPS computations in prior years will no longer be considered outstanding for EPS purposes in the year of adoption. As noted above, restatement is not permitted, however, such employers should disclose the number of shares considered outstanding for EPS purposes in prior periods that are no longer considered outstanding in the current period.

.58 An employer may have both (1) old ESOP shares for which it does not adopt the guidance in this SOP and (2) new ESOP shares for which the guidance in this SOP is required. The measure of compensation cost for the old and new shares in this circumstance will differ. The identification of the shares released each year for financial reporting purposes should be the same as the identification of the shares released for ERISA purposes.

## Discussion of Conclusions

.59 This section discusses considerations that were deemed significant by members of AcSEC in reaching the conclusions in this SOP. It includes reasons for accepting certain views and rejecting others. Individual AcSEC members gave greater weight to some factors than to others.

## Leveraged ESOPs

.60 AcSEC believes that all of the specific conclusions about employers' accounting for leveraged ESOP transactions follow from AcSEC's fundamental conclusion that the accounting for an ESOP's debt (financing element) should be separate from the accounting for an ESOP's shares (defined contribution element). Although the financing and defined contribution elements of leveraged ESOPs are related, each should be analyzed and reported separately,

and the principles for reporting one element should not affect the principles for reporting the other. Under this SOP, each element is reported in accordance with its substance as it would be reported if it occurred as a separate transaction.

### ***Accounting for Debt and Shares at the Inception of the ESOP***

.61 When a leveraged ESOP is established, it borrows money and buys employer shares for cash. However, because the employer is the ultimate source of the cash to repay the debt and is the beneficiary of the financing, AcSEC believes that the substance of the transaction is that the cash is not a consideration to the employer for the shares but rather proceeds from a borrowing. The consideration to be received by the employer for placing the shares in the ESOP trust is future employee services. In fact, the ESOP acquires the shares before the employees have performed the services for which the shares are to compensate them.

.62 AcSEC believes that because the shares transferred from the employer to the ESOP when the ESOP is established are not exchanged for a receipt of assets or services, or for a reduction of liabilities, total shareholders' equity should remain unchanged. The transaction should be reported only as a change within equity until the shares are committed to be released for allocation to participant accounts for services provided. Furthermore, AcSEC believes that even if a leveraged ESOP buys shares on the market rather than from the employer and, therefore, the employer has no direct capital stock transaction and no direct cash inflow when establishing a leveraged ESOP, the employer should treat it as a leveraged ESOP. Such a situation is analogous to an employer selling newly acquired treasury stock to its ESOP. Therefore, shareholders' equity should be reduced by reporting the amount of the stock the ESOP acquires as unearned ESOP shares. Either cash or debt would be credited, depending on whether the ESOP is internally or externally leveraged.

.63 For employers with internally leveraged ESOPs (indirect and employer loans), AcSEC notes that the ESOP's note payable does not represent an obligation of the employer to transfer resources to the ESOP and that the employer's note receivable does not represent a claim by the employer on the ESOP's resources. Therefore, AcSEC concluded they should not be reported by the employer as a liability and as an asset, respectively.

### ***Recognition and Measurement of Release of Shares***

.64 AcSEC believes its conclusions on recognition and measurement follow from its conclusions that the debt and shares related to ESOP transactions should be accounted for separately. The substance of an employer's cash contribution to an ESOP is that the cash contribution is used for the payment of debt service on the employer's debt. It is the release of shares, not the employer's cash contribution, that represents the compensation of participants in connection with the defined contribution plan. AcSEC's objective is that the accounting reflect the terms of the exchange transactions that take place between an employer that provides compensation and the employees who render services in exchange for that compensation. To do that, AcSEC considered how the ESOP shares are used.

.65 A key concept introduced in this SOP is that employers may use ESOP shares for different purposes: to compensate employees directly, which was the

primary use when SOP 76-3 [section 10,130] was issued; to settle liabilities for employee benefits, such as an employer's match under a 401(k) plan, that arise outside of the ESOP; or to replace dividends on allocated ESOP shares that are used for debt service. The accounting in each of those situations is discussed below.

**.66 *Shares Used to Directly Compensate Employees.*** For ESOP shares used to compensate employees directly, AcSEC addressed two issues: (a) when to record compensation and (b) when to measure compensation. AcSEC concluded that employers should record compensation when the shares are committed to be released, because AcSEC believes that is when the exchange between the employer and the employees of employer stock for services rendered occurs. Furthermore, AcSEC believes that the release of shares in a leveraged ESOP is analogous to the employer's contribution to a nonleveraged ESOP.

**.67** In reaching its conclusion on when to record compensation, AcSEC also considered whether either the point at which ESOP shares are allocated or at which employees become vested in ESOP shares is significant for accounting purposes, but rejected both of those recognition dates.

**.68** AcSEC notes that allocation is merely a mechanical process of assigning the released shares to individual participant accounts within the ESOP trust based on a known formula involving compensation, seniority, or both. AcSEC, therefore, believes that the allocation of shares is not significant for accounting purposes in recognizing compensation cost.

**.69** Furthermore, AcSEC believes that vesting provisions, which determine *vested shares*, are not the most meaningful way for employers with ESOPs to relate compensation cost to services performed. ESOPs are defined contribution plans in which participants receive regular periodic awards subject to vesting provisions. AcSEC believes that, in plans such as ESOPs in which employees receive regular, periodic awards, the shares released each period are earned by providing that period's service even though the shares may not vest until later.<sup>9</sup> Furthermore, FASB Statement No. 87, *Employers' Accounting for Pensions*, states that for defined contribution plans, the pension cost should equal the contribution called for in the period. Vesting is not a factor in recognizing compensation costs for defined contribution pension plans.

**.70** One of the most significant issues addressed in this SOP is the date on which compensation cost should be measured. Under current practice, compensation cost is measured at the date the ESOP purchases the shares, based on the ESOP's purchase price. AcSEC believes that compensation cost should be measured at the dates shares are committed to be released based on their current fair value, for the following reasons:

- APB Opinion 25, *Accounting for Stock Issued to Employees*, states that the measurement date for compensation is the first date on which the number of shares that an individual employee is entitled to receive is

---

<sup>9</sup> Allocated shares that have not vested may be forfeited by certain participants and reallocated to others. Under this SOP, the reallocation of forfeited shares does not result in a cost in the period the shares are reallocated. In fact, the increase or decrease in the fair value of such shares between the date the shares were originally released and the date they are reallocated may affect the number of shares needed to satisfy the employer's obligation to employees. Nevertheless, AcSEC believes that the costs associated with maintaining the records necessary to determine the effects of forfeitures on the employer's obligations and costs would exceed the benefits derived.

known. For ESOPs, the number of shares individual employees will receive is not determinable until the shares are committed to be released. Furthermore, paragraph 11e specifically notes that transferring shares to a trustee does not establish a measurement date for measuring compensation, even if the transfer is irrevocable, unless the identity of the recipient is known. (The general definition of measurement date in APB Opinion 25 supports the allocation date as the measurement date for a leveraged ESOP. However, AcSEC believes the special situations described in paragraphs 11a and 11c of APB Opinion 25 support measurement of compensation at the date shares are committed to be released. The total number of shares committed to be released for the current year's employee service is known prior to allocation and the shares must be allocated to individual employees' accounts as of the end of the ESOP's fiscal year.) Although APB Opinion 25 was issued before SOP 76-3 [section 10,130], AcSEC believes that, because of the significant changes in ESOPs since SOP 76-3 [section 10,130] was issued, the accounting in that SOP contrary to APB Opinion 25 is no longer appropriate.

- Using the fair value of the shares when the shares are committed to be released more accurately reflects the value of the services received by the employer. AcSEC believes an employer that sponsors a leveraged ESOP has entered into a transaction similar to an employer that borrows funds to buy treasury stock and later exchanges those shares with employees for services. Neither transaction should fix the employer's cost of providing employee benefits in the future.
- The risks and rewards of ownership of the shares rests with the employer until the shares are committed to be released, because of the large degree of control employers have (a) over how the ESOP debt will be repaid (for example, in some situations, an employer may prepay or refinance debt to achieve certain compensation goals) and (b) over an employee's compensation (for example, in some situations, an employer has the ability to change other parts of an employee's compensation package in reaction to changes in the value of the shares being released to maintain an overall competitive level of compensation).
- Measuring compensation based on current fair value conforms the accounting for leveraged and nonleveraged ESOPs. Instead of forming a leveraged ESOP, an employer could borrow and use the funds to buy treasury stock. Then, as the debt is repaid, the employer could contribute the treasury shares to a nonleveraged ESOP. Compensation cost would be measured and recognized based on the fair value of the shares when they are contributed or committed to be contributed to the nonleveraged ESOP. AcSEC believes that a leveraged ESOP and the transaction described in this paragraph have more similarities than differences, and that compensation should be measured in the same way for both.

**.71 Shares Used to Fund Liabilities for Other Employee Benefits.** AcSEC believes the employer's cost and liabilities for employee benefits that are funded with ESOP shares should be measured and recognized in the same way as if some other means of funding were used. The shares committed to be released represent funding or settlement of the employer's obligation for the benefits. To illustrate, assume the following facts about an employer with a leveraged ESOP:

- The ESOP shares are used to fund an employer match under its 401(k) savings plan equal to 50 percent of employee contributions.
- The market value of ESOP shares on the release date is used to determine (a) how many shares are allocated to particular participants and (b) whether the employer must provide cash or additional shares to fund the difference between the market value of the shares committed to be released and the employer's obligation under the savings plan.
- In period 1, employees contribute \$1,000 to their 401(k) accounts and, accordingly, the employer must match \$500.
- The market value of shares committed to be released to those employee accounts is \$450; the cost of the shares committed to be released is \$425.
- The employer issues additional shares with a fair value of \$50 to the ESOP (*top-up shares*).

Under current practice for ESOPs, the employer would report compensation cost of \$475 (\$425 cost of shares plus \$50 top-up), although its obligation to employees is \$500 (50 percent of the employee contribution). Under this SOP, the employer would report compensation cost of \$500, which is the amount AcSEC believes more accurately reflects the substance of the transaction.

**.72 *Shares Used to Replace Dividends.*** Similarly, AcSEC believes that for ESOP shares used to replace dividends on allocated shares that were used for debt service, the dividend payable is measured and recognized in the same way as if it were paid in cash. The shares committed to be released represent funding or settlement of the dividend payable.

### ***Dividends***

**.73** Legally, dividends on allocated shares belong to ESOP participants and are not controlled by employers. Although employers may use those dividends to pay debt service, they must allocate shares to participant accounts to replace such dividends. AcSEC believes that dividends on allocated shares have the attributes of dividends, because employers have a liability to pay such dividends to an identifiable outside party in proportion to shares of ownership. Therefore, AcSEC believes that dividends on allocated shares should be charged to retained earnings.

**.74** Although legally the dividends on unallocated ESOP shares belong to the ESOP, employers control the use of such dividends, the shares have not been exchanged for employee services, and are not considered outstanding for EPS purposes. The use of dividends on unallocated shares is usually determined by the employer when the ESOP is established. The employer may decide to use such dividends to compensate participants by adding the value of the dividends to participant accounts. Or, more commonly, the employer decides to use such dividends to pay debt service on the ESOP's debt, which the employer has reported as a liability. In all those situations, the employer controls, and benefits from, the use of the dividends on unallocated shares.

**.75** If the employer decides to pay the dividends to participants or add the value of the dividends to participant accounts, no linkage exists within the ESOP trust between the ownership of the shares and the amount of dividends

paid to participants.<sup>10</sup> AcSEC concluded that such dividends lack the normal attributes of dividends and that the employers are providing additional compensation to participants. Accordingly, such dividends should be charged to compensation cost.

.76 If the employer decides to use the dividends to pay debt service, there is no requirement that the employer replace those dividends or allocate additional shares to participants. Therefore, from the employer's perspective, the only economic event that has occurred when the employer uses dividends on ESOP suspense shares to pay debt service is that cash is transferred to a creditor of the employer (indirect or direct loans) for debt service or is retained by the employer (employer loans); no distribution to shareholders has occurred. AcSEC concluded that such dividends lack the normal attributes of dividends and should be reported as reductions of debt and interest payable.

.77 Under this SOP, dividends on committed-to-be-released-but-unallocated shares are not charged to retained earnings although, for financial reporting purposes, such shares have been exchanged for employee service and are considered outstanding for EPS computations. However, because employers do not relinquish control over the use of the dividends on ESOP shares until the shares are allocated, AcSEC believes that dividends on committed-to-be-released-but-unallocated shares should be treated the same way as dividends on other unallocated shares. AcSEC also notes that the treatment of dividends in other situations does not necessarily correspond with whether the shares are outstanding for EPS purposes. For example, in practice, dividends on restricted shares issued in conjunction with a restricted stock compensation plan are charged to retained earnings although the shares may be only partially outstanding for EPS purposes under the treasury stock method.

### ***Unearned ESOP Shares***

.78 AcSEC considered whether the contra-equity account representing unearned ESOP shares should be adjusted to fair value at each reporting date with a corresponding entry to paid-in-capital. However, because the fair value of unearned ESOP shares must be disclosed and there would be no effect on equity, AcSEC decided against such a requirement.

### ***Redemption of Shares***

.79 AcSEC believes that employer redemptions of ESOP shares from participants are purchases of treasury stock, even if there is a put option on the shares, and therefore believes that compensation cost should not be adjusted as the value of allocated shares changes. Employers whose shares are not readily tradable are required to give participants a put option, often called a liquidity put. AcSEC notes that such put options are given and shares are purchased from participants to comply with legal requirements and to make a market for the employer's shares. For employers whose shares are readily tradable, AcSEC views the cash redemption options primarily as a convenience to participants, to save them the brokerage commissions involved in the sale of what often may be small holdings and odd lots. Furthermore, ESOPs are nondiscriminatory benefit plans for substantially all employees, and participants may redeem their shares only at times permitted by law, typically on

---

<sup>10</sup> Under the IRC, if employers choose to pay dividends on suspense account shares to participants or to add those dividends to participant accounts, the allocation of the dividends must be nondiscriminatory among plan participants.

termination, hardship, or retirement. Accordingly, AcSEC believes that the existence of such options does not change the nature of an ESOP to that of a cash plan as described in paragraph 11g of APB Opinion 25.

### ***Earnings per Share***

.80 AcSEC believes that ESOP shares committed to be released and, accordingly, exchanged for employee services, are the same as other outstanding shares and should be treated as outstanding for EPS purposes. By contrast, AcSEC believes that ESOP shares that have not been committed to be released and, accordingly, not exchanged for employee services, should not be treated as outstanding for EPS purposes. AcSEC believes that this conclusion is consistent with its conclusion on reporting the release of shares in that the shares are not treated as issued until they are committed to be released.

.81 AcSEC believes that ESOP shares that have not been committed to be released are analogous to unpaid stock subscriptions, and the related consideration the employer will receive is future employee services rather than cash proceeds. Accordingly, AcSEC also considered whether the treasury stock method should be used to determine EPS similar to the way it is applied to unpaid stock subscriptions. However, AcSEC rejected the treasury stock method in favor of the released shares outstanding method, because the number of shares outstanding would be the same under either method and the released shares outstanding method is simpler to understand and apply.

### ***ESOPs That Hold Convertible Preferred Stock***

[.82] [Paragraph deleted to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

.83 *Computation of Shares Issuable on Assumed Conversion.* If participants withdrawing shares from their accounts are entitled to additional common shares because the fair value or the stated minimum value of the convertible preferred shares exceeds the fair value of the common shares issuable upon conversion, AcSEC believes that the additional shares should be assumed issued in the if-converted EPS computations. Some believe that because employers may have the ability to pay cash to the ESOP trustee (who would then buy employer common stock on the market for those participants who choose common stock) instead of issuing common stock to participants directly, the additional shares should be excluded from the EPS computations. However, AcSEC believes that any issuer of convertible securities has the ability to buy shares on the market to satisfy conversion requirements and that such ability does not change the requirement to reflect the potential dilution from the convertible securities in EPS computations.

.84 ESOP convertible preferred stock has unique attributes, which AcSEC believes make it similar to convertible securities with variable conversion rates. AcSEC's recommendations in this section are based on that analogy. Because the varying conversion rates are purely a function of changes in fair values, which are unknown before they occur, AcSEC concluded that the additional shares issuable should be computed based on current period fair values for diluted EPS computations. [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.85 *Adjustment of Earnings Applicable to Common Stock.*** When dividends on allocated ESOP shares are used to pay debt service, participants receive their dividends in shares rather than in cash. In the normal situation, if the preferred stock were converted to common stock, the common stock dividend would be less than the preferred stock dividend, the proportion of committed-to-be-released shares needed to replace dividends on allocated shares would be smaller after the assumed conversion, and the proportion of committed-to-be-released shares used to compensate participants for services would be greater after the assumed conversion. AcSEC believes the availability of a greater proportion of released shares to compensate participants is a nondiscretionary adjustment, as described in paragraph 26 of FASB Statement No. 128. Accordingly, earnings applicable to common stock in the if-converted computations should reflect the additional compensation cost that would arise from the assumed conversion. (Illustrations 4 and 5 of appendix A [paragraph .99] include this calculation.) [Paragraph revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

**.86** AcSEC believes that cash dividends on allocated ESOP shares paid to participants or added to participant accounts should be treated the same way as dividends on non-ESOP convertible preferred stock, and, accordingly, concluded that adjustment of compensation cost for EPS computation purposes is unnecessary.

**.87** Dividends on unallocated ESOP shares used to pay debt service are not treated as dividends for accounting purposes and, therefore, do not affect the if-converted EPS computations.

**.88** Dividends on unallocated ESOP shares paid to participants or added to participant accounts are treated as compensation cost. That use of dividends and, consequently, the compensation provided to participants, is discretionary when the ESOP is established. Accordingly, AcSEC believes that the compensation cost arising from those dividends should not be adjusted in the if-converted EPS computations.

### ***Terminations***

**.89** Although IRS and ERISA rules make it difficult, and often uneconomical, to terminate leveraged ESOPs and generally require a valid business reason—such as significant shrinkage in the work force or bankruptcy—for doing so, terminations and curtailments of ESOP plans occasionally occur. AcSEC believes that the conclusion that terminations or curtailments involving an ESOP's suspense shares should be accounted for as treasury stock transactions is consistent with the basic premise of this SOP—that the shares and debt should be accounted for separately. Another important consideration was that suspense shares are not considered outstanding for EPS computations.

**.90** The accounting for terminations recommended in this SOP would result in a debit to paid-in capital when the fair value of the shares at the termination date is less than the cost of the shares to the ESOP and a credit to paid-in capital when the fair value of the shares at the termination date is more than the cost of the shares to the ESOP. AcSEC believes those debits or credits to equity are analogous to losses and gains on the employer's own stock, which should be excluded from income. Under this SOP, differences between the fair value and cost of ESOP shares used to settle employer liabilities are debited

and credited to shareholders' equity. An ESOP termination is effectively the use of ESOP shares to settle the employer's liability for ESOP debt. Even if an employer has an internally leveraged ESOP with no related outside debt, AcSEC believes the reacquisition of the ESOP shares should be treated as a purchase of treasury stock because, under this SOP, the employer does not report the ESOP's note payable and does not report a note receivable from the ESOP, and the suspense shares have neither been considered outstanding for EPS nor exchanged for employee services.

.91 AcSEC provides the following example to illustrate the point. An ESOP borrows \$1,000 and acquires 100 shares of employer stock for \$10 per share (market price on the date acquired). The market price subsequently drops to \$6 per share, and the employer decides to terminate its ESOP when there are 80 shares in suspense and an \$800 debt balance. Accordingly, the employer would have to contribute an additional \$320 (\$800 less \$6 multiplied by 80 shares) to retire the ESOP debt. AcSEC believes that the additional contribution is a result of a change in the value of the employer's shares, not of a change in the debt obligation. Therefore, the \$320 should be charged to paid-in capital, not to income as an extinguishment loss or compensation expense. AcSEC believes the accounting treatment recommended for terminations is analogous to any company borrowing cash to buy shares of its own stock and later selling those shares to obtain cash to repay the debt. If the proceeds from the sale of the shares is insufficient to repay the debt because the fair value of the shares declined between the purchase and sale dates, the company will have to use additional cash to repay the debt. Such a transaction would have no impact on the company's income.

### Nonleveraged ESOPs

.92 Although this SOP would not change how employers with nonleveraged ESOPs account for ESOP transactions, AcSEC believes it is helpful to include a discussion of nonleveraged ESOPs. The accounting described in this SOP for employers with nonleveraged ESOPs is based on the fact that nonleveraged ESOPs are defined contribution pension plans covered by FASB Statement No. 87. Therefore, the compensation cost for the period should generally equal the contribution called for in the period. The shares or cash that an employer contributes or commits to contribute to a nonleveraged ESOP for a period is consideration for employee services rendered during that period.

### Pension Reversion ESOPs

.93 If the excess assets from a pension reversion are used to purchase ESOP shares, the shares in excess of the amount that may be allocated to participants in the year of the reversion are held in a suspense account and allocated in future years. The suspense account shares arising from a pension reversion do not collateralize a borrowing, and the release of such shares is not based on debt service payments. However, in most other respects, such suspense account shares are the same as the suspense account shares in a leveraged ESOP, and, accordingly, AcSEC concluded that they should be accounted for in the same way as suspense account shares of leveraged ESOPs.

### Income Taxes

.94 Although FASB Statement No. 109, *Accounting for Income Taxes*, does not explicitly address how to treat differences between the fair value and

the cost of ESOP shares committed to be released, it does address expenses for employee stock options recognized differently for financial reporting and tax purposes, which AcSEC believes is analogous to ESOPs. The FASB decided to make no changes to paragraph 17 of APB Opinion 25, which prohibits reporting the related tax effect of such differences as a part of income and requires that they be reported as charges or credits directly to related components of shareholders' equity.

## Disclosures

.95 AcSEC notes that the disclosures in paragraph .53f related to repurchase obligations are a minimum requirement. AcSEC recognizes that employers may wish to disclose additional information about the obligation, particularly information about the timing of payments.

## Transition

.96 AcSEC believes that transition, to a significant extent, is a practical matter. A major objective of transition is to minimize implementation costs and to mitigate disruption to the extent possible without unduly compromising the objectives of the accounting guidance in this SOP and consistency among reporting entities.

.97 In deciding to grandfather shares held by ESOPs as of December 31, 1992, AcSEC was most influenced by its perception that it would be unfair to employers with existing ESOPs to change their accounting for ESOPs currently in place. The decision to establish an ESOP is complex and involves the consideration of many factors, such as IRS and ERISA regulations, employee compensation matters, and possible other uses of debt proceeds, as well as how the ESOP will affect earnings during its term. ESOPs are long-term undertakings, they are costly to establish, and they cannot be undone easily. For many employers, the accounting treatment, which was covered in SOP 76-3 [section 10,130], was an important consideration in establishing their ESOPs.

## Minority View

.98 Four AcSEC members dissent to the issuance of this SOP, because they believe that fair value of shares released should not be used to measure compensation cost of certain ESOPs. The dissenters believe there are two types of ESOPs, as follows:

- *Type I*—Shares are released to compensate employees directly. Such ESOPs are not used to fund other employee benefits and the fair value of the shares released is not a factor in determining the number of shares to be allocated to employees. These ESOPs are typical of the ESOPs that commonly existed at the time SOP 76-3 [section 10,130] was issued.
- *Type II*—Shares are released to settle or fund liabilities for other specified or determinable employee benefits, such as an employer's match of a 401(k) plan. The fair value of shares released is used to determine how many shares are needed to satisfy an obligation that arose outside the ESOP.

The dissenters believe that Type I ESOPs should be excluded from the scope of the SOP because the current accounting guidance for Type I ESOPs continues

to be relevant and the costs of applying the SOP to Type I ESOPs are not justified. They believe this SOP on employers' accounting for ESOP transactions should cover only the ESOPs for which there is concern that the current accounting is inappropriate. The dissenters believe that the measurement date to recognize compensation expense for Type I ESOPs should continue to be the date the shares are purchased by the ESOP, because that is when the risks and rewards associated with the value of the ESOP shares are transferred from the employer to employees. In contrast, the dissenters agree with the accounting in this SOP for Type II ESOPs.

## Appendix A

### Illustrations

This appendix contains illustrations of the requirements of this SOP for employers with the following kinds of ESOPs:

- *Illustration 1*—A common-stock leveraged ESOP with a direct loan
- *Illustration 2*—A common-stock leveraged ESOP used to fund the employer's match of a 401(k) savings plan with an indirect loan
- *Illustration 3*—A common-stock nonleveraged ESOP
- *Illustration 4*—A convertible-preferred-stock leveraged ESOP with a direct loan [Illustration revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]
- *Illustration 5*—A convertible, preferred-stock, leveraged ESOP used to fund a 401(k) savings plan with an employer loan [Illustration revised to reflect the conforming changes necessary due to the issuance of FASB Statement No. 128, November 1998.]

The illustrations do not address all possible circumstances that may arise in applying the SOP. The illustrations are for annual reporting periods and, accordingly, do not demonstrate the application of the SOP to interim financial statements. However, depending on the circumstances, many of the journal entries illustrated would be made for interim financial statements.

Illustration 1

Common Stock Leveraged ESOP With a Direct Loan

Assumptions

On January 1, Year 1, Company A establishes a leveraged ESOP as follows:

- The ESOP borrows \$1,000,000 from an outside lender at 10 percent for five years and uses the proceeds to buy 100,000 shares of newly issued common stock of the sponsor for \$10 per share, which is the market price of those shares on the date of issuance.
- Debt service is funded by cash contributions and dividends on employer stock held by the ESOP.
- Dividends on all shares held by the ESOP are used for debt service.
- Cash contributions are made at the end of each year.
- The year-end and average market values of a share of common stock follow:

Table 1-a

<i>Year</i>	<i>Year-end</i>	<i>Average</i>
1	\$11.50	\$10.75
2	9.00	10.25
3	10.00	9.50
4	12.00	11.00
5	14.40	13.20

- The common stock pays normal dividends at the end of each quarter of 12.5 cents per share (\$50,000 for the ESOP's shares each year). Accordingly, in this illustration, the average fair value of shares is used to determine the number of shares used to satisfy the employers' obligation to replace dividends on allocated shares used for debt service.
- Principal and interest are payable in equal annual installments at the end of each year. Debt service is as follows:

Table 1-b

<i>Year</i>	<i>Principal</i>	<i>Interest</i>	<i>Total Debt Service</i>
1	\$ 163,800	\$100,000	\$ 263,800
2	180,200	83,600	263,800
3	198,200	65,600	263,800
4	218,000	45,800	263,800
5	239,800	24,000	263,800
	<u>\$1,000,000</u>	<u>\$319,000</u>	<u>\$1,319,000</u>

- The number of shares released each year is as follows:

Table 1-c

<i>Year</i>	<i>Dividends</i>	<i>Compensation</i>	<i>Total</i>
1	0	20,000	20,000
2	976	19,024	20,000
3	2,105	17,895	20,000
4	2,727	17,273	20,000
5	3,030	16,970	20,000

The number of shares released for dividends is determined by dividing the amount of dividends on allocated shares by the average fair value of a share of common stock (for year 2: \$10,000 divided by \$10.25 equals 976 shares). In this illustration, the remaining shares are released for compensation (for year 2: 20,000 less 976 equals 19,024 shares).

- Shares are released from the suspense account for allocation to participants' accounts based on a principal-plus-interest formula. The released shares are allocated to participant accounts the following year. Shares released and allocated follow:

Table 1-d

<i>Year</i>	<i>Cumulative Number of Shares</i>		<i>Average Shares</i>	<i>Year-End Suspense</i>
	<i>Released</i>	<i>Allocated</i>	<i>Released</i>	<i>Shares</i>
1	20,000	0	10,000	80,000
2	40,000	20,000	30,000	60,000
3	60,000	40,000	50,000	40,000
4	80,000	60,000	70,000	20,000
5	100,000	80,000	90,000	0

- Income before ESOP-related charges is as follows:

Table 1-e

<i>Year</i>	<i>Income</i>
1	\$1,800,000
2	1,900,000
3	2,000,000
4	2,100,000
5	2,200,000

- All interest cost and compensation cost are charged to expense each year.
- Excluding ESOP shares, 1,000,000 shares are outstanding on average each year.
- Company A follows FASB Statement No. 109.
- Company A's combined statutory tax rate is 40 percent each year.
- Company A's only book/tax differences are those associated with its ESOP.

- No valuation allowance is necessary for deferred tax assets.

Results of Applying SOP

The following table sets forth Company A's ESOP-related information. All amounts represent changes (credits in parentheses) in account balances.

Year	Principal	Unearned ESOP Shares	Paid-In Capital	Dividends	Interest Expense	Compensation Expense	Cash
Notes	(1)	(2)	(3)	(4)	(1)	(5)	(6)
1	\$ 163,800	\$ (200,000)	\$(15,000)	\$ 0	\$100,000	\$215,000	\$ (263,800)
2	180,200	(200,000)	(5,000)	10,000	83,600	195,000	(263,800)
3	198,200	(200,000)	10,000	20,000	65,600	170,000	(263,800)
4	218,000	(200,000)	(20,000)	30,000	45,800	190,000	(263,800)
5	239,800	(200,000)	(64,000)	40,000	24,000	224,000	(263,800)
Total	<u>\$1,000,000</u>	<u>\$(1,000,000)</u>	<u>\$(94,000)</u>	<u>\$100,000</u>	<u>\$319,000</u>	<u>\$994,000</u>	<u>\$(1,319,000)</u>

Notes:

- (1) See table 1-b.
- (2) Total number of shares released for year (20,000) multiplied by the cost per share to ESOP (\$10).
- (3) Total number of shares released for year (20,000) multiplied by the difference between average fair value per share (see table 1-a) and cost per share to ESOP (\$10). [Year 1: 20,000 shares multiplied by (\$10.75-\$10.00)]
- (4) Cumulative number of allocated shares (see table 1-d) multiplied by the dividend per share. [Year 2: 20,000 shares multiplied by \$.50]
- (5) Number of shares released for compensation (see table 1-c) multiplied by the average fair value per share for the period (see table 1-a). The amounts in this column have been rounded.
- (6) The cash disbursed each year is comprised of \$213,800 contribution and \$50,000 in dividends.

Journal Entries

Company A would record journal entries from inception through year 5 as follows:

January 1, Year 1 (inception)

Cash	1,000,000	
Debt		1,000,000
[To record the ESOP's loan]		
Unearned ESOP shares (equity)	1,000,000	
Common stock and paid-in capital		1,000,000
[To record the issuance of 100,000 shares to the ESOP at \$10 per share]		

Year 1

Interest expense	100,000	
Accrued interest payable		100,000
[To record interest expense]		

# Employers' Accounting for Employee Stock Ownership Plans **19,767**

Accrued interest payable	100,000	
Debt	163,800	
Cash		263,800
[To record debt payment (The cash disbursement of \$263,800 consists of \$50,000 in dividends, none of which is charged to retained earnings in year 1, and \$213,800 supplemental cash contribution to the ESOP)]		
Compensation expense	215,000	
Paid-in capital		15,000
Unearned ESOP shares		200,000
[To record release of 20,000 shares at an average fair value of \$10.75 per share (shares cost ESOP \$10)]		
Deferred tax asset	14,480	
Provision for income taxes	600,000	
Income taxes payable		614,480
[To record income taxes for year 1 (See tax computations following journal entries)]		

## Year 2

Interest expense	83,600	
Accrued interest payable		83,600
[To record interest expense]		
Accrued interest payable	83,600	
Debt	180,200	
Cash		263,800
[To record debt payment (The cash disbursement of \$263,800 consists of \$50,000 in dividends, \$10,000 of which is charged to retained earnings in year 2, and \$213,800 supplemental cash contribution to the ESOP)]		
Retained earnings	10,000	
Dividends payable		10,000
[To record declaration of \$.50 per share dividend on the 20,000 allocated shares]		
Compensation expense	195,000	
Dividends payable	10,000	
Paid-in capital		5,000
Unearned ESOP shares		200,000
[To record release of 20,000 shares (19,024 for compensation and 976 for dividends) at an average fair value of \$10.25 per share (shares cost ESOP \$10 per share)]		
Deferred tax asset	7,920	
Provision for income taxes	646,560	
Income taxes payable		654,480
[To record income taxes for year 2 (See tax computations following journal entries)]		

## Year 3

Interest expense	65,600	
Accrued interest payable		65,600
[To record interest expense]		

Accrued interest payable	65,600	
Debt	198,200	
Cash		263,800
[To record debt payment]		
Retained earnings	20,000	
Dividends payable		20,000
[To record declaration of \$.50 per share dividend on the 40,000 allocated shares]		
Compensation expense	170,000	
Dividends payable	20,000	
Paid-in capital	10,000	
Unearned ESOP shares		200,000
[To record release of 20,000 shares (17,895 for compensation and 2,105 for dividends) at an average fair value of \$9.50 per share (shares cost ESOP \$10 per share)]		
Deferred tax asset	720	
Provision for income taxes	697,760	
Paid-in capital		4,000
Income taxes payable		694,480
[To record income taxes for year 3 (See tax computations following journal entries)]		

**Year 4**

Interest expense	45,800	
Accrued interest payable		45,800
[To record interest expense]		
Accrued interest payable	45,800	
Debt	218,000	
Cash		263,800
[To record debt payment]		
Retained earnings	30,000	
Dividends payable		30,000
[To record declaration of \$.50 per share dividend on the 60,000 allocated shares]		
Compensation expense	190,000	
Dividends payable	30,000	
Paid-in capital		20,000
Unearned ESOP shares		200,000
[To record release of 20,000 shares (17,273 for compensation and 2,727 for dividends) at an average fair value of \$11.00 per share (shares cost ESOP \$10 per share)]		
Provision for income taxes	737,680	
Paid-in capital	4,000	
Deferred tax asset		7,200
Income taxes payable		734,480
[To record income taxes for year 4, see tax computations following journal entries]		

**Year 5**

Interest expense	24,000	
Accrued interest payable		24,000
[To record interest expense]		
Accrued interest payable	24,000	
Debt	239,800	
Cash		263,800
[To record debt payment]		
Retained earnings	40,000	
Dividends payable		40,000
[To record declaration of \$.50 per share dividend on the 80,000 allocated shares]		
Compensation expense	224,000	
Dividends payable	40,000	
Paid-in capital		64,000
Unearned ESOP shares		200,000
[To record release of 20,000 shares (16,970 for compensation and 3,030 for dividends) at an average fair value of \$13.20 per share (shares cost ESOP \$10 per share)]		
Provision for income taxes	790,400	
Deferred tax asset		15,920
Income taxes payable		774,480
[To record income taxes for year 5, see tax computations following journal entries]		

**Illustration of Termination**

Assuming Company A terminates its ESOP at the end of year 2 (when the fair value of the suspense shares is \$540,000 [60,000 shares multiplied by \$9 per share], the unearned compensation balance is \$600,000, and the unpaid debt balance is \$656,000), and assuming the suspense shares are sold to pay down the debt, Company A would make the following journal entry:

Debt	656,000	
Additional paid-in capital	60,000	
Unearned ESOP shares		600,000
Cash		116,000
[To record repayment of the ESOP's loan and termination of the plan]		

## Tax and EPS Computations

The following tables set forth Company A's tax (assuming no termination) and EPS computations:

	Year				
	1	2	3	4	5
Income before ESOP	\$1,800,000	\$1,900,000	\$2,000,000	\$2,100,000	\$2,200,000
Interest expense	(100,000)	(83,600)	(65,600)	(45,800)	(24,000)
Compensation expense	(215,000)	(195,000)	(170,000)	(190,000)	(224,000)
Pretax income	<u>1,485,000</u>	<u>1,621,400</u>	<u>1,764,400</u>	<u>1,864,200</u>	<u>1,952,000</u>
Provision for income tax					
Currently payable	614,480	654,480	694,480	734,480	774,480
Deferred	(14,480)	(7,920)	(720)	7,200	15,920
Shareholders' equity	-0-	-0-	4,000*	(4000)*	-0-
Total	<u>600,000</u>	<u>646,560</u>	<u>697,760</u>	<u>737,680</u>	<u>790,400</u>
Net income	<u>\$ 885,000</u>	<u>\$ 974,840</u>	<u>\$1,066,640</u>	<u>\$1,126,520</u>	<u>\$1,161,600</u>
Average shares outstanding	1,010,000	1,030,000	1,050,000	1,070,000	1,090,000
Earnings per share	<u>\$ .88</u>	<u>\$ .95</u>	<u>\$ 1.02</u>	<u>\$ 1.05</u>	<u>\$ 1.07</u>

## Tax Computations

	Year				
	1	2	3	4	5
Current provision:					
Income before ESOP	\$1,800,000	\$1,900,000	\$2,000,000	\$2,100,000	\$2,200,000
ESOP contribution	(213,800)	(213,800)	(213,800)	(213,800)	(213,800)
ESOP dividends	(50,000)	(50,000)	(50,000)	(50,000)	(50,000)
Taxable income	<u>1,536,200</u>	<u>1,636,200</u>	<u>1,736,200</u>	<u>1,836,200</u>	<u>1,936,200</u>
Multiplied by 40 percent	<u>\$ 614,480</u>	<u>\$ 654,480</u>	<u>\$ 694,480</u>	<u>\$ 734,480</u>	<u>\$ 774,480</u>
Deferred provision:					
Reduction in unearned ESOP shares for financial reporting	\$ 200,000	\$ 200,000	\$ 200,000	\$ 200,000	\$ 200,000
Related tax deduction**	163,800	180,200	198,200	218,800	239,800
Difference	<u>(36,200)</u>	<u>(19,800)</u>	<u>(1,800)</u>	<u>18,000</u>	<u>39,800</u>
Tax rate	40%	40%	40%	40%	40%
Deferred tax expense/(benefit)	<u>\$ (14,480)</u>	<u>\$ (7,920)</u>	<u>\$ (720)</u>	<u>7,200</u>	<u>15,920</u>

\* See paragraph .50. In year 3, the amount is calculated as follows: 20,000 shares released multiplied by \$.50 excess cost over average fair value per share multiplied by 40 percent tax rate.

\*\* This amount is the principal repayment.

**Reconciliation of Effective Tax Rate to Provision for Income Taxes**

	<i>Year</i>				
	<i>1</i>	<i>2</i>	<i>3</i>	<i>4</i>	<i>5</i>
Pretax income	\$1,485,000	\$1,621,400	\$1,764,400	\$1,864,200	\$1,952,000
Tax at 40 percent (statutory rate)	594,000	648,560	705,760	745,680	780,800
Benefit of ESOP dividends	-0-	(4,000)	(8,000)	(12,000)	(16,000)
Effect of difference between average fair value and cost of released shares	6,000	2,000	-0-	4,000	25,600
Provision as reported	<u>\$ 600,000</u>	<u>\$ 646,560</u>	<u>\$ 697,760</u>	<u>\$ 737,680</u>	<u>\$ 790,400</u>

**Illustrative Disclosure for End of Year 3**

The company sponsors a leveraged employee stock ownership plan (ESOP) that covers all U.S. employees who work twenty or more hours per week. The company makes annual contributions to the ESOP equal to the ESOP's debt service less dividends received by the ESOP. All dividends received by the ESOP are used to pay debt service. The ESOP shares initially were pledged as collateral for its debt. As the debt is repaid, shares are released from collateral and allocated to active employees, based on the proportion of debt service paid in the year. The company accounts for its ESOP in accordance with Statement of Position 93-6. Accordingly, the debt of the ESOP is recorded as debt and the shares pledged as collateral are reported as unearned ESOP shares in the statement of financial position. As shares are released from collateral, the company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for earnings-per-share (EPS) computations. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings; dividends on unallocated ESOP shares are recorded as a reduction of debt and accrued interest. ESOP compensation expense was \$170,000, \$195,000, and \$215,000 for years 3, 2, and 1, respectively. The ESOP shares as of December 31 were as follows:

	<i>Year 3</i>	<i>Year 2</i>
Allocated shares	40,000	20,000
Shares released for allocation	20,000	20,000
Unreleased shares	40,000	60,000
Total ESOP shares	<u>100,000</u>	<u>100,000</u>
Fair value of unreleased shares at December 31	<u>\$400,000</u>	<u>540,000</u>

Illustration 2

Common Stock Leveraged ESOP Used to Fund the Employer's Match of a 401(k) Savings Plan With an Indirect Loan

Assumptions

On January 1, Year 1, Company B established an ESOP to fund the employer's match of its savings plan as follows:

- All of the assumptions are the same as those for Company A, except as follows.
- Company B loaned its ESOP \$1,000,000 and concurrently obtained a related loan. The terms of both lending arrangements are the same as for Company A's outside loan.
- Company B uses shares released by the ESOP to satisfy its matching obligation of 50 percent of voluntary employee contributions to the savings plan. The average fair value of the shares for each year is used to determine the number of shares necessary to satisfy the matching obligation.
- If the fair value of the shares released is less than Company B's matching obligation, Company B contributes additional newly issued shares to the ESOP to satisfy the remaining obligation.
- Shares used to replace dividends on allocated shares used to service debt do not count toward the employer's match.
- The employee contributions, required employer match, and the number of shares needed to fund the employee match follow:

Table 2-a

<i>Year</i>	<i>Employee Contributions</i>	<i>Employer Match</i>	<i>Number of Shares</i>
1	\$400,000	\$200,000	18,605
2	410,000	205,000	20,000
3	420,000	210,000	22,105
4	430,000	215,000	19,545
5	440,000	220,000	16,667

*Note:* The number of shares needed to satisfy the employer's matching obligation is determined by dividing the matching obligation by the average fair value of a share of common stock [for year 1: \$200,000 divided by \$10.75 (See table 1-a for average fair values) equals 18,605 shares].

- The 20,000 shares released each year based on debt service payments follow:

**Table 2-b**

<i>Year</i>	<i>Number of Shares Needed to Settle 401(k) Liability</i>	<i>Total ESOP Shares Released</i>	<i>ESOP Shares Used for Dividends</i>	<i>ESOP Shares Available to Settle 401(k) Liability</i>	<i>Compensation (Additional Shares)</i>	<i>Top-Up (Additional Shares)</i>
<i>Notes</i>	<i>(1)</i>	<i>(2)</i>	<i>(3)</i>	<i>(4)</i>	<i>(5)</i>	<i>(6)</i>
1	18,605	20,000	-0-	20,000	1,395	-0-
2	20,000	20,000	976	19,024	-0-	976
3	22,105	20,000	2,105	17,895	-0-	4,210
4	19,545	20,000	2,727	17,273	-0-	2,272
5	16,667	20,000	3,030	16,970	303	0

**Notes:**

- (1) See table 2-a.
  - (2) See assumptions.
  - (3) See table 1-c.
  - (4) Total ESOP shares released minus ESOP shares used for dividends.
  - (5) If the ESOP shares needed to settle the 401(k) liability (column 1) are less than the ESOP shares available to settle the liability (column 4), then the remaining shares are considered compensation (this is the case in years 1 and 5).
  - (6) If the ESOP shares needed to settle the 401(k) liability (column 1) are greater than the ESOP shares available to settle the liability (column 4), then the shortfall must be made up by the employer in the form of top-up shares (this is the case in years 2, 3, and 4).
- Cumulative share amounts follow:

**Table 2-c**

<i>Year</i>	<i>Cumulative Number of Shares</i>		<i>Total Suspense Shares</i>
	<i>Released</i>	<i>Allocated</i>	
1	20,000	-0-	80,000
2	40,976	20,000	60,000
3	65,186	40,976	40,000
4	87,458	65,186	20,000
5	107,458	87,458	-0-

*Note:* Dividends on top-up shares are paid in cash. Cumulative shares released include top-up shares.

