## HOW TO USE VOLUME 1

### Scope of Volume 1 . . .

This volume, which is a reprint of volume 1 and the “Statements of Position—Accounting,” “Accounting Standards Executive Committee Practice Bulletins,” and “Listing of Issues Papers of the Accounting Standards Division” portions of the looseleaf edition of *Technical Practice Aids*, includes selected American Institute of Certified Public Accountants (AICPA) Technical Questions and Answers (Nonauthoritative) and Public Company Accounting Oversight Board (PCAOB) Staff Questions and Answers and other implementation guidance, as well as Trust Services Principles, Criteria, and Illustrations of the AICPA Assurance Services Executive Committee, Statements of Position—Accounting, Accounting Standards Executive Committee Practice Bulletins, and a listing of Issues Papers of the Accounting Standards Division of the AICPA.

### How This Volume Is Arranged . . .

The contents of this volume are arranged as follows:

#### **Technical Questions and Answers (Nonauthoritative)**

- Financial Statement Presentation
- Assets
- Liabilities and Deferred Credits
- Capital
- Revenue and Expense
- Specialized Industry Problems
- Specialized Organizational Problems
- Audit Field Work
- Auditors’ Reports
- Attestation Engagements

#### **PCAOB Staff Questions and Answers and Other Implementation Guidance**

- PCAOB Staff Questions and Answers
- Policy Statement
- Report on the Initial Implementation of Auditing Standard No. 2
- Staff Audit Practice Alerts

#### **Trust Services Principles, Criteria, and Illustrations**

- Trust Services Principles, Criteria, and Illustrations for Security, Availability, Processing Integrity, Confidentiality, and Privacy (Including WebTrust® and SysTrust®)
- Trust Services Principles, Criteria, and Illustrations for WebTrust® for Certification Authorities

#### **Statements of Position—Accounting**

#### **Practice Bulletins**

#### **Issues Papers Listing of the Accounting Standards Division**

## How to Use This Volume . . .

The arrangement of material is indicated in the general table of contents at the front of the volume. There is a detailed table of contents covering the material within each major division.

### TECHNICAL QUESTIONS AND ANSWERS (NONAUTHORITATIVE)

The major divisions are subdivided into sections, each with its own section number. With respect to Technical Questions and Answers, within each section, each Technical Question and Answer is decimally numbered. For example, section 9100.02, *Reporting on Companies With Different Fiscal Years*, is the second Technical Question and Answer in section 9100. When a Technical Question and Answer is deleted, its number is reserved. Reserved sections are deleted permanently if no future Technical Questions and Answers are expected for a particular topic.

Authoritative pronouncements are referenced in the Technical Questions and Answers, whenever possible, to support the guidance provided. The following list explains the references and cites the publications containing the authoritative literature:

AC	An accounting section from FASB <i>Accounting Standards Current Text</i>
ACC	Statements of Position—Accounting contained in AICPA <i>Technical Practice Aids</i>
AR	Accounting and Review Services standard or interpretation contained in AICPA <i>Professional Standards</i> , vol. 2
AT	Attestation standard or interpretation contained in AICPA <i>Professional Standards</i> , vol. 1
AU	Auditing standard or interpretation contained in AICPA <i>Professional Standards</i> , vol. 1
AUD	Statements of Position—Auditing and Attestation contained in AICPA <i>Technical Practice Aids</i>
EITF	A summary of the proceedings of the Emerging Issues Task Force contained in the FASB <i>EITF Abstracts</i>
ET	Section from the Code of Professional Conduct of the AICPA contained in AICPA <i>Professional Standards</i> , vol. 2
GAFRS	An accounting section from the GASB <i>Codification of Governmental Accounting and Financial Reporting Standards</i>
PA	Practice Alerts of the AICPA SEC Practice Section Professional Issues Task Force contained in AICPA <i>Technical Practice Aids</i>
PB	Practice Bulletins of the AICPA Accounting Standards Division contained in AICPA <i>Technical Practice Aids</i>
TSP	Trust Services Principles, Criteria, and Illustrations of the AICPA Assurance Services Executive Committee contained in AICPA <i>Technical Practice Aids</i>

**Note:** Generally, abbreviations are not used to reference AICPA Audit and Accounting Guides. Each guide is published separately and is also included in the AICPA *Audit and Accounting Guides* subscription service.

The TIS topical index for the Technical Questions and Answers uses the key word method to facilitate reference to the inquiries. This index is arranged alphabetically by subject, with references to section numbers.

## PCAOB STAFF QUESTIONS AND ANSWERS AND OTHER IMPLEMENTATION GUIDANCE

PCAOB Staff Questions and Answers and Other Implementation Guidance are assigned section numbers in chronological order as they are issued. However, the format and any numbering assigned by the PCAOB has been retained.

The PC topical index for the PCAOB Staff Questions and Answers and Other Implementation Guidance facilitates reference to the guidance. This index is arranged alphabetically by subject, with references to section, paragraph, and question numbers.

## TRUST SERVICES PRINCIPLES, CRITERIA, AND ILLUSTRATIONS

The Trust Services Principles, Criteria, and Illustrations are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

## STATEMENTS OF POSITION—ACCOUNTING

Statements of Position—Accounting are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

The ACC topical index for the Statements of Position—Accounting facilitates reference to the Statements. This index is arranged alphabetically by subject, with references to section and paragraph numbers.

## PRACTICE BULLETINS

Practice Bulletins are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

## ISSUES PAPERS LISTING

A listing of Issues Papers of the Accounting Standards Division, in chronological order, is included in a separate division.

## Section 1100

### ***Statement of Financial Position***

#### **.03 Unclassified Balance Sheet for Venture With Limited Life**

*Inquiry*—A corporation has recently been organized with the sole purpose of constructing a shopping center which will take several years to complete, after which the company will be liquidated. The company uses the completed contract method to recognize income, and will have only one operating cycle. Would an unclassified balance sheet be appropriate?

*Reply*—An unclassified balance sheet would be more appropriate than a classified one in this situation. The sole purpose of the corporation is to construct the shopping center, and the appropriate time frame for reporting purposes, by definition, becomes the time required to complete the project, rather than an arbitrary one-year period.

#### **.06 Classification of Idle Property**

This Question and Answer is currently being revised.

#### **.07 Comparative Statement Disclosures**

*Inquiry*—When financial statements of the prior period are presented on a comparative basis with financial statements of the current period, should the notes to the comparative financial statements disclose details for the prior year?

*Reply*—Generally, in practice notes to comparative financial statements are also comparative if they present details of items on the financial statements or are otherwise pertinent. For example, details of notes payable outstanding at the end of each period are normally disclosed, but the future maturities disclosure need only be disclosed for the current year. [Amended June 1995.]

#### **.08 Classification of Outstanding Checks**

*Inquiry*—Should the amount of checks that have been issued and are out of the control of the payor but which have not cleared the bank by the balance sheet date be reported as a reduction of cash?

*Reply*—Yes. A check is out of the payor's control after it has been mailed or delivered to the payee. The balance sheet caption "cash" should represent an amount that is within the control of the reporting enterprise, namely, the amount of cash in banks plus the amount of cash and checks on hand and deposits in transit minus the amount of outstanding checks. Cash is misrepresented if outstanding checks are classified as liabilities rather than a reduction of cash.

#### **.12 Classification of Inventory Stored in a Grain Elevator**

*Inquiry*—Should the operator of a grain elevator report in its financial statements grain owned by others and stored in its grain elevator?

*Reply*—No. Grain stored for others should not be included on the balance sheet of a grain elevator operator. SAS No. 1, section 901, *Public Warehouses—Controls and Auditing Procedures for Goods Held*, paragraph 13 (AU 901.13), states that goods held for others by a warehouseman are not owned by the warehouseman and should not appear in his financial statements. The same is true for grain stored for others by a grain elevator.

**.14 Classification of Convertible Debt**

*Inquiry*—A company has debt that is convertible into common stock of the company at the option of the company. The debt by its terms is considered long-term debt in the classified balance sheet. The company intends to call the debt and issue the common stock within one year of the balance sheet date. Should this debt be classified as a current liability?

*Reply*—No. The expected call of the debt securities will not consume current assets or increase current liabilities, and accordingly should continue to be classified as a long-term obligation.

The general principle underlying the classification of debt in a debtor's principal balance sheet should be based on facts existing at the date of the balance sheet rather than on expectations. ARB No. 43, Chapter 3A, *Current Assets and Current Liabilities*, paragraph 7 (AC B05.402), states that "the term current liabilities is used principally to designate obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets, or the creation of other current liabilities."

---

[The next page is 161.]

## Section 1200

### Income Statement

#### .01 Disclosure of Revenues of an Agent

*Inquiry*—Company A is in the business of arranging sales of used cars for which service it receives a commission based on an established fee schedule. Company A receives title to the cars sold but simultaneously transfers title to the car buyer. Company A warrants main engine components for thirty days after date of sale.

The following presentations of revenue in the income statement are being considered:

Commissions Earned	<u>\$20,000</u>
or	
Sales	\$ 300,000
Cost of Sales	<u>(280,000)</u>
Gross Profit (or Net Commissions)	\$ 20,000

What is the proper presentation of revenue?

*Reply*—Since Company A is operating as a broker, Company A should report Commissions Earned rather than Sales. However, Company A could disclose above the Commissions Earned figure, without showing a deduction, the amount of sales, as follows:

Sales Arranged	<u>\$300,000</u>
Commissions Earned	\$ 20,000
Expenses, etc.	XXX

Company A should also make proper provision for the cost of warranties.

#### .04 Statement Title When There Is a Net Loss

*Inquiry*—What title is suggested for the “Statement of Income” when a “net loss” exists in one or more years?

*Reply*—Companies included in the annual survey entitled *Accounting Trends & Techniques* (“Trends”) file with the Securities and Exchange Commission. Accordingly, their annual reports include a three year statement of income. If a current year net loss is shown in the income statement, the “Trends” companies usually describe the statement of income as the “Statement of Operations.” They occasionally use the title “Statement of Income (Loss)” and very rarely use the title “Statement of Loss.”

Some companies always use “Statement of Operations” since the heading will be the same whether there is a “net loss” or “net income.”

#### .05 Presentation of Reimbursed Payroll Expense

*Inquiry*—One company of a controlled group, in addition to its own operations, acts as a “paymaster” for the entire group. This company records the entire payroll of all members in the group on its general ledger to facilitate reconciliation with state and federal payroll tax returns. Each member of the

group reimburses the “paymaster” for its share of payroll and payroll taxes and records management fee expense while the paymaster records it as management fee income.

Should the reimbursement be classified as other income in the separate income statement of the “paymaster” company?

*Reply*—No. The reimbursement should be allocated as a reduction of payroll and payroll tax expense because this approach would more accurately present the “paymaster” company’s expenses for its own operations.

**.06 Note to TIS Section 1200.07 to 1200.16—Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk**

Insurance enables a company (the insured) to transfer insurance risk to an insurer for a specified premium. Insurance may be purchased for a number of economic reasons generally with the underlying goal of transferring insurance risk, including property damage, injury to others, and business interruption.

The following series of questions and answers (Sections 1200.07 through 1200.16) focus on certain aspects of finite insurance products that are utilized by noninsurance enterprises. Due to the diverse nature of contracts in the marketplace, the guidance in these questions and answers is designed to assist practitioners in identifying the relevant literature to consider in addressing their specific facts and circumstances. The TPAs contain many excerpts of applicable guidance, but readers should be familiar with all the guidance contained in that literature not only the specific paragraphs listed.

GAAP guidance for an insurance enterprise’s purchase of reinsurance is more extensive than guidance on accounting by noninsurance enterprises for insurance contracts. The accounting guidance for reinsurance addresses transactions between an insurer (the contract holder) and a reinsurer (the issuer of the contract). TIS section 1200.07 through .16 address property and casualty insurance contracts between a policyholder and an insurance enterprise, which is similar to the relationship between an insurer and a reinsurer.

**.07 Finite Insurance**

*Inquiry*—What are “finite” insurance transactions?

*Reply*—Finite insurance contracts are contracts that transfer a clearly defined and restricted amount of insurance risk from the policyholder to the insurance company, and the policyholder retains a substantial portion of the related risks under most scenarios. Nevertheless, under certain finite contracts there may be a reasonable possibility that the insurance company will incur a loss on the contract.

**.08 Insurance Risk Limiting Features**

*Inquiry*—What types of insurance risk limiting features do finite insurance contracts normally contain?

*Reply*—Contractual features that serve to limit insurance risk transfer are found in both traditional and finite insurance contracts; however, the degree to which these features limit risk is relatively higher in finite insurance. All contractual provisions that limit risk transfer need to be considered when reviewing insurance contracts. Common features that may limit the transfer of insurance risk include:

- *Sliding scale fees and profit sharing formulae.* These features adjust cash flows between the policyholder and insurance company based on loss experience (for example, increasing payments from the insured enterprise as losses increase and decreasing payments as losses decrease, subject to maximum and minimum limits).
- *Experience refunds.* These arrangements allow the policyholder to share in the favorable experience of the underlying contracts by reference to an “experience account” that typically tracks premiums paid, less fees, less losses incurred, plus interest. Experience provisions also can require the policyholder to share in unfavorable experience by requiring additional payments to the insurer in the event that the experience account is negative.
- *Caps.* Caps are used to limit the insurer’s aggregate exposure by imposing a dollar limit, or a limit expressed as a percentage of premiums paid, on the amount of claims to be paid by the insurer. For example, the insurer will not be responsible for losses beyond 150% of the premiums paid. While commercial insurance policies usually have limits on the amount of coverage provided, there may be significant risk mitigation for the insurer if the premium paid is a substantial percentage of the maximum coverage provided.
- *Loss Corridors.* This feature, which may exist in various forms, serves to eliminate or limit the risk of loss for a specified percentage or dollar amount of claims within the contract coverage. For example, in a contract providing coverage for a policyholder’s first \$3,000,000 of losses, the insurer will pay the first million and last million of losses but will exclude the corridor from \$1,000,000 to \$2,000,000.
- *Dual-triggers.* This feature requires the occurrence of both an insurable event and changes in a separate pre-identified variable to trigger payment of a benefit/claim. An example is a policy entered into by a trucking company that insures costs associated with rerouting trucks over a certain time period if snowfall exceeds a specified level during that time period.
- *Retrospectively-Rated Premiums.* Such premiums are determined after the inception of the policy based on the loss experience under the policy.
- *Reinstatement Premiums.* To the extent the coverage provided by a contract is absorbed by losses incurred, the contract provides for the policyholder to reinstate coverage for the balance of the contract period for a stated additional premium. To the extent reinstatement is required rather than optional, the additional premium may mitigate risk to the insurer.
- *Termination Provisions.* These provisions can be structured to reduce the risk of the insurer, for example, by allowing for termination by the insurer at a discounted amount under certain circumstances.
- *Payment Schedules.* Features that delay timely reimbursement of losses by the insurer prevent the transfer of insurance risk.

There may be other features and provisions, in addition to the list of common insurance risk transfer limiting features above, that exist in a contract. Determining the appropriate accounting requires a full understanding of all of the features and provisions of the contract.

**.09 Transfer of Insurance Risk**

*Inquiry*—Why is transfer of insurance risk important under GAAP?

*Reply*—If a contract does not provide for the indemnification of the insured by the insurer, it is accounted for as a deposit (financing) rather than as insurance as noted in paragraph 44 of FASB Statement No. 5, *Accounting for Contingencies*, and paragraph 6 of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*.

**.10 Accounting Guidance for Transfer of Insurance Risk**

*Inquiry*—What GAAP accounting literature provides guidance related to transfer of insurance risk?

*Reply*—The assessment of transfer of insurance risk requires significant judgment and a complete understanding of the insurance contract and other related contracts between the parties. The greater the number and/or degree of insurance risk limiting features that exist in a contract, the more difficult it becomes to assess whether or not the insurance risk transferred is sufficient to permit the contract to be accounted for as insurance rather than as a deposit.

Paragraph 44 of FASB Statement No. 5, *Accounting for Contingencies*, provides the following guidance on insurance contracts that do not provide for indemnification of the insured by the insurer against loss or liability:

To the extent that an insurance contract or reinsurance contract does not, despite its form, provide for indemnification of the insured or the ceding company by the insurer or reinsurer against loss or liability, the premium paid less the amount of the premium to be retained by the insurer or reinsurer shall be accounted for as a deposit by the insured or the ceding company. Those contracts may be structured in various ways, but if, regardless of form, their substance is that all or part of the premium paid by the insured or the ceding company is a deposit, it shall be accounted for as such.

FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, establishes the conditions required for a contract between an insurer and a reinsurer to be accounted for as reinsurance and prescribes accounting and reporting standards for those contracts. Paragraph 9 of Statement No. 113 notes:

Indemnification of the ceding enterprise against loss or liability relating to insurance risk in reinsurance of short-duration contracts requires both of the following, unless the condition in paragraph 11 is met:

- a. The reinsurer assumes significant insurance risk under the reinsured portions of the underlying insurance contracts.
- b. It is reasonably possible that the reinsurer may realize a significant loss from the transaction.

FASB Statement No. 113 looks to the present value of all cash flows between the parties, however characterized, under reasonably possible outcomes in determining whether it is reasonably possible that the reinsurer may realize a significant loss from the contract. The FASB staff views included in EITF Topic D-34, *Accounting for Reinsurance: Questions and Answers about FASB Statement No. 113*, are useful guidance in applying FASB Statement No. 113.

EITF 03-8, *Accounting for Claims-Made Insurance and Retroactive Insurance Contracts by the Insured Entity*, suggests that noninsurance entities look to the risk transfer guidance in FASB Statement No. 113, and states:

Entities may find the conditions in Statement 113, useful in assessing whether an insurance contract transfers risk.

In EITF 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprise*, the EITF concluded that an insurance contract must indemnify the insured as required by paragraph 44 of FASB Statement No. 5 to be accounted for as insurance. The Status section of EITF 93-14 also indicates that there may be certain situations in which the guarantee accounting in accordance with FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, is applicable.

FASB Derivatives Implementation Group Issue B-26, *Dual-Trigger Property and Casualty Insurance Contracts*, addresses scenarios where there are dual-triggers and includes a number of relevant examples.

### **.11 Differences Between Retroactive and Prospective Insurance**

*Inquiry*—What are the differences between retroactive and prospective insurance?

*Reply*—Paragraph 95 of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, states that for property and casualty insurance: The distinction between prospective and retroactive reinsurance contracts is based on whether the contract reinsures future or past insured events covered by the underlying contracts.

### **.12 Accounting for Prospective Insurance**

*Inquiry*—How does a noninsurance enterprise account for prospective insurance contracts that qualify for insurance accounting?

*Reply*—A noninsurance enterprise amortizes the premiums over the contract period in proportion to the amount of insurance protection provided. If an insured loss occurs, and if it is probable that the policy will provide reimbursement for the loss and the amount of the loss can be reasonably estimated, the noninsurance enterprise records a receivable from the insurance enterprise and a recovery of the incurred loss in the income statement. If it is not probable<sup>1</sup> that the policy will provide reimbursement, then the receivable and recovery are not recorded.

### **.13 Accounting for Retroactive Insurance**

*Inquiry*—How does a noninsurance enterprise account for retroactive insurance contracts that qualify for insurance accounting?

*Reply*—EITF 03-8, *Accounting for Claims-Made Insurance and Retroactive Insurance Contracts by the Insured Entity*, states:

Notwithstanding that Statement 113 applies only to insurance enterprises, the Task Force reached a consensus that purchased retroactive insurance contracts that indemnify the insured should be accounted for in a manner similar to the manner in which retroactive reinsurance contracts are accounted for under Statement 113. The guidance in paragraphs 22–25 of Statement 113 should be applied, as appropriate, based on the facts and circumstances of the particular transaction. That is, amounts paid for retroactive insurance should be expensed immediately. Simultaneously, a receivable should be established for the expected recoveries related to the underlying insured event. If the receivable established exceeds the amounts paid for the insurance, the resulting gain is deferred. If the amounts and timing of the insurance recoveries can be reasonably estimated, the deferred gain should be amortized using the interest method

---

<sup>1</sup> Probable as defined in paragraph 3 of FASB Statement No. 5, *Accounting for Contingencies*, is that the future event or events are likely to occur.

over the estimated period over which the entity expects to recover substantially all amounts due under the terms of the insurance contract. If the amounts and timing of the insurance recoveries cannot be reasonably estimated, then the proportion of actual recoveries to total estimated recoveries should be used to determine the amount of the amortization. Immediate gain recognition and liability derecognition are not appropriate because the liability has not been extinguished (the entity is not entirely relieved of its obligation). Additionally, the Task Force observed that the liability incurred as a result of a past insurable event and amounts receivable under the insurance contract do not meet the criteria for offsetting under Interpretation 39.

EITF 03-8 guidance is derived from paragraphs 22 and 23 of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, which state:

Amounts paid for retroactive reinsurance that meets the conditions for reinsurance accounting shall be reported as reinsurance receivables to the extent those amounts do not exceed the recorded liabilities relating to the underlying reinsured contracts. If the recorded liabilities exceed the amounts paid, reinsurance receivables shall be increased to reflect the difference and the resulting gain deferred. The deferred gain shall be amortized over the estimated remaining settlement period. If the amounts and timing of the reinsurance recoveries can be reasonably estimated, the deferred gain shall be amortized using the effective interest rate inherent in the amount paid to the reinsurer and the estimated timing and amounts of recoveries from the reinsurer (the interest method). Otherwise, the proportion of actual recoveries (the recovery method) shall determine the amount of amortization.

If the amounts paid for retroactive reinsurance exceed the recorded liabilities relating to the underlying reinsured contracts, the ceding enterprise shall increase the related liabilities or reduce the reinsurance receivable or both at the time the reinsurance contract is entered into, so that the excess is charged to earnings.

#### **.14 Accounting for Multiple-Year Retrospectively Rated Insurance**

*Inquiry*—How does a noninsurance enterprise account for a multiple-year retrospectively rated insurance contract?

*Reply*—As noted in EITF 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprises*, multiple-year retrospectively rated contracts:

include a “retrospective rating” provision that provides for at least one of the following based on contract experience: (1) changes in the amount or timing of future contractual cash flows, including premium adjustments, settlement adjustments, or refunds to the ceding enterprise, or (2) changes in the contract’s future coverage. A critical feature of those contracts is that part or all of the retrospective rating provision is obligatory such that the retrospective rating provision creates future rights and obligations as a result of past events.

EITF 93-14 also discusses the accounting for retrospective adjustments and states:

For a multiple-year retrospectively rated insurance contract accounted for as insurance, the Task Force reached a consensus that the insured should recognize a liability and the insurer should recognize an asset to the extent that the insured has an obligation to pay cash (or other consideration) to the insurer that would not have been required absent experience under the contract. The amount recognized in the current period should be computed, using a with-and-without method, as the difference between the insured’s total contract costs before and after the experience under the contract as of the reporting date, including costs such as premium adjustments, settlement adjustments, and impairments of coverage. The amount of premium expense related to impairments of coverage

should be measured in relation to the original contract terms. Future experience under the contract (that is, future losses and future premiums that would be paid regardless of past experience) should not be considered in measuring the amount to be recognized.

The insured should recognize an asset and the insurer should recognize a liability to the extent that any cash (or other consideration) would be payable by the insurer to the insured based on experience to date under the contract.

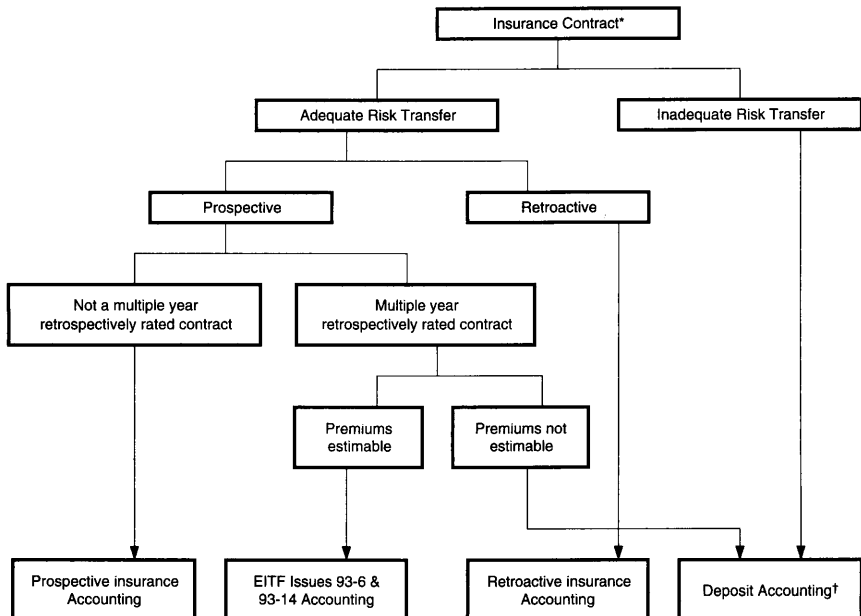

### .15 Deposit Accounting

*Inquiry*—What is deposit accounting?

*Reply*—Deposit accounting essentially treats the contract as a financing transaction similar to a loan taking into account the time value of money. SOP No. 98-7, *Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk* (ACC 10,760), provides guidance on how to account for insurance and reinsurance contracts that do not transfer insurance risk.

### .16 Identifying Accounting Model for Insurance Transactions

The accompanying chart depicts the basic decision process in identifying the appropriate accounting model for insurance transactions.

\* The insurance model discussed in this series of technical practice aids is based on property and casualty and other short-duration contracts, as defined in FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*.

† EITF 93-6, *Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises*, EITF 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprise*, and EITF 93-14 Status Section should also be considered in determining the accounting for multiple year retrospectively rated contracts that do not transfer risk. Topic D-35, *FASB Staff Views on Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises,"* Question 1 addresses why EITF 93-6 is not limited only to risk transfer issues.

[The next page is 201.]

## Section 1300

### ***Statement of Cash Flows***

#### **.03 Comparative Statements of Cash Flows**

*Inquiry*—Is it necessary to provide a statement of cash flows for both the current and prior periods if comparative income statements are presented, but only the current balance sheet is presented?

*Reply*—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3, (as amended by FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*) (AC C25.101), states:

A business enterprise (except for defined benefit plans and certain other employee benefit plans or for certain investment companies), that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Therefore, if a balance sheet is presented, a statement of cash flows should be presented for both current and prior periods if income statements are presented for such periods. [Amended]

#### **.05 Statement of Cash Flows for Annual Report With Balance Sheet Only**

*Inquiry*—When only a statement of financial position is presented, is it necessary that the auditor's opinion be qualified relative to the omission of the statement of cash flows?

*Reply*—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3, (as amended by FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*) (AC C25.101), states:

A business enterprise (except for defined benefit plans and certain other employee benefit plans or for certain investment companies), that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Therefore, when a statement of financial position is not accompanied by a statement of operations, there is no need for presentation of a statement of cash flows, and no comment on the absence of such a statement is necessary. [Amended]

#### **.10 Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles**

*Inquiry*—When an entity prepares its financial statements on a comprehensive basis of accounting other than generally accepted accounting principles (GAAP), is a statement of cash flows required?

*Reply*—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3, (as amended by FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*) (AC C25.101), states:

A business enterprise (except for defined benefit plans and certain other employee benefit plans or for certain investment companies), that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

SAS No. 62, *Special Reports*, paragraph 7 (AU 623.07), states, in part:

Terms such as “balance sheet,” “statement of financial position,” “statement of income,” or “statement of operations,” and “statement of cash flows,” or similar unmodified titles are generally understood to be applicable only to financial statements that are intended to present financial position, results of operations, or cash flows in conformity with generally accepted accounting principles.

Interpretation 14 of SAS No. 62 (AU 9623.92) states, in part:

While a statement of cash flows is not required in presentations using the cash, modified cash, or income tax basis of accounting, if a presentation of cash receipts and disbursements is presented in a format similar to a statement of cash flows or if the entity chooses to present such a statement . . . the statement should either conform to the requirements for a GAAP presentation or communicate their substance.

### **.11 The Effect of a Prior Period Adjustment on the Statement of Cash Flows When Single Period Statements Are Presented**

*Inquiry*—How would a prior period adjustment be presented in the statement of cash flows if single period statements are presented?

*Reply*—FASB Statement No. 16, *Prior Period Adjustments*, paragraph 16a (A35.106), states that “prior period adjustments shall, in single period statements, be reflected as adjustments of the opening balance of retained earnings.” A corresponding prior period adjustment will normally result in a change in the beginning balance of an asset or liability account. FASB Statement No. 95, *Statement of Cash Flows*, paragraph 32 (AC C25.132), states, in part:

Information about all investing and financing activities of an enterprise during a period that affected recognized assets or liabilities but that did not result in cash receipts or cash payments in the period shall be reported in related disclosures.

Therefore, the difference in an account between the current balance sheet and that same account in the restated beginning balance sheet (even if not presented) that resulted from the prior period adjustment, should be reflected in the related footnote disclosures and clearly referenced to the statement of cash flows. [Amended]

### **.13 Classification of Increase in Cash Value of Officers’ Life Insurance in Statement of Cash Flows**

*Inquiry*—How should the increase in cash surrender value of officers’ life insurance be classified in the statement of cash flows?

*Reply*—An increase in the cash surrender value of officers’ life insurance would normally be presented as an investing outflow if the increase in cash value is less than the related premium paid. If the increase in cash value exceeds the premium paid, the premium paid is an investing outflow and the remainder of the increase in cash value would be presented as a reconciling item on the reconciliation of net income to net cash provided by operating activities.

**.15 Presentation of Cash Overdraft on Statement of Cash Flows**

*Inquiry*—A company has accounts at three separate banks. One of the bank accounts is in an overdraft position at year end, thus it is shown as a liability on the balance sheet. Does the company show as cash and cash equivalents on the statement of cash flows only the two accounts with the positive balances or does it show the net cash (the three accounts combined) at the end of the year as its cash and cash equivalents?

*Reply*—The amount that will be shown on the statement of cash flows is the two accounts with the positive balances. Per FASB Statement No. 95, *Statement of Cash Flows*, paragraph 7 (AC C25.105), “The total amounts of cash and cash equivalents at the beginning and end of the period shall be the same amounts as similarly titled line items or subtotals shown in the statements of financial position . . .” The net change in overdrafts during the period is a financing activity.

**.16 Purchase of Inventory Through Direct Financing**

*Inquiry*—An automobile dealer purchases its inventory from a manufacturer which finances purchases through a finance subsidiary. The finance subsidiary pays the manufacturer directly on behalf of the dealer. Cash is not disbursed by the dealer until the automobiles are sold.

Under the provisions of FASB Statement No. 95, *Statement of Cash Flows* (AC C25), how should the purchases of inventory be reported by the automobile dealer in the statement of cash flows?

*Reply*—A statement of cash flows reports an enterprise’s cash receipts and cash payments during the period. Transactions that do not involve cash receipts and cash payments should be excluded from the statement of cash flows. Noncash investing and financing transactions should be reported in separate disclosures.

The purchases of inventory described above do not involve a cash flow by the automobile dealer until the automobiles are sold and the dealer pays the finance subsidiary under the financing arrangement. Therefore, only the cash outflows from payments to the finance subsidiary should be included in the body of the statement of cash flows.

Payments made to the finance subsidiary of the manufacturer should be classified as operating cash outflows in accordance with FASB Statement No. 95, paragraph 23(a) (AC C25.121), which defines operating cash outflows to include principal payments on accounts and notes payable to suppliers for goods acquired for resale.

**.17 Omission of Reconciliation of Net Income to Cash Flow From Operations**

*Inquiry*—When an accountant is requested to compile financial statements that omit substantially all of the disclosures required by GAAP, [SSARS 1, *Compilation and Review of Financial Statements*, paragraph 19 (AR 100.16)] would the omission of the schedule, “reconciliation of net income to net cash flow from operating activities” required by the direct method of reporting cash flows under FASB Statement No. 95, *Statement of Cash Flows* (AC C25), be considered a departure from GAAP?

*Reply*—Yes. Under the direct method of reporting net cash flows from operating activities, the separate schedule reconciling net income to net cash flow from operating activities is a required part of the cash flow statement. If

the schedule is omitted, the accountant should modify his compilation report to disclose a departure from GAAP in accordance with SSARS 1, paragraph 40 (AR 100.42).

### **.18 Presentation on the Statement of Cash Flows of Distributions From Investees With Operating Losses**

*Inquiry*—An entity carries an investment in a limited partnership interest under the equity method of accounting. The partnership had operating losses during the year, but a positive cash flow allowed the partnership to distribute funds to its investors. Would receipt of that distribution by the entity be classified on the statement of cash flows as cash inflows from investing activities or as cash inflows from operating activities?

*Reply*—FASB Statement No. 95, *Statement of Cash Flows* (AC C25), requires dividends received (returns on investments) to be classified as cash inflows from operating activities. Receipts from returns of investments are classified as cash inflows from investing activities.

Distributions to investors from investees should be presumed to be returns on investments and be classified by the investor as cash inflows from operating activities, similar to the receipt of dividends. That presumption can be overcome based on the specific facts and circumstances. For example, if the partnership sells assets, the distribution to investors of the proceeds of that sale would be considered a return of investment and be classified by the investor as cash inflows from investing activities.

### **.19 Classification of Payments on Equipment Finance Note**

*Inquiry*—Under the provisions of FASB Statement No. 95, *Statement of Cash Flows*, paragraph 32 (AC C25.134), noncash investing and financing transactions are to be disclosed in related narrative form or summarized in a schedule. An example of a transaction of this type would be an acquisition of equipment in a transaction in which an enterprise borrows money from a financial institution for the purchase of equipment and the financial institution remits the money directly to the vendor. In a transaction of this nature, should the payments of principal be presented as an outflow in the financing or investing section of the cash flow statement?

*Reply*—Payments on the aforementioned notes would be recorded as financing outflows per FASB Statement No. 95, paragraph 20b (AC C25.118b).

### **.20 Direct vs. Indirect Method for Statement of Cash Flows**

*Inquiry*—A company has decided to present its statement of cash flows using the direct method for the current year although the indirect method was used in the prior year. Would this change require an explanatory paragraph noting a lack of consistency in the financial statements?

*Reply*—No. A change in the presentation for the statement of cash flows from the indirect to direct method (or vice versa) is considered a change in classification rather than a consistency problem. SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph 16 (as amended) (AU 420.16) states:

Classifications in the current financial statements may be different from classifications in the prior year's financial statements . . . material changes in classification should be indicated and explained in the financial statements or notes. These changes . . . ordinarily would not need to be referred to in the independent auditor's report.

If the statement of cash flows is presented for the prior period, it should be restated using the direct method approach for comparative purposes. In addition, disclosure should be made indicating the prior period restatement.

### **.21 Presentation of Financing Transaction on Statement of Cash Flows**

*Inquiry*—A buyer contracts to purchase real estate. The lender gives the buyer a check made payable to the buyer for a loan to purchase the property. The buyer in turn endorses the check over to the seller. How should this financing transaction be presented on the buyer's statement of cash flows?

*Reply*—This transaction should be treated as a cash receipt by the buyer since the buyer was named as payee on the check. The amount of the check should be reported on the statement of cash flows even though the buyer did not convert the check to currency or deposit it in his or her bank account. The cash receipt belongs to the payee named on the check. The buyer should present the amount of the check as "Proceeds From Borrowings" as a cash inflow from financing transactions and "Purchase of Real Estate" as a cash outflow from investing activities.

### **.22 Negative Amortization of Long-Term Debt in Cash Flows Statement**

*Inquiry*—The cash repayments on a long-term loan are less than the interest expense for the period. The amount of the interest expense not paid becomes part of the principal balance (negative amortization). How should the negative amortization be shown on the cash flows statement?

*Reply*—FASB Statement No. 95, *Statement of Cash Flows*, paragraph 28, footnote 12 (and footnote 13 [AC C25.126]), indicates:

Adjustments to [reconcile] net income to determine net cash flow from operating activities shall reflect accruals for interest earned but not received and interest incurred but not paid.

The negative amortization should therefore be treated as an adjustment to net income to remove the effect of this noncash expense. Disclosure should also be considered.

---

[The next page is 261.]

## Section 1400

# Consolidated Financial Statements

### .02 Consolidation of Corporation and Proprietorship

*Inquiry*—How should the financial statements of a corporation and a proprietorship be consolidated?

*Reply*—This answer assumes that 100% of the corporation capital stock is owned by the proprietorship. If not, the proportion of the net equity of the corporation applicable to the interest of the minority should appear on the balance sheet between liabilities and equity, and on the income statement as a subtraction following the provision for income taxes.

As in any consolidation, the stockholders' equity of the subsidiary corporation should be eliminated against the investment of the parent (the proprietorship). Any net earnings of the subsidiary corporation subsequent to its acquisition and not recorded on the books of the parent should be reflected in the consolidated net equity, which, since the parent is a sole proprietorship, will be a single figure. As income taxes are assessed against the owner as an individual, rather than against the proprietorship, no provision is made for income taxes beyond those payable by the corporation. However, a footnote should disclose such omission, and if it is anticipated that funds will have to be withdrawn from the proprietorship to meet future taxes on income earned to date, this too should be disclosed, with an estimate of the amount thereof if practicable. Of course, provision should be made for elimination of profits to the extent that they may be reflected in consolidated inventories or in other consolidated assets.

### .06 Combined and Separate Financial Statements

*Inquiry*—Company A and Company B are new car dealers with A selling an American made car and B selling a foreign made car. One individual owns 100% of the outstanding stock of both companies.

Both companies A and B are at the same location with separate buildings for sales staffs. Company A maintains the parts and service departments for both companies with the parts inventory, warranty and service receivables of Company B on Company A's books. In return, Company B pays Company A a per car fee for services to be performed on each new car sold by B.

Company A maintains the only used car inventory on the lot adjacent to Company B's building. Each time B receives a used car in trade, it is sold to Company A at the wholesale fair market value.

Although there is a differentiation in sales staffs, management, accounting, secretarial, and other related services are performed by the same staff out of both buildings, and Company B pays a monthly fee for services performed.

Company A has income for the year, but Company B has a loss for the period. Combined financial statements will be prepared, but is it also necessary to provide combining statements for the individual companies?

*Reply*—ARB No. 51, *Consolidated Financial Statements*, paragraph 22 (AC C51.121), states in part:

There are circumstances, however, where combined financial statements (as distinguished from consolidated statements) of commonly controlled companies are likely to be more meaningful than their separate statements. For example, combined financial statements would be useful where one individual owns a controlling interest in several corporations which are related in their operations.

Combined financial statements of the companies would be appropriate, and there is no necessity for presenting separate statements for the companies.

Unfortunately, Accounting Research Bulletin No. 51 (AC C51) makes no statement as to appropriate presentation of the stockholder's equity section of a combined balance sheet. Appropriate disclosure, therefore, may depend upon the circumstances. Either on the statement of financial position, or in a note, there should be disclosure for each company of their number of shares of stock that are authorized and outstanding, and the par value. While under some circumstances it might not be necessary to disclose the allocation of retained earnings between the two companies, other circumstances may exist under which such disclosure would be required—e.g., if the losses of either company have been so severe that an insolvent condition might be anticipated.

#### **.07 Reporting on Company Where Option to Acquire Control Exists**

*Inquiry*—Corporation A acquired debentures from Corporation B convertible into common voting stock within ten years at \$1 per share. Corporation A also has an option to purchase additional shares at \$1 per share upon conversion to bring A's holdings in B up to 51% of the total outstanding shares. Corporation A also has the right to appoint a majority of Corporation B's Board of Directors and has done so. Other intercompany transactions are negligible.

May each company issue separate financial statements, or are consolidated statements required? What disclosures would be necessary?

*Reply*—At present there is no ownership of one company by the other, and consolidation would not be proper. Further, since intercompany transactions (other than interest on the debentures) are negligible, combined statements would probably not be particularly useful.

Corporation A should disclose in its financial statements the terms under which it may obtain controlling stock ownership of Corporation B, the amount of interest received, that no other intercompany transactions are significant, and that it presently has the right to and does appoint a majority to Corporation B's Board of Directors. It should also present summarized information as to the assets, liabilities, and operating results of Corporation B, or include B's financial statements with its report.

Corporation B, in addition to disclosing the interest rate and maturity of the convertible debentures, should disclose Corporation A's conversion and option privileges and should disclose that Corporation A has the right to and has appointed a majority to Corporation B's Board of Directors.

#### **.19 Consolidation of Limited Partnerships**

*Inquiry*—Company A, a privately held real estate developer and operator, conducts a portion of its business through limited partnerships in which it is a general partner. The limited partnerships are structured so that Company A,

the general partner, has a 5 percent interest in profits and losses, shares in two-thirds of the cash flow from operations after the limited partners receive their guaranteed payments, and has full authority to operate, manage, refinance, and sell. Should Company A consolidate the limited partnerships?

*Reply*—SOP No. 78-9, *Accounting for Investments in Real Estate Ventures*, paragraph 9, (ACC 10,240.09), states that consolidation is appropriate “only if the substance of the partnership or other agreements provide for control by the general partners.” Since the general partner has full authority to operate, manage, refinance, and sell, the general partner controls the operations of the limited partnerships and should consolidate the limited partnerships.

## **.21 Minority Interest Guarantee**

*Inquiry*—Company A is the majority shareholder and Company B the minority shareholder in Company C. B has guaranteed the debt of C by irrevocable letters of credit. B’s share of the net losses of C exceeds its share of C’s net assets. Since B guaranteed C’s indebtedness, should this be reported as an asset in the consolidated financial statements of A and C?

*Reply*—B’s guarantee is similar to a contingent asset and should not be included in the consolidated financial statements of A and C other than through note disclosure. Accordingly, there would be no amount reflected in the consolidated balance sheet for the minority interest, since B’s share of the net losses of C exceeds its share of C’s net assets. (See ARB No. 51, *Consolidated Financial Statements*, paragraph 15 (AC C51.116).)

If the creditor of C requires B to perform on its guarantee, then B, for accounting purposes, would have a claim against C. After this takes place, a liability to B would be reported in the consolidated financial statements of A and C. [Amended]

## **.22 Intervening Intercompany Transactions Between Subsidiary’s and Parent’s Year-End**

*Inquiry*—A parent company has a December 31 year-end and its wholly owned subsidiary has a November 30 year-end. The two companies generally have substantial intercompany sales and purchases which are recorded by each company as they occur. The parent uses the subsidiary’s November 30 year-end statement to prepare the consolidated financial statements.

The intervening intercompany transactions, which occur between December 1 and December 31, create intercompany account balances which do not eliminate upon consolidation due to the difference in year-ends of the parent and its subsidiary. How should these intervening transactions be accounted for in the consolidated financial statements?

*Reply*—In discussing differences in fiscal periods, ARB No. 51, *Consolidated Financial Statements*, paragraph 4 (AC C51.107), states, “where the difference is not more than about three months, it usually is acceptable to use, for consolidation purposes, the subsidiary’s statements for its fiscal period; when this is done, recognition should be given by disclosure, or otherwise, to the effect of intervening events which materially affect the financial position or results of operations.”

When a subsidiary’s fiscal year differs from that of the parent, intercompany accounts may not agree. Transactions in the interval between the subsidiary’s year-end and the parent’s year-end must be analyzed and appropriate consolidation entries prepared.

A practical approach to preparing these consolidation entries would be to reverse the intervening intercompany transactions in the parent company's accounts but not in the subsidiary's accounts. A summary of these intervening transactions could then be disclosed in a note to the consolidated financial statements.

### **.23 Conforming Subsidiary's Inventory Pricing Method to Its Parent Company's Method**

*Inquiry*—A parent company uses the first-in, first-out (FIFO) cost assumption to price its inventory, while its subsidiary uses the last-in, first-out (LIFO) cost assumption to price its inventory. Must the subsidiary's inventory method be changed to conform to the FIFO method used by its parent company in consolidated financial statements?

*Reply*—There is no requirement under generally accepted accounting principles for the subsidiary to conform its inventory pricing method with the parent company's method. Consolidated statements may be presented with the subsidiary using LIFO and the parent using FIFO. Also, separate subsidiary only statements may be presented on the LIFO basis.

### **.24 Classification of Minority Interest**

*Inquiry*—Where should minority interest be classified in a consolidated balance sheet?

*Reply*—The authoritative literature does not provide definitive guidance on the classification of minority interest. In practice, minority interest is presented as a liability, a component of stockholders' equity or as a separate category between liabilities and stockholders' equity.

The AICPA's *Accounting Trends & Techniques* is a compilation of data obtained by a survey of 600 annual reports to stockholders, undertaken for the purpose of analyzing the accounting information disclosed in such reports. Most companies included in the survey that reflected a minority interest caption presented it as part of noncurrent liabilities or between liabilities and stockholders' equity.

### **.25 Issuance of Parent Company Only Financial Statements**

*Inquiry*—FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, paragraph 15 (AC I82.102), precludes preparation of parent company financial statements for issuance to stockholders as the financial statements of the primary reporting entity. Are there any circumstances under which parent company financial statements may still be prepared?

*Reply*—Yes. ARB No. 51, *Consolidated Financial Statements*, paragraph 24 (AC C51.123), states: "In some cases parent company statements may be needed, in addition to consolidated statements, to indicate adequately the position of bondholders, other creditors, or preferred stockholders of the parent. Consolidated statements, in which one column is used for the parent company and other columns for particular subsidiaries or groups of subsidiaries often are an effective means of presenting the pertinent information."

### **.26 Consolidated Versus Combined Financial Statements**

*Inquiry*—S Corporation has 2000 common shares and 1000 preferred shares outstanding. The preferred shareholders have the same rights as the common shareholders, except the right to vote. Of the 2000 common shares outstanding,

1000 shares are owned by P Corporation and 1000 shares are owned by I (an individual) who also owns all of the outstanding common shares of P Corporation. The preferred shares of S Corporation are owned by an outside party. Should P Corporation consolidate S Corporation for financial reporting purposes?

*Reply*—ARB No. 51, *Consolidated Financial Statements*, as amended by FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries* (AC C51), states that to “justify the preparation of consolidated statements, the controlling financial interest should rest directly or indirectly in one of the companies included in the consolidation.” In this situation P does not control S directly or indirectly and therefore consolidation is not appropriate. Combined financial statements could be presented if the circumstances are such that combined financial statements of S Corporation and P Corporation are more meaningful than separate financial statements.

### **.27 Subsidiary Financial Statements**

*Inquiry*—FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, paragraph 61 (AC C51.101), indicates that “consolidated rather than parent-company financial statements are the appropriate general-purpose financial statements.” May subsidiary-only financial statements be issued without consolidated financial statements?

*Reply*—Yes. Generally accepted accounting principles do not preclude issuance of subsidiary-only statements. Care should be taken to include all disclosures required by FASB Statement No. 57, *Related Party Disclosures* (AC R36), FASB Statement No. 109, *Accounting for Income Taxes*, paragraph 49 (AC C51.108A), and other relevant pronouncements (AC R36.105-106).

### **.29 Consolidated Versus Combined Financial Statements Under FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities**

*Inquiry*—If a reporting entity is the primary beneficiary of a variable interest entity (VIE) under FASB Interpretation (FIN) No. 46(R), *Consolidation of Variable Interest Entities*, would it be appropriate to issue combined financial statements rather than consolidated financial statements?

*Reply*—No. ARB No. 51, *Consolidated Financial Statements*, paragraph 22 permits combined financial statements in certain situations in which consolidated financial statements are not required. However, FIN No. 46(R) states in paragraph 14 that “an enterprise shall consolidate a variable interest entity if that enterprise has a variable interest (or combination of variable interests) that will absorb a majority of the entity’s expected losses, receive a majority of the entity’s expected residual returns, or both.” Furthermore, the starting point for the preparation of combined financial statements is two or more sets of financial statements that are prepared in accordance with GAAP; in the case of a primary beneficiary of a VIE, financial statements prepared in accordance with GAAP would be consolidated financial statements.

### **.30 Stand-Alone Financial Statements of a Variable Interest Entity**

*Inquiry*—Regarding FASB Interpretation (FIN) No. 46(R), *Consolidation of Variable Interest Entities*, is it appropriate to present stand-alone financial statements of a variable interest entity (VIE)?

*Reply*—FIN No. 46(R) does not specifically address this issue. Subsidiary-only financial statements are appropriate under generally accepted accounting principles. By extension, it may be appropriate to present stand-alone financial statements of a VIE.

**.31 GAAP Departure for FIN No. 46(R)**

*Inquiry*—If a reporting entity is the primary beneficiary of a variable interest entity under FASB Interpretation (FIN) No. 46(R), *Consolidation of Variable Interest Entities*, what are the implications for the auditors' report if the reporting entity does not consolidate the variable interest entity?

*Reply*—AU section 508.35–36 addresses departures from generally accepted accounting principles. When financial statements are materially affected by a departure from generally accepted accounting principles and the auditor has audited the statements in accordance with generally accepted auditing standards, he or she should express a qualified or an adverse opinion.

In deciding whether the effects of a departure are sufficiently material to require either a qualified or adverse opinion, the auditor should use qualitative as well as quantitative judgments. The significance of an item to a particular entity and the pervasiveness of the misstatement (such as whether it affects the amounts and presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole are all factors to be considered in making a judgment regarding materiality.

If an auditor concludes that a qualified opinion is appropriate, he or she should disclose the GAAP departure in a separate explanatory paragraph(s) preceding the opinion paragraph of the report. Furthermore, the opinion paragraph of the report should include the appropriate qualifying language and a reference to the explanatory paragraph(s). The explanatory paragraph(s) should disclose the principal effects of the departure on financial position, results of operations, and cash flows, if practicable. If the effects are not reasonably determinable, the report should so state. If such disclosures are made in a note to the financial statements, the explanatory paragraph(s) may be shortened by referring to it.

**.32 Parent-Only Financial Statements and Relationship to GAAP**

*Inquiry*—ARB No. 51, *Consolidated Financial Statements*, and FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*, address parent company financial statements. If consolidation is required under generally accepted accounting principles (GAAP), are there any circumstances in which an entity may prepare parent company-only financial statements without preparing related consolidated financial statements and say that the parent company-only financial statements are in accordance with GAAP?

*Reply*—No. Paragraph 1 of ARB No. 51 notes the presumption in GAAP that consolidated financial statements are more meaningful than parent company-only financial statements. Paragraph 3 of ARB No. 51 states that all majority-owned subsidiaries shall be consolidated, with few exceptions. Paragraph 24 of ARB No. 51 adds that parent company financial statements may be needed in addition to consolidated financial statements, but it does not suggest that parent company financial statements may be prepared in place of consolidated financial statements.

For example, if, as a condition of a legal or regulatory agreement, an entity is required to submit “restricted” or “special use” parent-only financial statements without related consolidated financial statements, the restricted or special use parent-only financial statements are not in accordance with GAAP.

---

## Section 1500

### ***Financial Statements Prepared Under An Other Comprehensive Basis Of Accounting (OCBOA)***

---

For nonauthoritative guidance about OCBOA financial statements, consult the AICPA's publication entitled, *Preparing and Reporting on Cash- and Tax-Basis Financial Statements*. This book is intended to alert the reader to some of the most frequently-encountered issues faced by accounting professionals in dealing with cash- and tax-basis financial statements and provides suggestions and insight into how these issues are resolved in practice. To order this publication, call the AICPA at 1-888-777-7077.

---

#### **.04 Terminology for OCBOA Financial Statements**

**Inquiry**—(1) If an entity presents financial statements under an other comprehensive basis of accounting, may GAAP financial statement titles be used?

(2) What should be the caption for “net income” or “net loss,” and may the corporation use “retained earnings”?

**Reply**—(1) No. SAS No. 62, *Special Reports*, paragraph 7 (AU 623.07), states that unmodified GAAP financial statement titles are not acceptable for use in OCBOA financial statements. The paragraph contains a few examples of appropriate financial statement titles (for example, *Statement of Assets and Liabilities Arising from Cash Transactions and Statement of Income—Statutory Basis*). However, the examples presented in the authoritative literature were not meant to be all-inclusive and are not the only acceptable titles. Equally acceptable titles would be *Balance Sheet—Cash Basis* or *Statement of Operations—Income Tax Basis*. The selection of specific financial statement titles is a matter of judgment; any modified title would fulfill the requirements of SAS No. 62 (AU 623) as long as it is clear that the financial statements are not prepared in accordance with GAAP.

(2) The authoritative literature is silent regarding the captions to be used within OCBOA financial statements. Therefore, there is no requirement to modify standard GAAP financial statement captions in OCBOA financial statements. If modifications are desired, common examples for cash basis financial statements are *Excess of revenue collected over expenses paid*, *Excess of expenses paid over revenue collected*, and *Accumulated excess of revenue over expenses paid*. For tax-basis financial statements, acceptable modifications include *Retained earnings—income tax basis* and *Net income—tax basis*. [Amended February 1995.]

#### **.05 Substantial Support for Modifications in Cash Basis**

**Inquiry**—Many nonprofit organizations, partnerships, and small businesses prepare their financial statements on a modified cash basis of accounting. Which modifications of the cash basis of accounting have “substantial support” under SAS No. 62, *Special Reports*, paragraph 4c (AU 623.04c)?

*Reply*—The cash basis of accounting and modifications of the cash basis are not formalized in accounting literature. Modifications have evolved through common usage and practice.

Modifications of the cash basis of accounting to record depreciation on plant and equipment and to accrue income taxes were recognized in SAS No. 62, paragraph 4c (AU 623.04c). Ordinarily a modification would have “substantial support” if the method is equivalent to the accrual basis of accounting for the particular item and if the method is not illogical. For example, generally income tax accruals are derived from the tax payable or receivable on the entity’s income tax return(s). An illogical method would be recording revenue on the accrual basis and recording purchases and other costs on the cash basis.

If modifications to the cash basis of accounting do not have substantial support, the auditor should include an explanatory paragraph in his or her report (preceding the opinion paragraph) and should include in the opinion paragraph the appropriate modifying language and a reference to the explanatory paragraph.

If the modifications are so extensive that the modified “cash-basis” statements are, in the auditor’s judgment, equivalent to financial statements on the accrual basis, the statements should be considered GAAP basis. The auditor should use the standard form of report (SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08)), modified as appropriate because of departures from generally accepted accounting principles (SAS No. 58, paragraphs 49 through 54 (AU 508.49–.54)). For example, financial statements that are presented in conformity with generally accepted accounting principles, except that material leases are not capitalized (FASB Statement No. 13, *Accounting for Leases* (AC L10), are considered GAAP-basis financial statements containing a GAAP departure. [Amended February 1995.]

#### **.06 Application of FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities*, to Income Tax Basis Financial Statements**

*Inquiry*—Do the consolidation or disclosure provisions of FASB Interpretation (FIN) No. 46(R), *Consolidation of Variable Interest Entities*, apply to financial statements prepared under the income tax basis of accounting?

*Reply*—For income tax basis financial statements, consolidation is based on the Internal Revenue Code. Therefore, the consolidation requirements of the FIN No. 46(R) would not apply to financial statements prepared under the income tax basis of accounting.

SAS No. 62 (AU 623.09–.10) and Interpretation No. 14 (AU 9623.90–.95), “Evaluating the Adequacy of Disclosure and Presentation in Financial Statements Prepared in Conformity With an Other Comprehensive Basis of Accounting,” discusses disclosures in OCBOA financial statements. It states that, if OCBOA financial statements contain elements, accounts, or items for which GAAP would require disclosure, the statements should either provide the relevant disclosure that would be required for those items in a GAAP presentation or provide information that communicates the substance of that disclosure.

A variable interest entity (VIE) that is not consolidated under the income tax basis of accounting is analogous to a 60 percent-owned subsidiary that would be consolidated under GAAP but is not consolidated under the income tax basis of accounting because the threshold for consolidation under the Internal Revenue Code is 80 percent ownership. The primary beneficiary of the

VIE should perform the same analysis in determining which disclosures are appropriate as would the parent of the 60 percent-owned subsidiary. Examples of matters that might require disclosure are related-party transactions, guarantees, and commitments.

## Section 1600

### ***Personal Financial Statements***

#### **.03 Social Security Benefits—Personal Financial Statements**

*Inquiry*—Do social security benefits to be received based on the future life expectancy of an individual qualify as an asset in personal financial statements?

*Reply*—No. Statement of Position (SOP) 82-1, *Accounting and Financial Reporting for Personal Financial Statements*, paragraph 26 (ACC 10,350.26), indicates that nonforfeitable rights to receive future sums must meet certain criteria to be accounted for as assets. One of these criteria is that the rights must not be contingent on the individual's life expectancy or the occurrence of a particular event, such as disability or death. In this example, because the social security benefits are contingent on the individual's life expectancy, they do not qualify as a recognizable asset for the personal financial statements.

---

[The next page is 551.]

## Section 1800

### *Notes to Financial Statements*

#### **.03 Disclosure of Change in Fiscal Year**

*Inquiry*—What disclosure in the financial statements is necessary when a company changes its fiscal year?

*Reply*—Generally accepted accounting principles do not specifically require disclosure of a change in the fiscal year. However, disclosure of such a change is generally considered necessary to make the financial statements meaningful to users. [Amended]

#### **.04 Derivatives**

*Inquiry*—FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), requires certain disclosures for investments made in derivative financial instruments. Some entities have indirect investments in derivatives because they invest in mutual funds that include derivatives in their portfolios. Do these disclosure requirements apply only to direct investments in such instruments or do they apply to indirect investments as well?

*Reply*—No. FASB Statement No. 119 (AC F25) does not require disclosure of indirect investments in derivatives. This topic was specifically addressed by the FASB during the preparation of FASB Statement No. 119 (AC F25). The FASB's position differs from the GASB's conclusion in GASB Technical Bulletin No. 94-1, *Disclosures about Derivatives and Similar Debt and Investment Transactions*, paragraph 4, which states: "... the disclosures ... are applicable if the entity is exposed to risk by indirectly ... holding ... derivatives, such as through participation in a mutual fund. ..."

## Section 2110

### Cash

#### .02 Checks Held at Balance Sheet Date

*Inquiry*—It is the practice of a company to eliminate its recorded accounts payable balance at the end of each month by writing checks to all of its trade vendors prior to the end of the month. To prevent overdrafts that would result from this practice, the company retains possession of the checks and only mails them to the vendors after the end of the month, when sufficient funds are available to satisfy them.

How should these held checks be accounted for by the company at month end?

*Reply*—At month end the aggregate dollar amount of held checks should be added back to cash and accounts payable. Checks which have not left the custody of the company should not reduce the company's recorded cash or accounts payable balances because they have not been tendered to the vendor to satisfy the debt.

#### .06 Disclosure of Cash Balances in Excess of Federally Insured Amounts

*Inquiry*—Should the existence of cash on deposit with banks in excess of FDIC-insured limits be disclosed in the financial statements?

*Reply*—The existence of uninsured cash balances should be disclosed if the uninsured balances represent a significant concentration of credit risk. Credit risk is defined in FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, paragraph 7, as “the possibility that a loss may occur from the failure of another party to perform according to the terms of a contract.” As a result, bank statement balances in excess of FDIC-insured amounts represent a credit risk.

A concentration of credit risk exists if an entity has exposure with an individual counterparty or groups of counterparties. For example, a material uninsured cash balance with a single bank should generally be disclosed. In contrast, numerous immaterial uninsured cash balances on deposit with several banks may not require disclosure. The threshold for “significance” is a matter of judgment and will vary with individual circumstances.

An example of disclosure for this circumstance might be:

The Company maintains its cash accounts primarily with banks located in Alabama. The total cash balances are insured by the FDIC up to \$100,000 per bank. The Company has cash balances on deposit with two Alabama banks at December 31, 1996 that exceeded the balance insured by the FDIC in the amount of \$1,100,000.

---

[The next page is 761.]

## Section 2120

### *Temporary Investments*

#### **.05 Depreciation on Building Held for Investment**

*Inquiry*—A corporation purchased a building and intends to sell it within six months. It is accounted for as an investment rather than a fixed asset. Should the building be depreciated?

*Reply*—No. Depreciation is the systematic allocation of an asset's cost over the asset's service period. Because the building will be recovered through sale rather than through operations, accounting for the building is a process of valuation rather than allocation. FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, concludes that long-lived assets to be disposed of should not be depreciated during the period they are held for disposal. The asset should be reported at the lower of carrying amount or fair value less cost to sell.

The fair value of an asset is the amount at which the asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The cost to sell an asset to be disposed of are generally the incremental direct costs to transact the sale of the asset, such as broker commissions, legal and title transfer fees, and closing costs that must be incurred before legal title can be transferred. Costs generally excluded for cost to sell an asset to be disposed of are insurance, security services, utility expenses, and other costs of maintaining the asset.

#### **.06 Accounting for Preferred Dividends Received on Investments in Common Stock**

*Inquiry*—A company received dividends on its investment in common stock of another company in the form of preferred stock. How should the dividend be recorded?

*Reply*—The assets and related dividend income should be recorded at fair value. APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, paragraph 18 (AC N35.105), states that in general, accounting for nonmonetary transactions should be based on the fair values of the assets or services involved which is the same basis as that used in monetary transactions and that a nonmonetary asset received in a nonreciprocal transfer should be recorded at the fair value of the asset received. (ARB No. 43, chapter 7B, *Stock Dividends and Stock Split-ups* (AC C20), discusses accounting for stock dividends by the recipient; however, the scope of that pronouncement specifically excludes distributions of a different class of shares from that owned.) [Amended June 1995.]

---

[The next page is 811.]

## Section 2130

### **Receivables**

#### **.05 Out-of-Pocket Costs Incurred by a Law Firm**

*Inquiry*—A law firm incurs certain out-of-pocket costs on behalf of its clients. If the law firm's efforts on behalf of the client are successful, these costs are recovered from the client in addition to the legal fees. If the case is lost, the costs are absorbed by the law firm. How should these costs be treated by the law firm?

*Reply*—These out-of-pocket costs should be reported as an asset in the financial statements of the law firm (for example, in an account called "client costs receivable"). At each balance sheet date, the law firm should apply the criteria in FASB Statement No. 5, *Accounting for Contingencies*, paragraph 3 (AC C59.104) to determine whether a loss contingency should be accrued.

If an asset is recorded, an allowance for unrecoverable client disbursements should be established representing the estimated amount of such costs that will not be realized. If these out-of-pocket costs become uncollectible because a case is lost, they should be written off against the allowance. [Amended June 1995]

#### **.07 Requirement for Doubtful Accounts Allowance**

*Inquiry*—Do generally accepted accounting principles require an enterprise to establish an allowance for doubtful accounts even though management, based on analysis of the receivables and past charge-off experience, believes that no accounts are uncollectible at the balance sheet date?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies*, paragraph 22 (AC C59.128), states that "the conditions under which receivables exist usually involve some degree of uncertainty about their collectibility, in which case a contingency exists . . ." FASB Statement No. 5, paragraph 8 (AC C59.105), would require an accrual of a loss by a charge to income if both of the following conditions exist:

- a. "Information available prior to issuance of the financial statements indicates that it is probable that an asset has been impaired . . . at the date of the financial statements." and
- b. "The amount of loss can be reasonably estimated."

If both conditions are not met, an allowance for doubtful accounts would not be required. Further, there is no requirement to disclose the absence of a loss accrual. If the conditions are met, an accrual for the loss should be recognized even though the specific receivables that are uncollectible may not be identifiable.

#### **.09 Scope Part I: Application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*, to Debt Securities**

*Inquiry*—Does the scope of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), include debt securities?

*Reply*—Yes. This SOP applies to loans, as defined in the Glossary (ACC 10,880.23), including those that are accounted for as debt securities. The SOP defines the terms "loan" and "debt security" by reference to FASB Statement

No. 114, *Accounting by Creditors for Impairment of a Loan*, and FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The definition of loan in SOP 03-3's glossary (ACC 10,880.23) refers to FASB Statement No. 114 for the definition of a loan and goes on to say that the definition of loan encompasses loans accounted for as debt securities as defined in paragraph 137 of FASB Statement No. 115 (see below):

"Debt Securities: Any security representing a creditor relationship with an enterprise. It also includes (a) preferred stock that by its terms either must be redeemed by the issuing enterprise or is redeemable at the option of the investor and (b) a collateralized mortgage obligation (CMO) (or other instrument) that is issued in equity form but is required to be accounted for as a non-equity instrument regardless of how that instrument is classified (that is, whether equity or debt) in the issuer's statement of financial position. However, it excludes option contracts, financial futures contracts, forward contracts, and lease contracts."

Therefore, the scope of the SOP includes acquired loans that are accounted for as debt securities.

#### **.10 Scope Part II: Instruments Accounted for as Debt Securities Under SOP 03-3**

*Inquiry*—Some types of instruments are measured like debt securities. In accordance with the guidance of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), and considering expected cash flows for instruments measured like debt securities, when does the investor follow the guidance of paragraph 7 (ACC 10,880.07) of the SOP (loans accounted for as debt securities) or paragraph 8 (ACC 10,880.08) of the SOP (loans not accounted for as debt securities)?

*Reply*—Paragraph 14 of FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, provides an example of instruments that are measured like debt securities:

"Interest-only strips, retained interests in securitizations, loans, other receivables, or other financial assets that can contractually be prepaid or otherwise settled in such a way that the holder would not recover substantially all of its recorded investment, except for instruments that are within the scope of Statement 133, shall be subsequently measured like investments in debt securities classified as available-for-sale or trading under Statement 115, as amended (paragraph 362)."

For these types of instruments measured like debt securities, investors should follow the impairment guidance in paragraph 7 (ACC 10,880.07) (loans accounted for as debt securities) of the SOP, unless the asset is otherwise excluded according to paragraph 3 (ACC 10,880.03) of the SOP.

#### **.11 Determining Evidence of Significant Delays and Shortfalls Relative to SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—Footnote 3 (ACC 10,880.03) of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*, states that "investors should consider the significance of delays and shortfalls for a loan so the SOP is not applied when such delays and shortfalls are insignificant with regard to the contractually required payments." How might that assessment be determined?

*Reply*—That assessment will likely be based on individual facts and circumstances and should be guided by an accounting policy adopted and applied consistently by the investor. For instance a percentage could be established to indicate an “insignificant” shortfall and for those items that meet the percentage shortfall, the dollar shortfall itself would be evaluated as to whether it is insignificant in the aggregate.

**.12 Determining Evidence of Deterioration of Credit Quality and Probability of Contractual Payment Deficiency in Accordance With SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—In accordance with SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), how can an investor identify loans that have evidence of deterioration of credit quality and for which it is probable that the investor will be unable to collect all contractually required payments receivable so that they can identify whether the loans are in the scope of SOP 03-3 (ACC 10,880)?

*Reply*—There are several things to consider when determining whether certain loans are within the scope of SOP 03-3 (ACC 10,880). An investor may set policies, including thresholds based on the type of loan product. Commercial loans are generally classified or graded into risk categories as part of an ongoing credit review process. An investor may identify commercial loans with evidence of deterioration using the previous owner’s record of changes in classification and accrual status. Such records may also provide evidence concerning whether it is probable that the investor will be unable to collect all contractually required payments receivable. In contrast, consumer loans are generally not individually reviewed or graded and non-accrual and charge-off policies vary by product. For instance, some types of consumer loans are immediately charged-off when the loan is a certain number of days past due and may never be classified as non-accrual. As a result, indicators of credit quality deterioration for consumer products may vary depending on the product and may include non-accrual classification, past due status, or FICO score and changes therein. For debt securities, investors may establish other criteria to determine when securities should be considered for review for application under this SOP, for example, downgrades in credit grade categories.

**.13 Non-Accrual Loans Part I: Acquired Non-Accrual Loans Under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—Does an acquired loan (purchased individually or as part of a business combination) that was classified by the seller as non-accrual fall within the scope of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—Non-accrual status may be an indicator that a loan that meets the criteria of the SOP. However, the investor should analyze whether the loan meets all the scope criteria in paragraph 3 (ACC 10,880.03) of the SOP, including evidence of credit deterioration. Classification of a loan as non-accrual by the seller and/or investor does not provide an exemption from the SOP. SOP 03-3 (ACC 10,880) does not prohibit carrying acquired loans on non-accrual status, when appropriate. However, certain disclosures are required for such loans in accordance with paragraph 16 (a4) (ACC 10,880.16a(4)) of the SOP.

**.14 Non-Accrual Loans Part II: Consumer Loans on Non-Accrual Status Under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—Should SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), be applied to non-accrual (for example, 90 days past due) consumer loans that are reported as non-performing loans when such loans may be charged off completely in relatively short order (that is, after 120 days)?

*Reply*—Yes. The SOP is applicable to all loans within its scope, including non-accrual loans. The accrual accounting specified in the SOP should be applied if the investor is able to estimate expected cash flows, including cash flows resulting from foreclosure and other collection efforts. However, when the investor does not have the ability to reasonably estimate cash flows, the SOP does not prohibit carrying loans on non-accrual. Also, investors should note there are additional disclosure requirements for these circumstances.

**.15 Loans Held for Sale in Accordance With SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—Why are only mortgage loans held for sale and not all loans held for sale excluded from the scope of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—Only mortgage loans held for sale that are accounted for under FASB Statement No. 65, *Accounting for Mortgage Banking Activities*, are excluded from the scope because FASB Statement No. 65 is higher level GAAP and the SOP, under the GAAP hierarchy, had to provide an exception. (See Appendix B (paragraph B-13) (ACC 10,880.21) of the SOP for a further discussion.)

**.16 Treatment of Commercial Revolving Loans Under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—Paragraph 3f (ACC 10,880.03f) of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*, excludes revolving credit agreements from its scope specifically noting as examples two types of consumer revolving agreements, credit cards and home equity loans. Revolving privilege is defined in the glossary as “a feature in a loan that provides the borrower with the option to make multiple borrowings up to a specified maximum amount, to repay portions of previous borrowings, and then to reborrow under the same loan.” Are commercial revolving loans also excluded from the scope of SOP 03-3 (ACC 10,880)?

*Reply*—Commercial revolving loans should be treated the same as consumer revolving loans. Thus, commercial revolving loans are excluded as well, if the borrower has revolving privileges at the acquisition date.

**.17 Application of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer to Retained Interests***

*Inquiry*—The scope of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), excludes loans that are retained (transferor’s beneficial) interests. How does the SOP scope relate to the scope of EITF Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets*?

*Reply*—Accounting for retained interests should follow EITF Issue No. 99-20 and for purchased interests should follow SOP 03-3 (ACC 10,880) if they meet the scope criteria in paragraph 3 (ACC 10,880.03). EITF Issue No. 99-20 paragraph 10 states, “The Task Force observes that when the proposed SOP on accounting for certain purchased loans is issued and becomes effective, beneficial interests subject to that SOP would be excluded from the scope of this Issue.”

**.18 Loans Reacquired Under Recourse Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—If a loan that was transferred with recourse and qualified for accounting as a sale under a FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, is subsequently repurchased under the recourse provision, is it within the scope of the SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—Yes, if it meets the criteria in paragraph 3 (ACC 10,880.03) of the SOP related to credit quality. Except for purchases triggered by initial representations and warranty deficiencies, it is likely that the repurchased loan would meet the criteria to be included in the scope of the SOP. The SOP includes guidance on the evidence of credit deterioration. (See TIS section 2130.11, “Determining Evidence of Significant Delays and Shortfalls Relative to SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*.”)

**.19 Acquired Loans Where Purchase Price Is Greater Than Fair Value Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—If the fair value of a purchased loan is less than the purchase price because a loan is repurchased under a recourse provision, does SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), permit recording the loan at the purchase price?

*Reply*—If a loan meets the criteria of paragraph 3 (ACC 10,880.03), such that it is in the scope of the SOP and the seller re-purchases the asset at a price that is more than fair value, the seller should record the asset at its fair value and record a loss for the difference between the price paid and the fair value, if not already recognized. An allowance for loan losses to offset recording the loan at the purchase price should not be recorded. In most cases, if the loan had previously been transferred with recourse, the seller should already have recognized an associated liability for the recourse obligation in accordance with FASB Statement No. 5, *Accounting for Contingencies* and FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, as well as FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*.

**.20 Acquired Loans Where Purchase Price Is Less Than Fair Value Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—In accordance with SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), if the fair value of a purchased loan is more than the purchase price because a loan is acquired, for example, as part of a clean up call, should the seller record a gain?

*Reply*—No. There may be instances where the seller is required or has an option to re-purchase an asset at a price that is less than fair value. In that situation and if the loan is within the scope of the SOP, the investor should record the asset at the purchase price and the excess of expected cash flows over the initial investment should be recognized as the yield under the SOP.

**.21 Accounting for Loans With Cash Flow Shortfalls That Are Insignificant Under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer***

*Inquiry*—Related to footnote 3 (ACC 10,880.03) of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*, an investor might establish a policy that a shortfall in contractually required payments below a certain amount or percentage is insignificant and thus, certain acquired loans would not be in the scope of the SOP. For loans with shortfalls in payments of less than the established threshold, how should those discounts be accreted into income as a yield adjustment?

*Reply*—If a loan is not in the scope of SOP 03-3 (ACC 10,880), then FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Cost of Leases* applies, and paragraph 15 of FASB Statement No. 91 requires that the entire discount be accreted to income over the life of the loan.

**.22 Carrying Over the Allowance for Loan and Lease Losses (ALLL) Under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (Part I)**

*Inquiry*—Can some or all of an Allowance for Loan and Lease Losses (ALLL) be carried over in a business combination under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), does not address the appropriateness of carrying over the ALLL for loans not in its scope.<sup>1</sup>

**.23 Carrying Over the Allowance for Loan and Lease Losses (ALLL) Under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (Part II)**

*Inquiry*—Are there any recommendations on calculating allowance ratios relating to loans in the scope of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—Although the nonaccretable difference is akin to an ALLL because it represents amounts that are not expected to be collected, it should not be included in the ALLL or ALLL ratios. The only time there is any ALLL for the loans within the scope of the SOP is when the expected cash flows have decreased after acquisition and a loss is recognized by the investor. In other words, at the purchase date, for loans within the scope of the SOP, the allowance-to-loans ratio is always zero. The investor may wish to disclose in the notes to the financials the amount of the nonaccretable difference so that the readers understand by how much the loans have already been “written down.”

---

<sup>1</sup> On June 30, 2005, the FASB issued an Exposure Draft of a Proposed Statement of Financial Accounting Standards, *Business Combinations—a replacement of FASB Statement No. 141*. The comment period ended. The FASB tentatively took the position that no ALLL should be carried over.

**.24 Carrying Over the Allowance for Loan and Lease Losses (ALLL) Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part III)**

*Inquiry*—For loans evaluated collectively by the previous owner that have related FASB Statement No. 5, *Accounting for Contingencies*, components, should the investor in a business combination carry over the ALLL?

*Reply*—If the investor has acquired loans within the scope of the SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), in a business combination for which a portion of the predecessor's allowance had been specifically allocated to those loans, that portion of the ALLL would not be carried over. Even when loans are acquired within the scope of the SOP for which there had been no specific allocation, it is expected that some portion of the predecessor's ALLL related to such loans and should not be carried over. However, it may be difficult to determine the amount of the ALLL allocable to those loans where the ALLL had been estimated by a pool methodology and when there were "unallocated" components of the allowance. In considering how to attribute the appropriate amount of the predecessor's ALLL to loans in the scope of SOP 03-3 (ACC 10,880), investors should carefully consider that loans within the scope of the SOP likely have additional risk characteristics that may warrant a heavier weighting of the ALLL to those loans, considering other factors such as prior charge-offs. The AICPA staff understands that the portion of the predecessor's ALLL that is not carried over because it relates directly to or has been allocated to loans within the scope of the SOP should be disclosed for public companies. Another consideration related to determining the amount of the ALLL that should not be carried over is the seller's calculated nonaccretable difference. After a loan by loan analysis to determine whether an individual loan is in the scope of SOP 03-3 (ACC 10,880), SEC Staff Accounting Bulletin No. 61, *Adjustments to Allowances for Loan Losses in Connection with Business Combinations*, will continue to apply to public companies to the remainder of the loans and the ALLL that are not within the scope of the SOP.

**.25 Income Recognition for Non-Accrual Loans Acquired Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part I)**

*Inquiry*—What is the accounting for a purchased loan that was classified by the previous owner as non-accrual and for which cash flows cannot be reasonably estimated under SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—The SOP does not prohibit placing (or keeping) loans on non-accrual. At inception or thereafter the investor may place a loan on non-accrual, if the conditions in paragraph 6 (ACC 10,880.06) of the SOP are met. Paragraph 16a4 (ACC 10,880.16a(4)) of the SOP requires certain disclosures for purchases of non-accrual loans.

**.26 Income Recognition for Non-Accrual Loans Acquired Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part II)**

*Inquiry*—A loan is classified as non-accrual by a seller because the debtor is not meeting its obligations under the loan's contractual terms. That loan is sold to an investor who determines that the loan meets the requirements of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880). If the investor can reasonably estimate cash flows, should the investor classify the loan as an accruing loan?

*Reply*—Yes, if the investor can reasonably estimate cash flows, it should recognize an accretable yield and the loan is an accruing loan as discussed in paragraph 6 (ACC 10,880.06) of the SOP.

**.27 Income Recognition for Non-Accrual Loans Acquired Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part III)**

*Inquiry*—Assuming the investor followed the cost recovery method on a loan, and assuming the loan was brought current for a period of time, could the investor return the loan to accrual status and account for the loan as a new loan?

*Reply*—If the loan was within the scope of the SOP when it was purchased, it is not accounted for as a new loan but is always under the requirements of the SOP, even if the loan's performance improves. However, as discussed in TIS section 2130.26, the loan should be accruing income whenever the investor is able to reasonably estimate cash flows. Also, if the currently expected cash flows exceed the originally expected cash flows, the guidance in paragraph 7 (ACC 10,880.07) or 8 (ACC 10,880.08) of the SOP should be applied, which may result in recognizing income at a higher yield than originally expected.

**.28 Estimating Cash Flows Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—In accordance with the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), how often should an investor reassess the cash flows expected to be collected?

*Reply*—Investors should reassess expected cash flows at the end of each reporting period. Thus, for entities that prepare quarterly GAAP-basis financial statements, it is expected that cash flows will be re-assessed at least quarterly.

**.29 EITF Issue No. 01-7 Implications With a Restructured or Refinanced Loan Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part I)**

*Inquiry*—Can a loan that meets the requirements of EITF Issue No. 01-7, *Creditor's Accounting for a Modification or an Exchange of Debt Instruments*, be removed from the scope of SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)? If a loan is within the scope of SOP 03-3 (ACC 10,880) and there are modifications to that loan, should the guidance in EITF Issue No. 01-7 apply?

*Reply*—No. EITF Issue No. 01-7 only applies to loans that are not within the scope of SOP 03-3 (ACC 10,880). The point of paragraph 10 (ACC 10,880.10) in the SOP is that a loan stays in the scope of the SOP, regardless of restructuring or refinancing, except for a troubled debt restructuring.

**.30 EITF Issue No. 01-7 Implications With a Restructured or Refinanced Loan Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part II)**

*Inquiry*—Can a loan that has been extinguished in accordance with EITF Issue No. 01-7, *Creditor's Accounting for a Modification or an Exchange of Debt Instruments*, and given a new loan number, with new terms, but which has not been paid off, be accounted for as a new loan under the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)? What steps could the investor and borrower take to permit the loan to be accounted for as a new loan?

*Reply*—A loan within the scope of the SOP can never be accounted for as a new loan, except through a troubled debt restructuring in accordance with FASB Statement No. 15, *Accounting by Debtors and Creditors for a Troubled Debt Restructuring*.

**.31 Variable Rate Loans and Changes in Cash Flows and SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—In accordance with the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), should an investor in variable rate loans determine the cause of a decrease in expected cash flows?

*Reply*—Yes. To the extent that the investor can directly attribute a decrease in expected cash flows to a decrease in the contractual interest rate, the investor should reduce the yield recognized in income on a prospective basis. However, if the investor is not able to directly attribute the decrease in expected cash flows to a decrease in the contractual interest rate (for example, because the change in the index or rate has no direct effect on the cash flows available to the borrower to service the loan or because the change in the index or rate had no direct effect on expected cash flows that relate to the value of the collateral) the investor should immediately recognize any decrease in expected cash flows as an impairment, not over time as reduced yield.

**.32 Pool Accounting Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part I)**

*Inquiry*—In accordance with the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), if a loan is removed from a pool, how is the specific carrying amount of a loan determined?

*Reply*—As discussed in paragraph 13 (ACC 10,880.13) of the SOP, once a pool has been assembled the integrity of the pool should be maintained. If the loan is removed under the specific criteria in paragraph 13 (ACC 10,880.13), it should be removed at its carrying amount. In some cases the cash flows of the pool will have been estimated for the pool as a whole such that there is no specific information on the carrying amount and cash flows related to any particular loan. In that case, an allocation of carrying amount to the loan on a pro rata basis is an appropriate way to achieve the goal of not impacting the accounting for the remaining pool. In other cases, the cash flows of the pool may have been built up as the sum of cash flows of individual loans and there is specific information related to the loan being removed. In that case, the carrying amount is allocated on the basis of the specific information for the loan removed. In either case, the goal remains the same—that is, to not have a removal event result in either impairment or an increase in yield for the remaining pool.

**.33 Pool Accounting Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (Part II)**

*Inquiry*—Alternatively, and related to TIS section 2130.32, should the loan be removed at its initial fair value in accordance with the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880)?

*Reply*—Generally, no. Removing a loan at its initial fair value, unless done very shortly after acquisition of the loan and creation of the pool, would likely

result in a change in the effective yield of the remaining pool and the stated intent of the SOP is that removing a loan from a pool should not result in such a change.

**.34 Application to Fees Expected to Be Collected Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—In accordance with the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), should fees be included in “expected cash flows?” We note the glossary (ACC 10,880.23) definition for “cash flows expected at acquisition” includes “principal, interest and other cash flows expected to be collected.” Does the SOP address late fees and other fees?

*Reply*—“Other cash flows expected to be collected” includes all fees. If late fees are expected to be collected and are contractual, the investor should include them in total contractual cash flows and expected cash flows for purposes of calculating yield and making disclosures. If late fees are contractual but not expected to be collected, the investor should exclude late fees from contractual cash flows and disclose that accounting policy (if it is considered material).

**.35 Application to Cash Flows From Collateral and Other Sources Under SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer**

*Inquiry*—In accordance with the guidance in SOP 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880), should cash expected to be received from the ownership and sale of assets taken in settlement of loans be included in “other cash flows expected to be collected?”

*Reply*—Cash flows expected at acquisition includes all cash flows directly related to the acquired loan, including those expected from collateral. Although yield is measured on this basis under SOP 03-3 (ACC 10,880) for the loan prior to foreclosure, an asset received by the investor in full or partial settlement of a loan should be accounted for in accordance with paragraph 28 of FASB Statement No. 15, *Accounting by Debtors and Creditors for a Troubled Debt Restructuring*.

**.36 Impact on Cash Flows on a Group of Loans Accounted for as a Pool in Accordance With SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer, if There Is a Confirming Event, and One Loan Is Removed as Expected**

*Inquiry*—Paragraph 12 of Statement of Position (SOP) 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880.12), states that investors may aggregate loans acquired in the same fiscal quarter that have common risk characteristics and thereby use a composite interest rate and expectation of cash flows expected to be collected for the pool. Paragraph 13 (ACC 10,880.13) states that once the pool is assembled, the integrity of the pool should be maintained. What is the impact on the accounting for a group of loans accounted for as a pool, if there is a confirming event, and one loan is removed from the pool as expected?

*Reply*—The following is an example of the impact on the accounting for a pool of loans, if there is a confirming event, and one loan is removed as expected.

**SOP 03-3 (ACC 10,880) Example**

**Group of Loans**

**Example 1—Confirming Event, One Loan Is Removed From Pool, as Expected**

Facts: The investor purchases 10 loans that individually meet the scope definition of SOP 03-3 (ACC 10,880) for \$800. Based on the aggregation criteria, the investor assembles the loans into a pool. The investor initially expects to collect \$929.29 in cash flows (which generates a yield of approximately 5.387% over 3 years). The investor recognizes one month of yield income. The investor then receives notification that one obligor has become bankrupt and that it will make no further payments on its loan. The investor concludes that event is in accordance with the original expectation of cash flows. That is, the investor continues to expect that it will collect \$929.29 from the pool of loans. The investor removes the contractual cash flows from that loan and an equal amount of nonaccretable difference, in the amount of \$117.42, from the pool such that the yield is unaffected. This TPA does not address charge-offs.

	<i>Original Purchase</i>	<i>Accrue Income</i>	<i>Receive Payment</i>	<i>Balance</i>	<i>Removal of Loan</i>	<i>Balance</i>
Contractual Cash Flows	1,200.00		(25.81)	1,174.19	(117.42)	1,056.77
Nonaccretable Difference	(270.71)			(270.71)	117.42	(153.29)
Expected Cash Flows	929.29		(25.81)	903.48	0.00	903.48
Accretable Yield	(129.29)	6.67		(122.62)	0.00	(122.62)

\* Yield = Accretable yield divided by the carrying amount divided by 36 times 12.

**.37 Impact on Cash Flows on a Group of Loans Accounted for as a Pool in Accordance With SOP 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer, if There Is a Confirming Event, One Loan Is Removed From the Pool, and the Investor Decreases Its Estimate of Expected Cash Flows**

*Inquiry*—Paragraph 12 of Statement of Position (SOP) 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer* (ACC 10,880.12), states that investors may aggregate loans acquired in the same fiscal quarter that have common risk characteristics and thereby use a composite interest rate and expectation of cash flows expected to be collected for the pool. Paragraph 13 (ACC 10,880.13) states that once the pool is assembled, the integrity of the pool should be maintained. What is the impact on the accounting for a group of loans accounted for as a pool, if there is a confirming event, one loan is removed from the pool, and the investor decreases its estimate of expected cash flows?

*Reply*—The following is an example of the impact on the accounting for a group of loans accounted for as a pool, if there is a confirming event, one loan is removed from the pool, and the investor decreases its estimate of expected cash flows:

**SOP 03-3 (ACC 10,880) Example**

**Group of Loans**

**Example 2—Confirming Event, One Loan Is Removed From Pool, and Investor Decreases Estimate of Expected Cash Flows From Pool**

Facts: The investor purchases 10 loans that individually meet the scope definition of SOP 03-3 (ACC 10,880) for \$800. Based on the aggregation criteria, the investor assembles the loans into a pool. The investor initially expects to collect \$929.29 in cash flows (which generates a yield of approximately 5.387% over 3 years). The investor recognizes one month of yield income. The investor then receives notification that one obligor has become bankrupt and that it will make no further payments on its loan. The investor concludes that the expected cash flows from the pool are decreased by \$90.35, which has a present value at 5.387% of \$78.09. The investor records a provision of \$78.09, increasing the loan loss allowance by \$78.09. In addition, the investor removes the contractual cash flows from that loan and an equal amount of non-accretable discount, in the amount of \$117.42, from the pool such that the yield is unaffected. This TPA does not address charge-offs.

Receivables

	<i>Original Purchase</i>	<i>Accrue Income</i>	<i>Receive Payment</i>	<i>Balance</i>	<i>Decrease in Expected Cash Flows</i>	<i>Balance</i>	<i>Removal of Loan</i>	<i>Balance</i>

## Section 2140

### *Inventories*

#### **.01 Warehousing Included in Cost of Inventory**

*Inquiry*—A client deals in wholesaling and retailing automotive tires for foreign cars. Most of the inventory is imported, and it is valued on the company's records at the actual inventory cost plus freight-in. At year-end, the warehousing costs are prorated over cost of goods sold and ending inventory. The company's auditor believes the warehousing costs should not be capitalized to inventory, but the entire amount should be expensed in the year the costs are incurred. Are warehousing costs considered to be product costs or period costs?

*Reply*—Statement 3 of Chapter 4, ARB No. 43 states in part:

As applied to inventories, cost means in principle the sum of the applicable expenditures and charges directly or indirectly incurred in bringing an article to its existing condition and location.

Kieso and Weygandt, *Intermediate Accounting*, 9<sup>th</sup> Edition states:

Product costs are those costs that "attach" to the inventory and are recorded in the inventory accounts. These costs are directly connected with the bringing of goods to the place of business of the buyer and converting such goods to a saleable condition. Such charges would include freight charges on goods purchased, other direct costs of acquisition and labor, and other production costs incurred in processing the goods up to the time of sale. It would seem proper also, to allocate to inventories a share of any buying costs or expenses of a purchasing department, storage costs, and other costs incurred in storing or handling goods before they are sold (i.e., warehousing costs). Because of the practical difficulties involved in allocating such costs and expenses, however these items are not ordinarily included in valuing inventories.

Costs of delivering the goods from the warehouse would be considered a selling expense and should not be allocated to the goods that are still in the warehouse.

#### **.02 Obsolete Items in Inventory—I**

*Inquiry*—A client purchased in bulk various inventories of stock material. This material is used to produce various specialized parts used in electronic equipment. The bulk purchase took place some eighteen months ago, and less than ten percent of these inventories have been used. The client claims that there may be some obsolete stock on hand from this bulk purchase, but an eighteen months period is not enough time to effectively determine the complete degree of obsolescence because the highly specialized nature of the product line may not lead to renewed orders until periods beyond one or more operating cycles. Based on the information available to the client, about one-third of the original bulk purchase will be written off because of obsolescence. For the remaining inventories, the client will present a representation letter indicating that he believes the remaining inventory not to be obsolete.

There may be more obsolete inventory than the client is willing to admit. The poor turnover of such items is the chief reason for concern. Pricing the inventory at the lower of cost or market will be difficult. The nature of the inventory (many small items at low unit cost) and its poor turnover make obtaining market prices difficult.

What is the responsibility of auditors, not being inventory experts, in determining the extent of obsolescence?

*Reply*—Sections 331.09 to 331.13 of Statement on Auditing Standards No. 1 discuss audit evidence for inventories. These sections of SAS No. 1 do not define the auditor's responsibility for quality of inventory. However, the third standard of field work would require the auditor to obtain sufficient appropriate audit evidence regarding inventory quality in connection with determining whether or not the inventories are presented in accordance with generally accepted accounting principles. This audit evidence might include the opinion of other experts, for example an electronics engineer, with respect to the quality of the inventories in this case.

Over the eighteen-month period since the inventories were purchased, less than ten percent have been utilized. Such a usage rate indicates that the client has close to an estimated fifteen year supply of these inventories. This would indicate that little or no value should be assigned to these inventories. [Revised May 2007.]

### **.03 Obsolete Items in Inventory—II**

*Inquiry*—Accounting Research Bulletin No. 43, Chapter 4, "Inventory Pricing," Statement 1 defines inventory as,

"The aggregate of those items of tangible personal property which (1) are held for sale in the ordinary course of business, (2) are in process of production for such sale, or (3) are to be currently consumed in the production of goods or services to be available for sale."

Is it correct to assume that obsolete items which are not currently consumed in the production of "goods or services to be available for sale," are not classified as inventory?

*Reply*—It is correct to conclude that obsolete items are excludable from inventory. Cost attributable to such items is "nonuseful" and "nonrecoverable" cost (except for possible scrap value) and should be written off if a perpetual inventory is maintained or simply excluded from the inventory count if cost of sales is derived solely by means of taking a physical inventory count at the end of a period.

### **.04 Airplanes Chartered While Held for Sale**

*Inquiry*—A company purchases airplanes for sale to others. However, until they are sold, the company charts and services the planes. What would be the proper way to report these airplanes in the company's financial statements?

*Reply*—The primary use of the airplanes should determine their treatment on the balance sheet. Since the airplanes are held primarily for sale, and chartering is only a temporary use, the airplanes should be classified as current assets. However, depreciation would not be appropriate if the planes are considered inventory. ARB No. 43, Chapter 4, *Inventory Pricing*, states in part that the term inventory "excludes long-term assets subject to depreciation accounting, or goods which, when put into use, will be so classified."

If the use period were to exceed one year, reclassification to fixed assets and recognition of depreciation expense would be appropriate under generally accepted accounting principles (GAAP). [Amended]

### **.05 Valuation of Rebuilt Airplane Parts Inventory**

This Question and Answer is currently being revised.

### **.06 Inventory of Meat Packer**

*Inquiry*—A client engaged in the meat packing business uses the “National Provisioner Daily Market Service” quotations in valuing its inventories. The client contends that these quotations, adjusted for freight differentials, reflect an accurate approximation of actual costs and, in lieu of a complete cost accounting system, should be considered as cost for inventory valuation. Is this method of inventory valuation acceptable for meat packers?

*Reply*—Meat packing companies generally value their work in process and finished goods inventories at market price less cost to bring to market in accordance with ARB No. 43, Chapter 4 (AC I78), *Inventory Pricing*. Live animals and whole carcasses are carried at lower of cost or market. Many companies use quoted costs such as the National Provisioner quotations which are estimated costs of producing a particular cut of meat adjusted for the fluctuating daily livestock prices and other factors. These quoted prices must be further adjusted by the individual meat packers to take into account individual factors such as freight and storage.

### **.08 Valuing Precious Metals Inventory Used in Manufacturing Applications**

*Inquiry*—Should inventories of precious metals used in manufacturing applications (for example, diamonds used in drill bits, plutonium or uranium used in steel fabrication, or titanium used in paint manufacturing) be valued at market or at the lower of cost or market?

*Reply*—These inventories should be valued at the lower of cost or market in accordance with ARB No. 43, Chapter 4, *Inventory Pricing*, Statement 5, paragraph 8 (AC I78.109). The excess of market value over cost may be disclosed.

The exception to “lower of cost or market” that allows precious metals to be recorded at market on the balance sheet does not apply to these industrial applications because the metals will be used in the manufacturing process rather than held for immediate sale and do not meet the other conditions specified in ARB No. 43, Chapter 4, Statement 9 (AC I78.119), which states:

Only in exceptional cases may inventories properly be stated above cost. For example, precious metals having a fixed monetary value with no substantial cost of marketing may be stated at such monetary value; any other exceptions must be justifiable by inability to determine appropriate approximate costs, immediate marketability at quoted market price, and the characteristic of unit interchangeability. Where goods are stated above cost, this fact should be fully disclosed.

[Amended June 1995.]

### **.09 Standard Cost for Inventory Valuation**

*Inquiry*—A client uses standard costs for valuing inventory. What disclosure is necessary in the financial statements regarding inventory valuation?

*Reply*—Ordinarily, standard costs should be adjusted to a figure which approximates the lower of cost or market. If this is done, then it is appropriate to use standard costs for financial reporting purposes. This is usually the case where standards are currently and frequently adjusted.

ARB No. 43, Chapter 4, *Inventory Pricing*, states in the footnote to paragraph 6:

Standard costs are acceptable if adjusted at reasonable intervals to reflect current conditions so that at the balance sheet date standard costs reasonably approximate costs computed under one of the recognized bases. In such cases, descriptive language should be used which will express this relationship, as, for instance, “approximate costs determined on the first-in first-out basis,” or, if it is desired to mention standard costs, “at standard costs, approximating average costs.”

Accordingly, if in this particular case standard costs do in fact approximate the lower of cost or market, then disclosure along the lines indicated in the above reference is adequate.

On the other hand, if the difference between standard costs and the lower of cost or market is material, then mere footnote disclosure will not cure the known statement imperfection.

### **.11 Average Cost Method for Subsidiary**

*Inquiry*—Company A and all of its subsidiaries, except one, determine the cost of inventories by the last-in, first-out method (LIFO). The one subsidiary uses an average cost method. Is the average cost method acceptable for determining the cost of inventory? Is it acceptable for one subsidiary to use the average cost method and Company A and the other subsidiaries to use the LIFO method?

*Reply*—The average cost method is an acceptable method for determining the cost of inventory. An entity may use more than one method to determine the cost of inventory provided the methods are disclosed.

### **.12 Classification of Replacement Parts Under a Maintenance Agreement**

*Inquiry*—Company A has entered into a maintenance agreement with Company B, an unrelated party, to provide maintenance and service for specialized computer equipment leased by Company B to third parties. The maintenance contract between A and B requires that A maintain a spare/replacement parts inventory for the equipment. Company A has no use for these parts other than to fulfill the obligation under its contract with Company B. The term of the contract between Company A and Company B is for several years.

Most of the spare parts (i.e., circuit boards) are of a repairable nature, and it is expected that as A replaces a part, A will have the removed part refurbished, at its own cost. The refurbished parts will be available for future use as necessary.

Should Company A classify the refurbished replacement parts as inventory? Should Company A's investment in the parts be amortized?

*Reply*—Company A should classify the refurbished replacement parts as inventory. Inventory costs should not be amortized; a loss in their utility should be reflected as a charge against revenues of the period in which it occurs, as discussed in ARB No. 43, Chapter 4, *Inventory Pricing*, paragraph 8.

### **.13 Classification of Slow-Moving Inventory**

*Inquiry*—A client, engaged in an oil field related industry, has slow-moving products that are not considered obsolete. The inventory is properly stated at the lower of cost or market. The client plans to continue selling the inventory

on hand but will cease manufacturing the specialized product. Based on current sales estimates and demand for the product, it appears likely that the client will be able to sell all of the items in the inventory over a period of about four years. Is it correct to classify a portion of the slow-moving inventory as a long-term asset in the client's classified balance sheet?

*Reply*—The portion of the slow-moving inventory not reasonably expected to be realized in cash during the client's normal operating cycle should be classified as a long-term asset in the company's classified balance sheet. ARB No. 43, chapter 3A, *Working Capital*, paragraph 4, states that the term "current assets" is used to designate cash or resources commonly identified as those that are reasonably expected to be realized in cash or sold during the normal operating cycle of the business.

#### **.14 Disclosure of LIFO Reserve**

*Inquiry*—Should a company using the last-in, first-out (LIFO) method of inventory valuation be required to disclose the LIFO reserve in its financial statements or in the accompanying footnotes?

*Reply*—Yes. The Accounting Standards Division Issues Paper, *Identification and Discussion of Certain Financial Accounting and Reporting Issues Concerning LIFO Inventories*, addresses this matter in section 2, paragraphs 24 through 28. Paragraph 28 indicates that the task force voted (9 yes, 0 no) that either the LIFO reserve or replacement cost and its basis for determination should be disclosed. Paragraph 26 states that the Securities and Exchange Commission (SEC) requires companies whose securities trade publicly to disclose this information [Regulation S-X, section 210.5-02.6(c)] and that many nonpublic companies also disclose this information.

SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, paragraph 11 (AU 411.11), states that in the absence of a pronouncement covered by Rule 203 of the Rules of Conduct of the AICPA Code of Professional Conduct or another source of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances. Other accounting literature includes, for example, AICPA Issues Papers, FASB Statements of Financial Accounting Concepts, International Accounting Standards of the International Accounting Standards Committee; GASB Statements, Interpretations, and Technical Bulletins; Technical Information Service Inquiries and Replies included in AICPA *Technical Practice Aids*; pronouncements of other professional associations or regulatory agencies, and accounting textbooks, handbooks, and articles. [Amended June 1995.]

#### **.16 Accounting and Reporting for Changes in Inventory Policy**

*Inquiry*—In 19X4, a health care entity capitalizes in inventory supplies that in previous years were expensed. What is the proper accounting and reporting treatment for this event?

*Reply*—The accounting treatment of capitalizing supplies is in conformity with the guidance provided in the AICPA Audit and Accounting Guide *Audits of Providers of Health Care Services*, paragraph 8.04. This paragraph states that supplies for a health care entity should be accounted for in a manner similar to methods used by other business organizations. When material, this amount should be capitalized and, when immaterial, judgment for the proper accounting treatment should be exercised.

If the amounts of unrecorded supplies inventory in prior years were immaterial, the entity need not report the capitalization of supplies inventory in 19X4 as a change in accounting principle. APB Opinion No. 20, *Accounting Changes*, paragraph 8(a) (AC A06.106) states, “. . . neither (a) initial adoption of an accounting principle in recognition of events or transactions occurring for the first time or that previously were immaterial in their effect . . . is a change in accounting principle.”

However, if unrecorded supplies inventories in the prior years were material, and therefore should have been capitalized, an error has occurred, and the guidance in APB Opinion No. 20, paragraphs 36 and 37 (AC A35.105), concerning prior period adjustments should be followed.

---

[The next page is 1161.]

## Section 2210

### ***Fixed Assets***

#### **.01 Settlement of Mortgage Installment on Real Estate Between Buyer and Seller**

*Inquiry*—A company purchased an office building subject to the seller's assumable mortgage. The closing of the transaction occurred in the middle of a month which was between payment dates on the mortgage. The closing statement reflected a credit from the seller to the buyer for the interest that accrued on the mortgage from the last payment date until the date of the closing. How should this credit be accounted for by the buyer?

*Reply*—The buyer would treat the accrued interest credit as a reduction of interest expense for the first month of ownership. When the buyer makes the first interest payment after the closing, the credit will offset the full month's interest paid and thus reduce the buyer's net interest expense to the amount attributable to the period that the property was owned by the buyer. [Amended June 1995.]

#### **.02 Broker's Commission Received by Purchaser of Property as Purchase Price Concession**

*Inquiry*—A corporation ("purchaser") is engaged in negotiations to purchase real property. During the negotiations, the purchaser was unwilling to accept the seller's best offer. To induce the purchaser to agree to the sale, the broker agreed to rebate a portion of the seller-paid commission to the purchaser.

Would this rebate be considered income to the purchaser or a reduction of the cost of the property acquired?

*Reply*—The "rebate" received from the broker should be accounted for as a reduction of the cost of the property rather than as income. Income should not be recognized on a purchase. The receipt of the rebate was part of the acquisition of the real estate and, when netted against the purchase price, reflects the amount the purchaser was willing to pay for the property. [Amended June 1995.]

#### **.06 Valuation of Cattle Herd**

*Inquiry*—A client, in the business of raising and selling cattle, has not been in business long enough to develop enough cost information to reliably value the cattle raised by them. Each cow costs \$2,000 or more and has an estimated salvage value of about \$300 at the end of its productive breeding life. The client has adopted a life of seven years for its breeding herd based on the various ages of the cows.

The client proposes to price the cattle raised as follows:

##### *Purchased calves*

When a cow is purchased with a "calf at side," twenty percent of the purchase price is allocated to the calf. An additional \$50 is allocated to the calf every six months for the first eighteen months. At eighteen months of age, the cows are considered mature enough for breeding and are then either sold or placed in the breeding herd and depreciated.

*Raised calves*

Since the mother is maintained principally for breeding and is expected to produce one calf each year, the calf birthed and raised is allocated one year's depreciation of the mother, plus \$50 at birth. An additional \$50 is allocated every six months for the first eighteen months.

The problem of valuing the cattle is compounded by the fact that cattle purchased for breeding and those purchased for sale are not separated, and any cow may be sold at any time. What improvements could be made in the pricing scheme, and how should the breeding herd and the herd held for sale be shown on the balance sheet?

*Reply*—Rather than setting an average breeding life of seven years for the breeding herd, it would appear more reasonable to set an estimated age at which a cow should be fully depreciated and to depreciate the cost of each cow over the remaining estimated years of life. Also, instead of allocating twenty percent of the purchase price of the cow to the calf “at side,” it would be better to determine the percent applicable to the calf on the basis of the number of expected additional calves for that cow.

In valuing the calves, if the \$50 figure is a reasonable estimate of six months of costs, the method seems reasonable. However, instead of allocating one year's depreciation of the mother plus \$50 at birth, it might be better to allocate only the depreciation plus the direct expenses of birth such as veterinarian's fees, etc.

Since it is difficult to determine which of the cattle are “inventory” and which are “fixed assets,” it might not be appropriate in this case to classify the assets and liabilities as current or long-term in the balance sheet.

**.07 Costs of Ski Slopes and Lifts**

*Inquiry*—A company has developed a piece of land into a skiing resort. The company has cut the trees, cleared and graded the land and hills, and constructed ski lifts and platter pulls.

Should the tree cutting, land clearing, and grading costs of constructing the ski slopes be capitalized to land? If so, are these costs amortizable?

Should the clearing and grading costs connected with the construction of the ski lifts and platter pulls be capitalized to this equipment and depreciated?

*Reply*—All expenditures incurred which are made for the purpose of making the land suitable for its intended use or purpose (whether that use be for the construction of a ski lodge, lifts, slopes, platter pulls, or other facilities) are properly capitalizable as land costs, and land is not subject to depreciation. During the course of clearing the land to make it useful for the purpose acquired, salable timber may be recovered, and since the clearing costs are capital items, amounts realized from the sale of the timber may properly be credited to the land account. Recurring maintenance of right-of-way (i.e., the slope and ski-lift areas) would be properly treated as a period cost. [Amended]

**.08 Restaurant Dishes and Silverware**

*Inquiry*—Should a base stock inventory of silverware and dishes be shown on the balance sheet of a restaurant as a fixed asset? In the base stock method, the base stock is recorded at an unchanging amount and additions to the stock

are charged to expenses for the period. Inasmuch as fixed assets are specific items which are subject to depreciation (except land), and the base stock is an approximate figure for many items and is not depreciated, it would seem that the base stock should not be classified as a fixed asset.

*Reply*—Various publications recommending treatment for large stocks of short-lived, replaceable assets such as silverware and dishes indicate that the assets should be valued on the basis of physical inventories at year-end, with used equipment being valued at 50% of current cost, and unused equipment valued at full cost. This, in effect, assigns an average useful life of two years for the equipment. It is recommended that such assets be included in fixed assets.

The classification in the balance sheet should not depend upon the method of valuing the assets. Therefore, regardless of the method of valuation, the assets should be included in fixed assets. If the valuation differs materially from the depreciated cost of individual goods on hand at year-end, the presentation is not in accordance with generally accepted accounting principles.

### **.09 Appraisal Value for Mailing Lists**

This Question and Answer is currently being revised.

### **.13 Effect of Future Transfer on Accounting for Land**

*Inquiry*—A nonprofit health care corporation has agreed to a future transfer of title in its operating property (land and a hospital) to the city in which the property is located. The transfer will occur in 30 years. Under such circumstances, is it appropriate to amortize the cost of land over a period of 30 years?

*Reply*—APB Opinion No. 17, *Intangible Assets*, paragraph 22, states in part:

Accounting for the cost of a long-lived asset after acquisition normally depends on its estimated life. The cost of assets with perpetual existence, such as land, is carried forward as an asset without amortization, and the cost of assets with finite lives is amortized by systematic charges to income.

Accordingly, the cost of land should not be amortized.

The agreement between the corporation and the city should be disclosed in notes to the corporation's financial statements.

### **.15 Capitalization of Cost of Dredging Log Pond**

*Inquiry*—Corporation A operates a log pond and dredged the pond during the year at a cost of \$350,000. Thus, the useful life of the log pond was extended several years. Should the dredging cost be expensed or capitalized?

*Reply*—FASB Concepts Statement No. 3, *Elements of Financial Statements of Business Enterprises*, paragraph 89, states, in part, "... many assets yield their benefits to an enterprise over several periods . . . Expenses resulting from their use are normally allocated to the periods of their estimated useful lives (the periods over which they are expected to provide benefits) by a 'systematic and rational' allocation procedure, for example, by recognizing depreciation or other amortization."

Since the dredging cost will benefit future periods, Corporation A should capitalize the cost and amortize it in a systematic and rational manner over the estimated period of benefit. [Amended]

### **.18 Revaluation of Assets**

*Inquiry*—Company A acquired a material amount of treasury stock resulting in a stockholders' equity deficit. Since state law (where Company A is in-

corporated) prohibits the impairment of legal capital, Company A revalued certain of its assets at fair market value. Should Company A record depreciation for the revalued assets based on historical cost or fair market value?

*Reply*—APB Opinion No. 6, *Status of Accounting Research Bulletins*, paragraph 17 (AC D40.102), states:

The Board is of the opinion that property, plant and equipment should not be written up by an entity to reflect appraisal, market or current values which are above cost to the entity. This statement is not intended to change accounting practices followed in connection with quasi-reorganizations or reorganizations. This statement may not apply to foreign operations under unusual conditions such as serious inflation or currency devaluation. However, when the accounts of a company with foreign operations are translated into United States currency for consolidation, such write-ups normally are eliminated. Whenever appreciation has been recorded on the books, income should be charged with depreciation computed on the written up amounts.

An opinion expressed on the financial statements of Company A should be qualified or adverse because the write-up of assets is a departure from generally accepted accounting principles.

## **.20 Compounding Capitalized Interest**

*Inquiry*—Company A is constructing a building for its own use. The company capitalized interest cost on the average amount of accumulated expenditures for the asset during the current year end. The building was completed in the next year. Should the company capitalize interest on the average amount of expenditures for the assets that were made during the current period only or the average amount of accumulated expenditures for the asset during the period including the expenditures made in the prior period, which already includes capitalized interest cost?

*Reply*—FASB Statement No. 34, *Capitalization of Interest Cost*, paragraph 13 (AC I67.110), states in part, the amount capitalized in an accounting period shall be determined by applying an interest rate to the average amount of accumulated expenditures for the asset during the period. Paragraph 57 further states, “the Board concluded that compounding is conceptually consistent with its conclusion that interest on expenditures for the asset is a cost of acquiring the asset.” Accordingly, the rate should be applied to the average of all the accumulated expenditures.

## **.22 Fixed Asset Partially Acquired With Grant Funds**

This Question and Answer is currently being revised.

## **.25 Capitalization of Interest Costs Incurred by Subsidiary**

*Inquiry*—A subsidiary with an asset qualifying for interest capitalization under FASB Statement No. 34, *Capitalization of Interest Cost* (AC I67), incurs its entire interest cost from a loan from its parent.

What is the extent of interest that may be appropriately capitalized?

*Reply*—FASB Statement No. 34, paragraph 13 (AC I67.111), states in part, that the amount capitalized in an accounting period shall be determined by applying an interest rate to the average amount of accumulated expenditures for the asset during the period. FASB Statement No. 34, paragraph 15 (AC I67.113), further states that in separately issued financial statements of a parent company, consolidated subsidiary, or unconsolidated subsidiary, the amount of interest cost that may be capitalized is limited to the total amount of interest cost (including interest on intercompany debt) incurred by the separate entity.

Such financial statements should disclose related party transactions as required by FASB Statement No. 57, *Related Party Disclosures* (AC R36). [Amended]

## **.27 Construction of Asset—Foreign Currency Transaction Gains/Losses**

*Inquiry*—A company is constructing a building in the United States for its own use. In order to finance the cost of the building, a loan denominated in a foreign currency is obtained from a bank in a foreign country. The company is appropriately capitalizing interest incurred as part of the cost of the building in accordance with FASB No. 34, *Capitalization of Interest Cost* (AC I67). However, the company wants to also capitalize as part of the cost of the building any foreign currency transaction gains or losses it incurs as a result of the loan with the bank in the foreign country. The company's rationale is that the transaction gains or losses relate specifically to the building and therefore should be considered part of the cost of the building. Is this appropriate?

*Reply*—No. According to FASB Statement No. 52, *Foreign Currency Translation*, paragraph 15 (AC F60.122):

Foreign currency transactions are transactions denominated in a currency other than the entity's functional currency. Foreign currency transactions may produce receivables or payables that are fixed in terms of the amount of foreign currency that will be received or paid. A change in exchange rates between the functional currency and the currency in which a transaction is denominated increases or decreases the expected amount of functional currency cash flows upon settlement of the transaction. That increase or decrease in expected functional currency cash flows is a foreign currency transaction gain or loss that generally shall be included in determining net income for the period . . .

Thus, even though the loan was obtained to construct the building, the transaction gains and losses are not part of the cost of the building, but are a result of the change in the exchange rate and are included in income each period in which the exchange rate fluctuates. [Amended]

## **.28 Accounting for Certain Liquidated Damages**

*Inquiry*—"Liquidated damages" represent contractual payments to a buyer of property, plant, and equipment (PP&E) for the nondelivery or noncompletion of construction of PP&E by a stated completion date. The amount is specified in advance by contract—for example, a stated amount per day of delay—rather than a computation of actual losses of the buyer caused by the delay. Liquidated damages are negotiated to represent compensation for a reasonable estimate of the buyer's costs associated with a delay. Liquidated damages are specified in advance in order to eliminate the need for possibly contentious after-the-fact negotiations about actual costs incurred. How should a buyer of PP&E account for liquidated damages, as defined above?

*Reply*—Because the buyer does not provide the payer of the damages with an identifiable benefit in exchange for the payment, a buyer typically records liquidated damages as a reduction of the payments it has made to the vendor for the PP&E (that is, a reduction of the cost of the PP&E). Amounts of liquidated damages in excess of the total cost of PP&E would be recognized by the buyer as income.

The basis for this reply is EITF Issue No. 02-16, "Accounting by a Customer (Including a Reseller) for Certain Consideration Received From a Vendor." The underlying principle in that EITF is that unless the customer provides the

vendor with an identifiable benefit, the payment received from the vendor is a reduction of the purchase price of the goods purchased from the vendor—that is, a return of amounts paid.

Contracts between a buyer and provider of PP&E could be drafted in two ways—with a realistic completion date and contract price with liquidated damages for late delivery, or with a pessimistic completion date and a bargain contract price with a bonus for early delivery. The accounting for liquidated damages, as noted in this reply, results in the same accounting for the buyer regardless of how the contract is drafted.

---

**[The next page is 1261.]**

## Section 2220

### Long-Term Investments

#### .01 Equity Method When Current Direct Ownership Less Than Twenty Percent

*Inquiry*—Company A purchased a 19% stock ownership interest in B. The company also made a loan to B which is convertible into stock of B and is secured by shares of C (B's subsidiary). For as long as the loan is outstanding, Company A will have several seats on B's board. The company also has options to purchase shares of C.

Is the company required to report its investment in B under the equity method?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 17, states that the ability to exercise the type of influence contemplated in the Opinion may be indicated in several ways such as representation on the board of directors and investment (direct or indirect) of 20% or more in the voting stock of an investee.

The company would own only 19% of the outstanding voting stock. Although it is not indicated whether the conversion feature of the loan may result in ownership of 20% or more, or whether the board seats would allow A to significantly influence the voting at meetings of B's board of directors, the overall impact of the proposed transaction could demonstrate that the company has the ability to exercise significant influence over the investee. Therefore, the equity method should be followed in accounting for the investment.

#### .03 Equity Method for Investee Following Completed Contract Method

*Inquiry*—A client, a contractor who follows the percentage of completion method for income recognition, has entered into a joint venture. The joint venture follows the completed contract method in its financial statements. The client accounts for his investment in the joint venture on the equity basis. May the client recognize his share of the venture's income (determined on the percentage of completion method) even though the venture will not recognize income until the contract is completed?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 3f, states:

"Earnings or losses of an investee" and "financial position of an investee" refer to net income (or net loss) and financial position of an investee determined in accordance with accounting principles generally accepted in the United States.

Both the completed contract method and the percentage of completion method are generally accepted, and the investor should not change the investee's method of accounting from completed contract to percentage of completion in applying the equity method. If the investee's financial statements are prepared on a comprehensive basis of accounting other than GAAP, the investor

should eliminate material variances from GAAP in applying the equity method, in accordance with SOP No. 78-9, *Accounting for Investments in Real Estate Ventures*, paragraph 24 (ACC 10,240.24). [Amended]

### **.05 Assuming Pro Rata Share of Venture's Revenues and Expenses**

*Inquiry*—A company has entered into a joint venture with another venturer. Would it be permissible for the company to include in its income its pro rata share of each of the revenue and expense accounts of the venture?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19c, states:

The investment(s) in common stock should be shown in the balance sheet of an investor as a single amount, and the investor's share of earnings or losses of the investee(s) should ordinarily be shown in the income statement as a single amount except for the extraordinary items as specified in (d) below.

However, AICPA Interpretation No. 2 of APB Opinion No. 18, "Investments in Partnerships and Ventures" relating to accounting for investments in unincorporated joint ventures states in part:

... because the investor-venturer owns an undivided interest in each asset and is proportionately liable for its share of each liability, the provisions of paragraph 19-c may not apply in some industries. For example, where it is the established industry practice (such as in some oil and gas venture accounting), the investor-venturer may account in its financial statements for its *pro rata* share of the assets, liabilities, revenues, and expenses of the venture.

Terminology such as "should ordinarily" contained in the above reference indicates that picking up the share of the joint venture on a line by line item, while it may be unusual, would not necessarily be prohibited. Guidance for transactions of this type relating to real estate can be found in SOP No. 78-9, *Accounting for Investments in Real Estate Ventures*, paragraph 11 (ACC 10,240.11). [Amended]

### **.08 Acquisition of Subsidiaries by Exchange of Assets With No Book Value**

*Inquiry*—A client, a computer services company, acquired fifty percent of the capital stock of a corporation in exchange for rights to computer programs. The cost of these programs had been expensed by the client. Another party acquired the remaining fifty percent of the stock for \$150,000. The client recorded this transaction as a debit to investments in subsidiaries and a credit to earnings of \$150,000.

A similar transaction, an exchange of rights to computer programs for capital stock with a stated value of \$200,000, occurred later. Investments in subsidiaries was debited and earnings was credited for \$200,000.

The subsidiaries are accounted for under the equity method.

Can the earnings recorded on the exchange of expensed computer programs for common stock be reflected in parent company financial statements, or do generally accepted accounting principles require elimination?

*Reply*—APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19 (AC 182.109) states in part, "The difference between consolidation and the equity method lies in the details reported in the financial statements. Thus, an investor's net income for the per-

iod and its stockholders' equity at the end of the period are the same whether an investment in a subsidiary is accounted for under the equity method or the subsidiary is consolidated . . . ." Intercompany profit eliminations under the equity method is discussed in AICPA Interpretation No. 1 of APB Opinion No. 18, "Intercompany Profit Elimination Under Equity Method (AC I82.501)," and states in part, "All intercompany transactions are eliminated in consolidation, but under the equity method intercompany profits or losses are normally eliminated only on assets still remaining on the books of an investor or an investee."

Both APB Opinion No. 18, paragraph 19 (AC I82.109), and AICPA Interpretation No. 1 of APB Opinion No. 18 (AC I82.501), indicate that the intercompany gain (\$150,000 and \$200,000) recorded by the investor company would be eliminated under the equity method.

In the second case, measuring the value of the computer programs by the \$200,000 stated value of the stock may not be appropriate, and the auditor should try to satisfy himself concerning the estimated values assigned to the tangible and intangible assets contributed by the other stockholders. (See APB Opinion No. 18, paragraph 19n and APB Opinion No. 16, *Business Combinations*, paragraph 88.)

### **.09 Market Value of Unregistered Stock**

*Inquiry*—A company needs a monthly valuation of its securities at market. Among the securities to be valued are some lettered securities that contain a three-year restriction against sale. These lettered securities consist of 7 ½% convertible debentures maturing in five years and common stock which had to be purchased as a unit. Common stock which is unrestricted is being freely traded and is presently selling at three times the cost of the restricted common.

What is the generally accepted accounting method of valuing the lettered securities?

*Reply*—The valuation of unregistered stock is discussed in the SEC's Codification of Financial Reporting Policies, Sec. 404.04.a (ASR 113).

In general the valuation of such stock is difficult. The relationship between the current value of unregistered stock and of similar stock which is available for sale on the exchanges or over the counter will vary for many reasons, including particularly the period for which it may be expected to remain unregistered, and the volatility and thinness of market of stock being traded.

Methods of valuation are not, strictly speaking, accounting functions. The valuation of securities is primarily a function of appraisers and stockbrokers. A broker knowledgeable as to the company involved will frequently be in a position to suggest a discount percentage appropriate to the restrictions imposed upon sale of a particular security. Such percentage will vary with the type of restriction and with the nature of the market for the unrestricted security of that issuer.

In determining how much credibility to assign to evidence of valuation of an asset, it is necessary to evaluate the competence and experience of the individual appraiser, his knowledge of the field, and the individual asset involved.

### **.11 Equity Method for Investments in Limited Partnerships and Unincorporated Joint Ventures**

*Inquiry*—Corporation A owns investments ranging from 20% to more than 50% in several limited partnerships and unincorporated joint ventures. Is Cor-

poration A required to use the equity method to account for its investments? If Corporation A uses the equity method for its investments, should the auditors of Corporation A examine the financial statements of each separate investee?

*Reply*—AICPA Interpretation No. 2 of APB Opinion No. 18, “Investments in Partnerships and Ventures,” states:

APB Opinion No. 18 applies only to investments in common stock of corporations and does not cover investments in partnerships and unincorporated joint ventures (also called undivided interests in ventures). Many of the provisions of the Opinion would be appropriate in accounting for investments in these unincorporated entities, however, as discussed below.

Partnership profits and losses accrued by investor-partners are generally reflected in their financial statements as described in paragraphs 19-c and 19-d. Likewise, most of the other provisions of paragraph 19 would be appropriate in accounting for a partnership interest, such as the elimination of intercompany profits and losses (see paragraph 19-a).

\* \* \*

Generally, the above discussion of partnerships would also apply to unincorporated joint ventures, particularly the elimination of intercompany profits and the accounting for income taxes. However, because the investor-venturer owns an undivided interest in each asset and is proportionately liable for its share of each liability, the provisions of paragraph 19-c may not apply in some industries. For example, where it is the established industry practice (such as in some oil and gas venture accounting), the investor-venturer may account in its financial statements for its *pro rata* share of the assets, liabilities, revenues, and expenses of the venture.

AICPA Interpretation No. 2 of APB Opinion No. 18, seems to imply that the same factors (a controlling financial interest, the ability to exercise significant influence over operating and financial policies, or the lack of control or ability to exercise significant influence) that determine the method used by an investor to account for its investments in corporate common stock would also determine the method used by an investor to account for its investments in unincorporated entities. The one exception stated in AICPA Interpretation No. 2 of APB Opinion No. 18, that an investor may account for its *pro rata* share of the assets, liabilities, revenues, and expenses of an unincorporated joint venture, is based on industry practices. Accordingly, Corporation A’s method of accounting for its investments would depend on the circumstances.

SAS No. 1, section 332, *Long-Term Investments*, paragraph 5 (AU Section 332.05), relates to investments accounted for by either the cost method or the equity method and states, in part, that:

Audit evidence pertaining to the carrying amount of long-term investments, income and losses attributable to such investments, and capital and other transactions of the investee may be available in the form of audited financial statements, unaudited financial statements, market quotations, or other audit evidence. [Revised May 2007.]

## .12 Investor’s Share of Losses in Excess of Its Investment

*Inquiry*—Company A’s share of the losses of a real estate venture exceeds its investment in the venture. How should Company A account for its investment?

*Reply*—SOP No. 78-9, *Accounting for Investments in Real Estate Ventures* (ACC section 10,240), recommends that the equity method be used to account for investments in corporate or noncorporate real estate ventures. APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19i (AC I82.109), states:

An investor's share of losses of an investee may equal or exceed the carrying amount of an investment accounted for by the equity method plus advances made by the investor. The investor ordinarily should discontinue applying the equity method when the investment (and net advances) is reduced to zero and should not provide for additional losses unless the investor has guaranteed obligations of the investee or is otherwise committed to provide further financial support for the investee.\* If the investee subsequently reports net income, the investor should resume applying the equity method only after its share of that net income equals the share of net losses not recognized during the period the equity method was suspended.

Accordingly, the investor should reflect its investment at a zero amount and disclose in a note to the financial statements the amount of its share of investee losses in excess of the zero amount.

If the investor is committed to provide further financial support to the investee, the investor should show the excess of its share of investee losses over its investment and advances as a liability up to the amount of its commitment.

### **.13 A Change in Circumstances Using the Equity Method of Accounting for an Investment**

*Inquiry*—An investor had guaranteed obligations of an investee and the investor's share of losses of this investee have exceeded the carrying amount of the investment on the investor's book in a prior year. This procedure is in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, paragraph 19i (AC I82.109). In the current year, the investee fully paid the obligation which was guaranteed by the investor; accordingly, the investor will no longer guarantee the obligations of the investee and, therefore, will not record its share of the investee's losses.

- (1) Does this constitute a change of accounting principles?
- (2) How should the liability recorded on the investor's books be accounted for?

*Reply*—(1) This is not a change in accounting principles. According to APB Opinion No. 20, *Accounting Changes*, paragraph 8 (AC A06.106), an "adoption or modification of an accounting principle necessitated by transactions or events that are clearly different in substance from those previously occurring" is not a change in accounting principles. The situation described is a change in circumstances and not a change in accounting principles.

(2) The liability recorded on the investor's books should be reversed in the current year and reported in the income statement with appropriate footnote disclosure.

---

\* An investor should, however, provide for additional losses when the imminent return to profitable operations by an investee appears to be assured. For example, a material, nonrecurring loss of an isolated nature may reduce an investment below zero even though the underlying profitable operating pattern of an investee is unimpaired. [APB Opinion No. 18, paragraph 19i, footnote 10 (AC I82.109, footnote 11).]

**.14 Equity Method—Effect of Unrecorded Equity in Losses on Additional Investment**

*Inquiry*—Company A purchased 40 percent of Company B for \$100,000. Company A did not guarantee the debt of Company B. Subsequent to the investment by A, B incurred large operating losses and A ceased to record equity in B's losses after its investment in B was reduced to zero. A few years later, A purchased an additional 5 percent interest in B. Should Company A offset the amount of this additional investment by the unrecorded equity in losses of Company B?

*Reply*—No. Company A's additional investment would not be offset by the unrecorded equity in Company B's losses because A's unrecorded equity in those losses is not attributable to the block of shares in comprising the additional 5 percent interest.

**.15 Accounting for Distribution From Joint Venture**

*Inquiry*—A corporation invests in a joint venture which is involved in real estate. The joint venture is a corporation and it is not controlled by the corporate investor. It accounts for this investment in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (AC I82). The joint venture incurred losses over the next few years. That resulted in the investment account on the corporation's books to decline to zero. At this point, the joint venture paid the corporation a cash distribution. How should the corporation account for this distribution?

*Reply*—APB Opinion No. 18 (AC I82), states that the investor ordinarily shall discontinue applying the equity method when the investment (and net advances) is reduced to zero and shall not provide for additional losses unless the investor has guaranteed obligations of the investee or is otherwise committed to provide financial support for the investee.

In this situation, the corporate investor in the joint venture should account for the cash distributions received as income if the distribution is not refundable by agreement or by law and the investor is not liable for the obligations of the joint venture and is not otherwise committed to provide financial support to the joint venture.

**.17 Tax Basis Accounting—Use of Equity Method**

*Inquiry*—Can an investor who prepares its financial statements in accordance with U.S. generally accepted accounting principles (GAAP) use the equity method of accounting for an investment in the common stock of an investee that presents its financial statements on the income tax basis of accounting if the investment would otherwise qualify for the equity method?

*Reply*—APB Opinion No. 18, *Equity Method of Accounting for Investments in Common Stock*, paragraph 10 (AC I82), states, "Under the equity method, an investor recognizes its share of earnings or losses of an investee in the periods for which they are reported by the investee in its financial statements." APB Opinion No. 18, paragraph 3 (AC I82.404), defines the earnings or losses of an investee as the "net income (or net loss) . . . of an investee determined in accordance with accounting principles generally accepted in the United States."

If the investment qualifies for equity method accounting, the investor must adjust the investee's tax basis financial statements to GAAP basis to determine its share of earnings or losses. If the adjustment cannot be determined, and the amounts are material, it would be considered a GAAP exception.

---

## Section 2230

### ***Noncurrent Receivables***

#### **.02 Balance Sheet Classification of Deposit on Equipment to Be Purchased**

*Inquiry*—What is the appropriate balance sheet classification of a deposit on machinery which is to be purchased within one year?

*Reply*—ARB No. 43, Chapter 3A, *Current Assets and Current Liabilities*, paragraph 6, states, “This concept of the nature of current assets contemplates the exclusion from that classification of such resources as: (a) cash and claims to cash that are restricted as to withdrawal or use for other than current operations, are designated for expenditure in the acquisition or construction of noncurrent assets, or are segregated for the liquidation of long-term debts.” Accordingly, the deposit on equipment should be classified as a noncurrent asset even though the equipment will be purchased within one year.

---

[The next page is 1391.]

## Section 2240

### **Cash Surrender Value of Life Insurance**

#### **.01 Balance Sheet Classification of Life Insurance Policy Loan**

*Inquiry*—A company has secured a short-term loan from an insurance company against the cash surrender value of its life insurance policies.

In paragraph 6(d), Chapter 3A of ARB No. 43, cash surrender value of life insurance policies is excluded from the classification of a current asset. This reference does not appear to recommend a different classification if the cash value may have been fully borrowed from the insurance company.

Is it proper to classify a readily liquid asset as noncurrent and simultaneously show the related borrowings as a current liability?

*Reply*—Paragraph 6 of Chapter 3A of Accounting Research Bulletin No. 43 states in part:

This concept of the nature of current assets contemplates the exclusion from that classification of such resources as . . . (d) cash surrender value of life insurance policy.

Note 3 to paragraph 7 of this Chapter states:

Loans accompanied by pledge of life insurance policies would be classified as current liabilities when, by their terms or by intent, they are to be repaid within twelve months. The pledging of life insurance policies does not affect the classification of the asset any more than does the pledging of receivables, inventories, real estate, or other assets as collateral for a short-term loan. However, when a loan on a life insurance policy is obtained from the insurance company with the intent that it will not be paid but will be liquidated by deduction from the proceeds of the policy upon maturity or cancellation, the obligation should be excluded from current liabilities.

Paragraph 7-1 of Accounting Principles Board Opinion No. 10 states:

It is a general principle of accounting that the offsetting of assets and liabilities in the balance sheet is improper except where a right of setoff exists.

Therefore, if a company takes out policy loans from the insurance company on life insurance policies which it owns and if there is no intention to repay the loan during the ensuing operating cycle of the business, such loan may be excluded from current liabilities. Furthermore, as the owner of a policy normally has the right to offset the loan against the proceeds received on maturity or cancellation of the policy, it is appropriate to apply the amount of the loan in reduction of the cash surrender value, with disclosure of the amount so offset.

#### **.02 Disclosure of Life Insurance on Principal Stockholders**

*Inquiry*—A client corporation maintains life insurance policies on its principal stockholders which will provide for the repurchase of the stock in the event of a stockholder's death. The cash surrender value of these policies appears on the balance sheet. Is further disclosure necessary?

*Reply*—The rule of informative disclosure requires that the essential facts respecting firm commitments for purchase of a corporation's own stock pursuant to a buy-sell agreement, be set forth in a footnote to the financial statements.

Below is an example of a footnote describing such a situation which might appear on the balance sheet in reference to the cash surrender value account:

The company is the owner and beneficiary of key-man life insurance policies carried on the lives of X, Y, and Z bearing face value amounts of \$500,000, \$500,000 and \$450,000 respectively. No loans are outstanding against the policies, but there is no restriction in the policy regarding loans.

The life insurance contracts are accompanied by mandatory stock purchase agreements to the amount of the proceeds of the life insurance. In the event of the insured's death, the "fair market value" of the stock will, by previous action, be established by the X Appraisal Company. The insured's estate will be obligated to sell, and the company will be obligated to purchase the insured's stock up to the appraisal value of the stock or the proceeds of insurance, whichever is the lesser. The purpose is to protect the company against an abrupt change in ownership or management.

### **.03 Omission of Cash Surrender Value of Life Insurance from Assets**

*Inquiry*—Clearly, cash surrender values of life insurance may be included among the assets in the balance sheet of an enterprise. Is this mandatory, or may management elect to omit this item from the assets on the theory that its inclusion will be misleading since the insurance is carried for the purpose of covering the loss it is anticipated will be sustained as a result of the death of a key official?

*Reply*—If the enterprise retains all valuable contract rights incident to ownership of the life insurance policy, then it is mandatory from the standpoint of full accountability to reflect the asset status of the cash surrender value of the policy. Not to reflect the cash surrender value would be tantamount to creating a hidden reserve which would be contrary to generally accepted accounting principles.

### **.04 Corporation's Policy on Life of Debtor Corporation's Officer**

*Inquiry*—A client took out a straight life insurance policy on the life of an officer of another corporation which is indebted to the client. The client corporation hopes to receive the proceeds of the insurance policy tax free and has not deducted the yearly premium payments as expenses. The officer is over 65 years old, and, therefore, there is a great possibility he will die prior to the full payment of the outstanding balance of the corporation's debt. The prior CPA reported the accumulated premium payments on the Balance Sheet as "Investment in Life Insurance."

Is it proper to show total premiums paid as an investment under these circumstances?

*Reply*—Where a corporation takes out a life insurance policy on the life of a debtor corporation's officer (assuming that there is an insurable interest), the manner of accounting for the premiums should not differ from the manner of accounting for premiums paid on the life of the corporation's own officer. The premiums should be broken down between the expense and the cash surrender value elements. Accordingly, the accumulated premiums account should be analyzed to determine the cash surrender value as at the balance sheet date, the expense portion for the period under audit, and the remaining portion which should be treated as a correction of prior period earnings. See Accounting Principles Board Opinion No. 20, *Accounting Changes*, for a discussion of correction of an error.

---

[The next page is 1451.]

## Section 2250

### *Intangible Assets*

#### **.02 Change in Amortization Period for Contingent Consideration Carried as Goodwill**

*Inquiry*—A company in a purchase transaction acquired a service business at a purchase price in excess of identifiable tangible and intangible assets. The excess purchase price, paid for customers' lists, going concern value, goodwill, etc., is reflected on the balance sheet. The original purchase agreement provided for additional payments which were dependent upon the operations of the acquired company in subsequent years. An additional \$100,000 became due three years from the date of the original purchase.

Because of the nature of the service business, the purchaser tentatively decided on the date of acquisition to adopt a ten year life for amortization purposes. The ten-year write-off period originally chosen does not represent the actual life of the excess but only a judgmental estimate. The additional \$100,000 is payable only because the acquired company has demonstrated continued earning power. Because of this evidence as to the continued value of the excess purchase price, the company determined to write off the excess (comprising the unamortized balance of the original amount plus the \$100,000) over a term of fifteen years from the date of payment of the additional \$100,000.

Is the amortization of goodwill and other intangible assets, in accordance with generally accepted accounting principles?

*Reply*—Paragraph 80 of Accounting Principles Board Opinion No. 16 states as follows:

Additional consideration may be contingent on maintaining or achieving specified earnings levels in future periods. When the contingency is resolved and additional consideration is distributable, the acquiring corporation should record the current fair value of the consideration issued or issuable as additional cost of the acquired company. The additional costs of affected assets, usually goodwill, should be amortized over the remaining life of the asset.

Paragraph 31 of APB Opinion No. 17 states in part:

A company should evaluate the periods of amortization continually to determine whether later events and circumstances warrant revised estimates of useful lives. If estimates are changed, the unamortized costs should be allocated to the increased or reduced number of remaining periods in the revised useful life but not to exceed forty years after acquisition.

This also is in accordance with paragraph 31 of APB Opinion No. 20.

It is appropriate to adjust the estimate of the period benefited by the intangible assets at the date the contingent consideration is determined. Such amortization period may not exceed forty years from the date of the original acquisition. The revised life should be applied to the unamortized balance of the originally recorded intangible, as well as to the additional payment being

made, on a straight line basis in accordance with paragraph 30 of APB Opinion No. 17. If the intangibles can be broken down between general “goodwill” and other intangibles, the estimated lives for the various intangible assets may differ.

#### **.04 Appraisal Value of Intangible Assets**

*Inquiry*—A client who operates several Community Antenna Television systems wishes to value the CATV systems in the statement of financial position at an appraisal value based on a fixed amount per subscriber. Could such a value be properly presented on the financial statements?

*Reply*—APB Opinion No. 6, *Status of Accounting Research Bulletins*, paragraph 17, states in part, “The Board is of the opinion that property, plant and equipment should not be written up by an entity to reflect appraisal, market, or current values which are above cost to the entity.” APB Opinion No. 17, *Intangible Assets*, paragraph 25, states in part, “Intangible assets acquired singly should be recorded at cost at date of acquisition.”

Therefore, whether the assets involved are tangible or intangible, it would not be in accordance with generally accepted accounting principles to state such assets at appraised values in excess of cost. [Amended]

#### **.05 Reporting Write-Off of Unamortized Goodwill**

*Inquiry*—Corporation A has reviewed the estimated life of goodwill, which is being amortized, and decided that the unamortized balance of goodwill should be written off in the current year. The write-off is caused by significant changes in manufacturing techniques and other circumstances which indicate that the unamortized goodwill has no future benefits. How should the write-off be reported?

*Reply*—In accordance with APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, paragraph 23(a), which refers specifically to the write-down or the write-off of intangibles, the write-off of goodwill would not be reported as an extraordinary item. Assuming that the amount of the write-off is material, the write-off should be reported in accordance with APB Opinion No. 30, paragraph 26. Paragraph 26 states:

A material event or transaction that is unusual in nature or occurs infrequently but not both, and therefore does not meet both criteria for classification as an extraordinary item, should be reported as a separate component of income from continuing operations. The nature and financial effects of each event or transaction should be disclosed on the face of the income statement or, alternatively, in notes to the financial statements. Gains or losses of a similar nature that are not individually material should be aggregated. Such items should not be reported on the face of the income statement net of income taxes or in any manner inconsistent with the provisions of paragraphs 8 and 11 of this Opinion or in any other manner that may imply that they are extraordinary items. Similarly, the earnings per share effects of those items should not be disclosed on the face of the income statement.

#### **.06 Accounting Treatment of Agreements Not to Compete**

*Inquiry*—A company enters into an agreement with an outgoing officer whereby the company will make future periodic payments to the officer in return for the officer's agreement not to compete with the company for the period coinciding with the payments.

Would it be appropriate for the company to record a liability for the total future payments to the former officer and a corresponding intangible asset for the covenant?

*Reply*—The authoritative literature does not provide specific guidance for the treatment of executory contracts, which require future consideration upon the occurrence of certain events.

FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 36, specifies that a characteristic of a liability is that “the transaction or other event obligating the entity has already happened.” Since the event that gives rise to the company’s obligation is the former officer’s forbearance from competition, many accountants believe that the transaction should be recorded prospectively, as the payments are “earned” by the former officer. They would disclose the contractual obligation as a commitment in the company’s notes to its financial statements.

Concepts No. 6, paragraph 26 provides that a characteristic of an asset is that “it embodies a probable future benefit. . . .” Accordingly, the company would only record an intangible asset if the payment to the former officer preceded the period of forbearance.

### **.07 Write-Off of Goodwill on Date of Purchase**

*Inquiry*—An investor purchased a significant interest in an equity investee and at the same time guaranteed its obligations. The subsequent share of the investee’s losses plus advances exceeded the carrying amount of the investment. The investor purchased the remaining interest and assumed responsibility for the obligations of the investee. The purchase price of the remaining interest was in excess of the sum of the fair values of the identifiable assets acquired less liabilities assumed, which implied goodwill. If the parent determines that the goodwill has no value can it immediately be written off?

*Reply*—No. Goodwill is defined as the excess of the purchase price over the fair value of the identifiable assets acquired. APB Opinion No. 17, *Intangible Assets*, requires goodwill to be capitalized and amortized over its useful life. To reduce the carrying amount of goodwill, it is usually necessary to establish that the economic conditions and factors which gave rise to the goodwill no longer exist, or that the period benefited by such factors and conditions has expired. Since sufficient time has not elapsed to demonstrate either of these conditions, it would be improper to write off the goodwill.

---

[The next page is 1501.]

## Section 2260

### ***Other Assets***

#### **.03 Legal Expenses Incurred to Defend Patent Infringement Suit**

*Inquiry*—A company is sued for patent infringement. Should the cost to defend the patent be capitalized or expensed?

*Reply*—The choice of capitalizing or expensing depends on the outcome of the lawsuit. FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 247 (AC V18.401), states “. . . the legal and other costs of successfully defending a patent from infringement are ‘deferred legal costs’ only in the sense that they are part of the cost of retaining and obtaining the future economic benefit of the patent.”

If defense of the patent lawsuit is successful, costs may be capitalized to the extent of an evident increase in the value of the patent. Legal costs which relate to an unsuccessful outcome should be expensed.

## Section 3100

### ***Current Liabilities***

#### **.01 Estimated Liability for Unemployment Claims**

*Inquiry*—Under state law, a corporation has a choice of the method to pay unemployment insurance contributions. The corporation may pay a percentage of gross wages or may reimburse the state employment commission directly for actual unemployment claims. A client chose to reimburse the state for the actual claims which may arise. If no claims against the client are filed, may the client record an expense and a liability for unemployment claims?

*Reply*—The estimated unemployment insurance costs should be accrued currently based on the client's estimated or past history of unemployment. Unemployment insurance cost should be related to the period worked by the employees. Not recording unemployment costs until claims are actually filed would result in a mismatching of revenues and expenses. Such an approach would be unacceptable under generally accepted accounting principles.

#### **.03 Accounting for Possible Refunds of Leasing Fees**

*Inquiry*—A company franchises distributorships for home and office oxygen inhalator units. The licensees lease the units from the company and pay an initial leasing fee for each unit before receipt of the unit. As stipulated in the franchise agreement, the licensee is entitled to a refund, upon termination of the franchise agreement and return of the units, of a specified amount of the initial leasing fee depending on the period of time that the units are leased out. When units are returned they can usually be redistributed with little or no repair. Is there a liability for the return of a portion of the initial leasing fees?

*Reply*—The returned units can usually be redistributed with little or no repair. Therefore, accounting for these units would be similar to accounting for returnable containers. Because the licensee pays the initial leasing fee prior to delivery of the units, there is no receivable to be offset by an "allowance account" for the estimated refunds, and so the amounts for estimated refunds should be shown as a liability.

#### **.04 Date for Accrual of Tax Penalties**

*Inquiry*—A company has received certain billings from the federal government for interest and penalties for late filing of federal withholding taxes. Some of these notices were received prior to the balance sheet date, while other notices were received after the balance sheet date, but in either case they apply to periods prior to the balance sheet date. Should liabilities for the interest and penalties be shown on the balance sheet?

*Reply*—SAS No. 1, section 560, *Subsequent Events*, paragraph 3 (AU 560.03), states in part:

All information that becomes available prior to the issuance of the financial statements should be used by management in its evaluation of the conditions on which the estimates were based. The financial statements should be adjusted for any changes in estimates resulting from the use of such evidence.

Therefore, provision should be made for any billings received for penalties on late filing of federal withholding taxes which were required to be filed prior to the balance sheet date. Similarly, any such interest should be provided for up to the balance sheet date. Interest accrued subsequent thereto would be an expense of the following period.

### **.08 Reporting Accrued Compensation Cost**

*Inquiry*—An entity, which will be presenting comparative financial statements, failed to implement FASB Statement No. 43, *Accounting for Compensated Absences* (AC C44), until the current year. (It was required to have been adopted for fiscal years beginning after December 15, 1980.)

According to the entity's management, the condition of the books and records makes restating the earlier of the two years presented impracticable. Instead, it intends to include the cumulative effect in net income in the current year.

Management represents that the accounting treatment should parallel that of APB Opinion No. 20, *Accounting Changes*, paragraph 20 (AC A06.116), which states, "... The amount shown in the income statement for the cumulative effect of changing to a new accounting principle is the difference between (a) the amount of retained earnings at the beginning of the period of a change and (b) the amount of retained earnings that would have been reported at that date if the new accounting principle had been applied retroactively for all periods which would have been affected and by recognizing only the direct effects of the change and related income tax effect."

The auditor states that this should be treated as the correction of an error, and, as such, must result in the restatement of the earlier year of the comparative presentation.

Is the auditor correct?

*Reply*—Assuming that the amounts of unaccrued compensation costs were material in prior years, so that prior year statements were in error, the auditor is correct. If, however, the matter became material for the first time in the current year, then application of APB Opinion No. 20 (AC A06 and A35), i.e., a cumulative effect adjustment, would be appropriate.

The transition guidance in FASB Statement No. 43 (AC C44) permitted the cumulative effect to be included in net income in the year in which the Statement was first applied if it was not practicable to restate any prior year. However, the first year of application would have to have been for fiscal years beginning after December 15, 1980. The exception would not apply to initial application after that date.

### **.09 Accrual for Employer Co-Insurance Arrangements**

*Inquiry*—A company pays for the medical expenses of its active employees but purchased "stop-gap" or "excess of loss" insurance to cover medical expenses exceeding \$10,000, lifetime benefit, per employee. What amount, if any, should the company accrue to cover its liability?

*Reply*—Although FASB Statement No. 5, *Accounting for Contingencies* (AC C59), excludes employment-related costs, that accounting guidance may be appropriate for this situation. FASB Statement No. 5, paragraph 8 (AC C59.105), states that an accrual for a loss contingency is required if the loss is probable and the amount of the loss can be reasonably estimated. Medical expenses incurred by the employee during the reporting period should be ac-

crued. This includes expenses incurred during the reporting period but submitted after the balance sheet date. The accrual should be based on all relevant data (including statistical data), the company's historical experience, and its expectations of the future. Some of this data may be available from insurance administrators or actuaries.

## **.10 Compensated Absences**

*Inquiry*—A company with a June 30 year end has a sick pay policy that states that an employee employed for at least three months is entitled to ten sick days annually. The employee is entitled to these days as of January 1 and any unused sick days as of December 31, are paid to these workers. Should the company accrue a liability as of June 30 for the unused sick days of these workers?

*Reply*—Yes. FASB Statement No. 43, *Accounting for Compensated Absences* (AC C44), indicates that sick pay that is customarily paid even though the absence from work is not actually the result of an illness, should not be considered sick pay in applying the provisions of paragraph 7 (AC C44.105) of that Statement. In considering necessity for making an accrual, the four criteria in paragraph 6 (AC C44.104) should be considered.

In determining the amount of the accrual, the guidance in FASB Statement No. 5, *Accounting for Contingencies* (AC C59), concerning the probability of future payment should be considered. Specifically, the company should consider its payment history and employee turnover in calculating the accrual.

In this example, if an employee had taken three days through June 30, the remaining accrual would be seven days. If this example were modified, and the days were earned on a pro rata basis throughout the year, the company would record a liability for the expected payment to be made to the employee for only the accumulated right through June 30. With the same three days taken through June 30, the company would have an accrual for the remaining two days in the June 30 financial statements.

---

**[The next page is 2021.]**

## Section 3200

### *Long-Term Debt*

#### **.06 Amortization Period for Placement Fee When Mortgage Refinanced**

*Inquiry*—A company paid a \$100,000 mortgage placement fee for an eighteen year mortgage. Ten months later, it became apparent that a refinancing of a significantly larger mortgage would be needed. The company negotiated a commitment with a bank for a larger mortgage to be placed one year from the date of this agreement. At the time of the commitment, in accordance with APB Opinion No. 17, paragraph 31 (AC I60.112), which deals with intangible assets, the company reduced the amortization period of the placement fee to the expected remaining period of the original mortgage.

Two months before the closing date of the original mortgage, at which time almost the entire prepaid mortgage fee had been amortized, the bank was unable to make the loan and exercised an option to extend the closing date of the old mortgage and the placement date of the new mortgage for six more months.

Should the amortization period now be extended to the new settlement date?

*Reply*—The mortgage placement fee should not be viewed as an intangible asset but as a deferred charge under APB Opinion No. 21. It is an amortizable cost incurred to secure the mortgage.

The unamortized amount of the fee at the time when the bank exercises the option should be amortized over the remaining six month period. The reasons for the exercise of the option do not change the fact that the period benefited has been extended. The change should be treated as a change in accounting estimate, in accordance with APB Opinion No. 20 (AC A06). If the new mortgage is placed before the end of the six month option period, any balance of the fee should then be written off in accordance with APB Opinion No. 26 and FASB Statement No. 4 which deal with early extinguishment of debt. [Amended]

#### **.09 Financial Statement Presentation of "Pay Any Day" Loans**

*Inquiry*—Corporation A finances its purchases of equipment through "pay any day" loans. Under this type of financing arrangement, the borrower signs a note and security agreement which sets forth the amount financed, the finance charge, and the amount of monthly payment. This instrument differs from a conditional sales contract or "add-on" loan. The "add-on" loan is a contract calling for a specified number of payments, including interest, and therefore the liability is the total amount to be repaid over the life of the contract; whereas, the "pay any day" loan, or note and security agreement is a simple interest loan and the agreement shows the finance charge in order to disclose the amount of interest that will be paid if each installment payment is made on its exact due date.

What is the appropriate financial statement presentation of "pay any day" loans?

*Reply*—A "pay any day" loan can be recorded and reported in the financial statements at its face amount plus accrued interest because it is in effect a term loan with interest charged at the current rate. The amount of the loan, if any, expected to be paid within one year would be shown as a current liability.

### **.10 Determining the Allocation for Lease Payments for a Lease Capitalized at Fair Market Value**

*Inquiry*—According to FASB Statement No. 13, *Accounting for Leases*, paragraph 10, a lessee accounting for a capital lease, records an asset and an obligation equal to the present value of the minimum lease payments at the beginning of the lease term, excluding any portion of the payments which represent executory costs (e.g., insurance and taxes) which will be paid by the lessor. However, if this amount is greater than the fair market value of the leased property, the amount recorded as the asset and obligation should be fair market value. When the asset and obligation are recorded at the fair market value, since the interest rate is not known, how should the amount for the lease payments be recorded?

*Reply*—FASB Statement No. 13, paragraph 12, states in part, during the lease term, each minimum lease payment shall be allocated between a reduction of the obligation and interest expense so as to produce a constant periodic rate of interest on the remaining balance of the obligation. This is the “interest” method described in the first sentence of APB Opinion No. 21, *Interest on Receivables and Payables*, paragraph 15, and in APB Opinion No. 12, *Omnibus Opinion*—1967, paragraphs 16 and 17.

When the asset to be recorded based on the present value of the minimum lease payments exceeds the fair market value of the asset, it is usually because the incremental borrowing rate used to determine present value is lower than the interest rate implicit in the lease.

### **.11 Effect of Sales Taxes on the Determination of Present Value of Minimum Lease Payments**

*Inquiry*—A company leases a machine for \$14,000 a month for 72 months. The monthly invoice received from the lessor includes the stipulated monthly rent plus a charge for state sales taxes. The lease does not meet the 90 percent criterion of a capital lease (i.e., the present value of the minimum lease payments excluding executory costs equals or exceeds 90 percent of the fair value of the leased property) if sales taxes are excluded from minimum lease payments. The criterion is met if both the rent and sales taxes are included as minimum lease payments.

Should the minimum lease payments include sales taxes?

*Reply*—Practice in this area varies. FASB Statement No. 13, *Accounting for Leases*, paragraph 5(j)(i) defines, in part, minimum lease payments as the payments that the lessee is obligated to make or can be required to make in connection with the leased property. However, “. . . the lessee’s obligation to pay (apart from rental payments) executory costs such as insurance, maintenance, and taxes in connection with leased property shall be excluded.” Many accountants interpret this to mean that all taxes, including sales taxes, levied on lease payments are considered executory costs since the lessor is merely acting as a collection agent for the taxing authority.

Other accountants believe that only taxes other than sales taxes (such as property taxes) should be excluded from the minimum lease payments because sales taxes are often capitalized as part of the cost of purchased assets. FASB Statement No. 13, paragraph 60 states that the provisions of this Statement derive from the view that a lease that transfers substantially all of the benefits and risks incident to ownership should be accounted for as the acquisition of an asset and the incurrence of an obligation.

Because the authoritative pronouncements do not specifically address whether sales taxes should be included as part of minimum lease payments, practice varies and should be determined by the company's general policy for accounting for sales taxes on purchased assets.

Regardless of which approach is used, in order to properly apply the 90 percent test referred to in FASB Statement No. 13, paragraph 7(d) (AC L10.103), the components of the numerator and denominator should be the same. For example, if the sales taxes are included as part of the minimum lease payments (the numerator) then the sales taxes should be included in the fair value of the leased asset (the denominator).

## **.12 Balance Sheet Classification of Revolving Line of Credit**

*Inquiry*—A company has a revolving line of credit with a bank. The company is only required to make monthly interest payments. No principal payments are required. In the event the credit line is terminated, the principal is due 12 months after the date of termination.

Should the principal amount be classified as current or long-term in a classified balance sheet?

*Reply*—ARB No. 43, Chapter 3A, *Current Assets and Current Liabilities*, paragraph 7 (AC B05.402), states that liabilities whose regular and ordinary liquidation is expected to occur within a relatively short period of time, usually 12 months, are intended for inclusion in the current liability classification. If the line of credit has not been terminated at the balance sheet date, the principal amount should be classified as long-term, unless the company intends to repay the outstanding debt within 12 months.

## **.13 Uncertainty Arising From Violation of Debt Agreement**

*Inquiry*—At the end of 19X1, a company was in violation of its long-term debt covenant and was unable to obtain a waiver from the bank. It therefore reclassified its debt to current and appropriate footnote disclosures were made. During 19X2, the violation was cured. What is the proper classification of the debt in the company's 19X2 comparative financial statements?

*Reply*—FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor* (AC B05), states that the current liability classification is intended to include long-term obligations that are or will be callable by the creditor because the debtor either violates the debt agreement or does not cure a violation within a specified grace period. Accordingly, such callable obligations should be classified as current liabilities unless the creditor waives or loses the right to demand payment.

Since the violation was cured in 19X2, the debt should be classified as long-term in the 19X2 financial statements. The debt should not be reclassified to long term in the 19X1 financial statements because it was a current liability based on the facts existing at the 19X1 balance sheet date.

## **.15 Disclosure of Five-Year Maturities on Long-Term Debt**

*Inquiry*—A company entered into a 10-year loan agreement with a lender. The mortgage note contains a variable interest rate based on prime plus one percent. In accordance with FASB Statement No. 47, *Disclosure of Long-Term Obligations* (AC C32), the company will disclose the maturities on the debt for each of the next five succeeding years. Should the disclosure include principal and interest?

*Reply*—No. The required disclosure of the amount of scheduled repayments for each of the five succeeding fiscal years relates only to principal repayments and should not include interest. Disclosure is also called for when interest rates vary with the prime rate.

**.16 Amortization of Premium or Discount in Investment Securities With an Early Call Date**

*Inquiry*—Investment securities may be acquired at par value, at a premium, or at a discount. If the investment securities have an earlier call date, how should the amortization of premium or accretion of discount be recorded?

*Reply*—FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated With Originating or Acquiring Loans and Initial Direct Costs of Leases* (AC L20), applies to the accounting for discounts, premiums, and commitment fees associated with the purchase of loans and other debt securities such as corporate bonds. In accordance with FASB Statement No. 91, paragraph 19 (AC L20.118), “the calculation of the constant effective yield necessary to apply the interest method shall use the payment terms required by the loan contract, and prepayments of principles shall not be anticipated to shorten the loan term.” Accordingly, the period of amortization or accretion is from the purchase date to the maturity date. As provided by FASB Statement No. 91, paragraph 19 (AC L20.118), in order to amortize the premium or accrete the discount to an early call date, the enterprise must hold a large number of similar loans for which prepayments are probable and the timing and amount of prepayments can be reasonably estimated.

**.17 Disclosure of Covenant Violation and Subsequent Bank Waiver**

*Inquiry*—At the balance-sheet date, an entity was in violation of certain provisions of the loan covenant associated with its long-term debt. Under the terms of the loan agreement, the obligation is now callable by the creditor. Subsequent to the balance-sheet date, the bank waived its right to demand repayment for more than one year from the balance-sheet date. Therefore the loan remained classified as long-term, per FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor*, paragraph 5 (AC B05.109A). Does the covenant violation and subsequent bank waiver need to be disclosed in the financial statements?

*Reply*—The authoritative literature applicable to nonpublic entities does not address disclosure of debt covenant violations existing at the balance-sheet date that have been waived by the creditor for a stated period of time. Nevertheless, disclosure of the existing violation(s) and the waiver period should be considered for reasons of adequate disclosure. If the covenant violation resulted from nonpayment of principal or interest on the debt, inability to maintain required financial ratios, or other such financial covenants, that information may be vital to users of the financial statements even though the debt is not callable. If the lender has waived the right for greater than one year but retained the future covenant requirements (i.e., covenant requirements will have to be met at interim dates during the next 12 months), the accounting and disclosure provisions of EITF Issue No. 86-30, *Classification of Obligations When a Violation Is Waived by the Creditor*, apply.

For SEC registrants, Regulation S-X, Article 4, Section 210.4-08(c), requires disclosure of the amount of the obligation and the period of waiver whenever a creditor has waived its right to call the debt for a stated period of time.

---

## Section 3400

### ***Contingent Liabilities***

#### **.01 Contested Liability**

*Inquiry*—A company acquired the entire outstanding stock of another company several years ago. The acquired company was reorganized under IRS Code Section 334(b)(2) causing its building and equipment to be written up in value. Inventory was later written down.

An unpaid portion of the original purchase price is claimed by the former owners of the acquired company, but this is contested by the acquiring company on the grounds that the value of the acquired company's stock was misrepresented.

The acquired company's shareholders intend to sue the acquiring company for the unpaid balance, but a suit has not yet been filed. How should the amount due under the original purchase contract and the possible suit be reflected on the acquiring company's financial statements?

*Reply*—Because the possibility of a suit exists, footnote disclosure describing the entire dispute should be made, including legal counsel's comment that no suit is pending at this time. The amount due under the original purchase contract, plus accrued interest, should still be reported as a liability. No adjustments should be made in the acquiring company's financial records until the dispute is settled or legal counsel advises that a statute of limitations effectively bars filing of the suit in question and the company is not legally liable to pay the debt.

#### **.02 Disclosure of Agreement Between Corporation and Its Shareholders**

*Inquiry*—Corporation A, a closely held entity, has an agreement with its shareholders under which Corporation A could become obligated to purchase a certain number of shares of stock of deceased shareholders at book value. Should Corporation A disclose this agreement in its financial statements?

*Reply*—Corporation A should disclose the terms of the agreement in a note to its financial statements since it is a contingent liability.

#### **.04 Accounting for Issuance of Cents Off Coupons**

*Inquiry*—A client includes with its consumer product a coupon for cents off on the next purchase of the product. Should the coupon be accounted for as a reduction of the selling price when the second product is sold?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies*, paragraph 4(f), would consider the possible future coupon claims as a loss contingency to be evaluated as a future event. More than likely, the redemption of some or all of the coupons would be considered a probable event under FASB Statement No. 5, paragraph 3. The amount to be accrued and charged to earnings at the time the first product is sold should be based on a reasonable estimate of the amount of coupons expected to be presented for redemption. This estimate could be based on experience in previous promotions.

**.06 Change in Accounting Estimate for Discounted Receivables**

*Inquiry*—A company is contingently liable under guarantees of discounted receivables upon their default for nonpayment. In the past year the volume of defaults has increased. If the company increases its allowance for defaults as a result of such experience, how should the increase in the allowance be reflected in the financial statements?

*Reply*—The increase in the allowance represents a change in accounting estimate and should “be accounted for in . . . the period of change,” in accordance with APB Opinion No. 20, *Accounting Changes*, paragraph 31. Prior periods should not be restated, nor should pro forma information be presented.

APB Opinion No. 20, paragraph 33, states that disclosure “is not necessary (but) is recommended if the effect of a change in the estimate is material.”  
[Amended]

---

**[The next page is 2571.]**

## Section 3500

### Commitments

#### .01 Accounting for Contract to Cut Timber

*Inquiry*—A corporation is engaged in the forest products industry and purchases timber under both “pay as cut” (specifies a rate the buyer will pay per unit of volume cut) and “lump sum” (buyer pays a fixed amount for the right to cut timber on a specific tract of land). The corporation agrees to purchase timber on land which is identified in the contract. The exact amount of timber purchased can vary in total footage as well as species due to the nature of the goods. Is it proper to recognize the transactions as assets and liabilities on the balance sheet?

*Reply*—It would be improper to recognize a contract to cut timber as an asset and a liability unless the contract, at the time it was entered into, resulted in the purchase of the timber.

A distinction must be made between a contract that is executory in nature and one in which a sale and a purchase of lumber has occurred. Evidence of a purchase would be the transfer of title to the lumber at the time the contract is signed. Such a transfer usually occurs with lump sum contracts and may occur under pay as cut contracts if they include performance guarantees or risk of monetary damages if not performed. Therefore, those contracts would generally be recognized as assets and liabilities.

Receiving title at the time the timber is cut rather than at the time the contract is signed makes the contract executory. It is generally accepted practice to adequately disclose the nature and amounts of commitments relating to executory contracts in the notes to financial statements. Therefore, pay as cut contracts without performance guarantees or risk of monetary damages would generally not be recognized as assets and liabilities until performance occurs. [Amended]

#### .02 Liability Under Foreign Bank's Letter of Payment Guarantee

*Inquiry*—A client, an import-export firm, agreed to purchase goods from a foreign manufacturer. The agreement calls for advance payment with the goods being delivered over the twelve-month period following the date of the agreement. The client arranged to make this advance payment through a letter of credit issued by a U.S. bank. The U.S. bank has received a letter of payment guarantee issued by a bank in the foreign country. If the supplier fails to make shipments under the terms of the agreement, the U.S. bank will look to the foreign bank for any unpaid advances owed to the U.S. bank by the client. The U.S. bank will look to the client for payment of all amounts represented by shipments to the client under the terms of the agreement.

Is the client directly liable for the amount advanced by the U.S. bank through its letter of credit, or does the client become liable only as the goods are received and payment is due the U.S. bank?

*Reply*—The client is directly liable for the amount advanced to the foreign supplier. It appears from the description of the transactions that the foreign

bank is contingently liable if the supplier does not perform under the agreement. The offsetting asset would be classified as an "Advance to Suppliers." Additional footnote disclosure of the financial arrangements would also be required.

#### **.04 Recognition of Losses on Purchase Commitments**

*Inquiry*—ARB No. 43, Chapter 4, *Inventory Pricing*, Statement 10 (AC I78) states: "Accrued net losses on firm purchase commitments for goods for inventory, measured in the same way as are inventory losses, should, if material, be recognized in the accounts and the amounts thereof separately disclosed in the income statement."

Does this statement mean that the measurement of losses cannot be done on an item by item basis but must only be done if there is an overall net loss on purchase commitments?

*Reply*—Net losses apply to specific purchase commitments and contracts, and not necessarily to components of major categories of inventories, as discussed in ARB No. 43, Chapter 4, Statement 7 (AC I78).

#### **.05 Letters of Credit**

*Inquiry*—Should a company report its outstanding letters of credit as a liability in the financial statements?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies*, paragraphs 18 (AC C59.120) and 19 (AC C59.120), requires disclosure of unused letters of credit. They are commitments and should not be reported as a liability in the financial statements. [Amended]

#### **.06 Covenants Imposed by Loan Agreements**

*Inquiry*—Restrictive covenants under certain loan agreements of Company A require the Company to maintain a special level of working capital, limit the amount of additional debt that it can incur, and restrict the amount of retained earnings available for dividend payments. Should the restrictive covenants be disclosed?

*Reply*—FASB Statement No. 5, *Accounting for Contingencies* (AC C59), SAS No. 32, *Adequacy of Disclosure of Financial Statements* (AU 431), and ATB No. 1, paragraph 69(4) require the disclosure of restrictive covenants. The discussion of disclosure of restricted retained earnings in ARS No. 7, page 203, states: "When there is more than one type of restriction, disclosure of the amount of retained earnings, so restricted, may be based on the most restrictive covenants likely to be effective in the immediate future. In other words, restrictions seldom, if ever, pyramid in amount." By analogy, disclosing only the most restrictive covenants applying to dividend distributions would also apply to other restrictive covenants. [Amended]

#### **.07 Disclosure of Unused Lines of Credit**

*Inquiry*—Should nonpublic companies disclose the existence of unused lines of credit that are available as of the balance sheet date?

*Reply*—Although public companies are required [pursuant to SEC Regulation S-X, section 210.5-02.19(b)] to disclose significant unused lines of credit for short-term financing in the notes, there is no such explicit requirement for nonpublic companies under generally accepted accounting principles. However, under certain circumstances, disclosure by nonpublic companies may be advisable based on the general principle of adequate disclosure.

SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, paragraph 4 (AU 411.04), states that the notes, as well as the financial statements, should be “. . . informative of matters that may affect their use, understanding, and interpretation.” In addition, SAS No. 32, *Adequacy of Disclosure in Financial Statements*, paragraph 2 (AU 431.02), emphasizes:

An independent auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he is aware at the time.

[Amended June 1995.]

---

[The next page is 2671.]

## Section 3600

### ***Deferred Credits***

#### **.01 Balance Sheet Presentation of Unearned Revenue**

*Inquiry*—A client, a motor club with an insurance company subsidiary, has annually contended that unearned insurance premiums and membership dues should be presented on the consolidated balance sheet as deferred income immediately preceding the members' equity and should not be included in the amount for total liabilities. The client recognizes the revenues on the insurance premiums and membership dues on a pro rata basis over the period covered by the insurance policy and the memberships, therefore, the auditors have maintained that the unearned portion of the insurance premiums and membership dues represent a liability on the part of the client to render services in the future.

Is it appropriate to show these unearned premiums and dues outside the liability section of the balance sheet?

*Reply*—FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 84, indicates that amounts received for goods or services in advance are not treated as revenue of the period in which they are received but as revenue of the period or periods in which they are earned. These amounts are carried as "unearned revenue"—that is, liabilities to transfer goods or render services in the future—until the earning process is complete. Therefore, the unearned portions of the insurance premiums and membership dues represent liabilities to provide services in the future. While the description of the liabilities might vary, to present the unearned premiums and membership dues outside of the liability section of the balance sheet would be inappropriate.

## Section 4110

### *Issuance of Capital Stock*

#### **.01 Expenses Incurred in Public Sale of Capital Stock**

*Inquiry*—A closely held corporation is issuing stock for the first time to the public.

How would costs, such as legal and accounting fees, incurred as a result of this issue, be handled in the accounting records?

*Reply*—Direct costs of obtaining capital by issuing stock should be deducted from the related proceeds, and the net amount recorded as contributed stockholders' equity. Assuming no legal prohibitions, issue costs should be deducted from capital stock or capital in excess of par or stated value.

Such costs should be limited to the direct cost of issuing the security. Thus, there should be no allocation of officers' salaries, and care should be taken that legal and accounting fees do not include any fees that would have been incurred in the absence of such issuance. [Amended]

#### **.02 Stock Issued for No Consideration**

*Inquiry*—A corporation issued stock without receiving any consideration and set up goodwill to offset the credit to capital stock. Was this transaction properly recorded?

*Reply*—This is primarily a legal rather than an accounting question, and it would be advisable to obtain legal advice as to the effect of such issuance. If such stock were legally issued, the appropriate entry would be to show the offset as discount on capital stock issued. Goodwill should only be recognized when acquired, in accordance with paragraphs 24 through 26 (AC I60.105–107) of Accounting Principles Board Opinion No. 17. [Amended]

#### **.03 Stock Issued for Accounting and Management Services**

*Inquiry*—A newly formed corporation is going public and wishes to issue shares of stock for certain services, such as accounting, legal, underwriting, printing, etc.

How should the value for these services be set up on the books of the corporation?

*Reply*—It would be appropriate to record the stock issued at the fair value of the stock or services rendered, whichever is the more clearly evident. The recipients should be able to furnish evidence as to such fair value. Since the amounts the Securities and Exchange Commission might consider to be fair value cannot be predicted, a consultation with the staff of the Commission might be advisable before formal submission of the financial statements. [Amended]

#### **.07 Expenses Incurred in Withdrawn Public Offering**

*Inquiry*—What is the proper accounting for the costs of a public offering that was withdrawn?

*Reply*—Accounting Research Study No. 15, *Stockholders' Equity*, page 23, discusses accounting for stock issue costs. The Study states that such costs are usually deducted from contributed portions of equity, that is, capital stock or capital in excess of stated or par value, as a reduction in the proceeds from the sale of securities.

Since there were no proceeds from a sale of securities to offset the costs, the costs should be charged to current year's income, but not as an extraordinary item.

#### **.08 Balance Sheet Presentation of Mandatory Redeemable Preferred Stock**

*Inquiry*—Should mandatory redeemable preferred stock be reflected in the equity section of the balance sheet?

*Reply*—The Securities and Exchange Commission has addressed this question in Regulation S-X, section no. 210.5-02.28. This regulation states that mandatory redeemable preferred stock is not to be included in amounts reported as stockholders' equity.

Although nonpublic companies are not required to follow Regulation S-X, it would be appropriate for them to do so in most cases. However, practice varies.

FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 62, states all classes of equity depend to some extent on enterprise profitability for distribution of enterprises assets, and no class of equity carries an unconditional right to receive future transfers of assets from the enterprise except in liquidation, and then only after liabilities have been satisfied.

This characteristic of equity is generally not found in mandatory redeemable preferred stock. If the stock is redeemable at a specific date or at the option of the holder, debt classification as suggested by Regulation S-X seems most appropriate. Some financial statements present mandatory redeemable preferred stock in a category between liabilities and equity. However, facts and circumstances in nonpublic entities (e.g., certain stock issued for estate planning purposes) may justify equity classification of certain mandatory redeemable preferred stock. [Amended]

#### **.09 Costs Incurred to Acquire Treasury Stock**

*Inquiry*—A company has incurred legal and accounting costs arising from the acquisition of treasury stock. How should the costs be classified in the company's financial statements?

*Reply*—There is no authoritative literature on this particular subject. Some accountants believe that costs associated with the acquisition of treasury stock should be treated in a manner similar to stock issue costs. Stock issue costs are usually accounted for as a deduction from the gross proceeds of the sale of stock. Costs associated with the acquisition of treasury stock may be added to the cost of the treasury stock.

#### **.10 Costs Incurred in Shelf Registration**

*Inquiry*—A public company incurs legal and other fees in connection with an SEC filing for a stock issue it plans to offer under a shelf registration. How should the company account for these costs?

*Reply*—The costs should be capitalized as a prepaid expense. When securities are taken off the shelf and sold, a portion of the costs attributable to the securities sold should be charged against paid in capital. Any subsequent costs

incurred to keep the filing “alive” should be charged to expense as incurred. If the filing is withdrawn, the related capitalized costs should be charged to expense.

#### **.11 Default on Stock Subscribed**

*Inquiry*—A company entered into a stock subscription agreement to sell its stock. The agreement called for three monthly payments of \$10,000 after which the stock would be issued. Although the first payment was received by the company, the subscriber subsequently defaulted on the remaining two payments. According to the agreement, any payments made by the subscriber towards the stock subscription are not refundable. How should the company account for the retention of the first \$10,000 payment?

*Reply*—The payment should be recorded as an addition to shareholders' equity (i.e., a credit to paid-in capital). According to APB Opinion No. 9, *Reporting the Results of Operations*, paragraph 28, capital transactions shall be excluded from the determination of net income or the results of operations.

---

[The next page is 3121.]

## Section 4120

### ***Reacquisition of Capital Stock***

#### **.03 Repurchase of Stock in Excess of Retained Earnings and Additional Paid-in Capital**

*Inquiry*—A corporation has contracted to repurchase, over a period, some of its own stock. The corporation does not have sufficient retained earnings and additional paid-in capital from which to charge the excess of amounts paid over par value. How should this repurchase be reflected in the company's financial statements?

*Reply*—In many states, it would not be legal for a corporation to repurchase shares of its own stock at a cost greater than the amount of retained earnings of the corporation. Competent legal advice as to the effect of the agreement should be obtained. This may be an executory contract, with only amounts currently being paid for considered as repurchases. If this be the case, only amounts disbursed are to be recognized in the accounts, with an offset to treasury stock. There should of course be disclosure in a note to the financial statements of the date, number of shares, and amounts of future payments under the contract. Such future payments would thus include the interest factor, which would be an additional cost of the stock, rather than being interest expense.

However, if legal counsel advises that this is in fact a completed contract and enforceable, the full amount should be shown (excluding interest) as treasury stock, with an offsetting liability. Again, there should be footnote disclosure of the nature of the liability and of the interest rate and maturity dates. Under these circumstances, the interest would be included as a current expense. [Amended]

#### **.05 Purchase of Treasury Shares for an Amount in Excess of Market Price**

*Inquiry*—A corporation enters into an agreement to purchase a major block of its shares from one of its shareholders at a price in excess of its current market price. These shares represent the controlling interest in the corporation. The purchase price of the treasury stock does not include any other rights or privileges. At what value should the corporation record the treasury stock?

*Reply*—FASB Technical Bulletin 85-6, *Accounting for a Purchase of Treasury Shares and Costs Incurred in Defending Against a Takeover Attempt* (AC C23), states that transactions do arise in which an acquisition of an enterprise's stock may take place at prices different from routine transactions in the open market. A block of shares representing a controlling interest will generally trade at a price in excess of market, and a large block of shares may trade at a price above or below the current market price depending on whether the buyer or seller initiates the transaction. A company's acquisition of its shares in those circumstances is solely a treasury stock transaction and is properly accounted for at the purchase price of the treasury shares.

In this situation, since the purchase price does not include amounts attributable to items other than the shares purchased, the entire purchase price should be accounted for as the cost of treasury shares.

---

**[The next page is 3201.]**

## Section 4130

### ***Warrants***

#### **.03 Warrants Recquired**

*Inquiry*—Company A issued, in a prior year, stock warrants with a subordinated note. The value of the warrants as determined at the date of issuance was added to capital in excess of par value and recorded as deferred loan costs to be amortized over the term of the loan. Company A plans to reacquire the warrants for \$110,000. Should the \$110,000 be:

- (a) accounted for as additional cost of the loan and amortized over the remaining term of the loan, or
- (b) accounted for as a capital transaction and deducted from capital in excess of par value, or
- (c) accounted for in some other manner?

*Reply*—The purchase price of the warrants should be deducted from either capital in excess of par value or retained earnings.

---

[The next page is 3341.]

## Section 4150

### ***Stock Dividends and Stock Splits***

#### **.01 Stock Dividends of Closely-Held Corporation**

*Inquiry*—A corporation has about two hundred stockholders with the board of directors controlling about 80% of the stock. There is virtually no buying or selling of the company's stock and the price of trades has been constant at a level suggested by management.

The company has followed a policy of issuing stock distributions (usually 10 or 20%) and capitalizing them at par because there is not sufficient retained earnings to capitalize at estimated market value. The issuance of stock distributions is an integral part of the company's philosophy and policy with regard to employee morale and maintaining a relatively fixed trading value for the stock in the absence of a market.

Earnings have been increasing at 10% to 20% per year and cash dividends have remained constant. Stock distributions provide a means for returning earnings to stockholders without the tax impact of cash dividends.

Accounting Research Bulletin No. 43 states that stock dividends in amounts of less than 20% to 25% or of a recurring or frequent nature should be accounted for by capitalizing the estimated market value of the stock. The Bulletin also states that in cases of closely-held companies, it is to be presumed that the intimate knowledge of the corporation's affairs possessed by the shareholders would preclude any such implications as referred to in paragraph 10 of Chapter 7, Section B (AC C20.103), and that there is no need to capitalize earned surplus other than to meet legal requirements.

Under these circumstances, is it required that the stock dividends be capitalized at the estimated market value of the stock?

*Reply*—Since only 20% of the corporation's stock is not controlled by the board of directors, it is likely that these minority shareholders would not have intimate knowledge of the corporation's affairs, as contemplated in paragraph 12, Chapter 7, Section B (AC C20.105) of Accounting Research Bulletin No. 43, which excludes closely-held corporations from the provisions of paragraph 10 (AC C20.103). Accordingly, the requirements of paragraph 10 would apply. The stock dividends should be capitalized at the selling price of the stock with a corresponding charge to retained earnings. [Amended]

#### **.02 Stock Dividend Affecting Market Price of Stock**

*Inquiry*—A company issued a 10% stock dividend. May the dividend be treated as a stock split if the dividend resulted in a drop in the market price of the stock?

*Reply*—Paragraph 13 in Chapter 7, Section B of Accounting Research Bulletin No. 43 (AC C20.106) states, in part, "On the basis of a review of market action in the case of shares of a number of companies having relatively recent stock distributions, it would appear that there would be few instances involving

the issuance of additional shares of less than, say, 20% or 25% of the number previously outstanding where the effect would not be such as to call for the procedure referred to in paragraph 10 (AC C20.103).” Paragraph 10 (AC C20.103) requires a transfer from retained earnings to the category of permanent capitalization in an amount equal to the fair value of the additional shares issued.

In order to treat the 10% “stock dividend” as a “split-up effected in the form of a dividend,” the company would have to demonstrate that the additional shares issued is “large enough to materially influence the unit market price of the stock” as indicated in paragraph 13 (AC C20.106).

---

[The next page is 3401.]

**Section 4160*****Contributed Capital*****.01 Payment of Corporate Debt by Stockholders**

*Inquiry*—Three shareholders own stock in Corporations A and B. They agree to personally pay a debt of Corporation A by giving the creditor stock in Corporation B. How should this transaction be recorded on the books of Corporation A?

*Reply*—The payments by the three stockholders of Corporation A's debt would represent an additional contribution by the stockholders to Corporation A. This can be recorded as a credit to "additional capital." [Amended]

**.02 Forgiveness of Debt by Principal Owner**

*Inquiry*—The sole owner of a corporation forgives a loan that the corporation owes to him. What is the appropriate accounting treatment for this transaction?

*Reply*—APB Opinion No. 26, *Early Extinguishment of Debt*, deals with debt extinguishments which are ordinarily treated as extraordinary items. APB Opinion No. 26, paragraph 20, footnote 1 (AC L35.105, footnote 2) states, however, that extinguishment transactions between related enterprises may be in essence capital transactions.

---

[The next page is 3501.]

## Section 4200

### ***Retained Earnings***

#### **.01 Foreign Currency Translation—Retained Earnings**

*Inquiry*—A parent company is translating a foreign subsidiary's financial statements for consolidation purposes. It is the second year of operation for the subsidiary. How should retained earnings be translated?

*Reply*—For assets and liabilities, FASB Statement No. 52, *Foreign Currency Translation*, paragraph 12, requires the use of the exchange rate at the balance sheet date. For revenues, expenses, gains, and losses, the exchange rate at the dates on which those elements are recognized shall be used. However, an appropriately weighted average exchange rate for the period may be used to translate the income statement.

In year two, net income or loss would be translated at the weighted average exchange rate for the current year and accumulated with the historical opening translated retained earnings. It should be noted there may be a number of other transactions that may affect the subsidiary's retained earnings including the declaration of dividends.

---

[The next page is 3551.]

## Section 4210

### Dividends

#### .01 Write-off of Liquidating Dividends

*Inquiry*—Quite a few years ago, cash dividends were distributed to stockholders in excess of earnings. The company would now like to “clean up” the stockholders’ equity section of the balance sheet by removing the account “Prior Years’ Liquidation Dividends” which is shown as a reduction of the capital stock account. Can the liquidating dividends account be written off against “retained earnings” or “paid in capital in excess of par value”?

*Reply*—Essentially, this question is a legal one as to whether cash distribution to stockholders in excess of earnings in prior years may be charged to earnings in subsequent years. When liquidating dividends are declared, the charge is made to accounts such as “capital repayment,” “capital returned,” or “liquidating dividends” which appear on the balance sheet as offsets to paid-in capital. By this treatment, the amount of capital returned as well as the amount of capital originally paid in can be disclosed. Perhaps the wisest thing to do under the circumstances is to consult legal counsel to determine whether the write-off proposed is legal under the corporate statutes of the state. Perhaps it is legally permissible, under the laws of incorporation, to reduce the par or stated value of the corporation’s stock, thereby creating a reduction surplus which may then be used retroactively to absorb the original deficit, on the ground that the excess payments were dividends in partial liquidation.

#### .04 Accrual of Preferred Dividends

*Inquiry*—A corporation has cumulative preferred stock. It has not paid any dividends on this stock in the last three years. Should the corporation accrue the preferred dividends in arrears?

*Reply*—Generally, preferred stock contains a cumulative provision whereby dividends omitted in previous years must be paid prior to the payment of dividends on other outstanding shares. Since dividends do not become a corporate liability until declared, no accrual is needed. FASB Statement No. 129, *Disclosure of Information about Capital Structure* (AC C24), requires entities to disclose within its financial statements (either on the face of the statement of financial position or in the notes thereto) the aggregate and per-share amounts of arrearages in cumulative preferred dividends. Furthermore, FASB Statement No. 128, *Earnings per Share*, paragraph 9 (AC E11.104), states that dividends accumulated for the period on cumulative preferred stock (whether or not earned) should be deducted from income from continuing operations and also from net income when computing earnings per share. If there is a loss from continuing operations or a net loss, the amount of the loss should be increased by those preferred dividends. Preferred dividends that are cumulative only if earned should be deducted only to the extent that they are earned.

If preferred dividends are not cumulative, only the dividends declared should be deducted. In all cases, the effect that has been given to preferred dividends in arriving at income available to common stockholders in computing basic earnings per share should be disclosed for every period for which an income statement is presented. [Amended September 1997]

---

[The next page is 3631.]

## Section 4230

### *Capital Transactions*

#### **.02 Exchange of No Par Common Shares for Par Value Preferred Shares**

*Inquiry*—The shareholders of Corporation A exchanged their no par common shares for preferred shares with a par value to “freeze” the value of stock ownership for estate tax purposes. How should the difference between the carrying basis of the preferred shares and the carrying basis of the common shares be accounted for?

*Reply*—The difference should be charged or credited to additional paid-in capital. If there is no additional paid-in capital, any “debit” balance should first be charged to retained earnings and any remaining “debit” balance should be described in the financial statements as a discount on preferred stock. However, in many states the law requires that issued stock must be fully paid and nonassessable and therefore, if the par value of the preferred shares exceeds the market value of the common shares this exchange may have legal implications that should be considered. [Amended]

#### **.03 Use of Stockholder’s Assets to Repay Corporate Loan**

*Inquiry*—The sole owner of a corporation agreed to collateralize the company’s bank loan with personal assets. As a result of financial difficulties, the company’s bank loan was called and its owner agreed to sell his personal assets collateralizing the company’s loan, to repay the bank debt. What is the appropriate accounting of this transaction?

*Reply*—The monies used to repay the bank loan are in substance a further capital infusion by the individual, which increases his investment in the company. The company would eliminate its liability to the bank and credit paid-in capital.

## Section 5100

### Revenue Recognition

#### .01 Equipment Sales Net of Trade-Ins

*Inquiry*—A Client who deals in heavy equipment records all sales at net of trade-ins. Is this an acceptable accounting practice?

*Reply*—Support for the accounting treatment for trade-ins which this client follows could not be found. Sales should be credited with the nominal or stated contract price, and the difference between (a) the trade-in allowance and (b) the amount determined by pricing the trade-in at net realizable value minus normal profit margin should be treated as a sales allowance or discount. The traded-in equipment should be set up in inventory at an amount which, when reconditioning costs are added, will allow a margin approximating a normal profit when the sale is made.

#### .02 Rights to Broadcast Time Received for Services

*Inquiry*—An advertising agency creates and sells jingles and station identifications to radio and television stations. The agency receives broadcast time credit as part payment. This broadcast time is then resold by the agency to its clients. Should this broadcast time be recognized by the advertising agency:

1. when the agency bills the radio or television station, or
2. when it is subsequently sold to advertisers?

*Reply*—The broadcast time credit should be recognized as income when the services are billed to the station. It may be necessary to estimate the value of the credits. A corresponding asset account should be charged. This asset would be relieved as the broadcast time is sold by the advertising agency. [Amended]

#### .04 Discounts on Prepaid Funeral Arrangement Plans

*Inquiry*—An incorporated mortuary sells pre-need funeral plans in addition to rendering current mortuary services. These pre-need funeral plans are sold at a discount in order to be attractive to the public. All monies received from the sale of these plans are placed in a trust fund which has been set up at a local bank. The bank is the trustee of the trust and makes investments as it sees fit. The pre-need funeral plan agreements stipulate that all income earned by the trust belong to the mortuary, and withdrawals of such income from the trust may be made by the mortuary periodically. In return for the feature of the agreements calling for the mortuary's entitlement to the trust fund income, purchasers of the pre-need plans are permitted to buy the plans at a substantial discount. The agreements also provide for fully-covered funeral benefits in certain cases, although the plans may not be fully paid at time of death. Another advantage to the purchasers is that the costs of their funerals will not be influenced by increases in the cost of living index.

Certain expenses are met by the mortuary in the selling of its pre-need funeral plans; these are recorded monthly in a separate expense account in its general ledger. Trust fund income earned is also recorded monthly in the mortuary's general ledger, in a separate income account. As pre-need plans are

utilized by persons who had purchased them earlier, the special discounts mentioned in the preceding paragraph are recorded in a separate expense account in the mortuary’s general ledger. It should be emphasized here that such discounts are not reflected as an expense in the mortuary’s operations until such time the plans are actually used, whereas the expenses of the sales of the plans and the income earned by the trust affect operations currently, with no dependency whatsoever on the deaths of the purchasers or holders of the plans.

In order to achieve a better matching of expenses with revenues accruing from the sales of plans, could the trust fund income or the excess of trust fund income over the expenses of selling the plans be deferred until the plans are utilized? Or could the special discounts be charged to income at some date prior to the utilization of the plans?

*Reply*—It would be more acceptable to currently accrue or recognize selling expenses, fees and commissions, and trust fund income rather than use the “completed contract” or deferral accounting approach. If it is a fact that costs of furnishing services commonly exceed the trust funds expended at time of utilizing a plan, current provision should be made on an estimated basis for the potential or possible losses (more accurately, estimated excess of future servicing costs over monies to be released from trust to defray same) on plans not utilized as yet at the balance sheet date.

The special discounts are more in the nature of sales adjustments rather than costs or expenses.

**.07 One-Cent Sales**

*Inquiry*—A client in the fast food business has a “one-cent sale” once a week. For example, the sale might be two cheeseburgers for the price of one (60¢) plus one cent. The company would record the transaction as follows:

Cash (.60 + .01) . . . . .	\$ .61
Advertisement Expense . . . . .	.59
Sales (.60 × 2) . . . . .	\$1.20

The company makes this entry so that their “food costs” are not distorted, but should an adjustment be made at the end of the year for financial reporting purposes eliminating this advertising expense against sales?

*Reply*—The practice of crediting sales and charging advertising expense for the difference between the normal sales price and the “bargain day” sales price of merchandise is not acceptable for financial reporting. Realization of the full sales price cannot properly be imputed under such conditions. To do so would seem to imply that the same quantities would have been sold if the price had not been reduced.

It might however be appropriate to adjust the cost of sales and charge advertising for the cost of the one-cent hamburger. Such cost of sales should include only out-of-pocket expenses.

**.08 Life Membership Fees in a Club**

*Inquiry*—A company is engaged in a service club enterprise. What is the proper accounting for life membership fees?

*Reply*—The life membership fees should be allocated over the time the individual may be expected to require the services of the club.

#### **.10 Members of Country Club Assessed for Debt Retirement**

*Inquiry*—A country club has voted to impose a special yearly assessment on its membership for ten years. The proceeds are to be used to retire a first mortgage on the property of the club.

The assessment is being imposed on all members including voting certificate holders and nonvoting associate members.

Is the proper accounting treatment of this transaction a contribution to capital, or are dues to be reflected in the annual income statement?

*Reply*—When billing the assessments each year, the receivables from the members can be shown as an asset with a credit to income for the special assessment. Such amounts might then be appropriated to a special membership equity, perhaps entitled “appropriation for retirement of debt.” The financial statements should disclose that the directors had voted a special assessment for ten years and the amount of assessment per year. The first or the last year for the assessment, or both, should also be disclosed.

#### **.11 Excise Tax on Club Dues**

*Inquiry*—The members of certain private clubs must pay a federal excise tax in addition to their annual dues. Should the clubs record, as revenues, the dues net of the excise tax, or should revenues include both dues and taxes?

*Reply*—A club, in collecting excise taxes on dues, is acting as no more than an agent or conduit for the federal government. The amounts paid to the club by members to be turned over as excise taxes should not be construed as dues, and to show them as such on the income statement is erroneous.

#### **.14 Recognition of Fees Earned on Construction Mortgage Placements**

*Inquiry*—A client is in the business of bringing lenders and borrowers together for a fee. When a construction mortgage has been arranged and agreed to, it would appear that the client has earned its fee. However, because of the terms of the fee arrangement, there is some doubt as to when the income should be recognized.

The following is a summary of the types of transactions involved:

1. **Negotiable Note**

The company receives a negotiable note in payment of its fees. Generally the note is unsecured and non-interest-bearing and is payable over the same period as the construction draws on the related mortgage are to be made.

2. **Nonnegotiable Note**

The terms of the nonnegotiable note are comparable to the negotiable note.

3. **Commitment Letter, Not Contingent on Future Events**

The company receives a letter from the borrower indicating that the lender and the borrower have agreed on the terms of the mortgage. In addition, the letter states that the borrower agrees to pay the company a fixed fee by a specified date for services rendered in arranging the loan.

## 4. Commitment Letter, Contingent on Future Draws

The company receives commitment letters from the borrower as described in No. 3 above. However, the commitment letters state that a certain amount of the fee will not be paid unless or until certain construction draws are received from the lender.

When should revenue be recognized as earned by the client?

*Reply*—Revenue recognition is discussed in FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraphs 83 and 84.

Applying the guidelines of Concepts No. 5, paragraphs 83 and 84, to the specific situations, revenue would be recognized as follows:

## 1. Negotiable Note

Income would be recognized when the services have been performed and billed which may be prior to receipt of the negotiable note.

## 2. Nonnegotiable Note

The terms of the nonnegotiable note are comparable to the negotiable note, and revenue would be recognized in a similar manner.

## 3. Commitment Letter, Not Contingent on Future Events

Such a letter would be evidence that the services have been rendered and are now “billable”; therefore, the fee has been earned and income should be recognized.

## 4. Commitment Letter, Contingent on Future Draws

From the description, it appears that the agreement between the client, borrower, and lender in this case is such that the parties do not consider all the services rendered until actual borrowings take place even though the client need not physically do anything else. In such a situation, a portion of the fees should be deferred until the stipulated draw provisions have been met.

**.16 Rental Revenue Based on Percentage of Sales**

*Inquiry*—A supermarket built an addition to its store to house a liquor store. The rent to the liquor store is to be a percent of its sales. On its income statement, would it be proper for the supermarket to include the liquor store sales as though they were their own sales? The rent would then appear as a gross margin.

*Reply*—No. In accordance with FASB Statement No. 13, paragraph 1 (AC L10.101), this transaction meets the definition of a lease, which is “. . . the right to use property, plant, or equipment (land or depreciable assets or both) usually for a stated period of time.”

The revenue received from the liquor store represents rental income to the supermarket and it would be inappropriate for the supermarket to include as its sales the sales of the liquor store. However, it would be appropriate for the supermarket to include the rental income as part of its gross revenues. [Amended June 1995.]

**.20 Payment for Termination of License Agreement**

*Inquiry*—A research and development company holds numerous patents. The company derives its income from the sale of products which utilize its pa-

tents as well as from the licensing of the patents, for which it receives royalties, and also from the sale of patent rights, for which it receives a single payment for the term of the license.

A licensee desired to terminate its license, since it was no longer using the technology contained in the company's patent, and paid to the company a lump sum termination payment. This payment approximated the amount the company would have earned during the remaining years of the license agreement. How should the termination payment be reflected in the company's financial statements?

*Reply*—The transaction is similar to sale of a license for the remaining life of a patent and should be accounted for in the same manner. If this is the sole license for a patent, any remaining unamortized cost of such patent should be written off at this time. If the license represents only a portion of the use of the patent, an appropriate portion of the remaining unamortized cost should be written off. The proceeds should be included in this year's current operations, and there should be disclosure that a major source of income from licensing agreements is being terminated.

## **.25 Finished Parts Held by Manufacturer for Customers**

*Inquiry*—Corporation A, a subcontractor, manufactures precision parts to customers' specifications. Parts produced by Corporation A are inspected by a customer's quality control representative and then held in a secured area in Corporation A's plant. Corporation A is entitled to full contract payment on parts inspected and held in the secured area. Historically, there has been a short time span between completion date and scheduled shipment date, but recently production efficiency has improved to the extent that contracts are completed significantly in advance of scheduled shipment dates. Based on the recent experience of Corporation A, what is the proper date for revenue recognition?

*Reply*—FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 83, states in part:

"Revenues are not recognized until earned. An entity's revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues . . . ."

Revenue should be recognized at the time of inspection and delivery to the secured areas, since the realization criteria have been met. Corporation A should disclose the method followed for income recognition as part of its disclosure of accounting policies.

## **.28 Revenue From Private Label Sales**

*Inquiry*—Corporation A produces certain products that are sold under Corporation B's label. Corporation B reimburses Corporation A for all direct costs of raw material, ingredients, and packaging plus 10¢ per pound processing fee. Corporation A prepares an invoice for each shipment which itemizes the various direct costs plus 10¢ per pound processing fee. Should Corporation A record the total invoice amount as a sale or should it record the processing fee as revenue and the reimbursed direct costs as a reduction of expenses?

*Reply*—Corporation A should probably record the total invoice amount as a sale. Accounting for contracts of this type would be treated similar to cost-plus-fixed-fee contracts discussed in ARB No. 43, Chapter 11A, *Cost-Plus-Fixed-Fee Contracts*. [Amended]

**.31 Accounting for Zero Coupon Bonds**

*Inquiry*—A client purchased a 20-year zero coupon treasury bond for \$189, with a maturity value of \$1,000, at an 8½% yield to maturity.

- (1) What authoritative pronouncement would provide guidance for this transaction?
- (2) How is the interest income computed for financial reporting purposes?

*Reply*—(1) APB Opinion No. 21, *Interest on Receivables and Payables*, would apply. APB Opinion No. 21, paragraph 2, states that, “The principles discussed in this Opinion are applicable to receivables and payables which represent contractual rights to receive money or contractual obligations to pay money on fixed or determinable dates, whether or not there is any stated provision for interest . . . Examples are secured and unsecured notes, debentures, bonds . . .”

(2) APB Opinion No. 21, paragraph 15, states that, “the difference between the present value and the face amount should be amortized to reflect the interest income over the life of the note in such a way as to result in a constant rate of interest when applied to the amount outstanding at the beginning of any given period.” This is the “interest” method described in APB Opinion No. 12, *Omnibus Opinion*, paragraphs 16 and 17. However, other methods of amortization may be used if the results obtained are not materially different from those which would result from the “interest” method.

The following is an example of the application of the interest method. To calculate the semi-annual amount, multiply the purchase price by 4¼% (half of 8½%) to arrive at the adjusted cost basis for the first six-month period. Then repeat this calculation for the next six-month period using the adjusted cost basis. The total amount of income (accrual) in the first year will be \$16.40. Each year the cost basis is increased by the amount of income (accrual) reported in the previous year, as indicated in the following example:

<i>Semi-Annual Period</i>	<i>Your Purchase Price or Adjusted Cost Basis</i>	<i>½ Purchase YTM</i>	<i>Accrual During Period</i>	<i>Adjusted Cost Basis at End of Period</i>
1	\$189.00	4.25%	\$8.03	\$197.03
2	197.03	4.25%	8.37	205.40
3	205.40	4.25%	8.73	214.13
4	214.13	4.25%	9.10	223.23

The interest income would be reported annually for financial reporting purposes. If the bond is held to maturity, there will be no gain or loss. If sold prior to maturity any gain or loss is determined by the difference between the adjusted cost basis and the selling price.

**.33 Operating Lease With Rental Payments Rebated Against Purchase Price**

*Inquiry*—A lessor corporation leases construction equipment for periods of six to eighteen months under short-term cancellable leases. The leases provide

that during the first six months, 100 percent of the rentals paid may be applied toward the purchase price of the equipment if the lessee decides to purchase the equipment; during the next three months the percentage drops to 80 percent, and after nine months 60 percent may be applied toward the purchase price. The leases do not qualify as capital leases. How should the lessor account for the leases and the respective rebates?

*Reply*—The authoritative literature does not address this matter. The lessor should record rental income until the lessee decides to purchase the equipment. The lessor should then record the sale of the equipment net of the applicable rebate. The amount recorded as rental income should not be reclassified as sales proceeds.

### **.35 Involuntary Conversion—Recognition of Gain**

*Inquiry*—A tornado virtually destroys a company's building on June 12, 19X0. The company has insurance and expects to be reimbursed for costs incurred to refurbish the building. The company's fiscal year-end is June 30, 19X0. On August 15, 19X0, prior to the issuance of the financial statements, the company receives a check in excess of the carrying amount of the building. Should the company recognize the gain on the involuntary conversion in the June 30, 19X0 financial statements?

*Reply*—No. Since the company was reimbursed for an amount in excess of the carrying amount of the building there was no loss to record on June 30, 19X0. The gain, which was received on August 15, 19X0, was a gain contingency on June 30, 19X0. Per FASB Statement No. 5, *Accounting for Contingencies*, paragraph 17, contingencies that might result in gains usually are not reflected in the accounts since to do so might be to recognize revenue prior to its realization.

### **.36 Sales of Investment to Minority Stockholder**

*Inquiry*—A corporation enters into an agreement to sell an investment accounted for on the equity method to a minority stockholder in return for his shares in the corporation. The fair value of the investment exceeds its book value. Would the corporation recognize a gain on this transaction or would the excess be credited to equity?

*Reply*—APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, paragraph 18, states that a transfer of a nonmonetary asset to a stockholder or to another entity in a nonreciprocal transfer should be recorded at the fair value of the asset transferred, and that a gain or loss should be recognized on the disposition of the asset. APB Opinion No. 29, paragraph 18 also indicates that the fair value of an entity's own stock reacquired may be a more clearly evident measure of the fair value of the asset distributed in a nonreciprocal transfer if the transaction involves acquiring stock for the treasury or retirement.

The corporation should recognize as a gain, in the year in which the transaction occurs, the excess of the fair value of the investment transferred over its carrying amount.

### **.37 Sales Price Based on Future Revenue**

*Inquiry*—A company sold one of its direct-mail catalog offices for cash plus a percentage of revenue to be earned over the next five years. The sales agreement limits the percentage of revenue to a stipulated maximum. Management believes the maximum will be earned within the five-year period. When should revenue from this transaction be recorded?

*Reply*—According to FASB Statement No. 5, *Accounting for Contingencies*, paragraph 17, revenues from “Contingencies that might result in gains usually are not (recognized) prior to (their) realization.”

Unless it is assured that adequate revenue will be earned to cause payment of the contingent portion of the sales price, the contingent portion of the sales price should only be accrued as earned. The accuracy and reasonableness of management’s projections must be ascertained. If realization is assured, which would be relatively infrequent, revenue should be recorded as of the date of the sale using the present value of the projected cash receipts in accordance with APB Opinion No. 21, *Interest on Receivables and Payables*.

### **.38 Subsequent Event Related to Vendor-Specific Objective Evidence for Software Revenue Recognition**

*Inquiry*—Vendor-specific objective evidence (VSOE) of fair value may be established by management after the balance sheet date but before the issuance of the financial statements, either by separate sales or by establishment of a price by a pricing committee. May an entity use such evidence to recognize revenue at the balance sheet date in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—No. Establishment of VSOE after the balance sheet date is a Type II subsequent event, as discussed in SAS No. 1, section 560, *Subsequent Events* (AU 560). As a result, revenue should be deferred at the balance sheet date in accordance with paragraph 12 of SOP 97-2 (ACC 10,700.12), as amended by SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions* (ACC 10,770). However, if subsequent to the balance sheet date, management merely compiles evidence that existed at the balance sheet date, that evidence should be used to assess whether there is sufficient VSOE (in accordance with paragraph 10 of SOP 97-2 [ACC 10,700.10]) to recognize revenue at the balance sheet date.

### **.39 Software Revenue Recognition for Multiple-Element Arrangements**

*Inquiry*—Software vendors may execute more than one contract or agreement with a single customer. Should separate contracts or agreements be viewed as one multiple-element arrangement when determining the appropriate amount of revenue to be recognized in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—A group of contracts or agreements may be so closely related that they are, in effect, parts of a single arrangement. The form of an arrangement is not necessarily the only indicator of the substance of an arrangement. The existence of any of the following factors (which are not all-inclusive) may indicate that a group of contracts should be accounted for as a single arrangement:

- The contracts or agreements are negotiated or executed within a short time frame of each other.
- The different elements are closely interrelated or interdependent in terms of design, technology, or function.
- The fee for one or more contracts or agreements is subject to refund or forfeiture or other concession if another contract is not completed satisfactorily.

- One or more elements in one contract or agreement are essential to the functionality of an element in another contract.
- Payment terms under one contract or agreement coincide with performance criteria of another contract or agreement.
- The negotiations are conducted jointly with two or more parties (for example, from different divisions of the same company) to do what in essence is a single project.

#### **.40 Software Revenue Recognition Related to Year 2000 Compliant Software**

*Inquiry*—Is a commitment to deliver in the future a Year 2000 compliant version of a software product to an existing customer or to a customer that is acquiring a non-Year 2000 compliant version considered an upgrade right or specified upgrade in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—Yes. The criteria of SOP 97-2 (ACC 10,700) related to specified upgrades apply whether or not the commitment is contained under a warranty provision. Given the ramifications of non-Year 2000 compliant software, special attention should be given to paragraphs 13 and 14 of SOP 97-2 (ACC 10,700.13–14). Further, the Securities and Exchange Commission released an Interpretation in August 1998 titled, *Statement of the Commission Regarding Disclosure of Year 2000 Issues and Consequences by Public Companies, Investment Advisors, Investment Companies, and Municipal Securities Issuers*. Part of that Interpretation states, “Year 2000 issues may affect the timing of revenue recognition in accordance with (SOP 97-2 [ACC 10,700]). For example, if a vendor licenses a product that is not Year 2000 compliant and commits to deliver a Year 2000 compliant version in the future, the revenue from the transaction should be allocated to the various elements—the software and the upgrade. Entities should also consider FASB Statement No. 48, *Revenue Recognition When the Right of Return Exists* (AC R75), relating to any product return issues such as for products containing hardware and software, including whether the necessary conditions have been met to recognize revenue in the period of sale, whether that revenue should be deferred, or whether an allowance for sales return should be provided.” In such situations, a vendor generally would be required to defer all revenue until it delivers the upgraded (compliant) version.

#### **.41 Effect of Prepayments on Software Revenue Recognition**

*Inquiry*—Paragraph 29 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.29), states that if a fee on a software arrangement with extended payment terms is not fixed or determinable at the outset of an arrangement revenue should be recognized as payments become due. Should a vendor recognize revenue for amounts (related to an arrangement with extended payment terms) received directly from customers (without the software vendor’s participation in its customers’ financing arrangements) in advance of scheduled payments?

*Reply*—Yes, provided all other requirements of revenue recognition in SOP 97-2 (ACC 10,700) are met.

**.42 Extended Payment Terms and Software Revenue Recognition**

*Inquiry*—A software vendor with a fiscal year ending September 30 enters into a licensing arrangement and simultaneously delivers its product to a customer on September 29. Payment terms are as follows: \$600,000 due thirty days from September 29; \$400,000 due thirteen months from September 29. The licensing fee is not fixed or determinable because a significant portion of the fee is due more than one year after delivery of the software and the vendor cannot overcome the presumption in paragraph 28 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28). How much revenue should the vendor recognize during the current fiscal year ending September 30?

*Reply*—None. Paragraph 29 of SOP 97-2 (ACC 10,700.29) requires that the vendor recognize revenue as payments from customers become due (assuming all other conditions for revenue recognition in the SOP are met). In this situation, \$600,000 should be recognized as revenue on October 29 when the payment becomes due and the remaining \$400,000 should be recognized twelve months later on October 29 of the following fiscal year.

**.43 Corrections of Errors in Computer Software (Bug Fixes)**

*Inquiry*—A software vendor licenses software products to customers. Customers may elect to obtain postcontract customer support (PCS) from the software vendor as an element of the software arrangement, or customers may choose not to obtain PCS. In order to satisfy its warranty obligations, the software vendor provides bug fixes (free of charge) that are necessary to maintain compliance with published specifications to those customers that do not obtain PCS from the software vendor.

Paragraph 31 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.31), states, "...obligations related to warranties for defective software, including warranties that are routine, short-term, and relatively minor, should be accounted for in conformity with FASB Statement No. 5." However, the SOP's glossary (ACC 10,700.149) indicates that PCS may include services such as the correction of errors (for example, bug fixing). If a software vendor provides bug fixes (under warranty obligations) free of charge that are necessary to maintain compliance with published specifications, should the software vendor account for the estimated costs to correct the bugs in accordance with FASB Statement No. 5, *Accounting for Contingencies* (AC C59), or should the vendor consider the practice of providing bug fixes free of charge part of PCS (which may result in the deferral of revenue)?

*Reply*—In this situation, the software vendor should account for the estimated costs to provide bug fixes (that are necessary to maintain compliance with published specifications) in accordance with FASB Statement No. 5 (AC C59).

**.44 Postcontract Customer Support During the Deployment Phase of Computer Software**

*Inquiry*—A software vendor enters into an arrangement with a customer to deliver its software product and to provide postcontract customer support (PCS). The product will be deployed in stages. The stipulated term of the PCS period begins six months after delivery of the product, though the vendor has

a history of regularly making available to all customers the services or unspecified upgrades/enhancements normally associated with PCS as soon as its products are delivered. (That is, the customer receives any upgrades/enhancements released by the vendor during the six-month period after product delivery.) The PCS rate inherent in the licensing fee increases over time based on the customer's deployment of the product. After three years, the predetermined renewal rate for PCS for a fully deployed license is set at a stipulated rate multiplied by the aggregate list price (as established at the inception of the arrangement) of the licensed product, regardless of the status of the deployment efforts. The vendor does not have vendor-specific objective evidence (VSOE) of fair value of the PCS when the product is less than fully deployed because the only PCS sold separately is the renewal of PCS (that is, the predetermined renewal rate). Is PCS considered to commence at the date of product delivery or six months after delivery? Should the vendor consider the PCS predetermined renewal rate to be VSOE of fair value for PCS?

*Reply*—In this situation, the PCS arrangement commences upon product delivery because the customer receives any upgrades/enhancements released by the vendor during the six-month period after product delivery. In addition, the predetermined renewal rate is the only indicator of fair value because it is the only arrangement under which PCS is sold separately, and therefore, it should be used to establish VSOE of fair value of the PCS. In this situation, the vendor should initially defer the portion of the arrangement fee related to the three and one-half years of PCS provided under the arrangement based on the predetermined renewal rate.

#### **.45 Effect of Change in License Mix on Software Revenue Recognition**

*Inquiry*—Software arrangements may allow a user to change or alternate its use of multiple products/licenses (license mix) included in a license arrangement after those products have been delivered by the software vendor. The user has the right under the arrangement to deploy and utilize at least one copy of each licensed product (that is, the user has a license to use each delivered product). The products may or may not be similar in functionality. These arrangements may limit the customer's use at any time to any mix or combination of the products as long as the cumulative value of all products in use does not exceed the total license fee. Certain of these arrangements may not limit usage of a product or products, but rather, they may limit the number of users that simultaneously can use the products (referred to as concurrent user pricing). When should the software vendor recognize revenue for these kinds of arrangements?

*Reply*—If the other criteria in SOP 97-2, *Software Revenue Recognition* (ACC 10,700), for revenue recognition are met, revenue should be recognized upon delivery of the first copy or product master for all of the products within the license mix. Subsequent remixing is not an exchange or a return of software because the master or first copy of all products has been licensed and delivered, and the customer has the right to use them.

#### **.46 Nonmonetary Exchanges of Software (Part I)**

*Inquiry*—Is an exchange by a software vendor of a license of its software to a customer in exchange for a license to the customer's technology that permits the software vendor to sublicense the customer's technology to other customers as a component of the software vendor's products or as a stand-alone additional product the culmination of the earnings process? That is, should that exchange be recorded at fair value or at carryover basis?

*Reply*—Paragraph 21a of APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, states that an exchange of a product or property held for sale in the ordinary course of business for a product or property to be sold in the same line of business to facilitate sales to customers other than the parties to the exchange does not culminate an earning process. Therefore, if the technology/products received by the software vendor in the exchange were to be sold, licensed, or leased in the same line of business as the software vendor's technology/products delivered in the exchange, the software vendor should record the exchange at carryover basis. However, if the technology/products received by the software vendor in the exchange were to be sold, licensed, or leased in a different line of business from the software vendor's technology/products delivered in the exchange, the exchange is the culmination of the earnings process and the exchange should be recorded at fair value provided that:

1. the fair value of the technology/products exchanged or received can be determined within reasonable limits (that is, vendor-specific objective evidence of fair value of the software given up, or the value of the technology/products received, as if the software vendor had received or paid cash), and
2. the technology/products received in the exchange are expected, at the time of the exchange, to be deployed and utilized by the software vendor and the value ascribed to the transaction reasonably reflects such expected use.

If neither the fair value of the technology/products exchanged nor the fair value of the technology/products received can be reasonably determined, the exchange should be recorded at carryover basis. Paragraph 26 of APB Opinion No. 29 states that "if neither the fair value of a nonmonetary asset transferred nor the fair value of a nonmonetary asset received in exchange is determinable within reasonable limits, the recorded amount of the nonmonetary asset transferred from the enterprise may be the only available measure of the transaction."

#### **.47 Nonmonetary Exchanges of Software (Part II)**

*Inquiry*—Is an exchange by a software vendor of a license of its software to a customer in exchange for a license to the customer's technology that the software vendor intends to utilize for internal use the culmination of the earnings process? That is, should that exchange be recorded at fair value or at carryover basis?

*Reply*—Providing that the fair value of either of the nonmonetary assets involved in the transaction can be determined within reasonable limits, the software vendor should record the exchange at fair value because the exchange is subject to the guidance in paragraph 18 of APB Opinion No. 29, *Accounting for Nonmonetary Transactions*. Further, EITF Issue No. 86-29, *Nonmonetary Transactions: Magnitude of Boot and the Exception to the Use of Fair Value*, which provides guidance on interpreting APB Opinion No. 29, states that a product or property held for sale and exchanged for a productive asset does not fall within the modifications to the basic principle of paragraph 18 of APB 29 (even if they were in same line of business) and should be recorded at fair value.

Thus, that exchange is the culmination of the earnings process and that exchange should be recorded at fair value provided that:

1. the fair value of the technology/products exchanged or received can be determined within reasonable limits (that is, vendor-specific

objective evidence of fair value of the software given up, or the value of the technology/products received, as if the software vendor had received or paid cash), and

2. the technology/products received in the exchange are expected, at the time of the exchange, to be deployed and utilized by the software vendor and the value ascribed to the transaction reasonably reflects such expected use.

If neither the fair value of the technology/products exchanged nor the fair value of the technology/products received can be reasonably determined, the exchange should be recorded at carryover basis. Paragraph 26 of APB Opinion No. 29 states that "if neither the fair value of a nonmonetary asset transferred nor the fair value of a nonmonetary asset received in exchange is determinable within reasonable limits, the recorded amount of the nonmonetary asset transferred from the enterprise may be the only available measure of the transaction."

The following matrix summarizes the answers in TIS section 5100.46 and .47:

<i>Software Vendor's Technology Exchanged</i>	<i>Software Vendor's Use of Technology Received</i>	<i>Same Line of Business</i>	<i>Accounting Treatment</i>
Software product held for sale in the ordinary course of business (i.e., inventory) <sup>1</sup>	Technology to be held for sale in the ordinary course of business (i.e., inventory) <sup>2</sup>	1. Yes  2. No	1. Record at historical cost  2. Record at fair value <sup>3</sup>
Software product held for sale in the ordinary course of business (i.e., inventory)	Internal-use software <sup>4</sup>	N/A	Record at fair value <sup>3</sup>

The following example illustrates the answers in TIS section 5100.46 and .47:

Software vendor XYZ licenses software product A (a suite of financial accounting applications) to customers in the normal course of business. Software vendor XYZ has vendor-specific objective evidence of fair value of product A resulting from prior cash transactions with its customers. Product A includes technology (Product B) sublicensed by software vendor XYZ from Company PQR.

<sup>1</sup> Licenses to software products, source code, and object code that the software vendor sells, licenses, or leases in the ordinary course of business would constitute inventory.

<sup>2</sup> A software vendor that receives any of the following would be receiving inventory:

- a. a product to resell, sublicense, or sublease,
- b. a right to embed the technology received into a product, or
- c. a right to further develop the technology received into a product.

<sup>3</sup> Assumes that vendor-specific objective evidence of fair value exists and the transaction has a business purpose.

<sup>4</sup> A software vendor that receives any of the following would be receiving something other than inventory.

- a. a product or technology that only can be used internally (e.g., a financial or management application)
- b. a product or technology that only can be used internally to make a product but which does not become part of the product.

Software vendor XYZ agrees to exchange product A with Company PQR for licenses to product B. Software vendor XYZ intends to relicense product B (as a stand-alone product or embedded in product A) to its customers. Company PQR intends to use product A for internal use.

**Accounting by software vendor XYZ.** The exchange of product A for product B by software vendor XYZ would not result in the culmination of the earnings process for software vendor XYZ because software vendor XYZ exchanged property held for sale (product A) for property to be sold in the same line of business (product B) to facilitate future sales to other customers. The exchange should be recorded at carryover basis (that is, no revenue should be recognized until product B was sublicensed to other customers in a subsequent transaction).

**Accounting by Company PQR.** The exchange of product B for product A by Company PQR would result in the culmination of the earnings process for Company PQR because Company PQR exchanged property held for sale (product B) for a productive asset (product A, which will be used by Company PQR as an amortizable asset). The exchange should be recorded by Company PQR at fair value (that is, revenue should be recognized on the exchange). Such accounting treatment is based on the fact that the fair value of the technology exchanged or received can be reasonably determined and that a business purpose exists for the transaction.

#### .48 Application of Contract Accounting in Software Arrangements (Part I)

*Inquiry*—In paragraph 7 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.07), what is the meaning of the phrase “using the relevant guidance herein?”

*Reply*—The phrase “using the relevant guidance herein” refers to paragraphs 74-91 of SOP 97-2 (ACC 10,700.74–.91), which provide guidance on applying contract accounting to certain arrangements involving software.

#### .49 Application of Contract Accounting in Software Arrangements (Part II)

*Inquiry*—Footnote 4 to paragraph 7 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.07), states: “If a software arrangement includes services that meet the criteria discussed in paragraph 65 of this SOP, those services should be accounted for separately.” The type of services addressed by paragraph 65 (ACC 10,700.65) are described in paragraph 63 (ACC 10,700.63) and specifically exclude post contract customer support (PCS)-related services. For a software arrangement that is subject to contract accounting and that includes PCS-related services (other than those meeting the cost accrual criteria in paragraph 59 of SOP 97-2 (ACC 10,700.59)), how should the software vendor account for such PCS-related services?

*Reply*—If the software vendor has vendor-specific objective evidence of the fair value of such PCS-related services that has been determined pursuant to paragraph 57 of SOP 97-2 (ACC 10,700.57), those PCS-related services should be accounted for separately from the balance of the arrangement that is being accounted for in conformity with Accounting Research Bulletin (ARB) No. 45, *Long-Term Construction-Type Contracts* and the relevant guidance in paragraphs 74–91 of SOP 97-2 (ACC 10,700.74–.91), and in SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts* (ACC 10,330).

## **.50 Definition of More-Than-Insignificant Discount and Software Revenue Recognition**

*Inquiry*—As discussed in paragraph 3 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.03), in connection with the licensing of an existing product, a vendor might offer a small or insignificant discount on additional licenses of the licensed product or other products that exist at the time of the offer but are not part of the arrangement. Paragraph 3 indicates that those discounts are not within the scope of SOP 97-2 (ACC 10,700). However, footnote 3 to paragraph 3 (ACC 10,700.03) states that “[i]f the discount or other concessions in an arrangement are more than insignificant, a presumption is created that an additional element(s) (as defined in paragraph 9) is being offered in the arrangement.” What is a “more-than-insignificant” discount, as discussed in footnote 3 to paragraph 3 of SOP 97-2 (ACC 10,700.03)?

*Reply*—For purposes of SOP 97-2 (ACC 10,700), a more-than-insignificant discount with respect to future purchases that is provided in a software arrangement is a discount that is: (1) incremental to the range of discounts reflected in the pricing of the other elements of the arrangement, (2) incremental to the range of discounts typically given in comparable transactions, and (3) significant. Insignificant discounts and discounts that are not incremental to discounts typically given in comparable transactions (for example, volume purchase discounts comparable to those generally provided in comparable transactions) are not unique to software transactions and are not included in the scope of SOP 97-2 (ACC 10,700). Judgment is required when assessing whether an incremental discount is significant.

The provisions of footnote 3 to paragraph 3 of SOP 97-2 (ACC 10,700.03), should not be applied to an option within a software arrangement that allows the customer to purchase additional copies of products licensed by and delivered to the customer under the same arrangement. In that case, revenue should be recognized as the rights to additional copies are purchased, based on the price per copy as stated in the arrangement. Additional copies of delivered software are not considered an undelivered element. Paragraph 21 of SOP 97-2 (ACC 10,700.21), says that duplication of software is considered incidental to an arrangement, and the delivery criterion is met upon the delivery of the first copy or product master.

## **.51 Accounting for Significant Incremental Discounts in Software Revenue Recognition**

*Inquiry*—How should a software vendor account for significant incremental discounts that are within the scope of SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—If a software arrangement includes a right to a significant incremental discount on a customer's future purchase of a product(s) or service(s), a proportionate amount of that significant incremental discount should be applied to each element covered by the arrangement based on each element's fair value (VSOE) without regard to the significant incremental discount. (See Examples 1 through 6 below.)

If (a) the future product(s) or service(s) to which the discount is to be applied is not specified in the arrangement (for example, a customer is allowed a discount on any future purchases), or (b) the fair value of the future purchases

cannot be determined under paragraph 10 of SOP 97-2 (ACC 10,700.10), but the maximum amount of the incremental discount on the future purchases is quantifiable, that quantifiable amount should be allocated to the elements of the arrangement and the future purchases assuming that the customer will purchase the minimum amount necessary to utilize the maximum discount. (See Examples 2 and 3 below.)

If the maximum amount of the significant incremental discount on future purchases is not quantifiable (for example, the future purchases that can be purchased under the significant incremental discount arrangement are not limited by quantity of product(s) or service(s)), revenue otherwise allocated to each element covered by the arrangement without regard to the significant incremental discount should be reduced by the rate of the significant incremental discount. (See Example 5 below.)

The portion of the fee that is deferred as a result of the significant incremental discount should be recognized as revenue proportionately as the future purchases are delivered, assuming all other revenue recognition criteria are met, such that a consistent discount rate is applied to all purchases under the arrangement. If the future purchases are not limited by quantity of product(s) or service(s), the portion of the fee that is deferred as a result of the presence of a significant incremental discount should be recognized as revenue as a subscription in accordance with paragraphs 48 and 49 of SOP 97-2 (ACC 10,700.48–49).

**Examples** (For purposes of the examples, VSOE of fair value equals list price)

**Example 1:** A software vendor sells Product A for \$40 along with a right to a discount (the “coupon”) of \$30 on another of its software products, Product B. VSOE of fair value for Product A is \$40 and VSOE of fair value for Product B is \$60. The \$30 discount on Product B is a significant incremental discount that would not normally be given in comparable transactions.

The vendor should allocate the \$30 discount across Product A and Product B. The overall discount is 30% (\$30/\$100). Therefore, upon the delivery of Product A, the vendor would recognize \$28 of revenue and defer \$12. If the customer uses the discount and purchases Product B, the vendor would recognize \$42 in revenue upon delivery of Product B (\$30 in cash received plus the \$12 previously deferred). If the discount expires unused, the \$12 in deferred revenue would be recognized at that time.

**Example 2:** A software vendor sells Product A for \$40 along with a right to a discount (the “coupon”) of \$20 on any one of its other software products, Products B through Z. VSOE of fair value for Product A is \$40 and VSOE of fair value for Products B through Z ranges from \$30 to \$100. The \$20 discount is a significant incremental discount that would not normally be given in comparable transactions.

The vendor should allocate the \$20 discount across Product A and the assumed purchase of whichever of Product B through Z has the lowest fair value (\$30). The overall discount is 28.57% (\$20/\$70). Therefore, upon delivery of Product A, the vendor would recognize \$28.57 in revenue, and defer \$11.43. If the customer uses the discount and purchases the additional Product with a fair value of \$30, the vendor would recognize \$21.43 in revenue upon its delivery (the \$11.43 previously deferred and the additional cash license fee due of \$10). If the discount expires unused, the \$11.43 in deferred revenue would be recognized at that time.

**Example 3:** A software vendor sells Product A for \$40 along with a right to a discount (the “coupon”) of 50% off list price on any future purchases of its other software products, Products B through Z, with a maximum cumulative discount of \$100. VSOE of fair value for Product A is \$40 and VSOE of fair value for Products B through Z ranges from \$20 to \$100. The 50% discount is a significant incremental discount that would not normally be given in comparable transactions.

The vendor should assume that the maximum discount will be utilized. Therefore, the vendor would allocate the \$100 discount across Product A and the assumed additional products to be purchased. The overall discount is 41.67% ( $\$100/\$240$ ). Therefore, upon the delivery of Product A, the vendor would recognize \$23.33 of revenue and defer \$16.67. If the customer uses the discount by purchasing additional products with fair value totaling \$200, the vendor would recognize \$116.67 in revenue upon delivery of those products (\$100 in cash received plus the \$16.67 previously deferred). If the discount expires unused, the \$16.67 in deferred revenue would be recognized at that time.

**Example 4:** A software vendor sells Product A for \$60, which represents a 40% discount off its list price (VSOE) of \$100. In the same transaction, it also provides the right to a discount of 60% off of the list price (VSOE) on any future purchases of units of software Product B for the next 6 months with a maximum discount of \$200. The discount of 60% on future purchases of units of Product B is a discount not normally given in comparable transactions.

Because the discount offered on future purchases of Product B is not normally given in comparable transactions and is both significant and incremental in relation to the 40% discount, it must be accounted for as part of the original sale consistent with Example 3 above. The vendor should assume that the maximum discount will be utilized. Therefore, the vendor would allocate the \$240 discount (\$40 on Product A and \$200 maximum on future purchases) across Product A and the assumed additional products to be purchased. The overall discount is 55.38% ( $\$240/\$433.33$ )—( $\$433.33$  is the sum of the \$100 list price of Product A and the \$333.33 accumulated list price of Product B that results in a maximum discount of \$200). Therefore, upon the delivery of Product A, the vendor would recognize \$44.62 of revenue and defer \$15.38. If the customer uses the discount by purchasing additional products with fair value totaling \$333.33, the vendor would recognize \$148.71 in revenue upon delivery of those products (\$133.33 in cash received plus the \$15.38 previously deferred). If the discount expires unused, the \$15.38 in deferred revenue would be recognized at that time.

**Example 5:** A software vendor sells Product A for \$40 along with a right to a discount (the “coupon”) of 50% off list price on any future purchases of its other software products, Products B through Z, with no maximum cumulative discount. VSOE of fair value for Product A is \$40 and VSOE of fair value (which equals list price) of Products B through Z ranges from \$20 to \$100. The 50% discount is a significant incremental discount that would not normally be given in comparable transactions.

The vendor should apply the 50% discount to Product A and all future products purchased using the discount. Therefore, upon the delivery of Product A, the vendor would recognize \$20 of revenue and defer \$20. If the customer purchases additional products using the discount, the vendor would recognize revenue equal to the cash received upon the delivery of those products. The previously deferred \$20 should be accounted for as a subscription in accordance with paragraphs 48 and 49 of SOP 97-2 (ACC 10,700.48–.49), and recognized pro rata over the discount period or, if

no period is specified in the arrangement, over the estimated period during which additional purchases will be made.

**Example 6:** A software vendor sells Product A for \$30 along with the right to a discount for 70% off list price (VSOE) on any future purchases of its other software products, Products B through P, for the next 6 months with no maximum cumulative discount. Product A is also given at a 70% discount and the VSOE of fair value of Product A is \$100.

As the discount offered on future purchases over the next 6 months is equal to the discount offered on the current purchase (70%), there is no accounting necessary in the original sale for the discount offered on future purchases.

## **.52 Fair Value of PCS in a Perpetual License and Software Revenue Recognition**

**Inquiry**—The fee for a perpetual software license includes post-contract customer support (PCS) services for a term of two years. However, only one-year PCS renewal rates are offered to those holding the perpetual license rights. Do rates for the PCS renewal terms provide vendor-specific objective evidence (VSOE) of the fair value of the PCS element included (bundled) in the software arrangement pursuant to the provisions in paragraphs 10 and 57 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.10 and .57)?

**Reply**—Yes, if the PCS renewal rate and term are substantive. The dollar amount of the one-year PCS renewal rate multiplied by two (which reflects the PCS term included in the arrangement) constitutes VSOE of the fair value of PCS pursuant to the provisions in paragraphs 10 and 57 of SOP 97-2 (ACC 10,700.10 and .57).

## **.53 Fair Value of PCS in a Short-Term Time-Based License and Software Revenue Recognition**

**Inquiry**—A multiple-element software arrangement subject to the accounting requirements of SOP 97-2, *Software Revenue Recognition* (ACC 10,700), provides a 12-month time-based software license that includes (bundles) 6 months of post-contract customer support (PCS) services for a total fee of \$100,000, and specifies a 6-month renewal fee for PCS services of \$5,000. Are there arrangements that include time-based software licenses and PCS services wherein the duration of the time-based software license is so short that a renewal rate or fee for the PCS services does not represent vendor-specific objective evidence (VSOE) of the fair value of the bundled PCS?

**Reply**—Yes, and the fact pattern in this question is an example of such a situation. For time-based software licenses with a duration of one year or less, the fair value of the bundled PCS services is not reliably measured by reference to a PCS renewal rate. The short time frame during which any unspecified upgrade provided under the PCS agreement can be used by the licensee creates a circumstance whereby one cannot objectively demonstrate the VSOE of fair value of the licensee's right to unspecified upgrades.

Though a PCS service element may not be of significant value when it is provided in a short duration time-based license, SOP 97-2 (ACC 10,700), does not provide for an exception from its provision that VSOE of fair value is required for each element of a multiple-element arrangement. Consequently, when there is no VSOE of the fair value of PCS services included (bundled) in a multiple-element arrangement, even if the arrangement provides a short duration time-based software license, the total arrangement fee would be recognized under paragraph 12 (or paragraph 59, if applicable) of SOP 97-2 (ACC 10,700.12 or .59, if applicable). TIS section 5100.54 addresses circumstances

where a PCS renewal rate in connection with a multi-year time-based license may not constitute VSOE of the fair value of PCS.

#### **.54 Fair Value of PCS in a Multi-Year Time-Based License and Software Revenue Recognition**

*Inquiry*—Arrangements for multi-year time-based software licenses may include: 1) initial (bundled) post-contract customer support (PCS) services for only a portion of the software license's term (for example, a five-year time-based software license that includes initial PCS services for one year) and 2) a renewal rate for PCS for an additional year(s) within the time-based license period. Does that renewal rate constitute vendor-specific objective evidence (VSOE) of the fair value of the PCS under paragraphs 10 and 57 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.10 and .57)?

*Reply*—Yes, if the PCS renewal rate and term are substantive. Circumstances that indicate that the PCS renewal rate or term is **not** substantive include:

- The period of initial (bundled) PCS services is relatively long compared to the term of the software license (for example, four years of initial PCS services in connection with a five-year time-based software license, with a specified PCS renewal rate for the remaining year).
- The aggregate PCS renewal term is less than the initial (bundled) PCS period (for example, a 5-year time-based software license with three year bundled PCS and two annual PCS renewals).
- A PCS renewal rate that is significantly below the vendor's normal pricing practices in combination with a time-based software license that is for a relatively short period (for example, a two-year time-based software license that includes initial [bundled] PCS for one year for a total arrangement fee of \$1,000,000 and that stipulates a PCS renewal rate for the second year of \$25,000 when the vendor's normal pricing practices suggest higher renewal rates).

#### **.55 Fair Value of PCS With a Consistent Renewal Percentage (But Varying Renewal Dollar Amounts) and Software Revenue Recognition**

*Inquiry*—A software vendor charges Customer A \$100,000 for a software license with a post-contract customer support (PCS) renewal rate of 15% of the license fee while charging Customer B \$150,000 for the same software license with a PCS renewal rate of 15% of the license fee. Does the existence of varying dollar amounts of PCS renewal fees for the same software product (resulting from using a renewal rate that is a consistent percentage of the stipulated software license fee for the same software product) indicate an absence of vendor-specific objective evidence (VSOE) of the fair value of PCS or the possible presence of discounts on PCS that should be accounted for under paragraph 11 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.11)?

*Reply*—No. Assuming that the PCS renewal rate expressed as a consistent percentage of the stipulated license fee for customers is substantive, that PCS renewal rate would be the VSOE of the fair value of PCS.

#### **.56 Concessions and Software Revenue Recognition**

*Inquiry*—Paragraph 27 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.27), states that "Because a product's continuing value may be reduced due to the subsequent introduction of enhanced products by the vendor or its competitors, the possibility that the vendor still may provide a refund or concession to a credit-worthy customer to liquidate outstanding amounts due under the original

terms of the arrangement increases as payment terms become longer.” What kinds of changes to an arrangement would be considered concessions?

*Reply*—Concessions by a software vendor may take many forms and include, but are not limited to, any one of the following kinds of changes to the terms of an arrangement:

- Changes that would have affected the original amount of revenue recognized;
- Changes that reduce the arrangement fee or extend the terms of payment;
- Changes that increase the deliverables or extend the customer’s rights beyond those in the original transaction.

Examples of concessions by a software vendor that reduce an arrangement fee or extend the terms of payment include, but are not limited to, the following:

- Extending payment due dates in the arrangement (except when the extension is due to credit problems of the customer).
- Decreasing total payments due under the arrangement (except when the decrease is due to credit problems of the customer).
- Paying financing fees on a customer’s financing arrangement that was not contemplated in the original arrangement.
- Accepting returns that were not required to be accepted under the terms of the original arrangement.

Examples of concessions by a software vendor that increase the deliverables include, but are not limited to, the following:

- Providing discounted or free post-contract customer support that was not included in the original arrangement.
- Providing various types of other discounted or free services (beyond those provided as part of the vendor’s normal product offerings or warranty provisions), upgrades, or products that were not included in the original arrangement.
- Allowing the customer to have access to products not licensed under the original arrangement without an appropriate increase in the arrangement fee.
- For term licenses, extending the time frame for a reseller to sell the software or an end user to use the software.
- For limited licenses, extending the geographic area in which a reseller is allowed to sell the software, or the number of locations in which an end user can use the software.

Although the nature of a concession may vary by type of arrangement, many of the above concessions could be granted for any type of license arrangement regardless of its form (that is, term arrangement, perpetual arrangement, site license arrangement, enterprise license arrangement, etc.).

Examples of changes to the terms of an arrangement that are not concessions include, but are not limited to, the following:

- Changes that increase the deliverables with a corresponding appropriate increase in the arrangement fee.
- Changes that eliminate the software vendor’s delivery obligation without a refund of cash.

## .57 Overcoming Presumption of Concessions in Extended Payment Term Arrangements and Software Revenue Recognition

*Inquiry*—Paragraph 28 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28), indicates that, if a significant portion of the software licensing fee is not due until after expiration of the license or more than twelve months after delivery, the licensing fee should be presumed not to be fixed or determinable. That presumption may be overcome by evidence that the vendor has a standard business practice of using long-term or installment contracts and a history of successfully collecting under the original payment terms without making concessions. What types of evidence are useful in determining whether the vendor has a history of successfully collecting under the original payment terms without making concessions?

*Reply*—To have a “a history of successfully collecting under the original payment terms without making concessions,” a vendor would have to have collected all payments as due under comparable arrangements without providing concessions. For example, one year of payments under three-year payment arrangements would not provide sufficient history because all of the payments under the contracts would not yet have been paid as due.

In addition to a history of collecting payments as due without making concessions, paragraph 14 of SOP 97-2 (ACC 10,700.14) requires that the software vendor must intend not to provide refunds or concessions that are beyond the provisions of the arrangement.

In evaluating a vendor's history, the historical arrangements should be comparable to the current arrangement relative to terms and circumstances to conclude that the history is relevant. Examples of factors that should be assessed in this evaluation include, but are not limited to, the following:

### Similarity of Customers

- ***Type or Class of Customer:*** New arrangements with substantially the same types and class of customer is an indicator that the history is relevant. Significant differences call into question the relevance of the history.

### Similarity of Products Included

- ***Types of Products:*** Similarity in the types of products included under the new license arrangement (for example, financial systems, production planning, and human resources).
- ***Stage of Product Life Cycle:*** Product maturity and overall stage within its product life cycle should be considered when assessing the relevance of history. The inclusion of new products in a license arrangement should not automatically preclude the vendor from concluding that the software products are comparable. For example, if substantially all of the products under one license arrangement are mature products, the inclusion of a small number of newly developed products in a subsequent arrangement may not change the overall risk of concession and economic substance of the subsequent transaction.
- ***Elements Included in the Arrangement:*** There are no significant differences in the nature of the elements included in the arrangements.

The inclusion of significant rights to services or discounts on future products in some arrangements, but not others, could indicate that there is a significant difference between the arrangements. For example, a history developed for arrangements that included bundled post-contract customer support (PCS) and rights to additional software products would not be comparable to an arrangement that does not include these rights.

## Similarity of License Economics

- ***Length of Payment Terms:*** In order for the history to be considered relevant, the overall payment terms should be similar. Although a nominal increase in the length of payment terms may be acceptable, a significant increase in the length of the payment terms may indicate that the terms are not comparable.
- ***Economics of License Arrangement:*** The overall economics and term of the license arrangement should be reviewed to ensure that the vendor can conclude that the history developed under a previous arrangement is relevant, particularly if the primary products licensed are near the end of their lives and the customer would not be entitled to the updated version under a PCS arrangement.

### .58 Effect of Prepayments on Software Revenue Recognition (Part II)

*Inquiry*—Paragraph 28 of SOP 97-2 (ACC 10,700.28) says that any extended payment terms in a software licensing arrangement may indicate that the fee is not fixed or determinable. In addition, the licensing fee is presumed not to be fixed or determinable if payment of a significant portion of the fee is not due until after expiration of the license or more than twelve months after delivery. Is the presumption overcome if the software vendor transfers the rights to receive amounts due on an extended payment term arrangement to an independent third party without recourse to the vendor?

*Reply*—No. The presumption that the licensing fee is not fixed or determinable is NOT overcome if at the outset of the arrangement, or subsequently, the vendor receives cash on the transfer of the extended payment term arrangement. That answer does not change if the extended payment term arrangement is irrevocably transferred or otherwise converted to cash without recourse to the vendor. The difference in this situation as compared to TIS section 5100.41 (which addresses prepayments received directly from customers) is that the transfer of the extended payment term arrangement does not change the nature or structure of the transaction between the vendor and customer. Therefore, the presumption in paragraph 28 of SOP 97-2 (ACC 10,700.28) has not been overcome.

### .59 Subsequent Cash Receipt in an Extended Payment Term Arrangement for Software Revenue Recognition

*Inquiry*—Paragraph 28 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28), says that the presumption that an extended payment term license fee due more than twelve months after delivery of the software is not fixed or determinable *may* be overcome by evidence that the software vendor has a standard business practice of using long-term or installment contracts and has

a history of successfully collecting under the original payment terms without making concessions. A calendar year end software vendor enters into a two-year installment payment licensing arrangement with a customer on December 1 and the first payment is due in May of the following year. Subsequent to its December 31 year end but before it issues the financial statements, the software vendor receives from the customer payment of the full amount due. As of December 1, the software vendor has met all other conditions of revenue recognition except that it does not have a standard business practice of using long-term or installment contracts. Does the subsequent cash receipt provide sufficient evidence to render the licensing fee as fixed or determinable, and thus allow the software vendor to recognize revenue in the December 31 financial statements?

*Reply*—No. Paragraph 29 of SOP 97-2 (ACC 10,700.29) requires that the software vendor make the determination of whether the fee is fixed or determinable at the outset of the arrangement, which in this situation is December 1. The only circumstances sufficient to overcome the presumption that the license fee is not fixed or determinable are that the software vendor has (1) a standard business practice of using long-term or installment contracts and (2) has a history of successfully collecting under the original payment terms without making concessions. Since the software vendor has met all other conditions of revenue recognition, it should recognize revenue in the period it receives payment in full directly from the customer (see TIS section 5100.41, *Effect of Prepayments on Software Revenue Recognition*).

#### **.60 Customer Financing With No Software Vendor Participation and Software Revenue Recognition**

(For illustrative purposes, the following inquiry and reply assumes that the software arrangement is a single product/single element arrangement; however, the inquiry and reply also applies to multiple element arrangements.)

*Inquiry*—TIS section 5100.41 addresses a situation in which a customer obtains financing, without the software vendor's participation, and prepays amounts due the software vendor under previously negotiated extended payment terms. That TPA indicates that a software vendor should recognize revenue in advance of scheduled payments if amounts related to extended payment terms are received directly from customers without the software vendor's participation in its customers' financing arrangements, providing all other requirements of revenue recognition in SOP 97-2, *Software Revenue Recognition* (ACC 10,700), are met. TIS section 5100.58 indicates a software vendor should not recognize revenue in advance of scheduled payments if amounts related to extended payment terms are received as a result of the software vendor's transfer of a customer's extended payment term obligation to a third party, without recourse to the software vendor. Given the two aforementioned TPAs, how should a software vendor recognize revenue if it enters into an arrangement with an end user customer that contains customary (that is, non-extended) payment terms and the end user customer obtains, without the software vendor's participation, financing from a party unrelated to the software vendor?

*Reply*—Because the software arrangement's payment terms are not extended, as contemplated in paragraph 28 of SOP 97-2 (ACC 10,700.28), and the software vendor does not participate in the end user customer's financing, the software vendor should recognize revenue upon delivery of the software product, provided all other requirements of revenue recognition in SOP 97-2 (ACC 10,700), are met.

**.61 Effect of Prepayments on Software Revenue Recognition When Vendor Participates in Customer Financing**

(For illustrative purposes, the following inquiry and reply assumes that the software arrangement is a single product/single element arrangement; however, the inquiry and reply also applies to multiple element arrangements.)

*Inquiry*—TIS section 5100.41 addresses a situation in which amounts related to extended payment terms are received directly from customers without the software vendor's participation in its customers' financing arrangements. The specific reference to *without participation* suggests that the answer might be different if the software vendor *participates* in the customer's financing. How should a software vendor recognize revenue under SOP 97-2, *Software Revenue Recognition* (ACC 10,700), if it enters into an arrangement with an end user customer that contains extended payment terms and the software vendor receives payments in advance of the scheduled due dates after the software vendor participated in the customer's financing with a party unrelated to the software vendor?

*Reply*—If the software vendor's participation in the customer's financing results in incremental risk that the software vendor will provide a refund or concession to either the end user customer or the financing party (as discussed in TIS section 5100.62), the presumption is that the fee is not fixed or determinable. If the software vendor cannot overcome that presumption, the software vendor should recognize revenue as payments from the customer become due and payable to the financing party, provided all other requirements of revenue recognition in SOP 97-2 (ACC 10,700) are met. The software vendor should account for any proceeds received from the customer or the financing party prior to revenue recognition as a liability for deferred revenue. TIS section 5100.63 addresses when the presumption may be overcome.

**.62 Indicators of Incremental Risk and Their Effect on the Evaluation of Whether a Fee is Fixed or Determinable and Software Revenue Recognition**

(For illustrative purposes, the following inquiry and reply assumes that the software arrangement is a single product/single element arrangement; however, the inquiry and reply also applies to multiple element arrangements.)

*Inquiry*—Based on the reply to TIS section 5100.61, and as implied in TIS section 5100.41, considering whether a software vendor participated in the customer's financing is important to how revenue is recognized in a software arrangement that contains extended payment terms. A software vendor enters into an arrangement with an end user customer that contains customary (that is, non-extended) payment terms for which the arrangement fee ordinarily would be considered fixed or determinable. Simultaneously with entering into a software arrangement, or prior to the scheduled payment due date(s), the software vendor participates in the end user customer's financing with a party unrelated to the software vendor. In what circumstances would the software vendor's participation in the end user customer's financing (a) preclude a determination by the software vendor that the software arrangement fee is fixed or determinable pursuant to paragraph 28 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28), or (b) lead to a presumption (that can be overcome) that the fee is not fixed or determinable in accordance with paragraph 28 (ACC 10,700.28)?

*Reply*—A software arrangement fee is not fixed or determinable if a software vendor: (a) lacks the intent or ability to enforce the original payment terms of the software arrangement if the financing is not successfully completed, or (b) in past software arrangements, altered the terms of original software arrangements or entered into another arrangement with customers, to provide extended payment terms consistent with the terms of the financing. If a software vendor's participation in an end user customer's financing results in incremental risk that the software vendor will provide a refund or concession to either the end user customer or the financing party, there is a presumption that the arrangement fee is not fixed or determinable.

Any one of the following conditions or software vendor actions results in incremental risk and a presumption that the fee is not fixed or determinable:

1. Provisions that require the software vendor to indemnify the financing party above and beyond the standard indemnification provisions that are explicitly included in the software arrangement between the software vendor and the end user customer.
2. Provisions that require the software vendor to make representations to the financing party related to customer acceptance of the software that are above and beyond the **written** acceptance documentation, if any, that the software vendor has already received from the end user customer.
3. Provisions that obligate the software vendor to take action (such as to terminate the license agreement and/or any related services), which results in more than insignificant direct incremental costs, against the customer on behalf of the financing party in the event that the end user customer defaults under the financing, unless, as part of the original arrangement, the customer explicitly authorizes the software vendor upon request by the financing party to take those specific actions against the customer and does not provide for concessions from the vendor as a result of such action.
4. Provisions that prohibit or limit the ability of the software vendor to enter into another software arrangement with the customer for the same or similar product if the end user customer defaults under the financing, unless, as part of the original arrangement, the customer explicitly authorizes the software vendor upon request by the financing party to take those specific actions against the customer.
5. Provisions that require the software vendor to guarantee, certify, or otherwise attest in any manner to the financing party that the customer meets the financing party's qualification criteria.
6. Software vendor has previously provided concessions to financing parties or to customers to facilitate or induce payment to financing parties.
7. Provisions that lead to the software vendor's guarantee of the customer's indebtedness to the financing party.

If the presumption is not overcome, the software vendor should recognize revenue as payments from the customer become due and payable to the financing party, provided all other requirements of revenue recognition in SOP 97-2 (ACC 10,700) are met.

**.63 Overcoming the Presumption That a Fee is Not Fixed or Determinable When Vendor Participates in Customer Financing and Software Revenue Recognition**

*Inquiry*—TIS section 5100.62 provides indicators of incremental risk that result in a presumption that a fee is not fixed or determinable in an arrangement in which a software vendor participates in an end user customer's financing with a party unrelated to the software vendor. What evidence should the software vendor consider to overcome the presumption that the fee is not fixed or determinable, as discussed in TIS section 5100.62?

*Reply*—The presumption may be overcome in certain circumstances. The software vendor should use the guidance in paragraph 28 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28), and TIS section 5100.57.

To overcome the presumption, there should be evidence that the software vendor has a standard business practice of entering into similar arrangements with financing parties that have substantially similar provisions, and has a history of not providing refunds or concessions to the customer or the financing party.

Additionally, with respect to incremental risk indicator 7 in TIS section 5100.62, in those circumstances in which the software vendor has relevant history with arrangements in which it granted extended payment terms to its customers, the software vendor should consider that history. A history of the software vendor granting concessions to either (a) its customers in similar arrangements in which it provided extended payment terms or (b) unrelated financing parties in similar arrangements in which the software vendor participated, would prevent the software vendor from overcoming the presumption that the fee is not fixed or determinable.

In circumstances where there is sufficient evidence to overcome the presumption that the fee is not fixed or determinable, the software vendor should nevertheless evaluate the nature of the incremental risk to determine if there are other accounting ramifications, for example, accounting for the software vendor's continuing involvement that results from a guarantee of the customer's indebtedness (recourse).

**.64 Indicators of Vendor Participation in Customer Financing That Do Not Result in Incremental Risk and Software Revenue Recognition**

(For illustrative purposes, the following inquiry and reply assumes that the software arrangement is a single product/single element arrangement; however, the inquiry and reply also applies to multiple element arrangements.)

*Inquiry*—Related to TIS section 5100.62, are there examples of software vendor actions that generally do not cause the software vendor to assume incremental risk that the software vendor will provide a refund or concession to either the end user customer or the financing party related to the software vendor's participation in an end user customer's financing of a software arrangement?

*Reply*—Yes. The following examples of software vendor actions generally do not cause a software vendor to assume incremental risk:

1. Software vendor introduces the customer and financing party and facilitates their discussions.
2. Software vendor assists the customer in pre-qualifying for financing as long as the software vendor does not guarantee, certify, or otherwise attest in any manner to the financing party that the customer meets the financing party's qualification criteria.

3. Software vendor represents to the financing party that the software vendor has free and clear title to the licensed software or the right to sublicense if the software vendor makes the same written representations in the software arrangement with the end user customer.
4. Software vendor warrants to the financing party that the software functions according to the software vendor's published specifications if the software vendor makes the same written warranty in the software arrangement with the end user customer.
5. Software vendor takes action, which was explicitly authorized by the customer in the original arrangement, to terminate the license agreement and/or any related services, or to not enter into another arrangement for the same or similar product.
6. Software vendor makes customary recourse provisions to its customer related to warranties for defective software.

#### **.65 Software Vendor Interest Rate Buy Downs on Customer Financing and Software Revenue Recognition**

(For illustrative purposes, the following inquiry and reply assumes that the software arrangement is a single product/single element arrangement; however, the inquiry and reply also applies to multiple element arrangements.)

*Inquiry*—A customer may desire, and a software vendor may be willing to assist the customer in obtaining financing with a party unrelated to the software vendor that has a more attractive interest rate than typically offered by the financing party. For example, a software vendor arranges to “buy down” the interest rate a financing party would otherwise charge to the software vendor's customer. That interest rate “buy down” may occur simultaneously with the original arrangement between the software vendor and customer, or it may occur at a later point in time. Further, that interest rate “buy down” may occur with or without the customer's awareness. Does either the point in time of the interest rate “buy down”, or the awareness by the customer of it, affect revenue recognition under SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—The point in time that the interest rate “buy down” occurs affects revenue recognition, however, whether the customer is aware of the “buy down” does not affect revenue recognition.

An interest rate “buy down” which is evidenced contemporaneously and occurs simultaneously with the original arrangement between the software vendor and customer is considered an integral part of the arrangement because of its timing. Because the interest rate “buy down” is an integral part of the original arrangement, it is irrelevant whether the customer is or is not aware of it. The amount of the interest rate “buy down” should be treated as a reduction of the total arrangement fee to be recognized in accordance with SOP 97-2 (ACC 10,700), and not as a financing or other expense.

A software vendor's “buy down” of an interest rate which is not evidenced contemporaneously or occurs other than simultaneously with the original arrangement is not considered an integral part of the original arrangement, rather it constitutes a concession because it represents a reduction in the arrangement fee not contemplated in the original arrangement (see TIS section 5100.56). Because the interest rate “buy down” is a concession, it is irrelevant whether the customer is or is not aware of it.

**.66 Consideration of Other TPAs on Customer Borrowing When Customer is a Reseller and Software Revenue Recognition**

(For illustrative purposes, the following inquiry and reply assumes that the software arrangement is a single product/single element arrangement; however, the inquiry and reply also applies to multiple element arrangements.)

*Inquiry*—The inquiries in TIS section 5100.60 through .65 specifically refer to a software vendor's arrangements with an end user customer. Are the replies different if the customer is a reseller?

*Reply*—The inquiries and replies in TIS section 5100.60 through .65 are phrased in the context of end user customers to eliminate the additional discussion that may be necessary to address the complexities that exist for resellers. Paragraph 30 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.30), provides additional factors to consider in evaluating whether an arrangement fee is fixed or determinable if the customer is a reseller. The underlying concepts in the replies should be applied to customers that are resellers; however, all of the additional factors in paragraph 30 of SOP 97-2 (ACC 10,700.30), also should be considered. Further, the existence of financing by a reseller customer may increase the risk that:

1. Payment of the arrangement fee is substantially contingent on the distributor's success at reselling the product.
2. The reseller may not have the ability to honor a commitment to pay, which could increase the risk of software vendor concessions regardless of the source of the financing.
3. Returns or price protection cannot be reasonably estimated because of the potential for increased concession risk.

**.67 Customer Acceptance and Software Revenue Recognition**

*Inquiry*—Paragraph 20 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.20), says, "After delivery, if uncertainty exists about customer acceptance of the software, license revenue should not be recognized until acceptance occurs." In a software arrangement that contains a customer acceptance provision, can a software vendor ever recognize revenue (provided all of the other revenue recognition criteria of SOP 97-2 (ACC 10,700) have been met) before formal customer acceptance occurs?

*Reply*—Yes. Paragraph 20 of SOP 97-2 (ACC 10,700.20) is not intended to suggest that the mere existence of a customer acceptance provision precludes revenue recognition until formal acceptance has occurred. Items to consider in evaluating the effect of customer acceptance on revenue recognition include, but are not limited to, (a) historical experience with similar types of arrangements or products, (b) whether the acceptance provisions are specific to the customer or are included in all arrangements, (c) the length of the acceptance term, and d) historical experience with the specific customer. Public registrants subject to SOP 97-2 (ACC 10,700), should also consider the guidance in SEC Staff Accounting Bulletin No. 101 (SAB 101), *Revenue Recognition in Financial Statements*, and the *Frequently Asked Questions* to SAB 101, as it relates to customer acceptance.

**.68 Fair Value of PCS in Perpetual and Multi-Year Time-Based Licenses and Software Revenue Recognition**

*Inquiry*—Software licenses for the same product currently are offered by a software vendor as: 1) a perpetual license and 2) a multi-year time-based license

(for example, two or more years). The pricing of the licenses reflects the duration of the license rights. Vendor-specific objective evidence (VSOE) of fair value exists for post-contract customer support (PCS) services in the perpetual licenses. For the multi-year time-based licenses, PCS services for the *entire* license term are included (bundled) in the license fee and there is no renewal rate inasmuch as the time-based license rights are coterminous with the PCS service period. Do the PCS renewal terms in the perpetual license provide VSOE of the fair value of the PCS services element included (bundled) in the multi-year time-based software arrangement pursuant to the provisions of SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

*Reply*—No. SOP 97-2 (ACC 10,700) states that VSOE of fair value is provided by the price charged when the same element is sold separately. PCS services for a perpetual license and PCS services for a multi-year time-based license are two different elements. Though the same unspecified product upgrades or enhancements may be provided under each PCS arrangement, the time period during which the software vendor's customer has the right to use such upgrades or enhancements differs based on the terms of the underlying licenses. Because PCS services are bundled for the entire term of the multi-year time-based license, those PCS services are not sold separately.

However, in the rare situations in which both of the following circumstances exist, the PCS renewal terms in a perpetual license provide VSOE of the fair value of the PCS services element included (bundled) in the multi-year time-based software arrangement: (1) the term of the multi-year time-based software arrangement is substantially the same as the estimated economic life of the software product and related enhancements that occur during that term; and (2) the fees charged for the perpetual (including fees from the assumed renewal of PCS for the estimated economic life of the software) and multi-year time-based licenses are substantially the same.

If the software vendor also offers multi-year time-based licenses for the same product that include bundled PCS services for a portion of the license period (instead of only including bundled PCS services for the entire license term), the renewal terms of those transactions may provide VSOE of the fair value of the PCS services elements that are bundled for the entire license term. See TIS section 5100.54 for additional guidance on VSOE of PCS renewals.

## **.69 Delivery Terms and Software Revenue Recognition**

*Inquiry*—SOP 97-2, *Software Revenue Recognition* (ACC 10,700), says that delivery is one of the basic criteria for revenue recognition. In an arrangement that requires physical delivery of software, are delivery terms that indicate when the customer assumes the risks and rewards of its licensing rights (for example, FOB destination and FOB shipping point terms) relevant in the assessment of whether software has been delivered?

*Reply*—Yes, including in arrangements in which a software vendor licenses a software product and retains title to the product. For example, software arrangements that include FOB destination terms do not meet the delivery criterion until the customer receives the software. Public registrants subject to SOP 97-2 (ACC 10,700) should also consider the guidance in SEC Staff Accounting Bulletin No. 101, *Revenue Recognition in Financial Statements*, as it relates to when delivery is considered to have occurred.

**.70 Effect of Commencement of an Initial License Term and Software Revenue Recognition**

*Inquiry*—Revenue recognition in software arrangements that do not require significant production, modification, or customization of the software should occur when all four basic revenue recognition criteria (persuasive evidence of an arrangement, delivery, fixed or determinable fee and probable collectibility) of SOP 97-2, *Software Revenue Recognition* (ACC 10,700), are met. None of the four basic criteria specifically address whether the license term also must commence. For example: On December 20, X0, a software vendor enters into a software arrangement with a first-time customer for the license of Product A and PCS. VSOE of fair value exists for PCS. For reasons that may or may not be known by the software vendor, the customer desires the license to terminate on January 2, X4. The software vendor accepts the customer's terms and structures the arrangement as a three-year term beginning January 3, X1 and ending January 2, X4. On December 20, X0, the software vendor ships the software and collects the fee. Assuming all other criteria for revenue recognition are met, should the software vendor recognize any of the arrangement fee before the license term begins (that is, January 3, X1)?

*Reply*—No. Revenue should not be recognized prior to the commencement of the initial license term. Deferring recognition of revenue until the initial license term commences is consistent with TIS section 5100.45, which includes a "right to use" concept, and the overall concept of delivery addressed in SOP 97-2 (ACC 10,700).

If the software arrangement were to have been structured as a three-year and 14-day license commencing on December 20, X0 and ending January 2, X4, the software vendor would recognize revenue in December X0 if all other revenue recognition criteria had been met.

**.71 Effect of Commencement of an Extension/Renewal License Term and Software Revenue Recognition**

*Inquiry*—TIS section 5100.70, which addresses the effect of commencement of an initial license term on software revenue recognition, indicates revenue should not be recognized before the license term commences even if all other criteria for revenue recognition have been met. If the license were an extension/renewal of a pre-existing, currently active license for the same product(s), would commencement of the extension/renewal term also be a prerequisite for revenue recognition? For example: Consider the arrangement described in TIS section 5100.70, including that VSOE of fair value exists for PCS. The license term commenced on January 3, X1 and ends on January 2, X4. Now assume that in September X3, the customer decides it wants to be able to continue to use Product A beyond January 2, X4. The software vendor and customer execute an arrangement on September 20, X3 to extend/renew the terms of the existing license through December 31, X5. The extension/renewal arrangement includes only product(s) already included in the existing, currently active arrangement. Assuming all other revenue recognition criteria are met, should the software vendor recognize the portion of the extension/renewal arrangement fee allocated to the license of Product A as revenue on September 20, X3 or January 3, X4?

*Reply*—The software vendor should recognize the portion of the extension/renewal arrangement fee allocated to the license of Product A as revenue on September 20, X3 if all other revenue recognition criteria are met. In the case of an extension/renewal of a pre-existing, currently active license for the same product(s), the customer already has possession of and the right to use the software to which the extension/renewal applies.

However, if the customer's pre-existing license for the product(s) had lapsed (that is, was not currently active), a new arrangement including the same software product(s) should be accounted for as an initial arrangement and not as an extension/renewal.

In considering the guidance in paragraphs 28 and 29 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.28–.29), for determining whether the extension/renewal fee is fixed or determinable, the date that the extension/renewal arrangement is executed should be used to determine whether the extension/renewal payment terms are extended.

### **.72 Effect of Additional Product(s) in an Extension/Renewal of License Term and Software Revenue Recognition**

*Inquiry*—TIS section 5100.71 addresses the effect of commencement of an extension/renewal license term when the extension/renewal arrangement includes only a product(s) already included in the existing, currently active arrangement. If the extension/renewal arrangement includes additional product(s), how should the extension/renewal arrangement fee be allocated to the different products? For example: Consider the arrangement described in TIS section 5100.71, including that VSOE of fair value exists for PCS. The license term of Product A commenced on January 3, X1 and ends on January 2, X4. In September X3, the customer decides it wants to be able to continue to use Product A beyond January 2, X4 and now assume that the customer also wants to include in the arrangement a license to Product B, which will commence upon the delivery of Product B. The software vendor and customer execute an arrangement on September 20, X3 to extend/renew the terms of the existing, currently active license of Product A through December 31, X5 and also to license Product B. The software vendor has VSOE of fair value for Products A and B, and Product B is expected to be delivered in the first quarter of X4. How should the software vendor allocate and recognize the portions of the extension/renewal arrangement fee allocated to Products A and B?

*Reply*—The software vendor should allocate the extension/renewal arrangement fee using VSOE of fair value consistent with paragraph 10 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.10). Consistent with TIS section 5100.71, the software vendor should recognize the portion of the extension/renewal arrangement fee allocated to Product A as revenue on September 20, X3 (if all other revenue recognition criteria are met) because the customer already has possession of and the right to use the software to which the extension/renewal applies. The portion of the extension/renewal arrangement fee allocated to Product B should be recognized when the criteria of paragraph 8 of SOP 97-2 (ACC 10,700.08) are met and the license period for Product B has commenced.

In considering the guidance in paragraphs 28 and 29 of SOP 97-2 (ACC 10,700.28–.29) for determining whether the extension/renewal fee is fixed or determinable, the date that the extension/renewal arrangement is executed as it relates to the portion of the arrangement fee allocated to Product A, and the date Product B is delivered as it relates to the portion of the arrangement fee allocated to Product B, should be used to determine whether the extension/renewal arrangement payment terms are extended.

### **.73 Software Revenue Recognition for an Arrangement Containing an Option to Extend a Time-Based License Indefinitely**

*Inquiry*—A software vendor sells Product A with PCS under a three-year term license with PCS renewable after year 1. VSOE of fair value exists for PCS. The arrangement specifies that any time during its term the customer

can extend the license for Product A indefinitely for an additional fee. Effectively, the arrangement contains an option to convert the three-year term license into a perpetual license for Product A. Does the option to convert represent an element as that term is used in paragraph 10 of SOP 97-2, *Software Revenue Recognition* (ACC 10,700.10)? Would the answer differ if the perpetual license for Product A necessitated another delivery of software media because the term license software media contained a self-destruct or similar mechanism to allow the vendor to control the usage of its intellectual property?

*Reply*—The option itself is not an element as contemplated in paragraph 10 of SOP 97-2 (ACC 10,700.10) because there is no new deliverable. The exercise of the option merely affords the customer a longer time period over which to use the same Product A that it already has as part of the original arrangement. The additional fee to exercise the option is essentially the same as the fee for an extension/renewal of a license, as discussed in TIS section 5100.71.

Further, the need for another delivery of the software media as a result of a self-destruct or similar mechanism would not create an element or deliverable to be accounted for in the original arrangement; however, such media would need to be delivered before the option exercise fee could be recognized as revenue.

#### **.74 Effect of Discounts on Future Products on the Residual Method and Software Revenue Recognition**

*Inquiry*—TIS section 5100.50 defines a more-than-insignificant discount with respect to future purchases and TIS section 5100.51 provides examples of accounting for significant incremental discounts that are within the scope of SOP 97-2, *Software Revenue Recognition* (ACC 10,700). The term “discount,” as used in SOP 97-2 (ACC 10,700) and the related TPAs, is the difference between the arrangement fee and VSOE of fair value when VSOE of fair value exists for all elements in the arrangement. A question arises as to how to compute the amount of a discount when the software vendor is applying the residual method because VSOE of fair value does not exist for all of the elements in the arrangement but does exist for all of the undelivered elements.

For example: A software vendor enters into an arrangement with a customer that licenses currently available software products and services (referred to as the initial arrangement) and offers a discount off of its published list price on future purchases of products not previously licensed by the customer. The software vendor does not have VSOE of fair value of its software products. However, the software vendor is able to apply the residual method pursuant to SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions* (ACC 10,770), when the only undelivered elements are services.

How should the software vendor determine if the discount on future purchases of future products is significant and incremental (as discussed in TIS section 5100.50) since it does not have VSOE of fair value of its software products?

*Reply*—In this situation, the software vendor should compute the discount provided in the initial arrangement by comparing the published list price of the delivered elements in the initial arrangement to the residual value attributable to those delivered elements. If the discount on future purchases of future products is significant and incremental to the discount provided on the delivered elements in the initial arrangement, the software vendor should apply the significant and incremental discount on future purchases to the initial arrangement using the guidance in TIS section 5100.51.

Example:

On December 31, 20X1, software vendor licenses Product A (with a published list price of \$100) on a perpetual basis, bundled with PCS for the first year, to a customer for \$80. The customer may elect to renew PCS following the initial year at a stipulated rate of \$15, which requires the software vendor to apply the residual method pursuant to SOP 98-9 (ACC 10,770). In conjunction with the licensing of Product A, the software vendor offers the customer a 55% discount off of its published list price on the purchase of all new products released by the software vendor during the three years subsequent to December 31, 20X1, with no maximum cumulative discount. Based on the guidance in the reply above, the software vendor would perform the calculation below to assist in determining whether the discount offered on future purchases of future products is significant and incremental (as discussed in TIS section 5100.50):

	<u>Published List Price</u>	<u>Residual Value</u>	<u>Discount From Published List Price</u>
Product A	\$100	\$65	35.00%
Future Products	Unknown	Unknown	55.00%
Additional discount from published list price			20.00%

Assuming that the software vendor concludes that the additional discount (that is, 20.00% in this example) on future purchases is significant and incremental, the software vendor should allocate such discount to Product A and defer revenue related to the PCS in the initial arrangement as follows:

(a)	(b)	(a)*(b)=(c)	(d)	(c)+(d)=(e)	(f)	(f)–(e)
<u>Published List Price</u>	<u>Addtl Discount</u>	<u>Revenue Deferral for Additional Discount</u>	<u>Revenue Deferral for PCS</u>	<u>Total Revenue Deferral</u>	<u>Arrangement Fee</u>	<u>Up-front Revenue Product A</u>
\$100	20%	\$20	\$15	\$35	\$80	\$45

Consistent with Example 5 in TIS section 5100.51, upon delivery of Product A, the vendor should recognize \$45 of revenue and defer \$35, provided all other requirements of revenue recognition in SOP 97-2 (ACC 10,700) are met. The revenue related to PCS (\$15) deferred pursuant to the residual method should be recognized over the initial year of the license in accordance with paragraph 57 of SOP 97-2 (ACC 10,700.57). The deferred revenue related to the discount (\$20) should be accounted for as a subscription in accordance with paragraphs 48 and 49 of SOP 97-2 (ACC 10,700.48–.49) and recognized pro rata over the three-year discount period. If the customer purchases additional products using the discount, the vendor would recognize revenue equal to the fee attributable to those additional products, provided all other requirements of revenue recognition in SOP 97-2 are met (ACC 10,700).

**.75 Fair Value of PCS Renewals Based on Users Deployed and Software Revenue Recognition**

*Inquiry*—A software vendor offers a perpetual license to an end-user customer for a software product with post-contract customer support (PCS) bundled

for the initial year. The initial fee is \$1,150,000 (\$1,000,000 is stated as the software license fee and \$150,000 is stated as the PCS fee). The end-user customer is entitled to deploy an unlimited number of copies of the licensed software product for a 3-year period. During the 3-year unlimited deployment period, the end-user customer has the option to renew PCS annually for years 2 and 3 for a stipulated fee of 15% of the stated license fee, which is \$150,000 per year. After the expiration of the 3-year unlimited deployment period, the end-user customer is required to pay additional license and PCS fees if it deploys additional copies of the software product. The optional PCS fee for year 4 and annually thereafter is based on the ultimate number of copies of the software product deployed by the end-user customer at the end of the 3-year unlimited deployment period. Do the annual PCS renewal rates stipulated for years 2 and 3 constitute vendor-specific objective evidence (VSOE) of fair value for the year 1 PCS in accordance with SOP 97-2, *Software Revenue Recognition* (ACC 10,700)?

**Reply**—No. In this arrangement there are two different pricing methodologies for PCS and no basis for determining which pricing methodology produces the appropriate VSOE of fair value of the PCS bundled in year 1 and offered in years 2 and 3. Accordingly, the vendor should recognize the entire arrangement fee (\$1,450,000) ratably over the three-year deployment period (the aggregate fee recognized should not exceed the amount that is not subject to forfeiture, refund, or other concession, as required in paragraph 14 of SOP 97-2 [ACC 10,700.14]). This presumes that PCS will be renewed in years 2 and 3; however, if the customer does not renew PCS in year two or year three, the vendor should recognize the remaining deferred revenue at the time PCS is no longer being provided.

If sufficient objective evidence demonstrated that the renewal rate in year 4 and thereafter is more likely than not (that is, a likelihood of more than fifty percent, as that term is used in FASB Statement No. 109, *Accounting for Income Taxes*) to approximate or be less than the amount charged in years 2 and 3, the annual PCS renewal rates stipulated for years 2 and 3 would constitute VSOE of fair value of PCS. One example of such evidence would be a vendor's past history of deployment with other comparable arrangements that result in postdeployment PCS fees that approximate PCS fees charged during the unlimited deployment period. Another example of such evidence would be a stated cap or maximum on the price to be charged for PCS in year 4 and thereafter that would result in a price that approximates or is less than the amount charged in years 2 and 3. In such a circumstance, the amount allocated to the perpetual license (\$1,000,000) would be recognized immediately provided all other requirements for revenue recognition in SOP 97-2 (ACC 10,700) are met, and the fair value of PCS in year 1 would be recognized ratably over the PCS period. Likewise, the fees related to PCS renewals after year 1 (\$150,000 each for years 2 and 3) would be recognized ratably over the respective PCS periods.

#### **.76 Fair Value in Multiple-Element Arrangements That Include Contingent Usage-Based Fees and Software Revenue Recognition**

**Inquiry**—Software vendors may enter into various multiple-element arrangements that provide for both licensing rights and post-contract customer support (PCS) and that include contingent usage-based fees. Usage-based fees are determined based on applying a constant multiplier to the frequency that the licensee uses the software, for example, customer call center software wherein a fee of \$.01 is charged for each call handled. That fee structure is different

from fees that are determined based on the number of individuals or workstations that use or employ the software (that is, user-based fees). If usage-based fees are not paid timely, the licensee's perpetual license to use the software is vacated and there is no continuing obligation to provide PCS.

The following scenarios focus on circumstances in which software functionality is used by the software licensee only in processing the activity that underlies the measurement of the usage-based fee, that is, the software provides the licensee with no internal-use functionality for which a usage-based fee would not be charged. In each of the three scenarios, how should a software vendor recognize revenue for the perpetual license, PCS, and contingent usage-based fee elements?

**Scenario No. 1—Arrangement provides for a non-refundable initial fee for the perpetual license and contingent usage-based fees determined monthly or quarterly and due shortly thereafter. PCS is provided at no additional charge for the first year and the licensee may purchase renewal PCS annually thereafter for a fixed amount that is deemed substantive (the renewal rate).**

**Scenario No. 2—Arrangement provides for a non-refundable initial fee for the perpetual license and contingent usage-based fees determined monthly or quarterly and due shortly thereafter. PCS is provided at no additional stated charge (or the pricing of PCS is stated as being included in the contingent usage-based fee).**

**Scenario No. 3—Arrangement provides for a perpetual license solely in exchange for contingent usage-based fees determined monthly or quarterly and due shortly thereafter. PCS is provided at no additional stated charge.**

*Reply—Usage-based fees are not specifically addressed in SOP 97-2, Software Revenue Recognition (ACC 10,700). However, paragraph 10 (ACC 10,700.10), which provides guidance as to what constitutes vendor-specific objective evidence (VSOE) of fair value of the elements of a software arrangement, states, in part: "When a vendor's pricing is based on multiple factors such as the number of products and the number of users, the amount allocated to the same element when sold separately must consider all the factors of the vendor's pricing structure." Accordingly, usage-based fees should be considered in determining whether there is sufficient VSOE of fair value of all the elements of an arrangement.*

**Scenario No. 1—The existence of a substantive renewal rate for PCS allows for the determination of the portion of the initial fee that should be allocated to the perpetual license through the application of the residual method described in SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions* (ACC 10,770). That amount should be recognized as revenue when the criteria in paragraph 8 of SOP 97-2 are satisfied. The amount allocated to PCS should be recognized pursuant to the requirements of paragraph 57 of SOP 97-2 (ACC 10,700.57). The usage-based fee should be recognized at the time a reliable estimate can be made of the actual usage that has occurred (estimates may be used, for example, if there is a lag in the reporting of actual usage), provided collectibility is probable.**

**Scenario No. 2—Because there is no substantive renewal rate for PCS, there is no VSOE of fair value of the PCS that is to be provided, which precludes application of the residual method to determine the portion of the initial fee allocable to the perpetual license. Further, there is not sufficient objective evidence to demonstrate that some portion of the initial fee does not represent**

payment for future PCS. Accordingly, pursuant to paragraphs 12 and 58 of SOP 97-2 (ACC 10,700.12 and .58), the initial fee should be recognized ratably over the period that the vendor expects to provide PCS because there is no contractual term for the PCS. The usage-based fee should be recognized at the time a reliable estimate can be made of the actual usage that has occurred, provided collectibility is probable.

Scenario No. 3—The usage-based fee represents payment for both the perpetual license right and PCS. However, that fee becomes fixed or determinable only at the time actual usage occurs. Therefore, revenue should be recognized at the time a reliable estimate can be made of the actual usage that has occurred, provided collectibility is probable.

## Section 5210

### ***Depreciation and Depletion***

#### **.02 Disclosure of Depreciation Expense**

*Inquiry*—APB Opinion No. 12 states that the financial statements should disclose depreciation “expense” for a period. Does “expense” mean the total amount of depreciation accrued (i.e. credited to the allowance for depreciation account) for the period or the amount actually expensed after allowing for depreciation included in overhead apportioned to inventories?

*Reply*—In concerns such as public utilities and trading or commercial enterprises, determination of the total provision for depreciation is usually simple since the amounts of depreciation are generally identified in the expense accounts. In manufacturing concerns, however, there are difficulties in determining the amount of depreciation to be disclosed. Depreciation is usually included in overhead which in turn is distributed over a number of departments and products and finds its way ultimately into cost of sales through inventory accounts. To determine the amount of depreciation which is included as a part of the cost of merchandise sold may require an extensive and usually impracticable, if not impossible, analysis of cost accounts. The auditor usually solves the problem by suggesting that the amount of depreciation charged to manufacturing costs and to expense accounts be taken as representing the amount charged to income. Obviously, this method does not correctly state the depreciation charge which was recovered through sale of goods in which depreciation was an element of cost. From a practical standpoint, in view of the indicated difficulty, if not impossibility, of determining the exact amount of depreciation included in cost of sales, it has become recognized practice to report the amount of depreciation charged in the statement of income as that which has been charged to manufacturing costs and to expense accounts, even when amounts of depreciation included in inventories at the beginning and end of the period vary sufficiently to affect depreciation included in cost of sales. Such practice also is acceptable to the Securities and Exchange Commission.

#### **.04 Depreciation of Clothing Rented to Individuals**

*Inquiry*—Company A maintains a stock of tuxedos, shoes and related items which are rented to individuals. Management estimates that this stock will have a useful life of approximately two years. Additional stock will be purchased from time to time as required. At the end of each fiscal year, a complete physical inventory is taken of all items on hand. What is the most appropriate accounting treatment for the stock of rental clothing?

*Reply*—The clothing represents a fixed asset to be depreciated over its estimated life. The estimated life should be adjusted periodically to reflect experience and should not exceed two years. The depreciation charge should be computed monthly based on inventory at the beginning of the period plus additions during the current year.

Logically it seems that loss and retirement of clothing will relate to that clothing first purchased. Accordingly the first-in first-out basis would appropriately account for such loss and retirement.

**.05 Classification of Costs of Constructing a Golf Course**

*Inquiry*—How should the costs of constructing a golf course be broken down into depreciable and nondepreciable classifications?

*Reply*—For the costs incurred in constructing a golf course, those expenditures made to change the land itself, exclusive of buildings, should be treated as permanent improvements to the land and are not, therefore, depreciable. These costs would include clearing the land, building fairways, changing the contour of the earth by moving and filling, building sand traps, and creating water hazards. If trees are planted, and their lives can be estimated, it would appear to be proper to depreciate these over such lives. In the absence of any reasonable estimate, trees and shrubs should be carried at cost. Any structures such as buildings, shacks or stands should be depreciated along with the costs of any vehicles such as trucks or carts, and any equipment used. A watering system should be depreciated as it is made of material that will not last indefinitely.

**.08 Additional First Year Depreciation**

*Inquiry*—A corporation reports depreciation expense on its financial statements at the same amount that it claims on its income tax return. If that amount included the maximum \$10,000 deduction for additional first year depreciation (election to expense recovery property) allowed for tax purposes, whereas, normal depreciation was \$18,000, would the financial statements be in conformity with generally accepted accounting principles?

*Reply*—ARB No. 43, chapter 9C, *Depreciation*, paragraph 5, states, in part: “. . . depreciation accounting, a system which aims to distribute the cost or other basic value of tangible capital assets, less salvage (if any), over the estimated useful life of the unit . . . in a systematic and rational manner . . .” Accordingly, if any arbitrary additional first year depreciation amount is included in the financial statements and it is material, it would be a departure from generally accepted accounting principles. Refer to SAS No. 58, *Reports on Audited Financial Statements*, paragraph 50, and SAS No. 107, *Audit Risk and Materiality in Conducting an Audit*, paragraph 27, for guidance on materiality. [Amended]

**.09 Amortization of Leasehold Improvement**

*Inquiry*—A zoological society leases property in the city zoo for concession stands. The society plans to construct a new building, which will house several concession stands, on the leased property. When construction is complete the title to the building will be turned over to the city. How should the building be accounted for by the zoological society?

*Reply*—The construction of a building on leased property is considered a leasehold improvement. A leasehold improvement is a permanent improvement or betterment that increases the usefulness of the leased property and will revert to the lessor at the end of the lease term. The costs of such improvements are normally amortized either over the life of the improvement or the lease term, whichever is shorter.

---

[The next page is 4201.]

## Section 5220

### ***Interest Expense***

#### **.01 Deferral of Payment of Interest**

*Inquiry*—A client experienced problems in meeting its current obligations and reached an agreement with its primary creditor concerning several mortgage loans. Under the agreement, the interest rate on these loans will, for the present, be reduced from 10 percent to 8 percent, but the lender has the option in the future of increasing the interest rate to 11 percent to recover the foregone interest. At the maturity date, any unpaid interest calculated at the original 10 percent rate will be due.

How should the interest expense be recorded on the client's financial statements?

*Reply*—Interest should be accrued at the rate of 10 percent, the original rate under the mortgage loans. This debit would represent the interest expense charged to income. The credit would be segregated between current liabilities (an amount representing the 8 percent rate) and noncurrent liabilities (an amount representing the “deferred interest”).

#### **.03 Computation of Interest Expense on Long-Term Redeemable Bonds**

*Inquiry*—A bank has issued four year non-negotiable savings bonds with interest of 7 percent for the first year,  $7\frac{1}{2}$  percent for the second year, 8 percent for the third year and  $8\frac{1}{2}$  percent for the fourth year. The depositor has the option to request that he be paid his interest on a semi-annual or annual basis, but few do so, and the normal procedure is that the interest will be compounded and left on deposit for the four years.

If a bond is redeemed prior to maturity, interest is paid to the bondholder at the rate of 5 percent per annum for the period that the bond was held, less 90 days. Few instances of bond redemption prior to maturity are anticipated.

Which of the following methods of accounting for interest expense is appropriate?

(1) Accrue interest at 7 percent for the first year,  $7\frac{1}{2}$  percent for the second year (plus the compounding factor), 8 percent for the third year (plus the compounding factor), and  $8\frac{1}{2}$  percent for the fourth year (plus the compounding factor), making a debit to the interest expense and a credit to the accrued interest payable on four year bonds.

(2) Determine the total amount of interest that will be due to the holder upon the maturity of the bond and accrue a pro rata share of this amount for each month of the four year period that the bond is in effect.

*Reply*—A rate of interest should be used which reflects the bank's liabilities and assumes that the bondholders will not redeem their bonds and not withdraw the interest prior to maturity. This is essentially the second approach above.

**.05 Amortization of Prepaid Interest on Discounted Notes**

*Inquiry*—An equipment leasing company will use as of the beginning of the year the interest method to amortize prepaid interest on new discounted notes. But it will continue to use the straight-line method to amortize prepaid interest on notes discounted earlier. Is the adoption of the interest method on a prospective basis a change in accounting principle?

*Reply*—APB Opinion No. 21, *Interest on Receivables and Payables*, paragraph 15, states that the interest method of amortization should be used but that other methods of amortization may be used if the results obtained are not materially different from those which would result from the interest method.

If the results in earlier periods would not have differed materially by using the interest method, the interest method may be adopted for the new notes, disclosed, and not be reported as a change in accounting principle.

If the results in earlier periods would have been materially different by using the interest method, the interest method should be adopted for the old and new notes, and be reported as a correction of an error.

**.06 Imputed Interest on Shareholder Loans**

*Inquiry*—A section of the Internal Revenue Code requires, under certain circumstances, that a company impute interest on demand loans made to a shareholder of the company. Would this also be required under generally accepted accounting principles? If not, must it be disclosed and would there be an effect on the deferred income tax accounts?

*Reply*—No. APB Opinion No. 21, *Interest on Receivables and Payables*, paragraph 2, states that the opinion applies to receivables and payables which represent contractual rights to receive money or contractual obligations to pay money on fixed or determinable dates. Imputed interest would not be required on demand loans since they have no fixed or determinable due date.

However, disclosure of this transaction would be required under FASB Statement No. 57, *Related Party Transactions*.

There would be no effect on the deferred income tax accounts since this would be considered a permanent difference.

**.07 Imputed Interest on Note Exchanged for Cash Only**

*Inquiry*—If an enterprise receives cash in exchange for a non-interest bearing long-term note payable with a stated amount equal to the cash received, must interest be imputed on the note in accordance with APB Opinion No. 21, *Interest on Receivables and Payables* (AC I69)?

*Reply*—If there are rights or privileges other than cash attendant to the exchange, the value of such rights or privileges should be given accounting recognition pursuant to APB Opinion No. 21, paragraph 7 (AC I69.104). If the note is issued solely for cash (that is, the cash received is equivalent to the face amount of the note) and no other right or privilege is exchanged, it is presumed to have a present value at issuance measured by the cash proceeds exchanged. [Amended June 1995.]

---

[The next page is 4281.]

## Section 5230

### *Employee Benefit Plans*

#### **.06 Deferred Compensation Payable To Surviving Spouse**

*Inquiry*—Corporation A and its president entered into an employment contract. The contract stipulated that if the president died while employed by Corporation A, Corporation A would pay \$500 a month to the president's widow for the rest of her life. Shortly after the contract was signed, the president died. The present value of the estimated future payments by Corporation A to the president's widow is \$X. Should Corporation A accrue the \$X?

*Reply*—Under APB Opinion No. 12, *Omnibus Opinion—1967*, paragraphs 6–8, the estimated amounts to be paid under a compensation contract would normally be accrued over the period of active employment. The president's death accelerates recognition of a liability that is reasonably determinable from actuarial tables. Accordingly, the present value of the estimated future payments not previously recognized should be accrued and recognized as an expense.

#### **.09 Deferred Compensation Arrangement Funded by Life Insurance Contracts**

*Inquiry*—A company has a deferred compensation contract with one of its employees. In accordance with APB Opinion No. 12, *Omnibus Opinion—1967*, paragraph 6, the estimated amount of future payments was accrued over the period of active employment. The company purchases a life insurance policy on the employee, naming the company as beneficiary. May the cash surrender value earned on the policy be offset against the liability for the deferred compensation arrangement?

*Reply*—No. FASB Technical Bulletin No. 85-4, *Accounting for Purchases of Life Insurance*, paragraph 2, specifies that the cash surrender value on a life insurance contract should be reported on the balance sheet as an asset with any changes in that value reflected as an adjustment of insurance expense for the period. No right of offset or other deviations from the above accounting would be appropriate regardless of the funding objective pertaining to the purchase of the insurance contract, as stated in FASB Technical Bulletin No. 85-4, paragraph 1, footnote 1.

---

[The next page is 4381.]

## Section 5240

### Cost Allocation

#### .01 Transfer Pricing Between Manufacturing Division and Selling Division

*Inquiry*—X Company has two branches, both of which manufacture and sell the same type of items. In one transaction, Branch A made a sale of \$100,000. Branch B shipped the merchandise for this sale to Branch A. This merchandise had a cost on Branch B's books of \$70,000. How should the revenues and costs of this sale be allocated between Branches A and B?

*Reply*—When intracompany sales take place, revenues and costs are allocated by establishing transfer prices. In this case, the transfer price is the price Branch B will charge Branch A for the merchandise. Transfer prices must be set in such a way as to benefit the company as a whole, and consideration must be given to the effects the transfer prices will have on management decisions.

There are basically two methods of setting transfer prices: cost or market price. There are, however, many variations of these methods.

The transfer price could be based on standard cost of production, standard cost plus a return on investment, actual cost, variable cost, marginal cost, or simply a price negotiated by the divisions.

If there are outside suppliers of this product, the market price may be used as the transfer price. Market prices have the advantage of being relatively objective and, therefore, less subject to argument. Market prices may encourage the branches to consider market forces and outside opportunities which, to a certain extent, may be beneficial to the company. It is often difficult, however, to find market prices which accurately reflect the opportunity costs of intracompany sales.

Where intracompany transactions account for a large share of the division's sales, transfer prices must be chosen carefully so that each division is encouraged to operate for the good of the company as a whole. Where intracompany sales occur only occasionally and are not an important part of the division's activities, the choice of transfer prices is not as critical, and it may be easiest to negotiate a price or simply allow one of the divisions a "sales commission." In any event, the financial statements of the branches should be footnoted to disclose the treatment of the transaction.

No matter which transfer pricing method is chosen, the results on the company's financial statements will be the same, sales of \$100,000 and costs of goods sold of \$70,000, since the intracompany sale will be eliminated in the consolidation.

#### .10 Sale of Research and Development Technology

*Inquiry*—A company has incurred material research and development costs in the current year. Subsequent to the balance sheet date but prior to issuance of the financial statements, the company commenced negotiations and sold the research and development technology to an unrelated company. May the company capitalize the incurred research and development costs in its annual financial statements in light of the subsequent sale?

*Reply*—No. FASB Statement No. 2, *Accounting for Research and Development Costs*, paragraph 12, states that research and development costs should be expensed when incurred. There is no justification for capitalizing the costs because the technology will be sold. The company should disclose the subsequent sale of the research and development technology in the footnotes to its financial statements if the amount is material.

---

[The next page is 4501.]

## Section 5260

### ***Estimated Losses***

#### **.01 Recognition of Estimated Losses on Uncompleted Contracts**

*Inquiry*—An engineering firm manufactures and sells telemetry components on the basis of bids previously submitted to customers. In some cases, engineering time is required to modify a component to customer specifications. Since the amount of required engineering time is not known at the time a bid is submitted, costs to complete a particular job may exceed the bid price. The firm completes all jobs.

Presently all costs that accumulate on a particular job (direct materials, labor, and applied manufacturing and engineering overhead) are charged to that job and treated as work in process, even though the costs may exceed the selling price. Once the job is completed, it is taken out of work in process inventory and treated as costs of completion in the month that the job is shipped. Therefore, a loss on a job is recognized only when the job is shipped. When cost to complete a job is expected to exceed the bid price, what disclosure should be made on the balance sheet?

*Reply*—The problem faced by the firm is not primarily one of disclosure but rather that of satisfying the generally accepted accounting principle of “providing for losses which are reasonably certain to occur.”

It is assumed that the firm is accounting on the completed-contract basis. With regard to construction companies using this method of accounting, ARB No. 45, *Long-Term Construction-Type Contracts*, paragraph 11 states, “Although the completed-contract method does not permit the recording of any income prior to completion, provision should be made for expected losses in accordance with the well established practice of making provision for foreseeable losses.” The same concept applies to companies accounting under the percentage-of-completion method (*ibid.*, par. 6).

A possible journal entry to recognize the loss would be a charge to “Estimated Loss on Uncompleted Contracts” while crediting “Estimated Liability for Loss on Uncompleted Contracts.” This estimated liability could then be deducted from any excess of accumulated costs over related billings (or added to any liability arising from billings in excess of accumulated costs) for balance sheet purposes. If the loss is not deductible for tax purposes, part of the income tax paid should be set up as a deferred charge.

---

[The next page is 4551.]

## Section 5290

### Other Expenses

#### .02 Classification of Expenses Which Are Taxable to Employees

*Inquiry*—An amendment to the Internal Revenue Code requires, under certain circumstances, that an employer include as income, the fair value for the use of a company automobile, in the employee's wage and tax statement (Form W-2).

Should this be reported in the company's statement of income as compensation to employees?

*Reply*—No. The fair value is the amount the employee would have paid to use the car if the employee had owned it. The employer should report, as automobile expenses, the amount of actual expenses it incurred as owner of the car.

#### .04 Accounting for Relocation Costs

*Inquiry*—A corporation is relocating its production facilities to a different location. May the costs of relocating be capitalized?

*Reply*—A related matter is discussed in FASB Emerging Issues Task Force (EITF) Issue 88-10, *Costs Associated with Lease Modification or Termination*, where the question of whether any costs, particularly moving costs, incurred by a lessee in connection with changing from one lease to another lease may be deferred and amortized over the new lease term, is answered. In the discussion of EITF Issue 88-10, EITF task force members agreed that the predominant practice is to charge the costs of moving from a former location to expense as incurred. The SEC observer at the EITF discussion noted that as a general rule, the SEC staff would object to the deferral of moving costs. Additionally, one of the primary characteristics of an asset as defined by FASB Concepts Statement No. 6, *Elements of Financial Statements*, is that an asset embodies a probable future benefit that involves a capacity, singly, or in combination with other assets, to contribute directly or indirectly to future net cash inflows. The costs of relocation do not embody any future benefit and they should therefore be expensed when incurred.

#### .05 Accrual of Audit Fee

*Inquiry*—A CPA has been engaged to audit the financial statements of a client company. The audit is being conducted after year end. Is it proper to accrue the audit fee as an expense of the year under audit?

*Reply*—According to FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 145, "The goal of accrual accounting is to account in the periods in which they occur for the effects on an entity of transactions and other events and circumstances, to the extent that those financial effects are recognizable and measurable." The audit fee expense was incurred in the period subsequent to year end. Therefore, it is properly recorded as an expense in the subsequent period. However, fees incurred in connection with planning the audit, together with preliminary procedures (e.g., confirmation work) would be accruable for the year under audit.

**.06 Accounting for a Lease Trial Period**

*Inquiry*—A lease agreement allows a prospective lessee the free use of newly introduced specialized equipment for 30 days prior to entering into a long-term lease agreement for the equipment. The prospective lessee is not committed to enter into a long-term lease agreement at the beginning or during the 30-day trial period and there is no economic penalty to the lessee if the lessee does not enter into that agreement. How should the prospective lessee account for the 30-day trial period?

*Reply*—The 30-day trial period is part of the lessor's marketing strategy. Therefore, the lessee should not report any lease expense during the 30-day trial period. If the lessee subsequently enters into the lease arrangement, the date of inception should begin on the first day of the lease with no accounting recognition given to the trial period.

---

[The next page is 4801.]

## Section 5400

### *Extraordinary and Unusual Items*

#### **.01 Loss on Abandonment of Sales Project**

*Inquiry*—A company is engaged primarily in commercial and agricultural land sales, but some retail land sales and condominium sales are also made. The company acquired a retail land sales project under an agreement stating that, if the company did not desire to pursue the project, the property would be returned with no liability to the company.

The company invested a considerable amount of money in the project, but because of the declining state of the economy, the company decided to return the project to the original owner before any sales had been made.

Does the abandonment of the project represent a disposal of a segment of the business, an unusual and nonrecurring extraordinary loss, or an ordinary loss?

*Reply*—Paragraph 13 of Accounting Principles Board Opinion No. 30 describes a segment of the business as “. . . a component of an entity whose activities represent a separate major line of business or class of customer.” Paragraph 20 of the Opinion sets forth the two criteria for classification of an event or transaction as an extraordinary item. Although the criterion of infrequency of occurrence is met, it does not appear that the unusual nature criterion, described as “the possession of a high degree of abnormality, and of a type clearly unrelated to, or only incidentally related, to the ordinary and typical activities of the entity,” portrays this transaction.

If the company's formal decision to disengage itself from retail land sales applies to its entire retail land sales operation, the write-off should be considered as part of the sale of a segment of a business, but the segment to be accounted for must be the whole retail land sales operation. Otherwise, the write-off should be accounted for in accordance with paragraph 26 of APB Opinion No. 30 as a material transaction that occurs infrequently, but does not meet the criterion for classification as unusual in nature.

#### **.02 Sale of Cotton Futures Commitment Contracts**

*Inquiry*—A textile manufacturer entered into firm purchase commitments for cotton at a very favorable price. At the present time, the corporation has an unusually long position of purchase commitments at a low fixed price. Some of these contracts may be sold at a tremendous profit which is extremely material in relation to normal operating income. This results from the tremendous increase in cost of raw cotton during recent months. The corporation has not sold such commitment contracts in the past; nor does it anticipate selling such contracts in the future.

Will the sale of cotton futures commitment contracts be considered an extraordinary item?

*Reply*—Paragraphs 19–22 of Accounting Principles Board Opinion No. 30 discuss the criteria for extraordinary items. In order to be classified as an extraordinary item, an event or transaction would have to be both unusual in

nature and infrequent in occurrence. The transaction would not meet the “unusual nature” test. Making a commitment for future delivery of cotton to insure a source of supply would be part of the normal operations of a textile manufacturer. Any resulting gain or loss would therefore be considered ordinary. Although the corporation has not sold such commitment contracts in the past; nor does the corporation anticipate selling such contracts in the future, any gain realized on the sale of such a contract should not be considered an extraordinary item under APB Opinion No. 30. However, it should be shown as a separate line item in the income statement in accordance with paragraph 26 of the Opinion.

#### **.04 Reporting the Proceeds From Life Insurance on an Officer**

*Inquiry*—A company received the life insurance proceeds on the death of its president before the end of its fiscal year and intends to report the amount in its income statement as an extraordinary item. Would this be in conformity with generally accepted accounting principles?

*Reply*—No. APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, paragraph 20, states that “extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence.” The receipt of insurance proceeds from an officer’s life insurance policy is an infrequent occurrence, but it is not unusual in nature. Since it does not meet *both* the criteria of unusual and infrequent it does not qualify as an extraordinary item.

APB Opinion No. 30, paragraph 26, states “a material event or transaction that is unusual in nature *or* occurs infrequently but not both, and, therefore, does not meet both criteria for classification as an extraordinary item, should be reported as a separate component of income from continuing operations.”

#### **.05 Accounting and Disclosures Guidance for Losses From Natural Disasters—Nongovernmental Entities**

(This Technical Practice Aid identifies certain issues that may arise in accounting for losses from natural disasters, and lists relevant accounting literature for nongovernmental entities to consider in addressing those financial reporting issues.)

*Inquiry*—A natural disaster (such as a hurricane, tornado, fire, or earthquake) strikes and causes substantial damages. Though extreme in the loss of life and financial harm caused, the nature and location of the disaster may be such that one might reasonably expect that type of activity of nature to strike again in greater or lesser magnitude of damage. What are some of the accounting issues that arise and which accounting literature provides guidance for recognizing, measuring, and disclosing losses from natural disasters?

*Reply*—The following questions may arise in accounting for losses incurred as a result of a natural disaster:

1. How should losses from a natural disaster of a type that is reasonably expected to re-occur be classified in the statement of operations?
2. When should an asset impairment loss related to a natural disaster be recognized?
3. When should a liability for non-impairment losses and costs related to a natural disaster be recognized?

4. What is the accounting for insurance recoveries to cover losses sustained in a natural disaster? Also, what are the additional considerations related to business interruption insurance recoveries?
5. What are the required disclosures regarding the impact of a natural disaster?

***Issue 1—How should losses from a natural disaster of a type that is reasonably expected to re-occur be classified in the statement of operations?***

APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, defines an extraordinary item as an item that is both unusual in nature **and** nonrecurring. A natural disaster of a type that is reasonably expected to re-occur would not meet both conditions. The magnitude of loss from a particular natural disaster does not cause that disaster to be unusual in nature or unlikely to re-occur. If losses from such natural disasters meet the criteria for disclosure of unusual or infrequently occurring items in paragraph 26 of APB Opinion No. 30, they should be reported as a separate component of income from continuing operations either on the face of the statement of operations or in the notes to the financial statements.

***Issue 2—When should an asset impairment loss related to a natural disaster be recognized?***

FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides guidance on recognition and measurement of impairment losses on long-lived assets. Appendix D of FASB Statement No. 144 lists relevant authoritative literature and provides a useful roadmap to guidance relating to impairment of long-lived assets. That literature should be used to determine when an impairment loss on long-lived assets resulting from a natural disaster should be recognized and how that impairment loss should be measured.

FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan—an amendment of FASB Statements No. 5 and 15*, provides guidance on recognition and measurement of impairment losses on loans. FASB Statement No. 114 defines loan as “a contractual right to receive money on demand or on fixed or determinable dates that is recognized as an asset in the creditor’s statement of financial position.” According to paragraph 8 of this Statement, a loan is impaired when, “based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement.” In measuring impairment losses on loans, creditors should follow paragraph 13 of FASB Statement No. 114, which states, in part:

When a loan is impaired as defined in paragraph 8 of this Statement, a creditor shall measure impairment based on the present value of expected future cash flows discounted at the loan’s effective interest rate, except that as a practical expedient, a creditor may measure impairment based on a loan’s observable market price, or the fair value of the collateral if the loan is collateral dependent.

FASB Statement No. 142, *Goodwill and Other Intangible Assets*, provides guidance on recognition and measurement of impairment losses on intangible assets and goodwill.

FASB Statement No. 5, *Accounting for Contingencies*, provides guidance on recognition and measurement of impairment losses on assets not covered by specific other literature.

**Issue 3—When should a liability for non-impairment losses and costs related to a natural disaster be recognized?**

FASB Statement No. 5, paragraph 8, requires a loss accrual by a charge to income, if it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements and the amount of loss can be reasonably estimated.

Paragraph 12 of EITF 01-10, *Accounting for the Impact of the Terrorist Attacks of September 11, 2001*, references paragraph 63 of Concepts Statement 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, which provides that liabilities should be recognized when:

- a. The item meets the definition of a liability. Paragraph 35 of Concepts Statement 6 defines liabilities as “probable future sacrifices of economic benefits arising from present obligations of a particular entity to transfer assets or provide services to other entities in the future as a result of past transactions or events” (footnote references omitted).
- b. The liability can be measured with sufficient reliability.
- c. The information about the liability is capable of making a difference in user decisions.
- d. The information about the liability is representationally faithful, verifiable, and neutral.

Other authoritative literature to consider includes FASB Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, and FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*.

**Issue 4—What is the accounting for insurance recoveries to cover losses sustained in a natural disaster? Also, what are the additional considerations related to business interruption insurance recoveries?**

In accounting for insurance payments to cover losses, entities should follow the guidance in FASB Interpretation No. 30, *Accounting for Involuntary Conversions of Nonmonetary Assets to Monetary Assets*, FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts—an interpretation of APB Opinion No. 10* and FASB Statement No. 105, APB Opinion No. 30, and SOP 96-1, *Environmental Remediation Liabilities* (ACC 10,680).

FASB Interpretation No. 30 clarifies the accounting for involuntary conversions of nonmonetary assets (such as property or equipment) to monetary assets (such as insurance proceeds). It requires that a gain or loss be recognized when a nonmonetary asset is involuntarily converted to monetary assets even though an enterprise reinvests or is obligated to reinvest the monetary assets in replacement nonmonetary assets. Paragraph 4 of FASB Interpretation No. 30 states:

Gain or loss resulting from an involuntary conversion of a nonmonetary asset to monetary assets shall be classified in accordance with the provisions of APB Opinion No. 30.

Entities should follow the guidance in paragraph 3 of FASB Interpretation No. 30 (for recoveries in connection with property and casualty losses), or paragraphs 140 and 141 of SOP 96-1 (ACC 10,680.140 and .141) (for recoveries in connection with environmental obligations), as applicable. That guidance

generally requires that an asset relating to the insurance recovery should be recognized only when realization of the claim for recovery of a loss recognized in the financial statements is deemed probable (as that term is used in FASB Statement No. 5). In addition, under the requirements of paragraph 17 of FASB Statement No. 5, a gain (that is, a recovery of a loss not yet recognized in the financial statements or an amount recovered in excess of a loss recognized in the financial statements) should not be recognized until any contingencies relating to the insurance claim have been resolved (examples 7 and 8 in EITF Exhibit 01-10A provide further examples of the recognition of insurance recoveries). It is important to note that in some circumstances, losses and costs might be recognized in the statement of operations in a different (earlier) period than the related recovery.

An additional consideration relates to EITF Issue No. 01-13, *Income Statement Display of Business Interruption Insurance Recoveries*, which indicates that entities may choose how to classify such recoveries in the statement of operations, provided that classification does not conflict with existing GAAP requirements.

***Issue 5—What are the required disclosures regarding the impact of a natural disaster?***

In disclosing the impact of a natural disaster in the financial statements, entities should follow the guidance in paragraph 26 of APB Opinion No. 30 pertaining to presentation and disclosure of a material event or transaction that is unusual in nature or occurs infrequently.

As it relates to the issues covered in this Technical Practice Aid, entities also should consider the disclosure requirements of FASB Statements No. 5, No. 114, No. 142, No. 144, No. 146, SOP 96-1 (ACC 10,680), and SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (ACC 10,640).

**Section 5500****FASB Statement No. 128, Earnings per Share****.02 Earnings Per Share of Wholly-Owned Subsidiaries**

*Inquiry*—The annual report of a holding company with five wholly owned subsidiaries shows the consolidated net income and earnings per share of the companies. If the report also includes the individual income statements of the five subsidiaries, is it necessary to include individual earnings per share figures?

*Reply*—Paragraph 6 of FASB Statement No. 128, *Earnings per Share* (AC E11), does not require presentation of earnings per share in statements of wholly owned subsidiaries.

Therefore, it is not necessary to show earnings per share figures for the subsidiaries. [Amended September 1997]

**.03 Weighted Average Shares Outstanding for an Interim Period**

*Inquiry*—A company retired some of its common stock during the first quarter of its fiscal year. Should earnings per share for the interim period be based on annualized weighted average shares outstanding or the weighted average shares outstanding during the period?

*Reply*—The earnings per share computation should be based on the weighted average shares outstanding during the interim period, and not on an annualized weighted average. See the illustration in FASB Statement No. 128, *Earnings per Share*, appendix C, for an example computation of the weighted average shares outstanding for an interim period. [Amended September 1997]

**.13 Shares Held as Collateral Under Subscription Agreement**

*Inquiry*—A corporation had 150,000 shares of common stock outstanding and granted options for an additional 50,000 shares. The options were exercised, and shares were issued upon execution of a subscription agreement and a note for the total option price payable in ten annual installments. Counsel has advised that under state law shares acquired under such a subscription agreement are entitled to full vote and dividends even though they are not fully paid and are held as security under the agreement. The corporation cannot enforce payment for the shares under the agreement. If the purchaser defaults, the company just does not release the shares.