## Results of Applying SOP

The following table sets forth Company B's ESOP-related information. All amounts represent changes (credits in parentheses) in account balances.

Year	Principal	Unearned ESOP Shares	Paid-In Capital	Dividends	Interest Expense	Com- pensation Expense ESOP	Com- pensation Expense Top-Up	Cash
Notes	(1)	(2)	(3)	(4)	(1)	(5)	(6)	(7)
1	\$ 163,800	\$ (200,000)	\$ (15,000)	\$ -0-	\$100,000	\$215,000	\$ -0-	\$ (263,800)
2	180,200	(200,000)	(15,000)	10,000	83,600	195,000	10,000	(263,800)
3	198,200	(200,000)	(30,000)	20,500	65,600	170,000	40,000	(264,300)
4	218,000	(200,000)	(45,000)	32,600	45,800	190,000	25,000	(266,400)
5	239,800	(200,000)	(64,000)	43,700	24,000	224,000	-0-	(267,500)
Total	<u>\$1,000,000</u>	<u>\$(1,000,000)</u>	<u>\$(169,000)</u>	<u>\$106,800</u>	<u>\$319,000</u>	<u>\$994,000</u>	<u>\$75,000</u>	<u>\$(1,325,800)</u>

Notes:

- (1) See table 1-b.
- (2) Number of shares released during the year (20,000) multiplied by the cost per share to ESOP (\$10).
- (3) Number of shares released during the year (20,000) multiplied by the difference between average fair value per share (see table 1-a) and cost per share to the ESOP (\$10) plus the additional paid-in capital that arises from the top-up shares contributed, which equals the compensation expense related to the top-up.
- (4) Cumulative shares allocated (see table 2-c) multiplied by the dividend per share (\$.50).
- (5) Number of ESOP shares released for direct compensation plus number of shares released related to employer's match of 401(k) (see table 2-b) multiplied by the average fair value per share (see table 1-a).
- (6) Additional shares contributed (top-up) to satisfy the 401(k) obligation (see table 2-b) multiplied by the fair value of shares contributed.
- (7) The cash disbursed to the ESOP each year is composed of \$213,800 contribution; \$50,000 in dividends on original ESOP shares; and dividends on top-up shares of \$500 in year 3, \$2,600 in year 4, and \$3,700 in year 5.

Journal Entries

Company B would record journal entries from inception through year 2 as follows:

January 1, Year 1 (inception)

Cash	1,000,000	
Debt		1,000,000
[To record loan]		
Unearned ESOP shares (equity)	1,000,000	
Common stock and additional paid-in capital		1,000,000
[To record the issuance of 100,000 shares to the ESOP at \$10 per share]		

Year 1

Interest expense	100,000	
Accrued interest payable		100,000
[To record interest expense]		

Accrued interest payable	100,000	
Debt	163,800	
Cash		263,800

[To record debt payment (The cash disbursement of \$263,800 consists of \$50,000 in dividends, none of which was charged to retained earnings in year 1, and \$213,800 supplemental cash contribution to the ESOP)]

Compensation expense	200,000	
401(k) liability		200,000

[To record cost and liability related to employer's 401(k) match, which represents 50 percent of employee contributions]

401(k) liability	200,000	
Compensation expense	15,000	
Unearned ESOP shares		200,000
Paid-in capital		15,000

[To record release of 20,000 shares at an average fair value of \$10.75 per share, 18,605 shares are used to satisfy 401(k) liability and the remaining 1,395 are used to compensate participants directly (shares cost ESOP \$10 per share)]

Deferred tax asset	14,480	
Provision for income taxes	600,000	
Income taxes payable		614,480

[To record income taxes for year 1 (See illustration 1 for detailed tax computation)]

## **Year 2**

Interest expense	83,600	
Accrued interest payable		83,600

[To record interest expense]

Accrued interest payable	83,600	
Debt	180,200	
Cash		263,800

[To record debt payment (The cash disbursement of \$263,800 consists of \$50,000 in dividends, \$10,000 of which was charged to retained earnings in year 2, and \$213,800 supplemental cash contribution to the ESOP)]

Compensation expense	205,000	
401(k) liability		205,000

[To record cost and liability related to employer's 401(k) match, which represents 50 percent of employee contributions]

Retained earnings	10,000	
Dividends payable		10,000

[To record declaration of \$.50 per share dividend on the 20,000 allocated shares]

401(k) liability	205,000	
Dividends payable	10,000	
Unearned ESOP shares		200,000
Common stock/paid-in capital		15,000

[To record release of 20,000 shares plus contribution of an additional 976 shares to the ESOP at an average fair value of \$10.25 per share, 20,000 shares are used to satisfy 401(k) liability and the remaining 976 shares are used to replace dividends on allocated shares used for debt service (shares cost ESOP \$10 per share)]

Deferred tax asset	7,920	
Provision for income taxes	642,560	
Income taxes payable		650,480

[To record income taxes for year 2 (See illustration 1 for detailed tax computation)]

*Note:* Journal entry differs from Illustration 1 because Company B receives an additional \$10,000 deduction (\$4,000 tax benefit) for the 976 top-up shares.

Illustration of Termination

Assuming Company B terminated its ESOP at the end of year 4 (when the fair value of the suspense shares is \$240,000, the unearned ESOP shares balance is \$200,000, and the unpaid debt balance is \$239,800), and assuming the employer buys back the suspense shares in an amount equal to the debt balance, there will be seventeen suspense shares left, which must be allocated to participants. (In this illustration the shares are used to partially satisfy the employer's 401(k) matching obligation.) Company B would make the following journal entry:

Treasury stock	39,800	
401(k) liability	204	
Additional paid-in-capital		40,004
Unearned ESOP shares		200,000

[To record repurchase of ESOP suspense shares and termination of the plan]

Debt	239,800	
Cash		239,800

[To record repayment of the ESOP's loan]

Tax and EPS Computations

Company B's taxes would be computed the same way as Company A's. For Company B the average number of ESOP shares outstanding would be as follows:

<i>Year</i>	<i>ESOP Shares Outstanding</i>
1	10,000
2	30,488
3	53,081
4	76,322
5	97,458

This represents the cumulative numbers of shares released at the beginning of the year plus the end of the year (see table 2-c) divided by 2.

### **Illustrative Disclosure for End of Year 3**

The company sponsors a 401(k) savings plan under which eligible U.S. employees may choose to save up to 6 percent of salary income on a pre-tax basis, subject to certain IRS limits. The company matches 50 percent of employee contributions with company common stock. The shares for this purpose are provided principally by the company's employee stock ownership plan (ESOP), supplemented as needed by newly issued shares. The company makes annual contributions to the ESOP equal to the ESOP's debt service less dividends received by the ESOP. All dividends received by the ESOP are used to pay debt service. The ESOP shares initially were pledged as collateral for its debt. As the debt is repaid, shares are released from collateral and allocated to employees who made 401(k) contributions that year, based on the proportion of debt service paid in the year. The company accounts for its ESOP in accordance with Statement of Position 93-6. Accordingly, the shares pledged as collateral are reported as unearned ESOP shares in the statement of financial position. As shares are released from collateral, the company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for EPS computations. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings; dividends on unallocated ESOP shares are recorded as a reduction of debt and accrued interest.

Compensation expense for the 401(k) match and the ESOP was \$210,000, \$205,000, and \$215,000 for years 3, 2, and 1, respectively. The ESOP shares as of December 31 were as follows:

	<u>Year 3</u>	<u>Year 2</u>
Allocated shares	40,976	20,000
Shares released for allocation	24,210	20,976
Unreleased shares	40,000	60,000
Total ESOP shares	<u>105,186</u>	<u>100,976</u>
Fair value of unreleased shares at December 31	<u>\$400,000</u>	<u>\$540,000</u>

Illustration 3

Common Stock Nonleveraged ESOP

Assumptions

On January 1, Year 1, Company C established a nonleveraged ESOP as follows:

- Company C contributed 10 percent of pretax profit before ESOP-related charges to the ESOP at the end of each of years 1 through 5; the ESOP bought newly issued employer stock with the contribution.
- The number of shares, earnings, tax, and other relevant assumptions are the same as those for Company A.

Results of Applying SOP

The following chart sets forth Company C's ESOP-related information:

Year	Compensation Expense	Dividends	Number of ESOP Shares Purchased	Cumulative ESOP Shares
1	\$180,000	\$ -0-	15,652	15,652
2	190,000	7,830	21,111	36,763
3	200,000	18,380	20,000	56,763
4	210,000	28,380	17,500	74,263
5	220,000	37,130	15,278	89,541

The year-end market value is used in this illustration to determine the number of ESOP shares purchased. [Year 1: \$180,000 divided by \$11.50 (See table 1-a) equals 15,652]

Journal Entries

Company C would record journal entries for years 1 and 2 as follows:

Year 1

Compensation expense	180,000	
Common stock/paid-in capital		180,000
[To record contribution, sale of shares, and compensation expense]		
Provision for income taxes	648,000	
Income taxes payable		648,000
[To record income taxes at 40 percent for year 1 on earnings of \$1,620,000 (\$1,800,000 pre-ESOP income less ESOP compensation of \$180,000)]		

Year 2

Compensation expense	190,000	
Retained earnings	7,830	
Common stock/paid-in capital		190,000
Dividends payable		7,830
[To record contribution, sale of shares, declaration of dividends, and compensation expense]		

**Employers' Accounting for Employee Stock Ownership Plans      19,779**

Dividends payable	7,830	
Cash		7,830
[To record payment of dividends]		
Provision for income taxes	684,000	
Income taxes payable		684,000
[To record income taxes at 40 percent for year 2 on earnings of \$1,710,000 (\$1,900,000 pre-ESOP income less ESOP compensation of \$190,000)]		

Illustration 4

Convertible Preferred Stock Leveraged  
ESOP With a Direct Loan

Assumptions

On January 1, Year 1, Company D established an ESOP with convertible preferred stock as follows:

- The borrowing, debt service, earnings, and tax assumptions are the same as those for Company A.
- On January 1, Year 1, the ESOP used the proceeds of the debt to buy 80,000 shares of newly issued convertible preferred stock of Company D for \$12.50 per share.
- The preferred stock pays dividends quarterly at an annual rate of \$1.25 per share (\$100,000 each year for the ESOP's shares). Accordingly, in this illustration the average fair value of the shares is used to determine the number of shares used to satisfy the employer's obligation to replace dividends on allocated shares used for debt service.
- All dividends on ESOP shares are used for debt service.
- The preferred stock is convertible into common stock at 1:1 ratio.
- Participants may not withdraw the convertible preferred stock from the ESOP. When participants become eligible to withdraw shares from their account, they must either convert to common stock or redeem the preferred shares.
- The preferred stock has a guaranteed minimum redemption value of \$12.50 per share, to be paid in shares of common stock.
- The preferred stock is callable at \$13.00 per share.
- There is one vote per preferred share.
- The year-end and average fair values of a share of preferred stock (fair value is assumed to be greater than or equal to minimum value) follow:

Table 4-a

<i>Year</i>	<i>Year-end</i>	<i>Average</i>
1	\$12.50	\$12.50
2	12.50	12.50
3	12.50	12.50
4	12.50	12.50
5	14.40	13.20

- The shares released each year follow:

Table 4-b

Year	Dividends	Compensation	Total Released	Total Allocated
1	0	16,000	16,000	-0-
2	1,600	14,400	16,000	16,000
3	3,200	12,800	16,000	16,000
4	4,800	11,200	16,000	16,000
5	6,061	9,939	16,000	16,000

*Note:* The number of shares released for dividends is determined by dividing the amount of dividends on allocated shares (16,000 multiplied by \$1.25 in year 2; 32,000 multiplied by \$1.25 in year 3; etc.) by the average fair value of a share of preferred stock (\$12.50 in years 2 and 3). In this illustration the remaining shares are released for compensation (16,000 less 1,600 in year 2, 16,000 less 3,200 in year 3, etc.).

- Additional share information follows:

Table 4-c

Year	Cumulative Number of Shares		Year-End Suspense Shares
	Released	Allocated	
1	16,000	-0-	64,000
2	32,000	16,000	48,000
3	48,000	32,000	32,000
4	64,000	48,000	16,000
5	80,000	64,000	-0-

## Results of Applying SOP

The following chart sets forth Company D's ESOP-related information. All amounts represent changes (credits in parentheses) in account balances.

Year	Principal	Unearned ESOP Shares	Paid-In Capital	Dividends	Interest Expense	Compensation Expense	Cash
Notes	(1)	(2)	(3)	(4)	(1)	(5)	(6)
1	\$ 163,800	\$ (200,000)	\$ -0-	\$ -0-	\$100,000	\$200,000	\$ (263,800)
2	180,200	(200,000)	-0-	20,000	83,600	180,000	(263,800)
3	198,200	(200,000)	-0-	40,000	65,600	160,000	(263,800)
4	218,000	(200,000)	-0-	60,000	45,800	140,000	(263,800)
5	239,800	(200,000)	(11,200)	80,000	24,000	131,200	(263,800)
Total	<u>\$1,000,000</u>	<u>\$(1,000,000)</u>	<u>\$(11,200)</u>	<u>\$200,000</u>	<u>\$319,000</u>	<u>\$881,200</u>	<u>\$(1,319,000)</u>

### Notes:

- (1) See table 1-b.

- (2) Total number of shares released during the year (16,000) multiplied by the cost per share to ESOP (\$12.50).
- (3) Total number of shares released during the year (16,000) multiplied by the difference between average fair value per share at the release date (see table 4-a) and cost-per-share to the ESOP (\$12.50).
- (4) Cumulative shares allocated (see table 4-c) multiplied by the dividend per share (\$1.25).
- (5) Total number of ESOP shares released for compensation (see table 4-b) multiplied by the average fair value per share to ESOP (see table 4-a).
- (6) The cash disbursed each year is composed of \$163,800 in contributions and \$100,000 in dividends.

Journal Entries

The journal entries to reflect the accounting for Company D's ESOP from inception through year 2 are as follows:

January 1, Year 1 (inception)

Cash	1,000,000	
Debt		1,000,000
[To record the ESOP's loan]		
Unearned ESOP shares (equity)	1,000,000	
Preferred stock		1,000,000
[To record the issuance of shares to the ESOP]		

Year 1

Interest expense	100,000	
Accrued interest payable		100,000
[To record interest expense]		
Accrued interest payable	100,000	
Debt	163,800	
Cash		263,800
[To record debt payment (The cash disbursement of \$263,800 consists of \$100,000 in dividends, none of which was charged to retained earnings in year 1, and \$163,800 supplemental cash contribution to the ESOP)]		
Compensation expense	200,000	
Unearned ESOP shares		200,000
[To record release of 16,000 shares at an average fair value of \$12.50 per share (shares cost ESOP \$12.50 per share)]		
Deferred tax asset	14,480	
Provision for income taxes	600,000	
Income taxes payable		614,480
[To record income taxes for year (See tax computations following journal entries)]		

**Year 2**

Interest expense	83,600	
Accrued interest payable		83,600
[To record interest expense]		
Accrued interest payable	83,600	
Debt	180,200	
Cash		263,800
[To record debt payment (The cash disbursement of \$263,800 is made up of \$100,000 in dividends, \$20,000 of which was charged to retained earnings in year 2, and \$163,800 supplemental cash contribution to the ESOP)]		
Retained earnings	20,000	
Dividends payable		20,000
[To record declaration of \$1.25 per share dividend on the 16,000 allocated shares]		
Compensation expense	180,000	
Dividends payable	20,000	
Unearned ESOP shares		200,000
[To record release of 16,000 shares at an average fair value of 12.50 per share (shares cost ESOP \$12.50 per share)]		
Deferred tax asset	7,920	
Provision for income taxes	646,560	
Income taxes payable		654,480
[To record income taxes for year (See tax computations following journal entries)]		

**Tax and EPS Computations**

The tax and EPS calculations for Company D follow:

	<i>Year</i>				
	<i>1</i>	<i>2</i>	<i>3</i>	<i>4</i>	<i>5</i>
Income before ESOP	\$ 1,800,000	\$ 1,900,000	\$ 2,000,000	\$ 2,100,000	\$ 2,200,000

Illustration 5

Convertible Preferred Stock Leveraged ESOP Used to Fund a 401(k) Savings Plan With an Employer Loan

Assumptions

On January 1, Year 1, Company E established a leveraged ESOP with convertible preferred stock as follows:

- The ESOP borrowed \$1,000,000 from the employer at 10 percent for five years and used the proceeds to buy 80,000 shares of newly issued convertible preferred stock of Company E for \$12.50 per share.
- Debt service is funded by cash contributions and dividends on employer stock held by the ESOP.
- Dividends on all of the original 80,000 shares held by the ESOP are used for debt service.
- Cash contributions are made at the end of each year.
- The preferred stock pays dividends quarterly at an annual rate of \$1.25 per share (\$100,000 each year for the ESOP's shares). Accordingly, in this illustration, the average fair value of the shares is used to determine the number of shares used to satisfy the employer's obligation to replace dividends on allocated shares used for debt service.
- The preferred stock is convertible at a 1:1 ratio into common stock.
- Participants may not withdraw the convertible preferred stock from the ESOP. When participants become eligible to withdraw shares from their account, they must either convert to common stock or redeem the preferred shares.
- The preferred stock has a guaranteed minimum redemption value of \$12.50 per share, to be paid in shares of common stock.
- The preferred stock is callable at \$13.00 per share.
- There is one vote per preferred share.
- The year-end and average fair values of a share of preferred stock (fair value is assumed to be greater than or equal to minimum value) follow:

Table 5-a

<i>Year</i>	<i>Year-end</i>	<i>Average</i>
1	\$12.50	\$12.50
2	12.50	12.50
3	12.50	12.50
4	12.50	12.50
5	14.40	13.20

- Company E uses shares released by the ESOP to satisfy its matching obligation of 50 percent of voluntary employee contributions to the savings plan. The fair value of the shares at the end of each month is

used to determine the number of shares necessary to satisfy the matching obligation. (Accordingly, in this illustration, average fair values are used to determine the number of shares needed to satisfy the employer's liabilities.)

- If the fair value of the shares released is less than Company E's matching obligation, Company E contributes additional newly issued shares (top-up shares) to the ESOP to satisfy the remaining obligation. The top-up shares are issued at the end of the year. Dividends on the top-up shares are paid in cash.
- Shares that replace dividends on allocated shares used to service debt do not count toward the employer's match.
- The employee contributions, required employer match, and the number of shares needed to fund the employee match follow:

**Table 5-b**

<i>Year</i>	<i>Employee Contributions</i>	<i>Employer Match</i>	<i>Number of Shares</i>
1	\$400,000	\$200,000	16,000
2	410,000	205,000	16,400
3	420,000	210,000	16,800
4	430,000	215,000	17,200
5	440,000	220,000	16,667

*Note:* The number of shares needed to satisfy the employer's matching obligation is determined by dividing the matching obligation by the average fair value of a share of common stock (for year 1: \$200,000 divided by \$12.50 equals 16,000 shares).

- Principal and interest are payable in annual installments at the end of each year. Debt service is as follows:

**Table 5-c**

<i>Year</i>	<i>Principal</i>	<i>Interest</i>	<i>Total Debt Service</i>
1	\$ 110,000	\$100,000	\$ 210,000
2	150,000	89,000	239,000
3	200,000	74,000	274,000
4	250,000	54,000	304,000
5	290,000	29,000	319,000
Total	<u>\$1,000,000</u>	<u>\$346,000</u>	<u>\$1,346,000</u>

- Shares are released from the suspense account for allocation to participants' accounts based on a principal-plus-interest formula. The released shares are allocated to participants' accounts at the beginning of the following year. Shares are assumed to be released ratably throughout the year.
- The shares released each year follow:

Table 5-d

Year	Number of Shares Needed to Satisfy 401(k) Liability	Total Released	Shares Released for Dividends	ESOP Shares Available to Satisfy 401(k) Liability	Additional Shares (Top-Up)
1	16,000	12,481	-0-	12,481	3,519
2	16,400	14,205	1,248	12,957	3,443
3	16,800	16,286	2,669	13,617	3,183
4	17,200	18,068	4,297	13,771	3,429
5	16,667	18,960	5,780	13,180	3,487

*Note:* The number of shares released for dividends is determined by dividing the amount of dividends on allocated shares (12,481 multiplied by \$1.25 in year 2; 26,686 multiplied by \$1.25 in year 3, etc.) by the average fair value of a share of preferred stock (\$12.50 in years 2 and 3). In this illustration, the remaining shares are released for compensation (14,205 less 1,248 in year 2; 16,286 less 2,669 in year 3, etc.).

- Additional share information follows:

Table 5-e

Year	<u>Initial ESOP Shares</u> <u>Cumulative Shares</u>		<u>Top-Up Shares</u> <u>Cumulative Shares</u>		Average Shares Released / Issuable	Total Shares Allocated	Year- end Suspense Shares
	Released	Allocated	Issuable	Issued			
1	12,481	0	3,519	0	8,000	0	67,519
2	26,686	12,481	6,962	3,519	24,824	16,000	53,314
3	42,972	26,686	10,145	6,962	43,383	33,648	37,028
4	61,040	42,972	13,574	10,145	63,866	53,117	18,960
5	80,000	61,040	17,061	13,574	85,838	74,614	0

- The pre-ESOP income, shares outstanding, and income tax assumptions are the same as for illustrations 1 through 4.

Results of Applying SOP

The following chart sets forth Company E's ESOP-related information. All amounts represent changes (credits are in parentheses) in account balances.

Year	Unearned ESOP Shares	Paid-In Capital	Dividends— Original Shares	Dividends Top-Up Shares	Compensation Expense ESOP	Compensation Expense Top-Up
Notes	(1)	(2)	(3)	(4)	(5)	(6)
1	\$ (156,000)	\$ (44,000)	\$ -0-	\$ -0-	156,000	\$ 44,000
2	(177,600)	(43,000)	15,600	4,400	162,000	43,000
3	(203,600)	(39,800)	33,400	8,700	170,200	39,800
4	(225,800)	(42,900)	53,700	12,700	172,100	42,900
5	(237,000)	(59,300)	76,300	17,000	174,000	46,000
Total	<u>\$ (1,000,000)</u>	<u>\$ (229,000)</u>	<u>\$ 179,000</u>	<u>\$ 42,800</u>	<u>\$ 834,300</u>	<u>\$ 215,700</u>

Notes:

- (1) Total number of shares released during the year multiplied by the cost per share to ESOP (\$12.50).
- (2) Total number of shares released during the year multiplied by the difference between average fair value per share at the release date (see table 5-a) and cost per share to the ESOP (\$12.50) plus the additional paid-in capital that arises from the top-up shares contributed, which equals the compensation expense related to the ESOP.
- (3) Cumulative shares allocated from original 80,000 shares (see table 5-e) multiplied by the dividend per share (\$1.25).
- (4) Cumulative top-up shares issued (see table 5-e) multiplied by the dividend per share (\$1.25).
- (5) Total number of ESOP shares released for compensation (see table 5-d) multiplied by the average fair value per share (see table 5-a).
- (6) Top-up shares (see table 5-d) multiplied by the average fair value per share (see table 5-a).

**Journal Entries**

The journal entries to reflect the accounting for Company E's ESOP from inception through year 2 are as follows:

**January 1, Year 1 (inception)**

Unearned ESOP shares (equity)	1,000,000	
Preferred stock		1,000,000

[To record the issuance of shares to the ESOP]

**Year 1**

Compensation expense	200,000	
401(k) liability		200,000

[To record cost and liability related to 401(k) match]

401(k) liability	200,000	
Preferred stock		44,000
Unearned ESOP shares		156,000

[To record release of 12,481 shares at an average fair value of \$12.50 per share (shares cost ESOP \$12.50 per share) and issuance of 3,519 additional shares at \$12.50 per share for top-up]

Deferred tax asset	18,400	
Provision for income taxes	600,000	
Income tax payable		618,400

[To record income taxes for year 1 (See tax computations following journal entries)]

**Year 2**

Retained earnings	15,600	
Dividends payable		15,600

[To record declaration of \$1.25 per share dividend on the 12,481 allocated shares]

Retained earnings	4,400	
Cash		4,400

[To record declaration and payment of \$1.25 per share dividend on the 3,519 issued top-up shares]

Compensation expense	205,000	
401(k) liability		205,000

[To record cost and liability related to 401(k) match]

401(k) liability	205,000	
Dividends payable	15,600	
Unearned ESOP shares		177,600
Preferred stock		43,000

[To record release of 14,205 shares at an average fair value of \$12.50 per share (shares cost ESOP \$12.50 per share) and issuance of 3,443 additional shares at \$12.50 per share for top-up]

Deferred tax asset	11,040	
Provision for income taxes	636,160	
Income tax payable		647,200

[To record income taxes for year 2 (See tax computations following journal entries)]

Tax and EPS Computations

Provision as reported	\$ 600,000	\$ 636,160	\$ 673,040	\$ 710,920	\$ 755,200

## Appendix B

### Discussion of Comments Received on Exposure Draft

An exposure draft of a proposed statement of position, "Employers' Accounting for Employee Stock Ownership Plans," was issued for public comment in December 1992 and distributed to a variety of interested parties to encourage comment by those that would be affected by the proposal. Sixty-five comment letters were received on the exposure draft.

The most significant and pervasive comments received were in three areas: (a) measurement of compensation cost, (b) pro forma disclosures, and (c) effective date.

#### Measurement of Compensation Cost

A majority of respondents asked AcSEC to reconsider, for some or all ESOPs, the requirement in the SOP that the fair value of shares committed to be released be used to measure compensation cost. Many of them supported the minority view in this SOP. Three primary objections were raised in the comment letters.

The most frequent reason stated in comment letters for objecting to the proposed measurement of compensation was that debt payments or contributions, that is the cash payments, are a better measure of the value of employees' services than the fair value of shares released.

The second most frequent reason for objecting was disagreement with the argument in the proposed SOP that the risks and rewards of ownership of the shares rest with the employer, not the employees, until the shares are committed to be released. Some respondents disagreed with that statement in general. Other respondents disagreed with a related notion that employers have control over the employees' total compensation package and can make changes in other parts of compensation in response to unanticipated changes in the value of the unreleased shares. Most of those making those arguments support the minority view—that is, they believe that the risks and rewards remain with the employer for type II ESOPs, but believe that is not the case for type I ESOPs.

AcSEC had considered such arguments during the process leading up to the exposure draft, and continues to believe that the reasons for measuring compensation cost based on the fair value of the shares when committed to be released as stated in paragraph .70 of the SOP support its conclusion. Furthermore, AcSEC notes that the conclusion on measurement of compensation cost is consistent with AcSEC's fundamental conclusion that the debt and shares related to ESOP transactions should be accounted for separately. AcSEC believes that the fact that employers may, and often do, establish internally leveraged ESOPs that involve no net cash flows by the employer to the ESOP (the financing element is eliminated), supports its view that the fair value of shares when released is a more relevant measure of the employee's services than the value of the shares when they are placed in an ESOP trust. From the employer's perspective, the economic substance of such transactions is that shares are placed in a trust and released to employees over time; no net cash is ever disbursed or received.

AcSEC continues to believe that the risks and rewards of ownership of the unreleased shares remain with the employer, even when there is no explicit use of the fair value of the shares in determining whether the employer has

satisfied an obligation. Though many commentators said that employers do not adjust other compensation to reflect unanticipated changes in the fair value of employer shares, AcSEC has seen ESOP transactions in which the employer effectively controls compensation through its ability to control the debt terms and the rate at which shares are released. Further, AcSEC notes that many employers maintain control over the number of ESOP shares released through the ESOP loans with flexible terms, which allow for no or minimal principal payments before maturity and no prepayment penalties.

The third most frequent reason for objecting was that using the fair value of shares released penalizes companies whose share values increase and rewards companies whose share values decrease. AcSEC believes that the important issue is whether the measure of compensation cost is appropriate, not whether the amount is more or less than it would be under a different method.

### **Pro Forma Disclosures**

The proposed SOP would have required public companies that under the grandfathering provisions elected not to adopt the provisions of the SOP to disclose pro forma income before extraordinary items, net income, and EPS as if the employer had adopted the provisions of the SOP. Many respondents objected to those pro forma disclosures. The reasons most often cited for not requiring such disclosures follow:

- Such disclosures would add unnecessary complexity to the financial statements and would confuse rather than inform users.
- Such disclosures generally have not been required in the past for other accounting pronouncements with grandfathering provisions and would set a precedent for such disclosures in the future.
- Such disclosures are inconsistent with the grandfathering provisions and would discredit the amounts reported in the financial statements.
- The costs of making such disclosures would outweigh the benefits.
- It is unfair to require such disclosures only for public companies.

AcSEC found those arguments persuasive and deleted the disclosure requirement.

### **Effective Date**

In the exposure draft the grandfathering cutoff date was September 23, 1992, the date the FASB cleared the proposed SOP for exposure. Many respondents noted that a later date connected with a year end would be more appropriate. In response to those comments the cutoff date was changed to December 31, 1992.

Many respondents considered the effective date for years ending on or before December 15, 1993, in the exposure draft unreasonable. AcSEC agreed and extended the effective date by one year.

## Appendix C

### Law Changes

The following is a list of the most significant revisions to laws concerning ESOPs since 1976.

- The tax deduction limits were expanded from 15 percent of pay to 25 percent of pay, plus interest in certain cases.<sup>1</sup> This change prompted more small companies to use ESOPs and larger companies to increase the portion of employee benefits covered by ESOPs.
- ESOP sponsors were permitted to deduct dividends paid on ESOP shares from taxable income if the dividends were applied to debt service or distributed to plan participants.<sup>2</sup> This change increased the economic appeal of leveraged ESOPs. For example, it increased the amount of debt that could be covered for employers whose compensation base was too low to amortize the ESOP debt under the contribution limits of the Internal Revenue Code (IRC).
- Under certain circumstances, a person who sold stock to an ESOP was permitted to defer income tax on any resulting gain by reinvesting the sales proceeds in other corporate securities.<sup>3</sup> This change contributed to the substantial increase in the number of ESOPs sponsored by nontraded companies.
- Commercial lenders were permitted to exclude from taxable income 50 percent of the interest they earned on certain ESOP securities acquisition loans.<sup>4</sup> This change resulted in a reduced financing rate on such loans, as lenders frequently passed a portion of the savings on to their customers. Many new ESOP loans were made as a result of this change. (Although 1989 legislation significantly limited this benefit, all of the prior loans were allowed to retain their tax advantages.)
- The regulatory requirement that if ESOPs buy outstanding shares, the purchase must be tested under the corporate redemption rules was eliminated.<sup>5</sup> The significance of this development was that the IRC recognized the independence of ESOPs from their sponsors if certain controls are in place. Thus, it increased the usefulness of ESOPs in transfers of ownership of closely held companies.

<sup>1</sup> IRC Sections 404(a)(9) and 415 (c)(6).

<sup>2</sup> IRC Section 404(k).

<sup>3</sup> IRC Section 1042.

<sup>4</sup> IRC Section 133.

<sup>5</sup> Rev. Proc. 87-22, which superseded Rev. Procs. 77-30, 78-18, and 78-23.

## Appendix D

### Impact of SOP on Current ESOP Guidance

#### Current Guidance

FASB Statement No. 87, *Employers' Accounting for Pensions*

AICPA SOP 76-3, *Accounting Practices for Certain Employee Stock Ownership Plans* [section 10,130]

EITF Issue No. 85-11, *Use of an Employee Stock Ownership Plan in a Leveraged Buyout*

EITF Issue No. 86-4, *Income Statement Treatment of Income Tax Benefit for Employee Stock Ownership Plan Dividends*

EITF Issue No. 86-27, *Measurement of Excess Contributions to a Defined Contribution Plan or Employee Stock Ownership Plan*

EITF Issue No. 87-23, *Book Value Stock Purchase Plans*

#### Impact of SOP

The SOP includes accounting guidance on nonleveraged ESOPs that is consistent with the guidance for defined contribution plans in Statement No. 87.

The SOP supersedes SOP 76-3 [section 10,130]. However, under the transition provisions in the proposed SOP, employers may continue their current accounting practices for ESOP shares purchased before December 31, 1992.

No consensus was reached on this issue by the EITF. However, for ESOP shares accounted for under the SOP, the issue is moot, because compensation cost is measured based on the fair value of shares when committed to be released.

FASB Statement No. 109, *Accounting for Income Statement Income Taxes* nullified this consensus. The SOP deals with issues related to accounting for income taxes.

The SOP supersedes this consensus. However, under the transition provisions in the SOP, employers may continue their current accounting for shares purchased in a pension reversion occurring before December 31, 1992.

This EITF topic includes three issues; only the third one relates to ESOPs. The SOP, which is consistent with the consensus, supersedes this consensus on the third issue. However, under the transition provisions in the SOP, employers may continue their current accounting for shares purchased before December 31, 1992. This consensus applies to employers making that election.

Current Guidance

EITF Issue No. 88-27, *Effect of Unallocated Shares in an Employee Stock Ownership Plan on Accounting for Business Combinations*

EITF Issue No. 89-8, *Expense Recognition for Employee Stock Ownership Plans*

EITF Issue No. 89-10, *Sponsor's Recognition of Employee Stock Ownership Plan Debt*

EITF Issue No. 89-11, *Sponsor's Balance Sheet Classification of Capital Stock with a Put Option Held by an Employee Stock Ownership Plan*

EITF Issue No. 89-12, *Earnings-per-Share Issues Related to Convertible Preferred Stock Held by an Employee Stock Ownership Plan*

EITF Issue No. 90-4, *Earnings-per-Share Treatment of Tax Benefits for Dividends of Stock Held by an Employee Stock Ownership Plan*

EITF Issue No. 92-3, *Earnings-per-Share Treatment of Tax Benefits for Dividends on Unallocated Stock Held by an Employee Stock Ownership Plan*

EITF Issue No. 93-2, *Effect of Acquisition of Employer Shares for/by an Employee Benefit Trust on Accounting for Business Combinations*

Impact of SOP

The SOP does not deal with this issue and accordingly does not supersede the consensus. The consensus is reprinted in this appendix.

The SOP supersedes this consensus. However, under the transition provisions in the SOP, employers may continue their current accounting for shares purchased before December 31, 1992. This consensus applies to employers making that election.

The SOP, which is consistent with this consensus, supersedes the consensus.

The SOP does not deal with this issue and accordingly does not supersede the consensus. The consensus is reprinted in this appendix.

The SOP supersedes these consensus. However, under the transition provisions in the SOP, employers may continue their current accounting for shares purchased before December 31, 1992. This consensus applies to employers making that election.

FASB Statement No. 109, *Accounting for Income Taxes*, nullified this consensus.

Under this SOP, dividends paid on unallocated shares are not charged to retained earnings. However, under the transition provisions in the SOP, employers may continue their current accounting for shares purchased before December 31, 1992. This consensus would apply to employers making that election.

The SOP does not deal with this issue and accordingly does not supersede this consensus. The consensus is reproduced in this appendix.

**EITF Abstracts****Issue No. 88-27**

**Title:** Effect of Unallocated Shares in an Employee Stock Ownership Plan on Accounting for Business Combinations

**Date Discussed:** January 12-13, 1989

**References:** APB Opinion No. 16, *Business Combinations*  
AICPA Accounting Interpretation 20, *Treasury Stock Allowed with Pooling*, of APB Opinion No. 16  
AICPA Statement of Position 76-3, *Accounting Practices for Certain Employee Stock Ownership Plans*  
SEC Accounting Series Release No. 146, *Effect of Treasury Stock Transactions on Accounting for Business Combinations*  
SEC Accounting Series Release No. 146A, *Statement of Policy and Interpretations in Regard to Accounting Series Release No. 146*

**ISSUE**

Employee stock ownership plans (ESOPs) may hold shares of the sponsoring entity that are not allocated to the participants in the plan. Those unallocated shares may be allocated later or, under certain limited circumstances, may be sold or disposed of otherwise by the ESOP. Unlike allocated shares that must be reallocated to remaining plan participants if a participant leaves the plan before the shares become vested, the unallocated sponsoring entity shares held by the ESOP are not required to remain within the ESOP or with its participants. Further, to the extent the ESOP acquires unallocated shares as a result of a pension plan termination, Issue No. 86-27, "Measurement of Excess Contributions to a Defined Contribution Plan or Employee Stock Ownership Plan," requires unallocated shares held by the ESOP to be reported as treasury shares by the sponsoring entity.

The issue is under what circumstances, if any, unallocated sponsoring entity shares held by an ESOP should be considered tainted treasury shares for purposes of determining whether the pooling-of-interests method of accounting is appropriate for a business combination.

**EITF DISCUSSION**

The Task Force reached a consensus that unallocated shares held by an ESOP should not be considered tainted for purposes of determining whether the pooling-of-interests method of accounting is appropriate unless (1) there is more than a remote possibility that such shares could revert to the sponsoring entity, (2) there exists an agreement or intent, either written or implicit, whereby the sponsoring entity will repurchase or reacquire shares from the ESOP or from an employee that receives shares in a distribution (except if required by law to provide liquidity to the plan participant), or (3) the shares were acquired to circumvent the requirements of Opinion 16.

The Task Force considered comments by a tax partner of an accounting firm that generally, for unallocated shares in an ESOP, the possibility of those shares reverting to the sponsoring entity is remote. Some Task Force members

noted that the relevant attributes of unallocated shares differ for purposes of determining whether the shares are treasury shares, as addressed in Issue 86-27, compared with whether those treasury shares are tainted, as addressed in this Issue.

**STATUS**

No further EITF discussion is planned.

5/18/89

**EITF Abstracts****Issue No. 89-11**

**Title:** Sponsor's Balance Sheet Classification of Capital Stock with a Put Option Held by an Employee Stock Ownership Plan

**Dates Discussed:** September 21, 1989; December 14, 1989

**References:** APB Opinion No. 25, *Accounting for Stock Issued to Employees*  
SEC Accounting Series Release No. 268, *Presentation in Financial Statements of "Redeemable Preferred Stocks"*

**ISSUE**

Under federal income tax regulations, employer securities (such as convertible preferred stock) that are held by participants in an employee stock ownership plan (ESOP) and that are not readily tradeable on an established market must include a put option. The put option is a right to demand that the sponsor redeem shares of employer stock held by the participant for which there is no market for an established cash price. The employer may have the option to issue marketable securities for all or a portion of that option rather than to pay cash. The provisions of the ESOP may permit the ESOP to substitute for the sponsor as buyer of the employer stock; however, in no case can the sponsor require the ESOP to assume the obligation for the put option.

The issue is, in a leveraged ESOP, if securities subject to a put option are classified outside of permanent equity, whether any of the debit in the equity section of the sponsor's balance sheet (sometimes described as *loan to ESOP* or *deferred compensation*) should be similarly classified.

**EITF DISCUSSION**

The Task Force reached a consensus that when ASR 268 (as presented in Section 211 of the "Codification of Financial Reporting Policies") requires some or all of the value of the securities to be classified outside of permanent equity, a proportional amount of the debit in the equity section of the sponsor's balance sheet (sometimes described as *loan to ESOP* or *deferred compensation*), if any, should be similarly classified.

The SEC Observer indicated that ASR 268 requires that to the extent that there are conditions (regardless of their probability of occurrence) whereby holders of equity securities may demand cash in exchange for their securities, the sponsor must reflect the maximum possible cash obligation related to those securities outside of permanent equity. Thus, securities held by an ESOP (whether or not allocated) must be reported outside of permanent equity if by their terms they can be put to the sponsor for cash. With respect to ESOP securities where the cash obligation relates only to market value guarantee features, the SEC staff would not object to registrants only classifying outside of permanent equity an amount that represents the maximum cash obligation of the sponsor based on market prices of the underlying security as of the reporting date; accordingly, reclassifications of equity amounts would be required based on the market values of the underlying security. Alternatively, the SEC staff would not object to classifying the entire guaranteed value amount outside of permanent equity due to the uncertainty of the ultimate cash obligation because of a possible market value decline in the underlying security.

**STATUS**

No further EITF discussion is planned.

12/14/89

## ***EITF Abstracts***

### **Issue No. 93-2**

**Title:** Effect of Acquisition of Employer Shares for/by an Employee Benefit Trust on Accounting for Business Combinations

**Date Discussed:** January 21, 1993

**References:** APB Opinion No. 16, *Business Combinations*  
 AICPA Accounting Interpretation 20, *Treasury Stock Allowed with Pooling*, of APB Opinion No. 16  
 AICPA Statement of Position 76-3, *Accounting Practices for Certain Employee Stock Ownership Plans*  
 AICPA Proposed Statement of Position, *Employers' Accounting for Employee Stock Ownership Plans*, dated December 21, 1992  
 SEC Accounting Series Release No. 146, *Effect of Treasury Stock Transactions on Accounting for Business Combinations*  
 SEC Accounting Series Release No. 146A, *Statement of Policy and Interpretations in Regard to Accounting Series Release No. 146*

### **ISSUE**

An employer (Company) establishes an irrevocable grantor trust (Trust) to prefund certain employee benefits. The Company sells shares of its stock to the Trust in return for a note payable and, at or about the same time, reacquires treasury shares. Alternatively, the Trust may acquire Company shares in the marketplace using funds borrowed from the Company. The shares will be released from the Trust in future periods as debt is repaid or forgiven and will be used to meet obligations of the Company to various employee benefit plans.

The issue is whether Company shares reacquired coincident with the establishment of the Trust, either by the Company or by the Trust, should be considered tainted shares for purposes of pooling-of-interests accounting under Opinion 16.

### **EITF DISCUSSION**

The SEC Observer stated that it is the SEC staff's position that Issue No. 88-27, "Effect of Unallocated Shares in an Employee Stock Ownership Plan on Accounting for Business Combinations," and Topic No. D-19, "Impact on Pooling-of-Interests Accounting of Treasury Shares Acquired to Satisfy Conversions in a Leveraged Preferred Stock ESOP," in *EITF Abstracts* Appendix D, addressed ESOPs that are defined contribution employee benefit plans, as contemplated by SOP 76-3.<sup>1</sup> An ESOP that funds other employee benefit plans was not contemplated by either Issue 88-27 or Topic D-19.<sup>2</sup>

---

<sup>1</sup> This type of ESOP arrangement has been characterized as a Type I ESOP in the proposed Statement of Position on employers' accounting for employee stock ownership plans:

*Type I*—shares are released to compensate employees directly. Such ESOPs are not used to fund other employee benefits and the fair value of the shares at the time of release is not a factor at the time of release. These ESOPs are the typical ESOPs that existed at the time SOP 76-3 was issued.

<sup>2</sup> This type of ESOP arrangement has been characterized as a Type II ESOP in the proposed Statement of Position:

*Type II*—shares are released to settle or fund liabilities for other specified or determinable employee benefits, such as an employer's match of a 401(k) plan. The fair value of shares released is used to determine how many shares are needed to satisfy an obligation that arose outside the ESOP.

The SEC staff believes that the application of the consensus in Issue 88-27 and the statements made in Topic D-19 should be limited to "Type I" ESOPs. However, the SEC staff will not object to the application of the consensus in Issue 88-27 and Topic D-19 for shares held by a "Type II" ESOP as of January 21, 1993, provided the respective criteria are satisfied. Shares purchased by a Type II ESOP subsequent to January 21, 1993 would be considered treasury stock directly acquired by the employer and presumed to be tainted shares for the purpose of applying the provisions of paragraph 47(d) of Opinion 16.

The SEC Observer also stated that the trust arrangement described in this Issue is neither a Type I nor a Type II ESOP. Therefore, the SEC staff's position is that shares acquired in the past or in the future and placed in trust to fund future corporate obligations, such as the trust vehicle described in this Issue, are treasury stock directly acquired by the employer and presumed to be tainted shares for the purpose of applying the provisions of paragraph 47(d) of Opinion 16.

Because of the SEC staff's position, the Task Force did not discuss this Issue.

#### **STATUS**

No further EITF discussion is planned.

5/20/93

## Glossary

This glossary contains definitions of certain terms used in employers' accounting for ESOP transactions.

**Allocated shares.** The shares in an ESOP trust that have been assigned to individual participant accounts based on a known formula. IRS rules require allocations to be nondiscriminatory generally based on compensation, length of service, or a combination of both. For any particular participant such shares may be vested, unvested, or partially vested.

**Committed-to-be-released shares.** The shares that, although not legally released, will be released by a future scheduled and committed debt service payment and will be allocated to employees for service rendered in the current accounting period. The period of employee service to which shares relate is generally defined in the ESOP documents. Shares are legally released from suspense and from serving as collateral for ESOP debt as a result of payment of debt service. Those shares are required to be allocated to participant accounts as of the end of the ESOP's fiscal year. Formulas used to determine the number of shares released can be based on either (a) the ratio of the current principal amount to the total original principal amount (in which case unearned ESOP shares and debt balance will move in tandem) or (b) the ratio of the current principal plus interest amount to the total original principal plus interest to be paid. Shares are released more rapidly under the second method than under the first. Tax law permits the first method only if the ESOP debt meets certain criteria.

**Dividends on previously allocated shares used for debt service.** The allocation of shares to participant accounts that replaces the cash dividends on allocated shares that were or will be used for debt service. Under the IRC, dividends on shares held by an ESOP that have been allocated to participant accounts cannot be used for debt service unless the employers allocate shares to those participants whose dollar value is no less than the dollar value of the dividends that were used for debt service. (The IRS has not issued guidance on what employers would be required to do to make up the difference between the value of any dividends withdrawn and the shares allocated. In practice, plan sponsors apply a wide variety of techniques to satisfy the Code requirements.)

**Suspense shares.** Shares that have not been released, committed to be released, or allocated to participant accounts. Suspense shares generally collateralize ESOP debt.

**Top-up shares.** The shares or cash that an employer contributes to an ESOP because the fair value of the shares released is less than the employer's liability for a particular benefit, such as a savings plan match.

**Vested shares.** Allocated shares for which a participant's right to receive the shares or redeem the shares for cash is no longer contingent on remaining in the service of the employer. Allocated shares that have not been vested may be forfeited if a participant terminates his or her employment and reallocated to other participants. Whether the shares in a participant's ESOP account are vested depends on the length of that employee's service and the vesting provisions of the ESOP. The Code specifies minimum vesting requirements for benefits attributable to employer contributions. Currently, the Code permits two minimum vesting approaches:

- a.* Graded vesting, under which employees vest 20 percent after three years of service and 20 percent for each additional year of service until they become 100 percent vested.
- b.* Cliff vesting, under which employees vest 100 percent after five years of service.

Accordingly, the shares allocated to participants at any date will include shares that are fully vested, shares that are not vested, and (if graded vesting is used) shares that are partially vested.

## Section 10,590

# **Statement of Position 93-7 Reporting on Advertising Costs**

December 29, 1993

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction**

.01 The Accounting Standards Executive Committee (AcSEC) has on its agenda a project on reporting the costs of activities—such as advertising, preopening, start-up, training, customer acquisition, and similar activities—that are undertaken to create future economic benefits through the development of intangible assets. The project was undertaken to provide guidance that would aid in resolving issues concerning financial reporting for the costs of such activities.

.02 Because of the difficulty of developing sound financial reporting guidance that could be applied broadly to the costs of all activities, AcSEC decided that this statement of position (SOP) should be issued as a first step and be used to develop guidance for reporting costs of other kinds of activities undertaken to create such benefits although AcSEC has not begun deliberations to develop such guidance. The guidance in this SOP therefore is not intended to be used to account for the costs of other kinds of activities undertaken to create future economic benefits through the development of intangible assets.

.03 Some entities report the costs of all advertising as expenses when the costs are incurred. However, other entities report the costs of future economic benefits that they expect will result from some or all advertising as assets when the costs are incurred and amortize the costs to expense in the current and subsequent periods.

.04 The authoritative financial reporting literature provides no broad guidance on reporting the costs of advertising, although it does provide guid-

ance for certain specific transactions and industries and on reporting the costs of activities similar to advertising. The lack of broad guidance and the inconsistency of existing guidance has led to diversity in practice.

.05 This SOP provides guidance for annual financial statements on the following:

- Reporting the costs of advertising, which should be expensed either as incurred or the first time the advertising takes place, except for direct-response advertising (a) whose primary purpose is to elicit sales to customers who could be shown to have responded specifically to the advertising and (b) that results in probable future economic benefits
- For direct-response advertising that may result in reported assets—
  - How such assets should be measured initially
  - How the amounts ascribed to such assets should be amortized
  - How the realizability of such assets should be assessed
- The financial statement disclosures that should be made about advertising
- Amendments to other accounting literature affected by this SOP
- Transition rules for applying this SOP

## Scope

.06 This SOP provides financial reporting guidance for the annual financial statements of all entities and all advertising other than that for which pronouncements included in category (a) in paragraph 10 of Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, provide such guidance.<sup>1</sup> This SOP does not apply to financial statements for interim periods. Paragraphs 15 and 16 of Accounting Principles Board (APB) Opinion No. 28, *Interim Financial Reporting*, which are discussed in the appendix of this SOP [paragraph .81], provide guidance for accounting for advertising in interim periods. This SOP amends the following AICPA SOPs<sup>2</sup>:

- a. SOP 88-1, *Accounting for Developmental and Preoperating Costs, Purchases and Exchanges of Take-off and Landing Slots, and Airframe Modifications*, paragraph 22 [section 10,430.22]
- b. SOP 89-5, *Financial Accounting and Reporting by Providers of Prepaid Health Care Services*, paragraph 54
- c. SOP 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities*, paragraph 15

.07 This SOP does not amend FASB Technical Bulletin 90-1, *Accounting for Separately Priced Extended Warranty and Product Maintenance Contracts*.

---

<sup>1</sup> Category (a) in paragraph 10 of SAS No. 69 consists of Financial Accounting Standards Board (FASB) Statements of Financial Accounting Standards and Interpretations, Accounting Principles Board (APB) Opinions, and AICPA Accounting Research Bulletins. Advertising that is covered by pronouncements in category (a) of paragraph 10 of SAS No. 69 should be accounted for in conformity with that guidance regardless of the guidance in this SOP.

<sup>2</sup> The appendix [paragraph .81] discusses the guidance concerning advertising in these SOPs. Paragraphs .51 to .53 of this SOP discuss the amendments to these SOPs.

.08 This SOP applies to not-for-profit organizations.

.09 Reporting on the costs of advertising conducted for others under contractual arrangements is part of reporting on contracts in general and is not covered by this SOP. Indirect costs that are specifically reimbursable under the terms of a contract also are excluded from this SOP.

## Background

.10 FASB Statement No. 2, *Accounting for Research and Development Costs*, issued in 1974, requires all research and development costs to be reported as expenses when incurred. Therefore, FASB Statement No. 2 in effect prohibits reporting the research and development costs incurred in anticipation of probable future benefits as assets. Although activities similar to research and development were included in the discussion memorandum that initiated the FASB's project, paragraph 22 of appendix A of Statement No. 2 states that the FASB concluded, following the public hearing on the Discussion Memorandum, that the "initial Statement of Financial Accounting Standards resulting from the project should address solely accounting for research and development costs."

.11 Since issuing the discussion memorandum, the FASB has developed its conceptual framework, which provides conceptual criteria for asset recognition, and there has been periodic interest in how the costs of activities similar to research and development are reported on. The Securities and Exchange Commission (SEC) has issued some accounting and auditing enforcement releases on activities similar to research and development, and the SEC staff has expressed concern about the accounting for these activities.

.12 Costs incurred in anticipation of the probable future economic benefits of advertising generally have been expensed for the following reasons:

- Financial statement preparers generally presumed that the benefit period is short.
- The periods during which the future economic benefits probably would be received and the amounts of such benefits could not be measured and determined easily and objectively.
- The advertising costs for some entities were not material.

.13 Advertising is undertaken to provide or increase future economic benefits. FASB Statement on Financial Accounting Concepts (Concepts Statement) No. 6, *Elements of Financial Statements*, paragraph 178, states, "An entity commonly incurs costs to obtain future economic benefits, either to acquire assets from other entities in exchange transactions or to add value through operations to assets it already has . . . ." New technology, sources of information, and measurement techniques have given some entities the ability to better estimate the future economic benefits that could result from certain kinds of advertising.

.14 If future economic benefits do result from advertising, they generally would be in the form of revenue.

## Authoritative Pronouncements

.15 FASB Concepts Statement No. 6, paragraph 25, defines assets as "probable future economic benefits obtained or controlled by a particular entity

as a result of past transactions or events.”<sup>3</sup> Footnote 18 to Concepts Statement No. 6 states that “*probable* is used with its usual general meaning, rather than in a specific accounting or technical sense, . . . and refers to that which can reasonably be expected or believed on the basis of available evidence or logic but is neither certain nor proved . . . .” Paragraph 26 states:

An asset has three essential characteristics: (a) it embodies a probable future benefit that involves a capacity, singly or in combination with other assets, to contribute directly or indirectly to future net cash inflows, (b) a particular entity can obtain the benefit and control others’ access to it, and (c) the transaction or other event giving rise to the entity’s right to or control of the benefit has already occurred.

.16 Appendix B of Concepts Statement No. 6 discusses in paragraphs 175 and 176 the characteristics of assets and the concept of probable future economic benefits, including those that may arise from activities such as advertising:

Uncertainty about business and economic outcomes often clouds whether . . . particular items that might be assets have the capacity to provide future economic benefits to the entity, . . . sometimes precluding their recognition as assets. The kinds of items that may be recognized as expenses or losses rather than as assets because of uncertainty are some in which management’s intent in taking certain steps or initiating certain transactions is clearly to acquire or enhance future economic benefits available to the entity. For example, business enterprises . . . advertise, develop markets . . . and spend significant funds to do so. The uncertainty is not about the intent to increase future economic benefits but about whether and, if so, to what extent they succeeded in doing so. Certain expenditures for . . . advertising . . . are examples of the kinds of items for which assessments of future economic benefits may be especially uncertain . . . .

If . . . advertising results in an entity’s acquiring or increasing future economic benefit, that future economic benefit qualifies as an asset as much as do the future benefits from prepaid insurance or prepaid rent. The practical problem is whether future economic benefit is actually present and, if so, how much—an assessment that is greatly complicated by the feature that the benefits may be realized far in the future, if at all.

.17 Paragraphs 247 to 250 discuss deferred costs and acknowledge that advertising may provide future economic benefits, but they note that such benefits may not be reported as assets for practical reasons stemming from considerations of uncertainty or measurement. Paragraph 248 states, in part:

The question that needs to be answered to apply the definition of assets is whether the economic benefit received by incurring those costs was used up at the time the costs were incurred or shortly thereafter or future economic benefit remains at the time the definition is applied. Costs such as . . . advertising services do not *by themselves* qualify as assets under the definition in paragraph 25 any more than do spoiled units, dry holes, or legal costs. The reason for considering the possibility that they might be accounted for as if they were assets stems from their possible relationship to future economic benefits.

.18 FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 63, sets forth the following criteria that should be met to report an item in the financial statements:

---

<sup>3</sup> Because assets should be understood to represent current conditions, the term *probable future economic benefits* in this SOP means that current prospects indicate that the reporting entity probably will receive economic benefits in the future.

**Definitions**—The item meets the definition of an element of financial statements.

**Measurability**—It has a relevant attribute measurable with sufficient reliability.

**Relevance**—The information about it is capable of making a difference in user decisions.

**Reliability**—The information is representationally faithful, verifiable, and neutral.

**.19** No authoritative pronouncement provides broad guidance on financial reporting on advertising. However, aspects of the following documents, discussed in the appendix [paragraph .81], provide guidance on reporting on advertising in connection with specific items or industries.

- a. FASB Statement No. 13, *Accounting for Leases*, as amended by FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*
- b. FASB Statement No. 51, *Financial Reporting By Cable Television Companies*
- c. FASB Statement No. 53, *Financial Reporting by Producers and Distributors of Motion Picture Films*
- d. FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*
- e. FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*
- f. The AICPA Industry Audit Guide *Audits of Airlines*, as amended by SOP 88-1, *Accounting for Developmental and Preoperating Costs, Purchases and Exchanges of Take-off and Landing Slots, and Airframe Modifications* [section 10,430]
- g. The AICPA Industry Audit Guide *Audits of Stock Life Insurance Companies*
- h. SOP 89-5, *Financial Accounting and Reporting by Providers of Pre-paid Health Care Services*
- i. FASB Technical Bulletin No. 90-1, *Accounting for Separately Priced Extended Warranty and Product Maintenance Contracts*

**.20** Aspects of the following documents, also discussed in the appendix [paragraph .81], provide further guidance on reporting on activities similar to research and development:

- a. APB Opinion 17, *Intangible Assets*
- b. APB Opinion 28, *Interim Financial Reporting*
- c. FASB Statement No. 2, *Accounting for Research and Development Costs*
- d. FASB Statement No. 19, *Financial Accounting and Reporting by Oil and Gas Producing Companies*
- e. FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*

- f. FASB Statement No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*
- g. The AICPA Audit and Accounting Guide *Audits of Property and Liability Insurance Companies*
- h. SOP 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities*

.21 The guidance in the pronouncements listed in the two preceding paragraphs is not consistent. Some believe that pronouncements permitting capitalization of advertising do so because a clearly demonstrable cause-and-effect relationship exists between the assets acquired and costs incurred. Also, some believe that pronouncements prohibiting capitalization of advertising do so because (a) no such demonstrable causal relationship exists, (b) the amounts capitalized would be immaterial, or (c) the costs of obtaining the information would not be justified by the benefits of reporting it. The conclusions reached in this SOP are based on the guidance in the FASB Concepts Statements.

## Description of Advertising

.22 Advertising is the promotion of an industry, an entity, a brand, a product name, or specific products or services so as to create or stimulate a positive entity image or to create or stimulate a desire to buy the entity's products or services.<sup>4</sup>

.23 Advertising is one kind of customer acquisition activity. Financial reporting of other kinds of customer acquisition activities is outside the scope of this SOP.<sup>5</sup>

.24 Advertising generally uses a form of media—such as mail, television, radio, telephone, facsimile machine, newspaper, magazine, coupon, or billboard—to communicate with potential customers. Examples of kinds of advertising include the following:

- Directory and buyer's guide advertising
- Business and industrial publications
- Reprints of advertisements
- Television advertising
- Direct-mail advertising
- Consumer publications
- Radio advertisements
- Billboard advertisements
- Company and product catalogues
- Cooperative advertising

---

<sup>4</sup> Fund-raising by not-for-profit organizations is not considered advertising and is not within the scope of this SOP. However, this SOP does apply to advertising activities of not-for-profit organizations.

<sup>5</sup> The costs of premiums, contest prizes, gifts, and similar promotions, as well as discounts or rebates, including those resulting from the redemption of coupons, are not considered advertising costs for purposes of applying the guidance in this SOP. (Other costs of coupons and similar items, such as costs of newspaper advertising space, are considered advertising costs.)

- Booklets for sales promotion
- Newspaper advertising
- Point-of-sale material
- Sponsorship of public events

## Conclusions

**.25** The following conclusions should be read in conjunction with “Discussion of Conclusions and Implementation Guidance,” beginning with paragraph .55 of this SOP, which explains the basis for the conclusions and provides guidance for implementing them.

## Expensing or Capitalizing Advertising Costs

**.26** The costs of advertising should be expensed either as incurred or the first time the advertising takes place (paragraphs .42 to .44 elaborate on component costs of advertising),<sup>6</sup> except for—

- a. Direct-response advertising (1) whose primary purpose is to elicit sales to customers who could be shown to have responded specifically to the advertising and (2) that results in probable future economic benefits (future benefits). (Paragraph .37 discusses the conditions that must be met in order to conclude that direct-response advertising results in probable future benefits.) Examples of the first time advertising takes place include the first public showing of a television commercial for its intended purpose and the first appearance of a magazine advertisement for its intended purpose.
- b. Expenditures for advertising costs that are made subsequent to recognizing revenues related to those costs, as discussed in paragraph .27.

**.27** Expenditures for some advertising costs are made subsequent to recognizing revenues related to those costs. For example, some entities assume an obligation to reimburse their customers for some or all of the customers’ advertising costs (cooperative advertising). Generally, revenues related to the transactions creating those obligations are earned and recognized before the expenditures are made. For purposes of applying this SOP, those obligations should be accrued and the advertising costs expensed when the related revenues are recognized.

**.28** The costs of direct-response advertising (a) whose primary purpose is to elicit sales to customers who could be shown to have responded specifically to the advertising and (b) that results in probable future benefits should be reported as assets net of accumulated amortization. For purposes of calculating amortization and assessing realizability, which are discussed in paragraphs .46 to .48, each significant advertising effort establishes a separate stand-alone cost pool.

---

<sup>6</sup> Deferring the costs of advertising until the advertising takes place assumes that the costs have been incurred for advertising that will occur. Such costs should be expensed immediately if such advertising is not expected to occur.

**.29** The accounting policy selected from the two alternatives in the beginning of paragraph .26 (whether advertising costs are expensed as incurred or the first time the advertising takes place), should be applied consistently to similar kinds of advertising activities.

## **Tangible Assets**

**.30** Tangible assets, such as blimps or billboards, may be used for several advertising campaigns. The costs of such assets should be capitalized and depreciated or amortized using a systematic and rational method over their expected useful lives. That depreciation or amortization may be a cost of advertising if the tangible asset is used for advertising.

**.31** For purposes of applying this SOP, costs incurred to produce film or audio and video tape to be used to communicate advertising do not create tangible assets.

**.32** Sales materials, such as brochures and catalogues, may be accounted for as prepaid supplies until they no longer are owned or expected to be used, in which case their cost would be a cost of advertising and should be accounted for in conformity with the guidance in this SOP.

## **Direct-Response Advertising**

**.33** The costs of direct-response advertising should be capitalized if both of the following conditions are met:

- a. The primary purpose of the advertising is to elicit sales to customers who could be shown to have responded specifically to the advertising. (Paragraph .34 discusses the conditions that must exist in order to conclude that the advertising's purpose is to elicit sales to customers who could be shown to have responded specifically to the advertising.)
- b. The direct-response advertising results in probable future benefits. (Paragraph .37 discusses the conditions that must exist in order to conclude that direct-response advertising results in probable future benefits.)

**.34** In order to conclude that advertising elicits sales to customers who could be shown to have responded specifically to the advertising, there must be a means of documenting that response, including a record that can identify the name of the customer and the advertising that elicited the direct response. Examples of such documentation include the following:

- Files indicating the customer names and the related direct-response advertisement
- A coded order form, coupon, or response card, included with an advertisement, indicating the customer name
- A log of customers who have made phone calls to a number appearing in an advertisement, linking those calls to the advertisement

**.35** Direct-response advertising activities exclude advertising that, though related to the direct-response advertising, is directed to an audience that could not be shown to have responded specifically to the direct-response advertising. For example, a television commercial announcing that order forms

(that are direct-response advertising) soon will be distributed directly to some people in the viewing area would not be a direct-response advertising activity because the television commercial is directed to a broad audience, not all of which could be shown to have responded specifically to the direct-response advertising.

### **Probable Future Benefits of Direct-Response Advertising**

**.36** The probable future benefits of direct-response advertising activities are probable future revenues arising from that advertising in excess of future costs to be incurred in realizing those revenues.

**.37** Demonstrating that direct-response advertising will result in future benefits requires persuasive evidence that its effects will be similar to the effects of responses to past direct-response advertising activities of the entity that resulted in future benefits. Such evidence should include verifiable historical patterns of results for the entity. Attributes to consider in determining whether the responses will be similar include (a) the demographics of the audience, (b) the method of advertising, (c) the product, and (d) economic conditions.

**.38** Industry statistics would not be considered objective evidence that direct-response advertising will result in future benefits in the absence of the specific entity's operating history. If the entity does not have an operating history for a particular product or service but does have operating histories for other new products or services, statistics for the other products or services may be used if it can be demonstrated that the statistics for the other products or services are likely to be highly correlated to the statistics of the particular product or service being evaluated. For example, test market results for a new product or service may be used to support the view that the results of advertising for current new products or services are likely to be highly correlated with the results of advertising for new products or services previously sold by the entity. In the absence of the expectation of a high degree of correlation, a success rate based on historical ratios of successful products or services to total products or services introduced to the marketplace would not be a sufficient basis for reporting a portion of the costs of current-period advertising as resulting in assets.

**.39** Direct-response advertising costs that are not capitalized because it cannot be demonstrated that the direct-response advertising will result in future benefits should not be retroactively capitalized in subsequent periods if historical evidence in those subsequent periods indicates that the advertising did in fact result in future benefits.

### **Basis of Measurement**

**.40** Based on the potential customers and the probable customer response rates, direct-response advertising that is expected to produce future revenues generally is undertaken before the customers' identity is known. Such advertising is undertaken with the expectation that not all targets of the direct-response advertising will provide benefits but that the benefits created by the customers who do respond to the advertising will justify the total advertising costs. Accordingly, the cost of the direct-response advertising directed to all prospective customers, not only the cost related to the portion of the potential customers that are expected to respond to the advertising, should be used to measure the amounts of such reported assets.

## Costs of Direct-Response Advertising

.41 Costs of direct-response advertising that should be included in amounts reported as assets include only the following:

- a. *Incremental direct costs of direct-response advertising incurred in transactions with independent third parties*—Examples of those costs may include, but are not limited to, costs of idea development, writing advertising copy, artwork, printing, magazine space, and mailing.
- b. *Payroll and payroll-related costs for the direct-response advertising activities of employees who are directly associated with and devote time to the advertising reported as assets*—Examples of those activities may include, but are not limited to, idea development, writing advertising copy, artwork, printing, and mailing. The costs directly related to those advertising activities should include only that portion of employees' total compensation and payroll-related fringe benefits directly related to time spent performing such activities.

For purposes of this SOP, administrative costs, rent, depreciation other than depreciation of assets used directly for advertising activities (as discussed in paragraph .30), and other occupancy costs are not costs of direct-response advertising activities.

## Components of Advertising Activities

.42 Advertising activities may have several component costs. Two primary components, which are made up of other components, are the costs of (a) producing advertisements, such as the costs of idea development, writing advertising copy, artwork, printing, audio and video crews, actors, and other costs, and (b) communicating advertisements that have been produced, such as the costs of magazine space, television airtime, billboard space, and distribution (postage stamps, for example).

### Producing Advertising

.43 Costs of producing advertising are incurred during production rather than when the advertising takes place.

### Communicating Advertising

.44 Costs of communicating advertising are not incurred until the item or service has been received and should not be reported as expenses before the item or service has been received, except as discussed in paragraph .27. For example—

- The costs of television airtime should not be reported as advertising expense before the airtime is used. Once it is used, the costs should be expensed, unless the airtime was used for direct-response advertising activities that meet the criteria for capitalization under this SOP.
- The costs of magazine, directory, or other print media advertising space should not be reported as advertising expense before the space is used. Once it is used, the costs should be expensed, unless the space was used for direct-response advertising activities that meet the criteria for capitalization under this SOP.

### Executory Contracts

.45 Some activities, such as product endorsements and sponsorships of events, may be performed pursuant to executory contracts. Costs incurred un-

der executory contracts generally are recognized as performance under the contract is received. Executory contracts should be evaluated to determine whether the costs recognized under such contracts are advertising costs. To the extent that those costs are advertising costs, such costs should be accounted for in conformity with the guidance in this SOP.

## Amortization of Capitalized Advertising Costs

.46 The amounts at which direct-response advertising is reported as assets should be amortized on a cost-pool-by-cost-pool basis over the period during which the future benefits are expected to be received using the method described in paragraph .47.

.47 The amortization should be the amount computed using the ratio that current period revenues for the direct-response advertising cost pool bear to the total of current and estimated future period revenues for that direct-response-advertising cost pool. The amounts in this calculation should not be discounted to net present value. The estimated amounts of future revenues for that cost pool may increase or decrease over time, and the ratio should be recalculated at each reporting date.<sup>7</sup>

## Assessment of Realizability and Subsequent Measurement

.48 The realizability of the amounts of direct-response advertising reported as assets should be evaluated at each balance-sheet date by comparing the carrying amounts of such assets on a cost-pool-by-cost-pool basis to the probable remaining future net revenues expected to result directly from such advertising. (For this evaluation, future net revenues are gross revenues less the probable future costs of all goods and activities necessary to earn those revenues, except amortization of direct-response advertising. Examples of such future costs are the costs of goods sold, sales commissions, and payroll and payroll-related costs associated with the future revenues.) If the carrying amounts of such advertising exceed the remaining future net revenues that probably will be realized from such advertising, the excess should be reported as advertising expense of the current period. The reduced carrying amounts should not be adjusted upward if estimates of future net revenues are subsequently increased.<sup>[8]</sup>

## Disclosures

.49 The notes to the financial statements should disclose the following:

- a. The accounting policy selected from the two alternatives in the beginning of paragraph .26 for reporting advertising, indicating whether such costs are expensed as incurred or the first time the advertising takes place
- b. A description of the direct-response advertising reported as assets (if any), the accounting policy for it, and the amortization period
- c. The total amount charged to advertising expense for each income statement presented, with separate disclosure of amounts, if any, representing a write-down to net realizable value

---

<sup>7</sup> Changes in estimated future revenues for a direct-response-advertising cost pool should be reflected in the amortization calculation for current and future periods. Therefore, such changes in estimates would not result in reporting amounts expensed in prior periods as assets in the current or subsequent periods.

<sup>[8]</sup> [Footnote deleted.]

- d. The total amount of advertising reported as assets in each balance sheet presented

.50 The following illustrates the disclosures discussed in paragraph .49:

Note X. Advertising

The Company expenses the production costs of advertising the first time the advertising takes place, except for direct-response advertising, which is capitalized and amortized over its expected period of future benefits.

Direct-response advertising consists primarily of magazine advertisements that include order coupons for the Company's products. The capitalized costs of the advertising are amortized over the three-month period following the publication of the magazine in which it appears.

At December 31, 19XX, \$1,000,000 of advertising was reported as assets. Advertising expense was \$10,000,000 in 19XX, including \$500,000 for amounts written down to net realizable value.

## Amendments to Other Guidance

.51 This SOP amends SOP 88-1 [section 10,430] by requiring advertising costs incurred in connection with route developmental costs related to the preparation of new route operations to be accounted for in conformity with the guidance in this SOP, rather than expensed as incurred. Paragraph 22 of SOP 88-1 [section 10,430.22] is amended as follows:

Because of the current deregulated environment and the uncertainty regarding the recoverability of route developmental costs, the majority of the Accounting Standards Executive Committee (AcSEC) believes that developmental costs, other than advertising costs, related to preparation of operations of new routes should not be capitalized, as previously permitted under the guide. (Advertising costs should be accounted for in conformity with the guidance in SOP 93-7, *Reporting on Advertising Costs*.) Route expansion or alteration has become a recurring activity among the airlines, and any related cost is considered a normal and recurring cost of conducting business.

.52 This SOP amends SOP 89-5 by requiring advertising costs incurred as contract acquisition costs to be accounted for in conformity with the guidance in this SOP, rather than expensed as incurred. Paragraph 54 of SOP 89-5 is amended as follows:

Although there is theoretical support for deferring certain acquisition costs, acquisition costs of providers of prepaid health care services, other than costs of advertising, should be expensed as incurred. (Advertising costs should be accounted for in conformity with the guidance in SOP 93-7, *Reporting on Advertising Costs*.)

.53 This SOP amends SOP 90-8 by clarifying that advertising costs incurred in connection with acquiring initial continuing care contracts should be accounted for in conformity with the guidance in this SOP. SOP 90-8 is amended by adding the following as a footnote after the word "advertising" in the second bullet in paragraph 15:

Accounting for costs of advertising is not covered by this SOP. (Advertising costs should be accounted for in conformity with the guidance in SOP 93-7, *Reporting on Advertising Costs*.)

## Effective Date and Transition

.54 This SOP is effective for financial statements for years beginning after June 15, 1994. Earlier application is encouraged in fiscal years for which

financial statements previously have not been issued. Costs incurred, regardless of whether or not they are reported as assets, before the initial application of this SOP should not be adjusted to the amounts that would have been reported as assets had this SOP been in effect when those costs were incurred. However, the concepts included in the provisions of paragraphs .46 and .47 (amortization), paragraph .48 (assessment of realizability), and paragraph .49 (disclosures) of this SOP should be applied to any unamortized costs reported as assets before the initial application of this SOP that continue to be reported as assets after the effective date. In the year this SOP is first applied, the financial statements should disclose the nature of the accounting changes adopted to conform to the provisions of this SOP and their effect on income before extraordinary items, net income, and related per share amounts.

## Discussion of Conclusions and Implementation Guidance

### Expensing the Costs of Advertising Either as Incurred or the First Time the Advertising Takes Place, Unless the Advertising Is Direct-Response Advertising That Is Capitalized Under the SOP

.55 Practice for reporting the costs of advertising is diverse and includes the following:

- Some entities expense all such costs as the component services or items are performed or received. For example, the costs of hiring an actor to film a television commercial, which is one kind of component cost of television advertising, may be expensed when the actor has completed his or her acting assignment.
- Some entities expense such costs the first time the advertising takes place.
- Some entities expense such costs over the estimated life of the advertising.
- Some entities view the practices described in the three previous bulleted items as points on a continuum, and they expense those costs at some point on that continuum.
- Some entities expense such costs over the period that revenues are expected to result from the advertising.

.56 Some believe that all costs of advertising activities, other than direct-response advertising that results in probable future benefits and is capitalized in conformity with the guidance in paragraph .26, should be expensed as the component activities occur. They believe that if the costs of the component activities are not capitalized under the SOP because it cannot be demonstrated that there is an asset after the advertising occurs, it follows that there is no basis for concluding that there is an asset before the advertising occurs.

.57 FASB Concepts Statement No. 5, paragraph 86, states that—

Consumption of economic benefits during a period may be recognized either directly or by relating it to revenues recognized during the period:

... b. Many expenses, such as selling and administrative salaries, are recognized during the period in which cash is spent or liabilities are incurred for goods and services that are used up either simultaneously with acquisition or soon after. *[Footnote reference omitted.]*

Some believe that the component costs of advertising activities, other than direct-response advertising that results in probable future benefits and is capitalized in conformity with the guidance in paragraph .26, result in assets until at least the first time the advertising occurs. They believe that such costs are not capitalized under this SOP after the advertising occurs because they do not result in *demonstrable* probable future economic benefits, not because they do not result in any probable future economic benefits. However, they believe that the component costs of advertising have, at a minimum, benefits that are received simultaneously with the advertising. They note that there must be some economic benefit to advertising activities because entities continue to undertake them. They also note that there is no opportunity for an entity to benefit from advertising until it occurs. Therefore, they conclude that it is reasonable to defer such costs until the first time the advertising takes place.

.58 Some believe the component costs of advertising activities, other than direct-response advertising that results in probable future benefits and is capitalized in conformity with the guidance in paragraph .26, result in assets and should be amortized over the life of the advertising. They believe that the component costs of advertising have benefits that are received over the period the advertising is used. They note that there must be some economic benefit to advertising activities over the period they are used, because entities incur incremental costs to undertake them. Some believe that advertising should be expensed over the period in which revenues are expected to result from the advertising.

.59 AcSEC believes that the views discussed in paragraphs .55 through .58 have merit and acknowledges that choosing from among the accounting methods resulting from them is based to some extent on arbitrary judgments. AcSEC believes that the views discussed in paragraph .58 should not be adopted for advertising other than direct-response advertising, because probable future benefits beyond the first time the advertising takes place are too uncertain and are not demonstrable or measurable with the degree of reliability required to recognize an asset. Further, AcSEC believes the diversity in practice should be limited. AcSEC believes that the costs of advertising that otherwise would not be capitalized under the SOP should be expensed no later than the first time the advertising takes place. However, AcSEC is unable to reach a consensus on whether the costs of advertising that would otherwise not be capitalized under this SOP should be expensed (a) as incurred or (b) the first time the advertising takes place. Therefore, for practical reasons (including the likelihood that, for most entities, the financial statement effect of choosing the accounting described by (a) to the exclusion of (b), or vice versa, would be immaterial), AcSEC has concluded that entities should expense the costs of advertising that otherwise would not be capitalized under this SOP either as incurred or the first time the advertising takes place.

### **Capitalization of Direct-Response Advertising Costs Based on FASB Concepts Statements**

.60 AcSEC based its conclusions for capitalizing direct-response advertising on FASB Concepts Statement Nos. 5 and 6. AcSEC also considered other authoritative financial reporting literature that could be relevant to financial reporting for advertising. Such other literature is excerpted in the appendix [paragraph .81].

.61 AcSEC believes that advertising that results in an entity's acquiring or increasing probable future economic benefits meets the definition of an as-

set. However, for most advertising, those benefits cannot be measured with the degree of reliability required to report an asset in the financial statements. AcSEC believes that direct-response advertising that meets certain criteria is the only advertising that may result in benefits that can be measured with the degree of reliability required to report an asset in the financial statements after the first time the advertising takes place.

### **Recognition Criteria**

.62 FASB Concepts Statement No. 5, paragraph 63, sets forth the criteria of definition, measurability, relevance, and reliability that should be met to report an item in the financial statements.

### **Definition of an Asset**

.63 Paragraph 25 of Concepts Statement No. 6 states that “assets are probable future economic benefits obtained or controlled by a particular entity as a result of past transactions or events.” Advertising can create assets according to that definition, and the costs of such advertising may qualify to be capitalized.

.64 The probable future benefits are probable future revenues arising from direct-response advertising in excess of the future costs to be incurred in realizing those revenues. Those assets are deferrals, within the meaning of paragraph 141 of Concepts Statement No. 6, resulting from current cash payments or their equivalent. Recognition in income of the costs of such assets is deferred until the future economic benefits underlying the assets are partly or wholly realized or lost.

.65 Historical patterns of responses to the direct-response advertising or contracts that are enforced generally are evidence that the reporting entity obtains the benefits and can control others’ access to them.

### **Measurability**

.66 The probable future revenues that will result from direct-response advertising that meets the conditions for capitalization under this SOP can be measured with the degree of reliability necessary to report the costs to obtain them as an asset in financial statements. The list of attributes in paragraph 67 of Concepts Statement No. 5 includes historical cost, net realizable value, and present value of future cash flows.

### **Relevance**

.67 FASB Concepts Statement No. 1, *Objectives of Financial Reporting by Business Enterprises*, paragraphs 34 to 40, states that financial reporting should provide information that is useful in making rational economic decisions. That includes information helpful to users in assessing the amounts, timing, and uncertainties of prospective net cash inflows, information about the economic resources of an enterprise, and information about the effects of transactions and circumstances that change resources. Information about the future revenues that will result from direct-response advertising and the costs incurred are relevant because they provide such information.

### **Reliability**

.68 Paragraph 75 of Concepts Statement No. 5 states that to be reliable, information must be “representationally faithful, verifiable, and neutral.” Paragraph 77 amplifies that statement:

Unavailability or unreliability of information may delay recognition of an item, but waiting for virtually complete reliability or minimum cost may make the

information so untimely that it loses its relevance. At some intermediate point, uncertainty may be reduced at a justifiable cost to a level tolerable in view of the perceived relevance of the information. If other criteria are also met, that is the appropriate point for recognition. Thus, recognition may sometimes involve a trade-off between relevance and reliability.

.69 There is a broad spectrum of advertising activities and circumstances in which they are undertaken. AcSEC believes that many kinds of advertising activities may result in assets that meet the recognition criteria of definition, measurability, and relevance. However, AcSEC believes that only certain direct-response advertising can meet the recognition criteria of reliability after the first time the advertising takes place. AcSEC believes advertising other than direct-response advertising would not result in assets that are measurable with the degree of reliability required to report an asset in the financial statements after the first time the advertising takes place.

### **Specificity of Conditions That Must Be Met in Order to Report the Probable Future Benefits of Direct-Response Advertising as Assets**

.70 The conditions in this SOP that must be met in order to report the costs of direct-response advertising as assets beyond the first time the advertising takes place require reliable information. Those conditions are narrow because it is generally difficult to determine the probable future benefits of advertising with the degree of reliability sufficient to report the results of the advertising as assets.

.71 AcSEC considered providing guidance that would require or prohibit capitalization based on the use of econometric models, scanner studies, or other forms of data gathering as evidence that advertising leads to a response resulting in future benefits. Such forms of data gathering generally are designed to isolate the effects of all factors affecting revenue, such as advertising, price, and season, to estimate the effects of advertising on sales. AcSEC concluded that the SOP should prohibit capitalization of advertising based on the use of such information as evidence, because the effects of factors other than advertising on the production of revenue probably would not be measurable with the degree of reliability required to rely on such models.

### **Period and Extent of Expected Future Benefits**

.72 The response to advertising usually occurs shortly after the advertising takes place, but in mail-order catalogue advertising, for example, it can take place over a longer period.

.73 AcSEC considered providing guidance that would either permit or prohibit reporting the costs of direct-response advertising as assets based on the inclusion of future revenues from renewals or repeat sales. Reporting entities with an established operating history, such as certain entities in subscription businesses, may be able to measure such amounts with the required degree of reliability and, if so, should report assets based on renewal amounts. The reporting entity must exercise judgment about (a) the existence of the degree of reliability required to determine the probability of renewals and (b) whether those renewals result from the direct-response advertising being accounted for. In order to conclude that the renewals result from the direct-response advertising being accounted for, the renewals must not result from significant direct-response advertising that took place subsequent to the

direct-response advertising being accounted for. (As discussed in paragraph .28, each significant advertising effort establishes a separate stand-alone cost pool.) Examples of situations in which that required degree of reliability may exist, without significant direct-response advertising subsequent to the direct-response advertising being accounted for, include the following:

- The sale of subscriptions may be offered only through direct-response advertising. The entity may have objective evidence that, historically, a quantifiable percentage of subscriptions is renewed at the end of each subscription period without a significant advertising effort. After the subscription is purchased, in what is deemed to be an insignificant advertising effort, renewal subscriptions are offered for sale by mailing a renewal card to those who have subscriptions that will lapse soon. The amount of direct-response advertising reported as assets and amortized in future periods ordinarily would be based on the expected total revenue to be realized over both the initial and the renewal subscription periods.
- A series of products, such as pieces in a chess set, may be offered for sale only through direct-response advertising. After the first piece is purchased, the remaining pieces are offered for sale by mailing a response card to those who purchased the first piece in what is deemed to be an insignificant advertising effort. The entity may have objective evidence that, historically, each customer who buys the first piece will buy a quantifiable percentage of the remaining pieces. If each of the pieces is bought separately, the amount of direct-response advertising reported as assets and amortized in future periods ordinarily would be based on total revenue from all sales, including estimated future sales.

If significant marketing efforts are required to generate subsequent revenues through renewal or repeat sales, those subsequent revenues would not qualify as revenues resulting from the direct-response advertising that resulted in the initial sale and initial stand-alone cost pool. For example, in the previous bulleted item, if a pamphlet describing the chess set, its monetary and aesthetic value, and the history of the game of chess is sent to those who purchased the first piece, the amount of direct-response advertising reported as assets and amortized in future periods would be based on sales of the first piece rather than on the total of all sales including estimated future sales. However, subsequent direct-response advertising may result in the capitalization of the costs of that subsequent advertising, with its costs accumulated in a stand-alone cost pool, if the conditions for capitalization in this SOP are met.

.74 AcSEC concluded that it should not arbitrarily limit the period over which the direct-response advertising should be amortized. However, AcSEC believes that the reliability of accounting estimates decreases as the length of the period for which such estimates are made increases. Therefore, the period over which the benefits of direct-response advertising are amortized often is no longer than the greater of one year or one operating cycle. However, under certain circumstances, such as those discussed in paragraph .72, an entity may be able to demonstrate that the duration of the probable future benefits is greater than the longer of one year or one operating cycle.

### **Assets Should Be Reported Based on the Costs of the Advertising Directed to All Prospective Customers**

.75 Paragraph .40 of this SOP states, in part, that the "... cost of the direct-response advertising directed to all prospective customers, not only the

cost related to the portion of the potential customers that is expected to respond to the advertising, should be used to measure the amounts of such reported assets." Some believe that guidance to be inconsistent with guidance in other pronouncements issued by the FASB (such as FASB Statement Nos. 19 and 91) that require costs to be capitalized based on the portion of the costs expected to result in successful efforts. Other FASB pronouncements, such as FASB Statement No. 53, permit capitalization of advertising based on the cost of advertising directed to all potential customers.

.76 AcSEC compared and contrasted the guidance in this SOP with the guidance in FASB Statement Nos. 19 and 91. AcSEC concluded that, in general, any comparison of the guidance in Statement Nos. 19 and 91 should consider the differences in the kinds of activities addressed by those Statements and this SOP. In the extractive industries, drilling an oil well in a location without proven reserves can be viewed as a discrete effort; in financial industries, making or acquiring a loan can be viewed as a discrete effort. However, few would view an individual unit of advertising, such as one piece of advertising mailed as part of a direct-response advertising campaign, as a discrete effort. The entire mailing, not merely an individual piece of mail, constitutes the effort, and the advertiser evaluates the success of the advertising based on the response to the entire advertising effort, not on the response to one component of that effort.