The corporation has no other options, warrants, convertible debentures or other potentially dilutive securities outstanding.

After the exercise of the options as described above, how should the earnings per share be calculated?

*Reply*—Since the shares have been issued and are merely being held as collateral in connection with the subscription agreement, and based upon the fact that the shares issued under the agreement are entitled to full vote and dividend rights, earnings per share should be computed using 200,000 shares outstanding. [Amended June 1995]

**.15 Stock Dividend Declared But Not Paid at Balance-Sheet Date**

*Inquiry*—A client declared a 5 percent stock dividend to shareholders of record in December, 19X4, payable in 19X5. In calculating the weighted average number of shares outstanding for determining the earnings per share for 19X4, how should this stock dividend apply?

*Reply*—FASB Statement No. 128, *Earnings per Share*, paragraph 54 (AC E11.147), requires the computations of basic and diluted EPS to be adjusted retroactively for all periods presented to reflect a change in capital structure resulting from a stock dividend. Therefore, the 5 percent stock dividend should be considered as being outstanding for every month of 19X4, as well as for every month of every preceding period presented. [Amended September 1997]

---

[The next page is 4891.]

## Section 5600

### Leases

#### .04 Accounting for Subleases

**Inquiry**—A corporation leased a building and, ultimately, subleased half of the space to a third party with the lease agreement between the two original parties remaining in effect. Management believed that a fairer presentation was made by netting the rental income from the sublease against its own minimum lease payments. Is the corporation properly accounting for its leased property and sublease income?

**Reply**—No. FASB Statement No. 13, *Accounting for Leases*, paragraph 39 (AC L10.135), states that the original lessee, as sublessor, shall continue to account for the obligation related to the original lease as before. The sublease shall be accounted for in accordance with FASB Statement No. 13, paragraphs 7 (AC L10.103) and 8 (AC L10.104), depending upon which of the criteria the original lease met. If the original lease is an operating lease, the original lessee shall account for both it and the new lease as operating leases.

#### .07 Determining a Lease Term for Accounting Purposes

**Inquiry**—How should a lessee and lessor determine, for accounting purposes, the lease term of a lease, which is fundamental to determining the appropriate accounting for that lease?

**Reply**—Paragraph 5f of FASB Statement No. 13, *Accounting for Leases*, as amended by paragraph 22a of FASB Statement No. 98, *Accounting for Leases*, provides a definition of “lease term,” as follows.

Lease term. The fixed noncancelable term of the lease plus (i) all periods, if any, covered by bargain renewal options (as defined in paragraph 5(e)), (ii) all periods, if any, for which failure to renew the lease imposes a penalty (as defined in paragraph 5(o)) on the lessee in such amount that a renewal appears, at the inception of the lease, to be reasonably assured, (iii) all periods, if any, covered by ordinary renewal options during which a guarantee by the lessee of the lessor's debt directly or indirectly related to the leased property\* is expected to be in effect or a loan from the lessee to the lessor directly or indirectly related to the leased property is expected to be outstanding, (iv) all periods, if any, covered by ordinary renewal options preceding the date as of which a bargain purchase option (as defined in paragraph 5(d)) is exercisable, and (v) all periods, if any, representing renewals or extensions of the lease at the lessor's option; however, in no case shall the lease term be assumed to extend beyond the date a bargain purchase option becomes exercisable. A lease that is cancelable (a) only upon the occurrence of some remote contingency, (b) only with the permission of the lessor, (c) only if the lessee enters into a new lease with the same lessor, or (d) only if the lessee incurs a penalty in such amount that continuation of the lease appears, at inception, reasonably assured shall be considered “noncancelable” for purposes of this definition.

---

\* The phrase indirectly related to the leased property is used in this paragraph to describe provisions or conditions that in substance are guarantees of the lessor's debt or loans to the lessor by the lessee that are related to the leased property but are structured in such a manner that they do not represent a direct guarantee or loan. Examples include a party related to the lessee guaranteeing the lessor's debt on behalf of the lessee, or the lessee financing the lessor's purchase of the leased asset using collateral other than the leased property

**.08 Lease Term for Accounting Purposes Differs From Term Stated in Lease (Part 1)**

*Inquiry*—Can a lease term for accounting purposes begin before an initial fixed noncancelable term stated in a lease agreement?

*Reply*—Yes. Question 1 of FASB Technical Bulletin 88-1, *Issues Relating to Accounting for Leases*, provides that a lease term for accounting purposes includes all periods in which a lessee has access to and control over leased space, even if those periods precede the fixed noncancelable term stated in the lease agreement. For example, a lease agreement is signed on January 1 but the initial fixed noncancelable term begins on April 1. The lease allows the lessee to make improvements to the leased space at any time starting after January 1. In this situation, the lease term for accounting purposes starts on January 1.

**.09 Lease Term for Accounting Purposes Differs From Term Stated in Lease (Part 2)**

*Inquiry*—Can a lease term for accounting purposes extend beyond an initial fixed noncancelable term stated in a lease agreement?

*Reply*—Yes. Paragraph 5f of FASB Statement No. 13, *Accounting for Leases*, as amended by paragraph 22a of FASB Statement No. 98, *Accounting for Leases*, identifies situations in which the lease term for accounting purposes extends beyond the fixed noncancelable term stated in a lease agreement. TIS section 5600.07 identifies those situations in paragraph 5f of FASB Statement No. 13. For example, the lease term for accounting purposes would include renewal periods that at lease inception appear reasonably assured because failure to exercise renewal periods would impose a penalty on the lessee.

**.10 Rent Expense and Rent Revenue in an Operating Lease—General**

*Inquiry*—In an operating lease, how should a lessee accrue rent expense and also recognize rent revenue?

*Reply*—Paragraph 15 of FASB Statement No. 13, *Accounting for Leases*, says that the lessee should accrue rent expense on a straight line basis over the lease term unless another systematic and rational basis is more representative of the time pattern use of the property.

Paragraph 19 of FASB Statement No. 13 says that the lessor should recognize rent revenue on a straight line basis over the lease term unless another systematic and rational basis is more representative of the time pattern use of the property.

Also see TIS section 5600.11.

**.11 Rent Expense and Rent Revenue in an Operating Lease—Scheduled Increase in Rental Space**

*Inquiry*—Related to TIS section 5600.08 and .10, assume a lessee has access to and use of one floor of a building as of the beginning of a lease agreement in year 1. In accordance with the agreement and at the start of year 3, the lessee will have access to and the ability to occupy a second floor in addition to the first floor, and will pay an additional rental fee starting at that time. In this situation, how should the lessee accrue rent expense and the lessor recognize rent revenue before the lessee is allowed to occupy the second floor?

*Reply*—Question 1 of FASB Technical Bulletin 88-1, *Issues Relating to Accounting for Leases* is the applicable guidance. In years 1 and 2, the lessee should accrue rent expense on a straight line basis (unless another systematic

and rational basis is more representative of the time pattern use of the property) for the one floor and not include the rental of the second floor in its accrual because the lessee does not have access to and control over the second floor until the start of year 3. Starting in year 3, the lessee should accrue rent expense on a straight line basis for both floors.

The lessor's accounting for revenue is parallel to that of the lessee for expense in this fact pattern.

#### **.12 Rent Expense and Rent Revenue in an Operating Lease— Rent Holiday**

*Inquiry*—A lessee has a 120 month lease for \$10,000 per month on space owned by a lessor. The lease term for accounting purposes is 120 months. As an incentive to sign the lessee to the lease agreement, the first 6 of those months are rent free. In an operating lease, if a lease term includes a period of free or reduced rent (rent holiday), how does the rent holiday factor into the lessee's recognition of rent expense and the lessor's recognition of rent revenue?

*Reply*—Paragraphs 1–2 of FASB Technical Bulletin 85-3, *Accounting for Operating Leases with Scheduled Rent Increases*, provides that the lessee should recognize rent expense of \$9,500 per month ( $\$10,000 \times 114 \text{ months} / 120 \text{ month lease term}$ ) for 120 months, which is on a straight line basis. Likewise, the lessor should recognize rent revenue of \$9,500 per month.

#### **.13 Rent Expense and Rent Revenue in an Operating Lease— Scheduled Rent Increases**

*Inquiry*—In an operating lease, how should a lessee accrue rent expense and a lessor recognize rent revenue using the straight line method (see TIS section 5600.10) when the lease agreement contains scheduled rent increases over the lease term?

*Reply*—Paragraphs 1–2 of FASB Technical Bulletin 85-3, *Accounting for Operating Leases with Scheduled Rent Increases*, provides that the lessee and lessor should add up all rental payments over the lease term and divide that number by the number of periods in the lease term to arrive at the expense/revenue amounts to be accrued/recognized on a straight line basis.

#### **.14 Amortization/Depreciation of Leasehold Improvements in an Operating Lease (Part 1)**

*Inquiry*—A lessee enters into an operating lease in which the lease term for accounting purposes is 10 years. Upon signing the lease, the lessee acquires leasehold improvements that have a useful life of 15 years. Over what period should the lessee amortize/depreciate the leasehold improvements?

*Reply*—For leasehold improvements contemplated at or near the beginning of an initial lease term, the lessee should amortize/depreciate the leasehold improvements over the shorter of the (a) useful life of the improvements or (b) remaining lease term, which is 10 years in this inquiry. If the leasehold improvements are acquired and placed in service significantly after the inception of a lease, EITF Issue No. 05-6, *Determining the Amortization Period for Leasehold Improvements Purchased after Lease Inception or Acquired in a Business Combination*, requires that the lessee amortize/depreciate leasehold improvements over the shorter of the useful life of the leasehold assets or a term that includes required lease periods and renewals that are deemed to be reasonably assured at the date the leasehold improvements are acquired. Note that EITF Issue No. 05-6 does not apply to pre-existing leasehold improvements.

**.15 Leasehold Improvements and Lease Term in an Operating Lease (Part 2)**

*Inquiry*—A lessee enters into an operating lease in which the initial fixed noncancelable term within the lease agreement is 10 years and the agreement includes three 5-year renewal periods. Upon signing the lease, the lessee plans to acquire leasehold improvements that have a useful life of 15 years. Is the lessee's plan to acquire the leasehold improvements a factor in determining the lease term for accounting purposes?

*Reply*—Yes, the lessee should consider the impact on the lease term for accounting purposes, if any, of the plan to acquire leasehold improvements. If the leasehold improvements are expected to have a significant value at the end of the initial 10 year term such that the lessee would not be willing to abandon these assets (that is, effectively incur a penalty) resulting in a renewal option being reasonably assured of being exercised, that renewal period would be added to the initial fixed noncancelable term in determining the appropriate lease term for accounting purposes.

**.16 Landlord Incentive Allowance in an Operating Lease**

*Inquiry*—A lessee enters into an operating lease in which the landlord offers an incentive allowance towards the cost of the lessee making leasehold improvements. The leasehold improvements are the lessee's assets and cost \$1 million, and the incentive allowance totals \$500,000. Should the lessee net the \$500,000 allowance received from the landlord against the \$1 million leasehold improvement asset?

*Reply*—No. In accordance with Question 2 of FASB Technical Bulletin 88-1, *Issues Relating to Accounting for Leases*, the \$500,000 allowance should be reported by the lessee as a liability and amortized straight line over the lease term as a reduction of rent expense. Therefore, the lessee's amortization/depreciation calculation is based on the \$1 million leasehold improvements.

**.17 Cash Flows Statement Presentation of Landlord Incentive Allowance in an Operating Lease**

*Inquiry*—Related to TIS section 5600.16, how should a lessee categorize expenditures for leasehold improvements and a related cash incentive allowance received from a landlord in the statement of cash flows?

*Reply*—In accordance with FASB Statement No. 95, *Statement of Cash Flows*, a lessee should report expenditures for leasehold improvements in the investing section of a statement of cash flows. Cash allowances received from the landlord should be presented in the lessee's operating activities section of its statement of cash flows. The cash allowances from the lessor are treated for accounting purposes as adjustments of rent. FASB Statement No. 95 does not identify rent payments on operating leases as investing or financing activities.

## Section 5700

### Contributions Made

#### .01 Income Tax Accounting for Contributions to Certain Nonprofit Scholarship Funding Organizations

*Inquiry*—A state's corporate income taxpayers are allowed a credit against their state corporate income tax of 100 percent of eligible contributions made during the year to a nonprofit scholarship funding organization. Unused credits may be carried forward up to three years. The taxpayer may not convey, assign, or transfer the credit to another entity unless all of the assets of the taxpayer are conveyed, assigned, or transferred in the same transaction.

Should corporate income taxpayers report contributions that qualify for the tax credit as contributions or as income tax expense in income statements prepared in accordance with generally accepted accounting principles?

*Reply*—Corporate income taxpayers should report such contributions as contributions in their income statements in accordance with FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*.

Such contributions meet the definition of a contribution in FASB Statement No. 116. Just as the federal government offering a tax deduction for such a contribution does not change the nonreciprocal nature of the gift, the fact that the state provides a dollar-for-dollar tax credit to the donor for its remittance to the scholarship funding organization does not change the nonreciprocal nature of the gift. Nor does having only the alternative of paying a corresponding, higher tax make the contribution involuntary.

FASB Statement No. 109, *Accounting for Income Taxes*, provides that total income tax expense or benefit for the year is the sum of deferred tax expense or benefit and income taxes currently payable or refundable.

#### Example

##### Assumptions:

\$100 contribution to qualified scholarship funding organization

\$5,000 federal taxable income (includes \$100 charitable contribution deduction)

Tax rate—5.5%

##### State Tax Computation:

Federal taxable income	\$5,000
Contribution	100
State taxable income	5,100
Tax rate	0.055
Pre-credit state income tax	275
Tax credit	(100)
State income taxes payable	\$175

*Journal Entries:*

Journal entries made during the year should achieve the following result:

Dr. Contributions	100
Cr. Cash	100

To record contribution to scholarship fund

Dr. Income tax expense	175
Cr. State income taxes payable	175

To record state income tax expense

## Section 6130

### ***Finance Companies***

#### **.01 Amortization of Discount on Receivables of Consumer Finance Companies**

*Inquiry*—A client in the consumer finance business loans money for short periods of time. What method should be used to amortize discounts on such loans?

*Reply*—In determining income from loans receivable which have been issued at a discount, the required method of income recognition for any such discount is the interest method, as described in FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* (AC L20), and as required by the AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraphs 2.10, 2.11, and 2.13. [Amended]

#### **.02 Method of Recognizing Revenue From Finance Charges**

*Inquiry*—A finance company would like to establish a policy of recognizing 15% of the finance charges on discount loans as revenues in the first month of the loan and recognizing the balance of such charges as yield adjustments as the receivables are liquidated. Is this an acceptable method of recognizing revenues from finance charges?

*Reply*—No. The AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 2.13, requires that the interest (actuarial) method should be used to account for interest income in accordance with FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Cost of Leases* (AC L20). In addition, FASB Statement No. 91, paragraph 5 (AC L20.104), requires that certain direct loan acquisition costs be deferred and treated as yield adjustments in applying the interest method. [Amended]

#### **.03 Method of Recognizing Revenue From Service Charges**

*Inquiry*—A company finances insurance premiums of individuals through various insurance agents. The company's policy is to receive completed premium finance agreements directly from the insurance agents. The amount financed includes a finance charge and a nonreturnable service charge. The finance charge is recognized in income by the interest method.

How should the service charge be recognized on the records of the company?

*Reply*—In accordance with the AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 2.18, the service charge should also be recognized in income over the life of the related loan as an adjustment of yield using the interest method in accordance with FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases* (AC L20). [Amended]

**.04 Method of Recognizing Revenue From Commissions on Loan Insurance**

*Inquiry*—A finance company receives commissions for loan insurance. How should the company recognize commission revenues?

*Reply*—The AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 5.21, states that the insurance commissions received by finance companies from independent insurers should be credited to a deferred income account when received and systematically amortized over the life of the related insurance contracts. The method of commission amortization should be consistent with the method of premium income recognition for that type of policy in accordance with FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises* (AC In6). [Amended]

**.05 Disclosure of Contractual Maturities of Direct Cash Loans**

*Inquiry*—AICPA Audit and Accounting Guide *Audits of Finance Companies*, paragraph 2.44, calls for disclosure of contractual maturities of direct cash loans. At December 31, 19X1, a company has only three loans outstanding of \$36,000 each, payable monthly as follows: 12 installments of \$3,000 each; 24 installments of \$1,500 each; and 36 installments of \$1,000 each. How would these contractual maturities properly be shown?

*Reply*—Appropriate disclosure of the amounts to be received would be: 19X2, \$66,000; 19X3, \$30,000; and 19X4, \$12,000. Refer to the Audit and Accounting Guide *Audits of Finance Companies*, appendix A, Note B, for an illustration of such disclosure. [Amended]

**.06 Balance Sheet Presentation of Subordinated Debt**

*Inquiry*—A consumer finance company, whose financial statements are used only by the company and its banks, would like to include subordinated debt in its balance sheet with the caption “Total Subordinated Notes and Shareholders’ Equity.” The company believes that presentation would show more clearly the position of the banks with respect to other creditors. Would the presentation be acceptable if the statements were clearly labeled, “For the Use of Banks and Bankers Only”?

*Reply*—No. Although the total of subordinated long-term debt and stockholders’ equity is important to creditors of finance companies, the prominent presentation of this total in balance sheets causes many users of financial statements to interpret this amount as total stockholders’ equity, and, for this reason, its use is not acceptable.

The proposed balance sheet presentation would not be in conformity with generally accepted accounting principles even if the financial statements are clearly and conspicuously labeled, “For the Use of Banks and Bankers Only.” [Amended]

---

[The next page is 5371.]

## Section 6140

### ***Not-For-Profit Organizations***

#### **.01 Inventory Valuation for a Not-for-Profit Scientific Organization**

*Inquiry*—A not-for-profit scientific organization produces products that are sold at a price less than cost. The difference between cost and sale proceeds is covered by contributions. The not-for-profit organization reports inventories in its financial statements at an arbitrary amount and discloses that fact on the face of the financial statements. Is this accounting appropriate?

*Reply*—No. Accounting Research Bulletin No. 43, Chapter 4, *Inventory Pricing*, paragraph 8 (AC I78.109) states:

A departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as its cost. Where there is evidence that the utility of goods, in their disposal in the ordinary course of business, will be less than cost, whether due to physical deterioration, obsolescence, changes in price levels, or other causes, the difference should be recognized as a loss of the current period. This is generally accomplished by stating such goods at a lower level commonly designated as *market*.

Accordingly, inventories should be valued at lower of cost or market and not at an arbitrary amount. The fact that the difference between the sales proceeds and the costs is covered by contributions does not change the application of the requirements of ARB No. 43 (AC I78.109). [Amended June 1995]

#### **.02 Income Recognition of Membership Dues by Not-for-Profit Organization**

*Inquiry*—A local not-for-profit organization collects membership dues and does not provide any services to its members in return for the dues. It records the dues as contributions and recognizes them as revenue in the period they are received. The organization provides services, such as seminars, group insurance, etc., to its members at an extra cost.

Is this the appropriate accounting method?

*Reply*—Yes. This organization qualifies as a not-for-profit organization under the definition in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC No5). Accordingly, FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, paragraph 8 (AC C67.108), would require that the dues be recognized as contributions revenue when received since the members receive no benefits from the dues. If the member did receive benefits from those dues, dues revenue would be recognized over the period of membership (AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, paragraph 5.16). [Amended June 1995]

#### **.03 Lapsing of Time Restrictions on Receivables That Are Uncollected at Their Due Date**

*Inquiry*—Paragraph 15 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC No5.144), provides that “receipts of unconditional promises to give with payments due in future periods shall be

reported as restricted support unless explicit donor stipulations or circumstances surrounding the receipt of a promise make clear that the donor intended it to be used to support activities of the current period. For example, receipts of unconditional promises to give cash in future years generally increase temporarily restricted net assets.” Paragraph 167 notes that “most unconditional promises to give with payments due in future periods will be recognized as temporarily restricted support with time restrictions that expire in the periods those payments are due. That recognition should avoid misunderstandings that some respondents said would occur if promises to give due in future periods were recognized as unrestricted revenue and were perceived by users of financial statements as currently available funds.”

Do time restrictions on contributions receivable lapse when the receivable is due or when it is collected?

*Reply*—Time restrictions on contributions receivable lapse when the receivable is due. (In some cases, the due date may be explicitly stated. In other cases, circumstances surrounding receipt of the contribution may make clear the implicit due date. In yet other cases, the due date may be unclear. NPOs should consider the facts and circumstances surrounding the promise to give to determine the due date, if any.)

#### **.04 Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets Are Met Before the Receivables Are Due**

*Inquiry*—Paragraph 14 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC No5.143), provides that “a restriction on an organization’s use of the assets contributed results either from a donor’s explicit stipulation or from circumstances surrounding the receipt of the contribution that make clear the donor’s implicit restriction on use.” These are purpose restrictions. Paragraph 15 provides that “receipts of unconditional promises to give with payments due in future periods shall be reported as restricted support unless explicit donor stipulations or circumstances surrounding the receipt of a promise make clear that the donor intended it to be used to support activities of the current period. For example, receipts of unconditional promises to give cash in future years generally increase temporarily restricted net assets.” These are time restrictions. Footnote 5 to paragraph 17 provides as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions is recognized in the period in which the last remaining restriction has expired. Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired. Time restrictions implied on gifts of long-lived assets expire as the economic benefits of the acquired assets are used up; that is, over their estimated useful lives. In the absence of donor stipulations specifying how long donated assets must be used or an organization’s policy of implying time restrictions, restrictions on long-lived assets, if any, or cash to acquire long-lived assets expire when the assets are placed in service.

NPOs may receive promises to give contributions that are restricted by donors for investment in long-lived assets. In some circumstances, the assets may be placed in service, and the purpose restrictions met, prior to the due date of the contribution. For example, an NPO may have a capital campaign, asking for commitments to contribute over the next five years so the organization can build a new facility. A donor may promise to give \$100,000 in five years in response to that request.

Are the restrictions met when the assets are placed in service or when the receivable is due?

**Reply**—NPOs should consider the facts and circumstances surrounding the promise to give and whether those facts and circumstances indicate that the donor intended the contribution to be used to support activities of the current period, with constructing the building or placing it in service considered activities of the current period. If circumstances indicate that the donor intended to support activities of the current period, there is no time restriction and footnote 5 of FASB Statement No. 116 (AC No5.147) would not be applicable, unless a restriction was placed on the contribution other than constructing the building. If circumstances indicate that the donor's intent is not to support activities of the current period, there are both a time restriction and a purpose restriction. In conformity with footnote 5 of FASB Statement No. 116 (AC No5.147), the effect of the expiration of restrictions is recognized in the period in which the last remaining restriction has expired.

### **.05 NPO Accounting for Loans of Cash That Are Interest Free or That Have Below-Market Interest Rates**

**Inquiry**—FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC No5), defines a *contribution* as “an unconditional transfer of cash or other assets to an entity or a settlement or cancellation of its liabilities in a voluntary nonreciprocal transfer by another entity acting other than as an owner.” Some NPOs receive loans of cash that are interest free or that have below-market interest rates.

Should interest expense and contribution revenue be reported for loans of cash to NPOs that are interest free or that have below-market interest rates?

**Reply**—Interest expense and contribution revenue should be reported in connection with loans of cash to NPOs that are interest free or that have below-market interest rates (regardless of whether the loan is between related parties). Those contributions should be measured at fair value, which is the difference between the fair value of the loan at market rates and the fair value of the loan at its stated rate. The corresponding entry would be to interest income for the donor and to interest expense for the donee.

#### *Example 1*

On January 1, 1998, an NPO with a December year end receives an interest-free loan of \$200,000, payable on December 31, 2000. The purpose of the loan is to pay operating expenses and the appropriate imputed rate of interest is 6 percent.

1/1/98

db. Cash	200,000	
cr. Loan payable		168,000
cr. Contribution revenue—restricted		32,000

(Receipt of cash; liability reported at the fair value of the loan using the present value of \$200,000 due in three years, discounted at 6 percent.)

12/31/98

db. Interest expense	10,000	
cr. Loan payable		10,000

(Accretion of loan using the effective interest method.)

db. Interest expense	12,000	
cr. Contribution revenue		12,000

(Contribution revenue for below-market rate of interest on loan [loan balance x interest rate: \$200,000 x .06].)

db. Loan payable	200,000	
cr. Cash		200,000

(Payment of the loan.)

### **.06 Functional Category of Cost of Sales of Contributed Inventory**

*Inquiry*—How should the cost of sales of contributed inventory be reported? For example, should it be reported as a separate supporting service, as program, or as fundraising?

*Reply*—Cost of sales of contributed inventory should be reported as the cost of a separate supporting service, unless the item sold is related to a program activity, in which case, cost of sales is reported as a cost of a program activity. Cost of sales of contributed inventory should not be reported as fundraising.

### **.07 Functional Category of Costs of Special Events**

*Inquiry*—Paragraph 13.06 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* provides that “fund-raising costs, including the cost of special fund-raising events, are incurred to persuade donors to make contributions to an organization and should be expensed as incurred.” Paragraph 13.30 provides that “*fund-raising activities* involve inducing potential donors to contribute money....They include publicizing and conducting fund-raising campaigns...and conducting special fund-raising events....” Paragraph 13.18 provides guidance on accounting for special events and provides that “organizations may report the gross revenues of special events and other fund-raising activities with the cost of direct benefits to donors (for example, meals and facilities rental) displayed either (1) as a line item deducted from the special event revenues or (2) in the same section of the statement of activities as are other programs or supporting services *and allocated, if necessary, among those various functions.*” [*Emphasis added.*]

Should all costs of special fund-raising events, such as costs of direct donor benefits that are provided in exchange transactions, be reported as fund-raising?

*Reply*—The discussion of special fund-raising events in paragraphs 13.06, 13.18, and 13.30 of the Guide provide that some, but not necessarily all, costs of special fund-raising events should be reported as fundraising. Certain costs of special fund-raising events, such as costs of direct donor benefits that are provided in exchange transactions, should be reported in categories other than fundraising.

**.08 Functional Category of the Costs of Direct Donor Benefits**

*Inquiry*—NPOs may hold special events that provide donor benefits. For example, an organization may hold a special event and provide a meal to donors, which would be a direct donor benefit. Paragraphs 13.17 to 13.22 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* provide guidance on reporting the costs of special events, including the costs of direct donor benefits. Paragraph 13.15 provides that, if cost of sales relates to an item that is program related, cost of sales should be reported as program expense. Otherwise, cost of sales could be reported as a separate supporting service. Also, footnote 10 to paragraph 5.12 of the Guide provides that the cost of premiums provided that are greater than nominal in value should be reported as cost of sales. However, the Guide provides no guidance concerning the functional category in which the costs of direct donor benefits should be reported in circumstances in which the benefits are not program related, beyond providing that they should be reported as a supporting service.

In which functional category should the costs of direct donor benefits that are not program related be reported?

*Reply*—The costs of donor benefits that are not program related and that are provided in exchange transactions should be reported as a separate supporting category, such as cost of sales, and should not be reported as fundraising.

The costs of donor benefits that are not program related and that are provided in transactions that are other than exchange transactions, such as a fund-raising dinner for which there is no charge to attend, should be reported as fundraising.

**.09 Reporting Bad Debt Losses**

*Inquiry*—Paragraph 20 of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC No5.118), provides that expenses should be reported as decreases in net assets.

Paragraph 25 (AC No5.122) provides that “a statement of activities may report gains and losses as net amounts if they result from peripheral or incidental transactions or from other events and circumstances that may be largely beyond the control of the organization and its management.”

Paragraph 5.56 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* provides that, if the fair value of contributions arising from unconditional promises to give cash or noncash assets decreases subsequent to initial measurement because of changes in the quantity or nature of assets expected to be received, the decrease should be recognized as expenses or losses (bad debt) in the period(s) in which the expectation changes.<sup>1</sup>

May bad debt losses be netted against contribution revenue?

*Reply*—Bad debt losses are prohibited from being netted against contribution revenue under paragraph 25 of FASB Statement No. 117 (AC No5.122) because losses are permitted to be netted only against gains, and not against revenues.

---

<sup>1</sup> The Guide's provision that certain decreases in the fair value of contributions arising from unconditional promises to give should be accounted for as losses, rather than as expenses, is an accounting convention. This convention provides that, in circumstances in which the net assets related to receivables are represented as restricted net assets, decreases in net assets should be reported as decreases in restricted net assets, rather than as decreases in unrestricted net assets.

**.10 Consolidation of Political Action Committee**

*Inquiry*—Some not-for-profit organizations are related to other not-for-profit organizations that perform political activities that the reporting organization does not wish to perform, perhaps because performing those activities may threaten the reporting organization's tax exempt status, the reporting organization is precluded from conducting such activities, or for other reasons. For example, a membership organization may establish and sponsor a political action committee (PAC) whose mission is to further the interests of the membership organization. The resources held by the PAC are used for the purposes of the membership organization and the governing board of the PAC is appointed by the board of the membership organization.

Does SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations* (ACC 10,610), require consolidation of PACs in the circumstances described above?

*Reply*—SOP 94-3 (ACC 10,610) requires consolidating PACs in the circumstances described above. Under SOP 94-3 (ACC 10,610), the threshold issues pertaining to the circumstances described above are whether there is (1) control through a majority voting interest in the board of the PAC and (2) an economic interest. In the circumstances described above, both are present. Control through a majority voting interest in the board of the PAC exists because the governing board of the PAC is appointed by the board of the membership organization. An economic interest exists because the PAC holds significant resources that must be used for the purposes of the membership organization.

**.11 Costs of Soliciting Contributed Services and Time That Do Not Meet the Recognition Criteria in FASB Statement No. 116**

*Inquiry*—Questions have arisen about the classification of costs of soliciting contributed services and time. The issue focuses on whether those costs should be reported as fundraising in all cases or whether, in circumstances in which the services or time do not meet the recognition criteria in paragraph 9 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (C67.109), those costs should be reported in the functional category to which the solicited services or time pertain.

Paragraph 28 of FASB Statement No. 117 (No5.125) defines *fund-raising activities* and provides, in part, as follows:

Fund-raising activities include publicizing and conducting fund-raising campaigns; maintaining donor mailing lists; conducting special fund-raising events; preparing and distributing fund-raising manuals, instructions, and other materials; and conducting other activities involved with soliciting contributions from individuals, foundations, government agencies, and others.

Paragraph 5 of FASB Statement No. 116 (C67.104) defines *contribution* and provides as follows:

A contribution is an unconditional transfer of cash or other assets to an entity or a settlement or cancellation of its liabilities in a voluntary nonreciprocal transfer by another entity acting other than as an owner. Other assets include securities, land, buildings, use of facilities or utilities, materials and supplies, intangible assets, services, and unconditional promises to give those items in the future.

Paragraph 13.30 of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* (Guide) elaborates on the definition of *fund-raising activities* in FASB Statement No. 117 (No5) and provides, in part, as follows:

*Fund-raising activities* involve inducing potential donors to contribute money, securities, services, materials, facilities, other assets, or time.

Paragraph 9 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (C67.109), discusses recognition criteria for contributed services and provides, in part, as follows:

Contributions of services shall be recognized if the services received (a) create or enhance nonfinancial assets or (b) require specialized skills, are provided by individuals possessing those skills, and would typically need to be purchased if not provided by donation.

Contributed services that do not meet the recognition criteria in paragraph 9 are prohibited from being recognized.

As mentioned above, questions have arisen about the classification of the costs of soliciting contributed services and time that do not meet the recognition criteria in FASB Statement No. 116 (C67).

How should the costs of soliciting contributed services that do not meet the recognition criteria in paragraph 9 of FASB Statement No. 116 (C67.109) be reported?

*Reply*—The costs of soliciting contributed services should be reported as fundraising, regardless of whether those services meet the recognition criteria in paragraph 9 of FASB Statement No. 116.<sup>2</sup> For example, costs of soliciting contributed services to be used in program functions should be reported as fundraising, even if the services do not meet the recognition criteria. Similarly, costs of soliciting management and general services should be reported as fundraising, even if the management and general services do not meet the recognition criteria.

As discussed in the basis for conclusions of FASB Statement No. 116 (C67), certain contributed services are prohibited from being recognized for practical, rather than conceptual, reasons. Those services are nevertheless contributions, regardless of whether or not they are recognized. Therefore, soliciting those contributions meets the definition of *fundraising* in Statement No. 117 (No5) and the NPO Guide.

## .12 Nondiscretionary Assistance Programs

*Inquiry*—FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*, provides guidance for transactions in which an entity—the *donor*—makes a contribution by transferring assets to a not-for-profit organization—the *recipient organization*—that accepts the assets from the donor and agrees to use those assets on behalf of or transfer those assets, the return on investment of those assets, or both to another entity—the *beneficiary*—that is specified by the donor. It also provides guidance for transactions that take place in a similar manner but are not contributions because the transfers are revocable, repayable, or reciprocal. The Statement provides that a recipient organization that (a) accepts assets from a donor without variance power and

---

<sup>2</sup> NPOs frequently incur other costs in connection with contributed services, such as costs of training and managing volunteers. Costs of training and managing volunteers should not be reported as fund-raising, unless those volunteers are performing fundraising functions.

(b) agrees to use those assets on behalf of or transfer those assets, the return on investment of those assets, or both to a specified beneficiary that is not financially interrelated is not a donee. The recipient organization should recognize its liability to the specified beneficiary concurrent with its recognition of cash or other financial assets<sup>3</sup> received from the donor. Further, the Statement provides that a nondonee recipient organization that receives nonfinancial assets is permitted, but not required, to recognize its liability and those assets provided that the organization reports consistently from period to period and discloses its accounting policy.

Paragraph 53 of the Basis for Conclusions of FASB Statement No. 116 discusses transfers that are not contributions and provides as follows:

The recipient of assets who is an agent or trustee has little or no discretion in determining how the assets transferred will be used. For example, if a recipient receives cash that it must disburse to any who meet guidelines specified by a resource provider or return the cash, those receipts may be deposits held by the recipient as an agent rather than contributions received as a donee. Similarly, if a recipient receives cash that it must disburse to individuals identified by the resource provider or return the cash, neither the receipt nor the disbursement is a contribution for the agent, trustee, or intermediary.

Some NPOs participate in activities wherein the resource provider (donor) determines the eligibility requirements for the ultimate beneficiaries and the NPO must disburse to any who meet guidelines specified by the resource provider or return the assets. In some of those programs, the NPO receives assets, such as food, food vouchers, public transportation vouchers, and cash and distributes the assets on behalf of the resource provider (donor) in exchange for a fee for performing that service.

Should recipient organization NPOs report receipts and disbursements of assets under such programs (other than any fees for performing the service) as revenues and expenses?

**Reply**—Receipts and disbursements of assets under such programs (other than any fees for performing the service) are agency transactions, and are not contributions to the recipient organization NPO. A recipient organization that receives financial assets, such as cash or vouchers that can be exchanged for cash, should recognize its liability to the beneficiaries concurrent with its recognition of financial assets received from the donor. A recipient organization that receives nonfinancial assets, such as food vouchers or public transportation vouchers that are denominated in either dollar values or in nonfinancial terms, such as pounds of food or bus rides, but that will not be settled in cash, is permitted, but not required, to recognize its liability and those assets provided that the organization reports consistently from period to period and discloses its accounting policy.

### **.13 Note to TIS Section 6140.14 to 6140.18**

#### **Implementation of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (in the Beneficiary's Financial Statements)**

---

<sup>3</sup> Footnote 5 of FASB Statement No. 136, as amended, notes that FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, defines *financial assets* as "cash, evidence of an ownership interest in an entity, or a contract that conveys to a second entity a contractual right (a) to receive cash or another financial instrument from a first entity or (b) to exchange other financial instruments on potentially favorable terms with the first entity" (paragraph 364 of FASB Statement No. 140).

Some not-for-profit organizations have separate fund-raising foundations (commonly referred to as “institutionally related foundations”) that solicit contributions on their behalf. In June 1999, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*, which (among other things) provides guidance on the accounting that should be followed by such institutionally related foundations and their related beneficiary organization(s) with respect to contributions received by the foundation. The provisions of FASB Statement No. 136 are required to be implemented in financial statements issued for fiscal periods beginning after December 15, 1999 (generally years ending December 31, 2000 and thereafter).

Some institutionally related foundations and their beneficiary organizations meet the definition of *financially interrelated organizations* provided in paragraph 13 of FASB Statement No. 136. If organizations are financially interrelated, FASB Statement No. 136 provides that the balance sheet of the beneficiary organization(s) should reflect that organization’s interest in the net assets of the foundation, and that that interest should be periodically adjusted to reflect the beneficiary’s share of the changes in the net assets of the foundation. This accounting is similar to the equity method of accounting, which is described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

Paragraph 6(b) of APB Opinion No. 18 requires that the periodic adjustment of the investment be included in the determination of the investor’s net income. The purpose of TIS section 6140.14 through .18 (applicable to not-for-profit organizations [NPO] other than health care [HC] organizations) and TIS section 6400.36 through .42 (applicable to not-for-profit health care organizations) is to clarify that in circumstances in which the recipient and the beneficiary are financially interrelated—

- Beneficiary organizations should segregate the adjustment into changes in restricted and unrestricted net assets. (NPO TPA [TIS section 6140.14, .15, and .16]; HC TPA [TIS section 6400.36, .37, and .39])
- In circumstances in which the beneficiary can influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient organization should be transparent in determining the net asset classifications in the beneficiary’s financial statements. In other words, the recipient cannot impose time or purpose restrictions beyond those imposed by the donor. (NPO TPA [TIS section 6140.14 and .16]; HC TPA [TIS section 6400.36 and .39])
- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient organization creates an implied time restriction on the beneficiary’s net assets attributable to the beneficiary’s interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of the recipient organization and the changes in that interest, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions). (NPO TPA [TIS section 6140.15]; HC TPA [TIS section 6400.37])

- In circumstances in which the beneficiary can influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions [for example, net assets of the recipient restricted to the beneficiary's purchase of property, plant, and equipment (PPE)], expenditures by the beneficiary that meet those purpose restrictions result in the beneficiary (and recipient) reporting reclassifications from temporarily restricted to unrestricted net assets (assuming that the beneficiary has no other net assets subject to similar purpose restrictions), unless those net assets are subject to time restrictions that have not expired, including time restrictions that are implied on contributed long-lived assets as a result of the beneficiary's accounting policy pursuant to paragraph 16 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*. (If those net assets are subject to time restrictions that have not expired and the beneficiary has other net assets with similar purpose restrictions, the restrictions on those other net assets would expire in conformity with FASB Statement No. 116. These TPAs do not, however, establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or purpose restrictions on net assets held by the beneficiary.) (NPO TPA [TIS section 6140.17]; HC TPA [TIS section 6400.40])
- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions, though not subject to time restrictions other than the implied time restrictions that exist because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, expenditures by the beneficiary that are consistent with those purpose restrictions should not result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets, subject to the exceptions in the following sentence. Expenditures by the beneficiary that are consistent with those purpose restrictions should result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets if (a) the recipient has no discretion in deciding whether the purpose restriction is met<sup>4</sup> or (b) the recipient distributes or obligates itself to distribute to the beneficiary amounts attributable to net assets restricted for the particular purpose, or otherwise indicates that the recipient intends for those net assets to be used to support the particular purpose as an activity of the current period. In all other circumstances, (a) purpose restrictions and (b) implied time

---

<sup>4</sup> In some circumstances, the purpose restrictions may be so broad that the recipient organization has discretion in deciding whether expenditures by the beneficiary that are consistent with those purpose restrictions actually meet those purpose restrictions. For example, the recipient's net assets may have arisen from a contribution that was restricted for the beneficiary's purchase of research equipment, with no particular research equipment specified. Purchasing an XYZ microscope, which is consistent with that purpose restriction, may or may not meet that purpose restriction, depending on the decision of the recipient. In contrast, the net assets may have arisen from a contribution that was restricted for an XYZ microscope. Purchasing an XYZ microscope, which also is consistent with that purpose restriction, would result in the recipient having no discretion in determining whether that purpose restriction is met.

restrictions on the net assets attributable to the interest in the recipient organization exist and have not yet expired. (However, if the beneficiary has other net assets with similar purpose restrictions, those restrictions would expire in conformity with FASB Statement No. 116. These TPAs do not establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary.) (NPO TPA [TIS section 6140.18]; HC TPA [TIS section 6400.41])

- For HC NPOs Only—In circumstances in which the beneficiary can influence the financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, changes in the beneficiary's interest in the net assets of a recipient organization attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in conformity with chapters 4 and 10 of the AICPA Audit and Accounting Guide *Health Care Organizations*, in the same manner that they would have been had the beneficiary had the transactions itself. Similarly, in applying the guidance in chapters 4 and 10, the determination of whether amounts are included or excluded from the performance measure should comprehend that if the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, an implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in circumstances in which the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [TIS section 6400.42])
- For HC NPOs Only—In circumstances in which the recipient organization and the beneficiary are both controlled by the same organization, entities should consider the specific facts and circumstances to determine whether the beneficiary can influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary. (HC TPA [TIS section 6400.38])

**Technical Practice Aids for Not-for-Profit Organizations**

HC NPOs			
NPOs that are not HC NPOs			
Can the beneficiary determine the timing and amount of distributions from the recipient to the beneficiary? [Not-for-profit health care organizations (HC NPOs) under common control consider HC Technical Practice Aid (TPA) TIS section 6400.38]	How does the existence of the recipient affect the beneficiary's reporting of its interest?	Are any net assets held by the recipient for the benefit of the beneficiary subject to donor-imposed purpose restrictions and has the beneficiary made expenditures that meet those purpose restrictions (in circumstances in which the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary) or that are consistent with those purpose restrictions (in circumstances in which the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary)?	Are any changes in the beneficiary's interest in the net assets of the recipient attributable to unrealized gains and losses on investments?
Yes	Existence of recipient is transparent in determining net asset classifications. (NPO TPA [TIS section 6140.14 and .16]; HC TPA [TIS section 6400.36 and .39])	Reclass the applicable net assets from temporarily restricted (TR) to unrestricted (UR) unless those net assets are subject to time restrictions that have not expired. (NPO TPA [TIS section 6140.17]; HC TPA [TIS section 6400.40])	Changes in the beneficiary's interest in the net assets of a recipient organization attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in conformity with chapters 4 and 10 of the HC Guide in the same manner that they would have been had the beneficiary had the transactions itself. (HC TPA [TIS section 6400.42])

(continued)

No	Existence of the recipient creates an implied time restriction on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. (NPO TPA [TIS section 6140.15]; HC TPA [TIS section 6400.37])	Reclass the applicable net assets from TR to UR only if the purpose restriction and the implied time restriction are met. Whether the purpose restriction is met depends in part on (1) whether the recipient has discretion in determining whether the purpose restriction is met and (2) the recipient's decision in exercising that discretion, if any. (NPO TPA [TIS section 6140.18]; HC TPA [TIS section 6400.41])	An implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. The beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [TIS section 6400.42])

**.14 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary can influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)**

*Inquiry*—ABC Research Institute, a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*,<sup>5</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

During its most recent fiscal year, ABC Foundation's activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation distributed \$2,500 in cash representing unrestricted net assets to ABC Research Institute. How should this activity be reported in ABC Research Institute's financial statements?

*Reply*—Because ABC Foundation (the recipient organization) and ABC Research Institute (the beneficiary) are financially interrelated, paragraph 15 of FASB Statement No. 136 requires ABC Research Institute to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

<sup>5</sup> This TPA addresses not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*. TIS section 6400.36 addresses a similar issue for not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Research Institute should classify the resulting net assets as if contributions were received by ABC Research Institute directly from the donor, because ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Research Institute's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

In the circumstances described above, ABC Research Institute would initially increase its asset, "Interest in Net Assets of ABC Foundation" for the change in ABC Foundation's net assets (\$3,200). ABC Research Institute's Statement of Activity would include "Change in Unrestricted Interest in ABC Foundation" of \$2,200, which would be reported as an increase in unrestricted net assets, and "Change in Temporarily Restricted Interest in ABC Foundation" of \$1,000 as an increase in temporarily restricted net assets.

The \$2,500 distribution from ABC Foundation to ABC Research Institute would not be reported as an increase in net assets on ABC Research Institute's Statement of Activity. By analogy to equity method accounting, the \$2,500 would be reported in a manner similar to a distribution from a subsidiary to its parent (i.e., a dividend). ABC Research Institute should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

If the distribution represented restricted net assets, ABC Research Institute would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Research Institute would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met.

**.15 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary cannot influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)**

*Inquiry*—ABC Research Institute, a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*,<sup>6</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

---

<sup>6</sup> This TPA addresses not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*. TIS section 6400.37 addresses a similar issue for not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*.

During its most recent fiscal year, ABC Foundation's activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation elected to distribute \$2,500 in cash representing unrestricted net assets to ABC Research Institute. How should this activity be reported in ABC Research Institute's financial statements?

*Reply*—Because ABC Foundation (the recipient organization) and ABC Research Institute (the beneficiary) are financially interrelated, paragraph 15 of FASB Statement No. 136 requires ABC Research Institute to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

ABC Research Institute cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. Therefore, an implied time restriction exists on ABC Research Institute's interest in the net assets of ABC Foundation (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Research Institute should classify the resulting net assets as changes in temporarily restricted net assets (unless donors placed permanent restrictions on their contributions).

In the circumstances described above, ABC Research Institute would initially increase its asset, "Interest in Net Assets of ABC Foundation" for the change in ABC Foundation's net assets (\$3,200). ABC Research Institute's Statement of Activity would include "Change in Temporarily Restricted Interest in ABC Foundation" of \$3,200 as an increase in temporarily restricted net assets.

The \$2,500 distribution from ABC Foundation to ABC Research Institute would not be reported as an increase in net assets on ABC Research Institute's Statement of Activity. By analogy to equity method accounting, the \$2,500 would be treated similar to a distribution from a subsidiary to its parent (i.e., a dividend). ABC Research Institute should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

ABC Research Institute would reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution, because the time restriction would expire at the time of the distribution. (If those net assets were subject to purpose or time restrictions that remained even after the net assets had been distributed to ABC Research Institute, ABC Research Institute would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Research Institute would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met.)

- .16 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (More Than One Beneficiary—Some Contributions Are Designated)**

*Inquiry*—DEF Arts Organization is the parent of three brother-sister not-for-profit organizations: Ballet, Orchestra, a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*,<sup>7</sup> and Foundation. Foundation is organized for the purpose of raising contributions for the benefit of both Ballet and Orchestra. The four entities are legally separate not-for-profit organizations that are financially interrelated pursuant to the guidance in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. Assume that Orchestra can influence the financial decisions of Foundation to such an extent that Orchestra can determine the timing and amount of distributions from Foundation to Orchestra.

A donor contributes \$5,000 cash to Foundation and stipulates that the contribution is for the benefit of Orchestra. Foundation would record the contribution as temporarily restricted revenue (because Foundation must use the contribution for the benefit of Orchestra). In its separately issued financial statements, Orchestra would recognize its interest in the net assets attributable to that contribution by debiting “Interest in Net Assets of Foundation” for \$5,000. Would the offsetting credit be reported as temporarily restricted revenue (because the net assets attributable to the contribution are restricted on Foundation’s Balance Sheet) or unrestricted revenue (because there are no donor-imposed time restrictions or purpose restrictions on how Orchestra must use the contribution)?

*Reply*—Orchestra should report the offsetting credit as unrestricted revenue. Because Orchestra can influence the financial decisions of Foundation to such an extent that Orchestra can determine the timing and amount of distributions from Foundation to Orchestra, no implied time restriction exists on Orchestra’s net assets attributable to its interest in the net assets of Foundation. Accordingly, in recognizing its interest in the net assets of Foundation and the changes in that interest, Orchestra should classify the resulting net assets as if contributions were received by Orchestra directly from the donor. In other words, the existence of Foundation should be transparent in determining the net asset classifications in Orchestra’s separately issued financial statements because Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by Foundation are designations, rather than restrictions.)

Because there are no donor-imposed restrictions on how Orchestra must use the contribution, Orchestra should report the change in its interest in the net assets attributable to the contribution as an increase in unrestricted net assets in its separately issued Statement of Activity. When Foundation actually distributes the funds, Orchestra should increase cash and decrease its interest in net assets of Foundation; the distributions would have no effect on Orchestra’s Statement of Activity.

**17 Application of FASB Statement No. 136—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that meets a purpose restriction on net assets held for its benefit by the**

---

<sup>7</sup> This TPA addresses not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*. TIS section 6400.39 addresses a similar issue for not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*.

**recipient organization—The beneficiary can influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)**

*Inquiry*—ABC Research Institute, a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*,<sup>8</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of property, plant, and equipment (PPE) by ABC Research Institute. ABC Research Institute has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily restricted net assets. ABC Research Institute's accounting policy is to not imply a time restriction that expires over the useful life of the donated long-lived assets pursuant to paragraph 16 of FASB Statement No. 116 and it has no other net assets restricted for the purchase of PPE.<sup>9</sup> ABC Research Institute subsequently purchased and placed into service \$3,000,000 of PPE that meets those donor restrictions prior to receiving a distribution from ABC Foundation. Should ABC Research Institute reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the \$3,000,000 of PPE?

*Reply*—Because ABC Foundation (the recipient organization) and ABC Research Institute (the beneficiary) are financially interrelated, paragraph 15 of FASB Statement No. 136 requires ABC Research Institute to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Research Institute should classify the resulting net assets as if contributions were received by ABC Research directly from the donor, because ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. Accordingly, the net assets representing contributions restricted for the purchase of PPE should be reported as temporarily restricted net assets (purpose restricted) in ABC Research Institute's financial

<sup>8</sup> This TPA addresses not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*. TIS section 6400.40 addresses a similar issue for not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*.

<sup>9</sup> The assumption that ABC Research Institute has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

statements. Upon purchasing and placing into service the PPE, ABC Research Institute (and ABC Foundation) should reclassify \$3,000,000 from temporarily restricted to unrestricted net assets.<sup>10</sup> In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Research Institute's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

- .18 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that is consistent with a purpose restriction on net assets held for its benefit by the recipient organization—The beneficiary cannot influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)**

*Inquiry*—ABC Research Institute, a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*,<sup>11</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of property, plant, and equipment (PPE) by ABC Research Institute. ABC Research Institute has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily restricted net assets. ABC Research Institute has no other net assets restricted for the purchase of PPE.<sup>12</sup>

---

<sup>10</sup> In this fact pattern, ABC Research Institute's interest in the net assets of ABC Foundation is subject to only purpose restrictions because the net assets arose from cash contributions with no time restrictions. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to time restrictions in addition to the purpose restrictions. In determining whether net assets that arose from promises to give are subject to time restrictions, NPOs should consider the guidance in TIS section 6140.04, "Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets Are Met Before the Receivables Are Due," which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due.

<sup>11</sup> This TPA addresses not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*. TIS section 6400.41 addresses a similar issue for not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*.

<sup>12</sup> The assumption that ABC Research Institute has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

ABC Research Institute subsequently built and placed into service the New Modern Wing of the Research Building prior to receiving a distribution from ABC Foundation or any indication that it intends to support building and placing into service the New Modern Wing of the Research Building. Should ABC Research Institute reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the \$3,000,000 of PPE?

*Reply*—From ABC Research Institute’s perspective, its interest in the net assets of ABC Foundation has two restrictions—a purpose restriction (the purchase of the PPE) and an implied time restriction. (ABC Research Institute cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute, including distributions pertaining to expenditures by ABC Research Institute that meet the donor-imposed purpose restrictions. Therefore, an implied time restriction exists on ABC Research Institute’s interest in the net assets of ABC Foundation.) Footnote 5 to paragraph 17 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, provides, in part, as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions is recognized in the period in which the last remaining restriction has expired. Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

In considering whether the purpose restriction on ABC Research Institute’s interest in the net assets of ABC Foundation is met, ABC Research Institute should determine whether ABC Foundation has discretion in deciding whether an expenditure by ABC Research Institute that is consistent with the purpose restriction satisfies that purpose restriction. For example, if the restricted net assets arose from a contribution that was restricted for “building projects of ABC Research Institute,” with no particular building project specified, purchasing and placing into service the New Modern Wing of the Research Building is consistent with the purpose restriction but may or may not meet it, because ABC Foundation has some discretion in deciding which building project releases the purpose restriction. In other words, ABC Foundation may, at its discretion, either release restricted net assets in support of building the New Modern Wing of the Research Building or not, because the purpose restriction imposed by the donor was broad enough to give ABC Foundation discretion in deciding which building projects meet the purpose restriction. If ABC Foundation has such discretion, a purpose restriction and an implied time restriction on ABC Research Institute’s interest in the net assets of ABC Foundation exist. Therefore, ABC Research Institute should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Wing of the Research Building unless ABC Foundation distributes or obligates itself to distribute to ABC Research Institute amounts attributable to net assets restricted for the purchase of PPE by ABC Research Institute, or ABC Foundation otherwise indicates that it intends for those net assets to be used to support the building and placing into service the New Modern Wing of the Research

Building as an activity of the current period (assuming that ABC Research Institute had no other net assets that were restricted for the purchase of PPE).<sup>13, 14</sup>

In contrast to the example in the previous paragraph, if the restricted net assets arose from a contribution that was restricted for “building and placing into service the New Modern Wing of the Research Building,” ABC Foundation has no discretion in deciding whether that purpose restriction is met by building and placing into service the New Modern Wing of the Research Building. Therefore, if ABC Research Institute builds and places into service the New Modern Wing of the Research Building, the purpose restriction is met (assuming that ABC Research Institute had no other net assets that were restricted for building and placing into service the New Modern Wing). In addition, the implied time restriction is met because ABC Foundation is required to distribute the funds to ABC in order to meet the donor’s stipulations. Therefore, ABC Research Institute (and ABC Foundation) should reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Wing of the Research Building.

In summary, ABC Research Institute should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Wing of the Research Building until both the purpose restriction and the implied time restriction are

---

<sup>13</sup> In this fact pattern, the expenditure is made prior to meeting the purpose restriction and the implied time restriction that exists because ABC Research Institute cannot determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. The second sentence of footnote 5 to paragraph 17 of FASB Statement No. 116 provides that in circumstances in which both purpose and time restrictions exist, expenditures meeting the purpose restriction must be made simultaneous with or after the time restriction has expired in order to satisfy both the purpose and time restriction and result in a reclassification of net assets from temporarily restricted to unrestricted. In other words, time restrictions, if any, must be met before expenditures can result in purpose restrictions being met. In this fact pattern, however, the time restriction is an implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, rather than an implied time restriction that exists because a promise to give is due in a future period or because of an explicit donor stipulation. Accordingly, in this fact pattern, temporarily restricted net assets with implied time restrictions are available to support expenditures made before the expiration of the time restrictions and the net assets should be reclassified from temporarily restricted to unrestricted in the period in which the last remaining restriction has expired. In other words, in this fact pattern, if the expenditure that meets the purpose restriction is made before meeting the implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, all the restrictions should be considered met once the implied time restriction is met.

<sup>14</sup> In this fact pattern, ABC Research Institute’s interest in the net assets of ABC Foundation is subject to an implied time restriction that exists because ABC Research Institute cannot determine the timing and amount of distributions from ABC Foundation to ABC Research Institute and a purpose restriction. Because the net assets arose from cash contributions with no other donor-imposed time restrictions, no time restrictions other than those imposed by ABC Foundation exist. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to donor-imposed time restrictions in addition to the time restriction imposed by ABC Foundation and the purpose restriction. In determining whether net assets that arose from promises to give are subject to donor-imposed time restrictions in addition to the time restrictions imposed by ABC Foundation, NPOs should consider the guidance in TIS section 6140.04, “Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets Are Met Before the Receivables Are Due,” which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due. In circumstances in which the net assets are subject to (a) donor-imposed time restrictions in addition to the (b) implied time restrictions that exist because ABC Research Institute cannot determine the timing and amount of distributions from ABC Foundation to ABC Research Institute and (c) purpose restrictions, the last remaining time restriction should be considered in applying the guidance in footnote 5 to paragraph 17 of FASB Statement No. 116 that provides that temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

met. If both the purpose restriction and the implied time restriction are met, ABC Research Institute should decrease its interest in the net assets of ABC Foundation and increase cash (or a receivable, if the Foundation has merely obligated itself to make the distribution) by the amount of the distribution, and simultaneously reclassify the same amount from temporarily restricted net assets to unrestricted net assets.

**.19 Application of FASB Statement No. 136—Classification of Distributions From a Financially Interrelated Fund-Raising Foundation (Recipient Organization) to a Health Care Beneficiary**

*Inquiry*—How should a fund-raising foundation (recipient), a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, report (in its separately issued financial statements) distributions to a financially interrelated beneficiary that is a health care organization? In other words, should such distributions be reported following (a) the guidance on reporting transfers among affiliated health care organizations in Chapter 11 of the AICPA Audit and Accounting Guide *Health Care Organizations*, or (b) the guidance in the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* (NPO Guide).

*Reply*—The NPO Guide applies to all not-for-profit organizations, except those that are providers of health care services (paragraphs 1.01–1.04 of the NPO Guide). Therefore, the guidance in *Health Care Organizations*, generally does not apply to financial statements of recipient organizations that are financially interrelated fund-raising foundations. The foundation should follow the accounting and reporting requirements of the NPO Guide, rather than *Health Care Organizations*, in the foundation's separately issued financial statements. The foundation should report distributions to beneficiary organizations as expenses or distributions to related organizations. The guidance in the previous sentence applies regardless of whether the recipient organization and the beneficiary are under common control or whether one controls the other in a parent-subsidiary relationship.

**.20 NPOs Reporting No Fund-Raising Expenses**

*Inquiry*—Some not-for-profit organizations (NPOs) with contributions report no fund-raising expense. Paragraph 13.34 of the AICPA's Audit and Accounting Guide *Not-for-Profit Organizations* (NPO Guide) provides that the financial statements should disclose total fund-raising expense. Do circumstances exist in which an NPO could have contributions but minimal or no fund-raising expense?

*Reply*—It would be unusual for an NPO to have contributions but have minimal or no fund-raising expense. Examples of circumstances in which an NPO could have contributions but minimal or no fund-raising expense typically include those in which (a) because of name recognition or custom, donors contribute to the NPO without the NPO undertaking fund-raising activities,<sup>15</sup> (b) fund-raising activities related to those contributions are conducted entirely or almost entirely by volunteers whose contributed services do not meet the recognition criteria for contributed services in paragraph 9 of FASB Statement

---

<sup>15</sup> Fund-raising activities include, but are not limited to, compensating another entity for raising funds on behalf of the NPO, such as circumstances in which the fund-raising entity retains an administrative fee for raising funds on behalf of the NPO.

No. 116, or (c) other organizations that the NPO does not control<sup>16</sup> contribute to the NPO with the NPO undertaking minimal or no fund-raising activity or other participation in relation to those contributions.<sup>17, 18</sup> Examples of circumstances in which an NPO with contributions may have no fund-raising expense or minimal fund-raising expense in relation to contributions include:

- A religious organization obtains most or all of its contributions from member tithing.
- Most or all contributions arise from volunteers making phone calls or writing letters on the organization's behalf (and this volunteer activity does not meet the recognition criteria for contributed services in paragraph 9 of FASB Statement No. 116).
- An organization has no paid staff, and most or all contributions arise from uncompensated board members soliciting contributions (and this board member activity does not meet the recognition criteria for contributed services in paragraph 9 of FASB Statement No. 116).
- The reporting organization is a private foundation or is supported by a private foundation, and the reporting organization expends no or minimal resources in soliciting those contributions.
- The reporting organization obtains most or all of its contributions from one or more organizations that it does not control (fund-raising NPO), expends minimal resources, and has minimal participation in soliciting those contributions.<sup>19</sup> For example:
  - NPO Relief and Development Organization is one of many entities devoted to cause ABC. NPO Relief and Development Organization receives most or all of its contributions from Relief and Development Organizations in the USA, Canada, and the United Kingdom that raise support for cause ABC throughout the world.
  - NPO Religious Organization Denomination International Mission Board receives a substantial portion of its support from the NPO Religious Organization Denomination, which supports various entities and causes, including but not limited to NPO Religious

<sup>16</sup> SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations* (ACC 10,610), defines control as "the direct or indirect ability to determine the direction of management and policies through ownership, contract, or otherwise."

<sup>17</sup> As discussed in paragraph 13.58 of the NPO Guide, "Federated fund-raising organizations solicit and receive designated and undesignated contributions and make grants and awards to other organizations. The fund-raising activities of these organizations, including activities related to fund-raising on behalf of others, should be reported as fund-raising expenses."

<sup>18</sup> As discussed in TIS section 6140.22, "In Circumstances in Which the Reporting NPO Undertakes a Transaction in Which Another NPO (Fund-Raising NPO) Raises Contributions on Behalf of the Reporting NPO, and the Reporting NPO Compensates the Fund-Raising NPO for Raising Those Contributions (Compensation Including, But Not Limited to, an Administrative Fee), Should the Reporting NPO Report the Fund-Raising NPO's Compensation Gross as Fund-Raising Expenses, or Net, as a Reduction of Contributions?," reporting NPOs should report fund-raising expenses for compensation to a fund-raising NPO acting as an agent or intermediary in circumstances in which the fund-raising NPO acting as an agent or intermediary retains an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen organization. That fact pattern is an example of a circumstance in which other organizations that the NPO does not control contribute to the NPO (through an agent or intermediary) with the NPO undertaking minimal or no fund-raising activity or other participation in relation to those contributions, and the NPO would report fund-raising expense.

<sup>19</sup> Footnote 4, in referring to TIS section 6140.22, discusses a circumstance in which other organizations that the NPO does not control contribute to the NPO (through an agent or intermediary) with the NPO undertaking minimal or no fund-raising activity or other participation in relation to those contributions, and the NPO would report fund-raising expense.

Organization Denomination International Mission Board. NPO Religious Organization Denomination allocates, at its discretion, X percent of its contributions from supporting churches and individuals to NPO Religious Organization Denomination International Mission Board.

The reporting NPO should consider, however, whether it is required to make financial statement disclosures required by FASB Statement No. 57, *Related Party Disclosures*, and AICPA SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (ACC 10,640).

**.21 Should an NPO Report Amounts Charged to the NPO by a Professional Fund-Raiser Gross, as Fund-Raising Expenses, or Net, as a Reduction of Contributions?**

*Inquiry*—In circumstances in which a professional fund-raiser charges an NPO for soliciting contributions on the NPO's behalf, should the NPO report amounts charged to the NPO by the professional fund-raiser gross, as fund-raising expense, or net, as a reduction of contributions?

*Reply*—In circumstances in which a professional fund-raiser charges an NPO for soliciting contributions on the NPO's behalf, the NPO should report the amounts charged to the NPO by the professional fund-raiser gross, as fund-raising expense. As discussed in paragraph 13.18 of the AICPA's Audit and Accounting Guide *Not-for-Profit Organizations* (NPO Guide) and paragraph 24 of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*, revenues and expenses should be reported gross (except for investment revenues and related expenses, which are permitted to be reported net of related expenses, as discussed in paragraphs 8.10 and 13.27 of the NPO Guide), while gains and losses may be reported net. Accordingly, in circumstances in which an NPO incurs expenses by hiring a professional fund-raiser to solicit contributions on its behalf, the NPO should report those contributions and expenses gross, rather than net. For example, assume NPO A enters into a transaction with Professional Fund-Raiser B, whereby Professional Fund-Raiser B solicits contributions on behalf of NPO A, for a fee of 20 percent of contributions raised. Professional Fund-Raiser B raises \$100,000 and remits \$80,000 to NPO A after retaining its fee of \$20,000. NPO A should report \$100,000 contribution revenue and \$20,000 fund-raising expense.

**.22 In Circumstances in Which the Reporting NPO Undertakes a Transaction in Which Another NPO (Fund-Raising NPO) Raises Contributions on Behalf of the Reporting NPO, and the Reporting NPO Compensates the Fund-Raising NPO for Raising Those Contributions (Compensation Including, But Not Limited to, an Administrative Fee), Should the Reporting NPO Report the Fund-Raising NPO's Compensation Gross, as Fund-Raising Expenses, or Net, as a Reduction of Contributions?**

*Inquiry*—In some circumstances, a federated fund-raising organization (or other NPO) (fund-raising NPO) acts as an agent or intermediary rather than a donee. For example, in circumstances in which the fund-raising NPO receives resources from donors who stipulate that those resources should be transferred to a specified NPO, the fund-raising NPO acts as an agent or intermediary

rather than a donee.<sup>20</sup> The NPO compensates the fund-raising NPO acting as an agent or intermediary. (Such compensation includes, but is not limited to, the fund-raising NPO retaining an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen organization.) Should the reporting NPO report the compensation to the fund-raising NPO acting as an agent or intermediary gross, as fund-raising expenses, or net, as a reduction of contributions?

*Reply*—The reporting NPO should report fund-raising expenses for the compensation to the fund-raising NPO acting as an agent or intermediary in circumstances in which the reporting NPO compensates the fund-raising NPO acting as an agent or intermediary for raising contributions on behalf of the reporting NPO. (Such compensation includes, but is not limited to, the fund-raising NPO acting as an agent or intermediary retaining an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen organization.) Accordingly, the reporting NPO should report the amount retained as compensation by the fund-raising NPO acting as an agent or intermediary gross as fund-raising expenses and report contributions for the gross amount contributed from the donor to the fund-raising NPO acting as an agent or intermediary for the benefit of the reporting NPO.

Paragraphs 25–28 of Appendix A, “Illustrative Guidance,” of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust Raises or Holds Contributions for Others*, discuss, among other matters, circumstances in which a federated fund-raising organization acts as an agent or intermediary, rather than a donee, in raising contributions in which the donor specifies the organization to which the contribution should be transferred. As discussed in paragraph 27 of FASB Statement No. 136, in circumstances in which the federated fund-raising organization charges an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen organization, the beneficiaries should report the gross amount of the contributions as contribution revenue and the administrative fees withheld by the federated fund-raising organization as expenses. The guidance in paragraphs 25–28 of FASB Statement No. 136 would also apply if the fund-raising NPO were other than a federated fund-raising organization. Also, in functionalizing the administrative fees reported as expenses, the reporting NPO beneficiary would classify those expenses as fund-raising.

---

[The next page is 5521.]

---

<sup>20</sup> In some circumstances, the fund-raising NPO receives resources from donors without stipulations or with stipulations sufficiently broad such that the fund-raising NPO acts as a donee, rather than as an agent or intermediary.

## Section 6300

### ***Insurance Companies***

#### **.01 Recognition of Commission Income by Insurance Agency**

*Inquiry*—Insurance agents and brokers receive commissions on the insurance policies that they place for their clients with insurance companies. Commissions consist of a percentage of the premiums that the clients pay for the policies. On policies that are cancelled before the end of their term, usually one year, the insurance company charges back the portion of the commissions related to the unearned premiums to the originating agent or broker. In addition, some brokers may receive contingent commissions from underwriters based on the profitability of policies placed with an underwriter. How should an insurance agent or broker account for revenue from such commissions?

*Reply*—Commissions should be recognized on the date on which (a) the client is afforded protection under the policy (effective date), (b) the premium due under the policy can be reasonably estimated, and (c) the premium is billable to the client. A provision should be made for expected adjustments relating to policy cancellations when they can be reasonably estimated in accordance with FASB Statement No. 5, *Accounting for Contingencies* (AC C59). Contingent commissions should generally be recognized when the insurance agent or broker is notified by the underwriter of the amount to be received. [Amended]

#### **.02 Method of Recognizing Revenue From Commissions on Credit Life Insurance**

*Inquiry*—Under arrangements with a lending institution, an insurance agency provides credit life insurance to mortgagors. The borrower pays the premium for the entire term of the insurance (as much as eight years) when the loan is made, and the insurance agency remits to the insurance company this entire sum less a commission.

Should this commission income be recognized when it is received, or should it be recognized over the term of the policy?

*Reply*—Generally, credit life insurance appears to have more of the characteristics of casualty insurance than it does of life insurance. In particular, from the agent's viewpoint, payment for the policy usually occurs in a lump sum from which agent commissions are deducted. Generally, the efforts of the agency in connection with any individual policy terminate when collection is made or, at least, when the proceeds from the collections are remitted to the insurance company. It would therefore seem that the recognition of income should occur when proceeds of the policy are received.

However, as there is a potential liability for returned premiums, it would appear that a reasonable allowance should be provided at this time for estimated commissions on the portion of the policies that may be cancelled in future years. Most finance companies should have adequate statistics upon which to base such estimates. If the finance company is new, there may be statistics available from similar enterprises.

**.03 Recognition of Income on Unclaimed Refunds Due Policyholders on Policy Cancellations**

*Inquiry*—An insurance agency has a material amount of accounts payable legally due to policyholders who have cancelled their insurance prior to the end of the policy term. The company does not notify these policyholders that these amounts are due them. When, if ever, should these credits be taken into income?

*Reply*—These accounts payable should continue to be reported as liabilities until such time as the individuals involved legally lose their claim to these amounts. Legal counsel should be consulted for an opinion as to whether these amounts would have to be paid over to the state under an escheat law.

Consideration should also be given to the appropriateness of notifying these policyholders that this money is due them.

**.04 Reserve for Future Claims of Title Insurance Company**

*Inquiry*—A title insurance company must place part of its premiums in a reserve for future claims. When should this reserve be recognized as income?

*Reply*—The jurisdiction under which a title insurance company operates usually requires that a stipulated percentage of premiums collected must be deferred in an unearned premium account. Generally, the unearned premium is taken into income over a ten-year period since most claims against title policies tend to occur during this ten-year period. However, actual claims are not charged to the unearned premium account. Actual claims are charged against income (title claims account) with the credit to “Reserve for Claims.” The reserve for claims represents reported claims that have surfaced. The unearned premium account is intended to cover unsurfaced claims.

---

The AICPA staff, helped by industry experts, released a set of technical questions and answers (Q&As) on financial accounting and reporting issues related to Statement of Position (SOP) 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870). Q&As will be housed in the AICPA publication titled *Technical Practice Aids*, copies of which are available through the AICPA order department at (888) 777-7077. In addition, the Q&As will be placed in the accounting standards part of the AICPA Web site ([www.aicpa.org/members/div/acctstd/general/othitem/htm](http://www.aicpa.org/members/div/acctstd/general/othitem/htm)). Adoption of this guidance that results in changes to previously reported information should be recorded in accordance with APB 20, *Accounting Changes*.

---

**.08 Definition of an Insurance Benefit Feature**

*Inquiry*—Paragraph 26 of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870.26), requires a liability to be established in addition to the account balance for policies that (a) meet the definition of an insurance contract as described in paragraphs 24 and 25 (ACC 10,870.24–.25), and (b) have amounts assessed against the contract holder in a manner that is expected to result in profits in earlier years and losses in subsequent years from the insurance benefit function. What constitutes the “insurance benefit function” in performing the part b test described above?

*Reply*—The test should be applied separately to the base mortality or morbidity feature and, in addition, separately to each other individual mortality or morbidity feature. Other individual mortality or morbidity features that would need to be tested separately are those features that create incremental

mortality or morbidity risk to the base contract, (for example, no lapse guarantees or long term care riders in a universal life insurance contract). Indicators that a mortality or morbidity feature should be evaluated separately may include:

- Explicit incremental charges,
- Offered separately in the market place,
- Described in the contract as a separate benefit, or
- The contract holder has a choice to accept or reject the additional benefit without rejecting the base contract.

Other insurance benefit features that provide for fixed and guaranteed benefits and premiums, and offered as a rider or an addition to a universal life contract, in practice typically would have been and should continue to be, separately accounted for under FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*. Those features that have not been accrued for under FASB Statement No. 60 should be evaluated under the guidance of paragraph 26 of SOP 03-1 (ACC 10,870.26).

### **.09 Definition of an Assessment**

*Inquiry*—In performing the test in paragraph 26 of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870.26), (that is, have amounts assessed against the contract holder in a manner that is expected to result in profits in earlier years and losses in subsequent years from the insurance benefit function) what assessments should be used in the comparison of the amount and timing of expected assessments and the related benefits for determining whether amounts are assessed in a manner that is expected to result in profits in earlier years and losses in subsequent years from the insurance benefit function?

*Reply*—If an insurance benefit function has an explicit fee, paragraph 54 of FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*, states that, accounting typically presumes that the terms and conditions of a contract entered into between two parties dealing at arms length are representative of their agreement. Therefore, there is a rebuttable presumption that the explicit fee should be used for the paragraph 26 test in SOP 03-1 (ACC 10,870.26). However, paragraph 54 of FASB Statement No. 97 goes on to state that there may be circumstances where the presumption may be overcome if evidence indicates that the substance of the agreement is not captured in the explicit terms of the contract. It is unlikely the presumption can be rebutted in the situation in which the assessment is explicitly incremental upon election of a separate insurance benefit feature and for which the policyholder has the choice to not pay if the election is not made.

In circumstances in which an insurance benefit function has no corresponding explicit fee or if the explicit fee does not capture the substance of the agreement, another method of determining assessments should be used for the paragraph 26 test in SOP 03-1 (ACC 10,870.26). For example, in some universal life policies, the product's base mortality function may have been designed and priced on an integrated basis with the other functions, such as, administration and asset management. In such products, while the explicit cost of insurance charge is not expected to be sufficient to cover the death benefit risk in all periods, the product may be designed such that other assessments, including administrative fees, asset management fees, and investment margins, are expected to result in profits in subsequent years sufficient to offset the losses

from the explicit cost of insurance charges designed shortfalls. In this example, it may be appropriate to include such additional implicit assessments in the paragraph 26 test for the base mortality function. The analysis of implicit assessments would need to appropriately consider the pricing and cost of all components of the product. Indicators that implicit assessments are appropriately allocated to product components are:

- Allocation is not inconsistent with documentation, if any, of pricing at contract inception,
- Assessments are allocated considering the recovery of all costs of each product component,
- Allocation does not contradict external information on the market value of an individual product component on a stand-alone basis, and
- Allocation method is applied consistently.

There is a presumption that the minimum guaranteed death benefit of a variable annuity and the no-lapse guarantee mortality feature of a universal life or a variable universal life contract will result in profits in earlier years and losses in subsequent years. This pattern of profits followed by losses results from the design and capital markets risks of these benefit features.

#### **.10 Level of Aggregation of Additional Liabilities Determined Under SOP 03-1 (ACC 10,870)**

*Inquiry*—At what level of aggregation should additional liabilities, determined in accordance with paragraph 26 of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870.26), be calculated?

*Reply*—It is presumed that the level of aggregation generally should be consistent with the level at which the entity's DAC amortization ratios and associated DAC balances are calculated. This is the level at which products with common features have been aggregated. It is not appropriate to combine DAC-level groups for aggregation purposes in paragraph 26 of SOP 03-1 (ACC 10,870.26). Aggregation at a more detailed level than the level at which the entity's DAC amortization ratios and associated DAC balances are calculated may be warranted based on an individual entity's facts and circumstances including, but not limited to, the risk characteristics of the corresponding insurance benefit features, such as, variable annuities with a ratchet minimum guaranteed death benefit (MGDB) and variable annuities with a return of premium MGDB, or universal life products with and without secondary guarantees.

#### **.11 Losses Followed by Losses**

*Inquiry*—Should the guidance in paragraph 26 of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870.26), be applied if amounts assessed against the contract holder for an insurance benefit feature are expected to result in losses in earlier and subsequent years?

*Reply*—Yes, the concept underlying paragraph 26 of SOP 03-1 (ACC 10,870.26) is that the insurance entity may be required to establish a liability if it provides an insurance benefit in future periods for which it charges amounts in such periods that are less than the expected value of the insurance benefits to be provided. Consequently, the insurance enterprise should recognize a liability. This concept is applicable in situations in which charges attributable to an insurance benefit feature are less than the expected cost of the insurance benefit in all periods.

**.12 Reinsurance**

*Inquiry*—How should a ceding entity account for reinsurance contracts that meet the risk transfer criteria of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, and that reinsure the insurance benefit features accounted for under paragraph 26 of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870.26)?

*Reply*—The accounting for reinsurance should be separate from the accounting for the direct contracts of the ceding entity in accordance with paragraphs 14 through 16 of FASB Statement No. 113. Reinsurance recoverables arising from the reinsurance contract should be reported as assets. As stated in paragraph 20 of FASB Statement No. 113, the recoverable should be calculated using methods and assumptions consistent with those used to establish the direct contract holder's liability. Therefore, a benefit ratio using the same assumptions and scenarios used to establish the direct contract liability, as required in paragraph 26 of SOP 03-1 (ACC 10,870.26), should be used to establish a reinsurance recoverable with excess benefit payments ceded under the terms of the reinsurance contract as the numerator and direct assessments as the denominator. As required by paragraph 26 of FASB Statement No. 113, the cost of reinsurance shall be amortized over the remaining life of the underlying reinsured contracts if the reinsurance contract is long-duration, or over the contract period of the reinsurance if the reinsurance contract is short-duration. The cost of reinsurance may be recognized based on total direct assessments or on another reasonable manner such as estimated gross profits.

**.13 Accounting for Contracts That Provide Annuitization Benefits**

*Inquiry*—Are the provisions of paragraphs 31–35 of SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870.31–.35), dealing with accounting for contracts that provide annuitization benefits, limited only to contracts that are accounted for under the provisions of FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*?

*Reply*—No. SOP 03-1 (ACC 10,870) applies to all entities to which FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, as amended, applies. Therefore any product that includes an annuitization benefit should be evaluated. This includes, but is not limited to, products where the base contracts are accounted for under FASB Statement Nos. 60, 97, or 120, *Accounting and Reporting by Mutual Life Insurance Enterprises and by Insurance Enterprises for Certain Long-Duration Participating Contracts*, and where the annuitization benefit has not already been included in establishing the liability. To the extent annuitization benefits features have not already been included in benefit or premium deficiency liabilities, the provisions of SOP 03-1, paragraphs 31–35 (ACC 10,870.31–.35) should be applied.

**.14 Note to TIS Section 6300.15 to 6300.24—Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk**

Insurance enables a company (the insured) to transfer insurance risk to an insurer for a specified premium. Insurance may be purchased for a number of

economic reasons generally with the underlying goal of transferring insurance risk, including property damage, injury to others, and business interruption.

The following series of questions and answers (TIS section 6300.15 through .24) focus on certain aspects of finite insurance products that are utilized by noninsurance enterprises. Due to the diverse nature of contracts in the marketplace, the guidance in these questions and answers is designed to assist practitioners in identifying the relevant literature to consider in addressing their specific facts and circumstances. The TPAs contain many excerpts of applicable guidance, but readers should be familiar with all the guidance contained in that literature not only the specific paragraphs listed.

GAAP guidance for an insurance enterprise's purchase of reinsurance is more extensive than guidance on accounting by noninsurance enterprises for insurance contracts. The accounting guidance for reinsurance addresses transactions between an insurer (the contract holder) and a reinsurer (the issuer of the contract). TIS section 6300.15 through .24 address property and casualty insurance contracts between a policyholder and an insurance enterprise, which is similar to the relationship between an insurer and a reinsurer.

### **.15 Finite Insurance**

*Inquiry*—What are “finite” insurance transactions?

*Reply*—Finite insurance contracts are contracts that transfer a clearly defined and restricted amount of insurance risk from the policyholder to the insurance company, and the policyholder retains a substantial portion of the related risks under most scenarios. Nevertheless, under certain finite contracts there may be a reasonable possibility that the insurance company will incur a loss on the contract.

### **.16 Insurance Risk Limiting Features**

*Inquiry*—What types of insurance risk limiting features do finite insurance contracts normally contain?

*Reply*—Contractual features that serve to limit insurance risk transfer are found in both traditional and finite insurance contracts; however, the degree to which these features limit risk is relatively higher in finite insurance. All contractual provisions that limit risk transfer need to be considered when reviewing insurance contracts. Common features that may limit the transfer of insurance risk include:

- *Sliding scale fees and profit sharing formulae.* These features adjust cash flows between the policyholder and insurance company based on loss experience (for example, increasing payments from the insured enterprise as losses increase and decreasing payments as losses decrease, subject to maximum and minimum limits).
- *Experience refunds.* These arrangements allow the policyholder to share in the favorable experience of the underlying contracts by reference to an “experience account” that typically tracks premiums paid, less fees, less losses incurred, plus interest. Experience provisions also can require the policyholder to share in unfavorable experience by requiring additional payments to the insurer in the event that the experience account is negative.
- *Caps.* Caps are used to limit the insurer's aggregate exposure by imposing a dollar limit, or a limit expressed as a percentage of premiums paid, on the amount of claims to be paid by the insurer. For example, the insurer will not be responsible for losses beyond 150% of

the premiums paid. While commercial insurance policies usually have limits on the amount of coverage provided, there may be significant risk mitigation for the insurer if the premium paid is a substantial percentage of the maximum coverage provided.

- *Loss Corridors.* This feature, which may exist in various forms, serves to eliminate or limit the risk of loss for a specified percentage or dollar amount of claims within the contract coverage. For example, in a contract providing coverage for a policyholder's first \$3,000,000 of losses, the insurer will pay the first million and last million of losses but will exclude the corridor from \$1,000,000 to \$2,000,000.
- *Dual-triggers.* This feature requires the occurrence of both an insurable event and changes in a separate pre-identified variable to trigger payment of a benefit/claim. An example is a policy entered into by a trucking company that insures costs associated with rerouting trucks over a certain time period if snowfall exceeds a specified level during that time period.
- *Retrospectively-Rated Premiums.* Such premiums are determined after the inception of the policy based on the loss experience under the policy.
- *Reinstatement Premiums.* To the extent the coverage provided by a contract is absorbed by losses incurred, the contract provides for the policyholder to reinstate coverage for the balance of the contract period for a stated additional premium. To the extent reinstatement is required rather than optional, the additional premium may mitigate risk to the insurer.
- *Termination Provisions.* These provisions can be structured to reduce the risk of the insurer, for example, by allowing for termination by the insurer at a discounted amount under certain circumstances.
- *Payment Schedules.* Features that delay timely reimbursement of losses by the insurer prevent the transfer of insurance risk.

There may be other features and provisions, in addition to the list of common insurance risk transfer limiting features above, that exist in a contract. Determining the appropriate accounting requires a full understanding of all of the features and provisions of the contract.

## **.17 Transfer of Insurance Risk**

*Inquiry*—Why is transfer of insurance risk important under GAAP?

*Reply*—If a contract does not provide for the indemnification of the insured by the insurer, it is accounted for as a deposit (financing) rather than as insurance as noted in paragraph 44 of FASB Statement No. 5, *Accounting for Contingencies*, and paragraph 6 of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*.

## **.18 Accounting Guidance for Transfer of Insurance Risk**

*Inquiry*—What GAAP accounting literature provides guidance related to transfer of insurance risk?

*Reply*—The assessment of transfer of insurance risk requires significant judgment and a complete understanding of the insurance contract and other related contracts between the parties. The greater the number and/or degree of insurance risk limiting features that exist in a contract, the more difficult it

becomes to assess whether or not the insurance risk transferred is sufficient to permit the contract to be accounted for as insurance rather than as a deposit.

Paragraph 44 of FASB Statement No. 5, *Accounting for Contingencies*, provides the following guidance on insurance contracts that do not provide for indemnification of the insured by the insurer against loss or liability:

To the extent that an insurance contract or reinsurance contract does not, despite its form, provide for indemnification of the insured or the ceding company by the insurer or reinsurer against loss or liability, the premium paid less the amount of the premium to be retained by the insurer or reinsurer shall be accounted for as a deposit by the insured or the ceding company. Those contracts may be structured in various ways, but if, regardless of form, their substance is that all or part of the premium paid by the insured or the ceding company is a deposit, it shall be accounted for as such.

FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, establishes the conditions required for a contract between an insurer and a reinsurer to be accounted for as reinsurance and prescribes accounting and reporting standards for those contracts. Paragraph 9 of Statement No. 113 notes:

Indemnification of the ceding enterprise against loss or liability relating to insurance risk in reinsurance of short-duration contracts requires both of the following, unless the condition in paragraph 11 is met:

- a. The reinsurer assumes significant insurance risk under the reinsured portions of the underlying insurance contracts.
- b. It is reasonably possible that the reinsurer may realize a significant loss from the transaction.

FASB Statement No. 113 looks to the present value of all cash flows between the parties, however characterized, under reasonably possible outcomes in determining whether it is reasonably possible that the reinsurer may realize a significant loss from the contract. The FASB staff views included in EITF Topic D-34, *Accounting for Reinsurance: Questions and Answers about FASB Statement No. 113*, are useful guidance in applying FASB Statement No. 113.

EITF 03-8, *Accounting for Claims-Made Insurance and Retroactive Insurance Contracts by the Insured Entity*, suggests that noninsurance entities look to the risk transfer guidance in FASB Statement No. 113, and states:

Entities may find the conditions in Statement 113, useful in assessing whether an insurance contract transfers risk.

In EITF 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprise*, the EITF concluded that an insurance contract must indemnify the insured as required by paragraph 44 of FASB Statement No. 5 to be accounted for as insurance. The Status section of EITF 93-14 also indicates that there may be certain situations in which the guarantee accounting in accordance with FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*, is applicable.

FASB Derivatives Implementation Group Issue B-26, *Dual-Trigger Property and Casualty Insurance Contracts*, addresses scenarios where there are dual-triggers and includes a number of relevant examples.

## **.19 Differences Between Retroactive and Prospective Insurance**

*Inquiry*—What are the differences between retroactive and prospective insurance?

*Reply*—Paragraph 95 of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, states that for property and casualty insurance: The distinction between prospective and retroactive reinsurance contracts is based on whether the contract reinsures future or past insured events covered by the underlying contracts.

## **.20 Accounting for Prospective Insurance**

*Inquiry*—How does a noninsurance enterprise account for prospective insurance contracts that qualify for insurance accounting?

*Reply*—A noninsurance enterprise amortizes the premiums over the contract period in proportion to the amount of insurance protection provided. If an insured loss occurs, and if it is probable that the policy will provide reimbursement for the loss and the amount of the loss can be reasonably estimated, the noninsurance enterprise records a receivable from the insurance enterprise and a recovery of the incurred loss in the income statement. If it is not probable<sup>1</sup> that the policy will provide reimbursement, then the receivable and recovery are not recorded.

## **.21 Accounting for Retroactive Insurance**

*Inquiry*—How does a noninsurance enterprise account for retroactive insurance contracts that qualify for insurance accounting?

*Reply*—EITF 03-8, *Accounting for Claims-Made Insurance and Retroactive Insurance Contracts by the Insured Entity*, states:

Notwithstanding that Statement 113 applies only to insurance enterprises, the Task Force reached a consensus that purchased retroactive insurance contracts that indemnify the insured should be accounted for in a manner similar to the manner in which retroactive reinsurance contracts are accounted for under Statement 113. The guidance in paragraphs 22–25 of Statement 113 should be applied, as appropriate, based on the facts and circumstances of the particular transaction. That is, amounts paid for retroactive insurance should be expensed immediately. Simultaneously, a receivable should be established for the expected recoveries related to the underlying insured event. If the receivable established exceeds the amounts paid for the insurance, the resulting gain is deferred. If the amounts and timing of the insurance recoveries can be reasonably estimated, the deferred gain should be amortized using the interest method over the estimated period over which the entity expects to recover substantially all amounts due under the terms of the insurance contract. If the amounts and timing of the insurance recoveries cannot be reasonably estimated, then the proportion of actual recoveries to total estimated recoveries should be used to determine the amount of the amortization. Immediate gain recognition and liability derecognition are not appropriate because the liability has not been extinguished (the entity is not entirely relieved of its obligation). Additionally, the Task Force observed that the liability incurred as a result of a past insurable event and amounts receivable under the insurance contract do not meet the criteria for offsetting under Interpretation 39.

EITF 03-8 guidance is derived from paragraphs 22 and 23 of FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, which state:

Amounts paid for retroactive reinsurance that meets the conditions for reinsurance accounting shall be reported as reinsurance receivables to the extent those amounts do not exceed the recorded liabilities relating to the underlying

---

<sup>1</sup> Probable as defined in paragraph 3 of FASB Statement No. 5, *Accounting for Contingencies*, is that the future event or events are likely to occur.

reinsured contracts. If the recorded liabilities exceed the amounts paid, reinsurance receivables shall be increased to reflect the difference and the resulting gain deferred. The deferred gain shall be amortized over the estimated remaining settlement period. If the amounts and timing of the reinsurance recoveries can be reasonably estimated, the deferred gain shall be amortized using the effective interest rate inherent in the amount paid to the reinsurer and the estimated timing and amounts of recoveries from the reinsurer (the interest method). Otherwise, the proportion of actual recoveries (the recovery method) shall determine the amount of amortization.

If the amounts paid for retroactive reinsurance exceed the recorded liabilities relating to the underlying reinsured contracts, the ceding enterprise shall increase the related liabilities or reduce the reinsurance receivable or both at the time the reinsurance contract is entered into, so that the excess is charged to earnings.

## **.22 Accounting for Multiple-Year Retrospectively Rated Insurance**

*Inquiry*—How does a noninsurance enterprise account for a multiple-year retrospectively rated insurance contract?

*Reply*—As noted in EITF 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprises*, multiple-year retrospectively rated contracts:

include a “retrospective rating” provision that provides for at least one of the following based on contract experience: (1) changes in the amount or timing of future contractual cash flows, including premium adjustments, settlement adjustments, or refunds to the ceding enterprise, or (2) changes in the contract’s future coverage. A critical feature of those contracts is that part or all of the retrospective rating provision is obligatory such that the retrospective rating provision creates future rights and obligations as a result of past events.

EITF 93-14 also discusses the accounting for retrospective adjustments and states:

For a multiple-year retrospectively rated insurance contract accounted for as insurance, the Task Force reached a consensus that the insured should recognize a liability and the insurer should recognize an asset to the extent that the insured has an obligation to pay cash (or other consideration) to the insurer that would not have been required absent experience under the contract. The amount recognized in the current period should be computed, using a with-and-without method, as the difference between the insured’s total contract costs before and after the experience under the contract as of the reporting date, including costs such as premium adjustments, settlement adjustments, and impairments of coverage. The amount of premium expense related to impairments of coverage should be measured in relation to the original contract terms. Future experience under the contract (that is, future losses and future premiums that would be paid regardless of past experience) should not be considered in measuring the amount to be recognized.

The insured should recognize an asset and the insurer should recognize a liability to the extent that any cash (or other consideration) would be payable by the insurer to the insured based on experience to date under the contract.

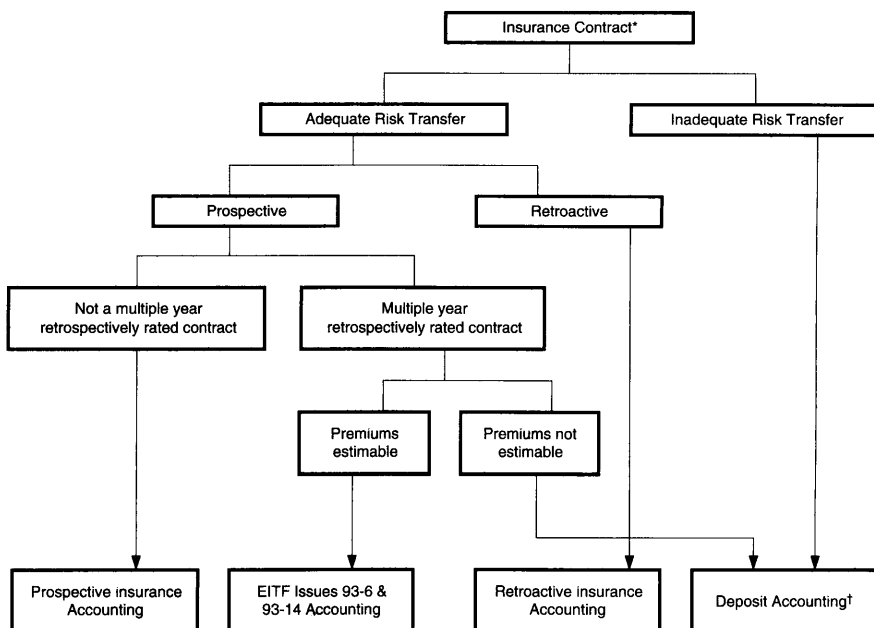

## **.23 Deposit Accounting**

*Inquiry*—What is deposit accounting?

*Reply*—Deposit accounting essentially treats the contract as a financing transaction similar to a loan taking into account the time value of money. SOP No. 98-7, *Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk* (ACC 10,760), provides guidance on how to account for insurance and reinsurance contracts that do not transfer insurance risk.

## .24 Identifying Accounting Model for Insurance Transactions

The accompanying chart depicts the basic decision process in identifying the appropriate accounting model for insurance transactions.

\* The insurance model discussed in this series of technical practice aids is based on property and casualty and other short-duration contracts, as defined in FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*.

† EITF 93-6, *Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises*, EITF 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprise*, and EITF 93-14 Status Section should also be considered in determining the accounting for multiple year retrospectively rated contracts that do not transfer risk. Topic D-35, *FASB Staff Views on Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises,"* Question 1 addresses why EITF 93-6 is not limited only to risk transfer issues.

## .25 Integrated/Nonintegrated Contract Features in Applying SOP 05-1

**Inquiry**—If there are contract features that do not meet the definition of nonintegrated contract features contained in paragraphs 11 and 12 of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.11–.12), how should the contract features be evaluated under the SOP?

**Reply**—The flowchart in Appendix C of the SOP, titled “Flowchart—Application of SOP 05-1 Accounting Model” (ACC 10,920.35), asks the question “Does the contract modification involve the addition of or changes to a nonintegrated contract feature?” If the answer is “Yes,” the nonintegrated contract feature is

evaluated separately from the base contract. All other modifications need to be evaluated to determine if the contract modification results in a substantially changed replacement contract in accordance with the criteria in paragraph 15 of SOP 05-1 (ACC 10,920.15).

When applying the guidance in SOP 05-1 (ACC 10,920) to determine whether a feature is integrated or nonintegrated, one indicator of a nonintegrated contract feature is that it is distinguishable as a separate component from the base contract.

## **.26 Evaluation of Significance of Modification in Applying SOP 05-1**

*Inquiry*—When analyzing a contract feature under paragraph 15a of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.15a), how should the significance of the change in the degree of mortality risk, morbidity risk, or other insurance risk be determined?

*Reply*—In assessing the significance of a change in the degree of mortality, morbidity, or other insurance risk, the insurance enterprise should consider the specific facts and circumstances of the modification as well as which approach or approaches it considers most appropriate to analyze the substance of the change. AcSEC concluded in paragraph A-26 of SOP 05-1 (ACC 10,920.33) "... that it is the substance of the contract between the insurance enterprise and the contract holder that is to be evaluated, and not just the economics to the insurance enterprise that is critical to determining whether an internal replacement results in a substantially changed contract."

SOP 05-1 (ACC 10,920) does not require any one specific approach for analyzing the significance of a change in insurance risk; rather, it provides examples of several approaches that may be used in assessing changes in the degree of insurance risk. Paragraph A-27 of SOP 05-1 (ACC 10,920.33) notes that factors to consider in determining whether there are significant changes in insurance risks may include changes in actuarially estimated costs for that benefit feature (e.g., changes in the death benefit provided) or, alternatively, changes in the SOP 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (ACC 10,870), benefit ratio related to that benefit feature (i.e., giving consideration to the change in the relationship between the actuarially estimated future costs of the benefit feature and estimated total future fees to be charged for the contract). Paragraph B-8 of SOP 05-1 (ACC 10,920.34) provides another example of assessing the significance of a change for a universal life contract by comparing the change in the relationship between the expected cost of the benefit and the charges for the benefit. Another potential comparison would be the change in the net amount at risk before and after the modification. However, paragraph A-27 of SOP 05-1 (ACC 10,920.33) also states that reunderwriting an entire contract generally would indicate a significant change in the kind or degree of insurance risk.

Different approaches utilized to assess the significance of a change in the degree of mortality, morbidity, or other insurance risk could result in different conclusions. Therefore, it may be necessary to consider multiple approaches to evaluate the significance of a change. For example, a change from a 20-pay life insurance contract to a 10-pay life insurance contract, where the two premiums are determined to be actuarially equivalent amounts, is an internal replacement that may or may not result in the replacement contract being determined to be substantially changed from the replaced contract. Using actuarially estimated cost before and after the modification would not result in a significant

change (i.e., the death benefit remains the same, only the premium payment period is changing). Comparing the relationship of the present value of estimated cost and the present value of the actuarially equivalent premiums also would not result in a significant change. However, if one used the net amount at risk as the basis for comparison, the change could be considered significant, given that the net amount at risk would differ for contracts with different premium collection periods.

While all these approaches, and perhaps others, would be appropriate in analyzing the significance of the change in this specific example, not all of these approaches would be appropriate in all circumstances. Any approach utilized should consider the substance of the change between the insurance enterprise and the contract holder. For instance, as described in paragraph B-33 of SOP 05-1 (ACC 10,920.34), a minimum guaranteed death benefit (MGDB) is essentially a combination of mortality and investment risk and, therefore, it generally would not be appropriate to analyze the change in a MGDB based on a comparison of net expected cost (expected costs net of expected charges for the MGDB benefit) or the change in the relationship between the expected cost and charges for the MGDB benefit due to the interaction of the mortality and investment risk.

The approach or approaches determined to be appropriate to evaluate the substance of a change should be applied consistently in analyzing similar types of modifications for similar contracts.

## **.27 Changes in Investment Management Fees and Other Administrative Charges in Applying SOP 05-1**

*Inquiry*—How should changes in investment management fees and other administrative charges be evaluated under the guidance in SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920)?

*Reply*—The insurance enterprise should first determine if changes in investment management fees and charges are modifications to the contract under paragraph 8 of SOP 05-1 (ACC 10,920.08). As indicated in paragraph A-25 of SOP 05-1 (ACC 10,920.33), changes in accordance with terms and within ranges specified in the contract, without any other change in benefits or coverages, are not modifications to the contract.

Changes in investment management fees and charges that are not in accordance with terms specified in the contract should be evaluated under the guidance in paragraph 15b of SOP 05-1 (ACC 10,920.15b) based on the substance of the fees and consider whether the change in fees is significant in the context of the overall investment return rights. Changes in the structure of investment management fees and charges (for example, between flat fee, sliding scale, or percentage of assets), whether made by the insurance entity or investment advisor, may or may not result in a significant change to the nature of investment return rights.

## **.28 Definition of Reunderwriting for Purposes of Applying SOP 05-1**

*Inquiry*—Is the performance of limited examination procedures in conjunction with the election of a benefit, feature, right, or coverage by the contract holder considered underwriting or reunderwriting as contemplated by paragraphs 9b and A-27 of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.09b and .33)?

*Reply*—It depends. The performance of examination procedures with respect to specific risks or components of a contract would not represent underwriting or reunderwriting as long as the procedures are limited in nature and do not involve judgment or discretion with respect to acceptance or price. For example, examination procedures undertaken to confirm data used to calculate benefit amounts, such as the income verification procedures undertaken as part of a benefit step-up in a disability policy, or to gather information to verify representations made by the contract holder with respect to the election being made, such as limited procedures to validate an insured's claim of currently being a non-smoker, would not be considered underwriting or reunderwriting.

The lack of underwriting is not, by itself, determinative that an election is not a modification or that a change is not substantial. The election should be evaluated against the other conditions of SOP 05-1 (ACC 10,920).

### **.29 Contract Reinstatements in Applying SOP 05-1**

*Inquiry*—How should insurance enterprises apply the guidance in SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920), to contract reinstatements?

*Reply*—If an insurance enterprise determines it has no further obligation to pay claims due to the lapse of a contract, the related contract would be considered extinguished. If the insurance contract is later reinstated, it would be accounted for as a newly issued contract in the period in which the reinstatement occurs. Unamortized deferred acquisition costs, unearned revenue liabilities, and deferred sales inducement assets related to the terminated contract should not be reestablished in connection with the newly issued contract.

### **.30 Commissions Paid on an Increase in Insurance Coverage or Incremental Deposits in Applying SOP 05-1**

*Inquiry*—Should additional commissions incurred on either an increase in insurance coverage or incremental deposits not provided for in the replaced contract, related to a contract modification determined to result in a substantially unchanged replacement contract under SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts* (ACC 10,920), be accounted for as maintenance costs?

*Reply*—No. If commissions are paid on either an increase in insurance coverage or incremental deposit, not previously provided for in the contract, related to a contract modification determined to result in a substantially unchanged replacement contract, the commissions should be accounted for as acquisition costs in accordance with the provisions of FASB Statements No. 60, *Accounting and Reporting by Insurance Enterprises*, and No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*, as appropriate.

For example, the increase in face amount of a universal life-type contract described in paragraphs B-7 and B-8 of SOP 05-1 (ACC 10,920.34) results in a replacement contract that is determined to be substantially unchanged. The modification is an integrated feature because the universal life-type contract has only a single account value and the death benefit is the excess of face amount over account value. In this situation, the commission incurred on what is essentially the sale of new insurance coverage should not be considered maintenance expense, but rather should be accounted for as acquisition costs in accordance with the provisions of FASB Statement No. 97. The substance of the modification in this example is the sale of additional insurance.

**.31 Participating Dividends and the Interaction of Guidance in SOP 05-1 & SOP 95-1**

*Inquiry*—How are paid up additions funded by dividends on participating policies evaluated under SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920), and what is the impact on estimated gross margins?

*Reply*—Paid up additions funded by dividends on participating policies that meet the conditions of paragraph 9 of SOP 05-1 (ACC 10,920.09) would not be considered internal replacements subject to the guidance in SOP 05-1 (ACC 10,920). Paid up additions that do not meet the conditions of paragraph 9 of the SOP (ACC 10,920.09) would be considered nonintegrated contract features under SOP 05-1 (ACC 10,920), similar to the example in paragraph B-2, “Option to Purchase Additional Insurance Rider” (ACC 10,920.34).

For paid up additions that do not meet the conditions of paragraph 9 of SOP 05-1 (ACC 10,920.09), SOP 95-1, *Accounting for Certain Insurance Activities of Mutual Life Insurance Enterprises* (ACC 10,650), addresses the accounting and the impact of various dividend options, including paid up additions, on estimated gross margins. Under paragraph 23 of SOP 95-1 (ACC 10,650.23), the estimated gross margins should include an insurance company’s best estimate of the dividend options that policyholders will elect, which would include the option to use dividends to fund paid up additions. SOP 05-1 (ACC 10,920) does not amend or affect that guidance in SOP 95-1 (ACC 10,650).

**.32 Premium Changes to FASB Statement No. 60 Long Duration Contracts in Applying SOP 05-1**

*Inquiry*—Are changes in premiums to FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*, long-duration insurance contracts for which the insurer has the right to make changes in premium rates considered modifications as contemplated in paragraph 8 of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.08)?

*Reply*—It depends.

FASB Statement No. 60 states:

... individual and group insurance contracts that are ... guaranteed renewable (renewable at the option of the insured), or collectively renewable (individual contracts within a group are not cancelable), ordinarily are long-duration contracts.

The AICPA Audit and Accounting Guide for Life and Health Insurance Entities defines a guaranteed renewable contract as:

An insurance contract whereby the insured has the right to continue in force by the timely payment of premiums for a period that coincides approximately with the average working lifetime (for federal income tax purposes at least until age sixty), with the right reserved by the insurer to make changes in premium rates by classes.

The right to adjust premium rates for group long-duration insurance contracts generally would not meet the definition of a modification under paragraph .08 of SOP 05-1 (ACC 10,920.08) as long as all of the following conditions are met:

- The right to adjust premium rates is provided for under the terms of the insurance contract,
- The change to premium rates for a contract holder is the same change in premium rates that is applicable to the entire class of contract holders,
- Changes to premium rates do not involve consideration by the insurer of specific experience of the contract holder, and
- No other changes in benefits or coverages occur.

Further, the determination of rates based on a formula specified within the contract that does not involve insurer discretion would not be considered a modification as contemplated under paragraph 8 of SOP 05-1 (ACC 10,920.08).

Changes to a contract that involve the adjustment of rates or benefits based on a judgmental review of actual experience of the contract holder or the renegotiation of rates or benefits with that contract holder, even if no reunderwriting has occurred, generally would be considered a modification that is subject to the guidance in SOP 05-1 (ACC 10,920).

### **.33 Evaluation of Changes Under Paragraph 15a of SOP 05-1**

*Inquiry*—How should changes in the period of coverage or insured risk under paragraph 15a of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.15a), be evaluated?

*Reply*—A change in the period of coverage should be evaluated based on a comparison of the remaining period of coverage of the replaced contract to the remaining period of coverage of the replacement contract when assessing the significance of that change. Similarly, when determining whether there are significant changes in insurance risk under paragraph 15a of SOP 05-1 (ACC 10,920.15a), the evaluation should be based on a comparison of the remaining insurance coverage of the replaced contract to the remaining insurance coverage of the replacement contract.

### **.34 Nature of Investment Return Rights in Paragraph 15b of SOP 05-1**

*Inquiry*—What constitutes the “nature of the investment return rights” in paragraph 15b of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.15b)?

*Reply*—The phrase “nature of the investment return rights” encompasses the manner in which the contract’s investment return is determined. As noted in paragraph A-30 of SOP 05-1 (ACC 10,920.33), AcSEC concluded that for pass-through contracts, the addition of a floor or the capping of the returns, such that actual returns (net of fees and charges) are not passed through to the policyholder, fundamentally changes the nature of the investment return rights.

If the contract is referenced to a pool of assets or otherwise indexed (for example, S&P 500 or LIBOR), the underlying referenced pool of assets or index is an inherent component of the nature of investment return rights, and changes in these provisions would result in a change to the nature of investment return rights between the insurance enterprise and the contract holder under paragraph 15b of SOP 05-1 (ACC 10,920.15b). This differs from a contract holder reallocation of funds among multiple investment alternatives provided for in the contract in which the investment performance of the investments passes through to the contract holder.

Contract holder liquidity rights related to investment guarantees (for example, variable annuity guaranteed minimum accumulation benefits, guaranteed minimum income benefits, and guaranteed minimum withdrawal benefits) are inherent components of the nature of investment return rights, and the addition of a different investment guarantee with substantively different timing of cash flow accessibility to the contract holder would result in a change to the nature of investment return rights between the insurance enterprise and the contract holder under paragraph 15b of SOP 05-1 (ACC 10,920.15b).

Changes to a component (or components) of an investment return formula (for example, the strike price of the guarantee for a variable annuity with a guaranteed minimum accumulation benefit or other modification to an existing investment guarantee) should be evaluated in a manner similar to changes in minimum guarantees for contracts subject to periodic discretionary declaration, as discussed in paragraph A-30 of SOP 05-1 (ACC 10,920.33).

### **.35 Transition Provisions for FAS 60 Long-Duration Contracts Under SOP 05-1**

*Inquiry*—How should the transition provisions in paragraphs 29–31 of SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (ACC 10,920.29–.31), be interpreted with respect to long-duration insurance contracts accounted for under FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*?

*Reply*—The adoption of SOP 05-1 (ACC 10,920) may result in a shorter life for a FASB Statement No. 60 long-duration insurance contract by changing the treatment of certain internal replacements that would have previously been anticipated and treated as continuations of the replaced contract. If the guidance of SOP 05-1 (ACC 10,920) had been known upon issuance of the contracts, the corresponding DAC balance would have been amortized over the shorter expected life. Because this change in the definition of the life of a FASB Statement No. 60 long-duration contract can be attributed solely to the adoption of SOP 05-1 (ACC 10,920), the insurer should consider whether liabilities for future policy benefits, DAC, and other balances should be adjusted to reflect the balances that would have resulted had the revised life<sup>2</sup> been used upon inception of the contracts. Consistent with the transition principle in SOP 05-1 (ACC 10,920) and the guidance in paragraph 31 of SOP 05-1 (ACC 10,920.31), such adjustments should be reported as part of the cumulative effect of a change in accounting principle upon adoption of SOP 05-1 (ACC 10,920).

---

**[The next page is 5641.]**

---

<sup>2</sup> The revised life should be equal to the actual life through adoption plus the period until the next modification simultaneous with or following adoption of the SOP 05-1 (ACC 10,920) that will result in the contract being substantially modified. For example, assume a contract originated on 7/1/2004 with an original expected life of 96 months; the contract is expected to be modified on 7/1/2007 and the company has concluded the modification will result in a contract that is substantially changed. Upon adoption of the SOP on 1/1/2007, the contract's expected revised life would be 36 months (actual life of 30 months and projected remaining life of 6 months) and the unamortized DAC balance should be adjusted to reflect a remaining life of 6 months out of a total revised life of 36 months.

## Section 6400

# Health Care Organizations

### .04 Hospital as Collecting Agent for Physicians

*Inquiry*—Under an agreement with several physicians, a hospital acts as collecting agent for the physicians' fees, and the physicians, in return, provide professional services at the hospital. These physicians are not employees; payroll taxes are not paid for them, and the hospital cannot exercise any of the prerogatives of an employer. To enable it to collect the physicians' Medicare fees, the hospital holds valid assignments. Should the amounts collected as physicians' fees be included in the income and expenses of the provider hospital?

*Reply*—No. As discussed in the AICPA Audit and Accounting Guide *Health Care Organizations*, paragraph 3.02, health care organizations may receive and hold assets owned by others under agency relationships; for example, they may perform billing and collection services for physicians. In accepting responsibility for those assets, an organization incurs a liability to the principal under the agency relationship to return the assets in the future. In the example above, the hospital is functioning as a conduit with respect to the physicians' fees. As a result, the fees should be reported as a liability to the physicians and not recognized in the statement of revenues and expenses. Agency funds are reported as unrestricted assets. [Amended September 1997]

### .12 General Obligation Bonds Issued for Current Use by City Owned Hospital

*Inquiry*—A hospital is a city municipal enterprise. The city council issued general obligation bonds to provide funds for the hospital's operations, without restriction. The hospital's assets will not be used to pay principal or interest on the bonds. Should the general obligation bond liability be reported in the hospital's financial statements?

*Reply*—No. The AICPA Audit and Accounting Guide *Health Care Organizations*, paragraph 7.15, states that if a health care organization has no obligation to make payments of principal and interest on the debt, the organization should not reflect the liability on its balance sheet. The proceeds from the bond issue are contributions from the city. Therefore, the hospital should not report the bonds as a liability in its financial statements. [Amended September 1997]

### .16 Disclosure Required in Consolidated or Combined Financial Statements

*Inquiry*—What disclosures are required when consolidated or combined financial statements are issued?

*Reply*—The entities being consolidated or combined should be appropriately identified and the basis for combining or consolidating the entities, including the nature of the interrelationship of the entities, should be disclosed in the notes to the financial statements. Governmental entities are required to follow the accounting and disclosure provisions of GASB Statement No. 14, *The Financial Reporting Entity* (GAFRS section 2100). [Amended June 1995]

**.17 Elimination of Profit on Intercompany Sales**

*Inquiry*—ARB No. 51, *Consolidated Financial Statements*, paragraph 6 (AC C51.109), addresses the elimination of intercompany profit or loss on assets remaining within a combined or consolidated group. FASB Statement No. 71, *Accounting for the Effects of Certain Types of Regulation*, paragraph 16 (AC Re6.126), indicates the following with regard to intercompany profit:

Profit on sales to regulated affiliates shall not be eliminated in general purpose financial statements, if both of the following criteria are met:

- a. The sales price is reasonable.
- b. It is probable that, through the rate-making process, future revenue approximately equal to the sales price will result from the regulated affiliate's use of the products.

Since health care providers are, in certain cases, reimbursed for operating costs, it is possible that, assuming they meet certain related party tests under third-party regulations, an entity could receive reimbursement on intercompany sales that include a profit. Thus, one could argue that under that circumstance, it would not be appropriate to eliminate profit on intercompany sales using the criteria set forth in FASB Statement No. 71 (AC Re6).

*Reply*—In some instances health care organizations may encounter situations where they fall under FASB Statement No. 71, paragraph 5 (AC Re6.115). Generally, however, as explained in FASB Statement No. 71, paragraph 62 (AC Re6.115, footnote 6), the normal Medicare and Medicaid arrangements are excluded from the scope of FASB Statement No. 71 (AC Re6) on the basis that the “regulator” is also a party to the contract. Accordingly, gains or losses on sale of assets within the group should be eliminated in combined or consolidated financial statements. However, these gains or losses would be recognized and disclosed as appropriate in the separate financial statements of the members of the group.

**.19 Offsetting of Limited Use Assets**

*Inquiry*—Can limited-use assets of one entity be offset against the related liability of another entity in combined or consolidated financial statements?

*Reply*—Unless a right of setoff exists as defined in FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10), assets, in general, should not be offset against related liabilities in any financial statement presentation. [Amended]

**.20 Format of Combined or Consolidated Financial Statements**

*Inquiry*—When presenting combined or consolidated financial statements of various health care entities, is there a prescribed or recommended presentation format?

*Reply*—No. The sample financial statements contained in the AICPA Audit and Accounting Guide *Health Care Organizations*, do not prescribe the format of statements. In addition, no single format for combined or consolidated financial statements has been considered appropriate in all circumstances.

**.25 Accounting for Transfer of Assets From Not-for-Profit to For-Profit Entities**

*Inquiry*—How should subsequent transfers of assets, evidenced as additional investment, from not-for-profit entities to for-profit entities be accounted for by the transferee and transferor?

*Reply*—Additional investments in for-profit entities (subsequent to the original transfer of assets) should be reflected by the transferee as an increase in capital stock and/or paid-in capital. The transferor would record a corresponding increase in its investment account in the for-profit entity, if a financial interest was received (e.g., additional capital stock).

**.26 Transfer of Assets From Subsidiary For-Profit Entity to Not-for-Profit Stockholder Parent**

*Inquiry*—How should transfers of assets from a “subsidiary” for-profit entity (F) to a not-for-profit entity (N) that is a minority stockholder of F be recorded?

*Reply*—This transaction would generally be recorded as a dividend, which would be reported as a reduction in F’s retained earnings. Any dividend in excess of retained earnings is a “liquidating” dividend; as such, it would be reported as a reduction in F’s paid-in capital account. If N accounts for its investment in F using the equity method, then the not-for-profit entity would report all dividends received as a reduction of its investment account, in accordance with APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (AC 182). If N’s investment in F is accounted for using the cost method, because the conditions for applying the equity method are not met, the dividends would be reported as income.

**.28 Valuation of Assets Transferred Between Related Entities Under Common Control**

*Inquiry*—At what value should the transfers of assets between related entities under common control be recorded by the transferee?

*Reply*—Assets transferred from one related entity under common control to another generally would not be recorded by the transferee at the fair value at the date of transfer, but rather at the carrying value of the transferring entity. This treatment is consistent with the guidance prescribed by Interpretation No. 39 of APB Opinion No. 16, *Transfers and Exchanges Between Enterprises Under Common Control* (AC B50.645–.648).

**.29 Timing of Recording Transfers Between Related Entities**

*Inquiry*—When should a transfer of assets between related entities be recorded—only when the transfer is actually made, or at some earlier point?

*Reply*—In most situations, transfers should be recorded at the time they are formally obligated to occur (formal board resolutions, legal notes, passage of title to real estate, etc.). This would be the case when each of the entities have independent governance, and the timing of the transfer is controlled by the governing board of the transferor. Yet, in situations where there is clear, common control of the related entities, it would be appropriate to record transfers at the time when both (a) the transfer amount is known and (b) the receiving entity is given control over the timing of the transfer.

**.30 Accounting for Transactions Involving Medicaid Voluntary Contribution or Taxation Programs**

*Inquiry*—The Medicaid program is set up on a state-by-state basis to provide medical assistance to the indigent. Although state-administered, the program is actually a joint federal and state program for which the federal government picks up a portion of the cost. Under this arrangement, the federal government “matches” a percentage of the total amount paid by the state to health care providers. This matching is referred to as federal financial participation.

States have attempted to increase the amount of federal matching funds for which they are eligible by increasing the amount of medical assistance they provide. In order to pay for the increased medical assistance, some states have imposed a tax on health care organizations and/or sought donations or other voluntary payments from them. As a result, the states have been able to generate additional federal matching funds without expending additional state funds. How should a health care organization account for these taxes or donations made to the state?

*Reply*—Congress has passed legislation prohibiting the use of health care organization taxes or donations except in limited situations.

The accounting for these types of programs is dependent on the individual facts and circumstances. For example, if there is a guarantee that specific monies given to the state by the health care organization will be ‘returned’ to the organization from the state, those amounts should be recorded as receivables. In addition, if the health care organization has met all requirements to be legally entitled to additional funds from the state, the revenue/gain should be recognized.

However, if the monies go into a pool with other contributions which are then disbursed based on factors over which the health care organization has little or no control, the payments should be recognized as an expense. Any subsequent reimbursements would be recognized as revenue/gain when the provider is entitled to them and payment is assured.

Care should be taken to avoid delayed recognition of expenses or to improperly recognize contingent gains. Because of complexities involved, it may be necessary to consult with legal counsel.

### **.32 Use of Pooling-of-Interests Method**

*Inquiry*—How, if at all, should APB Opinion No. 16, *Business Combinations* (AC B50), be applied to business combinations involving not-for-profit health care organizations?

*Reply*—APB Opinion No. 16 (AC B50) explicitly addresses only business combinations that involve transfers of ownership interests. However, the AICPA Audit and Accounting Guide *Health Care Organizations* (the Guide), paragraph 1.33, states that “circumstances exist under which reporting on the combination of two or more not-for-profit organizations . . . by the pooling of interests method better reflects the substance of the transaction than reporting by the purchase method. Therefore, not-for-profit organizations are, under certain circumstances, permitted to report by the pooling-of-interest method, even though they generally do not issue common stock. Such circumstances include the combination of two or more entities to form a new entity without the exchange of consideration.”

Paragraph 11.28 of the Guide also states that APB Opinion No. 16 (AC B50) “may provide a useful framework” when evaluating similar transactions entered into by not-for-profit health care business organizations that are similar to a pooling of interests, such as a transaction involving change in control but no exchange of consideration (for example, a change in sole corporate member).

However, because not-for-profit health care entities do not issue common stock and there is no private ownership, they are subject to different laws and practice regarding control and governance. Therefore, the provisions of APB Opinion No. 16 (AC B50) cannot be applied literally. If the transaction is deemed similar to a pooling of interests, no step-up in basis is required. Accord-

ing to paragraph 1.34 of the Guide, an example of acceptable practice in such circumstances is to report the assets, liabilities, and net asset balances of the combined entities as of the beginning of the year and disclose the information that would be required to be disclosed for a pooling of interests under APB Opinion No. 16 (AC B50).

---

**Note:** The FASB is working on a project regarding *Business Combinations*. The results of this project could significantly affect the use of the pooling-of-interests method. The timing of this project has not yet been established.

---

### **.33 Accounting for a Joint Operating Agreement**

**Inquiry**—Two not-for-profit health care systems enter into a Joint Operating Agreement whereby both (the Venturers) agree to jointly operate and control certain of their hospitals while sharing in the operating results and residual interest upon dissolution based upon an agreed-upon ratio. Neither of the Venturers receives cash or other monetary assets as part of entering into the Agreement. How should the Venturers account for the Agreement?

**Reply**—Joint Operating Agreements are similar to joint ventures and typically are characterized by factors such as:

- Common purpose (e.g., to share risks and rewards; to develop a new market, health service or program; to pool resources)
- Joint funding: all parties contribute resources toward its accomplishment
- Defined relationship: typically governed by an agreement
- Joint control: control is not derived from holding a majority of the voting interest

Even though the Agreement does not provide for a separate legal entity (such as a corporation or partnership), the same principles apply. For example, since there is joint control (i.e., neither party controls the venture), consolidation would not be appropriate. Instead, such agreements should be accounted for similar to a corporate joint venture using the equity method of accounting (see AICPA Interpretation No. 2 of APB Opinion No. 18, *Investments in Partnerships and Ventures* [AC I82.512], or APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* [AC I82]). Since the transaction did not reflect the culmination of the earnings process, the Venturers' basis in the investment would be recorded at net book value.

### **.34 Accounting for Computer Systems Costs Incurred in Connection With the Health Insurance Portability and Accountability Act of 1996 (HIPAA)**

**Inquiry**—The Health Insurance Portability and Accountability Act of 1996 (HIPAA) was enacted by the federal government with the intent to assure health insurance portability, improve the efficiency and effectiveness of the health care system, reduce health care fraud and abuse, help ensure security and privacy of health information, and enforce standards for transacting health information. HIPAA addresses issues of security and confidentiality in the transfer of electronic patient information and facilitates the reduction of administrative costs by standardizing health care electronic transactions.

How should health care organizations account for computer systems costs incurred in connection with HIPAA?

*Reply*—Costs associated with upgrading and improving computer systems to comply with HIPAA should follow the guidance set forth in SOP 98-1 *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use* (ACC 10,720). The accounting for specific compliance costs depends on whether the costs relate to “upgrades and enhancements” or maintenance. The following summarizes the financial reporting requirements for each type of cost:

- **Upgrades and enhancements** are defined in SOP 98-1 (ACC 10,720) as “modifications to enable the software to perform tasks that it was previously incapable of performing.” In order for upgrades and enhancements to internal-use software to be capitalized “it must be probable that those expenditures will result in additional functionality.” For example, if the changes increase the security of the data from tampering or alteration or reduce the ability of unauthorized persons to gain access to the data, those changes would be tasks that the software previously could not perform and the associated qualifying costs of application development stage activities should be capitalized. Conversely, if the changes merely reconfigure existing data to conform to the HIPAA standard or regulatory requirements, such changes would not result in the capability to perform of additional tasks and the associated costs therewith should be expensed as incurred. Because many of the costs associated with HIPAA relate to compliance with the Act and do not result in “additional functionality”, those costs should be expensed as incurred.
- **Maintenance costs** should be expensed as incurred. Training costs and data conversion costs, except for costs to develop or obtain software that allows for access or conversion of old data by new systems, should also be expensed as incurred.

### .35 Note to TIS Section 6400.36 to 6400.42

#### **Implementation of FASB Statement No. 136—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (in the Beneficiary’s Financial Statements)**

Some not-for-profit organizations have separate fund-raising foundations (commonly referred to as “institutionally related foundations”) that solicit contributions on their behalf. In June 1999, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*, which (among other things) provides guidance on the accounting that should be followed by such institutionally related foundations and their related beneficiary organization(s) with respect to contributions received by the foundation. The provisions of FASB Statement No. 136 are required to be implemented in financial statements issued for fiscal periods beginning after December 15, 1999 (generally years ending December 31, 2000 and thereafter).

Some institutionally related foundations and their beneficiary organizations meet the definition of *financially interrelated organizations* provided in paragraph 13 of FASB Statement No. 136. If organizations are financially interrelated, FASB Statement No. 136 provides that the balance sheet of the beneficiary organization(s) should reflect that organization’s interest in the net assets of the foundation, and that that interest should be periodically adjusted

to reflect the beneficiary's share of the changes in the net assets of the foundation. This accounting is similar to the equity method of accounting, which is described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

Paragraph 6(b) of APB Opinion No. 18 requires that the periodic adjustment of the investment be included in the determination of the investor's net income. The purpose of TIS section 6140.14 through .18 (applicable to not-for-profit organizations [NPO] other than health care [HC] organizations) and TIS section 6400.36 through .42 (applicable to not-for-profit health care organizations) is to clarify that in circumstances in which the recipient and the beneficiary are financially interrelated—

- Beneficiary organizations should segregate the adjustment into changes in restricted and unrestricted net assets. (NPO TPA [TIS section 6140.14, .15, and .16]; HC TPA [TIS section 6400.36, .37, and .39])
- In circumstances in which the beneficiary can influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient organization should be transparent in determining the net asset classifications in the beneficiary's financial statements. In other words, the recipient cannot impose time or purpose restrictions beyond those imposed by the donor. (NPO TPA [TIS section 6140.14 and .16]; HC TPA [TIS section 6400.36 and .39])
- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient organization creates an implied time restriction on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of the recipient organization and the changes in that interest, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions). (NPO TPA [TIS section 6140.15]; HC TPA [TIS section 6400.37])
- In circumstances in which the beneficiary can influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions [for example, net assets of the recipient restricted to the beneficiary's purchase of property, plant, and equipment (PPE)], expenditures by the beneficiary that meet those purpose restrictions result in the beneficiary (and recipient) reporting reclassifications from temporarily restricted to unrestricted net assets (assuming that the beneficiary has no other net assets subject to similar purpose restrictions), unless those net assets are subject to time restrictions that have not expired, including time restrictions that are implied on contributed long-lived assets as a result of the beneficiary's accounting policy pursuant to paragraph 16 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*. (If those net assets are subject to time restrictions that have not expired and the beneficiary has other net assets with similar

purpose restrictions, the restrictions on those other net assets would expire in conformity with FASB Statement No. 116. These TPAs do not, however, establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or purpose restrictions on net assets held by the beneficiary.) (NPO TPA [TIS section 6140.17]; HC TPA [TIS section 6400.40])

- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions, though not subject to time restrictions other than the implied time restrictions that exist because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, expenditures by the beneficiary that are consistent with those purpose restrictions should not result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets, subject to the exceptions in the following sentence. Expenditures by the beneficiary that are consistent with those purpose restrictions should result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets if (a) the recipient has no discretion in deciding whether the purpose restriction is met<sup>1</sup> or (b) the recipient distributes or obligates itself to distribute to the beneficiary amounts attributable to net assets restricted for the particular purpose, or otherwise indicates that the recipient intends for those net assets to be used to support the particular purpose as an activity of the current period. In all other circumstances, (a) purpose restrictions and (b) implied time restrictions on the net assets attributable to the interest in the recipient organization exist and have not yet expired. (However, if the beneficiary has other net assets with similar purpose restrictions, those restrictions would expire in conformity with FASB Statement No. 116. These TPAs do not establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary.) (NPO TPA [TIS section 6140.18]; HC TPA [TIS section 6400.41])
- For HC NPOs Only—In circumstances in which the beneficiary can influence the financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, changes in the beneficiary's interest in the net assets of a recipient organization attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in conformity with chapters 4 and 10 of the AICPA Audit and Accounting Guide *Health Care Organizations*, in the same manner that they would have been had the beneficiary

---

<sup>1</sup> In some circumstances, the purpose restrictions may be so broad that the recipient organization has discretion in deciding whether expenditures by the beneficiary that are consistent with those purpose restrictions actually meet those purpose restrictions. For example, the recipient's net assets may have arisen from a contribution that was restricted for the beneficiary's purchase of research equipment, with no particular research equipment specified. Purchasing an XYZ microscope, which is consistent with that purpose restriction, may or may not meet that purpose restriction, depending on the decision of the recipient. In contrast, the net assets may have arisen from a contribution that was restricted for an XYZ microscope. Purchasing an XYZ microscope, which also is consistent with that purpose restriction, would result in the recipient having no discretion in determining whether that purpose restriction is met.

had the transactions itself. Similarly, in applying the guidance in chapters 4 and 10, the determination of whether amounts are included or excluded from the performance measure should comprehend that if the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, an implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in circumstances in which the beneficiary cannot influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [TIS section 6400.42])

- **For HC NPOs Only**—In circumstances in which the recipient organization and the beneficiary are both controlled by the same organization, entities should consider the specific facts and circumstances to determine whether the beneficiary can influence the financial decisions of the recipient organization to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary. (HC TPA [TIS section 6400.38])

**Technical Practice Aids for Not-for-Profit Organizations**  
**Implementation of FASB Statement No. 136—**  
**Classification of a Beneficiary’s Interest in the Net Assets of a**  
**Financially Interrelated Fund-Raising Foundation**  
**(in the Beneficiary’s Financial Statements)**

HC NPOs			
NPOs that are not HC NPOs			
Can the beneficiary determine the timing and amount of distributions from the recipient to the beneficiary? [Not-for-profit health care organizations (HC NPOs) under common control consider HC Technical Practice Aid (TPA) TIS section 6400.38]	How does the existence of the recipient affect the beneficiary’s reporting of its interest?	Are any net assets held by the recipient for the benefit of the beneficiary subject to donor-imposed purpose restrictions and has the beneficiary made expenditures that meet those purpose restrictions (in circumstances in which the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary) or that are consistent with those purpose restrictions (in circumstances in which the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary)?	Are any changes in the beneficiary’s interest in the net assets of the recipient attributable to unrealized gains and losses on investments?
Yes	Existence of recipient is transparent in determining net asset classifications. (NPO TPA [TIS section 6140.14 and .16]; HC TPA [TIS section 6400.36 and .39])	Reclass the applicable net assets from temporarily restricted (TR) to unrestricted (UR) unless those net assets are subject to time restrictions that have not expired. (NPO TPA [TIS section 6140.17]; HC TPA [TIS section 6400.40])	Changes in the beneficiary’s interest in the net assets of a recipient organization attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in conformity with chapters 4 and 10 of the HC Guide in the same manner that they would have been had the beneficiary had the transactions itself. (HC TPA [TIS section 6400.42])

(continued)

No	Existence of the recipient creates an implied time restriction on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. (NPO TPA [TIS section 6140.15]; HC TPA [TIS section 6400.37])	Reclass the applicable net assets from TR to UR only if the purpose restriction and the implied time restriction are met. Whether the purpose restriction is met depends in part on (1) whether the recipient has discretion in determining whether the purpose restriction is met and (2) the recipient's decision in exercising that discretion, if any. (NPO TPA [TIS section 6140.18]; HC TPA [TIS section 6400.41])	An implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. The beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [TIS section 6400.42])
----	---	--	--

**.36 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary can influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)**

*Inquiry*—ABC Hospital, a not-for-profit health care organization subject to the AICPA Audit and Accounting Guide *Health Care Organizations*,<sup>2</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

During its most recent fiscal year, ABC Foundation's activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation distributed \$2,500 in cash representing unrestricted net assets to ABC Hospital. How should this activity be reported in ABC Hospital's financial statements?

*Reply*—Because ABC Foundation (the recipient organization) and ABC Hospital (the beneficiary) are financially interrelated, paragraph 15 of FASB Statement No. 136 requires ABC Hospital to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

<sup>2</sup> This TPA addresses not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*. TIS section 6140.14 addresses a similar issue for not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Hospital should classify the resulting net assets as if contributions were received by ABC Hospital directly from the donor, because ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Hospital's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

In the circumstances described above, ABC Hospital would initially increase its asset, "Interest in Net Assets of ABC Foundation" for the change in ABC Foundation's net assets (\$3,200). ABC Hospital's Statement of Operations would include "Change in Unrestricted Interest in ABC Foundation" of \$2,200 (which would be included in the performance indicator in conformity with chapter 10 of the Audit and Accounting Guide *Health Care Organizations*) and "Change in Temporarily Restricted Interest in ABC Foundation" of \$1,000 which would be reported in the Statement of Changes in Net Assets.

The \$2,500 distribution from ABC Foundation to ABC Hospital would not be reported as an increase in net assets on ABC Hospital's Statement of Operations or its Statement of Changes in Net Assets. By analogy to equity method accounting, the \$2,500 would be reported in a manner similar to a distribution from a subsidiary to its parent (i.e., a dividend). ABC Hospital should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

If the distribution represented restricted net assets, ABC Hospital would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Hospital would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met.

**.37 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary cannot influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)**

*Inquiry*—ABC Hospital, a not-for-profit health care organization subject to the AICPA Audit and Accounting Guide *Health Care Organizations*,<sup>3</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

During its most recent fiscal year, ABC Foundation's activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000

---

<sup>3</sup> This TPA addresses not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*. TIS section 6140.15 addresses a similar issue for not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*.

in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation elected to distribute \$2,500 in cash representing unrestricted net assets to ABC Hospital. How should this activity be reported in ABC Hospital's financial statements?

*Reply*—Because ABC Foundation (the recipient organization) and ABC Hospital (the beneficiary) are financially interrelated, paragraph 15 of FASB Statement No. 136 requires ABC Hospital to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

ABC Hospital cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation. Therefore, an implied time restriction exists on ABC Hospital's interest in the net assets of ABC Foundation (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Hospital should classify the resulting net assets as changes in temporarily restricted net assets (unless donors placed permanent restrictions on their contributions).

In the circumstances described above, ABC Hospital would initially increase its asset, "Interest in Net Assets of ABC Foundation" for the change in ABC Foundation's net assets (\$3,200). ABC Hospital's Statement of Changes in Net Assets would include "Change in Temporarily Restricted Interest in ABC Foundation" of \$3,200 as an increase in temporarily restricted net assets.

The \$2,500 distribution from ABC Foundation to ABC Hospital would not be reported as an increase in net assets on ABC Hospital's Statement of Operations or its Statement of Changes in Net Assets. By analogy to equity method accounting, the \$2,500 would be treated similar to a distribution from a subsidiary to its parent (i.e., a dividend). ABC Hospital should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

ABC Hospital would reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution, because the time restriction would expire at the time of the distribution. The reclassification would be reported as "net assets released from restrictions" and included in the performance indicator in the statement of operations. (If those net assets were subject to purpose or time restrictions that remained even after the net assets had been distributed to ABC Hospital, ABC Hospital would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Hospital would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met and the reclassification would be included in or excluded from the performance indicator in conformity with chapter 10 of the Audit and Accounting Guide *Health Care Organizations*.)

**.38 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation—Does Common Control Lead to the Conclusion That the Beneficiary Can Determine the Timing and Amount of Distributions from the Recipient?**

*Inquiry*—ABC Holding Company (a not-for-profit organization) has two not-for-profit subsidiaries (ABC Hospital and ABC Foundation) that it controls

and consolidates in conformity with the guidance in chapter 11 of the Audit and Accounting Guide *Health Care Organizations*. ABC Hospital and ABC Foundation are brother-sister organizations that are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Hospital issues separate financial statements in connection with a loan agreement. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital.

Because ABC Hospital and ABC Foundation are under common control, does that lead to the conclusion that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital?

*Reply*—In some circumstances ABC Hospital, though a subsidiary of ABC Holding Company, may be able to influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. For example, if ABC Hospital formed ABC Holding Company as a nominally-capitalized shell with no real operating powers, a rebuttable presumption exists that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. On the other hand if, for example, ABC Hospital formed ABC Holding Company to be an operating entity with substance, other factors would need to be considered in determining whether ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Therefore, it is necessary to consider the facts and circumstances surrounding the relationships between ABC Holding Company and ABC Hospital, and ABC Hospital and ABC Foundation, to determine whether ABC Hospital exerts enough influence over ABC Foundation to determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Indicators to consider may include, but are not limited to, the following:

- What is the extent of overlap among the boards of ABC Hospital, ABC Holding Company, and ABC Foundation (e.g., do a majority of the individuals who govern ABC Hospital also govern ABC Foundation; do a majority of the individuals who govern ABC Hospital also govern ABC Holding Company; are the boards of ABC Hospital, ABC Foundation and ABC Holding Company substantially independent of one another)? The greater the overlap among the boards of ABC Hospital and either ABC Holding Company or ABC Foundation, the more likely that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.
- What is the extent of overlap among management teams of ABC Hospital, ABC Holding Company, and ABC Foundation (e.g., do the individuals who manage ABC Hospital also manage ABC Foundation; do the individuals who manage ABC Hospital also manage ABC Holding Company; does ABC Holding Company have a separate management team that exercises significant authority over both ABC Hospital and ABC Foundation)? The greater the overlap between ABC Hospital's

management and management of either ABC Holding Company or ABC Foundation, the more likely that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

- What are the origins of the parent/holding company structure? For example, were ABC Holding Company and ABC Foundation created by ABC Hospital through a corporate restructuring, which may indicate that ABC Hospital, as the original entity, can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Alternatively, were ABC Hospital and ABC Foundation independent organizations that merged and created ABC Holding Company to govern the combined organization, which may indicate that ABC Hospital cannot influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.
- What is the number of organizations under common control? The greater the number of organizations under ABC Holding Company's control, the less likely it is that any one subsidiary, such as ABC Hospital, can influence the financial decisions of another brother-sister subsidiary, such as ABC Foundation, (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital

Other relevant facts and circumstances should also be considered.

**.39 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (More Than One Beneficiary—Some Contributions Are Designated)**

*Inquiry*—DEF Health Organization is the parent company of three brother-sister not-for-profit organizations: Health A, a not-for-profit health care organization subject to the AICPA Audit and Accounting Guide *Health Care Organizations*,<sup>4</sup> Health B, and Foundation. Foundation is organized for the purpose of raising contributions for the benefit of both Health A and Health B. The four entities are legally separate not-for-profit organizations that are financially interrelated pursuant to the guidance in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. Assume that Health A can influence the financial decisions of Foundation to such an extent that Health A can determine the timing and amount of distributions from Foundation to Health A.

A donor contributes \$5,000 cash to Foundation and stipulates that the contribution is for the benefit of Health A. Foundation would record the contribution as temporarily restricted revenue because Foundation must use the contribution for the benefit of Health A. In its separately issued financial statements, Health A would recognize its interest in the net assets attributable to that contribution by debiting "Interest in Net Assets of Foundation" for \$5,000. Would the offsetting credit be reported as temporarily restricted revenue

---

<sup>4</sup> This TPA addresses not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*. TIS section 6140.16 addresses a similar issue for not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*.

(because the net assets attributable to the contribution are restricted on Foundation's Balance Sheet) or unrestricted revenue (because there are no donor-imposed time restrictions or purpose restrictions on how Health A must use the contribution)?

*Reply*—Health A should report the offsetting credit as unrestricted revenue. Because Health A can influence the financial decisions of Foundation to such an extent that Health A can determine the timing and amount of distributions from Foundation to Health A, no implied time restriction exists on Health A's net assets attributable to its interest in the net assets of Foundation. Accordingly, in recognizing its interest in the net assets of Foundation and the changes in that interest, Health A should classify the resulting net assets as if contributions were received by Health A directly from the donor. In other words, the existence of Foundation should be transparent in determining the net asset classifications in Health A's separately issued financial statements because Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by Foundation are designations, rather than restrictions.)

Because no donor-imposed restrictions exist on how Health A must use the contribution, Health A should report the change in its interest in the net assets attributable to the contribution as an increase in unrestricted net assets that is included in its performance indicator (in conformity with chapter 10 of the Audit and Accounting Guide *Health Care Organizations*) in its separately issued Statement of Operations. When Foundation actually distributes the funds, Health A should increase cash and decrease its interest in net assets of Foundation; the distributions would have no effect on Health A's Statement of Operations or its Statement of Changes in Net Assets.

**.40 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that meets a purpose restriction on net assets held for its benefit by the recipient organization—The beneficiary can influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)**

*Inquiry*—ABC Hospital, a not-for-profit health care organization subject to the AICPA Audit and Accounting Guide *Health Care Organizations*,<sup>5</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of property, plant, and equipment (PPE) by ABC Hospital. ABC Hospital has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily

<sup>5</sup> This TPA addresses not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*. TIS section 6140.17 addresses a similar issue for not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*.

restricted net assets. ABC Hospital's accounting policy is to not imply a time restriction that expires over the useful life of the donated long-lived assets pursuant to paragraph 16 of FASB Statement No. 116 and it has no other net assets restricted for the purchase of PPE.<sup>6</sup> ABC Hospital subsequently purchased and placed into service \$3,000,000 of PPE that meets those donor restrictions prior to receiving a distribution from ABC Foundation. Should ABC Hospital reclassify \$3,000,000 from temporarily-restricted net assets as a result of building and placing into service the \$3,000,000 of PPE?

*Reply*—Because ABC Foundation (the recipient organization) and ABC Hospital (the beneficiary) are financially interrelated, paragraph 15 of FASB Statement No. 136 requires ABC Hospital to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Hospital should classify the resulting net assets as if contributions were received by ABC Hospital directly from the donor, because ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Accordingly, the net assets representing contributions restricted for the purchase of PPE should be reported as temporarily restricted net assets (purpose restricted) in ABC Hospital's financial statements. Upon purchasing and placing into service the PPE, ABC Hospital (and ABC Foundation) should reclassify \$3,000,000 from temporarily restricted to unrestricted net assets,<sup>7</sup> reported separately from the performance indicator in the statement of operations in conformity with the guidance in chapter 10 of the Audit and Accounting Guide *Health Care Organizations*. In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Hospital's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

- .41 Application of FASB Statement No. 136—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that is consistent with a purpose restriction on net assets held for its benefit by the recipient organization—The beneficiary cannot influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)**

---

<sup>6</sup> The assumption that ABC Hospital has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

<sup>7</sup> In this fact pattern, ABC Research Institute's interest in the net assets of ABC Foundation is subject to only purpose restrictions because the net assets arose from cash contributions with no time restrictions. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to time restrictions in addition to the purpose restrictions. In determining whether net assets that arose from promises to give are subject to time restrictions, NPOs should consider the guidance in TIS section 6140.04, *Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets are Met Before the Receivables are Due*, which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due.

*Inquiry*—ABC Hospital, a not-for-profit health care organization subject to the AICPA Audit and Accounting Guide *Health Care Organizations*,<sup>8</sup> and ABC Foundation are financially interrelated organizations as defined in paragraph 13 of FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of property, plant, and equipment (PPE) by ABC Hospital. ABC Hospital has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily restricted net assets. ABC Hospital has no other net assets restricted for the purchase of PPE.<sup>9</sup>

ABC Hospital subsequently built and placed into service the New Modern Hospital Wing (at a cost of \$3,000,000) prior to receiving a distribution from ABC Foundation or any indication from ABC Foundation that it intends to support building and placing into service the New Modern Hospital Wing. Should ABC Hospital reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Hospital Wing?

*Reply*—From ABC Hospital's perspective, its interest in the net assets of ABC Foundation has two restrictions—a purpose restriction (the purchase of the PPE) and an implied time restriction. (ABC Hospital cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital, including distributions pertaining to expenditures by ABC Hospital that meet the donor-imposed purpose restrictions. Therefore, an implied time restriction exists on ABC Hospital's interest in the net assets of ABC Foundation.) Footnote 5 to paragraph 17 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, provides, in part, as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions is recognized in the period in which the last remaining restriction has expired. Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

In considering whether the purpose restriction on ABC Hospital's interest in the net assets of ABC Foundation is met, ABC Hospital should determine whether ABC Foundation has discretion in deciding whether an expenditure by ABC Hospital that is consistent with the purpose restriction satisfies that purpose restriction. For example, if the restricted net assets arose from a contribution that

---

<sup>8</sup> This TPA addresses not-for-profit health care organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations*. TIS section 6140.18 addresses a similar issue for not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*.

<sup>9</sup> The assumption that ABC Hospital has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

was restricted for “building projects of ABC Hospital,” with no particular building project specified, purchasing and placing into service the New Modern Hospital Wing is consistent with the purpose restriction but may or may not meet it, because ABC Foundation has some discretion in deciding which building project releases the purpose restriction. In other words, ABC Foundation may, at its discretion, either release restricted net assets in support of building the New Modern Hospital Wing or not, because the purpose restriction imposed by the donor was broad enough to give ABC Foundation discretion in deciding which building projects meet the purpose restriction. If ABC Foundation has such discretion, a purpose restriction and an implied time restriction on ABC Hospital’s interest in the net assets of ABC Foundation exist. Therefore, ABC Hospital should not reclassify \$3,000,000 from temporarily restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Hospital Wing unless ABC Foundation distributes or obligates itself to distribute to ABC Hospital amounts attributable to net assets restricted for the purchase of PPE by ABC Hospital, or ABC Foundation otherwise indicates that it intends for those net assets to be used to support the building and placing into service the New Modern Hospital Wing as an activity of the current period (assuming that ABC Hospital had no other net assets that were restricted for the purchase of PPE).<sup>10, 11</sup>

In contrast to the example in the previous paragraph, if the restricted net assets arose from a contribution that was restricted for “building and placing

---

<sup>10</sup> In this fact pattern, the expenditure is made prior to meeting the purpose restriction and the implied time restriction that exists because ABC Hospital cannot determine the timing and amount of distributions from ABC Foundation to ABC Hospital. The second sentence of footnote 5 to paragraph 17 of FASB Statement No. 116 provides that in circumstances in which both purpose and time restrictions exist, expenditures meeting the purpose restriction must be made simultaneous with or after the time restriction has expired in order to satisfy both the purpose and time restriction and result in a reclassification of net assets from temporarily restricted to unrestricted. In other words, time restrictions, if any, must be met before expenditures can result in purpose restrictions being met. In this fact pattern, however, the time restriction is an implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, rather than an implied time restriction that exists because a promise to give is due in a future period or because of an explicit donor stipulation. Accordingly, in this fact pattern, temporarily restricted net assets with implied time restrictions are available to support expenditures made before the expiration of the time restrictions and the net assets should be reclassified from temporarily restricted to unrestricted in the period in which the last remaining restriction has expired. In other words, in this fact pattern, if the expenditure that meets the purpose restriction is made before meeting the implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, all the restrictions should be considered met once the implied time restriction is met.

<sup>11</sup> In this fact pattern, ABC Hospital’s interest in the net assets of ABC Foundation is subject to an implied time restriction that exists because ABC Hospital cannot determine the timing and amount of distributions from ABC Foundation to ABC Hospital and a purpose restriction. Because the net assets arose from cash contributions with no other donor-imposed time restrictions, no time restrictions other than those imposed by ABC Foundation exist. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to donor-imposed time restrictions in addition to the time restriction imposed by ABC Foundation and the purpose restriction. In determining whether net assets that arose from promises to give are subject to donor-imposed time restrictions in addition to the time restrictions imposed by ABC Foundation, NPOs should consider the guidance in TIS section 6140.04, *Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets are Met Before the Receivables are Due*, which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due. In circumstances in which the net assets are subject to (a) donor-imposed time restrictions in addition to the (b) implied time restrictions that exist because ABC Hospital cannot determine the timing and amount of distributions from ABC Foundation to ABC Hospital and (c) purpose restrictions, the last remaining time restriction should be considered in applying the guidance in footnote 5 to paragraph 17 FASB Statement No. 116 that provides that temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

into service the New Modern Hospital Wing,” ABC Foundation has no discretion in deciding whether that purpose restriction is met by building and placing into service the New Modern Hospital Wing. Therefore, if ABC Hospital builds and places into service the New Modern Hospital Wing, the purpose restriction is met (assuming that ABC Hospital had no other net assets that were restricted for building and placing into service the New Modern Hospital Wing). In addition, the implied time restriction is met because ABC Foundation is required to distribute the funds to ABC Hospital in order to meet the donor’s stipulation. Therefore, ABC Hospital (and ABC Foundation) should reclassify \$3,000,000 from temporarily-restricted net assets as a result of building and placing into service the New Modern Hospital Wing.

In summary, ABC Hospital should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Hospital Wing until both the purpose restriction and the implied time restriction are met. If both the purpose restriction and the implied time restriction are met, ABC Hospital should decrease its interest in the net assets of ABC Foundation and increase cash (or a receivable, if the Foundation has merely obligated itself to make the distribution) by the amount of the distribution, and simultaneously reclassify the same amount from temporarily restricted net assets to unrestricted net assets. The reclassification should be reported separately from the performance indicator in the statement of operations in conformity with the guidance in chapter 10 of the Audit and Accounting Guide *Health Care Organizations*.

**.42 Application of FASB Statement No. 136—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (Recipient Organization)—Accounting for Unrealized Gains and Losses on Investments Held by the Foundation**

*Inquiry*—FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*, provides that if organizations are financially interrelated, the balance sheet of the beneficiary organization should reflect that organization’s beneficial interest in the net assets of the recipient organization, and that that interest should be adjusted periodically to reflect the changes in the net assets of the recipient organization. This accounting is similar to the equity method of accounting. Chapters 4 and 10 of the Audit and Accounting Guide *Health Care Organizations*, provide guidance pertaining to the classification of investment returns in the financial statements of health care organizations.

ABC Hospital and ABC Foundation are financially interrelated organizations. How should changes in ABC Hospital’s interest in the net assets of ABC Foundation attributable to unrealized gains and losses on Foundation’s investments be classified in ABC Hospital’s financial statements?

*Reply*—In circumstances in which ABC Hospital can influence the financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from Foundation to ABC Hospital, changes in ABC Hospital’s interest in the net assets of ABC Foundation attributable to unrealized gains and losses on investments should be classified in the same manner that they would have been had ABC Hospital held the investments and had the transactions itself. In conformity with the guidance in chapters 4 and 10 of the Audit and Accounting Guide *Health Care Organizations*, ABC Hospital should include in the performance indicator the portion of the change attributable to unrealized gains and losses on trading securities that

are not restricted by donors or by law, and should exclude from the performance indicator the portion of the change attributable to all other unrealized gains and losses.

In circumstances in which ABC Hospital cannot influence the financial decisions of Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions ABC Hospital receives from Foundation, an implied time restriction exists on ABC Hospital's net assets attributable to its interest in the net assets of Foundation (in addition to any other restrictions that many exist). Accordingly, ABC Hospital should classify all changes in that interest, including the portion of the change attributable to unrealized gains and losses on investments, as changes in temporarily restricted net assets (unless donors placed permanent restrictions on investment gains and losses pertaining to their contributions) and therefore should exclude those changes from the performance indicator.

**.43 Application of FASB Statement No. 136—Classification of Distributions From a Financially Interrelated Fund-Raising Foundation (Recipient Organization) to a Health Care Beneficiary**

*Inquiry*—How should a fund-raising foundation (recipient), a not-for-profit organization subject to the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, report (in its separately issued financial statements) distributions to a financially interrelated beneficiary that is a health care organization? In other words, should such distributions be reported following (a) the guidance on reporting transfers among affiliated health care organizations in chapter 11 of the AICPA Audit and Accounting Guide *Health Care Organizations* or (b) the guidance in the AICPA Audit and Accounting Guide *Not-for-Profit Organizations* (NPO Guide).

*Reply*—The NPO Guide applies to all not-for-profit organizations, except those that are providers of health care services (paragraphs 1.01 to 1.04 of the NPO Guide). Therefore, the guidance in *Health Care Organizations*, generally does not apply to financial statements of recipient organizations that are financially interrelated fund-raising foundations. The foundation should follow the accounting and reporting requirements of the NPO Guide, rather than *Health Care Organizations*, in the foundation's separately issued financial statements. The foundation should report distributions to beneficiary organizations as expenses or distributions to related organizations. The guidance in the previous sentence applies regardless of whether the recipient organization and the beneficiary are under common control or whether one controls the other in a parent-subsidiary relationship.

**.44 Other-Than-Temporary Impairment Losses on Investments by Not-for-Profit Health Care Organizations**

*Inquiry*—Paragraph 4.07 of the AICPA Audit and Accounting Guide *Health Care Organizations* (Guide) states that a not-for-profit health care organization should include in the performance indicator other-than-temporary impairment losses on investments in debt securities and investments in equity securities with readily determinable fair values. What constitutes an other-than-temporary impairment on such investments for a not-for-profit health care organization?

*Reply*—The Guide uses the term "other than temporary" impairment losses with the same meaning as in paragraph 16 of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. That paragraph, as amended, states, in part:

For individual securities classified as either available-for-sale or held-to-maturity, an enterprise shall determine whether a decline in fair value below the amortized cost basis is other than temporary. For example, if it is probable that the investor will be unable to collect all amounts due according to the contractual terms of a debt security not impaired at acquisition, an other-than-temporary impairment shall be considered to have occurred. If the decline in fair value is judged to be other than temporary, the cost basis of the individual security shall be written down to fair value as a new cost basis and the amount of the write-down shall be included in earnings (that is, accounted for as a realized loss).

While FASB Statement No. 115 uses a debt security as an example, similar considerations exist for investments in marketable equity securities, including shares of mutual funds. Not-for-profit health care organizations do not distinguish between securities that are available-for-sale and those that are held-to-maturity; therefore, the above guidance applies to all investments in debt and marketable equity securities other than those that are classified as trading securities.

The FASB Special Report, *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities*, contains additional guidance. The answer to Question 46 notes that in addition to a deterioration in the issuer's creditworthiness, recognition of an other-than-temporary impairment loss "also may be required if the security will be disposed of before it matures or the investment is not realizable and the decline in a security's value is due to an increase in market interest rates or a change in foreign exchange rates since acquisition." Like FASB Statement No. 115, the examples in the answer to Question 46 refer to debt securities; similar considerations apply to investments in marketable equity securities.

FASB Statement No. 115 refers to two other sources of literature that should be considered in evaluating impairment: AICPA Statement on Auditing Standards (SAS) No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, and SEC Staff Accounting Bulletin No. 59, *Accounting for Noncurrent Marketable Equity Securities*. Paragraph 47 of SAS 92 states:

*Impairment Losses.* Regardless of the valuation method used, generally accepted accounting principles might require recognizing in earnings an impairment loss for a decline in fair value that is other than temporary. Determinations of whether losses are other than temporary often involve estimating the outcome of future events. Accordingly, judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors.

- Fair value is significantly below cost and:
  - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - The decline has existed for an extended period of time.
  - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.

- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

SAB 59 emphasizes that the phrase “other than temporary” should not be interpreted as meaning “permanent.” The term “temporary” is defined as “lasting for a limited time.”<sup>12</sup> The term “other than temporary,” then, refers to situations where the decline lasts for more than a limited time, but is not necessarily permanent in nature. As a result, the eventual recovery in fair value of an investment should not preclude the recognition of an other-than-temporary impairment loss. Further, if an other-than-temporary impairment exists at the balance sheet date, the security is written down to its fair value at the balance sheet date, even if the fair value increases between the balance sheet date and the issuance of the financial statements.

The concept of other-than-temporary impairment is a matter of professional judgment, depending on specific facts and circumstances. FASB Statement 115 and other literature do not provide “bright lines” or “safe harbors” to identify those securities that may have an other-than-temporary impairment. However, a common feature of all of the guidance is that a significant decline in fair value below cost or a decline in fair value below cost for an extended period of time indicates an other-than-temporary impairment loss. FASB Statement 115 requires each security to be evaluated based on the individual facts and circumstances using professional judgment. Generally, the greater the decline in value, as evidenced by market prices or the length of time period the decline has existed, the greater the evidence that will be needed to conclude that an other-than-temporary decline has not occurred. For example, a not-for-profit health care organization owns shares of a mutual fund (with a cost basis of \$100,000) that tracks one of the major stock market indexes. The market value of the mutual fund has been below \$80,000 continuously for more than 9 months. The organization should consider the impairment other-than-temporary unless the organization has (1) objective and verifiable evidence that the market value will recover to \$100,000 within a reasonable period of time and (2) the ability and intent to hold the investment for that reasonable period of time.

The Emerging Issues Task Force is considering Issue 03-1, “The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments,” which may provide additional guidance on this topic. Readers should be alert to a final consensus.

#### **.45 Applicability of FASB Interpretation No. 45—Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others**

*Inquiry*—In order to attract a physician into a community to meet community needs, a hospital may loan the physician an amount to be forgiven over a set period as long as the physician remains in practice in the community. The hospital (generally a not-for-profit) is precluded from requiring the physician to refer patients to or treat patients at that facility, although the hospital hopes to be the primary referral location. Is this arrangement subject to FASB

---

<sup>12</sup> Oxford English Dictionary

Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others?*

*Reply*—No. The contract does not constitute a guarantee contract under paragraph 3 of FASB Interpretation No. 45.

**.46 Applicability of FASB Interpretation No. 45—Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others—Mortgage Guarantees**

*Inquiry*—In order to recruit a physician, a hospital may guarantee the physician's home mortgage. The physician may be recruited either as an employee of the hospital or as an independent contractor. Is this arrangement considered a guarantee under FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others?*

*Reply*—If the physician becomes an employee of the hospital, the arrangement is not covered by FASB Interpretation No. 45; see the discussion of "other employment-related costs" in paragraph A19a. If the physician is not an employee, then the arrangement is considered a guarantee under FASB Interpretation No. 45. The contract requires the guarantor (hospital) to make a payment (in cash) to the guaranteed party (mortgage lender) based on changes in an underlying (occurrence or nonoccurrence of a specified event such as a scheduled payment under mortgage contract not made by physician) that is related to an asset (mortgage loan) of the guaranteed party (mortgage lender).

As an example, a physician obtains a mortgage guarantee from a hospital. The presence of the hospital's guarantee, obtained through a local bank, reduces the interest rate on the physician's mortgage loan by one-half point. No loan default is expected to occur (and as a result, no cash is expected to be paid out). At inception, the hospital would record an obligation to stand ready to perform in an amount equal to the fair value of the guarantee. FASB Interpretation No. 45 does not prescribe where the offsetting debit should go (e.g., expense, asset, or adjustment to a gain or loss on sale), instead stating that it depends on the circumstances in which the guarantee was issued (paragraph 11).

FASB Interpretation No. 45 does not describe in detail how the guarantor's liability for its obligations under the guarantee would be measured subsequent to initial recognition, but notes (paragraph 12) that the liability typically would be reduced by a credit to earnings as the guarantor is released from risk under the guarantee. In the situation described above, the hospital would be released from risk as the physician's outstanding mortgage obligation is reduced.

## Section 6500

### *Extractive Industries*

#### **.03 Disclosure of Contingent Liability for Royalties**

*Inquiry*—A company is forming a new subsidiary company which is purchasing the assets of an existing coal mining partnership. The total consideration is \$2,000,000, which is to be paid in the following manner:

- (1) \$750,000 in cash at the time of closing, which is considered as payment for coal land owned in fee, mining equipment, supplies, and other real estate, all of which have a fair market value of at least \$750,000.
- (2) \$1,250,000 to be paid as an overriding royalty of 10¢ per ton for all coal mined by the purchaser on the properties both owned and leased, acquired from the sellers or on any subsequently acquired properties.

Should the \$1,250,000 be recorded as a liability on the statement of financial position? If the \$1,250,000 is recorded as a liability and reduced monthly at the time that the 10¢ per ton overriding royalty is paid, how should the asset account be amortized?

*Reply*—It would be improper to reflect the total amount of the stipulated overriding royalty as a liability in the financial statements with a correlative charge being made to an asset account. The only possible rationale for setting these amounts up immediately, is to base such treatment on the contentions that (a) from a going concern standpoint, it is likely the total amount in question will eventually be paid; and (b) the transaction is viewed as involving a “premium” or “purchase price” undertaken to be paid for the acquisition of a leasehold. This rationale is erroneous since no immediate payment for the leasehold rights is made.

The \$1,250,000 is a contingent liability—a commitment entirely conditioned on the actual mining of coal. Accordingly, royalties should be accrued as a liability only when, and to the extent that, tonnage (to which the royalty applies) is actually mined. In the purchase agreement, there is a liability on the overriding royalty if no coal is mined.

The rule of informative disclosure requires that the essential facts concerning the property acquisitions be indicated in a footnote to the statements, including an adequate explanation as to the nature and amount of the company’s contingent liability.

Although there are instances where royalty payments are reflected as administrative or selling expense, in this case the royalties are paid for the right to mine the coal. The royalty cost may be viewed as a direct burden on production cost and should be accumulated as part of the cost of coal mined. The royalty cost then would be matched with revenues at the point of sale, as part of the cost of coal sold.

## Section 6600

### *Real Estate*

#### **.01 Method of Recognizing Revenue from Commissions by Real Estate Brokerage Firm**

*Inquiry*—A client is a real estate broker and also manages real estate. The client is the exclusive broker for all its affiliates and acts as broker for outside parties as well. All of the affiliates invest in raw land for appreciation and occasionally improve and subdivide parcels. None of the properties are extensive enough to be considered “retail land sales companies.” Sales are probably half for second home sites and half for larger parcels bought for investment. Sales are usually for cash with an occasional mortgage taken by the seller. The client usually receives a gross brokerage commission of 10%-15% which is shared with its salesmen and co-brokers, retaining an average of 5%. Commissions are received at closing and co-brokers are paid shortly after the closing. Salesmen draw against firm purchase and sale agreements and are credited with the commission on closing. If a buyer fails to complete a purchase, his deposit is usually retained by the client in lieu of the brokerage commission, which legal counsel indicates is permitted under law.

The client records brokerage commission income when a firm purchase and sale agreement is accepted. This is an agreement which specifies price and all terms of sale, has no unusual or difficult conditions, and is secured by a deposit of 10% or more of the purchase price. This method was adopted by the client to more closely match revenues and expenses. Indirect selling expenses, including advertising, are treated as period costs. The costs of co-brokerage and salesmen’s commissions are also accrued at that time. The client’s contention is that the earnings process has been substantially completed, and the wait until closing (usually 30-90 days but occasionally longer) is a legal formality rather than an integral part of the broker’s work. Very few sales are not closed, and the price and terms of sale rarely change. From an audit point of view, many of the open sales at year-end have closed by completion of the audit field work. The client’s financial statements do disclose the method of accounting employed for brokerage commissions.

Is this present method of accounting for brokerage commissions considered acceptable?

*Reply*—Revenue recognition is discussed in FASB Concepts Statement No. 5, *Recognition and Measurement of Business Enterprises*, paragraphs 83 and 84. Paragraph 83 states in part:

“Revenues are not recognized until earned. An entity’s revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues.”

Therefore, the client’s method of accounting for commission income at the time when a firm purchase and sale agreement is entered into would be acceptable. However, because of state laws governing real estate operations, recognition of

commission income might have to be postponed, depending on the particular legal requirements of a given state, until such time as the broker is legally entitled to receive that commission.

### **.03 Accounting for Sale of Property With Option to Repurchase**

*Inquiry*—A corporation sold a parcel of land to a bank. The corporation has an option to repurchase the land for a period of three years. The corporation received the full purchase price at the time of sale.

What is the proper accounting treatment for this transaction?

*Reply*—The conclusion in FASB Statement No. 66, *Accounting for Sales of Real Estate*, paragraph 26, is that a transaction whereby a seller has an obligation or an option to repurchase the property must be accounted for as a financing, leasing, or profit sharing arrangement. A right of first refusal based on a bona fide offer by a third party is ordinarily not an obligation or an option to repurchase.

### **.04 Method of Recognizing Profit on Sale of Undeveloped Land With a Release Provision**

*Inquiry*—One hundred acres of undeveloped land was sold for \$10,000 per acre for a total consideration of \$1,000,000. The buyer made a cash down payment of \$250,000, and the balance of \$750,000 is payable in three annual installments of \$250,000. The agreement has a release provision that title to the acreage will be released to the buyer on a basis of 115% of the sales price. Therefore, of the \$250,000 down payment, \$217,000 would be applicable to the release of 21.7 acres, and the balance of \$33,000 would be applicable to the remaining acreage. At this point, there would be a balance due on the sales agreement of \$750,000 against which \$33,000 would apply. The buyer would have this privilege every year, and the only security would be the land underlying the agreement.

What is the proper accounting treatment?

*Reply*—FASB Statement No. 66, *Accounting for Sales of Real Estate*, paragraph 15 (AC Re1.115), states:

If the amounts applied to unreleased portions do not meet the initial-and continuing-investment criteria as applied to the sales value of those unreleased portions, profit shall be recognized on each released portion when it meets the criteria in paragraph 5 as if each release were a separate sale.

Paragraph 5 (AC Re1.105) states, in part:

Profit on real estate sales transactions shall not be recognized by the full accrual method until all of the following criteria are met:

- a. A sale is consummated.
- b. The buyer's initial and continuing investments are adequate to demonstrate a commitment to pay for the property.
- c. The seller's receivable is not subject to future subordination.
- d. The seller has transferred to the buyer the usual risks and rewards of ownership in a transaction that is in substance a sale and does not have a substantial continuing involvement with property.

Presumably, the tests referred to would have to be met continuously; that is, at the time of closing and at each release date.

The relationship of the \$33,000 to the \$750,000 is not sufficient “to constitute an adequate initial and continuing investment” related to the unreleased property. Therefore, “profit should be recognized as if each release were a separate sale” as stated in paragraph 15 (AC Re1.115). [Amended]

### **.07 Accounting for Nonmonetary Exchange of Land**

*Inquiry*—A real estate company is engaged in developing residential communities, but they occasionally sell undeveloped parcels of land. The company has entered into an agreement whereby it will exchange land zoned for industrial use having a cost basis of \$10,000 for residential land having a fair value of \$50,000.

Is it proper to record the land received at \$50,000 and recognize a gain of \$40,000?

*Reply*—APB Opinion No. 29, paragraph 21(a) (AC N35.108a), indicates that “an exchange of a product or property held for sale in the ordinary course of business for a product or property to be sold in the same line of business to facilitate sales to customers . . .” does not culminate an earnings process. This exchange represents only a shift in real estate held as inventory. Therefore, the exchange should be reported on the basis of the recorded amount of the nonmonetary asset given up, \$10,000.

---

**[The next page is 6151.]**

## Section 6700

### Construction Contractors

#### **.01 Distinction Between Long-Term and Short-Term Construction Contracts**

*Inquiry*—A construction company considers all contracts that are less than one year in duration as short-term contracts and accounts for them on a completed contract method. Long-term contracts are accounted for on the completed-contract method or the percentage of completion method depending on other factors.

Does the distinction made by the company conform with generally accepted accounting principles?

*Reply*—SOP No. 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, paragraph 31 (ACC 10,330.31), and the AICPA Audit and Accounting Guide *Construction Contractors*, page 123, state that the completed-contract method may be used as the basic accounting method only if the financial position and results of operations reported on that basis would not vary from those resulting from the use of the percentage-of-completion method, “for example, in circumstances in which an entity has primarily short-term contracts.” SOP No. 81-1, paragraph 31 (ACC 10,330.31), also states that an entity using the completed-contract method as its basic accounting method should depart from that policy for a single contract or a group of contracts not having the features described in the paragraph. Thus, it appears that the distinction made by the company conforms to generally accepted accounting principles. [Amended]

#### **.10 Payments for Landfill Rights**

*Inquiry*—A construction contractor pays for rights allowing the contractor to extract a specified volume of landfill from a third party’s property for a period of three years. How should the payment for landfill rights be classified in the contractor’s balance sheet?

*Reply*—Until the landfill is extracted, the contractor should classify the payment for landfill rights as a deferred charge. The portion of the landfill payment related to the volume of landfill extracted should be reclassified as project costs. A deferred charge remaining at the termination of the agreement should be written off as an expense.

---

[The next page is 6351.]

## Section 6910

### *Investment Companies*

#### **.16 Presentation of Boxed Investment Positions in the Condensed Schedule of Investments of Nonregistered Investment Partnerships**

*Inquiry*—Should long and short positions in the same security (“boxed positions”) be disclosed on a gross or net basis in the schedule of investments?

*Reply*—Although there may be a perfect economic hedge in boxed positions, the determination of which components of the boxed position would be required to be presented in the schedule of investments should be evaluated on a gross basis for the purposes of the 5 percent of net assets test as described in paragraph 7.13 of the AICPA Audit and Accounting Guide *Investment Companies*. To the extent that one (or both) of the components is (are) required to be disclosed, such component(s) should be disclosed on the schedule of investments because there may be market risk if one position is removed before the other or experiences settlement costs or losses upon disposition. In the event that only one of the positions is required to be disclosed, a nonregistered investment partnership is not precluded from disclosing both positions.

#### **.17 Disclosure of Long and Short Positions**

*Inquiry*—If a nonregistered investment partnership has a long position that exceeds 5 percent of net assets and a short position in the same issuer that is less than 5 percent of net assets, is the investment partnership required to disclose both the long and short position in the condensed schedule of investments?

*Reply*—No. The guidance in paragraph 7.13 of the AICPA Audit and Accounting Guide *Investment Companies* indicates that, in applying the 5 percent test to determine the investments to be disclosed in the condensed schedule of investments, total long and total short positions in any one issuer should be considered separately. Because the value of the long position exceeds 5 percent of net assets, disclosure of the long position is required; however, disclosure of the short position is not required because the short position does not exceed 5 percent of net assets. Although not required, a nonregistered investment partnership is not precluded from disclosing both positions.

#### **.18 Disclosure of an Investment in an Issuer When One or More Securities and/or One or More Derivative Contracts Are Held**

*Inquiry*—A nonregistered investment partnership may hold one or more securities of the same issuer and one or more derivative contracts for which the underlying is a security of the same issuer. How should such securities and derivative contracts be presented in the condensed schedule of investments when applying paragraphs 7.13*b*, *d* and *e* of the AICPA Audit and Accounting Guide *Investment Companies*?

*Reply*—When applying the guidance in paragraphs 7.13*b*, *d* and *e* of the Guide, the disclosure on the condensed schedule of investments should be consistent with the classification of the securities or contracts on the statement of assets and liabilities. Those securities (market value) and derivative contracts (appreciation or fair value) that are classified as assets should be aggregated. To the extent that the sum constitutes more than 5 percent of net

assets, each position must be presented separately in the condensed schedule of investments. The investment company should similarly sum all of the positions classified as liabilities and determine whether or not they exceed 5 percent. The netting concepts allowed by FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts*, are not considered when determining disclosures in the condensed schedule of investments.

The following are illustrative examples of how to apply the disclosure guidelines.

U.S. Treasury Bond (Long)—4 percent of net assets

U.S. Treasury Bond (Short)—1 percent of net assets

U.S. Treasury Bond Futures Contract—appreciation equals 2 percent of net assets

In the example above, the investment company should present separately the long bond and the futures contract in the condensed schedule of investments, because in aggregate they exceed 5 percent of net assets. The short bond position, which represents the only liability position associated with the issuer, is not required to be disclosed separately because the position is less than 5 percent of net assets. This assessment for derivatives is made regardless of whether the exposure to the underlying is long or short. Assessments are based solely on the value of the derivative contract (i.e., either a long or short position with depreciation or a negative fair value would be considered a liability and aggregated with other liabilities for the purpose of this test). The preparer may consider whether disclosure of all positions, including those under 5 percent, would be appropriate in the circumstances.

*Example 2:*

Bond of X Company (Long)—3 percent of net assets

Stock of X Company (Short)—1 percent of net assets

Swap (X Company is the underlying)—fair value equals 2 percent of net assets

In the example above, the investment company would not be required to present any of the positions in the condensed schedule of investments because the total asset position of the issuer (represented by the bond) is less than 5 percent of net assets and the total liability position (represented by the combined total of values of the short stock position and the swap) is also less than 5 percent of net assets.

*Example 3:*

Bond of X Company (Long)—4 percent of net assets

Stock of X Company (Short)—2 percent of net assets

Swap (X Company is the underlying)—fair value equals 2 percent of net assets

Swap (X Company is the underlying)—fair value equals 4 percent of net assets

In the example above, the investment company should present each of the positions in the condensed schedule of investments because the total asset position of the issuer (represented by the combined total of values of the bond and the appreciated swap) and the total liability position of the issuer (represented by the combined total of values of the short stock position and the depreciated swap) are both greater than 5 percent of net assets.

## **.19 Information Required to Be Disclosed in Financial Statements When Comparative Financial Statements of Nonregistered Investment Partnerships Are Presented**

*Inquiry*—When comparative financial statements of a nonregistered investment partnership are presented, should the schedule of investment be presented as of the end of each period presented, or only as of the most recent date of the statement of assets and liabilities? Additionally, when comparative financial statements of a nonregistered investment partnership are provided, should the financial highlights be presented for each period provided, or only for the most recent period?

*Reply*—The AICPA Audit and Accounting Guide *Investment Companies* does not require comparative financial statements for nonregistered investment partnerships. However, if an entity elects to prepare comparative financial statements, the general guidance for the presentation of comparative financial statements as found in Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*, Chapter 2A indicates that:

In any one year it is ordinarily desirable that the balance sheet, the income statement, [the statement of cash flows,] and the statement of [retained earnings] be given for one or more preceding years as well as for the current year. Footnotes, [and] explanations . . . that appeared on the statements for the preceding years should be repeated, or at least referred to, in the comparative statements to the extent that they continue to be of significance.

Because the schedule of investments would continue to be considered of significance relative to the statement of assets and liabilities for the prior year, the schedule of investments for the prior year should be included as a part of the comparative statements. Additionally, paragraph 7.01 of the Guide states that “at a minimum, a condensed schedule of investments (as discussed in paragraphs 7.13 and 7.14) should be provided for each statement of assets and liabilities.” Therefore, comparative schedules of investments are required to be presented when comparative statements of assets and liabilities are reported.

Consistent with the requirements of ARB 43, comparative financial highlights should be presented when comparative statements of operations are provided because they would also be considered a significant disclosure for the prior periods of operation included in the financial statements.

## **.20 Presentation of Purchases and Sales/Maturities of Investments in the Statement of Cash Flows**

*Inquiry*—Should the value of securities purchased by a nonregistered investment partnership during the period presented be reported in the statement of cash flows separately from the proceeds received on the sale/maturity of securities by the nonregistered investment partnership or may the nonregistered investment partnership report only the net difference?

*Reply*—In general, a nonregistered investment partnership should present purchases and sales/maturities of long-term investments (securities purchased with no stated maturity or with a stated maturity of greater than one year at the date of acquisition) on a gross basis in the statement of cash flows pursuant to Statement of Financial Accounting Standards No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Acquired for Resale*, and in accordance with the requirements in paragraph 7.63 of the AICPA Audit and Accounting Guide *Investment Companies*, although the nonregistered investment partnership may consider

the provisions in Statement of Financial Accounting Standards No. 95, *Statement of Cash Flows*, paragraph 13 in determining whether or not certain purchases and sales/maturities qualify for net reporting. Purchases and sales/maturities of short-term investments (securities purchased with a stated remaining maturity of one year or less at the date of acquisition), however, may be presented on a net basis, as permitted in paragraph 7.63 of the Guide. Additionally, proceeds and costs reported for transactions in short positions are reflected separately from proceeds and costs associated with long positions.

### **.21 Recognition of Premium/Discount on Short Positions in Fixed-Income Securities**

*Inquiry*—An investment company enters into short positions on various fixed-income securities, where the short sale price is at a premium or discount to the par value of the bond. The Audit and Accounting Guide *Investment Companies* states in Chapter 2 that an investment company is required to amortize premiums/discounts on its investments, referring to long positions, but is silent as to whether similar accounting is required for short positions. The investment company currently recognizes all payments of coupon interest as interest expense on its short positions. Is the investment company also required under generally accepted accounting principles (GAAP) to amortize the premium/discount on the short position?

*Reply*—Yes. As when recognizing interest income on long positions, when recognizing interest expense on short positions, the investment company should recognize all economic elements of interest, including premium and discount.

### **.22 Presentation of Reverse Repurchase Agreements**

*Inquiry*—An investment company enters into a reverse repurchase agreement, which is defined in Chapter 3 of the Audit and Accounting Guide *Investment Companies* as “the sale of a security at a specified price with an agreement to purchase the same or substantially the same security from the same counterparty at a fixed or determinable price at a future date.” The investment company receives cash and initially records the amount payable as a liability. Should reverse repurchase agreements be presented in the financial statements of investment companies at the amount payable or at fair value?

*Reply*—Investment companies present their debt obligations at amounts payable. Because reverse repurchase agreements represent a fixed, determinable obligation of the investment company, such agreements should also be presented at amounts payable. A reverse repurchase agreement denominated in a currency that differs from the reporting currency should be translated at the current exchange rate.

### **.23 Accounting Treatment of Offering Costs Incurred by Investment Partnerships**

*Inquiry*—According to Chapter 8 of the Audit and Accounting Guide *Investment Companies*, all open-end registered investment companies and those closed-end registered investment companies with a continuous offering period should defer offering costs and amortize them to expense over 12 months on a straight-line basis. However, the Guide does not indicate whether an investment partnership should apply the same treatment. Should an investment partnership that continually offers its interests also defer and amortize such costs over 12 months?

*Reply*—Yes, an investment partnership that continually offers its interests should defer offering costs incurred prior to the commencement of operations

and then amortize them to expense over the period that it continually offers its interests, up to a maximum of 12 months. The straight-line method of amortization should generally be used. If the offering period terminates earlier than expected, the remaining deferred balance should be charged to expense.

#### **.24 Meaning of "Continually Offer Interests"**

*Inquiry*—How should an investment partnership determine if it continually offers its interests?

*Reply*—An investment partnership is deemed to continually offer its interests if an eligible, new investor may enter into an agreement to purchase an interest in the partnership on any business day or on a series of specified business days over a continuous period of time. A new investor is one that does not already own any interest in the investment partnership at the time of purchase.

Some investment partnerships may offer their interests at a single point in time and require new investors to commit to providing capital contributions over a period of time. As interests are not available for purchase over a continuous period, such investment partnerships would not be deemed to have a continuous offering period.

## Section 6930

### *Employee Benefit Plans*

#### **.01 When Does a Plan Have to File a Form 11-K?**

*Inquiry*—When is a plan subject to the requirements of the Securities Act of 1933, thus requiring a Form 11-K filing under the Securities Exchange Act of 1934?

*Reply*—Section 3(a)(2) of the Securities Act of 1933 provides exemptions from registration requirements for defined benefit plans and defined contribution plans not involving the purchase of employer securities with employee contributions. All other plans are subject to the requirements, provided they are both voluntary and contributory. For further guidance, see paragraph 12.24 of the AICPA Audit and Accounting Guide *Employee Benefit Plans* (March 2007). Advice of ERISA counsel should be obtained to determine if the registration requirements apply to the plan.

---

[The next page is 6475.]

## Section 6931

## Financial Statement Reporting and Disclosure—Employee Benefit Plans

### .01 Computation of Net Appreciation/Depreciation in Fair Value of Investments

*Inquiry*—FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, paragraph 15 (AC Pe5.114), requires the statement of changes in net assets available for benefits to include separate disclosure of the net appreciation (depreciation) in fair value for each significant class of investments. The AICPA Audit and Accounting Guide *Employee Benefit Plans* (March 2007), paragraphs 3.32a and 4.52d, require the same disclosure for defined contribution plans and employee health and welfare benefit plans. How can this amount be computed?

*Reply*—FASB Statement No. 35, paragraph 15, footnote 7 (AC Pe5.114, footnote 10), states that the net appreciation (depreciation) in the fair value of investments should include both realized and unrealized gains (losses). This amount may be computed by aggregating the realized and unrealized gains and losses for each individual security. However, this would be quite time-consuming if the plan has a large portfolio of investments. As an alternative, the following formula may be used to compute the net appreciation (depreciation) in the fair value of each type of investment:

Market value at 12/31/X1 . . . . .	\$XXX
Total proceeds of assets sold in 20X2 . . . . .	<XX>
Add: Total cost of assets purchased in 20X2 . . . . .	XX
Market value at 12/31/X2 . . . . .	<XXX>
Net appreciation/depreciation in fair value of investments . . . . .	<u>\$XXX</u>

### .02 Benefits Payable to Terminated Participants of a Defined Contribution Plan

*Inquiry*—Should benefits payable to terminated participants of a defined contribution [such as profit sharing or 401(k)] plan be classified as a liability in the plan financial statements?

*Reply*—No. Classifying benefits payable to participants as a liability is inappropriate because, by definition, net assets available for benefits (the difference between plan assets and liabilities) represent benefits owed to all participants—both active and terminated. Therefore, only amounts owed to nonparticipants (that is, third parties) should be classified as liabilities.

However, benefits payable to terminated participants should be disclosed in accordance with paragraph 3.35 of the AICPA Audit and Accounting Guide *Employee Benefit Plans* (March 2007), which states:

The financial statements should also disclose, if applicable—

- m. Amounts allocated to accounts of persons who have elected to withdraw from the plan but have not yet been paid. These amounts should

not be reported as a liability on the statement of net assets available for benefits, in financial statements prepared in conformity with generally accepted accounting principles. A footnote to reconcile the audited financial statements to the Form 5500 may be necessary to comply with ERISA . . .

[Amended June 1995]

**.03 Should the Sale of Real Estate Investments Held by Employee Benefit Plans Be Treated as Discontinued Operations?**

*Inquiry*—Many employee benefit plans invest directly in real estate (for example, a building) that generates rental income and operating expenses for the plan. Generally, these plans are defined benefit plans but certain defined contribution plans may also hold these investments.

Paragraph 41 of FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides that a “component of an entity” comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity. A component of an entity may be a reportable segment or an operating segment, a reporting unit, a subsidiary, or an asset group.

Paragraph 42 of FASB Statement No. 144 provides that the results of operations of a component of an entity that either has been disposed of or is classified as held for sale shall be reported in discontinued operations in accordance with paragraph 43 of FASB Statement No. 144 if both of the following are met:

- a. The operations and cash flows of the component have been (or will be) eliminated from the ongoing operations of the entity as a result of the disposal transaction and
- b. The entity will not have any significant continuing involvement in the operations of the component after the disposal transaction.

Paragraph 43 of FASB Statement No. 144 states that in a period in which a component of an entity either has been disposed of or is classified as held for sale, the income statement of a business enterprise (or statement of activities of a not-for-profit organization) for current and prior periods shall report the results of operations of the component, including any gain or loss recognized in accordance with paragraph 37 of FASB Statement No. 144, in discontinued operations.

Because employee benefit plans are not specifically scoped out of FASB Statement No. 144, if an employee benefit plan invests in real estate that generates rental income and operating expenses for the plan and then sells that property, is the sale of the real estate investment considered a discontinued operation of the plan?

*Reply*—No. For many entities, an investment in real estate (such as a building) that generates rental income and operating expenses would meet the definition of a “component of an entity” (as defined in FASB Statement No. 144) and, therefore, any gains or losses relating to the disposal of that “component” would be reported in discontinued operations. However, employee benefit plan financial statements show financial status or net assets available for benefits and changes in financial status or net assets available for benefits. Because they do not show a statement of operations or activities, distinguishing between continuing and discontinued operations is not meaningful. Rather, real estate

in an employee benefit plan should be treated as an investment carried at fair value and the related income/expenses and net appreciation/depreciation should be included in the statement of changes in financial status or statement of changes in net assets available for benefits. No distinction should be made between continuing and discontinued operations.

#### **.04 Depreciation of a Real Estate Investment Owned by a Defined Benefit Pension Plan**

*Inquiry*—A defined benefit pension plan has invested in real estate which owns and receives rents from various stores in a shopping center. The financial statements include an expense for depreciation based on original cost. FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, paragraph 11 (AC Pe5.110), requires that plan investments in real estate be presented at their fair value at the reporting date. Consequently, by providing for depreciation expense, the unrealized appreciation on this asset is increased.

Should depreciation expense be reflected for this plan investment?

*Reply*—No. Depreciation expense is normally an adjustment of the valuation of fixed assets reported at cost, in accordance with FASB Statement No. 35, paragraph 14 (AC Pe5.113), which requires plan assets used in plan operations to be presented at cost less accumulated depreciation or amortization. Accordingly, since plan investments in real estate are to be reported at fair value, there is no requirement to provide for depreciation expense.

#### **.05 Accounting and Disclosure Requirements for Single-Employer Employee Benefit Plans Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003**

*Inquiry*—On December 8, 2003, the President signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) for employers that sponsor postretirement health care plans that provide prescription drug benefits. The Act introduces a prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D.1. In May 2004, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) FAS 106-2, *Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003*. That FSP addresses the issue of whether an employer that provides postretirement prescription drug coverage should recognize the effects of the Act on its accumulated postretirement benefit obligation (APBO) and net postretirement benefit costs and, if so, when and how to account for those effects. FSP FAS 106-2 says that the APBO and net periodic postretirement benefit costs should reflect the effects of the Act. The FSP does not address accounting for the subsidy by health and welfare benefit plans.

For a single-employer health and welfare benefit plan, should the effects of the plan sponsor's (employer's) Medicare prescription drug subsidy (Medicare subsidy) be taken into consideration when calculating the health and welfare plan's postretirement benefit obligation?

*Reply*—No, the effects of the employer's Medicare subsidy should not be reflected in the plan's obligations. The primary objective of the financial statements of a health and welfare benefit plan is to provide financial information that is useful in assessing the plan's present and future ability to pay its

benefit obligations when due. The Medicare subsidy amount is paid to the plan sponsor and does not flow into the plan. The plan sponsor is not required to use the subsidy amount to fund the postretirement benefits and may use the subsidy for any valid business purpose. As a result, the Medicare subsidy does not reduce the amount of benefits that need to be covered by plan assets and future employer contributions. Therefore, the APBO, without reduction for the Medicare subsidy, is a more meaningful measure of the benefits. Further, the information necessary to calculate the gross measure should be readily available for sponsors who are subject to income taxes, because those plan sponsors should maintain gross and net measures of the APBO in order to properly account for income taxes under FASB Statement No. 109, *Accounting for Income Taxes*.

**Disclosures.** The plan should disclose the following:

- a. The existence of the Act
- b. The fact that the APBO and the changes in the benefit obligation do not reflect any amount associated with the Medicare subsidy because the plan is not directly entitled to the Medicare subsidy
- c. Until the plan sponsor (employer) is able to determine whether benefits provided by its plan are actuarially equivalent to Medicare Part D.1, that the employer is not able to determine whether the benefits provided by its plan are actuarially equivalent to Medicare Part D.1. If the plan sponsor (employer) has included the effects of the Medicare subsidy in measuring its APBO and changes in benefit obligation, the plan should disclose the fact that the amount of the APBO differs from that disclosed by the plan sponsor (employer) because the plan sponsor's amounts are net of the Medicare subsidy.

#### **.06 Accounting and Disclosure Requirements for Multiemployer Employee Benefit Plans Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003**

*Inquiry*—On December 8, 2003, the President signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) for employers that sponsor postretirement health care plans that provide prescription drug benefits. The Act introduces a prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D.1. In May 2004, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) FAS 106-2, *Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003*. That FSP addresses the issue of whether an employer that provides postretirement prescription drug coverage should recognize the effects of the Act on its accumulated postretirement benefit obligation (APBO) and net postretirement benefit costs and, if so, when and how to account for those effects. FSP FAS 106-2 says that the APBO and net periodic postretirement benefit costs should reflect the effects of the Act. The FSP does not address accounting for the subsidy by multiemployer health and welfare benefit plans or by the sponsors or participating employers of those plans.

For multiemployer health and welfare benefit plans, should the effects of the Medicare prescription drug subsidy (Medicare subsidy) be taken into

consideration when calculating the health and welfare plan's postretirement benefit obligation?

*Reply*—Yes, the multiemployer plan's benefit obligations should be reduced by the effects of the Medicare subsidy because the multiemployer plan trust receives the subsidy amount directly and not the individual employers. Because the primary objective of the financial statements of a health and welfare benefit plan is to provide financial information that is useful in assessing the plan's present and future ability to pay its benefit obligations when due, and because the Medicare subsidy amount flows into the multiemployer plan trust, the APBO net of the Medicare subsidy is a more meaningful measure of those benefits.

**Disclosures.** Until the multiemployer plan is able to determine whether benefits provided by its plan are at least actuarially equivalent to Medicare Part D.1, the plan should disclose the following in the notes to its financial statements:

- a. The existence of the Act
- b. The fact that measures of the APBO and changes in the benefit obligation do not reflect any amount associated with the subsidy because the plan is unable to conclude whether the benefits provided by the plan are actuarially equivalent to Medicare Part D under the Act.

If the multiemployer plan has included the effects of the Medicare subsidy in measuring its APBO and changes in the benefit obligation, the plan should disclose the following:

- a. The existence of the Act
- b. The reduction in the APBO for the subsidy related to benefits attributed to past service
- c. The effect of the subsidy on the changes in the benefit obligation for the current period
- d. An explanation of any significant change in the benefit obligation or plan assets not otherwise apparent in the other disclosures
- e. The gross benefit payments (paid and expected, respectively) including prescription drug benefits, and separately the gross amount of the subsidy receipts (received and expected, respectively).

## **.07 Financial Statement Presentation of Underwriting Deficits**

*Inquiry*—The administrator of an employee health and welfare benefit plan has questioned an item on the plan's statement of net assets available for benefits. The item appears in the liabilities section as follows:

Reserve for underwriting deficit—(Note 3) \$10,000

Note 3 reads as follows:

Reserve for underwriting deficit represents a liability with the XYZ Life Insurance Company for claims paid in excess of premiums during the current policy year. This liability will be applied to reduce any refunds which may accrue in the future. Such a refund was received during the current year.

The related debit to the credit setting up the liability was to "Underwriting Deficit," and is included in health claims deductions in the "Statement of Changes in Net Assets Available for Benefits."

The administrator takes the position that this item should be excluded entirely from the financial statements because:

1. The policy provides that any underwriting deficit in one policy year is not immediately recoverable by the insurance company but only recoverable against underwriting “gains” of succeeding years, if any.
2. Upon cancellation of the policy by the underwriter, the fund is relieved of any liability for any unrecovered underwriting deficit existing on date of cancellation.
3. Although there were usually underwriting “gains” in past years, there is no assurance that future underwriting “gains” will occur to permit recovery of the deficit.

Should the underwriting loss be reflected in the financial statements in the year in which it occurs?

*Reply*—Yes, if certain criteria are met. Paragraph 42 of SOP 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans*, as amended, (ACC 10,530.47), states experience ratings determined by the insurance company or by estimates, may result in a premium deficit. Premium deficits should be included in the benefit obligations if (a) it is probable that the deficit will be applied against the amounts of future premiums or future experience-rating refunds and (b) the amount can be reasonably estimated. If no obligation is included for a premium deficit because either or both of the conditions are not met, or if an exposure to loss exists in excess of the amount accrued, disclosure of the premium deficit should be made if it is reasonably possible that a loss or an additional loss has been incurred.

A footnote states that considerations in determining whether it is probable that a premium deficit will be applied against future premiums or refunds include (a) the extent to which the insurance contract requires payment of such deficits and (b) the plan’s intention, if any, to transfer coverage to another insurance company.

They should not be shown as liabilities on the plan’s statement of net assets available for benefits.

[Amended June 1995 and June 2001.]

#### **.08 Types of Investments Subject to SOP 94-4, as Amended by FSP AAG INV-1 and SOP 94-4-1**

*Inquiry*—What types of investments are subject to the financial statement presentation and disclosure requirements of SOP 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans* (ACC 10,620), as amended by FASB staff position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*?

*Reply*—FSP AAG INV-1 and SOP 94-4-1 defines investment contracts as (a) a traditional or separate account guaranteed investment contract (GIC) contract, (b) a bank investment contract (BIC) contract, (c) a synthetic GIC contract composed of a wrapper contract and the underlying wrapped portfolio of individual investments, or (d) a contract with similar characteristics.

Plans may hold stable value investments through direct contracts with issuers or through a specifically plan-managed account. Plans may also hold

stable value investments through beneficial ownership of bank collective funds (which own investment contracts). Insurance company pooled separate accounts that hold investment contracts also have similar characteristics.

It is important for the auditor to gain an understanding of the types of investments being held by the plan; this can be achieved by obtaining the underlying documents for the investments. Typically, investments have some form of underlying documentation to help determine the type of investment. For example, if a plan is invested in common collective trust funds (CCTs), then there should be a trust declaration for that CCT, which would generally have audited financial statements.

### **.09 Financial Statement Presentation When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts**

*Inquiry*—Do the financial statement presentation requirements in paragraph 15 of SOP 94-4 (ACC 10,620.15), as amended by FSP AAG INV-1 and SOP 94-4-1, apply to a plan's investment in a common collective trust fund (CCT), or master trust that holds fully benefit-responsive investment contracts?

*Reply*—Yes. Paragraph 15 of SOP 94-4 (ACC 10,620.15), as amended by FSP AAG INV-1 and SOP 94-4-1, requires the following presentation for fully benefit-responsive investment contracts:

The statement of net assets available for benefits of the plan shall present amounts for (1) total assets, (2) total liabilities, (3) net assets reflecting all investments at fair value, and (4) net assets available for benefits. The amount representing the difference between (3) and (4) shall be presented on the face of the statement of net assets available for benefits as a single amount, calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to each fully benefit-responsive investment contract from fair value to contract value.

When the plan invests in a CCT (or similar vehicle), or a master trust that holds fully benefit-responsive investment contracts, the fair value of the investment in the CCT or master trust should be reported in investments on the face of the statement of net assets available for benefits. The amount representing the difference between the fair value and the contract value of the fully benefit-responsive investment contracts held by the CCT or master trust should be presented on the face of the statement of net assets available for benefits, and calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to the plan's investment in the CCT or master trust from fair value to contract value. For the master trust, the adjustment only relates to the plan's portion of the master trust invested in the fully benefit-responsive investment contracts.

A CCT is a trust for a collective investment and reinvestment of assets contributed from employee benefit plans maintained by more than one employer or a controlled group of corporations that is maintained by a bank, trust company, or similar institution that is regulated, supervised, and subject to periodic examination by a state or federal agency. Such CCTs allow several smaller unaffiliated plans to gain the economies of scale necessary to participate in the stable value marketplace. These CCTs generally issue separate, stand-alone financial statements, and are considered investment companies subject to the AICPA *Investment Companies* Guide.

**.10 Financial Statement Disclosure Requirements When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts**

*Inquiry*—Do plans that directly invest in common collective trust funds (CCTs), or in master trusts that hold fully benefit-responsive investment contracts, need to include in the plan's financial statements, the disclosures in paragraph 15 of SOP 94-4 (ACC 10,620.15), as amended by FSP AAG INV-1 and SOP 94-4-1?

*Reply*—Plans that directly invest in CCTs, or similar vehicles that hold fully benefit-responsive investment contracts, do not need to include the disclosures detailed in the FSP in the plan's financial statements. Such disclosures would be included in the financial statements of the CCT, in accordance with paragraph 11 of the FSP.

For plans that invest in a master trust that holds fully benefit-responsive investment contracts, the notes to the financial statements should include the disclosures required in paragraph 15 of SOP 94-4 (ACC 10,620.15), as amended by FSP AAG INV-1 and SOP 94-4-1 related to the fully benefit-responsive investment contracts held by the master trust. These disclosures are necessary because, unlike a CCT (as discussed in TPA 6931.09), master trust financial statements are not required, and the related disclosure information would not be readily available.

---

**[The next page is 6491.]**

## Section 6932

### ***ERISA Reporting and Disclosures***

#### **.01 Employee Benefit Security Administration Guidance on Insurance Company Demutualizations**

*Inquiry*—During the past few years there have been a number of insurance companies that have demutualized, resulting in the insurance contract policyholder receiving demutualization proceeds. What alternatives are available with respect to receipt by policyholders of demutualization proceeds?

*Reply*—On February 15, 2001, Employee Benefit Security Administration (EBSA) issued a letter regarding alternatives available under the trust requirement of Title I of ERISA with respect to receipt by policyholders of demutualization proceeds belonging to an ERISA-covered plan in connection with the proposed plan of demutualization of an insurance company (the company). In its letter, the DOL noted that the application of ERISA's trust requirements would depend on whether demutualization proceeds received by a policyholder constitute plan assets. The DOL stated that, in the case of an unfunded or insured welfare plan in which participants pay a portion of the premiums, the portion of the demutualization proceeds attributable to participant contributions must be treated as plan assets. In the case of a pension plan, or where any type of plan or trust is the policyholder or where the policy is paid for out of trust assets, the DOL stated that all of the proceeds received by the policyholder in connection with the demutualization would constitute plan assets. Auditors should take care to identify those plans with contracts with insurance companies that have demutualized and ensure that the proceeds are properly recorded as plan assets. Plan sponsors may not be familiar with EBSA's letter regarding alternatives available with respect to receipt by policyholders of demutualization proceeds. In addition, it has been noted that demutualization proceeds are often deposited into a separate account or trust and may be overlooked in financial reporting for the plan.

#### **.02 When Should Participant Contributions Be Considered Late Remittances?**

*Inquiry*—For purposes of reporting on line 4(a) of Form 5500, from what date should remittances be deemed late; the date the remittances can reasonably be made, or 15 days after the end of the month in which the funds were withheld?

*Reply*—Participant contributions are required to be remitted as soon as they can reasonably be segregated from an employer's general assets. DOL Regulation 2510.3-102 states that an employer is required to segregate employee contributions from its general assets as soon as practicable, but in no event more than (a) ninety days after the contributions are paid by employees or withheld from their wages for a welfare benefit plan or (b) the 15th business day following the end of the month in which amounts are contributed by employees or withheld from their wages for a pension benefit plan. The definition of what constitutes as soon as practicable will vary from plan sponsor to plan sponsor. DOL Field Assistance Bulletin 2003-2 states that the process for segregating participant contributions must be taken into account when determining when participant contributions can be reasonably segregated from

the employer's general assets. Plan sponsors, under their fiduciary responsibility, also should consider how costly to the plan a more expeditious process would be. Those costs should be balanced against any additional income and security the plan and plan participants would realize from a faster system.

In considering whether remittances are delinquent, an understanding of the plan sponsor's process to segregate and remit contributions should be obtained. If the plan has several entities and payroll processes that comprise the remittance process, their timeframe to remit may be longer than a plan sponsor with only one location and one payroll system. Similarly, facts and circumstances that occur in the year (for example, a change in payroll processing or new service provider) may change the timeframe in which remittances are made. If a process has been established and the plan sponsor deviates from such a process, an understanding of the reasons why the remittance of the contributions for the period or periods did not comply with the established process should be obtained. Based on that understanding, a determination as to whether the plan sponsor remitted contributions as soon as it could reasonably segregate them from general assets should be made. The plan sponsor also may want to consult ERISA counsel in making that determination. In any case, any contributions remitted after the 15th business day after the end of the month in which the funds were withheld should be reported on Form 5500, Schedule H, Line 4a.

### **.03 How Should Delinquent Loan Remittances Be Reported on the Form 5500?**

*Inquiry*—How should delinquent loan remittances be reported on the Form 5500?

*Reply*—In Advisory Opinion 2002-02A, the DOL stated that participant loan repayments paid to or withheld by an employer for purposes of transmittal to an employee benefit plan are sufficiently similar to participant contributions to justify, in the absence of regulations providing otherwise, the application of principles similar to those underlying the participant contribution regulation for purposes of determining when such repayments become assets of the plan. Delinquent forwarding of participant loan repayments is eligible for correction under the Voluntary Filer Correction Program and PTE 2002-51 on terms similar to those that apply to delinquent participant contributions. Accordingly, the DOL will not reject a Form 5500 report based solely on the fact that delinquent forwarding of participant loan repayments is included on Line 4a of the Schedule H or Schedule I. Filers that choose to include such participant loan repayments on Line 4a must apply the same supplemental schedule and independent public accountant disclosure requirements to the loan repayments as apply to delinquent transmittals of participant contributions. If the plan does not report delinquent loan remittances on Line 4a, those payments should be reported on Schedule G.

### **.04 How Should Participant Loans Be Reported on Defined Contribution Plan Master Trust Form 5500 Filings?**

*Inquiry*—How should participant loans be reported on defined contribution plan master trust Form 5500 filings?

*Reply*—The face of Schedule H Form 5500 instructs master trust investment accounts not to complete line 1c(8) participant loans. In practice, many master trusts for defined contribution plans include participant loans as part of their master trust agreement. However, even though these loans may be included as part of the master trust agreement, the Form 5500 instructs the preparer not to include them as part of the master trust assets. Thus, the plan's financial

statements would require a supplemental schedule, Schedule of Assets (Held at End of Year), to report participant loans as a nonmaster trust investment. The plan's Form 5500 filing would require the participant loans to be broken out separately from the investment in the master trust on the Schedule H.

#### **.05 How Should Investments in Brokerage Accounts Be Reported in the Financial Statements and Form 5500?**

*Inquiry*—Investments in individually directed brokerage accounts can be aggregated in a single line item on the Form 5500. Can they be listed as a single line item on the supplemental schedule of assets, or do the individual underlying investments have to be listed?

*Reply*—As described in the Form 5500 instructions, individually directed brokerage accounts may be aggregated in a single line item on the statement of net assets available for benefits and on the supplemental schedule of assets, provided the investments are not loans, partnership or joint-venture interests, real property, employer securities, or investments that could result in a loss in excess of the account balance of the participant or beneficiary who directed the transaction. However, the notes to the financial statements must disclose any individual investment that is over 5 percent of net assets available for benefits at the end of the year. In addition, the total investment income or loss for individually directed brokerage accounts may be aggregated in a single line item in the Form 5500; however, the financial statements must separate interest and dividends from net appreciation (depreciation) in fair value on the statement of changes in net assets available for benefits and disclose net appreciation (depreciation) by type of investment in the notes to the financial statements.

#### **.06 Do All Types of Reconciling Items Between the Financial Statements and the Form 5500 Require a Reconciling Footnote in the Financial Statements?**

*Inquiry*—Does ERISA require a footnote to the audited financial statements reconciling amounts reported in the Statement of Changes in Net Assets Available for Benefits to those reported in the Form 5500 for differences in the way income and expense amounts are classified in the two reports?

*Reply*—Generally, a reconciliation would be required for differences occurring because certain income and expense items are netted against each other and disclosed as one amount in one statement and reported separately in the other (for example, the amount reported as contributions in the financial statements may differ from that reported in the 5500 because excess contributions are recorded net on the financial statements but gross on the Form 5500). However, frequently the classification of line items comprising certain income and expense items (for example, investments and investment interest, dividends, gains and losses, and self-directed brokerage accounts) reported in the Form 5500 differ from the classifications shown in the financial statements. In such situations, a reconciling footnote may not be necessary.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, paragraph 12.33.)

#### **.07 What is the Requirement to Report Certain Transactions Under Individual Account Plans on the Schedule of Reportable Transactions?**

*Inquiry*—Under Form 5500 (Schedule H, Part IV, line 4j), there is a special rule whereby transactions under an individual account plan that a participant

directs should not be taken into account for purposes of preparing the Schedule of Reportable Transactions. What about situations where an individual account plan is participant-directed but has certain transactions that appear to be nonparticipant-directed (for example, pass-through account for contributions)?

*Reply*—If the plan is an individual account plan and the overall structure of the plan is participant-directed, pass-through account transactions would not be required to be included on the Schedule of Reportable Transactions. Another example would be a participant-directed individual account plan that liquidates its investment options as a result of a plan termination, merger, or change in service provider. Often such changes result in the plan sponsor directing the plan trustee to liquidate the current balance in the participant-directed investment options into a short-term fund before the transfer to new investment options. Such transactions would be not be required to be included on the Schedule of Reportable Transactions.

**.08 Is Noninterest-Bearing Cash an Asset on the Supplemental Schedule of Assets (Held at End of Year)?**

*Inquiry*—Should noninterest-bearing cash be included as an asset on the supplemental Schedule of Assets (Held at End of Year)?

*Reply*—Generally, only assets held for investment are included on the supplemental Schedule of Assets (Held at End of Year); thus noninterest-bearing cash would not be included. Interest-bearing cash accounts would be included on the supplemental schedule.

**.09 Is Netting of Investments on the Schedule of Assets (Held at End of Year) Permitted?**

*Inquiry*—Can immaterial investments be netted together as “other” on the supplemental Schedule of Assets (Held at End of Year)?

*Reply*—No, each investment must be separately listed on the supplemental schedule.

**.10 Is the Schedule of 5 Percent Reportable Transactions Required for Defined Benefit Plans?**

*Inquiry*—Is the schedule of 5 percent reportable transactions required for defined benefit plans?

*Reply*—As defined benefit plans generally are not participant-directed, the reportable transactions schedule would be required.

---

[The next page is 6501.]

## Section 6933

# Auditing Employee Benefit Plans

### .01 Initial Audit of a Plan

**Inquiry**—In an initial audit of a plan that has been in existence for several years, to what extent does the auditor need to audit information from previous years?

**Reply**—In an initial audit of a plan which has been in existence in previous years, ERISA requires that the audited financial reports contain a comparative Statement of Net Assets Available for Benefits and, as such, there should be some consideration of the accumulation of data from prior years, and the effect on current year balances. The auditor can choose to compile, review, or audit the opening Statement of Net Assets Available for Benefits. It is important to note, however, that if the opening Statement of Net Assets Available for Benefits is not audited, the auditor must satisfy himself or herself as to the reasonableness of the amounts reported in that statement because material errors in that information may materially impact the Statement of Changes in Net Assets Available for Benefits under audit.

The auditor should apply appropriate audit tests and procedures to the opening balances in the Statement of Net Assets Available for Benefits to determine that those balances are not materially misstated. The auditor should make inquiries of the plan's management and outside service providers, as applicable, regarding the plan's operations during those earlier years. The auditor also may wish to obtain relevant information (for example, trust statements, recordkeeping reports, reconciliations, minutes of meetings, and SAS No. 70 reports) for earlier years, as applicable, to determine whether there appears to be any errors during those years that could have a material effect on current year balances. Further, the auditor should gain an understanding of the accounting practices that were followed in prior years to determine that they have been consistently applied in the current year. Based on the results of the auditor's inquiries, review of relevant information, and evidence gathered during the current year audit, the auditor would determine the necessity of performing additional substantive procedures (including detailed testing or substantive analytics) on earlier years' balances.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, paragraphs 5.26 through 5.27 and 13.43 through 13.46.)

### .02 Investment Allocations Testing in an Electronic Environment

**Inquiry**—How should the auditor test for proper investment allocation in situations where changes may be made by participants electronically, via phone or internet, on a daily basis?

**Reply**—Where participants make contributions or investment elections by telephone or electronic means (such as the Internet), the auditor should consider confirming the contribution percentage, source, and investment election directly with the participant, or compare that information to detail of the transaction (for example, a copy of the transaction confirmation) if maintained by the plan sponsor or service provider. Alternatively, if a service provider has a type II SAS No. 70 report that provides evidence that the service auditor has

tested investment allocations, the auditor may place some reliance on the SAS No. 70 report to reduce (not eliminate) substantive testing.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, paragraph 7.16.)

### **.03 Auditor's Responsibility for Detecting Nonexempt Transactions**

*Inquiry*—What is the auditor's responsibility for detecting nonexempt transactions resulting from participant contributions that are not remitted to the plan within the guidelines established by DOL regulations?

*Reply*—An audit performed in accordance with generally accepted auditing standards (GAAS) cannot be expected to provide assurance that all party-in-interest transactions will be discovered. Nevertheless, during the audit the auditor should be aware of the possible existence of party-in-interest transactions. During the planning phase of the audit, the auditor should inquire about the existence of any party-in-interest or nonexempt transactions. If any issues relating to late remittances are brought to the auditor's attention, the auditor may consider obtaining a schedule of employee contributions detailing payroll withholding date and date of deposit to the plan. A sample of deposits can then be traced to the supporting payroll register and wire transfer advice or check. Further, the auditor should have the client include in the management representation letter a representation that there are no party-in-interest transactions that have not been disclosed in the supplemental schedules.

### **.04 Nonexempt Transactions**

*Inquiry*—If a nonexempt transaction related to the above is noted, is materiality of the transaction taken into consideration in determining the need for the supplemental schedule of nonexempt transactions?

*Reply*—There is no materiality threshold for the inclusion on the supplemental schedule. All known events must be reported.

### **.05 Testing of Plan Qualification Tests Prepared by TPA**

*Inquiry*—What responsibility does the auditor have in testing plan qualification tests (for example, ACP and ADP) prepared by a client's third-party administrator?

*Reply*—An audit in accordance with generally accepted auditing standards (GAAS) is not designed to ensure compliance with all legislative and regulatory provisions. However, plans must be designed and comply with certain operating tests to maintain their qualified status. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible violations affecting the financial statements, the auditor should apply auditing procedures specifically directed to ascertaining whether a violation has occurred. The auditor is also expected to inquire of, and obtain representation from, management concerning compliance with laws and regulations and the prevention of violations that may cause disqualification.

### **.06 Audit Procedures for Plan Mergers**

*Inquiry*—What audit procedures should be performed for material plan mergers into a plan? What audit procedures are required when the prior plan was audited? What if the prior plan was never audited?

*Reply*—If the prior plan was audited, the auditor should obtain the audited financial statements to ensure that the balance transferred from the prior plan reconciles to the balance that is reflected on the new plan's financial statements. Also, the auditor will generally perform procedures to ensure that participant accounts were properly set up under the new plan. If the prior plan

was not audited, the auditor will generally perform audit procedures to determine that the equity that is transferred from the prior plan is reasonable based upon an analysis of historical activity. (Other audit procedures relating to plan mergers can be found in paragraphs 12.13 through 12.16 of the AICPA Audit and Accounting Guide *Employee Benefit Plans* (March 2007).

#### **.07 Audit Requirements for Remaining Portion of a Split Plan**

*Inquiry*—For the year ended December 31, 20X1, an audit was performed for AB Plan with more than 100 participants that covered two related companies (Company A and Company B). In July 20X2, Company A was sold, and the plan assets related to those participants were transferred to a new unrelated plan (Plan C). What are the audit requirements for the remaining portion of the AB Plan which, as of July 20X2, covers only employees at Company B and had fewer than 100 participants?

*Reply*—Audit for the AB Plan is required for the year ended December 31, 20X2, because the plan had over 100 participants at the beginning of the plan year. For the year ended December 31, 20X3, an audit of plan AB may not be required if the number of participants at January 1, 20X3, is under 100 and the plan meets the criteria for the Small Pension Plan Audit Waiver.

#### **.08 Audit Requirements for Frozen and Terminated Plans**

*Inquiry*—Are frozen and terminated plans that are still paying out benefits required to have an audit?

*Reply*—An audit is required if the plan has more than 100 participants at the beginning of the plan year. Paragraph 5.03 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*, provides guidance with regard to the definition of “participants.” When a plan has been terminated or frozen, complete and prominent disclosure of the relevant circumstances is essential in all subsequent financial statements issued by the plan. If the number of participants falls below 100, auditors should consider whether the plan meets the criteria for the Small Pension Plan Audit Waiver.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, paragraph 2.50 and Exhibit 5-4.)

#### **.09 Audit Procedures When Plan Operates in a Decentralized Environment**

*Inquiry*—When a plan operates in a decentralized environment, what additional audit procedures should be considered?

*Reply*—The auditor should consider the controls at each decentralized location as well as the overall mitigating controls that may be performed on a centralized basis. Taking into consideration the materiality of the activity at each decentralized location, the auditor may choose to expand participant level and substantive testing to incorporate these decentralized locations.

#### **.10 Is the Master Trust Required to Be Audited?**

*Inquiry*—Is the master trust required to be audited?

*Reply*—While the DOL does not require the master trust to be audited, the plan administrator normally engages an auditor to report only on the financial statements of the individual plans. If the master trust is not audited, the plan auditor should perform those procedures necessary to obtain sufficient audit evidence to support the financial statement assertions as to the plan’s investments or qualify or disclaim his or her report.

---

[The next page is 6511.]

## Section 6934

### ***Limited-Scope Audits—Employee Benefit Plans***

#### **.01 Certifications by “Agent of”**

*Inquiry*—Can the plan sponsor accept a certification from the plan’s recordkeeper if the recordkeeper certifies the investment information to be complete and accurate on behalf of the plan’s trustee/custodian as “agent for”?

*Reply*—According to the Department of Labor, such a certification generally would be acceptable if there is in fact a legal arrangement between the trustee and the recordkeeper to be able to provide the certification on the trustee’s behalf. Care should be taken by the plan administrator to obtain such legal documentation. Additionally the plan auditor might consider adding wording to the standard limited-scope report to include reference to such an arrangement. Sample language might include the following: “...any auditing procedures with respect to the information described in Note X, which was certified by ABC, Inc., the recordkeeper of the Plan as agent for XYZ Bank, the trustee of the Plan, . . . We have been informed by the plan administrator that the trustee holds the Plan’s investment assets and executes investment transactions. The plan administrator has obtained a certification from the agent on behalf of the trustee, as of and for the year ended December 31, 20XX, that the information provided to the plan administrator by the agent for the trustee is complete and accurate.” The third paragraph of the report should also be modified.

#### **.02 Limited-Scope Audit on a Portion of the Plan’s Investments**

*Inquiry*—Is it permissible to perform a limited-scope audit on a portion of the plan’s investments but not all (some investments did not meet the DOL 29 CFR 2520.103-8 criteria for a limited-scope audit)? If yes, what form does the auditors’ report take?

*Reply*—Yes, it is permissible to perform a limited-scope audit on only a portion of a plan’s investments and audit the remaining investments. The auditors’ report is the same as that used for a limited-scope audit. However, the note that is referenced in the auditor report should clearly identify the investments that were not audited.

#### **.03 Limited-Scope Audit—Plan Certifications for Master Trusts**

*Inquiry*—If a limited-scope audit is to be performed for a plan funded under a master trust arrangement or other similar vehicle, should separate individual plan certifications from the trustee or the custodian be obtained for the allocation of the assets and the related income activity to the specific plan?

*Reply*—Yes, if a limited-scope audit is to be performed for a plan funded under a master trust arrangement or other similar vehicle, separate individual plan certifications from the trustee or the custodian should be obtained for the allocation of the assets and the related income activity to the specific plan.

[DOL regulation 2520.103-8]

**.04 In a Limited-Scope Audit Is it Necessary to Test the Allocation of Investment Earnings at the Participant Account Level?**

*Inquiry*—For a DOL limited-scope audit, is it necessary to test the allocation of investment earnings at the participant account level?

*Reply*—The testing of allocation of investment earnings at the participant level is part of the participant data testing and is recommended for a limited-scope audit.

---

**[The next page is 6515.]**

## Section 6935

# SAS No. 70 Reports—Employee Benefit Plans

### .01 Audit Procedures When SAS 70 Reports Are Not Available

*Inquiry*—What procedures need to be performed in audits where the plan doesn't receive a SAS No. 70 report from the service provider?

*Reply*—Service providers are not required to furnish SAS No. 70 reports. However, this does not relieve the auditor of his or her responsibility to obtain a sufficient understanding of internal control relevant to transactions executed by the service organization to plan the audit and to determine the nature, timing, and extent of testing to be performed by considering those components of internal control maintained by the service organization. In situations where a SAS No. 70 report is not available, other sources, such as user manuals, system overviews, technical manuals, the contract between the user organization and the service organization, and reports on the service organization's controls issued by internal auditors or regulatory authorities, may provide sufficient information about the nature of the services provided by the service organization that are part of the user organization's information system and the service organization's controls over those services. If both the services provided and the service organization's controls over those services are highly standardized, information obtained through the plan auditor's prior experience with the service organization may be helpful in planning the audit. The plan auditor may wish to consider the specific control objectives and selected controls outlined in Exhibit B-1 of Appendix B of the AICPA Accounting and Audit Guide *Employee Benefit Plans*, in obtaining his or her understanding. If the user auditor concludes that the available information is not adequate to obtain a sufficient understanding of the service organization's controls to plan the audit, consideration should be given to contacting the service organization through the user organization to obtain adequate internal control information, or request that a service auditor be engaged to perform procedures at the service organization.

The level of substantive testing that should be performed depends on the amount of reliance the auditor can place on internal controls. Thus, if a Type 2 SAS No. 70 report is not available, the auditor would need to increase substantive testing or consider testing controls at the service provider.

Auditing procedures applied to data maintained by the service provider may include tests of participant data, payroll data, or benefits data to determine that they agree with the information obtained and maintained by the employer. If the data is not available at the employer, consideration should be given to confirming the information directly with participants or to reviewing hard copy information obtained from the service provider, if available.

Individual participant accounts in 401(k) plans or other defined contribution pension plans should be tested for proper allocation of plan assets, contributions, income, and expenses. As such, the auditor should consider confirming contribution percentages and investment elections directly with the participants in situations where transactions are performed electronically or by phone. In addition, record keepers may maintain back up documentation of

participant transactions, which may be requested as audit evidence to test participant data.

Procedures that should be considered in the audit of benefit payments, particularly those initiated by telephone or electronic methods, include confirming disbursements directly with participants, or comparing the disbursement to a transaction report if one is maintained, and testing the documentation underlying the benefit payment transactions.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, Chapters 7, 9, and 10.)

## **.02 Allocations Testing of Investment Earnings When a Type 2 SAS 70 Report Is Available**

*Inquiry*—In plan audits where a Type 2 SAS No. 70 report is used, how extensively should the allocation of investment earnings at the participant level be tested? What are commonly used methods for testing this information?

*Reply*—In audits where a Type 2 SAS No. 70 report is relied upon, the extent of testing of the allocation of investment earnings at the participant level will be determined based on the assessed level of the plan's control risk in this area. The Type 2 SAS No. 70 report can provide information about the controls in place within the service organization to help the auditor assess this risk. However, the auditor should not use the Type 2 SAS No. 70 report to completely eliminate substantive testing.

One commonly used method of testing this information is comparing the yield in the participants' accounts (selecting a sample of funds) for a certain period of time to the yield that the plan reported as a whole (as compared to published sources) for those funds for the same period of time.

---

[The next page is 6521.]

## Section 6936

# Auditing Defined Contribution Plans

### **.01 Auditor's Responsibility for Testing a Plan's Compliance With Qualification Issues**

*Inquiry*—What is the auditor's responsibility for testing a plan's compliance with top heavy rules, the Average Deferral Percentage Test, and other qualification issues?

*Reply*—An audit in accordance with generally accepted auditing standards (GAAS) is not designed to ensure compliance with all legislative and regulatory provisions. However, a plan must be designed to comply with all provisions, and must meet certain operating tests in order to maintain its qualified status. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible violations of provisions that may affect the financial statements, he or she should apply auditing procedures specifically directed to ascertaining whether a violation has occurred. The auditor also is expected to inquire of, and obtain representation from, management concerning compliance with laws and regulations, and the controls in place to prevent violations of those laws and regulations that may cause the plan to lose its qualified status.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, Chapter 11 and paragraphs 12.01 through 12.03.)

### **.02 Merger Date for Defined Contribution Plans**

*Inquiry*—If a defined contribution plan has an effective merger date, per the merger agreement, of December 31, 20X1, but a significant portion of the plan's assets have not been transferred as of December 31, 20X1, should the audit be done as of the December date, or when the majority of the assets were transferred? Would the answer be any different for a defined benefit plan? Would a liability representing the assets due to the acquiring plan be reflected on the statement of net assets if the audit date is December 31, 20X1?

*Reply*—For defined contribution plans, if there is a significant difference between the effective merger date per the merger agreement and the actual date assets were transferred, consideration should be given to performing an audit through the date of the actual transfer. However, all facts and circumstances should be considered, including management's intent, before determining the proper merger date.

For defined benefit plans, the merger typically is recorded on the effective merger date per the merger agreement because legal title to the assets, liabilities, and benefit obligations has transferred. In certain circumstances, it may be appropriate to record a liability representing the assets due the acquiring plan at year-end (for example, if the physical transfer from one plan to another has been requested and is pending).

---

[The next page is 6525.]

## Section 6937

### ***Auditing Defined Benefit Plans***

#### **.01 General Conditions Requiring an Audit of Pension Plan Financial Statements**

*Inquiry*—What are the general conditions requiring an audit of pension plan financial statements?

*Reply*—An audit generally is required if the plan is covered under Title I of ERISA and there are over 100 participants as of the beginning of the plan year. Exhibit 5-2 in Chapter 5 of the AICPA Audit and Accounting Guide *Employee Benefit Plans* (March 2007) provides guidance on determining who is considered a participant. In addition, DOL regulations permit plans that have between 80 and 120 participants at the beginning of the plan year to complete the Form 5500 in the same category (large plan or small plan) as was filed in the previous year.

---

[The next page is 6531.]

## Section 6938

# Auditing Health and Welfare Plans

### .01 When Does a Health and Welfare Plan Require An Audit?

*Inquiry*—When does a health and welfare plan require an audit?

*Reply*—A health and welfare plan is required to have an audit when the plan has more than 100 participants at the beginning of the plan year (this can be expanded to 120 if the 80-to-120-participant rule applies) and the plan is funded. According to DOL Regulation 2520.104-44, the existence of a separate fund or account for the plan by the employer or a third-party administrator can cause the requirement that funds be paid directly from the general assets of the sponsor not to be met. For example, if a separate account is maintained that would be deemed to be a trust under state law, the related plan would be deemed to be funded under ERISA. It is not always easy to determine when a plan is considered funded. The auditor may wish to consult with legal counsel, plan actuaries, or the DOL to determine if a plan meets the definition of funded.

### .02 Audit Requirements for Health and Welfare Plans

*Inquiry*—Assume a partially insured H&W plan where the employer pays claims to a certain level and then reinsurance assumes the liability. There are over 100 participants, and the employer and employees each pay a portion of the premiums. The employee's share is paid on a pretax basis through a section 125 plan. There is no trust established, but at year end there may be a minimal payable to the third party administrator for regular monthly charges and a small reinsurance receivable, depending on timing. Does this plan require an audit?

*Reply*—No, the plan does not require an audit. According to the fact pattern described, no separate trust exists to hold the assets of this plan, and therefore it is not a funded plan for ERISA purposes. ERISA exempts unfunded plans from the requirement to perform an annual audit. Participant contributions made through a section 125 cafeteria plan are not required to be held in trust per DOL Technical Release 92-1, and as long as no trust is being utilized, no audit requirement exists.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, Appendix A, paragraphs A.25 and A.28.)

### .03 HIPAA Restrictions

*Inquiry*—In recent audits of health and welfare plans, our firm has been denied access to personnel files because of Health Insurance Portability and Accountability Act of 1996 (HIPAA) rules. In such cases, it has prohibited us from performing certain procedures necessary to render our opinion on the financial statements, such as testing of birth date, hire date, elections, and other such information. How can we overcome this obstacle?

*Reply*—The items mentioned (birth date, hire date, elections) are not “protected health information” (PHI) under the HIPAA rules.

PHI is individually identifiable health information that is created or received from a health care provider, health plan, employer, or health care clearinghouse; that either identifies or can be used to identify an individual; and relates to the individual's past, present, or future physical or mental health,

to the provision of health care to an individual, or to the payment for the provision of health care to the individual. In other words, there are two components to PHI: 1) the identification of an individual, and 2) health information. Identification of an individual without the corresponding health information is not PHI, nor is health information without identifying the corresponding individual to whom it relates.

The first step is to understand what information is needed for the audit and whether it constitutes PHI. If access to PHI is necessary for the audit, HIPAA regulations allow for that access.

HIPAA privacy regulations indicate that a plan sponsor may not use or disclose protected health information except as permitted or required by the regulations. The regulations permit use of the “minimum necessary” information for use in health care operations, including conducting audits. If the auditor has signed a business associate agreement with the plan sponsor, then that auditor is considered a business associate under the regulations, and access to such minimum necessary information required for the audit should not be restricted by HIPAA.

Discussion with the plan sponsor may be necessary to demonstrate that the requested information is the minimum necessary for the audit and, if such information is not obtained, would result in a disclaimer of opinion.

For more information, call the Department of Labor Office of Health Plan Standards and Compliance Assistance at (202) 693-8335, or call EBSA's toll free inquiry line at 1-866-444-EBSA (3272). Health and Human Service (HHS) also has a toll-free number dealing with HIPAA privacy related issues. That number is 1-866-627-7748. You also may wish to visit the HHS Web site, [www.hhs.gov/ocr/hipaa](http://www.hhs.gov/ocr/hipaa).

#### **.04 Is a Health and Welfare Plan Required to Be Audited if Participants Are Contributing to the Plan?**

*Inquiry*—If participants are contributing to a health and welfare plan, is an audit required?

*Reply*—According to DOL Technical Releases 88-1 and 92-1, participant contributions to a welfare plan that has an Internal Revenue Code (IRC) section 125 cafeteria plan feature do not have to be held in trust. If contributions are not through a section 125 plan and they are not used for the payment of insurance or health maintenance organization (HMO) premiums, generally, they will be required to be held in trust. If the plan is funded voluntarily or as required by DOL regulation, then the plan would require an audit.

#### **.05 Audit Requirement When Only Medical Is Funded Through a VEBA Trust**

*Inquiry*—If a plan offers several benefits under the plan document, and only the medical component is funded through the voluntary employees' beneficiary association (VEBA) trust, what is the audit requirement?

*Reply*—The reporting entity and thus the audit requirement is of the entire plan; not the trust. All benefits covered by the plan should be included in the audited financial statements.

#### **.06 Audit of Plan When VEBA Trust Is a Pass-Through**

*Inquiry*—If a VEBA trust is used as a pass-through for claims payment during the year, but there are no monies in the VEBA trust at year end, is an audit of the plan required?

*Reply*—If a plan is deemed to be funded for a part of a plan year, the entire plan year is subject to the audit requirement. All plan activity for the entire year would have to be included in the audited financial statements.

**.07 When Multiple Plans Use a VEBA Trust, Can the Audit Be Performed At the Trust Level?**

*Inquiry*—If multiple plans use a VEBA trust, can an audit be performed at the VEBA trust level?

*Reply*—The audit requirement is of the plan, not the trust. Each plan would require a separate audit if it individually met the audit requirement (see previous question). The auditor may be engaged to audit the VEBA trust in order to assist with the plan level allocation reporting, but this would not fulfill the plan level audit requirement.

**.08 Audit Requirement for Health and Welfare Plan Funded Through a 401(h) Account**

*Inquiry*—Does the funding of a health and welfare benefit plan through a 401(h) account, when the plan was otherwise unfunded, cause the plan to require an audit?

*Reply*—If the plan was otherwise unfunded, the 401(h) account association will not cause the health and welfare benefit plan to be considered funded for audit determination purposes.

---

[The next page is 6535.]

## Section 6939

# Auditor's Reports—Employee Benefit Plans

### .01 Communications When the Plan Has No Audit Committee

**Inquiry**—In situations where the plan has no audit committee, but the Plan Sponsor has an audit committee, are the plan auditors required to make the communications required by SAS No. 61, *Communication With Audit Committees* (AU 380A)? What is the requirement if the plan has an administrative committee? Would the answer be different for public and nonpublic entities?

**Reply**—SAS No. 61, *Communication With Audit Committees*, as amended by SAS Nos. 89, *Audit Adjustments*, and 90, *Audit Committee Communications* (AU 380A), requires the auditor to determine that certain matters related to the conduct of an audit are communicated to those who have responsibility for oversight of the financial reporting process. The communications are to be made to an audit committee or to a group equivalent to an audit committee which has formal designated oversight responsibility of the financial reporting process, such as a finance committee or budget committee. For employee benefit plans, formal oversight may be delegated to a pension or administrative committee.

Required communications may be oral or written. If information is communicated orally, the auditor should document the communication by appropriate memoranda or notations in the working papers.

The communications are not required to occur before the issuance of the auditor's report on the entity's financial statements (see rules for public entities below) so long as the communications occur on a timely basis.

**Non-public entities.** Plans that do not file a Form 11-K with the SEC are considered non-public entities. If a plan that does not file a Form 11-K with the SEC has no designated group or body equivalent to an audit committee with formal responsibility for the financial reporting process, the auditor is not required to make the communications required by SAS No. 61, as amended (AU 380A).

**Public entities.** Plans that file a Form 11-K with the SEC are considered public entities. For such plans, the communications required by PCAOB Interim Standard No. 61 (as amended by PCAOB Interim Standard Nos. 89 and 90) must be made in every situation. When issuing an audit report on financial statements that are filed with the SEC, auditors are required to follow Rule 2-07 of Regulation S-X in addition to the matters required to be communicated to the audit committee by SAS No. 61, as amended (AU 380A).

Rule 2-07 of Regulation S-X requires that auditors communicate certain matters to audit committees prior to the filing of the audit report with the SEC. As such, any auditor's report that is included (or incorporated by reference) in a client's periodic report should only be included in such periodic report after the auditors have communicated the matters required by Rule 2-07 of Regulation S-X to the audit committee.

Currently there is no guidance from the SEC in determining the appropriate group (other than the audit committee) with whom to have the required communications as they relate to Form 11-K filers.

(Source: AICPA, *Professional Standards*, vol. 1, AU section 380A, *Communication With Audit Committees*, the related Interpretation at AU section 9380A, and Rule 2-07 of SEC Regulation S-X, *Communication With Audit Committees*.)

## **.02 Audit Opinion to Be Issued When Discrimination Testing Has Not Been Completed**

*Inquiry*—We have completed the audit of a plan except for reviewing the 401(k) and 401(m) discrimination testing, which has not yet been done and, quite possibly may not ever be done. If such testing is not performed, what type of audit opinion should be issued?

*Reply*—Independent auditors should inquire if the plan has complied with the annual limitation tests to determine if the plan has met the requirements in order to maintain its tax exempt status. Since the non-discrimination requirements under 401(k) and 401(m) are required to be met annually, the independent auditor should understand the results of similar tests performed in the past and the reasons why the associated testing has not been performed in the current year. The auditor should be aware that any corrections, corrective distributions, or qualified non-elective contributions (QNECs) that would result from the failure of these compliance tests must be made before the end of the following plan year to preserve the plan's qualified status. If correction is to be made through refunds then a correction made within two and a half months after the plan's year end will avoid potential excise tax and preserve the plan's qualified tax status. In contrast, a refund after two and a half months triggers an excise tax payable by the plan sponsor. In the event that testing has not been completed for the year under audit, the auditor should consider the results of testing performed in the past and any corrections that were made and whether significant changes in the plan's demographics have occurred. The client should determine whether or not it is expected that a correction will be necessary, and should make an estimate for accrual purposes of the amount required for correction. Consideration should be given to modifying the tax note in the financial statements to indicate that the plan sponsor will take the necessary steps, if any, to bring the plan's operations into compliance with the Code. Similar wording also should be included in the management representation letter. If the results of the testing, when completed, are expected to be material based on similar issues in the past or discussions with the client and a correction amount cannot be reasonably estimated, the auditor should consider withholding his or her report until the testing is completed and the appropriate accruals recorded. If, however, the financial statements are issued and the client doesn't remedy or complete the tests by the next audit, the auditor should consider the effect on the financial statements as well as other implications as described in SAS No. 54, *Illegal Acts by Clients* (AU 317), since the plan's tax qualified status may be in jeopardy.

(Source: AICPA Audit and Accounting Guide *Employee Benefit Plans*, March 2007, paragraph 12.03b.)

---

[The next page is 6551.]

## Section 6940

### *Franchisors*

#### **.01 Method of Accounting for Sale of Territorial Franchise Right**

*Inquiry*—A client sells territorial franchise rights to region managers for \$30,000 with ten percent taken in cash and the remainder as a note. The region manager in turn sells franchises in his territory. The note is payable at the rate of \$1,000 per franchise sold in the territory but is due in three years regardless of the number of franchises sold.

The collectibility of the notes depends on the performance of the region managers. The company has been able to resell territories of managers who have been unsuccessful, and the down payments have been refunded in these instances.

What is the proper method of accounting for these franchise fees and the related costs of selling the territories?

*Reply*—In discussing initial franchise fees for area franchises, FASB Statement No. 45, *Accounting for Franchise Fee Revenue*, paragraph 8 (AC Fr3.104), states: "... revenue ordinarily shall be recognized when all material services or conditions relating to the sale(s) have been substantially performed or satisfied by the franchisor." In FASB Statement No. 45, paragraph 5 (AC Fr3.101), the Board defines substantial performance as follows:

... Substantial performance for the franchisor means that (a) the franchisor has no remaining obligation or intent—by agreement, trade practice, or law—to refund any cash received or forgive any unpaid notes or receivables; (b) substantially all of the initial services of the franchisor required by the franchise agreement have been performed; and (c) no other material conditions or obligations related to the determination of substantial performance exists ...

Therefore, the sale of the regions is not a completed transaction which would allow the recognition of income when the sale is made (i.e., when the down payment and notes are received) since the company's practice of refunding down payments to region managers and, in effect, excusing nonpayment of their notes would violate item (a) above.

Since payment of the notes is on the basis of specific performance (i.e., at the rate of \$1,000 per franchise sold in the region), as a practical matter, a reasonable basis for recognizing deferred revenue would be over the estimated number of franchises to be opened in a region.

With regard to the costs of selling the territories, FASB Statement No. 45, paragraph 17 (AC Fr3.113), states:

Direct (incremental) costs relating to franchise sales for which revenue has not been recognized ordinarily shall be deferred until the related revenue is recognized; however, the deferred costs shall not exceed anticipated revenue less estimated additional related costs. Indirect costs of a regular and recurring nature that are incurred irrespective of the level of sales, such as general, selling, and administrative costs, shall be expensed as incurred. Costs yet to be incurred shall be accrued and charged against income no later than the period in which the related revenue is recognized ...

Therefore, deferral and amortization of costs “incurred to produce the region sales” could be accounted for in a manner similar to the deferral and recognition of revenue discussed in the preceding paragraph. The operating expenses of the company should be charged off as a period cost. [Amended]

## **.02 Revenue Recognition for Franchisors**

*Inquiry*—A franchise agreement is entered into whereby the franchisor agrees to provide to a franchisee the technical information necessary to manufacture a product. In addition, the franchisor agrees to provide consultation needed to produce the product for the next five years. The agreement states that 80 percent of the franchise fee is to be paid in the first year of the agreement, and five percent is to be paid in each of the next four years. How should the franchisor recognize the revenue from this agreement?

*Reply*—This issue is addressed in FASB Statement No. 45, *Accounting for Franchise Fee Revenue* (AC Fr3). Paragraph 7 (AC Fr3.103), states that “if it is probable that the continuing fee will not cover the cost of the continuing services to be provided by the franchisor and a reasonable profit on those continuing services, then a portion of the initial franchise fee shall be deferred and amortized over the life of the franchise. The portion deferred shall be an amount sufficient to cover the estimated cost in excess of continuing franchise fees and provide a reasonable profit on the continuing services.” This Statement defines continuing franchise fee as “consideration for the continuing rights granted by the franchise agreement and for general or specific services during its life.”

In the above situation, it is unlikely the five percent of revenues the franchisor will receive in years two through five is sufficient to cover the costs, and a reasonable profit, on the raw materials and services provided. Therefore, the franchisor should defer a portion of the first year’s franchise fee and amortize it over the next four years at a rate that will cover costs and provide a reasonable profit.

---

## Section 6950

### ***State and Local Governments***

#### **.18 Accounting for the Issuance of Zero-Coupon Bonds and Other Deep Discount Debt by a Governmental Entity**

*Inquiry*—A governmental entity issues zero-coupon bonds due in 10 years. Even though bond interest and principal is not due until the end of the bond's term, a sinking fund was established. When should interest expense be recognized and principal payments be deducted from the debt?

*Reply*—The treatment by governmental entities of the bond discount related to deep-discount debt has not been specifically addressed in authoritative literature. As discussed in *Governmental Accounting, Auditing and Financial Reporting*, by the Government Finance Officers Association, the accrual of principal and interest payments for zero-coupon bonds and other deep-discount debt is not recommended because the requirement that payments be due "early in the next year" is not met. The face amount of the debt less the discount presented as a direct deduction should be presented in the general long-term debt account group. The net value of the bonds should be accreted (the discount reduced) over the life of the bonds in the long-term debt account group. This presentation shows what amount would be payable if the debt were required to be paid today. The interest method provides an acceptable means of amortizing the discount. However, the straight line amortization method may also be used if its application would not produce amounts that differ materially from those that would be achieved if the interest method were applied.

#### **.21 Auditor's Reports on Local Governments**

*Inquiry*—A state law referring to the audit of local governments requires every auditor's report to state that the audit was conducted in accordance with generally accepted auditing standards and with the auditing standards prescribed by the state auditor. The law also requires the auditor's report to conform with the standard report form and to contain a reference to a report of comments and recommendations.

May a CPA include such wording in the opinion if he or she has followed the standards prescribed by the state auditor and he or she has included a report of comments and recommendations?

*Reply*—A CPA may state in the report that the audit has been conducted in accordance with generally accepted auditing standards and with the standards prescribed by the state treasurer if the audit was in fact conducted in conformity with these standards.

Also a CPA may include in the auditor's report a reference to a report of comments and recommendations if such a report has in fact been issued. [Amended June 1995.]

#### **.22 State Accounting Guide Differs From GAAP**

*Inquiry*—Are reports on financial statements conforming to the State accounting guide requirements considered special reports under SAS No. 62, *Special Reports* (AU 623)?

*Reply*—Yes. Reports on financial statements conforming to the State accounting guide requirements are considered special reports. SAS No. 62, paragraph 4 (AU 623.04), states that a basis of accounting that an entity uses to comply with the requirements or financial reporting provisions of a government regulatory agency to whose jurisdiction it is subject is a comprehensive basis of accounting other than generally accepted accounting principles. SAS No. 62, paragraph 8 (AU 623.08), illustrates a special report for financial statements filed solely with the regulatory agency. In addition, paragraph 14.68 of the AICPA Audit and Accounting Guide *State and Local Governments*, discusses auditor reporting when law or regulation requires a government to prepare and file with a regulatory agency financial statements that do not constitute a complete presentation of all the financial statements required by GASB Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, but that otherwise are prepared in conformity with GAAP. [Amended June 1995 and December 2004.]

---

[The next page is 6701.]

**Section 6960*****Colleges and Universities*****.12 Allocation of Overhead**

*Inquiry*—A private college has many individual restricted programs funded from federal, state and private contributions. One of the programs was charged a \$97,000 overhead expense amount, with the credit going to revenue in another program. Is it appropriate under generally accepted accounting principles to record revenue based on the overhead allocation?

*Reply*—No, it is inappropriate. The allocation of overhead is an interprogram transaction that should not be reported as revenue of the program providing the services but rather as a reduction of expense of such program. For additional information related to this topic, see the AICPA's Audit and Accounting Guide *Not-for-Profit Organizations*, paragraph 16.03. [Amended June 1995]

### Entertainment Industry

---

The AICPA staff, helped by industry experts, released the following technical questions and answers (Q&As) on financial accounting and reporting issues related to Statement of Position (SOP) 00-2, *Accounting by Producers or Distributors of Films* (ACC 10,800). The staff may continue to issue Q&As on SOP 00-2 (ACC 10,800) as issues arise. Q&As will be housed in the AICPA publication titled *Technical Practice Aids*, copies of which are available through the AICPA order department at (888) 777-7077. In addition, the Q&As will be placed in the accounting standards part of the AICPA Web site ([www.aicpa.org/members/div/acctstd/general/othitem.htm](http://www.aicpa.org/members/div/acctstd/general/othitem.htm)). Questions on these Q&As may be sent to Dan Noll via e-mail ([dnoll@aicpa.org](mailto:dnoll@aicpa.org)).

---

#### **.01 Changes in Film Impairment Estimates During Quarters Within a Fiscal Year (Part I)**

*Inquiry*—Company A produced a film that is subject to the requirements of SOP 00-2, *Accounting by Producers or Distributors of Films* (ACC 10,800). In accordance with paragraphs 43–47 of SOP 00-2 (ACC 10,800.43–.47), Company A determined at the end of the first quarter of 20X1 that the film was impaired. Company A wrote down the film's cost basis by \$2 million, which represents the amount that the film's net book value exceeded the film's fair value. Company A determined the film's fair value by using a discounted cash flow model. At the end of the second quarter of 20X1, Company A determines based on updated information that the film's estimated net cash flows will be greater than anticipated at the end of the first quarter. Is the change in the estimated net cash flows a circumstance under SOP 00-2 (ACC 10,800) that requires Company A to restore all or a portion of the film's cost basis that was written off in the first quarter of 20X1?

*Reply*—Yes. Paragraph 36 of SOP 00-2 (ACC 10,800.36) requires that changes in estimates during the fiscal year be applied retroactively from the beginning of the fiscal year.

In this situation, Company A would use the new information regarding the film's estimated net cash flows gathered in the second quarter as if it were available in the first quarter to determine what the amount of the impairment loss would have been in the first quarter. Company A would record this adjustment to the impairment loss in the second quarter. Company A also would adjust the film's cost amortization for the first and second quarters to reflect the revised impairment loss. Company A should not restate the first quarter. In accordance with paragraph 44 of SOP 00-2 (ACC 10,800.44), the amount of the impairment write down restored cannot result in the adjusted net book value exceeding the film's fair value at the end of the second quarter. For example, if the revised first quarter calculation indicates that the impairment loss was only \$1 million at the end of the first quarter, the actual adjustment at the end of the second quarter would be different than the \$1 million because of the effect on the film's cost amortization using the individual-film-forecast-computation method, and possibly the film's fair value at the end of the second quarter. In addition, restorations of impairment write downs on a film should not exceed previous impairment write downs taken on that film.

Paragraph 57 of SOP 00-2 (ACC 10,800.57) requires that Company A disclose the effect of the change in estimate in the period that the change occurred. For public registrants, the Management Discussion and Analysis should address material restorations of prior impairment write downs.

Note that had the change in estimated net cash flows occurred in the subsequent fiscal year, paragraph 44 of SOP 00-2 (ACC 10,800.44) would prohibit Company A from adjusting the impairment write down taken in 20X1.

## **.02 Changes in Film Impairment Estimates During Quarters Within a Fiscal Year (Part II)**

*Inquiry*—Assume the same facts in TIS section 6970.01 with the following exception. The film's actual net cash inflow for the second quarter was as expected by Company A at the end of the first quarter. Company A, as expected, spent most of its advertising budget to promote the film during the second quarter. The film's estimated net cash inflow for subsequent periods also did not change. As a result of the advertising expenditures, using a discounted cash flow model at the end of the second quarter, the film's fair value increased from the amount determined at the end of the first quarter. Is that a circumstance under SOP 00-2, *Accounting by Producers or Distributors of Films* (ACC 10,800), for which Company A should restore all or a portion of the film's cost basis that was previously written off in the first quarter of 20X1?

*Reply*—No. In this situation the film's estimated net cash flows did not change from those used to estimate the film's fair value at the end of the first quarter. Accordingly, the guidance in paragraph 36 of SOP 00-2 (ACC 10,800.36) is not applicable.

---

[The next page is 6851.]

## Section 6980

### ***Brokers and Dealers***

#### **.01 Auditor's Report on Internal Control for Broker-Dealers**

*Inquiry*—Some state regulatory agencies are requesting that their name be included in the restrictive paragraph of the auditor's report on internal accounting control for broker-dealers. Because most broker-dealers must comply with Securities and Exchange Commission (SEC) regulations, the report on internal accounting control from their auditors includes a report on the additional requirements of Rule 17a-5(g) as well as a report on their study and evaluation as part of an audit. The restriction paragraph of the report illustrated in the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities*, appendix D, therefore includes the SEC as a designated recipient of the report and reads as follows:

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*designated self-regulatory organization*], and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and should not be used for any other purpose.

One state agency suggested revising the paragraph to reflect other agencies as recipients as follows:

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*designated self-regulatory organization*], and other regulatory agencies and should not be used for any other purpose.

Is this proposed revised wording appropriate in view of the fact that not all regulatory agencies use the SEC's Rule 17a-5(g) criteria or other established criteria for the evaluation of the adequacy of internal control procedures for their purposes?

*Reply*—No. The above suggested wording is not appropriate because the report would then be distributable to all other non-SEC regulatory agencies, and as stated, most agencies, including those of the 50 states, do not establish criteria in reasonable detail and in terms susceptible to objective application for the auditor's study, evaluation and report on the control procedures for the agencies' purposes. [Amended September 1997]

---

## Section 6990

### ***Common Interest Realty Associations***

#### **.01 Personal Property of Timeshares**

*Inquiry*—Should a common interest realty association (CIRA) that is a timeshare development report as assets personal property that it owns and uses as internal unit furnishings for timeshare units.

*Reply*—Yes. The AICPA Audit and Accounting Guide *Common Interest Realty Associations*, paragraph 2.01, provides that common property includes personal property that is owned by the CIRA and used on common real property. Paragraph 2.11 of the Guide provides that “CIRAs should recognize common personal property, such as furnishings, recreational equipment, maintenance equipment, and work vehicles, that is used by the CIRA in operating, preserving, maintaining, repairing, and replacing common property and providing other services, as assets.” Personal property that is owned by a CIRA and used as internal unit furnishings for timeshare units is common personal property that is used by the CIRA in providing other services.

## Section 7200

### Partnerships

#### **.01 Balance Sheet Presentation of Drawings in Excess of Capital Contributions**

*Inquiry*—Two partners each contributed capital of \$100 to form a partnership for the construction of a shopping center. The partnership has obtained several loans to fund the construction, but no payments on these loans are due for two years. The partners each withdrew excess funds of \$50,000 from the partnership out of the proceeds of the loans.

How would the balance sheet show the \$200 of capital and \$100,000 of withdrawals?

*Reply*—Whether the \$50,000 payments to the partners are permissible depends on the terms of the construction loan commitment. If the partnership agreement is silent concerning these payments, and they are, in fact, not loans to the partners, the \$50,000 withdrawn by each partner represents drawings in anticipation of profits. As drawing accounts, they would normally be closed to the partners' capital accounts. In the situation presented, it would result in a "negative" capital account for each partner in the amount of \$49,900 in the partners' equity section of the balance sheet. Full disclosure of the circumstances causing the negative balance should also be included.

#### **.02 Provision for Income Taxes on Partnership Income**

*Inquiry*—A partnership agreement provides that in computing net profits, there will be a provision for income taxes, and the amount of the provision for income taxes will be considered an expense of the partnership. In the preparation of the income statement, would the net profit figure after income taxes be considered as having been determined according to generally accepted accounting principles?

*Reply*—Between themselves, partners may agree to compute net profits in any fashion they wish; but for financial presentation purposes, a provision for income taxes should not be set up. The absence of this item in the financial statement can be explained in the form of a footnote to the income statement. If the income statement shows a net profit figure after income taxes, the statement is not prepared in accordance with generally accepted accounting principles.

#### **.07 Accounting for Syndication Costs of Limited Partnerships**

*Inquiry*—How should the amounts paid to attorneys, accountants or engineers; commissions paid to selling agents; fees paid to regulatory bodies; and printing costs for a private offering of a limited partnership be accounted for? Should they be deferred and amortized similar to organization costs in a corporation?

*Reply*—No. Organization costs of a corporation are normally considered to be the initial legal and other fees paid to incorporate a business in a particular state and are normally an immaterial amount.

The expenses referred to in the inquiry are similar in nature to stock issue costs such as underwriting discounts, professional fees and other expenses clearly and directly attributable to receiving proceeds of the shares issued by a corporation. These costs would be a reduction of paid-in capital in an offering of stock. Accordingly, these costs should be a reduction of capital contributed by the partners in a limited partnership.

#### **.08 Income Allocation of Limited Partnership**

*Inquiry*—A real estate limited partnership allocates the depreciation deduction entirely to the limited partners in accordance with the provisions of the partnership agreement. This is done in order to induce investment in the venture by the limited partners. Would such an allocation in the financial statements conform with generally accepted accounting principles (GAAP)?

*Reply*—Yes. Allocation of partnership income is determined by the partnership agreement. Therefore, in computing the income allocable to the limited and general partners, the depreciation deduction may be allocated entirely to the limited partners, in financial statements prepared in conformity with GAAP.

---

**[The next page is 7351.]**

## Section 7400

### ***Related Parties***

#### **.06 Exchange of Interest Bearing Note for Non-Interest Bearing Note**

*Inquiry*—Corporation A has an interest bearing note receivable from an officer/shareholder. Corporation A plans to exchange the present note for a non-interest bearing note. Should the non-interest bearing note be discounted in accordance with APB Opinion No. 21?

*Reply*—Yes. The non-interest bearing note should be discounted in accordance with APB Opinion No. 21, and there should be recognition of compensation or a dividend distribution, depending on what the unstated right or privilege represents.

---

[The next page is 7401.]

## Section 7500

### ***Estates and Trusts***

#### **.01 Trust Funds for Perpetual Care of Cemetery**

*Inquiry*—In accordance with state laws, a cemetery conducting business as a closely held corporation is required to set aside in a perpetual trust, with a corporate trustee, a certain amount from the sales proceeds of lots and crypts to be used for the perpetual care of the cemetery. The cemetery has no recourse to the principal of the trust, but receives all income earned by the trust assets. Before the state law was enacted, the cemetery made contributions to a similar trust as part of the contract of sale of lots. The cemetery contends that assets deposited with the trustee should not be reflected as part of its financial position because it has no claim to the corpus of the trust. Is this an appropriate method to account for such a trust?

*Reply*—The cemetery management is technically correct in contending that the assets deposited with the trustee should not be reflected as part of the financial position of the cemetery. Situations analogous to that of the cemetery include escrow funds held by an escrow company which are shown in a separate statement; trust funds established by third parties under which a college or university has a beneficial interest only in the resulting income, the trust corpus in such case not being included as an asset in the balance sheet of the college or university; and employees' pension, health, and welfare funds which are reflected in a separate statement.

Although the cemetery's balance sheet need not reflect the trust fund assets, the balance sheet should reflect the cemetery's agency obligation(s), i.e., the cemetery's liability either by contract or statute to pay over certain portions of monies received or receivable to the trustee.

The accounting treatment is the same whether the cemetery has entered into a contract to establish a trust or whether the cemetery's obligation to do so is required by statute.

Footnote disclosure of amounts held in trust, income from which is used in whole or in part to meet the cemetery's commitments respecting perpetual care, would be desirable but not mandatory in order to make the statements not misleading (unless the statute itself calls for such disclosure). If footnote disclosure concerning the trust fund assets is made, the cemetery could also reiterate its policy or procedure of promptly remitting monies to the trustee in connection with cash and deferred payment transactions.

None of the AICPA's official Bulletins or Opinions have dealt specifically with the matter of accountability for, and presentation of, funds or property received by an accounting entity in various somewhat related capacities, i.e., as custodian, bailee, factor, depository, agent to receive and pay over, stockholder, or trustee. Technically, the trust funds are not required to be reported by any accounting entity other than the trust.

---

[The next page is 7431.]

## Section 7600

### ***Business Combinations—General***

#### **.01 Date of Acquisition of a Company**

*Inquiry*—A corporation acquired a company for cash in March, subject to the same basic terms as negotiated orally in early January. It would like to designate December 31, the previous year-end of the acquired company, as the acquisition date, subject to imputed interest. The written contract does not specifically mention the date effective control passes to the acquiring company, although the December 31 balance sheet was prepared in accordance with Accounting Principles Board Opinion No. 16, paragraph 88(c) in anticipation of the acquisition.

Would it be proper to use December 31 of the previous year as the effective date of control of acquired company?

*Reply*—If the terms of the plan of combination were announced in writing or otherwise formally made known to the stockholders of the acquired company in early January, it would be appropriate to use, for accounting purposes, a balance sheet as of that date or any later balance sheet near the date of the cash payment with appropriate adjustment for imputed interest on the cash payment. If the December 31 balance sheet would not differ materially from a balance sheet prepared in early January, the December 31 balance sheet might be used.

Paragraph 93 of APB Opinion No. 16, states:

The Board believes that the date of acquisition of a company should ordinarily be the date assets are received and other assets are given or securities are issued. However, the parties may for convenience designate as the effective date the end of an accounting period between the dates a business combination is initiated and consummated.

Paragraph 46 of APB Opinion No. 16, states, in part:

A plan of combination is initiated on the earlier of (1) the date that the major terms of a plan, including the ratio of exchange of stock, are announced publicly or otherwise formally made known to the stockholders of any one of the combining companies (2) the date that stockholders of a combining company are notified in writing of an exchange offer.

It is assumed that there were no dividends, redemptions of stock, or other transactions between the acquired company and its stockholders between December 31 and the date the assets were taken over by the purchaser. It is also assumed that the fair market value (rather than book value) of the assets of the acquired company, which must be determined in order to properly allocate the purchase price, did not change appreciably between December 31 and the date of initiation of the transaction.

#### **.02 Date of Consummation of a Business Combination**

*Inquiry*—A client signed an agreement on June 30 for the acquisition of another company. The agreement calls for a closing date to be held only after the buyer receives financial statements of the seller for past years, and the seller receives a ruling from the Internal Revenue Service that the transaction

will not be taxable. It is anticipated that these conditions will be met within sixty days of the signing of the agreement at which time stock will be exchanged.

The company's year ends on June 30, and the auditor is in the process of examining the financial statements of the client. The auditor believes that the two companies have effectively combined their interests as of the year-end. According to the requirements of Accounting Principles Board Opinion No. 16, paragraph 47g, was the combination consummated before the end of the client's fiscal year?

*Reply*—APB Opinion No. 16 does not define the term “consummated” as it is used in paragraph 47g. However, in that the two companies have effectively combined their interests before the end of the year, and the two conditions to the agreement were not major obstacles, paragraph 47g would not preclude the auditor from considering the transaction as consummated before the end of the year.

### **.03 Financial Statement Presentation of Agreement to Acquire Company**

*Inquiry*—A client has entered into an agreement to acquire fifty percent of the stock of a corporation. To finance the acquisition, the company has arranged for a third party, a bank, to acquire the fifty percent interest in the corporation, and the company will purchase these shares from the bank over a five-year period. The price to be paid the bank for these shares has been fixed, subject only to changes in the prevailing interest rates.

When the bank acquires the fifty percent ownership, the bylaws of the corporation will be changed, and the client will be allowed to control half the seats of the board of directors.

Should the contract with the bank be considered an executory contract with the investment recorded only as the shares are acquired from the bank, or should the entire obligation be recorded on the client's financial statements?

*Reply*—The date of an acquisition in which the acquisition is being financed by an outside party depends primarily upon the date on which the principal rights of ownership are acquired. It would appear that the principal rights of ownership of equity securities are the rights to realize future gains in value and to be subject to future losses in value of the investee. Under the contract in question, the client has the right, subject to payment of the agreed amounts, to obtain the benefit of future earnings of the investee; and further, any losses in value of the purchased securities will be borne by the client. The principal attributes of ownership have been acquired by the company, and, therefore, the 50% interest and the related liability should be shown on the company's balance sheet.

### **.04 Conditions for Pooling of Interests Method**

*Inquiry*—If any of the seven conditions set forth in paragraph 47 of Accounting Principles Board Opinion No. 16 are not met, a business combination must be treated as a purchase.

Condition “a” of this paragraph requires:

The combination is effected in a single transaction or is completed in accordance with a specific plan within one year after the plan is initiated.

Condition “g” requires:

The combination is resolved at the date the plan is consummated . . .

Is a combination resolved when a specific plan is initiated, completed, or consummated?

*Reply*—Paragraph 47(g) states that the existence of any provision for future issuance of stock or other compensation subsequent to the date a combination is consummated (based on market prices or earnings subsequent to consummation) would require that the combination be accounted for as a purchase. Paragraph 47(a) requires that the combination must be effected within one year following the initiation of the plan. The word “consummated” in subparagraph “g” should be read to include both the phrase “effected in a single transaction” and “completed” as used in subparagraph “a”.

This means that there may be conditions at the date of initiation of a plan as to the number of shares which may be issued. However, as long as these conditions are met by date of consummation of the plan and such date of consummation is not more than one year after the date of initiation, pooling of interest accounting is not precluded. The definition of consummation of a plan is discussed in Accounting Interpretation No. 4 of APB Opinion No. 16.

### **.05 Accounting for Acquisition Costs Incurred in Merger**

*Inquiry*—In acquiring Corporation B, Corporation A incurred certain legal, accounting, printing, and other costs. These costs were capitalized and are being amortized over a forty-year period. Corporation B also incurred similar costs which were capitalized and are being amortized.

Consolidated financial statements are being prepared with the acquired Corporation B as an operating subsidiary of the acquiring Corporation A.

Were the merger costs properly handled, or should they be adjusted at this time?

*Reply*—Interpretation 33 of Accounting Principles Board Opinion No. 16 relates to costs of maintaining an “acquisitions department,” and states:

All “internal” costs associated with a business combination are deducted as *incurred* in determining net income under APB Opinion No. 16. This answer applies to costs incurred for both “poolings” (see paragraph 58) and “purchases” (see paragraph 76). Naturally, costs incurred in unsuccessful negotiations are also deducted as incurred.

Paragraph 76 specifies that in a business combination accounted for by the purchase method the cost of a company acquired includes the *direct* costs of acquisition. These direct costs, however, are “out-of-pocket” or incremental costs rather than recurring internal costs which may be directly related to an acquisition. The direct costs which are capitalized in a purchase therefore include, for example, a finder’s fee and fees paid to outside consultants for accounting, legal, or engineering investigations or for appraisals, etc. All costs related to effecting a pooling of interests, including the direct costs listed above, are charged to expense as specified in paragraph 58.

Costs of printing securities should reduce the fair value assigned to the securities, in accordance with paragraph 76 of APB Opinion No. 16.

The language in paragraph 76 and interpretation 33 indicates that the direct costs incurred by the acquiring corporation may be capitalized, but the costs incurred by the target (acquired) company may not. Therefore, the costs should have been expensed by Corporation B under APB Opinion No. 16. This should now be treated as a correction of an error under APB Opinion No. 20, *Accounting Changes*, and accounted for as a prior period adjustment.

The costs incurred by Corporation A should have been considered as part of the cost of investment and not necessarily capitalized and amortized separately.

.06 Exchange of Stock Involving Companies Under Common Control

*Inquiry*—Individual Y owns 100% of Corporation A and Corporation B. Individual Y exchanges his stock in Corporation A for 100 additional shares in Corporation B, thus creating a parent-subsidiary relationship. Prior to this transaction the assets, liabilities, and stockholders' equity of A and B were as follows:

Company A

Assets . . . . .	\$500,000
Liabilities . . . . .	\$100,000
Common stock, no par value, 200 shares authorized and issued. . .	100,000
Retained earnings . . . . .	300,000
Total . . . . .	\$500,000

Company B

Assets . . . . .	\$ 50,000
Liabilities . . . . .	\$ 20,000
Common stock, no par value, 1,000 shares authorized, 100 shares issued and outstanding. . . . .	20,000
Retained earnings . . . . .	10,000
Total . . . . .	\$ 50,000

How should Company B account for and record this transaction?

*Reply*—The exchange would be accounted for in accordance with AICPA Interpretation No. 39 of APB Opinion No. 16, "Transfers and Exchanges Between Companies Under Common Control," which stipulates that an exchange of stock involving companies under common control "would be accounted for at historical cost in a manner similar to that in pooling of interests accounting."

Company B would record this transaction as follows:

Investment in A . . . . .	400,000
Common stock of B . . . . .	100,000
Retained earnings of A . . . . .	300,000

This entry records B's investment in A at the carrying amount of A's stock (\$100,000 + \$300,000). The separate account for retained earnings of A is established to emphasize that the retained earnings are not a source of dividends to B's stockholder, as is often true in a statutory merger.

This entry also reflects the underlying theory of pooling accounting—the combining of stockholder interests concept (APB Opinion No. 16, *Business Combinations*, paragraph 53)—while recognizing the separate corporate identity of the pooled subsidiary. APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, holds that the total stockholders'

equity of the parent company should equal the total stockholders' equity shown in the consolidated financial statements. Paragraph 19 of that Opinion states, in part, "The difference between consolidation and the equity method lies in the details reported in the financial statements. Thus, an investor's net income for the period and its stockholders' equity at the end of the period are the same whether an investment in a subsidiary is accounted for under the equity method or the subsidiary is consolidated (except as indicated in paragraph 19i)."

### **.08 Shareholder Contribution of Land**

*Inquiry*—What value should be recorded for land contributed to a corporation by its sole shareholder?

*Reply*—Generally, a shareholder who owns more than 50 percent of a corporation is deemed to be a controlling shareholder. Accordingly, the land should be recorded at the shareholder's historical cost as discussed in AICPA Interpretation No. 39 of APB Opinion No. 16, "Transfers and Exchanges Between Companies Under Common Control." [Amended]

### **.09 Use of Stepped-Up Basis in Recording Acquisition of Majority Interest**

*Inquiry*—Company A is 100 percent owned by a family. The family also owns a 43 percent interest in Company B, with the remaining 57 percent owned by unrelated third parties. Company A purchases the 57 percent interest in Company B paying more than net book value and shortly thereafter the remaining 43 percent interest in Company B is transferred to Company A. If A then combines with B, can A use a stepped-up basis in recording the net assets of B?

*Reply*—Yes. The 57 percent interest that was acquired from an unrelated party should be accounted for by the purchase method according to APB Opinion No. 16, *Business Combinations*, paragraph 11, which states, "the purchase method accounts for business combination as the acquisition of one company by another. The acquiring company records as its cost the acquired assets less liabilities assumed."

The 43 percent interest that was owned by the family and transferred to Company A should be recorded at the family's predecessor basis according to AICPA Interpretation No. 39 of APB Opinion No. 16, "Transfers and Exchanges Between Companies Under Common Control," which states that assets and liabilities transferred between entities under common control be accounted for at historical cost in a manner similar to that in pooling of interests accounting.

---

[The next page is 7531.]

## Section 7610

### ***Purchase Method***

#### **.01 Acquisition of Parent Company by Subsidiary**

*Inquiry*—Company A owns seventy percent of the outstanding voting common stock of Company B. A “downstream” merger, whereby Company B, the subsidiary, would acquire the assets of Company A, is planned. The transaction would be recorded following the purchase method of accounting. Some controversy has arisen over whether Company B can be the surviving corporation after the transaction is completed. Could the subsidiary company become the survivor company after the merger?

*Reply*—In Accounting Interpretation No. 20 to Accounting Principles Board Opinion No. 16, concerning the acquisition of minority interest, the following statement appears:

Whether a parent acquires the minority or a subsidiary acquires its parent, the end result is a single shareholder group, including the former minority shareholders, owning the consolidated net assets.

In a “downstream” merger the effect of the transaction is that the stockholder group is increased by acquisition of the former minority shareholders of the subsidiary. The transaction should be accounted for as if the surviving company were the parent, rather than the subsidiary. The subsidiary should, therefore, adjust its accounts to reflect any difference between the parent’s equity and unamortized cost to the parent of its investment in the subsidiary (including the effect of any difference between the fair value of the stock held by minority shareholders at date of the combination and the net equity position of such minority in the surviving company).

The stockholders’ equity of the surviving company should be adjusted to reflect the stockholders’ equity of the former parent, after giving effect to acquisition of the former minority interest. If the resulting capital account is less than the par or stated value of the capital stock of the survivor, an appropriate transfer must be made from retained earnings.

Whether the former parent or the former subsidiary is the surviving company is a legal matter, not an accounting matter and, therefore, is not subject to Accounting Principles Board pronouncements. Accounting for the transaction, however, should follow the substance of the transaction. The accounting for the surviving company should, therefore, be the same whether it is the parent or the subsidiary that survives.

#### **.02 Income of Acquired Company Pending Approval of Merger by Regulatory Agency**

*Inquiry*—Corporation A executed a stock purchase agreement in January, 19X5, whereby A would purchase the stock of Corporation B. This purchase must be approved by the Interstate Commerce Commission. A and B also entered into a temporary management agreement which was approved by the

ICC effective March 1, 19X5. Under this temporary management agreement, A will operate B until the ICC rules on the purchase. Any income or losses of B during the term of the agreement will be credited or charged to A regardless of the ruling of the ICC. How should Corporation A account for the operations of B during the temporary management period?

*Reply*—The profit or loss under the temporary management agreement should be accounted for by the acquiring company in accordance with paragraphs 93 and 94 of Accounting Principles Board Opinion No. 16. As indicated in paragraph 93 of the Opinion, using March 1, 19X5, as the effective date of acquisition would require an adjustment of the cost of the acquired company and net income otherwise reported to compensate for recognizing income before consideration was transferred. Income of the acquired company included in consolidation would have to be reduced by imputed interest as provided in the last sentence of paragraph 93. Paragraph 94 also indicates, “. . . income of an acquiring corporation for the period in which a business combination occurs should include income of the acquired company after the date of acquisition by including the revenue and expenses of the acquired operations based on the cost to the acquiring corporation.”

### **.06 Purchase of Corporation With Negative Net Worth**

*Inquiry*—Corporation A will purchase 100% of Corporation B by issuing its stock to the stockholders of Corporation B. The stock will have a value of approximately \$3,900. The balance sheet of Corporation B at the time of purchase will have a negative net worth of approximately \$700. Should Corporation A record its investment at \$3,900 with subsequent equity adjustments to be made in the future as they occur, or should Corporation A record the investment at zero and show the \$3,900 as “Unamortized Excess Cost Over Net Assets of Subsidiary at Date of Acquisition” which would be amortized over a period of years?

*Reply*—It is assumed that the combination of Corporation A and B is being accounted for as a purchase, because all the criteria for pooling of interests accounting have not been met. Corporation A should record the investment at \$3,900; the consolidation entry to eliminate the investment would result in “goodwill” of \$4,600 because of the \$700 negative net worth at acquisition. The equity adjustments referred to would only be required if Corporation A prepared “parent company only” financial statements for issuance to its stockholders as “the financial statements of the primary reporting entity” (see paragraph 14 of Accounting Principles Board Opinion No. 18).

The application of the purchase method is discussed in some detail beginning with paragraph 66 of APB Opinion No. 16. Paragraphs 87-89 deal with recording assets acquired and liabilities assumed, which should, essentially, be recorded at fair market values. Any excess of cost over net assigned values should be reported as goodwill and amortized in accordance with paragraphs 27-31 of APB Opinion No. 17, *Intangible Assets*.

### **.08 Allocation of Purchase Price to Assets**

*Inquiry*—Corporation A was formed for the purpose of acquiring from Corporation B certain assets and its name. Corporation A will not assume any of Corporation B's liabilities. The terms of the purchase agreement state that for the assets being sold by the seller, the buyer shall pay a purchase price of \$400,000, which shall be allocated as follows: \$50,000 to real estate, \$250,000

to equipment, and the balance to all other assets. The other assets include accounts receivable, prepaid expense items, a truck, and merchandise inventories.

The real estate and equipment values are based on appraisals by reputable appraisers. The receivables are at book value, the prepaid items are computed, and the truck is of small value. When all these assets have been considered, the balance of the purchase price allocable to inventory is considerably below its value.

Should the values assigned to the real estate and equipment be reduced in order to record the inventory at the value placed on it by the company, or should the stated values for real estate and equipment be used and the balance of purchase price allocated to the remaining assets?

*Reply*—Paragraphs 88 and 91 of Accounting Principles Board Opinion No. 16 would require that cash, receivables, and inventory be set up at estimated realizable value at date of the purchase. The balance of the purchase price should be assigned to the real estate and equipment, after allowing appropriate values for any miscellaneous accounts. Use for accounting purposes of values arbitrarily assigned in the purchase agreement would under the circumstances be contrary to generally accepted accounting principles as expressed in paragraph 91.

### **.09 Allocation of Purchase Price to Assets Purchased in Bulk**

*Inquiry*—A corporation purchased all the assets of another company consisting of inventory (parts and supplies), machinery and equipment, dies, furniture and fixtures, etc. Detailed schedules supported such assets but no amounts or values were assigned by the seller.

The corporation has elected to value the inventory at fair market value or at original cost of the seller, whichever is lower. The records of seller are available to establish costs. The machinery and equipment, dies and furniture and fixtures are to be assigned values at estimates so that the total assigned cost equals the total purchase price. No goodwill is deemed to exist. The assets are material balance sheet items.

Is this treatment of assigning values for the bulk purchase of assets in accordance with generally accepted accounting principles?

*Reply*—Paragraph 68 of Accounting Principles Board Opinion No. 16 states that a bulk purchase of assets is treated in the same manner as a business combination under the purchase method. The proper method of allocating costs to the individual assets in a purchase is discussed in paragraphs 87 through 92 of APB Opinion No. 16.

Paragraph 88(c) indicates that inventories of raw material should be valued at current replacement cost, while finished goods should be valued at estimated selling price less cost of disposal and an allowance for a reasonable profit for the selling effort of the acquiring corporation. While in many cases this will agree substantially with the cost basis as shown on the records of the seller, such cost basis should not be used automatically. Further, fair market value to the purchaser must provide an allowance for the cost of disposal and a normal profit margin.

If the balance to equal the purchase price is less than the sum of replacement costs of the machinery and equipment, dies, and furniture and fixtures, the balance of course should be assigned to such tangible fixed assets on the basis

of current replacement costs. If, however, such costs do not exhaust the purchase price, the balance being paid for is presumably for some intangible asset. If such intangible asset is being recognized, it must be amortized over an appropriate period not to exceed forty years. [Amended]

#### **.10 Asset Values Stated in Purchase Agreement**

*Inquiry*—Can a purchase agreement, which identifies specific assets of the acquired company and sets their purchase prices, govern the valuation of these assets in accounting for a business combination, or must the acquirer adhere to the valuation principles stated in paragraphs 87 (AC B50.145) and 88 (AC B50.146) of Accounting Principles Board Opinion No. 16 despite the agreement?

*Reply*—For purposes of recording the business combination, the provisions of paragraphs 87 (AC B50.145) and 88 (AC B50.146) of APB Opinion No. 16 should be followed and cannot be circumvented by the purchase agreement.

#### **.14 Value of Receivables Purchased Decreased at Closing Date**

*Inquiry*—A purchaser of an enterprise found that the value of the accounts receivable, included in the total assets to be purchased, had decreased at the closing date of the agreement. The seller holds the buyer to the original agreement price for the business.

What is the proper treatment on the books of the purchaser for the excess paid for accounts receivable?

*Reply*—A bargained price measures an outlay deemed prudent by the purchaser at the time of consummating a transaction. The difference in accounts receivable should not be written off as a loss immediately. The difference either represents a claim upon the seller (which could be set up as a receivable) on the ground that a certain amount of receivables were bargained and not received, or the excess paid represents additional goodwill, a premium the purchaser was willing to pay for future profit expectations.

#### **.16 Amortization of Cost of Long-Term Land Leases Acquired**

*Inquiry*—A real estate investment trust, is acquiring substantially all of the net assets of a company whose principal holdings are improved rental real estate. The combination is being accounted for as a purchase.

The assets being acquired include several favorable long-term (99 years) land leases. The amount at which these leases are being recorded was derived by taking the capitalized economic value of the property as if owned and subtracting the capitalized value of the lease to arrive at the total economic value of the lessee's interest. The depreciated value of the improvements was then deducted to determine the residual leasehold value of the land.

What would be the period of amortization of the long-term land leases under these circumstances?

*Reply*—Any value assigned to the leased property should not exceed the current appraised value of the property account less its residual value at termination of the lease (discounted to present value), and reduced by any favorable (to the sublessee) factors of current subleases. Such value may be amortized over the life of the lease.

#### **.19 Step Up in Basis of a Company's Assets as a Result of a Change in Its Ownership**

*Inquiry*—Corporation A purchased the total outstanding stock of Corporation B and elected, under section 338 of the Internal Revenue Code, to treat the

transaction as a purchase of assets. The effect of the transaction and election was to increase (step up) the carrying amounts of the assets of Corporation B to their fair values for tax purposes based on the purchase price (the subsidiary's liabilities plus the amount Corporation A paid for its stock) paid by Corporation A. Is a similar step up in basis acceptable for financial reporting purposes?

**Reply**—APB Opinion No. 16, *Business Combinations*, provides guidance on accounting for the purchase of the stock of one company by another in consolidated financial statements, and requires that the assets and liabilities of an acquired company be stated, for that purpose, at their fair values at the date of acquisition. The authoritative literature does not address the step up of the carrying amounts of assets in the separate accounts of an acquired company to reflect the purchase of its stock by another entity or group of stockholders. However, an AcSEC Issues Paper, *"Push Down" Accounting*, contains an advisory conclusion that the values assigned to an acquired company's assets and liabilities under APB Opinion No. 16 for consolidated financial statement purposes in an acquisition involving at least a 90 percent change in ownership may be used ("pushed down") in the separate financial statements of the acquired company. The methods for determining the fair values of the assets and liabilities in a business combination required to be accounted for as a purchase are described in APB Opinion No. 16, paragraphs 87 and 88.

#### **.20 Accumulated Depreciation in a Purchase Business Combination**

**Inquiry**—In a purchase business combination, a used market did not exist for certain plant and equipment to be used, therefore, it was valued at replacement cost new less estimated accumulated depreciation in accordance with APB Opinion No. 16, *Business Combinations*, paragraph 88, footnote 11. Should the estimated accumulated depreciation be recorded by the acquirer as a contra account to the plant and equipment, which would be shown at replacement cost new?

**Reply**—No. Replacement cost new less estimated accumulated depreciation is a method used to approximate the current fair value of a used asset. Only the net amount should be shown on the balance sheet.

#### **.21 Reduction of Carrying Value of Restricted Long-Term Equity Securities**

**Inquiry**—Corporation P purchased corporation S for a price substantially below the fair value of S Corporation's net assets. The sole assets of Corporation S are long-term equity securities which are restricted from being sold for a three year period by a contractual agreement. Should these securities be reduced by a proportionate part of the excess fair value over cost?

**Reply**—Yes. APB Opinion No. 16, *Business Combinations*, paragraph 91, states that the values assigned to net assets acquired should not exceed the cost of the acquired company. An excess over cost should be allocated to reduce proportionally the values assigned to noncurrent assets (except long-term investments in marketable securities).

FASB Interpretation No. 16, *Clarification of Definitions and Accounting for Marketable Equity Securities that Become Nonmarketable*, paragraph 6, states that if a restricted security cannot qualify for sale within one year or market price quotations are not available for unrestricted shares of the same class, the security is considered nonmarketable.

The equity securities owned by Corporation S should be reduced by a proportionate share of the excess fair value over cost because they are nonmarketable and do not meet the exception in APB Opinion No. 16, paragraph 91.

## **.22 Negative Goodwill in Unclassified Balance Sheet**

*Inquiry*—APB Opinion No. 16, *Business Combinations*, paragraph 91, discusses an excess of acquired net assets over cost, which should be allocated to reduce proportionately the values assigned to noncurrent assets (except for long-term investments in marketable securities) in determining their fair values. What is the appropriate accounting in a situation involving an unclassified balance sheet?

*Reply*—The allocation process under APB Opinion No. 16, paragraph 91, would focus on the nature of the assets regardless of whether a classified or unclassified balance sheet is presented, and would allocate the excess to long lived assets, except for investments in marketable securities.

## **.23 Sale of Parent Stock in Subsidiary to Minority Shareholder**

*Inquiry*—A parent company owns 80 percent and an unrelated minority owns the remaining 20 percent of a subsidiary. The parent sells 10 percent of its ownership in the subsidiary to the minority shareholder for an amount in excess of what the parent paid for that stock.

Would the parent record a gain for the amount received in excess of carrying value (based on the equity method)? If so, would that gain be eliminated in consolidation, or remain on the consolidated income statement?

*Reply*—Authoritative literature does not address this specific situation. However, Interpretation No. 39 to APB Opinion No. 16, *Transfers and Exchanges Between Companies Under Common Control*, states that the acquisition of all or part of the shares held by the minority interest of a subsidiary is never considered a transaction between enterprises under common control and should be accounted for as a purchase. Therefore, a transaction in the opposite direction, i.e., the minority interest acquires the stock of the subsidiary held by the parent, also should be accounted for as a purchase.

Any amount received by the parent in excess of its carrying value (based on the equity method) would be recorded as a gain, in the consolidated statements. The “gain” should be shown as a transfer from consolidated equity to the minority interest.

## **.24 Acquisition of Minority Interest**

*Inquiry*—A parent corporation (P) has a wholly-owned subsidiary (S), who in turn owns 90 percent of another company (C). The remaining 10 percent (minority interest) is held by stockholders who are outside the corporate structure. P paid \$220,000 to acquire the minority interest shares of C. How would this acquisition be accounted for by P?

*Reply*—Interpretation No. 26 of APB Opinion No. 16, *Acquisition of Minority Interest*, states that the acquisition of some or all of the stock held by minority stockholders of a subsidiary—whether acquired by the parent, the subsidiary itself, or another affiliate—should be accounted for by the purchase method. Thus, purchase accounting applies when (a) a parent exchanges its common

stock or assets or debt for common stock held by minority shareholders of its subsidiary, (b) the subsidiary buys as treasury stock the common stock held by minority shareholders, or (c) another subsidiary of the parent exchanges its common stock or assets or debt for common stock held by the minority shareholders of an affiliated subsidiary.

Based on the above, P would account for this acquisition by the purchase method. The \$220,000 would be allocated proportionately to 10 percent of the fair value of the assets and liabilities acquired in the same manner as under the purchase method described in APB Opinion No. 16, *Business Combinations*.

---

[The next page is 7681.]

## Section 7620

### ***Applicability of Pooling of Interests Method***

#### **.03 Affiliate Acquiring Interest in Company Wholly Owned by Parent**

*Inquiry*—A client owns 45 percent of a foreign holding company, with the balance owned by unrelated parties. The foreign company wishes to acquire a 65 percent interest in a U.S. operating company. This operating company will be sold to a U.S. holding company which is presently 100 percent owned by the client. The selling price will be substantially above the foreign company's cost.

What method of accounting should be used to reflect these transactions?

*Reply*—Because the client owns 45 percent of the foreign holding company's stock, the equity method of accounting for this investment would be appropriate. In APB Opinion No. 18, paragraph 17, the Board concluded that in order to achieve a reasonable degree of uniformity in application, an investment (direct or indirect) of 20 percent or more of the voting stock of an investee should lead to a presumption that, in the absence of evidence to the contrary, an investor has the ability to exercise significant influence over an investee.

Interpretation 39 to Opinion No. 16 should be followed in accounting for the "sale" of the 65 percent interest to the U.S. 100 percent owned subsidiary. APB Opinion No. 16 deals with accounting for business combinations. The interpretation discusses transfers and exchanges between companies under common control, which is similar to this situation.

Interpretation 39 states:

In general, paragraph 5 excludes transfers and exchanges that do not involve outsiders. For example, a parent company may transfer the net assets of a wholly owned subsidiary into the parent company and liquidate the subsidiary, which is a change in legal organization but not a change in the entity. Likewise, a parent may transfer its interest in several partially owned subsidiaries to a new wholly owned subsidiary, which is again a change in legal organization but not in the entity. Also, a parent may exchange its ownership or the net assets of a wholly owned subsidiary for additional shares issued by the parent's partially owned subsidiary, thereby increasing the parent's percentage of ownership in the partially owned subsidiary but leaving all of the existing minority interest outstanding.

Interpretation 39 states, "None of the above transfers or exchanges is covered by APB Opinion No. 16," and, "The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting." But, the acquisition of all or part of the outstanding shares held by the minority interest would be accounted for by the purchase method.

#### **.04 Combination of Related Companies—I**

*Inquiry*—An individual owns two corporations. It is desirable to maintain only one corporate structure, therefore the brother and sister corporations are being merged. Would the pooling of interests method be appropriate?

*Reply*—Paragraph 5 of APB Opinion No. 16 states in part:

The term business combination in this Opinion excludes a transfer by a corporation of its net assets to a newly formed substitute corporate entity chartered by the existing corporation and a transfer of net assets or exchange of shares between companies under common control . . . such as between a parent corporation and its subsidiary or between two subsidiary corporations of the same parent.

Accounting Interpretation No. 39 of APB Opinion No. 16 illustrates the application of paragraph 5, and indicates, “The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting.”

### **.05 Combination of Related Companies—II**

*Inquiry*—Company A is a real estate holding corporation owning land and buildings, forty percent of which are occupied by Company B.

The shareholders of Company A are the spouses of two of the three shareholders of Company B. The third shareholder is also related by marriage to the other two shareholders of Company B and married to the daughter of one of the shareholders of Company A.

The book value of A’s assets are about ten percent of those of B.

Voting preferred stock was issued to effect the merger of Company A with Company B. Company B then set up the real estate corporation as a separate division, mortgaged the property, and used the funds in its operations.

Is the merger of Company A with Company B to be treated as a pooling of interests or a purchase?

*Reply*—Paragraph 5 of APB Opinion No. 16, *Business Combinations*, states, “The term business combination in this Opinion excludes a transfer by a corporation of its net assets to a newly formed substitute corporate entity chartered by the existing corporation and a transfer of net assets or exchange of shares between companies under common control . . . such as between a parent corporation and its subsidiary or between two subsidiary corporations of the same parent.”

Interpretation No. 39 of Opinion No. 16 deals with transfers and exchanges between companies under common control. The following excerpts are from that interpretation: “In general, paragraph 5 excludes transfers and exchanges that do not involve outsiders . . . . The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting.” Therefore, even though voting preferred stock was issued (which would preclude a pooling under paragraph 47b of APB Opinion No. 16), the merger of A should be treated in a manner similar to a pooling of interests if the family relationship is such that the companies were deemed to be under common control. If the family relationship leads to the conclusion that the companies are not under common control, then the merger would come under the provisions of APB Opinion No. 16 and purchase accounting would be required. However, in the absence of evidence to the contrary, the close family relationship among the stockholders would lead to the conclusion that A and B are under common control; therefore, Interpretation No. 39 would apply, and the transaction should be recorded in a manner similar to a pooling of interests.

**.06 Combination of Related Companies—III**

*Inquiry*—The Stock of Parent Company was held by four family members. Several years ago, the operating assets of two divisions were transferred to two newly formed corporations, A and B, in exchange for their stock. One family member exchanged his Parent stock for a minority interest in A and another exchanged his Parent stock for a minority interest in B.

Early this year, A and B were combined in a pooling of interests transaction, forming AB. Recently, AB was combined with the original Parent. The 2 family members holding AB stock will receive stock of Parent. Parent has only one class of stock.

Would the treatment of the combination of AB and Parent as pooling of interest be in accordance with APB Opinion No. 16?

*Reply*—Interpretation No. 39 of APB Opinion No. 16 dealing with business combinations involving transfers and exchanges between companies under common control states:

In general, paragraph 5 excludes transfers and exchanges that do not involve outsiders. For example, a parent company may transfer the net assets of a wholly owned subsidiary into the parent company and liquidate the subsidiary, which is a change in legal organization but not a change in the entity. Likewise, a parent may transfer its interest in several partially owned subsidiaries to a new wholly owned subsidiary, which is again a change in legal organization but not in the entity. Also, a parent may exchange its ownership or the net assets of a wholly owned subsidiary, thereby increasing the parent's percentage of ownership in the partially owned subsidiary but leaving all of the existing minority interest outstanding.

None of the above transfers or exchanges is covered by APB Opinion No. 16. The assets and liabilities so transferred would be accounted for at historical cost in a manner similar to that in pooling of interests accounting.

It should be noted, however, that purchase accounting applies when the effect of a transfer or exchange is to acquire all or part of the outstanding shares held by the minority interest of a subsidiary (see paragraph 43). The acquisition of all or part of a minority interest, however acquired, is never considered a transfer or exchange by companies under common control. (See Interpretation No. 26 of APB Opinion No. 16, "Acquisition of Minority Interest.")

The case described involves companies under common control because of ownership by the parent company and family members, and, therefore, the combination should be accounted for at historical cost.

**.07 Combination of Related Companies—IV**

*Inquiry*—Corporation A acquired Corporation B in an exchange of common stock. Corporation B is owned by two individuals in the amounts of 60 percent and 40 percent of the stock issued. Corporation B owned 12 percent of Corporation A before acquisition. The two individuals who own Corporation B, own stock of Corporation A and, including their beneficial ownership through the stock which Corporation B owns in Corporation A, they own over 50 percent of Corporation A.

How would this acquisition be classified and reflected on the records of the acquiring corporation?

*Reply*—It is assumed that the interest in Corporation A of each of the two individuals who own Corporation B are roughly in the same proportion to each other as is their ownership of Corporation B.

Paragraph 5 of APB Opinion No. 16 excludes from the definition of a business combination the transfer of net assets or exchange of shares between companies under common control. Paragraph 5 seems to apply whether the common control was exercised by a corporation or by individuals.

Although APB Opinion No. 16 does not address itself to the proper accounting for a combination of such companies, it would be appropriate to apply the pooling of interests method. However, certain of the disclosures required for a pooling of interests in business combinations would not be required for mergers of companies under common control. Such combinations should reflect generally any costs of acquisition that were incurred by the joint owner, but which were not reflected on the books of the companies being combined. Interpretation No. 39 of APB Opinion No. 16 relates to transfer and exchanges between companies under common control and can be used as a basis for application of the pooling of interests method.

### **.08 Acquisition of a Division of Another Company**

*Inquiry*—A company is acquiring a division of another company. APB Opinion No. 16, paragraph 5, reads in part, “The conclusions of this section apply equally to business combinations in which one or more companies become subsidiary corporations, one company transfers its net assets to another, and each company transfers its net assets to a newly formed corporation.”

Is this transaction excluded from APB Opinion No. 16, and, if not, what method of accounting should be used?

*Reply*—The first sentence of APB Opinion No. 16, paragraph 5, states, “This section covers the combination of a corporation and one or more incorporated or unincorporated businesses; both incorporated and unincorporated enterprises are referred to in this section as companies.” The division should be viewed as an “unincorporated enterprise” because whether the other company chose to operate under a divisional or parent-subsidiary structure is largely a matter of management preference and form over substance. Therefore, this acquisition is covered by APB Opinion No. 16 and the purchase method should be used.

### **.09 Pooling of Interest Following Abandonment of Previous Attempt to Merge**

*Inquiry*—A year ago Company A was acquired by Company B in an exchange of stock. A condition of this exchange was that Company B would register its stock with the SEC within one year. If such a registration was not completed, the shareholders of the two companies would again be separate, autonomous, and unrelated entities.

Company B was unable to register its stock and the exchange of stock was subsequently reversed. Company A is now contemplating combining with another company.

One of the conditions for using the pooling of interest method for business combinations is stated in paragraph 46 of APB Opinion No. 16 as follows:

Each of the combining companies is autonomous and has not been a subsidiary or division of another corporation within two years before the plan of combination is initiated.

Was Company A a subsidiary of Company B?

*Reply*—Although Company A had been involved in an attempted business combination which was abandoned after one year, the failure of the transaction would indicate that the company had not in fact been a division or subsidiary of another company. Therefore, the requirement of paragraph 46 of APB Opinion No. 16 would not preclude a subsequent business combination from being accounted for as a pooling of interest.

#### **.10 Business Combination Following a “Spin-Off”**

*Inquiry*—A company which owns 100 percent of two subsidiaries is considering combining with another company through an exchange of stock. Prior to any combination, however, the company intends to spin-off to its present stockholders the capital stock of the two subsidiaries. These two subsidiaries account for approximately 50 percent of the gross revenue of the combined enterprise. Would the combination, after the spin-off, qualify as a pooling of interest or as a purchase under APB Opinion No. 16?

*Reply*—Paragraph 47c of APB Opinion No. 16 (AC B50.106c) states that in order to be considered a pooling of interest, “none of the combining companies changes the equity interest of the voting common stock in contemplation of effecting the combination either within two years of the date the combination is initiated or between the dates the combination is initiated and consummated; changes in contemplation of effecting the combination may include distributions to stockholders and additional issuances, exchanges, and retirements of securities.”

Therefore, in accordance with paragraph 47c of APB Opinion No. 16 (AC B50.106c), the transaction must be considered a “purchase.” [Amended June 1995.]

#### **.11 Pooling of Interest Following Acquisition of Treasury Stock**

*Inquiry*—A company has decided that it is over-capitalized and wishes to acquire treasury shares in order to reduce its capitalization. Assuming that the number of shares acquired is material as contemplated by the Interpretation No. 20 of APB Opinion No. 16, will the company be precluded from entering pooling of interest business combination for a period of two years? If the company decides to accomplish this reduction in capitalization by a pro rata redemption of outstanding shares, is it similarly precluded from entering pooling of interests business combinations for two years?

*Reply*—Interpretation No. 20 relates to paragraphs 47(c) and (d) of APB Opinion No. 16.

Paragraph 47(d) states, “Each of the combining companies reacquires shares of voting common stock only for purposes other than business combinations, and no company reacquires more than a normal number of shares between the dates the plan of combination is initiated and consummated.” In determining intent, both in subparagraphs (c) and (d) of paragraph 47 and subparagraph (a) of paragraph 46, it is presumed that a transaction is in contemplation of the business combination if it occurs within two years prior to the initiation of the plan.

As stated in the Interpretation to APB Opinion No. 16, paragraph 47(d), this presumption may be overcome if it is shown that the shares have been or will be reissued in stock option or other compensation plans or as payments in purchase combinations. It will also be overcome if the stock is resold prior to the business combination.

However, if the stock is not reissued, it should be evident that some of the stockholders are being paid in cash, rather than receiving stock of the combined company or that some stockholders have been paid in cash for part of their stock. APB Opinion No. 16 expressly precludes pooling of interests accounting when stockholders of either of the combining companies are paid in part by cash.

The Interpretation of APB Opinion No. 16, paragraph 47(d), lists specific purposes for acquiring treasury stock which would not prohibit pooling of interests accounting treatment: stock option or compensation plans, stock dividends declared, "purchase" business combinations, and resolving existing contingent share agreements from a prior business combination. Each of these purposes is similar in that they all include a subsequent distribution of the stock. In other words, the company is reacquiring the stock for some subsequent business purpose. "Over-capitalization" as a specific purpose differs from these examples because the company is not acquiring these shares for a subsequent business purpose.

Therefore, treasury stock acquisitions to avoid over-capitalization is a business purpose which will prevent pooling of interests accounting for business combinations for two years. This assumes that the violation has not been "cured" by resale of these shares prior to consummation.

A pro rata redemption of shares is, in substance, the same as an acquisition of treasury stock. Accordingly, the company will also be ineligible to enter pooling of interests business combinations for two years if it chooses this method to reduce its capitalization.

Also see the SEC's Codification of Financial Reporting Policies, Sec. 201.02 (ASRs 146 and 146A).

## **.12 Exchange of Shares Between Companies Under Common Control**

*Inquiry*—The voting common stock of Corporations A and B are owned by the same interests but not in the same proportion. In addition, B has outstanding nonvoting common stock which is identical to the voting common stock, except for the voting privilege. None of the holders of the voting stock own nonvoting stock, although members of their families and family related trusts are owners of part of the nonvoting stock with the balance being held by key employees and others. It is proposed that B remain in existence but that all of its voting stock be acquired by A in exchange for voting stock of A. The nonvoting stock will not be exchanged.

Based upon current financial statements, the nonvoting interest in B represents approximately 35 percent of the stockholders' equity in that corporation and would represent approximately 20 percent of the combined stockholders' equity.

What is the proper accounting for the combination of these two companies?

*Reply*—Paragraph 5 of APB Opinion No. 16 excludes from the term "business combination" an exchange of shares between companies under common control. Such a combination, although thus excluded from the provisions of APB Opinion No. 16, should generally be accounted for in the same manner as a pooling of interests. Even if the combination of the two companies should be considered a business combination subject to APB Opinion No. 16, allowing the nonvoting stock of one of the companies to remain outstanding would not result

in a business combination being accounted for as a purchase, if all other conditions indicated use of the pooling method. Interpretation No. 39 of APB Opinion No. 16 discusses transfers and exchanges between companies under common control.

### **.13 Effect on Pooling of Interests of Contingently Issued Shares Held in Escrow**

*Inquiry*—A client and another company have agreed to a plan of combination which is intended to meet all of the criteria for pooling of interests accounting.

The client's attorneys have prepared a preliminary draft of an indemnity-escrow agreement which may provide for deposit in escrow of 30 percent of the total shares to be issued to affect the combination, to secure, compensate, and indemnify the issuer regarding breach of certain warranties and other matters coming within the type of "general management representation" as referred to in Interpretation 30 of APB Opinion No. 16.

One of the requirements stated in paragraph 47 of APB Opinion No. 16 is:

- g. The combination is resolved at the date the plan is consummated and no provisions of the plan relating to the issue of securities or other consideration are pending.

This condition means that (1) the combined corporation does not agree to contingently issue additional shares of stock or distribute other consideration at a later date to the former stockholders of a combining company, or (2) the combined corporation does not issue or distribute to an escrow agent common stock or other consideration which is to be either transferred to common stockholders or returned to the corporation at the time the contingency is resolved.

An agreement may provide, however, that the number of shares of common stock issued to effect the combination may be revised for the later settlement of a contingency at a different amount than that recorded by a combining company.

Interpretation No. 14 of APB Opinion No. 16 states:

The only contingent arrangement permitted under paragraph 47-g is for settlement of a contingency pending at consummation, such as the later settlement of a lawsuit. A contingency arrangement would also be permitted for an additional income tax liability resulting from the examination of "open" income tax returns.

Interpretation No. 30 states:

The most common type of contingency agreement not prohibited in a pooling by paragraph 47g is the "general management representation" which is present in nearly all business combinations. In such a representation, management of a combining company typically warrants that the assets exist and are worth specified amounts and that all liabilities and their amounts have been disclosed. The contingency agreement usually calls for an adjustment in the total number of shares exchanged up to a relatively small percentage (normally about 10%) for variations from the amounts represented, but actual adjustments of the number of shares are rare.

Would the 30 percent of the shares to be issued held in escrow preclude the use of the pooling of interests method?

*Reply*—The contingencies covered in Interpretation No. 14 are more susceptible of quantification than those discussed in Interpretation No. 30. The 10 percent referred to in No. 30 should not be viewed as a ceiling if the escrow shares are earmarked for contingencies, such as those discussed in No. 14. However, No. 30 also states:

... the contingency agreement is merely a device to provide time for the issuing company to determine that the representations are accurate so it does not share risks arising prior to consummation. Although the time required will vary with circumstances, these determinations should be completed within a few months following consummation of the combination. In any case, the maximum time should not extend beyond the issuance of the first independent audit report on the company making the representations following consummation of the combination.

#### **.14 Issuance of Stock for Contingent Earnings Rights of Acquired Company's Stockholders**

*Inquiry*—Corporation A plans to combine with Corporation B, with A being the surviving corporation. A will issue its shares of stock to the stockholders of B. B also has a preexisting obligation to certain of its shareholders who have certain contingent earnings rights requiring issuance of additional common stock. Corporation A has agreed to assume this obligation and will issue shares of its own stock to these stockholders. May this merger be treated as a pooling of interest?

*Reply*—The issuance of A's common shares to the holders of the contingent earnings rights would not prohibit using the pooling of interests method to account for the business combination. Issuing common stock for this obligation is similar to assuming or exchanging common stock for a debt security. Therefore, it would be proper to apply that part of APB Opinion No. 16, paragraph 47, which states, "... a corporation issuing stock to effect the combination may assume the debt securities of the other company or may exchange substantially identical securities or voting common stock for other outstanding equity and debt securities. ..."

#### **.15 Pooling of Interests Precluded by Agreement to Redeem Stock**

*Inquiry*—Corporation A, a personal holding company, has an agreement with its sole shareholder to redeem the corporation's stock at fair market value on the date of the shareholder's death.

Corporation B, whose stock is publicly traded, proposes to merge with A. All stockholders will exchange their stock for voting common stock in the resulting Corporation AB.

Assuming that the exchange of stock meets all other requirements for a pooling of interests, would the assumption of the redemption agreement by AB negate the pooling under the "contingent bailout" or "planned transaction" provisions of APB Opinion No. 16?

Also, if pooling is permissible, would the result be changed if AB amended the agreement to provide a specific redemption price not related to the fair market value of the stock at the death of A's shareholder?

*Reply*—Paragraphs 48a and 48b of APB Opinion No. 16 specify that a combined corporation may not agree to retire or reacquire any of the common stock issued to effect the combination or enter into financial arrangements for

the benefit of the former stockholders of a combining company if a business combination is to be accounted for by the pooling of interests method. Furthermore, Interpretation No. 21 of the Opinion states, in part, that the critical factor in meeting the conditions of APB Opinion No. 16, paragraphs 48a and 48b, is that the voting common stock issued to effect a business combination remains outstanding outside the combined corporation without arrangements on the part of any of the corporations involving the use of their financial resources to "bailout" former stockholders of a combining company or to induce others to do so.

These references lead to the conclusion that pooling of interests accounting would not be permitted under these circumstances despite the preexistent aspect of the agreement with A's sole stockholder.

---

## Section 7630

### ***Application of Pooling of Interests Method***

#### **.02 Exchange of Stock on a Share for Share Basis With Different Stated Values**

*Inquiry*—Corporation A merged with Corporation B, leaving Corporation A as the survivor. The terms of the merger stated that the shareholders of Corporation B would exchange their stock on a “share for share basis” for the stock of Corporation A. The stock of Corporation B has a stated value and was sold originally at \$.05 per share, but the stock of Corporation A has a stated value of \$.10 per share. When Corporation A issued its stock for Corporation B’s stock on a “share for share basis,” the net effect resulted in Corporation A’s stock being issued at a discount of \$.05 per share.

What is the proper statement presentation for this transaction?

*Reply*—APB Opinion No. 16, *Business Combinations*, paragraph 53, states in part, “The amount of outstanding shares of stock of the combined corporation at par or stated value may exceed the total amount of capital stock of the separate combining companies; the excess should be deducted first from the combined other contributed capital and then from the combined retained earnings.”

Since the merger was effected by an exchange of stock on a “share for share basis,” it is assumed that pooling of interests accounting would be appropriate. Based upon the above quotation, a sufficient amount should be transferred from the combined other contributed capital and then from the combined retained earnings in order to reflect A’s capital at the number of shares outstanding times \$.10 per share.

## Section 8100

# Generally Accepted Auditing Standards

### .01 Determining the Effective Date of a New Statement on Auditing Standards for Audits of a Single Financial Statement

*Inquiry*—The Auditing Standards Board issues a Statement on Auditing Standards (SAS) and the effective date is as follows: “This standard is effective for audits of financial statements for periods beginning on or after December 15, 2006.” If an auditor is engaged to perform an audit of only the balance sheet as of December 31, 2006, would the new standard be effective?

*Reply*—In determining whether the standard is effective to an audit of a single statement, the auditor needs to determine whether the standard would be effective if the auditor was engaged to audit the entity’s complete set of financial statements. If the standard would be effective when auditing a complete set of financial statements, the standard is effective when auditing a single statement. If the standard would not be effective when auditing a complete set of financial statements, the standard is not effective when auditing a single statement. To illustrate, refer to the following examples:

*Example 1*—Entity’s year began January 1, 2006, and ends December 31, 2006; would the standard apply to an audit of only the balance sheet as of December 31, 2006?

No, because the standard is not effective until periods beginning on or after December 15, 2006. Because the standard would not be effective if engaged to audit the complete set of financial statements, the standard is not effective if engaged to audit only the balance sheet.

*Example 2*—Entity’s year begins November 1, 2006, and ends October 31, 2007; would the standard apply to an audit of only the balance sheet as of June 30, 2007 (or as of any date during their year)?

No, for same reason as stated in Example 1.

*Example 3*—Entity’s year begins December 25, 2006, and ends December 21, 2007 (52–53 weeks); would the standard be effective if the auditor is engaged to audit only the balance sheet as of December 31, 2006?

Yes, because the fiscal period began after December 15, 2006, the standard would be effective if engaged to audit a complete set of financial statements for this period. Therefore, the standard is effective for an audit of the balance sheet only.

*Example 4*—Entity’s year begins January 1, 2007, and ends December 31, 2007; would the standard be effective if the auditor is engaged to audit only the balance sheet as of January 31, 2007?

Yes, for the same reason as stated in Example 3.

### .02 Determining the Effective Date of a New Statement on Auditing Standards for Audits of Interim Periods

*Inquiry*—The Auditing Standards Board issues a Statement on Auditing Standards (SAS) and the effective date is as follows: “This standard is effective

for audits of financial statements for periods beginning on or after December 15, 2006.” If an auditor is engaged to perform an “interim audit” of an entity’s financial statements, would the standard apply?

*Reply*—The auditor should refer to the entity’s normal fiscal year to determine whether the standard is effective. To illustrate, refer to the following examples:

*Example 1*—Entity’s year begins January 1, 2007. The standard would be effective for an audit of financial statements for the three-month period ending March 31, 2007, because the interim period began after December 15, 2006.