.77 AcSEC believes the arguments supporting successful-effort accounting for exploration activities in the oil and gas industry are based on the inability to demonstrate, on an individual company basis, a direct cause-and-effect relationship between unsuccessful acquisition and exploration costs and revenues derived from successful activities in unrelated geological areas. For the kinds of activities capitalized under the guidance in this SOP, there is a reliable and demonstrated relationship between total costs and future benefits that is a direct result of incurring those costs. For example, reporting entities capitalizing advertising in conformity with this SOP would have reliable evidence that they must, for example, send out 1 million pieces of direct-mail advertising in order to get 10 thousand responses. The cost of obtaining those 10 thousand responses is the cost of sending out the million pieces of mail. The effort is the million pieces mailed, and documented operating history enables those reporting entities to make reliable predictions about the relationship between the total number of pieces of advertising mailed and the total future revenues obtained.

### **Acquisition Cost of the Assets**

.78 AcSEC used FASB Statement Nos. 19 and 91 as a basis for determining the kinds of costs of direct-response advertising that result in assets that should be included in the acquisition cost of the assets. AcSEC believes that some activities, such as allocated overhead, may result in assets, but it excluded such costs because measurements of the amounts that should be allocated to advertising are too imprecise. The costs of materials bought from a supplier in the production of advertising materials should be reported as costs of assets from direct-response advertising if those materials can be directly attributed to specific direct-response advertising. An example of such costs and activities is the cost of paper bought from a third party used to produce catalogues.

### **Amortization**

.79 APB Opinion 17, paragraph 32, states that intangible assets should be amortized using the straight-line method, unless a company demonstrates

that another systematic method is more appropriate. AcSEC used FASB Statement No. 86 as a basis for determining the amortization method because it believes the method used in that Statement generally is more appropriate. AcSEC does not require straight-line amortization, because the benefits of advertising sometimes are greater or less in future periods than in current periods. AcSEC believes amortization should match the costs of obtaining the future benefits with those benefits.

.80 In calculating the amortization of the amounts reported as assets resulting from direct-response advertising, the amounts in the calculation should not be discounted to net present value. The FASB currently is studying discounting. Under current generally accepted accounting principles (GAAP), assets resulting from direct-response advertising are nonmonetary assets, and nonmonetary assets generally are not discounted. Further, the effect of discounting generally would not be material, because the amortization period usually would be short.

## Appendix

### Other Financial Reporting Literature

The following sets forth relevant portions of authoritative and other financial reporting literature that was considered by AcSEC in its deliberation of financial reporting on advertising activities.

As discussed in paragraph .06 of this SOP, the guidance in this SOP does not apply to transactions for which pronouncements in category (a) in paragraph 10 of SAS No. 69 provide guidance.

### Guidance Included in Category (a) in Paragraph 10 of SAS No. 69

#### APB Opinion 17

APB Opinion 17, *Intangible Assets*, paragraph 24, states the following:

... [A] company should record as assets the costs of intangible assets acquired from other enterprises or individuals. Costs of developing, maintaining, or restoring intangible assets which are not specifically identifiable, have indeterminate lives, or are inherent in a continuing business and related to an enterprise as a whole—such as goodwill—should be deducted from income when incurred.

However, paragraph 28 states that “a reasonable estimate of the useful life may often be based on upper and lower limits even though a fixed existence is not determinable.”

#### APB Opinion 28

APB Opinion 28, *Interim Financial Reporting*, paragraph 15(a), states the following:

Costs and expenses other than product costs should be charged to income in interim periods as incurred, or be allocated among interim periods based on an estimate of time expired, benefit received or activity associated with the periods. Procedures adopted for assigning specific cost and expense items to an interim period should be consistent with the bases followed by the company in reporting results of operations at annual reporting dates. However, when a specific cost or expense item charged to expense for annual reporting purposes benefits more than one interim period, the cost or expense item may be allocated to those interim periods.

Paragraph 16(d) states the following:

Advertising costs may be deferred within a fiscal year if the benefits of an expenditure made clearly extend beyond the interim period in which the expenditure is made. Advertising costs may be accrued and assigned to interim periods in relation to sales prior to the time the service is received if the advertising program is clearly implicit in the sales arrangement.

#### FASB Statement No. 2

FASB Statement No. 2, *Accounting for Research and Development Costs*, provides no specific guidance on the financial reporting treatment of advertising but does include a discussion from which parallels can be drawn. Appendix B, “Basis for Conclusions,” includes uncertainty of probable future benefits, lack of causal relationship between expenditures and benefits, and measurabil-

ity of probable future economic benefits as bases for the FASB's conclusion that the costs of research and development should be reported as expenses when incurred and, in effect, that the benefits of that activity should not be reported as assets. The FASB considered the concept of selective reporting of assets for those activities, which would involve establishing conditions that would have to be met before the benefits of research and development could be reported as assets. However, because the factors on which such conditions might be based could not be objectively and comparably applied by all enterprises, the FASB rejected this concept for research and development activities.

The Statement, in paragraph 11, includes both internal and external costs among the costs to be identified with research and development activities.

### **FASB Statement No. 13**

FASB Statement No. 13, *Accounting for Leases*, as amended by FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*, paragraph 24, states that "initial direct costs shall not include costs related to activities performed by the lessor for advertising [and] soliciting potential lessees . . ." and therefore requires that the costs of advertising, as they pertain to leases, be reported as expenses when incurred.

### **FASB Statement No. 19**

FASB Statement No. 19, *Financial Accounting and Reporting by Oil and Gas Producing Companies*, is discussed in the "Discussion of Conclusions and Implementation Guidance" section of this SOP.

### **FASB Statement No. 51**

FASB Statement No. 51, *Financial Reporting by Cable Television Companies*, appendix A, paragraph 17, states that "direct selling costs include . . . local advertising targeted for acquisition of new subscribers . . ." and requires that they be reported as expenses when incurred, but initial hookup revenue may be recognized to the extent such costs are incurred.

### **FASB Statement No. 53**

FASB Statement No. 53, *Financial Reporting by Producers and Distributors of Motion Picture Films*, requires in paragraph 15 that the probable future economic benefits of exploitation activities, including prerelease and early-release advertising of films in both primary and secondary markets that probably will benefit the film in future markets, be reported as film inventory at cost and amortized based on the ratio that gross revenues from the film for the current period bear to total anticipated gross revenues from the film during its useful life. The costs of local advertising that is "not clearly expected to benefit the film in future markets . . . shall be charged to expense in the period incurred."

### **FASB Statement No. 60**

FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, requires in paragraph 29 that the probable future economic benefits of policy acquisition activities be reported as assets at cost and amortized in proportion to premium revenue reported. Appendix A, paragraph 66, defines acquisition costs as—

Costs incurred in the acquisition of new and renewal insurance contracts.  
Acquisition costs include those costs that vary with and are primarily related

to the acquisition of insurance contracts (for example, agent and broker commissions, certain underwriting and policy issue costs, and medical and inspection fees).

The Statement does not discuss whether acquisition activities include advertising activities.

#### **FASB Statement No. 67**

FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, appendix A, paragraph 28, defines the following terms:

##### *Costs Incurred to Rent Real Estate Projects*

Examples of such costs include costs of model units and their furnishings, rental facilities, semipermanent signs, rental brochures, advertising, "grand openings," and rental overhead including rental salaries.

##### *Costs Incurred to Sell Real Estate Projects*

Examples of such costs include costs of model units and their furnishings, sales facilities, sales brochures, legal fees for preparation of prospectuses, semipermanent signs, advertising, "grand openings," and sales overhead including sales salaries.

The probable future economic benefits of activities undertaken to sell real estate projects are reported as assets at cost if their costs are realizable from the sale of the project and are incurred for tangible assets that are used throughout the selling period to help sell the project. Paragraph 19 states that "capitalized selling costs shall be charged to expense in the period in which the related revenue is recognized as earned."

Paragraphs 20 and 21 state:

If costs incurred to rent real estate projects, other than initial direct costs, under operating leases are related to and their recovery is reasonably expected from future rental operations, they shall be capitalized. Examples of such costs are costs of model units and their furnishings, rental facilities, semipermanent signs, "grand openings," and unused rental brochures. Costs that do not meet the criteria for capitalization shall be expensed as incurred, for example, rental overhead.

Capitalized rental costs directly related to revenue from a specific operating lease shall be amortized over the lease term. Capitalized rental costs not directly related to revenue from a specific operating lease shall be amortized over the period of expected benefit. The amortization period shall begin when the project is substantially completed and held available for occupancy. Estimated unrecoverable amounts of unamortized capitalized rental costs associated with a lease or group of leases shall be charged to expense when it becomes probable that the lease(s) will be terminated. [Footnote reference omitted.]

#### **FASB Statement No. 86**

FASB Statement No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*, provides no specific guidance on reporting on advertising, but it does provide guidance from which parallels can be drawn. Under the Statement, all costs incurred internally to create computer software products are reported as expenses when incurred until technological feasibility has been established for the products. For certain production costs of specific activities whose probable future benefits are reported as assets, paragraph 8 states:

The annual amortization shall be the greater of the amount computed using  
(a) the ratio that current gross revenues for a product bear to the total of current

and anticipated future gross revenues for that product or (b) the straight-line method over the remaining estimated economic life of the product including the period being reported on.

The unamortized amount of assets reported is compared to their net realizable value at the reporting date and is written down to the extent that it exceeds the net realizable value.

### **FASB Statement No. 91**

FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*, requires the probable future economic benefits of direct loan origination activities to be reported as assets at cost, which should be amortized over the lives of the loans with the amortization reported as yield adjustments. Paragraph 6 states that "direct loan origination costs of a completed loan shall include only (a) incremental direct costs of loan origination incurred in transactions with independent third parties for that loan and (b) certain costs directly related to specified activities performed by the lender for that loan." Those specified activities do not include advertising or marketing. Paragraph 7 states that "all other lending-related costs, including costs related to activities performed by the lender for advertising [and] soliciting potential borrowers . . . shall be charged to expense as incurred."

### **Guidance That Is Not Included in Category (a) of Paragraph 10 of SAS No. 69 but That Is Not Affected by This SOP**

#### **Industry Audit Guide *Audits of Stock Life Insurance Companies***

Paragraphs 8.27 to 8.30 of the AICPA Industry Audit Guide *Audits of Stock Life Insurance Companies* state that acquisition expenses should be deferred only if the expense both varies with and is primarily related to the production of new business. Paragraph 8.30 of the guide states that advertising activities are acquisition activities.

Advertising activities that are policy acquisition activities should continue to be accounted for in conformity with the guidance in FASB Statement No. 60 and *Audits of Stock Life Insurance Companies*.

#### **Audit and Accounting Guide *Audits of Property and Liability Insurance Companies***

Paragraphs 3.34 and 8.13 of the AICPA Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* state that acquisition costs that vary with and are primarily related to the acquisition of new and renewal business should be capitalized as deferred acquisition costs. The guide does not state whether advertising activities are acquisition activities.

Advertising activities that are policy acquisition activities should continue to be accounted for in conformity with the guidance in FASB Statement No. 60 and *Audits of Property and Liability Insurance Companies*.

### **FASB Technical Bulletin No. 90-1**

FASB Technical Bulletin No. 90-1, *Accounting for Separately Priced Extended Warranty and Product Maintenance Contracts*, discusses advertising costs incurred in connection with acquiring extended warranty and product maintenance contracts. Paragraph 4 states the following:

Costs that are directly related to the acquisition of a contract and that would have not been incurred but for the acquisition of that contract (incremental di-

rect acquisition costs) should be deferred and charged to expense in proportion to the revenue recognized. All other costs, such as . . . advertising expenses . . . should be charged to expense as incurred.

## **Guidance That Is Not Included in Category (a) of Paragraph 10 of SAS No. 69 That Is Amended by This SOP**

### **SOP 88-1**

AICPA SOP 88-1, *Accounting for Developmental and Preoperating Costs, Purchases and Exchanges of Take-off and Landing Slots, and Airframe Modifications*, paragraphs 19 to 24 [section 10,430.19–24], amends *Audits of Airlines* by recommending that the probable future economic benefits of developmental activities not be reported as assets, “because of the current deregulated environment and the uncertainty regarding the recoverability” of the costs of such activities. The SOP states that the basis for the conclusion in the guide was that the airline industry operated in a regulated environment and “the expected future benefit and recoverability of such costs was generally not in doubt . . . . Route expansion or alteration has become a recurring activity among the airlines, and any related cost is considered a normal and recurring cost of conducting business.”

Paragraph 51 of this SOP discusses amendments to SOP 88-1 [section 10,430.51].

### **SOP 89-5**

Paragraphs 50 to 54 of SOP 89-5, *Financial Accounting and Reporting by Providers of Prepaid Health Care Services*, discuss accounting for contract acquisition costs. Paragraph 51 lists advertising as one kind of contract acquisition cost. Paragraph 54 states that “. . . acquisition costs of providers of prepaid health care services should be expensed as incurred.”

Paragraph 52 of this SOP discusses amendments to SOP 89-5.

### **SOP 90-8**

Paragraph 65 of SOP 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities*, states the following:

Costs of acquiring initial continuing-care contracts that are expected to be recovered from future contract revenues should be capitalized. These costs should be amortized to expense on a straight-line basis over the average expected remaining lives of the residents under contract or the contract term, if shorter. Costs of acquiring continuing-care contracts after a CCRC [continuing-care retirement community] is substantially occupied or one year following completion should be expensed when incurred.

Paragraph 15 states that advertising is not a cost of acquiring an initial continuing-care contract.

Some believe that SOP 90-8 includes no guidance for reporting the costs of advertising activities. Others believe that the exclusion of advertising activities from the definition of the costs of acquiring an initial continuing-care contract is a prohibition against capitalizing advertising under the guidance in paragraph 63.

Paragraph 53 of this SOP discusses amendments to SOP 90-8.

## Section 10,610

# Statement of Position 94-3 Reporting of Related Entities by Not-for-Profit Organizations

September 2, 1994

### NOTE

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## Introduction

.01 The purpose of this statement of position (SOP) is to provide guidance to users and preparers of not-for-profit organizations' financial statements that will produce greater uniformity and comparability in the reporting of investments in majority-owned for-profit subsidiaries, investments in less than 50-percent-owned for-profit entities, and related but separate not-for-profit organizations. This SOP does not address how to prepare consolidated financial statements,<sup>1</sup> nor does it address all the conceptual issues underlying the reporting of relationships not evidenced by ownership.<sup>2</sup>

## Scope

.02 This SOP—

- Amends and makes uniform the guidance concerning the reporting of related entities in the following AICPA publications:

<sup>1</sup> Consolidation of a parent and subsidiary organizations requires the presentation of a single set of amounts for the entire reporting entity. Combination, as discussed in paragraphs 22 and 23 of Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements*, refers to financial statements prepared for organizations among which common control exists but for which the parent-subsidiary relationship does not exist. Both consolidation and combination require elimination of interorganization transactions and balances. This SOP provides no guidance concerning commonly controlled not-for-profit organizations.

<sup>2</sup> As discussed in appendix C [paragraph .18], the Financial Accounting Standards Board (FASB) has on its agenda a project on consolidations and related matters. One of the phases of that project concerns financial reporting guidance for not-for-profit entities.

- Industry Audit Guides *Audits of Voluntary Health and Welfare Organizations* and *Audits of Colleges and Universities*
- Audit and Accounting Guide *Audits of Certain Nonprofit Organizations*
- SOP 78-10, *Accounting Principles and Reporting Practices for Certain Nonprofit Organizations*<sup>3</sup>
- Does not apply to entities or activities that are covered by the AICPA Audit and Accounting Guide *Audits of Providers of Health Care Services*

## Conclusions

.03 This SOP provides guidance for reporting (a) investments in for-profit majority-owned subsidiaries, (b) investments in common stock of for-profit entities wherein the not-for-profit organization has a 50 percent or less voting interest, and (c) financially interrelated not-for-profit organizations.

.04 Whether the financial statements of a reporting not-for-profit organization and those of one or more other entities should be consolidated, whether those other entities should be reported using the equity method, and the extent of the disclosure that should be required, if any, should be based on the nature of the relationships between the entities.

## Investments in For-Profit Majority-Owned Subsidiaries

.05 Not-for-profit organizations with a controlling financial interest in a for-profit entity through direct or indirect ownership of a majority voting interest in that entity should follow the guidance in ARB 51, as amended by FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, in determining whether the financial position, results of operations, and cash flows of the for-profit entity should be included in the not-for-profit organization's financial statements.

## Investments in Common Stock of For-Profit Entities Wherein the Not-for-Profit Organization Has a 50 Percent or Less Voting Interest

.06 Investments in common stock of for-profit entities wherein the not-for-profit organization has 50 percent or less of the voting stock in the investee should be reported under the equity method in conformity with Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, if the guidance in that Opinion requires use of the equity method, subject to the exception in paragraph .07 of this SOP. Also, not-for-profit organizations should make the financial statement disclosures required by APB Opinion 18 if the guidance in that Opinion requires them.

.07 Some AICPA audit guides applicable to some not-for-profit organizations permit investment portfolios to be reported at market value. Not-for-profit organizations that choose to report investment portfolios at market value in conformity with the AICPA audit guides may do so instead of applying the equity method to investments covered by paragraph .06 of this SOP.

---

<sup>3</sup> SOP 78-10 has no effective date. This SOP amends, but does not affect the status of, SOP 78-10.

## Financially Interrelated Not-for-Profit Organizations

.08 Not-for-profit organizations may be related to one or more other not-for-profit organizations in numerous ways, including ownership, *control*,<sup>4</sup> and *economic interest*.

.09 As discussed in paragraphs .10–.13, the various kinds and combinations of control and economic interest result in various financial reporting. Certain kinds of control result in consolidation (paragraph .10). Other kinds of control result in consolidation only if coupled with an economic interest (paragraph .11). Still other kinds of control result in consolidation being permitted but not required if coupled with an economic interest (paragraph .12). The existence of control or an economic interest, but not both, is discussed in paragraph .13.

.10 Not-for-profit organizations with a controlling financial interest in another not-for-profit organization through direct or indirect ownership of a majority voting interest in that other not-for-profit organization should consolidate that other organization, unless control is likely to be temporary or does not rest with the majority owner, in which case consolidation is prohibited, as discussed in paragraph 13 of FASB Statement No. 94.

.11 In the case of (a) control through a majority ownership interest<sup>5</sup> by other than ownership of a majority voting interest, as discussed in paragraph .10, or control through a *majority voting interest in the board of the other entity* and (b) an economic interest in other such organizations, consolidation is required, unless control is likely to be temporary or does not rest with the majority owner, in which case consolidation is prohibited, as discussed in paragraph 13 of FASB Statement No. 94.<sup>6</sup>

.12 Control of a separate not-for-profit organization in which the reporting organization has an economic interest may take forms other than majority ownership or voting interest; for example, control may be through contract or affiliation agreement. In circumstances such as these, consolidation is permitted but not required, unless control is likely to be temporary, in which case consolidation is prohibited, as discussed in paragraph 13 of FASB Statement No. 94. If the reporting organization controls a separate not-for-profit organization through a form other than majority ownership or voting interest and has an economic interest in that other organization, and consolidated financial statements are not presented, the notes to the financial statements should include the following disclosures:

- Identification of the other organization and the nature of its relationship with the reporting organization that results in control

---

<sup>4</sup> Words or terms defined in the Glossary [paragraph .20] are in italicized type the first time they appear in this SOP.

<sup>5</sup> Ownership of not-for-profit organizations may be evidenced in various ways because not-for-profit organizations may exist in various legal forms, such as corporations issuing stock, corporations issuing ownership certificates, membership corporations issuing membership certificates, joint ventures, and partnerships, among other forms.

<sup>6</sup> Interests by not-for-profit organizations in other not-for-profit organizations may be less than complete interests. For example, a not-for-profit organization may appoint 80 percent of the board of the other not-for-profit organization. If the conditions for consolidation in this SOP are met, the basis of that consolidation would not reflect a minority interest for the portion of the board that the reporting not-for-profit organization does not control, because there is no ownership interest other than the interest of the reporting not-for-profit organization. However, some not-for-profit organizations may enter into agreements with other entities, such as sharing revenue from fund-raising campaigns, resulting in liabilities to those other entities. In such circumstances, those liabilities should be reported.

- Summarized financial data of the other organization including—
  - Total assets, liabilities, net assets, revenue, and expenses
  - Resources that are held for the benefit of the reporting organization or that are under its control
- The disclosures set forth in FASB Statement No. 57, *Related Party Disclosures*

.13 In the case of control and an economic interest, the presentation of consolidated financial statements, as discussed in paragraph .11, or the disclosures, as discussed in paragraph .12, are required. The existence of control or an economic interest, but not both, precludes consolidation, except as stated in the next sentence, but requires the disclosures set forth in FASB Statement No. 57.<sup>7</sup> Entities that otherwise would be prohibited from presenting consolidated financial statements under the provisions of this SOP, but that currently present consolidated financial statements in conformity with the guidance in SOP 78-10, may continue to do so.

.14 If consolidated financial statements are presented, they should disclose any restrictions made by entities outside of the reporting entity on distributions from the controlled not-for-profit organization to the reporting organization and any resulting unavailability of the net assets of the controlled not-for-profit organization for use by the reporting organization.

## Effective Date and Transition

.15 This SOP is effective for financial statements issued for fiscal years beginning after December 15, 1994, except for not-for-profit organizations that have less than \$5 million in total assets and less than \$1 million in annual expenses. For those organizations, the effective date shall be for fiscal years beginning after December 15, 1995. Earlier application is permitted. For organizations that adopt FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*, prior to its effective date, earlier application of this SOP is encouraged. Comparative financial statements for earlier periods included with those for the period in which this SOP is adopted should be restated.

---

<sup>7</sup> The existence of an economic interest does not necessarily cause the entities to be related parties, as defined in FASB Statement No. 57. However, the disclosures required by that Statement also are required under this SOP if an economic interest exists.

## Appendix A

### Background Information and Discussion of Conclusions

A-1. This section discusses considerations that were deemed significant by members of AcSEC in reaching the conclusions in this SOP. It includes reasons for accepting certain views and rejecting others. Individual AcSEC members gave greater weight to some factors than to others.

### Background

#### *Characteristics and Objectives of Financial Reporting*

A-2. FASB Statement of Financial Accounting Concepts No. 4, *Objectives of Financial Reporting by Nonbusiness Organizations*, states, among other things, that financial reporting by not-for-profit organizations should provide information—

... that is useful to ... resource providers ... in making rational decisions about the allocation of resources to those organizations. (paragraph 35)

and that is

... about the economic resources, obligations, and net resources of an organization and the effects of transactions ... that change resources and interests in those resources. (paragraph 43)

A-3. FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, as amended by FASB Concepts Statement No. 6, *Elements of Financial Statements*, examines the characteristics that make accounting information useful. The Statement sets forth a hierarchy of qualities, with usefulness for decision making being most important. The two primary characteristics that make accounting information useful are relevance and reliability. Comparability, which includes consistency, interacts with relevance and reliability to increase the usefulness of information.

A-4. Information about the nature of relationships and forms of control among not-for-profit organizations and between not-for-profit organizations and for-profit entities should contribute to the objectives set forth in FASB Concepts Statement No. 4, as well as meet the criteria for accounting information set forth in Concepts Statement No. 2. As indicated in paragraphs A-11 and A-12 of this SOP, the information currently presented in not-for-profit organizations' financial statements may not meet the objectives set forth in Concepts Statement No. 4.

A-5. Related but separate not-for-profit organizations and for-profit entities result from the following:

- a. The decision of not-for-profit organizations to structure their operations in a manner that helps them achieve their mission
- b. Investments by not-for-profit organizations in for-profit entities

#### *Structure of Not-for-Profit Organizations*

A-6. Not-for-profit organizations conduct their operations through a variety of organizational structures. *The Not-For-Profit Organization Reporting Entity* (the Holder Report), a 1986 research report by William W. Holder, identifies three basic kinds of organizational structure:

- a. *Simple structures*, consisting of a single entity that conducts all operations and activities of the organization
- b. *Separate entities*, conducting individual program activities
- c. *Single entity and separate entities*, conducting, respectively, program activities and support and other noncentral activities, such as fund-raising

### **Relationship of Separate Entities to Each Other**

A-7. The Holder Report, as well as other studies, identified a variety of relationships that could indicate that the resources and activities of an entity are controlled by another entity. Among the most widespread are the following:

- *Ownership*—One entity is the legal owner of another entity, either through stock ownership or some other means, such as membership in a membership corporation.
- *Board membership*—(a) One entity has the ability to appoint or elect a voting majority of the board of directors of another entity or (b) a voting majority of one entity's board, as a result of its charter or bylaws, is also a voting majority of the board of another entity.
- *Charter or bylaws*—The corporate charter or bylaws of an entity limits its activities to those that are beneficial to another entity.
- *Oversight relationship*—A national charter establishes conditions, such as financial relationships or an accreditation process, for a separate entity's use of a national name or participation in the activities of a national organization.
- *Contract*—The relationship between separate entities is spelled out in a written contract.

### **Factors Influencing Relationships of Separate Entities to Each Other**

A-8. According to the Holder Report, the most common reasons for establishing separate entities are the following:

- *Taxes*—To ensure the income tax deductibility of contributions by donors and to avoid problems of unrelated business income for taxation purposes
- *Legal*—To limit legal liability; protect funding sources; and avoid laws, rules, and regulations perceived to be overly restrictive
- *Organization*—To establish clear-cut organizational limits of authority and autonomy for various activities
- *Public identity*—To create a separate, distinct public identity for the specific activity in question

Generally, entities that are established for these reasons are not-for-profit organizations; however, they also may be for-profit entities, principally for tax reasons.

### **Not-for-Profit Organization Investment Portfolio Relationships**

A-9. Not-for-profit organizations' investment portfolios may include ownership interests in for-profit entities. Such investments generally are made to earn returns on assets rather than to conduct operating activities and frequently are held for long-term investment purposes. Some not-for-profit organizations holding such investments own more than 20 percent interests in these for-profit organizations; for example—

- A federated fund-raising organization may hold a majority interest in an oil company.
- A not-for-profit organization's endowment fund may include controlling interests in shopping malls, commercial buildings, and venture capital funds.

Current practice for reporting such investments is diverse, including cost, lower of cost or market, fair market value, and the equity method. Such investments generally are not reported by consolidating their financial statements with the financial statements of the reporting not-for-profit organizations.

### **Current Authoritative Literature**

**A-10.** Current authoritative literature on reporting the resources and activities of related entities of which one or more is a not-for-profit organization is inconsistent. Two noteworthy instances are the following:

- Appendix B [paragraph .17] discusses the inconsistencies in the AICPA audit and accounting guides and the SOP listed in paragraph .02 of this SOP. Efforts to correct or address these inconsistencies will take a long time, and no immediate guidance is anticipated other than this SOP.
- There has been uncertainty in practice over whether and to what extent certain pronouncements of the FASB—for example, FASB Statement No. 94—apply to not-for-profit organizations. In September 1994, the AICPA Accounting Standards Executive Committee (AcSEC) issued SOP 94-2, *The Application of the Requirements of Accounting Research Bulletins, Opinions of the Accounting Principles Board, and Statements and Interpretations of the Financial Accounting Standards Board to Not-for-Profit Organizations* [section 10,600], which provides that not-for-profit organizations should follow the guidance in effective provisions of ARBs, APB Opinions, and FASB Statements and Interpretations except for specific pronouncements that explicitly exempt not-for-profit organizations.

Appendix C [paragraph .18] summarizes other projects related to this SOP and their current status.

### **Needs of Financial Statement Users**

**A-11.** Because of the variety of organizational structures, the nature of the relationships among separate entities, and the inconsistency of the guidance in the current authoritative accounting literature, the needs of users of not-for-profit organizations' financial reports described in FASB Concepts Statement Nos. 2 and 4 may not be met.

**A-12.** Among the deficiencies noted by creditors, identified in the Holder Report, are the following:

- Relationships with and among affiliated entities and other related parties are not always clear and readily understandable in an organization's financial reports.
- Creditors sometimes are unable to understand the scope of activities and range of entities that make up the reporting entity simply by reading the financial reports.
- Substantially different reporting practices exist for similar economic circumstances.

Among the deficiencies noted by grantors and contributors, also identified in the Holder Report, are the following:

- Reporting for fund-raising and administrative activities sometimes is fragmented into more than one set of financial statements.
- The level of disclosure in financial statements about the kinds of activities conducted and the existence and inclusion of related entities is inadequate. Of specific concern is whether all the resources controlled and all the activities conducted by a not-for-profit organization are included in its financial statements.

### **Reporting and Disclosures**

**A-13.** Relationships between not-for-profit organizations and other entities range from complete control of the other entities by a central organization to a loose association. These relationships have resulted in the following eight financial reporting alternatives:

- a. Consolidation or combination under the guidelines in ARB 51, FASB Statement No. 94, and SOP 78-10
- b. Reporting the investment under the equity method of accounting for investments
- c. Reporting the investment at cost
- d. Reporting the investment at market
- e. Reporting the investment at the lower of cost or market
- f. Disclosures similar to those under the AICPA Audit and Accounting Guide *Audits of Providers of Health Care Services*
- g. Related-party disclosures under the guidelines of FASB Statement No. 57
- h. No reporting or disclosures

### **Consolidation and Combination**

**A-14.** Drawing on ARB 51, FASB Statement No. 94, paragraph 1, states:

The purpose of consolidated statements is to present, primarily for the benefit of the shareholders and creditors of the parent company, the results of operations and the financial position of a parent company and its subsidiaries essentially as if the group were a single company with one or more branches or divisions.

**A-15.** SOP 78-10, which is included in the AICPA Audit and Accounting Guide *Audits of Certain Nonprofit Organizations* and which predates FASB Statement No. 94, states in paragraphs 42 and 43:

For a reporting organization that controls another organization having a compatible purpose, it is presumed that combined or combining financial statements are more meaningful than separate statements and are usually necessary for a fair presentation in conformity with generally accepted accounting principles. *Control* means the direct or indirect ability to determine the direction of the management and policies through ownership, by contract, or otherwise.

The accounting standards division has considered the foregoing definition in relation to the nonprofit organizations covered by this statement of position and has concluded that it may be construed by some to be so broad, considering

the structure of some nonprofit organizations, that presentation of combined financial statements might have relatively little value to users of such combined statements, particularly in relation to the cost of their preparation.

SOP 78-10, paragraph 44, states, in part:

... combined financial statements should be presented if (1) control exists as defined in paragraph 42 and (2) any of the following circumstances exists:

- a. Separate entities solicit funds in the name of and with the expressed or implied approval of the reporting organization, and substantially all of the funds solicited are intended by the contributor or are otherwise required to be transferred to the reporting organization or used at its discretion or direction.
- b. A reporting organization transfers some of its resources to another separate entity whose resources are held for the benefit of the reporting organization.
- c. A reporting organization assigns functions to a controlled entity whose funding is primarily derived from sources other than public contributions.

### ***Equity Method***

A-16. APB Opinion 18 states in paragraph 17:

... the equity method of accounting for an investment in common stock should ... be followed by an investor whose investment in voting stock gives it the ability to exercise significant influence over operating and financial policies of an investee even though the investor holds 50% or less of the voting stock. Ability to exercise that influence may be indicated in several ways, such as representation on the board of directors, participation in policy making processes, material intercompany transactions, interchange of managerial personnel, or technological dependency.

### ***Disclosures***

A-17. Paragraph 13.04 of *Audits of Providers of Health Care Services* suggests presenting "summarized information about the assets, liabilities, results of operations, and changes in fund balances of related organizations" that "describe the nature of the relationships between ... the related organizations."

A-18. FASB Statement No. 57 requires the following disclosures for material related-party transactions:

- The existence and nature of the relationship
- A description of the transactions between the entities, summarized if appropriate, for the period reported on, including amounts, if any, and any other information deemed necessary to an understanding of the effects of those transactions on the reporting organization's financial statements
- The dollar volume of transactions between the entities and the effects of any changes in the method of establishing their terms from the preceding period
- Amounts due from or to the related entities, and, if not otherwise apparent, the terms and manner of settlement

## Discussion of Conclusions

### Scope

**A-19.** Consistent with the May 19, 1993, exposure draft of this SOP, this SOP does not apply to entities that are included in the scope of *Audits of Providers of Health Care Services*. AcSEC considered including those entities in the scope of this SOP but exempted them for practical purposes. The ways those entities are related to each other are evolving and may not be contemplated by this SOP. For example, many of those entities are affiliated based on participation in networks of health care providers, with complex contractual agreements that make it difficult to determine whether control and economic interest exist based on the definitions in this SOP. While AcSEC believes the basic principles in this SOP also may apply to those entities, further study and deliberation are necessary to determine whether this SOP would require clarification for it to be made operational for those entities. Further, AcSEC believes (a) there is a need for guidance now for entities included in the scope of this SOP and (b) including entities covered by *Audits of Providers of Health Care Services* in the scope of this SOP likely would delay its issuance. Accordingly, AcSEC concluded it should exclude entities that are required to follow *Audits of Providers of Health Care Services* from the scope of this SOP. Guidance for reporting related entities for entities covered by *Audits of Providers of Health Care Services* is expected to be included as part of the current project to revise that guide.

### Underlying Principles

**A-20.** The conclusions in this SOP are based on the premise that (a) whether the financial statements of a reporting not-for-profit organization and those of one or more other entities (either a not-for-profit organization or a for-profit entity) should be consolidated and (b) the extent of disclosure that should be required, if any, if consolidated financial statements are not presented should be based on the nature of the relationship between the entities.

### Control

**A-21.** This SOP does not develop new concepts concerning the definition of control. Because the FASB currently has on its agenda a project on consolidations and related matters that may result in a definition of control different from that contained in SOP 78-10, AcSEC concluded that it should not revise the definition of control at this time.

### Relation to Other Guidance

**A-22.** This SOP makes uniform the application of APB Opinion 18 and FASB Statement No. 94 for not-for-profit organizations with the following exception: This SOP permits not-for-profit organizations that otherwise would report their investment portfolios at market value in conformity with guidance in the not-for-profit audit guides to do so instead of adopting the equity method for unconsolidated subsidiaries and 50 percent or less owned entities. AcSEC permitted this exception because it believes uniform guidance will be issued by the FASB on reporting the overall investment activities of not-for-profit organizations as part of the FASB's project on not-for-profit organizations.

**A-23.** The conclusions in this SOP evolve from and consider the conclusions of SOP 78-10 and *Audits of Providers of Health Care Services* to provide uniform

criteria for consolidation. They provide for financial statement disclosures that can be applied objectively and that can curb potential abuses in not reporting (a) the results of separate but related entities established by a not-for-profit organization to raise funds on its own behalf and (b) assets controlled by another not-for-profit organization. (This SOP does not revise *Audits of Providers of Health Care Services*.)

**A-24.** This SOP requires consolidation if there is an economic interest and control by either a majority voting interest in the board of the other entity or the ability to appoint a majority of its board members. Some not-for-profit organizations are related to each other in ways that would meet the definition of control under this SOP. However, in the case of some of the organizations, no such economic interest exists. In circumstances of control other than a controlling financial interest in another not-for-profit organization through direct or indirect ownership of a majority voting interest, this SOP requires the existence of an economic interest for consolidation to be required or permitted. That provision is included in order to preclude the reporting of misleading information about the assets, liabilities, results of operations, and cash flows of the reporting organization.

### ***Economic Interest***

**A-25.** The Glossary [paragraph .20] of this SOP states that “[a]n *economic interest* in another entity exists if (a) the other entity holds or utilizes significant resources that must be used for the unrestricted or restricted purposes of the not-for-profit organization, either directly or indirectly by producing income or providing services, or (b) the reporting organization is responsible for the liabilities of the other organization.” The Glossary [paragraph .20] includes examples of circumstances that result in economic interests, including a reporting organization assigning certain of its functions to another entity. For example, an educational institution assigning its research functions to a research corporation that holds significant resources that must be used for the unrestricted or restricted purposes of the reporting organization, either directly or indirectly, results in an economic interest in that research corporation. Also, an organization may have an economic interest in a lobbying organization if that lobbying organization conducts any of the organization’s lobbying functions and uses significant resources that must be used for the unrestricted or restricted purposes of the reporting organization, either directly or indirectly.

### ***Circumstances Permitting but Not Requiring Consolidation***

**A-26.** Paragraph .12 of this SOP permits but does not require consolidation if the reporting not-for-profit organization controls a separate not-for-profit organization in which it has an economic interest and that control is achieved other than control through—

- a. A controlling financial interest in the other not-for-profit organization through direct or indirect ownership of a majority voting interest or
- b. A majority voting interest in the board of the other entity.

AcSEC considered requiring consolidation in all circumstances in which the reporting not-for-profit organization controls and has an economic interest in another not-for-profit organization. However, AcSEC believes consolidation may not be meaningful in all situations in which there is control and an econo-

mic interest. For example, some national organizations may control local chapters through affiliation agreements and receive funds from those local chapters. In such circumstances, both control and an economic interest exist. However, consolidation may not be meaningful. AcSEC encourages consolidation if—

- a. The reporting not-for-profit organization controls a separate not-for-profit organization in which it has an economic interest and that control is other than control through—
  - i. A controlling financial interest in the other not-for-profit organization through direct or indirect ownership of a majority voting interest or
  - ii. A majority voting interest in the board of the other entity and
- b. Consolidation would be meaningful.

### ***Disclosures***

**A-27.** AcSEC believes the disclosures required by this SOP in circumstances in which control exists by contract, agreement, or otherwise provide financial statement users with information that is more meaningful than the information they now receive under the existing not-for-profit audit guides. The disclosure requirements in this SOP are an interim step until the FASB completes its consolidations and related matters project.

### ***Combined Financial Statements***

**A-28.** This SOP provides guidance concerning consolidated financial statements. As discussed in footnote 1, ARB 51 provides guidance concerning combined financial statements. Paragraph 22 of ARB 51 states that “there are circumstances, however, where combined financial statements (as distinguished from consolidated statements) of commonly controlled companies are likely to be more meaningful than their separate statements.” This SOP prohibits consolidated financial statements in certain circumstances. However, it provides no guidance concerning combined financial statements of commonly controlled not-for-profit organizations, which may be presented, in certain circumstances, in conformity with the guidance in ARB 51.

### ***Parent or Subsidiary-Only Financial Statements***

**A-29.** This SOP provides no guidance concerning parent-entity-only or subsidiary-entity-only financial statements. Paragraph 15 of FASB Statement No. 94 precludes the use of parent-company financial statements for use as the general-purpose financial statements of the primary reporting entity. However, that Statement is silent concerning parent-company financial statements as other than general-purpose financial statements for the primary reporting entity. Generally accepted accounting principles do not preclude the issuance of subsidiary-only financial statements. However, care should be taken to include all disclosures required by FASB Statement No. 57 and other relevant pronouncements.

## Appendix B

### Other Financial Reporting Literature

**B-1.** The following discusses the authoritative and other financial reporting literature that is relevant to AcSEC's consideration of consolidated financial statements involving not-for-profit organizations. All references and discussion pertain to literature as it exists prior to being revised by this SOP. As discussed in paragraph .02, this SOP revises certain AICPA literature.

#### SOP 78-10

**B-2.** SOP 78-10, *Accounting Principles and Reporting Practices for Certain Nonprofit Organizations*, is discussed in paragraph A-15 of this SOP. (As discussed in paragraph .02 of this SOP, this SOP amends SOP 78-10.)

### Audits of Providers of Health Care Services

**B-3.** The AICPA Audit and Accounting Guide *Audits of Providers of Health Care Services*, paragraph 13.02, recommends consolidation or combination of organizations related to health care entities by direct or common ownership in accordance with the provisions of ARB 51. In cases in which related organizations are controlled through means other than direct or common ownership and ARB 51 does not require consolidation, *Audits of Providers of Health Care Services* does not recommend consolidation or combination.

**B-4.** In circumstances in which *Audits of Providers of Health Care Services* does not recommend consolidation or combination, paragraph 13.04 of that guide requires disclosure of certain summarized information concerning the related organizations if control and at least one of the following circumstances exist:

- a. The organization has solicited funds in the name of the health care entity and with the expressed or implied approval of the health care entity, and substantially all the funds solicited by the organization were intended by the contributor, or were otherwise required, to be transferred to the health care entity or used at its discretion or direction.
- b. The health care entity has transferred some of its resources to the organization, and substantially all of the organization's resources are held for the benefit of the health care entity.
- c. The health care entity has assigned certain of its functions (such as the operation of a dormitory) to the organization, which is acting primarily for the benefit of the health care entity.

(As discussed in paragraph .02 of this SOP, this SOP does not amend *Audits of Providers of Health Care Services*.)

### Audits of Colleges and Universities

**B-5.** The AICPA Industry Audit Guide *Audits of Colleges and Universities*, paragraph 11.09, states:

For adequate disclosure, all separately incorporated but related units for which the reporting institution is fiscally responsible, such as university presses, in-

tercollegiate athletics, and research foundations, should be (1) included in the financial statements, (2) adequately disclosed by notes, or (3) presented in separate financial statements accompanied by and cross-referenced in the basic financial statements of the institution.

(As discussed in paragraph .02 of this SOP, this SOP amends *Audits of Colleges and Universities*.)

### **Audits of Voluntary Health and Welfare Organizations**

**B-6.** The AICPA Industry Audit Guide *Audits of Voluntary Health and Welfare Organizations* provides no guidance on whether consolidated financial statements should be presented. However, paragraphs 7.08 and 7.09 provide guidance for determining whether auditors should audit the financial statements of organizations associated with the reporting not-for-profit organization. (As discussed in paragraph .02 of this SOP, this SOP amends *Audits of Voluntary Health and Welfare Organizations*.)

## Appendix C

### Other Projects Related to This SOP

#### FASB Project on Consolidations and Related Matters

C-1. This project is addressing various issues concerning the reporting entity, including those relating specifically to not-for-profit organizations. The FASB issued its September 10, 1991, Discussion Memorandum, *Consolidation Policies and Procedures*. The conclusions in this SOP will be reconsidered when the FASB completes its project on consolidations and related matters, which may affect the definition of control and other related matters.

#### FASB Project on Investments

C-2. This project is addressing various issues concerning investments held by not-for-profit organizations. The project is in the preliminary stages. The conclusions in this SOP will be reconsidered when the FASB completes its project on investments, which may affect the conclusions concerning investments in common stock of for-profit entities wherein the not-for-profit organization has a 50 percent or less voting interest and other related matters.

#### AICPA Project on the Application of the Requirements of Accounting Research Bulletins, Opinions of the Accounting Principles Board, and Statements and Interpretations of the Financial Accounting Standards Board to Not-for-Profit Organizations

C-3. In September 1994, AcSEC issued SOP 94-2, *The Application of the Requirements of Accounting Research Bulletins, Opinions of the Accounting Principles Board, and Statements and Interpretations of the Financial Accounting Standards Board to Not-for-Profit Organizations* [section 10,600], which provides that not-for-profit organizations should follow the guidance in effective provisions of ARBs, APB Opinions, and FASB Statements and Interpretations except for specific pronouncements that explicitly exempt not-for-profit organizations.