*Example 2*—Entity’s year begins October 1, 2006. The standard would not be effective for an audit of financial statements for the six-month period ending March 31, 2007, because the interim period began prior to December 15, 2006.

---

[The next page is 8371.]

## Section 8200

### *Internal Control*

#### **.02 Determining Accuracy of Cash Collections for Coin-Operated Machines**

*Inquiry*—How can the accuracy of the cash collections be determined for a chain of laundromats with several thousand machines? The coin-operated machines do not employ the use of meters, counters, locked boxes, or any other devices that would provide a basis for control.

*Reply*—One method to determine if the machines' receipts are being surrendered intact is to occasionally fill selected coin-operated machines with marked coins. The subsequent collections can then be reviewed to make sure the same coins have been turned in. It may also be possible to correlate revenues with consumption of water and electricity by these machines. Furthermore, it may be possible to determine the expected revenues from an installation and the extent to which the machines are being used by observation of the activities of selected installations.

#### **.04 Communication With Audit Committee**

*Inquiry*—An auditor has been engaged to perform an audit on a small, privately-held company. It has only two owners and no audit committee or other oversight group. Does the auditor have the responsibility to communicate certain matters to the owners under SAS No. 61, *Communication With Audit Committees*?

*Reply*—SAS No. 61 requires that an auditor communicate certain matters related to the conduct of an audit to those who have responsibility for oversight of the financial reporting process. Some of the items that need to be communicated relate to the auditor's responsibility under generally accepted auditing standards (GAAS), significant accounting policies, management judgments and accounting estimates, significant audit adjustments, disagreements with management, etc.

The communications required by SAS No. 61 are applicable to (1) entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee) and (2) all Securities and Exchange Commission (SEC) engagements.

Since the company has no oversight group and the engagement is not an SEC engagement, the auditor has no SAS No. 61 responsibility on this engagement.

---

[The next page is 8491.]

## Section 8220

### *Sampling*

#### **.01 Application of SAS No. 39**

*Inquiry*—When should the auditor apply the audit sampling principles in SAS No. 39?

*Reply*—Audit sampling is only one of many tools used by auditors to obtain sufficient, appropriate evidence to support an opinion regarding financial statements. SAS No. 39, as amended, outlines design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used—

- in performing tests of controls that provide an audit trail of documentary evidence,
- in performing substantive procedures to test details of transactions and balances, and
- in dual purpose tests that test a control that provides documentary evidence of performance and whether the recorded monetary amount of transactions or balances is correct.

Sampling applies when the auditor needs to decide whether the rate of deviation from a prescribed procedure is no greater than a tolerable rate, for example in testing a matching process or an approval process. However, risk assessment procedures performed to obtain an understanding of internal control do not involve sampling. Sampling concepts also do not apply for some tests of controls. Tests of automated application controls are generally tested only once or a few times when effective (IT) general controls are present, and thus do not rely on the concepts of risk and tolerable deviation as applied in other sampling procedures. Sampling generally is not applicable to analyses of controls for determining the appropriate segregation of duties or other analyses that do not examine documentary evidence of performance. In addition, sampling may not apply to tests of certain documented controls or to analyses of the effectiveness of security and access controls. Sampling also may not apply to some tests directed toward obtaining audit evidence about the operation of the control environment or the accounting system, for example, inquiry or observation of explanation of variances from budgets when the auditor does not desire to estimate the rate of deviation from the prescribed control, or when examining the actions of those charged with governance for assessing their effectiveness.

Thus, the portion of SAS No. 39, as amended, pertaining to tests of controls (paragraphs 30 through 37) applies when sampling techniques are used to test the operating effectiveness of the controls. The portion of SAS No. 39, as amended, pertaining to substantive tests (paragraphs 14 through 29) applies when sampling techniques are used to test details of transactions or balances.

SAS No. 39, as amended, defines audit sampling as “the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.” A key to understanding that definition is the *intent* of the

auditor in applying the audit procedure. As noted in footnote 1 of SAS No. 39, as amended, the auditor may examine less than 100 percent of the items comprising an account balance or class of transactions for reasons *other than* evaluating a characteristic of the balance or class. For example, the auditor is not performing audit sampling in the following situations:

- An auditor traces several sales transactions through a client's accounting system to gain an understanding of the manner in which transactions are processed. SAS No. 39, as amended, would not apply because the auditor's intent was to gain an understanding of the processing of these transactions by the accounting system, not to evaluate a characteristic of all sales transactions processed by the accounting system.
- The auditor might examine several large sales invoices that comprise a significant portion of the account balance and leave the remaining portion of the balance untested or test the remaining items by other means, such as the application of analytical procedures. Again, SAS No. 39, as amended, does not apply because the auditor does not intend to evaluate all items in the account balance based on the examination of the large items.

Another consideration in determining whether SAS No. 39, as amended, is applicable to circumstances in which an auditor examines less than 100 percent of the items comprising an account balance or class of transactions is the purpose of the test being applied. If he intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, the auditor should follow the guidance in SAS No. 39, as amended. For example, if the auditor intends to examine selected sales invoices to draw a conclusion as to whether sales are overstated, he should apply audit sampling as described in SAS No. 39, as amended—he intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to the remaining invoices, he is not sampling according to SAS No. 39—his examination of the large items is not intended to lead him to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the combined results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed related to overstatement of sales.

In determining whether SAS No. 39 applies to a given audit procedure, the auditor should also consider the population in which he is interested. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables and employee receivables. Each of these populations can be tested using a different audit strategy. The sampling concepts in SAS No. 39 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

(Revised May 2007)

### **.03 Adequate Size for Nonstatistical Samples**

*Inquiry*—Is there a rule-of-thumb for determining an adequate size for nonstatistical samples for substantive audit tests?

*Reply*—There is no rule-of-thumb that is appropriate for all applications. SAS No. 39 imposes no requirement to use quantitative aids, such as sample size tables, to determine sample size. Nor does SAS No. 39 impose a rule regarding

minimum sample size. Just as before the issuance of SAS No. 39, judgment is the key. Auditors often use benchmarks or starting points such as sample sizes used in prior years or in similar circumstances in other audit engagements in determining what sample size is appropriate for a given sampling application. Paragraph 22 of SAS No. 39 lists factors that influence the auditor's judgment in determining sample size. Those factors include—

- Tolerable misstatement.
- The audit risk.
- The characteristics of the population (e.g., the variability of the amounts of items in the population and the expected misstatement in the population).
- The assessed risk of material misstatement (inherent and control risk).
- The assessed risk for other substantive procedures related to the same assertion.

An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgments to relate these factors in determining the appropriate sample size.

If the auditor considered factors such as these in determining sample size in prior years or in other engagements, there may be no reason to believe that sample sizes based on these benchmarks or starting points are inadequate. Individual firms or auditors often prefer to set their own rules regarding a benchmark or starting point for determining sample size. SAS No. 39 does not prohibit such policies. It merely alerts the auditor to factors he should consider in judging the adequacy of sample size.

(Revised May 2007)

#### **.04 Documentation Requirements of SAS No. 39**

*Inquiry*—Does SAS No. 39 impose any new documentation requirements?

*Reply*—No, SAS No. 39 contains no new specific documentation requirements. The documentation standards set forth in the statements on auditing standards dealing with documentation apply to audit sampling applications just as they apply to other auditing applications. For example, SAS No. 108, *Planning and Supervision*, states that the auditor must develop a written audit program and SAS No. 103, *Audit Documentation*, requires the auditor to prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached concerning significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Thus, with regard to audit sampling applications, the auditor's audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. The auditor's record of the work performed might include—

- The definition of the population and the sampling unit, including how the auditor considered completeness of the population.
- The definition of misstatement.
- The method of sample selection.

- A list of misstatements identified in the sample.
- An evaluation of the result of the sampling application.
- Conclusions reached by the auditor.

(Revised May 2007)

### **.05 Methods to Select Representative Sample**

*Inquiry*—What are some selection methods that can be used to select a representative sample?

*Reply*—There is no requirement in SAS No. 39, as amended, that random sampling selection methods be used. Representative sampling methods used by auditors include—

- Haphazard sampling.
- Systematic sampling.
- Random-number sampling.

(Revised May 2007)

Haphazard sampling consists of selecting sampling units without any conscious bias, that is, without any special reason for including or omitting items from the sample. Haphazard sampling does not imply that units can be selected in a careless manner. Rather, a haphazard sample is selected in a manner that can be expected to be representative of the population. For example, where the physical representation of the population is a file cabinet drawer of vouchers, a haphazard sample of all vouchers processed for the year 19XX might include any of the vouchers that the auditor pulls from the drawer, regardless of each voucher's size, shape, location, or other physical features. The auditor using haphazard selection should be careful to avoid distorting the sample by selecting, for example, only unusual or physically small items or by omitting items such as the first or last items in the physical representation of the population.

Systematic sampling consists of determining a uniform interval, and one item is selected throughout the population at each of the uniform intervals from the starting point.

Random-number sampling entails matching random numbers generated by a computer or selected from a random-number table with, for example, document numbers.

Another method sometimes used in practice is block sampling. Block sampling consists of selecting groups of sequential transactions (for example, all vouchers processed on several selected dates). Using block samples may be inefficient because in order for a block sample to be adequate to lead to an audit conclusion, a relatively larger number of blocks should be selected. If an auditor decides to use block sampling, he should exercise special care to control sampling risk in designing his sample.

---

## Section 8310

### ***Audit Evidence: Securities***

#### **.02 Confirmation of Securities Held in Street Name**

*Inquiry*—A CPA firm has been engaged to perform the initial audit of a pension plan and trust. Most of the trust assets are investments held in street name by a brokerage house. Some negotiable bearer bonds, held in a bank, are in denominations not traceable to the trust account since the bond may represent investments by more than one customer. In addition to its monthly account statements the broker will certify details and ownership of investments at the statement date and will permit examination of certain of its internal records. The bank will also certify details and ownership of investments held for the trust.

Would the fact that the securities are held in “street name” and in some cases in denominations which cannot be traced to the trust’s account preclude obtaining sufficient appropriate audit evidence on which to base an opinion on the financial statements of the pension plan and trust?

*Reply*—Statement on Auditing Standards No. 106, Audit Evidence, discusses audit evidence. Physical inspection and count of the securities in this case appear to be impracticable; therefore, audit evidence concerning the securities would presumably consist primarily of confirmations received from the brokerage houses and other financial institutions which have possession of the securities. Whether or not confirmations would represent sufficient appropriate audit evidence is really a matter for the auditor’s professional judgment. [Amended]

(Revised May 2007)

---

[The next page is 8571.]

## Section 8320

### ***Audit Evidence: Inventories***

#### **.01 Reliance on Observation of Inventories at an Interim Date**

*Inquiry*—Although its fiscal year ends on March 31, a client has always counted its physical inventory on December 31. The March 31 ending inventory has always been calculated by the gross profit method which has proven over the past to be quite accurate. No perpetual inventory records are kept.

Can the auditor rely on an observation of inventory that takes place three months prior to the balance sheet date?

*Reply*—SAS No. 1, section 331, *Receivables and Inventories*, paragraphs 9–12, discusses evidence regarding inventories. SAS No. 1, section 331, paragraph 10, states, “When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor’s observation procedures usually can be performed either during or after the end of the period under audit.” SAS No. 1, section 331, paragraph 12, states in part, “. . . it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate test of intervening transactions.”

Normally, observing an inventory-taking on December 31 when a client has a March 31 year-end and perpetual records are used as the basis of the March 31 inventories, would present no unusual problems since the tests of intervening transactions referred to in SAS No. 1, section 331, paragraph 12, usually can be readily applied. However, if the client keeps no perpetual records of inventory, the tests of the intervening transactions would, in effect, cause the auditor to create the perpetual records as a basis for the March 31 inventory.

#### **.02 Observation of Physical Inventory on a First Audit**

*Inquiry*—A company maintains large inventories of tractor parts in five different locations. The quantities of each part may be quite small, averaging six or seven pieces; but there are approximately 5000 different parts on hand, some as much as twenty years old. The company has been taking complete physical inventories at the end of each year. In the past, the parts inventories have been valued at the current catalogue prices.

A CPA has been engaged to perform the company’s first audit. What procedures may be followed in establishing the value of the parts inventory?

*Reply*—It would appear necessary under sections SAS No. 1, section 331, *Receivables and Inventories*, paragraphs 1 (AU 331.01) and 9 (AU 331.09), and SAS No. 58, *Reports on Audited Financial Statements*, paragraphs 40 through 44 (AU 508.40 through .44), that the auditor observe the client’s count of the parts inventory. Presumably tests should be made in each of the five locations.

Inventory pricing should be based on historical cost, rather than current selling price. While it may not be practicable to determine cost individually for the large number of parts on hand, it might be appropriate to determine the ratio of cost to catalogue price to obtain an approximation of the cost of current

inventory. Also, some allowance, based on experience, should be made for obsolescence. Presumably a part will have little current value if there is a probability it will not be sold within five years. Costs of warehousing items for such a period may often approach the discounted value of the sales price.

Based upon observations and upon discussions with the client's employees, the auditor may be able to obtain some impressions as to the reliability of the earlier inventories. This would be supported by a comparison of this year's inventory with the prior year's, and by knowledge of sales and production in the current year. [Amended]

### **.03 Cost of Inventories Acquired From Principal Stockholder**

*Inquiry*—A corporation purchased merchandise from a stockholder who owns 99 percent of the corporation's stock and executed a chattel mortgage in favor of the stockholder. The merchandise was acquired by the stockholder prior to the formation of the corporation.

How can the CPA be sure the purchase price of this merchandise is reasonable?

*Reply*—The "seller's" cost can be ascertained through the examination of his cost records, invoices, etc., and comparing his total cost with the selling price to the corporation. Also, the taking of inventory can be observed and verified against physical quantities and classifications of inventory, against transfer documents and against the transferor's cost records and invoices. If the latter records are not available, the auditor can price the inventory at the current replacement cost which can be obtained by reference to recent invoices, communication with suppliers, or references to recent merchandise catalogs.

A basic consideration in this case is the fact that, upon incorporation, there is a continuance of beneficial interest in the inventory transferred and in the proceeds from its eventual disposition by virtue of the chattel mortgage and the 99 percent stock ownership. Accordingly, the transferor's cost should be carried over and continued on the books of the newly organized corporation.

### **.04 Reliance on Estimates of Coal Inventories by Experts**

*Inquiry*—An electric utility maintains a large stockpile of coal. The auditors rely on the calculations of an engineering firm in their test of this inventory. The amount of coal by weight is estimated by multiplying the volume of the coal pile, calculated in cubic feet, by the estimated average density of the coal, measured in pounds per cubic foot. The calculated amount is then compared with the utility's perpetual inventory records, and, if the variance is not considered material, the perpetual inventory is accepted as the accurate amount.

Because of the uncertainties involved in this method, particularly in the estimation of the average density of the coal, the engineers are reluctant to render an opinion on the amount of coal on hand. Other methods of calculating the amount of coal such as the "two coal-pile" theory are uneconomical.

In all cases, this inventory is a material item in the accounts of the utility. What alternative auditing procedures might be used in these circumstances?

*Reply*—While a slight change in density of the coal might result in a change in computed quantity of coal on hand, the effect would most likely not be material in relation to the balance sheet or statement of operations of the utility

company. Perhaps, using the criteria of statistical sampling, the engineers would be willing to state that there is a X% probability that the quantity of coal is a certain amount plus or minus X% (or some other measure of variability).

### **.05 Dates of Observation of Inventories Which Are Kept on Perpetual Records**

*Inquiry*—A retail dealer in tires and tubes has twenty-two stores. Each month the dealer takes inventory at two stores. The dealer's auditor has observed the inventory taking at ten locations. To avoid the need for extra help at year end, January 31, the auditor proposes to visit the remaining locations shortly after December 31 and:

- Count the tires on hand at that time.
- Reconcile the count back to the daily report at December 31.

Do the above described procedures constitute an adequate observation of inventories?

*Reply*—Section 331.09–.14 of Statement on Auditing Standards No. 1 discusses audit evidence for inventories. Section 331.10 states:

When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor's observation procedures usually can be performed either during or after the end of the period under audit.

Presumably the dealer has the necessary perpetual records which allow the taking of inventory at two stores each month during the year. Therefore, the proposed procedures would be acceptable and meet the requirement for inventory observation.

### **.06 Observation of Consignment Inventories Stored in Public Warehouse**

*Inquiry*—A sells supplies and equipment for manufacturing jewelry. Silver on consignment from a supplier is kept in a vault adjacent to where Corporation A keeps its silver inventory. The supplier employs an independent warehouse firm to protect the consigned silver. The bonded employee of the warehouse firm has sole access to the consignment silver and performs the duties of warehouse manager for Corporation A. The warehouse firm pays the salary of the bonded employee but is reimbursed by Corporation A. Since the possibility for substitutions between Corporation A's silver inventories and the consignment silver exists, the auditors of Corporation A, in conducting a physical observation of Corporation A's silver inventories, also want to conduct a physical observation of the consignment silver. Is it necessary for the auditors of Corporation A to observe the consignment silver?

*Reply*—SAS No. 1, section 331.14, and SAS No. 1 section 901.24–.28 (as amended by SAS No. 43) deal with controls and auditing procedures for owner's goods stored in public warehouses. Section 901.28 makes reference to section 331.14 which provides that obtaining direct confirmation from the custodian is acceptable, except that supplemental procedures are to be applied in cases where such inventories represent a significant proportion of the client's current assets or total assets. Among the steps recommended for the auditor to follow, to the extent considered necessary, is the observation of physical counts of the goods wherever practicable and reasonable.

Because of the relationship which Corporation A has with the warehouse and the bonded employee, and the possibility for substitutions of inventory between Corporation A and the supplier, the auditors should observe the consignment inventory and Corporation A's inventory at the same time.  
[Amended]

---

[The next page is 8671.]

## Section 8330

### ***Audit Evidence: Fixed Assets***

#### **.01 Verification of Real Estate Ownership**

*Inquiry*—What procedures may be followed in the verification of real property accounts? Is it sufficient to examine the documents involved in the purchase of the property, to examine the real estate tax bills, and to communicate with the holders of any mortgages or trusts secured by the property? Should the client be required to assume the expense of a title search by an attorney?

*Reply*—It is generally conceded that examination of public records which contain the history of transactions relating to realty, as well as the current status of that property, is normally the function of an attorney or title company rather than that of an auditor. Accordingly if it is feasible for the client to obtain a letter from an attorney or title company which defines the interest the company holds in the land based upon a title search, this appears to be the best evidence available as to title and encumbrances.

If this procedure is too costly, then the following other audit procedures may supply sufficient indicia of title as to enable the auditor to assume that the client does, in fact, own the land subject to named liens.

1. Compare legal description of land found in deed with that found in the title insurance policy, abstract of deed, tax receipts, etc.
2. Verify current payment of carrying expenses of land in question, such as insurance premiums, tax payments, payments to mortgagee, etc.
3. Examine any rent receipts which may show evidence of continuing ownership.
4. Visit the land in question, if this is practicable.
5. Request an attorney's letter describing any conveyances or encumbrances of real property that may have been effected during the period covered in the audit, as well as his opinion regarding present status of title.
6. Obtain statement from client as to condition of title and encumbrance.
7. Check municipal or county records for evidence of ownership.

Use of a property map in connection with undertaking these procedures would also be helpful.

#### **.02 Examination of Assets of a Rental Company**

*Inquiry*—A lessor is in the business of leasing autos, large trucks, tractors, and trailers. Is it necessary for the auditors to make physical observations of

the rolling stock which is scattered across the country? What other audit procedures might be employed in the verification of this equipment? Must the titles to all equipment be examined?

*Reply*—It is not necessary, unless some extraordinary situation or circumstances were brought to light, to examine titles to all the equipment. Random test verifications of title certificates or proper registration of vehicles should be made. The fact that the client is receiving rent for the vehicles and is currently making payments on its time-purchase contracts would also be verified in regular course. Any tax and insurance payments which the client is required to make in connection with the vehicles can be checked. Also, test confirmations of possession of vehicles with the lessee should be made. Audit responsibility would not necessarily extend to physical observation of the equipment at its numerous shifting locations.

---

[The next page is 8731.]

## Section 8340

# Audit Evidence: Confirmation Procedures

### .03 Confirmation of Balances Due on Loans

**Inquiry**—A bank arranges mortgage loans whereby the borrower instructs the bank to make payments to the contractor or developer. Payment booklets, which specify the periodic amounts due, are sent twice yearly to the borrower. In addition, each borrower receives an annual statement which shows his total yearly payments as well as the various yearly charges. Many of the debtors are unable to verify the correctness of the accrued charges and are unable to check the outstanding balances of their loans because of the complex interest rates. How can these loan balances be confirmed when the debtor cannot determine the total amount of the debt?

**Reply**—While the debtor may not be able to calculate the balance of the loan due, there are details of the loan which he should know and which can be confirmed. A request that the debtor confirm the original amount of the loan and the payments he has made would properly serve the purpose of a confirmation. Confirmation of the interest rate might also be requested as this affects the balance of the loan and should be known by the debtor.

### .09 Insurance Claims

**Inquiry**—Should a CPA communicate with an insurance company, or the insurance company's attorneys, when trying to obtain evidence about insured claims outstanding against a client?

**Reply**—The CPA should obtain evidence about claims outstanding (1) from the client and (2) by communicating with the client's lawyer in accordance with SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AU 337). The CPA may encounter situations where neither the client nor the client's lawyer is able to provide sufficient information regarding outstanding claims handled by insurance companies. In those situations, he or she may consider communicating directly with the insurance company or its attorneys appropriate. [Amended]

### .10 Letter of Inquiry to Client's Attorney

**Inquiry**—When a CPA requested a client to send a letter of inquiry to the client's attorney, the client objected because the attorney would charge for answering the letter of inquiry. The client also believed that an inquiry about legal matters was not necessary because it had not used the services of its attorney in the current year for any matters concerning litigation, claims or assessments. Rather, the client paid fees to its attorney in connection with other matters such as corporate registrations. Do generally accepted auditing standards require that a letter of inquiry be sent to the attorney?

**Reply**—No. SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims and Assessments* (AU 337), requires that a letter of inquiry be sent to those attorneys with whom management consulted concerning litigation, claims, and assessments. The auditor should obtain evidence about management's assertions by reviewing invoices received from the attorney and related

cash disbursements and correspondence files. If information contrary to management's assertion is discovered, the auditor should request management to send an inquiry letter to the attorney. Further, the auditor should consider the effects of the erroneous assertion on the ability to rely on other management representations.

In situations where no letter of inquiry is sent to the client's attorney, the auditor should consider including in the client representation letter a specific representation that no attorney had been consulted regarding litigation, claims, and assessments. [Amended]

### **.11 Receivables in Cash Basis Financial Statements**

*Inquiry*—If accounts receivable and escrow balances are included in modified cash basis financial statements, should the accounts receivable and escrow balances be confirmed?

*Reply*—The generally accepted auditing standards, including confirmation, that apply to financial statements prepared in conformity with generally accepted accounting principles apply to modified cash basis financial statements.

### **.16 Retention of Returned Confirmations When a Schedule of Confirmation Results is Prepared**

*Inquiry*—SAS No. 67, *The Confirmation Process* (AU 330), provides guidance about the confirmation process in audits performed in accordance with generally accepted auditing standards (GAAS). Similarly, SAS No. 96, *Audit Documentation* (AU 339), provides guidance as to the form and content of audit documentation. When written confirmations are received, should they be retained as part of audit documentation or is a schedule of confirmation results sufficient?

*Reply*—SAS No. 96, paragraph .07 (AU 339.07), sets forth factors that the auditor should consider in determining the nature and extent of the documentation. While the auditor should apply professional judgment when considering these factors, confirmations are typically used for accounts with higher risks of material misstatement (see AU 330.05–.10), they often serve as significant evidence to the assertions being tested (AU 330.11–.14), and seasoned judgment is often needed in evaluating confirmations that identify the nature and extent of exceptions.

For these reasons, among others, the auditor should ordinarily retain returned confirmations even though a schedule of confirmation results is prepared.

---

[The next page is 8751.]

**Section 8345*****Audit Evidence: Destruction of Documents*****.01 Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster**

*Inquiry*—Prior to issuance of an auditor's report on financial statements, and either prior to or after the completion of fieldwork, the audit documentation is destroyed by a fire, flood, or natural disaster. To what extent must the auditor recreate the audit documentation in order to express an opinion on the financial statements?

*Reply*—The third standard of field work of generally accepted auditing standards state: "The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit."

If substantially all of an entity's evidence and corroborating evidence in support of their financial statements has been destroyed and the auditor has been unable to complete audit procedures with respect to financial statement amounts and assertions,<sup>1</sup> the auditor should disclaim an opinion on the financial statements as the auditor is unable to form an opinion as to the fairness of presentation of the financial statements in conformity with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles. If the auditor disclaims an opinion, the auditor's report should give all of the substantive reasons for the disclaimer. The auditor should not identify any procedures that were performed nor include the paragraph describing the characteristics of an audit (that is, the scope paragraph of the auditor's standard report); to do so may tend to overshadow the disclaimer.

An example of a report disclaiming an opinion resulting from the destruction due to fire, flood or a natural disaster, of substantially all client evidence or corroborating evidence in support of financial statements is as follows:

Independent Auditor's Report

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.<sup>2</sup>

Substantially all of the Company's books of original entry; the general and subsidiary ledgers; related accounting manuals; records such as work sheets and spreadsheets supporting cost allocations, computations, and reconciliations; as well as substantially all corroborating evidence in support of the financial

---

<sup>1</sup> The auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure.

<sup>2</sup> The wording in the first paragraph of the auditor's standard report is changed in a disclaimer of opinion because of a scope limitation. The first sentence now states that "we were engaged to audit" rather than "we have audited" since, because of the scope limitation, the auditor was not able to perform an audit in accordance with generally accepted auditing standards. In addition, the last sentence of the first paragraph is also deleted, because of the scope limitation, to eliminate the reference to the auditor's responsibility to express an opinion.

statements were destroyed [in a fire, by a flood, by Hurricane Katrina, etc.] which also destroyed the Company's headquarters. The records that remain are not sufficient to permit the application of auditing procedures that would be adequate for us to express an opinion on the accompanying financial statements.

Since the Company was not able to provide evidence or corroborating evidence in support of the accompanying financial statements and we were not able to apply other auditing procedures to satisfy ourselves as to whether the financial statements are presented in accordance with generally accepted accounting principles, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the financial statements.

In the case where the evidence and corroborating evidence is available for some, but not all, of the financial statement accounts and assertions, the auditor would explain which evidence has been destroyed [i.e. evidence supporting the cost of inventory, the valuation of amounts in accounts receivable, etc].

If so engaged by an entity, the auditor may express an opinion on one or more specified elements, accounts, or items of a financial statement [i.e. a schedule of accounts receivable or fixed assets]. If the auditor is so engaged, the guidance in AU 623.11–.14 should be followed. The auditor should not express an opinion on specified elements, accounts, or items included in a financial statement on which he or she has disclaimed an opinion, if such reporting would be tantamount to expressing a piecemeal opinion on the financial statements. However, an auditor would be able to express an opinion on one or more specified elements, accounts, or items of a financial statement provided that matters to be reported on and the related scope of the audit were not intended to and did not encompass so many elements, accounts, or items as to constitute a major portion of the financial statements. For example, it may be appropriate for an auditor to express an opinion on an entity's schedule of accounts receivable or fixed assets even if the auditor has disclaimed an opinion on the financial statements taken as a whole. However, the report on the specified element, account, or item should be presented separately from the financial statements of the entity.

## **.02 Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster**

*Inquiry*—Prior to issuance of an auditor's report on financial statements, and either prior to or after the completion of fieldwork, the audit documentation is destroyed by a fire, flood, or natural disaster. To what extent must the auditor recreate the audit documentation in order to express an opinion on the financial statements?

*Reply*—Audit documentation is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. In addition, certain Statements on Auditing Standards contain specific documentation requirements. AU 339.03 states that audit documentation serves mainly to (a) provide the principal support for the auditor's report, including the representation regarding observance of the standards of field work, which is implicit in the reference in the report to generally accepted auditing standards<sup>3</sup> and (b) aid the auditor in the conduct and supervision of the audit.

---

<sup>3</sup> However, there is no intention to imply that the auditor would be precluded from supporting his or her report by other means in addition to audit documentation.

Oral explanations cannot serve as the principal support for the work performed or the conclusions reached.

Since audit documentation is an essential element of an audit performed in accordance with generally accepted auditing standards, the auditor cannot state that he or she has performed an audit in accordance with generally accepted auditing standards without the required audit documentation. In cases where the audit documentation has been destroyed by fire, flood, or a natural disaster prior to the issuance of the auditor's report, the auditor must either recreate the audit documentation in support of the audit procedures performed or re-perform the audit procedures and create new audit documentation.

In making the determination as to whether to recreate the destroyed audit documentation or to re-perform the audit procedures, the auditor should keep in mind the ultimate objective of the auditing procedures. That is, to obtain sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements. For example, the auditor may be able to recreate the documentation that supports certain assertions about accounts receivable by using information contained in the audit documentation with respect to sales revenue (assuming that the sales documentation was not destroyed). In addition, the auditor may be able to recreate the audit program and prepare memorandums sufficient to explain the procedures performed and the results obtained. When considering the sufficiency of such documentation, the auditor should consider the guidance in AU 339.06 which states that audit documentation should be sufficient to (a) enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent, and results of audit procedures performed, and the evidence obtained; (b) indicate the engagement team member(s) who performed and reviewed the work; and (c) show that the accounting records agree or reconcile with the financial statements or other information being reported on. Except for perhaps the smallest of audits, it will prove difficult for the auditor to amass sufficient audit documentation by referring to documentation for a related account or by recreating the audit documentation. Consequently, the auditor will usually have to re-perform the audit procedures and create new audit documentation.

---

[The next page is 8771.]

## Section 8350

### ***Audit Evidence: Audit Documentation***

#### **.01 Current Year Audit Documentation Contained in the Permanent File**

*Inquiry*—Paragraph 5 of SAS No. 103, *Audit Documentation* (AU 339.05), states that audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached. SAS No. 103 (AU 339) is applicable to all audit documentation supporting the current year's auditor's report. Do the provisions of SAS No. 103 (AU 339) with respect to documentation completion and retention apply to current year audit documentation maintained in the permanent file?

*Reply*—Yes. SAS No. 103 (AU 339) applies to current year audit documentation maintained in any type of file if such documentation serves as support for the current year's audit report.

---

[The next page is 8991.]

## Section 8900

### ***Predecessor/Successor Auditors***

#### **.01 Communications Between Predecessor Accountant and Successor Auditor**

*Inquiry*—An accountant is engaged to audit the current year's financial statements of a company. In the prior year, the company's financial statements were reviewed by another accountant. Is the successor auditor required to communicate with the predecessor accountant?

*Reply*—No. SAS No. 84, *Communications Between Predecessor and Successor Auditors* (AU 315), footnote 3, states "When the most recent financial statements have been compiled or reviewed in accordance with the AICPA Statements on Standards for Accounting and Review Services, the accountant who reported on those financial statements is not a predecessor auditor. Although not required by this Statement, in these circumstances the successor auditor may find the matters described in paragraphs 8 and 9 useful in determining whether to accept the engagement."

#### **.02 Communications Between Predecessor and Successor Auditors**

*Inquiry*—A client has decided to restate, for comparative purposes, the statement of changes in financial position reported on by the predecessor auditor to a statement of cash flows. The predecessor's audit report will not be presented.

- (1) Must the successor auditor notify the predecessor auditor as part of his or her procedures to prepare or evaluate restatements permitted or mandated by new accounting standards?
- (2) How will the restatement affect the successor auditor's report?

*Reply*—SAS No. 84, *Communications Between Predecessor and Successor Auditors*, paragraph 21 (AU 315.21), states:

If during an audit, the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should request that the client inform the predecessor auditor of the situation and to arrange for the three parties to discuss this information and attempt to resolve the matter.

In cases where revisions result from an accounting change required or permitted by a new FASB or AICPA Pronouncement, the successor auditor is not required to consult with the predecessor auditor. However, the successor may find that communication with the predecessor auditor is desirable in order to obtain any additional information and/or workpapers that may be needed to prepare or evaluate the restatement. To maintain audit efficiency, such communications may be made as part of the successor auditor's routine request for review of selected workpapers.

SAS No. 58, *Reports on Audited Financial Statements*, paragraph 83, as amended by SAS No. 64, *Omnibus Statement on Auditing Standards—1990* (AU 508.83), provides guidance for the form and content of the successor auditor's report when the prior period statements have been restated. Additional language may also be included if the successor auditor wishes to comment on the appropriateness of the restatement. Additional illustrations may be found in the AICPA Financial Report Survey, "Illustrations of Departures From the New Standard Auditor's Report on Financial Statements of Business Enterprises" (June 1990), pages 49–50.

### **.03 Communications With a Predecessor Auditor Who Has Ceased Operations<sup>1</sup>**

*Inquiry*—SAS No. 84, *Communications Between Predecessor and Successor Auditors*, paragraph 3, requires a successor auditor to attempt certain communications with the predecessor auditor prior to acceptance of an engagement. How should a successor fulfill this responsibility when the predecessor has ceased operations?

*Reply*—Even when the predecessor has ceased operations, SAS No. 84 obligates a successor to attempt certain communications with the predecessor prior to acceptance of an engagement. The successor should attempt the required communications, about matters that the successor believes will assist him or her in determining whether to accept the engagement, with the individual who had final responsibility for the audit (for example, the engagement partner). If the successor is unable to communicate with that individual or receives a limited response, the successor should consider the implications in deciding whether to accept the engagement.

### **.04 Unavailability of the Working Papers of a Predecessor Auditor Who Has Ceased Operations**

*Inquiry*—A successor auditor must obtain sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements under audit. The successor's audit may be facilitated by reviewing the predecessor auditor's working papers. What is the effect on the successor's audit when the working papers of a predecessor who has ceased operations are not available for review?

*Reply*—Sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements includes sufficient evidence about matters of continuing audit and accounting significance, such as beginning balances, consistency in the application of accounting principles and contingencies. When the working papers of a predecessor who has ceased operations are not available, the evidence normally obtained by reviewing the working papers must be obtained by performing other audit procedures. If the successor is unable to obtain sufficient appropriate audit evidence to express an opinion on the financial statements, the successor should qualify or disclaim an opinion because of the inability to perform procedures that the successor considers necessary in the circumstances, not because of the unavailability of the predecessor's working papers.

---

<sup>1</sup> SSARS 4, *Communication Between Predecessor and Successor Accountants*, provides guidance to a successor accountant who decides to communicate with a predecessor accountant regarding acceptance of an engagement to compile or review the financial statements of a nonpublic company. In situations in which the predecessor has ceased operations and the successor decides to engage in such communications, the guidance in this paragraph may be useful.

**.05 Significant Audit Procedures Performed by a Predecessor Auditor Who Has Ceased Operations**

*Inquiry*—If a predecessor auditor has performed significant audit procedures, such as the observation of inventory or the confirmation of accounts receivable, and subsequently has ceased operations, to what extent may this work be used by the successor auditor?

*Reply*—Because a report on the financial statements has not been issued by the predecessor and the successor cannot complete the procedures required by SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors*, the successor can neither assume responsibility for the work of the predecessor nor issue a report that reflects divided responsibility for the audit, as described in SAS No. 1, section 543. The successor must perform audit procedures sufficient to afford a reasonable basis for an opinion on the financial statements under audit. However, review of the predecessor's working papers may have an effect on the nature, timing and extent of those procedures.

**.06 Successor Auditor Becomes Aware of Information That Leads Him or Her to Believe That Financial Statements Reported On by a Predecessor Auditor Who Has Ceased Operations May Be Materially Misstated**

*Inquiry*—What actions should a successor auditor take when he or she becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor auditor who has ceased operations may be materially misstated?

*Reply*—When the successor becomes aware of information that leads him or her to believe that the financial statements reported on by a predecessor who has ceased operations may be materially misstated, the successor should advise management of the information and request that management determine whether the financial statements require restatement. In making such a determination, management may find it useful to discuss the information with the individual who had final responsibility for the audit of those financial statements (for example, the engagement partner). If management determines that the financial statements require restatement, the successor should request that management disclose the information to the party responsible for winding up the affairs of the predecessor firm. The successor also should request that management consider whether action should be taken to prevent future reliance on the financial statements.

If, in the successor's judgment, management does not respond appropriately to his or her requests, the successor should advise the audit committee, or others with equivalent authority and responsibility, regarding the information and management's response. If, in the successor's judgment, the audit committee does not respond appropriately to his or her communication, the successor should consider resigning as the entity's auditor. The successor would be well advised to consult with his or her attorney in determining an appropriate course of action.

**.07 Reports on Audited Financial Statements Presented With Prior-Period Financial Statements Audited by a Predecessor Auditor Who Has Ceased Operations**

*Inquiry*—If the prior-period financial statements audited by a predecessor auditor who has ceased operations are presented for comparative purposes with current-period audited financial statements, how is the successor auditor's report affected?

*Reply*—The answer depends on (1) whether the prior-period financial statements have been restated and (2) whether the entity files annual financial statements with the Securities and Exchange Commission (SEC).

- a. If the prior-period audited financial statements are *unchanged*, the successor should indicate in the introductory paragraph of his or her report (1) that the financial statements of the prior period were audited by another auditor, (2) the date of the predecessor's report, (3) the type of report issued by the predecessor, and (4) if the report was other than a standard report, the substantive reasons therefor. SAS No. 58, *Reports on Audited Financial Statements*, paragraph 74, indicates that the successor should not name the predecessor in the report. An example of the reference that would be added to the introductory paragraph of the successor's report is presented below.

The financial statements of ABC Company as of December 31, 19X1, were audited by other auditors whose report dated March 31, 19X2, expressed an unqualified opinion on those statements.

A reference to the predecessor's report should be included even when the predecessor's report on the prior-period financial statements is reprinted and accompanies the successor's report, because reprinting does not constitute reissuance of the predecessor's report in accordance with SAS No. 58, paragraph 71.

- b. If the prior-period financial statements *have been restated*, the successor should follow the guidance in the preceding point *a*, indicating that the predecessor reported on the financial statements of the prior period before restatement. In addition, the successor should consider the guidance in paragraph .06.

If the successor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor may report on the adjustments in accordance with the guidance in SAS No. 58, paragraph 74 (AU 508.74). In determining the nature, timing and extent of procedures, the successor should consider that a predecessor who has ceased operations cannot perform the procedures to evaluate the appropriateness of the restatement adjustments as described in SAS No. 1, section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

If the successor does not perform sufficient procedures to satisfy himself or herself as to the restatement adjustments, the note to the financial statements describing the restatement adjustments should be marked *unaudited*.

- c. If the entity files annual financial statements with the SEC, the SEC staff has indicated that, in annual reports (on Form 10-K and to shareholders), the predecessor's report on the prior-period financial statements should be reprinted with a legend, in lieu of the manual signature, indicating (1) that the report is a copy of the report issued by the predecessor and (2) that the predecessor has discontinued performing auditing and accounting services, and, if applicable, that it has filed for protection from creditors under the Bankruptcy Code. A sample legend, for cases in which the predecessor has filed for bankruptcy, is presented below.

The report that appears below is a copy of the report issued by the company's previous independent auditor [*name of firm*]. That firm has filed for protection from creditors under Chapter 11 of the Bankruptcy Code on [*date*], and has discontinued performing auditing and accounting services.

The successor should refer to the predecessor's report in his or her report, as described in the preceding point *a*. If the prior-period financial statements have been restated, the SEC staff has indicated that it is ordinarily sufficient for the successor to audit only the restatement adjustments and report on them in accordance with the guidance in the preceding point *b*; in unusual circumstances, the restated prior-period financial statements may have to be audited.

**.08 Reports on Audited Financial Statements of a Nonpublic Entity Presented With Prior-Period Financial Statements Compiled or Reviewed by a Predecessor Accountant Who Has Ceased Operations**

*Inquiry*—If the prior-period financial statements that have been compiled or reviewed by a predecessor accountant who has ceased operations are presented for comparative purposes with current-period audited financial statements, how is the successor auditor's report affected?

*Reply*—The answer depends on whether the prior-period financial statements have been restated.

- a.* If the prior-period financial statements *are unchanged*, the successor's report should make reference in a separate paragraph to the predecessor's report on the prior-period financial statements. This paragraph should include (1) a statement of the service performed in the prior period, (2) a statement that the predecessor has ceased operations, (3) the date of the report on the service performed, (4) a description of any modifications of that report, and (5) a statement that the service was less in scope than an audit and does not provide the basis for the expression of an opinion on the financial statements taken as a whole. Reference to the predecessor's report should not include the name of the predecessor. Examples of additional paragraphs for compiled and reviewed prior-period financial statements are presented below.

*Compiled Prior Period Financial Statements*

The 19X1 financial statements were compiled by other accountants who have ceased operations, and their report thereon, dated February 1, 19X2, stated they did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

*Reviewed Prior-Period Financial Statements*

The 19X1 financial statements were reviewed by other accountants who have ceased operations, and their report thereon, dated March 1, 19X2, stated they were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

- b. If the prior-period financial statements *have been restated*, the restated prior-period financial statements should be compiled, reviewed, or audited and reported on accordingly. In addition, the successor should consider the guidance in paragraph .06.

**.09 Reports on Compiled or Reviewed Financial Statements Presented With Prior-Period Financial Statements Compiled, Reviewed, or Audited by a Predecessor Accountant Who Has Ceased Operations**

*Inquiry*—If prior-period financial statements that have been compiled, reviewed, or audited by a predecessor accountant who has ceased operations are presented for comparative purposes with current-period compiled or reviewed financial statements, how is the successor accountant's report affected?

*Reply*—The answer depends on whether the prior-period financial statements have been restated.

- a. If the prior-period financial statements were *compiled or reviewed and are unchanged*, the successor should add a paragraph to his or her report on the current-period financial statements that includes (1) a statement that the financial statements of the prior period were compiled or reviewed by another accountant who has ceased operations, (2) the date of the predecessor's report, (3) a description of the standard form of disclaimer or limited assurance, as applicable, included in the report, and (4) a description or a quotation of any modifications of the standard report and of any paragraphs emphasizing a matter regarding the financial statements. Reference to the predecessor's report should not include the name of the predecessor. Examples of additional paragraphs for compiled and reviewed prior-period financial statements are presented below.

*Compiled Prior-Period Financial Statements*

The 19X1 financial statements of XYZ Company were compiled by other accountants who have ceased operations and whose report dated February 1, 19X2, stated that they did not express an opinion or any other form of assurance on those statements.

*Reviewed Prior-Period Financial Statements*

The 19X1 financial statements of XYZ Company were reviewed by other accountants who have ceased operations and whose report dated March 1, 19X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

If the prior-period financial statements were *audited and are unchanged*, the successor should add a paragraph to his or her report on the current-period financial statements that indicates (1) that the financial statements of the prior period were audited by another accountant who has ceased operations, (2) the date of the predecessor's report, (3) the type of opinion issued by the predecessor, (4) if the opinion was other than unqualified, the substantive reasons therefor, and (5) that no auditing procedures were performed after the date of the predecessor's report. Reference to the predecessor's report should not include the name of the predecessor. An example of such a paragraph is presented below.

The financial statements for the year ended December 31, 19X1, were audited by other accountants who have ceased operations, and they expressed an unqualified opinion on them in their report dated March 1, 19X2, but they have not performed any auditing procedures since that date.

- b. If the prior-period financial statements *have been restated*, the restated prior-period financial statements should be compiled, reviewed or audited and reported on accordingly. In addition, the successor should consider the guidance in paragraph .10.

**.10 Successor Accountant's Responsibilities Under SSARSs When He or She Becomes Aware That Prior-Period Financial Statements Reported On by a Predecessor Accountant Who Has Ceased Operations May Require Revision**

*Inquiry*—SSARS No. 4, *Communications Between Predecessor and Successor Accountants*, paragraph 10, provides guidance to a successor accountant who, during an engagement to compile or review current-period financial statements, becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor accountant may require revision. SSARS 4, paragraph 10 states that the successor should request that his or her client communicate this information to the predecessor. How may the successor fulfill this responsibility when the predecessor has ceased operations?

*Reply*—When the successor becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor accountant may require revision, the successor should request that the client advise the party responsible for winding up the affairs of the predecessor firm. If the client refuses to communicate with the predecessor or if the successor is not satisfied with the predecessor's course of action, the successor would be well advised to consult with his or her attorney.

## Section 9030

# Accounting Changes

### .02 Change in Accounting for Pre-Operating Costs

*Inquiry*—A client, whose stock is not presently traded publicly, anticipates making a public offering. The offering probably would occur sometime after the end of the fiscal year.

The client presently defers pre-operating costs of new retail stores. They wish to change the method of accounting for preoperating cost to expensing such costs as they are incurred.

May the client restate the prior year's financial statements under the provisions of APB Opinion No. 20, *Accounting Changes*, paragraph 29 (AC A06.125 and A35.114)?

*Reply*—The special exemption provisions of APB Opinion No. 20, paragraph 29 (AC A06.125 and A35.114), apply only to those cases where there is a “forthcoming public offering” of shares of equity security of a company. The Board concluded in such cases that the “financial statements for all prior periods presented may be restated retroactively . . . .” The exemption is available only once for changes made at the time a company's financial statements are first used for any of the purposes stated in the paragraph.

If the client makes the change in its financial statements for the current year, the provisions of APB Opinion No. 20 (AC A06) which require cumulative effect reporting should be applied. APB Opinion No. 20, paragraph 29 (AC A06.125 and A35.114), would be applicable at the time the client began to prepare its financial statements in connection with the public offering. At that time, the prior years presented in the registration statement would have to be restated. In this connection, normally more than one prior year's income statement is required. The client would not be precluded from making the change in the current year, but accounting for the change would be different.

### .03 Change in Service Lives of Fixed Assets

*Inquiry*—A reevaluation of the lives of depreciable property resulted in an increase in the remaining lives of certain properties. The company would like to include the cumulative, net of tax, effect of this change in income. Is this in accordance with generally accepted accounting principles?

*Reply*—APB Opinion No. 20, *Accounting Changes* (AC A06), is quite specific regarding the treatment of changes in estimated service lives of depreciable assets. Such a change is considered a change in an accounting estimate and should be recorded prospectively, that is, in the period of the change and future periods as appropriate. Therefore, the proposed accounting would not be in accordance with generally accepted accounting principles. If the change in service lives of depreciable property were accounted for as suggested, the independent auditors would have to issue a qualified or adverse opinion depending upon materiality of the item.

**.09 Change in Reporting Entity**

*Inquiry*—SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraphs 7 through 9 (AU 420.07–.09), discusses the applicability of the consistency standard to a change in the reporting entity, which is a special type of change in accounting principle. Are SAS No. 1, section 420, paragraphs 7(b) and (c) (AU 420.07(b) and (c)), which state that a change in reporting entity results when there is a change in the specific entities included in consolidated or combined financial statements, and paragraph 9 (AU 420.09), which states that “a change in reporting entity does not result from the creation, cessation, purchase or disposition of a subsidiary,” contradictory?

*Reply*—No. The creation, cessation, purchase, or disposition of a subsidiary or other business unit is a factual change in the legal structure of the entity and therefore does not require recognition in the auditor's report. Changes that require recognition in the auditor's report are those that can be arbitrarily made by management.

**.10 Change From Generally Accepted Accounting Principles (GAAP) to An Other Comprehensive Basis of Accounting (OCBOA) or From OCBOA to GAAP**

*Inquiry*—A company that has previously issued financial statements prepared in accordance with GAAP has decided to change to the income tax basis (or vice versa). How should the change in accounting basis be accounted for and reported in the financial statements and how does the change impact the auditor's or accountant's report?

*Reply*—Accounting issues:

Authoritative literature does not address accounting for a change in accounting basis. APB Opinion No. 20, *Accounting Changes* (AC A06), provides guidance for reporting accounting changes within the same basis. However, the situation described above is considered to be a change in accounting basis rather than an accounting change.

When only current year financial statements are presented, it is common practice to present the effect of the change in the accounting basis by showing beginning retained earnings as previously reported with an adjustment to convert to the new basis. Although not as common in practice, precedent also exists for either showing opening retained earnings on the new basis or showing the effects of the change as a cumulative-effect adjustment in the income statement.

However, if comparative financial statements are presented, the prior year(s) should be restated and presented under the basis to which the company has changed. Restatement is necessary to ensure comparability with all periods presented.

In both cases, the change in accounting basis should be disclosed in the notes to the financial statements.

—Reporting issues:

Auditing literature states that a change in accounting basis does not represent a lack of consistency and, consequently, that report modification is not required. However, the literature allows for the inclusion of an explanatory paragraph in the auditor's report to emphasize a matter regarding the financial statements.

A summary of the relevant authoritative references follows:

SAS No. 58, *Reports on Audited Financial Statements*, as amended, paragraph 16 (AU 508.16)—*Lack of Consistency*, indicates that the consistency reference in the auditor's report refers to consistent application of principles within a basis of presentation. The standards do not address the consistent use of a basis of presentation; therefore, a change in accounting basis does not require the auditor to modify the report for a lack of consistency.

Also, SAS No. 62, *Special Reports*, as amended, footnote 35 (AU 623.31, footnote 35)—*Circumstances Requiring Explanatory Language in an Auditor's Special Report*, indicates that a change from GAAP to an OCBOA does not represent a lack of consistency in accounting principles and states, in part, that an auditor may wish to add an explanatory paragraph to highlight a difference in the basis of presentation in the current year from that used in the prior year. Footnote 35 (AU 623.31, footnote 35) does not address changes from an OCBOA to GAAP or whether an explanatory paragraph is suggested for both single-period and comparative statements. However, the auditor may consider adding an explanatory paragraph in each of these situations.

SAS No. 58, paragraph 19 (AU 508.19), indicates that an auditor reporting on GAAP financial statements may wish to emphasize an accounting matter affecting the comparability of financial statements with those of the preceding period. SAS No. 62, paragraph 31 (AU 623.31) provides that an auditor reporting on OCBOA statements may wish to modify the report to emphasize a matter similar to reporting on GAAP statements.

A sample explanatory paragraph for an audit report on comparative financial statements in the year of change to an OCBOA follows:

(explanatory paragraph)

As discussed in Note A to the financial statements, in 19X4 the Company adopted a policy of preparing its financial statements on the accrual method of accounting used for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles. Accordingly, the accompanying financial statements are not intended to present financial position and results of operations in conformity with generally accepted accounting principles. The financial statements for 19X3 have been restated to reflect the income tax basis of accounting accrual method adopted in 19X4.

Accountants performing review or compilation engagements may also consider adding an explanatory paragraph for these basis changes. [Amended February 1995.]

## **.12 Comparative Statements From Equity Method to Consolidation**

*Inquiry*—In 19X1, a nonpublic entity owned 40 percent of a subsidiary and accounted for the subsidiary using the equity method. During 19X2, the entity acquired an additional 30 percent of the subsidiary and prepared consolidated financial statements. When presenting comparative financial statements for 19X1 and 19X2, should the 19X1 statements be restated from the equity method to a consolidated basis for comparability with 19X2?

*Reply*—No. ARB No. 51, *Consolidated Financial Statements*, paragraph 10 (AC C51.111), discusses the accounting for step-acquisitions for nonpublic entities, and implies that consolidated financial statements are presented only in the year an entity obtains control of a subsidiary.

---

[The next page is 9101.]

## Section 9060

### *Uncertainties*

#### **.06 Possible Effect of Divorce Proceedings on Credit Rating**

*Inquiry*—A client and his wife who are co-owners and co-managers of a business are involved in divorce proceedings. The auditor believes a divorce will adversely affect the business's credit rating. Is it necessary to include a reference in the financial statements to the divorce proceedings and their potentially adverse effects?

*Reply*—The auditor should not include references in his report to currently litigated divorce proceedings. The independent auditor should refrain from mentioning the client's involvements of a personal nature which might effectively disparage (or even stimulate the slander of) his business reputation or credit standing. It is possible that a divorce settlement could adversely affect the credit standing of the client, but in the absence of a final determination of the litigation or a determinative event which directly affects the financial condition of the entity under audit, the rule of informative disclosure does not compel the independent accountant to contribute in advance to a possible adverse effect on the client's credit standing.

#### **.08 Going Concern Problem—Financial Statements Prepared on the Income Tax Basis of Accounting**

*Inquiry*—A client prepares its financial statements on the income tax basis of accounting. The client is experiencing financial difficulties and its ability to continue as a going concern is questionable. Since the financial statements are prepared on "an other comprehensive basis of accounting," must the CPA's audit report include an explanatory paragraph that refers to this uncertainty?

*Reply*—Yes. SAS No. 62, *Special Reports*, paragraph 31b (AU 623.31b), states:

If the auditor has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statements, the auditor should add an explanatory paragraph after the opinion paragraph of the report only if the auditor's substantial doubt is relevant to the presentation.

SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU 341), applies to audits of financial statements prepared either in accordance with generally accepted accounting principles (GAAP) or in accordance with other comprehensive bases of accounting. Therefore, when the auditor concludes that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period, regardless of the basis of accounting, the auditor should include an explanatory paragraph (following the opinion paragraph) to reflect that conclusion. [Amended]

#### **.09 Audit Report for Development Stage Enterprise**

*Inquiry*—Is an explanatory paragraph in the auditor's report for a going concern uncertainty always required for a development stage enterprise because there is doubt as to recovery of costs from future operations?

*Reply—No.* A going concern uncertainty does not automatically arise because an enterprise is in the development stage. In accordance with SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU 341), the auditor should consider whether the results of the procedures performed (in planning, gathering evidence relative to the various audit objectives, and completing the audit) identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If such conditions or events are identified, the auditor should consider management's plan to deal with the adverse effects of the conditions and events (such as financing or additional capital infusion), and assess the likelihood that such plans can be effectively implemented.

If the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for one year after the balance sheet date remains after considering conditions, events and management's plans, the going concern issue should be adequately disclosed in the financial statements, and the auditor's report should include an explanatory paragraph to reflect this conclusion. [Amended]

---

## Section 9070

### ***Subsequent Events***

#### **.01 Failure to Remit Withholding Taxes in Subsequent Period**

*Inquiry*—In the course of an examination of the financial statements, the auditor has discovered that in the period subsequent to the balance sheet date the company has not remitted to the appropriate agencies the taxes currently withheld from employees' wages. Assuming the amount is material, is it necessary that this matter be disclosed in the auditor's report?

*Reply*—Section 560.03 of Statement on Auditing Standards No. 1 states in part:

The first type [of subsequent events] consists of those events that provide additional evidence with respect to conditions that existed at the date of the balance sheet and affect the estimates inherent in the process of preparing financial statements . . . . The financial statements should be adjusted . . . .

Section 560.05 of SAS No. 1 states in part:

The second type consists of those events that provide evidence with respect to conditions that did not exist at the date of the balance sheet being reported on but arose subsequent to that date. These events should not result in adjustment of the financial statements. Some of these events, however, may be of such a nature that disclosure of them is required to keep the financial statements from being misleading.

Even if it is determined that the financial statements are not directly affected, it is possible that the situation indicated future serious difficulties that might require disclosures.

If the delinquent obligations are not evidence of serious financial difficulties, there usually would be no reason why obligations incurred subsequent to the balance sheet date need be reported in financial statements as of such date. In such a case, it should be expected that the delinquent payments will soon be remitted. [Amended]

#### **.02 Disclosure of Note Receivable Covering Previous Account of Bankrupt Company**

*Inquiry*—Company A reports on a fiscal year ending January 31. Company A's accounts receivable include a material amount due from a bankrupt company. To avoid legal action, several individuals formed a new company. The new company and the individuals signed a note which would pay the accounts receivable of the bankrupt company over a three year period. The note was signed on March 1, subsequent to the balance sheet date. Should the note receivable, assumed to be collectible, be presented in the balance sheet at January 31?

*Reply*—Section 560 of Statement on Auditing Standards No. 1 deals with subsequent events. Paragraph 560.07 states, "Subsequent events affecting the realization of assets such as receivables and inventories or the settlement of estimated liabilities ordinarily will require adjustment of the financial statements . . . because such events typically represent the culmination of condi-

tions that existed over a relatively long period of time.” Accordingly, the accounts receivable should be reported as a note receivable at January 31, with adequate disclosure of the financial arrangements made after the balance sheet date.

### **.03 Discovery of Potential Liability in Subsequent Period**

*Inquiry*—In the period subsequent to the balance sheet date, the auditors discovered that an employee of the client had used a company purchase order to obtain merchandise for his personal business. This transaction resulted in a material potential liability of the client. Negotiations with the creditor ensued and the client’s attorney was successful in securing a complete release from any obligation on the part of the client.

Is it necessary to disclose this matter on the client’s financial statements?

*Reply*—According to section 560.03–.04 of Statement on Auditing Standards No. 1, the resolution of this matter appears to constitute a subsequent event which is evidence of a condition that existed at the balance sheet date, but since no transaction in fact occurred which involved the client, it is not necessary to disclose the matter in the financial statements. However, a condition which did affect the client and which did exist at the balance sheet date is the future legal costs of settling the matter. Provisions for these costs (if they are material) should be made on the financial statements, and the reasons for incurring these costs should be disclosed.

### **.04 Settlement of Pending Litigation in Subsequent Period**

*Inquiry*—The field work for an audit of financial statements for a year ended December 31 was completed on May 22. Pending litigation on December 31, in which the client was the plaintiff, was settled on May 10, resulting in a gain to the client. Should the settlement be recognized in the financial statements for the year ended December 31, in accordance with SAS No. 1, section 560, *Subsequent Events*, as a type I subsequent event?

*Reply*—No. SAS No. 1, section 560, applies only to loss contingencies, not gain contingencies. The settlement should be recognized on May 10, because the settlement occurred on that date. FASB Statement No. 5, *Accounting for Contingencies*, paragraph 17, states, “Contingencies that might result in gains usually are not recorded in the accounts since to do so might be to recognize revenue prior to its realization. Adequate disclosure shall be made of contingencies that might result in gains but care shall be exercised to avoid misleading implications as to likelihood of realization.”

### **.05 Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor’s Report But Before Issuance of the Auditor’s Report and Related Financial Statements**

*Inquiry*—An auditor completes the field work with respect to an audit of financial statements, performs all of the post-field work procedures required by the firm’s quality control standards and signs the audit report but does not immediately issue the auditor’s report and the related financial statements to the client. During the period that the report was signed but not issued, the client suffers a significant loss due to a natural disaster. What are the auditor’s responsibilities with respect to consideration of a material subsequent event that occurs after completion of field work and after the signing of the auditor’s report but before issuance of the auditor’s report and the audited financial statements?

*Reply*—AU section 561.04 states that after the date of the report, the auditor has no obligation to make any further or continuing inquiry or perform any other auditing procedures with respect to the audited financial statements covered by that report, unless new information which may affect the report comes to his or her attention. In addition, AU section 560.01 defines a subsequent event as events or transactions which occur subsequent to the balance-sheet date, but prior to the issuance of the financial statements that have a material effect on the financial statements and therefore require adjustment or disclosure in the financial statements.

A loss from a natural disaster occurring after year end would be considered a type II subsequent event. AU section 560.05 defines such a subsequent event as an event that provides evidence with respect to conditions that did not exist at the date of the balance sheet being reported on but arose subsequent to that date. These events should not result in an adjustment to the financial statements. Some of these events, however, may be of such a nature that disclosure of them is required to keep the financial statements from being misleading. In addition, the auditor should always remember that the financial statements belong to the client and the client may wish to disclose the event in the notes to the financial statements even if not required to do so.

Management and the auditor should consider whether a type II subsequent event would be of such a nature that disclosure of the event is necessary in order to keep the financial statements from being misleading. Management and the auditor should also consider whether the event affects the entity's ability to continue as a going concern.

For example, if the auditee owns a major distribution center in an area that is declared a disaster area by a local, state, or federal government due to natural disaster (e.g. hurricane, earthquake, tornado), management and the auditor should assess the damage done to that asset and the impact on the entity's current and future operations and determine whether disclosure of the impact of the disaster is required to keep the financial statements from being misleading. Occasionally such an event may be so significant that disclosure can best be made by supplementing the historical financial statements with pro forma financial data giving effect to the event as if it had occurred on the date of the balance sheet. It may be desirable to present pro forma statements, usually a balance sheet only, in columnar form on the face of the historical statements.

The auditor may conclude that the event has such a material impact on the entity that it would be appropriate to include an emphasis of matter paragraph in the auditor's report directing the reader's attention to the event and its effects. As AU section 508.19 notes, emphasis paragraphs are never required and are added solely at the auditor's discretion.

If the auditor concludes that the effects of the disaster are such that substantial doubt exists as to the entity's ability to continue as a going concern for a reasonable period of time, the auditor should include an explanatory paragraph (following the opinion paragraph) to reflect that conclusion. AU section 341.13 provides an example of such an explanatory paragraph.

---

[The next page is 9141.]

## Section 9080

### ***Audited Financial Statements***

#### **.02 Going Concern Assumption for Venture With Limited Life**

*Inquiry*—A corporation has recently been organized with the sole purpose of constructing a shopping center which will take several years to complete, after which the company will be liquidated. The company uses the completed contract method to recognize income and will have only one operating cycle.

Should there be an explanatory paragraph in the auditor's report now or near the final years of operations on the assumption that after a certain fixed period it will no longer be a "going concern"?

*Reply*—SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, requires that an explanatory paragraph (following the opinion paragraph) be included in the audit report when the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. A reasonable period of time is defined as "a period of time not to exceed one year beyond the date of the financial statements being audited." Therefore, when the auditor has substantial doubt that the corporation will continue as a going concern for one year from the date of the financial statements under audit, an explanatory paragraph (following the opinion paragraph) reflecting that conclusion should be included in the audit report.

However, if the corporation has presented its financial statements on the assumption of liquidation, SAS No. 59 does not apply and therefore an explanatory paragraph reflecting the auditor's conclusion that substantial doubt exists about the corporation's ability to continue as a going concern is not necessary. [Amended]

#### **.03 Opinion on Balance Sheet Only**

*Inquiry*—Occasionally, a client will request from a CPA only an audited balance sheet with footnotes even though the CPA has examined and reported on all the financial statements. The usual purpose of this statement is for presentation by the client to a supplier for securing credit.

In complying with such a request, one CPA furnishes the client with the balance sheet, the notes to all the financial statements, and the following report:

We have audited the accompanying balance sheet of X Company as of December 31, 19XX. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting

the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 19XX, in conformity with generally accepted accounting principles.

Does such a practice satisfy the CPA's reporting obligation according to SAS No. 58, *Reports on Audited Financial Statements*?

*Reply*—SAS No. 58, paragraphs 33 and 34, permit the expression of an opinion on a balance sheet only. In expressing such an opinion, the explanatory and scope paragraphs need not refer to the audit of related statements which are not being presented. The only information necessary to the readers of this report would concern the audit of the balance sheet.

The notes to the financial statements which do not pertain to the balance sheet should be omitted. However, if depreciable property is a significant portion of assets, the disclosures required by APB Opinion No. 12, *Omnibus Opinion—1967*, paragraph 5, should be considered necessary for fair presentation of the balance sheet. Disclosure as to pension plans, except for the amount of expense for the current year, would also be appropriate. [Amended]

#### **.04 Opinion on Balance Sheet With Disclaimer on Income Statement**

*Inquiry*—A CPA firm has been engaged to perform the initial audit of a company. Since the firm did not observe the inventory taking at the beginning of the period and it is not practicable for it to satisfy itself by other means as to the beginning inventory, the firm plans to issue an opinion only on the balance sheet and disclaim an opinion on the income statement. Would this be in accordance with SAS No. 58, *Reports on Audited Financial Statements*, paragraph 33?

*Reply*—Since the engagement involves a scope limitation, SAS No. 58, paragraph 33, does not apply because that pertains to audits that are unrestricted. SAS No. 58, paragraph 5, however, would apply and concludes, "The auditor may express an unqualified opinion on one of the financial statements and express a qualified or adverse opinion or disclaim an opinion on another if the circumstances warrant." If the independent auditor has not satisfied himself by means of other auditing procedures with respect to opening inventories, he should either qualify or disclaim an opinion on the income statement.

If an opinion is disclaimed on the income statement, a disclaimer on the statement of cash flows would also be required as illustrated in SAS No. 58, paragraph 67. [Amended]

#### **.06 Reference in Financial Statements to Auditor's Report**

*Inquiry*—Audited financial statements often contain a note such as:

The accompanying notes are an integral part of this financial statement.  
or a note sometimes reads

The accompanying notes and auditor's report are an integral part of this financial statement.

The only difference between the two notes is the inclusion of the phrase, "and auditor's report." Is a reference to the auditor's report necessary?

*Reply*—SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph 2, as amended by SAS No. 58, *Reports on Audited Financial Statements*, in discussing the distinction between responsibilities of the auditor and management states, “The financial statements are management’s responsibility.” Therefore, the auditor’s report cannot be an integral part of the financial statements, and it is inappropriate to include it by reference. [Amended]

#### **.09 Arrangement of References to Financial Statements in Auditor’s Report**

*Inquiry*—The examples of auditor’s opinions in the Statements on Auditing Standards all seem to refer to the statement of financial position first, followed by the statement of results of operations, and finally the statement of cash flows. Is it necessary that the financial statements be presented in this order and the statements be referred to in the auditor’s report in this order?

*Reply*—The order in which the financial statements are referred to in the independent auditor’s report need not follow the order in which the statements are physically arranged. The suggested standard report such as shown in SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08), can be used regardless of the order in which the financial statements are presented. [Amended]

#### **.13 Classification of Certain Callable Obligations**

*Inquiry*—In some situations in which there is a violation of a debt agreement that makes a long-term obligation callable, management continues to classify the obligation as long-term because it asserts that it is probable that the violation will be cured during the grace period, while the auditor does not agree with that assertion. In such a situation, does an uncertainty exist that might cause the auditor to add an explanatory paragraph (after the opinion paragraph) to his report?

*Reply*—No. FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor* (AC B05), requires that long-term obligations be classified as current liabilities if they are, or will be, callable because of the debtor’s violation of a provision of the debt agreement unless certain conditions are met. These conditions occur when (1) the creditor waives or loses the right to demand payment for more than one year from the balance sheet date or (2) it is probable that the violation will be cured within the grace period specified in the loan agreement.

The circumstances described above do not constitute an uncertainty as described in SAS No. 58, *Reports on Audited Financial Statements* (AU 508), because they do not involve matters expected to be resolved at a future date (SAS No. 58, paragraph 29 (AU 508.29)). If the auditor, on the basis of evidence available to him, disagrees with management’s assertion, a qualified (“except for”) or adverse opinion because of a departure from generally accepted accounting principles should be considered. [Amended]

#### **.14 Compilation of Supplementary Schedules in Audited Financial Statements**

*Inquiry*—When supplementary schedules are included with audited financial statements in an auditor-submitted document, can these schedules be compiled in accordance with SSARS 1, *Compilation and Review of Financial Statements*, paragraph 43 (AR 100.45)?

*Reply*—No. It would not be appropriate to refer to the accounting and review services literature to report on the accompanying information in this situation. If such schedules accompany financial statements audited in accordance with generally accepted auditing standards, the guidance in SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AU 551), should be followed. SAS No. 29, paragraph 6d (AU 551.06d), states that the auditor should either express or disclaim an opinion on the information, depending on whether it has been subjected to the auditing procedures applied in the audit of the basic financial statements.

### **.15 Condensed Financial Statements of a Nonpublic Entity**

*Inquiry*—A client prepares condensed financial statements that name the auditor and state that they have been derived from audited financial statements. The condensed statements incorporate the audited financial statements by reference and indicate such statements and auditor's report thereon may be obtained. Must the auditor report on the condensed financial statements?

*Reply*—SAS No. 42, *Reporting on Condensed Financial Statements and Selected Financial Data*, paragraph 7 (AU 552.07), states that an auditor need not report on the condensed financial statements provided they are included in a document containing audited financial statements or incorporating such statements by reference to information filed with a regulatory agency. Many accountants believe that if the condensed financial statements of a nonpublic entity refer to the audited statements and location where they may be obtained, an auditor need not report on such condensed statements.

---

[The next page is 9161.]

## Section 9100

### *Signing and Dating Reports*

#### **.01 Use of Successor Firm Name in Signing Registration Statement**

*Inquiry*—A CPA firm has been requested to provide an opinion on the consolidated financial statements of a client covering a five-year period. During this five-year period, the CPA firm has undergone several changes in its organization and its name:

1. Opinions for the first two years were issued by John Doe & Co.
2. In the third year, the accounting practice merged with another firm and the opinions for years three and four were signed by Doe, Roe & Co. Primary responsibility for the client was retained by the partners of John Doe & Co.
3. This partnership was later dissolved and the opinion in year five was signed by John Doe & Co., who, under the dissolution agreement, retained the working papers for this client.

Since it is impracticable to obtain the consent of each partner of the dissolved partnership, may the opinion on the five-year statements be issued by John Doe & Co.?

*Reply*—This situation is discussed in Statement on Auditing Standards No. 58, *Reports on Audited Financial Statements*, footnote 22 (AU 508.65, footnote 22). Since the partners of John Doe & Co., as it presently exists, retained primary responsibility for the publicly held company in question during the merger period, and since the firm is a successor in interest to the engagement and has retained all working papers for this client, it appears that, after consideration of these circumstances, the statements of consolidated income for the five-year period may be released solely in the name of John Doe & Co. [Amended]

#### **.02 Reporting on Companies With Different Fiscal Years**

*Inquiry*—A CPA has a client whose fiscal year ends on June 30. A parent company of this client now wishes to go public and must file consolidated financial statements with the SEC. The parent company, however, observes a fiscal year ending on December 31.

The CPA has been asked by the parent to provide financial statements with an auditor's opinion for the year ending December 31, 19X3. To do this, the auditor must assemble figures for the period January 1, 19X3, to June 30, 19X3, from the financial statements for the year ended June 30, 19X3, and figures for the period July 1, 19X3, to December 31, 19X3, from the financial statements for the year ended June 30, 19X4.

The CPA has been having difficulty in segregating the financial information into these six-month periods because of the condition of the accounting records. Furthermore, the inventories were not observed nor were the receivables confirmed at the December 31 dates.

Under these conditions, should the CPA express his opinion for the year ended June 30, 19X3, and disclaim an opinion for the six months ended December 31, 19X3?

*Reply*—In order for an auditor to express an opinion on financial statements for prior periods, it is generally not necessary to observe all audit procedures required for the most recent financial statements. SAS No. 58, *Reports on Audited Financial Statements*, paragraph 24, footnote 14 (AU 508.24, footnote 14) (in referring to absence of confirmation of receivables and observation of inventories) indicates that the omission of these procedures at the beginning of the year is not required to be disclosed in situations where the independent auditor has satisfied himself by other auditing procedures. However, he may wish to disclose the circumstances of the engagement and briefly describe the other procedures.

Generally, if the client's records are reasonably well kept and the auditor has satisfied himself as to year-end financial statements, review of ratios of sales to cost of sales and determination that accruals have been properly recognized at the interim date will enable an auditor to satisfy himself that the financial statements at an intervening interim date are fairly presented. On the other hand, if no perpetual inventory records are kept and if the client has not prepared inventories as of the interim date, it may not be practicable to reconstruct such inventory, and a disclaimer of opinion must be expressed on the reconstructed statements. In such circumstances, it would appear necessary that the auditor indicate in a middle paragraph that, due to the fact that he was not engaged to make an audit of financial statements as of such date until June 30, 19X4, he was not in a position to observe the amount of inventory at such date and is unable to satisfy himself thereto by the application of other auditing procedures. If this be the case, the SEC would probably be willing to accept combined income statements based on statements of the subsidiary company as of a date six months different than the parent and to accept unconsolidated balance sheets, with the balance sheet of the subsidiary being presented as of its appropriate year-end. The absence of correspondence with debtors and creditors would probably not cause similar problems. [Amended]

#### **.05 Signing of Independent Auditor's Report**

*Inquiry*—Should the independent auditor's report be manually signed?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08), indicates that one of the basic elements of the report is "the manual or printed signature of the auditor's firm."

Although SAS No. 58 (AU 508) does not require a manual signature, Department of Labor and Securities and Exchange Commission regulations require manual signatures in certain circumstances.

#### **.06 The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report**

*Inquiry*—SAS No. 85, *Management Representations* (AU 333), establishes a requirement that the independent auditor obtain written representations from management as part of an audit of financial statements performed in accordance with generally accepted auditing standards. Additionally, paragraph 23 of SAS No. 103, *Audit Documentation* (AU 339.23), states that the auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion. Among other things, sufficient appropriate audit evidence includes evidence that the audit documentation has been reviewed, and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that it has taken responsibility for them. Is the auditor required to

have the signed management representation in hand as of the date of the auditor's report?

*Reply*—AU 530.01 states, in part, “The auditor’s report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion [footnote omitted].” Such sufficient appropriate audit evidence includes management having asserted responsibility for the final financial statements. The requirement does not mean that the auditor needs to be in physical receipt of the representation letter on the date of the auditor’s report. However, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor’s report, since management’s refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion (see SAS No. 85 (AU 333)).

---

[The next page is 9181.]

## Section 9110

### *Special Reports*

#### **.01 Determination of Sales Price Based on Auditor's Report**

*Inquiry*—A CPA has been designated by a contract of sales to prepare a statement of “net current assets” and a statement of net income of the selling firm. Both are elements in the determination of the sales price.

A disagreement has arisen between the seller and the buyer as to the pricing of the inventory which represents the major portion of the “net current assets.” The seller relies on a formula represented as “heretofore agreed . . . .” The buyer demands a formula “based upon good accounting practice.”

The CPA believes he may have to submit two inventory values to comply with the contract provisions—one to describe the “net current assets” which will use the formula set forth in the contract, and a second using the normal pricing methods of prior years. There is a major variation between the two. The formula in the contract was not represented as being based on good accounting methods but was developed by management after the date of their latest audit.

Can the CPA express an unqualified opinion on each of the two statements if different price bases are used provided full disclosure is made?

*Reply*—This is a special report situation and these are special circumstances in which the auditor may have a certain reporting latitude he might not otherwise have. Since seller and buyer were both parties to the contract, the CPA was designated by the contract to prepare specified statements, and the contract apparently describes a special formula to be used in pricing inventories, the CPA would ordinarily perform strictly according to the terms of the engagement and report on one set of statements as being fairly presented or correctly presented in accordance with the specified contractual formula.

However, since the CPA is aware of the basic disagreement between seller and buyer, he might be much more helpful towards ultimately resolving the issue if he were to prepare statements on both bases.

The auditor may properly report on the two statements prepared in accordance with different inventory pricing bases, full disclosure, of course, being assumed. A more significant question, under the circumstances, is whether he has (or can obtain) consent from both parties modifying the terms of the engagement to allow preparation of the statements on a dual basis.

#### **.03 Audit of Sales for Percentage-of-Sales Lease Agreements**

*Inquiry*—Tenants' lease agreements with a large shopping center provide for a minimum annual rental plus a percentage rent for sales in excess of a certain dollar amount. In accordance with the leases, the shopping center has engaged the services of a CPA to verify that sales exceeding the specified minimum base are being reported. If the CPA is satisfied that the internal control of a tenant is good, may he rely on copies of sales tax returns filed with the state as sufficient evidence for his examination? Is any further verification necessary if a tenant submits a written confirmation of its annual sales from its CPA?

*Reply*—The degree of reliance which the auditor can place on the work of a tenant's CPA will depend upon many considerations such as those described in section 543 of Statement on Auditing Standards No. 1. Comparison of the sales figure reported to the client with the figure reported on the tenant's sales tax return would not in itself be sufficient verification, and additional procedures will be necessary.

An audit program suitable for determining the annual sales of the tenants will have to be highly flexible. Flexibility is required so as to enable the field auditors involved to adjust the audit procedures employed from store to store, as dictated by changes in types of merchandise sold, selling policies employed, sufficiency of records maintained, adequacy of internal control, etc. Accordingly, the depth of the examination will vary to some extent with almost every tenant audited.

Procedures might include examining weekly cash reports submitted by store managers and comparing these reports with general ledger entries, bank statements, and state and federal tax returns, and test checking consecutively numbered sales invoices.

Perhaps the most important documents to play a role in such an examination of the tenants' sales will be the lease agreements which provide the very basis for such examination and which may well contain restrictions on the number and type of records and reports that each tenant will be required to make available.

#### **.07 Statement of Cash Receipts and Disbursements**

*Inquiry*—What is the appropriate language for audit, review, and compilation reports on a statement of cash receipts and disbursements?

*Reply*—Report language will vary depending on the level of service performed. A statement of cash receipts and disbursements is a financial statement prepared under an other comprehensive basis of accounting (see SAS No. 62, *Special Reports* (AU 623.04), and SSARS 1, *Compilation and Review of Financial Statements* (AR 100.04)). It is a pure cash-basis financial statement that summarizes cash activity of the entity, including the individual sources and uses of cash, and may be the only financial statement prepared for the period.

Audit reports on this financial statement should contain a separate paragraph that states the cash receipts and disbursements basis of accounting is being used and that it represents a comprehensive basis of accounting other than GAAP (see SAS No. 62, paragraph 5(d) [AU 623.05(d)]). This extra paragraph is not required for full-disclosure compilation and review reports as long as the notes state the basis of accounting used and describe how that basis differs from GAAP (see Interpretation No. 12 of SSARS 1 (AR 9100.42)). A compilation report on financial statements that omit substantially all disclosures must also describe the basis of accounting used if such disclosure is not provided on the face of the statements or in an attached note (see Interpretation No. 12 of SSARS 1 (AR 9100.43)).

Illustrations of audit, review, and compilation reports on statements of cash receipts and disbursements follow:

##### **A) Audit**

We have audited the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the statements of cash receipts and disbursements are free of material misstatement. An audit includes examining on a test basis, evidence supporting the amounts and disclosures in the statements of cash receipts and disbursements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the statements of cash receipts and disbursements. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, the financial statements have been prepared on the cash receipts and disbursements basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, on the basis of accounting described in Note X.

*B) Review*

I (We) have reviewed the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the cash receipts and disbursements basis of accounting described in Note X.

*C) Compilation With Full Disclosure*

I (We) have compiled the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

*D) Compilation With Substantially All Disclosures Omitted*

I (We) have compiled the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 19X2 and 19X1, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the cash receipts and disbursements basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the informative disclosures ordinarily included in financial statements prepared on the cash receipts and disbursements basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusion about the Company's cash receipts and disbursements. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[Amended February 1995.]

### **.08 Statutory Basis Financial Statements Differ From GAAP**

*Inquiry*—Financial statements filed with a state regulatory agency are prepared on a statutory basis which differs from generally accepted accounting principles (GAAP). How should the accountant report on the financial statements if he knows they will be distributed to third parties other than the regulatory agency?

*Reply*—A practical way of handling this situation can be found in SAS No. 62, *Special Reports*, paragraph 5, footnote 4 (AU 623.05, footnote 4), which refers to amended SAS No. 1, section 544, *Lack of Conformity With Generally Accepted Accounting Principles* (AU 544). In accordance with SAS No. 1, section 544, paragraph 4 (AU 544.04), the auditor's report would take the following format:

- The first paragraph would be the standard introductory paragraph.
- The second paragraph would be the standard scope paragraph.
- The third paragraph would be an explanation in full of the differences between GAAP and the state mandated policies, or alternatively, a brief description of the differences with a reference to a footnote identifying these differences in detail.
- The fourth paragraph would be the qualified or adverse opinion regarding the application of GAAP.
- The fifth paragraph would be an opinion stating whether the financial statements are presented in conformity with the prescribed basis of accounting mandated by the state regulatory agency.

[Amended]

### **.13 Report Distribution Restriction Related to Financial Statements Prepared on a Basis of Accounting Prescribed in an Agreement**

*Inquiry*—An auditor was asked to report on special purpose financial statements of a corporation prepared in conformity with a basis of accounting that departs from GAAP and that does not constitute an other comprehensive basis of accounting. Certain assets, such as receivables, inventories, and other properties, have been valued on a basis specified in the agreement (fair market value). Must the auditor issue a report containing a paragraph that restricts the distribution of the report?

*Reply*—Yes. SAS No. 62, *Special Reports*, paragraph 29(g) (AU 623.29(g)), states that in such circumstances, a paragraph restricting the distribution of the report to those within the entity, to the parties to the contract or agreement, for filing with a regulatory agency, or to those with whom the entity is negotiating directly is required.

## .14 Liquidation Basis Financial Statements

**Inquiry**—The stockholders of a corporation adopted a plan of complete liquidation. The liquidation will occur over a period of three years. What constitutes the basic financial statements following the adoption of the plan, and on what basis should those statements be presented?

**Reply**—Auditing Interpretation No. 8 of SAS No. 58, “Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting (AU 9508.33–.38),” states that a liquidation basis of accounting may be considered generally accepted accounting principles for entities in liquidation or for which liquidation appears imminent.

The financial statements of entities adopting a plan of liquidation may be presented with financial statements of a prior period that were prepared on a going concern assumption. The basic financial statements following the adoption of a plan of liquidation consist of a statement of net assets in liquidation, and the related statement of changes in net assets in liquidation.

## .15 Reporting on Medicaid/Medicare Cost Reports

**Inquiry**—Third-party payors may require health care organizations to prepare and submit “cost reports” as a condition of participation in a payor’s program. The most common examples are Medicare and Medicaid. Sometimes, a specific payor (such as a state Medicaid program) will require health care organizations to obtain an audit of their financial statements and further, will require some form of independent auditor association with or “certification” of cost reports submitted by the health care organization. No standards exist that define or specify what is meant by “certification” of a cost report. As stated in the Appendix to SOP 00-1, *Auditing Health Care Third-Party Revenues and Related Receivables* (AUD 14,360.38), a financial statement audit conducted in accordance with generally accepted auditing standards does not include rendering an opinion or any form of assurance on the entity’s compliance with laws and regulations, nor does it provide any assurance on an entity’s cost report. Consequently, auditors have expressed concern that providing such certification might erroneously imply that they are providing assurance on the entity’s cost report or on its compliance with cost report rules or regulations. When an auditor has been engaged to perform an audit of a health care organization’s basic financial statements, what form of report should the auditor issue to comply with the certification requirement?

**Reply**—The auditor could enter into a separate engagement to examine the cost report under Statement on Standards for Attestation Engagements (SSAE) No. 10, Chapter 6, *Compliance Attestation* (AT 601). However, typically states do not require such extensive services and therefore, health care organizations may be reluctant to engage the auditor to perform such an examination. If a health care organization includes their cost report as accompanying information with their audited basic financial statements, an auditor may report on the cost report as accompanying information in accordance with Statement on Auditing Standards (SAS) No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*, as amended (AU 551), or SAS No. 8, *Other Information in Documents Containing Audited Financial Statements*, as amended (AU 550).<sup>1</sup> If certain cost report amounts or statistics have been applied in the audit of the basic

---

<sup>1</sup> SAS No. 8, as amended (AU 550), applies if the financial statements and information are contained in a client-prepared document, rather than an auditor-submitted document.

financial statements, the auditor may express an opinion on whether this accompanying information is fairly stated, in all material respects, in relation to those basic financial statements taken as a whole. The following is an illustration of such an "in relation to" opinion on certain data within a cost report:

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The financial and statistical data on pages x through x, designated with the tickmark "#",<sup>2</sup> that are excerpted from ABC Health System's [*identify title of cost report, such as "Annual Report of Hospitals and Hospital Health Care Complexes"*]<sup>3</sup> for the year ended December 31, 200X, identified by Declaration Control Number xxxxxxx and prepared as of [*insert date that cost report was submitted*]<sup>4</sup> are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The financial and statistical data, designated with the tickmark "#," has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is stated fairly in all material respects in relation to ABC Health System's basic financial statements taken as a whole. Those auditing procedures applied in the audit of the basic financial statements were not intended to determine compliance with, and therefore would not detect compliance with or deviations from, the applicable instructions furnished by the [*identify related regulators, such as "XYZ State Department of Health"*] relating to the preparation of the cost report or the reporting requirements contained in the [*identify related regulations, such as "XYZ State Medicaid Accounting and Reporting Manual"*].<sup>5</sup> None of the other information included in the accompanying schedules excerpted from [*identify source*] has been subjected to the auditing procedures applied in our audit of the basic financial statements referred to above and, accordingly, we express no opinion or any other form of assurance thereon.<sup>6</sup>

This report is intended solely for the information and use of Management and the Board of Directors of ABC Health System and the [*identify requesting organization, such as "XYZ State Department of Health"*] and is not intended to be and should not be used by anyone other than these specified parties.<sup>7</sup>

<sup>2</sup> It should be clear from the description in the auditor's report and/or the specific page numbers referenced as to which data is, and which data is not, covered by the "in relation to" opinion.

<sup>3</sup> This wording presumes that the supplementary information is comprised of specific pages or schedules excerpted from the cost report. If the entire cost report is included as supplementary information, this sentence might be reworded to read "Certain supplementary financial and statistical data designated with the tickmark '#' in ABC Health System's [*identify title of cost report, such as "Annual Report of Hospitals and Hospital Health Care Complexes"*] for the year ended December 31, 200X."

<sup>4</sup> A provider's as-filed cost report may subsequently be revised; therefore, the auditor's report should clearly identify the specific version of the cost report to which the "in relation to" report applies, such as by identifying specific control numbers and/or date of preparation/filing. Doing so will eliminate any future misunderstanding as to the version of the cost report/cost report excerpts covered by the "in relation to" opinion.

<sup>5</sup> As discussed in the Appendix of SOP 00-1, *Auditing Health Care Third-Party Revenues and Related Receivables* (AUD 14,360.38), an auditor engaged to perform a financial statement audit in accordance with generally accepted auditing standards would not be in a position to express an opinion, or provide negative assurance, regarding compliance with cost report preparation instructions or rules and regulations covering reimbursement as promulgated by the government program.

<sup>6</sup> A disclaimer should be included as to any other data included in the supplementary information.

<sup>7</sup> Restrictive use language should be included in the report. Paragraph 4 of SAS No. 87 (AU 532.04) states that the auditor should restrict the use of a report when (a) the subject matter of the auditor's report or the presentation being reported on is based on measurement or disclosure criteria contained in contractual agreements or regulatory provisions that are not in conformity with generally accepted accounting principles or an other comprehensive basis of accounting (OCBOA) or (b) the auditor's report is issued as a by-product of a financial statement audit and is based on the results of procedures designed to enable the auditor to express an opinion on the financial statements taken as a whole, not to provide assurance on the specific subject matter of the report.

Because this is a restricted-use report, the auditor should consider the guidance in SAS No. 87, *Restricting the Use of the Auditor's Report*, paragraphs 12 and 13 (AU 532.12–.13) before deciding whether to combine this report with the auditor's report on the basic financial statements.

---

**[The next page is 9201.]**

## Section 9120

### ***Reliance on Others***

#### **.01 Definition of “Principal Auditor”**

*Inquiry*—In the situation where one auditor relies on the work of another auditor, the term “principal auditor” is used. How is the term “principal auditor” defined?

*Reply*—The “principal auditor” is the auditor expressing an opinion on the financial statements of the parent company or on the consolidated financial statements of several companies, while the “other independent auditor” expresses an opinion on the financial statements of a subsidiary, division, or branch whose statements are being incorporated therein. The term “primary auditor” is also used in this connection as the equivalent of “principal auditor.”

#### **.02 Responsibility for Audit of Dividend Fund Managed by Agent**

*Inquiry*—A mutual fund employs a management company to act as its dividend disbursing agent and transfer agent. Dividend checks to the individual shareholders of the mutual fund are drawn from a “dividend disbursing agency fund.” This account, however, does not appear as an asset or liability on the books of either the mutual fund or the management company.

Is it the responsibility of the mutual fund’s auditors or the management company’s auditors to audit the dividend disbursing agency fund?

*Reply*—Since it is one of the primary responsibilities of the management company for the mutual fund, to draw and pay individual dividend checks to the fund’s shareholders, it would be appropriate for, if not incumbent upon, the management company’s auditors, in connection with their audit, to see that this function is being properly discharged, even though the account from which these checks are disbursed does not appear as an asset or liability on the books of either the fund or the management company.

#### **.04 Reliance on State Grain Inspectors for Inventory Measurements**

*Inquiry*—A grain company operates several storage elevators. The company maintains perpetual inventory records for all facilities—both at the elevators and the home office. State grain inspectors measure the stored grain and in effect perform the same audit functions as the CPA firm. Past experience has been that the differences between the measurements of the state inspectors, the CPA firm, and the perpetual inventory records are immaterial. The state inspectors are qualified with years of experience. Can the CPA firm accept the findings of the state inspectors as adequate inventory observation in accordance with generally accepted auditing standards?

*Reply*—Auditing Interpretation No. 1 of SAS No. 58, “Report of an Outside Inventory-Taking Firm as an Alternative Procedure for Observing Inventories,” especially paragraphs .05 and .06 can be applied to this situation. The CPA firm could use the measurements and calculations of the state grain inspectors but not as a complete substitute for its own independent inventory observation.

**.06 Use of Other Auditors' Work When They Are Not Independent**

*Inquiry*—SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors*, provides guidance when part of the audit is performed by other independent auditors. How does the lack of independence of the other auditors affect the use of their work and reports by the principal auditor?

*Reply*—In these circumstances, the work and reports of the other auditors cannot be used in accordance with SAS No. 1, section 543. The responsibility for the audit report on the financial statements rests solely with the principal auditor.

Therefore, judgments about assessments of inherent and control risk, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the principal auditor.

The principal auditor, however, may use his or her judgment in evaluating the work of the other auditors who are lacking in independence in the way he or she would consider the work performed by internal auditors.

**.07 Reference to Other Auditors in Accompanying Information Report**

*Inquiry*—An audit report is based in part on the report of other auditors. If the principal auditor makes reference to other auditors' work in the audit report, must the report on accompanying information, which includes data audited by other auditors, include a reference to other auditors' work?

*Reply*—Yes. If a portion of the financial statements was audited by other auditors and the principal auditor's report refers to the other auditors, the principal auditor's report on the accompanying information, which includes data audited by other auditors, also should refer to other auditors' work.

---

[The next page is 9221.]

## Section 9130

### **Limited Scope Engagements**

#### **.01 Auditor's Report if Inventories Not Observed—I**

*Inquiry*—Clients sometimes impose restrictions on their auditors with regard to the observation and testing of inventory because of the costs involved, yet they still want an opinion from the auditor. What type of opinion can be issued in such circumstances when the inventory is 10 percent or more of total assets?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraphs 20–26 (AU 508.20–.26) and 61–63 (AU 508.61–.63), indicates that if either confirmation of receivables or observation of inventories is omitted because of a restriction imposed by the client, and such inventories or receivables are material, the auditor should modify the scope paragraph and indicate clearly in an explanatory paragraph the limitations on his work and, generally, should disclaim an opinion on the financial statements taken as a whole.

The word “generally” may be interpreted to exclude those situations in which inventories or receivables are material, but are not sufficiently material to require a disclaimer of opinion. SAS No. 58, paragraph 23, would appear to govern in such situations. The materiality of inventory would depend on other factors than just the ratio of inventory to total assets, involving among others the ratio of inventory not examined to stockholders’ equity for a statement of financial position and the ratio of inventory to income before taxes for a statement of operations. Unless circumstances are unusual, it is doubtful that inventories could be considered not material if they amount to as much as 10 percent of total assets.

It is conceivable that there might be circumstances where, although the scope of the audit omitted observation of inventories which were in excess of 10 percent of total assets, a qualified opinion on the financial statements might be appropriate. [Amended]

#### **.02 Auditor's Report if Inventories Not Observed—II**

*Inquiry*—An auditor has been engaged by a corporation on a limited scope basis. The engagement does not include any independent verification of the inventory. The auditor will not be present at any physical inventory taking and the pricing and clerical accuracy of the inventory will not be tested. The inventory is material in relation to the other accounts on the client’s financial statements.

What type of opinion can the auditor give under these circumstances?

*Reply*—The disclaimer of opinion in SAS No. 58, *Reports on Audited Financial Statements*, paragraph 63 (AU 508.63), is appropriate when the scope limitation precludes inventory observation and any other audit tests of the inventories.

The example shown in SAS No. 58, paragraph 63 (AU 508.63), is as follows:

(Introductory paragraph)

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained

earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.

(Second (scope) paragraph of standard report should be omitted)

(Explanatory paragraph)

The Company did not make a count of its physical inventory in 19X2 or 19X1, stated in the accompanying financial statements at \$..... as of December 31, 19X2, and at \$..... as of December 31, 19X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 19X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

(Disclaimer paragraph)

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements. [Amended]

## .06 Distinctions Between Scope Limitations

*Inquiry*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 24 (AU 508.24), states in part: "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements."

SAS No. 58, paragraph 24, footnote 13 (AU 508.24, footnote 13), states: "Circumstances such as the timing of his work may make it impracticable or impossible for the auditor to accomplish these procedures. In this case, if he is able to satisfy himself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of his work, and his report need not include a reference to the omission of the procedures or to the use of alternative procedures . . . ."

Based on the above excerpts, what is an appropriate auditor's report in each of the following situations:

Auditor is not permitted to confirm receivables but is able to satisfy himself by other means?

Auditor is not permitted to observe inventories but is able to satisfy himself by other means?

Is there a distinction between a client-imposed limitation regarding receivables or inventories and other client-imposed scope limitations?

*Reply*—If a client refuses to permit confirmation of receivables but the auditor is able to satisfy himself by other means, the auditor may express an unqualified opinion.

If a client refuses to permit observation of inventories but the auditor is able to satisfy himself (except as to physical quantities) by other means, the auditor cannot express an unqualified opinion. The client-imposed restriction does not enable the auditor to "make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions" in accordance with SAS No. 1, section 331, *Receivables and Inventories*, paragraph 12 (AU 331.12). SAS No. 58, paragraph 24, footnote 13 (AU 508.24, footnote 13), contemplates circumstances that are not related to any client-imposed restrictions, and are not within the control of either the client or the auditor.

SAS No. 58, paragraph 23 (AU 508.23), states: “The auditor’s decision to qualify his opinion or disclaim an opinion because of a scope limitation depends on his assessment of the importance of the omitted procedure(s) to his ability to form an opinion on the financial statements being audited. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the financial statements. If the potential effects relate to many financial statement items, this significance is likely to be greater than if only a limited number of items is involved.” Client-imposed limitations on confirmation of receivables and observation of inventories, and scope limitations in other areas should be evaluated on the basis of SAS No. 58, paragraph 23 (AU 508.23). Since SAS No. 1, section 331, is still in effect, the evidence needed to support receivables and inventories would generally cause auditors to treat scope limitations on these items differently from other scope limitations. The final determination of how to report client-imposed scope limitations can only be made by the independent auditor involved after considering all the surrounding circumstances. [Revised May 2007.]

### **.07 Inadequate Internal Control and Financial Records**

*Inquiry*—How should the auditor report that he has been unable, because of inadequate internal control and financial records, to satisfy himself that all transactions were recorded?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 22 (AU 508.22), which deals with scope limitations, states, in part:

Restrictions on the scope of his audit, whether imposed by the client or by circumstances such as the timing of his work, the inability to obtain sufficient appropriate audit evidence, or an inadequacy in the accounting records, may require him to qualify his opinion or to disclaim an opinion. In such instances, the reasons for the auditor’s qualification of opinion or disclaimer of opinion should be described in his report.

A disclaimer of opinion in this situation would be appropriate under SAS No. 58 (AU 508) if the effects of the inadequacy of internal control and the accounting records are sufficiently pervasive. Otherwise, a qualified opinion may be appropriate. [Revised May 2007.]

### **.09 Letter of Audit Inquiry Not Sent to Client’s Legal Counsel**

*Inquiry*—If a client refuses to send a letter of audit inquiry to its legal counsel, can the auditor express an unqualified opinion on the client’s financial statements?

*Reply*—SAS No. 12, *Inquiry of a Client’s Lawyer Concerning Litigation, Claims, and Assessments*, paragraph 6 (AU 337.06), states:

... the auditor should request the client’s management to send a letter of inquiry to those lawyers with whom they consulted concerning litigation, claims, and assessments.

SAS No. 12, paragraph 7 (AU 337.07), indicates certain other procedures that might also disclose litigation, claims, and assessments. Failure to send a letter of audit inquiry to legal counsel, when otherwise indicated, is a scope limitation which would ordinarily require the auditor to express other than an unqualified opinion.

**.10 Effect of Generally Accepted Accounting Principles (GAAP)  
Departures on Limited Scope Engagements**

*Inquiry*—The auditor of a company is unable to observe physical inventory at year end due to a restriction imposed by the client. Because the inventory is material, the auditor plans to issue a disclaimer of opinion on the financial statements in accordance with SAS No. 58, *Reports on Audited Financial Statements*, paragraph 61 (AU 508.61).

The auditor also discovers significant mathematical errors in the client's last-in, first-out (LIFO) provision in the prior year. The auditor advises the client to report the error as a prior period adjustment in accordance with APB Opinion No. 20, *Accounting Changes* and APB Opinion No. 9, *Reporting the Results of Operations* (as amended by FASB Statement No. 16, *Prior Period Adjustments*). If the client refuses to do so, the auditor is now faced with a GAAP departure and a disclaimer of opinion—both related to the company's inventory.

How would the GAAP departure affect the auditor's disclaimer of opinion?

*Reply*—Assuming the auditor decided not to withdraw from the engagement, the guidance in SAS No. 58, paragraph 61 (AU 508.61), should be followed. That paragraph discusses disclaimers of opinion and states that the auditor "... should also disclose any other reservations he has regarding fair presentation in conformity with generally accepted accounting principles."

---

[The next page is 9241.]

## Section 9150

# Compilation and Review Engagements

### .01 Compiled Financial Statements Not Adjusted

*Inquiry*—An accountant processes client input on a computer and produces monthly statements that do not include adjustments for changes in inventories, prepayments, and accruals, and do not include notes. Adjustments are recorded annually. Can the accountant state in his report that adjustments to make the statements not misleading have not been made?

*Reply*—No. The specific departures from GAAP must be disclosed. SSARS 1, *Compilation and Review of Financial Statements*, paragraphs 39 and 41 (AR 100.41 and .43), are clear that the accountant must consider whether a modified report is adequate to disclose the departures. SSARS 1, paragraph 40 (AR 100.42) describes the form of report when the accountant concludes that a modified report is appropriate. The departures should be disclosed in a separate paragraph, including the effects of the departures on the financial statements, if known to the accountant, or he should state that the effects have not been determined.

### .02 Inquiries for a Review Engagement

*Inquiry*—SSARS 1, *Compilation and Review of Financial Statements*, Appendix A (AR 100.58), lists certain suggested inquiries for a review engagements. Is a “yes” or “no” response sought?

*Reply*—Appendix A (AR 100.58) states that the list is not intended to serve as a checklist, but to describe the general areas in which inquiries might be made. The inquiries in Appendix A (AR 100.58) are presented for illustrative purposes only. They do not necessarily apply to every engagement, nor are they meant to be all-inclusive. The accountant has to bear in mind that he must achieve limited assurance about the financial statements. His inquiry and analytical procedures should be designed to provide him with that assurance. A review should not be treated as a mechanical exercise to obtain “yes” or “no” answers to the illustrative inquiries. The accountant should exercise professional judgment based on all relevant circumstances in designing his inquiries and evaluating responses. While some of the inquiries can be answered “yes” or “no,” others cannot because they are asking “what are the procedures . . .”

### .04 Financial Statements Marked As “Unaudited”

*Inquiry*—Should each page of compiled or reviewed financial statements of nonpublic companies be marked “unaudited”?

*Reply*—No. SSARS 1, *Compilation and Review of Financial Statements* (AR 100), does not require that each page of compiled or reviewed financial statements of a nonpublic entity be marked as “unaudited.” Before SSARS 1 (AR 100) was issued, it was common practice to mark each page as “unaudited”; however, this practice was discontinued after SSARS 1 (AR 100) was issued because the phrase “unaudited” does not communicate to the reader the financial statement service performed.

SSARS 1 (AR 100) does require, however, that each page of the financial statements include a reference such as "See Accountant's Compilation Report" (AR 100.13) or "See Accountant's Review Report" (AR 100.36), as appropriate. [Amended February 1995]

## **.08 Supplementary Information**

*Inquiry*—Are supporting schedules of balance sheet or income statement accounts considered supplementary information? If so, what are the reporting requirements in a review or compilation engagement?

*Reply*—SSARS 1, *Compilation and Review of Financial Statements*, paragraph 43 (AR 100.45), pertains to reporting on supplementary information that accompanies the basic financial statements in a review or compilation engagement. The basic financial statements are usually considered to be the balance sheet, statement of income, statement of retained earnings or changes in stockholders' equity, and statement of cash flows. Descriptions of accounting policies and notes to financial statements are also considered part of the basic financial statements and are usually identified as such, for example, by a legend on the balance sheet, etc., indicating that the notes are an integral part of the financial statements. If supporting schedules of balance sheet or income statement accounts are not identified as being part of the basic financial statements, they are considered supplementary information.

If the information does not accompany the basic financial statements, it is not supplementary information. Under SSARS 1, paragraph 4 (AR 100.04), it does not meet the definition of a financial statement, and therefore, the accountant does not have a reporting obligation. However, the accountant may want to issue a report to clarify his or her responsibility. This can be done by modifying the standard compilation report (SSARS 1, paragraph 17 (AR 100.15)) to refer to the schedules. [Amended]

## **.09 Application of SSARS 3 to Certain Companies Required to File With Regulatory Bodies**

*Inquiry*—Some nonpublic entities, as defined in SSARS 2, *Reporting on Comparative Financial Statements*, paragraph 1, footnote 2 (AR 200.01, footnote 2), such as privately owned brokers or dealers in securities, may be required to include unaudited financial statements in a form prescribed by a regulatory body concerned with the sale or trading of securities, such as the National Association of Securities Dealers or the New York Stock Exchange. Does the first sentence of SSARS 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms*, paragraph 2 (AR section 300.02), preclude an accountant from using the alternative form of report illustrated in SSARS 3 (AR 300) in those circumstances?

*Reply*—No. SSARS 3, paragraph 2, excludes from the definition of a prescribed form those forms "... concerned with the sale or trading of securities." In that context, "securities" refers to those issued or to be issued by the entity submitting the prescribed form. Accordingly, an accountant is not precluded in the circumstances described in this question from using the alternative form of compilation report illustrated in SSARS 3 if the entity is not submitting the prescribed form in connection with the actual or contemplated sale or trading of its own securities.

**.10 Review of Financial Statements Included in a Prescribed Form**

*Inquiry*—SSARS 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms*, paragraph 3, states that “in the absence of a requirement or a request for a review report on the financial statements included in a prescribed form, the following form of standard compilation report may be used when the unaudited financial statements of a nonpublic entity are included in a prescribed form that calls for departure from generally accepted accounting principles . . .” Can an accountant perform a review of financial statements included in a prescribed form that are presented on a basis other than generally accepted accounting principles?

*Reply*—A review can be performed on the financial statements included in a prescribed form prepared under any comprehensive basis of accounting (as defined in SAS No. 62, *Special Reports*, paragraph 4), but SSARS 1, *Compilation and Review of Financial Statements*, reporting standards would apply, not those in SSARS 3. SSARS 3, paragraph 1, states in part:

The requirements of SSARS 1 and SSARS 2 are applicable when the unaudited financial statements of a nonpublic entity are included in a prescribed form. This statement amends SSARS 1 and SSARS 2 to provide for an alternative form of standard compilation report when the prescribed form or related instructions call for departure from generally accepted accounting principles by specifying a measurement principle not in conformity with generally accepted accounting principles or by failing to request the disclosures required by generally accepted accounting principles.

Accordingly, where the prescribed form calls for the departures referred to above, a review report expressing limited assurance under SSARS 1 would be appropriate provided that, as required by SSARS 1, paragraph 40 (AR 100.41), the review report discloses the departures from generally accepted accounting principles, including the departures called for by the prescribed form.

**.11 Computer Generated Financial Statements**

*Inquiry*—A firm recently purchased a new computer which will enable it to have some of its clients access this computer via a phone terminal in their office. The client will input all information into the firm's computer including journal entries and will be able to prepare its own financial statements which will be received via the client's phone terminal. No one in the accounting firm directly inputs data into the computer or sees the financial statements. Is the accounting firm required to attach a compilation report for this type service?

*Reply*—No. If the client directly inputs data from its office into the computer and generates the financial statements in the client's office directly from the computer, the firm does not have a reporting responsibility. However, if the financial statements are generated by the CPA in the firm's office, there is a reporting responsibility as discussed in SSARS 1, *Compilation and Review of Financial Statements*, paragraph 7. [Amended]

**.12 Use of Other Comprehensive Basis of Accounting (OCBOA) for Interim Financial Statements and Generally Accepted Accounting Principles (GAAP) for Annual Financial Statements**

*Inquiry*—What are the reporting implications when a client uses OCBOA for interim financial statements and GAAP for annual statements?

*Reply*—A privately-held company may use OCBOA for interim financial statements and GAAP for annual financial statements. However, the report on interim financial statements should be prepared in accordance with the requirements of SAS No. 62, *Special Reports* (AU 623).

For publicly-traded companies, APB Opinion No. 28, *Interim Financial Reporting*, paragraph 10, states in part, “the results for each interim period shall be based on the accounting principles and practices used by an enterprise in the preparation of the latest annual financial statements unless a change in an accounting practice or policy has been adopted in the current year.” Therefore, for publicly-held companies, OCBOA reporting for interim financial statements would not be allowed. [Amended]

#### .14 Uncertainties/Going Concern Problems

*Inquiry*—SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU 341), provides guidance on that subject as it would affect the auditor's report under SAS No. 58, *Reports on Audited Financial Statements* (AU 508). What is the appropriate guidance on how to deal with uncertainties under the statements on standards for accounting and review services?

*Reply*—SSARS 1, *Compilation and Review of Financial Statements*, footnote 18 (AR 100.42, footnote 23), states that “normally, neither an uncertainty nor an inconsistency in the application of accounting principles would cause the accountant to modify the standard report provided the financial statements appropriately disclose such matters.” Accordingly, disclosure of this uncertainty in a footnote to the financial statements would satisfy this requirement. SSARS 1, footnote 18 (AR 100.42, footnote 23), further states, “nothing in this statement, however, is intended to preclude the accountant from emphasizing in a separate paragraph of his report a matter regarding the financial statements.”

The last two paragraphs of Interpretation No. 11 of SSARS 1 (AR 9100.33 through .40), “Reporting on Uncertainties,” indicates there is no requirement to disclose an uncertainty in the accountant's report, under certain conditions, when management has elected to omit substantially all disclosures required by generally accepted accounting principles. [Amended]

#### .15 Consistency

*Inquiry*—A correction of an error in previously issued financial statements is treated as a prior period adjustment, in accordance with FASB Statement No. 16, *Prior Period Adjustments* (AC A35). SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph 11 (AU 420.11), discusses a correction of an error in principle and states that a change from an accounting principle that is not generally accepted to one that is generally accepted, including correction of a mistake in the application of a principle, is a correction of an error. Although this type of change in accounting principle should be accounted for as the correction of an error, the change requires recognition in the auditor's report through the addition of an explanatory paragraph. How is this consistency issue treated in compilation and review engagements?

*Reply*—SSARS 1, *Compilation and Review of Financial Statements*, footnote 18 (AR 100.42, footnote 23), states that “Normally, neither an uncertainty, including an uncertainty about an entity's ability to continue as a going con-

cern, nor an inconsistency in the application of accounting principles would cause the accountant to modify the standard report provided the financial statements appropriately disclose such matters.” Accordingly, disclosure of this inconsistency in a footnote to the financial statements would satisfy this requirement. SSARS 1, footnote 18 (AR 100.42, footnote 23), further states, “. . . nothing in this statement, however, is intended to preclude an accountant from emphasizing in a separate paragraph of his or her report a matter regarding the financial statements.” [Amended]

### **.16 Reference to Accountant’s Report in Notes to Financial Statements**

*Inquiry*—SSARS 1, *Compilation and Review of Financial Statements*, paragraphs 16 and 34 (AR 100.13 and .36), requires that each page of the financial statements compiled or reviewed by the accountant include a reference such as “See Accountant’s Compilation (or Review) Report.”

Does this requirement extend to the related notes to the financial statements?

*Reply*—The application of this requirement varies in practice.

Some accountants believe that since the related notes to financial statements are an integral part of the basic financial statements, at least the first page of the notes should include a reference to the accountant’s report.

Other accountants believe that if the basic financial statements, other than footnote disclosures, contain a statement indicating that the notes to financial statements are an integral part of the statements, it is not necessary to include a reference to the accountant’s report on note pages.

### **.18 Bank Engaged a CPA Firm to Compile a Financial Statement of Another Entity**

*Inquiry*—A bank has engaged a CPA firm to compile a balance sheet for another entity. The bank has possession of the books and records of the entity. Can the firm issue a compilation report under such circumstances?

*Reply*—There is nothing in the Statements on Standards for Accounting and Review Services which precludes the CPA firm from issuing a compilation report under such circumstances. However, SSARS 1, *Compilation and Review of Financial Statements*, paragraph 11 (AR 100.08), states: “To compile financial statements, the accountant should possess a general understanding of the nature of the entity’s business transactions, the form of its accounting records, the stated qualifications of its accounting personnel, the accounting basis on which the financial statements are to be presented, and the form and content of the financial statements.” Due to the nature of the engagement, the CPA firm may not be able to attain a sufficient level of understanding of the entity’s business as required by SSARS 1, paragraph 11 (AR 100.08), to issue a compilation report on the balance sheet, nor obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed, as required by Rule 201(D) of the AICPA Code of Professional Conduct (ET 201.01D). (See SSARS 1, paragraph 3.) [Amended]

### **.19 Issuance of an Audit Report on Financial Statements Which Have Already Been Reviewed**

*Inquiry*—If an accountant has issued a review report on a set of financial statements may he later issue an audit report on the same set of financial statements?

*Reply*—Yes. Interpretation No. 3 of SSARS 1, *Compilation and Review of Financial Statements* (AR 9100.06 through .12), states that SSARS 1 does not prohibit the accountant from accepting an engagement to perform a higher level of service with respect to financial statements that have been previously compiled or reviewed.

## **.20 Reissuance When Not Independent**

*Inquiry*—An accountant performed a review in the prior year and a compilation in the current year. He was independent in the prior year but impaired his independence in the current year. May he reissue his review report on the prior year financial statements?

*Reply*—Yes. SSARS 2, *Reporting on Comparative Financial Statements*, paragraph 8 (AR 200.08), states in part, “A continuing accountant who performs a lower level of service with respect to the financial statements of the current period should either (a) include as a separate paragraph of his report a description of the responsibility assumed for the financial statements of the prior period . . . or (b) reissue his report on the financial statements of the prior period.” The separate paragraph referred to in item (a), above, includes a statement that the accountant has not performed any procedures in connection with the prior period review engagement after the date of his review report as reflected in the example in SSARS 2, paragraph 12 (AR 200.12).

## **.24 Issuing a Compilation Report With Substantially All Disclosures Omitted After Issuing a Report on Financial Statements Containing Full Disclosure**

*Inquiry*—A client wants to submit financial statements with substantially all disclosures omitted to one of its vendors. May the accountant issue a compilation report on those financial statements with substantially all disclosures omitted, if he or she previously issued an audit, review, or compilation report on financial statements with full disclosure for the same reporting period?

*Reply*—Generally, yes. This issue is not specifically addressed by the authoritative literature. However, SSARS 1, paragraph 19 (AR 100.16), provides indirect guidance on this matter. It states that an accountant may compile financial statements that omit substantially all disclosures provided the omission of the disclosure is clearly indicated in the report and is not, to the accountant’s knowledge, undertaken with the intention of misleading those who might reasonably be expected to use the financial statements.

If the accountant believes that the client’s intent is to mislead users, the accountant should *not* comply with the request. However, if the accountant concludes that it is not the client’s intent to mislead users, it would be appropriate to compile financial statements with substantially all disclosures omitted after having compiled, reviewed, or audited full-disclosure financial statements.

Some practitioners are reluctant to compile financial statements they have previously audited or reviewed because the accountant’s compilation report will read:

I have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

They conclude that the disclaimer in the report would be misleading to financial statement users in these circumstances because the accountant has, in fact, audited or reviewed the financial statements. They believe the aforementioned disclaimer precludes the accountant from compiling financial statements after auditing or reviewing them. The disclaimer in the compilation report, however, is intended to be engagement-specific and, therefore, refers only to the financial statements that accompany the accountant's report. Therefore, the disclaimer language does not present a reporting problem for the current engagement.

---

[The next page is 9261.]

## Section 9160

### Other Reporting Issues

#### .02 Furnishing Unbound Reports to Clients

*Inquiry*—A CPA gets numerous requests from clients for a set of unbound financial statements along with the usual bound sets. The unbound copy is usually reproduced on their copying machines for periodic distribution to suppliers and others. Should the CPA continue to provide these unbound statements?

*Reply*—This practice is dangerous since the CPA is assisting in the reproduction of his report without control over such reproduced copies. It would be preferable if he agreed to provide any additional copies of the report which may be required, thus controlling the assembly of the reproduced reports.

#### .03 Dates on Cover for Financial Statements

*Inquiry*—SAS No. 26, *Association With Financial Statements*, paragraph 15, specifies that an auditor's report disclose that prior year financial statements presented for comparative purposes are unaudited. Is it appropriate to include the dates of both the current year and prior year financial statements on the cover of the financial statements?

*Reply*—Both years may be included on the cover if the financial statements for the prior year are referred to as unaudited. [Amended]

#### .06 Break-Even Financial Statements

*Inquiry*—Company A requested compiled financial statements with an inventory reported so that the financial statements would reflect no profit or loss ("break-even financial statements"). How would this affect the accountant's compilation report?

*Reply*—"Break-even financial statements" are not in accordance with generally accepted accounting principles. Accordingly, the independent accountant would have to express a reservation in his compilation report because of the departure from generally accepted accounting principles as required by SSARS 1, *Compilation and Review of Financial Statements*, paragraph 40.

#### .07 Financial Statements Cover Period Longer Than Twelve Months

*Inquiry*—Is it acceptable for an auditor to express an opinion on financial statements covering a period longer than twelve months?

*Reply*—It is acceptable provided the title of the financial statements is descriptive of the period covered and the auditor's report clearly indicates the period covered by the financial statements.

#### .08 Title of Auditors' Report

*Inquiry*—Does the auditor's opinion require a title?

*Reply*—SAS No. 58, *Reports on Audited Financial Statements*, paragraph 8 (AU 508.08), states, "... The basic elements of the report are the following: a. A title that includes the word independent . . . ." Footnote 3 of SAS No. 58

(AU 508.08, footnote 3) states, "This Statement does not require a title for an auditor's report if the auditor is not independent . . ." Therefore, if the auditor is independent, the auditor's opinion must have a title which includes the word independent.

#### **.10 Distinction Between Internal and General Use of Financial Statements**

*Inquiry*—Are financial statements differentiated between internal and general use in the professional reporting literature?

*Reply*—Internal use by management and general use of financial statements are no longer differentiated for historical financial statements. However, the distinction between general and internal use is made for financial forecasts and projections.

#### **.14 Part of Audit Performed by Another Independent Auditor Who Has Ceased Operations**

*Inquiry*—If an auditor who has ceased operations audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in an entity's financial statements, may the principal auditor make reference in his or her report to the audit of that auditor or assume responsibility for that auditor's work in accordance with SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors*?

*Reply*—The principal auditor may make reference to the audit of another auditor, or assume responsibility for that auditor's work, only if the other auditor has issued an audit report and the principal auditor has completed the procedures required by SAS No. 1, section 543 prior to the time that the other auditor ceased operations. The procedures described in SAS No. 1, section 543 cannot be appropriately performed after the other auditor has ceased operations. In situations in which the principal auditor cannot use the work of the other auditor in accordance with SAS No. 1, section 543, the principal must perform audit procedures sufficient to afford a reasonable basis for an opinion on the financial statements under audit. However, review of the other auditor's working papers may have an effect on the nature, timing, and extent of those procedures.

#### **.21 Fiscal Years for Tax and Financial Reporting Purposes Differ**

*Inquiry*—Can an entity have different fiscal years for tax and reporting purposes?

*Reply*—There is no requirement in the accounting literature for the tax and the financial reporting year-end to be the same. However, having different fiscal years complicates further any interperiod tax allocation the entity may have.

#### **.22 Location Where Report is Issued**

*Inquiry*—Is there a requirement to indicate the city and state where an accountant's report is issued?

*Reply*—The AICPA professional standards do not include such a requirement. However, some SEC regulations require the disclosure. For example, SEC Regulation S-X, section 210.2-02, states, in part, "... the Accountant's Report shall indicate the city and state where issued."

**.23 Distinction Between Supplemental Information and Basic Financial Statement Information in an Auditor-Submitted Document**

*Inquiry*—What is an appropriate means of distinguishing between information to be considered a part of the basic financial statements and supplementary information in an auditor-submitted document?

*Reply*—If the basic financial statements refer to specific information (i.e., ‘See Exhibit A—Schedule of Operating Expenses’), such information is considered to be a part of the basic statements and is presumed to have been subjected to the auditing procedures applied to the basic financial statements. This information is therefore not required to be reported on separately and should not be referred to in the auditors’ report. Any additional information presented with the basic financial statements, but not referred to in such statements, should be considered supplementary information unless described otherwise. Such supplementary information should be reported on in accordance with the requirements of SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AU 551).

**.24 Required Presentation of the Statement of Stockholders’ Equity**

*Inquiry*—Is the statement of stockholders’ equity required when financial position and results of operations are presented?

*Reply*—Disclosure of changes in capital accounts and retained earnings is required. According to APB Opinion No. 12, *Omibus Opinion—Capital Changes*, paragraph 10 (AC C08.102), “when both financial position and results of operations are presented, disclosure of changes in the separate accounts comprising stockholders’ equity (in addition to retained earnings) . . . is required to make the financial statements sufficiently informative. Disclosure of such changes may take the form of separate statements or may be made in the basic financial statements of notes thereto.”

**.25 Use of Singular v. Plural Terminology for Accountants and Auditors**

*Inquiry*—In reporting on audited, reviewed, or compiled financial statements, should accountants use singular or plural terminology when referring to themselves?

*Reply*—Use of plural or singular terminology is not addressed in the professional standards. Illustrative auditors’ reports in Statements on Auditing Standards use plural terminology, while the accountants’ reports in Statements on Standards for Accounting and Review Services use both singular and plural.

In practice, sole practitioners often use singular terms; firms that have one partner with professional staff use both singular and plural; and firms that have more than one partner most often use plural. However, the use of singular or plural references to the accountant or auditor is purely discretionary. For ease of report preparation, firms should be consistent in their use of singular or plural in all reports.

**.26 Compilation and Review—Comparative Financial Statements**

*Inquiry*—A nonpublic entity’s financial statements for the year ended December 31, 19X1 were compiled by a predecessor accountant. Management had elected to omit substantially all of the disclosures and the statement of cash flows required by generally accepted accounting principles (GAAP).

A successor auditor is engaged to audit the 19X2 financial statements, and the client has asked the auditor to include the 19X1 compiled financial statements for comparative purposes with the 19X2 financial statements.

Is the successor auditor permitted to do this?

*Reply*—No. SSARS 2, *Reporting on Comparative Financial Statements*, paragraph 5 (AR 200.05), states that compiled financial statements that omit substantially all of the disclosures required by GAAP are not comparable to financial statements that include such disclosures.

The 19X1 financial statements would need to be revised to include the statement of cash flows and all disclosures required by GAAP. Either the predecessor or the successor accountant would then need to at least compile the full disclosure financial statements for 19X1.

	.03 Reporting on New York State Medicaid Cost Reports

---

**[The next page is 9521.]**

## Section 9510

### Attestation Reports

#### **.01 Testing Prospective Financial Information as Part of Performing Auditing Procedures**

*Inquiry*—Generally Accepted Accounting Principles (GAAP) require that certain accounts be carried at or adjusted to fair value. Many fair value models are based on the present value of future cash flows or earnings. In making those fair value calculations, management may seek the auditor's assistance in developing what may be considered either a full or partial financial forecast. In testing an entity's fair value calculation, an auditor might test management's assumptions including, for example future cash flows for the next five years. Similarly, the auditor may make an independent estimate of fair value, for example, by using a cash flow model developed and prepared by the auditor.

Does the auditor's assistance in developing or preparing prospective cash flows require the auditor to examine or compile such information in accordance with Statements on Standards for Attest Engagements (SSAEs)?

*Reply*—No. SSAE 10, Chapter 1, paragraph .01 (AT 101.01), states that the attest standards apply when a practitioner is "engaged to issue or does issue an examination...." Accordingly, the auditor would not be required to follow the SSAEs unless the auditor has also been engaged to examine, compile, assemble or apply agreed upon procedures to prospective financial information or the auditor issues an examination, compilation, assembly or agreed upon report on prospective financial information.

#### **.02 Availability of Criteria for a Fee**

*Inquiry*—A practitioner may perform an attestation engagement only if he or she has reason to believe that the subject matter is capable of evaluation against criteria that are suitable and available to users. Statement on Standards of Attest Engagements (SSAE) 10, Chapter 1, paragraph .33 (AT 101.33), states in part that criteria should be available to users in one or more of a number of ways, including available publicly. Paragraph .34 (AT 101.34) goes on to say "If criteria are only available to specified parties, the practitioner's report should be restricted to those parties who have access to the criteria as described in paragraphs .78 and .80 (AT 101.78 and .80)." If criteria is only available for a fee, is it considered available publicly for the purpose of paragraphs AT 101.33–.34?

*Reply*—Yes, as long as the criteria is available to any person in the normal course of business, it is considered available publicly. This would include certain industry associations and other organizations that make criteria available free of charge to their members but charge a fee to nonmembers.

#### **.03 Reporting on New York State Medicaid Cost Reports**

On June 27, 2006, the New York State Department of Health ("DOH") issued a prescribed "Opinion of Independent Accountant" (the "Cost Report Opinion") that is required to be utilized by CPAs reporting on audits and attestation engagements associated with a nursing home's filing of its Annual Report of Residential Health Care Facility (RHCF-4). The purpose of this Technical

Practice Aid (“TPA”) is to provide clarity to CPAs performing these engagements. This TPA also may be useful to a CPA performing audits and attestation engagements for the purpose of reporting on an Annual Institutional Cost Report of Hospitals and Hospital Healthcare Complexes and other cost reports filed with the New York State Department of Health or other New York State agencies.

The Cost Report Opinion as prescribed by the DOH references certain data in the facility’s RHCF-4 cost report (the “supplemental data”). The Cost Report Opinion includes three separate opinions:

1. An opinion on the facility’s financial statements (displayed as schedules within the cost report) based on an audit conducted in accordance with generally accepted auditing standards.
2. A SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor Submitted Documents* (AU 551), opinion on whether the supplemental data is stated fairly in all material respects in relation to the basic financial statements taken as a whole.
3. An opinion under the attestation standards (the “attestation opinion”) on the supplemental data’s conformity with the DOH cost report instructions.

The required format of the Cost Report Opinion, as prescribed by the DOH, is attached as Exhibit A. The AICPA staff understands that all DOH Cost Reports, including the Annual Institutional Cost Report of Hospitals and Hospital Healthcare Complexes, within New York State will include similar language.

The Cost Report Opinion contains certain terminology that differs from the language found in AICPA professional standards and therefore may be unclear to practitioners. AICPA staff held conversations with the DOH for the purpose of better understanding their views about these wording differences and their expectations about the procedures a CPA would perform to issue the Cost Report Opinion. The following responses are those of AICPA staff based on their understanding of the requirements and expectations of the DOH.

Four issues are addressed in this Technical Practice Aid:

1. The CPA’s consideration of materiality in completing the attestation engagement.
2. The meaning of the term “certification” in the Cost Report Opinion, and its impact on the CPA’s procedures.
3. The Independence Standards that the CPA is expected to adhere to in the performance of the engagement.
4. Dating the CPA’s report.

**Inquiry**—The attestation opinion contained in the Cost Report Opinion reads as follows:

In our opinion, the above supplemental data are in all material respects in conformity with the applicable instructions relating to the preparation of the RHCF-4 as furnished by the New York State Department of Health for the year ended Month XX, 20XX.

With respect to the attestation opinion’s phrase, “in all material respects,” may a CPA utilize materiality applied at the financial statement level to plan the scope of the attestation procedures, or in the evaluation of misstatements, if any, that are identified through the attestation procedures?

*Reply*—No. The AICPA staff understands that the DOH believes that the use of materiality applied at the financial statement level would not be appropriate for planning or performing attestation procedures related to cost report instructions, or for evaluating any misstatements identified related to conformity with cost report instructions. Rather, the AICPA staff's understanding is that materiality should be determined and applied at the individual schedule level. Accordingly, the DOH expects the CPA to perform procedures on line items, columns, and totals in the specific schedules covered by the CPA's attestation opinion to be able to opine that the financial and statistical data presented on each schedule has been prepared in conformity, in all material respects as determined at the individual schedule level, with the applicable instructions. As a result, the CPA ordinarily will perform procedures beyond those performed in the audit of the financial statements with respect to certain amounts included in the supplemental data. These additional procedures result from the application of a lower materiality level for procedures performed on information included in the individual schedules as compared to the materiality level applied in the financial statement audit.

The CPA may consider attestation risk and materiality in applying his or her professional judgment in determining the nature, timing and extent of attestation procedures for testing the financial and statistical data. The CPA's risk assessment should give consideration to the effects of whether amounts in a particular schedule are either understated or overstated. The quantity of attestation evidence needed is affected by the risk of misstatement (items presenting greater risk likely will require evaluation of attestation evidence beyond that deemed necessary for purposes of the financial statement audit) and by the quality of such attestation evidence. In determining the nature, timing and extent of attest procedures to perform, the CPA may give consideration to:

1. His or her assessment of the facility's policies and procedures related to the preparation of the cost report in accordance with the applicable instructions and,
2. Deficiencies related to internal control over the preparation of the cost report (which may differ from internal control over financial reporting evaluated for purposes of the financial statement audit).

In addition to the above considerations, the CPA may focus his or her testing on those amounts, line items, or schedules that impact the facility's reimbursement or rate setting most significantly.

The purpose of testing the supplemental data is to obtain sufficient appropriate attestation evidence to provide a reasonable basis for the CPA's opinion on whether the financial and statistical data in the schedules is in conformity, in all material respects as determined at the individual schedule level, with the applicable instructions. The CPA will have performed audit procedures directed toward evaluating certain amounts included in the supplemental data in connection with the audit of the facility's financial statements. The CPA may consider the results of those procedures in determining the nature, timing and extent of additional work necessary because of a lower materiality level for individual schedules compared to the materiality level for the financial statements.

The CPA ordinarily would select individual amounts from the supplemental data to examine based on the risk of misstatement or departure from the cost report instructions or by applying sampling. A combination of both selection techniques as described below may be necessary to provide the CPA with sufficient appropriate attestation evidence relative to the supplemental data.

The CPA may select amounts to test based on the risk of material misstatement associated with the reimbursement or rate-setting impact of a particular amount, line item, or schedule. For example, the costs associated with non-moveable equipment may have a greater impact on rate setting when compared with major moveable equipment. Accordingly, the CPA may determine that it is necessary to obtain more attestation evidence related to costs for non-moveable equipment. Factors influencing the CPA's assessment of risk might include the facility's history of misstatements in the cost report, the complexity associated with the preparation of a schedule and the effectiveness of management's internal control over the preparation of the applicable cost report schedules.

The CPA may select amounts to test utilizing sampling. The CPA uses his or her professional judgment to determine when it may be appropriate to use sampling and the sample size.

The CPA's procedures ordinarily will include agreeing individual supplemental data amounts, as appropriate, to related audit documentation or the audited financial statements, or to the general ledger, sub-ledgers, or client analyses prepared in support of the cost report schedules. In addition, the CPA's procedures ordinarily will include substantive procedures applied to selected supplemental data amounts, which are designed to identify material misstatements at the individual schedule level. Substantive procedures include tests of details and substantive analytical procedures. For example, the CPA might select supplemental data amounts and compare them to vendor's invoices or analytically compare the relationship of amounts and current year expectations.

As a result of procedures performed, the CPA may identify departures from the cost report instructions. In that case, the CPA would need to re-consider his or her initial risk assessment and determine whether additional procedures need to be performed. If departures from the cost report instructions are not corrected by facility management, the CPA would consider whether such departures result in the CPA opining that there is a material departure from the cost report instructions.

*Inquiry*—The Cost Report Opinion includes the following paragraph:

The undersigned hereby certifies this opinion and that I/we have disclosed any and all material facts known to me/us, disclosure of which is necessary to make this opinion, the basic financial statements and the supplemental data not misleading. The undersigned hereby further certifies that I/we will disclose any material fact discovered by me/us subsequent to this certification which existed at the time of this certification and was not disclosed in the basic financial statements or the supplemental data, the disclosure of which is necessary to make the basic financial statements or the supplemental data not misleading and will disclose any material misstatement in said financial statements or supplemental data.

Given that the terms "certifies" and "certification" are not defined in AICPA professional standards, should the CPA perform additional procedures beyond those contemplated by Statements on Auditing Standards (SASs) and Statements on Standards for Attestation Engagements (SSAEs) in order to provide a "certification"? Additionally, since the financial statements and supplemental schedules are the responsibility of management, what is the CPA's responsibility with respect to information discovered subsequent to the certification's report date?

*Reply*—New York State Public Health Law Section 2808-b states in part "All financial statements or financial information...shall be certified in their entirety by an independent public accountant...." Although the phrase "certifies

this opinion” does not appear in AICPA professional standards, there is nothing in the concept of a certification that would be in conflict with or contrary to those standards. The CPA may consider the phrase “certifies this opinion” to be the equivalent of rendering or expressing an opinion. However, it is the responsibility of the CPA to determine, and take any and all steps that are necessary and proper, in order to be able to appropriately sign the Cost Report Opinion.

Public Health Law 2808-b further states that “Subsequent to such certification (the CPA should disclose) any material fact discovered by him which existed at the time of such certification...which is necessary to make the financial statements or financial information not misleading...” If the CPA becomes aware of information, which relates to the audited financial statements or supplemental schedules previously reported on by him or her, but which was not known to the CPA at the date of the Cost Report Opinion, and such subsequently discovered information is deemed to be necessary to make the basic financial statements not misleading, the CPA should ensure that such subsequently discovered information is communicated to the DOH. AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, provides that the CPA should request the client to communicate such information to the DOH. However, the CPA retains the responsibility to ensure that such information is communicated to the DOH—whether by the client or the CPA. In fulfilling this responsibility, if the client refuses to make such communication the CPA should notify the DOH of the information and that the Cost Report Opinion should no longer be relied upon.

**Inquiry**—The Cost Report Opinion is titled “Opinion of Independent Accountant” and includes the following paragraph:

During the period of this professional engagement, at the time of expressing this opinion, and during the period covered by the financial statements I/we did not have nor were committed to acquire, any direct financial interest or material indirect financial interest in the ownership or operation of the facility and I/we were not connected in any way with the ownership, financing or operation of the facility as a director, officer or employee, or in any capacity other than as an independent certified public accountant or independent public accountant.

What independence requirements are expected to be followed in conducting the engagements contemplated by the Cost Report Opinion?

**Reply**—The CPA should follow Independence Standards as issued by the AICPA and that are codified in the AICPA *Code of Professional Conduct* as well as any independence standards issued by the N.Y. Board of Accountancy.

**Inquiry**—The engagements underlying the Cost Report Opinion may have different dates for completion of field work. For example, the audits of the financial statements and the supplemental data in relation to the basic financial statements taken as a whole may have been completed (and the CPA's opinions thereon rendered) before the CPA completes the work related to the attestation opinion. In those situations, may the Cost Report Opinion be dual-dated?

**Reply**—Yes. Although dual-dating is not required, the Cost Report Opinion may be dual dated for the attestation opinion as follows:

[Date], except for our examination of the conformity of specified data with the instructions for the year ended December 31, 20XX, as to which the date is [Date].

NAME OF CONTROLLER OR CHIEF FISCAL OFFICER

Opinion of Independent Accountant

We have audited the balance sheet of \_\_\_\_\_ as of December 31, 2004 and the related statements of operations, changes in net assets or equity and cash flows for the year then ended included as Exhibits A through E (the basic financial statements), except for lines 041, 042 and 043 of Exhibit E of Part IV of the accompanying Annual Report of Residential Health Care Facility (RHCF-4) identified by Declaration Control Number \_\_\_\_\_. These financial statements are the responsibility of the facility management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the aforementioned financial statements present fairly, in all material respects, the financial position of \_\_\_\_\_ as of December 31, 2004 and the results of its operations, changes in net assets or equity and its cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as whole. The following supplemental data, which are the responsibility of the facility management, are presented for the purpose of additional analysis and are not required as part of the basic financial statements identified by Declaration Control Number \_\_\_\_\_.

- PART I—STATISTICAL DATA
- Bed Capacity—Patient Days, Line 017
- PART II—CROSSWALK
- Schedule 7, Column 0161
- Schedules 8 through 11, except for Schedule 8C, Lines 010 through 035

**PART IV—UNIFORM REPORT**

Exhibit H, except Columns 0034–0044, Lines 054–057, 060–069 and 090

Exhibit I

Schedule 4, except Columns 0114–0122, Lines 054–057, 060–069 and 090

Schedule 6

The above supplemental data have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are stated fairly in all material respects when considered in conjunction with the basic financial statements included as Exhibits A through E of the RHCF-4, taken as a whole.

Our procedures were not intended to determine compliance with, and therefore would not necessarily disclose deviations from, reporting requirements contained in the New York State Residential Health Care Facility Accounting and Reporting Manual.

The other information included on Parts I, II, III and IV of the Annual Report of Residential Health Care Facility (RHCF-4) identified by Declaration Control Number \_\_\_\_\_, (not detailed in the preceding paragraphs), was not audited by us and, accordingly, we express no opinion thereon.

We have examined the above supplemental data for the year ended December 31, 2004. [Facility name] \_\_\_\_\_ management is responsible for the preparation of the supplemental data in conformity with the applicable instructions relating to the preparation of the RHCF-4 as furnished by the New York State Department of Health for the year ended December 31, 2004. Our responsibility is to express an opinion on the supplemental data's conformity with those instructions based upon our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the supplemental data's conformity with the applicable instructions and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, the above supplemental data are in all material respects in conformity with the applicable instructions relating to the preparation of the RHCF-4 as furnished by the New York State Department of Health for the year ended December 31, 2004.

This RHCF-4 report, including this accountant's opinion, is intended solely for the information and use of the management and ownership of the facility and the officers and agencies of the State of New York, and is not intended to be and should not be used by anyone other than these specified parties.

The undersigned hereby certifies this opinion and that I/we have disclosed any and all material facts known to me/us, disclosure of which is necessary to make this opinion, the basic financial statements and the supplemental data not misleading. The undersigned hereby further certifies that I/we will disclose any material fact discovered by me/us subsequent to this certification which existed at the time of this certification and was not disclosed in the basic financial statements or the supplemental data, the disclosure of which is necessary to make the basic financial statements or the supplemental data not misleading and will disclose any material misstatement in said financial statements or supplemental data.

During the period of this professional engagement, at the time of expressing this opinion, and during the period covered by the financial statements I/we did not have nor were committed to acquire, any direct financial interest or

material indirect financial interest in the ownership or operation of the facility and I/we were not connected in any way with the ownership, financing or operation of the facility as a director, officer or employee, or in any capacity other than as an independent certified public accountant or independent public accountant.

### ***PCAOB Staff Questions and Answers***

#### **.01 Staff Questions and Answers: Auditing Internal Control Over Financial Reporting, June 23, 2004 (Revised July 27, 2004)<sup>1</sup>**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2"), were prepared by the Office of the Chief Auditor. Questions should be directed to Laura Phillips, Associate Chief Auditor (202/207-9111; phillipsl@pcaobus.org) or Greg Fletcher, Assistant Chief Auditor (202/207-9203; fletchergr@pcaobus.org).

### **General**

**Q1.** What is the authoritative status of the Background and Basis for Conclusions appendix in a Board's standard?

**A1.** All appendices of auditing standards issued by the Board, including the Background and Basis for Conclusions, are an integral part of the standard and carry the same authoritative weight as the body of the standard.

**Q2.** What is the authoritative status of the Notes included within the body of a Board's standard?

**A2.** Both the Notes and footnotes to a Board standard are an integral part of the standard and carry the same authoritative weight as any other information in the body of, or appendices to, the standard.

### **Independence**

**Q3.** Paragraph 33 of Auditing Standard No. 2 states: "The auditor must not accept an engagement to provide internal control-related services to an issuer for which the auditor also audits the financial statements unless that engagement has been specifically pre-approved by the audit committee." Although the word "non-audit" does not appear in that requirement, do only non-audit internal control-related services need to be specifically pre-approved?

---

<sup>1</sup> Paragraph A16 was revised on July 27, 2004 to more closely align the answer with the directions in paragraph B6 of Auditing Standard No. 2 upon which the answer was based

**A3.** The pre-approval requirement in Auditing Standard No. 2 applies to *any* internal control-related services, regardless of whether they are classified as audit or non-audit services for proxy disclosure purposes or otherwise. Every proposed engagement by the issuer's auditor to provide internal control-related services merits specific attention by the audit committee so that the audit committee can determine whether the performance of the services would impair the auditor's independence and whether management's involvement in the services is substantive and extensive.

**Q4.** Under Auditing Standard No. 2, an auditor cannot accept an engagement to provide internal control-related services unless the audit committee has evaluated the actual, individual control-related service before the auditor was engaged. An auditor might have been engaged by an issuer to perform internal control-related services prior to the effective date of Auditing Standard No. 2, at which time those services were pre-approved in a manner that would not satisfy the requirement in Auditing Standard No. 2. Further, those services might be ongoing such that the auditor continues to provide internal control-related services *after* the effective date of Auditing Standard No. 2 that were pre-approved *prior* to the effective date of Auditing Standard No. 2 in a manner that does not satisfy the auditor's requirement in Auditing Standard No. 2. Is there any grandfathering for these types of engagements in which their original pre-approval would be considered sufficient under Auditing Standard No. 2?

**A4.** No, there is no grandfathering for internal control-related engagements that were pre-approved prior to the effective date of Auditing Standard No. 2 in a manner that would not satisfy the requirement in Auditing Standard No. 2 if the provision of services is ongoing after the effective date of the standard. If the auditor has been engaged to perform internal control-related services that were pre-approved prior to the effective date of Auditing Standard No. 2 in a manner that does not satisfy the requirements of Auditing Standard No. 2 and if those services are ongoing after the effective date of Auditing Standard No. 2, the auditor should request the audit committee to specifically evaluate the independence implications of the continuation of those services as soon as practicable. This type of remedial involvement of the audit committee is consistent with the emphasis and vigilance that is appropriate for the audit committee to have regarding approval of internal control-related services.

## **Scope and Extent of Testing**

**Q5.** Several passages in Auditing Standard No. 2 refer to "financial statements and related disclosures." Do these references to "related disclosures" extend the auditor's evaluation and testing of controls to controls over the preparation of management's discussion and analysis ("MD&A")?

**A5.** No. References in Auditing Standard No. 2 to "financial statements and related disclosures" refer to a company's financial statements and notes as presented in accordance with generally accepted accounting principles ("GAAP"). These references do not extend to the preparation of MD&A or other similar financial information presented outside a company's GAAP-basis financial statements and notes.

**Q6.** If management implements, late in the year, a new accounting system that significantly affects the processing of transactions for significant accounts, and if the majority of the year's transactions were processed on the old system, does the auditor need to test controls over the *new* system? Given the same scenario, does the auditor need to test controls over the *old* system?

**A6.** To audit internal control over financial reporting, the auditor will need to test controls over the new system. Paragraphs 147–149 of Auditing Standard No. 2 provide relevant directions to the auditor in this situation. Those paragraphs state that the auditor's opinion on whether management's assessment of the effectiveness of internal control over financial reporting is fairly stated relates to the effectiveness of the company's internal control over financial reporting as of a *point in time*. Furthermore, Section 404(a) of the Act requires that this assessment be as of the end of the issuer's most recent fiscal year. Because controls over the *new* system, which significantly affect the processing of transactions for significant accounts, are the controls that are operating as of the date of management's assessment, the auditor should test controls over the new system.

Although the auditor would not be required to test controls over the *old* system to have sufficient evidence to support his or her opinion on management's assessment of the effectiveness of internal control over financial reporting as of the end of the issuer's fiscal year, the old system is relevant to the audit of the financial statements. In the audit of the financial statements, the auditor should have an understanding of the internal control over financial reporting, which includes the old system. Additionally, to assess control risk for specific financial statement assertions at less than the maximum, the auditor is required to obtain evidence that the relevant controls operated effectively during the *entire period* upon which the auditor plans to place reliance on those controls. Paragraphs 150 and 151 of Auditing Standard No. 2 provide relevant directions to the auditor in this situation.

**Q7.** Paragraph 140 of Auditing Standard No. 2 includes the following circumstance as a significant deficiency and a strong indicator of a material weakness:

Identification by the auditor of a material misstatement in financial statements in the current period that was not initially identified by the company's internal control over financial reporting. (This is a strong indicator of a material weakness even if management subsequently corrects the misstatement.)

Historically, many auditors have worked with companies closely at year-end, performing auditing procedures on preliminary drafts of the financial statements and providing feedback over a period of time on each successive draft. If the auditor identifies a misstatement in a preliminary draft of financial statements, does this represent a significant deficiency and a strong indicator of a material weakness? Do discussions between management and the auditor regarding the adoption of a new accounting principle or an emerging issue that have, in the past, been seen as a normal part of a high quality audit, need to be postponed until after the company has completed its related accounting?

**A7.** The inclusion of this circumstance in Auditing Standard No. 2 as a significant deficiency and a strong indicator of a material weakness emphasizes that a company must have effective internal control over financial reporting on its own. More specifically, the results of auditing procedures cannot be considered when evaluating whether the company's internal control provides reasonable assurance that the company's financial statements will be presented fairly in accordance with generally accepted accounting principles. There are a variety of ways that a company can emphasize that it, rather than the auditor, is responsible for the financial statements and that the company has effective controls surrounding the preparation of financial statements.

Modifying the traditional audit process such that the company provides the auditor with only a single draft of the financial statements to audit when the

company believes that all its controls over the preparation of the financial statements have fully operated is one way to demonstrate management's responsibility and to be clear that all the company's controls have operated. However, this process is not necessarily what was expected to result from the implementation of Auditing Standard No. 2. Such a process might make it difficult for some companies to meet the accelerated filing deadlines for their annual reports. More importantly, such a process, combined with the accelerated filing deadlines, might put the auditor under significant pressure to complete the audit of the financial statements in too short a time period thereby impairing, rather than improving, audit quality. Therefore, some type of information-sharing on a timely basis between management and the auditor is necessary.

A company may share interim drafts of the financial statements with the auditor. The company can minimize the risk that the auditor would determine that his or her involvement in this process might represent a significant deficiency or material weakness through clear communications (either written or oral) with the auditor about the following:

- state of completion of the financial statements;
- extent of controls that had operated or not operated at the time; and
- purpose for which the company was giving the draft financial statements to the auditor.

For example, a company might give the auditor draft financial statements to audit that lack two notes required by generally accepted accounting principles. Absent any communication from the company to clearly indicate that the company recognizes that two specific required notes are lacking, the auditor might determine that the lack of those notes constitutes a material misstatement of the financial statements that represents a significant deficiency and is a strong indicator of a material weakness. On the other hand, if the company makes it clear when it provides the draft financial statements to the auditor that two specific required notes are lacking and that those completed notes will be provided at a later time, the auditor would not consider their omission at that time a material misstatement of the financial statements.

As another example, a company might release a partially completed note to the auditor and make clear that the company's process for preparing the numerical information included in a related table is complete and, therefore, that the company considers the numerical information to be fairly stated even though the company has not yet completed the text of the note. At the same time, the company might indicate that the auditor should not yet subject the entire note to audit, but only the table. In this case, the auditor would evaluate only the numerical information in the table and the company's process to complete the table. However, if the auditor identifies a misstatement of the information in the table, he or she should consider that circumstance a misstatement of the financial statements. If the auditor determines that the misstatement is material, a significant deficiency as well as a strong indicator of a material weakness would exist.

This type of analysis, focusing on the company's responsibility for internal control, may be extended to other types of auditor involvement. For example, many audit firms prepare accounting disclosure checklists to assist both companies and auditors in evaluating whether financial statements include

all the required disclosures under GAAP. Obtaining a blank accounting disclosure checklist from the company's auditor and independently completing the checklist as part of the procedures to prepare the financial statements is not, by itself, an indication of a weakness in the company's controls over the period-end financial reporting process. As another example, if the company obtains the blank accounting disclosure checklist from its auditor, requests the auditor to complete the checklist, and the auditor determines that a material required disclosure is missing, that situation would represent a significant deficiency and a strong indicator of a material weakness.

These evaluations, focusing on the company's responsibility for internal control over financial reporting, will necessarily involve judgment on the part of the auditor. A discussion with management about an emerging accounting issue that the auditor has recently become aware of, or the application of a complex and highly technical accounting pronouncement in the company's particular circumstances, are all types of timely auditor involvement that should not necessarily be indications of weaknesses in a company's internal control over financial reporting. However, as described above, clear communication between management and the auditor about the purpose for which the auditor is being involved is important. Although the auditor should not determine that the implications of Auditing Standard No. 2 force the auditor to become so far removed from the financial reporting process on a timely basis that audit quality is impaired, some aspects of the traditional audit process may need to be carefully structured as a result of this increased focus on the effectiveness of the company's internal control over financial reporting.

**Q8.** If an issuer decides to forego the required testing or documentation that would form a sufficient basis for management's assessment of the effectiveness of internal control over financial reporting, may the auditor simply render an adverse opinion on internal control over financial reporting? In this circumstance, could the auditor render an adverse opinion on management's assessment but render an unqualified opinion on the effectiveness of internal control over financial reporting?

**A8.** No. Paragraph 20 of Auditing Standard No. 2 describes the responsibilities that management is required to fulfill for the auditor to satisfactorily complete an audit of internal control over financial reporting. These responsibilities include management evaluating the effectiveness of the company's internal control over financial reporting and supporting its evaluation with sufficient evidence, including documentation. If the auditor concludes that management has not fulfilled these responsibilities, Auditing Standard No. 2 states that the auditor should communicate, in writing, to management and the audit committee that the audit of internal control over financial reporting cannot be satisfactorily completed and that he or she is required to disclaim an opinion. Therefore, an auditor could not render either an adverse opinion on management's assessment or an unqualified opinion on internal control over financial reporting because, in this situation, the auditor would be precluded from expressing any opinion.

Additionally, management is required to fulfill these responsibilities under Items 308(a) and (c) of Regulation S-B and S-K, 17 C.F.R. 228.308 (a) and (c) and 229.308 (a) and (c), respectively. To the extent that management has willfully decided not to fulfill these responsibilities, the auditor also may

## 11,016 PCAOB Staff Qs & As and Other Implementation Guidance

have responsibilities under AU sec. 317, *Illegal Acts by Clients*,<sup>2</sup> and Section 10A of the Securities Exchange Act of 1934.

**Q9.** Is it necessary for the auditor to test controls directly if management asserts that internal control over financial reporting is ineffective? If the auditor identifies a material weakness, does the auditor need to complete his or her testing of controls?

**A9.** Yes. Paragraph 27 of Auditing Standard No. 2 requires the auditor to obtain sufficient competent evidence about the design and operating effectiveness of controls over all relevant financial statement assertions related to all significant accounts and disclosures in the financial statements. That paragraph also requires the auditor to plan and perform the audit to obtain reasonable assurance that *all* material weaknesses are identified. Therefore, to complete an audit of internal control over financial reporting and render an opinion, it is necessary for the auditor to test controls directly, regardless of the company's assessment or the auditor's earlier identification of a material weakness.

**Q10.** Auditing Standard No. 2 describes five financial statement assertions and describes the auditor's responsibilities in terms of relevant assertions. Some professional standards, such as the International Standards on Auditing, include more than five financial statement assertions. Some companies are using fewer than five assertions when making their assessments. For the auditor to perform an audit of internal control over financial reporting in accordance with Auditing Standard No. 2, must management and the auditor use the five assertions described therein?

**A10.** No. For the auditor to perform an audit of internal control over financial reporting in accordance with Auditing Standard No. 2, management and the auditor may base their evaluations on assertions that are different from those specified in Auditing Standard No. 2. Paragraphs 69 and 70 of Auditing Standard No. 2 describe the identification of relevant assertions. Relevant assertions are those that have a meaningful bearing on whether the account is fairly stated. To identify relevant assertions, the auditor should determine the sources of likely potential misstatements in each significant account. Ultimately, management and the auditor should identify and test controls over all relevant assertions for all significant accounts. To the extent that management or the auditor bases his or her work on assertions different from those in Auditing Standard No. 2, the auditor would be required to determine that he or she had identified and tested controls over all sources of likely potential misstatements in each significant account and over all representations by management that have a meaningful bearing on whether the account is fairly stated.

## Evaluating Deficiencies

**Q11.** The definition of a significant deficiency is based, in part, on a magnitude of financial statement misstatement that is "more than inconsequential." Paragraphs E87E91 of Auditing Standard No. 2 describe the development of the

---

<sup>2</sup> The Board adopted the generally accepted auditing standards, as described in the AICPA Auditing Standards Board's ("ASB") Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, as in existence on April 16, 2003, on an initial, transitional basis. The Statements on Auditing Standards promulgated by the ASB have been codified into the AICPA *Professional Standards*, Volume 1, as AU sections 100 through 900. References in Auditing Standard No. 2 and this Staff Questions and Answers document refer to those generally accepted auditing standards, as adopted on an interim basis in PCAOB Rule 3200T.

Board's definition of the term *inconsequential*. The definition is based on paragraph .41 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, which states:

In aggregating likely misstatements that the entity has not corrected, pursuant to paragraphs .34 and .35 [of AU sec. 312], the auditor may designate an amount below which misstatements need not be accumulated. This amount should be set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

In the audit of the financial statements, different auditors designate the amount described in paragraph .41 of AU sec. 312 in various ways. Some auditors quantify, during the planning phase of the audit, a specific dollar amount above which likely misstatements will be accumulated. Others take a more judgmental approach to determining which likely misstatements to accumulate. Of the auditors who quantify a specific dollar amount above which likely misstatements will be accumulated, different auditors use different methodologies to arrive at different thresholds or specific dollar amounts.

Given the relationship of paragraph .41 of AU sec. 312 to the definition of *inconsequential*, is a known or likely misstatement aggregated by the auditor during the audit of the financial statements in response to the directions in paragraph .41 of AU sec. 312 by definition "more than inconsequential"? Furthermore, by virtue of having been aggregated by the auditor, such a misstatement would have a "more than remote likelihood" of occurring; therefore, by extension, does the aggregation of a difference by the auditor, by definition, mean that there is a significant deficiency in the company's internal control over financial reporting?

**A11.** No. A known or likely misstatement aggregated by the auditor as part of the audit of the financial statements is not, by definition, either "more than inconsequential" or determinative of there being a significant deficiency. There are several reasons and circumstances why such a likely misstatement aggregated by the auditor might or might not indicate the existence of a significant deficiency.

The threshold for "more than inconsequential" when evaluating whether a significant deficiency exists is not necessarily the same as the amount the auditor establishes pursuant to paragraph .41 of AU section 312 for aggregating misstatements. The definition of *inconsequential* includes a combination of concepts from both Staff Accounting Bulletin ("SAB") No. 99, *Materiality*, and AU sec. 312. The definition of *inconsequential* is largely based on the discussion of magnitude in SAB No. 99 and on AU sec. 312 for its directions regarding both the consideration of misstatements individually and in the aggregate as well as the possibility of undetected misstatements.

Also, as the Board indicated in paragraph E75 of the Background and Basis for Conclusions of Auditing Standard No. 2, one reason that a significant deficiency is defined differently from the previously used term "reportable condition" is because the definition of reportable condition was solely a matter of the auditor's judgment. A definition dependent *solely* on the auditor's judgment was insufficient for purposes of the Sarbanes-Oxley Act because management also needs a definition to determine whether a deficiency is significant, and that definition should be the same as the definition used by the auditor. Accordingly, Auditing Standard No. 2's definition of significant deficiency is not, by definition, the same as the auditor's threshold for aggregating likely misstatements in the audit of the financial statements.

## 11,018 PCAOB Staff Qs & As and Other Implementation Guidance

As indicated in the question, different auditors exercise their professional judgment in different ways in different circumstances when accumulating likely misstatements as part of the audit of the financial statements. Furthermore, some auditors, as a matter of policy, tend to set their posting threshold for accumulating likely misstatements lower than “inconsequential.” For example, some auditors set their posting threshold for accumulating likely misstatements at .25 percent of the company’s pre-tax income which would, in most cases, be clearly inconsequential on a quantitative basis.

Because a likely misstatement aggregated by the auditor as part of the audit of the financial statements is not, by definition, “more than inconsequential” or determinative of the existence of a significant deficiency, the auditor need not align the amount above which he or she aggregates misstatements with the amount above which he or she believes a misstatement to be “more than inconsequential” or determinative of the existence of a significant deficiency. Furthermore, the auditor should not, for example, change the types of deficiencies that he or she determines to be significant deficiencies simply by raising the auditor’s threshold for accumulating likely misstatements. These determinations also need to take into consideration qualitative, as well as quantitative, factors. The auditor might still determine that there is a more than remote likelihood that a misstatement *larger* than the difference on his or her summary of audit differences might occur and not be prevented or detected. For these reasons, it is possible that a control deficiency associated with a likely misstatement accumulated by the auditor on his or her summary of audit differences might indicate the existence of a deficiency, a significant deficiency, or a material weakness.

**Q12.** When determining whether a control deficiency exists, should the auditor consider compensating controls?

**A12.** No. The Note to paragraph 10 of Auditing Standard No. 2 states that “. . . in determining whether a control deficiency or combination of deficiencies is a significant deficiency or a material weakness, the auditor should evaluate the effect of compensating controls and whether such compensating controls are effective.” An important part of the evaluation of whether a significant deficiency or material weakness exists includes aggregating deficiencies and considering their effect in combination. The logical extension of this aggregation is to also consider compensating controls. However, control deficiencies should be considered individually and in isolation; therefore, the existence of compensating controls does not affect whether a control deficiency exists.

**Q13.** Are all control testing exceptions, by definition, control deficiencies?

**A13.** No. Paragraph 107 of Auditing Standard No. 2 states: “A conclusion that an identified exception does not represent a control deficiency is appropriate only if evidence beyond what the auditor had initially planned and beyond inquiry supports that conclusion.” Paragraph 133 also includes the example that “a control with an observed non-negligible deviation rate is a deficiency.” Both these passages in the standard recognize the inherent limitations in internal control. Effective internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting. Because effective internal control over financial reporting cannot, and does not, provide absolute assurance of achieving financial reporting objectives, any individual control does not necessarily have to operate perfectly, all the time, to be considered effective.

Therefore, Auditing Standard No. 2 provides the auditor with directions that allow the use of judgment in the circumstances in which he or she is evaluating whether a control testing exception is a control deficiency.

**Q14.** When a control deficiency exists, what degree of precision is required for a compensating control to effectively mitigate a significant deficiency or material weakness?

**A14.** As discussed in A13, Auditing Standard No. 2 provides that auditors should evaluate the effect of compensating controls when determining whether a control deficiency or combination of deficiencies is a significant deficiency or a material weakness. However, to have a mitigating effect, the compensating control should operate at a level of precision that would prevent or detect a misstatement that was more than inconsequential or material, respectively.

**Q15.** Paragraph 9 of Auditing Standard No. 2 defines a significant deficiency as “a control deficiency, or combination of control deficiencies . . .” Paragraph 10 defines a material weakness as “a significant deficiency, or combination of significant deficiencies . . .” The definition of a material weakness, therefore, relies on the definition of significant deficiency. Does this mean that a control deficiency, once determined to be only a control deficiency and not also a significant deficiency, could be excluded from the evaluation of whether a significant deficiency or combination of significant deficiencies constitutes a material weakness?

**A15.** No. The definitions of significant deficiency and material weakness delineate increasingly severe types of control deficiencies. All significant deficiencies are also deficiencies; all material weaknesses are also significant deficiencies and deficiencies. If the auditor correctly aggregates control deficiencies when evaluating whether a significant deficiency exists, then all related and salient control deficiencies will also be included in the auditor’s evaluation of whether a combination of significant deficiencies represents a material weakness. Therefore, whether the definition of a material weakness is expressed as “a significant deficiency, or combination of significant deficiencies . . .” or as “a control deficiency, or combination of control deficiencies . . .” is unimportant. Both the meaning and the evaluation are the same.

## Multi-Location Issues

**Q16.** Paragraph 87 of Auditing Standard No. 2 states:

Appendix B, paragraphs B1 through B17, provide additional direction to the auditor in determining which controls to test when a company has multiple locations or business units. In these circumstances, the auditor should determine significant accounts and their relevant assertions, significant processes, and major classes of transactions based on those that are relevant and significant to the consolidated financial statements. Having made those determinations in relation to the consolidated financial statements, the auditor should then apply the directions in Appendix B.

Paragraph B4 states:

Because of the importance of financially significant locations or business units, the auditor should evaluate management’s documentation of and perform tests of controls over all relevant assertions related to significant accounts and disclosures at each financially significant location or business unit, as discussed in paragraphs 83 through 105 [of the standard].

## **11,020 PCAOB Staff Qs & As and Other Implementation Guidance**

Does the combination of these directions mean that, for example, if the auditor determines that accounts receivable is a significant account to the consolidated financial statements, the auditor should test controls over all relevant assertions over accounts receivable at every financially significant location or business unit, even if accounts receivable at a particular financially significant location is immaterial?

**A16.** No. The combination of these directions means that the auditor should determine significant accounts and their relevant assertions based on the consolidated financial statements and perform tests of controls over all relevant assertions related to those significant accounts at each financially significant location or business unit for which the selected accounts are material at the account level. Therefore, the auditor need not test controls over all relevant assertions for a significant account at a financially significant location where the significant account is immaterial. However, if accounts receivable at a location or business unit that is not otherwise considered financially significant represents a risk of material misstatement to the consolidated financial statements, the auditor should test controls over all relevant assertions for accounts receivable at that location. This direction is consistent with the directions in paragraph B6 addressing locations or business units that involve specific risks.

**Q17.** The multi-location guidance in Appendix B of Auditing Standard No. 2 states that the auditor should test controls over a “large portion” of the company’s operations and financial position. Many auditors are referring to specific percentages that represent coverage over a “large portion” of the company’s operations and financial position, such as 60 percent or 75 percent. Are these percentages set in Auditing Standard No. 2?

**A17.** No. Auditing Standard No. 2 does not establish specific percentages that would achieve this level of testing. During the comment period on the proposed standard for the audit of internal control over financial reporting, several commenters suggested that the standard should provide more specific directions regarding the evaluation of whether controls over a “large portion” of the company’s operations and financial position had been tested, including establishing specific percentages. The Board decided that balancing auditor judgment with the consistency that would be enforced by increased specificity would be best served by this direction remaining “principles-based.” Therefore, Auditing Standard No. 2 leaves to the auditor’s judgment the determination of what exactly constitutes a “large portion.”

Additionally, the Note to paragraph B11 states that, “the evaluation of whether controls over a large portion of the company’s operations or financial position have been tested should be made at the overall level, not at the individual significant account level.” For example, if an auditor believes that he or she should test controls over x percent of some measure, that auditor should evaluate whether he or she had tested controls over x percent of the company’s consolidated operations or financial position (e.g., x percent of total assets or x percent of revenues) and not x percent of each individual significant account.

**Q18.** Is any type of sampling strategy accommodated by the direction to test controls over “a large portion” of financial position or operations?

**A18.** Yes. The directions in paragraph B11 of Auditing Standard No. 2 that the auditor should test controls over a large portion of the company's operations or financial position are intended as a fail-safe to ensure that every audit of internal control over financial reporting is supported by sufficient evidence.

In no case should the auditor find that, in following the directions in paragraphs B1–B10, the auditor could merely test company-level controls without also testing controls over all relevant assertions related to significant accounts and disclosures.

The direction to test controls over a large portion of financial position or operations is easily satisfied at companies in which the auditor's testing of individual financially significant locations or business units clearly covers a large portion. At these types of entities and others, the type of judgment discussed in Q17 in which an auditor determines that he or she should test controls over 60 percent or 75 percent of the company's financial position or operations are readily satisfied. However, in circumstances in which a company has a very large number of individually insignificant locations or business units, testing controls over 60 percent or 75 percent of the company's financial position or operations may result in an extensive amount of work, in which the auditor would test controls over hundreds and even thousands of individual locations to reach that type of percentage target. In circumstances in which a company has a very large number of individually insignificant locations or business units and management asserts to the auditor that controls have been documented and are effective at all locations or business units, the auditor may satisfy the directions in paragraph B11 by testing a representative sample of the company's locations or business units.

The auditor may select the representative sample either statistically or non-statistically. However, the locations or business units should be selected in such a way that the sample is expected to be representative of the entire population. Also, particularly in the case of a non-statistical sample, the auditor's sampling will be based on the expectation of no, or very few, control testing exceptions. In such circumstances, because of the nature of the sample and the control testing involved, the auditor will not have an accurate basis upon which to extrapolate an error or exception rate that is more than negligible. Furthermore, the existence of testing exceptions would not support management's assertion that controls had been documented and were effective at all locations or business units. Therefore, if the auditor elects to use a representative sample in these circumstances and encounters testing exceptions within the sample that exceed a negligible rate, the auditor might decide that testing controls over a very large number of individual locations or business units is necessary to adequately support his or her opinion.

**Q19.** Paragraphs B16 and B17 of Auditing Standard No. 2 provide direction to the auditor in situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities. The SEC staff's guidance, *Office of the Chief Accountant and Division of Corporation Finance: Management's Report on Internal Control Over Financial Reporting and Disclosure in Exchange Act Periodic Reports, Frequently Asked Questions*, dated June 23, 2004, discusses such situations in Questions 1 and 3. However, that document also instructs management to refer in its report

on internal control over financial reporting to disclosure in its Form 10-K or Form 10-KSB regarding the scope of management's assessment and any entity excluded from the scope. How does this disclosure by management in its report affect the directions in Auditing Standard No. 2 that instruct the auditor, in these situations, to report without reference to the limitation in scope?

**A19.** In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the scope paragraph in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting.

## Using the Work of Others

**Q20.** Auditing Standard No. 2 allows the auditor to use the work of others to alter the nature, timing, or extent of the work the auditor would otherwise have performed. If the auditor plans to use the work of others, he or she should, among other things, test some of the work performed by others to evaluate the quality and effectiveness of the work. In performing this testing, does the auditor need to test the work of others in every significant account in which the auditor plans to use their work?

**A20.** No. Auditing Standard No. 2 establishes a framework for using the work of others based on evaluating the nature of the controls, evaluating the competence and objectivity of the individuals who performed the work, and testing some of the work performed by others to evaluate the quality and effectiveness of their work. Within this framework, the amount of testing of the work of others should be sufficient to enable the auditor to evaluate the overall quality and effectiveness of their work. Auditing Standard No. 2 provides flexibility in this regard; testing the work of others in every significant account in which the auditor plans to use their work is not required. Furthermore, if the auditor believes that extensive testing of the work of others is necessary in every area in which the auditor plans to use their work, the auditor should keep in mind the directions in paragraph 124 of Auditing Standard No. 2. Those directions state that the auditor should also assess whether the evaluation of the quality and effectiveness of the work of others has an effect on the auditor's conclusions about the competence and objectivity of the individuals performing the work. If the auditor determines the need to test the work of others to a high degree, the auditor should consider whether his or her original assessment of their competence and objectivity is correct.

**Q21.** Paragraph 108 of Auditing Standard No. 2 requires the auditor to perform enough of the testing himself or herself so that the auditor's own work provides the principal evidence for the auditor's opinion. Does the auditor's testing of the work of others "count" toward the auditor obtaining the principal evidence supporting his or her opinion?

**A21.** No. As described in paragraph 109 of Auditing Standard No. 2, to determine the extent to which the auditor may use the work of others to alter the nature, timing, or extent of the work the auditor would have otherwise performed, *in addition to obtaining the principal evidence for his or her opinion*, the auditor should, among other things, test some of the work performed by others to evaluate the quality and effectiveness of their work. Therefore, the auditor's testing of the work of others is not considered to be

part of the principal evidence obtained by the auditor. As described in A20, if the auditor determines the need to test the work of others to a high degree, the auditor should consider whether his or her original assessment of their competence and objectivity is correct.

**Q22.** Paragraph 123 of Auditing Standard No. 2 states that the auditor's tests of the work of others may be accomplished by either (a) testing some of the controls that others tested or (b) testing similar controls not actually tested by others. Based on the response in A21, regardless of whether the auditor tested some of the controls tested by others or tested similar controls not actually tested by others ("independent testing"), if the objective of that testing is to evaluate the quality and effectiveness of the work of others, that testing should not be considered as part of the principal evidence obtained by the auditor. However, does the auditor's independent testing in areas in which the auditor is using the work of others count as principal evidence if the independent tests are not for the purpose of assessing the quality and effectiveness of the work of others?

**A22.** Yes. The auditor's independent testing in these circumstances may be considered as work performed by the auditor when evaluating whether the auditor obtained the principal evidence supporting his or her opinion, but only if these independent tests are not for the purpose of assessing the quality and effectiveness of the work of others. If the independent tests are for the purpose of assessing the quality and effectiveness of the work of others, then the independent tests should not be considered as work performed by the auditor when evaluating whether the auditor obtained the principal evidence supporting his or her opinion.

**Q23.** Paragraphs 113 through 115 of Auditing Standard No. 2 describe the auditor's evaluation of the nature of the controls subjected to the work of others when determining how to use the work of others to alter the nature, timing, or extent of the work the auditor would otherwise have performed. Those paragraphs state that the auditor should not use the work of others to reduce the amount of work he or she performs on controls in the control environment. Further, those directions state that controls that are part of the control environment include, but are not limited to, controls specifically established to prevent and detect fraud that is at least reasonably possible to result in a material misstatement of the financial statements. How do these directions regarding the auditor's testing of controls specifically established to prevent and detect fraud relate to the auditor's responsibilities in AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*?

**A23.** Paragraph 26 of Auditing Standard No. 2 generally describes how the auditor's evaluation of controls in an audit of internal control over financial reporting is interrelated with the auditor's evaluation of fraud risks in a financial statement audit as required by AU sec. 316. AU sec. 316 requires, among other things, that the auditor identify risks that may result in a material misstatement of the financial statements due to fraud and that the auditor should respond to those identified risks. AU sec. 316 emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating evidence. The auditor also is required to respond to the results of the fraud risk assessment in three ways:

- a. A response that has an overall effect on how the audit of the financial statements is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned.

## 11,024 PCAOB Staff Qs & As and Other Implementation Guidance

- b. A response to identified risks that involves the nature, timing, and extent of auditing procedures to be performed.
- c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls.

The relationship of these requirements with the directions in Auditing Standard No. 2 regarding the auditor's use of the work of others may be illustrated by several examples.

First, AU sec. 316 establishes a presumption that there is a risk of material misstatement due to fraud relating to revenue recognition. If the auditor does not overcome this presumption, as would frequently be the case with, for example, software revenue recognition, the auditor should test the controls specifically established to prevent and detect fraud related to a material misstatement of the company's revenue recognition himself or herself.

Because material misstatement due to fraud often involves manipulation of the financial reporting process by management, AU sec. 316 also requires the auditor to review journal entries and other adjustments for evidence of material misstatement due to fraud. Paragraph 112 of Auditing Standard No. 2 includes as one of the factors that the auditor should evaluate when evaluating the nature of the controls subjected to the work of others "the potential for management override of the control." Taken together, these directions mean that obtaining the understanding of the design of controls over journal entries and other adjustments and determining whether they are suitably designed and have been placed in operation, as required by AU sec. 316, and performing any associated testing of those controls that the auditor determines is necessary when auditing internal control over financial reporting under Auditing Standard No. 2, should be performed by the auditor himself or herself. However, Auditing Standard No. 2 emphasizes that, although the auditor should not use the work of others in this situation, the auditor should consider the results of work performed in the area by others because it might indicate the need for the auditor to increase his or her work.

## Service Organizations

**Q24.** What types of outsourcing activities result in a service organization arrangement addressed by Statement on Auditing Standards ("SAS") No. 70, *Service Organizations* (AU sec. 324)? What types of outsourcing activities are part of a company's internal control over financial reporting?

**A24.** As described in paragraph .03 of AU sec. 324, a service organization's services are part of a company's information system if they affect any of the following:

- The classes of transactions in the company's operations that are significant to the company's financial statements.
- The procedures, both automated and manual, by which the company's transactions are initiated, authorized, recorded, processed, and reported from their incurrence to their inclusion in the financial statements.
- The related accounting records, whether electronic or manual, supporting information and specific accounts in the company's financial statements involved in initiating, authorizing, recording, processing and reporting the company's transactions.

- How the company's information system captures other events and conditions that are significant to the financial statements.
- The financial reporting process used to prepare the company's financial statements, including significant accounting estimates and disclosures.

Paragraph .03 of AU sec. 324 also provides examples of situations in which a service organization's services affect a company's information system. For instance, the trust departments of banks and insurance companies often serve as the custodian of an employee benefit plan's assets, including making investment decisions, maintaining records of each participants account, allocating income amongst participants, and preparing other types of recordkeeping; this type of servicing is a common example of a service organization's services that affect a company's information system. In contrast, AU sec. 324 does not apply to situations in which the services being provided are limited to executing client organization transactions that the client specifically authorizes. For example, the processing of checking account transactions or wire transfer instructions by a bank would not constitute a service organization arrangement. Paragraph .03 of AU sec. 324 also excludes other types of transactions, such as transactions arising from joint ventures, from the scope of a service organization arrangement addressed by AU sec. 324.

All of the examples of outsourcing activities in paragraph .03 of AU sec. 324 (which are not an exhaustive listing of all types of possible outsourcing activities) are part of the company's information system. However, not all outsourcing activities are a part of the company's information system. In addition to the arrangements described in paragraph .03 of AU sec. 324 to which AU sec. 324 does *not* apply, the use of a specialist is not part of a company's information system. For example, a company might outsource actuarial services; however, the nature of the services represents the use of a specialist, and the actuary is not a part of the company's information system.

If the service organization's services are part of a company's information system, then they are part of the information and communication component of the company's internal control over financial reporting. In those circumstances, management should consider the activities of the service organization in making its assessment of internal control over financial reporting, and the auditor should consider the activities of the service organization in determining the evidence required to support his or her opinion. Appendix B of Auditing Standard No. 2 provides additional directions regarding the procedures management and the auditor should perform with respect to activities performed by the service organization.

**Q25.** Auditing Standard No. 2 indicates that evidence about the operating effectiveness of controls at a service organization can be obtained from a Type 2 SAS No. 70 report. Is a Type 2 SAS No. 70 report issued more than six months prior to the date of management's assessment current enough to provide any such evidence?

**A25.** Paragraphs B25 through B27 provide directions when a significant period of time has elapsed between the time period covered by the tests of controls in the service auditor's report and the date of management's assessment. These directions do not establish any "bright lines." In other words, application of the directions does not result in a precise answer as to whether a service auditor's report issued more than six months prior to

the date of management's assessment is not current enough to provide *any* evidence. Rather, these directions state that, when a significant period of time has elapsed between the time period covered by the tests of controls in the service auditor's report and the date of management's assessment, additional procedures should be performed.

Paragraph B26 provides directions to the auditor in determining whether to obtain additional evidence about the operating effectiveness of controls at the service organization. The auditor's procedures to obtain additional evidence will typically be more extensive the longer the period of time that has elapsed between the time period covered by the service auditor's report and the date of management's assessment. Also, those auditor's procedures will vary depending on the importance of the controls at the service organization to management's assessment and on the level of interaction between the company's controls and the controls at the service organization.

The auditor's procedures will be focused on, among other things, identifying changes in the service organization's controls subsequent to the period covered by the service auditor's report. The auditor should be alert for situations in which management has not made changes to its procedures and controls to respond to changes in procedures and controls at the service organization. These situations might result in errors not being prevented or detected in a timely manner.

**Q26.** Can a registered public accounting firm in the integrated audit of an issuer obtain evidence from a service auditor's report issued by a non-registered public accounting firm?

**A26.** Yes. Paragraph B24 of Auditing Standard No. 2 directs the auditor to make inquiries concerning the service auditor's reputation, competence, and independence in determining whether the service auditor's report provides sufficient evidence to support management's assessment and the auditor's opinion on internal control over financial reporting. Auditing Standard No. 2 does not require that the service auditor be a registered public accounting firm.

The auditor should be aware of how evidence obtained from a service auditor's report issued by a non-registered firm interacts with the Board's registration rules. Any public accounting firm that "plays a substantial role in the preparation or furnishing of an audit report" with respect to any issuer must register with the Board. Because of the nature of the service auditor's report (the user auditor could have performed tests of controls at the service organization himself or herself but, instead, may have chosen to obtain evidence from a service auditor's report), when a registered public accounting firm obtains evidence from a service auditor's report in the audit of an issuer, the service auditor has participated in the audit of the issuer. If the service auditor's work, measured in terms of either services or procedures, meets the "substantial role" threshold (as defined in Rule 1001(p)(ii)) for the audit of the user organization, the service auditor is required to be registered with the Board.

**.02 Staff Questions and Answers: Auditing Internal Control Over Financial Reporting, October 6, 2004**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2"), were prepared by the Office of the Chief Auditor. The staff questions and answers related to Auditing Standard No. 2 are sequentially numbered upon issuance. Refer to the staff questions and answers dated June 23, 2004 for questions numbered 1–26 [paragraph .01]. Additional questions should be directed to Laura Phillips, Associate Chief Auditor (202/207-9111; phil-lips1@pcaobus.org) or Greg Fletcher, Assistant Chief Auditor (202/207-9203; fletchergr@pcaobus.org).

\* \* \*

## Scope and Extent of Testing

**Q27.** Paragraph .05 of AU sec. 317, *Illegal Acts by Clients*,<sup>1</sup> states the following:

The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

Paragraph 15 of Auditing Standard No. 2 states:

Also, operations and compliance with laws and regulations directly related to the presentation of and required disclosures in financial statements are encompassed in internal control over financial reporting . . . Accordingly, all controls that could materially affect financial reporting, including controls that focus primarily on the effectiveness and efficiency of operations or compliance with laws and regulations and also have a material effect on the reliability of financial reporting, are a part of internal control over financial reporting.

Paragraph 15 of Auditing Standard No. 2 does not use the phrase, "direct and material effect on the determination of financial statement amounts," used in AU sec. 317. Does the scope of internal control over financial reporting as it relates to compliance with laws and regulations under Auditing Standard No. 2 encompass controls over a broader array of circumstance than those circumstances described in AU sec. 317?

---

<sup>1</sup> The Board adopted the generally accepted auditing standards, as described in the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's ("ASB") Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, as in existence on April 16, 2003, on an initial, transitional basis. The Statements on Auditing Standards promulgated by the ASB have been codified into the AICPA *Professional Standards*, Volume 1, as AU sections 100 through 900. References in Auditing Standard No. 2 and this Staff Questions and Answers document refer to those generally accepted auditing standards, as adopted on an interim basis in PCAOB Rule 3200T.

**A27.** Yes. Paragraph 15 of Auditing Standard No. 2 does not include the phrase, “direct and material effect on the determination of financial statement amounts,” because this paragraph in Auditing Standard No. 2 encompasses controls over a broader array of circumstances than those described in AU sec. 317. Paragraph 15 of Auditing Standard No. 2 also is consistent with the Securities and Exchange Commission (“SEC”) staff’s views about management’s responsibilities for assessing internal control over financial reporting.

The statement in Auditing Standard No. 2 that “compliance with laws and regulations directly related to the presentation of and required disclosures in financial statements are encompassed in internal control over financial reporting” includes the “direct and material” effects described in AU sec. 317, such as compliance with tax laws that affect accruals and the amount recognized as expense in the accounting period, as well as some circumstances that would be classified under AU sec. 317 as having only indirect effects on the financial statements.

Regarding the possible accrual or disclosure of a contingency under Financial Accounting Standards Board (“FASB”) Statement No. 5, *Accounting for Contingencies*, related to the violation of laws or regulations, a circumstance might have a material effect on the reliability of financial reporting and, therefore, be encompassed by internal control over financial reporting under Auditing Standard No. 2 and, at the same time, have a material, but indirect, effect on the financial statements under AU sec. 317. AU sec. 317.07 states that if specific information comes to the auditor’s attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply auditing procedures specifically directed to ascertaining whether an illegal act has occurred. In the absence of such information, the auditor does not need to perform any procedures other than those procedures required by AU sec. 317.08. On the other hand, Auditing Standard No. 2 encompasses controls over compliance with laws and regulations that have a material effect on the reliability of financial reporting. Therefore, internal control over financial reporting encompasses controls over the identification, measurement, and reporting of all material actual loss events which have occurred, including controls over the monitoring and risk assessment of areas in which, given the nature of the company’s operations, such actual loss events are reasonably possible. For example, internal control over financial reporting at a waste disposal company ordinarily would encompass controls for identifying and measuring environmental liabilities for existing and newly acquired landfills, even if there is no governmental investigation or enforcement proceeding underway.

As previously mentioned, this interpretation is consistent with the SEC staff’s views regarding management’s responsibilities for assessing internal control over financial reporting. Question 10 of the SEC staff’s guidance, *Office of the Chief Accountant and Division of Corporation Finance: Management’s Report on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports, Frequently Asked Questions*, dated June 23, 2004 (as amended October 6, 2004), discusses these views.

## **Evaluating Deficiencies**

**Q28.** Paragraph 20 of Auditing Standard No. 2 states that for the auditor to satisfactorily complete an audit of internal control over financial reporting,

management must fulfill several responsibilities, including evaluating the effectiveness of the company's internal control over financial reporting and supporting its evaluation with sufficient evidence.

Paragraphs 178 and 179 of Auditing Standard No. 2 describe situations in which there are restrictions on the scope of the auditor's engagement. Paragraphs B14–B17 of Appendix B of Auditing Standard No. 2 describe special situations and address whether the scope of the evaluation of internal control over financial reporting extends to controls in these special situations. Appendix B also describes the situation in which a service organization's controls are part of the company's internal control over financial reporting.

There may be circumstances in which management's assessment and the auditor's audit procedures do not encompass certain controls that should have been encompassed because neither management nor the auditor has the ability to evaluate those controls. For example, both management and the auditor may determine that it is necessary in the circumstances to obtain evidence of operating effectiveness of controls at a service organization used by the issuer but are unable to obtain such evidence because a Type 2 Statement on Auditing Standards ("SAS") 70 report is not available, and neither management nor the auditor is able to perform tests of controls at the service organization because management does not have a contractual right to do so.

What effects do these circumstances have on the auditor's evaluation of management's assessment and the auditor's report?

**A28.** Question 19 of the SEC staff's guidance, *Office of the Chief Accountant and Division of Corporation Finance: Management's Report on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports, Frequently Asked Questions*, dated June 23, 2004 (as amended October 6, 2004), states that management cannot issue a report on internal control over financial reporting with a scope limitation, subject to the exceptions in Questions 1, 2, and 3 of that document. Management must determine whether the inability to assess controls over a particular process is significant enough to conclude in their report that internal control over financial reporting is ineffective. Consistent with the answer to the aforementioned Question 19, management's assessment of the effectiveness of the company's internal control over financial reporting required by Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") is part of the control environment and monitoring components of internal control over financial reporting. Accordingly, management's inability to assess certain controls over financial reporting that should have been included in management's assessment, represents a control deficiency in the control environment and monitoring components of internal control over financial reporting. As described in paragraph 130 of Auditing Standard No. 2, the auditor must evaluate the significance of all identified control deficiencies. If the transaction or events subject to controls that management is unable to assess are material to the company's financial statements, the auditor ordinarily would determine that this control deficiency represents a material weakness. In this case, the auditor would not follow the directions in paragraphs 178–179 of Auditing Standard No. 2 on scope limitations; rather, he or she would follow the directions in paragraphs 175–177 on material weaknesses.

The auditor also would need to determine whether management's inability to assess certain controls was such that management had not fulfilled its

## 11,030 PCAOB Staff Qs & As and Other Implementation Guidance

responsibilities to evaluate the effectiveness of the company's internal control over financial reporting and support its evaluation with sufficient evidence, as described in paragraph 20 of Auditing Standard No. 2. If the auditor determines that management has not fulfilled its responsibilities, paragraph 21 of Auditing Standard No. 2 requires the auditor to disclaim an opinion. In making this determination, the auditor could evaluate factors such as:

- The date of the contract or other transaction documents that could have provided management with the ability to assess controls or otherwise to obtain evidence of the operating effectiveness of relevant controls (i.e., whether the contract was executed prior to the time management became aware that the company would be required to make an assessment of the effectiveness of internal control over financial reporting).
- The relative ease or difficulty with which management could renegotiate the contract or transaction documents and the extent to which management has attempted to do so.
- The ability of management to assess the controls or obtain evidence of operating effectiveness of relevant controls in the absence of having access to the controls.

If the auditor determines that management has not fulfilled its responsibilities and that the auditor is required to disclaim an opinion, he or she should follow the directions in paragraph 180 of Auditing Standard No. 2 that require the auditor's report to include disclosure of the material weakness. Further, as discussed in PCAOB Staff Question and Answer No. 8, because management is required to fulfill those responsibilities under Items 308(a) and (c) of Regulation S-B and S-K, 17 C.F.R. 228.308 (a) and (c) and 229.308 (a) and (c), respectively, to the extent that management has willfully decided not to fulfill these responsibilities, the auditor also may have responsibilities under AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.

The following two examples illustrate how to apply these views in various situations. These examples are for illustrative purposes only. Further, these examples do not represent an exhaustive list of the situations in which these directions might apply.

**Example 1.** In the service organization example in the question, management and the auditor determined that evidence of the operating effectiveness of controls at the service organization is necessary. If the transactions or events subject to the controls at the service organization are material to the company's financial statements and management is unable to obtain evidence about their operating effectiveness, the auditor ordinarily would determine that this circumstance represents a material weakness in the company's internal control over financial reporting. If the servicing contract was executed in 2001 (a time that is well before the existence of the Sarbanes-Oxley Act), for example, and management already has negotiated with the service organization to provide a suitable Type 2 SAS 70 report to provide the necessary evidence to support management's assessment next year, the auditor might determine that management had fulfilled its responsibilities as described in paragraph 20 of Auditing Standard No. 2, and thus be able to complete the audit of internal control over financial reporting. On the other hand, if management recently renewed its contract with the service organization and did not negotiate either an agreement about obtaining

a suitable Type 2 SAS 70 report or permission to test controls at the service organization, or if the contract with the service organization is long-dated and management has made no attempt to negotiate the ability to obtain the necessary evidence of operating effectiveness of controls, the auditor ordinarily would determine that management had not fulfilled its responsibilities. Accordingly, the auditor would be required to disclaim an opinion as directed by paragraph 21 of Auditing Standard No. 2. The auditor also would need to evaluate whether he or she had additional responsibilities in this circumstance under AU sec. 317 and Section 10A.

**Example 2.** Another example relates to entities consolidated by virtue of FASB Interpretation No. 46, *Consolidation of Variable Interest Entities—An Interpretation of ARB No. 51* (“FIN No. 46”). Paragraph 16 of Appendix B of Auditing Standard No. 2 states that in situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner and report without reference to the limitation in scope. Question 1 of the SEC staff’s guidance, *Office of the Chief Accountant and Division of Corporation Finance: Management’s Report on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports, Frequently Asked Questions*, dated June 23, 2004 (as amended October 6, 2004), discusses such a situation. In this interpretation, the SEC staff allows management to exclude from the scope of its assessment of internal control over financial reporting the controls of an entity in existence prior to December 15, 2003, that is consolidated by virtue of FIN No. 46, for which the company does not have the right or authority to assess the controls and also lacks the ability, in practice, to make that assessment. Management’s inability to assess the controls of an entity consolidated by virtue of FIN No. 46 that came into existence subsequent to December 15, 2003, would represent a deficiency in the control environment and monitoring components of the company’s internal control over financial reporting. If the variable interest entity consolidated under FIN No. 46 is material to the company’s consolidated financial statements, the auditor ordinarily would determine that this circumstance represents a material weakness in internal control over financial reporting.

The auditor also needs to determine whether management has fulfilled its responsibilities as described in paragraph 20 of Auditing Standard No. 2. For an entity that came into existence subsequent to December 15, 2003, consider the following additional details. Assume, for example, that in the regular course of the company’s business, the company enters into option contracts that constitute variable interests in variable interest entities. The company is considered the primary beneficiary of the variable interest entities and, therefore, is required to consolidate the entities; however, management is unable to assess controls at these variable interest entities. Additionally, the variable interest entities are, in the aggregate, material to the company’s consolidated financial statements. As described above, the auditor ordinarily would determine that this circumstance represents a material weakness in internal control over financial reporting. If the existing option contracts that create the variable interests that require consolidation are short-dated (that is, with remaining terms of less than a year) and cannot be amended to permit management to assess controls, and management has already drafted option contracts that it plans to execute next year for all future such transactions and these revised contracts provide management with the ability to assess controls at the variable interest entity,

the auditor might determine that management has fulfilled its responsibilities as described in paragraph 20 of Auditing Standard No. 2 and thus be able to complete the audit of internal control over financial reporting. On the other hand, if the existing option contracts that create the variable interests that require consolidation do not expire for a longer period of time, for example, 10 years, and management has made no attempt to negotiate the ability to assess controls at the variable interest entities, the auditor ordinarily would determine that management had not fulfilled its responsibilities. Accordingly, the auditor would be required to disclaim an opinion as directed in paragraph 21 of Auditing Standard No. 2. The auditor also would need to evaluate whether he or she had additional responsibilities in this circumstance under AU sec. 317, *Illegal Acts by Clients*, and Section 10A.

## Service Organizations

**Q29.** Paragraph 79 of Auditing Standard No. 2 requires the auditor to perform at least one walkthrough for each major class of transactions. Paragraph 80 states:

The auditor's walkthroughs should encompass the entire process of initiating, authorizing, recording, processing, and reporting individual transactions and controls for each of the significant processes identified, including controls intended to address the risk of fraud.

Paragraph B19 states:

When the service organization's services are part of the company's internal control over financial reporting, management should consider the activities of the service organization in making its assessment of internal control over financial reporting, and the auditor should consider the activities of the service organization in determining the evidence required to support his or her opinion.

If a service organization's services involve the processing of a major class of transactions, should the company's auditor perform walkthroughs at the service organization?

**A29.** If the auditor is able to obtain sufficient evidence to achieve the objectives of the walkthrough by other means, such as through a service auditor's report, the auditor would not need to perform a walkthrough at the service organization.

The auditor performs walkthroughs to, among other things, obtain evidence to confirm the auditor's understanding of the process flow of transactions. Paragraph B18 of Auditing Standard No. 2 states that the auditor may apply the relevant concepts described in AU sec. 324, *Service Organizations*, to the audit of internal control over financial reporting. Paragraph B20 of Auditing Standard No. 2 specifically highlights several paragraphs of AU sec. 324 that describe the procedures the auditor should perform to obtain an understanding of the controls at the service organization that are relevant to the entity's internal control and the entity's controls over the activities of the service organization.

These portions of AU sec. 324 state that information about the nature of the services provided by a service organization that are part of the user organization's information system and the service organization's controls over those services may be available from a wide variety of sources, such as user manuals, system overviews, technical manuals, the contract between the user organization and the service organization, and reports by service auditors, internal auditors, or regulatory authorities on the service organization's

controls. Additionally, AU sec. 324 provides that, after considering the available information, the user auditor may conclude that he or she has the means to obtain a sufficient understanding of internal control. If the user auditor concludes that information is not available to obtain a sufficient understanding, he or she may consider contacting the service organization, through the user organization, to obtain specific information or to request that a service auditor be engaged to perform the procedures that will supply the necessary information, or the user auditor may visit the service organization and perform such procedures.

Therefore, paragraphs 80 and B19 of Auditing Standard No. 2 do not, by themselves, require the auditor to perform a walkthrough at the service organization when the service organization's activities involve the processing of a major class of transactions. The auditor may determine that it is possible to obtain sufficient evidence to understand the process flow of transactions at a service organization from a variety of sources, including a service auditor's report. For example, a service auditor's report includes a description of the service organization's controls and the service auditor's opinion on whether the description presents fairly the relevant aspects of the service organization's controls that have been placed in operation as of a specific date. The service auditor would have performed procedures comparable to those the user auditor would have performed during a walkthrough to support the service auditor's opinion on whether the description presents fairly the relevant aspects of the service organization's controls that have been placed in operation. When the auditor plans to use a service auditor's report, he or she should evaluate whether the report provides evidence sufficient to achieve the objectives of a walkthrough. The auditor should follow the directions in paragraphs B21–B24 in obtaining evidence and evaluating whether the service auditor's report provides sufficient evidence.

**.03 Staff Questions and Answers: Auditing Internal Control Over Financial Reporting, November 22, 2004**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2"), were prepared by the Office of the Chief Auditor. The staff questions and answers related to Auditing Standard No. 2 are sequentially numbered upon issuance. Staff questions and answers numbered 1–26 [paragraph .01] were issued June 23, 2004, and staff questions and answers numbered 27–29 [paragraph .02] were issued October 6, 2004. Additional questions should be directed to Laura Phillips, Associate Chief Auditor (202/207-9111; philipsl@pcaobus.org) or Greg Fletcher, Assistant Chief Auditor (202/207-9203; fletchergr@pcaobus.org).

\* \* \*

## Scope and Extent of Testing

**Q30.** Paragraphs 182–185 of Auditing Standard No. 2 provide directions regarding opinions based, in part, on the report of another auditor. Paragraph 182 of Auditing Standard No. 2 states that if the auditor decides it is appropriate to serve as the principal auditor of the financial statements, then that auditor also should be the principal auditor of the company's internal control over financial reporting. When another auditor has been engaged to audit the financial statements of a subsidiary, division, branch, or component of the company, must the other auditor also audit internal control over financial reporting in accordance with Auditing Standard No. 2? In other words, is the other auditor required to perform an integrated audit of the financial statements and internal control over financial reporting to satisfy the principal auditor's obligation to report on the consolidated financial statements and internal control over financial reporting?

**A30.** No. There are a number of ways in which the principal auditor can satisfy his or her obligation to report on the consolidated financial statements and internal control over financial reporting, three of which are described below.

- The other auditor may be engaged to perform an integrated audit of the financial statements and internal control over financial reporting. In this instance, the principal auditor must decide whether he or she will assume responsibility for the work of the other auditor. If the principal auditor assumes responsibility for the work of the other auditor, the principal auditor will not refer to the work of the other auditor in his or her report. If the principal auditor decides to divide responsibility with the other auditor, the principal auditor will refer to the other auditor in his or her report. The directions in paragraph 184 of Auditing Standard No. 2 allow the principal auditor to assume responsibility for the audit of the financial

statements or the audit of internal control over financial reporting, or both, or neither. If the principal auditor decides to make reference to the other auditor in his or her report on the audit of internal control over financial reporting, then the other auditor must perform an integrated audit of internal control over financial reporting and the financial statements and separately issue a report in accordance with Auditing Standard No. 2.

- The principal auditor may direct the other auditor to perform specified procedures related to internal control over financial reporting at the subsidiary, division, branch, or component of the company based on the significance of the internal control over financial reporting of the subsidiary, division, branch, or component in relation to the internal control over financial reporting of the consolidated entity as a whole. This approach may save costs as compared to performing an integrated audit of the subsidiary while still achieving the same overall reporting objective. In this case, the principal auditor must assume responsibility for the specified procedures and should follow the directions in Appendix B of Auditing Standard No. 2 regarding tests to be performed when a company has multiple locations or business units.
- The principal auditor may perform procedures at the subsidiary, division, branch, or component of the company that he or she considers necessary to be able to express an opinion on the internal control over financial reporting on a consolidated basis. In this case, the principal auditor should follow the directions in Appendix B of Auditing Standard No. 2 regarding tests to be performed when a company has multiple locations or business units.

Of course, if the subsidiary is itself an issuer subject to Section 404 of the Act and is audited by another auditor, the other auditor must perform an audit of internal control over financial reporting and the financial statements in accordance with Auditing Standard No. 2.

**Q31.** The Securities and Exchange Commission (“SEC”) and the staffs of the Federal Deposit Insurance Corporation (“FDIC”), the Federal Reserve Board, the Office of Thrift Supervision, and the Office of the Comptroller of the Currency have stated that insured depository institutions (“IDIs”) that are subject to the internal control reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (“FDICIA”)<sup>1</sup> as well as the internal control reporting requirements of Section 404 of the Sarbanes-Oxley Act of 2002 (“the Act”) may choose either of the following two options for satisfying both sets of requirements—

1. They can prepare two separate management reports to satisfy the requirements of FDICIA and Section 404 of the Act; or
2. They can prepare a single management report that satisfies both the requirements of FDICIA and Section 404 of the Act.<sup>2</sup>

If an IDI or its holding company elects to prepare a single report to satisfy both sets of requirements, the reports of management and the auditor on the IDI’s

---

<sup>1</sup> See Section 36 of the Federal Deposit Insurance Act and its implementing regulation, 12 CFR Part 363.

<sup>2</sup> See Section II.H.4 of Securities and Exchange Commission Release No. 33-8238 (June 5, 2003) [68 FR 36636], *Final Rule. Management’s Reports on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports*

or the holding company's internal control over financial reporting must address the requirements of both sets of rules.<sup>3</sup>

In Financial Institution Letter ("FIL") 86-94, *Additional Guidance Concerning Annual Audits, Audit Committees and Reporting Requirements*, the FDIC indicated that financial reporting, at a minimum, includes financial statements prepared under generally accepted accounting principles ("GAAP") and the schedules equivalent to the basic financial statements that are included in the IDI's appropriate regulatory report (for example, Schedules RC, RI and RI-A in the Call Report). Accordingly, to comply with FDICIA, management of the IDI (or holding company)<sup>4</sup> and the auditor should identify and test controls over the preparation of GAAP-basis financial statements as well as the schedules equivalent to the basic financial statements that are included in the IDI's (or holding company's) appropriate regulatory report. Further, either management, or the auditor, or both, should include in their report on the IDI's internal control over financial reporting a specific description indicating that the scope of internal control over financial reporting included controls over the preparation of the IDI's GAAP-basis financial statements as well the schedules equivalent to the basic financial statements that are included in the IDI's appropriate regulatory report.

As discussed in Staff Answer No. 5, references in Auditing Standard No. 2 to "financial statements and related disclosures" refer to a company's financial statements and notes as presented in accordance with GAAP. When performing an audit of internal control over financial reporting in accordance with Auditing Standard No. 2 for the purpose of satisfying an IDI's reporting obligations under both Section 404 of the Act and FDICIA, may an auditor expand his or her testing to include an IDI's controls over the preparation of schedules equivalent to the basic financial statements included in the IDI's appropriate regulatory report? May the auditor modify the wording of his or her report to communicate this expansion?

**A31.** Yes. When performing an audit of internal control over financial reporting in accordance with Auditing Standard No. 2 for the purpose of satisfying an IDI's reporting obligations under both Section 404 of the Act as well as FDICIA, the auditor may expand his or her audit to include the IDI's controls over the preparation of schedules equivalent to the basic financial statements included in the IDI's appropriate regulatory report.

When expanding the audit of internal control over financial reporting in this manner, the auditor should be aware that he or she should test controls over the preparation of the schedules in the IDI's regulatory report to determine whether they are effective. Auditors of IDIs frequently perform a substantive test of these schedules by reconciling the schedules that are equivalent to the basic financial statements that are included in the IDI's appropriate regulatory report to the IDI's GAAP-basis financial statements. As discussed in paragraph 158 of Auditing Standard No. 2, the absence of misstatements detected by substantive procedures does not provide evidence that controls related to the assertion being tested are effective. The

---

<sup>3</sup> See Section II H.4 of Securities and Exchange Commission Release No. 33-8238 (June 5, 2003) [68 FR 36636], *Final Rule: Management's Reports on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports*, for further discussion of how the requirements of FDICIA and Section 404 of the Act differ and what a single report by management would have to cover.

<sup>4</sup> See FIL 86-94 for further discussion of the holding company exemption for FDICIA reporting purposes and its application as it relates to controls over the preparation of "regulatory reports."

effectiveness of controls should be tested directly. Also, as discussed in paragraph 96 of Auditing Standard No. 2, the nature of the tests of controls should be beyond inquiry alone.

Additionally, paragraph 76 of Auditing Standard No. 2 describes the period-end financial reporting process as including the procedures for drafting annual and quarterly financial statements and related disclosures. Accordingly, when the audit of internal control over financial reporting has been expanded to include the IDI's controls over the preparation of schedules equivalent to the basic financial statements that are included in the IDI's appropriate regulatory report, the auditor should test controls over the preparation of those schedules in the IDI's annual and interim regulatory reports.

When the auditor expands his or her audit of internal control over financial reporting to include the IDI's controls over the preparation of schedules equivalent to the basic financial statements included in the IDI's appropriate regulatory report, the auditor's report may be modified to indicate this. For example, the auditor could add the following sentence as the second sentence of the definition paragraph of the auditor's report for a bank holding company:

Because management's assessment and our audit were conducted to also meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management's assessment and our audit of W Company's internal control over financial reporting included controls over the preparation of financial statements in accordance with the instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9 C).<sup>5</sup>

The staff believes that this type of change to the auditor's report would communicate appropriately the expanded nature of the audit of internal control over financial reporting to meet the requirements of both Section 404 of the Act and FDICIA and satisfy the reporting elements described in paragraph 167 of Auditing Standard No. 2. The auditor might determine that changes to his or her report other than the one illustrated above also could accomplish the same objectives.

## Evaluating Deficiencies

**Q32.** The definitions of significant deficiency and material weakness in paragraphs 9 and 10, respectively, of Auditing Standard No. 2 address the likelihood and magnitude of misstatements of the annual or interim financial statements. Therefore, the auditor should evaluate the possible effects of identified control deficiencies on both the annual and interim financial statements to determine whether the control deficiencies, individually or in combination, represent significant deficiencies or material weaknesses. Does this responsibility have any effect on either the scope or timing of the auditor's procedures in an audit of internal control over financial reporting?

---

<sup>5</sup> This sentence would be modified if the reporting entity was an IDI rather than a bank holding company to refer to the Federal Financial Institutions Examination Council instructions for Consolidated Reports of Condition and Income ("call report instructions") or Office of Thrift Supervision Instructions for Thrift Financial Reports ("TFR instructions") instead of to the FR Y-9C. This sentence also would be modified if the IDI employed another approach to reporting on controls over the preparation of regulatory reports as permitted by FIL 86-94.

**A32.** No. As discussed in paragraph 147 of Auditing Standard No. 2, the auditor's opinion relates to the effectiveness of the company's internal control over financial reporting as of a point in time. Additionally, paragraph E92 of Auditing Standard No. 2 points out that an evaluation of internal control over financial reporting as of year end encompasses controls over the annual financial reporting and quarterly financial reporting as such controls exist at that point in time. Although the auditor should obtain evidence about the internal control over financial reporting over a sufficient period of time, as discussed in paragraph 148 of the standard, the auditor has flexibility in determining the timing of his or her testing. Further, the auditor is required by paragraph 130 of Auditing Standard No. 2 to reach a conclusion regarding the significance of all identified control deficiencies only as of the date of the assessment (i.e., as of year end). This is consistent with the directions in paragraphs 98–103 of Auditing Standard No. 2 regarding the timing of tests of controls. Although the auditor might reach a conclusion regarding the significance of a control deficiency as of an earlier date, an earlier conclusion is not required by Auditing Standard No. 2.

**Q33.** Paragraph 207 of Auditing Standard No. 2 states that the auditor must communicate in writing to management and the audit committee all significant deficiencies and material weaknesses identified during the audit. Paragraph 214 states that when timely communication is important, the auditor should communicate significant deficiencies and material weaknesses during the course of the audit rather than at the end of the engagement. In light of these directions, can the auditor strictly limit his or her communication of significant deficiencies and material weaknesses to those that exist as of the date of management's assessment? For example, can the auditor exclude from this communication any significant deficiencies and material weaknesses of which the auditor was aware during the course of his or her audit but that did not exist as of the date of management's assessment because they were corrected?

**A33.** No. The directions in paragraph 207 refer to "significant deficiencies and material weaknesses identified during the audit"—not significant deficiencies and material weaknesses existing as of the date of management's assessment. The auditor, therefore, must include in his or her written communication to management all significant deficiencies and material weaknesses that exist as of the date of management's assessment as well as significant deficiencies and material weaknesses that the auditor becomes aware of as of an interim date that have not yet been corrected as of that interim date.

This communication requirement was designed with several objectives in mind. First, it is important for the auditor to communicate all significant deficiencies and material weaknesses that the auditor believes exist as of year end to enable management and the audit committee to understand whether the auditor, in his or her independent judgment, has reached similar conclusions as management regarding the severity of deficiencies that exist as of year end. It is also important for the auditor to communicate any conditions that the auditor believes are significant deficiencies and material weaknesses as of an interim date (as described in paragraph 214) so that management and the audit committee can take corrective action as soon as possible. In this manner, management might be able to correct a significant deficiency or material weakness identified by the auditor in advance of the date of management's annual assessment required by Section 404(a) of the Act.

The need to communicate significant deficiencies and material weaknesses identified as of an interim date, however, is limited by several aspects of Auditing Standard No. 2. As described in Staff Answer No. 32, the auditor is required by paragraph 130 of Auditing Standard No. 2 to reach a conclusion regarding the significance of all identified control deficiencies only as of the date of the assessment (i.e., as of year end). Although the auditor might reach a conclusion regarding the significance of a control deficiency as of an earlier date, an earlier conclusion is not required by Auditing Standard No. 2. The audit of internal control over financial reporting is an annual, not a quarterly, process. Also, because the objective of a timely auditor communication regarding significant deficiencies and material weaknesses is to enable management and the audit committee to take corrective action as soon as possible, there is no need for the auditor to communicate significant deficiencies and material weaknesses as of an interim date when the auditor becomes aware of their existence only because management already has identified them as significant deficiencies or material weaknesses and begun corrective action.

Therefore, the auditor's responsibility to communicate in writing to management and the audit committee all significant deficiencies and material weaknesses identified during the audit encompasses (1) all significant deficiencies and material weaknesses that exist as of the date of the assessment and (2) any deficiencies that the auditor concludes, as of an earlier date, are significant deficiencies or material weaknesses and that management has not also identified as significant deficiencies or material weaknesses and begun corrective action upon as of the interim date.

**Q34.** Paragraph 142 of Auditing Standard No. 2 states that the auditor should obtain a representation from management that, among other matters, management has disclosed to the auditor all deficiencies in the design or operation of internal control over financial reporting identified as part of management's assessment, including separately disclosing to the auditor all such deficiencies that it believes to be significant deficiencies or material weaknesses. Can the auditor accept this representation from management if management has communicated only deficiencies, including those that are significant deficiencies and material weaknesses, that exist as of the date of management's assessment?

**A34.** No. This representation contemplates that management has disclosed to the auditor all deficiencies in internal control over financial reporting identified as part of management's assessment, regardless of whether the deficiencies have been corrected as of the date of management's assessment.

Management already is required by other provisions of the Act and the SEC's associated implementing rules to communicate all significant deficiencies and material weaknesses to the auditor and the audit committee. The representation in paragraph 142 was intended to close what some commenters on the Board's proposed internal control standard perceived as a loophole: that management could conceal a deficiency from the auditor by concluding that it was only a deficiency and, therefore, was not captured by other communication requirements for management to communicate significant deficiencies and material weaknesses to the auditor and the audit committee. When the auditor obtains the representation from management described in paragraph 142 that management has communicated to the auditor all deficiencies in internal control over financial reporting identified

as part of management's assessment, the auditor has the ability (and responsibility) to evaluate, in his or her own judgment, (1) whether those deficiencies exist as of the date of management's assessment and, if so (2) the severity of those deficiencies. This is an important part of the auditor obtaining sufficient evidence supporting his or her opinion about the effectiveness of internal control over financial reporting.

Management may, of course, communicate all deficiencies in internal control over financial reporting identified as part of management's assessment throughout the course of management's assessment process and in a number of different forms. The staff expects that management would not ordinarily need to assemble a separate documentation package solely for the purpose of representing that it has disclosed to the auditor all identified deficiencies in internal control. In most circumstances, management's documentation of its assessment would be sufficient for communicating all deficiencies to the auditor. For example, if management uses a database to accumulate and document all identified control deficiencies, management could grant the auditor continuous access to management's database. Further, some issuers might correct identified control deficiencies prior to year end without reaching a conclusion as to their severity. In this case, the significance of the deficiency would be irrelevant in terms of management's year-end conclusion as part of its assessment of internal control over financial reporting because the deficiency would not exist as of year end. Management's representation that it has separately disclosed to the auditor all such deficiencies that it believes to be significant deficiencies or material weaknesses does not, by itself, obligate management to conclude on the severity of a deficiency that it otherwise would not have concluded upon.

**Q35.** Paragraph 50 of Auditing Standard No. 2 states that some controls might have a pervasive effect on the achievement of many overall objectives of the control criteria. For example, information technology ("IT") general controls over program development, program changes, computer operations, and access to programs and data help ensure that specific controls over the processing of transactions are operating effectively. IT general controls whose design or operation is ineffective would, of course, be deficiencies. The definitions of significant deficiency and material weakness, however, focus on the likelihood and magnitude of financial statement misstatement. IT general controls, by their nature, do not affect a company's financial statements directly. How should the significance of deficiencies in IT general controls be evaluated?

**A35.** To evaluate the significance of a deficiency in IT general controls, the effect of the deficiency on application controls should be evaluated. Application controls can be automated control procedures (for example, calculations, posting to accounts, generation of reports, edits, and control routines) performed by IT. When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include automated application controls related to the corresponding assertions for significant accounts or disclosures. Application controls also may be manual controls that are dependent on IT (for example, the review by an inventory manager of an exception report when the exception report is generated by IT). Although IT general control deficiencies do not result in financial statement misstatements directly, an associated ineffective application control may lead to misstatements. Therefore, the significance of an IT general control deficiency should be evaluated in relation to its effect on application controls, that is, whether the associated application controls are ineffective.

An application control might be effective even if deficiencies exist in IT general controls. For example, in the presence of deficient program change controls, management and the auditor might be able to determine that, in the circumstances, the relevant application controls were operating effectively as of the date of management's assessment. In this case, the deficiency in IT general controls could be classified as only a deficiency. On the other hand, deficient program change controls might result in unauthorized changes to application controls, in which case the application controls are ineffective. In this case, the ineffective program change controls, combined with the ineffective application controls, should be evaluated in terms of likelihood and magnitude of potential financial statement misstatement. In this manner, the combined effect of the ineffective IT general control and the ineffective application control(s) could be classified as either a significant deficiency or a material weakness for both the application control and the related IT general control.

The definitions of significant deficiency and material weakness also contain aggregation concepts: a control deficiency, or *combination of control deficiencies*, can represent a significant deficiency or material weakness. After an IT general control deficiency has been evaluated in relation to its effect on application controls, it also should be evaluated when aggregated with other control deficiencies. For example, all deficiencies affecting the control environment should be evaluated in the aggregate. Management's decision not to correct an IT general control deficiency and its associated reflection on the control environment, when aggregated with other deficiencies affecting the control environment, could lead to the conclusion that a significant deficiency or material weakness in the control environment exists.

An IT general control deficiency in the absence of an application control deficiency could be classified as only a control deficiency. Based on the directions in paragraph 137, the auditor also could determine that a prudent official in the conduct of his or her own affairs would conclude that the IT general control deficiency, by itself, was a significant deficiency. In this manner, an IT general control deficiency, by itself, could be covered by paragraph 140 of Auditing Standard No. 2, which states that significant deficiencies that have been communicated to management and the audit committee that remain uncorrected after some reasonable period of time are strong indicators of a material weakness.

## Using the Work of Others

**Q36.** Auditing Standard No. 2 allows the auditor to use the work of others to alter the nature, timing, and extent of work he or she otherwise would have performed. Paragraph 109 of Auditing Standard No. 2 states that the auditor may apply the relevant concepts of AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*,<sup>6</sup> to using the work of others in the audit of internal control over financial reporting. AU sec. 322 allows the auditor to use internal auditors to provide direct assistance in an

---

<sup>6</sup> The Board adopted the generally accepted auditing standards, as described in the AICPA Auditing Standards Board's ("ASB") Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, as in existence on April 16, 2003, on an initial, transitional basis. The Statements on Auditing Standards promulgated by the ASB have been codified into the *AICPA Professional Standards*, Volume 1, as AU sections 100 through 900. References in Auditing Standard No. 2 and this Staff Questions and Answers document refer to those generally accepted auditing standards, as adopted on an interim basis in PCAOB Rule 3200T.

## **11,042 PCAOB Staff Qs & As and Other Implementation Guidance**

audit of the financial statements. Can the auditor use internal auditors to provide direct assistance in the audit of internal control over financial reporting?

**A36.** Yes. The reference to AU sec. 322 in paragraph 109 of Auditing Standard No. 2 means that the auditor can use internal auditors to provide direct assistance in the audit of internal control over financial reporting. AU sec. 322 further describes using internal auditors as direct assistance.

Paragraph 108 of Auditing Standard No. 2, however, states that the auditor must perform enough of the testing himself or herself so that the auditor's own work provides the principal evidence for the auditor's opinion. Because the auditor is not performing the testing himself or herself when internal auditors provide direct assistance, testing performed by internal auditors as direct assistance does not qualify as part of the principal evidence supporting the auditor's opinion.

Similarly, paragraph 116 of Auditing Standard No. 2 states that the auditor should perform the walkthroughs (described beginning at paragraph 79) himself or herself because of the degree of judgment required in performing this work. Therefore, the auditor may not use internal auditors as direct assistance for the walkthroughs that the auditor determines are necessary. Also, as described in paragraph 113, the auditor should not use the work of others to reduce the amount of work he or she performs on controls in the control environment because of the nature of the controls in the control environment. Accordingly, the auditor cannot use direct assistance provided by internal auditors to reduce the amount of work the auditor performs himself or herself on controls in the control environment.

Therefore, when the auditor uses internal auditors to provide direct assistance in the audit of internal control over financial reporting, the auditor should determine the extent to which this direct assistance alters the nature, timing and extent of the work the auditor would otherwise have performed by following the directions in paragraphs 108–126 of Auditing Standard No. 2 regarding using the work of others. For example, consistent with the example in paragraph 126 regarding management self-assessment of controls, the auditor should not use internal auditors to provide direct assistance to test controls the internal auditor tested as part of management's assessment.

**.04 Staff Questions and Answers: Auditing Internal Control Over Financial Reporting, January 21, 2005**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff question and answer related to PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2"), was prepared by the Office of the Chief Auditor. The staff questions and answers related to Auditing Standard No. 2 are sequentially numbered upon issuance. Staff questions and answers numbered 1–36 [paragraphs .01–.03] are available on the Board's web site at <http://www.pcaobus.org>. Additional questions should be directed to Laura Phillips, Associate Chief Auditor (202/207-9111; [phillips1@pcaobus.org](mailto:phillips1@pcaobus.org)) or Greg Fletcher, Assistant Chief Auditor (202/207-9203; [fletcher@pcaobus.org](mailto:fletcher@pcaobus.org)).

\* \* \*

## Temporary Transitional Rule 3201T

**Q37.** The Board's temporary transitional rule, Rule 3201T, *Temporary Transitional Provision for Auditing Standard No. 2, "An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements,"* provides that, notwithstanding Auditing Standard No. 2, in connection with the audit of an issuer that does not file management's annual report on internal control over financial reporting in reliance on the SEC's order,<sup>1</sup> an auditor need not date the auditor's report on management's assessment of the effectiveness of internal control over financial reporting with the same date as the auditor's report on the issuer's financial statements,<sup>2</sup> as long as the date of the auditor's report on management's assessment is later than the date of the report on the financial statements.

Paragraph 14 of PCAOB Auditing Standard No. 3, *Audit Documentation* ("Auditing Standard No. 3"), defines the "report release date" as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. Paragraph 15 of Auditing Standard No. 3 requires that a complete and final set of audit documentation be assembled for retention as of a date not more than 45 days after the report release date (defined as the "documentation completion date").

When an auditor is engaged to perform an integrated audit of the financial statements and internal control over financial reporting under Auditing Standard No. 2, the auditor may prepare a single set of integrated audit documentation for the engagement.

If an auditor that has been engaged to perform an integrated audit of the financial statements and internal control over financial reporting under Auditing

---

<sup>1</sup> See Exchange Act Release No. 50754 (Nov. 30, 2004).

<sup>2</sup> See, e.g., Paragraph 171, Auditing Standard No. 2.

## 11,044 PCAOB Staff Qs & As and Other Implementation Guidance

Standard No. 2 releases his or her report on the financial statements before releasing his or her report on management's assessment of internal control over financial reporting in reliance on Rule 3201T, does this action create two separate documentation completion dates—one for the auditor's report on the financial statements and one for the auditor's report on management's assessment?

**A37.** No, there would not be two separate documentation completion dates if the auditor releases his or her report on management's assessment of internal control in reliance on Rule 3201T within the time period described by the SEC's order.<sup>3</sup> In normal circumstances, an auditor engaged to perform an integrated audit of the financial statements and internal control over financial reporting under Auditing Standard No. 2 would release his or her reports on the financial statements and management's assessment of internal control over financial reporting on the same date and, as Auditing Standard No. 2 requires, both reports would be dated the same. Therefore, normally, there would be a single documentation completion date associated with the completion of an engagement performed under Auditing Standard No. 2.

In the circumstance in which the auditor releases his or her report on the financial statements *before* releasing his or her report on management's assessment of internal control over financial reporting in reliance on Rule 3201T, the 45-day period specified in paragraph 15 of Auditing Standard No. 3 that determines the documentation completion date for the auditor's report on the financial statements begins on the earlier of (1) the release of the auditor's report on management's assessment of internal control over financial reporting or (2) the date that management was required, under the SEC's order, to file an amendment to its Form 10-K that was to include the omitted management and auditor reports on internal control.

---

<sup>3</sup> The SEC's order, among other things, requires an issuer relying on the exemption in the order to file all of the other information required in Form 10-K within the 75 day period specified in the form and complete its Form 10-K by filing an amendment to include the omitted management and auditor reports on internal control not later than 45 days after the end of that 75 day period. See Exchange Act Release No. 50754 (Nov. 30, 2004) for further information.

**.05 Staff Questions and Answers: Auditing Internal Control Over Financial Reporting, May 16, 2005**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2"), were prepared by the Office of the Chief Auditor. \* \* \*

## General

**Q38.** What is a "top-down approach" to the audit of internal control over financial reporting, and what are its benefits?

**A38.** In a top-down approach to auditing internal control over financial reporting, the auditor performs procedures to obtain the necessary understanding of internal control over financial reporting and to identify the controls to test in a sequential manner, starting with company-level controls and then driving down to significant accounts, significant processes, and, finally, individual controls at the process, transaction, or application levels. Auditing Standard No. 2 was designed to encourage the auditor to take this type of top-down approach to his or her audit. A top-down approach prevents the auditor from spending unnecessary time and effort understanding a process or control that does not affect the likelihood that the company's financial statements could be materially misstated.

By following the top-down sequence summarized below, the auditor focuses early in the process on matters, such as company-level controls, that can have an effect on the auditor's later decisions about scope and testing strategy. This approach also helps the auditor to identify and eliminate from further consideration accounts, disclosures, and assertions that have only a remote likelihood of containing misstatements that could cause the financial statements to be materially misstated.

Top-down Approach Sequence	Auditing Standard No. 2 Direction
Identify, understand, and evaluate the design effectiveness of company-level controls	Paragraphs 52 through 59
Identify significant accounts, beginning at the financial-statement or disclosure level	Paragraphs 60 through 67
Identify the assertions relevant to each significant account	Paragraphs 68 through 70
Identify significant processes and major classes of transactions	Paragraphs 71 through 78
Identify the points at which errors or fraud could occur in the process	This identification occurs during the identification of significant accounts, relevant assertions, and significant processes, and is confirmed by performing walkthroughs as described in paragraphs 79–82
Identify controls to test that prevent or detect errors or fraud on a timely basis	Paragraphs 83 through 87
Clearly link individual controls with the significant accounts and assertions to which they relate	Paragraph 84

In this top-down approach, the auditor begins by identifying, understanding, and evaluating the design of company-level controls. Company-level controls include:

- controls within the control environment, such as tone at the top, organizational structure, commitment to competence, human resource policies and procedures;
- management’s risk assessment process;
- centralized processing and controls, such as shared service environments;
- controls to monitor other controls, including activities of the internal audit function, the audit committee, and self-assessment programs; and
- the period-end financial reporting process.

Company-level controls function within all five COSO<sup>1</sup> internal control components and often have a pervasive effect on controls at the process, transaction, or application level. Because of the pervasive effect of company-level controls, in this top-down approach, the auditor tests and evaluates the effectiveness of company-level controls first, because the results of this work will affect the auditor’s testing strategy for controls at the process, transaction, and application levels. Staff Question No. 43 further discusses

<sup>1</sup> COSO refers to The Committee of Sponsoring Organizations (“COSO”) of the Treadway Commission’s publication, *Internal Control—Integrated Framework* (the “COSO Report”). Paragraph 49 of Auditing Standard No. 2 and the COSO report describe these components.

the role of company-level controls in the auditor's decisions about the nature, timing, and extent of tests of controls at the process, transaction, or application levels.

This top-down approach is both effective and efficient. In terms of effectiveness, the identification of significant accounts at the financial statement level (the "top") is driving the audit process "down" to the individual control level. In this manner, the auditor is assured of identifying controls to test that address relevant assertions for significant accounts. In terms of efficiency, this process prevents the auditor from spending unnecessary time and effort understanding a process or control that ultimately is not relevant to whether the financial statements could be materially misstated.

**Q39.** Auditors generally employ a "risk-based" approach to auditing financial statements. The auditor's assessment of the risk that a financial statement amount or disclosure is misstated affects the nature, timing, and extent of the auditor's work on that financial statement amount or disclosure. How is an audit of internal control over financial reporting risk-based?

**A39.** Risk assessment underlies the entire audit process described by Auditing Standard No. 2. A direct relationship exists between the degree of risk that a material weakness could exist in a particular area of the company's controls and the amount of audit attention the auditor should devote to that area. Accordingly, the lower the risk that a material weakness could exist in a particular area, the less audit attention the auditor would need to devote to the area. On the other hand, the higher the risk that a material weakness could exist in a particular area, the greater the amount of audit attention the auditor should devote to the area. This relationship between risk and amount of audit attention is consistent with the auditor's responsibility to plan and perform the audit of internal control over financial reporting so that the risk that he or she fails to find a material weakness that does exist is appropriately low.

**Q40.** How does the auditor's assessment of the risk of financial statement misstatement affect the work that must be performed in an audit of internal control over financial reporting?

**A40.** The auditor's assessment of the risk that the financial statements could be materially misstated is an integral part of an audit of internal control over financial reporting conducted pursuant to Auditing Standard No. 2. The auditor's risk assessment, therefore, has a pervasive effect on the amount of work the auditor must perform.

The effects of the auditor's risk assessment are particularly significant in four provisions of Auditing Standard No. 2 that are at the center of an audit of internal control: (1) the identification of significant accounts, (2) the identification of relevant assertions, (3) the nature, timing, and extent of the auditor's tests of controls, and (4) the auditor's use of the work of others.

*Significant accounts.* Paragraph 65 of Auditing Standard No. 2 describes quantitative and qualitative risk factors that the auditor should evaluate in deciding whether an account is significant. Using these risk factors, the auditor may eliminate from further consideration (unless the auditor later identifies indications of a higher level of risk) those accounts and disclosures that have only a remote likelihood of containing misstatements that could cause the financial statements to be materially misstated.

Staff Question No. 41 further discusses the identification of significant accounts.

*Relevant assertions.* The auditor identifies relevant assertions related to significant accounts by evaluating the risk that the assertions could be misstated. An assertion that does not present a meaningful risk of potential material misstatement should not be identified as a relevant assertion and does not need to be subject to the auditor's testing.

*Nature, timing, and extent of tests of controls.* Auditing Standard No. 2 provides the auditor with the ability to test a control less extensively and farther from the "as-of" date when less risk is associated with the control. Likewise, these provisions direct the auditor to test a control more extensively and closer to the as-of date of management's assessment when more risk is associated with the control.

Staff Question No. 43 further discusses the role of an assessment of risk on the nature, timing, and extent of tests of controls.

*Using the work of others.* An important component of the framework for using the work of others in an audit of internal control over financial reporting relates to the nature of the controls subjected to the work of others. Paragraph 112 of Auditing Standard No. 2 describes several risk factors that the auditor should evaluate when evaluating the nature of the controls subjected to the work of others. As these factors decrease in significance, the need for the auditor to perform his or her own work on those controls decreases. As these factors increase in significance, the need for the auditor to perform his or her own work on those controls increases. In this manner, the auditor's degree of reliance on the work of others should be naturally responsive to the degree of risk associated with the testing of those controls.

Staff Question No. 54 further discusses the role of risk assessment on the auditor's use of the work of others.

## Scope and Extent of Testing

**Q41.** The identification of significant accounts plays a central role in the scoping of an audit of internal control over financial reporting. What role do qualitative factors and an assessment of risk have in the identification of significant accounts?

**A41.** As discussed in Staff Question No. 40, the auditor should determine that an account is significant based on an assessment of the risk that the account could contain misstatements that individually, or when aggregated with others, could have a material effect on the financial statements. Paragraph 65 of Auditing Standard No. 2 describes quantitative and qualitative factors that the auditor should evaluate together to determine whether an account is significant. It is important for the auditor to take into account the total mix of information that is available in determining whether an account is significant. Accordingly, quantitative measures alone are not determinative of whether an account should be identified as significant.

For example, paragraph 66 of Auditing Standard No. 2 should not be understood to require that the fixed asset account be identified as a significant account for the audit of internal control over financial reporting simply because it is quantitatively large and without regard to the risk that the account could be materially misstated. The example in paragraph 66 in which the fixed asset account is determined to be significant is based on considering both quantitative and qualitative factors.

If the auditor determines that an account is a significant account for the audit of internal control over financial reporting, the auditor should design his or her control testing strategy to be responsive to his or her assessment of the risk related to the account. Staff Question No. 43 further discusses how the auditor may reduce the extent of his or her control testing for accounts that are assessed as having lower risk.

The auditor also should consider that components of an account balance may be subject to differing risks or different controls. Accordingly, the auditor may be able to reduce or eliminate testing of controls for some components. To take an obvious example, the petty cash component of the financial statement line item “cash and cash equivalents” rarely presents a more than remote risk that the financial statements could be materially misstated.

**Q42.** At many companies, management identifies and tests what it describes as “key” or “significant” controls as a part of its assessment of internal control over financial reporting. Is the auditor required to test all the controls that management tested because management described them as key or significant?

**A42.** No. Auditing Standard No. 2 does not define key or significant controls. Depending on the way in which key or significant controls are identified, testing all of those controls might result in the auditor testing either more or fewer controls than necessary. Rather, paragraph 83 of Auditing Standard No. 2 states that the auditor should obtain evidence about the effectiveness of controls (either by performing tests of controls himself or herself, or by using the work of others) for all relevant assertions related to all significant accounts and disclosures in the financial statements. This direction encourages the auditor to focus on assertions that are relevant to the accounts and disclosures that the auditor has determined are significant before deciding which controls to test. This process is consistent with the top-down approach described in Staff Question No. 38.

There may be circumstances in which management identifies and tests more controls than necessary for the purpose of its assessment of internal control over financial reporting. Such a decision on the part of management should not affect the scope of the auditor’s work. The auditor need test only those controls that the auditor identifies as controls over relevant assertions related to significant accounts. This direction applies to the auditor’s tests of design effectiveness as well as operating effectiveness of controls.

Staff Question No. 49 further discusses the independent nature of management’s decisions regarding controls to test compared with the auditor’s decisions related to the testing of controls.

**Q43.** How does the auditor’s assessment of risk affect the auditor’s decisions about the nature, timing, and extent of testing of controls?

**A43.** As discussed further in Staff Question No. 40, a direct relationship exists between the degree of risk that a material weakness could exist in a particular area of a company’s controls and the amount of audit attention the auditor should devote to that area. Accordingly, the provisions of Auditing Standard No. 2 discussed below provide the auditor with the ability to reduce his or her testing for lower-risk areas.

*Nature.* As the risk associated with the control being tested decreases, the persuasiveness of the evidence that the auditor needs to obtain also decreases. On the other hand, as the risk associated with the control being tested increases, the persuasiveness of the evidence that the auditor needs to obtain also increases.

Paragraphs 89 and 93 of Auditing Standard No. 2 describe the nature of the procedures the auditor might choose to perform to test the effectiveness of a control. These procedures include inquiry, observation, inspection of relevant documentation, and reperformance of the application of the control. The auditor also may perform walkthroughs, which ordinarily consist of some combination of these types of procedures, as tests of design and operating effectiveness. These procedures are listed in the order of the general level of persuasiveness of the evidence that they ordinarily would produce, from lowest to highest. Although inquiry alone is not sufficient, the auditor has significant latitude to determine what work should be done.

*Timing.* Generally, as the risk associated with the control being tested decreases, the testing may be performed farther from the as-of date; on the other hand, as the risk associated with the control increases, the testing should be performed closer to the as-of date. Paragraphs 100 and 101 of Auditing Standard No. 2 describe factors that the auditor should evaluate when determining the timing of his or her testing.

In determining that the testing of a control should be performed closer to the as-of date because of increased risk associated with the control, the auditor still may test those controls as of an interim date and correspondingly adjust the nature and extent of his or her roll-forward procedures to be more extensive.

Staff Question No. 51 further discusses determining adequate roll-forward procedures.

Also, as described in paragraph 101 of Auditing Standard No. 2, the auditor should balance performing tests of controls closer to the as-of date with the need to obtain sufficient evidence of operating effectiveness. For example, if the auditor determined that he or she should test 25 operations of a control that operated multiple times per day, the auditor should not test that control 25 times on the last day of the company's fiscal year.

*Extent.* As the risk associated with a control decreases, the extensiveness of the auditor's testing should decrease; as the risk associated with a control increases, the extensiveness of the auditor's testing also should increase. Paragraph 105 of Auditing Standard No. 2 describes three primary factors that the auditor should evaluate when determining the extent of testing the auditor should perform on a given control: (1) the nature of the control, (2) the frequency of operation, and (3) the importance of the control. Evaluating the nature of the control, and especially the importance of the control, is related directly to the auditor's assessment of risk associated with the control.

*Company-level controls.* As described in Staff Question No. 38 regarding the top-down approach, the auditor's evaluation of company-level controls also will affect the auditor's decisions regarding the nature, timing, and extent of testing a control. Because company-level controls have a bearing on the auditor's evaluation of risk associated with the controls operating at more detailed levels than the company-level controls, the auditor's evaluation of company-level controls can result in increasing or decreasing the testing that the auditor otherwise would have performed on controls at the process, transaction, or application levels. Although testing company-level controls alone is not sufficient, pervasive company-level controls can have a significant effect on the auditor's testing of other controls, particularly when strong company-level controls that have a direct relationship with lower-level controls result in the auditor decreasing the testing he or she otherwise would have performed.

**Q44.** The Background and Basis for Conclusions of Auditing Standard No. 2 indicates that the requirements in Auditing Standard No. 2 reflect the Board's decision that "each year's audit must stand on its own." Does this mean that the auditor must ignore the results of the previous year's audit of internal control over financial reporting and conduct subsequent audits as though they were an initial audit?

**A44.** No. The statement that each year's audit must stand on its own does not mean that audit knowledge obtained in prior years should be ignored in subsequent years' audits. Importantly, the auditor should use previous knowledge about the company's internal control over financial reporting to inform his or her assessments of risk in the current-year's audit. For example, during the first audit of internal control over financial reporting, the auditor might have determined his or her sample size for testing a control by planning for several exceptions—a sampling strategy that would have resulted in a larger sample size than if no exceptions were expected. Based on favorable audit results, the auditor might reduce his or her sample size to reflect the expectation of no exceptions in the next year.

Staff Question Nos. 39, 40, and 43 further discuss how the auditor's assessment of risk could affect his or her audit approach.

Also, as described in paragraph E120 of Auditing Standard No. 2, some natural efficiency will emerge as the auditor repeats the audit process. For example, the auditor likely will spend less time obtaining the requisite understanding of the company's internal control over financial reporting in subsequent years compared with the time that was necessary in the first year. This use of previous knowledge also means that the auditor's evaluation of the design effectiveness of controls in subsequent years should be substantially more efficient.

Additionally, the statement that each year's audit must stand on its own accommodates both benchmarking automated application controls (See Staff Question No. 45) and alternating tests of controls (See Staff Question No. 46).

**Q45.** Since each year's audit must stand on its own, can a benchmarking strategy for testing automated application controls be employed? How would the auditor properly execute such a testing strategy?

**A45.** Yes, a benchmarking strategy for testing automated application controls can be used and presents an area of potential audit efficiency for those companies that have made investments in effective Information Technology ("IT") general controls. As such, paragraph E122 of Auditing Standard No. 2 specifically acknowledges benchmarking as a testing strategy that is permitted by the standard.

In general, to render an opinion as of the date of management's assessment, the auditor needs to test controls every year. This type of evidence is needed regardless of whether controls were found to be effective at the time of the prior annual assessments or whether those controls have changed since that time because even if nothing significant changed about the company—the business model, employees, organizational structure, etc.—controls that were effective last year may not be effective this year due to error, complacency, distraction, and other human conditions that result in the inherent limitations in internal control over financial reporting. Automated application controls, however, will continue to perform a given control (for example,

aging of accounts receivable, extending prices on invoices, performing edit checks) in exactly the same manner until the program is changed. Entirely automated application controls, therefore, are generally not subject to breakdowns due to human failure and this feature allows the auditor to “benchmark,” or “baseline,” these controls.

If general controls over program changes, access to programs, and computer operations are effective and continue to be tested, and if the auditor verifies that the automated application control has not changed since the auditor last tested the application control, the auditor may conclude that the automated application control continues to be effective without repeating the prior year’s specific tests of the operation of the automated application control. The nature and extent of the evidence that the auditor should obtain to verify that the control has not changed may vary depending on the circumstances, including depending on the strength of the company’s program change controls.

When using a benchmarking strategy for a particular control, the auditor also should consider the importance of the effect of related files, tables, data, and parameters on the consistent and effective functioning of the automated application control. For example, an automated application for calculating interest income might be dependent on the continued integrity of a rate table used by the automated calculation.

To determine whether to use a benchmarking strategy, the auditor should evaluate the following factors. As these factors increase in significance, the control being evaluated should be viewed as well suited for benchmarking. As these factors decrease in significance, the control being evaluated should be viewed as less suited for benchmarking. These factors are:

- the extent to which the application control can be matched to a defined program within an application;
- the extent to which the application is stable (i.e., there are few changes from period to period); and
- whether a report of the compilation dates of all programs placed in production is available and is reliable. (This information may be used as evidence that controls within the program have not changed.)

Benchmarking automated application controls can be especially effective for companies using purchased software when the possibility of program changes is remote—for example, when the vendor does not allow access or modification to the source code.

At some point, the benchmark of an automated application control should be reestablished. To determine whether to reestablish a benchmark, the auditor should evaluate the following factors:

- the effectiveness of the IT control environment, including controls over application and system software acquisition and maintenance, access controls and computer operations;
- the auditor’s understanding of the effects of changes, if any, on the specific programs that contain the controls;
- the nature and timing of other related tests; and
- the consequences of errors associated with the application control that was benchmarked.

**Q46.** In the context of an audit of internal control over financial reporting, what does “alternating tests of controls” mean?

**A46.** Alternating tests of controls relates to using the work of others and other variations in testing from year to year. The statement that each year’s audit must stand on its own is a guiding principle, and one that permits significant flexibility in varying the nature, timing, and extent of work in particular areas from year to year.

The auditor may use the work of others in a particular area to a large extent, perhaps entirely, in one or more years and to a lesser extent in other years. This decision to use the work of others as the entirety of the audit evidence for a given area would be made using the principles described in paragraphs 108 through 125 of Auditing Standard No. 2, including evaluating the nature of the controls being tested and the competence and objectivity of the individuals who performed the work.

Variation in the auditor’s testing, as paragraph 104 of Auditing Standard No. 2 explains, includes the concept that the auditor “should vary from year to year the nature, timing, and extent of testing of controls to introduce unpredictability into the testing and respond to changes in circumstances.” In a particular area, from year to year, the auditor may vary the time period over which controls are tested, the number and types of procedures performed, or the combination of procedures used. Each year’s audit must stand on its own, but each year’s audit does not have to include the same scope of testing.

**Q47.** As companies refine their approach to complying with the reporting requirements of Section 404 in subsequent years, many companies are expected both to improve their processes and procedures for monitoring the operation of controls and to make further use of control self-assessments. Management also plays a role as part of internal control itself. How should these factors affect the auditor’s evaluation of management’s assessment?

**A47.** Management’s daily interaction with the system of internal control provides it with a broader array of procedures to achieve reasonable assurance for its assessment of internal control over financial reporting than the auditor has available. The auditor should recognize this difference when evaluating the adequacy of management’s assessment.

Paragraph 40 of Auditing Standard No. 2, which addresses the auditor’s evaluation of management’s assessment process, recognizes the important difference between management’s assessment and the auditor’s testing. The fifth bullet of that paragraph cites as examples of procedures that management could use to obtain sufficient evidence of the operating effectiveness of controls “inspection of evidence of the application of controls, or testing by means of a self-assessment process, some of which might occur as part of management’s ongoing monitoring activities.” For example, management might be able to determine that controls operate effectively through its direct and ongoing monitoring of the operation of controls. This determination might be accomplished through performing regular management and supervisory activities, monitoring adherence to policies and procedures, and performing other routine actions. For instance, a supervisor’s review of a monthly account reconciliation prepared by one of his or her subordinates could be a monitoring control that also provides management with evidence supporting its assessment of internal control over financial reporting, if the results of the supervisor’s review were evaluated

and documented as part of management's assessment. To appropriately evaluate the adequacy of management's assessment as directed by the standard, the auditor needs to recognize these other types of procedures that are available to management as part of the basis for its assessment.

**Q48.** Paragraph 126 of Auditing Standard No. 2 states that the auditor should not use management "self-assessment" of controls as part of the auditor's evidence supporting his or her opinion. Does this mean that the auditor cannot use any procedures that are labeled or characterized as a self-assessment?

**A48.** No. Simply labeling management tests as self-assessment does not preclude the auditor from using that work. Self-assessment, as the term is currently used by issuers and auditors, has become a broad term that refers to different types of procedures performed by various parties. Accordingly, the auditor should evaluate the nature of the self-assessment process used by management when considering whether to use this work.

Although it does not provide an explicit definition of the term self-assessment, paragraph 126 of Auditing Standard No. 2 uses the term in a specific and narrow way to mean an assessment made by the same personnel who are responsible for performing the control. The auditor should not use this type of self-assessment as a basis for the auditor's opinion because this type of work lacks sufficient objectivity for the auditor's purposes. On the other hand, the broader set of procedures that some issuers and auditors currently label as self-assessment includes assessments and tests of controls performed by persons who are members of management but are not the same personnel who are responsible for performing the control. In this manner, an assessment may be carried out with varying degrees of objectivity, depending on how far the person performing the assessment is removed from the person performing the control.

When the self-assessment is being performed by persons who are members of management but are not the same personnel who are responsible for performing the control, the auditor should evaluate this work using the provisions in Auditing Standard No. 2 for using the work of others—evaluating the nature of the controls subjected to the work of others and the competence and objectivity of the individuals who performed the work. In this circumstance, the decision about whether the auditor may use the work labeled as a self-assessment, and the extent to which the auditor uses that work, involve judgment in the circumstances beyond simply whether the work is labeled self-assessment.

**Q49.** Should the auditor evaluate the adequacy of management's assessment of internal control over financial reporting by determining whether, on a control-by-control level, management's testing was at least as extensive as the auditor's?

**A49.** No. The auditor should not evaluate the adequacy of management's assessment by simply comparing, on a control-by-control level, whether management's testing was at least as extensive as the auditor's. The nature and extent of the procedures that management uses to support its assessment should be determined by management, independent of the auditor's decisions about the nature, timing, and extent of the auditor's procedures. The procedures that management performs to support its assessment might be different from the auditor's procedures, yet still provide management with an adequate basis for its assessment, for several reasons.

First, as discussed in Staff Question No. 47, management has a broader array of procedures available to support its assessment than the auditor. As discussed further in Staff Question No. 48, management also may use self-assessment in particular areas to support its overall assessment of internal control over financial reporting. In this circumstance, the auditor should evaluate whether management's overall assessment process includes periodic, objective validation of the effectiveness of self-assessments in individual areas, such as testing by internal auditors, to verify the effectiveness of self-assessments. This type of validation of self-assessments need not occur every period for every area in which a self-assessment is performed. Management's overall assessment process, however, should include a rational approach for determining how frequently and extensively to verify the effectiveness of self-assessments.

The work that management performs in connection with its assessment can have a significant effect on the nature, timing, and extent of the work of the auditor. The more extensive and reliable management's assessment is, the less extensive and costly the auditor's work will need to be.

**Q50.** The auditor's opinion on the effectiveness of internal control over financial reporting is rendered as of a point in time (i.e., at year-end), whereas the auditor's opinion on the financial statements covers the financial results over a period of time (i.e., for the entire year). In an integrated audit of internal control over financial reporting and the financial statements, how should the auditor generally structure his or her testing of controls—throughout the entire period under audit or compressed toward year-end?

**A50.** In most circumstances, testing controls throughout the year will provide several benefits, perhaps the most important of which will be to fully integrate the audit of internal control over financial reporting with the audit of the financial statements.

In an integrated audit of internal control over financial reporting and the financial statements, the auditor ordinarily would design his or her testing of controls to accomplish the objectives of both audits simultaneously: (1) to obtain sufficient evidence to support his or her opinion on internal control over financial reporting as of year-end, and (2) to obtain sufficient evidence to support a control risk assessment of low for purposes of the audit of financial statements. By obtaining sufficient evidence to support a control risk assessment of low for purposes of the financial statement audit, the auditor will be able to reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements.

To further promote an integrated approach to the audit of internal control over financial reporting and the audit of the financial statements (and, therefore, testing controls over a period of time), paragraph 160 of Auditing Standard No. 2 directs the auditor to document the reasons for assessing control risk as other than low for any relevant assertions related to significant accounts. This documentation requirement reflects the expectation that the benefits associated with an integrated audit ordinarily will best be achieved by the auditor testing controls over a period of time. There may be circumstances in which it is appropriate and efficient, however, for the auditor not to test controls throughout the period and, therefore, not to assess control risk in the audit of the financial statements as low, such as when a material weakness is eliminated late in the year.

**Q51.** If the auditor performs procedures to test the effectiveness of controls as of an interim date, how should the auditor determine the nature and extent of roll-forward procedures that are necessary to support the auditor's opinion as of year-end?

**A51.** The auditor should evaluate the factors described in paragraph 100 of Auditing Standard No. 2 when evaluating the nature and extent of procedures to perform to update the results of his or her testing from an interim date to the company's year-end. As these factors decrease in significance, the evidence that needs to be obtained can be less persuasive, and the necessary updating procedures, accordingly, become less extensive. As these factors increase in significance, the necessary updating procedures become more extensive. These factors include:

- *The specific controls tested prior to the as-of date and the results of those tests.* This factor takes into consideration the nature of the control and the risks associated with the control. The lower the overall risk associated with a given control, the less extensive the auditor's updating procedures should be. Controls tested as of an interim date and for which testing exceptions were identified are an example of controls considered to be of higher risk if the auditor expects to conclude that those controls were effective as of year-end. This factor also includes the direction in paragraph 101 of Auditing Standard No. 2 that, for controls over significant non-routine transactions, controls over accounts or processes with a high degree of subjectivity or judgment in measurement, or controls over the recording of period-end adjustments (all areas of higher risk), the auditor should perform tests of controls closer to or at the as-of date rather than at an interim date.
- *The degree to which evidence about the operating effectiveness of those controls was obtained.* The more persuasive the evidence obtained as of an interim date, the less extensive should be the updating procedures. On the other hand, the less persuasive the evidence obtained as of an interim date is, the more extensive the updating procedures need to be.
- *The length of the remaining period.* The updating procedures should be less extensive if the updating period of time is shorter. In other words, the updating procedures for a control tested through October would need to be less extensive than the updating procedures for a control tested through May for a calendar year-end company.
- *The possibility that there have been any significant changes in internal control over financial reporting subsequent to the interim date.* The more indicators the auditor has that signal that a control has not changed since the interim testing date, the less extensive the updating procedures should be. For example, if the auditor understands that there have been no changes in the design of the control, the business operations surrounding the control, the personnel performing the control, or other factors, the less extensive the updating procedures need to be. On the other hand, if management has implemented a restructuring of significant processes that affect several significant accounts after the auditor's interim testing, such as when personnel are replaced or positions are lost, the auditor's updating procedures would need to be more extensive.

In selecting the nature of the tests to perform, the auditor might choose to perform the following procedures: inquiry, observation, inspection of relevant documentation, and reperformance of a control. The auditor also may

perform walkthroughs, which ordinarily consist of some combination of these types of procedures. These procedures are listed in the order of the general level of persuasiveness of the evidence that they ordinarily would produce, from lowest to highest. For example, “inspection” might include scanning monthly account reconciliations to determine that the control was performed on a timely basis during the period between the interim testing and year-end.

*Specific examples of roll-forward procedures.* Appendix B of Auditing Standard No. 2 contains four examples of how to apply the requirements in paragraphs 88 through 107 of the standard regarding the nature, timing, and extent of testing of internal control over financial reporting. Those examples should be read in their entirety; however, the table below summarizes the timing of the interim testing and the roll-forward procedures illustrated in the examples.

<b>Examples of Extent-of-Testing Decisions</b>	<b>Timing of Interim Testing</b>	<b>Nature and Extent of Roll-forward Procedures</b>
Example B-1 Daily programmed application control and daily information technology-dependent control	Through September	Inquiry and observation
Example B-2 Monthly manual reconciliation	May and July	Inquiry and inspection
Example B-3 Daily manual preventive control	Through September	Walkthrough of one December transaction
Example B-4 Programmed prevent control and weekly information technology-dependent manual detective control	Through July	Inquiry, observation, and inspection

**Q52.** How should the auditor evaluate a company’s internal control over financial reporting when a company has implemented a significant change to IT that affects the company’s preparation of its financial statements?

**A52.** To evaluate the effect that a change to the company’s IT has on the company’s internal control over financial reporting, the auditor should evaluate the company’s controls over program development and program changes over the specific planned change to IT, as well as any controls that the company might put in place temporarily during the conversion period. The temporary controls referred to here would include the various procedures, many of which would be manual or IT-dependent manual procedures,

## 11,058 PCAOB Staff Qs & As and Other Implementation Guidance

that management puts in place to detect and correct errors during the time immediately after the conversion (often referred to as the “shake-down” period).

To evaluate whether the company’s controls provide management with reasonable assurance that the company can produce complete and accurate financial statements before, during, and after the change to IT, the auditor should evaluate the combination of all these various types of controls.

As further discussed in Staff Question No. 43, the auditor’s evaluation of company-level controls (and their relative strength or weakness), such as IT general controls, will affect the auditor’s assessment of risk and, therefore, the nature, timing, and extent of the auditor’s testing of more detailed controls.

It would be inappropriate for the auditor to conclude, as a rule, that management should not implement changes to IT for some arbitrary period of time before year-end.

**Q53.** Does Auditing Standard No. 2 encourage a mindset that in the absence of documentation evidencing the performance of a control, the control should be presumed to be ineffective in its operation?

**A53.** No. Auditing Standard No. 2 does not contain a presumption that a control is ineffective solely because there is no documentation evidencing the operation of the control. Such a presumption might suggest an emphasis on a “sign-and-file” mentality for management’s approach to maintaining effective internal control—that a signature or other evidence of the performance of a control might become more important than the performance of the control itself. Rather, Auditing Standard No. 2 emphasizes the importance of obtaining evidence that is sufficiently persuasive to support a conclusion about whether a control is operating effectively. Accordingly, the absence of documentation evidencing the operation of an individual control is not determinative that the control is not operating effectively. The auditor must be satisfied, however, that the control actually operated.

### Using the Work of Others

**Q54.** How does the auditor’s assessment of risk associated with particular controls and the decision to use the work of others relate to the auditor’s determination of whether he or she has obtained the principal evidence supporting his or her opinion?

**A54.** As discussed in Staff Question No. 40, the auditor’s degree of reliance on the work of others should be naturally responsive to the degree of risk associated with the testing of those controls. The requirements in paragraph 116 of Auditing Standard No. 2 that the auditor perform the walkthroughs himself or herself, and the requirements in paragraph 113 that the auditor not use the work of others to reduce the amount of work that he or she performs on controls in the control environment, directly relate to the degree of risk associated with these areas. In other words, because these areas of testing are at the very high end of the scale of audit risk, the auditor should perform this work himself or herself. These specific directions ensure that what should have been a natural result from the auditor’s assessment of risk would, in fact, occur in all circumstances.

Having followed the principles in the standard regarding evaluating the nature of the controls subjected to the work of others and evaluating the

competence and objectivity of the individuals who performed the work, the auditor should have (1) naturally allocated his or her own work to the areas of highest risk, and (2) generally, already obtained the principal evidence supporting his or her opinion. The note to paragraph 108 of Auditing Standard No. 2 states the following:

Because the amount of work related to obtaining sufficient evidence to support an opinion about the effectiveness of controls is not susceptible to precise measurement, the auditor's judgment about whether he or she has obtained the principal evidence for the opinion will be qualitative as well as quantitative. For example, the auditor might give more weight to work he or she performed on pervasive controls and in areas such as the control environment than on other controls, such as controls over low-risk, routine transactions.

This note means that the auditor's evaluation of whether he or she has obtained the principal evidence supporting his or her opinion is primarily qualitative. As described above, the auditor should perform more work himself or herself in areas that represent higher risk. Likewise, the auditor should ascribe more weight to work he or she performs in higher-risk areas. In this manner, in most circumstances, following the other risk-based principles regarding using the work of others will result in the auditor having obtained the principal evidence supporting his or her opinion.

## Auditor's Responsibilities With Respect to Management's Certification Disclosures

**Q55.** Paragraphs 202 through 206 of Auditing Standard No. 2 describe the auditor's responsibilities as they relate to management's quarterly certifications on internal control over financial reporting. Is the auditor required to perform the same types of tests of controls that support his or her opinion on internal control over financial reporting as of year-end on a quarterly basis to determine whether any change in internal control over financial reporting has materially affected the company's internal control over financial reporting?

**A55.** No. The procedures that the auditor is required to perform on a quarterly basis by paragraph 203 of Auditing Standard No. 2 ordinarily are limited to inquiry and observation and an evaluation of the implications of any misstatements identified by the auditor during the auditor's required review of interim financial information. Paragraphs 202 through 206 of Auditing Standard No. 2 do not require—and should not be read to encourage—what might amount to a quarterly audit of internal control over financial reporting. Rather, the auditor's responsibilities related to management's quarterly certifications on internal control over financial reporting are analogous to the auditor's responsibilities related to the company's financial statements in an interim review of financial statements in accordance with AU sec. 722, *Interim Financial Information*.

For example, in conducting the inquiries and observations, the auditor ordinarily would limit these procedures to members of management within the company who would be expected to have knowledge about significant changes in the design or operation of internal control over financial reporting. These inquiries and observations should not result in the auditor interviewing every one of the company's employees with whom the auditor would interact during a complete audit of internal control over financial reporting.

As another example, if management plans, in connection with a quarterly certification, to disclose that it has eliminated a previously reported material weakness, the auditor's procedures would be limited to inquiry and observation. In connection with management's quarterly certification, the auditor is not required to test the design or operating effectiveness of controls that management believes eliminate a material weakness beyond inquiry and observation.

## **.06 Staff Questions and Answers: Audits of Financial Statements of Non-Issuers Performed Pursuant to the Standards of the Public Company Accounting Oversight Board, June 30, 2004**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to PCAOB Auditing Standard No. 1, References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board ("Auditing Standard No. 1"), were prepared by the Office of the Chief Auditor. Questions should be directed to C. Gregory Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org), or Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org).

\* \* \*

The Sarbanes-Oxley Act of 2002 (the "Act") directs the Public Company Accounting Oversight Board to establish auditing and related attestation, quality control, ethics and independence standards, to be used by registered public accounting firms in the preparation and issuance of audit reports of issuers.<sup>1</sup> The Act and PCAOB Rules require audits of issuers to be conducted in accordance with PCAOB standards. When issuing an audit report on the financial statements of an issuer, PCAOB Auditing Standard No. 1 requires registered public accounting firms to include a reference to "the standards of the Public Company Accounting Oversight Board (United States)." In contexts other than an audit of the financial statements of an issuer, however, auditors, whether registered or not, may be legally required to, or may agree voluntarily to, perform an engagement in accordance with PCAOB standards or some portion of those standards.<sup>2</sup> Auditors and other interested persons have raised questions about the implications of Auditing Standard No. 1, as well as the Act and other PCAOB rules, for such engagements. The following staff questions and answers seek to answer some of those questions.

**Q1.** Must a public accounting firm be registered with the PCAOB to perform an audit of a non-issuer according to PCAOB standards?

**A1.** No. The Sarbanes-Oxley Act requires only that those public accounting firms that prepare or issue, or participate in the preparation or issuance of, audit reports on the financial statements of issuers be registered.<sup>3</sup>

---

<sup>1</sup> Section 2(a) of the Act defines "issuer" as "an issuer (as defined in Section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)), the securities of which are registered under Section 12 of the Act (15 U.S.C. 781), or that is required to file reports under Section 15(d) (15 U.S.C. 780(d)), or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn."

<sup>2</sup> See, e.g., Securities Exchange Act of 1934 Rule 17i-6(d), 17 CFR 240.17i-6(d) (requiring supervised investment bank holding companies to obtain an audit and review "in accordance with the rules promulgated by the Public Company Accounting Oversight Board").

<sup>3</sup> The SEC has ordered that broker-dealers that are not issuers need not file with the Commission, and send to their customers, financial statements certified by a registered public accounting firm until January 1, 2005, unless rules are in place regarding Board registration of auditors of such broker-dealers that set an earlier date. See Notice, Broker-Dealer Financial Statement Requirements under Section 17 of the Exchange Act, Rel. No. 34-48281 (August 4, 2003).

## 11,062 PCAOB Staff Qs & As and Other Implementation Guidance

**Q2.** The PCAOB's Auditing Standard No. 1 requires the auditor to include a reference to "the standards of the Public Company Accounting Oversight Board (United States)" in audit reports on the financial statements of issuers. May an auditor refer to "the auditing standards of the Public Company Accounting Oversight Board (United States)" rather than to "the standards of the Public Company Accounting Oversight Board (United States)" in an audit report on an audit of the financial statements of a non-issuer that was performed in accordance with the Board's auditing standards?

**A2.** Yes. In an audit of the financial statements of a non-issuer, an auditor may wish to be clear that he or she adhered to only the auditing standards of the PCAOB; accordingly, the auditor may include the word "auditing" in the reference to the standards of the PCAOB. Registered public accounting firms, however, are not permitted to limit their reference to the "auditing standards" of the PCAOB in their audit reports on the financial statements of issuers.

**Q3.** What standards are included in a reference to "the standards of the Public Company Accounting Oversight Board (United States)"?

**A3.** A reference to "the standards of the Public Company Accounting Oversight Board (United States)" includes the standards of the Board that are applicable in the circumstances of the engagement. For example, in an audit of financial statements that does not involve the use of a specialist, the auditor would not be expected to follow the Board's interim auditing standard, Statement of Auditing Standards No. 73, "Using the Work of a Specialist." Similarly, in an audit of an entity that has immaterial inventory balances, the auditor would not be expected to follow the Board's interim auditing standard, AU Section 331, "Inventories," of Statement on Auditing Standards No. 1, "Codification of Auditing Standards and Procedures." On the other hand, the Board's interim auditing standard, Statement on Auditing Standards No. 99, "Consideration of Fraud in a Financial Statement Audit," would be applicable in all audits of financial statements conducted pursuant to the Board's standards. As another example, quality control standards generally apply to a firm's system of quality control over its accounting and auditing practice and not to individual audit engagements. Thus, a breakdown in the system of quality control does not necessarily mean that a particular audit was not conducted in accordance with the standards of the PCAOB. However, such a breakdown might result in a deficient audit if it caused or contributed to an audit deficiency. In addition, an auditor who states that he or she has performed the audit in accordance with the standards of the PCAOB must be in compliance with the applicable interim independence standards of the Board. These are examples only, and not an exhaustive list of standards that may be applicable to an engagement. While not required by PCAOB rules, auditors of issuers and other entities subject to the SEC's jurisdiction are reminded that they must also comply with applicable Commission requirements, including the Commission's auditor independence requirements.

**Q4.** By referring to "the auditing standards of the Public Company Accounting Oversight Board (United States)" in an audit report on the financial statements of a non-issuer, does the auditor represent that he or she has adhered to the Board's interim independence standards?

**A4.** No. Auditors of the financial statements of non-issuers, including nonprofit organizations, government agencies, municipalities and other governments, should look to relevant state and federal laws and regulations

relating to auditor independence. Auditors of nonpublic companies should bear in mind, however, that any company that becomes an issuer, as defined in Section 2(a)(7) of the Act, must file with the SEC an audit report prepared and issued by an independent registered public accounting firm, and therefore it may behoove an auditor of a nonpublic company that intends to become an issuer to comply with SEC and PCAOB independence requirements.

**Q5.** By referring to “the auditing standards of the Public Company Accounting Oversight Board (United States)” or to “the standards of the Public Company Accounting Oversight Board (United States)” in an audit report on the financial statements of a non-issuer, does the auditor represent that he or she has complied with the Commission’s auditor independence requirements?

**A5.** No. A Note to the PCAOB’s rule on interim independence standards, PCAOB Rule 3600T, reminds auditors of issuers and other entities subject to the SEC’s jurisdiction of their separate obligations under the SEC’s rule on auditor independence. The PCAOB’s rule on interim independence standards does not, however, incorporate the SEC’s auditor independence requirements.

**Q6.** What are the PCAOB’s independence requirements and to whom do they apply?

**A6.** The PCAOB adopted interim independence standards when it adopted PCAOB Rule 3600T, which is a temporary rule in effect until the Board adopts permanent independence standards. Rule 3600T requires that, when a registered public accounting firm conducts an audit of the financial statements of an issuer, the firm comply with—

- Rule 101 of the AICPA’s Code of Professional Conduct, and interpretations and rulings thereunder, as in existence on April 16, 2003; and
- Standards Nos. 1, 2 and 3, and Interpretations 99-1, 00-1, and 002, of the Independence Standards Board.

Registered public accounting firms must also comply with SEC requirements, including its Rule 2-01 of Regulation S-X, relating to auditor independence, when they conduct audits required by the federal securities laws, including audits of financial statements of issuers. The Board did not adopt the SEC’s Rule 2-01 because that rule already governs auditor independence from issuers. As a Note to Rule 3600T makes clear, however, in an audit of the financial statements of an issuer, to the extent that a provision of the SEC’s rule is more restrictive—or less restrictive—than the Board’s interim independence standards, a registered public accounting firm must comply with the more restrictive rule.

**Q7.** Does a reference to “the auditing standards of the Public Company Accounting Oversight Board (United States)” or to “the standards of the Public Company Accounting Oversight Board (United States)” in an auditor’s report on the financial statements of a non-issuer imply that the non-issuer is subject to, or otherwise complied with, some or all of the provisions of the Act and other securities laws or the Commission’s rules and regulations thereunder?

**A7.** No. An auditor’s reference to PCAOB standards in an audit report on the financial statements of a non-issuer does not subject the auditor or the non-issuer to any laws that the auditor or the non-issuer would not otherwise have been required to comply with. Unless the non-issuer is involved in an activity that subjects it to the Act or other securities laws, such as the laws governing broker-dealers, compliance by the auditor or the non-issuer with the Act or other securities laws would be strictly voluntary.

## **11,064** PCAOB Staff Qs & As and Other Implementation Guidance

**Q8.** Does inclusion of a reference to the Board's standards in an auditor's report on the financial statements of a non-issuer cause the audit to become eligible for review as a part of a Board inspection?

**A8.** No. An audit of the financial statements of a non-issuer does not become subject to PCAOB inspection solely because the auditor performed and reported on the audit in accordance with the standards of the PCAOB. Auditors of the financial statements of non-issuers may, nevertheless, be subject to various forms of state and federal oversight, such as review by federal banking regulators, the U.S. General Accounting Office, or a state board of accountancy.

**Q9.** If a non-issuer elects to have its financial statements audited pursuant to the Board's standards, must it also have its internal control over financial reporting audited pursuant to the Board's Auditing Standard No. 2, "An Audit of Internal Control Over Financial Reporting Conducted in Conjunction with an Audit of Financial Statement"?

**A9.** No. Only certain issuers that are subject to Section 404 of the Act are required to include within the scope of the audit an audit of internal control over financial reporting. Although the Board's standards provide for an integrated audit of financial statements and internal control for those issuers that are subject to Section 404 of the Act, the Board's standards also permit auditors to conduct a financial statement-only audit under circumstances, for example, when Section 404 of the Act is not applicable.

**Q10.** If an auditor refers to either "the standards of the Public Company Accounting Oversight Board (United States)" or "the auditing standards of the Public Company Accounting Oversight Board (United States)" in an audit report on an audit of the financial statements of a non-issuer, is the auditor also required to subject the audit to a "concurring partner review" as required by the Board's adoption of certain of the requirements of the AICPA's former Securities and Exchange Commission Practice Section ("SECPS")?

**A10.** No. The Board may at some time adopt a standard requiring the performance of a second partner review. At this time, however, the PCAOB interim quality control standards only require registered firms that were members of the SECPS as of April 16, 2003, to have a concurring partner review on audits of issuers. (See PCAOB Release No. 2003-006.)

**.07 Staff Questions and Answers: Attest Engagements Regarding XBRL Financial Information Furnished Under the XBRL Voluntary Financial Reporting Program on the EDGAR System, May 25, 2005**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to attest engagements regarding XBRL financial information furnished under the XBRL Voluntary Financial Reporting Program on the EDGAR System were prepared by the Office of the Chief Auditor. Additional questions should be directed to Keith Wilson, Associate Chief Auditor (202/207-9134; wilsonk@pcaobus.org).

\* \* \*

**Q1. What is XBRL?**

**A1.** XBRL (eXtensible Business Reporting Language) is an open standard for electronic communication of business and financial data. The XBRL standard provides a format for tagging that data so users can extract, exchange, analyze, and present the information.

XBRL information is commonly distributed in the form of XBRL instance documents. These documents are electronic files consisting of financial data along with their corresponding XBRL tags.

To facilitate electronic communication of financial information among many parties, XBRL instance documents must be created using a common set of standards that all parties can understand and use. In XBRL, this is accomplished through taxonomies and specifications. An XBRL taxonomy (or tag list) provides a data structure and vocabulary for interpreting financial information, such as all of the items comprising "net income." An entity may extend the taxonomy by creating additional custom tags for its own use. XBRL specifications have been developed by the XBRL Consortium for creating and extending taxonomies. (See the XBRL website, [www.xbrl.org](http://www.xbrl.org), for more information about XBRL.)

**Q2. What is the XBRL Voluntary Financial Reporting Program on the EDGAR System?**

**A2.** The Securities and Exchange Commission ("SEC") has adopted rule amendments<sup>1</sup> allowing issuers to voluntarily submit supplemental tagged financial information using the XBRL<sup>2</sup> format as exhibits to specified EDGAR filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940. The amendments include certain requirements regarding the information in those exhibits. This SEC initiative is referred to in the SEC Release as the "XBRL Voluntary Financial Reporting Program on the EDGAR System" (hereinafter referred to as the "SEC Voluntary Program").

---

<sup>1</sup> *Final Rule: XBRL Voluntary Financial Reporting Program on the EDGAR System*, Securities and Exchange Commission Release Nos. 33-8529, 34-51129, 35-27944, 39-2432, IC-26747; File Number S7-35-04 (February 3, 2005) [70 FR 6556]

<sup>2</sup> The SEC's website, [www.sec.gov](http://www.sec.gov), has more information about the SEC's XBRL initiative.

The XBRL documents furnished under the SEC Voluntary Program are referred to in the SEC Regulations<sup>3</sup> as “XBRL-Related Documents.” The XBRL-Related Documents must contain only certain specified content (“mandatory content” and “optional content”) that appears in a specified format (“voluntary program format”), as set forth in the SEC Regulations.

According to the EDGAR Filer Manual,<sup>4</sup> issuers who file under the SEC Voluntary Program must create their XBRL-Related Documents using one of the US Generally Accepted Accounting Principles (“US GAAP”) taxonomies, based on XBRL Specification Version 2.1. Issuers also may use one of the Stand Alone Add-on taxonomies provided in the US Financial Reporting Taxonomy Framework for certain content. Any company extensions of those taxonomies must conform to XBRL Specification Version 2.1.

**Q3.** May an auditor<sup>5</sup> examine and report on whether the XBRL-Related Documents accurately reflect the information in the corresponding part of the official EDGAR filings? If so, what are the primary engagement standards that apply to those engagements?

**A3.** Yes, an auditor may be engaged to examine and report on whether the XBRL-Related Documents accurately reflect the information in the corresponding part of the official EDGAR filings. That engagement is an examination under AT section 101 of the PCAOB’s interim attestation standards, *Attest Engagements* (“AT section 101”), as amended.

**Q4.** The second general attestation standard in paragraph .21 of AT section 101 indicates that the engagement shall be performed by an auditor “having adequate knowledge of the subject matter.” How does this general standard apply to examination engagements regarding XBRL-Related Documents?

**A4.** In examination engagements regarding XBRL-Related Documents, the auditor must have sufficient knowledge of the applicable SEC Regulations, EDGAR Filer Manual requirements, and XBRL taxonomies and specifications to perform the examination. The auditor must also have sufficient knowledge of the company’s financial statements and underlying financial records to understand how the financial data in the XBRL-Related Documents relates to the corresponding information in the official EDGAR filing.

**Q5.** The third general attestation standard in paragraph .23 of AT section 101 states that the auditor “shall perform the engagement only if he or she has reason to believe that the subject matter is capable of evaluation against criteria that are suitable and available to users.” How does this general standard apply to examination engagements regarding XBRL-Related Documents?

**A5.** Paragraphs .24 through .34 of AT section 101 discuss the attributes of suitable and available criteria. The US GAAP Version 2.1 based taxonomies, Stand Alone Add-on taxonomies, and XBRL Specification Version 2.1 would be considered suitable and available criteria because (a) they were developed

---

<sup>3</sup> §232.401 of Regulation S-T, 17 C.F.R. 232.401; and SEC Final Rule Release No. 33-8529 (February 3, 2005)

<sup>4</sup> EDGARLink Filer Manual, Appendix L. (The EDGARLink Filer Manual comprises Volume 1 of the EDGAR Filer Manual.)

<sup>5</sup> These PCAOB Staff Questions and Answers assume that the auditor who is engaged to perform this examination has also audited, in accordance with PCAOB standards, the financial statements for at least the latest period to which the XBRL financial information relates and the financial statements for the other periods covered by the XBRL financial information have been audited by the auditor or a predecessor auditor. Therefore, the word “auditor” is used instead of “practitioner.”

by a panel of widely recognized experts that follow due process procedures, including exposure for public comment, and (b) they are available free of charge through the XBRL Consortium.

Company extensions of those taxonomies normally do not go through the same development processes as described in the preceding paragraph. Accordingly, the auditor should evaluate whether company extensions represent suitable and available criteria as described in AT section 101.

**Q6.** May the auditor assist a company with the creation or tagging of its XBRL-Related Documents and still perform an examination regarding those documents?

**A6.** The fourth general attestation standard requires the auditor to be independent in order to perform an attest engagement. When evaluating independence, the auditor should apply the independence principles for financial statement audits to the context of the examination engagement. For example, although the auditor may provide technical advice on matters related to the application of the XBRL taxonomy and specifications, the auditor's independence would be impaired (and thus the auditor would be unable to examine a company's XBRL-Related Documents) if he or she prepared those documents or made decisions about the documents for management.

**Q7.** What are the objectives of the examination procedures regarding the XBRL-Related Documents, and what procedures should be performed to achieve those objectives?

**A7.** In performing the examination as set forth in AT section 101, the auditor should apply procedures as necessary to obtain sufficient evidence to provide a reasonable basis for an opinion on whether the XBRL-Related Documents accurately reflect the information in the corresponding part of the official EDGAR filings. Thus, the objectives of the examination procedures are to determine whether—

- a. the XBRL data agrees with the official EDGAR filings, and
- b. the XBRL-Related Documents are in conformity with the applicable XBRL taxonomies and specifications, as well as with the SEC requirements for format and content.

The following are examination procedures that the auditor should consider to achieve the engagement objectives:

- Compare the rendered<sup>6</sup> XBRL-Related Documents to the information in the official EDGAR filing, and agree the corresponding content.
- Determine whether the content in the XBRL-Related Documents conforms to the SEC voluntary program content requirements.
- Determine whether the XBRL-Related Documents (and the related taxonomy documents, as necessary) conform to the SEC voluntary program format requirements. To accomplish this, the auditor should consider the following procedures:
  - Test whether the data elements (i.e., text and line item names and associated values, dates and other labels) in the XBRL-Related Documents reflect the same information as the corresponding official EDGAR filing (i.e., the HTML or ASCII version).

---

<sup>6</sup> A rendered XBRL-Related Document has been converted from machine readable form into human readable form using a software tool

## 11,068 PCAOB Staff Qs & As and Other Implementation Guidance

- Verify that the data elements in the corresponding official EDGAR filing have not been changed, deleted, or summarized in the XBRL-Related Documents.
- Evaluate whether the XBRL-Related Documents comply with the appropriate XBRL specification and EDGAR-supported XBRL taxonomies.
- Evaluate whether any company extensions of the taxonomy are consistent with the SEC voluntary program format requirements, including conformity with XBRL specifications.
- Test whether data elements in the XBRL-Related Documents are matched with appropriate tags in accordance with the applicable taxonomy.
- Read the EDGAR filing to determine whether it contains the disclosures regarding XBRL-Related Documents required by SEC Regulations.<sup>7</sup>
- Obtain a representation letter from management that includes a statement that the XBRL-Related Documents comply with SEC requirements.

**Q8.** What are the reporting requirements for examination engagements regarding XBRL-Related Documents?

**A8.** The report for this engagement should comply with the requirements of AT section 101, as amended.

If the underlying information in the XBRL-Related Documents has been audited, the examination report should refer to the audit report. If the underlying information was reviewed, and the review report was filed with the SEC, the examination report should refer to the review report. If the underlying information was reviewed, but the review report was not filed with the SEC, the examination report need not refer to the review report but should indicate that the underlying information has not been audited and no opinion is expressed on it. The auditor should disclaim an opinion on any underlying information in the XBRL-Related Documents that is not covered by an audit report or review report.

The auditor may be engaged to report on management's assertion or on the subject matter of the assertion. The following are examples of examination reports for these engagements.

---

<sup>7</sup> §232.401(d) of Regulation S-T, 17 C.F.R. 232.401(d).

## Report on the Subject Matter of the Assertion

**Report of Independent Registered Public  
Accounting Firm on XBRL-Related Documents**

We have examined the accompanying XBRL-Related Documents of Sample Volunteer Company, presented as Exhibit *[number]* to the Company's *[Identify EDGAR filing, such as Form 10-K]*, which reflect the data presented in the *[Identify corresponding information in the official EDGAR filing]* as of *[Month and Day]*, *[Year]* and *[Year]* and for each of the years in the *[number]*-year period ended *[date]*. Sample Volunteer Company's management is responsible for the XBRL-Related Documents. Our responsibility is to express an opinion based on our examination.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of Sample Volunteer Company as of *[Month and Day]*, *[Year]* and *[Year]* and for each of the years in the *[number]*-year period ended *[date]*, and in our report dated *[date]*, we expressed an unqualified opinion on those financial statements.<sup>8</sup> In addition, we have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Sample Volunteer Company's internal control over financial reporting as of *[Month and Day]*, *[Year]*, based on *[Identify control criteria]*, and our report dated *[date]*, expressed *[Include nature of opinion]*.<sup>9, 10, 11, 12</sup>

Our examination was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included examining, on a test basis, evidence supporting the XBRL-Related Documents. Our examination also included evaluating the XBRL-Related Documents for conformity with the applicable XBRL taxonomies and specifications and the content and format requirements of the Securities and Exchange Commission. We believe that our examination provides a reasonable basis for our opinion.

---

<sup>8</sup> If the auditor's opinion on the related financial statements is other than unqualified, this report should disclose that fact along with the reason for the modified report.

<sup>9</sup> This sentence is necessary if (a) the XBRL-Related Documents include information about the effectiveness of internal control over financial reporting, and (b) that information was covered by an audit report.

<sup>10</sup> If the financial statements have been reviewed and the review report was filed with the SEC, this paragraph should read: "We have also reviewed, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of Sample Volunteer Company as of *[date]*, and for the three months then ended, the objective of which was the expression of limited assurance on such financial statements, and issued our report thereon dated *[date]*, *[Describe any modifications of such report]*. A review of financial statements is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion."

<sup>11</sup> If the financial statements have been reviewed but the review report was not filed with the SEC, this paragraph should read: "We did not audit the financial statements of Sample Volunteer Company (or examine *[Identify any other underlying information]*), the objective of which would have been the expression of an opinion on them. Accordingly, we do not express an opinion on them."

<sup>12</sup> If the XBRL-Related Documents contain both (a) financial statements that are covered by an audit report or review report filed with the SEC and (b) other information that is not covered by an audit or review report, this paragraph should include a statement such as the following: "We were not engaged to and did not conduct an audit (or review) of *[Identify information]*, the objective of which would have been the expression of an opinion (or limited assurance) on such *[Identify information]*. Accordingly, we do not express an opinion or any other assurance on *[it]* *[them]*."

## 11,070 PCAOB Staff Qs & As and Other Implementation Guidance

In our opinion, the XBRL-Related Documents of Sample Volunteer Company referred to above accurately reflect, in all material respects, the data presented in the *[Identify corresponding information in the official EDGAR filing]* in conformity with *[Identify the criteria—for example, the taxonomy, such as “US GAAP—Commercial and Industrial Taxonomy,” and where applicable, the Stand Alone Add-on Taxonomy such as “US Financial Reporting—Management Report Taxonomy,” and the specifications, such as “XBRL Specifications (Version 2.1)”]*.

*[Signature]*

*[City and State or Country]*

*[Date]*

Report on Management's Assertion<sup>13</sup>**Report of Independent Registered Public  
Accounting Firm on XBRL-Related Documents**

We have examined management's assertion that *[Identify the assertion—for example, the accompanying XBRL-Related Documents, presented as Exhibit [number] to Sample Volunteer Company's [Identify EDGAR filing, such as Form 10-K] accurately reflect the data presented in the [Identify corresponding information in the official EDGAR filing] as of [Month and Day], [Year] and [Year] and for each of the years in the [number]-year period ended [date], in conformity with [Identify the criteria—for example, the taxonomy, such as "US GAAP—Commercial and Industrial Taxonomy," and where applicable, the Stand Alone Add-on Taxonomy such as "US Financial Reporting—Management Report Taxonomy," and the specifications, such as "XBRL Specifications (Version 2.1)"]*. Sample Volunteer Company's management is responsible for the assertion. Our responsibility is to express an opinion on the assertion based on our examination.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of Sample Volunteer Company as of *[Month and Day], [Year] and [Year]* and for each of the years in the *[number]-year period ended [date]*, and in our report dated *[date]*, we expressed an unqualified opinion on those financial statements. In addition, we have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Sample Volunteer Company's internal control over financial reporting as of *[Month and Day], [Year]*, based on *[Identify control criteria]*, and our report dated *[date]*, expressed *[Include nature of opinion]*.

Our examination was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included examining, on a test basis, evidence supporting the XBRL-Related Documents. Our examination also included evaluating the XBRL-Related Documents for conformity with the applicable XBRL taxonomies and specifications and the content and format requirements of the Securities and Exchange Commission. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, management's assertion referred to above is fairly stated, in all material respects, in conformity with *[Identify the criteria—for example, the taxonomy, such as "US GAAP—Commercial and Industrial Taxonomy," and where applicable, the Stand Alone Add-on Taxonomy such as "US Financial Reporting—Management Report Taxonomy," and the specifications, such as "XBRL Specifications (Version 2.1)"]*.

**.08 Staff Questions and Answers: Adjustments to Prior-Period Financial Statements Audited by a Predecessor Auditor, June 9, 2006**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to adjustments to prior-period financial statements audited by a predecessor auditor were prepared by the Office of the Chief Auditor. Additional questions should be directed to Greg Scates, Associate Chief Auditor (202/207-9114; [scatesg@pcaobus.org](mailto:scatesg@pcaobus.org)) or Sam Guzman, Assistant Chief Auditor (202/207-9117; [guzmans@pcaobus.org](mailto:guzmans@pcaobus.org)).

\* \* \*

## General

**Q1.** Circumstances arise that require a company to make adjustments to prior-period financial statements. Such circumstances include, for example, the reporting of discontinued operations, and the retrospective application of a change in accounting principle or the correction of an error in prior-period financial statements pursuant to Financial Accounting Standards Board Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("FASB Statement 154").<sup>1</sup>

If the prior-period financial statements that require adjustments were audited by a predecessor auditor, which auditor, the predecessor or the successor, may audit the adjustments to prior-period financial statements?<sup>2</sup>

**A1.** Either the successor auditor or the predecessor auditor may audit the adjustments made to prior-period financial statements so long as the auditor is independent and registered with the PCAOB. Issuers sometimes select the predecessor auditor to audit the adjustments because that auditor has performed the audit of the prior-period financial statements and has knowledge of the transactions that occurred during that period. In addition, the use of the predecessor auditor sometimes can be more cost-effective for performing this work. However, the successor auditor also may audit the adjustments.

## Predecessor Auditor Audits the Adjustments to Prior-Period Financial Statements

**Q2.** If the predecessor auditor audits the adjustments to the prior-period financial statements, how should the predecessor auditor date his or her report on the reissued financial statements?

---

<sup>1</sup> Pursuant to Financial Accounting Standards Board Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("FASB Statement 154"), the retrospective application of a change in accounting principle also is appropriate when there are no transition requirements specific to a particular accounting pronouncement.

<sup>2</sup> The term "adjustments to prior-period financial statements" should be understood for purposes of this set of questions and answers to include, among other things, the reporting of discontinued operations, as well as, restatements to correct errors and retrospective applications of changes in accounting principles, as described in FASB Statement 154.

**A2.** The predecessor auditor should dual-date his or her reissued report in connection with the audit of the adjustments made to the prior-period financial statements. Paragraph .73 of AU section (“sec.”) 508, *Reports on Audited Financial Statements*, states that, “A predecessor auditor’s knowledge of the current affairs of his or her former client is obviously limited in the absence of a continuing relationship. Consequently, when reissuing the report on prior-period financial statements, a predecessor auditor should use the date of his or her previous report to avoid any implication that he or she has examined any records, transactions, or events after that date. If the predecessor auditor revises the report or if the financial statements are restated, he or she should dual-date the report.”

**Q3.** If the predecessor auditor audits the adjustments made to the prior-period financial statements, what is the successor auditor’s responsibility with regard to those adjustments?

**A3.** If the predecessor auditor audits the adjustments made to the prior-period financial statements, he or she is responsible for the audit conclusions reached with respect to those adjustments. However, because corrections of errors and the retrospective application of a change in accounting often have the effect of changing the periods in which transactions and events are recognized in the financial statements, the successor auditor should obtain an understanding of the adjustments made to the prior-period financial statements and their effects, if any, on the current-period financial statements.<sup>3</sup>

In addition, the successor auditor should evaluate the consistency of the application of accounting principles from period to period. Paragraph .24 of AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*, states:

When the independent auditor has not audited the financial statements of a company for the preceding year, he should adopt procedures that are practicable and reasonable in the circumstances to assure himself that the accounting principles employed are consistent between the current and the preceding year.

## Successor Auditor Audits the Adjustments to Prior-Period Financial Statements

**Q4.** What factors are relevant to a successor auditor’s determination as to whether he or she is able to audit only the adjustments to prior-period financial statements or whether a reaudit of those financial statements is necessary?<sup>4</sup>

**A4.** To audit only the adjustments to prior-period financial statements that were audited by a predecessor auditor,<sup>5</sup> a successor auditor must be able to form an opinion that the adjustments are appropriate and have been properly applied.<sup>6</sup> In determining whether he or she is able to form such an

---

<sup>3</sup> See the requirement for the auditor to plan and perform his or her work with due professional care in paragraph .02 of AU section (“AU sec.”) 230, *Due Professional Care in the Performance of Work*.

<sup>4</sup> This staff question and answer assumes that the predecessor auditor reissues his or her report on the prior-period financial statements before the effects of the adjustments.

<sup>5</sup> This series of staff questions and answers assumes that the predecessor auditor has not ceased operations as the term “ceased operations” has been defined in footnote 2 of AU sec. 9508, *Reports on Audited Financial Statements: Auditing Interpretations of Section 508*. In cases in which the predecessor auditor has ceased operations, the successor auditor should refer to AU sec. 9508.60–75.

<sup>6</sup> See paragraph .74 of AU sec. 508, *Reports on Audited Financial Statements*.

opinion without performing a reaudit of the prior-period financial statements, the successor auditor should consider:

- *The extent of the adjustments.* The less extensive and pervasive the adjustments to prior-period financial statements are, the more likely it is that a successor auditor can form an opinion that the adjustments are appropriate and have been properly applied without performing a reaudit of those financial statements. More extensive and pervasive adjustments make it more likely that a reaudit is necessary.
- *The reason for the adjustments.* A successor auditor is ordinarily more likely to be able to form an opinion that adjustments to prior-period financial statements are appropriate and have been properly applied when those adjustments are due to the retrospective application of an accounting principle rather than when the adjustments are necessary to correct an error.<sup>7</sup> In the latter situation, the auditor should consider the risk that there may be other undetected misstatements in the prior-period financial statements. In particular, if the adjustments correct an intentional misstatement,<sup>8</sup> it is more likely that a reaudit is necessary.
- *Cooperation of predecessor auditor.* A successor auditor is more likely to be able to form an opinion that adjustments to prior-period financial statements are appropriate and have been properly applied if he or she has the cooperation of the predecessor auditor. For example, a successor auditor may determine that he or she is able to audit adjustments to prior-period financial statements if he or she has access to the audit documentation relating to the prior periods and if the predecessor auditor is responsive to questions relating to those periods.

After a successor auditor has determined that he or she is likely to be able to form an opinion that adjustments to prior-period financial statements are appropriate and have been properly applied, the auditor might obtain evidence indicating, or otherwise might determine, that the prior-period financial statements are materially misstated in other respects. In this circumstance, the successor auditor should reevaluate whether auditing only the adjustments is appropriate or whether a reaudit of the prior-period financial statements is necessary.<sup>9</sup>

**Q5.** If the successor auditor audits adjustments to the prior-period financial statements audited by a predecessor auditor, how should the successor auditor report on the results of the audit of those adjustments?

**A5.** AU sec. 508.74 describes how a successor auditor should report when he or she audits adjustments and the predecessor auditor's report is not presented. The successor auditor may use a similar form of reporting if he or she has audited the adjustments made to prior-period financial statements

---

<sup>7</sup> FASB Statement 154 defines an error in previously issued financial statements as an error in recognition, measurement, presentation, or disclosure in financial statements resulting from mathematical mistakes, mistakes in the application of GAAP, or oversight or misuse of facts that existed at the time the financial statements were prepared. Errors, also referred to as misstatements, include those that are intentional or unintentional

<sup>8</sup> See paragraph .05 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

<sup>9</sup> In addition, the successor auditor has responsibilities under paragraphs .21–.22 of AU sec. 315, *Communications Between Predecessor and Successor Auditors*, when the successor auditor becomes aware of information that leads him or her to believe that the prior-period financial statements reported on by the predecessor auditor may require revision

in connection with his or her audit of a subsequent period and if the predecessor auditor also reissues his or her report on the prior-period financial statements. It also is appropriate for the successor auditor to emphasize in the report that he or she was not engaged to audit, review, or apply any procedures to the prior-period financial statements other than with respect to the adjustments.

The following are examples of a paragraph the successor auditor may include in his or her report on the audit of the financial statements of a subsequent period:

***Example for retrospective application of a change in accounting***

We also have audited the adjustments to the 20X4 financial statements to retrospectively apply the change in accounting [*describe accounting change*], as described in Note X. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 20X4 financial statements of the Company other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X4 financial statements taken as a whole.

***Example for correction of an error***

We also have audited the adjustments described in Note X that were applied to restate the 20X4 financial statements to correct an error. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 20X4 financial statements of the Company other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X4 financial statements taken as a whole.

**Q6.** When a successor auditor audits and reports on adjustments made to prior-period financial statements due to the correction of an error, may the predecessor auditor reissue his or her report on the prior-period financial statements?

**A6.** Yes. A predecessor auditor may reissue his or her report on prior-period financial statements when a successor auditor has been engaged to audit and report on adjustments made to those prior-period financial statements, provided that the predecessor auditor has determined that the report on those financial statements is still appropriate, other than with respect to the error correction.<sup>10</sup> When determining whether the report is still appropriate, the predecessor auditor may consider factors such as:

- The nature and extent of the adjustments pertaining to the error correction,
- Whether management has withdrawn the prior-period financial statements, and
- Whether the errors were intentional.

**Q7.** If the predecessor auditor does not reissue his or her report on the prior-period financial statements, may the successor auditor reaudit and report on those financial statements as adjusted?

**A7.** Yes. A successor auditor or another independent auditor may reaudit and report on prior-period financial statements as adjusted.

---

<sup>10</sup> See AU sec. 508.71. The predecessor auditor also may decide to withdraw his or her report on those financial statements. See AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

**Q8.** In circumstances in which a successor auditor audits and reports on adjustments made to prior-period financial statements audited by a predecessor auditor, what procedures should the predecessor auditor perform prior to reissuing his or her report on those financial statements prior to adjustment?

**A8.** AU sec. 508.71 states that, “a predecessor auditor should (a) read the financial statements of the current period, (b) compare the prior-period financial statements that he or she reported on with the financial statements to be presented for comparative purposes, and (c) obtain representation letters from management of the former client and from the successor auditor. The representation letter from management of the former client should state (a) whether any information has come to management’s attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance-sheet date of the latest prior-period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements [except for the adjustments]. The representation letter from the successor auditor should state whether the successor’s audit revealed any matters that, in the successor’s opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor [other than the adjustments disclosed to the predecessor auditor].”

**Q9.** In circumstances in which a successor auditor audits and reports on adjustments made to prior-period financial statements audited by a predecessor auditor, are there any modifications the predecessor auditor should make to his or her reissued report on the prior-period financial statements?

**A9.** Yes. If the predecessor auditor was not engaged to audit the adjustments to the prior-period financial statements, the predecessor auditor should modify his or her reissued report to indicate that (a) the reissued opinion relates to the prior-period financial statements before the effects of the adjustments, and (b) he or she was not engaged to audit, review, or apply any procedures to the adjustments.

The following are examples of how the predecessor auditor may modify his or her report.<sup>11</sup>

---

<sup>11</sup> See PCAOB staff question no. 6

***Example for retrospective application of a change in accounting***Report of Independent Registered Public Accounting Firm

We have audited, before the effects of the adjustments to retrospectively apply the change in accounting described in Note X, the balance sheet of ABC Company as of December 31, 20X4, and the related statements of income, changes in shareholders' equity, and cash flows for the year then ended (the 20X4 financial statements before the effects of the adjustments discussed in Note X are not presented herein). The 20X4 financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

*[Same second paragraph as the standard report]*

In our opinion, the 20X4 financial statements, before the effects of the adjustments to retrospectively apply the change in accounting described in Note X, present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

We were not engaged to audit, review, or apply any procedures to the adjustments to retrospectively apply the change in accounting described in Note X and, accordingly, we do not express an opinion or any other form of assurance about whether such adjustments are appropriate and have been properly applied. Those adjustments were audited by *[name of successor auditor]*.

*[Signature]*

*[City and State or Country]*

*[Original Date]*

***Example for correction of an error***

Report of Independent Registered Public Accounting Firm

We have audited, before the effects of the adjustments for the correction of the error described in Note X, the balance sheet of ABC Company as of December 31, 20X4, and the related statements of income, changes in shareholders' equity, and cash flows for the year then ended (the 20X4 financial statements before the effects of the adjustments discussed in Note X [*have been withdrawn and*] are not presented herein). The 20X4 financial statements are the responsibility of the company's management.

Our responsibility is to express an opinion on these financial statements based on our audit.

*[Same second paragraph as the standard report]*

In our opinion, except for the error described in Note X, the 20X4 financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

We were not engaged to audit, review, or apply any procedures to the adjustments for the correction of the error described in Note X and, accordingly, we do not express an opinion or any other form of assurance about whether such adjustments are appropriate and have been properly applied. Those adjustments were audited by [*name of successor auditor*].

*[Signature]*

*[City and State or Country]*

*[Original Date]*

**Q10.** When a successor auditor audits and reports on adjustments made to prior-period financial statements audited by a predecessor auditor, how should the predecessor auditor date his or her report on the reissued financial statements?

**A10.** When the successor auditor has audited and reported on the adjustments made to the prior-period financial statements and the predecessor auditor is reissuing the report on the prior-period financial statements, the predecessor auditor should use the date of the previous report to avoid any implication that he or she has examined any records, transactions, or events after that date.<sup>12</sup>

## Successor Auditor Has Not Completed an Audit

**Q11.** Can a successor auditor audit and report on the adjustments made to the prior-period financial statements if he or she has not yet completed an audit of the current-period financial statements?

**A11.** No. If the prior-period financial statements have been adjusted, the successor auditor may audit and report on the adjustments made to the prior-period financial statements in connection with the successor auditor's audit of the financial statements of the company for a subsequent period.<sup>13</sup> Unless the successor auditor has completed an audit of the financial statements of the company, he or she will not have sufficient knowledge of the company and its financial reporting to adequately plan and perform an audit of the adjustments to conclude on whether they are appropriate and have been properly applied. If the successor auditor has not completed an audit of a subsequent period, the successor auditor, or another independent auditor, may be engaged to reaudit the prior-period financial statements and audit the adjustments to those financial statements.

---

<sup>12</sup> See AU sec. 508.73

<sup>13</sup> See AU sec. 508.74.

**.09 Staff Questions and Answers: Auditing the Fair Value of Share Options Granted to Employees, October 17, 2006**

**Summary:** Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers are applicable to audits of financial statements in circumstances in which a company has granted share options to employees that must be accounted for as compensation cost in conformity with Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, issued by the Financial Accounting Standards Board. These staff questions and answers were prepared by the Office of the Chief Auditor. Additional questions should be directed to Greg Fletcher, Assistant Chief Auditor (202/207-9203; fletchergr@pcaobus.org) or Jennifer Rand, Deputy Chief Auditor (202/207-9206; randj@pcaobus.org).

\* \* \*

## **General**

**Q1.** What is the purpose of these PCAOB staff questions and answers about auditing the fair value of employee share options?

**A1.** The purpose of these questions and answers is to help auditors implement the PCAOB's existing auditing standards when auditing the fair value of share options granted to employees. The Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 123, *Share-Based Payment* (revised 2004) ("FAS 123R"), which established the accounting requirements for companies that grant share options to employees and generally required that companies recognize as compensation cost the grant-date fair value of the award. In addition, the SEC staff issued Staff Accounting Bulletin 107 ("SAB 107") in March 2005, which, among other things, provides the Securities and Exchange Commission ("SEC") staff's views regarding the valuation of share-based payment arrangements for public companies. Based on these developments, the PCAOB staff believes that there is a need for guidance for implementing the existing auditing standards related to a company's accounting for the fair value of employee share options.<sup>1</sup>

**Q2.** Which auditing standards of the PCAOB provide direction on auditing the fair value of employee share options and what are the general steps involved in auditing them?

---

<sup>1</sup> This series of PCAOB staff questions and answers addresses the principles and procedures related to auditing the grant-date fair value of employee share options, which is a component of compensation cost associated with the issuance of employee share options. It does not address auditing the other components of determining and reporting compensation cost in the financial statements. Other components include making adjustments for actual pre-vesting forfeitures to arrive at the compensation cost related to the share option grant; determining the periods in which compensation cost is recognized in the financial statements; determining related financial statement effects of employee share options to the company, such as income tax effects; and making the appropriate entries in the general ledger.

**A2.** Because employee share options are complex financial instruments with no available market, companies generally use option-pricing models to estimate the fair value. As such, these valuations are accounting estimates, and AU sec. 342, *Auditing Accounting Estimates*, and AU sec. 328, *Auditing Fair Value Measurements*, most directly apply. In addition, because fraudulent financial reporting often is accomplished through an intentional misstatement of an estimate, AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, also applies.<sup>2</sup>

In general, when auditing the fair value of employee share options, the auditor should:

- Obtain an understanding of the process used to develop the estimated fair value of employee share options;
- Assess the risk of misstatement related to the fair value of employee share options; and
- Perform testing on the company's estimated value of employee share options. Testing includes:
  - Evaluating the consistency of the process,
  - Evaluating the reasonableness of (1) the company's model and (2) the assumptions used in the model, such as expected term and expected volatility, and
  - Verifying the accuracy and completeness of the data underlying the fair value measurements.

The auditor also should evaluate whether he or she possesses the necessary skills and knowledge to plan and perform the audit procedures.

Each of these matters is addressed in the following PCAOB staff questions and answers

## The Company's Process

**Q3.** How should the auditor evaluate the company's process for estimating the fair value of employee share option grants?

**A3.** AU sec. 328.09 requires the auditor to obtain an understanding of the company's process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach.<sup>3</sup> AU sec. 328.23 states that, based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures. AU sec. 328.23 also identifies three ways in which the auditor may test fair value measurements:

- Testing management's significant assumptions, the valuation model, and the underlying data,

---

<sup>2</sup> The Board adopted as its interim standards generally accepted auditing standards as described in the AICPA Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, as in existence on April 16, 2003, to the extent not superseded or amended by the Board, on an initial transitional basis.

<sup>3</sup> Paragraph .12 of AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, also provides items that auditors should consider when obtaining an understanding of fair value measurements and disclosures.

- Developing independent fair value estimates for corroborative purposes, or
- Reviewing subsequent events and transactions.<sup>4</sup>

Because of the complexity involved in developing an independent estimate and the limited usefulness of reviewing subsequent events and transactions to evaluate the fair value of employee share options, in many cases, the second and third approaches are not likely to be practical approaches to auditing the fair value of employee share options. In such cases, the auditor should test management's significant assumptions, the valuation model, and the underlying data related to the fair value estimate.

In applying the provisions of AU sec. 328 to the evaluation of the company's process for estimating the fair value of employee share option grants, the auditor should review the procedures used by the company to make the estimates. These procedures include:

- Evaluating how the terms of the share option awards affect the determination of the grant date, selection of model, and the assumptions used;<sup>5</sup>
- Selecting the option-pricing model;<sup>6</sup> (See also PCAOB staff question Nos. 5 and 6.)
- Developing the assumptions used in the valuation, including implementation of the guidance in FAS 123R and SAB 107,<sup>7</sup> that could affect the assumptions;<sup>8</sup> (See also PCAOB staff question Nos. 7–18.)
- Ensuring that the data upon which the fair value measurements are based (including employee exercises and post-vesting cancellations and lapses) are accurate and complete;<sup>9</sup> (See also PCAOB staff question No. 19.) and
- Generating the estimated fair value of the employee share options, including executing the calculations required in the option-pricing model.<sup>10</sup> (See also PCAOB staff question No. 20.)

The auditor also should evaluate whether the process is complete, including whether the company considers the relevant factors identified in the accounting literature that affect the assumptions and whether the company applies the process consistently from period to period.<sup>11</sup>

---

<sup>4</sup> Similarly, in evaluating the reasonableness of an estimate, paragraph .10 of AU sec. 342, *Auditing Accounting Estimates*, requires the auditor to review and test the process used by management to develop an estimate, develop an independent estimate to corroborate the reasonableness of the company's estimate, or review subsequent events or transactions occurring before the completion of fieldwork.

<sup>5</sup> See Statement of Financial Accounting Standard No. 123, *Share-Based Payment* (revised 2004) ("FAS 123R"), paragraph A2.

<sup>6</sup> See FAS 123R, paragraphs A13–A15

<sup>7</sup> See SEC Staff Accounting Bulletin 107, *Share-Based Payment* (March 29, 2005).

<sup>8</sup> See FAS 123R, paragraph A16.

<sup>9</sup> See AU sec. 328.39.

<sup>10</sup> *Ibid.*

<sup>11</sup> AU sec. 328.19 states that the auditor should evaluate whether the company's method (in this case, the company's process) for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the company, or changes in accounting principles.

In addition, in auditing the financial statements, the auditor may determine that it is not practical or possible to restrict detection risk to an acceptable level by performing only substantive tests for one or more assertions. In such circumstances, the auditor should obtain evidence about the effectiveness of both the design and operation of controls to reduce the assessed level of control risk.<sup>12, 13</sup>

## Risk Factors

**Q4.** What factors affect the auditor's assessment of risk at the financial statement and significant account levels for fair value measurements related to employee share options?

**A4.** Accounts consisting of amounts derived from accounting estimates have a higher inherent risk than do accounts consisting of relatively routine factual data<sup>14</sup> or having readily determinable values. Therefore, compensation cost based on fair value measurements of employee share options, and related disclosures, often will have a high inherent risk. The auditor should be aware of how changes in assumptions and models affect fair value.

The following are examples of circumstances or conditions that indicate increased risk and might indicate a risk of fraud that would require a specific response from the auditor:<sup>15</sup>

- When an assumption that a company uses has the effect of reducing the fair value below what it would have been had the company based the assumption on unadjusted historical information.
- Exclusion of an historical period of time from the inputs to the valuation model, especially when the effect of that exclusion is to lower expected term or expected volatility.<sup>16</sup> (See also PCAOB staff question No. 14.)
- Adjustments to historical exercise behavior or historical share price volatility. For example:
  - The expected term estimate for the current grant of share options is five years when the company has averaged seven years in previous grants of share options;
  - The expected term or expected volatility estimate selected as the most likely was the lowest in a range of possible expected terms or expected volatilities; or
  - The expected term and expected volatility estimates are both lower than the historical averages.
- Adjustments to historical exercise behavior or historical share price volatility are not applied consistently to each option grant in circumstances in which they should have been consistently applied.

---

<sup>12</sup> See AU sec. 319.03

<sup>13</sup> In an integrated audit of the financial statements and internal control over financial reporting, the auditor must obtain evidence about the effectiveness of internal controls. This series of PCAOB staff questions and answers does not illustrate how the auditor should test the design and operating effectiveness of controls related to employee share option compensation cost and disclosures in an integrated audit.

<sup>14</sup> See AU sec. 312.27a

<sup>15</sup> See AU sec. 316.48b

<sup>16</sup> See also SAB 107, interpretive response to question 2, Section D.1. SAB 107 states that valid exclusions of periods would be rare.

## Model Selection

**Q5.** Observable market prices generally are not available for employee share options because employee share options are not traded. As a result, companies ordinarily will need to use an option-pricing model to estimate the fair value of employee share options. What factors should the auditor use to evaluate the reasonableness of a company's selection of an option-pricing model for calculating the fair value of employee share options?<sup>17</sup>

**A5.** The auditor should evaluate whether the model selected by the company

- Is applied in a manner consistent with FAS 123R's fair value measurement objective;
- Is based on established principles of financial economic theory; and
- Reflects all of the substantive characteristics of the share options granted to employees.<sup>18</sup>

The Black-Scholes-Merton formula, a closed-form option-pricing model, was developed for exchange-traded share options. As developed, it assumes that option exercises occur at the end of an option's contractual term, and that the other factors, expected volatility, expected dividends, and risk-free interest rates, are constant over the option's term. Because employees often exercise before the contractual term expires, FAS 123R requires companies to modify the term used as an input to the original formula by estimating an expected term for the employee share options that is less than the contractual term.

A lattice, or binomial, option-pricing model, however, can accommodate dynamic assumptions of expected volatility and dividends over the option's contractual term, and estimates of expected option exercise patterns during the contractual term (for example, the likelihood that an employee will exercise when the share price reaches a certain multiple of the exercise price). Therefore, the design of a lattice model might more fully reflect the substantive characteristics of a particular employee share option.<sup>19</sup>

The auditor should be alert to circumstances in which the selection of the Black-Scholes-Merton formula might not be appropriate. For example, the appropriate model for estimating the fair value of an instrument with a market condition (such as an exercise condition that is satisfied when the share price exceeds a specified value for a specified period of days) must take into account the effect of that market condition.<sup>20</sup> The Black-Scholes-Merton option-pricing formula would not generally be an appropriate valuation model for a share option in which the exercisability is conditional on a specified increase in the price of the underlying shares because it is not designed to take into account that type of market condition.<sup>21</sup>

---

<sup>17</sup> See FAS 123R, paragraph A2. The fair value of equity instrument share options granted to employees is measured on the date of the grant.

<sup>18</sup> See FAS 123R, paragraph A8, AU sec. 328.18, and AU sec. 328.26b. In addition to the Black-Scholes-Merton formula and a lattice option-pricing model, a Monte Carlo simulation technique also satisfies the requirements in paragraph A8 of FAS 123R. See FAS 123R, footnote 48.

<sup>19</sup> See FAS 123R, paragraph A15.

<sup>20</sup> See FAS 123R, paragraph A14.

<sup>21</sup> See the interpretive response to question 2, section C of SAB 107.

**Q6.** What steps should the auditor take when a company changes the valuation technique or model chosen to value employee share options?

**A6.** The auditor should evaluate whether the new technique or model meets the fair value measurement objective of FAS 123R. The SEC staff has stated that it would not object to a company changing its valuation technique or model, as long as the new technique or model meets the fair value measurement objective.<sup>22</sup> SAB 107 states that a company should take into account the reason for the change in technique or model in determining whether it meets the fair value measurement objective.<sup>23</sup> However, the SEC staff also has stated that it would not expect that a company would frequently switch between valuation techniques or models, particularly when there has been no significant variation in the form of share-based payments being<sup>24</sup> As noted in SAB 107, changing a technique or model from period to period for the sole purpose of lowering the fair value estimate of a share option would not meet the fair value measurement objective of FAS 123R.<sup>25</sup> Finally, frequent changes in the valuation technique or model also might indicate a risk of fraud that would require a response by the auditor. Accordingly, the auditor should evaluate management's reason for the change.