#### AICPA Accounting and Audit Guide Revisions

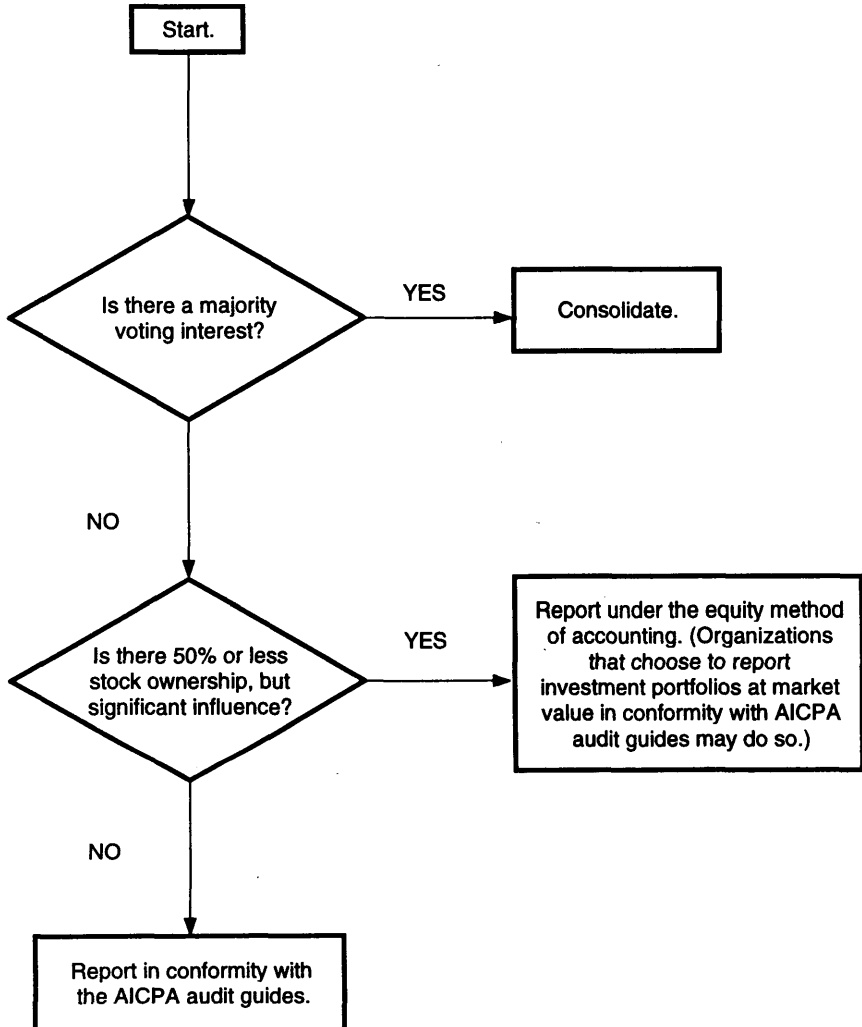

C-4. The AICPA will revise the existing audit and accounting guides for not-for-profit organizations and colleges and universities to reflect the accounting and reporting requirements of FASB Statement Nos. 116, *Accounting for Contributions Received and Contributions Made*, and 117, *Financial Statements of Not-for-Profit Organizations*, among other things.

.19

## Appendix D

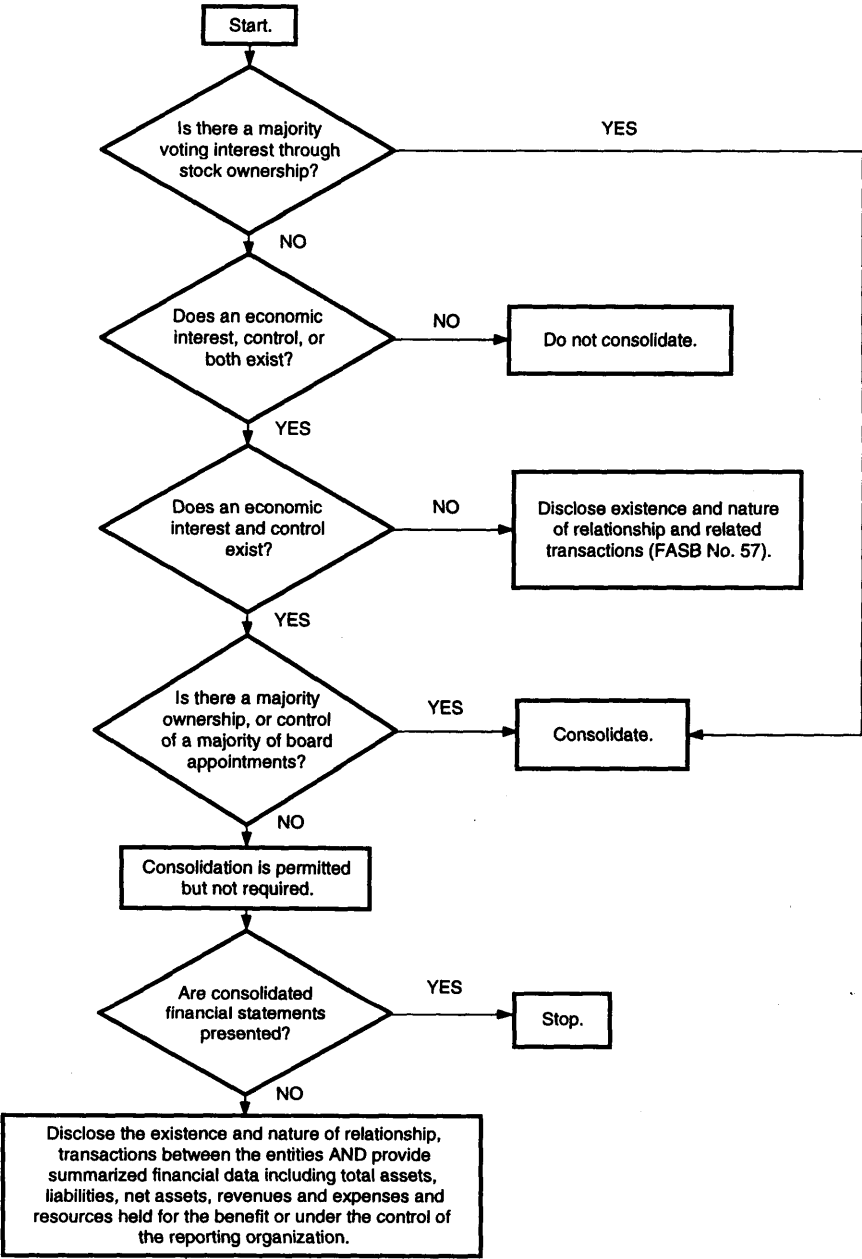

### Flowcharts and Decision Trees<sup>8</sup>

#### Ownership of a For-Profit Entity

<sup>8</sup> The flowcharts and decision trees summarize certain guidance in this SOP and are not intended as substitutes for the SOP.

Relationship With Another Not-for-Profit Organization

## Glossary

**Control.** The direct or indirect ability to determine the direction of management and policies through ownership, contract, or otherwise.

**Economic interest.** An interest in another entity that exists if (a) the other entity holds or utilizes significant resources that must be used for the unrestricted or restricted purposes of the not-for-profit organization, either directly or indirectly by producing income or providing services, or (b) the reporting organization is responsible for the liabilities of the other entity. The following are examples of economic interests:

- Other entities solicit funds in the name of and with the expressed or implied approval of the reporting organization, and substantially all of the funds solicited are intended by the contributor or are otherwise required to be transferred to the reporting organization or used at its discretion or direction.
- A reporting organization transfers significant resources to another entity whose resources are held for the benefit of the reporting organization.
- A reporting organization assigns certain significant functions to another entity.
- A reporting organization provides or is committed to provide funds for another entity or guarantees significant debt of another entity.

**Majority voting interest in the board of another entity.** For purposes of this SOP, a majority voting interest in the board of another entity is illustrated by the following example. Entity B has a five-member board, and a simple voting majority is required to approve board actions. Entity A will have a majority voting interest in the board of entity B if three or more entity A board members, officers, or employees serve on or may be appointed at entity A's discretion to the board of entity B. However, if three of entity A's board members serve on the board of entity B but entity A does not have the ability to require that those members serve on the entity B board, entity A does not have a majority voting interest in the board of entity B.

## Section 10,620

### ***Statement of Position 94-4 Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans***

September 23, 1994

#### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction**

.01 The American Institute of Certified Public Accountants (AICPA) Audit and Accounting Guide *Audits of Employee Benefit Plans* (the Guide) includes standards of financial accounting and reporting for the financial statements of health and welfare benefit plans and defined-contribution pension plans. The Guide states that plan investments are generally to be presented at their fair value at the reporting date. Paragraph 3.15 of the Guide states that "contracts with insurance companies are to be included as plan assets in the manner required by [the Employee Retirement Income Security Act of 1974] ERISA annual reporting requirements and are to be reported in a manner consistent with the requirements of [Department of Labor] DOL Form 5500 or 5500-C/R." Paragraph 4.10 of the Guide and paragraph 26 of AICPA Statement of Position (SOP) 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans* [section 10,530.26], contain similar language. The instructions to DOL Forms 5500 and 5500-C/R permit unallocated insurance contracts to be reported at either fair value or amounts determined by the insurance company, that is, contract value. Currently, "contracts with insurance companies" include investment contracts that do not incorporate mortality or morbidity risk. The Guide specifically excludes contract value reporting for investments in similar contracts issued by banks, savings institutions, or other financial institutions. Contract value generally equals the principal balance plus accrued interest.

.02 The Financial Accounting Standards Board (FASB) has issued Statement of Financial Accounting Standards Statement No. 110, *Reporting by Defined Benefit Pension Plans of Investment Contracts*, which requires defined-benefit pension plans to report investment contracts issued by either an insurance enterprise or other entity at fair value. It amends FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, to permit defined-benefit pension plans to report only contracts that incorporate mortality or morbidity risk at contract value. The FASB decided not to address the measurement of plan assets held by health and welfare benefit plans or defined-contribution pension plans. Instead, the FASB asked the AICPA, in view of its experience with those plans, to address further the appropriate reporting of investments held by those plans.

## Scope

.03 This SOP provides guidance on the reporting of investment and insurance contracts held by health and welfare benefit plans and defined-contribution pension plans. It applies to all health and welfare benefit plans and defined-contribution pension plans. The Appendix [paragraph .20] provides guidance for determining the values of investment contracts held by defined-contribution plans, including both health and welfare, and pension plans; however, certain examples may also be useful in determining the fair value of investment contracts held by other types of plans.

## Conclusions

### Reporting of Contracts

.04 Defined-benefit health and welfare benefit plans should report investment contracts at fair value. Defined-contribution plans, including both health and welfare and pension plans, should report fully benefit-responsive investment contracts at contract value, which may or may not be equal to fair value, and all other investment contracts at fair value. If, however, plan management is aware that an event has occurred that may affect the value of a fully benefit-responsive contract (for example, a decline in the creditworthiness of the contract issuer or third-party guarantor—if different from the contract issuer—or the possibility of premature termination of the contract by the plan), pursuant to FASB Statement No. 5, *Accounting for Contingencies*, disclosure of the event or reporting the investment at less than contract value may be appropriate.

.05 Health and welfare benefit plans and defined-contribution pension plans should report insurance contracts in the same manner required by ERISA annual reporting requirements of DOL Form 5500 or 5500-C/R. For purposes of this SOP, the terms *insurance contract* and *investment contract* are used as those terms are described for accounting purposes in FASB Statements No. 60, *Accounting and Reporting by Insurance Enterprises*, and No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments* (see paragraphs .13 and .14).

## Background

.06 Defined-benefit plans provide participants with a determinable benefit based on a formula provided for in the plans, whereas defined-contribution

plans provide benefits based on amounts contributed to an employee's individual account plus or minus forfeitures, investment experience, and administrative expenses. The Internal Revenue Code (IRC) generally requires that all investment experience under defined-contribution plans be allocated to individual account balances.

.07 Consequently, information relevant to the primary users of defined-contribution plan financial statements—plan participants—is different from that which is relevant to users of defined-benefit plan financial statements. In defined-contribution plans, plan participants have a greater vested interest in monitoring the financial condition and operations of the plan since they bear investment risk under these plans and plan transactions can directly affect their benefits.

.08 The primary objective of a defined-contribution plan's financial statements is to provide information that is useful in assessing the plan's present and future ability to pay benefits when they are due. In a defined-contribution plan, the plan's net assets available to pay benefits equal the sum of participants' individual account balances. Accordingly, benefits that can be paid by the plan when they are due relate to the value of the assets that may currently be made available to the individual participants.

.09 Consistent with the objective of a defined-contribution plan's financial statements, plan assets of defined-contribution plans should be measured and reported at values that are meaningful to financial statement users. Information that is useful to plan participants includes the amount they would receive currently if they were to withdraw or borrow funds from or transfer funds within the plan.

.10 A fully benefit-responsive investment contract (whether with an insurance enterprise or other entity) provides a liquidity guarantee by a financially responsible third party of principal and previously accrued interest for liquidations, transfers, loans, or hardship withdrawals initiated by plan participants exercising their rights to withdraw, borrow, or transfer funds under the terms of the ongoing plan. From the perspective of the participants, the contract value of a fully benefit-responsive investment contract held by a plan is the amount they would receive if they were to initiate transactions under the terms of the ongoing plan.

.11 For purposes of this SOP, benefit responsiveness is defined as the extent to which a contract's terms or related agreement and the plan itself permit and require withdrawals at contract value for benefit payments, loans, or transfers to other investment options offered to the participant by the plan. Investment contracts frequently are negotiated directly between the plan and the issuer and generally prohibit assignment of the contracts or their proceeds to another party. Investment contracts must transfer principal and accrued interest risk to a financially responsible third party (that is, they provide for all participant-initiated transactions permitted by an ongoing plan at contract value with no conditions, limits, or restrictions) to be considered fully benefit-responsive. The plan itself must also allow plan participants reasonable access to their funds. If access to funds is substantially restricted by plan provisions, investment contracts held by those plans may not be considered to be fully benefit-responsive. For example, if plan participants are allowed access at contract value to all or a portion of their account balances only upon termination of their participation in the plan, it would not be considered reasonable access and, therefore, investment contracts held by that plan would generally

not be deemed to be fully benefit-responsive. However, in plans with a single investment fund that allow reasonable access to assets by inactive participants, restrictions on access to assets by active participants consistent with the objective of the plan (for example, retirement or health and welfare benefits) will not affect the benefit responsiveness of the investment contracts held by those single-fund plans. Also, if a plan limits participants' access to their account balances to certain specified times during the plan year (for example, semiannually or quarterly) to control the administrative costs of the plan, that limitation generally would not affect the benefit responsiveness of the investment contracts held by that plan. In addition, administrative provisions that place short-term restrictions (for example, three or six months) on transfers to competing fixed-rate investment options to limit arbitrage among those investment options (*equity wash* provisions) would not affect a contract's benefit responsiveness.

.12 If a plan holds multiple contracts, each contract should be evaluated individually for benefit responsiveness. If a plan invests in pooled funds that hold investment contracts, each contract in the pooled fund should be evaluated individually for benefit responsiveness. However, if the pooled fund places any restrictions on access to funds for the payment of benefits, the underlying investment contracts would not be considered fully benefit-responsive. Contracts that provide for prospective interest adjustments may still be fully benefit-responsive provided that the terms of the contracts specify that the crediting interest rate cannot be less than zero. The Appendix [paragraph .20] to this SOP includes examples of the application of fair value and contract value reporting for defined-contribution plan investments.

.13 As discussed in paragraph .05, for purposes of this SOP, the terms *insurance contract* and *investment contract* are described for accounting purposes in FASB Statements No. 60 and No. 97. Paragraph 1 of FASB Statement No. 60 describes insurance contracts:

The primary purpose of insurance is to provide economic protection from identified risks occurring or discovered within a specified period. Some types of risks insured include death, disability, property damage, injury to others, and business interruptions. Insurance transactions may be characterized generally by the following:

- a. The purchaser of an insurance contract makes an initial payment or deposit to the insurance enterprise in advance of the possible occurrence or discovery of an insured event.
- b. When the insurance contract is made, the insurance enterprise ordinarily does not know if, how much, or when amounts will be paid under the contract.

.14 Paragraphs 7 and 8 of FASB Statement No. 97 describe insurance and investment contracts:

Long-duration contracts that do not subject the insurance enterprise to risks arising from policyholder mortality or morbidity are referred to in this Statement as investment contracts. A mortality or morbidity risk is present if, under the terms of the contract, the enterprise is required to make payments or forego required premiums contingent upon the death or disability (in the case of life insurance contracts) or the continued survival (in the case of annuity contracts) of a specific individual or group of individuals. A contract provision that allows the holder of a long-duration contract to purchase an annuity at a guaranteed price on settlement of the contract does not entail a mortality risk until the right to purchase is executed. If purchased, the annuity is a new contract to be evaluated on its own terms.

Annuity contracts may require the insurance enterprise to make a number of payments that are not contingent upon the survival of the beneficiary, followed by payments that are made if the beneficiary is alive when the payments are due (often referred to as life-contingent payments). Such contracts are considered insurance contracts under this Statement and Statement 60 unless (a) the probability that life-contingent payments will be made is remote or (b) the present value of the expected life-contingent payments relative to the present value of all expected payments under the contract is insignificant. [Footnote references omitted.]

## Disclosure Requirements

.15 Defined-contribution plans, including both health and welfare, and pension plans, should disclose the following in connection with fully benefit-responsive investment contracts in the aggregate by investment option:

- a. The average yield for each period for which a statement of net assets available for benefits is presented
- b. The crediting interest rate as of the date of each statement of net assets available for benefits presented
- c. The amount of valuation reserves recorded to adjust contract amounts (for example, due to problems with the creditworthiness of the contract issuer or third-party guarantor)
- d. The fair value of investment contracts reported at contract value, in accordance with FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*.

Those plans should also provide a general description of the basis and frequency of determining crediting interest-rate resets and any minimum crediting interest rate under the terms of the contracts and any limitations on guarantees (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives).

.16 For ERISA-covered plans, if a fully benefit-responsive investment contract does not qualify for contract-value reporting in the DOL Form 5500 but is reported in the financial statements at contract value, and the contract value does not approximate fair value, the DOL's rules and regulations require that a statement explaining the differences between amounts reported in the financial statements and DOL Form 5500 be added to the financial statements.

## Amendments to the Guide

.17 The Guide is amended as follows:

- a. The parenthetical comment (*see paragraph 3.15 for special provisions concerning the valuation of contracts with insurance companies*) in paragraph 3.12 is replaced by (*see paragraph 3.13 for special provisions concerning the valuation of insurance contracts and paragraph 3.17 for special provisions concerning the valuation of fully benefit-responsive investment contracts*).
- b. The following paragraph is inserted as paragraph 3.13:

Insurance contracts, as defined by FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, should be presented in

the same manner as specified in the annual report filed by the plan with certain governmental agencies pursuant to ERISA; that is, either at fair value or at amounts determined by the insurance enterprise (contract value). Plans not subject to ERISA should present insurance contracts as if the plans were subject to the reporting requirements of ERISA.

- c. Paragraph 3.13 is renumbered as paragraph 3.14. The second sentence of that paragraph is replaced by the following:

Examples include real estate, mortgages, or other loans (including loans to participants of a 401(k) plan), restricted securities, unregistered securities, securities for which the market is thin, and non-transferable investment contracts.

- d. Paragraph 3.14 is renumbered as paragraph 3.15.

- e. Paragraph 3.15 is replaced by the following:

3.16 Defined-contribution pension plans provide benefits based on the amounts contributed to employees' individual accounts plus or minus forfeitures, investment experience, and administrative expenses. In such plans, plan participants have a vested interest in monitoring the financial condition and operations of the plan since they bear investment risk under these plans, and plan transactions can directly affect their benefits (for example, investment mix, and risk and return).

3.17 Plan assets of defined-contribution pension plans should be measured and reported at values that are meaningful to financial statement users, including plan participants. The contract value of a *fully benefit-responsive* investment contract held by a plan is the amount a participant would receive if he or she were to initiate transactions under the terms of the ongoing plan. Defined-contribution pension plans should report fully benefit-responsive investment contracts at contract value, which may or may not be equal to fair value. If, however, plan management is aware that an event has occurred that may affect the value of the contract (for example, a decline in the creditworthiness of the contract issuer or third-party guarantor—if different from the contract issuer—or the possibility of premature termination of the contract by the plan), pursuant to FASB Statement No. 5, *Accounting for Contingencies*, disclosure of the event or reporting the investment at less than contract value may be appropriate.

3.18 *Benefit responsiveness* is the extent to which a contract's terms permit and require withdrawals at contract value for benefit payments, loans, or transfers to other investment options offered to the participant by the plan. Investment contracts frequently are negotiated directly between the plan and the issuer and generally prohibit assignment of the contracts or their proceeds to another party. Investment contracts must transfer the risk of principal and accrued interest to a financially responsible third party (that is, they provide for all participant-initiated transactions permitted by an ongoing plan at contract value with no conditions, limits, or restrictions) to be considered fully benefit-responsive. The plan itself must also allow plan participants reasonable access to their funds. If access to funds

is substantially restricted by plan provisions, investment contracts held by those plans may not be considered to be fully benefit-responsive. For example, if plan participants are allowed access at contract value to all or a portion of their account balances only upon termination of their participation in the plan, it would not be considered reasonable access and, therefore, investment contracts held by that plan would generally not be deemed to be fully benefit-responsive. However, in plans with a single investment fund that allow reasonable access to assets by inactive participants, restrictions on access to assets by active participants consistent with the objective of the plan (for example, retirement or health and welfare benefits) will not affect the benefit responsiveness of the investment contracts held by those single-fund plans. Also, if a plan limits participants' access to their account balances to certain specified times during the plan year (for example, semiannually or quarterly) to control the administrative costs of the plan, that limitation generally would not affect the benefit responsiveness of the investment contracts held by that plan. In addition, administrative provisions that place short-term restrictions (for example, three or six months) on transfers to competing fixed-income investment options to limit arbitrage among those investment options (*equity wash* provisions) would not affect a contract's benefit responsiveness.

3.19 If a plan holds multiple contracts, each contract should be evaluated individually for benefit responsiveness. If a plan invests in pooled funds that hold investment contracts, each contract in the pooled fund should be evaluated individually for benefit responsiveness. However, if the pooled fund places any restrictions on access to funds for the payment of benefits, the underlying investment contracts would not be considered fully benefit-responsive. Contracts that provide for prospective interest adjustments may still be fully benefit-responsive provided that the terms of the contracts specify that the crediting interest rate cannot be less than zero.

- f. The phrase *contracts with insurance companies* in paragraph 3.22 is replaced by *insurance contracts*.
- g. The following is added to paragraph 3.23:
  - o. For benefit-responsive investment contracts in the aggregate by investment option—
    - The average yield for each period for which a statement of net assets available for benefits is presented
    - The crediting interest rate as of the date of each statement of net assets available for benefits presented
    - The amount of valuation reserves recorded to adjust contract amounts (for example, due to problems with the creditworthiness of the contract issuer or third-party guarantor)
    - The fair values of fully benefit-responsive investment contracts reported at contract value, in accordance with FASB Statement No. 107.
  - p. A general description of the basis and frequency of determining crediting interest rate resets and any minimum crediting inter-

est rate under the terms of fully benefit-responsive investment contracts and any limitations on related liquidity guarantees (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives).

- q. For ERISA-covered plans, if a fully benefit-responsive investment contract does not qualify for contract-value reporting in the DOL Form 5500, but is reported in the financial statements at contract value, and the contract value does not approximate fair value, the DOL's rules and regulations require that a statement explaining the differences between amounts reported in the financial statements and DOL Form 5500 be added to the financial statements.
- h. The parenthetical comment (*excluding contracts with insurance companies*) in paragraph 4.09 is replaced by (*excluding insurance contracts and fully benefit-responsive investment contracts held by defined-contribution health and welfare plans*).

- i. Paragraph 4.10 is replaced by the following:

4.10 Insurance contracts, as defined by FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, should be presented in the same manner as specified in the annual report filed by the plan with certain governmental agencies pursuant to ERISA; that is, either at fair value or at amounts determined by the insurance enterprise (contract value). Plans not subject to ERISA should present insurance contracts as if the plans were subject to the reporting requirements of ERISA.

4.11 Investment contracts held by defined-benefit health and welfare benefit plans should be reported at their fair values.

4.12 Defined-contribution health and welfare benefit plans provide benefits based on the amounts contributed to employees' individual accounts plus or minus forfeitures, investment experience, and administrative expenses. In such plans, plan participants have a vested interest in monitoring the financial condition and operations of the plan since they bear investment risk under these plans, and plan transactions can directly affect their benefits (for example, investment mix, and risk and return).

4.13 Plan assets of defined-contribution health and welfare benefit plans should be measured and reported at values that are meaningful to financial statement users including plan participants. The contract value of a *fully benefit-responsive* investment contract held by a defined-contribution health and welfare benefit plan is the amount a participant would receive if he or she were to initiate transactions under the terms of the ongoing plan. Defined-contribution health and welfare plans should report fully benefit-responsive investment contracts at contract value, which may or may not be equal to fair value. If, however, plan management is aware that an event has occurred that may affect the value of the contract (for example, a decline in the creditworthiness of the contract issuer or third-party guarantor—if different from the contract issuer—or the possibility of premature termination of the contract by the plan),

pursuant to FASB Statement No. 5, *Accounting for Contingencies*, disclosure of the event or reporting the investment at less than contract value may be appropriate.

4.14 *Benefit responsiveness* is the extent to which a contract's terms permit and require withdrawals at contract value for benefit payments, loans, or transfers to other investment options offered to the participant by the plan. Investment contracts frequently are negotiated directly between the plan and the issuer and generally prohibit assignment of contracts or their proceeds to another party. Investment contracts must transfer the risk of principal and accrued interest to a financially responsible third party (that is, they provide for all participant-initiated transactions permitted by an ongoing plan at contract value with no conditions, limits, or restrictions) to be considered fully benefit-responsive. The plan itself must also allow plan participants reasonable access to their funds. If access to funds is substantially restricted by plan provisions, investment contracts held by those plans may not be considered to be fully benefit-responsive. For example, if plan participants are allowed access at contract value to all or a portion of their account balances only upon termination of their participation in the plan, it would not be considered reasonable access and, therefore, investment contracts held by that plan would generally not be deemed to be fully benefit-responsive. However, in plans with a single investment fund that allow reasonable access to assets by inactive participants, restrictions on access to assets by active participants consistent with the objective of the plan (for example, retirement or health and welfare benefits) will not affect the benefit responsiveness of the investment contracts held by those single-fund plans. Also, if a plan limits participants' access to their account balances to certain specified times during the plan year (for example, semiannually or quarterly) to control administrative costs of the plan, that limitation generally would not affect the benefit responsiveness of the investment contracts held by that plan. In addition, administrative provisions that place short-term restrictions (for example, three or six months) on transfers to competing fixed income investment options to limit arbitrage among those investment options (*equity wash* provisions) would not affect a contract's benefit responsiveness.

4.15 If a plan holds multiple contracts, each contract should be evaluated individually for benefit responsiveness. If a plan invests in pooled funds that hold investment contracts, each contract in the pooled fund should be evaluated individually for benefit responsiveness. However, if the pooled fund places any restrictions on access to funds for the payment of benefits, the underlying investment contracts would not be considered fully benefit-responsive. Contracts that provide for prospective interest adjustments may still be fully benefit-responsive, provided that the terms of the contracts specify that the crediting interest rate cannot be less than zero.

- j. Paragraph 4.11 is renumbered as paragraph 4.15. References to 4.26f and 4.26g are changed to 4.30f and 4.30g, respectively.
- k. The phrase *contracts with insurance companies* in paragraph 4.25a is replaced by *insurance contracts*.

- l. The following is added to paragraph 4.26:
  - i. For benefit-responsive investment contracts held by defined-contribution health and welfare plans, in the aggregate by investment option—
    - The average yield for each period for which a statement of net assets available for benefits is presented
    - The crediting interest rate as of the date of each statement of net assets available for benefits presented
    - The amount of valuation reserves recorded to adjust contract amounts (for example, due to problems with the credit-worthiness of the contract issuer or third-party guarantor)
    - The fair values of fully benefit-responsive investment contracts reported at contract value, in accordance with FASB Statement No. 107
  - j. A general description of the basis and frequency of determining crediting interest rate resets and any minimum crediting interest rate under the terms of fully benefit-responsive investment contracts and any limitations on related liquidity guarantees (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives).
  - k. For ERISA-covered plans, if a fully benefit-responsive investment contract does not qualify for contract-value reporting in the DOL Form 5500 but is reported in the financial statements at contract value, and the contract value does not approximate fair value, the DOL's rules and regulations require that a statement explaining the differences between amounts reported in the financial statements and DOL Form 5500 be added to the financial statements.
- m. The heading that precedes paragraph 7.23, *Insurance Contracts*, is replaced by *Contracts With Insurance Companies*.
- n. The second sentence in footnote 32 to paragraph 7.36 is replaced by the following:
 

A plan's share would be the value of its units determined in accordance with applicable guidance for valuing investment contracts, and the funds held in the separate account should be viewed as an unallocated funding arrangement. Each investment contract in the pooled account should be evaluated individually for benefit responsiveness. However, if the separate account places any restrictions on access to funds for the payment of benefits, the underlying investment contracts would not be considered fully benefit-responsive.
- o. The last sentence of paragraph 7.37 is replaced by the following:
 

These contracts are unallocated and are generally to be included as plan assets at their contract or fair values, as appropriate (see paragraphs 3.17 and 4.13).
- p. The phrase *insurance contracts* in paragraph 7.38a is replaced by *contracts with insurance companies*.

- q. The phrase *insurance contracts* in paragraph 7.39 is replaced by *contracts with insurance companies*.
- r. The third item of paragraph 7.39b is replaced by the following:
  - The value of the funds in the general or separate account at the plan's year-end and the basis for determining such value
- s. The Appendix [paragraph .20] of this SOP, *Application of Fair Value and Contract Value Reporting for Defined-Contribution Plan Investments*, is added as appendix I.

## Amendment to SOP 92-6 [section 10,530]

.18 SOP 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans* [section 10,530], is amended as follows:

- a. The parenthetical comment (*excluding contracts with insurance companies*) in paragraph 25 [section 10,530.25] is replaced by (*excluding insurance contracts and fully benefit-responsive investment contracts held by defined-contribution health and welfare benefit plans*).
- b. Paragraph 26 [section 10,530.26] is replaced by the following:

Insurance contracts, as defined by FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, should be presented in the same manner as specified in the annual report filed by the plan with certain governmental agencies pursuant to ERISA; that is, either at fair value or at amounts determined by the insurance enterprise (contract value). Plans not subject to ERISA should present insurance contracts as if the plans were subject to the reporting requirements of ERISA.

- c. The following paragraphs are inserted as paragraphs 27, 28, 29, 30, and 31 [section 10,530.27 through .31]:

27. Investment contracts held by defined-benefit health and welfare benefit plans should be reported at their fair values.

28. Defined-contribution health and welfare benefit plans provide benefits based on the amounts contributed to employees' individual accounts plus or minus forfeitures, investment experience, and administrative expenses. In such plans, plan participants have a vested interest in monitoring the financial condition and operations of the plan since they bear investment risk under these plans, and plan transactions can directly affect their benefits (for example, investment mix, and risk and return).

29. Plan assets of defined-contribution health and welfare benefit plans should be measured and reported at values that are meaningful to financial statement users including plan participants. The contract value of a *fully benefit-responsive* investment contract held by a defined-contribution health and welfare benefit plan is the amount a participant would receive if he or she were to initiate transactions under the terms of the ongoing plan. Defined-contribution health and welfare benefit plans should report fully benefit-responsive investment contracts at contract value, which may or may not be equal to fair value. If, however, plan management is aware

that an event has occurred that may affect the value of the contract (for example, a decline in the creditworthiness of the contract issuer or third-party guarantor—if different from the contract issuer—or the possibility of premature termination of the contract by the plan), pursuant to FASB Statement No. 5, *Accounting for Contingencies*, disclosure of the event or reporting the investment at less than contract value may be appropriate.

30. *Benefit responsiveness* is the extent to which a contract's terms permit and require withdrawals at contract value for benefit payments, loans, or transfers to other investment options offered to the participant by the plan. Investment contracts frequently are negotiated directly between the plan and the issuer and generally prohibit assignment of contracts or their proceeds to another party. Investment contracts must transfer the risk of principal and accrued interest to a financially responsible third party (that is, they provide for all participant-initiated transactions permitted by an ongoing plan at contract value with no conditions, limits, or restrictions) to be considered fully benefit-responsive. The plan itself must also allow plan participants reasonable access to their funds. If access to funds is substantially restricted by plan provisions, investment contracts held by those plans may not be considered to be fully benefit-responsive. For example, if plan participants are allowed access at contract value to all or a portion of their account balances only upon termination of their participation in the plan, it would not be considered reasonable access and, therefore, investment contracts held by that plan would generally not be deemed to be fully benefit-responsive. However, in plans with a single investment fund that allow reasonable access to assets by inactive participants, restrictions on access to assets by active participants consistent with the objective of the plan (for example, retirement or health and welfare benefits) will not affect the benefit responsiveness of the investment contracts held by those single-fund plans. Also, if a plan limits participants' access to their account balances to certain specified times during the plan year (for example, semiannually or quarterly) to control the administrative costs of the plan, that limitation generally would not affect the benefit responsiveness of the investment contracts held by that plan. In addition, administrative provisions that place short-term restrictions (for example, three or six months) on transfers to competing fixed income investment options to limit arbitrage among those investment options (*equity wash* provisions) would not affect a contract's benefit responsiveness.

31. If a plan holds multiple contracts, each contract should be evaluated individually for benefit responsiveness. If a plan invests in pooled funds that hold investment contracts, each contract in the pooled fund should be evaluated individually for benefit responsiveness. However, if the pooled fund places any restrictions on access to funds for the payment of benefits, the underlying investment contracts would not be considered fully benefit-responsive. Contracts that provide for prospective interest adjustments may still be fully benefit-responsive provided that the terms of the contracts specify that the crediting interest rate cannot be less than zero.

- d. Paragraph 27 is renumbered as paragraph 32 [section 10,530.32].

- e. The following is added to paragraph 53 [section 10,530.58]:
- For benefit-responsive investment contracts in the aggregate by investment option:
    - The average yield for each period for which a statement of net assets available for benefits is presented
    - The crediting interest rate as of the date of each statement of net assets available for benefits presented
    - The amount of valuation reserves recorded to adjust contract amounts (for example, due to problems with the credit-worthiness of the contract issuer or third-party guarantor)
    - The fair values of fully benefit-responsive investment contracts reported at contract value, in accordance with FASB Statement No. 107
  - A general description of the basis and frequency of determining crediting interest-rate resets and any minimum crediting interest rate under the terms of fully benefit-responsive investment contracts and any limitations on related liquidity guarantees (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives).
  - For ERISA-covered plans, if a fully benefit-responsive investment contract does not qualify for contract-value reporting in the DOL Form 5500 but is reported in the financial statements at contract value, and the contract value does not approximate fair value, the DOL's rules and regulations require that a statement explaining the differences between amounts reported in the financial statements and DOL Form 5500 be added to the financial statements.

## Effective Date and Transition

.19 This SOP is effective for financial statements for plan years beginning after December 15, 1994, except that the application of this SOP to investment contracts entered into before December 31, 1993, is delayed to plan years beginning after December 15, 1995. Earlier application is encouraged. Accounting changes adopted to conform to the provisions of this SOP should be made as of the beginning of the year in which the change is adopted. The effect of initially applying this SOP should be reported in a manner similar to the cumulative effect of a change in accounting principle (Accounting Principles Board [APB] Opinion No. 20, *Accounting Changes*, paragraph 20). Pro forma effects of retroactive application (APB Opinion 20, paragraph 21) are not required. Restatement of financial statements of prior years is not permitted.

## Appendix

### Application of Fair Value and Contract Value Reporting for Defined-Contribution Plan Investments

**A.1** Fully benefit-responsive investment contracts held by defined-contribution plans, including both health and welfare, and pension plans that provide a liquidity guarantee by a financially responsible third party of principal and previously accrued interest for participant-initiated liquidations, transfers, loans, or hardship withdrawals under the terms of the ongoing plan, should be reported at contract value, which may or may not be equal to fair value. If access to funds is substantially restricted by plan provisions, investment contracts held by those plans may not be considered to be fully benefit-responsive. Other investment contracts should generally be reported at fair value.

**A.2** Investment contracts that do not provide a liquidity guarantee as discussed in paragraph A.1 may be valued by discounting the related cash flows based on current yields of similar investments with comparable durations. In determining the similarity of investments, appropriate consideration should be given to the credit quality of the contract issuer. Generally, contract termination (penalty) clauses need not be considered unless it is probable that the plan intends to terminate the contract.

**A.3** In the following examples, value is determined within the context of the objectives of financial statements for a defined-contribution plan. The valuation must reflect the ability of the plan to pay benefits from the perspective of the participants. This value is then reflected on participants' statements to disclose the amount they can expect to receive when they exercise their rights to withdraw, borrow, or transfer funds under the terms of the plan.

#### EXAMPLE 1

##### **A Five-Year Public Bond (or Portfolio of Bonds) Which Is Guaranteed by a Third Party to Have a Fixed Value at the End of Three Years**

**A.4** The guarantee applies only to the extent that the bond (or portfolio) is not liquidated prior to the end of three years. Liquidation within three years is at market value.

**A.5** Because guaranteed proceeds from the bond are not available for benefit withdrawals or transfers prior to maturity, the contract should be valued at fair value. Fair value may be determined as the amount at which the bond could be exchanged in a current transaction between parties, other than in a forced or liquidation sale, considering the guaranteed fixed value of the bond at the end of three years.

#### EXAMPLE 2

##### **A Benefit-Responsive Investment Contract**

**A.6** This contract provides a fixed crediting interest rate, and a financially responsible entity guarantees liquidity at contract value prior to maturity for

any and all participant-initiated benefit withdrawals, loans, or transfers arising under the terms of the plan, which allows access for all participants on a quarterly basis.

**A.7** The contract should be reported at contract value, because the plan will receive such value and only such value if the contract is accessed to pay participant benefits or transfers.

**A.8** The contract described in the preceding paragraph would be viewed as fully benefit-responsive. Examples of some variations on this contract, and their impact on the valuation, follow.

- a. *Liquidity at contract value is not guaranteed for benefits that are attributable to termination of the plan, a plan spin-off to a new employer plan, or amendments to plan provisions.* The contract should be reported at contract value unless it is probable that the plan will be terminated, spun off, or amended.
- b. *Liquidity at contract value is not guaranteed for benefits that are attributable to the layoff of a large group of workers or an early retirement program.* The contract should be reported at contract value unless it is probable that termination of the employment of a significant number of employees will occur.
- c. *The contract will pay for benefits of up to 30 percent of the contract at contract value, and any excess benefits will be at some adjusted value.* The contract should be reported at fair value. Fair value may be determined as the guaranteed amount plus the estimated discounted cash flows related to the amount in excess of 30 percent of the contract value.
- d. *The contract will pay benefits at contract value, but only if the issuer of the contract determines that there is sufficient liquidity in the portfolio of assets that backs the contract.* Because the third party has not guaranteed liquidity for participant-initiated withdrawals, the contract should be reported at fair value.
- e. *The contract will not pay benefits at contract value if benefits are due to participant transfers to another fixed income investment option, unless the funds are invested in an equity option for at least three months (equity wash provisions).* The contract should be reported at contract value.

### EXAMPLE 3

#### **A Five-Year, Nonbenefit-Responsive Investment Contract That Has No Liquid Market for Trading**

**A.9** The contract should be reported at fair value because there is no guarantee of liquidity at contract value. Fair value would be determined in the same manner as for an illiquid bond. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 107, *Disclosures about Fair Value of Financial Instruments*, includes a discussion of methods used to determine the fair values of illiquid instruments.

**EXAMPLE 4****A Benefit-Responsive, Participating, Separate Account Investment Contract**

**A.10** A financially responsible issuer pays contract value for participant withdrawals, regardless of the value of the assets in the separate account. The credited interest rate is a function of the relationship between the contract value and the value of the assets in the separate account. The rate is reset periodically, daily, monthly, quarterly, and so on, by the issuer and cannot be less than zero. There may or may not be a specified maturity date on the contract. The contractholder may terminate the contract at any time, and receive the value of the assets in the separate account.

**A.11** The contract should be reported at contract value because participants are guaranteed return of principal and accrued interest.

**• EXAMPLE 5****A Synthetic Investment Contract—"Managed" Type**

**A.12** This contract operates similarly to a separate account guaranteed investment contract (GIC), except that the assets are placed in a trust (with ownership by the plan) rather than a separate account of the issuer and a financially responsible third party issues a *wrapper* contract that provides that participants can, and must, execute plan transactions at contract value.

**A.13** Inasmuch as trust assets are owned by the plan, the wrapper contract and the assets in trust should be separately valued and disclosed. The wrapper contract would be valued at the difference between the fair value of the trust assets and the contract value attributable by the wrapper to such assets. When considered together, the trust assets and the wrapper contract should be reported at the wrapper contract value because participants are guaranteed return of principal and accrued interest.

**EXAMPLE 6****A Synthetic Investment Contract—"Repurchase" Type**

**A.14** Under this contract, the plan purchases a bond and places it in trust. The plan then contracts with a financially responsible third party to provide benefit responsiveness. Under the contract, should the bond need to be sold to meet a participant-initiated withdrawal benefit, loan, or transfer, the plan is obligated to sell the bond to the contract issuer, and the issuer is obligated to buy the bond. The transaction price is defined under the contract (for example, amortized cost). The issuer is not obligated, however, to purchase securities that are in default.

**A.15** The contract, when considered together with the bond, should be reported at contract value (refer to paragraph A.13) absent impairment of the value of the securities due to credit risk because return of principal and accrued interest has been guaranteed to participants.

**A.16** If the contract provided only an *option* for the sponsor to sell the bond to the issuer, rather than an obligation to do so, contract value would only apply when the fair value of the bond was less than contract value, because the option would then have value. Fair value may be determined as the greater of the estimated discounted cash flows or the option price.

**Section 10,630****Statement of Position 94-5  
Disclosures of Certain Matters in the  
Financial Statements of Insurance Enterprises****December 15, 1994****NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

**Introduction**

.01 Most of the accounting principles related to disclosures for insurance enterprises were promulgated over twenty years ago when the insurance regulatory and business environments were less complex and volatile. Accordingly, the AICPA Accounting Standards Executive Committee (AcSEC) added a project to its agenda to consider whether new disclosures should be required in insurance enterprises' financial statements. This statement of position (SOP) is a result of that project.

**Scope**

.02 This SOP applies to annual and complete sets of interim financial statements prepared in conformity with generally accepted accounting principles (GAAP) of life and health insurance enterprises (including mutual life insurance enterprises), property and casualty insurance enterprises, reinsurance enterprises, title insurance enterprises, mortgage guaranty insurance enterprises, financial guaranty insurance enterprises, assessment enterprises, fraternal benefit societies, reciprocal or interinsurance exchanges, pools other than public-entity risk pools, syndicates, and captive insurance companies. Furthermore, AICPA Auditing Interpretation No. 12, "Evaluation of the Appropriateness of Informative Disclosures in Insurance Enterprises' Financial Statements Prepared on a Statutory Basis" (AICPA, *Professional Standards*, vol. 1, AU section 9623.60-.79), requires auditors to apply the same disclosure criteria for statutory financial statements as they do for financial statements prepared in conformity with GAAP.