## Assumptions Used In Option-Pricing Models

**Q7.** Paragraph A18 of FAS 123R states that the valuation technique or model used to estimate the fair value of the share option shall take into account, at a minimum—

- Expected term of the option (in a lattice model, expected term is an output of the model);
- Expected volatility of the price of the underlying share for the expected term of the option;
- Exercise price of the option;
- Current price of the underlying share;
- Risk-free interest rate(s) for the expected term of the option; and
- Expected dividends of the underlying share for the expected term of the option.

How should the auditor assess the possible effect of these six items on the fair value measurement?

**A7.** The expected term and expected volatility assumptions have the highest risk because they involve the greatest amounts of judgment and have a significant effect on the estimated fair value. PCAOB staff question Nos. 8 through 11 provide direction to the auditor regarding expected term. PCAOB staff question Nos. 12 through 17 provide direction to the auditor regarding volatility.

The exercise price of the option and current price of the underlying shares have a significant effect on the fair value measurement and have a high

---

<sup>22</sup> See the interpretive response to question 3, section C of SAB 107.

<sup>23</sup> Ibid.

<sup>24</sup> Ibid.

<sup>25</sup> Ibid.

degree of verifiability. The auditor should verify that the company has properly authorized the share option plan and test whether the company has properly authorized the specific terms of the award, correctly determined the grant date, and accurately entered the exercise price and current share price, as of the measurement date, into the valuation model.

The risk-free interest rate(s) might have an elevated risk because a mathematical computation could be involved. The expected dividends assumption might have an elevated risk because of potential measurer bias. PCAOB staff question No. 18 provides direction to the auditor regarding risk-free interest rate(s) and expected dividends.

## Expected Term of the Option

**Q8.** The expected term assumption is one of the key drivers of fair value in the Black-Scholes-Merton formula.<sup>26</sup> Paragraph A23 of FAS 123R states that assumptions used to estimate the fair value of share options granted to employees should be determined in a consistent manner from period to period. How should the auditor evaluate the reasonableness of the expected term assumption?

**A8.** When a company is using the Black-Scholes-Merton option-pricing formula, the auditor should apply the following procedures to the expected term assumption:<sup>27</sup>

- Obtain an understanding of the company's process for estimating expected term, including the extent to which the company evaluates relevant factors in the accounting literature;<sup>28</sup>
- Verify that the expected term generally is at least equal to the vesting period of the share option grant;<sup>29</sup>
- Verify that the company (1) has taken into account the contractual term of the option and the effects of employees' post-vesting employment termination behavior, in addition to employees' expected exercise behavior, and (2) has not taken into account pre-vesting employee termination behavior;<sup>30</sup>
- Evaluate whether adjustments that the company has made to the historical exercise behavior are reasonable and supportable,<sup>31</sup> including adjustments to the historical exercise behavior of groups (See also PCAOB staff question No. 11); and
- Test the data that the company uses for its estimate, such as data on actual exercise behavior (See also PCAOB staff question No. 19).

---

<sup>26</sup> Expected term usually is an output of lattice models.

<sup>27</sup> See PCAOB staff question No. 10 for a discussion about the "simplified method." If a company's share option plan has the characteristics that are sometimes referred to as "plain vanilla," it may use the simplified method for estimating expected term, as found in SAB 107. However, the SEC staff has stated that it does not expect the simplified method to be used for share option grants after December 31, 2007.

<sup>28</sup> For example, see FAS 123R, paragraphs A26–A30.

<sup>29</sup> See FAS 123R, paragraph 42. Some awards have graded vesting schedules. These may be accounted for as in-substance multiple awards.

<sup>30</sup> Paragraphs A27 and A28 of FAS 123R describe factors that may affect expectations about employees' exercise behavior.

<sup>31</sup> See FAS 123R, footnote 50.

The auditor also should evaluate whether the person or persons determining the expected term assumption, including the company's specialists, have experience in valuing employee share options<sup>32</sup> and assess how that evaluation affects the audit procedures.

**Q9.** What should the auditor do to test a company's calculation of its historical exercise experience for employee share options, including consideration of the contractual term and post-vesting employee behavior?

**A9.** Paragraph A21 of FAS 123R states that historical experience generally is the starting point for developing expectations about the future. Because the expected term estimate is the period of time for which the option is expected to be outstanding (that is, generally the period of time from the grant date to the date of expected exercise or other expected settlement), companies may start by calculating a historical weighted average period of time for which previous grants of share options were outstanding.

The auditor should verify that a company's calculations include options that were not exercised during the contractual term. Failure to include such options could significantly understate average time that options were outstanding. For example, if a company calculates historical exercise behavior based only on the 70 percent of the options exercised over a 10 year contractual term, then it will probably significantly understate the average by not considering the 30 percent of options that may have been outstanding for 10 years and never exercised.

The auditor should:

- Evaluate whether the company's calculations are complete; i.e., that the calculations include all vested options, including those that were never exercised;
- Evaluate whether the company's calculations are mathematically correct, including any separate calculations for groups of employees (See also PCAOB staff question No. 11); and
- Test the underlying data upon which the company's calculations are based, for example, the grant date and exercise date (See also PCAOB staff question No. 19).

The auditor also should be aware of situations in which historical information is not sufficiently complete to enable a company to use it as the sole basis for estimating expected term. For example, if a company issues employee share options for the first time in 20X4 with a three-year vesting period and a ten-year contractual term, it cannot use its unadjusted historical experience in estimating the expected term of additional grants in 20X8 because there will have been only one year in which the earlier grants could have been exercised. The earliest it will have a complete history is at the end of the ten-year contractual term.

In situations in which the company calculated the historical exercise behavior based on incomplete historical information, the auditor should evaluate whether the company's rationale for using this calculation in connection with an estimate of expected term is reasonable and supportable.

---

<sup>32</sup> See AU sec. 328.12.

**Q10.** FAS 123R states that expectations based on historical experience should be modified to reflect ways in which currently available information indicates that the future is reasonably expected to differ from the past.<sup>33</sup> What procedures should the auditor perform to evaluate the reasonableness of adjustments to historical exercise behavior?

**A10.** The auditor should evaluate whether the company's rationale for adjustments to historical exercise behavior are reasonable and supportable.<sup>34</sup> The auditor also should evaluate whether the company failed to make a necessary adjustment. For example, if the historical experience is based on grants with one-year vesting, an adjustment would be appropriate if current grants have four-year vesting. The volatility of the company's stock price also can affect whether vested employees (1) exercise the options, (2) terminate from the company and exercise the options, (3) terminate from the company and let the options lapse, or (4) stay with the company through the contractual term and let the options lapse. Announced plans for acquisitions, divestitures, and initial public offerings of stock also could affect employee exercises and forfeitures.

The auditor should evaluate whether the amount of an adjustment is reasonable by reviewing the support for the adjustment. The auditor also should be alert to the risk of management override in the adjustments.

*Range of expected terms.* If a company, after analyzing its historical data, developed a range of possible expected terms that are each equally likely, the auditor should verify that the company selected the average of the amounts in the range (the expected value according to paragraph A20 of FAS 123R).

*Use of SAB 107 "simplified method."* According to SAB 107, the simplified method of estimating expected term is permitted only for "plain vanilla" options.<sup>35</sup> If a company uses the simplified method, the auditor should review the evidence that supports the company's view that it is eligible to use the simplified method. Specifically, the auditor should review the grant documentation to ensure that the terms conform to the "plain-vanilla" requirements, review pre-vesting terminations to ensure that the associated share options were cancelled, and test whether exercises by terminated employees occurred within a limited time after termination (typically 30 to 90 days).

**Q11.** According to FAS 123R, aggregating individual awards into relatively homogenous groups, with respect to exercise and post-vesting employment termination behaviors, and estimating the fair value of the options granted to each group separately, reduces the risk of potential misstatement of the value

---

<sup>33</sup> See FAS 123R, paragraph A21.

<sup>34</sup> AU sec. 328 provides general guidance about evaluating a company's assumptions.

<sup>35</sup> The interpretative response to question 5, section D.2 of SAB 107, establishes basic characteristics of share option plans that are sometimes referred to as "plain vanilla." The basic characteristics are: (1) share options are granted at-the-money, (2) exercisability is conditional only on performing service through the vesting date, (3) if an employee terminates service prior to vesting, the employee would forfeit the share options, (4) if an employee terminates service after vesting, the employee would have a limited time to exercise the share options (typically 30 to 90 days), and (5) share options are nontransferable and nonhedgeable. In addition, the SEC staff has stated that it does not expect the simplified method to be used for share option grants after December 31, 2007 (See the interpretative response to question 6, section D.2.).

of the award.<sup>36</sup> How should the auditor evaluate the appropriateness of groups of employees used in the estimate of expected term?

**A11.** If the company segregates the employees into more than one group (such as executives and non-executives), the auditor should perform the following procedures to evaluate the company's employee groups:

- Evaluate whether the company aggregated individual awards into relatively homogeneous groups with respect to exercise and post-vesting employment termination behaviors and the evidence and rationale supporting the determination of the groups is adequate;
- Evaluate the reasonableness and completeness of groups;
- Evaluate the reasonableness and support for adjustments to historical exercise behavior of groups;
- Test the underlying data upon which the groups are based (See also PCAOB staff question No. 19); and
- Evaluate whether the company's calculations of historical exercise behavior for each group are mathematically correct.

## Expected Volatility

**Q12.** Paragraph A23 of FAS 123R states that assumptions used to estimate the fair value of share options granted to employees should be determined in a consistent manner from period to period. Paragraphs A32 and A34 provide further guidance related to the company's estimate of expected volatility. How should the auditor evaluate the reasonableness of a company's estimate of the expected volatility of its share price?

**A12.** The auditor should perform the following procedures to evaluate the reasonableness of a company's estimate of expected volatility:<sup>37</sup>

- Obtain an understanding of the company's process for estimating expected volatility.
- Evaluate whether the company's process considers all of the applicable factors identified in paragraph A32 of FAS 123R in determining its estimate of expected volatility. The auditor also should evaluate whether the process (1) identifies the information necessary to be able to consider the volatility factors and (2) evaluates and weights that information (as required by paragraph A34 of FAS 123R).
- Evaluate the reasonableness of the assumptions, supporting information, judgments, and weightings. Evidence of reasonableness includes whether the company considered all the volatility factors and how such factors might affect the company's estimate of expected volatility. The auditor also should be alert to the risk of management override of the company's process for estimating expected volatility.
- Evaluate the consistency of the company's process for estimating expected volatility from period to period in evaluating the company's

---

<sup>36</sup> See FAS 123R, paragraph A30. In addition, the interpretive response to Question 4 of section D.2. of SAB 107 states that an entity may generally make a reasonable fair value estimate with as few as one or two groupings.

<sup>37</sup> AU secs. 342 and 328 provide general guidance for reviewing a company's process and evaluating its assumptions.

compliance with paragraphs A32 and A34 of FAS 123R.<sup>38</sup> However, the auditor also should consider that when circumstances indicate the availability of new or different information which would be useful in estimating expected volatility, SAB 107 directs the company to incorporate that information.<sup>39</sup>

- In general, for historical volatility, verify that the company's process provides for looking back over the expected term (for a closed-form model) or contractual term (for a lattice model)<sup>40</sup> to consider the extent to which currently available information indicates that future volatility will differ from historical volatility.<sup>41</sup> A change in a company's business model that results in a material alteration to the company's risk profile is an example of a circumstance in which the company's future volatility would be expected to differ from its past volatility.<sup>42</sup>
- Test the underlying data used in the estimate (See also PCAOB staff question No. 19).

The auditor also should evaluate whether the person or persons determining the expected volatility assumption, including the company's specialists, have experience in valuing employee share options,<sup>43</sup> and assess how that evaluation affects the audit procedures.

## Historical Volatility

**Q13.** How should the auditor evaluate the reasonableness of a company's estimate of expected volatility when it uses its historical volatility as its expected volatility?

**A13.** As discussed in the answer to PCAOB staff question No. 12, the auditor should evaluate whether the company's process provides for looking backward to determine whether currently available information indicates that expected volatility will differ from historical volatility. The auditor should evaluate whether there is other information that the company did not consider and such information indicates that expected volatility will differ from the past. The auditor could base this evaluation on publicly available information related to the company's corporate history and future plans, and knowledge of the industry. In addition, an indication of the reasonableness of the company's process will be the extent to which the company analyzes each factor with respect to its own facts and circumstances.

Additionally, the auditor should consider the criteria established by SAB 107 for exclusive reliance on historical volatility. The SEC staff has stated that it would not object to a public company placing exclusive reliance on historical volatility when the following factors are present, and the methodology is consistently applied, if the company's common shares have been publicly traded for a sufficient period of time:<sup>44</sup>

---

<sup>38</sup> The interpretative response to question 1, section D 1. of SAB 107 states that the process used to gather and review available information to estimate expected volatility should be applied consistently from period to period.

<sup>39</sup> Ibid.

<sup>40</sup> See FAS 123R, paragraph A32a.

<sup>41</sup> See FAS 123R, paragraph A34.

<sup>42</sup> See SAB 107, footnote 55.

<sup>43</sup> See AU sec. 328.12.

<sup>44</sup> See SAB 107, section D 1., "Company B" example

- The company has no reason to believe that its future volatility over the expected or contractual term, as applicable, is likely to differ from its past;
- The computation of historical volatility uses a simple average calculation method;
- A sequential period of historical data at least equal to the expected or contractual term of the share option, as applicable, is used; and
- A reasonably sufficient number of price observations are used, measured at a consistent point throughout the applicable historical period.

The auditor also should verify that the company has properly calculated the historical volatility.

If a company makes adjustments to historical volatility based on peer company data, the auditor should evaluate the reasonableness of the company's decision to use peer company data. In addition, the auditor should evaluate whether the company is using an appropriate peer group, the company is reasonably comparable to the peer group, and management reasonably blended peer group data and its own company data. The auditor also should be alert to the risk of management override in the area of adjustments to historical volatility.

**Q14.** FAS 123R indicates that a company should consider historical volatility over a period generally commensurate with the expected term or contractual term, as applicable. How should the auditor evaluate whether a company, in determining its expected volatility, has considered the historical volatility of its share price over an appropriate period of time?

**A14.** The auditor should evaluate whether the company considered the volatility of its share price over the most recent period that is generally commensurate with the expected term (or contractual term if a lattice model is used). For example, if a company estimated that the expected term of the options is four years, then the company generally should start with its historical volatility for the most recent four-year period in determining the expected volatility.

The following are circumstances that indicate increased inherent risk and might also indicate increased risk of fraud.

- The company used a period of historical data that is longer than the expected term,<sup>45</sup> and the effect is to lower expected volatility and the resulting fair value, or the company did not consistently use the longer period. Using a period of historical data longer than expected or contractual term is acceptable under SAB 107 if the company reasonably believes that the additional historical information will improve the estimate. However, this situation is similar to the condition described in PCAOB staff question No. 4, in which an adjustment to historical exercise behavior or share price volatility that results in a lower expected term or expected volatility increases inherent risk and might indicate a heightened risk of fraud.

---

<sup>45</sup> See the interpretative response to question 2, section D.1 of SAB 107. SAB 107 also points out that paragraph A32a of FAS 123R indicates companies should consider historical volatility over a period generally commensurate with expected or contractual term.

- The company used a method that weights the most recent periods of a company's historical volatility more heavily than earlier periods, especially if the result is a lowering of expected volatility.<sup>46</sup>
- The company excludes a period of time from the calculation of historical volatility, especially if doing so results in a decrease of expected volatility, and hence a decrease in fair value.<sup>47</sup>

**Q15.** How should the auditor evaluate the company's share price observations for the purpose of determining historical volatility?

**A15.** The auditor should evaluate whether the company used actual observed prices within intervals that were appropriate based on the facts and circumstances and that provide a basis for a reasonable estimate. For example, if a company's shares are thinly traded, then weekly or monthly price observations may be more appropriate than daily price observations.<sup>48</sup> The auditor also should verify that the price observations are taken consistently throughout the period and are consistent with the approach used in prior grants. For example, if a company uses weekly price observations, then the auditor should verify that the company made the observation on the same day of each week. In addition, if the company changes when it makes price observations, for example, from daily price observations to monthly, the auditor should evaluate the reasonableness of the company's rationale for the change.

## **Implied Volatility**

**Q16.** Implied volatility is inferred by calculating volatility using an option-pricing model (typically Black-Scholes-Merton), where the fair value—the market price of a company's appropriate traded financial instruments—and other variables are known (i.e., share price, exercise price, expected term, risk-free rate, and expected dividends). How should the auditor evaluate a company's use of implied volatility in its estimate of expected volatility?

**A16.** SAB 107 provides items for a company to consider when using implied volatility. Accordingly, in such situations, the auditor should evaluate whether a company with "appropriate traded financial instruments from which they can derive an implied volatility"<sup>49</sup> has appropriately taken into account implied volatility in determining the estimate of expected volatility.

For companies with exchange-traded options, or other appropriate traded financial instruments,<sup>50</sup> the auditor should evaluate whether the company's

---

<sup>46</sup> See SAB 107, interpretative response to question 2, section D.1, including footnote 40. SAB 107 states that such weighting may not be appropriate for longer term employee share options and that an estimate of expected volatility that places "extreme emphasis on the most recent periods" may not be consistent with paragraph A32(a) of FAS 123R.

<sup>47</sup> See SAB 107, interpretative response to question 2, section D.1. SAB 107 states that if a company disregards a period of historical volatility, it should be prepared to support its conclusion that its historical share price during that previous period is not relevant to estimating expected volatility due to one or more discrete and specific historical events and that similar events are not expected to occur during the expected term of the share option. SAB 107 states that these situations would be rare.

<sup>48</sup> See SAB 107, footnote 42.

<sup>49</sup> See SAB 107, interpretative response to question 1, section D.1.

<sup>50</sup> *Ibid*. Under SAB 107, appropriate traded financial instruments could include actively traded options or financial instruments with embedded options.

process for estimating expected volatility is appropriate and consistent from period to period.<sup>51</sup> A company that considers implied volatility will probably do so as part of its overall process for estimating expected volatility. Therefore, the auditor also should consider the concepts described in PCAOB staff question Nos. 3 and 12.

Regarding exclusive reliance on implied volatility, the SEC staff has stated that it would not object to a public company placing exclusive reliance on implied volatility when certain factors are present and the methodology is consistently applied, if the company's common shares have been publicly traded for a sufficient period of time and the company has multiple options on its shares outstanding that are traded on an exchange.<sup>52</sup>

If the company places exclusive reliance on implied volatility based on its assessment that the factors in SAB 107 are present, the auditor should evaluate that assessment. In addition, the auditor should verify that the company has properly calculated the implied volatility.

## Combined Volatility

**Q17.** How should the auditor evaluate the reasonableness of a company's estimate of expected volatility when it uses a combination of historical and implied volatility in that estimate?

**A17.** The auditor should verify that the company's process for estimating expected volatility includes consideration of the applicable factors for using historical or implied volatility, as discussed in FAS 123R and SAB 107. PCAOB staff question Nos. 13 through 16 provide guidance for the auditor to use when evaluating the company's use of historical volatility, including the effects of any adjustments, and implied volatility in its estimate of expected volatility. In considering the reasonableness of the combined expected volatility, the auditor should evaluate the company's consideration of the factors that affect volatility, including the SEC staff's factors for exclusive use of implied or historical volatility, and the company's support for its conclusions. The factors outlined in SAB 107 for a company's exclusive use of either historical volatility or implied volatility also may provide some relative benchmarks for the auditor to use in evaluating the combined volatility.

## Risk-Free Interest Rate(s) and Expected Dividends

**Q18.** FAS 123R requires that the valuation method, such as the Black-Scholes-Merton formula or lattice models, consider the expected dividends of the underlying shares for the expected term and the risk-free interest rate(s) for the expected term. How should the auditor evaluate whether the company has properly considered these two elements?

**A18.** The risk-free interest rate(s) and the expected dividends assumption generally are less subjective than the expected term and volatility assumptions and also do not have as significant an effect on the estimate of fair value. However, the auditor still should evaluate the reasonableness of those assumptions.

---

<sup>51</sup> See SAB 107, interpretative responses to question 3, section D.1, regarding the use of implied volatility.

<sup>52</sup> See SAB 107, section D.1., Company B example, and interpretative response to question 4, section D.1.

*Risk-free interest rate.* In general, the risk-free rate is the yield on a zero-coupon U.S. Treasury bond with a remaining term equal to the option term. A higher risk-free interest rate increases the option value and hence the estimated fair value, all other factors being equal.

If the company uses the Black-Scholes-Merton formula, the auditor should verify that the company used a traded zero-coupon U.S. Treasury bond with a remaining term equal to the expected term, measured on the grant date. The auditor also should verify that the company properly calculated the yield based on the traded price. If the company interpolated a yield because the expected term fell within the remaining terms of two bonds, the auditor should evaluate the accuracy of the interpolation.

If a company's lattice model incorporates a term structure of expected volatilities, the company might use a yield curve for the contractual period. If the company's lattice model uses a yield curve, the auditor should verify that the company properly calculated the yield curve and accurately entered the yields into the lattice model.

*Expected dividends.* The dividend yield over the option term affects the option value because it reduces the stock price on the ex-dividend date. In general, higher expected dividends decrease the value of the option and hence the estimated fair value. The auditor should:

- Evaluate whether the company has the intent and ability to pay the dividends that are embodied in the expected dividend assumption. Sufficient cash and observable trends provide evidence of the company's intent and ability to pay dividends.<sup>53</sup>
- If the company has adjusted its current or historic dividend yield, evaluate the reasonableness of and support for the expected dividend yield. The auditor should evaluate whether the expected dividend yield is consistent with management's plans and information available to market participants by reviewing evidence such as press releases on dividend policy changes and historical dividend yield rates. This evaluation should include whether the company failed to make an adjustment to expected dividends.
- Test the underlying data (See also PCAOB staff question No. 19).

## Validation of Data and the Option-Pricing Model

**Q19.** How should the auditor test the underlying data that supports a company's estimate of fair value, and the related entries?

**A19.** Pursuant to AU sec. 328.39, the auditor should test the data used to develop the fair value measurements and evaluate whether the fair value measurements have been properly determined from such data and management's assumptions. This includes evaluating whether the data on which the fair value measurements are based, including the data used in the work of a specialist, are accurate, complete, and relevant; and whether fair value measurements have been properly determined using such data and management's assumptions. In considering the controls over data pursuant to

---

<sup>53</sup> AU sec. 328.17 states that the auditor should evaluate management's intent to carry out specific courses of action where intent is relevant to the use of fair value measurement and that the auditor also should evaluate management's ability to carry out those courses of action.

AU sec. 328.12, the auditor should consider the effectiveness of the design of controls intended to safeguard the integrity and reliability of the data.

A number of systems, which can be automated or manual, often provide data relevant to the estimate of fair value. The auditor should identify the automated or manual systems that might be subject to testing. Record-keeping systems for stock plan information and awards are usually critical because information about forfeitures and exercises supports the company's estimate of expected term. Payroll, human resources, and tax systems also could be critical if they contain information about awards, forfeitures, and exercises that is used in the estimation process.<sup>54</sup>

The auditor also should establish that any data used that resides outside the company are reliable, such as peer group data. AU sec. 329.16 provides guidance for evaluating the reliability of such data.

**Q20.** How should the auditor evaluate whether the model has appropriately calculated the fair value estimate for share options?

**A20.** If the company is using the Black-Scholes-Merton formula, the auditor should verify that the company is using the correct formula and recalculate the fair value. If the company is using a lattice option-pricing model, the auditor should obtain evidence that the model is functioning properly.

## Role of Specialists

**Q21.** What is the role of a specialist in auditing estimates of the fair value of employee share option grants?

**A21.** AU sec. 328 provides guidance on auditing fair value measurements and disclosures, including auditing the fair value of employee share option grants. According to AU 328.12, as part of obtaining an understanding of the process management uses to determine fair value, such as the fair value of employee share option grants, the auditor should consider the extent to which management engages or employs specialists.

When testing fair value measurements and disclosures, the auditor should, among other things, perform procedures to evaluate whether management's assumptions are reasonable and to evaluate the source and reliability of evidence supporting management's assumptions.<sup>55</sup> According to AU sec. 328.05, footnote 2, management's assumptions include any assumptions developed by a specialist engaged or employed by management. Thus, the auditor should perform procedures in accordance with AU sec. 328 to evaluate the assumptions developed by a specialist engaged or employed by management.

Pursuant to AU sec. 328.20, the auditor should consider whether to engage a specialist and use the work of that specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions related to the fair value of employee share option grants. In making

---

<sup>54</sup> See AU sec. 328.12. When obtaining an understanding of the company's process for determining fair value measurements and disclosures, the auditor should consider the extent to which the company relies on a service organization to provide data that supports the measurement. When a company uses a service organization, the auditor should consider the requirements of AU sec. 324, *Service Organizations*.

<sup>55</sup> See AU secs. 328.26a and 328.31.

this decision, the auditor<sup>56</sup> should evaluate whether he or she has the necessary skill and knowledge to plan and perform audit procedures related to the fair value of employee share option grants, including the reasonableness of the assumptions that the company or its specialist used.

The following circumstances related to the company's fair value measurement under FAS 123R often are particularly complex, involve assumptions that have a significant effect on fair value and, thus, might result in a higher assessment of risk by the auditor. Accordingly, the auditor should evaluate whether he or she has the necessary skill and knowledge to plan and perform audit procedures in these areas.

- Use of a lattice model, including obtaining evidence that the model is functioning properly. (See PCAOB staff questions No. 5, 18, and 20.)
- Exclusion of periods of historical data. (See PCAOB staff questions No. 4 and 14.)
- Adjustments to historical exercise behavior or historical share price volatility that result in shorter expected term or lower expected volatility than the company's historical experience. (See PCAOB staff questions No. 4, 10, and 14.)
- Use of a method that weights the most recent periods of a company's historical volatility more heavily than earlier periods, especially if the result is a lowering of expected volatility. (See PCAOB staff question No. 14.)
- Use of combined volatility. (See PCAOB staff question No. 17.)

**Q22.** What should the auditor do to satisfy the requirement that he or she evaluate the qualifications of a specialist?

**A22.** Valuation specialists may have certain areas of experience. When evaluating the qualifications of a specialist in accordance with AU sec. 336.08,<sup>57</sup> the auditor should evaluate whether the specialist has experience in valuing employee share options. In doing this, the auditor should evaluate the experience of the specialist's firm and of the individual specialist, or specialists, performing the service.

---

[The next page is 11,201.]

---

<sup>56</sup> In this context, the term *auditor* includes employees of the auditor's firm who possess relevant special skill or knowledge and who participate in the audit as a member of the audit team.

<sup>57</sup> Pursuant to AU sec. 336.08a and b, the auditor should also consider the specialist's certification, license, or other recognition of competence and the specialist's reputation.

## Section 200

### *Policy Statement*

- .01 **PCAOB Release No. 2005-009, *Policy Statement Regarding Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, May 16, 2005**

### Summary

This Policy Statement discusses some of the issues raised during the first year of auditors' implementation of the PCAOB's Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* ("Auditing Standard No. 2"), which implements Sections 103 and 404 of the Sarbanes-Oxley Act of 2002 (the "Act") by establishing a process for auditing public companies' internal control over financial reporting in conjunction with an audit of financial statements. Many of these issues were raised, among other occasions, at the Securities and Exchange Commission's ("SEC" or "Commission") Roundtable on Implementation of Internal Control Reporting Provisions, on April 13, 2005. While Roundtable participants generally supported the objectives of Section 404, many expressed concerns about compliance costs and offered constructive comments about how the implementation process can be improved.

This Policy Statement considers several of the auditing practices observed in the first year of implementation that may be ineffective or inefficient means of meeting the objectives of Auditing Standard No. 2. It also describes how the PCAOB intends to supervise implementation of the standard, from providing additional guidance to make audits of internal control more effective and cost-efficient to driving improvements in implementation through our inspections of registered public accounting firms.

Specifically, this Policy Statement expresses the Board's view that, to properly plan and perform an effective audit under Auditing Standard No. 2, auditors should—

- ***integrate their audits*** of internal control with their audits of the client's financial statements, ***so that evidence gathered and tests conducted in the context of either audit contribute to completion of both audits***;
- ***exercise judgment to tailor their audit plans to the risks facing individual audit clients***, instead of using standardized "checklists" that may not reflect an allocation of audit work weighted toward high-risk areas (and weighted against unnecessary audit focus in low-risk areas);
- ***use a top-down approach*** that begins with company-level controls, to identify for further testing only those accounts and processes that are, in fact, relevant to internal control over financial reporting, and ***use the risk assessment required by the standard*** to eliminate from further consideration those accounts that have only a remote likelihood of containing a material misstatement;

- take advantage of the significant flexibility that the standard allows to *use the work of others*; and
- ***engage in direct and timely communication with audit clients*** when those clients seek auditors' views on accounting or internal control issues before those clients make their own decisions on such issues, implement internal control processes under consideration, or finalize financial reports.

## Background

The Sarbanes-Oxley Act has had a profound effect on the integrity of financial reporting in U.S. capital markets. The Act has strengthened and reformed almost every aspect of the financial reporting process, from the composition and role of the audit committee to preparers' certifications of accuracy, covering the integrity of gatekeepers such as analysts, lawyers and auditors in between. Although some of these changes have been in place for some time, the participants in the financial reporting process are now implementing one of the most challenging—but also one of the most promising—provisions of the Act.

Section 404 of the Act aims to strengthen the internal controls that underpin the accuracy and reliability of a company's published financial information. That section, along with the SEC's implementing rule, requires a public company to annually report its assessment of the effectiveness of its internal control over financial reporting. The section also requires such a company to provide its auditor's attestation to, and report on, the company's assessment. Auditing Standard No. 2 governs the auditor's responsibilities under Section 404.

In the simplest terms, investors can have much more confidence in the reliability of a corporate financial statement if corporate management demonstrates that it maintains adequate internal control over the preparation of accurate financial statements. Companies have been required to have internal control over their accounting since the Congress enacted the Foreign Corrupt Practices Act in 1977. There is no doubt, however, that the Act's requirement for annual assessments, and auditor attestations to those assessments, has led to a renewed emphasis on internal control over financial reporting and significant improvements in companies' controls.

Many of the larger public companies have recently filed their first assessments of the effectiveness of their internal controls, as well as the related reports from their auditors. There is evidence that the benefits of the internal control requirements are already being realized,<sup>1</sup> and investors have expressed strong support for the goals of Section 404, including the increased transparency that the provision provides.<sup>2</sup> Section 404 has, however, proven to be an enormous

---

<sup>1</sup> Seventy-nine percent of the 222 financial executives surveyed by Oversight Systems, Inc. reported that their companies have stronger internal controls after complying with Section 404. Seventy-four percent said that their companies benefited from compliance with Sarbanes-Oxley, and, of those, 33 percent said that compliance lessened the risk of financial fraud. See Oversight Systems, Inc., The 2004 Oversight Systems Financial Executive Report on Sarbanes-Oxley (December 2004).

<sup>2</sup> See, e.g., Remarks of Mark Anson, Chief Investment Officer, California Public Employees' Retirement System, Transcript of SEC Roundtable on Implementation of Internal Control Reporting Provisions (Apr 13, 2005) ("Roundtable Tr."); Remarks of Ann Yerger, Executive Director, Council of Institutional Investors, Roundtable Tr.; Remarks of Damon Silvers, Associate General Counsel, American Federation of Labor and Congress of Industrial Organizations, Roundtable Tr.; Letter from Laurie Fiori Hacking, Executive Director, Ohio Public Employees Retirement System, to William H. Donaldson, Chairman, SEC (Mar 1, 2005); see also Remarks of Gregory Jonas, Managing Director of Accounting Specialists Group, Moody's Investors Service, Roundtable Tr.

challenge for those involved in its implementation. Companies have found the requirements costly and demanding, and many have questioned whether the benefits are worth the cost.

We take these concerns seriously and are committed to learning from the first year's experience implementing Section 404. As part of this effort, on April 13, 2005, we participated in the Commission's Roundtable. The Roundtable was an opportunity for us and the Commission to hear directly from issuers, auditors, and investors on the front line of the Section 404 implementation process. Many participants at the Roundtable expressed their support for Section 404's purpose. One of the most valuable aspects of the Roundtable, however, has been the constructive criticism provided by many of those currently involved in the implementation process.

The cost of Section 404 compliance was the primary concern raised at the Roundtable.<sup>3</sup> Among other reasons, commenters suggested that costs were too high because companies and their auditors did not sufficiently focus their efforts on higher risk areas of internal control over financial reporting. In addition, commenters expressed the view that auditors did not use the work of others sufficiently or fully integrate the audit of internal control with the audit of the financial statements. Some Roundtable participants also stated that auditors are often less willing than they were previously to provide guidance to clients on accounting issues for fear of compromising independence or triggering a material weakness finding.

At the conclusion of the Roundtable, the Board agreed to take several steps to promote an internal control audit process that is both effective and cost-efficient. Today, we take the first two of these steps.<sup>4</sup> First, we are separately publishing a series of additional staff questions and answers related to Auditing Standard No. 2.<sup>5</sup> These questions and answers further explain and clarify provisions in Auditing Standard No. 2. In particular, these questions and answers seek to correct the misimpression that certain provisions of Auditing Standard No. 2 need to be applied in a rigid manner that constrains professional judgment and prevents the conduct of an audit in a manner that is both effective and cost-efficient. Second, we are also issuing today this Policy Statement, which amplifies some of the themes in those questions and answers and articulates our policy with respect to administering Auditing Standard No. 2.

Failure to apply the concepts discussed in this Policy Statement may reflect poor audit planning and result in unnecessary cost. Indeed, although we have not performed a detailed analysis, it is sufficiently clear to us that the costs to date associated with the implementation of Section 404 have been too high. For the Section 404 process to be sustainable, these costs must be reduced in future years. Some of this excess expense is attributable to first-year, start-up costs

---

<sup>3</sup> One survey found that for 217 public companies with average revenues of \$5 billion, first year Section 404 compliance cost, on average, \$4.36 million and consumed an average of nearly 27,000 hours. See Financial Executives International, FEI Special Survey on SOX Section 404 Implementation (March 2005).

<sup>4</sup> The Board also intends to devote the agenda of the upcoming meeting of its Standing Advisory Group, scheduled for June 8 and 9, 2005, to a discussion about implementation of Auditing Standard No. 2.

<sup>5</sup> The Staff Questions and Answers are available on the Board's Web site, at [http://www.pcaobus.org/Standards/Staff\\_Questions\\_and\\_Answers/index.asp](http://www.pcaobus.org/Standards/Staff_Questions_and_Answers/index.asp).

that should not recur in future years; nevertheless, we are concerned that auditors may not sufficiently be using several features of our standard, described below, that are designed to reduce costs without sacrificing quality.

## The Integrated Audit Concept

As auditing has evolved over the last century from a process of detailed examination of individual transactions and account balances into a process of testing samples, internal control over financial reporting has emerged as the foundation not only of the financial reporting process but also of the financial statement audit. Since 1941, the SEC's regulations have required auditors to consider a company's internal controls in planning an audit.<sup>6</sup> In addition, if controls had been adequately designed and were operating effectively, then longstanding auditing standards permitted the auditor to rely on less costly and time-consuming procedures.<sup>7</sup> Conversely, if an auditor determined that a control was inadequate in its design or operation (or elected not to test the control), then the auditor could not rely upon that control.<sup>8</sup> In this event, the auditor would take a considerably more detailed approach by relying almost exclusively on detailed tests of account balances and transactions.

Sections 103 and 404 of the Act, and Auditing Standard No. 2, changed that audit model. Today, auditors of companies subject to Section 404 must not only obtain an understanding of internal control, but they must also examine the design and operating effectiveness of internal control sufficient to render an opinion as to that effectiveness, as required by Section 103(a)(2)(A)(iii). To reap the most benefit from this examination, and to make the overall audit process as efficient as possible, we designed in Auditing Standard No. 2 an integrated audit model.

An integrated audit combines an audit of internal control over financial reporting with the audit of the financial statements, such that the objectives of the two audits are achieved simultaneously through a single coordinated process. In an integrated audit, the auditor's examination of internal control is validated by the findings in the audit of the financial statements. In addition, the auditor's findings and conclusions reached during the audit of internal control help the auditor better plan and conduct the auditing procedures designed to determine whether the financial statements are fairly presented. The two processes are mutually reinforcing. In this way, the integrated audit helps to improve the quality and integrity of both corporate controls over financial reporting and independent financial statement audits. We also believe that an integrated audit is more cost-effective than performing two distinct processes to audit internal control and the financial statements separately.

---

<sup>6</sup> Amendment of Rules 2-02 and 3-07 of Regulation S-X, Accounting Series Release No. 21, 11 Fed. Reg. 10921 (Feb. 5, 1941) (amending Regulation S-X to provide that "[i]n determining the scope of the audit necessary, appropriate consideration shall be given to the adequacy of the system of internal check and control. Due weight may be given to an internal system of audit regularly maintained by means of auditors employed on the registrant's own staff.").

<sup>7</sup> See AU Section 319.03, *Consideration of Internal Control in a Financial Statement Audit*. Effective April 16, 2003, the PCAOB adopted, on an initial, transitional basis, temporary rules that refer to pre-existing professional standards of auditing, attestation, quality control, ethics, and independence (the "interim standards"), including AU Section 319. These standards are reproduced on our Web site at [http://www.pcaobus.org/Standards/Interim\\_Standards/index.asp](http://www.pcaobus.org/Standards/Interim_Standards/index.asp).

<sup>8</sup> See AU Section 319.04, *Consideration of Internal Control in a Financial Statement Audit*.

As a practical matter, integration of the two audits means that evidence gathered and tests conducted in the context of either audit contribute to completion of both audits. This kind of coordination of work requires an auditor to plan and conduct his or her work with both audits in mind. Failing to integrate these audits not only wastes resources, but it also jeopardizes the quality of the overall audit and, potentially, misses key insights that could identify and uproot a budding accounting or reporting problem.<sup>9</sup>

Some auditors have acknowledged that, for a variety of reasons, they did not achieve fully integrated audits this year. As a result, audit costs may have been substantially higher than necessary. According to a recent survey commissioned by the largest U.S. accounting firms, auditors believe that the total costs of compliance with Section 404 will decline by 46 percent next year.<sup>10</sup> Among the factors cited to support this prediction was auditors' expectations that integration will be improved.<sup>11</sup> We, too, expect that auditors will better integrate their audits in the coming years. This should meaningfully affect both audit costs and audit quality.

## The Importance of Professional Judgment

Auditing Standard No. 2 is no different from any other auditing standard in that it does not prescribe detailed audit programs. For as long as the profession has established auditing standards, auditors have used those standards to tailor their own audit plans, in a manner that addresses the nature and complexity of the audit client.

Many participants in the Roundtable, as well as others, have noted, however, that some auditors have in fact failed to use tailored audit plans in their first year of auditing internal control over financial reporting under Section 404 of the Act and Auditing Standard No. 2. Those auditors have instead used a one-size-fits-all audit plan driven by standardized checklists that may have little to do with the unique issues and risks of the particular client's financial reporting processes. This is a disappointing development indicative of poor training and audit planning. Not only do audit fees increase when, for example, an audit plan calls for less experienced auditors on the engagement team to devote endless hours to process-level control testing, but audit quality also decreases, because such a plan contributes little to the search for material weaknesses in internal control that could identify a financial reporting problem.

The overall objective of Auditing Standard No. 2 is for the auditor to obtain evidence that a company's control system reasonably assures that its financial statements do not contain material misstatements. To accomplish this, the auditor must not only exercise judgment to determine how to apply the standard to audit clients in different industries and of different sizes, but also exercise judgment to focus their work on areas that pose higher risks of misstatement, due either to errors or fraud. Reliance on standardized checklists

---

<sup>9</sup> PCAOB Staff Question and Answer No. 50 issued today provides additional guidance on integrating the audit of internal control over financial reporting with the audit of the financial statements.

<sup>10</sup> See Charles River Associates, Sarbanes-Oxley Section 404 Costs and Remediation of Deficiencies: Estimates from a Sample of Fortune 1000 Companies (Apr. 2005).

<sup>11</sup> See Letter from Deloitte & Touche, Ernst & Young, KPMG, and PricewaterhouseCoopers to Jonathan G. Katz, Secretary, SEC (Apr. 11, 2005).

that lead to a focus on controls in low-risk areas obviously fails to meet this objective.

## **The Top-down Approach and Role of Risk Assessment**

Auditing Standard No. 2 was designed to be applied from the top down. That is, the standard focuses the auditor first on company-level controls and then on significant accounts, which lead the auditor to significant processes and, finally, individual controls at the process, transaction, or application levels. Knowledge obtained at each step guides the auditor toward the higher risk areas within the next succeeding level of controls. By approaching the task in this way, the auditor is naturally steered toward higher risk areas and away from those with less potential to have a material impact on the financials. This approach also provides a road map through the control system to ensure that the individual controls selected for testing are, in fact, relevant to internal control over financial reporting.

An auditor who chooses another approach needlessly risks adding to the audit's cost and reducing its quality. For example, starting at the bottom increases the risk that the auditor will become bogged down in testing that may ultimately prove pointless, in light of the primary objective of preventing or detecting material misstatements of the financial statements, resulting in increased and unnecessary costs.

A risk-based approach to the auditor's testing strategy can further reduce costs while increasing audit effectiveness. The auditor should consider the overall risk related to each significant account identified to determine whether he or she should alter the nature, timing, and extent of testing of the controls over that specific account. By doing so, the auditor will be able to eliminate from further consideration accounts that have only a remote likelihood of containing a material misstatement and, in any event, devote less audit attention to areas of low risk. In addition, the auditor should look to the individual control being tested and consider the nature, frequency, and importance of that specific control in order to determine whether the testing strategy should be revised further.

Finally, the auditor should consider, as part of his or her risk assessment, the strength of the company-level controls, to determine whether the result of testing these controls will alter the nature, timing, and extent of testing. Although the auditor may not rely solely on testing company-level controls,<sup>12</sup> strong company-level controls should lead the auditor to do less work than he or she otherwise would have performed or rely to a greater degree on the work of others.

## **Using the Work of Others**

An auditor who applies Auditing Standard No. 2 from the top down and appropriately assesses risk should naturally identify areas where use of the work of others is not only appropriate but is also the most efficient way to perform the audit. Redoing work in these areas may unnecessarily increase costs without producing a corresponding increase in audit quality. Spending auditor resources in areas in which the auditor could rely on the work of others also may cause the auditor to focus too much on low-risk controls. As discussed earlier, this could be an early warning sign of poor audit planning.

---

<sup>12</sup> See Auditing Standard No. 2, paragraph 54. PCAOB Staff Questions and Answers Nos. 38–43 issued today provide additional guidance on how to plan and perform an audit of internal control over financial reporting using both a top-down and a risk-based approach.

Auditing Standard No. 2 provides the auditor with considerable flexibility to use the work of others, consistent with the profession's longstanding auditing standard on using the work of internal auditors in the financial statement audit.<sup>13</sup> There is some concern that auditors have been reluctant to use Auditing Standard No. 2 flexibility to rely on the work of others because the standard also requires the external auditor to obtain the principal evidence supporting his or her opinion as to whether internal control is effective overall. These provisions are not in conflict. The principal evidence provision of Auditing Standard No. 2 requires the auditor to perform sufficient auditing to reach his or her own, independent opinion as to the effectiveness of a company's internal control over financial reporting. In broad terms, it prevents auditors from merely passing on to investors the judgments and opinion of others.

As one of the questions and answers issued today explains, the principal evidence requirement is "primarily qualitative."<sup>14</sup> Indeed, under Auditing Standard No. 2 the amount of work necessary to meet the principal evidence test "is not susceptible to precise measurement."<sup>15</sup>

In practical terms, this means two things. First, the auditor should perform more work directly in high-risk areas and seek to use the work of others in areas of lesser risk. Second, in evaluating whether the auditor has met the principal evidence test, the auditor should ascribe more weight to the work he or she performs in high-risk areas.<sup>16</sup> In this manner, following the risk-based principles regarding using the work of others will, in most circumstances, result in the auditor having obtained the principal evidence supporting his or her opinion.

## The Auditor's Ability to Provide Advice to Audit Clients

Finally, we are concerned about a misconception that, as a result of Auditing Standard No. 2, companies may no longer look to their auditors for advice on difficult accounting and internal control issues. This misconception appears to manifest itself in two particularly problematic ways. First, we have heard at the Roundtable and elsewhere that auditors have been unwilling to provide accounting advice to their audit clients; second, auditors have apparently encouraged audit clients to finish their assessments of internal control and their

---

<sup>13</sup> See AU Section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*. This standard provides that the work of competent and objective internal auditors may affect the nature, timing and extent of the audit. Specifically, if internal auditors are competent and objective, then external auditors may rely on work performed by internal auditors in the ordinary course of their duties. For example, "for certain assertions related to less material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is low, the auditor may decide, after considering the circumstances and the results of work . . . performed by internal auditors . . . , that . . . testing of the assertions directly by the auditor may not be necessary." See *id.* at paragraph 22. In addition, this standard also permits auditors to request direct assistance from the internal auditors, such that internal auditors will work under the direct supervision of the external auditor. See *id.* at paragraph 27. PCAOB Staff Question and Answer No. 54 issued today provides additional guidance on using the work of others. See also PCAOB Staff Question and Answer No. 36 (Nov. 22, 2004) (stating that external auditors may "use internal auditors to provide direct assistance in the audit of internal control over financial reporting").

<sup>14</sup> PCAOB Staff Question and Answer No. 54 (May 16, 2005).

<sup>15</sup> See Auditing Standard No. 2, note to paragraph 108.

<sup>16</sup> In other words, principal evidence is not meant to be assessed by simply adding up hours or numbers of controls tested in a mechanical fashion; rather, such an approach would likely detract from the standard's goal of allowing the auditor to use the work of others in an efficient and appropriate manner.

financial statements before the auditor begins audit work to attest to the fairness of those assessments and financial statements. Such practices are neither necessary nor advisable.

Auditing Standard No. 2 provides that an auditor's detection of a material misstatement in financial statements is a "strong indicator" of a material weakness in internal control. In addition, longstanding rules on auditor independence prohibit the auditor from preparing a client's financial statements and from making financial reporting decisions on behalf of management.<sup>17</sup> The prospect of PCAOB inspectors examining for compliance with these independence rules seems to have led some to conclude that management and the auditor should not consult on accounting and internal control questions or that the auditor should not review draft financial statements that, because they are not finished or complete, may contain misstatements or misapplications of Generally Accepted Accounting Principles ("GAAP"). When auditors are unwilling, or believe that they are unable, to provide advice on accounting or internal control, management may be forced to retain other accounting experts, or to make accounting decisions without the benefit of access to the auditor's technical knowledge.

Nothing in Auditing Standard No. 2 requires this result. Determining when it is appropriate for the auditor to provide accounting advice requires professional judgment and common sense. Auditors may not, of course, make accounting decisions for their clients, and management may not abandon its responsibility for quality financial reporting and simply rely on auditors to catch errors. Where management makes its own informed decisions regarding how applicable accounting principles apply to its company's circumstances, however, the auditor may discuss freely with management the meaning and significance of those principles.

To help dispel confusion on this issue, our staff addressed last June the question of whether audit clients may—or should—share draft financial statements with their auditors. The answer is decidedly yes. Indeed, information-sharing on a timely basis between management and the auditor is necessary. When reviewing draft financial statements, in determining the point at which the auditor must draw the line for purposes of identifying when a deficiency exists, the auditor should be concerned primarily about instances in which the company completed its financial statements and disclosures without recognizing a potential material misstatement. If it is clear that all applicable controls have not yet operated, then a conclusion as to whether a material misstatement in draft financial statements demonstrates a control deficiency would be premature.<sup>18</sup>

Auditors may also provide audit clients technical advice on the proper application of GAAP, including offering suggestions for management's consideration to improve disclosure and financial statement quality and giving updates on recent developments with accounting standards-setters. In addition, management may provide and discuss with the auditor preliminary drafts

---

<sup>17</sup> See Rule 2-01(c)(4)(i) of Regulation S-X, 17 C.F.R. § 210.2-01(c)(4)(i) (stating that an auditor is not independent of an audit client if it "prepar[es] the audit client's financial statements"); Rule 2-01(c)(4)(vi) of Regulation S-X, 17 C.F.R. § 210.2-01(c)(4)(vi) (stating that an auditor is not independent of an audit client if it "perform[s] any decision-making, supervisory, or ongoing monitoring function for the audit client"); see also Meeting of PCAOB Standing Advisory Group, February 16, 2005, available on the Board's Web site <http://www.pcaobus.org>

<sup>18</sup> See PCAOB Staff Question and Answer No. 7 (revised July 27, 2004) (explaining that Auditing Standard No. 2 requires an auditor to judge whether, once all applicable controls have operated, the company is able to prepare financial statements that are free of material misstatements).

of accounting research memos, spreadsheets, and other working papers in order to obtain the auditor's views on the assumptions and methods selected by management. Although the auditor may determine that some of these communications need to be made in writing, timely and open communication will often be best accomplished orally.

For example, a company that is contemplating a transaction may ask the auditor for assistance in determining the proper accounting for the transaction. In this situation, the auditor may provide substantial help, including explaining how applicable accounting principles apply to the transaction, offering sample journal entries, and reviewing management's preliminary conclusions. This is very different from a situation in which the auditor identifies a potential misapplication of applicable accounting principles in connection with a transaction that the auditor learns of outside of the consultation process, such as during a quarterly review, or after management has completed its financial statements and disclosures, in which case the auditor would have to consider whether management's failure to recognize the potential misapplication of applicable accounting principles constitutes a significant deficiency or material weakness.

## **The Board's Approach to Oversight of Implementation of Auditing Standard No. 2**

We take seriously our responsibility to oversee implementation of Auditing Standard No. 2. This includes issuing additional guidance to explain or interpret the standard as necessary, as well as supervising auditors' implementation of the standard. In particular, we intend to use our upcoming inspections to evaluate how firms have conducted the first round of audits under Auditing Standard No. 2.

Our inspections should drive improvements in the effectiveness and efficiency of registered firms' audits of internal control in two ways. First, as we have described above, Auditing Standard No. 2 leaves auditors considerable flexibility to apply the standard in a manner that is appropriate to each audit. Indeed, the standard requires auditors to use professional judgment to tailor their audit plans to the specific risks facing each audit client. In our inspections, we will look for audits that suffer from poor planning and risk assessment, such as by using standardized checklists without appropriately tailoring the procedures to the circumstances or focusing the audit on areas that are unlikely to lead to the discovery of material weaknesses in internal control at the expense of adequately auditing high-risk areas. When we detect such shortcomings, we will demand improvements.

Second, we have also described above, as well as in the staff questions and answers issued today and in the past, several approaches to the audit of internal control that we believe improve both the effectiveness and the efficiency of these audits. When we review audits that do not apply the approaches described above, we will expect auditors to justify their decisions and to be able to explain how the audit plan nevertheless met the objectives of the standard.

At the Roundtable, a number of the participants focused on the role our inspections will play in shaping implementation of Auditing Standard No. 2. Some suggested that our inspections should require auditors to reduce costs overall. Others suggested that, if our inspections are narrowly focused on technical compliance, they could have the perverse effect of promoting a checklist mentality and discouraging the use of judgment and tailored audit planning.

We intend for our inspections to do neither. By focusing on the conduct of a high-quality audit as described above, we believe our inspections will promote efficiency without the need for us to get involved in auditors' billing practices. And, by focusing on appropriate use of judgment and risk assessment, we are deliberately planning our inspections in a manner that promotes an audit of internal control that is both thoughtful and risk-focused. In other words, we do not intend to second-guess good faith audit judgments. If we believe, however, that an auditor has approached the audit in a way that is mechanistic and does not reflect the application of professional judgment to the specific risks associated with the audit client's financial reporting system, we will not hesitate to demand changes to the auditor's approach to implementing Auditing Standard No. 2.

## **Conclusion**

The first year's implementation of Section 404 required a tremendous effort on the part of management and auditors, as well as the commitment of substantial corporate resources. The lessons learned so far—and to be learned as we complete our first cycle of inspections of audits under Auditing Standard No. 2—should provide a solid basis for substantial improvement in the process, including significant cost reduction in the future.

## Section 300

# ***Report on the Initial Implementation of Auditing Standard No. 2***

- .01 PCAOB Release No. 2005-023, *Report on the Initial Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, November 30, 2005

## **Overview**

This report discusses issues identified in the course of the Board's monitoring of the implementation of Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2" or "AS 2"). That standard implements Sections 103 and 404 of the Sarbanes-Oxley Act of 2002 (the "Act") by establishing a process for auditing a public company's internal control over financial reporting ("internal control") in conjunction with an audit of financial statements.

The Board's monitoring has focused on whether firms' audit methodologies, as well as firms' execution of those methodologies, have resulted in audits of internal control that are effective and efficient. The Board found that both firms and issuers faced enormous challenges in the first year of implementation, arising from the limited time frame that issuers and auditors had to implement Section 404; a shortage of staff with prior training and experience in designing, evaluating, and testing controls; and related strains on available resources. These challenges were compounded in those companies that needed to make significant improvements in their internal control systems to make up for deferred maintenance of those systems.

The Board's monitoring revealed that audits performed under these difficult circumstances were often not as effective or efficient as Auditing Standard No. 2 intends (and as the Board expects they can be in the future, given the benefits of experience, adequate time and resources).<sup>1</sup> Accordingly, the Board has identified, in its inspections and other monitoring,<sup>2</sup> areas in which auditors

---

<sup>1</sup> This report uses the term "effectiveness" to refer to the auditor achieving the objectives described in the Board's standards. An effective audit culminates in the auditor obtaining reasonable assurance that his or her opinion is correct. This report uses the term "efficiency" to refer to the auditor achieving the objectives described in the Board's standards with the least expenditure of effort and resources. For the reasons described in this report, the Board expects that auditors will increase both the effectiveness and efficiency of their audits in future years.

<sup>2</sup> The Board's observations in this report are based in significant part, but not exclusively, on information obtained by the Board in the Board's inspection process, which in the 2005 cycle included review of portions of a limited selection of audits of internal control. Information received or prepared by the Board in connection with any inspection of a registered public accounting firm is subject to certain confidentiality restrictions set out in Sections 104(g)(2) and 105(b)(5) of the Act. Under the Board's Rule 4010, however, the Board may publish summaries, compilations, or general reports concerning the results of its various inspections, provided that no such published report may identify the firm or firms to which any quality control criticisms in the report relate. The Board's reports under Rule 4010 also may include information that was not gathered during the inspection process.

should be able to make their audits more effective and efficient in the future, by obtaining sufficient evidence for an opinion in a manner that appropriately conserves time and other resources. These areas are summarized below and detailed in the body of the report along with further explanation about certain aspects of Auditing Standard No. 2. The Board understands that, based on first-year experiences and on previous Board guidance, firms are already modifying their audit methodologies and training materials in a number of these areas, to improve the effectiveness and efficiency of their internal control audits.

## Summary of the Board's Observations

The inefficiencies observed by the Board varied in form and degree among firms and engagement teams. The most common reasons why audits were not as efficient as the Board expects them to be include the following—

- Some auditors did not integrate their audits of internal control with their audits of financial statements. Consequently, the amount of reliance placed on controls in establishing the nature, timing, and extent of financial statement audit work was limited. The Board expects that auditors will better integrate their audits in the future.
- Some auditors did not effectively apply a top-down approach. To varying degrees, auditors often approached the audit of internal control from the bottom up. Using a top-down approach, the auditor begins by evaluating company-level controls and significant accounts at the financial statement level and then works down to relevant individual controls at the process, transaction, or application levels. The results of the auditors' testing at each level help the auditor tailor the remainder of the work. The Board expects that auditors will use a top-down approach to a greater extent in the future, which will make audits both more effective and more efficient.
- Some auditors did not alter the nature, timing, and extent of their testing to reflect the level of risk. Auditors often appeared to take a uniform approach to their testing, inadequately considering the unique risk factors within each company. As a result, some auditors appeared to have expended more effort than was necessary in lower-risk areas. This approach also compromised audit effectiveness because, in some cases, a higher-risk area should have received more audit attention than it did. The Board expects that auditors will tailor their procedures to focus on the particular risks facing audit clients' systems of internal control as they gain more experience in auditing internal control.
- Some auditors performed inefficient, and sometimes ineffective, walkthroughs of major classes of transactions because they used different transactions to test each control separately rather than walking a single transaction through the entire process. In addition, some auditors did not ask sufficiently probing questions of the company's personnel to gain a complete understanding of the transaction process. Making such inquiries assists the auditor in identifying any points at which a necessary control is missing or inadequate. In the future, the Board expects auditors, in most cases, to simplify their walkthroughs by following a single transaction.
- Some auditors did not use the work of others to the extent permitted by Auditing Standard No. 2. Auditors who more effectively use the work

of others as permitted by AS 2 will likely be able to make more efficient use of their own time in performing their audits of internal control. The Board expects auditors to use the work of others more consistently in the manner intended by the Board as they gain more experience in applying the standard.

In addition, the Board identified areas in which, on the whole, auditors could have performed their work more effectively. While varying among firms and engagement teams, the most common reasons why audits were not as effective as the Board expects them to be include the following—

- In the face of identified control deficiencies, often discovered late in the audit process, some auditors failed to sufficiently evaluate the adequacy of compensating controls. For example, in some cases, auditors relied on management assertions about compensating controls without testing those controls in operation. The Board expects that, in future years, auditors and issuers alike will have more time to address identified control deficiencies and evaluate compensating controls.
- Some auditors did not perform sufficient testing of the controls over preparing financial statement disclosures. The controls in this area are among the most important in the financial reporting process because of the relatively high risk of material misstatement or omission due to fraud or error. Sufficient testing of controls in this area also can make the auditor's substantive testing of financial statement disclosures more efficient.

This report also explains certain aspects of Auditing Standard No. 2 and amplifies the guidance issued by the Board on May 16, 2005 on effective and efficient implementation of the standard, as follows—

- The term “more than remote,” which appears in the standard's definitions of “significant deficiency” and “material weakness,” means “at least reasonably possible.” These definitions, based in part on long-standing accounting terms, are designed to lead to a determination as to whether there is a deficiency that would prevent a prudent official from concluding that he or she has reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles.
- Circumstances identified in Auditing Standard No. 2 as “strong indicators” of a material weakness are not automatically material weaknesses; rather, these circumstances require heightened auditor scrutiny to determine whether a material weakness, in fact, exists.
- The objective of an audit of internal control is to identify whether any material weaknesses exist in the company's internal control over financial reporting. Therefore, an audit in accordance with AS 2 should not be designed to detect deficiencies that, individually or in the aggregate, are less severe than a material weakness.
- When the auditor identifies control deficiencies, Auditing Standard No. 2 requires the auditor to evaluate the existence and effectiveness of any compensating controls. Such an evaluation is important because compensating controls may mitigate the effects of deficiencies that would otherwise be considered significant deficiencies or material weaknesses.

- In performing an integrated audit of internal control and the financial statements, the auditor may perform tests of controls that simultaneously satisfy the objectives of both audits. Auditing Standard No. 2 does not require or suggest that the auditor perform separate tests of controls for the purposes of the audit of internal control and for the purposes of the audit of financial statements. To the contrary, AS 2 encourages such integration of testing.

## Background

Section 404 of the Act aims to assure that the controls that underpin the accuracy and reliability of a company's published financial information are adequate. That section, along with the Securities and Exchange Commission's (the "Commission" or "SEC") implementing rules, requires a public company to annually report its assessment of the effectiveness of its internal control. The section also requires such a company to provide investors its auditor's attestation to, and report on, that assessment.

It would be difficult to overstate the efforts expended by both corporate managements and auditors to comply with Section 404's new requirements, especially given the short deadline for compliance that many of the largest companies confronted. Since 1977, the Foreign Corrupt Practices Act has required public companies to maintain internal controls. Nevertheless, in 2004, many companies had to undertake the daunting task of making significant improvements to their internal controls as part of their preparation for complying with Section 404. For many companies, this involved documenting controls for the first time and identifying and remediating control deficiencies (in some cases, numerous deficiencies) under severe time pressure. In addition, managements had to simultaneously devise and execute procedures to assess the effectiveness of their controls. For most companies, this assessment was an entirely new process. As a result of the scope of this undertaking, many companies completed their management assessment processes later than anticipated. This, in turn, compressed the time for the audit even more, in many cases forcing auditors to plan their audits before companies had established a stable and complete set of controls.

Given the importance of Auditing Standard No. 2 and the challenges of a compressed time frame for implementation, the Board made the monitoring of firms' implementation of the standard one of its top priorities. Based on early questions from auditors and their audit clients, on June 23, 2004, the Board's staff issued 26 questions and answers on how to interpret provisions of the standard related to, among other things, scope and extent of testing, using the work of others, and evaluating deficiencies. The Board's staff issued additional questions and answers on October 6, 2004; November 22, 2004; and January 21, 2005. In addition, on May 16, 2005, the Board issued a policy statement regarding the implementation of the standard, accompanied by additional staff questions and answers.<sup>3</sup> Both May 16 documents addressed how auditors can make the internal control audit more effective and efficient, and provided guidance on integrating the audits, using a top-down approach, using the work

---

<sup>3</sup> See PCAOB Release No. 2005-009, Policy Statement Regarding Implementation of Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* (May 16, 2005) (available at [http://www.pcaobus.org/Standards/Standards\\_and\\_Related\\_Rules/Auditing\\_Standard\\_No\\_2.aspx](http://www.pcaobus.org/Standards/Standards_and_Related_Rules/Auditing_Standard_No_2.aspx)); Staff Questions and Answers, *Auditing Internal Control Over Financial Reporting* Staff Questions and Answers are available at [http://www.pcaobus.org/Standards/Staff\\_Questions\\_and\\_Answers/index.aspx](http://www.pcaobus.org/Standards/Staff_Questions_and_Answers/index.aspx).

of others, assessing risk, and other topics. At that time, the Board also indicated its intention to use its 2005 inspections to evaluate how efficiently and effectively firms conducted the first round of audits under the standard.<sup>4</sup>

The Board's monitoring has taken two forms. First, to ensure that firms' internal policies and procedures related to AS 2 implement the standard effectively and efficiently, the Board's staff met with several large firms in June and July 2005. The purpose of these meetings was to evaluate portions of their audit methodologies, as well as their internal training materials, and to understand whether and, if so, how these firms intended to modify their methodologies and training in light of experience gained in the first year of implementation. Each of these firms represented that it had made changes to its policies, procedures, and training materials in various areas, including areas addressed in the Board's May 16 policy statement.

Second, the Board included in its 2005 annual inspections of firms whose audit clients were subject to Section 404 during the first year an evaluation of a limited selection of those firms' audits of internal control. One of the Board's objectives in conducting these inspections was to provide auditors with timely feedback on their first year's implementation of this significant standard. The inspection process has, therefore, involved ongoing discussions with engagement teams and firm leadership about the matters described in this report.

Each inspection began with a visit to the firm's headquarters, in order to probe and understand the firm's leadership's perspective on its first year of implementation. During this part of the inspection, inspectors also evaluated the firm's documented audit policies, tools, and training materials to gain an understanding of both the firm's method of communicating with its field auditors on individual engagements and its policies regarding consultations on internal control matters. Next, the Board's inspectors visited practice offices to evaluate the performance of individual audit engagements, focusing on specific areas deemed to be high-risk for most engagements, such as controls over revenue and the evaluation of deficiencies.

The audits selected for inspection were conducted—and most were completed—prior to the issuance of the Board's additional guidance on May 16, 2005. Many of the observations described in this report, therefore, relate to matters that were addressed in that guidance. Further, many auditors acknowledged before the start of these inspections that they had not implemented certain areas of Auditing Standard No. 2 as well as they could have and that they planned to make improvements in subsequent years. Areas that auditors recognized needed improvement included integrating the audits, taking a top-down approach, and using the work of others to a greater extent. The Board understands that many firms already have undertaken significant efforts to refine their methodologies, provide additional training to their personnel, and otherwise identify and implement improvements in the second-year audits of internal control.

## **Board Observations Regarding the Performance of Audits of Internal Control**

The Board's inspections and other monitoring revealed that, on the whole, there are opportunities for greater effectiveness and efficiency, as both issuers and auditors gain more experience evaluating and testing internal control. More

---

<sup>4</sup> See PCAOB Release No. 2005-009.

time to meet regulatory deadlines and adequate resources in the future also should help issuers and auditors become more effective and efficient in their work. Specific performance issues observed by the Board's inspectors are described below.

## **The Integrated Audit**

As described in the Board's May 16, 2005 guidance, Auditing Standard No. 2 encourages integration of the financial statement audit and the internal control audit. In an integrated audit of the financial statements and internal control, the auditor designs and simultaneously executes procedures that accomplish the objectives of both audits. These objectives are not identical, but are interrelated. By obtaining sufficient evidence to support a control risk assessment of low during the audit of internal control, the auditor may reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements. At the same time, integration of the two audits means that evidence gathered and tests conducted in the context of either audit contribute to the completion of both audits. For example, the knowledge of a company's controls and procedures derived from the audit of internal control may lead to improvements in the design of financial statement audit procedures.

Due largely to externally imposed timing constraints, most auditors were unable to integrate their first-year audits under Auditing Standard No. 2. The Board's inspectors observed that in most of the engagements selected for inspection, auditors performed two separate, parallel audit processes. This approach may have been used because, in many cases, auditors were concerned that they might not be able to complete the evaluation and testing of controls until late in the audit period and that unfavorable results of testing of controls would require last-minute increases in audit procedures related to the financial statement audit. In these cases, the result was a less efficient process than AS 2 intends.

In some cases, auditors' failure to integrate the two audits also reduced audit effectiveness. For example, in some of the engagements reviewed by inspection teams, auditors identified deficiencies in internal control as a result of discovering misstatements during the audit of the financial statements. In a significant number of these cases, however, the auditors did not re-evaluate the original risk assessments used in planning the audit of internal control. In other cases, some auditors identified a control deficiency during the audit of internal control but did not determine the effect of the deficiency on the nature, timing, and extent of substantive procedures to be performed as part of the financial statement audit.

## **Top-Down Approach**

Auditing Standard No. 2 was designed to encourage the auditor to take a top-down approach to the audit. As described in the Board's May 16, 2005 guidance, in a top-down approach, the auditor performs procedures to obtain the necessary understanding of internal control and to identify the controls to test in a sequential manner, starting with company-level controls and significant accounts at the financial statement level and then working down to relevant individual controls at the process, transaction, or application levels. Successful implementation of a top-down approach requires the auditor to evaluate company-level controls (such as the control environment, the period-end financial reporting process, controls to monitor other controls, and management's risk assessment process) early in the audit.<sup>5</sup> By doing this, the

---

<sup>5</sup> See Auditing Standard No. 2, paragraphs 52-59

auditor is able to tailor the remainder of his or her testing of controls over significant accounts to reflect the conclusions reached while evaluating company-level controls. In this way, when companies have well-designed controls at the higher levels that operate effectively, auditors may be able to reduce tests of internal control over individual processes, transactions and applications. (Of course conversely, if companies have poorly designed controls or controls that do not operate effectively at the company level, auditors will need to focus more closely on lower-level controls.)

Most of the audit engagements reviewed by the Board's inspectors did not use a top-down approach. Rather, to varying degrees, auditors approached the audit of internal control from the bottom up, focusing first on performing detailed tests of controls at the process, transaction, and application levels, much as many of their audit clients had approached their assessments. Auditors who used a bottom-up approach often spent more time and effort than was necessary to complete the audit.

Moreover, even in those cases in which auditors spent a significant amount of time testing and evaluating company-level controls, inspectors observed that most auditors did not alter their testing of controls at the process, transaction, or application levels in response to the results of that testing. Other audit engagement teams appeared to have spent relatively little time testing and evaluating company-level controls and instead relied almost exclusively on detailed tests of controls over individual processes, transactions and applications.

## Risk-Based Approach

An auditor's assessment of the risk that the financial statements could be materially misstated has a pervasive effect on the amount of work that the auditor performs. Thus, as explained in the Board's May 16, 2005 guidance, risk assessment allows the auditor to focus on higher-risk areas while expending less effort in areas of lower risk.

In most of the engagements reviewed, the nature, timing, and extent of the auditor's testing were not altered to reflect the level of risk assessed within a given area. Instead, auditors on the whole appeared to take a uniform approach to their testing. As a result, some auditors appeared to have expended more effort than was necessary in lower-risk areas. Inspectors noted that this approach also compromised audit effectiveness because, in some cases, a higher-risk area should have received more audit attention than it did.<sup>6</sup>

Ineffective use of standardized firm tools may have contributed to audit engagement teams' failure to vary the scope and extent of testing in response to the assessed risks. Inspectors observed, in some cases, that key decision points, such as the identification of significant accounts and controls to test, might have benefited from more judgment and input from senior members of the audit engagement team in addition to the assistance provided by the firm tools.

Standardized tools play an important and necessary role in encouraging consistency in the performance of quality audits. Auditors must recognize, however, that these tools cannot replace sound auditor judgment applied to the facts and circumstances of each audit. Without this judgment, the use of these tools can turn the audit into an exercise in rules-based compliance. In this regard,

---

<sup>6</sup> Indeed, some high-risk areas, especially areas such as the formulation of accounting estimates that are easily manipulated notwithstanding controls, can justify additional effort in the audit of internal control, as well as additional substantive work in the financial statement audit, irrespective of the reliability of controls.

the Board's inspectors will continue to focus on whether auditors have applied the provisions of Auditing Standard No. 2 in a risk-focused manner, rather than on the basis of compliance with forms and checklists.

## Using the Work of Others

As explained in the Board's May 16, 2005 guidance, Auditing Standard No. 2 permits auditors to use the work of others in a way that corresponds directly with the auditor's assessment of the risk associated with particular controls. An auditor who appropriately uses the work of others enhances the overall efficiency of the audit by avoiding duplication of effort in lower-risk areas, as well as facilitating the auditor's focus on higher-risk controls. In some cases, however, auditors did not use the work of others to the extent permitted by the standard.

Auditors' reluctance to use the work of others to the extent that AS 2 allows may have been due to one or more factors, including—

- Some auditors' decisions to perform all the work in the first year themselves based on the theory that, irrespective of the standard's provisions on using the work of others, this approach was the best way for the engagement team to conduct a high-quality audit in the first year and to increase efficiency in future years.
- The timing of management's assessment, which, in many cases, was not completed until near year-end or concurrently with auditors' testing. Specifically, some auditors were concerned that planned reliance on others' work, when that work was not yet completed or available for evaluation, could cause the auditor to miss required deadlines.
- Auditors' uncertainty about whether the principal evidence requirement<sup>7</sup> involves primarily a quantitative or qualitative assessment. This confusion led some auditors to take a highly quantitative approach. The PCAOB staff guidance issued on May 16, 2005 clarifies that the principal evidence requirement is primarily qualitative.<sup>8</sup>

Inspectors also noted that most of the firms' methodologies used in 2004 described three general categories for using the work of others—much like the three categories described in the Board's initially proposed standard on auditing internal control over financial reporting.<sup>9</sup> When the Board adopted Auditing Standard No. 2 in its final form, however, it did not include these three categories. Instead, the final standard describes a more flexible framework for using the work of others. The fact that this aspect of the final standard

---

<sup>7</sup> When using the work of others, AS 2 requires the auditor to obtain the principal evidence supporting his or her opinion as to whether internal control is effective overall. See Auditing Standard No. 2, paragraph 108.

<sup>8</sup> See Staff Questions and Answers, *Auditing Internal Control Over Financial Reporting* (Q&A No. 54) (May 16, 2005).

<sup>9</sup> The proposed standard defined three categories of controls and the extent to which the auditor could use the work of others in each of those categories

- Controls for which the auditor should not rely on the work of others, such as controls in the control environment and controls specifically intended to prevent or detect fraud that is reasonably likely to have a material effect on the company's financial statements;

- Controls for which the auditor may rely on the work of others, but his or her reliance on the work of others should be limited, such as controls over nonroutine transactions that are considered high risk because they involve judgments and estimates, and

- Controls for which the auditor's reliance on the work of others is not specifically limited, such as controls over routine processing of significant accounts.

See PCAOB Release No. 2003-017, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* (Oct. 7, 2003). These categories were not included in Auditing Standard No. 2.

was not consistently incorporated into the firms' methodologies probably influenced auditors' decisions not to use the work of others to the extent permitted by Auditing Standard No. 2.

## Walkthroughs

Auditing Standard No. 2 requires the auditor to perform a walkthrough of each major class of transactions. In a walkthrough, the auditor follows a transaction from its origination through the company's information systems until it is reflected in the company's financial reports. The objectives of a walkthrough are to obtain a complete understanding of the process flow of transactions and to determine the points in the process at which misstatements could occur; confirm the auditor's understanding of the design of controls in that process; evaluate the effectiveness of the design of controls; and ascertain whether controls have been placed in operation.<sup>10</sup> Focusing on a single transaction, from start to finish, is generally the most effective and efficient way to accomplish these objectives.

Inspectors found, however, that a significant number of engagement teams chose not to use a single transaction for their walkthroughs. In some of these cases, the auditor appeared to have obtained a complete understanding of the process by undertaking additional, less efficient procedures. Other auditors failed to perform the procedures necessary to achieve the objectives of the walkthrough. For example, many auditors who chose not to use a single transaction for a walkthrough switched their focus to a new transaction at points in the transaction process that involved a higher risk of material misstatement. As a result, these auditors needed to take special care to determine that their understanding of the entire process was complete, especially at those riskier transition points. The inspectors noted a number of engagement teams that failed to focus the necessary attention on these transition points.<sup>11</sup>

## Testing and Evaluating Compensating Controls

When the auditor identifies control deficiencies, Auditing Standard No. 2 requires the auditor to evaluate the existence and effectiveness of any compensating controls.<sup>12</sup> This evaluation is important because compensating controls may mitigate the effects of deficiencies that would otherwise be more significant.<sup>13</sup> Inspectors noted, however, that some auditors failed to sufficiently evaluate the adequacy of compensating controls.

Inspectors observed that, in several cases, auditors identified control deficiencies early in the process but did not evaluate their severity until after year-end. When these deficiencies were evaluated, management and the auditor

---

<sup>10</sup> See Auditing Standard No. 2, paragraph 79.

<sup>11</sup> Inspectors also noted that many walkthroughs were ineffective because the auditor did not ask sufficiently probing questions of the company's personnel to gain a complete understanding of the transaction process and to be able to identify any points at which a necessary control was missing or inadequate. Under Auditing Standard No. 2, the auditor should question the company's personnel about their understanding of the company's procedures and controls. See Auditing Standard No. 2, paragraphs 80 and 81. These questions should go beyond a narrow focus on the single transaction used as the basis for the walkthrough so as to understand all the types of significant transactions handled by the process. For example, the auditor should evaluate whether matters that come to his or her attention during the processing of an individual transaction merit broader follow-up discussion with company personnel as part of confirming that the auditor's understanding of the process is complete.

<sup>12</sup> See Auditing Standard No. 2, note to paragraph 10.

<sup>13</sup> This is because, "[i]f a deficiency is effectively mitigated by compensating controls, then the likelihood of a misstatement occurring and not being prevented or detected may very well be remote." Auditing Standard No. 2, paragraph E86.

often tried to identify compensating controls that mitigated the control deficiency. If a compensating control had not been identified previously in management's assessment, management and the auditor then would need to test it to determine that it was designed to operate at the level of precision necessary to compensate adequately for the deficiency and that it indeed operated effectively.

In some cases, auditors did not adequately test late-identified compensating controls to form a conclusion about their operating effectiveness. In other cases, auditors agreed that certain controls—such as senior management's oversight of financial reporting generally—mitigated deficiencies even though they did not appear to operate in a manner that compensated for deficiencies at the process, transaction, or application levels. The Board expects that, in the future, auditors and issuers alike will have more time to consider and evaluate appropriate compensating controls.

## **Testing Controls Over Financial Statement Presentation and Disclosure**

Auditing Standard No. 2 provides that the period-end financial reporting process is always a significant process because of its importance to the company's financial reporting.<sup>14</sup> The period-end financial reporting process ordinarily consists of a combination of manual and automated functions, requires considerable judgment to evaluate, and presents numerous opportunities for misstatements to occur. Given the high degree of risk that misstatements could occur during the period-end financial reporting process, significant attention to this process is necessary in virtually all audits.

In auditing the period-end reporting process, auditors should assess the risk that the company's financial statement disclosures include material misstatements or omit material information. That assessment allows the auditor to determine an appropriate audit response.

Inspectors observed several instances in which auditors had not focused adequately on the period-end financial reporting process and had not identified and tested sufficient controls over financial statement presentation and disclosure. Although auditors usually identified and tested some controls over financial statement presentation and disclosure, this testing, in some cases, was insufficient because it did not include consideration of the company's underlying process for generating the financial statement disclosure information. As a result, these auditors could not demonstrate that they sufficiently understood the company's process for assembling financial statement disclosure information and ensuring that no material omissions occurred, that they had adequately assessed the risks associated with that process, or that they had evaluated whether the information underlying the company's financial statement disclosures was complete and accurate.

## **Evaluating Control Deficiencies and Implementing the Definition of Material Weakness**

The objective of an audit of internal control is to obtain reasonable assurance as to whether any material weaknesses exist.<sup>15</sup> An important corollary to this

---

<sup>14</sup> See Auditing Standard No. 2, paragraph 78

<sup>15</sup> See Auditing Standard No. 2, paragraph 4. Auditing Standard No. 2 does not require the auditor to plan the audit to detect significant deficiencies. Paragraph 27 of Auditing Standard No. 2 states, in part, "Thus, the audit is not designed to detect deficiencies in internal control over financial reporting that, individually or in the aggregate, are less severe than a material weakness."

fundamental principle is that the standard does not require auditors to search for deficiencies other than material weaknesses. Further, the standard does not re-define materiality for the purposes of auditing internal control. Rather, the standard provides that the same conceptual definition of materiality that applies under the federal securities laws to financial reporting applies to information on internal control.<sup>16</sup> This means that the auditor should plan and perform the audit of internal control using the same materiality measures as the auditor uses to plan and perform the annual audit of the financial statements.

When auditors do identify control deficiencies in the course of the audit, however, the standard requires them to evaluate whether those deficiencies are significant deficiencies or material weaknesses.<sup>17</sup> The definitions of deficiency, significant deficiency, and material weakness in Auditing Standard No. 2<sup>18</sup> focus on the likelihood and magnitude of potential misstatements in the financial statements to classify deficiencies in order of increasing severity. Anecdotal claims have suggested that some auditors applied a more stringent threshold to the evaluation of control deficiencies than the definitions in Auditing Standard No. 2 require. In addition, mechanical reliance on standardized tools appears to have contributed to unnecessary work in this area.

### ***More Than Remote Likelihood***

In defining the terms “significant deficiency” and “material weakness” in Auditing Standard No. 2, the Board used terms defined in Financial Accounting Standards Board’s Statement No. 5, *Accounting for Contingencies* (“FAS No. 5”). The Board chose to use terms with which auditors were already familiar in order to promote consistency in the evaluation of deficiencies.<sup>19</sup> FAS No. 5 describes the likelihood of a future event occurring as “probable,” “reasonably possible,” or “remote.” The definitions in Auditing Standard No. 2 refer to a “more than remote” likelihood of a misstatement occurring. In accordance with FAS No. 5, the likelihood of an event is “more than remote” when it is either “reasonably possible” or “probable.” Therefore, the words “more than a remote likelihood” in the definitions of significant deficiency and material weakness mean “at least a reasonably possible likelihood.”<sup>20</sup> The definitions in the standard, based in part on these long-standing accounting terms, are designed to lead to a determination as to whether the deficiency would prevent a prudent official from concluding that he or she has reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles.<sup>21</sup>

Further, the terms “probable,” “reasonably possible,” and “remote,” should not be understood to provide for specific quantitative thresholds. Proper application of these terms involves a qualitative assessment of probability. Therefore,

---

<sup>16</sup> See Auditing Standard No. 2, paragraphs 22 and 23. The federal courts and the SEC have defined materiality for purposes of the federal securities laws. See, e.g., Staff Accounting Bulletin No. 99, *Materiality* (Aug. 12, 1999).

<sup>17</sup> See Auditing Standard No. 2, paragraph 130.

<sup>18</sup> See Auditing Standard No. 2, paragraphs 8 through 10.

<sup>19</sup> See Auditing Standard No. 2, paragraph E73.

<sup>20</sup> See Auditing Standard No. 2, note to paragraph 9.

<sup>21</sup> See Auditing Standard No. 2, paragraph 137. If the auditor determines that the deficiency would prevent prudent officials in the conduct of their own affairs from concluding that they have reasonable assurance, then the auditor should deem the deficiency to be at least a significant deficiency.

## 11,312 PCAOB Staff Qs & As and Other Implementation Guidance

the evaluation of whether a control deficiency presents a “more than remote” likelihood of misstatement can be made without quantifying the probability of occurrence as a specific percentage.

### ***Use of Judgment***

This evaluation requires an exercise of judgment, based on an assessment of what constitutes reasonable assurance under the circumstances, not on the mechanical application of a predetermined probability formula. Inspectors observed, however, that the quest for quantitative rules of thumb in the application of the definitions described above may have resulted in some auditors exercising less judgment than the standard requires in this area. Many engagement teams used a framework developed through the collective effort of nine firms for evaluating deficiencies. That framework uses terms such as “gross exposure,” “adjusted exposure,” and “upper limit deviation rate.” The statistical precision suggested by these terms may have driven auditors’ decision-making process unduly toward simplistic quantitative thresholds and away from the qualitative evaluation that may have been necessary in the circumstances.

This evaluation framework can result in decisions that are consistent with the provisions of Auditing Standard No. 2. Further, the use of the framework promoted consistency among different audit teams within and across firms. Nevertheless, the framework is not a substitute for the professional judgment that Auditing Standard No. 2 requires. Moreover, using this framework could, in some cases, lead auditors to spend more time evaluating the severity of a deficiency than otherwise would be necessary.

### ***Strong Indicators of a Material Weakness***

Auditing Standard No. 2 describes certain circumstances that should be regarded as at least significant deficiencies and as strong indicators of a material weakness in internal control.<sup>22</sup> The identification of one of these strong indicators is the beginning of the auditor’s evaluation process of whether a material weakness, in fact, exists. Such indicators require heightened scrutiny, but they are not automatically material weaknesses. The Board’s inspectors found that, in general, with respect to evaluating strong indicators—such as restatements of previously issued financial statements—auditors understood that the indicator required heightened scrutiny but was not irrefutable evidence of a material weakness.<sup>23</sup>

## **Conclusion**

While this report describes several opportunities for auditors to improve audit quality and efficiency, the Board remains confident that auditors will be able to perform more effective and efficient audits in future years, particularly

---

<sup>22</sup> See Auditing Standard No. 2, paragraph 140.

<sup>23</sup> That is, in the case of a restatement to correct an error, the restatement itself is not a control deficiency; rather, the restatement is an indicator of a control deficiency. When there has been a restatement, the auditor must evaluate the underlying facts and circumstances using professional judgment to identify the cause of the misstatement and to determine whether a material weakness exists.

It should be noted that, even if management and the auditor determine that a material weakness does not exist notwithstanding a restatement, under Auditing Standard No. 2 a significant deficiency does exist and must be reported to the audit committee. Significant deficiencies identified due to restatements of prior period financial statements may nevertheless be remediated relatively easily, if management and the audit committee determine that only minor changes are necessary to strengthen internal control.

as auditors gain experience and as challenges unique to the first year's implementation abate. A number of the matters discussed in this report have been the subject of an ongoing dialogue with the larger firms and have been communicated in public forums. Thus, while many of the inspectors' observations were expected, the inspections further focused the dialogue on steps that auditors can take to perform quality audits as efficiently as possible.

The Board intends to continue to monitor closely the implementation of the standard and, as always, will use its inspection authority to focus the firms on those aspects of their practice that impede them from performing audits as effectively and efficiently as possible. The Board also intends to continue, as needed, to issue interpretive guidance (either by the Board or through staff) concerning the application of Auditing Standard No. 2. The Board believes that the supplemental guidance provided in this report, in conjunction with the guidance issued on May 16, 2005, should result in significant improvement in the effectiveness and efficiency of audits of internal control going forward. Finally, the Board intends to continue to gather feedback—from investors, issuers, auditors, and others—on audits under Section 404.

**.02 PCAOB Release No. 2007-001, *Observations On Auditors' Implementation Of PCAOB Standards Relating To Auditors' Responsibilities With Respect To Fraud*, January 22, 2007**

This report focuses on aspects of the Board's interim auditing standards that address the auditor's responsibility with respect to fraud, principally AU § 316, *Consideration of Fraud in a Financial Statement Audit*.<sup>1</sup> The Board is not, in this report, changing or proposing to change any existing standard, nor is the report meant to provide a new interpretation of any aspect of existing standards. The Board has, however, identified certain observations, made in the course of Board inspections, that are sufficiently important or arise with sufficient frequency to warrant discussion in a public report, both for the purpose of generally focusing auditors on being diligent about these matters and for the purpose of providing information that audit committees may find useful in working with auditors.<sup>2</sup>

The auditor's responsibility with respect to the detection of a material misstatement caused by fraud is an important focus of the Board. The Board's standards state that the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, including misstatements caused by fraud.<sup>3</sup> Although any financial statement audit entails some risk that the auditor will not detect a material misstatement even when the audit has been conducted in accordance with the standards of the PCAOB,<sup>4</sup> the risk of nondetection is likely to be higher for misstatements caused by fraud than for misstatements caused by error, since fraud usually involves deliberate concealment and may involve collusion with third parties. The auditor should, therefore, assess risks and apply procedures directed specifically to the detection of a material, fraudulent misstatement of the financial statements.

Using observations from certain Board inspections as a focal point, this report discusses aspects of procedures relevant to an auditor's consideration of fraud.<sup>5</sup> The discussion is organized around the following topics:<sup>6</sup>

- Auditor's Overall Approach to the Detection of Financial Fraud
- Brainstorming Sessions and Fraud-Related Inquiries

---

<sup>1</sup> On April 16, 2003, the Board adopted certain pre-existing auditing standards as its interim auditing standards to be used on an initial, transitional basis. PCAOB Rule 3200T describes the auditing standards that the Board adopted and requires registered public accounting firms and their associated persons to comply with these auditing standards to the extent not superseded or amended by the Board. See [www.pcaobus.org/standards](http://www.pcaobus.org/standards).

<sup>2</sup> The inspection observations described in this report reflect information reported to the Board by its inspection staff and do not reflect or constitute any determinations by the Board as to whether any firms or persons have engaged in any conduct for which the Board could sanction them through the Board's disciplinary process.

<sup>3</sup> See paragraph 01 of AU § 316, *Consideration of Fraud in a Financial Statement Audit*.

<sup>4</sup> See AU § 316.12

<sup>5</sup> Information received or prepared by the Board in connection with any inspection of a registered public accounting firm is subject to certain confidentiality restrictions set out in Sections 104(g)(2) and 105(b)(5) of the Act. Under the Board's Rule 4010, the Board may publish summaries, compilations, or general reports concerning the results of its various inspections, provided that no such published report may identify the firm or firms to which any quality control criticisms in the report relate.

<sup>6</sup> This report's focus on certain topics should not be understood to suggest any relatively lesser degree of importance of topics that are not addressed. Topics are included in this report because of the nature and frequency of deficiencies that Board inspectors have observed concerning these points in certain of their inspections.

- Auditor's Response to Fraud Risk Factors
- Financial Statement Misstatements
- Risk of Management Override of Controls
- Other Areas to Improve Fraud Detection

## Auditor's Overall Approach to the Detection of Financial Fraud

The auditor is to make various judgments about the nature, timing, and extent of tests to perform to address specifically identified risks of material misstatement due to fraud.<sup>7</sup>

PCAOB inspection teams have observed, however, that auditors often document their consideration of fraud merely by checking off items on standard audit programs and checklists. PCAOB standards require additional documentation evidencing the actual performance of certain of the procedures outlined in those programs and checklists.<sup>8</sup>

In addition, in audits performed by multi-person audit engagement teams, the lack of such additional documentation makes it difficult for senior members of the audit team to supervise engagement team members properly and to review the procedures performed with respect to the consideration of fraud. In certain instances involving such engagement teams, PCAOB inspection teams have observed that engagement teams' documentation did not contain any such additional evidence of the actual performance of the procedures, suggesting that there may not be sufficient involvement of senior members in supervising and reviewing the engagement team's application of the provisions of AU § 316.

In addition, PCAOB inspection teams have, in some cases, observed that auditors failed to expand audit procedures when addressing identified fraud risk factors. In those cases, it appeared that auditors might be performing the procedures required in AU § 316 mechanically, without using those procedures to develop insights on the risk of fraud or with a view toward identifying ways to modify the audit plan in order to address the risk. If used properly, firm programs and checklists can be useful tools for achieving the objectives of AU § 316. Mechanical implementation of the standard is unlikely to be very effective in detecting fraud.

## Brainstorming Sessions and Fraud-Related Inquiries

The auditor's planning should include consideration of how the issuer's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how the issuer's assets could be misappropriated.<sup>9</sup> In audits involving multi-person audit teams, the audit team should hold what the standard refers to as a "brainstorming session" to discuss those issues. This discussion allows the audit team to be alerted to how fraud might be perpetrated and concealed based on the general and client-specific knowledge of key members of the audit team and the expertise of the more experienced members of the team. This brainstorming session also reinforces the concept that the

<sup>8</sup> See AU § 316.83 and paragraph 6 of PCAOB Auditing Standard No. 3, *Audit Documentation*.

<sup>9</sup> See AU § 316.14.

## 11,316 PCAOB Staff Qs & As and Other Implementation Guidance

detection of a material misstatement in the financial statements caused by fraud is an essential element of an audit.

During this stage of planning the audit, AU § 316.15 states the auditor should set “aside any prior beliefs the audit team members may have that management is honest and has integrity.” The emphasis at this stage is on the issuer’s vulnerability to fraud, if management and employees were inclined to perpetrate it,<sup>10</sup> and not solely on the likelihood that fraud has occurred. To be most effective, this stage of planning the audit, including an audit team’s brainstorming discussion, should occur during the early stages of audit planning so that auditors can consider the issuer’s vulnerability to fraud when developing an overall strategy for the expected scope and conduct of the audit. To most effectively identify fraud risk factors, an audit team’s brainstorming session should involve key members of the audit team, including, for example, information technology (“IT”), tax, and other specialists, when they are key members of the audit engagement team.<sup>11</sup>

Despite the importance of this planning stage to an effective audit, PCAOB inspection teams have noted instances of failures to comply with this aspect of the standard. In particular, PCAOB inspectors have (1) identified audits in which the audit team was unable to demonstrate that brainstorming sessions were held; (2) identified audits in which the audit teams’ brainstorming sessions occurred after planning and after substantive fieldwork had begun; and (3) identified audits in which key members of the audit team did not attend the brainstorming sessions.

To appropriately discharge the auditor’s responsibility with respect to the detection of a material misstatement caused by fraud, the auditor should make inquiries of the audit committee, management, and others about their knowledge of alleged or suspected fraud and fraud risks within the organization.<sup>12</sup> In some engagements, however, inspection teams have found no evidence in the audit documentation that the auditor made required inquiries of the audit committee, management, or others about their knowledge of fraud and fraud risks.

### Auditor’s Response to Fraud Risk Factors

Auditors respond to the assessment of the risks of material misstatement due to fraud by using a combination of overall and specific responses.<sup>13</sup> The auditor should evaluate whether the fraud risk assessment can be linked to individual accounts or classes of transactions and related assertions.<sup>14</sup> Linking in this manner assists the auditor in designing the appropriate audit procedures.<sup>15</sup> An overall response involves a general consideration of how the audit is to be conducted and involves procedures such as modifying the assignment of personnel and the extent of supervision and incorporating an element of unpredictability into the selection of auditing procedures to be performed.<sup>16</sup> For specifically identified risks of material misstatement due to fraud, such as

---

<sup>10</sup> See AU § 316.15

<sup>11</sup> See AU § 316.17

<sup>12</sup> See AU §§ 316.20–27.

<sup>13</sup> See AU § 316.48.

<sup>14</sup> See AU § 316.38

<sup>15</sup> Ibid

<sup>16</sup> See AU § 316.50

significant related-party transactions not in the ordinary course of business, the auditor generally responds by changing the nature, timing, and/or extent of auditing procedures.<sup>17</sup>

PCAOB inspection teams have observed instances of auditors failing to respond appropriately to identified fraud risk factors. Inspection teams also observed instances in which auditors examined transactions warranting further fraud risk consideration, but for which there was no evidence that the auditors had considered any associated fraud risk factors.

## Financial Statement Misstatements

When the auditor's procedures identify misstatements in the financial statements, the auditor should document the nature and effect of the misstatements<sup>18</sup> and consider whether the misstatements might be indicative of fraud.<sup>19</sup> The auditor's evaluation of misstatements may influence the auditor's conclusion about the materiality of those misstatements.<sup>20</sup> Qualitative considerations related to indications of fraud may mean that misstatements of relatively small amounts are material.<sup>21</sup> Although intent might be difficult to ascertain, that difficulty does not relieve the auditor of the responsibility to consider whether misstatements might be indicative of fraud.<sup>22</sup> In addition, the auditor's ongoing assessment of the risk of material misstatement due to fraud should take into account, among other things, any last-minute adjustments significantly affecting financial results.<sup>23</sup>

PCAOB inspectors noted instances in which auditors failed to properly calculate planning materiality and/or the threshold for posting proposed audit adjustments to a summary schedule. As a result, certain uncorrected misstatements were not evaluated, or were not evaluated appropriately, both individually and in the aggregate, with other misstatements because the summary schedule was incomplete. The inspection teams also observed that some auditors did not fulfill their responsibility to investigate identified departures from generally accepted accounting principles to determine whether such departures were indicative of fraud.

In addition, PCAOB inspectors noted instances in which auditors did not post all proposed audit adjustments in excess of the posting threshold to the summary schedule, thus rendering the summary incomplete. Inspectors also noted instances in which auditors had netted the effects of known misstatements that individually met the posting threshold. The net effect of those particular misstatements was lower than the posting threshold for the summary of unadjusted differences. As a result, those misstatements were improperly excluded from the evaluation of potential misstatements. Furthermore, inspection teams observed that some auditors did not adequately scrutinize late adjustments, significantly affecting financial results, that were proposed by management and that partially or completely offset adjustments previously proposed by the auditors.

<sup>19</sup> See AU § 316.75

<sup>20</sup> Ibid.

<sup>21</sup> See AU §§ 316.74–.75

<sup>22</sup> See AU §§ 316.05–.12.

<sup>23</sup> See AU § 316.68

## Risk of Management Override of Controls

AU § 316.08 recognizes that “[m]anagement has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and to present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.” To address the risk of management override of controls, AU § 316 requires an auditor to perform certain procedures, such as the examination of journal entries and other adjustments for evidence of possible material misstatements due to fraud<sup>24</sup> and the review of accounting estimates for biases that similarly could result in material misstatements due to fraud.<sup>25</sup>

PCAOB inspection teams noted instances in which it did not appear that the auditor had performed adequate procedures with respect to evaluating the risk of management override of controls. More specifically, in some instances it did not appear that the auditor had appropriately addressed the risk of management override of controls with respect to journal entries and accounting estimates.

### *Journal Entries*

Management has often used journal entries to perpetrate or conceal fraudulent financial reporting by recording inappropriate or unauthorized amounts in the accounting records, including computer records, or by making adjustments directly to draft financial statements in post-closing or consolidating entries. Accordingly, auditors should understand the company’s financial reporting process and the controls over journal entries and evaluate these areas.<sup>26</sup>

To identify, select, and test specific entries and other adjustments and to determine the appropriate method of examining the underlying support for these entries, auditors should consider several important issues, for example:

- Fraud risk factors that might help identify specific classes of journal entries for testing, such as entries made by unauthorized personnel or personnel who do not ordinarily enter journal entries, or entries that lack detailed explanations or other supporting documentation,
- The characteristics of fraudulent entries, including entries made at unusual times, such as nights, weekends, or holidays, and entries made to intercompany or suspense accounts, and
- Nonstandard journal entries that might not be subjected to the same level of internal control as recurring journal entries, for instance, entries at the close of quarterly and annual reporting periods and those that are part of the post-closing process.<sup>27</sup>

PCAOB inspection teams identified certain audit engagements in which auditors performed tests of journal entries, but failed to demonstrate that they had appropriately assessed the completeness and integrity of the population of journal entries obtained from the issuer. The inspection teams also noted instances in which there was no evidence in the audit documentation, and no

---

<sup>24</sup> See AU § 316.58.

<sup>25</sup> See AU § 316.63.

<sup>26</sup> See AU § 316.58a

<sup>27</sup> See AU § 316.61.

persuasive other evidence, that an appropriate examination and evaluation of journal entries was performed. In addition, inspection teams noted the exclusion of journal entries with lower dollar amounts from the examination. Setting the scope in such a manner fails to appropriately address the risk of fraud occurring as a result of the frequent use of low-dollar entries.

In reviewing journal entries, auditors should obtain an understanding of the financial reporting process related to the initiation, recording, and processing of journal entries;<sup>28</sup> the procedures used to record recurring and nonrecurring adjustments; and the controls over journal entries and similar adjustments. Auditors might need to use IT specialists and computer-assisted audit techniques to assist them in this process to ensure the integrity and completeness of the population of journal entries and to assist in the selection of journal entries for testing.<sup>29</sup>

### **Accounting Estimates**

Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates.<sup>30</sup> Financial frauds have been committed by management intentionally biasing assumptions and judgments used to estimate account balances. In certain cases, management also has used significant or unusual accounting estimates to intentionally distort results of operations by, for example, failing to recognize losses due to the impairment of assets or intentionally overstating estimates in one period so that the estimates can be reversed in future periods to manage earnings in those periods. Such accounting estimates include allowances for bad debts, accruals for merger-related expenses in connection with business combinations, and so-called restructuring reserves.

Auditors, in complying with AU § 316, should consider the possibility of management bias in developing estimates by considering whether the differences between the estimates best supported by the audit evidence and the estimates included in the financial statements indicate a possible management bias.<sup>31</sup> For example, if each individual accounting estimate included in the financial statements was reasonable and, at the same time, the effect of the difference between each management estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole.<sup>32</sup> Moreover, auditors should perform a retrospective review of significant accounting estimates reflected in the prior year's financial statements to determine whether management's judgments and assumptions relating to estimates indicate a possible bias on the part of management.<sup>33</sup> If the auditor identifies a possible bias, he or she should evaluate whether the circumstances producing such a bias represent a risk of material misstatement due to fraud.<sup>34</sup>

PCAOB inspection teams observed that some auditors have failed to test, or failed to document their testing of, management's assumptions and other aspects of issuers' accounting estimates. The inspection teams also noted that

---

<sup>28</sup> See AU §§ 316.58–.59 and .61.

<sup>29</sup> See AU § 316.61.

<sup>30</sup> See AU § 316.63.

<sup>31</sup> *Ibid.*

<sup>32</sup> See AU § 312.36.

<sup>33</sup> See AU § 316.64.

<sup>34</sup> See AU § 316.65.

some auditors failed to assess, or failed to include in their audit documentation evidence that they had assessed, whether the overstatement or understatement of accounting estimates indicated a bias in management's estimates that could result in material misstatements due to fraud.

## Other Areas to Improve Fraud Detection

Improvement in auditors' performance in the areas described below also may better position auditors to detect possible misstatements due to fraud.<sup>35</sup>

### **Analytical Procedures**

Although analytical procedures alone are not well-suited for detecting fraud,<sup>36</sup> they can be an effective diagnostic tool, depending on the reliability of the data used to develop the expected results. For example, auditors can use analytical procedures on information that management is less able or less likely to manipulate, such as operating statistics maintained by operating personnel or audited information.

PCAOB inspection teams have noted numerous deficiencies in auditors' performance of analytical procedures that were intended to be substantive analytical procedures. These deficiencies include the failure to test the underlying data used in the analytical procedures as well as the failure to disaggregate the data in order to improve the precision of the analytical procedures when such disaggregation was appropriate. In addition, inspection teams noted that, when the analytical procedures were intended to be substantive tests, some auditors failed to establish expectations, establish thresholds for identifying significant differences, or investigate differences from the expectations that were greater than the established thresholds. Moreover, some auditors failed to obtain corroboration of management's explanations for differences in excess of the established thresholds.

### **Confirmation Process**

AU § 316.41 states that auditors ordinarily should presume that revenue recognition is a fraud risk, thus requiring the auditor to respond with appropriate audit procedures. Numerous financial frauds have been perpetrated by management through premature or fictitious revenue recognition schemes.

The recognition of fictitious revenue often results in complementary false and uncollectible receivables. Historically, one of the most widely used substantive tests for determining the existence of receivables and similar assets and, perhaps, for detecting revenue-related fraud as a result, has been direct communication by the auditor with the issuer's customers and others. That audit procedure is based on the premise that audit evidence obtained from third parties will provide the auditor with higher quality audit evidence than is typically available from within the entity.<sup>37</sup>

---

<sup>35</sup> Each of the areas described in this section has significant relevance to aspects of an audit other than an auditor's responsibilities with respect to fraud. The discussion of any inspection observations in this section should not be understood to mean that any observed deficiencies in these areas have been addressed with the particular firm specifically in relation to detection of fraud. These matters are included in this report because appropriate attention to these areas may play a role in helping the auditor detect material misstatements caused by fraud.

<sup>36</sup> See paragraph .09 of AU § 329, *Analytical Procedures*, as amended by the *Conforming Amendments to PCAOB Interim Standards Resulting From the Adoption of PCAOB Auditing Standard No. 2, "An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements"*

<sup>37</sup> See paragraph 34 of AU § 330, *The Confirmation Process*

PCAOB auditing standards permit the use of either positive or negative confirmation requests.<sup>38</sup> With positive confirmation requests, audit evidence is obtained when the auditor receives completed confirmations from the issuer's customers or other intended recipients<sup>39</sup> or, in the absence of such responses, when the auditor performs alternative procedures, such as the examination of shipping documents and cash receipts.<sup>40</sup> (Recipients of negative confirmations are requested to respond only if they disagree with the stated information.) The interim auditing standards caution auditors to use negative confirmations only when certain conditions are present, one of which is that the combined assessed level of inherent and control risk is low.<sup>41</sup> When auditors do not request confirmation of accounts receivable or do not receive responses to positive confirmation requests, they should apply alternative procedures to obtain the evidence necessary to reduce audit risk to an acceptably low level.

PCAOB inspection teams have identified instances in which auditors who had not requested confirmations of account balances or had not received responses to positive confirmation requests either failed to obtain, or failed to include evidence in their audit documentation that they had obtained, sufficient other evidence regarding the existence of accounts receivable balances.

### ***Roll-Forward of Interim Substantive Testing***

Auditors usually perform some of their audit work as of an interim date. Interim audit procedures may include confirmation of accounts receivable and observation of physical inventories. PCAOB auditing standards allow auditors to apply substantive tests to the details of asset or liability accounts as of an interim date if additional substantive tests can be designed to cover the remaining period to provide a reasonable basis for extending the audit conclusions at the interim date to the balance sheet date.<sup>42</sup>

Interim audit work creates a somewhat higher risk that the auditor will not detect fraud because management may record fraudulent transactions in this roll-forward period, believing that the auditors will be less likely to detect them. The auditing standards caution auditors that such interim audit procedures potentially increase the risk that misstatements that exist at the balance sheet date will not be detected by the auditor. Furthermore, audit risk tends to increase as the period from the interim date to the balance-sheet date is lengthened.<sup>43</sup>

Therefore, in determining audit procedures to be performed from the interim date to the balance-sheet date, auditors should consider the following factors: the length of the period between the interim and balance-sheet dates; any changes in controls; the nature and volume of transactions during this period; the comparability of the items comprising the account balance at the interim and balance-sheet dates; and any misstatements detected as a result of the interim procedures.<sup>44</sup>

PCAOB inspection teams have observed that some auditors failed to perform, or failed to include evidence in their audit documentation that they had

---

<sup>38</sup> See AU § 330.17.

<sup>39</sup> See AU § 330.18.

<sup>40</sup> See AU §§ 330.31–.32.

<sup>41</sup> See AU § 330.20.

<sup>42</sup> See paragraph .03 of AU § 313, *Substantive Tests Prior to the Balance Sheet Date*.

<sup>43</sup> Ibid.

<sup>44</sup> See AU §§ 313.04–.07.

performed, adequate substantive roll-forward procedures to cover the activity from the interim date to the balance sheet date.

### ***Review of Interim Financial Information***

Financial frauds, including revenue and expense recognition schemes, often originate with the manipulation of quarterly earnings. The SEC requires the auditor to review the issuer's interim financial information before the company files its quarterly report on Form 10-Q or Form 10-QSB with the SEC for each of the first three quarters of the company's fiscal year. In addition, certain issuers, pursuant to item 302(a) of Regulation S-K, are required to include selected quarterly financial data in their annual (and certain other) filings with the SEC. Thus, a review of a company's interim financial information is required for the fourth quarter for those issuers, even though the company does not file a report on Form 10-Q or Form 10-QSB for that quarter. PCAOB inspection teams observed, in some instances, that auditors had failed to perform, or failed to include evidence in their audit documentation that they had performed, sufficient procedures with respect to the review of fourth-quarter financial information for those issuers that were required to disclose selected quarterly financial data.

\* \* \*

The particular inspection observations described in this report gave rise to quality control concerns that were communicated to the firms at which the deficiencies were identified. By law, those quality control criticisms are not made public with respect to any particular firm if the firm addresses the criticism to the Board's satisfaction within 12 months after the issuance of the inspection report on the firm.<sup>45</sup> No later than the conclusion of this 12-month period, a firm that seeks to keep such criticisms nonpublic must provide the Board with explanation and evidence, which the Board evaluates, concerning how the firm has addressed the criticisms.<sup>46</sup> To date, the Board's initial experience with the remediation process has been very positive;<sup>47</sup> the Board will continue to monitor the firms' progress in this important area.

## Section 400

### *Staff Audit Practice Alerts*

#### **.01 Staff Audit Practice Alert No. 1, Matters Related to Timing and Accounting for Option Grants, July 28, 2006**

Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Recent reports and disclosures about issuer practices related to the granting of stock options, including the “backdating” of such grants, indicate that some issuers’ actual practices in granting options might not have been consistent with the manner in which these transactions were initially recorded and disclosed. Some issuers have announced restatements of previously issued financial statements as a result of these practices. In addition, some of these practices could result in legal and other contingencies that may require recognition of additional expense or disclosure in financial statements.

This practice alert advises auditors that these practices may have implications for audits of financial statements or of internal control over financial reporting (“ICFR”) and discusses factors that may be relevant in assessing the risks related to these matters.

### **Background**

The recorded value of a stock option depends, in part, on the market price of the underlying stock on the date that the option is granted and the exercise price specified in the option. Some issuers may have granted options with exercise prices that are less than the market price of the underlying stock on the date of grant. These options are sometimes referred to as “discounted” or “in-the-money” options. Where discounted options were granted and an issuer failed to properly consider this condition in its original accounting for the option, errors in recording compensation cost, among other effects, may have resulted. These errors may cause an issuer’s financial statements, including related disclosures, to be materially misstated.<sup>1</sup>

While this alert does not attempt to describe all of the variations in circumstances that may result in the issuance of discounted options, a range of practices appears to be involved, including—

---

<sup>1</sup> In addition, academic research has suggested the possibility that some issuers may have purposefully granted options immediately before the release of information that the issuer believed would be favorable to its share price. While these practices may not result in the granting of discounted options, they may create legal or reputational risks and raise concerns about the issuer’s control environment.

- The application of provisions in option plans that allow for:
  - the selection of exercise prices based on market prices on dates earlier than the grant date, or
  - the award of options that allow the option holder to obtain an exercise price equal to the lower of the market price of the stock at the grant date or during a specified period of time subsequent to the grant date.
- Preparation, or subsequent modification, of option documentation for purposes of indicating a lower exercise price than the market price at the actual grant date.
- Treating a date as the grant date when, in fact, all of the prerequisites to a grant had not yet occurred.

Available information suggests that the incidence of these and similar practices may have substantially decreased after the implementation of the shortened filing deadline for reports of option grants specified by Section 403 of the Sarbanes-Oxley Act of 2002. In August 2002, the Securities and Exchange Commission (“SEC”) implemented this requirement by requiring the reporting of an option grant on Form 4 within two days of the date of grant. However, periods subsequent to the grant of an option may also be affected by improper accounting for a grant because option cost is generally expensed over the period during which the issuer receives the related services, most commonly its vesting period.

## Matters for Auditor Consideration

Auditors planning or performing an audit should be alert to the risk that the issuer may not have properly accounted for stock option grants and, as a result, may have materially misstated its financial statements or may have deficiencies in its ICFR. For audits currently underway or to be performed in the future, the auditor should acquire sufficient information to allow him or her to assess the nature and potential magnitude of these risks. An auditor must use professional judgment in making these assessments and in determining whether to apply additional procedures in response.

In making these judgments, auditors should be mindful of the following—

*Applicable financial accounting standards.* Financial Accounting Standards Board Statement of Financial Accounting Standards (“SFAS”) No. 123 R (revised 2004), *Share-Based Payment*, applies to issuer reporting periods beginning after June 15, 2005 (December 15, 2005 for small business issuers). Accounting for options was, however, previously governed by other accounting standards and related interpretations, specifically Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and SFAS No. 123, *Accounting for Stock-Based Compensation*. If an auditor determines that it is necessary to consider the accounting for option grants and related disclosures in financial statements of a prior period, the auditor should take care to determine the applicable generally accepted accounting principles in effect in those periods and to consider the specific risks associated with these principles.

- *Accounting for discounted options.* For periods in which an issuer used the provisions of APB 25 to determine compensation cost related to stock

options, the issuer may have been required to record additional compensation cost equal to the difference in the exercise price and the market price at the measurement date (as defined in APB 25). In periods in which the issuer has recorded option compensation cost using the fair value method as allowed by SFAS No. 123, or as required by SFAS No. 123 R (revised 2004), the impact on the calculated fair value of options of using an incorrect date as the grant date would depend on the nature and magnitude of changes in conditions that affect option valuation between the incorrect date used and the actual grant date. In all cases, the compensation cost of options should be recognized over the period benefited by the services of the option holder.

- *Accounting for variable plans.* For periods in which an issuer used the provisions of APB 25 to determine compensation cost related to stock options, an option with terms allowing a modification of the exercise price, or whose exercise price was modified subsequent to the grant date may require variable plan accounting. Variable option accounting requires that compensation cost be recorded from period to period based on the variation in current market prices. In periods in which the issuer records option compensation cost using the fair value method as allowed by SFAS No. 123, or as required by SFAS No. 123 R, the right to a lower exercise price may constitute an additional component of value of the option that should be considered at the grant date. In all cases, the cost of options should be recognized over the period benefited by the services of the option holder.
- *Accounting for contingencies.* If the consequences of the issuer's practices for stock option grants or its accounting for, and disclosure of, option grants result in legal or other contingencies, the application of SFAS No. 5, *Accounting for Contingencies*, may require that the issuer record additional cost or make additional disclosures in financial statements.
- *Accounting for tax effects.* The grant of discounted stock options may affect the issuer's ability to deduct expenses related to these options for income tax purposes, thereby affecting the issuer's cash flows and the accuracy of the related accounting for the tax effects of options.

*Consideration of materiality.* In evaluating materiality, auditors should remember that paragraph .11 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, and SEC Staff Accounting Bulletin: No. 99—*Materiality* emphasize that both quantitative and qualitative considerations must be assessed. Quantitatively small misstatements may be material when they relate to unlawful acts or to actions by an issuer that could lead to a material contingent liability. In all cases, auditors should evaluate the adequacy of related issuer disclosures.

*Possible illegal acts.* Auditors who become aware that an illegal act may have occurred must comply with the applicable requirements of AU section ("AU sec.") 317, *Illegal Acts*, and Section 10A of the Securities Exchange Act of 1934. Section 10A, among other things, requires a registered public accounting firm to take certain actions if it "detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements of the issuer) has or may have occurred . . ." If it is likely that an illegal act has occurred, the registered public accounting firm must "determine and consider the possible

effect of the illegal act on the financial statements of the issuer, including any contingent monetary effects, such as fines, penalties, and damages.” The registered public accounting firm must also inform the appropriate level of management and assure that the audit committee is adequately informed “unless the illegal act is clearly inconsequential.” The auditor may, depending on the circumstances, also need to take additional steps required under Section 10A if the issuer does not take timely and appropriate remedial actions with respect to the illegal act.

## **A. Effects of options-related matters on planned or ongoing audits**

In planning and performing an audit of financial statements and ICFR, the auditor should assess the nature and potential magnitude of risks associated with the granting of stock options and perform procedures to appropriately address those risks. The following factors are relevant to accomplishing these objectives—

- Assessment of the potential magnitude of risks of misstatement of financial statements and deficiencies in ICFR related to option granting practices. This assessment should include consideration of possible indicators of risk related to option grants, including, where appropriate:
  - The status and results of any investigations relating to the timing of options grants conducted by the issuer or by regulatory or legal authorities.
  - The results of direct inquiries of members of the issuer’s management and its board of directors that should have knowledge of matters related to the granting and accounting for stock options.
  - Public information related to the timing of options grants by the issuer.
  - The terms and conditions of plans or policies under which options are granted; in particular, terms that allow exercise prices that are not equal to the market price on the date of grant or that delegate authority for option grants to management. In these situations, auditors should also consider whether issuers have other policies that adequately control the related risks.
  - Patterns of transactions or conditions that may indicate higher levels of inherent risk in the period under audit. Such patterns or conditions may include levels of option grants that are very high in relation to shares outstanding, situations in which option-based compensation is a large component of executive compensation, highly variable grant dates, patterns of significant increases in stock prices following option grants, or high levels of stock-price volatility.
- In planning and performing audits, auditors should appropriately address the assessed level of risk, if any, related to option granting practices. Specifically:
  - In addition to the general planning considerations for financial statement audits identified in AU sec. 311, *Planning and Supervision*, the auditor should consider:
    - The implications of any identified or indicated fraudulent or illegal acts related to option grants to assessed risks of fraud (AU sec. 312.07 and AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*); the potential for

illegal acts (AU sec. 317, *Illegal Acts by Clients*); or the assessment of an issuer's internal controls (AU sec. 319, *Internal Control in a Financial Statement Audit*).

- The scope of procedures applied to assess the potential for fraud (AU sec. 316) and illegal acts (AU sec. 317).
- The nature, timing, and extent of audit procedures applied to elements of the financial statements affected by the issuance of options. In particular, this assessment should include consideration of:
  - The need for specific management representations related to these matters (AU sec. 333, *Management Representations*) and the nature of matters included in inquiries of lawyers (AU sec. 337, *Inquiry of a Client's Lawyer*).
  - Where applicable, the result of tests of internal controls over the granting, recording, and reporting of option grants.
  - The need, based on the auditor's risk assessment, for additional specific auditing procedures related to the granting of stock options.

For integrated audits performed as described in PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements* ("AS No. 2"), the auditor should consider the implications of identified or potential accounting and legal risks related to options in planning, performing, and reporting on audits of ICFR. In addition, as discussed in paragraphs 145–158 of AS No. 2, the results of the audit of ICFR should be considered in connection with the related financial statement audit.

## **B. Auditor involvement in registration statements**

In cases where an auditor is requested to consent to the inclusion of his or her report, including a report on ICFR, in a registration statement under the Securities Act of 1933, AU sec. 711, *Filings Under Federal Securities Statutes*, provides that the auditor should perform certain procedures prior to issuing such a consent.<sup>2</sup>

- Paragraph .10 of AU sec. 711 provides that an auditor should perform certain procedures with respect to events subsequent to the date of the audit opinion up to the effective date of the registration statement (or as close thereto as is reasonable and practical under the circumstances). These procedures include inquiry of responsible officials and employees of the issuer and obtaining written representations from them about whether events have occurred subsequent to the date of the auditor's report that have a material effect on the financial statements or that should be disclosed in order to keep the financial statements from being misleading. The auditor should consider performing inquiries and obtaining representations specifically related to the granting and recording of option grants.
- Paragraph .11 of AU sec. 711 provides that a predecessor auditor that has been requested to consent to the inclusion of his or her report on prior-period financial statements in a registration statement should

---

<sup>2</sup> Under Paragraph 198 of AS No. 2, the auditor should apply AU sec. 711 when the auditor's report on management's assessment of ICFR is included in filings under federal securities statutes.

obtain written representations from the successor auditor regarding whether the successor auditor's audit and procedures with respect to subsequent events revealed any matters that might have a material effect on the financial statements reported on by the predecessor auditor or that would require disclosure in the notes to those financial statements. If the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should apply paragraphs .21 and .22 of AU sec. 315.<sup>3</sup>

- If either the successor or predecessor auditor discovers subsequent events that require adjustment or disclosure in the financial statements or becomes aware of facts that may have existed at the date of his or her report and might have affected the report had he or she been aware of them, the auditor should take the actions described in Paragraph .12 of AU sec. 711. In addition, where the auditor concludes that unaudited financial statements or unaudited interim financial information presented, or incorporated by reference, in a registration statement are not in conformity with generally accepted accounting principles, he or she should take the actions described in Paragraph .13 of AU sec. 711.

### **C. Effects of option-related matters on previously issued opinions**

If an auditor becomes aware of information that relates to financial statements previously reported on by the auditor, but which was not known to him or her at the date of the report, and which is of such a nature and from such a source that he or she would have investigated it had it come to his or her attention during the course of the audit, he or she should take the actions described in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

## **Contact Information**

Inquiries concerning this Practice Alert may be directed to—

Phil D. Wedemeyer, Director, Office of Research and Analysis, 202-207-9204, [wedemeyerp@pcaobus.org](mailto:wedemeyerp@pcaobus.org)

## Section 100

# ***Trust Services Principles, Criteria, and Illustrations for Security, Availability, Processing Integrity, Confidentiality, and Privacy (Including WebTrust® and SysTrust®)***

Supersedes the 2003 version of the Suitable Trust Services Criteria and Illustrations.

May 2006

### **NOTICE TO READERS**

The Trust Services Principles, Criteria, and Illustrations present criteria established by the Assurance Services Executive Committee of the AICPA for use by practitioners when providing attestation services on systems in the subject matters of security, availability, processing integrity, confidentiality, privacy, and certification authorities. The Assurance Services Executive Committee, in establishing and developing these criteria, followed due process procedures, including exposure of the proposed criteria for public comment. The Assurance Services Executive Committee has been designated as a senior committee and has been given authority to make public statements and publish measurement criteria without clearance from Council or the Board of Directors under Bylaw section 3.6 (AICPA, *Professional Standards*, vol. 2, BL sec. 360).

## **Introduction**

**.01** This section provides guidance when providing assurance services, advisory services, or both on information technology (IT)-enabled systems including electronic commerce (e-commerce) systems. It is particularly relevant when providing services with respect to security, availability, processing integrity, confidentiality, and privacy.

**.02** The guidance provided in this section includes:

- Trust Services principles and criteria
- Examples of system descriptions required for these engagements
- Sample practitioner reports for Trust Services engagements

## **Trust Services**

**.03** Trust Services (including WebTrust® and SysTrust®) are defined as a set of professional assurance and advisory services based on a common framework (that is, a core set of principles and criteria) to address the risks and opportunities of IT. Trust Services principles and criteria are issued by the Assurance Services Executive Committee.

**Assurance Services**

.04 Assurance services are those that result in the expression of an opinion by the reporting practitioner; for example, the opinion as to whether a defined system meets the principles and criteria for systems reliability. Assurance services are developed within the framework of Chapter 1, “Attest Engagements,” of Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), as amended. Only certified public accountants (CPAs) may provide the assurance services of Trust Services that result in the expression of a Trust Services, WebTrust, or SysTrust opinion.

**Advisory Services**

.05 In the context of Trust Services, advisory services include strategic, diagnostic, implementation and sustaining/managing services using Trust Services principles and criteria. Practitioners providing such services follow Statement on Standards for Consulting Services (AICPA, *Professional Standards*, vol. 2, CS sec. 100). There is no expression of an opinion by the practitioner under these engagements.

**Principles, Criteria, and Illustrative Controls**

.06 The following material sets out broad statements of principles and identifies specific criteria that should be achieved to meet each principle. Trust Services principles are broad statements of objectives. Criteria are benchmarks used to measure and present the subject matter and against which the practitioner evaluates the subject matter. Suitable criteria are objective, measurable, complete, and relevant—they will yield information useful to intended users. It is the view of the Assurance Services Executive Committee that the Trust Services principles and supporting criteria meet the characteristics for suitable criteria. Trust Services principles are used to describe the overall objective; however, the practitioner’s opinion makes reference only to criteria.

.07 In the Trust Services Principles and Criteria, the criteria are supported by a list of illustrative controls. These illustrations are not intended to be all-inclusive and are presented as examples only. Actual controls in place at an entity may not be included in the list, and some of the listed controls may not be applicable to all systems and client circumstances. The practitioner should identify and assess the relevant controls the client has in place to satisfy the criteria. The choice and number of those controls would be based on the entity’s management style, philosophy, size, and industry. In order to receive an unqualified opinion on a Trust Services engagement, all criteria must be met unless the criterion is clearly not applicable. In the context of the Trust Services Principles and Criteria, the term *policies* is used to refer to written statements that communicate management’s intent, objectives, requirements, responsibilities, and/or standards for a particular subject. Such communications may be explicitly designated as policies, whereas others (such as communications with users not otherwise documented as policies, or written procedures) may be implicit. Policies may take many forms but should be in writing.

**Consistency With Applicable Laws and Regulations, Defined Commitments, Service-Level Agreements, and Other Contracts**

.08 Several of the principles and criteria refer to “consistency with applicable laws and regulations, defined commitments, service-level agreements,

and other contracts.” Under normal circumstances, it would be beyond the scope of the engagement for the practitioner to undertake identification of *all* relevant “applicable laws and regulations, defined commitments, service-level agreements, and other contracts.” Furthermore, Trust Services engagements do not require the practitioner to provide assurance of an entity’s compliance with applicable laws and regulations, defined commitments, service-level agreements, and other contracts, but rather of the effectiveness of the entity’s controls over monitoring compliance with them. Reference should be made to other professional standards related to providing assurance over compliance with laws, regulations, and agreements.

## Foundation for Trust Services—Trust Services Principles and Criteria

.09 The Trust Services Principles and Criteria set forth herein are organized into four broad areas:

- a. *Policies.* The entity has defined and documented its policies<sup>1</sup> relevant to the particular principle.
- b. *Communications.* The entity has communicated its defined policies to authorized users.
- c. *Procedures.* The entity uses procedures to achieve its objectives in accordance with its defined policies.
- d. *Monitoring.* The entity monitors the system and takes action to maintain compliance with its defined policies.

.10 A two-column format has been used to present and discuss the criteria. The first column presents the criteria—the attributes that the entity must meet to be able to demonstrate that it has achieved the principle. The second column provides illustrative controls. These are examples of controls that the entity might have in place to conform to the criteria. Alternative and additional controls may also be appropriate. In addition, examples of system descriptions for both e-commerce and non-e-commerce systems are included in Appendix A [paragraph .42] and Appendix B [paragraph .43], respectively, and Appendix A [paragraph .42] also includes sample disclosures for e-commerce systems.

.11 The following principles and related criteria have been developed by the AICPA/CICA for use by practitioners in the performance of Trust Services engagements such as SysTrust and WebTrust.

- a. *Security.* The system<sup>2</sup> is protected against unauthorized access (both physical and logical).
- b. *Availability.* The system is available for operation and use as committed or agreed.

---

<sup>1</sup> As noted in paragraph .07, the term *policies* refers to written statements which communicate management’s intent, objectives, requirements, responsibilities, and/or standards for a particular subject. Some policies may be explicitly described as such, being contained in policy manuals or similarly labeled documents. However, some policies may be contained in documents without such explicit labeling, including for example, notices or reports to employees or outside parties.

<sup>2</sup> A *system* consists of five key components organized to achieve a specified objective. The five components are categorized as follows: (a) infrastructure (facilities, equipment, and networks), (b) software (systems, applications, and utilities), (c) people (developers, operators, users, and managers), (d) procedures (automated and manual), and (e) data (transaction streams, files, databases, and tables).

- c. *Processing integrity.* System processing is complete, accurate, timely, and authorized.
- d. *Confidentiality.* Information designated as confidential is protected as committed or agreed.
- e. *Privacy.* Personal information<sup>3</sup> is collected, used, retained, and disclosed in conformity with the commitments in the entity's privacy notice and with criteria set forth in Generally Accepted Privacy Principles issued by the AICPA/CICA (found in Appendix D [paragraph .45]).

## Trust Services—Offerings of SysTrust and WebTrust

.12 SysTrust and WebTrust are two specific services developed by the AICPA that are based on the Trust Services Principles and Criteria. The Trust Services Principles and Criteria may, however, be used to offer services other than SysTrust and WebTrust.

.13 When a practitioner intends to provide assurance from SysTrust or WebTrust engagements, he or she needs to also follow the performance and reporting standards set forth in Chapter 1, “Attest Engagements,” of SSAE No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), as amended. In order to issue SysTrust or WebTrust reports, CPA firms must be licensed by the AICPA.

## Principles and Criteria

.14 The Trust Services Principles and Criteria are presented in a two-column format. The first column identifies the criteria for each principle—the attributes that the entity must meet to be able to demonstrate that it has achieved the principle. The second column provides illustrative controls. These are examples of controls that the entity might have in place to meet the criteria. Alternative and/or additional controls can also be used. Illustrative controls are presented as examples only. It is the practitioner's responsibility to identify and document the policies, procedures, and controls actually in place at the entity under examination.

.15 As discussed earlier, in certain e-commerce environments, the terms and conditions, including the rights, responsibilities, and commitments of both parties, are implicit in the user's completion of a transaction on the Web site. To meet the underlying intent of the “Communications” category of the criteria in such circumstances, the policies and processes required by each of the “Communications” criteria should be disclosed on the entity's Web site. Examples of such disclosures for each of the Trust Services principles are contained in Appendix A [paragraph .42].

## Security Principle and Criteria

.16 The *security principle* refers to the protection of the system components from unauthorized access, both logical and physical. In e-commerce and other systems, the respective parties wish to ensure that information provided is available only to those individuals who need access to complete the transaction or services, or follow up on questions or issues that may arise. Information

---

<sup>3</sup> *Personal information* is information that is, or can be, about or related to an identifiable individual

provided through these systems is susceptible to unauthorized access during transmission and while it is stored on the other party's systems. Limiting access to the system components helps prevent potential abuse of system components, theft of resources, misuse of software, and improper access to, use, alteration, destruction, or disclosure of information. Key elements for the protection of system components include permitting authorized access and preventing unauthorized access to those components.

### **Security Principle and Criteria Table**

.17 The system is protected against unauthorized access (both physical and logical).

<b>Criteria</b>	<b>Illustrative Controls<sup>4</sup></b>
<b>1.0 Policies: The entity defines and documents its policies for the security of its system.</b>	
1.1 The entity's security policies are established and periodically reviewed and approved by a designated individual or group.	<p>The entity's documented systems development and acquisition process includes procedures to identify and document authorized users of the system and their security requirements.</p> <p>User requirements are documented in service-level agreements or other documents.</p> <p>The security officer reviews security policies annually and submits proposed changes for approval by the information technology (IT) standards committee.</p>
1.2 The entity's security policies include, but may not be limited to, the following matters:	The entity's documented security policies contain the elements set out in criterion 1.2.
a. Identification and documentation of the security requirements of authorized users.	
b. Allowing access, the nature of that access, and who authorizes such access.	
c. Preventing unauthorized access.	
d. The procedures to add new users, modify the access levels of existing users, and remove users who no longer need access.	
e. Assignment of responsibility and accountability for system security.	
f. Assignment of responsibility and accountability for system changes and maintenance.	

(continued)

<sup>4</sup> Illustrative controls are presented as examples only. It is the practitioner's responsibility to identify and document the policies, procedures, and controls actually in place at the entity under examination.

Criteria	Illustrative Controls
<ul style="list-style-type: none"> <li>g. Testing, evaluating, and authorizing system components before implementation.</li> <li>h. Addressing how complaints and requests relating to security issues are resolved.</li> <li>i. The procedures to handle security breaches and other incidents.</li> <li>j. Provision for allocation for training and other resources to support its system security policies.</li> <li>k. Provision for the handling of exceptions and situations not specifically addressed in its system security policies.</li> <li>l. Provision for the identification of, and consistency with, applicable laws and regulations, defined commitments, service-level agreements, and other contracts.</li> </ul>	
<p>1.3 Responsibility and accountability for the entity's system security policies, and changes and updates to those policies, are assigned.</p>	<p>Management has assigned responsibilities for the maintenance and enforcement of the entity security policy to the chief information officer (CIO). Others on the executive committee assist in the review, update, and approval of the policy as outlined in the executive committee handbook.</p> <p>Ownership and custody of significant information resources (for example, data, programs, and transactions) and responsibility for establishing and maintaining security over such resources is defined.</p>
<p><b>2.0 Communications: The entity communicates its defined system security policies to authorized users.</b></p>	
<p>2.1 The entity has prepared an objective description of the system and its boundaries and communicated such description to authorized users.</p>	<p>For its e-commerce system, the entity has posted a system description on its Web site. <i>[For an example of a system description for an e-commerce system, refer to Appendix A (paragraph .42).]</i></p> <p>For its non-e-commerce system, the entity has provided a system description to authorized users. <i>[For an example of a system description for a non-e-commerce based system, refer to Appendix B (paragraph .43).]</i></p>
<p>2.2 The security obligations of users and the entity's security commitments to users are communicated to authorized users.</p>	<p>The entity's security commitments and required security obligations of its customers and other external users are posted on the entity's Web site and/or as part of the entity's standard services agreement.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
2.3 Responsibility and accountability for the entity's system security policies and changes and updates to those policies are communicated to entity personnel responsible for implementing them.	<p>For its internal users (employees and contractors), the entity's policies relating to security are reviewed with new employees and contractors as part of their orientation, and the key elements of the policies and their impact on the employee are discussed. New employees must sign a statement signifying that they have read, understand, and will follow these policies. Each year, as part of their performance review, employees must reconfirm their understanding of and compliance with the entity's security policies. Security obligations of contractors are detailed in their contracts.</p> <p>A security awareness program has been implemented to communicate the entity's IT security policies to employees.</p> <p>The entity publishes its IT security policies on its corporate intranet.</p>
2.4 The process for informing the entity about breaches of the system security and for submitting complaints is communicated to authorized users.	<p>The security administration team is responsible for implementing the entity's security policies under the direction of the CIO.</p> <p>The security administration team has custody of and is responsible for the day-to-day maintenance of the entity's security policies, and recommends changes to the CIO and the IT steering committee.</p> <p>The process for customers and external users to inform the entity of possible security breaches and other incidents is posted on the entity's Web site and/or is provided as part of the new user welcome kit.</p> <p>The entity's security awareness program includes information concerning the identification of possible security breaches and the process for informing the security administration team.</p>
2.5 Changes that may affect system security are communicated to management and users who will be affected.	<p>Documented procedures exist for the identification and escalation of security breaches, and other incidents.</p> <p>Changes that may affect customers and users and their security obligations or the entity's security commitments are highlighted on the entity's Web site.</p> <p>Changes that may affect system security are reviewed and approved by affected customers under the provisions of the standard services agreement before implementation of the proposed change.</p> <p>Planned changes to system components and the scheduling of those changes are reviewed as part of the monthly IT steering committee meetings.</p>

(continued)

*Criteria**Illustrative Controls*

Changes to system components, including those that may affect system security, require the approval of the security administrator before implementation.

There is periodic communication of changes, including changes that affect system security.

Changes that affect system security are incorporated into the entity's ongoing security awareness program.

### **3.0 Procedures: The entity uses procedures to achieve its documented system security objectives in accordance with its defined policies.**

3.1 Procedures exist to restrict logical access to the defined system including, but not limited to, the following matters:

- a. Registration and authorization of new users.
- b. Identification and authentication of users.
- c. The process to make changes and updates to user profiles.
- d. The process to grant system access privileges and permissions.
- e. Distribution of output restricted to authorized users.
- f. Restriction of logical access to offline storage, backup data, systems, and media.
- g. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices (for example, firewalls).

a. Registration and authorization of new users:

- Customers can self-register on the entity's Web site, under a secure session in which they provide new user information and select an appropriate user identification (ID) and password. Privileges and authorizations associated with self-registered customer accounts provide specific limited system functionality.
- The ability to create or modify users and user access privileges (other than the limited functionality "customer accounts") is limited to the security administration team.
- The line-of-business supervisor authorizes access privilege change requests for employees and contractors. Customer access privileges beyond the default privileges granted during self-registration are approved by the customer account manager. Proper segregation of duties is considered in granting privileges.

b. Identification and authentication of users:

- Users are required to log on to the entity's network and application systems with their user ID and password before access is granted. Unique user IDs are assigned to individual users. Passwords must contain at least six characters, one of which is nonalphanumeric. Passwords are case sensitive and must be updated every 90 days.

c. Changes and updates to user profiles:

- Changes and updates to self-registered customer accounts can be done by the individual user at any time on the entity's Web site after the user has successfully logged onto the system. Changes are reflected immediately.
- Unused customer accounts (no activity for six months) are purged by the system.

**Criteria****Illustrative Controls**

- Changes to other accounts and profiles are restricted to the security administration team and require the approval of the appropriate line-of-business supervisor or customer account manager.
  - Accounts for terminated employees are deactivated upon notice of termination being received from the human resources team.
- d. The process to grant system access privileges and permissions:
- All paths that allow access to significant information resources are controlled by the access control system and operating system facilities. Access requires users to provide their user ID and password. Privileges are granted to authenticated users based on their user profiles.
  - The login session is terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up.
- e. Distribution of output:
- Access to computer processing output is provided to authorized individuals based on the classification of the information.
  - Processing outputs are stored in an area that reflects the classification of the information.
- f. Restriction of logical access to offline storage, backup data, systems, and media.
- Logical access to offline storage, backup data, systems, and media is limited to computer operations staff.
- g. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices.
- Hardware and operating system configuration tables are restricted to appropriate personnel.
  - Application software configuration tables are restricted to authorized users and under the control of application change management software
  - Utility programs that can read, add, change, or delete data or programs are restricted to authorized technical services staff. Usage is logged and monitored by the manager of computer operations

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
	<ul style="list-style-type: none"><li>• The information security team, under the direction of the CIO, maintains access to firewall and other logs, as well as access to any storage media. Any access is logged and reviewed quarterly.</li><li>• A listing of all master passwords is stored in an encrypted database and an additional copy is maintained in a sealed envelope in the entity safe.</li></ul>
3.2 Procedures exist to restrict physical access to the defined system including, but not limited to, facilities, backup media, and other system components such as firewalls, routers, and servers.	<p>Physical access to the computer rooms, which house the entity's IT resources, servers, and related hardware such as firewalls and routers, is restricted to authorized individuals by card key systems and monitored by video surveillance.</p> <p>Physical access cards are managed by building security staff. Access card usage is logged. Logs are maintained and reviewed by building security staff.</p> <p>Requests for physical access privileges to the entity's computer facilities require the approval of the manager of computer operations.</p> <p>Documented procedures exist for the identification and escalation of potential security breaches.</p> <p>Offsite backup data and media are stored at service provider facilities. Access to offsite data and media requires the approval of the manager of computer operations.</p>
3.3 Procedures exist to protect against unauthorized logical access to the defined system.	<p>Login sessions are terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up by the security administrator.</p> <p>Virtual private networking (VPN) software is used to permit remote access by authorized users. Users are authenticated by the VPN server through specific "client" software and user ID and passwords.</p> <p>Firewalls are used and configured to prevent unauthorized access. Firewall events are logged and reviewed daily by the security administrator.</p> <p>Unneeded network services (for example, telnet, ftp, and http) are deactivated on the entity's servers. A listing of the required and authorized services is maintained by the IT department. This list is reviewed by entity management on a routine basis for its appropriateness for the current operating conditions.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
3.4 Procedures exist to protect against infection by computer viruses, malicious codes, and unauthorized software.	<p>Intrusion detection systems are used to provide continuous monitoring of the entity's network and early identification of potential security breaches.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p> <p>In connection with other security monitoring, the security administration team participates in user groups and subscribes to services relating to computer viruses.</p> <p>Antivirus software is in place, including virus scans of incoming e-mail messages. Virus signatures are updated at least weekly.</p> <p>Any viruses discovered are reported to the security team and an alert is created for all users notifying them of a potential virus threat.</p>
3.5 Encryption or other equivalent security techniques are used to protect user authentication information and the corresponding session transmitted over the Internet or other public networks.	<p>The entity uses 128-bit secure sockets layer (SSL) encryption for transmission of private or confidential information over public networks, including user ID and password. Users are required to upgrade their browser to the most current version tested and approved for use by the security administration team to avoid possible security problems.</p> <p>Account activity, subsequent to successful login, is encrypted through a 128-bit SSL session. Users are logged out on request (by selecting the "Sign-out" button on the Web site) or after 10 minutes of inactivity.</p>
3.6 Procedures exist to identify, report, and act upon system security breaches and other incidents.	<p>Users are provided instructions for communicating potential security breaches to the information security team. The information security team logs incidents reported through customer hotlines and e-mail.</p> <p>Intrusion detection and other tools are used to identify, log, and report potential security breaches and other incidents. The system notifies the security administration team and/or the network administrator via e-mail and pager of potential incidents in progress.</p> <p>Incident logs are monitored and evaluated by the information security team daily.</p> <p>Documented incident identification and escalation procedures are approved by management.</p>

(continued)

Criteria	Illustrative Controls
3 7 Procedures exist to provide that issues of noncompliance with system security policies are promptly addressed and that corrective measures are taken on a timely basis	<p>Security issues are recorded and accumulated in a problem report. Corrective action is noted and monitored by management.</p> <p>On a routine basis, security policies, controls, and procedures are audited by the internal audit department. Results of such examinations are reviewed by management, a response is prepared, and a remediation plan is put in place.</p>

**Criteria related to the system components used to achieve the objectives**

3.8 Design, acquisition, implementation, configuration, modification, and management of infrastructure and software related to system security are consistent with defined system security policies to enable authorized access and to prevent unauthorized access.	<p>The entity has adopted a formal systems development life cycle (SDLC) methodology that governs the development, acquisition, implementation, and maintenance of computerized information systems and related technology.</p> <p>The SDLC methodology includes a framework for classifying data and creating standard user profiles that are established based on an assessment of the business impact of the loss of security. Users are assigned standard profiles based on needs and functional responsibilities.</p> <p>Owners of the information and data classify its sensitivity and determine the level of protection required to maintain an appropriate level of security.</p> <p>The security administration team reviews and approves the architecture and design specifications for new systems development and/or acquisition to ensure consistency with the entity's security objectives, policies, and standards.</p> <p>Changes to system components that may affect security require the approval of the security administration team.</p> <p>The access control and operating system facilities have been installed, including the implementation of options and parameters, to restrict access in accordance with the entity's security objectives, policies, and standards</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p>
3 9 Procedures exist to provide that personnel responsible for the design, development, implementation, and operation of systems affecting security are qualified to fulfill their responsibilities	<p>The entity has written job descriptions specifying the responsibilities and academic and professional requirements for key job positions.</p>

Criteria	Illustrative Controls
<b>Maintainability-related criteria applicable to the system's security</b>  3.10 Procedures exist to maintain system components, including configurations consistent with the defined system security policies.	<p>Hiring procedures include a comprehensive screening of candidates for key positions and consideration of whether the verified credentials are commensurate with the proposed position. New personnel are offered employment subject to background checks and reference validation</p>
	<p>Candidates, including internal transfers, are approved by the line-of-business manager before the employment position is offered.</p>
	<p>Periodic performance appraisals are performed by employee supervisors and include the assessment and review of professional development activities</p>
	<p>Personnel receive training and development in system security concepts and issues</p>
	<p>Procedures are in place to provide alternate personnel for key system security functions in case of absence or departure</p>
	<p>Entity management receives a third-party opinion on the adequacy of security controls, and routinely evaluates the level of performance it receives (in accordance with its contractual service-level agreement) from the service provider that hosts the entity's systems and Web site</p>
	<p>The IT department maintains a listing of all software and the respective level, version, and patches that have been applied</p>
	<p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p>
	<p>Staffing, infrastructure, and software requirements are periodically evaluated and resources are allocated consistent with the entity's security policies</p>
	<p>System configurations are tested annually, and evaluated against the entity's security policies and current service-level agreements. An exception report is prepared and remediation plans are developed and tracked.</p>
	<p>The IT steering committee, which includes representatives from the lines of business and customer support, meets monthly and reviews anticipated, planned, or recommended changes to the entity's security policies, including the potential impact of legislative changes</p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
3.11 Procedures exist to provide that only authorized, tested, and documented changes are made to the system	<p>Senior management has implemented a division of roles and responsibilities that segregates incompatible functions</p> <p>The entity's documented systems development methodology describes the change initiation, software development and maintenance, and approval processes, as well as the standards and controls that are embedded in the processes. These include programming, documentation, and testing standards.</p> <p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Changes to system infrastructure and software are developed and tested in a separate development or test environment before implementation into production.</p> <p>As part of the change control policies and procedures, there is a "promotion" process (for example, from "test" to "staging" to "production"). Promotion to production requires the approval of the business owner who sponsored the change and the manager of computer operations.</p> <p>When changes are made to key systems components, there is a "backout" plan developed for use in the event of major interruption(s).</p>
3.12 Procedures exist to provide that emergency changes are documented and authorized (including after-the-fact approval)	<p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Emergency changes that require deviations from standard procedures are logged and reviewed by IT management daily and reported to the affected line-of-business manager. Permanent corrective measures follow the entity's change management process, including line-of-business approvals.</p>

Criteria	Illustrative Controls
<b>4.0 Monitoring: The entity monitors the system and takes action to maintain compliance with its defined system security policies.</b>	
4.1 The entity's system security is periodically reviewed and compared with the defined system security policies.	<p>The information security team monitors the system and assesses the system vulnerabilities using proprietary and other tools. Potential risk is evaluated and compared to service-level agreements and other obligations of the entity. Remediation plans are proposed and implementation is monitored.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. The internal audit function conducts system security reviews as part of its annual audit plan. Results and recommendations for improvement are reported to management.</p>
4.2 There is a process to identify and address potential impairments to the entity's ongoing ability to achieve its objectives in accordance with its defined system security policies.	<p>Logs are analyzed to identify trends that may have a potential impact on the entity's ability to achieve its system security objectives.</p> <p>Monthly IT staff meetings are held to address system security concerns and trends; findings are discussed at quarterly management meetings.</p>
4.3 Environmental and technological changes are monitored and their effect on system security is assessed on a timely basis.	<p>Senior management, as part of its annual IT planning process, considers developments in technology and the impact of applicable laws or regulations on the entity's security policies.</p> <p>The entity's IT security group monitors the security impact of emerging technologies.</p> <p>Users are proactively invited to contribute to initiatives to improve system security through the use of new technologies.</p>

## Availability Principle and Criteria

.18 The *availability principle* refers to the accessibility to the system, products, or services as advertised or committed by contract, service-level, or other agreements. It should be noted that this principle does not, in itself, set a minimum acceptable performance level for system availability. The minimum performance level is established through commitments made or by mutual agreement (contract) between the parties.

.19 Although there is a connection between system availability, system functionality, and system usability, the availability principle does not address system functionality (the specific functions a system performs) and system usability (the ability of users to apply system functions to specific tasks or problems). It does address system availability, which relates to whether the system is accessible for processing, monitoring, and maintenance.

### Availability Principle and Criteria Table

.20 The system is available for operation and use as committed or agreed.

Criteria	Illustrative Controls
<b>1.0 Policies: The entity defines and documents its policies for the availability of its system.</b>	
<b>1.1</b> The entity's system availability and related security policies are established and periodically reviewed and approved by a designated individual or group.	<p>The entity's documented systems development and acquisition process includes procedures to identify and document authorized users of the system and their availability and related security requirements.</p> <p>User requirements are documented in service-level agreements or other documents.</p> <p>Management reviews the entity's availability and related security policies annually. Proposed changes are submitted as needed for approval by the information technology (IT) standards committee, which includes representation from the customer service department.</p>
<b>1.2</b> The entity's system availability and related security policies include, but may not be limited to, the following matters: <ul style="list-style-type: none"> <li>a. Identification and documentation of the system availability and related security requirements of authorized users.</li> <li>b. Allowing access, the nature of that access, and who authorizes such access.</li> <li>c. Preventing unauthorized access.</li> <li>d. The procedures to add new users, modify the access levels of existing users, and remove users who no longer need access.</li> <li>e. Assignment of responsibility and accountability for system availability and related security.</li> <li>f. Assignment of responsibility and accountability for system changes and maintenance.</li> <li>g. Testing, evaluating, and authorizing system components before implementation.</li> <li>h. Addressing how complaints and requests relating to system availability and related security issues are resolved.</li> </ul>	<p>The entity's documented availability and related security policies contain the elements set out in criterion 1.2.</p>

Criteria	Illustrative Controls
<ul style="list-style-type: none"> <li>i. The procedures to handle system availability and related security breaches and other incidents.</li> <li>j. Provision for allocation for training and other resources to support its system availability and related security policies.</li> <li>k. Provision for the handling of exceptions and situations not specifically addressed in its system availability and related security policies.</li> <li>l. Provision for the identification of, and consistency with, applicable laws and regulations, defined commitments, service-level agreements, and other contracts.</li> <li>m. Recovery and continuity of service in accordance with documented customer commitments or other agreements.</li> <li>n. Monitoring system capacity to achieve customer commitments or other agreements regarding availability.</li> </ul>	<p>Management has assigned responsibilities for the maintenance and enforcement of the entity's availability policies to the chief information officer (CIO). Others on the executive committee assist in the review, update, and approval of these policies as outlined in the executive committee handbook.</p> <p>Ownership and custody of significant information resources (for example, data, programs, and transactions) and responsibility for establishing and maintaining the system availability of and related security over such resources is defined.</p>
<p>1.3 Responsibility and accountability for the entity's system availability and related security policies, and changes and updates to those policies, are assigned.</p>	
<p><b>2.0 Communications: The entity communicates the defined system availability policies to authorized users.</b></p>	
<p>2.1 The entity has prepared an objective description of the system and its boundaries and communicated such description to authorized users.</p>	<p>For its e-commerce system, the entity has posted a system description on its Web site. [For an example of a system description for an e-commerce system, refer to Appendix A (paragraph .42).]</p>

(continued)

Criteria	Illustrative Controls
2.2 The availability and related security obligations of users and the entity's availability and related security commitments to users are communicated to authorized users.	<p>For its non-e-commerce system, the entity has provided a system description to authorized users. <i>[For an example of a system description for a non-e-commerce based system, refer to Appendix B (paragraph .43).]</i></p> <p>The entity's system availability and related security commitments and required system availability and related security obligations of its customers and other external users are posted on the entity's Web site and/or as part of the entity's standard services agreement. Service-level agreements are reviewed with the customer annually.</p> <p>For its internal users (employees and contractors), the entity's policies relating to system availability and security are reviewed with new employees and contractors as part of their orientation, and the key elements of the policies and their impact on the employee are discussed. New employees must sign a statement signifying that they have read, understand, and will follow these policies. Each year, as part of their performance review, employees must reconfirm their understanding of and compliance with the entity's policies. Obligations of contractors are detailed in their contract.</p> <p>A security awareness program has been implemented to communicate the entity's IT security policies to employees.</p> <p>The entity publishes its IT security policies on its corporate intranet.</p>
2.3 Responsibility and accountability for the entity's system availability and related security policies and changes and updates to those policies are communicated to entity personnel responsible for implementing them.	<p>The network operations team is responsible for implementing the entity's availability policies under the direction of the chief information officer (CIO). The security administration team is responsible for implementing the related security policies.</p> <p>The network operations team has custody of and is responsible for the day-to-day maintenance of the entity's availability policies, and recommends changes to the CIO and the IT steering committee. The security administration team is responsible for the related security policies.</p> <p>Availability and related security commitments are reviewed with the customer account managers as part of the annual IT planning process.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
2.4 The process for informing the entity about system availability issues and breaches of system security and for submitting complaints is communicated to authorized users.	<p>The process for customers and external users to inform the entity of system availability issues, possible security breaches, and other incidents is posted on the entity's Web site and/or is provided as part of the new user welcome kit.</p> <p>The entity's user training program includes modules dealing with the identification and reporting of system availability issues, security breaches, and other incidents.</p> <p>The entity's security awareness program includes information concerning the identification of possible security breaches and the process for informing the security administration team.</p> <p>Documented procedures exist for the identification and escalation of system availability issues, security breaches, and other incidents.</p>
2.5 Changes that may affect system availability and system security are communicated to management and users who will be affected.	<p>Changes that may affect system availability, customers and users and their security obligations, or the entity's security commitments are highlighted on the entity's Web site.</p> <p>Changes that may affect system availability and related system security are reviewed and approved by affected customers under the provisions of the standard services agreement before implementation of the proposed change.</p> <p>Planned changes to system components and the scheduling of those changes are reviewed as part of the monthly IT steering committee meetings.</p> <p>Changes to system components, including those that may affect system security, require the approval of the manager of network operations and/or the security administration team, before implementation.</p> <p>There is periodic communication of system changes, including changes that affect availability and system security.</p> <p>Changes that affect system security are incorporated into the entity's ongoing security awareness program.</p>

*(continued)*

Criteria	Illustrative Controls
<b>3.0 Procedures: The entity uses procedures to achieve its documented system availability objectives in accordance with its defined policies.</b>	
<b>3.1</b> Procedures exist to protect the system against potential risks (for example, environmental risks, natural disasters, labor disputes, and routine operational errors and omissions) that might disrupt system operations and impair system availability.	<p data-bbox="556 262 1003 421">A risk assessment is prepared and reviewed on a regular basis or when a significant change occurs in either the internal or external physical environment. Threats such as fire, flood, dust, power failure, excessive heat and humidity, and labor problems have been considered.</p> <p data-bbox="556 439 1003 644">Management maintains measures to protect against environmental factors (for example, fire, flood, dust, power failure, and excessive heat and humidity) based on its risk assessment. The entity's controlled areas are protected against fire using both smoke detectors and a fire suppression system. Water detectors are installed within the raised floor areas.</p> <p data-bbox="556 661 1003 800">The entity site is protected against a disruption in power supply to the processing environment by both uninterruptible power supplies (UPS) and emergency power supplies (EPS). This equipment is tested semiannually.</p> <p data-bbox="556 817 991 887">Preventive maintenance agreements and scheduled maintenance procedures are in place for key system hardware components.</p> <p data-bbox="556 904 1003 973">Vendor warranty specifications are complied with and tested to determine if the system is properly configured.</p> <p data-bbox="556 991 979 1060">Procedures to address minor processing errors, outages, and destruction of records are documented.</p> <p data-bbox="556 1078 979 1147">Procedures exist for the identification, documentation, escalation, resolution, and review of problems.</p> <p data-bbox="556 1164 979 1260">Physical and logical security controls are implemented to reduce the opportunity for unauthorized actions that could impair system availability.</p>
<b>3.2</b> Procedures exist to provide for backup, offsite storage, restoration, and disaster recovery consistent with the entity's defined system availability and related security policies.	<p data-bbox="556 1277 1003 1529">Management has implemented a comprehensive strategy for backup and restoration based on a review of business requirements. Backup procedures for the entity are documented and include redundant servers, daily incremental backups of each server, and a complete backup of the entire week's changes on a weekly basis. Daily and weekly backups are stored offsite in accordance with the entity's system availability policies.</p> <p data-bbox="556 1546 1003 1584">Disaster recovery and contingency plans are documented.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>The disaster recovery plan defines the roles and responsibilities and identifies the critical information technology application programs, operating systems, personnel, data files, and time frames needed to ensure high availability and system reliability based on the business impact analysis.</p> <p>The business continuity planning (BCP) coordinator reviews and updates the business impact analysis with the lines of business annually.</p> <p>Disaster recovery and contingency plans are tested annually in accordance with the entity's system availability policies. Testing results and change recommendations are reported to the entity's management committee.</p> <p>The entity's management committee reviews and approves changes to the disaster recovery plan.</p> <p>All critical personnel identified in the business continuity plan hold current versions of the plan, both onsite and offsite. An electronic version is stored offsite.</p>
3.3 Procedures exist to provide for the integrity of backup data and systems maintained to support the entity's defined system availability and related security policies.	<p>Automated backup processes include procedures for testing the integrity of the backup data.</p> <p>Backups are performed in accordance with the entity's defined backup strategy, and usability of backups is verified at least annually.</p> <p>Backup systems and data are stored offsite at the facilities of a third-party service provider.</p> <p>Under the terms of its service provider agreement, the entity performs an annual verification of media stored at the offsite storage facility. As part of the verification, media at the offsite location are matched to the appropriate media management system. The storage site is reviewed biannually for physical access security and security of data files and other items.</p> <p>Backup systems and data are tested as part of the annual disaster recovery test.</p>

#### **Security-related criteria relevant to the system's availability**

- |  |  |
|--|--|
| <p>3.4 Procedures exist to restrict logical access to the defined system including, but not limited to, the following matters:</p> <ul style="list-style-type: none"> <li>a. Registration and authorization of new users.</li> <li>b. Identification and authentication of users.</li> </ul> | <ul style="list-style-type: none"> <li>a. Registration and authorization of new users: <ul style="list-style-type: none"> <li>• Customers can self-register on the entity's Web site, under a secure session in which they provide new user information and select an appropriate user identification (ID) and password. Privileges and authorizations associated with self-registered customer accounts provide specific limited system functionality.</li> </ul> </li> </ul> |
|--|--|

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
<p>c. The process to make changes and updates to user profiles.</p> <p>d. The process to grant system access privileges and permissions.</p> <p>e. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices (for example, firewalls)</p>	<ul style="list-style-type: none"><li>• The ability to create or modify users access privileges (other than the limited functionality “customer accounts”) is limited to the security administration team</li><li>• The line-of-business supervisor authorizes access privilege change requests for employees and contractors. Customer access privileges beyond the default privileges granted during self-registration are approved by the customer account manager. Proper segregation of duties is considered in granting privileges.</li></ul>
<p>b. Identification and authentication of users</p>	<ul style="list-style-type: none"><li>• Users are required to log on to the entity’s network and application systems with their user ID and password before access is granted. Unique user IDs are assigned to individual users. Passwords must contain at least six characters, one of which is nonalphanumeric. Passwords are case sensitive and must be updated every 90 days.</li></ul>
<p>c. Changes and updates to user profiles:</p>	<ul style="list-style-type: none"><li>• Changes and updates to self-registered customer accounts can be done by the individual user at any time on the entity’s Web site after the user has successfully logged onto the system. Changes are reflected immediately</li><li>• Unused customer accounts (no activity for six months) are purged by the system</li><li>• Changes to other accounts and profiles are restricted to the security administration team and require the approval of the appropriate line-of-business supervisor or customer account manager</li><li>• Accounts for terminated employees are deactivated upon notice of termination being received from the human resources team.</li></ul>
<p>d. The process to grant system access privileges and permissions</p>	<ul style="list-style-type: none"><li>• All paths that allow access to significant information resources are controlled by the access control system and operating system facilities. Access requires users to provide their user ID and password. Privileges are granted to authenticated users based on their user profiles.</li></ul>

Criteria	Illustrative Controls
<p>3.5 Procedures exist to restrict physical access to the defined system including, but not limited to, facilities, backup media, and other system components such as firewalls, routers, and servers.</p>	<ul style="list-style-type: none"> <li>• The login session is terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up.</li> </ul> <p>e. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices:</p> <ul style="list-style-type: none"> <li>• Hardware and operating system configuration tables are restricted to appropriate personnel.</li> <li>• Application software configuration tables are restricted to authorized users and under the control of application change management software.</li> <li>• Utility programs that can read, add, change, or delete data or programs are restricted to authorized technical services staff. Usage is logged and monitored by the manager of computer operations.</li> <li>• The information security team, under the direction of the CIO, maintains access to firewall and other logs, as well as access to any storage media. Any access is logged and reviewed quarterly.</li> <li>• A listing of all master passwords is stored in an encrypted database and an additional copy is maintained in a sealed envelope in the entity safe.</li> </ul> <p>Physical access to the computer rooms, which house the entity's IT resources, servers, and related hardware such as firewalls and routers, is restricted to authorized individuals by card key systems and monitored by video surveillance.</p> <p>Physical access cards are managed by building security staff. Access card usage is logged. Logs are maintained and reviewed by building security staff.</p> <p>Requests for physical access privileges to the entity's computer facilities require the approval of the manager of computer operations.</p> <p>Documented procedures exist for the identification and escalation of potential security breaches.</p> <p>Offsite backup data and media are stored at service provider facilities. Access to offsite data and media requires the approval of the manager of computer operations.</p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
3.6 Procedures exist to protect against unauthorized logical access to the defined system.	<p data-bbox="533 165 983 262">Login sessions are terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up by the security administrator.</p> <p data-bbox="533 284 989 403">Virtual private networking (VPN) software is used to permit remote access by authorized users. Users are authenticated by the VPN server through specific “client” software and user ID and passwords.</p> <p data-bbox="533 416 985 509">Firewalls are used and configured to prevent unauthorized access. Firewall events are logged and reviewed daily by the security administrator.</p> <p data-bbox="533 522 983 707">Unneeded network services (for example, telnet, ftp, and http) are deactivated on the entity’s servers. A listing of the required and authorized services is maintained by the IT department. This list is reviewed by entity management on a routine basis for its appropriateness for the current operating conditions.</p> <p data-bbox="533 719 983 816">Intrusion detection systems are used to provide continuous monitoring of the entity’s network and early identification of potential security breaches.</p> <p data-bbox="533 829 945 943">The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p>
3.7 Procedures exist to protect against infection by computer viruses, malicious codes, and unauthorized software.	<p data-bbox="533 956 959 1070">In connection with other security monitoring, the security administration team participates in user groups and subscribes to services relating to computer viruses.</p> <p data-bbox="533 1083 989 1153">Antivirus software is in place, including virus scans of incoming e-mail messages. Virus signatures are updated at least weekly.</p> <p data-bbox="533 1166 969 1263">Any viruses discovered are reported to the security team and an alert is created for all users notifying them of a potential virus threat.</p>
3.8 Encryption or other equivalent security techniques are used to protect user authentication information and the corresponding session transmitted over the Internet or other public networks.	<p data-bbox="533 1275 977 1478">The entity uses 128-bit secure sockets layer (SSL) encryption for transmission of private or confidential information over public networks, including user ID and password. Users are required to upgrade their browser to the most current version tested and approved for use by the security administration team to avoid possible security problems.</p> <p data-bbox="533 1490 969 1607">Account activity, subsequent to successful login, is encrypted through a 128-bit SSL session. Users are logged out on request (by selecting the “Sign-out” button on the Web site) or after 10 minutes of inactivity.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
3.9 Procedures exist to identify, report, and act upon system availability issues and related security breaches and other incidents	<p>Users are provided instructions for communicating system availability issues, potential security breaches, and other issues to the help desk or customer service center.</p> <p>Documented procedures exist for the escalation of system availability issues and potential security breaches that cannot be resolved by the help desk.</p> <p>Network performance and system processing are monitored using system monitoring tools by onsite operations staff 24 hours a day, 7 days a week. Documented procedures exist for the escalation and resolution of performance and processing availability issues.</p> <p>Intrusion detection and other tools are used to identify, log, and report potential security breaches and other incidents. The system notifies the security administration team and/or the network administrator via e-mail and pager of potential incidents in progress.</p> <p>Incident logs are monitored and evaluated by the information security team daily.</p> <p>Documented incident identification and escalation procedures are approved by management.</p> <p>Network performance, system availability, and security incident statistics and comparisons to approved targets are accumulated and reported to the IT steering committee monthly.</p> <p>System performance and capacity analysis and projections are completed annually as part of the IT planning and budgeting process.</p>
3.10 Procedures exist to provide that issues of noncompliance with system availability and related security policies are promptly addressed and that corrective measures are taken on a timely basis.	<p>System processing and security-related issues are recorded and accumulated in a problem report. Corrective action is noted and monitored by management.</p> <p>As a part of the monthly monitoring of the site, availability and site usage reports are compared to the disclosed availability levels. This analysis is used to forecast future capacity, reveal any performance issues, and provide a means of fine-tuning the system.</p> <p>Standard procedures exist for the documentation, escalation, resolution, and review of problems.</p> <p>On a routine basis, security policies, controls, and procedures are audited by the internal audit department. Results of such examinations are reviewed by management, a response is prepared, and a remediation plan is put in place.</p>

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>Entity management evaluates the level of performance it receives from the Internet service provider (ISP) which hosts the entity Web site. This evaluation is done by evaluating the provider's actual performance as compared to agreed service-level commitments including measures for system processing performance levels, availability, and security controls the ISP has in place.</p> <p>Management receives an annual independent third-party report on the adequacy of internal controls from its Web-hosting service provider. Management reviews these reports and follows up with the service provider management on any open items or causes for concern.</p>

**Criteria related to the system components used to achieve the objectives**

<p>3.11 Design, acquisition, implementation, configuration, modification, and management of infrastructure and software related to system availability and security are consistent with defined system availability and related security policies</p>	<p>The entity has adopted a formal systems development life cycle (SDLC) methodology that governs the development, acquisition, implementation, and maintenance of computerized information systems and related technology.</p> <p>The SDLC methodology includes a framework for</p> <ul style="list-style-type: none"><li>• Establishing performance level and system availability requirements based on user needs.</li><li>• Maintaining the entity's backup and disaster recovery planning processes in accordance with user requirements.</li><li>• Classifying data and creating standard user profiles that are established based on an assessment of the business impact of the loss of security; assigning standard profiles to users based on needs and functional responsibilities</li><li>• Testing changes to system components to minimize the risk of an adverse impact to system performance and availability</li><li>• Development of "backout" plans before implementation of changes</li></ul> <p>Owners of the information and data establish processing performance and availability benchmarks, classify its sensitivity, and determine the level of protection required to maintain an appropriate level of security.</p> <p>The security administration team reviews and approves the architecture and design specifications for new systems development and/or acquisition to ensure consistency with the entity's availability and related security policies</p>
---	--

<i>Criteria</i>	<i>Illustrative Controls</i>
3.12 Procedures exist to provide that personnel responsible for the design, development, implementation, and operation of systems affecting availability and security are qualified to fulfill their responsibilities.	<p>Changes to system components that may affect systems processing performance, availability, and security require the approval of the security administration team.</p> <p>The access control and operating system facilities have been installed, including the implementation of options and parameters, to restrict access in accordance with the entity's security objectives, policies, and standards.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p> <p>The entity has written job descriptions specifying the responsibilities and academic and professional requirements for key job positions.</p> <p>Hiring procedures include a comprehensive screening of candidates for key positions and consideration of whether the verified credentials are commensurate with the proposed position. New personnel are offered employment subject to background checks and reference validation.</p> <p>Candidates, including internal transfers, are approved by the line-of-business manager before the employment position is offered.</p> <p>Periodic performance appraisals are performed by employee supervisors and include the assessment and review of professional development activities.</p> <p>Personnel receive training and development in system availability concepts and issues.</p> <p>Procedures are in place to provide alternate personnel for key system availability functions in case of absence or departure.</p>
<b>Maintainability-related criteria applicable to the system's availability</b>	
3.13 Procedures exist to maintain system components, including configurations consistent with the defined system availability and related security policies.	<p>Entity management receives a third-party opinion on the adequacy of security controls, and routinely evaluates the level of performance it receives (in accordance with its contractual service-level agreement) from the service provider that hosts the entity's systems and Web site.</p> <p>The IT department maintains a listing of all software and the respective level, version, and patches that have been applied.</p> <p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests</p>

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
3.14 Procedures exist to provide that only authorized, tested, and documented changes are made to the system.	Staffing, infrastructure, and software requirements are periodically evaluated and resources are allocated consistent with the entity's availability and related security policies.
	System configurations are tested annually and evaluated against the entity's processing performance, availability, and security policies, and current service-level agreements. An exception report is prepared and remediation plans are developed and tracked.
	The IT steering committee, which includes representatives from the lines of business and customer support, meets monthly and reviews anticipated, planned, or recommended changes to the entity's availability and related security policies, including the potential impact of legislative changes.
	Senior management has implemented a division of roles and responsibilities that segregates incompatible functions.
	The entity's documented systems development methodology describes the change initiation, software development and maintenance, and approval processes, as well as the standards and controls that are embedded in the processes. These include programming, documentation, and testing standards.
	Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.
	Changes to system infrastructure and software are developed and tested in a separate development or test environment before implementation into production.
	As part of the change control policies and procedures, there is a "promotion" process (for example, from "test" to "staging" to "production"). Promotion to production requires the approval of the business owner who sponsored the change and the manager of computer operations.
	When changes are made to key systems components, there is a "backout" plan developed for use in the event of major interruption(s).

Criteria	Illustrative Controls
3.15 Procedures exist to provide that emergency changes are documented and authorized (including after-the-fact approval).	<p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Emergency changes that require deviations from standard procedures are logged and reviewed by IT management daily and reported to the affected line-of-business manager. Permanent corrective measures follow the entity's change management process, including line-of-business approvals.</p>
<b>4.0 Monitoring: The entity monitors the system and takes action to maintain compliance with its defined system availability policies.</b>	
4.1 The entity's system availability and security performance is periodically reviewed and compared with the defined system availability and related security policies.	<p>Network performance and system processing are monitored using system monitoring tools by onsite operations staff 24 hours a day, 7 days a week. Network performance, system availability, and security incident statistics and comparisons to approved targets are accumulated and reported to the IT steering committee monthly.</p> <p>The customer service group monitors system availability and related customer complaints. It provides a monthly report of such matters together with recommendations for improvement, which are considered and acted on at the monthly IT steering committee meetings.</p> <p>The information security team monitors the system and assesses the system vulnerabilities using proprietary and other tools. Potential risk is evaluated and compared to service-level agreements and other obligations of the entity. Remediation plans are proposed and implementation is monitored.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. The internal audit function conducts system availability and system security reviews as part of its annual audit plan. Results and recommendations for improvement are reported to management.</p>
4.2 There is a process to identify and address potential impairments to the entity's ongoing ability to achieve its objectives in accordance with its defined system availability and related security policies.	<p>Network performance and system processing are monitored using system monitoring tools by onsite operations staff 24 hours a day, 7 days a week. Network performance, system availability, and security incident statistics and comparisons to approved targets are accumulated and reported to the IT steering committee monthly.</p>

(continued)

Criteria	Illustrative Controls
4.3 Environmental and technological changes are monitored and their effect on system availability and security is assessed on a timely basis.	<p>Future system performance, availability, and capacity requirements are projected and analyzed as part of the annual IT planning and budgeting process.</p> <p>Logs are analyzed to identify trends that may have a potential impact on the entity's ability to achieve its system availability and related security objectives.</p> <p>Monthly IT staff meetings are held to address system performance, availability, capacity, and security concerns and trends; findings are discussed at quarterly management meetings.</p> <p>The entity's data center facilities include climate and environmental monitoring devices. Deviations from optimal performance ranges are escalated and resolved.</p> <p>Senior management, as part of its annual IT planning process, considers developments in technology and the impact of applicable laws or regulations on the entity's availability and related security policies.</p> <p>The entity's customer service group monitors the impact of emerging technologies, customer requirements, and competitive activities.</p>

## Processing Integrity Principle and Criteria

**.21** The *processing integrity principle* refers to the completeness, accuracy, timeliness, and authorization of system processing. Processing integrity exists if a system performs its intended function in an unimpaired manner, free from unauthorized or inadvertent manipulation. Completeness generally indicates that all transactions and services are processed or performed without exception, and that transactions and services are not processed more than once. Accuracy includes assurances that key information associated with the submitted transaction will remain accurate throughout the processing of the transaction and the transaction or services are processed or performed as intended. The timeliness of the provision of services or the delivery of goods is addressed in the context of commitments made for such delivery. Authorization includes assurances that processing is performed in accordance with the required approvals and privileges defined by policies governing system processing.

**.22** The risks associated with processing integrity are that the party initiating the transaction will not have the transaction completed or the service provided correctly, and in accordance with the desired or specified request. Without appropriate processing integrity controls, the buyer may not receive the goods or services ordered, receive more than requested, or receive the wrong goods or services altogether. However, if appropriate processing integrity controls exist and are operational within the system, the buyer can be reasonably assured that the correct goods and services in the correct quantity at the correct price are received when promised. Processing integrity addresses all of the system components including procedures to initiate, record, process, and report

the information, product, or service that is the subject of the engagement. The nature of data input in e-commerce systems typically involves the user entering data directly over Web-enabled input screens or forms, whereas in other systems, the nature of data input can vary significantly. Because of this difference in data input processes, the nature of controls over the completeness and accuracy of data input in e-commerce systems may be somewhat different than for other systems. The illustrative controls outlined in the following table identify some of these differences.

.23 Processing integrity differs from data integrity. Processing integrity does not automatically imply that the information stored by the system is complete, accurate, current, and authorized. If a system processes information inputs from sources outside of the system's boundaries, an entity can establish only limited controls over the completeness, accuracy, authorization, and timeliness of the information submitted for processing. Errors that may have been introduced into the information and the control procedures at external sites are typically beyond the entity's control. When the information source is explicitly excluded from the description of the system that defines the engagement, it is important to describe that exclusion in the system description. In other situations, the data source may be an inherent part of the system being examined, and controls over the completeness, accuracy, authorization, and timeliness of information submitted for processing would be included in the scope of the system as described.

### ***Processing Integrity Principle and Criteria Table***

.24 System processing is complete, accurate, timely, and authorized.

<i>Criteria</i>	<i>Illustrative Controls</i>
<b>1.0 Policies: The entity defines and documents its policies for the processing integrity of its system.</b>	
1.1 The entity's processing integrity and related security policies are established and periodically reviewed and approved by a designated individual or group.	<p>The entity's documented systems development and acquisition process includes procedures to identify and document authorized users of the system and their processing integrity and related security requirements.</p> <p>User requirements are documented in service-level agreements or other documents.</p> <p>The security officer reviews security policies annually and submits proposed changes as needed for approval by the information technology (IT) standards committee.</p>
1.2 The entity's system processing integrity and related security policies include, but may not be limited to, the following matters:	The entity's documented processing integrity and related security policies contain the elements set out in criterion 1.2.
a. Identification and documentation of the system processing integrity and related security requirements of authorized users.	

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
b. Allowing access, the nature of that access, and who authorizes such access.	
c. Preventing unauthorized access.	
d. The procedures to add new users, modify the access levels of existing users, and remove users who no longer need access.	
e. Assignment of responsibility and accountability for system processing integrity and related security.	
f. Assignment of responsibility and accountability for system changes and maintenance.	
g. Testing, evaluating, and authorizing system components before implementation.	
h. Addressing how complaints and requests relating to system processing integrity and related security issues are resolved.	
i. The procedures to handle errors and omissions and other system processing integrity and related security breaches and other incidents.	
j. Provision for allocation for training and other resources to support its system processing integrity and related system security policies.	
k. Provision for the handling of exceptions and situations not specifically addressed in its system processing integrity and related system security policies.	
l. Provision for the identification of, and consistency with, applicable laws and regulations, defined commitments, service-level agreements, and other contracts.	

Criteria	Illustrative Controls
<p>1.3 Responsibility and accountability for the entity's system processing integrity and related system security policies, and changes, updates, and exceptions to those policies, are assigned.</p>	<p>Management has assigned responsibilities for the implementation of the entity's processing integrity and related security policies to the chief information officer (CIO). Others on the executive committee assist in the review, update, and approval of the policies as outlined in the executive committee handbook.</p> <p>Ownership and custody of significant information resources (for example, data, programs, and transactions) and responsibility for establishing and maintaining system processing integrity and related security over such resources is defined.</p>
<p><b>2.0 Communications: The entity communicates its documented system processing integrity policies to authorized users.</b></p>	
<p>2.1 The entity has prepared an objective description of the system and its boundaries and communicated such description to authorized users.</p> <p>If the system is an e-commerce system, additional information provided on its Web-site includes, but may not be limited to, the following matters:</p> <p>a. Descriptive information about the nature of the goods or services that will be provided, including, where appropriate:</p> <ul style="list-style-type: none"> <li>• Condition of goods (meaning, whether they are new, used, or reconditioned).</li> <li>• Description of services (or service contract).</li> <li>• Sources of information (meaning, where it was obtained and how it was compiled).</li> </ul> <p>b. The terms and conditions by which it conducts its e-commerce transactions including, but not limited to, the following matters:</p> <ul style="list-style-type: none"> <li>• Time frame for completion of transactions (<i>transaction</i> means fulfillment of orders where goods are being sold and delivery of service where a service is being provided).</li> </ul>	<p>For its e-commerce system, the entity has posted a system description including the elements set out in criterion 2.1 on its Web site. <i>[For an example of a system description and additional disclosures for an e-commerce system, refer to Appendix A (paragraph .42).]</i></p> <p>For its non-e-commerce system, the entity has provided a system description to authorized users. <i>[For an example of a system description for a non-e-commerce based system, refer to Appendix B (paragraph .43).]</i></p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
<ul style="list-style-type: none"> <li>• Time frame and process for informing customers of exceptions to normal processing of orders or service requests.</li> <li>• Normal method of delivery of goods or services, including customer options, where applicable.</li> <li>• Payment terms, including customer options, if any.</li> <li>• Electronic settlement practices and related charges to customers.</li> <li>• How customers may cancel recurring charges, if any.</li> <li>• Product return policies and limited liability, where applicable.</li> </ul> <p>c. Where customers can obtain warranty, repair service, and support related to the goods and services purchased on its Web site.</p> <p>d. Procedures for resolution of issues regarding processing integrity. These may relate to any part of a customer's e-commerce transaction, including complaints related to the quality of services and products, accuracy, completeness, and the consequences for failure to resolve such complaints.</p>	
<p>2.2 The processing integrity and related security obligations of users and the entity's processing integrity and related security commitments to users are communicated to authorized users.</p>	<p>The entity's processing integrity and related security commitments and required processing integrity and related security obligations of its customers and other external users are posted on the entity's Web site and/or as part of the entity's standard services agreement.</p> <p>For its internal users (employees and contractors), the entity's policies relating to processing integrity and security are reviewed with new employees and contractors as part of their orientation, and the key elements of the policies and their impact on the employee are discussed. New employees must sign a statement signifying that they have read, understand, and will follow these policies. Each year, as part of their performance review, employees must reconfirm their understanding of and compliance with the entity's processing integrity and security policies. Obligations of contractors are detailed in their contract.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
2.3 Responsibility and accountability for the entity's system processing integrity and related security policies, and changes and updates to those policies, are communicated to entity personnel responsible for implementing them.	<p>A security awareness program has been implemented to communicate the entity's processing integrity and related security policies to employees.</p> <p>The entity publishes its IT security policies on its corporate intranet.</p> <p>Management has assigned responsibilities for the enforcement of the entity's processing integrity policies to the chief financial officer (CFO). The security administration team is responsible for implementing the entity's security policies under the direction of the CIO. Others on the executive committee assist in the review and update of the policy as outlined in the executive committee handbook.</p>
2.4 The process for obtaining support and informing the entity about system processing integrity issues, errors and omissions, and breaches of systems security and for submitting complaints is communicated to authorized users.	<p>The security administration team has custody of and is responsible for the day-to-day maintenance of the entity's security policies, and recommends changes to the CIO and the IT steering committee.</p> <p>Processing integrity and related security commitments are reviewed with the customer account managers as part of the annual IT planning process.</p> <p>The process for customers and external users to inform the entity of possible processing integrity issues, security breaches, and other incidents is posted on the entity's Web site and/or is provided as part of the new user welcome kit.</p> <p>The entity's user training and security awareness programs include information concerning the identification of processing integrity issues and possible security breaches, and the process for informing the security administration team.</p>
2.5 Changes that may affect system processing integrity and system security are communicated to management and users who will be affected.	<p>Documented procedures exist for the identification and escalation of system processing integrity issues, security breaches, and other incidents.</p> <p>Changes that may affect customers and users and their processing integrity and related security obligations or the entity's processing integrity and related security commitments are highlighted on the entity's Web site.</p> <p>Changes that may affect processing integrity and related system security are reviewed and approved by affected customers under the provisions of the standard services agreement before implementation of the proposed change.</p> <p>Planned changes to system components and the scheduling of those changes are reviewed as part of the monthly IT steering committee meetings.</p>

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>Changes to system components, including those that may affect system security, require the approval of the security administrator and the sponsor of the change before implementation.</p> <p>There is periodic communication of changes, including changes that affect system security.</p> <p>Changes are incorporated into the entity's ongoing user training and security awareness programs.</p>
<b>3.0 Procedures: The entity uses procedures to achieve its documented system processing integrity objectives in accordance with its defined policies.</b>	
<p>3.1 The procedures related to completeness, accuracy, timeliness, and authorization of inputs are consistent with the documented system processing integrity policies.</p> <p>If the system is an e-commerce system, the entity's procedures include, but may not be limited to, the following matters:</p> <ul style="list-style-type: none"> <li>• The entity checks each request or transaction for accuracy and completeness.</li> <li>• Positive acknowledgment is received from the customer before the transaction is processed.</li> </ul>	<p>The entity has established data preparation procedures to be followed by user departments.</p> <p>Data entry screens contain field edits and range checks, and input forms are designed to reduce errors and omissions.</p> <p>Source documents are reviewed for appropriate authorizations before input.</p> <p>Error handling procedures are followed during data origination to ensure that errors and irregularities are detected, reported, and corrected.</p> <p>Original source documents are retained on image management systems for a minimum of seven years, to facilitate the retrieval or reconstruction of data as well as to satisfy legal requirements.</p> <p>Logical access controls restrict data entry capability to authorized personnel. (See 3.5 in this table.)</p> <p>The customer account manager performs a regular review of customer complaints, back-order logs, and other transactional analysis. This information is compared to customer service agreements.</p> <p>The entity protects information from unauthorized access, modification, and misaddressing during transmission and transport using a variety of methods including:</p> <ul style="list-style-type: none"> <li>• Encryption of transmission information.</li> <li>• Batch header and control total reconciliations.</li> <li>• Message authentication codes and hash totals.</li> <li>• Private leased lines or virtual private networking connections with authorized users.</li> <li>• Bonded couriers and tamper-resistant packaging.</li> </ul>

**Criteria****Illustrative Controls**

- 3.2 The procedures related to completeness, accuracy, timeliness, and authorization of system processing, including error correction and database management, are consistent with documented system processing integrity policies.

If the system is an e-commerce system, the entity's procedures include, but are not necessarily limited to, the following matters:

- The correct goods are shipped in the correct quantities in the time frame agreed upon, or services and information are provided to the customer as requested.
- Transaction exceptions are promptly communicated to the customer.
- Incoming messages are processed and delivered accurately and completely to the correct IP address.

Because of the Web-based nature of the input process, the nature of the controls to achieve the criterion set out in 3.1 may take somewhat different forms, such as:

- Account activity, subsequent to successful login, is encrypted through a 128-bit secure sockets layer (SSL) session.
- Web scripts contain error checking for invalid inputs.
- The entity's order processing system contains edits, validity, and range checks, which are applied to each order to check for accuracy and completeness of information before processing.
- Before a transaction is processed by the entity, the customer is presented with a request to confirm the intended transaction and the customer is required to click on the "Yes, please process this order" button before the transaction is processed.

The entity e-mails an order confirmation to the customer-supplied e-mail address. The order confirmation contains order details, shipping and delivery information, and a link to an online customer order tracking service. Returned e-mails are investigated by customer service.

Responsibility for order processing, application of credits and cash receipts, custody of inventory, user account management, and database management have been segregated.

The entity's documented systems development life cycle (SDLC) methodology is used in the development of new applications and the maintenance of existing applications. The methodology contains required procedures for user involvement, testing, conversion, and management approvals of system processing integrity features.

Computer operations and job scheduling procedures exist, are documented, and contain procedures and instructions for operations personnel regarding system processing integrity objectives, policies, and standards. Exceptions require the approval of the manager of computer operations.

The entity's application systems contain edit and validation routines to check for incomplete or inaccurate data. Errors are logged, investigated, corrected, and resubmitted for input. Management reviews error logs daily to ensure that errors are corrected on a timely basis.

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
<ul style="list-style-type: none"> <li>Outgoing messages are processed and delivered accurately and completely to the service provider's (SP's) Internet access point.</li> <li>Messages remain intact while in transit within the confines of the SP's network.</li> </ul>	<p>End-of-day reconciliation procedures include the reconciliation of the number of records accepted to the number of records processed to the number of records output.</p> <p>The following additional controls are included in the entity's e-commerce system:</p> <ul style="list-style-type: none"> <li>Packing slips are created from the customer sales order and checked by warehouse staff as the order is packed.</li> <li>Commercial delivery methods are used that reliably meet expected delivery schedules. Vendor performance is monitored and assessed periodically.</li> <li>Service delivery targets are maintained and actual services provided are monitored against such targets.</li> <li>The entity uses a feedback questionnaire to confirm customer satisfaction with completion of service or delivery of information to the customer.</li> <li>Computerized back-order records are maintained and are designed to notify customers of back orders within 24 hours. Customers are given the option to cancel a back order or have an alternate item delivered.</li> <li>Monitoring tools are used to continuously monitor latency, packet loss, hops, and network performance.</li> <li>The organization maintains network integrity software and has documented network management policies.</li> <li>Appropriately documented escalation procedures are in place to initiate corrective actions to unfavorable network performance.</li> </ul>
<p>3.3 The procedures related to completeness, accuracy, timeliness, and authorization of outputs are consistent with the documented system processing integrity policies.</p> <p>If the system is an e-commerce system, the entity's procedures include, but are not necessarily limited to, the following matters:</p> <ul style="list-style-type: none"> <li>The entity displays sales prices and all other costs and fees to the customer before processing the transaction.</li> </ul>	<p>Written procedures exist for the distribution of output reports that conform to the system processing integrity objectives, policies, and standards.</p> <p>Control clerks reconcile control totals of transaction input to output reports daily, on both a system-wide and an individual customer basis. Exceptions are logged, investigated, and resolved.</p> <p>The customer service department logs calls and customer complaints. An analysis of customer calls, complaints, back-order logs, and other transactional analysis and comparison to the entity's processing integrity policies are reviewed at monthly management meetings, and action plans are developed and implemented as necessary.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
<ul style="list-style-type: none"> <li>• Transactions are billed and electronically settled as agreed.</li> <li>• Billing or settlement errors are promptly corrected.</li> </ul>	<p>The following additional controls are included in the entity's e-commerce system:</p> <ul style="list-style-type: none"> <li>• All costs, including taxes, shipping, and duty costs, and the currency used, are displayed to the customer. Customer accepts the order, by clicking on the "yes" button, before the order is processed.</li> <li>• Customers have the option of printing, before an online order is processed, an "order confirmation" for future verification with payment records (such as credit card statement) detailing information about the order (such as item(s) ordered, sales prices, costs, sales taxes, and shipping charges).</li> <li>• All foreign exchange rates are displayed to the customer before performing a transaction involving foreign currency.</li> <li>• Billing or settlement errors are followed up and corrected within 24 hours of reporting by the customer.</li> </ul>
3.4 There are procedures to enable tracing of information inputs from their source to their final disposition and vice versa.	<p>Input transactions are date and time stamped by the system and identified with the submitting source (user, terminal, IP address).</p> <p>Each order has a unique identifier that can be used to access order and related shipment and payment settlement information. This information can also be accessed by customer name and dates of order, shipping, or billing.</p> <p>The entity maintains transaction histories for a minimum of 10 years. Order history information is maintained online for three years and is available for immediate access by customer service representatives. After three years, this information is maintained in offline storage.</p> <p>Original source documents are retained on image management systems for a minimum of seven years, to facilitate the retrieval or reconstruction of data as well as to satisfy legal requirements.</p> <p>The entity performs an annual audit of tapes stored at the offsite storage facility. As part of the audit, tapes at the offsite location are matched to the appropriate tape management system.</p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
<b>Security-related criteria relevant to the system's processing integrity</b>	
<p>3.5 Procedures exist to restrict logical access to the defined system including, but not limited to, the following matters:</p> <ul style="list-style-type: none"> <li>a. Registration and authorization of new users.</li> <li>b. Identification and authentication of authorized users.</li> <li>c. The process to make changes and updates to user profiles.</li> <li>d. The process to grant system access privileges and permissions.</li> <li>e. Distribution of output restricted to authorized users.</li> <li>f. Restriction of logical access to offline storage, backup data, systems, and media.</li> <li>g. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices (for example, firewalls).</li> </ul>	<ul style="list-style-type: none"> <li>a. Registration and authorization of new users: <ul style="list-style-type: none"> <li>• Customers can self-register on the entity's Web site, under a secure session in which they provide new user information and select an appropriate user identification (ID) and password. Privileges and authorizations associated with self-registered customer accounts provide specific limited system functionality.</li> <li>• The ability to create or modify users and user access privileges (other than the limited functionality "customer accounts") is limited to the security administration team.</li> <li>• The line-of-business supervisor authorizes access privilege change requests for employees and contractors. Customer access privileges beyond the default privileges granted during self-registration are approved by the customer account manager. Proper segregation of duties is considered in granting privileges.</li> </ul> </li> <li>b. Identification and authentication of users: <ul style="list-style-type: none"> <li>• Users are required to log on to the entity's network and application systems with their user ID and password before access is granted. Unique user IDs are assigned to individual users. Passwords must contain at least six characters, one of which is nonalphanumeric. Passwords are case sensitive and must be updated every 90 days.</li> </ul> </li> <li>c. Changes and updates to user profiles: <ul style="list-style-type: none"> <li>• Changes and updates to self-registered customer accounts can be done by the individual user at any time on the entity's Web site after the user has successfully logged onto the system. Changes are reflected immediately.</li> <li>• Unused customer accounts (no activity for six months) are purged by the system.</li> <li>• Changes to other accounts and profiles are restricted to the security administration team and require the approval of the appropriate line-of-business supervisor or customer account manager.</li> <li>• Accounts for terminated employees are deactivated upon notice of termination being received from the human resources team.</li> </ul> </li> </ul>

**Criteria****Illustrative Controls**

- 
- d. The process to grant system access privileges and permissions:
- All paths that allow access to significant information resources are controlled by the access control system and operating system facilities. Access requires users to provide their user ID and password. Privileges are granted to authenticated users based on their user profiles.
  - The login session is terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up.
- e. Distribution of output:
- Access to computer processing output is provided to authorized individuals based on the classification of the information.
  - Processing outputs are stored in an area that reflects the classification of the information.
- f. Restriction of logical access to offline storage, backup data, systems, and media:
- Logical access to offline storage, backup data, systems, and media is limited to computer operations staff.
- g. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices:
- Hardware and operating system configuration tables are restricted to appropriate personnel.
  - Application software configuration tables are restricted to authorized users and under the control of application change management software.
  - Utility programs that can read, add, change, or delete data or programs are restricted to authorized technical services staff. Usage is logged and monitored by the manager of computer operations.
  - The information security team, under the direction of the CIO, maintains access to firewall and other logs, as well as access to any storage media. Any access is logged and reviewed quarterly.
  - A listing of all master passwords is stored in an encrypted database and an additional copy is maintained in a sealed envelope in the entity safe.

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
3.6 Procedures exist to restrict physical access to the defined system including, but not limited to, facilities, offline storage media, backup media and systems, and other system components such as firewalls, routers, and servers.	<p>Physical access to the computer rooms, which house the entity's IT resources, servers, and related hardware such as firewalls and routers, is restricted to authorized individuals by card key systems and monitored by video surveillance.</p> <p>Physical access cards are managed by building security staff. Access card usage is logged. Logs are maintained and reviewed by building security staff.</p> <p>Requests for physical access privileges to the entity's computer facilities require the approval of the manager of computer operations.</p> <p>Documented procedures exist for the identification and escalation of potential security breaches.</p> <p>Offsite backup data and media are stored at service provider facilities. Access to offsite data and media requires the approval of the manager of computer operations.</p>
3.7 Procedures exist to protect against unauthorized logical access to the defined system.	<p>Login sessions are terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up by the security administrator.</p> <p>Virtual private networking (VPN) software is used to permit remote access by authorized users. Users are authenticated by the VPN server through specific "client" software and user ID and passwords.</p> <p>Firewalls are used and configured to prevent unauthorized access. Firewall events are logged and reviewed daily by the security administrator.</p> <p>Unneeded network services (for example, telnet, ftp, and http) are deactivated on the entity's servers. A listing of the required and authorized services is maintained by the IT department. This list is reviewed by entity management on a routine basis for its appropriateness for the current operating conditions.</p> <p>Intrusion detection systems are used to provide continuous monitoring of the entity's network and early identification of potential security breaches.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
3.8 Procedures exist to protect against infection by computer viruses, malicious codes, and unauthorized software.	<p>In connection with other security monitoring, the security administration team participates in user groups and subscribes to services relating to computer viruses.</p> <p>Antivirus software is in place, including virus scans of incoming e-mail messages. Virus signatures are updated at least weekly.</p> <p>Any viruses discovered are reported to the security team and an alert is created for all users notifying them of a potential virus threat.</p>
3.9 Encryption or other equivalent security techniques are used to protect user authentication information and the corresponding session transmitted over the Internet or other public networks.	<p>The entity uses 128-bit secure sockets layer (SSL) encryption for transmission of private or confidential information over public networks, including user ID and password. Users are required to upgrade their browser to the most current version tested and approved for use by the security administration team to avoid possible security problems.</p> <p>Account activity, subsequent to successful login, is encrypted through a 128-bit SSL session. Users are logged out on request (by selecting the "Sign-out" button on the Web site) or after 10 minutes of inactivity.</p>
3.10 Procedures exist to identify, report, and act upon system processing integrity issues and related security breaches and other incidents.	<p>Users are provided instructions for communicating system processing integrity issues and potential security breaches to the IT hotline. Processing integrity issues are escalated to the manager of computer operations. The information security team investigates security-related incidents reported through customer hotlines and e-mail.</p> <p>Production run and automated batch job scheduler logs are reviewed each morning and processing issues are identified, escalated, and resolved.</p> <p>Intrusion detection and other tools are used to identify, log, and report potential security breaches and other incidents. The system notifies the security administration team and/or the network administrator via e-mail and pager of potential incidents in progress. Incident logs are monitored and evaluated by the information security team daily.</p> <p>Documented incident identification and escalation procedures are approved by management.</p>
3.11 Procedures exist to provide that issues of noncompliance with system processing integrity and related security policies are promptly addressed and that corrective measures are taken on a timely basis.	<p>Computer operations team meetings are held each morning to review the previous day's processing. Processing issues are discussed, remedial action is taken, and additional action plans are developed, where necessary, and implemented.</p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>Standard procedures exist for the review, documentation, escalation, and resolution of system processing problems.</p> <p>Entity management routinely evaluates the level of performance it receives from the Internet service provider (ISP) which hosts the entity's Web site. This includes evaluating the security controls the ISP has in place by an independent third party as well as following up with the ISP management on any open items or causes for concern.</p> <p>Processing integrity and related security issues are recorded and accumulated in a problem report. Corrective action is noted and monitored by management.</p> <p>On a routine basis, processing integrity and related security policies, controls, and procedures are audited by the internal audit department. Results of such examinations are reviewed by management, a response is prepared, and a remediation plan is put in place.</p>

**Criteria related to the system components used to achieve the objectives**

3.12 Design, acquisition, implementation, configuration, modification, and management of infrastructure and software related to processing integrity and security are consistent with defined processing integrity and related security policies.

The entity has adopted a formal systems development life cycle (SDLC) methodology that governs the development, acquisition, implementation, and maintenance of computerized information systems and related technology.

The SDLC methodology includes a framework for assigning ownership of systems and classifying data. Process owners are involved in development of user specifications, solution selection, testing, conversion, and implementation.

Owners of the information and data classify its sensitivity and determine the level of protection required to maintain an appropriate level of security.

The security administration team reviews and approves the architecture and design specifications for new systems development and/or acquisition to ensure consistency with the entity's processing integrity and related security objectives, policies, and standards.

Process owner review, approval of test results, and authorization are required for implementation of changes.

3.13 Procedures exist to provide that personnel responsible for the design, development, implementation, and operation of systems affecting processing integrity and security are qualified to fulfill their responsibilities.

A separate systems quality assurance group reporting to the CIO has been established.

The entity has written job descriptions specifying the responsibilities and academic and professional requirements for key job positions.

**Criteria****Illustrative Controls****Maintainability-related criteria applicable to the system's processing integrity**

- 3.14 Procedures exist to maintain system components, including configurations consistent with the defined system processing integrity and related security policies.

Hiring procedures include a comprehensive screening of candidates for key positions and consideration of whether the verified credentials are commensurate with the proposed position. New personnel are offered employment subject to background checks and reference validation.

Candidates, including internal transfers, are approved by the line-of-business manager before the employment position is offered.

Periodic performance appraisals are performed by employee supervisors and include the assessment and review of professional development activities.

Personnel receive training and development in computer operations, system design and development, testing, and security concepts and issues.

Procedures are in place to provide alternate personnel for key system processing functions in case of absence or departure.

Entity management receives a third-party opinion on the adequacy of security controls, and routinely evaluates the level of performance it receives (in accordance with its contractual service-level agreement) from the service provider that hosts the entity's systems and Web site.

The IT department maintains a listing of all software and the respective level, version, and patches that have been applied.

Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.

Staffing, infrastructure, and software requirements are periodically evaluated and resources are allocated consistent with the entity's processing integrity and related security policies.

System configurations are tested annually, and evaluated against the entity's processing integrity and security policies and current service-level agreements. An exception report is prepared and remediation plans are developed and tracked.

The IT steering committee, which includes representatives from the lines of business and customer support, meets monthly and reviews anticipated, planned, or recommended changes to the entity's processing integrity and related security policies, including the potential impact of legislative changes.

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
3.15 Procedures exist to provide that only authorized, tested, and documented changes are made to the system.	<p>Senior management has implemented a division of roles and responsibilities that segregates incompatible functions.</p> <p>The entity's documented systems development methodology describes the change initiation, software development and maintenance, and testing and approval processes, as well as the standards and controls that are embedded in the processes. These include programming, documentation, and testing standards.</p> <p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Changes to system infrastructure and software are developed and tested in a separate development and test environment before implementation into production.</p> <p>As part of the change control policies and procedures, there is a "promotion" process (for example, from "test" to "staging" to "production"). Promotion to production requires the approval of the business owner who sponsored the change and the manager of computer operations.</p> <p>When changes are made to key systems components, there is a "backout" plan developed for use in the event of major interruption(s).</p>
3.16 Procedures exist to provide that emergency changes are documented and authorized (including after-the-fact approval).	<p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Emergency changes that require deviations from standard procedures are logged and reviewed by IT management daily and reported to the affected line-of-business manager. Permanent corrective measures follow the entity's change management process, including line-of-business approvals.</p>

**Availability-related criteria applicable to the system's processing integrity**

3.17 Procedures exist to protect the system against potential risks (for example, environmental risks, natural disasters, and routine operational errors and omissions) that might impair system processing integrity.	<p>A risk assessment is prepared and reviewed on a regular basis or when a significant change occurs in either the internal or external physical environment. Threats such as fire, flood, dust, power failure, excessive heat and humidity, and labor problems have been considered.</p>
--	---

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>Management maintains measures to protect against environmental factors (for example, fire, dust, power failure, and excessive heat and humidity) based on its risk assessment. The entity's controlled areas are protected against fire using both smoke detectors and a fire suppression system. Water detectors are installed within the raised floor areas.</p> <p>The entity site is protected against a disruption in power supply to the processing environment by both uninterruptible power supplies (UPS) and emergency power supplies (EPS). This equipment is tested semiannually.</p> <p>Preventive maintenance agreements and scheduled maintenance procedures are in place for key system hardware components.</p> <p>Vendor warranty specifications are complied with and tested to determine if the system is properly configured.</p> <p>Procedures to address minor processing errors, outages, and destruction of records are documented.</p> <p>Procedures exist for the identification, documentation, escalation, resolution, and review of problems.</p> <p>Physical and logical security controls are implemented to reduce the opportunity for unauthorized actions that could impair system processing integrity.</p>
3.18 Procedures exist to provide for restoration and disaster recovery consistent with the entity's defined processing integrity policies.	<p>Management has implemented a comprehensive strategy for backup and restoration based on a review of business requirements. Backup procedures for the entity are documented and include redundant servers, daily incremental backups of each server, and a complete backup of the entire week's changes on a weekly basis. Daily and weekly backups are stored offsite in accordance with the entity's system policies.</p> <p>Disaster recovery and contingency plans are documented.</p> <p>The disaster recovery plan defines the roles and responsibilities and identifies the critical information technology application programs, operating systems, personnel, data files, and time frames needed to ensure high availability and system reliability based on the business impact analysis.</p> <p>The business continuity planning (BCP) coordinator reviews and updates the business impact analysis with the lines of business annually.</p>

*(continued)*

Criteria	Illustrative Controls
3.19 Procedures exist to provide for the completeness, accuracy, and timeliness of backup data and systems.	<p data-bbox="561 157 1003 270">Disaster recovery and contingency plans are tested annually in accordance with the entity's system policies. Testing results and change recommendations are reported to the entity's management committee.</p> <p data-bbox="561 293 1003 361">The entity's management committee reviews and approves changes to the disaster recovery plan.</p> <p data-bbox="561 383 990 473">All critical personnel identified in the business continuity plan hold current versions of the plan, both onsite and offsite. An electronic version is stored offsite.</p> <p data-bbox="561 526 967 593">Automated backup processes include procedures for testing the integrity of the backup data.</p> <p data-bbox="561 616 982 706">Backups are performed in accordance with the entity's defined backup strategy, and usability of backups is verified at least annually.</p> <p data-bbox="561 729 986 796">Backup systems and data are stored offsite at the facilities of a third-party service provider.</p> <p data-bbox="561 819 996 1024">Under the terms of its service provider agreement, the entity performs an annual verification of media stored at the offsite storage facility. As part of the verification, media at the offsite location are matched to the appropriate media management system. The storage site is reviewed biannually for physical access security and security of data files and other items.</p> <p data-bbox="561 1046 994 1093">Backup systems and data are tested as part of the annual disaster recovery test.</p>
<b>4.0 Monitoring: The entity monitors the system and takes action to maintain compliance with the defined system processing integrity policies.</b>	
4.1 System processing integrity and security performance is periodically reviewed and compared with the defined system processing integrity and related security policies.	<p data-bbox="561 1185 999 1390">System processing is monitored using system monitoring tools by onsite operations staff 24 hours a day, 7 days a week. Processing logs, performance and security incident statistics, and comparisons to approved targets are reviewed by the operations team daily and are accumulated and reported to the IT steering committee monthly.</p> <p data-bbox="561 1413 999 1571">The customer service group monitors system processing and related customer complaints. It provides a monthly report of such matters together with recommendations for improvement, which are considered and acted on at the monthly IT steering committee meetings.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>The information security team monitors the system and assesses the system vulnerabilities using proprietary and other tools. Potential risk is evaluated and compared to service-level agreements and other obligations of the entity. Remediation plans are proposed and implementation is monitored.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. The internal audit function conducts processing integrity and system security reviews as part of its annual audit plan. Results and recommendations for improvement are reported to management.</p>
4.2 There is a process to identify and address potential impairments to the entity's ongoing ability to achieve its objectives in accordance with its defined system processing integrity and related security policies.	<p>System processing is monitored using system monitoring tools by onsite operations staff 24 hours a day, 7 days a week. Processing logs and performance and security incident statistics and comparisons to approved targets are reviewed by the operations team daily and are accumulated and reported to the IT steering committee monthly.</p> <p>Future system processing performance and capacity requirements are projected and analyzed as part of the annual IT planning and budgeting process.</p> <p>Logs are analyzed to identify trends that may have a potential impact on the entity's ability to achieve its system processing integrity and related security objectives.</p> <p>Monthly IT staff meetings are held to address system processing, capacity, and security concerns and trends; findings are discussed at quarterly management meetings.</p>
4.3 Environmental and technological changes are monitored and their impact on system processing integrity and security is assessed on a timely basis.	<p>The entity's data center facilities include climate and environmental monitoring devices. Deviations from optimal performance ranges are escalated and resolved.</p> <p>Senior management, as part of its annual IT planning process, considers developments in technology and the impact of applicable laws or regulations on the entity's processing integrity and related security policies.</p> <p>The entity's customer service group monitors the impact of emerging technologies, customer requirements, and competitive activities.</p>

## Confidentiality Principle and Criteria

.25 The *confidentiality principle* focuses on information designated as confidential. Unlike personal information, which is being defined by regulation in a number of countries worldwide and is subject to the privacy principles (see paragraph .30), there is no widely recognized definition of confidential information. In the course of communicating and transacting business, partners often exchange information they require to be maintained on a confidential basis. In most instances, the respective parties wish to ensure that the information they provide is available only to those individuals who need access to complete the transaction or resolution on any questions that arise. To enhance business partner confidence, it is important that the business partner is informed about the entity's confidentiality practices. The entity needs to disclose its practices relating to the manner in which it provides for authorized access to and uses and shares information designated as confidential.

.26 Examples of the kinds of information that may be subject to confidentiality include:

- Transaction details
- Engineering drawings
- Business plans
- Banking information about businesses
- Inventory availability
- Bid or ask prices
- Price lists
- Legal documents
- Client and customer lists
- Revenue by client and industry

.27 Also, unlike personal information, there are no defined rights of access to confidential information to ensure its accuracy and completeness. As a result, interpretations of what is considered to be confidential information can vary significantly from business to business and in most cases are driven by contractual arrangements. As a result, it is important for those engaged or expecting to be engaged in business relationships to understand and to accept what information is to be maintained on a confidential basis and what, if any, rights of access or other expectations an entity might have to update that information to ensure its accuracy and completeness.

.28 Information that is provided to another party is susceptible to unauthorized access during transmission and while it is stored on the other party's computer systems. For example, an unauthorized party may intercept business partner profile information and transaction and settlement instructions while they are being transmitted. Controls such as encryption can be used to protect the confidentiality of this information during transmission, whereas firewalls and rigorous access controls can help protect the information while it is stored on computer systems.

## Confidentiality Principle and Criteria Table

.29 Information designated as confidential is protected as committed or agreed.

Criteria	Illustrative Controls
<b>1.0 Policies: The entity defines and documents its policies related to the protection of confidential information.</b>	
1.1 The entity's system confidentiality and related security policies are established and periodically reviewed and approved by a designated individual or group.	<p>The entity's documented systems development and acquisition process includes procedures to identify and document authorized users of the system and their confidentiality and related security requirements.</p> <p>User requirements are documented in service-level agreements, nondisclosure agreements, or other documents.</p> <p>The security officer reviews the entity's confidentiality and related security policies annually and proposed changes as needed for the approval by the information technology (IT) standards committee, which includes representation from the customer service department.</p>
<p>1.2 The entity's policies related to the protection of confidential information and security include, but are not limited to, the following matters:</p> <ul style="list-style-type: none"> <li>a. Identification and documentation of the confidentiality and related security requirements of authorized users.</li> <li>b. Allowing access, the nature of that access, and who authorizes such access.</li> <li>c. Preventing unauthorized access.</li> <li>d. The procedures to add new users, modify the access levels of existing users, and remove users who no longer need access.</li> <li>e. Assignment of responsibility and accountability for confidentiality and related security.</li> <li>f. Assignment of responsibility and accountability for system changes and maintenance.</li> <li>g. Testing, evaluating, and authorizing system components before implementation.</li> <li>h. Addressing how complaints and requests relating to confidentiality and related security issues are resolved.</li> </ul>	<p>The entity's documented confidentiality and related security policies contain the elements set out in criterion 1.2.</p>

(continued)

Criteria	Illustrative Controls
<ul style="list-style-type: none"> <li>i. The procedures to handle confidentiality and related security breaches and other incidents.</li> <li>j. Provision for allocation for training and other resources to support its system confidentiality and related security policies.</li> <li>k. Provision for the handling of exceptions and situations not specifically addressed in its system confidentiality and related security policies.</li> <li>l. Provision for the identification of, and consistency with, applicable laws and regulations, defined commitments, service-level agreements, and other contracts.</li> </ul>	<p>Management has assigned responsibilities for implementation of the entity's confidentiality policies to the vice president, human resources team. Responsibility for implementation of the entity's security policies has been assigned to the chief information officer (CIO). Others on the executive committee assist in the review, update, and approval of the policies as outlined in the executive committee handbook.</p> <p>Ownership and custody of significant information resources (for example, data, programs, and transactions) and responsibility for establishing and maintaining confidentiality of and related security over such resources is defined.</p>
<p>1.3 Responsibility and accountability for the entity's confidentiality and related security policies, and changes and updates to those policies, are assigned.</p>	
<p><b>2.0 Communications: The entity communicates its defined policies related to the protection of confidential information to internal and external users.</b></p>	
<p>2.1 The entity has prepared an objective description of the system and its boundaries and communicated such description to authorized users.</p>	<p>For its e-commerce system, the entity has posted a system description on its Web site. <i>[For an example of a system description for an e-commerce system, refer to Appendix A (paragraph .42).]</i></p> <p>For its non-e-commerce system, the entity has provided a system description to authorized users. <i>[For an example of a system description for a non-e-commerce based system, refer to Appendix B (paragraph .43).]</i></p>

<i>Criteria</i>	<i>Illustrative Controls</i>
<p>2.2 The confidentiality and related security obligations of users and the entity's confidentiality and related security commitments to users are communicated to authorized users before the confidential information is provided. This communication includes, but is not limited to, the following matters:</p> <ul style="list-style-type: none"> <li>a. How information is designated as confidential and ceases to be confidential.</li> <li>b. How access to confidential information is authorized.</li> <li>c. How confidential information is used.</li> <li>d. How confidential information is shared.</li> <li>e. If information is provided to third parties, disclosures include any limitations on reliance on the third party's confidentiality practices and controls. Lack of such disclosure indicates that the entity is relying on the third party's confidentiality practices and controls that meet or exceed those of the entity.</li> <li>f. Confidentiality practices needed to comply with applicable laws and regulations.</li> </ul> <p>2.3 Responsibility and accountability for the entity's confidentiality and related security policies and changes and updates to those policies are communicated to entity personnel responsible for implementing them.</p>	<p>The entity's confidentiality and related security commitments and required confidentiality and security obligations of its customers and other external users are posted on the entity's Web site; or the entity's confidentiality policies and practices are outlined in its customer contracts, service-level agreements, vendor contract terms and conditions, and its standard nondisclosure agreement.</p> <p>Signed nondisclosure agreements are required before sharing information designated as confidential with third parties. Customer contracts, service-level agreements, and vendor contracts are negotiated before performance or receipt of service. Changes to the standard confidentiality provisions in these contracts require the approval of executive management.</p> <p>For its internal users (employees and contractors), the entity's policies relating to confidentiality and security are reviewed with new employees and contractors as part of their orientation, and the key elements of the policies and their impact on the employee are discussed. New employees must sign a statement signifying that they have read, understand, and will follow these policies. Each year, as part of their performance review, employees must reconfirm their understanding of and compliance with the entity's security policies. Confidentiality and security obligations of contractors are detailed in their contract.</p> <p>A security awareness program has been implemented to communicate the entity's confidentiality and security policies to employees.</p> <p>The entity publishes its confidentiality and related security policies on its corporate intranet.</p> <p>The security administration team is responsible for implementing the entity's confidentiality and related security policies under the direction of the CIO.</p> <p>The security administration team has custody of and is responsible for the day-to-day maintenance of the entity's confidentiality and related security policies, and recommends changes to the CIO and the IT steering committee.</p> <p>Confidentiality and related security commitments are reviewed with the customer account managers as part of the annual IT planning process.</p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
2.4 The process for informing the entity about breaches of confidentiality and system security and for submitting complaints is communicated to authorized users.	<p>The process for customers and external users to inform the entity of possible confidentiality or security breaches and other incidents is posted on the entity's Web site and/or is provided as part of the new user welcome kit.</p> <p>The entity's security awareness program includes information concerning the identification of possible confidentiality and security breaches and the process for informing the security administration team.</p> <p>Documented procedures exist for the identification and escalation of possible confidentiality or security breaches and other incidents.</p>
2.5 Changes that may affect confidentiality and system security are communicated to management and users who will be affected.	<p>Changes that may affect customers and users and their confidentiality and related security obligations or the entity's confidentiality and security commitments are highlighted on the entity's Web site.</p> <p>Changes that may affect confidentiality and system security are reviewed and approved by affected customers under the provisions of the standard services agreement before implementation of the proposed change.</p> <p>Planned changes to system components and the scheduling of those changes are reviewed as part of the monthly IT steering committee meetings.</p> <p>Changes to system components, including those that may affect system security, require the approval of the security administrator before implementation.</p> <p>There is periodic communication of changes, including changes that may affect confidentiality and system security.</p> <p>Changes that affect confidentiality or system security are incorporated into the entity's ongoing security awareness program.</p>

### **3.0 Procedures: The entity uses procedures to achieve its documented confidentiality objectives in accordance with its defined policies.**

3.1 The entity's procedures provide that confidential information is disclosed to parties only in accordance with its defined confidentiality and related security policies.	<p>Employees are required to sign a confidentiality agreement as a routine part of their employment. This agreement prohibits any disclosures of information and other data to which the employee has access.</p> <p>Logical access controls are in place that limit access to confidential information based on job function and need. Requests for access privileges to confidential data require the approval of the data owner.</p> <p>Business partners are subject to nondisclosure agreements (NDAs) or other contractual confidentiality provisions.</p>
--	--

<i>Criteria</i>	<i>Illustrative Controls</i>
3.2 The entity has procedures to obtain assurance or representation that the confidentiality policies of third parties to whom information is transferred and upon which the entity relies are in conformity with the entity's defined confidentiality and related security policies, and that the third party is in compliance with its policies.	<p>The entity outsources technology support or service and transfers data to an outsource provider. The requirements of the service provider with respect to confidentiality of information provided by the entity are included in the service contract. Legal counsel reviews third-party service contracts to assess conformity of the service provider's confidentiality provisions with the entity's confidentiality policies.</p> <p>The entity obtains representation about the controls that are followed by the outsource provider and obtains a report on the effectiveness of such controls from the outsource provider's independent auditor</p>
3.3 In the event that a disclosed confidentiality practice is discontinued or changed to be less restrictive, the entity has procedures to protect confidential information in accordance with the confidentiality practices in place when such information was received, or obtains customer consent to follow the new confidentiality practice with respect to the customer's confidential information.	<p>Changes to confidentiality provisions in business partner contracts are renegotiated with the business partner.</p> <p>When changes to a less restrictive policy are made, the entity attempts to obtain the agreement of its customers to the new policy. Confidential information for those customers who do not agree to the new policy is either removed from the system and destroyed or isolated and receives continued protection under the old policy.</p>
<b>Security-related criteria relevant to confidentiality</b>	
3.4 Procedures exist to restrict logical access to confidential information including, but not limited to, the following matters:	<p>a. Registration and authorization of new users:</p> <ul style="list-style-type: none"> <li>• Customers can self-register on the entity's Web site, under a secure session in which they provide new user information and select an appropriate user identification (ID) and password. Privileges and authorizations associated with self-registered customer accounts provide specific limited system functionality.</li> <li>• The ability to create or modify users and user access privileges (other than the limited functionality "customer accounts") is limited to the security administration team.</li> <li>• The line-of-business supervisor authorizes access privilege change requests for employees and contractors. Customer access privileges beyond the default privileges granted during self-registration are approved by the customer account manager. Confidentiality and proper segregation of duties are considered in granting privileges</li> </ul>
a. Registration and authorization of new users.	
b. Identification and authentication of all users.	
c. The process to make changes and updates to user profiles.	
d. The process to grant system access privileges and permissions.	
e. Procedures to prevent customers, groups of individuals, or other entities from accessing other than their own confidential information.	
f. Procedures to limit access to confidential information to only	

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
authorized employees based upon their assigned roles and responsibilities.	b Identification and authentication of users.
g. Distribution of output containing confidential information restricted to authorized users	<ul style="list-style-type: none"> <li>Users are required to log on to the entity's network and application systems with their user ID and password before access is granted. Unique user IDs are assigned to individual users. Passwords must contain at least six characters, one of which is nonalphanumeric. Passwords are case sensitive and must be updated every 90 days.</li> </ul>
h. Restriction of logical access to offline storage, backup data, systems, and media.	c Changes and updates to user profiles
i. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices (for example, firewalls)	<ul style="list-style-type: none"> <li>Changes and updates to self-registered customer accounts can be done by the individual user at any time on the entity's Web site after the user has successfully logged onto the system. Changes are reflected immediately.</li> <li>Unused customer accounts (no activity for six months) are purged by the system.</li> <li>Changes to other accounts and profiles are restricted to the security administration team and require the approval of the appropriate line-of-business supervisor or customer account manager.</li> <li>Accounts for terminated employees are deactivated upon notice of termination being received from the human resources team.</li> </ul>
	d. The process to grant system access privileges and permissions:
	<ul style="list-style-type: none"> <li>All paths that allow access to significant information resources are controlled by the access control system and operating system facilities. Access requires users to provide their user ID and password. Privileges are granted to authenticated users based on their user profiles.</li> <li>The login session is terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up.</li> </ul>
	e Restriction of access to information of other customers.
	<ul style="list-style-type: none"> <li>Corporate customers are assigned a unique company identifier that is required as part of the login process. Logical access software is used to restrict user access based on the company identifier used at login.</li> </ul>

**Criteria****Illustrative Controls**

- Individual customers are restricted to their own information based on their unique user ID.
- f. Restriction of access to confidential information:
  - Requests for privileges to access confidential customer information require the approval of the customer account manager.
  - Simulated customer data is used for system development and testing purposes. Confidential customer information is not used for this purpose.
- g. Distribution of output:
  - Access to computer processing output is provided to authorized individuals based on the classification of the information.
  - Processing outputs are stored in an area that reflects the classification of the information.
- h. Restriction of logical access to offline storage, backup data, systems, and media:
  - Logical access to offline storage, backup data, systems, and media is limited to computer operations staff.
- i. Restriction of access to system configurations, superuser functionality, master passwords, powerful utilities, and security devices:
  - Hardware and operating system configuration tables are restricted to appropriate personnel.
  - Application software configuration tables are restricted to authorized users and under the control of application change management software.
  - Utility programs that can read, add, change, or delete data or programs are restricted to authorized technical services staff. Usage is logged and monitored by the manager of computer operations.
  - The information security team, under the direction of the CIO, maintains access to firewall and other logs, as well as access to any storage media. Any access is logged and reviewed quarterly.
  - A listing of all master passwords is stored in an encrypted database and an additional copy is maintained in a sealed envelope in the entity safe.

*(continued)*

<i>Criteria</i>	<i>Illustrative Controls</i>
3.5 Procedures exist to restrict physical access to the defined system including, but not limited to, facilities, backup media, and other system components such as firewalls, routers, and servers.	<p>Physical access to the computer rooms, which house the entity's IT resources, servers, and related hardware such as firewalls and routers, is restricted to authorized individuals by card key systems and monitored by video surveillance.</p> <p>Physical access cards are managed by building security staff. Access card usage is logged. Logs are maintained and reviewed by building security staff.</p> <p>Requests for physical access privileges to the entity's computer facilities require the approval of the manager of computer operations.</p> <p>Documented procedures exist for the identification and escalation of potential security breaches.</p> <p>Offsite backup data and media are stored at service provider facilities. Access to offsite data and media requires the approval of the manager of computer operations.</p>
3.6 Procedures exist to protect against unauthorized logical access to the defined system.	<p>Login sessions are terminated after three unsuccessful login attempts. Terminated login sessions are logged for follow-up by the security administrator.</p> <p>Virtual private networking (VPN) software is used to permit remote access by authorized users. Users are authenticated by the VPN server through specific "client" software and user ID and passwords.</p> <p>Firewalls are used and configured to prevent unauthorized access. Firewall events are logged and reviewed daily by the security administrator.</p> <p>Unneeded network services (for example, telnet, ftp, and http) are deactivated on the entity's servers. A listing of the required and authorized services is maintained by the IT department. This list is reviewed by entity management on a routine basis for its appropriateness for the current operating conditions.</p> <p>Intrusion detection systems are used to provide continuous monitoring of the entity's network and early identification of potential security breaches.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p>
3.7 Procedures exist to protect against infection by computer viruses, malicious codes, and unauthorized software.	<p>In connection with other security monitoring, the security administration team participates in user groups and subscribes to services relating to computer viruses.</p>

<i>Criteria</i>	<i>Illustrative Controls</i>
3.8 A minimum of 128-bit encryption or other equivalent security techniques are used to protect transmissions of user authentication and other confidential information passed over the Internet or other public networks.	<p>Antivirus software is in place, including virus scans of incoming e-mail messages. Virus signatures are updated at least weekly.</p> <p>Any viruses discovered are reported to the security team and an alert is created for all users notifying them of a potential virus threat.</p> <p>The entity uses 128-bit secure sockets layer (SSL) encryption for transmission of private or confidential information over public networks, including user ID and password. Users are required to upgrade their browser to the most current version tested and approved for use by the security administration team to avoid possible security problems.</p> <p>Account activity, subsequent to successful login, is encrypted through a 128-bit SSL session. Users are logged out on request (by selecting the "Sign-out" button on the Web site) or after 10 minutes of inactivity.</p> <p>Confidential information submitted to the entity over its trading partner extranet is encrypted using 128-bit SSL.</p> <p>Transmission of confidential customer information to third-party service providers is done over leased lines.</p>
3.9 Procedures exist to identify, report, and act upon confidentiality and security breaches and other incidents.	<p>Users are provided instructions for communicating potential confidentiality and security breaches to the information security team. The information security team logs incidents reported through customer hotlines and e-mail.</p> <p>Intrusion detection and other tools are used to identify, log, and report potential security breaches and other incidents. The system notifies the security administration team and/or the network administrator via e-mail and pager of potential incidents in progress.</p> <p>Incident logs are monitored and evaluated by the information security team daily.</p> <p>Documented incident identification and escalation procedures are approved by management.</p>
3.10 Procedures exist to provide that issues of noncompliance with defined confidentiality and related security policies are promptly addressed and that corrective measures are taken on a timely basis.	<p>Security and confidentiality problems are reported immediately to the customer account manager, recorded, and accumulated in a problem report. Corrective action, decided upon in conjunction with the customer account manager, is noted and monitored by management.</p> <p>The vice president, customer services is responsible for assessing the customer service impact of potential confidentiality breaches and coordinating response activities.</p>

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
	<p>On a routine basis, security policies, controls, and procedures are audited by the internal audit department. Results of such examinations are reviewed by management, a response is prepared, and a remediation plan is put in place.</p>
<b>Criteria related to the system components used to achieve the objectives</b>	
3.11 Design, acquisition, implementation, configuration, modification, and management of infrastructure and software related to confidentiality and security are consistent with defined confidentiality and related security policies.	<p>The entity has adopted a formal systems development life cycle (SDLC) methodology that governs the development, acquisition, implementation, and maintenance of computerized information systems and related technology.</p> <p>The SDLC methodology includes a framework for classifying data, including customer confidentiality requirements. Standard user profiles are established based on customer confidentiality requirements and an assessment of the business impact of the loss of security. Users are assigned standard profiles based on needs and functional responsibilities.</p> <p>Internal information is assigned to an owner based on its classification and use. Customer account managers are assigned as custodians of customer data. Owners of internal information and custodians of customer information and data classify its sensitivity and determine the level of protection required to maintain an appropriate level of confidentiality and security.</p> <p>The security administration team reviews and approves the architecture and design specifications for new systems development and/or acquisition to ensure consistency with the entity's confidentiality and related security policies.</p> <p>Changes to system components that may affect security require the approval of the security administration team.</p> <p>The access control and operating system facilities have been installed, including the implementation of options and parameters, to restrict access in accordance with the entity's confidentiality and related security policies.</p> <p>The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. Results and recommendations for improvement are reported to management.</p>

<i><b>Criteria</b></i>	<i><b>Illustrative Controls</b></i>
3.12 Procedures exist to provide that personnel responsible for the design, development, implementation, and operation of systems affecting confidentiality and security are qualified to fulfill their responsibilities.	<p>The entity has written job descriptions specifying the responsibilities and academic and professional requirements for key job positions.</p> <p>Hiring procedures include a comprehensive screening of candidates for key positions and consideration of whether the verified credentials are commensurate with the proposed position. New personnel are offered employment subject to background checks and reference validation.</p> <p>Candidates, including internal transfers, are approved by the line-of-business manager before the employment position is offered.</p> <p>Periodic performance appraisals are performed by employee supervisors and include the assessment and review of professional development activities.</p> <p>Personnel receive training and development in systems confidentiality and security concepts and issues.</p> <p>Procedures are in place to provide alternate personnel for key system confidentiality and security functions in case of absence or departure.</p>

**Maintainability-related criteria relevant to confidentiality**

3.13 Procedures exist to maintain system components, including configurations consistent with the defined system confidentiality and related security policies.	<p>Entity management receives a third-party opinion on the adequacy of security controls, and routinely evaluates the level of performance it receives (in accordance with its contractual service-level agreement) from the service provider that hosts the entity's systems and Web site.</p> <p>The IT department maintains a listing of all software and the respective level, version, and patches that have been applied.</p> <p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Staffing, infrastructure, and software requirements are periodically evaluated and resources are allocated consistent with the entity's confidentiality and related security policies.</p> <p>System configurations are tested annually, and evaluated against the entity's security policies and current service-level agreements. An exception report is prepared and remediation plans are developed and tracked.</p>
---	--

(continued)

<i>Criteria</i>	<i>Illustrative Controls</i>
3.14 Procedures exist to provide that only authorized, tested, and documented changes are made to the system.	The IT steering committee, which includes representatives from the lines of business and customer support, meets monthly and reviews anticipated, planned, or recommended changes to the entity's confidentiality and related security policies, including the potential impact of legislative changes.
	<p>Senior management has implemented a division of roles and responsibilities that segregates incompatible functions.</p> <p>The entity's documented systems development methodology describes the change initiation, software development and maintenance, and approval processes, as well as the standards and controls that are embedded in the processes. These include programming, documentation, and testing standards.</p> <p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Changes to system infrastructure and software are developed and tested in a separate development or test environment before implementation into production.</p> <p>As part of the change control policies and procedures, there is a "promotion" process (for example, from "test" to "staging" to "production"). Promotion to production requires the approval of the business owner who sponsored the change and the manager of computer operations.</p> <p>When changes are made to key systems components, there is a "backout" plan developed for use in the event of major interruption(s).</p>
3.15 Procedures exist to provide that emergency changes are documented and authorized (including after-the-fact approval).	<p>Requests for changes, system maintenance, and supplier maintenance are standardized and subject to documented change management procedures. Changes are categorized and ranked according to priority, and procedures are in place to handle urgent matters. Change requestors are kept informed about the status of their requests.</p> <p>Emergency changes that require deviations from standard procedures are logged and reviewed by IT management daily and reported to the affected line-of-business manager. Permanent corrective measures follow the entity's change management process, including line-of-business approvals.</p>

Criteria	Illustrative Controls
<b>4.0 Monitoring: The entity monitors the system and takes action to maintain compliance with its defined confidentiality policies.</b>	
4.1 The entity's confidentiality and security performance is periodically reviewed and compared with the defined confidentiality and related security policies.	The information security team monitors the system and assesses the system's vulnerabilities using proprietary and other tools. Potential risk is evaluated and compared to service-level agreements and other obligations of the entity. Remediation plans are proposed and implementation is monitored.
4.2 There is a process to identify and address potential impairments to the entity's ongoing ability to achieve its objectives in accordance with its confidentiality and related security policies.	The entity contracts with third parties to conduct periodic security reviews and vulnerability assessments. The internal audit function conducts system security reviews as part of its annual audit plan. Results and recommendations for improvement are reported to management.  Logs are analyzed to identify trends that may have a potential impact on the entity's ability to achieve its system confidentiality and related security objectives.
4.3 Environmental and technological changes are monitored and their impact on confidentiality and security is assessed on a timely basis.	Monthly IT staff meetings are held to address system security concerns and trends; findings are discussed at quarterly management meetings.  Trends and emerging technologies and their potential impact on customer confidentiality requirements are reviewed with corporate customers as part of the annual performance review meeting.  Senior management, as part of its annual IT planning process, considers developments in technology and the impact of applicable laws or regulations on the entity's confidentiality and related security policies.  The entity's customer service group monitors the impact of emerging technologies, customer requirements, and competitive activities.

## Privacy Principles and Criteria

**.30** This section provides a brief overview and privacy concepts, objectives and principles. The complete set of privacy principles is contained in *Generally Accepted Privacy Principles—A Global Privacy Framework* (GAPP) found in Appendix D [paragraph .45].

**.31** The *privacy principles*, which are included in GAPP, focus on protecting the personal information an organization may collect about its customers, employees and other individuals. Generally Accepted Privacy Principles have been developed from a business perspective, referencing significant domestic and international privacy regulations. GAPP operationalizes complex privacy requirements into a single privacy objective that is supported by ten privacy principles.

**Privacy Concepts***Privacy Definition*

**.32** Under Generally Accepted Privacy Principles, privacy is defined as *the rights and obligations of individuals and organizations with respect to the collection, use, retention, and disclosure of personal information.*

*Personal Information*

**.33** *Personal information* is information that is, or can be, about or related to an identifiable individual. It includes any information that can be linked to an individual or used to directly or indirectly identify an individual. Most information collected by an organization about an individual is likely to be considered personal information if it can be attributed to an identified individual. Some examples of personal information are:

- Name
- Home or e-mail address
- Identification number (e.g., a Social Security or Social Insurance Number)
- Physical characteristics
- Consumer purchase history

**.34** Some personal information is considered *sensitive*. Some laws and regulations define the following to be sensitive personal information:

- Information on medical or health conditions
- Financial information
- Racial or ethnic origin
- Political opinions
- Religious or philosophical beliefs
- Trade union membership
- Sexual preferences
- Information related to offenses or criminal convictions

**.35** Sensitive personal information generally requires an extra level of protection and a higher duty of care. For example, the use of sensitive information may require explicit consent rather than implicit consent.

**.36** Some information about or related to people cannot be associated with specific individuals. Such information is referred to as nonpersonal information. This includes statistical or summarized personal information for which the identity of the individual is unknown or linkage to the individual has been removed. In such cases, the individual's identity cannot be determined from the information that remains, because the information is "de-identified" or "anonymized." Nonpersonal information ordinarily is not subject to privacy protection because it cannot be linked to an individual.

*Privacy or Confidentiality?*

**.37** As discussed in the Confidentiality Principle, personal information is different from confidential information. Unlike personally identifiable

information, which is often defined by regulation in a number of countries worldwide, there is no single definition of confidential information that is widely recognized. In the course of communicating and transacting business, partners often exchange information or data that one or the other party requires to be maintained on a “need to know” basis.

### **Generally Accepted Privacy Principles**

#### *Overall Privacy Objective*

**.38** Generally Accepted Privacy Principles are founded on the following privacy objective:

*Personal information is collected, used, retained, and disclosed in conformity with the commitments in the entity's privacy notice and with criteria set forth in Generally Accepted Privacy Principles issued by the AICPA/CICA.*

#### *The Privacy Principles*

**.39** Generally Accepted Privacy Principles are essential to the proper protection and management of personal information. They are based on internationally known fair information practices included in many privacy laws and regulations of various jurisdictions around the world and recognized good privacy practices.

The following are the 10 Generally Accepted Privacy Principles:

1. *Management.* The entity defines, documents, communicates, and assigns accountability for its privacy policies and procedures.
2. *Notice.* The entity provides notice about its privacy policies and procedures and identifies the purposes for which personal information is collected, used, retained, and disclosed.
3. *Choice and Consent.* The entity describes the choices available to the individual and obtains implicit or explicit consent with respect to the collection, use, and disclosure of personal information.
4. *Collection.* The entity collects personal information only for the purposes identified in the notice.
5. *Use and Retention.* The entity limits the use of personal information to the purposes identified in the notice and for which the individual has provided implicit or explicit consent. The entity retains personal information for only as long as necessary to fulfill the stated purposes.
6. *Access.* The entity provides individuals with access to their personal information for review and update.
7. *Disclosure to Third Parties.* The entity discloses personal information to third parties only for the purposes identified in the notice and with the implicit or explicit consent of the individual.
8. *Security for Privacy.* The entity protects personal information against unauthorized access (both physical and logical).
9. *Quality.* The entity maintains accurate, complete, and relevant personal information for the purposes identified in the notice.
10. *Monitoring and Enforcement.* The entity monitors compliance with its privacy policies and procedures and has procedures to address privacy-related complaints and disputes.

For each of the 10 privacy principles, relevant, objective, complete, and measurable criteria have been developed for evaluating an entity's privacy policies, communications, and procedures and controls.

.40 These criteria are set forth in a separate publication *Generally Accepted Privacy Principles—A Global Privacy Framework*.

### **Online Privacy Engagements**

.41 When the privacy engagement relates to an online segment, an entity may choose to display a WebTrust Online Privacy seal. For these engagements, the scope needs to include, as a minimum, an online business segment of the entity. For additional considerations see Appendix C of the GAPP document.

## Appendix A

### Illustrative Disclosures for E-Commerce Systems

This appendix sets out illustrative disclosures for electronic commerce (e-commerce) systems that are required to meet the Trust Services principles. The disclosures are set out separately by Trust Services principles; they are illustrative only and should be tailored according to the particular organization's system.

#### System Description

Rather than addressing the components of a system (used for describing non-e-commerce systems), an organization may describe the functionality of the system covered by the WebTrust examination, as follows:

##### Example System Description

Our site (abc-xyz.org) enables users to create and manage their own online store (myABC-xyz.org). It also covers the back-end fulfillment and settlement systems that integrate with abc-xyz.org to facilitate ordering from customer sites created on our site and the use of third-party service providers with which we have contracted to provide various services related to our site.

Entrepreneurs and small business owners can use the abc-xyz.org suite of business services to take advantage of the online world. abc-xyz.org's Web browser interface can be used to create your own online store (complete with product ordering). You design the site and control the customer experience.

The WebTrust seal covers the functionality set out in our abc-xyz.org site that allows users to create and manage their own online store. It also covers the back-end fulfillment and settlement systems that integrate with abc-xyz.org to facilitate ordering from customer sites created on abc-xyz.org, myABC-xyz.org—e-commerce and Web publishing made easy. Entrepreneurs and small business owners can use the abc-xyz.org suite of business services to take advantage of the convenience, reach, and speed of the online world. myABC-xyz.org's simple Web browser interface can be used to create your own online store (complete with secure ordering) within minutes. You design the site, control the customer experience, list the products, and fulfill orders in a secure environment.

#### Disclosures Related to Specific Principles and Criteria

The following tables set out illustrative disclosures for e-commerce systems.

**Security**

<i>Criteria Reference</i>	<i>Illustrative Disclosures</i>
2.2 The security obligations of users and the entity's security commitments to users are communicated to authorized users.	<p>Even though we strive to protect the information you provide through ABC.com, no data transmission over the Internet can be guaranteed to be 100 percent secure. As a result, even though we strive to protect your information, we cannot ensure or warrant the security of any information you transmit to or receive from us through our Web site and online services.</p> <p>We review our security policies on a regular basis, and changes are made as necessary. They undergo an intense review on an annual basis by the information technology (IT) department. These defined security policies detail access privileges, information collection needs, accountability, and other such matters. Documented system security objectives, policies, and standards are consistent with system security requirements defined in contractual, legal, and other service-level agreements. For example, only a select group of authorized individuals within ABC have access to user information. A complete policy with details regarding access, scripting, updates, and remote access is available for review by qualified personnel within the organization. This document is not available to the general public for study.</p> <p>ABC.com operates secure data networks that are password-protected and are not available to the public. When transmitting information between you and ABC.com, data security is handled through a security protocol called secured sockets layer (SSL). SSL is an Internet security standard using data encryption and Web server authentication.</p> <p>Encryption strength is measured by the length of the key used to encrypt the data; that is, the longer the key, the more effective the encryption. Using the SSL protocol, data transmission between you and the ABC.com server is performed at a 128-bit level of encryption strength.</p>
2.4 The process for informing the entity about breaches of the system security and for submitting complaints is communicated to authorized users.	Should you feel that there has been a breach to the security of this site, please contact us <i>immediately</i> at (800) 123-1234.
2.5 Changes that may affect system security are communicated to management and users who will be affected.	Any changes that affect the security of our Web site as it affects you as a site user will be communicated to you by posting the highlight of the change to the Web page that summarizes our security policies and significant controls.

**Availability**

<i>Criteria Reference</i>	<i>Illustrative Disclosures</i>
2.2 The availability and related security obligations of users and the entity's availability and related security commitments to users are communicated to authorized users.	<p>To allow sufficient time for file maintenance and backup, the maximum number of hours per day that our network will be made available is 22 hours per day, 7 days a week. In the event of a disaster or other prolonged service interruption, the entity has arranged for the use of alternative service sites to allow for full business resumption within 24 hours.</p> <p>Our company's defined security policies detail access privileges, information collection needs, accountability, and other such matters. They are reviewed and updated at quarterly management meetings and undergo an intense review on an annual basis by the information technology (IT) department. Documented system security objectives, policies, and standards are consistent with system security requirements defined in contractual, legal, and other service-level agreements. For example, current policy prohibits shared identifications (IDs); each support person has his or her own unique ID to log on and maintain network equipment. A complete policy with details regarding access, scripting, updates, and remote access is available for review by qualified personnel. This document will not be released to the general public for study.</p>
2.4 The process for informing the entity about system availability issues and breaches of system security and for submitting complaints is communicated to authorized users.	<p>Management has in place a consumer hotline to allow customers to telephone in any comments, complaints, or concerns regarding the security of the site and availability of the system. If you are unable to obtain access to this site, please contact our customer support personnel at (800) 123-2345. Should you believe that there has been a breach to the security of this site please contact us <i>immediately</i> at (800) 123-1234.</p>
2.5 Changes that may affect system availability and system security are communicated to management and users who will be affected.	<p>Highlights of any changes that affect the security of our Web site and availability of the system as it affects you as a site user will be communicated to you by e-mail seven days in advance of the anticipated change. The highlights of the change will be posted to the Web page that summarizes our availability and security policies.</p>

**Processing Integrity****Criteria Reference**

- 2.1 The entity has prepared an objective description of the system and its boundaries and communicated such description to authorized users.

If the system is an e-commerce system, additional information provided on its Web-site includes, but may not be limited to, the following matters:

- a. Descriptive information about the nature of the goods or services that will be provided, including, where appropriate:
  - Condition of goods (meaning, whether they are new, used, or reconditioned).
  - Description of services (or service contract).
  - Sources of information (meaning, where it was obtained and how it was compiled).
- b. The terms and conditions by which it conducts its e-commerce transactions including, but not limited to, the following matters:
  - Time frame for completion of transactions (*transaction* means fulfillment of orders where goods are being sold and delivery of service where a service is being provided).
  - Time frame and process for informing customers of exceptions to normal processing of orders or service requests.
  - Normal method of delivery of goods or services, including customer options, where applicable.

**Illustrative Disclosures**

You can purchase new and used books on our site; used books are clearly labeled as such.

The mortgage rate information we obtain for your brokerage transaction is gathered from 12 different lending institutions on a daily basis. A complete listing of these lending institutions can be obtained by clicking here [*insert hot link / URL*].

ABC's Online RFQ Brokerage is the online clearing house for requests for quotes (RFQ) on custom-made parts. Through our unique service, OEM manufacturers looking for parts will be connected to contract manufacturers looking for work.

RFQs published on our online brokerage undergo an intensive review process to ensure that contract manufacturers get all the information needed to compose a quote. ABC's trained personnel will work closely with OEM manufacturers new to the outsourcing market to ease their fears.

Contract manufacturers participating in the RFQ bidding process are members of ABC's BizTrust program. New members are subjected to an assortment of checks such as credit checks and reference checks to ensure that they are qualified to bid on RFQs. The results from these checks are organized into an easy-to-read BizTrust Report accessible by all members of ABC.

The nationwide survey, conducted by the compensation-research firm of Dowden & Co., presents data on 20X2 compensation gathered from among more than 900 employers of information systems professionals, including corporations of all sizes, in every industry group, and from every U.S. region. The survey was completed July 20X1.

Our policy is to ship orders within one week of receipt of a customer-approved order. Our experience is that over 90 percent of our orders are shipped within 48 hours; the remainder is shipped within one week.

We will notify you by e-mail within 24 hours if we cannot fulfill your order as specified at the time you placed it and will provide you the option of canceling the order without further obligation. You will not be billed until the order is shipped.

You have the option of downloading the requested information now or we will send it to you on CD-ROM by UPS two-day or Federal Express overnight delivery.

<i>Criteria Reference</i>	<i>Illustrative Disclosures</i>
<ul style="list-style-type: none"> <li>• Payment terms, including customer options, if any.</li> <li>• Electronic settlement practices and related charges to customers.</li> <li>• How customers may cancel recurring charges, if any.</li> <li>• Product return policies and limited liability, where applicable.</li> </ul> <p>c. Where customers can obtain warranty, repair service, and support related to the goods and services purchased on its Web site.</p> <p>d. Procedures for resolution of issues regarding processing integrity. These may relate to any part of a customer's e-commerce transaction, including complaints related to the quality of services and products, accuracy, completeness, and the consequences for failure to resolve such complaints.</p>	<p>Credit approval is required before shipment. All goods will be invoiced on shipment according to either our normal terms of settlement (net 30 days), or where alternative contractual arrangements are in place, those arrangements shall prevail.</p> <p>We require an electronic funds transfer of fees and costs at the end of the transaction. For new customers, a deposit may be required.</p> <p>To cancel your monthly service fee, send us an e-mail at <a href="mailto:Subscriber@ABC.com">Subscriber@ABC.com</a> or call us at (800) 555-1212. Be sure to include your account number.</p> <p>Purchases can be returned for a full refund within 30 days of receipt of shipment. Call our toll-free number or e-mail us for a return authorization number, which should be written clearly on the outside of the return package.</p> <p>Warranty and other service can be obtained at any one of our 249 locations worldwide that are listed on this Web site. A list of these locations is also provided with delivery of all of our products.</p> <p>Transactions at this site are covered by binding arbitration conducted through our designated arbitrator [<i>name of arbitrator</i>]. They can be reached at <a href="http://www.name.org">www.name.org</a> or by calling toll-free (800) 111-2222. For the details of the terms and conditions of arbitration, click here [<i>insert hot link / URL</i>].</p> <p>Our process for consumer dispute resolution requires that you contact our customer toll-free hotline at (800) 555-1234 or contact us via e-mail at <a href="mailto:custhelp@ourcompany.com">custhelp@ourcompany.com</a>. If your problem has not been resolved to your satisfaction you may contact the Cyber Complaint Dispute Resolution Association, which can be reached at (877) 123-4321 during normal business hours (8:00 a.m. – 5:00 p.m. central time) or via their Web site at <a href="http://www.ccomplaint.com">www.ccomplaint.com</a>.</p> <p>For the details of the terms and conditions of arbitration, click here [<i>insert hot link / URL</i>].</p> <p>For transactions at this site, should you, our customer, require follow-up or response to your questions or complaints, you may contact us at <a href="http://www.xxxquestions.org">www.xxxquestions.org</a>. If your follow-up or your complaint is not handled to your satisfaction, you should contact the e-commerce ombudsman who handles consumer complaints for e-commerce in this country. He or she can be reached at <a href="http://www.ecommercombud.org">www.ecommercombud.org</a> or by calling toll-free at (800) XXX-XXXX.</p>

(continued)

Criteria Reference	Illustrative Disclosures
2.2 The processing integrity and related security obligations of users and the entity's processing integrity and related security commitments to users are communicated to authorized users.	<p>Our company's defined processing integrity policies and related security policies are communicated to all authorized users of the company. The security policies detail access privileges, information collection needs, accountability, and other such matters. They are reviewed and updated at quarterly management meetings and undergo an intense review on an annual basis by the information technology (IT) department. Documented system security objectives, policies, and standards are consistent with system security requirements defined in contractual, legal, and other service-level agreements. For example, current policy prohibits shared identifications (IDs); each support person has his or her own unique ID to log on and maintain network equipment. A complete policy with details regarding access, scripting, updates, and remote access is available for review by qualified personnel. This document will not be released to the general public for study.</p>
2.4 The process for obtaining support and informing the entity about system processing integrity issues, errors and omissions, and breaches of systems security and for submitting complaints is communicated to authorized users.	<p>For service and other information, contact one of our customer service representatives at (800) 555-1212 between 7:00 a.m. and 8:00 p.m. (central standard time) or you can write to us as follows:</p> <p>Customer Service Department ABC Company 1234 Anystreet Anytown, Illinois 60000 or CustServ@ABC.com</p> <p>Should you believe that there has been a breach to the integrity or security of this site, please contact us <i>immediately</i> at (800) 123-1234.</p>
2.5 Changes that may affect system processing integrity and system security are communicated to management and users who will be affected.	<p>Highlights of any changes that affect the security of our Web site and processing integrity of the system as it affects you as a site user will be communicated to you by e-mail seven days in advance of the anticipated change. The highlights of the change will be posted to the Web page that summarizes our processing integrity and security policies.</p>

**Confidentiality*****Criteria Reference***

- 2.2 The confidentiality and related security obligations of users and the entity's confidentiality and related security commitments to users are communicated to authorized users before the confidential information is provided. This communication includes, but is not limited to, the following matters:
- a. How information is designated as confidential and ceases to be confidential.
  - b. How access to confidential information is authorized.
  - c. How confidential information is used.
  - d. How confidential information is shared.
  - e. If information is provided to third parties, disclosures include any limitations on reliance on the third party's confidentiality practices and controls. Lack of such disclosure indicates that the entity is relying on the third party's confidentiality practices and controls that meet or exceed those of the entity.
  - f. Confidentiality practices needed to comply with applicable laws and regulations.

***Illustrative Disclosures***

XYZ manufacturing.com is a high-quality custom manufacturer of electronic components. Customers and potential customers can submit engineering drawings, specifications, and requests for manufacturing price quotes through our Web site or e-mail.

Access to your information is limited to our employees and any third-party subcontractors we may elect to use in preparing our quote. We will not use any information you provide for any purpose other than a price quote and subsequent manufacturing and order fulfillment on your behalf. However, access may need to be provided in response to subpoenas, court orders, legal process, or other needs to comply with applicable laws and regulations.

Using our encryption software, you may designate information as confidential by checking the "Confidential Treatment" box. This software can be downloaded from our site and will accept information in most formats. Such information will automatically be encrypted using our public key before transmission over the Internet. You may transmit such information to us through our Web site or by e-mail.

Access to information designated as confidential will be restricted only to our employees with a need to know. We will not provide such information to third parties without your prior permission.

When we provide information to third parties, we do not provide your company name. However, we make no representation regarding third-party confidential treatment of such information.

Our confidentiality protection is for a period of two years, after which we will cease to provide such protection. In addition, should such information become public through your actions or other means, our confidentiality protection ceases.

If you are not a customer at the time of submitting such information, you will be provided with an account number and password. You may use this account number and password to access the information you have submitted, plus any related price quote information provided by us. You may also set up an additional 10 sub-accounts and passwords so others in your organization can also access this information.

Our services and the protection of confidential information are subject to third-party dispute resolution. This process is described under "Arbitration Process" elsewhere on our Web site.

*(continued)*

<i>Criteria Reference</i>	<i>Illustrative Disclosures</i>
2.4 The process for informing the entity about breaches of confidentiality and system security and for submitting complaints is communicated to authorized users.	<p>If you have any questions about our organization or our policies on confidentiality as stated at this site, please contact CustServ@XYZ-manufacturing.com.</p> <p>Should you feel that there has been a breach to the security of this site, please contact us <i>immediately</i> at (800) 123-1234.</p>
2.5 Changes that may affect confidentiality and system security are communicated to management and users who will be affected.	<p>Effective January 200X, we eliminated our “secret” category of information. Information submitted under such secret category will continue to be protected in accordance with our commitments at that time.</p>

**Privacy**

See Generally Accepted Privacy Principles in Appendix D [paragraph .45] for related criteria.

## Appendix B

### Example System Description for Non-E-Commerce Systems

The purpose of a system description is to delineate the boundaries of the system covered by management's assertion or the subject matter of the practitioner's report (in this example, a pension processing service). The system description should be an integrated part of the entity's communication of policies related to the specific principles subject to the practitioner's attestation. In all cases, the system description should accompany the practitioner's report.

#### Background

XYZ Co. Pension Services (XPS), based in New York, New York, with offices across North America, manages and operates the Pension Administration System (PAS) on behalf of pension plan sponsors who are XPS Co.'s customers. The plan members are the employees of XPS Co.'s customers who are enrolled in the pension plan. XPS uses PAS for recordkeeping of pension-related activities.

#### Infrastructure

PAS uses a three-tier architecture, including proprietary client software, application servers, and database servers.

Various peripheral devices, such as tape cartridge silos, disk drives, and laser and impact printers, are also used.

#### Software

The PAS application was developed by programming staff in XITD's (XYZ Co.'s Information Technology Department) Systems Development and Application Support area. PAS enables the processing of contributions to members' pension plans and withdrawals at retirement, based on plan rules. PAS generates all the required reports for members, plan sponsors, and tax authorities. PAS also provides a facility to record investments and related transactions (purchases, sales, dividends, interest, and other miscellaneous transactions). Batch processing of transactions is performed nightly.

PAS provides a facility for online data input and report requests. In addition, PAS accepts input from plan sponsors in the form of digital or magnetic media or files transmitted via the telecommunications infrastructure.

#### People

XPS has a staff of approximately 200 employees organized in the following functional areas:

- Pension administration includes a team of specialists for set-up of pension rules, maintenance of master files, processing of contributions to PAS, reporting to plan sponsors and members, and assistance with inquiries from plan members;

- Financial operations is responsible for processing of withdrawals, deposit of contributions and investment accounting;
- Trust accounting is responsible for bank reconciliation; and
- Investment services is responsible for processing purchases of stocks, bonds, certificates of deposits, and other financial instruments.

XITD has a staff of approximately 50 employees who are dedicated to PAS and related infrastructure and are organized in the following functional areas:

- The help desk provides technical assistance to users of PAS and other infrastructure, as well as plan sponsors.
- Systems development and application support provides application software development and testing for enhancements and modifications to PAS.
- Product support specialists prepare documentation manuals and training material.
- Quality assurance monitors compliance with standards, and manages and controls the change migration process.
- Information security and risk is responsible for security administration, intrusion detection, security monitoring, and business-recovery planning.
- Operational services performs day-to-day operation of servers and related peripherals.
- System software services installs and tests system software releases, monitors daily system performance, and resolves system software problems.
- Technical delivery services maintains job scheduling and report distribution software, manages security administration, and maintains policies and procedures manuals for the PAS processing environment.

Voice and data communications maintains the communication environment, monitors the network and provides assistance to users and plan sponsors in resolving communication problems and network planning.

### **Procedures**

The pension administration services covered by this system description include:

- Pension master file maintenance.
- Contributions.
- Withdrawals.
- Investment accounting.
- Reporting to members.

These services are supported by XYZ Co.'s Information Technology Department (XITD), which supports PAS 24 hours a day, 7 days a week. The key support services provided by XITD include:

- Systems development and maintenance.
- Security administration and auditing.

- Intrusion detection and incident response.
- Data center operations and performance monitoring.
- Change controls.
- Business recovery planning.

**Data**

Data, as defined for the PAS, constitutes the following:

- Master file data.
- Transaction data.
- Error and suspense logs.
- Output reports.
- Transmission records.
- System and security files.

Transaction processing is initiated by the receipt of paper documents, electronic media, or calls to XYZ's call center. Transaction data are processed by PAS in either online or batch modes of processing, and are used to update master files. Output reports are available either in hard copy or through a report-viewing facility to authorized users based on their job functions. Pension statement and transaction notices are mailed to plan sponsors and members.

## Appendix C

### Practitioner Guidance on Scoping and Reporting Issues

This appendix deals with issues related to engagement planning, performance, and reporting using the Trust Services principles and criteria. It does not deal with reporting issues under the WebTrust® Program for Certification Authorities. This has been separately considered and issued.<sup>1</sup>

Specifically, this section deals with:

- Engagement elements.
- The practitioner's report.
- Reporting on multiple principles.
- Additional reporting guidance.
- Agreed-upon procedure engagements.
- Other matters.

As Trust Services attestation or audit reports are issued under Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), as amended, the practitioner should be familiar with the relevant standards.

### Engagement Elements

#### *Trust Services Principles*

Trust Services provides for a modular approach using five different principles—security, availability, processing integrity, confidentiality, and privacy. It is possible for the client to request a separate Trust Services examination that covers one or any combination of the principles. Principles provide the basis for describing various aspects of the system under examination with logical groupings of suitable criteria.

#### *Trust Services Criteria*

Criteria are the benchmarks used to measure and present the subject matter and against which the practitioner evaluates the subject matter.

Under the U.S. attestation standards,<sup>2</sup> suitable criteria must have each of the following attributes:

- *Objectivity*—Criteria should be free from bias.
- *Measurability*—Criteria should permit reasonably consistent measurements, qualitative or quantitative, of subject matter.

---

<sup>1</sup> Audit reporting for certification authorities is dealt with in TSP section 200, *Trust Services Principles, Criteria, and Illustrations for WebTrust® for Certification Authorities*

<sup>2</sup> See Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements (SSAE) No. 10 *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101.24)

- *Completeness*—Criteria should be sufficiently complete so that those relevant factors that would alter a conclusion about subject matter are not omitted.
- *Relevance*—Criteria should be relevant to the subject matter.

The Trust Services criteria meet the requirement for being suitable criteria and are the result of a public exposure and comment process.

### ***Management's Assertion***

Under AICPA attestation standards, management must provide the practitioner with a written assertion or the practitioner will be required to modify his or her report.<sup>3</sup> Specifically, management asserts that, during the period covered by the report and based on the AICPA/CICA Trust Services criteria, it maintained effective controls over the system under examination to satisfy the stated Trust Services principle(s). For engagements covering only certain principles, management's assertion should only address the principles covered by the engagement.

In a WebTrust engagement, the practitioner is engaged to examine both that an entity complied with the Trust Services criteria and that it maintained effective controls over the system based on the Trust Services criteria. In order to receive a WebTrust seal, both compliance and operating effectiveness must be addressed. This differs from a SysTrust® engagement in which the practitioner is engaged to examine only that an entity maintained effective controls over the system under examination based on the Trust Services criteria.

Under the AICPA standards, the practitioner may report on either management's assertion or the subject matter of the engagement. When the practitioner reports on the assertion, the assertion should accompany the practitioner's report or the first paragraph of the report should contain a statement of the assertion.<sup>4</sup> When the practitioner reports on the subject matter, the practitioner may want to request that management make its assertion available to the users of the practitioner's report.

If one or more criteria have not been achieved, the practitioner issues a qualified or adverse report. Under AICPA attestation standards, when issuing a qualified or adverse report the practitioner should report directly on the subject matter rather than on the assertion.

### ***Period of Coverage***

The practitioner's report and management's assertion (when required) always should specify the time period covered by the report and assertion, respectively. A practitioner may issue a report for a period of time or at a point in time. The determination of an appropriate period should be at the discretion of the practitioner and the entity.

Factors to be considered in establishing the reporting period may include the following:

- The anticipated users of the report and their needs.
- The need to support a "continuous" audit model.
- The degree and frequency of change in each of the system components.

---

<sup>3</sup> See Chapter 1 of SSAE No. 10 (AT sec. 101.58) for a description of a practitioner's options, if a written assertion is not obtained.

<sup>4</sup> See Chapter 1 of SSAE No. 10 (AT sec. 101.64).

- The cyclical nature of processing within the system.
- Historical information about the system.

For WebTrust or SysTrust seals on Web sites, the report must be refreshed at least every 12 months. A three-month grace period is permitted from the end of the reporting period to allow for the practitioner to complete the fieldwork and prepare the report. For example, if the current report is for the period ending December 31, 20X2, the next report must be for a period ending no later than December 31, 20X3, and must be posted no later than March 31, 20X4. In this example, the first report may continue to be posted to the client's Web site until March 31, 20X4.

## **The Practitioner's Report**

There are a variety of reporting alternatives that are discussed below.

### ***Reporting on the Entity's Controls to Achieve the Criteria***

This reporting alternative provides an opinion on the operating effectiveness of controls based on one or more Trust Services principle(s) and criteria. The practitioner can issue either a SysTrust report (and corresponding seal), if applicable, or a Trust Services report. A WebTrust report (and corresponding seal) cannot be issued for this type of engagement since the practitioner is not also reporting on whether the entity has complied with the criteria.

### ***Reporting on the Entity's Having Complied With the Criteria***

This reporting alternative provides an opinion on the operating effectiveness of controls based on one or more Trust Services principle(s) and criteria and whether the entity complied with the criteria. In this type of engagement, the practitioner can issue either a WebTrust or a SysTrust report (and corresponding seal) as appropriate.

### ***Reporting on the Suitability of the Design of Control Procedures***

A practitioner may be asked to conduct a Trust Services engagement addressing the suitability of design of controls for a system, prior to the system's implementation. In such an engagement, the practitioner can issue a Trust Services report, but cannot issue a WebTrust or SysTrust report or corresponding seal.

## **Reporting on Multiple Principles**

In most cases, a practitioner will be asked to report on one or more Trust Services principles and related criteria, rather than on the entire set of five principles. The practitioner, in the introductory paragraph, makes reference to the principles included in the scope of examination but makes no further statement that the entire set of principles was not included in the scope of the examination.

When the client asks the practitioner to examine and report on its conformity with two or more Trust Services principles and related criteria, there are a number of issues that the practitioner should consider, which are discussed in this section.

### ***Individual or Combined Report***

When engaged to perform a Trust Services examination for multiple principles, the practitioner can, depending on the needs of the client, issue either a combined report or individual reports for each of the principles. For the purpose

of this discussion, it is assumed that the practitioner has been asked to report on the client's conformity with three sets of principles and criteria: security, privacy, and confidentiality.

The first issue is to decide whether this represents (1) one engagement to examine three principles or (2) three engagements that examine one principle each. This can affect, among other matters, the engagement letter, the content and number of representation letters, and whether one audit report or multiple audit reports will be issued.

A Trust Services examination for multiple principles can be performed either as a single engagement involving those three principles or as three separate engagements involving one principle each. In either case, the practitioner's report(s) should clearly communicate the nature of the engagement(s).

There can be reporting complications when a qualified report is appropriate for one or more, but not all three, of the principles. In certain instances, the practitioner may decide not to issue such a report. In order to ensure a clear understanding with the client on this matter, the engagement letter might include language indicating that "a report may or may not be issued."

### ***Failure to Meet Criteria***

There may be instances, with a multiple principle engagement, in which the entity fails to meet the relevant criteria for one or more of the multiple principles. If one or more relevant criteria have not been met, the practitioner cannot issue an unqualified report. Under AICPA attestation standards, when issuing a qualified or adverse report, the practitioner should report directly on the subject matter rather than on the assertion.

In the situation where, for example, the entity did not meet the confidentiality criteria but met all of the security and privacy criteria, the practitioner, depending upon how the engagement was structured, has the following options available:

1. Issue one report that deals with all three principles. Because the report would be qualified, no seal would be issued. Since this option would most likely not accomplish the client's objective of obtaining a seal, the practitioner should consider the next option.
2. Issue multiple reports (for example, two reports), with segregation of the confidentiality principle into a separate report. The other two principles would have an unqualified report, thereby enabling the entity to obtain the seal.<sup>5</sup> The practitioner may then either issue a separate qualified report for confidentiality or withdraw from the confidentiality engagement. In either case, the practitioner may wish to issue recommendations to management on how the deficiencies can be corrected. The impact of the deficiency for confidentiality would need to be assessed to ascertain its effect, if any, on the other principles.<sup>6</sup>

In the situation where the practitioner treats each principle as a separate engagement with separate engagement letters, option (2) would be the most appropriate.

---

<sup>5</sup> In determining whether a WebTrust seal would be issued in such circumstances, the practitioner should consider the guidance under the section "Responsibility for Communicating Lack of Compliance in Other Principle(s)."

<sup>6</sup> Chapter 1 of SSAE No. 10 (AT secs 501.34 and 601.53)

### ***Different Examination Periods***

There may be situations where the entity requests that more than one principle be examined, but due to various reasons the principles will have different reporting periods (either the length of the reporting period, the date that the various reporting periods begin, or both). Ideally, it would be more efficient for the practitioner to have such periods coincide. When different reporting periods exist, the practitioner should consider whether to issue separate or combined reports. Separate reports covering the separate principles are less complex to prepare than a combined report. If a combined report is issued, the different reporting periods would need to be detailed in the introductory and opinion paragraphs of the report to ensure that the different examination periods are highlighted.

## **Additional Reporting Guidance**

### ***Special Issues for Initial Reports***

Typically, an initial report would need to cover a period of two months or more. However, an initial report covering a period of less than two months (including a point-in-time report) can be issued in any of the following circumstances:

- When the conditions dictate (see Table 1).
- When an entity wishes to restore a Trust Services seal following a significant event that caused the entity to no longer comply with the criteria (that necessitated removal of the practitioner's report and the Trust Services seal from the entity's site).
- When an entity requests a Trust Services engagement for a system that is in the pre-implementation stage. The report would be a point in time rather than a period in time. Such a report would indicate that the system has not been placed in operation.

Similar to any attest engagement, before a practitioner can render an opinion, sufficient and competent evidential matter needs to be obtained.<sup>7</sup> For all criteria, there needs to be sufficient client transaction volumes and other procedure and control evidence to provide the practitioner with the necessary evidential matter. Therefore, in accepting an engagement that will result in the issuance of a report on a period of less than two months (including a point-in-time report) the practitioner should consider, as it relates to management's assertion about compliance with the criteria and the operating effectiveness of its controls, whether there will be an appropriate testing period ("look-back period") to provide sufficient evidence to enable the practitioner to issue such a report. The period over which a practitioner should perform tests is a matter of judgment.

The period of time over which the practitioner would need to perform tests of controls to determine that such controls were operating effectively will vary with the nature of the controls being tested and the frequency with which the specific controls operate and specific policies are applied. Some controls operate continuously while others operate only at certain times.

If it is concluded that there will be an appropriate "look-back period" to provide sufficient evidential matter, the practitioner may undertake the engagement to issue a report covering a period of less than two months, or a point-in-time

---

<sup>7</sup> Chapter 1 of SSAE No. 10 (AT sec. 101.51)

report. If the practitioner decides to issue a point-in-time report, the report should indicate that the firm has examined management's assertion as of [Month, day, year], rather than during a period.

The Trust Services practitioner should, in addition to considering the guidance herein, consider the relevant attest standards<sup>8</sup> with respect to the wording of such a report, to assure that he or she is complying with such attest standards.

The length of the relevant initial period should be determined by the practitioner's professional judgment based on factors such as those set out in Table 1.

**Table 1**

<b><i>Considerations for Use of a Shorter Initial Period</i></b>	<b><i>Considerations for Use of a Longer Initial Period</i></b>
<ul style="list-style-type: none"> <li>• Clients for whom other control examinations have already been performed</li> <li>• Established site, with little transaction volatility</li> <li>• Operations that experience infrequent changes to disclosures, policies, and related controls</li> <li>• Start-up operation with significant transaction volumes and operating conditions (typical of expected normal operations) during the practitioner's pre-implementation testing period and a transition to a live operational site that expects infrequent changes in policies and controls once it is operational</li> </ul>	<ul style="list-style-type: none"> <li>• Start-up operation that has not generated, during pre-implementation stages, sufficient transaction volume and conditions typical of expected normal operations</li> <li>• Operations that experience volatile transaction volumes</li> <li>• Complex operations</li> <li>• Operations that experience frequent changes to disclosures, policies, and related controls or significant instances that lack compliance with disclosures, policies, and related controls</li> </ul>

### ***Use of Third-Party Service Providers***

The practitioner may encounter situations where the entity under examination uses a third-party service provider to accomplish some of the Trust Services criteria. The AICPA/CICA *Effects of a Third-Party Service Provider in a WebTrust or Similar Engagement* provides applicable guidance for these situations and is available for download at [www.webtrust.org](http://www.webtrust.org).

### ***Considerations When Restoring a Removed Seal***

The following guidance applies when an entity wishes to restore the seal following a significant event that caused the entity to no longer comply with the criteria (that necessitated removal of the practitioner's report and the Seal from the entity's site). It is important that the entity consider disclosing to its users the nature of the significant event that created the "out of compliance" situation and the steps taken to remedy the situation. The entity should consider disclosing the event on its Web site or as part of its management assertion. Likewise, before issuing a new report, the practitioner should consider the significance of the event, the related corrective actions, and whether appropriate disclosure has been made. The practitioner also should consider whether

<sup>8</sup> See Chapter 1 of SSAE No. 10 (AT sec 101.84–87) and Appendix A (AT sec 101.110) for additional reporting guidance.

this matter should be (1) disclosed as part of management's assertion, (2) emphasized in a separate explanatory paragraph in the practitioner's report, or (3) both.

### ***Responsibility for Communicating Lack of Compliance in Other Principle(s)***

During an examination of a client's conformity with a Trust Services principle, information about compliance or control deficiencies related to principles and criteria that are not within the defined scope of the engagement may come to the practitioner's attention. For example, while engaged only to report on controls related to the security principle, a practitioner may become aware that the entity is not complying with its privacy policy as stated on its Web site (for example, it is disclosing personal information to selected third parties). Although the practitioner is not responsible for detecting information outside the scope of his or her examination, the practitioner should consider such information when it comes to his or her attention and evaluate whether the identified deficiencies are significant (that is, whether such deficiencies could materially mislead users of the system).

If the practitioner determines that such deficiencies are significant, they should be communicated in writing to management. Management should be asked either to correct the deficiency (in this case, cease providing the information to third parties) or to properly disclose their actual practices publicly so that users are aware of actual policies (in this case, the privacy statement would be amended to reflect the fact that they do provide information to third parties).

If the practitioner concludes that omission of this information would be significant and if management is unwilling to either correct the deficiency or to disclose the information, the practitioner should consider withdrawing from the engagement.

### ***Cumulative Reporting***

Under Trust Services reporting guidelines, the period reported upon by a practitioner is limited to the current period under examination and shall not exceed 12 months. A cumulative report that covers the current examination period and prior periods that were subject to similar examinations by the practitioner is not recommended. The relevance of a cumulative reporting period has been questioned given the significant pace of growth and change in technological systems, especially those for electronic commerce.

### ***Qualified or Adverse Opinions***

Under the AICPA attestation standards, reservations about the subject matter or the assertion refers to any unresolved reservation about the assertion or about the conformity of the subject matter with the criteria, including the adequacy of the disclosure of material matters. They can result in either a qualified or an adverse opinion, depending on the materiality of the departure from the criteria against which the subject matter was evaluated.

### ***Subsequent Events***

Events or transactions sometimes occur subsequent to the point in time or period of time of the subject matter being tested but prior to the date of the practitioner's report that have a material effect on the subject matter and therefore require adjustment or disclosure in the presentation of the subject

matter or assertion. These occurrences are referred to as *subsequent events*. In performing an attest engagement, a practitioner should consider information about subsequent events that comes to his or her attention. Two types of subsequent events require consideration by the practitioner.

The first type consists of events that provide additional information with respect to conditions that existed at the point in time or during the period of time of the subject matter being tested. This information should be used by the practitioner in considering whether the subject matter is presented in conformity with the criteria and may affect the presentation of the subject matter, the assertion, or the practitioner's report.

The second type consists of those events that provide information with respect to conditions that arose subsequent to the point in time or period of time of the subject matter being tested that are of such a nature and significance that their disclosure is necessary to keep the subject matter from being misleading. This type of information will not normally affect the practitioner's report if the information is appropriately disclosed.

While the practitioner has no responsibility to detect subsequent events, the practitioner should inquire of the responsible party (and his or her client if the client is not the responsible party) as to whether they are aware of any subsequent events, through the date of the practitioner's report, that would have a material effect on the subject matter or assertion.<sup>9</sup> The representation letter ordinarily would include a representation concerning subsequent events.

The practitioner has no responsibility to keep informed of events subsequent to the date of his or her report; however, the practitioner may later become aware of conditions that existed at that date that might have affected the practitioner's report had he or she been aware of them. In such circumstances, the practitioner may wish to consider the guidance in Statement on Auditing Standards (SAS) No. 1, section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 561).<sup>10</sup>

## Agreed-Upon Procedures Engagements

A client may request that a practitioner perform an agreed-upon procedures engagement related to the Trust Services principles and criteria. In such an engagement, the practitioner performs specified procedures agreed to by the specified parties,<sup>11</sup> and reports his or her findings. Because the needs of the parties may vary widely, the nature, timing, and extent of the agreed-upon procedures may vary as well; consequently, the specified parties assume responsibility for the sufficiency of the procedures since they best understand their own needs. In an agreed-upon procedures engagement, the practitioner does not perform an examination or review of an assertion or subject matter or express an opinion or negative assurance about the assertion or subject matter.

---

<sup>9</sup> For certain subject matter, specific subsequent event standards have been developed to provide additional requirements for engagement performance and reporting. Additionally, a practitioner engaged to examine the design or effectiveness of internal control over items not covered by Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," or Chapter 6, "Compliance Attestation," of SSAE No. 10, as amended, should consider the subsequent events guidance set forth in Chapter 5 (AT sec. 501.65–68), and Chapter 6 (AT sec. 601.50–52).

<sup>10</sup> Chapter 1 of SSAE No. 10 (AT sec. 101.95–99).

<sup>11</sup> The specified users and the practitioner agree upon the procedures to be performed by the practitioner.

The practitioner's report on agreed-upon procedures is a presentation of procedures and findings.<sup>12</sup> The use of an agreed-upon procedures report is restricted to the specified parties who agreed upon the procedures. In such engagements, issuance of a seal is not appropriate.

## Other Matters

All Trust Services engagements should be performed in accordance with the applicable professional standards and the Trust Services license agreement. Because users are seeking a high level of assurance, WebTrust and SysTrust are examination level engagements. Accordingly, it is not appropriate to provide these services with the intent of providing a moderate level or a review report. Although permissible, a moderate assurance or review level Trust Services engagement may not provide the desired degree of usefulness for the intended users.

## Illustrative Reports

The following illustrative reports are for both SysTrust and WebTrust engagements. Illustrations 1 through 2 are period-of-time report examples. Illustration 3 is a point-in-time report example.

Under the SSAEs, the first paragraph of the practitioner's report will state that the practitioner has performed an examination of management's assertion about compliance with the Trust Services criteria or, alternatively, that the practitioner has examined the subject matter. The practitioner may opine (1) on management's assertion or (2) directly on the subject matter. Both alternatives are covered in the illustrative reports.

These reports are for illustrative purposes and should be modified in accordance with the applicable professional standards as the specific engagement facts and circumstances warrant.

---

<sup>12</sup> Agreed-upon procedures engagements are performed under Chapter 2, "Agreed-Upon Procedures Engagements," of SSAE No. 10 (AT sec. 201)

**Illustration 1—SysTrust Report for Systems Reliability—Reporting Directly on the Subject Matter (Period-of-Time Report)****Independent Practitioner's SysTrust Report on System Reliability**

To the Management of ABC Company, Inc.:

We have examined the effectiveness of ABC Company, Inc.'s (ABC Company) controls over the reliability of its \_\_\_\_\_ [system under examination] System during the period [Month, day, year] through [Month, day, year], based on the AICPA/CICA Trust Services Criteria for systems reliability. Maintaining the effectiveness of these controls is the responsibility of ABC Company's management. Our responsibility is to express an opinion based on our examination.

A reliable system is one that is capable of operating without material error, fault, or failure during a specified period in a specified environment. The AICPA/CICA Trust Services Availability, Security, and Processing Integrity Criteria [*hot link to applicable principles and criteria*] are used to evaluate whether ABC Company's controls over the reliability of its \_\_\_\_\_ [system under examination] System are effective.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included (1) obtaining an understanding of ABC Company's relevant system availability, security, and processing integrity controls; (2) testing and evaluating the operating effectiveness of the controls; and (3) performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, ABC Company maintained, in all material respects, effective controls over the reliability of the \_\_\_\_\_ [system under examination] System to provide reasonable assurance that:

- The System was available for operation and use, as committed or agreed;
- The System was protected against unauthorized access (both physical and logical); and
- The System processing was complete, accurate, timely, and authorized during the period [Month, day, year] through [Month, day, year], based on the AICPA/CICA Trust Services Criteria for systems reliability.

Because of inherent limitations in controls, error or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that the validity of such conclusions may be altered because of changes made to the system or controls, the failure to make needed changes to the system or controls, or a deterioration in the degree of effectiveness of the controls.

The SysTrust seal on ABC Company's Web site constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance

***Illustration 2—Report for One Principle—Reporting Directly on the Subject Matter (Period-of-Time Report Including Schedule Describing Controls)***

**Independent Practitioner's SysTrust Report**

To the Management of ABC Company, Inc

We have examined the effectiveness of ABC Company, Inc's (ABC Company) controls, described in Schedule X, over the security of its \_\_\_\_\_ |*system under examination*| System during the period |*Month, day, year*| through |*Month, day, year*|, based on the AICPA/CICA Trust Services Security Criteria. Maintaining the effectiveness of these controls is the responsibility of ABC Company's management. Our responsibility is to express an opinion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included (1) obtaining an understanding of ABC Company's relevant security controls, (2) testing and evaluating the operating effectiveness of the controls, and (3) performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, ABC Company maintained, in all material respects, effective controls, described in Schedule X, over the security of the \_\_\_\_\_ |*system under examination*| System to provide reasonable assurance that the \_\_\_\_\_ |*system under examination*| System was protected against unauthorized access (both physical and logical) during the period |*Month, day, year*| through |*Month, day, year*|, based on the AICPA/CICA Trust Services Security Criteria.

Because of inherent limitations in controls, error or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that the validity of such conclusions may be altered because of changes made to the system or controls, the failure to make needed changes to the system or controls, or a deterioration in the degree of effectiveness of the controls.

The SysTrust seal on ABC Company's Web site constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

**Schedule X—Controls Examined Supporting AICPA/CICA Trust Services Security Criteria**

The system is protected against unauthorized access (both physical and logical).

**1.0 Policies: The entity defines and documents its policies for the security of its system.****Controls**

- 1.1 The entity's security policies are established and periodically reviewed and approved by a designated individual or group.

The company's documented systems development and acquisition process includes procedures to identify and document authorized users of the system and their security requirements.

User requirements are documented in service-level agreements or other documents.

The security officer reviews security policies annually and submits proposed changes for the approval by the information technology standards committee.

- 1.2 The entity's security policies include, but may not be limited to, the following matters:

The company's documented security policies contain the elements set out in criterion 1.2.

- a. Identification and documentation of the security requirements of authorized users.
- b. Allowing access, the nature of that access, and who authorizes such access.
- c. Preventing unauthorized access.
- d. The procedures to add new users, modify the access levels of existing users, and remove users who no longer need access.
- e. Assignment of responsibility and accountability for system security.
- f. Assignment of responsibility and accountability for system changes and maintenance.
- g. Testing, evaluating, and authorizing system components before implementation.
- h. Addressing how complaints and requests relating to security issues are resolved.
- i. The procedures to handle security breaches and other incidents.
- j. Provision for allocation for training and other resources to support its system security policies.

(continued)

**Policies: The entity defines and documents its policies for the security of its system.**

### Controls

- |  |  |   |
|--|--|---|
| <ul style="list-style-type: none"> <li>k. Provision for the handling of exceptions and situations not specifically addressed in its system security policies.</li> <li>l. Provision for the identification of, and consistency with, applicable laws and regulations, defined commitments, service-level agreements, and other contracts.</li> </ul> | <p>1.3 Responsibility and accountability for the entity's system security policies, and changes and updates to those policies, are assigned.</p> | <p>Management has assigned responsibilities for the maintenance and enforcement of the company security policy to the chief information officer (CIO). Others on the executive committee assist in the review, update, and approval of the policy as outlined in the executive committee handbook.</p> <p>Ownership and custody of significant information resources (for example, data, programs, and transactions) and responsibility for establishing and maintaining security over such resources is defined.</p> |
|--|--|---|

This schedule is for illustrative purposes only and does not contain all the criteria for the security principle. When the practitioner is reporting on more than one principle, a similar format would be used to detail the appropriate criteria and controls. The practitioner is not bound by this presentation format and may utilize other alternative presentation styles.

**Illustration 3—Report for One Principle—Reporting on Management’s Assertion (Point-in-Time Report)****Independent Practitioner’s WebTrust Report**

To the Management of ABC Company, Inc.:

We have examined management’s assertion [*hot link to management’s assertion*] that ABC Company, Inc. (ABC Company) as of [*Month, day, year*] complied with the AICPA/CICA Trust Services Security Criteria and, based on these Criteria, maintained effective controls to provide reasonable assurance the \_\_\_\_\_ [*system under examination*] System was protected against unauthorized access (both physical and logical). This assertion is the responsibility of ABC Company’s management. Our responsibility is to express an opinion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included (1) obtaining an understanding of ABC Company’s relevant security controls, (2) testing and evaluating the operating effectiveness of the controls, (3) testing compliance with the Security Criteria, and (4) performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, management’s assertion that ABC Company complied with AICPA/CICA Trust Services Security Criteria and, based on these Criteria, maintained effective controls to provide reasonable assurance that the \_\_\_\_\_ [*system under examination*] System was protected against unauthorized access (both physical and logical) as of [*Month, day, year*] is fairly stated, in all material respects.

OR

In our opinion, ABC Company’s management’s assertion referred to above is fairly stated, in all material respects, based on the AICPA/CICA Trust Services Security Criteria.

Because of inherent limitations in controls, error or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that the validity of such conclusions may be altered because of changes made to the system or controls, the failure to make needed changes to the system or controls, or a deterioration in the degree of effectiveness of the controls.

The WebTrust seal of assurance on ABC Company’s Web site constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

## Appendix D

# Generally Accepted Privacy Principles—A Global Privacy Framework

May 2006

### Acknowledgments:

The AICPA and Canadian Institute of Chartered Accountants (CICA) appreciate the contribution of the volunteers who devoted significant time and effort to this project. The institutes also acknowledge the support the following organizations have provided to the development of Generally Accepted Privacy Principles:

- ISACA
- The Institute of Internal Auditors

**NOTICE TO READERS**

*This CPA/CA practitioner version is identical to “Generally Accepted Privacy Principles—A Global Privacy Framework” with the exception of Appendix C, “Practitioner Services Using Generally Accepted Privacy Principles,” and Appendix D, “Illustrative Privacy Examination/Audit Reports.” These additional appendices are intended primarily to assist CPAs and CAs in public practice in providing privacy services to their clients. Effective for Reports issued after June 30, 2006. Early adoption is encouraged.*

## Foreword

The American Institute of Certified Public Accountants (AICPA) and the Canadian Institute of Chartered Accountants (CICA) believe strongly that privacy is a business issue. In considering what organizations face when trying to address privacy issues, we quickly concluded that businesses did not have a comprehensive framework to manage their privacy risks effectively. The institutes decided that they could contribute significantly by developing a privacy framework that would address the needs and expectations of all of the parties affected by privacy requirements or expectations. Therefore, the institutes developed the initial AICPA/CICA Privacy Framework. This framework has been updated to reflect that the principles included have now become more widely accepted. Accordingly, the framework has now been renamed as Generally Accepted Privacy Principles. The institutes are making these principles and criteria widely available to all parties interested in addressing privacy issues.

These principles and criteria were developed by volunteers who considered both current international privacy regulatory requirements and best practices. These principles and criteria were issued following the due process procedures of both institutes, which included exposure for public comment.

Underlying these principles is the premise that good privacy is good business. Good privacy practices are a key component of corporate governance and accountability. One of today's key business imperatives is maintaining the privacy of personal information collected and held by an organization. As business systems and processes become increasingly complex and sophisticated, growing amounts of personal information are being collected. Since more data is collected and held, most often in electronic format, personal information may be at risk to a variety of vulnerabilities, including loss, misuse, unauthorized access, and unauthorized disclosure. Those vulnerabilities raise concerns for organizations, governments, individuals, and the public in general.

For organizations operating in a multijurisdictional environment, managing privacy risk can be even a more significant challenge. Organizations need to be aware of the significant privacy requirements in all the jurisdictions in which the organization does business.

With these issues in mind, the AICPA and CICA developed Generally Accepted Privacy Principles to be used as an operational framework to help management address privacy in a manner that takes into consideration local, national, or international requirements. The primary objective is to facilitate privacy compliance and effective privacy management. The secondary objective is to provide suitable criteria against which a privacy examination (which is usually referred to as a "privacy audit") can be performed.

Generally Accepted Privacy Principles represent the AICPA and CICA contribution to the effective management of privacy risk, recognizing the needs of organizations while reflecting the public interest. Additional history about the development and additional privacy resources can be found at [www.aicpa.org/privacy](http://www.aicpa.org/privacy) and [www.cica.ca/privacy](http://www.cica.ca/privacy). *Generally Accepted Privacy Principles—A Global Privacy Framework* can be downloaded from the AICPA and the CICA Web sites.\*

Generally Accepted Privacy  
Principles—A Global Privacy  
Framework was approved by the  
AICPA Board of Directors.

## Introduction

Most organizations find challenges in managing privacy<sup>1</sup> on a local, national, or international basis. Most are faced with a number of differing privacy laws and regulations whose requirements need to be operationalized.

Generally Accepted Privacy Principles have been developed from a business perspective, referencing significant domestic and international privacy regulations. Generally Accepted Privacy Principles operationalize complex privacy requirements into a single privacy objective that is supported by 10 privacy principles. Each principle is supported by objective, measurable criteria that need to be met. Illustrative policy requirements, communications, and controls, including monitoring controls, are provided as support for the criteria.

This document sets out Generally Accepted Privacy Principles that can be used by any organization as part of its privacy program. Generally Accepted Privacy Principles have been developed to help management create an effective privacy program that addresses privacy risks and obligations and business opportunities. This introduction includes a definition of privacy and an explanation of why privacy is a business issue and not solely a compliance issue. Also illustrated is how these principles can be applied to outsourcing scenarios and the potential types of privacy initiatives that can be undertaken for the benefit of the organizations and their customers.

This introduction and the set of Generally Accepted Privacy Principles and Criteria will be useful to those who:

- Oversee and monitor privacy and security programs
- Implement and manage privacy in an organization
- Implement and manage security in an organization
- Assess compliance and audit privacy and security programs
- Regulate privacy

### ***Why Privacy Is a Business Issue***

Good privacy is good business. Good privacy practices are a key part of corporate governance and accountability. One of today's key business imperatives is maintaining the privacy of personal information. As business systems and processes become increasingly complex and sophisticated, organizations are collecting growing amounts of personal information. As a result, personal information is vulnerable to a variety of risks, including loss, misuse, unauthorized access, and unauthorized disclosure. Those vulnerabilities raise concerns for organizations, governments, and the public in general.

Organizations are trying to strike a balance between the proper collection and use of their customers' personal information. Governments are trying to protect the public interest but, at the same time, manage their cache of personal information gathered from citizens. Consumers are very concerned about their personal information and many believe they have lost control of it. Furthermore, the public has a significant concern about identity theft and inappropriate access to personal information, especially financial and medical records, and information about children.

---

<sup>1</sup> The first occurrence of each word contained in Appendix A—Glossary is underlined in the introduction section and in the Generally Accepted Privacy Principles and Criteria tables

Individuals expect their privacy to be respected and their personal information to be protected by the organizations with which they do business. They are no longer willing to overlook an organization's failure to protect their privacy. Therefore, *all* businesses need to effectively address privacy as a risk management issue. Specific risks of having inadequate privacy policies and procedures include:

- Damage to the organization's reputation, brand, or business relationships
- Legal liability and industry or regulatory sanctions
- Charges of deceptive business practices
- Customer or employee distrust
- Denial of consent by individuals to have their personal information used for business purposes
- Lost business and consequential reduction in revenue and market share
- Disruption of international business operations

## International Privacy Considerations

For organizations operating in more than one jurisdiction, the management of their privacy risk can be a significant challenge.

For example, the global nature of the Internet and business means that regulatory actions in one country may affect the rights and obligations of users around the world. Many countries have laws regulating transborder data flow, including the European Union's 1995 and 1997 directives on data protection and privacy with which an organization must comply if it wants to do business in those jurisdictions. Therefore, organizations need to comply with changing privacy requirements around the world. Further, different jurisdictions have different privacy philosophies, making international compliance a complex task. To illustrate this, some countries view personal information as belonging to the individual and take the position that the enterprise has a fiduciary-like relationship when collecting and maintaining such information. Alternatively, other countries view personal information as belonging to the enterprise that collects it.

In addition, organizations are challenged in trying to stay up-to-date with the requirements for each country in which they do business. By adhering to a high global standard, such as those set out in this document, compliance with emerging regulations will be facilitated.

Even organizations with limited international exposure often face issues of compliance with data privacy requirements in other countries. Many of these organizations are unsure how to address stricter overseas regulations. This increases the risk that an organization could inadvertently commit a breach that becomes an example to be publicized by the offended host country.

## Outsourcing and Privacy

Outsourcing increases the complexity for dealing with privacy. An organization may outsource a part of its business process and with it part of its responsibility for privacy; however, the organization cannot outsource its accountability for privacy for its business processes. Complexity increases when the entity that

performs the outsourcing service is in a different country and may be subject to different privacy laws or often no privacy requirements at all. In such circumstances, the organization that outsources a business process will need to ensure that it manages its privacy responsibilities appropriately.

The Generally Accepted Privacy Principles and supporting Criteria set out in this document can assist an organization in completing assessments (including independent examinations) about the privacy policies, procedures, and practices of the entity performing the outsourcing to which part of its privacy responsibility has been transferred.

The fact that these principles have global application can provide comfort to an outsourcer that privacy assessments can be undertaken using a consistent measurement based on internationally known fair information practices included in many privacy laws and regulations of various jurisdictions around the world and recognized as good privacy practices.

## What Is Privacy?

### Privacy Definition

Under Generally Accepted Privacy Principles, privacy is defined as *the rights and obligations of individuals and organizations with respect to the collection, use, retention, and disclosure of personal information*.

### Personal Information

*Personal information* is information that is, or can be, about or related to an identifiable individual. It includes any information that can be linked to an individual or used to directly or indirectly identify an individual. Most information collected by an organization about an individual is likely to be considered personal information if it can be attributed to an identified individual. Some examples of personal information are:

- Name
- Home or e-mail address
- Identification number (e.g., a Social Security or Social Insurance Number)
- Physical characteristics
- Consumer purchase history

Some personal information is considered *sensitive*. Some laws and regulations define the following to be sensitive personal information:

- Information on medical or health conditions
- Financial information
- Racial or ethnic origin
- Political opinions
- Religious or philosophical beliefs
- Trade union membership
- Sexual preferences
- Information related to offenses or criminal convictions

Sensitive personal information generally requires an extra level of protection and a higher duty of care. For example, the use of sensitive information may require explicit consent rather than implicit consent.

Some information about or related to people cannot be associated with specific individuals. Such information is referred to as nonpersonal information. This includes statistical or summarized personal information for which the identity of the individual is unknown or linkage to the individual has been removed. In such cases, the individual's identity cannot be determined from the information that remains, because the information is "de-identified" or "anonymized." Nonpersonal information ordinarily is not subject to privacy protection because it cannot be linked to an individual.

### ***Privacy or Confidentiality?***

Unlike personally identifiable information, which is often defined by regulation in a number of countries worldwide, there is no single definition of confidential information that is widely recognized. In the course of communicating and transacting business, partners often exchange information or data that one or the other party requires to be maintained on a "need to know" basis. Examples of the kinds of information that may be subject to a confidentiality requirement include:

- Transaction details
- Engineering drawings
- Business plans
- Banking information about businesses
- Inventory availability
- Bid or ask prices
- Price lists
- Legal documents
- Revenue by client and industry

Also, unlike personal information, rights of access to confidential information to ensure its accuracy and completeness are not clearly defined. As a result, interpretations of what is considered to be confidential information can vary significantly from organization to organization and in most cases are driven by contractual arrangements. The AICPA/CICA Trust Services Principles, Criteria and Illustrations for Security, Availability, Processing Integrity, Confidentiality, and Privacy (including WebTrust® and SysTrust®) provides a set of criteria for confidentiality (see [www.webtrust.org](http://www.webtrust.org)).

## Introducing Generally Accepted Privacy Principles

Generally Accepted Privacy Principles are designed to assist management in creating an effective privacy program that addresses their privacy risks and business opportunities.

The set of Generally Accepted Privacy Principles is founded on key concepts from significant domestic and international privacy laws, regulations, and guidelines (see Appendix B, “Comparison of International Privacy Concepts”)<sup>2</sup> and good business practices. By using these Generally Accepted Privacy Principles, organizations can proactively address the significant challenges that they face in establishing and managing their privacy programs and risks from a business perspective. The use of Generally Accepted Privacy Principles also facilitates management of privacy risk on a multijurisdictional basis.

### Overall Privacy Objective

Generally Accepted Privacy Principles are founded on the following privacy objective.

**Personal information is collected, used, retained, and disclosed in conformity with the commitments in the entity's privacy notice and with criteria set forth in Generally Accepted Privacy Principles issued by the AICPA/CICA.**

### Generally Accepted Privacy Principles

Generally Accepted Privacy Principles are essential to the proper protection and management of personal information. They are based on internationally known fair information practices included in many privacy laws and regulations of various jurisdictions around the world and recognized good privacy practices.

The following are the 10 Generally Accepted Privacy Principles:

1. *Management.* The entity defines, documents, communicates, and assigns accountability for its privacy policies and procedures.
2. *Notice.* The entity provides notice about its privacy policies and procedures and identifies the purposes for which personal information is collected, used, retained, and disclosed.
3. *Choice and Consent.* The entity describes the choices available to the individual and obtains implicit or explicit consent with respect to the collection, use, and disclosure of personal information.
4. *Collection.* The entity collects personal information only for the purposes identified in the notice.

---

<sup>2</sup> For example, the Organisation for Economic Co-operation and Development (OECD) has issued Guidelines on the Protection of Privacy and Transborder Flows of Personal Data (the Guidelines) and the European Union (EU) has issued Directive on Data Privacy (Directive 95/46/EC). In addition, the United States has enacted the Gramm-Leach-Bliley Act (GLBA), the Health Insurance Portability and Accountability Act (HIPAA), and the Children's Online Privacy Protection Act (COPPA). Canada has enacted the Personal Information Protection and Electronic Documents Act (PIPEDA) and Australia has enacted the Australian Privacy Act of 1988, as amended in 2001. Web site URLs for these and other privacy laws and regulations are set out in Appendix B. Compliance with this set of Generally Accepted Privacy Principles and Criteria may not necessarily result in compliance with applicable privacy laws and regulations and entities may wish to seek appropriate legal advice regarding compliance with any laws and regulations.

5. *Use and Retention.* The entity limits the use of personal information to the purposes identified in the notice and for which the individual has provided implicit or explicit consent. The entity retains personal information for only as long as necessary to fulfill the stated purposes.
6. *Access.* The entity provides individuals with access to their personal information for review and update.
7. *Disclosure to Third Parties.* The entity discloses personal information to third parties only for the purposes identified in the notice and with the implicit or explicit consent of the individual.
8. *Security for Privacy.* The entity protects personal information against unauthorized access (both physical and logical).
9. *Quality.* The entity maintains accurate, complete, and relevant personal information for the purposes identified in the notice.
10. *Monitoring and Enforcement.* The entity monitors compliance with its privacy policies and procedures and has procedures to address privacy-related complaints and disputes.

For each of the 10 privacy principles, relevant, objective, complete, and measurable criteria have been developed for evaluating an entity's privacy policies, communications, and procedures and controls. *Privacy policies* are written statements that convey management's intent, objectives, requirements, responsibilities, and/or standards. *Communications* refers to the organization's communication to individuals, internal personnel, and third parties about its privacy notice and its commitments therein and other relevant information. *Procedures and controls* are the other actions the organization takes to achieve the criteria.

### **Using Generally Accepted Privacy Principles**

Generally Accepted Privacy Principles can be used by organizations for:

- Privacy policy design and implementation
- Performance measurement
- Benchmarking
- Monitoring and auditing privacy programs

Management of a privacy program entails the following activities:

- Strategizing—Performing privacy strategic and business planning
- Diagnosing—Performing privacy gap and risk analysis
- Implementing—Introducing and institutionalizing solutions
- Sustaining/Managing—Monitoring activities of a privacy program
- Auditing—Internal or external auditors evaluating the organization's privacy program

The following table summarizes and illustrates how Generally Accepted Privacy Principles can be used by an organization to address these business activities.

<i>Activity</i>	<i>General Discussion</i>	<i>Potential Use of Generally Accepted Privacy Principles</i>
<b>Strategizing</b>	<p><b>Vision.</b> An entity's strategy is concerned with its long-term direction and prosperity. The vision identifies the entity's culture and helps shape and determine how the entity will interact with its external environment, including customers, competitors, and legal, social, and ethical issues.</p> <p><b>Strategic Planning.</b> This is an entity's overall master plan, encompassing its strategic direction. Its objective is to ensure that the entity's efforts are all headed in a common direction. The strategic plan identifies the entity's long-term goals and major issues for becoming privacy-compliant.</p> <p><b>Resource Allocation.</b> This step identifies the human and financial resources allocated to achieve the goals and objectives set forth in the strategic plan or business plan.</p>	<p><b>Vision.</b> Within an entity's privacy effort, establishing the vision helps the entity integrate preferences and prioritize goals.</p> <p><b>Strategic Planning.</b> Within an entity's privacy effort, Generally Accepted Privacy Principles can be used to assist the organization in identifying significant components that need to be addressed.</p> <p><b>Resource Allocation.</b> Using Generally Accepted Privacy Principles, the entity would identify the people working with and responsible for areas that might include systems management, privacy and security concerns, and stipulate the budget for their activities.</p> <p><b>Overall Strategy.</b> A strategic document describes expected or intended future development. Generally Accepted Privacy Principles can assist an entity in clarifying plans for the systems under consideration or for the business's privacy objectives. The plan identifies the process to achieve goals and milestones. It also provides a mechanism to communicate critical implementation elements, including details on services, budgets, development costs, promotion, and privacy advertising.</p>
<b>Diagnosing</b>	<p>This stage, often referred to as the assessment phase, encompasses a thorough analysis of the entity's environment, identifying opportunities where weaknesses, vulnerability, and threats exist. The most common initial engagement</p>	<p>Generally Accepted Privacy Principles can assist the entity in understanding its high-level risks, opportunities, needs, privacy policy and practices, competitive pressures, and the requirements of the relevant laws and regulations to which the entity is subject.</p>

<b>Activity</b>	<b>General Discussion</b>	<b>Potential Use Of Generally Accepted Privacy Principles</b>
	for an organization is an assessment. The purpose of an assessment is to evaluate the entity against its privacy goals and objectives and determine to what extent the organization is achieving those goals and objectives.	Generally Accepted Privacy Principles provides a legislative-neutral benchmark to allow the entity to assess the current state of privacy against the desired state.
<b>Implementing</b>	At this point, an action plan is mobilized and/or a diagnostic recommendation is put into effect. Implementing involves the execution of all planned and other tasks necessary to make the action plan operational. It includes the definition of who will perform what tasks, assigning responsibilities, and establishing schedules/ milestones. This involves the planning and implementation of a series of planned projects to provide guidance, direction, methodology, and tools to the organization in developing its initiatives.	Generally Accepted Privacy Principles can assist the entity in meeting its implementation goals. At the completion of the implementation phase, the entity should have developed the following deliverables: <ul style="list-style-type: none"> <li>• Converted systems, procedures, and processes to address the privacy requirements</li> <li>• Updated privacy compliant forms, brochures, and contracts</li> <li>• Internal and external privacy awareness programs</li> </ul>
<b>Sustaining/Managing</b>	Sustaining/Managing involves monitoring the work to identify how progress differs from the action plan in time to initiate corrective action. Monitoring refers to the management policies, processes, and supporting technology to ensure compliance with organizational privacy policies and procedures and the ability to exhibit due diligence.	The entity can use Generally Accepted Privacy Principles, for example, to develop appropriate reporting criteria for monitoring requests for information, the sources used to compile the information and the information actually disclosed. It can also be used for determining validation procedures to ensure that the parties to whom the information was disclosed are entitled to receive that information.
<b>Internal privacy audit</b>	Internal auditors provide objective assurance and consulting services designed to add value and improve an entity's operations. They help an entity accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.	Internal auditors can evaluate an entity's privacy program using Generally Accepted Privacy Principles as a benchmark and provide useful information and reporting to management.

(continued)

<i>Activity</i>	<i>General Discussion</i>	<i>Potential Use Of Generally Accepted Privacy Principles</i>
<b>External privacy audit</b>	External auditors, notably CAs and CPAs, can perform assurance services. Generally, an external audit of financial and nonfinancial information builds trust and confidence for individuals, management, customers, business partners, and other users.	An external auditor can evaluate an entity's privacy program in accordance with Generally Accepted Privacy Principles and provide reports useful to individuals, management, customers, business partners, and other users.

### ***Presentation of Generally Accepted Privacy Principles and Criteria***

Under each principle, the Criteria are presented in a three-column format. The first column contains the measurement criteria. The second column contains illustrations and explanations, which are designed to enhance the understanding of the criteria. The illustrations are not intended to be comprehensive, nor are any of the illustrations required for an entity to have met the criteria. The third column contains additional considerations, including supplemental information such as good privacy practices and selected requirements of specific laws and regulations that pertain to a certain industry or country.

These principles and criteria provide a basis for designing, implementing, maintaining, and evaluating/auditing a privacy program to meet an entity's needs.

## Generally Accepted Privacy Principles and Criteria

## Management

Ref.	Management Criteria	Illustrations and Explanations of Criteria	Additional Considerations
------	---------------------	--	---------------------------

**1.0** The entity defines, documents, communicates, and assigns accountability for its privacy policies and procedures.

**1.1** Policies and Communications

**1.1.0** Privacy Policies

The entity defines and documents its privacy policies with respect to:

- Notice (See 2.1.0)
- Choice and Consent (See 3.1.0)
- Collection (See 4.1.0)
- Use and Retention (See 5.1.0)
- Access (See 6.1.0)
- Onward Transfer and Disclosure (See 7.1.0)
- Security (See 8.1.0)
- Quality (See 9.1.0)
- Monitoring and Enforcement (See 10.1.0)

Privacy policies are documented (in writing) and made readily available to internal personnel and third parties who need them.

(continued)

Ref.	Management Criteria	Illustrations and Explanations of Criteria	Additional Considerations
1.1.1	<p><b>Communication to Internal Personnel</b></p> <p>Privacy policies and the consequences of noncompliance with such policies are communicated at least annually to the entity's internal personnel responsible for collecting, using, retaining, and disclosing personal information. Changes in privacy policies are communicated to such personnel shortly after the changes are approved.</p>	<p>The entity:</p> <ul style="list-style-type: none"> <li>Periodically communicates to internal personnel (for example, on a network or a Web site) relevant information about the entity's privacy policies and changes to its privacy policies.</li> <li>Requires internal personnel to confirm (initially and periodically) their understanding of an agreement to comply with the entity's privacy policies.</li> <li>Educates and trains internal personnel (initially and periodically) who have access to personal information or are charged with the security of personal information about privacy and security concepts, and issues; and promotes ongoing awareness.</li> </ul>	<p>Privacy policies encompass security policies relevant to the protection of personal information.</p>

(continued)

Ref.	Management Criteria	Illustrations and Explanations of Criteria	Additional Considerations
1.1.2	<p><b>Responsibility and Accountability for Policies</b></p> <p>Responsibility and accountability are assigned to a person or group for documenting, implementing, enforcing, monitoring, and updating the entity's privacy policies. The names of such person or group and their responsibilities are communicated to internal personnel.</p>	<p>The entity assigns responsibility for privacy policies to a designated person, such as a corporate privacy officer. (Those assigned responsibility for privacy policies may be different from those assigned for other policies, such as security).</p> <p>The responsibility, authority, and accountability of the designated person or group are clearly documented. Responsibilities include:</p> <ul style="list-style-type: none"> <li>• Establishing with management standards to classify the sensitivity of personal information and to determine the level of protection required</li> <li>• Formulating and maintaining the entity's privacy policies</li> <li>• Monitoring and updating the entity's privacy policies</li> <li>• Delegating authority for enforcing the entity's privacy policies</li> <li>• Monitoring the degree of compliance and initiating action to improve the training or clarification of policies and practices</li> </ul>	<p>The individual identified as being accountable for privacy should be from within the entity.</p>

(continued)

Ref.	Management Criteria	Illustrations and Explanations of Criteria	Additional Considerations
		<p>The board periodically includes privacy in its regular review of corporate governance.</p> <p>The entity requires and documents users, management, and third-party confirmations (initially and annually) of their understanding and agreement to comply with the entity's privacy policies and procedures.</p>	
1.2	<b>Procedures and Controls</b>		
1.2.1	<b>Review and Approval</b>		
	Privacy policies and procedures and changes thereto are reviewed and approved by management.	<p>Privacy policies and procedures are:</p> <ul style="list-style-type: none"><li>• Reviewed and approved by senior management or a management committee.</li><li>• Reviewed at least annually and updated as needed.</li></ul> <p>Corporate counsel or the legal department:</p>	
1.2.2	<b>Consistency of Privacy Policies and Procedures With Laws and Regulations</b>		
	Policies and procedures are reviewed and compared to the requirements of applicable laws and regulations at least annually and whenever there are changes to such laws and regulations. Privacy policies and procedures are revised to conform with the requirements of applicable laws and regulations.	<ul style="list-style-type: none"><li>• Determines which privacy laws and regulations are applicable in the jurisdictions in which the entity operates.</li><li>• Reviews the entity's privacy policies and procedures to ensure they are consistent with the applicable laws and regulations.</li></ul>	

(continued)

(continued)

<i>Ref.</i>	<i>Management Criteria</i>	<i>Illustrations and Explanations of Criteria</i>	<i>Additional Considerations</i>
1.2.3	<p><b>Consistency of Commitments With Privacy Policies and Procedures</b></p> <p>Internal personnel or advisers review contracts for consistency with privacy policies and procedures and address any inconsistencies.</p>	<p>Management and the corporate counsel or the legal department review all contracts and service-level agreements for consistency with the entity's privacy policies and procedures.</p>	
1.2.4	<p><b>