## Relationship to Other Pronouncements

.03 In some circumstances, the disclosure requirements in this SOP may be similar to, or overlap, the disclosure requirements in certain other authoritative accounting pronouncements issued by the Financial Accounting Standards Board (FASB), the American Institute of Certified Public Accountants (AICPA), and the Securities and Exchange Commission (SEC). For example—

- FASB Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, requires certain disclosures related to loss contingencies, including catastrophe losses of property and casualty insurance companies.
- FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, requires certain disclosures about liabilities for unpaid claims and claim adjustment expenses and statutory capital.
- FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, requires certain disclosures about reinsurance transactions.
- AICPA Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties* [section 10,640], requires disclosures about certain significant estimates.
- The SEC Securities Act Guide 6, *Disclosures Concerning Unpaid Claims and Claim Adjustment Expenses of Property-Casualty Insurance Underwriters*, requires disclosures of information about liabilities for unpaid claims and claim adjustment expenses.

The disclosure requirements in this SOP supplement the disclosure requirements in other authoritative pronouncements. This SOP does not alter the requirements of any FASB or SEC pronouncement.

## Conclusions

.04 The disclosure requirements in this section should be read in conjunction with appendix A, "Illustrative Disclosures" [paragraph .13], and appendix B, "Discussion of Conclusions" [paragraph .14], of this SOP.

## Permitted Statutory Accounting Practices

.05 Insurance enterprises currently prepare their statutory financial statements in accordance with accounting principles and practices prescribed or permitted by the insurance department of their state of domicile. The National Association of Insurance Commissioners (NAIC) currently has a project under way to codify statutory accounting practices through a complete revision of its *Accounting Practices and Procedures Manuals*, that, when complete, is expected to replace prescribed or permitted statutory accounting practices as the statutory basis of accounting for insurance enterprises (referred to hereafter as the "codification"). Therefore, the codification will likely result in changes to what is currently considered a prescribed statutory accounting practice. Furthermore, postcodification-permitted statutory accounting practices will be exceptions to the statutory basis of accounting.

.06 Prescribed precodification statutory accounting practices include state laws, regulations, and general administrative rules applicable to all in-

insurance enterprises domiciled in a particular state; *NAIC Annual Statement Instructions*; the *NAIC Accounting Practices and Procedures Manuals*; the *Securities Valuation Manual* (published by the NAIC Securities Valuation Office); NAIC official proceedings; and the *NAIC Examiners' Handbook*.

**.07** Permitted statutory accounting practices include practices not described in paragraph .06 but allowed by the domiciliary state insurance department. Insurance enterprises may request permission from the domiciliary state insurance department to use a specific accounting practice in the preparation of their statutory financial statements (a) when the enterprise wishes to depart from the prescribed statutory accounting practices, or (b) when prescribed statutory accounting practices do not address the accounting for the transaction.

**.08** The disclosures in this paragraph should be made for permitted statutory accounting practices for the most recent fiscal year presented, regardless of when the permitted statutory accounting practice was initiated. Insurance enterprises should disclose the following information about permitted statutory accounting practices that individually or in the aggregate materially affect statutory surplus or risk-based capital, including GAAP practices when the permitted practices differ from the prescribed statutory accounting practices:

- a. A description of the permitted statutory accounting practice
- b. A statement that the permitted statutory accounting practice differs from prescribed statutory accounting practices
- c. The monetary effect on statutory surplus

Insurance enterprises should disclose the following information about permitted statutory accounting practices, excluding GAAP practices used, when prescribed statutory accounting practices do not address the accounting for the transaction:

- a. A description of the transaction and of the permitted statutory accounting practice used
- b. A statement that prescribed statutory accounting practices do not address the accounting for the transaction

## **Liability for Unpaid Claims and Claim Adjustment Expenses**

**.09** The liability for unpaid claims and claim adjustment expenses represents the amounts needed to provide for the estimated ultimate cost of settling claims relating to insured events that have occurred on or before a particular date (ordinarily, the statement of financial position date). The estimated liability includes the amount of money that will be required for future payments of (a) claims that have been reported to the insurer, (b) claims related to insured events that have occurred but that have not been reported to the insurer as of the date the liability is estimated, and (c) claim adjustment expenses. Claim adjustment expenses include costs incurred in the claim settlement process such as legal fees; outside adjuster fees; and costs to record, process, and adjust claims.

**.10** Financial statements should disclose for each fiscal year for which an income statement is presented the following information about the liability for unpaid claims and claim adjustment expenses:

- a. The balance in the liability for unpaid claims and claim adjustment expenses at the beginning and end of each fiscal year presented, and the related amount of reinsurance recoverable
- b. Incurred claims and claim adjustment expenses with separate disclosure of the provision for insured events of the current fiscal year and of increases or decreases in the provision for insured events of prior fiscal years
- c. Payments of claims and claim adjustment expenses with separate disclosure of payments of claims and claim adjustment expenses attributable to insured events of the current fiscal year and to insured events of prior fiscal years

Also, insurance enterprises should discuss the reasons for the change in the provision for incurred claims and claim adjustment expenses attributable to insured events of prior fiscal years and should indicate whether additional premiums or return premiums have been accrued as a result of the prior-year effects.

.11 In addition to the disclosures required by FASB Statement No. 5 and other accounting pronouncements, insurance enterprises should disclose management's policies and methodologies for estimating the liability for unpaid claims and claim adjustment expenses for difficult-to-estimate liabilities, such as for claims for toxic waste cleanup, asbestos-related illnesses, or other environmental remediation exposures.

## Effective Date and Transition

.12 This SOP is effective for annual and complete sets of interim financial statements for periods ending after December 15, 1994. Disclosures of information required by paragraph .10 should be included for each fiscal year for which an income statement is presented.

## Appendix A

### Illustrative Disclosures

**A-1.** The illustrations included in this appendix are guides to implementation of the disclosures required by this SOP. Insurance enterprises are not required to display the information contained herein in the specific manner or in the degree of detail illustrated. Alternative disclosure presentations are permissible if they satisfy the disclosure requirements of this SOP.

### Permitted Statutory Accounting Practices

**A-2.** The following is an illustration of disclosures that an insurance enterprise would make before the codification is complete, to meet the requirements of paragraph .08 of this SOP.

#### *Note X. Permitted Statutory Accounting Practices*

Property and Casualty Company, Inc., domiciled in ABC State, prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the ABC State Insurance Department. Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (NAIC), as well as state laws, regulations, and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The company received written approval from the ABC State Insurance Department to discount loss reserves at a rate of X percent for statutory accounting purposes, which differs from prescribed statutory accounting practices. Statutory accounting practices prescribed by ABC state require that loss reserves be discounted at Y percent. As of December 31, 19X3, that permitted transaction increased statutory surplus by \$XX million over what it would have been had prescribed accounting practice been followed.<sup>1</sup>

### Liability for Unpaid Claims and Claim Adjustment Expenses

**A-3.** The following is an illustration of information an insurance enterprise would disclose to meet the requirements of paragraph .10 of this SOP. (This illustration presents amounts incurred and paid net of reinsurance.)

The information may also be presented before the effects of reinsurance with separate analysis of reinsurance recoveries and recoverables related to the incurred and paid amounts.)

---

<sup>1</sup> If an insurance company's risk-based capital (RBC) would have triggered a regulatory event had it not used a permitted practice, that fact should be disclosed in the financial statements.

**Note X. Liability for Unpaid Claims and Claim Adjustment Expenses**

Activity in the liability for unpaid claims and claim adjustment expenses is summarized as follows.

	<u>19X5</u>	<u>19X4</u>
Balance at January 1	\$7,030	\$6,687
Less reinsurance recoverables	1,234	987
Net Balance at January 1	<u>5,796</u>	<u>5,700</u>
Incurred related to:		
Current year	2,700	2,600
Prior years	(171)	96
Total incurred	<u>2,529</u>	<u>2,696</u>
Paid related to:		
Current year	781	800
Prior years	2,000	1,800
Total paid	<u>2,781</u>	<u>2,600</u>
Net Balance at December 31	5,544	5,796
Plus reinsurance recoverables	1,255	1,234
Balance at December 31	<u>\$6,799</u>	<u>\$7,030</u>

As a result of changes in estimates of insured events in prior years, the provision of claims and claim adjustment expenses (net of reinsurance recoveries of \$X and \$X in 19X5 and 19X4, respectively) decreased by \$171 million in 19X5 because of lower-than-anticipated losses on Hurricane Howard, and increased by \$96 million in 19X4 because of higher-than-anticipated losses and related expenses for claims for asbestos-related illnesses, toxic waste cleanup, and workers' compensation.

**A-4.** The following is an illustration of an insurance enterprise disclosure designed to meet the requirements of paragraph .11 of this SOP. (Additional disclosures about the liabilities for unpaid claims and claim adjustment expenses may be required under FASB Statement No. 5, FASB Interpretation 14, *Reasonable Estimation of the Amount of a Loss*, AICPA SOP 94-6 [section 10,640], and SEC requirements.)

**Note X. Environmental-Related Claims**

In establishing the liability for unpaid claims and claim adjustment expenses related to asbestos-related illnesses and toxic waste cleanup, management considers facts currently known and the current state of the law and coverage litigation. Liabilities are recognized for known claims (including the cost of related litigation) when sufficient information has been developed to indicate the involvement of a specific insurance policy, and management can reasonably estimate its liability. In addition, liabilities have been established to cover additional exposures on both known and unasserted claims. Estimates of the liabilities are reviewed and updated continually. Developed case law and adequate claim history do not exist for such claims, especially because significant uncertainty exists about the outcome of coverage litigation and whether past claim experience will be representative of future claim experience.

## Appendix B

### Discussion of Conclusions

**B-1.** This section discusses factors that were deemed significant by members of AcSEC in reaching the conclusions in this SOP. It includes reasons for accepting certain views and rejecting others. Individual AcSEC members gave greater weight to some factors than to others.

**B-2.** The business and regulatory environment of insurance enterprises has become more complex and volatile, and therefore riskier. Accordingly, AcSEC believed the need existed to reconsider the disclosures made in the financial statements of insurance enterprises.

**B-3.** FASB Statement of Financial Accounting Concepts No. 1, *Objectives of Financial Reporting by Business Enterprises*, states financial reporting should “provide information that is useful to present and potential investors and creditors and other users in making rational investment, credit, and similar decisions” (paragraph 34). Further, the Concepts Statement says that to support that decision-making process, financial reports should help such users “assess the amounts, timing, and uncertainty of prospective net cash inflows to the related enterprises” (paragraph 37) by providing “information about the economic resources of an enterprise, the claims to those resources. . . and the effects of transactions, events, and circumstances that change resources and claims to those resources” (paragraph 40).

**B-4.** AcSEC considered a wide variety of potential disclosures, and tried to identify the areas of importance to insurance enterprises for which the current disclosures were lacking. AcSEC concluded that additional disclosures in the financial statements of insurance enterprises about regulatory risk-based capital, the liability for unpaid claims, and certain accounting methods permitted by state insurance departments would help insurance enterprises better meet the objectives of financial reporting in their financial statements.

### Risk-Based Capital

**B-5.** Insurance enterprises operate in a highly regulated environment directed primarily toward safeguarding policyholders’ interests and maintaining public confidence in the safety and soundness of the insurance system. Historically, regulation of insurance enterprises has monitored solvency by focusing on their capital. One of the primary tools used by state insurance departments for ensuring that their objectives are being met is risk-based capital (RBC).

**B-6.** The NAIC has developed an RBC program that is used by state insurance departments to enable them to take appropriate and timely regulatory actions relating to insurers that show signs of weak or deteriorating financial conditions. This program is encompassed in the RBC Model Acts for life and property and casualty insurers, which have been or are intended to be adopted by most of the states. RBC is a series of dynamic surplus-related formulas set forth in the NAIC’s RBC instructions for life and health and for property and casualty insurance enterprises. The formulas contain a variety of weighing factors that are applied to financial balances or to levels of activity based on the perceived degree of certain risks, such as asset risk, credit risk,

interest rate risk (life insurance enterprises only), underwriting risk, and other business risks, such as risks related to management, regulatory action, and contingencies. The amount determined under such formulas, the authorized control level risk-based capital, is required to be disclosed in life insurance enterprises' statutory filings starting for the year ended December 31, 1993, and in property and casualty insurance enterprises' statutory filings starting for the year ended December 31, 1994.

**B-7.** The exposure draft of the SOP contained a requirement that insurance enterprises that are required to calculate RBC should disclose in their financial statements the ratio of total adjusted capital to authorized control level RBC and the amount of total adjusted capital for each fiscal year for which a statement of financial position is presented.

**B-8.** However, the NAIC's RBC Model Acts for both life and property and casualty insurers have a confidentiality provision, which states:

[E]xcept as otherwise required under the provisions of this Act [that is, in the annual financial reports filed with state insurance departments], the making, publishing, disseminating, circulation, or placing before the public, or causing, directly or indirectly to be made, placed before the public, in a newspaper, magazine or other publication . . . with regard to the RBC levels of any insurer . . . would be misleading and is therefore prohibited.

**B-9.** Prior to issuing the exposure draft, based on discussions with the drafters of the RBC Model Acts and some state insurance regulators, and based on the fact that the information is already in the public domain, AcSEC believed that the confidentiality provisions were not intended to apply to disclosures in financial statements. However, a number of respondents to the exposure draft stated that they believe disclosing RBC levels in financial statements would be illegal in states that have enacted the RBC Model Acts. They point out that words in the RBC Model Acts appear to be intended to restrict *all* other disclosure of RBC levels, including in insurers' financial statements.

**B-10.** AcSEC continues to believe, because of the importance of RBC in the regulatory oversight of insurance enterprises, that its disclosure would improve the relevance and usefulness of insurance enterprises' financial statements, and, therefore, it should be disclosed in the financial statements. Nevertheless, AcSEC concluded the legal issues require further consideration.

**B-11.** AcSEC decided that this SOP should not be delayed while the legal issues regarding RBC disclosures are considered. A separate SOP on RBC disclosures will be considered at a later date.

**B-12.** Nevertheless, AcSEC encourages insurance enterprises to disclose RBC levels if they are domiciled in states that have not adopted the RBC Model Acts, or if they have otherwise determined that it is legal to make such disclosures in their financial statements.

**B-13.** The exposure draft also required insurance enterprises whose level of RBC has triggered a regulatory event<sup>2</sup> to disclose certain information in their

---

<sup>2</sup> Under the NAIC's RBC Model Acts, when the ratio of total adjusted capital to authorized control level RBC is less than or equal to 2 or less than or equal to 2.5 with negative trends for life insurance enterprises, a regulatory event exists that is, the insurance enterprise would fail to meet the minimum RBC requirements. There are four types of regulatory events, ranging from least to most serious: company action level event, regulatory action level event, authorized control level event, and mandatory control level event.

financial statements. Delaying the issuance of the RBC guidance does not change the fact that under SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, auditors must consider the need for disclosures about the principal conditions and events that triggered the regulatory event and the possible effects of such conditions and events, as well as management's plans.

## Permitted Statutory Accounting Practices

**B-14.** Permitted statutory accounting practices historically have not been disclosed in the notes to the financial statements, except to the extent that they have been disclosed in the accounting practices and procedures note to the statutory financial statements. With increasing frequency, insurance enterprises have transactions that are not explicitly addressed by prescribed accounting practices, or for which no analogous prescribed accounting practices exist. Furthermore, insurance enterprises often request exceptions from certain prescribed accounting practices. Permitted statutory accounting practices may differ from state to state, and from company to company within a state, and may change in the future. Moreover, permitted statutory accounting practices have been used to enhance insurance enterprises' surplus positions. For example, some state insurance departments have permitted certain insurance enterprises to adjust home office facilities to appraised values even though the states' prescribed statutory accounting practices require that such assets be carried at depreciated historical cost.

**B-15.** AcSEC believes the required disclosure of permitted statutory accounting practices will enhance the relevance of the financial statements and fulfill the financial reporting objective of providing current and potential investors, creditors, policyholders, and other users of an insurance enterprise's financial statements with useful information. Not only will such disclosures identify situations in which permitted statutory accounting practices enhance an insurance enterprise's statutory capital and RBC position, but they also will improve the comparability of insurance enterprises' financial statements.

## Liability for Unpaid Claims and Claim Adjustment Expenses

**B-16.** Insurance enterprises estimate their liability for unpaid claims and claim adjustment expenses for reported and unreported claims incurred as of the end of the accounting period in accordance with FASB Statement No. 60. The liability is estimated based on past loss experience, adjusted for current trends and other factors that will modify past experience. The liability may be calculated using a variety of mathematical approaches ranging from simple arithmetic projections using loss development factors to complex statistical models.

**B-17.** FASB Concepts Statement No. 1, paragraph 21, states:

The information provided by financial reporting largely reflects the financial effects of transactions and events that have already happened. Management may communicate information about its plans or projections, but financial statements and most other financial reporting are historical . . . Estimates resting on expectations of the future are often needed in financial reporting, but their major use, especially of those formally incorporated in financial statements, is to measure financial effects of past transactions or events or the present status of an asset or liability . . . To provide information about the past

as an aid in assessing the future is not to imply that the future can be predicted merely by extrapolating past trends or relationships. Users of the information need to assess the possible or probable impact of factors that may cause change and form their own expectations about the future and its relation to the past.

**B-18.** AcSEC believes that disclosures about an insurance enterprise's liabilities for unpaid claims and claim adjustment expenses development are useful in understanding insurance enterprises' liabilities and results of operations. Furthermore, AcSEC notes the disclosures are the same as some of the loss reserve development disclosures that the SEC requires registrants to file with the commission under Securities Act Guide 6.

**B-19.** Paragraph 60(a) of FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, requires all insurance enterprises to disclose the basis for estimating the liabilities for unpaid claims and claim adjustment expenses. Furthermore, FASB Statement No. 5, *Accounting for Contingencies*, requires disclosure of loss contingencies not accrued, for which it is at least reasonably possible that a loss has been incurred. Because of the relatively high degree of coverage litigation and the lack of historical information regarding the amount and nature of both known and unasserted claims relating to difficult-to-estimate liabilities (such as those related to environmental related illness claims and toxic-waste cleanup claims), traditional loss reserving techniques may not be used in estimating such liabilities. Therefore, a high degree of judgment is needed in estimating the amount of losses, and practice is developing in the area. Accordingly, AcSEC believes financial statement users will benefit from disclosure of the policies and methods management has used for estimating these amounts.

## Discussion of Comments Received on Exposure Draft

**B-20.** An exposure draft of a statement of position, *Disclosure of Certain Matters in the Financial Statements of Insurance Enterprises* was issued on April 20, 1994, and distributed to a variety of interested parties to encourage comment by those that would be affected by the proposal. Forty comment letters were received on the exposure draft.

### *Risk-Based Capital*

**B-21.** A number of comments were received on the risk-based capital disclosures. As discussed in paragraphs B-5 through B-13, AcSEC decided to consider a separate SOP at a later date on risk-based capital disclosures. The comments will be addressed at that time.

### *Permitted Statutory Accounting Practices*

**B-22.** A number of respondents to the exposure draft of the SOP requested that the disclosure requirements for permitted statutory accounting practices be postponed until after the codification is complete. AcSEC believes that the disclosures are especially important before codification to improve understanding of the factors that affect comparability among the statutory capital of insurance enterprises.

**B-23.** Respondents asked for clarification of how disclosure of the monetary effect of statutory surplus would be calculated, particularly when there is no prescribed accounting practice to compare with the permitted practice. AcSEC agreed and revised the exposure draft to state that for permitted statutory ac-

counting practices used when prescribed accounting practice is silent, a description of the transaction is sufficient. Respondents also asked for clarification about whether there should be disclosure of GAAP-permitted practices when there is no prescribed statutory accounting. If an insurance company uses a GAAP practice in its statutory financial statements when there is no prescribed practice, that is still considered a permitted statutory accounting practice. However, AcSEC agreed that no disclosures should be made for GAAP practices that are used when prescribed statutory practices do not specify the accounting for the transaction.

**B-24.** Respondents suggested that the requirement in the exposure draft to make a statement about the codification be eliminated. AcSEC agreed the disclosure might be confusing to users of financial statements, and eliminated the requirement.

### ***Liability for Unpaid Claims and Claim Adjustment Expenses***

**B-25.** The exposure draft would have required disclosure of information about actuarial adjustments made for nonrecurring or abnormal experience. A number of respondents suggested that that disclosure requirement be eliminated. AcSEC was persuaded that such actuarial adjustments are a normal part of making estimates that should not be disclosed in the financial statements, and eliminated the requirement.

## Section 10,640

# **Statement of Position 94-6 Disclosure of Certain Significant Risks and Uncertainties**

December 30, 1994

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction**

.01 The volatile business and economic environment underscores a need for improved disclosure about the significant risks and uncertainties that face reporting entities. In 1987, the AICPA issued the *Report of the Task Force on Risks and Uncertainties* (the Report), which was intended to help standards-setting bodies and others identify practical methods of improving the information communicated to users of financial statements to help them assess those risks and uncertainties. This statement of position (SOP) is largely based on the Report. The central feature of this SOP's disclosure requirements is selectivity: specified criteria serve to screen the host of risks and uncertainties that affect every entity so that required disclosures are limited to matters significant to a particular entity.

.02 The disclosures focus primarily on risks and uncertainties that could significantly affect the amounts reported in the financial statements in the near term or the near-term functioning of the reporting entity. The risks and uncertainties this SOP deals with can stem from the nature of the entity's operations, from the necessary use of estimates in the preparation of the entity's financial statements, and from significant concentrations in certain aspects of the entity's operations.

## **Scope**

.03 This SOP applies to financial statements prepared in conformity with generally accepted accounting principles (GAAP) applicable to nongovern-

mental entities. It applies to all entities that issue such statements. While this SOP applies to complete interim financial statements, it does not apply to condensed or summarized interim financial statements.<sup>1</sup> If comparative financial statements are presented, the disclosure requirements apply only to the financial statements for the most recent fiscal period presented.

.04 The disclosure requirements do not encompass risks and uncertainties that might be associated with management or key personnel, proposed changes in government regulations, proposed changes in accounting principles,<sup>2</sup> or deficiencies in the internal control structure. Nor do they encompass the possible effects of acts of God, war, or sudden catastrophes.

## Relationship to Other Pronouncements

.05 The disclosure requirements of this SOP in many circumstances are similar to or overlap the disclosure requirements in certain pronouncements of the Financial Accounting Standards Board (FASB), such as FASB Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, and, for public business enterprises, FASB Statement No. 14, *Financial Reporting for Segments of a Business Enterprise*. The disclosure requirements of this SOP in many circumstances also are similar to or overlap the disclosure requirements in certain pronouncements of the Securities and Exchange Commission (SEC). This SOP does not alter the requirements of any FASB or SEC pronouncement.

.06 Certain disclosure requirements in this SOP supplement the requirements of other authoritative pronouncements. In many cases, however, the disclosure requirements in this SOP, particularly those relating to certain significant estimates, will be met or partly met by compliance with such other pronouncements.

## Definitions

.07 This SOP uses the following terms with the definitions indicated:

*Near term.* A period of time not to exceed one year from the date of the financial statements.

*Severe impact.* (Used in reference to current vulnerability due to certain concentrations. See paragraph .21.) A significant financially disruptive effect on the normal functioning of the entity. Severe impact is a higher threshold than material. Matters that are important enough to influence a user's decisions are deemed to be material,<sup>3</sup> yet they may not be so significant as to dis-

---

<sup>1</sup> However, see Accounting Principles Board (APB) Opinion No. 28, *Interim Financial Reporting*, paragraph 30, for guidance on disclosure of contingencies in summarized interim financial information of publicly traded companies.

<sup>2</sup> SEC Staff Accounting Bulletin 74 requires disclosure, both in Management's Discussion and Analysis (MD&A) and in the notes to the financial statements, concerning accounting standards that have been issued but that have not yet been adopted. Also, Auditing Interpretation No. 3 of SAS No. 1, section 410, "The Impact on an Auditor's Report of an FASB Statement Prior to the Statement Effective Date" (AICPA, *Professional Standards*, vol. 1, AU 9410.13-.18), addresses reporting considerations when financial statements will have to be restated in the future because an authoritative accounting pronouncement that is not yet effective will require retroactive application of its provisions by prior-period adjustment.

<sup>3</sup> FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, defines *materiality* as "the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement."

rupt the normal functioning of the entity. Some events are material to an investor because they might affect the price of an entity's capital stock or its debt securities, but they would not necessarily have a severe impact on (disrupt) the enterprise itself. The concept of severe impact, however, includes matters that are less than catastrophic.<sup>4</sup>

## Conclusions

.08 The Accounting Standards Executive Committee (AcSEC) of the AICPA has concluded that reporting entities should make disclosures in their financial statements beyond those now required or generally made in financial statements about the risks and uncertainties existing as of the date of those statements in the following areas:

- a. Nature of operations
- b. Use of estimates in the preparation of financial statements
- c. Certain significant estimates
- d. Current vulnerability due to certain concentrations

These four areas of disclosure are not mutually exclusive. The information required by some may overlap. Accordingly, the disclosures required by this SOP may be combined in various ways, grouped together, or placed in diverse parts of the financial statements, or included as part of the disclosures made pursuant to the requirements of other authoritative pronouncements.

.09 The following detailed discussion of the four areas of disclosure enumerated in paragraph .08 should be read in conjunction with the "Illustrative Disclosures" in appendix A [paragraph .27] of this SOP, which provide guidance for implementing them.

## Nature of Operations

.10 Financial statements should include a description of the major products or services the reporting entity sells or provides and its principal markets, including the locations of those markets. If the entity operates in more than one business, the disclosure should also indicate the relative importance of its operations in each business and the basis for the determination—for example, assets, revenues, or earnings. Not-for-profit organizations' disclosures should briefly describe the principal services performed by the entity and the revenue sources for the entity's services. Disclosures about the nature of operations need not be quantified; relative importance could be conveyed by use of terms such as *predominately*, *about equally*, or *major and other*.<sup>5</sup>

## Use of Estimates in the Preparation of Financial Statements

.11 Financial statements should include an explanation that the preparation of financial statements in conformity with GAAP requires the use of management's estimates.

## Certain Significant Estimates

.12 Various accounting pronouncements require disclosures about uncertainties addressed by those pronouncements. In particular, paragraphs 9 through

---

<sup>4</sup> Matters that are catastrophic include, for example, those that would result in bankruptcy.

<sup>5</sup> See paragraph B-17 in appendix B [paragraph .28] for a comparison of this SOP's disclosure requirements concerning nature of operations with the disclosure requirements for public companies in FASB Statement No. 14, *Financial Reporting for Segments of a Business Enterprise*.

12, and 17b, and footnote 6 of FASB Statement No. 5 specify disclosures to be made about contingencies<sup>6</sup> that exist at the date of the financial statements. The disclosure requirements of paragraphs 9 through 12 of Statement No. 5 are further clarified in FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*. In addition to disclosures required by FASB Statement No. 5 and other accounting pronouncements, this SOP requires disclosures regarding estimates used in the determination of the carrying amounts of assets or liabilities or in disclosure of gain or loss contingencies, as described below.

.13 Disclosure regarding an estimate should be made when known information available prior to issuance of the financial statements indicates that *both* of the following criteria are met:

- a. It is at least reasonably possible<sup>7</sup> that the estimate of the effect on the financial statements of a condition, situation, or set of circumstances that existed at the date of the financial statements will change in the near term due to one or more future confirming events.
- b. The effect of the change would be material to the financial statements.

.14 The disclosure should indicate the nature of the uncertainty and include an indication that it is at least reasonably possible<sup>8</sup> that a change in the estimate will occur in the near term.<sup>9</sup> If the estimate involves a loss contingency covered by FASB Statement No. 5, the disclosure also should include an estimate of the possible loss or range of loss, or state that such an estimate cannot be made. Disclosure of the factors that cause the estimate to be sensitive to change is encouraged but not required.

.15 Many entities use risk-reduction techniques to mitigate losses or the uncertainty that may result from future events. If the entity determines that the criteria in paragraph .13 are not met as a result of risk-reduction techniques, the disclosures described in paragraph .14 and disclosure of the risk-reduction techniques are encouraged but not required.

.16 This SOP's disclosure requirements are separate from and do not change in any way the disclosure requirements or criteria of FASB Statement No. 5; rather, the disclosures required under this SOP supplement the disclosures required under Statement No. 5 as follows:

- If an estimate (including estimates that involve contingencies covered by FASB Statement No. 5) meets the criteria for disclosure under paragraph .13 of this SOP, this SOP requires disclosure of an indication that it is at least reasonably possible that a change in the

---

<sup>6</sup> FASB Statement No. 5 defines a *contingency* as "an existing condition, situation, or set of circumstances involving uncertainty as to possible gain (hereinafter a 'gain contingency') or loss (hereinafter a 'loss contingency') to an enterprise that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the acquisition of an asset or the reduction of a liability or the loss or impairment of an asset or the incurrence of a liability."

<sup>7</sup> The term *reasonably possible* is used in this SOP consistent with its use in FASB Statement No. 5 to mean that the chance of a future transaction or event occurring is more than remote but less than likely.

<sup>8</sup> The words *reasonably possible* need not be used in the disclosures required by this SOP.

<sup>9</sup> FASB Statement No. 5 states in paragraph 17b that "adequate disclosure shall be made of contingencies that might result in gains, but care shall be exercised to avoid misleading implications as to the likelihood of realization."

estimate will occur in the near term; FASB Statement No. 5 does not distinguish between near-term and long-term contingencies.

- An estimate that does not involve a contingency covered by Statement No. 5, such as estimates associated with long-term operating assets and amounts reported under profitable long-term contracts, may meet the criteria in paragraph .13. This SOP requires disclosure of the nature of the estimate and an indication that it is at least reasonably possible that a change in the estimate will occur in the near term.

.17 Whether an estimate meets the criteria for disclosure under this SOP does not depend on the amount that has been reported in the financial statements, but rather on the materiality of the effect that using a different estimate would have had on the financial statements. Simply because an estimate resulted in the recognition of a small financial statement amount, or no amount, does not mean that disclosure is not required under this SOP.

.18 The following are examples of assets and liabilities and related revenues and expenses, and of disclosure of gain or loss contingencies included in financial statements that, based on facts and circumstances existing at the date of the financial statements, may be based on estimates that are particularly sensitive to change in the near term:

- Inventory subject to rapid technological obsolescence
- Specialized equipment subject to technological obsolescence
- Valuation allowances for deferred tax assets based on future taxable income
- Capitalized motion picture film production costs
- Capitalized computer software costs
- Deferred policy acquisition costs of insurance enterprises
- Valuation allowances for commercial and real estate loans
- Environmental remediation-related obligations
- Litigation-related obligations
- Contingent liabilities for obligations of other entities
- Amounts reported for long-term obligations, such as amounts reported for pensions and postemployment benefits
- Estimated net proceeds recoverable, the provisions for expected loss to be incurred, or both, on disposition of a business or assets
- Amounts reported for long-term contracts

The above list is not intended to be all-inclusive.

.19 Paragraph 5 of FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, provides examples of events or changes in circumstances that indicate that the recoverability of the carrying amount of an asset should be assessed.<sup>[10]</sup> [Revised, April 1996, to reflect the conforming changes necessary due to the issuance of recent authoritative literature.]

---

<sup>[10]</sup> [Footnote deleted.]

## Current Vulnerability Due to Certain Concentrations

.20 Vulnerability from concentrations arises because an entity is exposed to risk of loss greater than it would have had it mitigated its risk through diversification. Such risks of loss manifest themselves differently, depending on the nature of the concentration, and vary in significance.

.21 Financial statements should disclose the concentrations described in paragraph .22 if, based on information known to management prior to issuance of the financial statements, *all* of the following criteria are met:

- a. The concentration exists at the date of the financial statements.
- b. The concentration makes the enterprise vulnerable to the risk of a near-term severe impact.
- c. It is at least reasonably possible that the events that could cause the severe impact will occur in the near term.

.22 Concentrations, including known group concentrations, described below require disclosure if they meet the criteria of paragraph .21. (Group concentrations exist if a number of counterparties or items that have similar economic characteristics collectively expose the reporting entity to a particular kind of risk.) Some concentrations may fall into more than one category.

- a. *Concentrations in the volume of business transacted with a particular customer, supplier, lender, grantor, or contributor.* The potential for the severe impact can result, for example, from total or partial loss of the business relationship. For purposes of this SOP, it is always considered at least reasonably possible that any customer, grantor, or contributor will be lost in the near term.
- b. *Concentrations in revenue from particular products, services, or fund-raising events.* The potential for the severe impact can result, for example, from volume or price changes or the loss of patent protection for the particular source of revenue.
- c. *Concentrations in the available sources of supply of materials, labor, or services, or of licenses or other rights used in the entity's operations.* The potential for the severe impact can result, for example, from changes in the availability to the entity of a resource or a right.
- d. *Concentrations in the market or geographic area<sup>11</sup> in which an entity conducts its operations.* The potential for the severe impact can result, for example, from negative effects of the economic and political forces within the market or geographic area. For purposes of this SOP, it is always considered at least reasonably possible that operations located outside an entity's home country will be disrupted in the near term.

.23 Concentrations of financial instruments, and other concentrations not described in paragraph .22, are not addressed in this SOP. However, these other concentrations may be required to be disclosed pursuant to other authoritative pronouncements, such as FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*.

.24 Disclosure of concentrations meeting the criteria of paragraph .21 should include information that is adequate to inform users of the general na-

---

<sup>11</sup> FASB Statement No. 14, *Financial Reporting for Segments of a Business Enterprise*, paragraph 34, provides guidance on determining foreign geographic areas.

ture of the risk associated with the concentration. For those concentrations of labor (paragraph .22c) subject to collective bargaining agreements and concentrations of operations located outside of the entity's home country (paragraph .22d) that meet the criteria of paragraph .21, the following specific disclosures are required:

- For labor subject to collective bargaining agreements, disclosure should include both the percentage of the labor force covered by a collective bargaining agreement and the percentage of the labor force covered by a collective bargaining agreement that will expire within one year.
- For operations located outside the entity's home country, disclosure should include the carrying amounts of net assets and the geographic areas in which they are located.

Adequate information about some concentrations may already be presented in diverse parts of the financial statements. For example, adequate information about assets or operations located outside the entity's home country may be included in disclosures made to comply with FASB Statement No. 14. In accordance with paragraph .08 of this SOP, such information need not be repeated.

## Application of Disclosure Criteria

.25 An assessment of whether a disclosure is required should not be found to be in error simply as a result of future events. For example, reporting a concentration not followed by a severe impact does not imply that the disclosure should not have been made, because something that has only a reasonably possible chance of occurring obviously might not occur. Similarly, the occurrence of a severe impact related to a concentration not disclosed in the prior-year financial statements would not suggest noncompliance with this SOP's requirements if an appropriate judgment had been made that a near-term severe impact was not at least reasonably possible at the prior reporting date. In addition, a severe impact may arise from a concentration of which management did not have knowledge at the time the financial statements were issued.

## Effective Date

.26 This SOP is effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which this SOP is to be first applied. Early application is encouraged but not required.

Appendix A

Illustrative Disclosures

<i>Contents</i>	<i>Paragraph Numbers</i>
<b>Nature of Operations</b>	
Illustrative Disclosure A—Nature of Operations .....	A-2–A-4
Illustrative Disclosure B—Combined Disclosure: Nature of Operations and Customer Concentration .....	A-5–A-7
<b>Use of Estimates in the Preparation of Financial Statements</b>	
Illustrative Disclosure—Pervasiveness of Estimates .....	A-8–A-10
<b>Certain Significant Estimates</b>	
Illustrative Disclosure A—Inventories .....	A-11–A-16
Illustrative Disclosure B—Discontinued Operations: Assets Held for Sale .....	A-17–A-19
Illustrative Disclosure C—Specialized Manufacturing Equipment .....	A-20–A-23
Illustrative Disclosure D—Capitalized Software Costs .....	A-24–A-27
Illustrative Disclosure E—Environmental Remediation Liability .....	A-28–A-33
Illustrative Disclosure F—Guarantee of Debt. ....	A-34–A-36
Illustrative Disclosure G—Long-Term Construction Contract .....	A-37–A-42
Illustrative Disclosure H—Realizability of a Deferred Tax Asset .....	A-43–A-45
Illustrative Disclosure I—Litigation .....	A-46–A-48
<b>Current Vulnerability Due to Certain Concentrations</b>	
Illustrative Disclosure A—Supplier/Sources of Supply .....	A-49–A-52
Illustrative Disclosure B—Supplier/Sources of Supply .....	A-53–A-55
Illustrative Disclosure C—Patent .....	A-56–A-59
Illustrative Disclosure D—Source of Supply of Labor .....	A-60–A-62
Illustrative Disclosure E—Contributor .....	A-63–A-65
Illustrative Disclosure F—Geographic Area of Operations .....	A-66–A-68

**A-1.** The kinds of disclosures required by this SOP are illustrated below. Each illustrative disclosure is accompanied by a scenario in which the disclosure would likely be made or not made and by a discussion of how and why the illustrative disclosure complies with the requirements of this SOP or why no disclosure is required by this SOP.

## Nature of Operations

### *Illustrative Disclosure A—Nature of Operations*

**A-2. Scenario.** Conglomerate, Inc. is a United States-based multinational corporation. Conglomerate's principal lines of business are automotive products, aerospace products and technologies, textiles, and nonprescription health-care products. The principal markets for the company's automotive and aerospace products and technologies are European- and Far East-based industrial concerns. Textiles are sold primarily to U.S. clothing manufacturers, while nonprescription health-care products are sold to wholesale and retail distributors worldwide. The operations of the company in any one country are not significant in relation to the company's overall operations. The following illustrates disclosure of the nature of operations required by this SOP.

**A-3. Disclosure.** Conglomerate, Inc. is a multinational manufacturer and engineering concern. The company's principal lines of business are automotive products, aerospace products and technologies, textiles, and nonprescription health-care products, all of which are about equal in size based on sales. The principal markets for the automotive and aerospace products and technologies are European- and Far East-based industrial concerns. Textiles are sold primarily to domestic clothing manufacturers, while nonprescription health-care products are sold primarily to wholesale and retail distributors worldwide.

**A-4. Discussion.** This disclosure provides—

- a. Information necessary for users not familiar with the operations of the company to identify and consider the broad risks and uncertainties associated with the businesses and markets in which the company operates and competes. From the disclosures provided, financial statement users having a general knowledge of business matters should be able to assess that the company's product lines are subject to different and varied risks. Those financial statement users familiar with the businesses recognize the general risks associated with each of these businesses and their related markets.
- b. Information that facilitates the overall understanding of the financial information presented. This kind of disclosure could provide users with a basis for comparing an enterprise's financial information with that of competitors or with applicable industry statistics.
- c. Insight into the location of the company's principal markets, although on a broad scale. Because the company's markets are so diverse, it likely would not be useful to enumerate the specific locations of the company's markets. For this reason, the manner in which the information is disclosed in the illustrative disclosure is sufficient to meet the broad objectives of paragraph .10 of this SOP.

**Illustrative Disclosure B—Combined Disclosure: Nature of Operations and Customer Concentration**

**A-5. Scenario.** Smith Corporation, formerly Smith Munitions Corporation, was founded in 1940. At that time, Smith's principal business was the design and manufacture of artillery ammunition and other explosives. In 1959, commensurate with the evolution of its principal business to the design, engineering, and manufacture of military aircraft for sale to the U.S. government, Smith changed its name to Smith Corporation. Smith has one factory, located in New York. The following illustrates disclosure of the nature of operations required by this SOP.

**A-6. Disclosure.** **Smith Corporation is engaged principally in the design, engineering, and manufacturing of military aircraft and related peripheral equipment for sale primarily to the U.S. government.**

**A-7. Discussion.** This disclosure provides—

- a. Information needed by users who are not familiar with the operations of the enterprise to identify and consider the broad risks and uncertainties faced by all or most enterprises operating in a specific business or market, which in this case is the defense contracting business. From this disclosure, financial statement users having a general knowledge of business matters should know that the enterprise's business may be heavily affected by future changes in U.S. defense and foreign policies.
- b. Information that aids in the overall understanding of the other financial information presented. Certain accounting procedures involving estimation may apply only to particular industries or may be relevant in comparing a business enterprise's financial reports with those of business enterprises in other industries.
- c. Insight into the location of the company's principal product markets and information about its current vulnerability due to concentrations. In the illustration, users would be able to recognize and assess the company's dependency on sales to the U.S. government (assuming the loss of the government as a customer would result in a near-term severe impact to the company).

**Use of Estimates in the Preparation of Financial Statements****Illustrative Disclosure—Pervasiveness of Estimates**

**A-8. Scenario.** The following illustrates disclosure of the pervasiveness of estimates in the financial statements of all reporting entities.

**A-9. Disclosure.** **The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.**

**A-10. Discussion.** This disclosure is intended to inform users of the inherent uncertainties in measuring assets and liabilities and related revenues and expenses and contingent assets and liabilities, and that subsequent resolution

of some matters could differ significantly from the resolution that is currently expected. Such disclosure alerts users that uncertainties are present in the financial statements of all reporting entities.

### **Certain Significant Estimates**

*Note: Some of the following disclosures contain certain information that is already required to be disclosed under FASB Statement No. 5; in those cases, the FASB Statement No. 5 requirements are supplemented by an indication that it is at least reasonably possible that a change in an estimate will occur in the near term. Others may not be covered by FASB Statement No. 5.*

#### **Illustrative Disclosure A—Inventories**

**A-11. Scenario.** XYZ Corporation manufactures high technology stereo equipment. In June 19X7, one of XYZ's competitors introduced a new model stereo system with the same features as XYZ's Model A. The competitor's version sells for significantly less than XYZ's suggested retail price for Model A. The introduction of this product resulted in a sharp decrease in the sales volume of Model A. At December 31, 19X7, XYZ has accumulated significant inventory quantities beyond its normal short-term needs of its Model A system. Inventory for Model A (\$6 million) represents approximately 20 percent of XYZ's inventory at that date. The remaining 80 percent of XYZ's inventory consists of products experiencing only normal competitive pressures. XYZ has established provisions for obsolescence for this latter group of products in the normal course of business.

**A-12.** Management has developed a program to provide substantial dealer incentives on purchases of the Model A, which it expects will result in the sale of this inventory in the near term. Because of the existing high profit margin on its stereo systems, XYZ would continue to earn a marginal profit on sales of the Model A under the new program. It is also reasonably possible, however, that the program will not be wholly successful, and, accordingly, a material loss could ultimately result on the disposal of the inventory.

**A-13. Disclosure.** At December 31, 19X7, some portion of \$6 million of inventory of one of the company's products is in excess of XYZ's current requirements based on the recent level of sales. Management has developed a program to reduce this inventory to desired levels over the near term and believes no loss will be incurred on its disposition. No estimate can be made of a range of amounts of loss that are reasonably possible should the program not be successful.

**A-14. Discussion.** This situation meets the criteria for disclosure under paragraph .13 of this SOP because circumstances that existed at the date of the financial statements, including the decreasing sales volume and excessive quantities of inventory of Model A, make it at least reasonably possible that management's plan to liquidate its excess inventory without a loss will be less than fully successful and that such an outcome would have a near-term material effect on the enterprise's financial statements.

**A-15.** In this illustration, XYZ discloses the existence of potentially excess quantities of inventory at the date of the financial statements and indicates that the uncertainty is expected to be resolved in the near term. The disclosure is intended to provide users with insight into management's assessment of recoverability of the cost of inventories existing at the date of the financial statements. Although disclosure of the \$6 million carrying amount of the in-

ventory of Model A is not required because, based on the facts presented, \$6 million does not constitute a reasonable estimate of loss on the disposal of the inventory or the maximum amount in an estimated range of loss, disclosure of this amount is not misleading and may provide useful information.

**A-16.** Discussion of XYZ's provision for obsolescence for the remaining 80 percent of its inventory is not required because it is not considered reasonably possible that additional material losses on this inventory will occur.

### ***Illustrative Disclosure B—Discontinued Operations: Assets Held for Sale***

**A-17. Scenario.** Axel Industries, a manufacturer of automotive components and heavy trucks, currently has facilities in Michigan, Tennessee, and Ontario, Canada. As a result of weak demand in the automobile industry, Axel's management decided during the current year to discontinue Axel's automotive components business, which is located entirely at the company's Michigan facility. Axel has charged current operations with the estimated loss on discontinuing the business based, in part, on valuations by its investment banker and independent appraiser. After year end, Axel entered into negotiations to sell its Michigan facility to a Japanese automobile manufacturer and expects to sell the facility in the near term. The following illustrates disclosure of significant estimates and would likely appear as part of the disclosure of the business segment disposition made pursuant to APB Opinion 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*.

**A-18. Disclosure.** Discontinued operations include management's best estimates of the amounts expected to be realized on the sale of its automotive components business. [While the estimates are based on an analysis of the facilities, including valuations by independent appraisers and investment bankers, there have been limited recent sales of comparable properties to consider in preparing such valuations.<sup>12</sup>] The amounts the company will ultimately realize could differ materially in the near term from the amounts assumed in arriving at the loss on disposal of the discontinued operations.

**A-19. Discussion.** Determining a provision for discontinued operations required the use of assumptions and estimates. In this case, the disclosure is required because circumstances that existed at the date of the financial statements indicated it was at least reasonably possible that estimates of the amount ultimately to be realized on the sale of the facilities could differ in the near term from the current estimates used as a basis for recognizing the charge to income associated with management's disposal plan by an amount that would be material to the entity's financial statements.

### ***Illustrative Disclosure C—Specialized Manufacturing Equipment***

**A-20. Scenario.** Offshore Industries is a manufacturer of offshore drilling rigs and platforms. The company's manufacturing process requires significant specialized equipment, which it currently owns. As a result of a decline in the price of oil, the demand for its products and services has fallen dramatically in the past two years, resulting in a significant underutilization of its manufacturing capacity.

---

<sup>12</sup> This is an example of voluntary disclosure that is encouraged by paragraph .14 of this SOP.

**A-21.** The company depreciates its investments in specialized equipment based on its original estimate of the remaining useful lives of the equipment using the units-of-production method, since it believes that the exhaustion of usefulness of these specialized assets relates more to their use than to the passage of time. The company reevaluates these estimates in light of current conditions in accordance with generally accepted accounting principles. The company also monitors the policies of its major competitors and is aware that several have reported large write-downs of similar assets. Nevertheless, while the company believes that it is at least reasonably possible that its estimate that it will recover the carrying amount of those assets from future operations will change during the next year, it believes it is more likely that conditions in the industry will improve and that no write-down for impairment will be necessary.

**A-22. Disclosure.** Offshore's policy is to depreciate specialized manufacturing equipment (with a net book value of \$25 million at December 31, 19X7) over its remaining useful life using the units-of-production method and to evaluate the remaining life and recoverability of such equipment in light of current conditions.<sup>13</sup> [Given the excess capacity in the industry,<sup>14</sup>] it is reasonably possible that the company's estimate that it will recover the carrying amount of this equipment from future operations will change in the near term.

**A-23. Discussion.** In this illustration, the company acknowledges that the carrying amount of the specialized assets is subject to significant uncertainty based on current conditions. The uncertainty relates to the measurement of the specialized assets at the date of the financial statements, and the company's disclosure makes clear that it is at least reasonably possible that the carrying amount will change in the near term.

### ***Illustrative Disclosure D—Capitalized Software Costs***

**A-24. Scenario.** Software, Inc. develops and markets computer programs. In 19X5, it acquired a software company in a business combination accounted for as a purchase. A significant portion of the purchase price was allocated to (capitalized) Product A (present net book value of \$5 million), the most significant and profitable software program currently being marketed by the acquired company. Only nominal amounts of other software costs have been capitalized. Software, Inc. expects Product A and its derivatives to be among its most significant products over the next several years. However, a competitor has recently released a new product designed to compete directly with Product A. Software, Inc. amortizes the capitalized software costs of Product A by the greater of (a) the ratio that current gross revenues for a product bear to the total of current and anticipated future gross revenues for that product or (b) the straight-line method over the remaining estimated economic life of the product including the period being reported on, pursuant to FASB Statement No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*. The amount of the amortization computed for year 19X6 was equal to 20 percent of the beginning-of-the-year capitalized amount and was a significant component of cost of sales.

**A-25.** The segment of the computer software industry in which Software, Inc. operates is characterized by sales of products occurring primarily on the

---

<sup>13</sup> If this information is already disclosed elsewhere in the notes, it need not be repeated.

<sup>14</sup> This is an example of voluntary disclosure that is encouraged by paragraph .14

basis of customers' perceptions of the relative technical merits of competing products. Those perceptions are greatly influenced by product reviews in technical journals and advertising, and they can change rapidly. Innovative products have been introduced in recent years that have reduced quickly and significantly the volume of sales of pre-existing products in the same market niche. While management of Software, Inc. believes its estimates of future gross revenues and the estimated economic life of Product A used in the determination of the amortization of capitalized software costs are reasonable, new products introduced by its competitors, such as the one discussed in paragraph A-24, could have a significant near-term negative effect on such estimates. As a result, the amount of periodic amortization could increase in the near term in amounts that could be material to the enterprise's financial statements.

**A-26. Disclosure.** Software, Inc.'s policy is to amortize capitalized software costs by the greater of (a) the ratio that current gross revenues for a product bear to the total of current and anticipated future gross revenues for that product or (b) the straight-line method over the remaining estimated economic life of the product including the period being reported on.<sup>15</sup> It is reasonably possible that those estimates of anticipated future gross revenues, the remaining estimated economic life of the product, or both will be reduced significantly in the near term [due to competitive pressures].<sup>16</sup> As a result, the carrying amount of the capitalized software costs for Product A (\$5 million) may be reduced materially in the near term.

**A-27. Discussion.** In this illustration, the company acknowledges that the carrying amount of its capitalized software costs is subject to significant uncertainty. The uncertainty relates to estimates of future years' revenues and useful lives that are made at the date of the financial statements, and the company is aware that circumstances exist that could cause such estimates to change in the near term. The company's disclosure makes clear that it is at least reasonably possible that the carrying amount could be reduced in the near term.

### ***Illustrative Disclosure E—Environmental Remediation Liability***

**A-28. Scenario.** Ace Oil Company is a distributor of heating oil with four storage and distribution facilities located in Anystate. Federal, state, and local laws and regulations govern the operation of the company's facilities. The company has determined that, beginning in the coming year, a significant number of its storage tanks and a significant amount of its other equipment will need to be removed, replaced, or modified to satisfy regulations that go into effect in varying stages over the next seven years. In addition, the company has a present obligation to decontaminate the soil in the near term at its largest facility.

**A-29.** The company hired a consultant to evaluate the technological, regulatory, and legal factors involved. Based on the consultant's findings, the company estimated that total environmental expenditures over the next seven years related to the tanks and equipment will aggregate approximately \$5 million. Of this amount, approximately \$4.75 million represents capital expenditures, which are expected to be recoverable through operations. The existing tanks have a net book value of \$500,000, and the equipment has a net book

---

<sup>15</sup> If this information is already disclosed elsewhere in the notes, it need not be repeated.

<sup>16</sup> This is an example of voluntary disclosure that is encouraged by paragraph .14.

value of \$475,000. The cost of soil decontamination is estimated to be at least \$1 million, which is material to the company's operations, and may be as high as \$3 million. Exposure to legal liability to third parties is considered remote.

**A-30.** The consultant has demonstrated substantial experience with similar sites, and the technical aspects of upgrading storage facilities and decontaminating soil appear to be fairly straightforward.

**A-31. Disclosure.** The company will begin a project to decontaminate the soil at its Anytown, Anystate facility in the coming year. The company estimates the cost of decontamination to total at least \$1 million and has accrued that amount as an operating expense in the current year.<sup>17</sup> The ultimate cost [, however, will depend on the extent of contamination found as the project progresses and<sup>18</sup>] may be as much as \$3 million. The company expects decontamination to be substantially completed within one year.

**A-32. Discussion.** This disclosure informs financial statement users of the existence of the soil contamination problem at the financial statement date and indicates that the liability is susceptible to change in the near term. This SOP does not require disclosure of the capital commitment because it is not a present obligation for which an estimate is reflected in the company's financial statements.

**A-33.** Although, in this case, the near-term nature of the possible change is indicated by a statement that the company expects decontamination to be substantially completed within one year, an expectation that decontamination will take more than one year to complete would not preclude the estimate from being susceptible to near-term change. In such cases, the disclosure could be worded to specifically refer to the near term.

### ***Illustrative Disclosure F—Guarantee of Debt***

**A-34. Scenario.** Shipping Company operates a shipping center in Local City. In 19X0, Shipping decided to raise money for modernization of facilities through a debt offering. In order for the offering to take place, Smokestack Company, a local manufacturer, agreed to guarantee the bonds if Shipping's revenues were insufficient to pay debt service. In May 19X4 (four years later when the bonds had an outstanding balance of \$55 million), Shipping lost two of its major shipping customers, constituting 35 percent of its prior-year revenues, to a company in a neighboring port. At Smokestack's June 30, 19X4, year end, Shipping was directing substantial efforts toward finding new customers. It is reasonably possible, however, that Shipping will not replace the lost revenue in time to pay debt service installments at December 30, 19X4, and June 30, 19X5, totaling \$6 million.

**A-35. Disclosure.** In 19X0, Smokestack guaranteed the Series AA debt of Shipping Company, which operates a shipping center within Local City. Smokestack continues as guarantor of such debt totaling \$55 million. In May 19X4, Shipping Company lost two of its major customers. Although Shipping Company is directing substantial efforts toward obtaining new customers, it is at least reasonably possible that Shipping Company will not replace lost revenues sufficient to

---

<sup>17</sup> FASB Statement No. 5 states that "disclosure of the nature of an accrual [footnote omitted] made pursuant to the provisions of paragraph 8, and in some circumstances the amount accrued, may be necessary for the financial statements not to be misleading."

<sup>18</sup> This is an example of voluntary disclosure that is encouraged by paragraph .14.

make its December 19X4 and June 19X5 debt service payments totaling \$6 million. If so, the company will become responsible for repayment of at least a portion of that amount and possibly additional amounts over the debt term. No amount has been reported in the company's financial statements pending the outcome of Shipping Company's efforts during the next fiscal year.

**A-36. Discussion.** This example illustrates the potential near-term effect of a change in estimate of a contingent liability resulting from the guarantee of the debt of another entity. Shipping's loss of customers causes the potential for a near-term material change in that estimate within the next fiscal year. Although disclosure of Shipping's ongoing efforts to replace those customers is not required, this additional information may be presented.

**Illustrative Disclosure G—Long-Term Construction Contract**

**A-37. Scenario.** Rivet Construction Company is a nonpublic general contractor specializing in the construction of commercial buildings. Rivet has three long-term projects underway that are in various stages of completion. Rivet has a substantial history of making reasonably dependable estimates of the extent of progress towards completion, contract revenues, and contract costs, and it uses the percentage-of-completion method of accounting for all of its long-term contracts.

**A-38.** Shortly after December 31, 19X2, but before the 19X2 financial statements were issued, subsoil conditions were discovered at the site of Project A that will require Rivet to incur substantial additional, unbudgeted costs in completing the project. The nature of the subsoil problem is unusual in the region in which Rivet operates. The additional estimated costs are not considered to be a normal, recurring contract-accounting adjustment. Engineers have estimated the additional construction cost to be 10 to 40 percent of the original estimated construction cost, with 15 percent (\$1.5 million) being their best estimate, and delays in construction are expected to add an additional 3 to 7 percent to the cost of construction, depending on the time involved, with 5 percent (\$500,000) being the best estimate. Accordingly, Rivet has revised upward its estimate of costs to complete the project by \$2 million. Project A, which was begun in 19X1 under a fixed-price contract, is still expected to be completed in the coming year (19X3), and it is still expected to be profitable.

**A-39.** The following is a summary of financial data at December 31, 19X2, for Project A.

	<i>Before Discovery of Condition</i>	<i>After Discovery of Condition</i>
Contract price	\$15,000,000	\$15,000,000
Estimated total cost	10,000,000	12,000,000
Estimated gross profit	5,000,000	3,000,000
Costs incurred to date	6,400,000	6,400,000
Percentage of completion	64%	53%

Rivet's other two projects are proceeding as planned.

**A-40. Disclosure.** As a result of the discovery of unusual subsoil conditions at the site of Project A, estimated contract completion costs have been revised upward by \$2 million. [Due to uncertainties inherent

in the estimation process,<sup>19]</sup> it is at least reasonably possible that completion costs for Project A will be further revised in the near-term [by up to an additional \$2.7 million].<sup>20</sup>

**A-41. Discussion.** In addition to any disclosures regarding the change in estimates that might be required by APB Opinion 20,<sup>21</sup> the disclosure requirements of this SOP focus on the effects of possible near-term changes in estimates. Disclosure is required under this SOP because it is at least reasonably possible that the estimated cost of completing Project A will change in the near term and that the change will be material to the financial statements.

**A-42.** Disclosure of the potential for changes in other estimates used in determining amounts reported for Rivet's long-term contracts is not required because, given Rivet's history of making similar estimates, it is not considered at least reasonably possible that they will change in the near term by amounts that would be material to the financial statements.

### ***Illustrative Disclosure H—Realizability of a Deferred Tax Asset***

**A-43. Scenario.** XYZ Corporation develops, manufactures, and markets limited-use vaccines. The company has a dominant share of the narrow market it serves. As of December 31, 19X4, the company has no temporary differences and has aggregate loss carryforwards of \$12 million that originated in prior years and that expire in varying amounts between 19X5 and 19X7. As of December 31, 19X4, the company has a deferred tax asset of \$4.8 million that represents the benefit of the remaining \$12 million in loss carryforwards, and it has concluded at that date that a valuation allowance is unnecessary. The loss carryforwards arose during the company's development stage when it incurred high levels of research and development expenses prior to commencing sales. While the company has earned, on average, \$6 million income before tax (taxable income before carryforwards) in each of the last five years, future profitability in this competitive industry depends on continually developing new products. The company has a number of promising new vaccines under development, but it is aware that other companies recently began testing vaccines that would compete with the vaccines being developed by the company as well as products that will compete with the vaccines that are currently generating the company's profits. Rapid introduction of competing products or failure of the company's development efforts could reduce estimates of future profitability in the near term, which could affect the company's ability to fully utilize its loss carryforward.

**A-44. Disclosure.**<sup>22</sup> The company has recorded a deferred tax asset of \$4.8 million reflecting the benefit of \$12 million in loss carryforwards, which expire in varying amounts between 19X5 and 19X7. Realization is dependent on generating sufficient taxable income prior to expiration of the loss carryforwards. Although realization is not assured, management believes it is more likely than not that all of

---

<sup>19</sup> This is an example of voluntary disclosure that is encouraged by paragraph .14.

<sup>20</sup> As this contract is still expected to be profitable, the estimate does not involve a loss contingency covered by FASB Statement No. 5. Accordingly, disclosure of an estimate of the range of the possible change in estimate is not required.

<sup>21</sup> APB Opinion 20, *Accounting Changes*, paragraph 33, requires or recommends, depending on the estimates involved, disclosure of the effect of significant revisions of estimates if the effect is material.

<sup>22</sup> In addition to other disclosures, information as to the amount of loss carryforwards and their expiration dates and the amount of any valuation allowance with respect to the recorded deferred tax asset is required under FASB Statement No. 109, *Accounting for Income Taxes*.

the deferred tax asset will be realized. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

**A-45. Discussion.** This disclosure informs users that (a) realization of the deferred tax asset depends on achieving a certain minimum level of future taxable income within the next three years and (b) although management currently believes that achievement of the required future taxable income is more likely than not, it is at least reasonably possible that this belief could change in the near term, resulting in establishment of a valuation allowance.

### **Illustrative Disclosure I—Litigation**

**A-46. Scenario.** ABC Company is the defendant in litigation involving a major competitor claiming patent infringement. The suit claims damages of \$200 million. Discovery has been completed, and ABC is engaged in settlement discussions with the plaintiff. ABC has made an offer of \$5 million to settle the case, which offer was rejected by the plaintiff; the plaintiff has made an offer of \$35 million to settle the case, which offer was rejected by ABC. Based on the expressed willingness of the plaintiff to settle the case along with information revealed during discovery and the likely cost and risk to both sides of litigating, the company believes that it is probable the case will not come to trial. Accordingly, the company has determined that it is probable that it has some liability. The company's reasonable estimate of this liability is a range between \$10 million and \$35 million, with no amount within that range a better estimate than any other amount; accordingly, \$10 million was accrued.

**A-47. Disclosure.** On March 15, 19X1, the DEF Company filed a suit against the company claiming patent infringement. While the company believes it has meritorious defenses against the suit, the ultimate resolution of the matter, which is expected to occur within one year, could result in a loss of up to \$25 million in excess of the amount accrued.<sup>23</sup>

**A-48. Discussion.** FASB Statement No. 5 requires accrual of a loss contingency and disclosure of the nature of the contingency, the exposure to loss in excess of the amount accrued, and, depending on the circumstances, the amount accrued. This SOP requires disclosure of an indication that it is at least reasonably possible that a change in the company's estimate of its probable liability could occur in the near term.

### **Current Vulnerability Due to Certain Concentrations**

*Note: The following are illustrations of the disclosures required by paragraph .21 of this SOP. Some of the concentrations described may fall into more than one of the categories of concentrations given in paragraph .22, a through d.*

### **Illustrative Disclosure A—Supplier/Sources of Supply**

**A-49. Scenario.** Hi-Tech Corp. is a manufacturer of electronic equipment in which integrated circuits are an important component. Substantially all of Hi-Tech's customers require that only those vendors that meet quality criteria be used as sources for integrated circuits. Hi-Tech currently buys all of its integrated circuits from one manufacturer in the Far East, and no long-term sup-

---

<sup>23</sup> See footnote 17 of this Appendix.

ply contract exists. There are only a limited number of manufacturers of these particular integrated circuits, and a change of supplier could significantly disrupt the business due to the time it would take to locate and qualify a new vendor.

**A-50. Disclosure.** The company currently buys all of its integrated circuits, an important component of its products, from one supplier. Although there are a limited number of manufacturers of the particular integrated circuits, management believes that other suppliers could provide similar integrated circuits on comparable terms. A change in suppliers, however, could cause a delay in manufacturing and a possible loss of sales, which would affect operating results adversely.

**A-51. Discussion.** Although other sources of supply of this particular kind of integrated circuit are currently available, the limited number of such sources and the time it takes to qualify new vendors makes Hi-Tech currently vulnerable to the risk of a near-term severe impact.

**A-52.** Disclosure is required because it is considered at least reasonably possible, based on information known to management prior to issuance of the financial statements, that the events that could cause the severe impact will occur.

### ***Illustrative Disclosure B—Supplier/Sources of Supply***

**A-53. Scenario.** Minnesota Company manufactures various products in which wheat is an important raw material. It currently buys 80 percent of its wheat from one supplier, but numerous alternate sources of supply are readily available on comparable terms.

**A-54. Disclosure.** (No disclosure is required.)

**A-55. Discussion.** The concentration exists at the date of the financial statements, and an inability to obtain wheat could result in a near-term severe impact. No disclosure is required, however, because numerous alternative suppliers are available and, therefore, it is not considered at least reasonably possible that events that could cause a near-term severe impact will occur.

### ***Illustrative Disclosure C—Patent***

**A-56. Scenario.** Felt Pharmaceutical Company is a national pharmaceutical manufacturer headquartered in Atlanta, Georgia. The company markets a wide range of pharmaceutical products. One of its better-known name-brand products, a significant source of profits and cash flow, is an antibiotic on which there is a patent that will expire in six months. Competitors are preparing to enter the market with generic alternatives when Felt's patent expires, and the concentration therefore has the potential for a severe impact.

**A-57. Disclosure.** Felt Pharmaceutical Company is a national pharmaceutical manufacturer with sales throughout the United States. The patent on one of its major products expires next year. This product accounts for approximately one-third [or "a significant portion"] of the company's revenues and a higher percentage of its gross profit.

**A-58. Discussion.** The disclosure focuses on the nature of the business and on Felt's current vulnerability due to a concentration of its patented products. Disclosure is required because the concentration exists at the date of the finan-

cial statements, because the effect on the company's cash flows and profitability of competitors entering the market when the patent expires could be a severe impact, and because it is considered at least reasonably possible that the events that could cause the severe impact will occur in the near term.

**A-59.** Because the risk is evident from the description of the concentration, no further explanation of the risk is necessary.

### ***Illustrative Disclosure D—Source of Supply of Labor***

**A-60. Scenario.** Team Company is a manufacturer of industrial hardware. The contract with the union representing Team's labor force is due to expire in the coming year. Over the past thirty years, Team has, in rare instances, been affected by work stoppages in the course of contract negotiations; they have always been of short duration, and none has had a significant effect on Team's financial statements. Although management expects that there will initially be some differences between its offer to the union and union demands, based on preliminary discussions with union leaders, management believes it is very unlikely that those differences will result in a protracted conflict.

**A-61. Disclosure.** (No disclosure is required.)

**A-62. Discussion.** Although the concentration of labor exists at the date of the financial statements and it could result in a severe impact in the near term due to the potential of a protracted work stoppage, no disclosure is required because it is not considered at least reasonably possible in the light of past experience and current conditions that a protracted work stoppage will take place.

### ***Illustrative Disclosure E—Contributor***

**A-63. Scenario.** Zebra Zoo, a not-for-profit organization, is supported by contributions from the public. In the current year, two contributors provided 35 percent of the organization's combined revenues.

**A-64. Disclosure.** Approximately 35 percent of the organization's combined revenues were provided by two contributors.

**A-65. Discussion.** Disclosure is required because the two contributors provided a significant portion of the organization's revenues. As noted in paragraph .22, it is always considered reasonably possible that a customer, grantor, or contributor will be lost in the near term.

### ***Illustrative Disclosure F—Geographic Area of Operations***

**A-66. Scenario.** Offshore Productions, Inc. (Offshore), a Delaware corporation, designs and manufactures optical lenses, which it markets throughout the United States. Substantially all of its manufacturing operations are carried out in a single facility, which is located in Switzerland and which is owned by Offshore's subsidiary. Offshore does not carry insurance for risks of loss. Offshore's consolidated balance sheet includes \$20 million representing the net assets of those operations.

**A-67. Disclosure.** Included in the company's consolidated balance sheet at December 31, 19X4, are the net assets of the company's manufacturing operations, all of which are located in a single facility in Switzerland and which total approximately \$20 million.<sup>24</sup>

<sup>24</sup> The disclosures required by this SOP for this scenario may have been met, or partly met, by satisfying the requirements of Accounting Research Bulletin (ARB) 43, chapter 12, "Foreign Operations and Foreign Exchange." Furthermore, for public companies, the disclosures required by this SOP for this scenario may also have been met, in part, by satisfying the requirements of FASB Statement No. 14, *Financial Reporting for Segments of a Business Enterprise*.

**A-68. Discussion.** All of Offshore's specialized manufacturing capacity is concentrated in a single facility. As noted in paragraph .22, it is always considered at least reasonably possible that the use of a facility located outside of an entity's home country could be disrupted in the near term. Due to the specialized nature of the assets, it would not be possible to find replacement capacity quickly. Accordingly, loss of the facility could produce a near-term severe impact to Offshore. This disclosure informs financial statement users of that concentration of operations in a particular geographic area and informs them of the risks and uncertainties associated with the concentration. Because the concentration is one of operations located outside of Offshore's home country, the disclosure also sets forth the carrying amount of the net assets, as required by paragraph .24 of this SOP.

## Appendix B

### Background Information and Basis for Conclusions

**B-1.** FASB Statement of Financial Accounting Concepts No. 1, *Objectives of Financial Reporting by Business Enterprises*, states that financial reporting should “provide information that is useful to present and potential investors and creditors and other users in making rational investment, credit, and similar decisions” (paragraph 34). To support that decision-making process, financial reports should help such users “assess the amounts, timing, and uncertainty of prospective net cash inflows to the related enterprise” (paragraph 37) by providing “information about the economic resources of an enterprise, the claims to those resources...and the effects of transactions, events, and circumstances that change resources and claims to those resources” (paragraph 40). Without additional disclosure in financial reports about significant risks and uncertainties, these objectives may not be fully met in today’s environment.

**B-2.** Recognizing that a riskier business and economic climate equates to a riskier investment and lending climate, users increasingly are asking that financial statements include more information to help them assess the risks and uncertainties concerning a reporting entity’s future cash flows and results of operations. These requests are underscored in calls for an “early warning system” expressed in the financial press and in congressional hearings.

**B-3.** No system of reporting can provide early warnings of all future detrimental events. Indeed, management may be unaware, and reasonably so, of some significant risks and uncertainties. And, clearly, financial statements should not be burdened in an attempt to describe every possible risk and uncertainty facing the reporting entity.

**B-4.** But such limitations should not prevent users from receiving improved disclosures concerning significant risks and uncertainties. Their existence merely means that any new disclosure requirements must focus on what is important. New disclosure requirements should effectively separate the significant matters that warrant reporting from the host of lesser risks and uncertainties that do not.<sup>25</sup> AcSEC believes that the requirements in this SOP meet those objectives.

**B-5.** In reaching the conclusions in this SOP, AcSEC considered and evaluated users’ reliance on financial information, sources of financial information, current accounting and disclosure requirements, current SEC requirements, and users’ perceptions of the kinds of information that should be presented in financial statements.

### Users’ Reliance on Financial Information

**B-6.** Information in financial statements, shaped by generally accepted accounting principles (GAAP) and, for SEC registrants, by the additional regulatory requirements of the Commission, is considered important to users in making investment and lending decisions. Financial statements provide information about certain current conditions and trends that help users in pre-

---

<sup>25</sup> This SOP does not prohibit disclosure of matters it does not require to be disclosed either because they do not meet the specified screening criteria or because they relate to risks and uncertainties that are outside the scope of this SOP.

dicting reporting entities' future cash flows and results of operations. The quality of users' predictions depends to a significant degree on their assessment of the risks and uncertainties inherent in entities' operations and of the information about those operations that financial reporting provides.

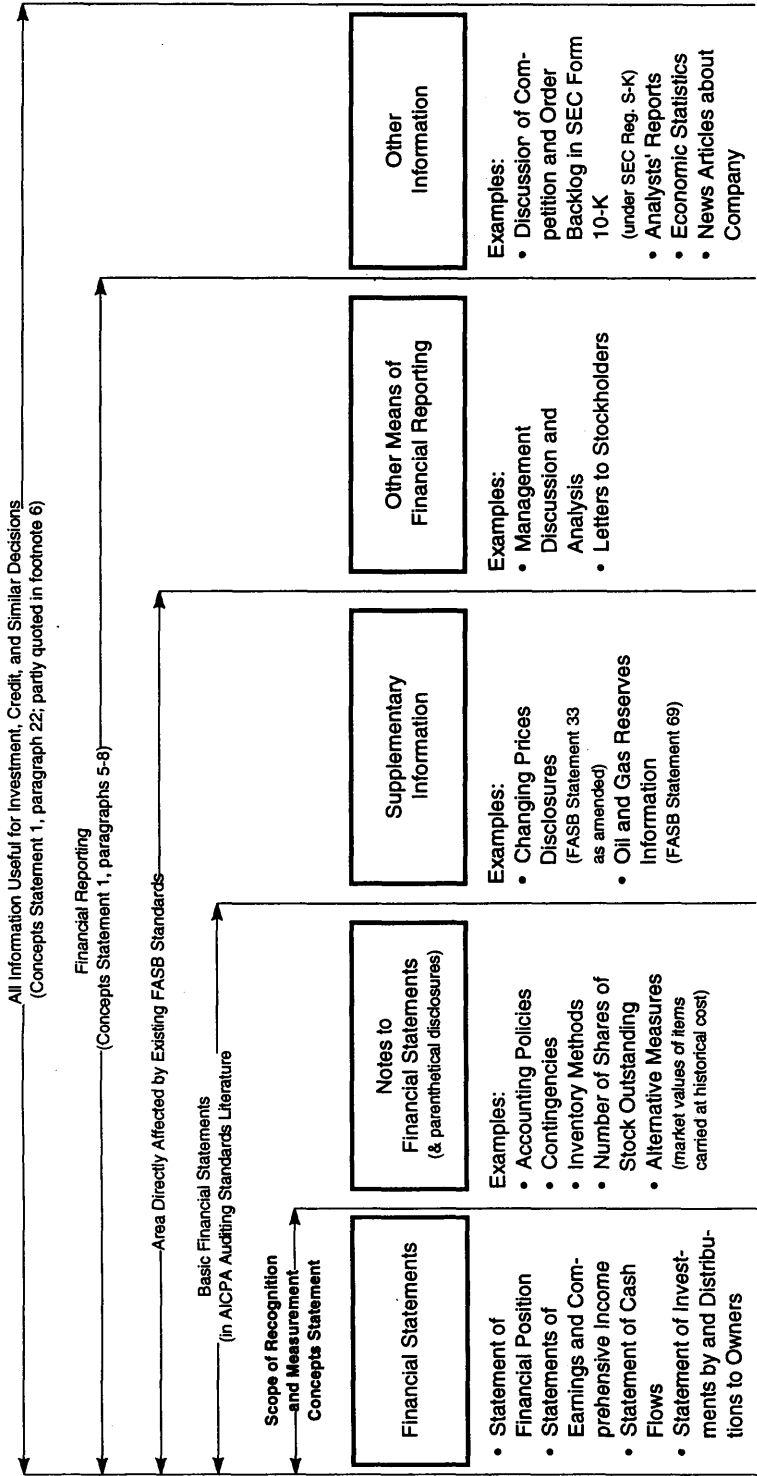

**B-7.** Financial reporting largely reflects the effects of past transactions and other events that have already affected a reporting entity. Such information can help users in assessing the future. But that does not mean the future can be predicted merely by extrapolating past trends or relationships. Indeed, volatility in the economic environment almost always means that simply extrapolating past trends and relationships will lead to inaccurate predictions. Users need to assess all currently available information to form their own expectations about the future and its relation to the past. Forming expectations—making predictions—is a vital part of the decision process. But it is a function of financial analysis, not of financial reporting. Furthermore, financial reporting is only one source of information required for making investment and credit decisions.

**B-8.** Reporting entities and those who have economic interests in them are affected by many factors that interact in complex ways. Those who use financial information for business and economic decisions need to combine information provided by financial reports with pertinent information from other sources, including additional information provided by issuers, financial analysts' reports, business and trade publications, and reports of macroeconomic and other local, national, and international events.

## Sources of Financial Information

**B-9.** Financial reporting encompasses the financial statements and notes, required information supplementary to the financial statements, and other information, such as that included in Management's Discussion and Analysis (MD&A), which the SEC requires publicly held business enterprises to provide in their annual and quarterly reports. Additional sources of information include company releases, current information filings of publicly held business enterprises, investment advisory services, analysts' reports, the financial press, general economic statistics, and general news reports.

**B-10.** The major sources of financial information and their relationships for business and not-for-profit entities are illustrated in the following diagram, taken from FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*.

[Source: FASB Concepts Statement No. 5, p. 5]

## Current Accounting Requirements

**B-11.** Disclosing information to help users assess major risks and uncertainties is consistent with the established objectives of financial reporting, and some such information is already presented in financial statements. Such information includes, for example, information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk, related party disclosures and information about receivables, leases, pensions, postretirement benefits, and commitments and contingencies. In addition, publicly held business enterprises are required to disclose in their financial statements segment information and information about foreign operations, export sales, and major customers, which, among other things, helps users to assess risks and uncertainties. This SOP, however, is intended to extend disclosures beyond those currently required and to help users discern those risks that are of particular importance.

### *Nature of Operations*

**B-12.** Current GAAP (FASB Statement No. 14, *Financial Reporting for Segments of a Business Enterprise*) requires a public business enterprise to disclose the major types of products and services that generate revenues, that is, the nature of its businesses, as part of segment information in its financial statements, even if the business enterprise operates in only one industry.<sup>26</sup> Information presented includes a description of the types of goods or services provided, operating revenues, operating income or loss, net income or loss, net working capital, and total assets for each segment. But other reporting entities are not required to disclose such information.<sup>27</sup> Thus, financial statement users now sometimes cannot discern the nature of the operations of such other entities from information presented in their financial statements.

**B-13.** Information about the nature of operations is helpful because the various kinds of businesses in which reporting entities operate have diverse degrees and kinds of risks. Certain of these risks are inherent to the business in which an entity is engaged. Simply by knowing the nature of an entity's business and the principal markets for its products or services, a financial statement user is alerted, indirectly, about the risks common to that business.

**B-14.** Some have expressed concerns about whether this SOP conflicts with FASB Statement No. 21, *Suspension of the Reporting of Earnings per Share and Segment Information by Nonpublic Enterprises*. AcSEC believes that, while the information that this SOP requires to be disclosed concerning the nature of a reporting entity's operations overlaps in certain respects the information public business enterprises are required to report under FASB Statement No. 14, it is significantly different in other respects. Accordingly, AcSEC does not believe this SOP conflicts with Statement No. 21.

**B-15.** Further, AcSEC notes that, for public business enterprises that already disclose information about the nature of their operations pursuant to FASB Statement No. 14, this SOP requires disclosure of additional information about the nature of their operations.

---

<sup>26</sup> The FASB currently has on its agenda a project on disaggregated disclosures, which is reconsidering issues related to FASB Statement No. 14.

<sup>27</sup> FASB Statement No. 21, *Suspension of the Reporting of Earnings per Share and Segment Information by Nonpublic Enterprises*, suspended the segment information reporting requirements of FASB Statement No. 14 for nonpublic enterprises.

**B-16.** The disclosure required by paragraph .10 of this SOP focuses on the entity's principal markets, including their locations. Current segment information for business enterprises, in contrast, focuses on the nature of the segments' operations and their identifiable assets and the geographic location of assets outside the enterprise's home location. Disclosure of the locations of a business or not-for-profit entity's principal markets provides information useful in assessing risks and uncertainties related to the environments in which the entity operates. The risks and the uncertainties associated with selling products and services in various regions in the United States may differ significantly. And they do differ significantly from the risks and the uncertainties in selling products and services outside the United States. Knowing those environments in which an entity sells its products or provides services helps users of financial reports to assess certain risks based on day-to-day national and world events.

**B-17.** The following table compares and contrasts the information required of public companies by FASB Statement No. 14 with paragraph .10.

**Comparison of Disclosure Requirements:  
FASB Statement No. 14 (Segment Reporting) Versus  
Paragraph .10 of this SOP**

<i>Disclosure</i>	<i>FASB Statement No. 14</i>	<i>Paragraph .10</i>
Description of the types of products or services sold	X	X
Revenue, profitability, identifiable assets, and other related disclosures for each reportable segment	X	*
Revenue, profitability, identifiable assets for foreign operations, by geographic area	X	†
Export sales by domestic operations, by geographic area	X	
Significant sales to single customer, foreign government, or domestic governmental agency	X	‡
Identification of principal markets		X
Description of location of principal markets		X

\* Paragraph .10 requires an indication of the relative importance of operations in each business.

† This SOP requires disclosure of current vulnerability due to concentrations in the market or geographic area in which an entity conducts its operations if the criteria in paragraph .21 are met.

‡ This SOP requires disclosure of current vulnerability due to concentrations of customers if the criteria in paragraph .21 are met.

**B-18.** AcSEC considered whether disclosure of an entity's principal operating locations would be informative to financial statement users and should, therefore, be included in paragraph .10. AcSEC concluded that, although in certain circumstances such information would be relevant, generally it would not be. In addition, disclosure of an entity's principal operating locations would be required under paragraph .21 (current vulnerability due to certain concen-

trations) in circumstances where operating in that particular environment created substantive near-term risk to the entity. Knowing, however, that a manufacturing plant is located in Dallas, Texas, for example, was not considered particularly relevant information. In contrast, knowing where a residential housing construction contractor's principal market is located was considered to be highly relevant. As a result, disclosure of the location of principal markets was chosen by AcSEC for inclusion in paragraph .10, while disclosure of the location of principal operating units was considered unnecessary.

### ***Use of Estimates in the Preparation of Financial Statements***

**B-19.** Auditors are required under generally accepted auditing standards (GAAS)<sup>28</sup> to acknowledge in their standard reports the use of estimates in the preparation of financial statements. AcSEC has concluded, however, that an explanation that the preparation of financial information requires the use of estimates and assumptions should be included in the financial statements by the reporting entity to inform users of the nature and limitations of those financial statements. AcSEC acknowledges that the disclosure would usually be standardized. AcSEC nevertheless believes it would help users make sounder use of financial statements.

**B-20.** There is a need to communicate explicitly to users of financial reports that the inescapable use of estimates in the preparation of financial information, including the estimation of fair and, in some cases, market values for assets carried at such bases, results in the presentation of a number of approximate rather than exact amounts. If users understand better the inherent limitations on precision in financial statements, they will be better able to make decisions.

**B-21.** Estimates inherent in the current financial reporting process inevitably involve assumptions about future events. For example, accruing income for the current period under a long-term contract requires an estimate of the total profit to be earned on the contract. For another example, carrying inventories at the lower of cost or market is based on an assumption that there will be sufficient demand for that product in the future to be able to sell the quantity on hand without incurring losses on the sales or, if market is used, that it can be estimated. Making reliable estimates for such matters is often difficult even in periods of economic stability; it is more so in periods of economic volatility. Although many users of financial reports are aware of that aspect of financial reporting, others often assume an unwarranted degree of reliability in financial statements. The disclosure required by this SOP should help dispel any such erroneous assumptions.

**B-22.** A number of publicly held business enterprises now include management reports in annual reports to stockholders. Many such reports and letters state that estimates and assumptions are required to prepare financial statements in conformity with GAAP. AcSEC acknowledges that development, but it believes the disclosure should be mandated and included in the notes to financial statements.

### ***Certain Significant Estimates***

**B-23.** FASB Statement No. 5 requires reporting entities to disclose certain loss contingencies, as follows:

---

<sup>28</sup> SAS No. 58, *Reports on Audited Financial Statements*, requires auditors to include in their standard reports a statement that an audit includes "assessing . . . significant estimates made by management."

If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, disclosure of the contingency shall be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred.<sup>6</sup> The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. [Emphasis added.] [FASB Statement No. 5, paragraph 10]

Footnote 6 to Statement No. 5 states:

For example, disclosure shall be made of any loss contingency that meets the condition in paragraph 8(a) but that is not accrued because the amount of loss cannot be reasonably estimated (paragraph 8(b)). Disclosure is also required of some loss contingencies that do not meet the condition in paragraph 8(a)—namely, those contingencies for which there is a *reasonable possibility* that a loss may have been incurred even though information may not indicate that it is *probable* that an asset has been impaired or a liability had been incurred at the date of the financial statements. [Emphasis in original.]

FASB Statement No. 5 defines loss contingencies as:

an existing condition, situation, or set of circumstances involving uncertainty as to possible . . . loss . . . to an enterprise that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the acquisition of an asset or the reduction of a liability or the loss or impairment of an asset or the incurrence of a liability. [paragraph 1]

The recognition and disclosure requirements of Statement No. 5 are further clarified in FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*. This SOP does not change the requirements of FASB Statement No. 5 or FASB Interpretation No. 14; the requirements of this SOP supplement those requirements. For example, if a loss contingency meets the criteria for disclosure under both Statement No. 5 and paragraph 13 of this SOP, this SOP requires disclosure that it is at least reasonably possible that future events confirming the fact of the loss or the change in the estimated amount of the loss will occur in the near term.

**B-24.** This SOP also requires disclosure of matters that may not be deemed to be contingencies requiring disclosure under current GAAP. FASB Statement No. 5 distinguishes loss contingencies from other uncertainties inherent in making accounting estimates, as follows:

Not all uncertainties inherent in the accounting process give rise to contingencies as that term is used in this Statement. Estimates are required in financial statements for many on-going and recurring activities of an enterprise. The mere fact that an estimate is involved does not of itself constitute the type of uncertainty referred to in the definition [of a contingency] in paragraph 1. For example, the fact that estimates are used to allocate the known cost of a depreciable asset over the period of use by an enterprise does not make depreciation a contingency; the eventual expiration of the utility of the asset is not uncertain. Thus, depreciation of assets is not a contingency as defined in paragraph 1, nor are such matters as recurring repairs, maintenance, and overhauls, which interrelate with depreciation. Also, amounts owed for services received, such as advertising and utilities, are not contingencies even though the accrued amounts may have been estimated; there is nothing uncertain about the fact that those obligations have been incurred. [paragraph 2]

FASB Statement No. 5 acknowledges, however, that the distinction between uncertainties inherent in making accounting estimates and uncertainties that give rise to a contingency is not always clear:

A question has been raised whether uncollectibility of receivables and product warranties constitute contingencies within the scope of this Statement. The Board recognizes that uncertainties associated with uncollectibility of some receivables and some product warranties are likely to be, in part, inherent in making accounting estimates (described in paragraph 2) as well as, in part, the type of uncertainties that give rise to a contingency (described in paragraph 1). The Board believes that no useful purpose would be served by attempting to distinguish between those two types of uncertainties for purposes of establishing conditions for accrual of uncollectible receivables and product warranties. Consequently, those matters are deemed to be contingencies within the definition of paragraph 1 and should be accounted for pursuant to the provisions of this Statement. [paragraph 58]

**B-25.** AcSEC believes that requiring disclosure of certain estimates not deemed to be covered by current GAAP, for example, some amounts reported for long-term contracts, would enhance the usefulness of financial statements in assessing risks and uncertainties.

**B-26.** Among the matters specifically excluded from the scope of FASB Statement No. 5 is the write-down of operating assets. Paragraph 31 of Statement No. 5 states:

In some cases, the carrying amount of an operating asset not intended for disposal may exceed the amount expected to be recoverable through future use of that asset even though there has been no physical loss or damage of the asset or threat of such loss or damage. For example, changed economic conditions may have made recovery of the carrying amount of a productive facility doubtful. The question of whether, in those cases, it is appropriate to write down the carrying amount of the asset to an amount expected to be recoverable through future operations is not covered by this Statement.

The requirements of paragraph .13 of this SOP are applicable to long-lived assets whose value may become impaired in the near term.

**B-27.** On November 29, 1993, the FASB issued an exposure draft of a Proposed Statement of Financial Accounting Standards, *Accounting for the Impairment of Long-Lived Assets*. That exposure draft is expected to result ultimately in the promulgation of authoritative guidance on recognition, measurement, and disclosure requirements for long-lived assets whose carrying amounts may not be recoverable. Paragraphs 102 and 103 of the exposure draft state:

In 1985, the AICPA established a task force to consider the need for improved disclosures about risks and uncertainties that affect companies and the manner in which they do business. In July 1987, the task force published *Report of the Task Force on Risks and Uncertainties*, which concluded that companies should be making early warning disclosures as part of their financial statements. In March 1993, AcSEC issued an exposure draft of a proposed Statement of Position, *Disclosure of Certain Significant Risks and Uncertainties and Financial Flexibility*. That proposed SOP would require entities to include in their financial statements disclosures about (a) the nature of their operations, (b) the use of estimates in the preparation of their financial statements, (c) certain significant estimates, (d) current vulnerability due to concentrations, and (e) financial flexibility.

Board members observed that for some impairments early warning disclosures would be useful. However, they were in general agreement, based on comment letters and testimony, that it would not be possible to adequately describe those situations and develop adequate disclosure requirements. Some Board members also believed that the proposed SOP is a much broader disclosure requirement that could have implications in several other Board projects. Board members therefore concluded not to require early warning disclosures in this Statement.

AcSEC notes that, while the exposure draft would not require early warning disclosures concerning impairment of long-lived assets, it acknowledges the usefulness of such disclosures and recognizes that the disclosure requirement of this SOP is a much broader requirement than the FASB considered.

### **Current Vulnerability Due to Certain Concentrations**

**B-28.** Current GAAP requires disclosure of certain concentrations (for example, credit concentrations under FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, and information about major customers under FASB Statement No. 14 for public enterprises) but does not specifically address disclosures of concentrations on a comprehensive basis. This SOP addresses known concentrations more comprehensively but stops short of requiring disclosure of all concentrations.

**B-29.** Some believe that disclosure of economic dependency is required under current literature. A requirement to disclose economic dependency was included in SAS No. 6, *Related Party Transactions*. But, partly in response to the issuance of FASB Statement No. 57, *Related Party Transactions*, the AICPA superseded SAS No. 6 in August 1983 with the issuance of SAS No. 43, *Omnibus Statement on Auditing Standards—1983*, which, among other things, “remov[ed] guidance on accounting considerations and disclosure standards . . . provided in FASB Statement of Financial Accounting Standards No. 57, *Related Party Disclosures*.” Statement No. 57 states, in turn, that it “does not address the issues pertaining to economic dependency.”

**B-30.** The FASB observed in Statement No. 21, *Suspension of the Reporting of Earnings per Share and Segment Information by Nonpublic Enterprises*, which was issued in April 1978 and which eliminated the requirement for nonpublic enterprises to disclose information about major customers, that FASB Statement No. 21 “does not affect the disclosure of information about economic dependency when such disclosure may be necessary for a fair presentation.” That observation, however, refers to the now-superseded SAS No. 6.

**B-31.** AcSEC believes that disclosure in the notes to financial statements about current vulnerability due to concentrations of customers, grantors, and contributors is necessary for a fair presentation when the criteria in paragraph .21 of this SOP are met. Assessing the likelihood of loss of relationships with these parties would often present difficulties, however. Accordingly, for purposes of this SOP, it is always considered at least reasonably possible that any of these relationships will be lost in the near term. Similarly, because of the difficulty in assessing the political and economic risks associated with operations located outside an entity’s home country, for purposes of this SOP, it is always considered at least reasonably possible that those operations might be disrupted in the near term. This SOP does not, however, prohibit entities from also stating in disclosures of concentrations related to customers, grantors, or contributors or operations located outside the entity’s home country that the entity does not expect that the business relationship will be lost or does not expect that the foreign operations will be disrupted if such is the case.

**B-32.** AcSEC considered whether it would be useful to establish quantitative criteria for disclosure of concentrations, either in place of or in addition to the qualitative criteria provided. AcSEC believes that a quantitative approach might not provide meaningful information about an enterprise (for example, a critical supplier is not necessarily a major supplier). Any potential simplification in implementing the disclosure requirements that might result from a quantitative approach would be outweighed by deterioration in the quality of information provided.

### Current SEC Requirements

**B-33.** The SEC requirement for information to be included in MD&A expands the information that financial reporting otherwise provides to include certain specific kinds of information related to liquidity, capital resources, and results of operations. It further expands the information to include management analysis of trends and other factors. Thus, management's subjective analysis is a significant part of the information users obtain from financial reporting of publicly held business enterprises as the data for their decisions.

**B-34.** The FASB's Concepts Statements present the view that such analysis is helpful to users. For example, in Concepts Statement No. 1, the FASB observes that financial reporting should include explanations and interpretations and cites as an example management's explanation of the information as a significant aid to users.

**B-35.** Under SEC requirements relating to MD&A, publicly held business enterprises are required to describe, among other things, "any known trends or uncertainties that have had or that the registrant reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations" (Regulation S-K, Item 303(a)(3)(ii)). SEC Financial Reporting Release (FRR) No. 36 clarifies that disclosure is required unless management determines that the trend or uncertainty is not reasonably likely to occur or that a material effect on the registrant's financial condition or results of operations is not reasonably likely to occur. Publicly held business enterprises are encouraged but not required to include forward-looking information relevant to a full understanding of their past and anticipated operations.

**B-36.** The disclosure of current vulnerability due to certain concentrations required by paragraph .21 of this SOP differs from the MD&A requirement in two important respects. First, the MD&A rules apply broadly to "any known trends or uncertainties," whereas paragraph .21 applies only to certain known concentrations. Second, this SOP requires disclosure only if the effect would cause a severe impact in the near term—a higher threshold than "material" used for MD&A purposes. AcSEC believes a higher threshold is needed for these disclosures to avoid required disclosure of lengthy lists of risks related to concentrations that are reasonably possible in today's environment and at the same time still meet the objective of providing an early warning of the potential for a disruptive set of events occurring in the near term.

**B-37.** The SEC also requires registrants, "where appropriate," to include in prospectuses offering securities to the public "a discussion of the principal factors that make the offering speculative or one of high risk." Among the factors cited are "the financial position of the registrant" and "the nature of the business in which the registrant is engaged or proposes to engage" (Regulation S-K, Item 503(c)).

**B-38.** This information required by the SEC is not now required for entities not subject to SEC regulation. However, expanding the scope of financial statements to include some of such information is compatible with the objectives of financial reporting. This SOP requires disclosure in the notes to financial statements of some of the information now reported in MD&A or as risk factors but might also require disclosure of certain information not currently required in either place.

## Comments Received on Exposure Draft

**B-39.** An exposure draft of a proposed Statement of Position, *Disclosure of Certain Significant Risks and Uncertainties and Financial Flexibility*, was issued for public comment on March 31, 1993, and distributed to approximately 20,000 interested parties to encourage comment by those who would be affected by the proposal. Over 300 comment letters were received in response to the exposure draft. Substantially all of the responses expressed reservations regarding the exposure draft's required disclosures of certain significant estimates, current vulnerability due to concentrations, and financial flexibility, while relatively few respondents expressed concerns regarding the disclosure of the nature of the reporting entity's operations or the use of estimates in the preparation of financial statements.

**B-40.** The most significant and pervasive concerns can be summarized in three areas:

- a. The cost of determining the necessity of the disclosures will exceed the benefit received from providing them, particularly for small, privately owned entities, and particularly with respect to the requirements for disclosure of financial flexibility.
- b. Requiring disclosures based on information "of which management is reasonably expected to have knowledge" is too subjective and unnecessarily expands costs and liability as well as the "expectation gap."
- c. "Reasonably possible" is too low a threshold and is an insufficiently objective criterion for disclosure of a broad range of possible future events.

**B-41.** AcSEC considered the comments received on the exposure draft and took the following actions in response to them.

- a. The requirement for disclosure of financial flexibility has been eliminated from this SOP. Financial flexibility was the exposure draft's most controversial requirement, with deep concerns expressed about the cost of compliance. Other concerns were expressed regarding the overlap between the exposure draft's requirements and the requirements of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, and the ability of the exposure draft's criteria to highlight meaningful information and to differentiate among entities that have different risks.

AcSEC does, however, continue to consider financial flexibility disclosures to be relevant early warnings for financial statement users. AcSEC also believes that disclosure requirements such as those included in SAS No. 59 should be included in accounting rather than auditing standards. Therefore, AcSEC and the AICPA's Auditing

Standards Board are considering forming an interdivisional task force to develop accounting standards to provide the appropriate early warnings of possible financial difficulties and to replace disclosure requirements currently included only in auditing standards.

- b. This SOP requires disclosure of certain defined concentrations known to management rather than a wider range of concentrations based on information of which management "is reasonably expected to have knowledge." Further, because of the continuing activity of the FASB in establishing disclosure requirements related to financial instruments, none of the defined concentrations relate specifically to financial instruments. The disclosures are to be made when (a) the concentrations are known to exist at the date of the financial statements, (b) they make the enterprise vulnerable to the risk of a near-term severe impact, and (c) it is at least reasonably possible that the events that could cause the severe impact will occur in the near term.

AcSEC considered eliminating the reasonably possible and severe-impact disclosure criteria, but decided that retention of these criteria should promote disclosures that are more significant and useful than standardized listings that might otherwise result.

- c. The requirements to disclose certain significant estimates have been clarified to make them more consistent with the requirements of FASB Statement No. 5. This SOP requires discussion of estimates when, based on known information available prior to the issuance of the financial statements, it is reasonably possible that the estimate will change in the near term and the effect of the change will be material. AcSEC responded to concerns regarding the predictive nature of this disclosure requirement by stipulating that it is the estimate of the effect of a change in a condition, situation, or set of circumstances that existed at the date of the financial statements that must be disclosed and that the evaluation should be based on known information available prior to issuance of the financial statements.

AcSEC also revised the disclosure requirements included in the exposure draft applicable to estimates not involving loss contingencies covered by FASB Statement No. 5. With respect to such estimates, this SOP does not require the disclosure of the possible loss or range of loss or the statement that such an estimate cannot be made.

### **Placement of Disclosures**

**B-42.** A significant number of commentators recommended that, because of the subjectivity associated with some of the disclosures required by this SOP, they should be presented outside the basic financial statements, either as supplemental information or in MD&A.

**B-43.** FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, distinguishes between information that should be part of the basic financial statements and that which should be provided as supplementary information. Paragraph 7 of Concepts Statement No. 5 emphasizes that information disclosed as part of the basic financial state-

ments amplifies or explains information recognized in financial statements and is essential to understanding that information. FASB Statement No. 107, however, points out in paragraph 75 a need for disclosure about “many important items . . . not recognized as assets and liabilities in financial statements, and many transactions and other events . . . not recognized when they occur but only later when uncertainty about them is reduced sufficiently so that their effects are clear.”

**B-44.** The disclosures required by this SOP build on disclosures already included in the basic financial statements and, like them, serve one of the major purposes of disclosure summarized in Appendix D of FASB Statement No. 105, that is, to help in assessing risks and potentials. AcSEC also believes that the changes made in response to the comments received on the exposure draft have significantly reduced the subjectivity of the disclosures. Accordingly, AcSEC concluded that all of the disclosures now required by this SOP should be included in the basic financial statements.

### Scope

**B-45.** The exposure draft of this SOP would have applied to state and local governmental units. However, concern was expressed that inclusion of such entities unduly complicated the SOP. Further, resolving financial reporting issues unique to state and local governments that were brought up by commentators on the exposure draft—especially in the light of the other substantive changes made to the exposure draft—would have unduly delayed the issuance of this SOP. AcSEC believes the understandability of this SOP is improved by not including state and local governmental units in its scope.<sup>29</sup>

**B-46.** Many commentators on the exposure draft recommended that other reporting entities, especially smaller nonpublic reporting entities, be exempted from this SOP's disclosure requirements. AcSEC considered those recommendations and concluded that the disclosures required by this SOP are no less relevant for such entities and that the changes made to the exposure draft sufficiently mitigate the concerns expressed by commentators.

**B-47.** Some commentators requested that AcSEC clarify the applicability of the SOP's requirements to financial statements prepared using an Other Comprehensive Basis of Accounting (OCBOA). AcSEC concluded that the applicability of disclosures required by GAAP to OCBOA financial statements is a pervasive issue that is beyond the scope of this SOP.

### Field Tests

**B-48.** The March 31, 1993 exposure draft *Disclosure of Certain Significant Risks and Uncertainties and Financial Flexibility* was subjected to limited field testing in which the exposure draft was applied to small and medium-size busi-

---

<sup>29</sup> Under the provisions of Governmental Accounting Standards Board (GASB) Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, paragraph 7, proprietary activities may apply all FASB Statements and Interpretations issued after November 30, 1989, except for those that conflict with or contradict GASB pronouncements. Paragraph 33 of the “Basis for Conclusions” of that Statement explains that, for proprietary activities that apply paragraph 7, an AICPA SOP that does not include governmental entities in its scope but that has been cleared by the Financial Accounting Standards Board (FASB) would be considered category (b) guidance under Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, issued by the Auditing Standards Board of the AICPA.

nesses, a not-for-profit organization, and case studies. The issues highlighted by the results of those tests were similar to the issues raised in the comment letters on the exposure draft. The results of the field tests were considered by AcSEC in its deliberations of this SOP.

## Cost/Benefit

**B-49.** AcSEC believes the disclosures required by this SOP will improve financial reporting by providing, in a number of situations, information that will assist financial statement users in assessing certain risks and uncertainties inherent in financial reporting. AcSEC also believes the changes made to the exposure draft, which are discussed in paragraph B-41, are reasonably responsive to concerns expressed by commentators about the cost of determining the need for and making those disclosures.

**B-50.** FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, states in paragraph 142 that:

The costs and benefits of a standard are both direct and indirect, immediate and deferred. They may be affected by a change in circumstances not foreseen when the standard was promulgated. There are wide variations in the estimates that different people make about the dollar values involved and the rate of discount to be used in reducing them to a present value . . . [It has been observed that] "the merits of any Standard, or of the Standards as a whole, can be decided finally only by judgments that are largely subjective. They cannot be decided by scientific test."

**B-51.** While a reliable evaluation of costs versus benefits is not possible, AcSEC believes that the benefits of the disclosures required by this SOP will outweigh their costs.

## AICPA Special Committee on Financial Reporting

**B-52.** In the Spring of 1991, the AICPA's Board of Directors formed a Special Committee on Financial Reporting to address increasing concerns about the relevance and usefulness of financial reporting. The committee's charge is to recommend to standards setters and regulators (1) the nature and extent of information that should be made available to others by management and (2) the extent to which auditors should report on the various elements of that information. The focus of the Special Committee's work is on the information needs of investors and creditors, and its recommendations will be responsive to those needs.

**B-53.** In its November 1993 report on the information needs of today's users of financial reporting, *The Information Needs of Investors and Creditors*, the Special Committee stated:

Users want operating opportunities and risks identified based on the company and its segments rather than on an industry-wide basis. They also want information about opportunities and risks resulting from concentrations in assets, customers and suppliers.

**B-54.** AcSEC considered the Special Committee's preliminary findings in developing this SOP, and AcSEC may reconsider the guidance in this SOP in the light of the Special Committee's recommendations, if and when the conclusions are implemented by standards-setting bodies.

## Section 10,650

# **Statement of Position 95-1 Accounting for Certain Insurance Activities of Mutual Life Insurance Enterprises**

January 18, 1995

### **NOTE**

Statements of Position of the Accounting Standards Division present the conclusions of at least two-thirds of the Accounting Standards Executive Committee, which is the senior technical body of the Institute authorized to speak for the Institute in the areas of financial accounting and reporting. Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles in the Independent Auditor's Report*, identifies AICPA Statements of Position as sources of established accounting principles that an AICPA member should consider if the accounting treatment of a transaction or event is not specified by a pronouncement covered by Rule 203 of the AICPA Code of Professional Conduct. In such circumstances, the accounting treatment specified by this Statement of Position should be used, or the member should be prepared to justify a conclusion that another treatment better presents the substance of the transaction in the circumstances.

## **Introduction and Background**

.01 Most mutual life insurance enterprises, assessment enterprises, and fraternal benefit societies (hereafter collectively referred to as *mutual life insurance enterprises*) issue financial statements prepared in conformity with statutory accounting practices. Practice, however, has been to consider statutory accounting practices as generally accepted accounting principles (GAAP), and mutual life insurance enterprises' statutory financial statements have been described as being in accordance with GAAP.

.02 In April 1993, the FASB issued Interpretation No. 40, *Applicability of Generally Accepted Accounting Principles to Mutual Life Insurance and Other Enterprises*, which concludes that financial statements based on statutory accounting practices can no longer be described as prepared in conformity with GAAP. FASB Interpretation No. 40, as amended by FASB Statement of Financial Accounting Standards No. 120, *Accounting and Reporting by Mutual Life Insurance Enterprises and by Insurance Enterprises for Certain Long-Duration Participating Contracts*, is effective for financial statements issued for fiscal years beginning after December 15, 1995. (FASB Statement No. 120 does not change the disclosure and other transition provisions of Interpretation No. 40.) Accordingly, mutual life insurance enterprises that wish to prepare GAAP financial statements in 1996 and beyond will have to apply pertinent authoritative accounting pronouncements, such as FASB Statements and Interpretations, Accounting Principles Board Opinions, and AICPA Statements of Position, that do not explicitly exempt mutual life insurance companies.

.03 When FASB Interpretation No. 40 was issued, FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*, and No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, exempted mutual life insurance companies from their provisions. Furthermore, the AICPA Industry Audit Guide *Audits of Stock Life Insurance Companies* does not apply to mutual life insurance companies.<sup>1</sup> Accordingly, there was no authoritative guidance that explicitly addressed how to account for certain insurance activities of mutual life insurance enterprises. Recognizing the lack of authoritative guidance, the FASB urged the AICPA to take on a project to address accounting and reporting by mutual life insurance enterprises for their insurance activities. This SOP was prepared in response to that request. Furthermore, concurrent with the issuance of this SOP, the FASB has issued Statement No. 120, which removes the exemption for mutual life insurance enterprises from FASB Statement Nos. 60, 97, and 113 and recognizes that participating life insurance contracts that meet the conditions in paragraph .05 of this SOP should be accounted for under this SOP.

## Applicability and Scope

.04 This SOP applies to all mutual life insurance enterprises, assessment enterprises, and fraternal benefit societies. This SOP also applies to stock life insurance subsidiaries of mutual life insurance enterprises.

.05 This SOP applies to life insurance contracts that have both of the following characteristics:

- a. They are long-duration participating contracts that are expected to pay **dividends to policyholders**<sup>2</sup> based on actual experience of the insurance enterprise.
- b. **Annual policyholder dividends** are paid in a manner that identifies divisible surplus and distributes that surplus in approximately the same proportion as the contracts are considered to have contributed to divisible surplus (commonly referred to in actuarial literature as the *contribution principle*).

.06 FASB Statement No. 97 should be applied to investment contracts, limited-payment contracts that do not have the characteristics described in paragraph .05, and universal life-type contracts as defined in FASB Statement No. 97. FASB Statement No. 60 should be applied to short-duration contracts with fixed and variable terms and to long-duration contracts that do not have the characteristics described in paragraph .05 and are not covered by FASB Statement No. 97. FASB Statement No. 113 should be applied to reinsurance contracts.

## Accounting and Reporting Models

.07 The accounting and reporting model for long-duration insurance contracts issued by insurance enterprises other than mutual life insurance enter-

---

<sup>1</sup> The AICPA plans to issue an exposure draft of a revised life and health insurance enterprises audit guide, which will apply to mutual life insurance enterprises. This SOP will be incorporated into the revised guide.

<sup>2</sup> Terms defined in the Glossary [paragraph .65] are in **boldface type** the first time they appear in this SOP.

prises was established in FASB Statement Nos. 60 and 97. FASB Statement No. 60 addresses long-duration contracts, such as whole-life, guaranteed-renewable term-life, and annuity contracts that are expected to remain in force for an extended period and that are characterized by fixed and guaranteed terms. FASB Statement No. 97 addresses other long-duration contracts such as universal life-type insurance contracts—that are characterized by flexibility and discretion granted to one or both parties to the contract, limited payment contracts, and investment contracts.

## FASB Statement No. 60

.08 Under FASB Statement No. 60, premiums for long-duration insurance contracts are recognized as revenue when due from policyholders. A liability for future policy benefits is accrued when premium revenue is recognized. The liability—which represents both the present value of estimated future policy benefits to be paid to or on behalf of policyholders, and related expenses less the present value of estimated future net premiums<sup>3</sup> to be collected from policyholders is based on a uniform percentage of anticipated premiums and on estimates of expected **investment yields**, mortality, morbidity, terminations, and expenses applicable at the time the insurance contracts are made. FASB Statement No. 60 also requires a provision for the risk of adverse deviation. Original assumptions ordinarily continue to be used in subsequent accounting periods to determine changes in the liability for future policy benefits (referred to as *lock-in*), unless a premium deficiency exists. Costs that vary with, and are primarily related to, the acquisition of new and renewal insurance contracts (**acquisition costs**) are capitalized and charged to expense in proportion to premium revenue recognized.

## FASB Statement No. 97

.09 FASB Statement No. 97 requires that a retrospective deposit method be used to account for universal life-type insurance contracts. That accounting method establishes a liability for policy benefits at an amount determined by the account or contract balance that accrues to the benefit of the policyholder. Premiums are not reported as revenues. Rather, revenues from those contracts represent amounts assessed against policyholders and are reported in the period that the amounts are assessed, unless evidence indicates that the amounts are designed to compensate the insurer for services to be provided over more than one period. FASB Statement No. 97 also requires that capitalized acquisition costs associated with universal life-type contracts be amortized, based on a constant percentage of the present value of estimated gross profit amounts. Estimates of gross profits should be evaluated regularly, and the total amortization recorded to date is adjusted if actual experience or other evidence suggests earlier estimates should be revised.

## Participating Contracts

.10 FASB Statement No. 60 addresses accounting for traditional forms of participating contracts issued, but does not address the participating contracts issued by mutual life insurance enterprises, which are covered by this SOP.

---

<sup>3</sup> FASB Statement No. 60 defines *gross premium* as “the premium charged to a policyholder for an insurance contract.” That Statement defines *net premium* as “the portion of the gross premium required to provide for all benefits and expenses.”

Furthermore, FASB Statement No. 97 addresses those participating contracts with contract terms that suggest that they are, in substance, universal life-type contracts.

## Conclusions on Financial Reporting

.11 The following conclusions should be applied to insurance contracts described in paragraph .05 of this SOP and should be read in conjunction with "Background Information and Basis for Conclusions," beginning in paragraph .26 of this SOP. Furthermore, AICPA Practice Bulletin 8, *Application of FASB Statement No. 97, Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments, to Insurance Enterprises* [section 12,080], provides interpretative guidance that, if applicable, should be followed for the contracts covered by this SOP.

### Revenue Recognition

.12 Premiums from participating insurance contracts should be reported as revenue in the statement of earnings when due from policyholders.

### Benefits Recognition

.13 Death and surrender benefits incurred should be reported as expenses in the statement of earnings.

### Dividends

.14 Annual policyholder dividends should be reported separately as an expense in the statement of earnings, and should be based on estimates of amounts incurred for the policies in effect during the period. For example, if a policy has an anniversary date of June 30, at which time annual dividends are paid, at December 31, 19X1, dividends should be accrued for the period July 1, 19X1, through December 31, 19X1, and should be reported separately on the balance sheet. (See paragraph .17 for information on accounting for terminal dividends as part of the liability for future policyholder benefits.)

### Liability for Future Policy Benefits

.15 A liability for future policy benefits relating to participating life insurance contracts should be equal to the sum of—

- a. The **net level premium reserve** for death and endowment policy benefits.
- b. The liability for **terminal dividends**.
- c. Any probable loss (premium deficiency) as described in paragraphs 35 to 37 of FASB Statement No. 60.

.16 The net level premium reserve should be calculated based on the **dividend fund interest rate**, if determinable, and mortality rates guaranteed in calculating the cash surrender values described in the contract. If the dividend fund interest rate is not determinable, the **guaranteed interest rate** used in calculating cash surrender values described in the contract should be used. If the dividend fund interest rate is not determinable and there is no guaranteed interest rate, the interest rate used in determining guaranteed nonforfeiture values should be used. Finally, if none of the above rates exists,

then the interest rate used to determine minimum cash surrender values—as set by the National Association of Insurance Commissioners' (NAIC) model standard nonforfeiture law—for the year of issue of the contract should be used. Regardless of the rate used, net premiums should be calculated as a constant percentage of the gross premiums.

**.17 Terminal dividends** should be accrued in the liability for future policy benefits if the following conditions are both met:<sup>4</sup>

- a. Payment of the dividend is probable.
- b. The amount can be reasonably estimated.

If the two conditions are met (and they ordinarily will be), the terminal dividends should be recognized as an expense over the life of a book of participating life insurance contracts, at a constant rate based on the present value of the estimated gross margin amounts expected to be realized over the life of the book of contracts. The present value of estimated gross margins should be computed using the expected investment yield (net of related investment expenses). If significant negative gross margins are expected in any period, then the present value of gross margins before annual dividends, estimated gross premiums, or the balance of insurance in force should be substituted as the base for computing the expense amount to be recognized. (The base substituted in this calculation should be the same one substituted in the amortization of deferred acquisition costs discussed in paragraph .20.)

**.18** Increases in the liability for future policy benefits should be reported as an expense in the statement of earnings.

## Acquisition Costs

**.19** This SOP uses the definition of *acquisition costs* contained in FASB Statement No. 60,<sup>5</sup> and in the following sentence describes those that are ineligible for capitalization under this SOP. Acquisition costs (such as premium taxes) that vary in a constant relationship to premiums or insurance in force, that are recurring in nature, or that tend to be incurred in a level amount from period to period, should be charged to expense in the period incurred.

**.20** Capitalized acquisition costs should be amortized over the life of a book of participating life insurance contracts at a constant rate, based on the present value of the estimated gross margin amounts expected to be realized over the life of the book of contracts. The present value of estimated gross margins should be computed using the expected investment yield. If significant negative gross margins are expected in any period, then the present value of gross margins before annual dividends, estimated gross premiums, or the balance of insurance in force should be substituted as the base for computing amortization.

**.21** In computing amortization, interest should accrue to the unamortized balance of capitalized acquisition costs at the rate used to discount expected gross margins. Estimates of expected gross margins used as a basis for amortization should be evaluated regularly, and the total amortization recorded to date should be adjusted by a charge or credit to the statement of earnings if actual experience or other evidence suggests that earlier estimates should be

---

<sup>4</sup> These conditions should be used in the same sense that they are used in FASB Statement No. 5, *Accounting for Contingencies*.

<sup>5</sup> Acquisition costs are addressed in paragraphs 28 to 31 of FASB Statement No. 60.

revised. The interest rate used to compute the present value of revised estimates of expected gross margins should be either the rate in effect at the inception of the book of contracts or the latest revised rate applied to the remaining benefit period. The approach selected to compute the present value of revised estimates should be applied consistently in subsequent revisions to computations of expected gross margins.

### **Estimated Gross Margins**

**.22** *Estimated gross margin*, as the term is used in this SOP, should include estimates of the following:

- a. Amounts expected to be received from premiums, plus
- b. Amounts expected to be earned from investment of policyholder balances (that is, the net level premium reserve described in paragraph .15a), less
- c. All benefit claims expected to be paid, less
- d. Costs expected to be incurred for contract administration (including acquisition costs not included in capitalized acquisition costs), less
- e. Expected change in the net level premium reserve for death and endowment benefits, less
- f. Expected annual policyholder dividends, plus or less
- g. Other expected assessments and credits, however characterized

Estimated gross margins should be determined on a best estimate basis, without provision for adverse deviation.

**.23** Several dividend options may be available to the policyholder, in which instances the options generally can be changed during the life of the contract. In estimating gross margins, insurance enterprises should use the best estimate of the dividend options that policyholders will elect.

### **Disclosures**

**.24** The following should be disclosed in the financial statements with respect to participating contracts:

- a. The methods and assumptions used in estimating the liability for future policy benefits
- b. The average rate of assumed investment yields used in estimating expected gross margins
- c. The nature of acquisition costs capitalized, the method of amortizing those costs, and the amount of those costs amortized for the period

### **Effective Date and Transition**

**.25** This SOP is effective for financial statements for fiscal years beginning after December 15, 1995. Earlier application is encouraged. The effect of initially applying this SOP should be reported retroactively through restatement of all previously issued annual financial statements presented for comparative purposes for fiscal years beginning after December 15, 1992. Previously issued financial statements for any number of consecutive periods preceding that date may be restated to conform to the provisions of this SOP. The cumulative effect of adopting this SOP should be included in the earliest year restated.

## Background Information and Basis for Conclusions

.26 The AICPA Accounting Standards Executive Committee's (AcSEC's) conclusions about accounting and reporting for participating life insurance contracts covered by this SOP are based on how the economic substance of those contracts differs fundamentally from nonparticipating contracts (traditional and universal life-type contracts) and from participating contracts that do not have the characteristics described in paragraph .05 of this SOP. The following sections (a) describe the factors differentiating the contracts covered by this SOP from those other contracts, (b) discuss AcSEC's reasons for concluding that neither FASB Statement No. 60 nor FASB Statement No. 97 in its entirety is appropriate for the contracts covered by this SOP, and (c) discuss other considerations deemed significant by AcSEC in reaching its conclusions.

### Participating Contracts

.27 Participating life insurance contracts are issued for a gross premium that provides policyholders with certain guaranteed benefits as well as with dividends. Generally, the gross premium is calculated with sufficient margin so that each class of contracts is self-supporting. Annual policyholder dividends paid generally reflect the company's experience and performance in investment activity, mortality experience, and contract administration for each class of contracts. It is the dividend determination and distribution that distinguishes participating life insurance from nonparticipating life insurance.

.28 The nature of the annual dividend determination varies from company to company but is generally a two-step process. The first step is to determine divisible surplus, which is a determination each company makes based on its financial results. The second step is to distribute divisible surplus to policyholders in an equitable manner. Actuarial standards require divisible surplus to be distributed among contracts in the same proportion as the contracts contributed to divisible surplus.

### Applicability and Scope

.29 AcSEC's charge was to address, as much as possible, the accounting and reporting of mutual life insurance enterprises' insurance activities within the framework established in FASB Statement Nos. 60 and 97. In reaching the conclusions in this SOP, AcSEC believes the contracts covered by this SOP are transactions between mutual life insurance enterprises and their customers. After reviewing the nature of a variety of mutual life insurance enterprise contracts, AcSEC concluded that this SOP should address the accounting only for life insurance contracts with the characteristics described in paragraph .05 of this SOP. The dividend scales on such contracts are often referred to as *actively managed*, because dividends paid are based on actual experience; that is, dividend scales are adjusted to reflect significant changes on a reasonably timely basis. FASB Statement No. 120 requires that other insurance contracts of mutual life insurance enterprises, such as annuity contracts, group insurance contracts, disability contracts, universal life-type contracts, and pension guarantee contracts, should be accounted for under FASB Statement Nos. 60 and 97.

.30 AcSEC concluded that separate consideration of the participating life insurance contracts covered by this SOP is justified by the differences between

those contracts and both traditional nonparticipating life insurance contracts, covered by FASB Statement No. 60, and universal life-type contracts, covered by FASB Statement No. 97. Participating life insurance contracts covered under this SOP have attributes of the contracts covered by FASB Statement Nos. 60 and 97. AcSEC concluded, therefore, that contracts covered by this SOP were not sufficiently similar to those covered by either FASB Statement to warrant applying either of them in its entirety.

.31 Participating life insurance contracts covered by this SOP are similar to the conventional life contracts contemplated by FASB Statement No. 60 in the following respects:

- a. Permanent participating life insurance is based on the traditional concept of level premiums over the life of the contract.
- b. The individual contract functions related to interest, mortality, and expenses are not separately displayed to policyholders and are not explicitly stated in the policy.
- c. The pattern of premium payments is specified in the contract and cannot normally be varied after issue.
- d. There is no explicit account balance for each policyholder.

.32 Despite those similarities in form to FASB Statement No. 60 contracts, the dividend feature introduces a variable that affects the substance of the earnings flow to the company. The dividend feature causes the contracts covered by this SOP to more closely resemble contracts in which the earnings emerge in relation to margins rather than contracts in which earnings emerge proportional to the level of premiums received in that year. Participating policies covered by this SOP share in the results of investment activity, mortality experience, and contract administration costs through dividends, which are not fixed or guaranteed by contract terms. As a result, earnings on these products, after annual policyholder dividends, tend to emerge as the margin recognized on investments, mortality, and expenses.

.33 AcSEC concluded that because the earnings after annual policyholder dividends from the contracts covered by this SOP tend to evolve in a manner similar to universal life-type contracts, most of the provisions of FASB Statement No. 97 should be applied to the contracts covered by this SOP. Nevertheless, AcSEC concluded that because the contracts covered by this SOP have terms similar to the terms of conventional life products, it was not feasible or appropriate to apply FASB Statement No. 97 in its entirety.

.34 The recommendations in this SOP differ from the accounting in FASB Statement No. 97 for universal life-type contracts in two significant respects:

- a. Whereas under FASB Statement No. 97 premiums are not reported as revenue and benefit payments representing a return of policyholder balances are not reported as expenses in the statement of earnings, under this SOP premiums should be recognized as revenue and benefit payments charged to expense.
- b. Whereas FASB Statement No. 97 does not address dividends, under this SOP dividends should be charged to expense.

.35 AcSEC recognizes that the FASB chose to exclude traditional participating life insurance contracts issued by stock life insurance companies from the scope of FASB Statement No. 97. However, AcSEC notes that in making that decision, the FASB did not consider participating policies of mutual life

insurance enterprises, which AcSEC believes differ substantively from many of the participating policies issued by stock life insurance companies. Furthermore, the FASB's consideration of participating policies may have been influenced by the fact that participating policies are generally a less significant portion of stock life insurance companies' business than of mutual life insurance enterprises' business.

## Revenue Recognition

.36 AcSEC recognizes that reporting premiums as revenues may appear inconsistent with the accounting model set forth in this SOP. AcSEC believes, however, that recognizing premiums as revenue for the contracts covered by this SOP is justified for two reasons, both of which are based on the economic substance of the relationship between the issuer and the policyholder.

.37 First, premiums received under participating contracts fit the definition of *revenues* in FASB Statement of Financial Accounting Concepts No. 6, *Elements of Financial Statements*. AcSEC believes the fact that premiums generally are level, fixed, and payable at predetermined points in return for a guaranteed death benefit and cash surrender value is significant. Furthermore, unlike the purchaser of a universal life-type insurance contract, the purchaser of a participating life insurance contract generally cannot vary the amount and timing of premium payments, and no account balance information is communicated to the policyholder. In addition, premiums are not credited to a policyholder account balance. Accordingly, AcSEC believes reporting premiums as revenues is consistent with the FASB Concepts Statement No. 6 definition of *revenues* as inflows from delivering services that constitute an entity's ongoing major or central operations.

.38 Second, for many mutual life insurance enterprises it would not be practicable or meaningful to report premiums received as deposits. AcSEC considered how mutual life insurance companies would report premiums as such and concluded that mortality, expense, and surrender charges would be reported as revenues. For those amounts to be relevant, the elements of dividends related to each would have to be determined. AcSEC believes that making such allocations would be arbitrary. AcSEC further believes the costs of making such allocations would far exceed the benefits derived from reporting the amounts separately. Furthermore, the lack of an explicit policyholder balance or separate assessments or charges for contract services and credits for interest—which exist for universal life-type contracts—makes separate measurement of the advance funding and contract service functions impractical.

## Benefit Recognition

.39 AcSEC concluded that to be consistent with the reporting of premiums as revenues when due from the policyholder, actual death and surrender benefits incurred during the accounting period should be reported as expenses.

## Dividends

.40 FASB Statement No. 97 does not explicitly address the treatment of dividends for participating contracts accounted for as universal life-type contracts. Some may believe that under that model, annual policyholder dividends would be allocated among interest credited, death benefits or mortality charges, and expenses, rather than reported as an expense. Others may believe that the entire annual policyholder dividend is one of the "other assessments and cre-

dividends" described in paragraph 23 of FASB Statement No. 97. AcSEC concluded that, especially because this SOP recommends premiums should be reported as revenues when due from the policyholder, actual dividends incurred during the accounting period should always be reported as an expense; dividends should not be charged directly to equity in any circumstance.

.41 Furthermore, FASB Statement No. 60 defines two alternative accounting treatments for policyholder dividends based on whether the contracts included restrictions on the net income amount that may be distributed to stockholders. For participating contracts that have no net income restrictions, and that use life insurance dividend scales unrelated to actual net income, policyholder dividend liabilities should be accrued over the premium-paying period of the contracts (1) based on dividends anticipated in determining gross premiums, or (2) as shown in published dividend illustrations at the date insurance contracts are made. For contracts limiting the amount of net income that may be distributed to stockholders, the net income amount that cannot be distributed to shareholders is excluded from stockholders' equity by a charge to operations and a credit to a liability, a method similar to the accounting for net income applicable to minority interests. However, for either type of participating contract, dividends are reported as expenses in the statement of earnings as "dividends to policyholders" or "provision for policyholders' share of earnings on participating business."

.42 Annual policyholder dividends of participating contracts covered by this SOP are based on actual company performance. Accordingly, AcSEC believes dividends on participating contracts covered by this SOP are not similar to either of the types of dividends discussed in FASB Statement No. 60. While AcSEC acknowledges that segregating undistributed accumulated earnings on participating contracts in a manner similar to minority interests may be meaningful in a stock life insurance company, it is not meaningful for a mutual life insurance enterprise, because the objective of such presentation is to identify amounts that are not distributable to stockholders.

## Capital Gains and Losses

.43 The guidance in FASB Statement No. 97, as amended by FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, on capital gains and losses, which also is incorporated in FASB Statement No. 60, applies to the contracts covered in this SOP. Paragraph 28 of FASB Statement No. 97, as amended, states:

Realized gains and losses on all investments (except investments that are classified as trading securities and those that are accounted for as hedges as described in FASB Statements No. 52, *Foreign Currency Translation*, and No. 80, *Accounting for Futures Contracts*) shall be reported in the statement of earnings as a component of other income, on a pretax basis. Realized gains and losses shall be presented as a separate item in the statement of earnings or disclosed in the notes to the financial statements. Realized gains and losses shall not be deferred, either directly or indirectly.

Furthermore, in paragraph 77 in appendix A of FASB Statement No. 97, the FASB addressed the issue of whether certain realized gains and losses should be deferred and recognized over the remaining life of the insurance contracts with the following:

The Board notes that generally accepted accounting principles require that realized investment gains and losses be reflected in the period in which they

occur. The Board acknowledges that some contracts with policyholders may entitle policyholders to an amount equal to a portion of specific investment performance. The recording of liabilities to reflect amounts to which those policyholders are entitled is appropriate, but the deferral of realized gains and losses is not justified.

## **Liability for Future Policy Benefits**

### ***Proxy for Account Balance***

.44 Under FASB Statement No. 97, the liability for future policy benefits includes the policyholder's account balance as of the balance sheet date. However, because participating contracts usually lack a stated account balance, a proxy for account balance had to be determined. AcSEC considered six possible proxies:

- a. **Dividend fund**
- b. Net level premium reserve, using statutory valuation mortality and interest
- c. Commissioners reserve valuation method (CRVM) reserves
- d. Cash surrender value
- e. Net level premium reserve, using guaranteed mortality and interest
- f. Net level premium reserve, using the guaranteed mortality and dividend fund interest

.45 After considering all the above possible account balances, AcSEC concluded that the net level premium reserve using the guaranteed mortality and dividend fund interest generally should be used as the proxy for account balance. Furthermore, AcSEC notes that there may be policies that do not meet normal underwriting standards for which additional amounts may be included in the net level premium reserve.

.46 If experience is more favorable than what was anticipated in determining the dividends guaranteed in the policy, a mutual life insurance enterprise's objective is to distribute the favorable experience as dividends. If experience is less favorable than what was anticipated in determining the dividends guaranteed, the company must at least provide the guaranteed values. Therefore, if there is an unfavorable experience, a premium deficiency may result, which would be recognized under paragraph .15c of this SOP. Accordingly, the liability determined, based on guaranteed benefits, provides an appropriate measure of the liability to policyholders because, to the extent experience is more favorable than the guarantees, the company pays the difference to policyholders in dividends. This estimate of the liability is consistent with the view that the mutual life insurance enterprise is liable for the guaranteed provisions of the policies it sells and for paying dividends related to favorable experience. AcSEC believes that for many participating policies the net level premium reserve for guaranteed benefits will best reflect the amount that has accrued to the benefit of policyholders for participating contracts. AcSEC therefore concluded that the net level premium reserve is consistent with FASB Statement No. 97's description of the liability as "the balance that accrues to the benefit of individual policyholders [that] represents the minimum measure of an insurance enterprise's liability . . . ."

.47 Nevertheless, this SOP recommends that a mutual life insurance enterprise with a determinable dividend fund interest rate should calculate the

net level premium reserve for guaranteed benefits based on the dividend fund interest rate rather than on the rate used in determining guaranteed cash surrender values. AcSEC believes that in practice the dividend fund interest rate and the interest rate guaranteed in computing cash surrender values often will be the same. If those interest rates differ, the calculation based on the dividend fund interest rate usually reflects the pattern of anticipated annual policyholder dividends more accurately.

.48 Some mutual life insurance enterprises have a dividend fund for participating policies. Though that dividend fund generally is not disclosed to the policyholder, it is the amount specified by management at contract inception to which interest is credited and from which mortality and expense charges are assessed in the dividend determination mechanism. Accordingly, many believe the dividend fund is the economic equivalent of the account balance of universal life-type contracts. Though most companies with dividend funds define the dividend fund account balance in their dividend resolutions, there are a variety of ways in which a dividend fund is defined but no consistent practices for company management to apply in defining the amount. Furthermore, not all mutual life insurance enterprises have a dividend fund. Accordingly, AcSEC concluded that the dividend fund lacked the objectivity and comparability necessary to be an appropriate proxy for the account balance.

.49 AcSEC also rejected the statutory net level premium reserve and the statutory CRVM as proxies for account balance, because the assumptions used in determining such amounts are based on statutory requirements, which are not necessarily related to either policy nonforfeiture guarantees or the dividend calculation.
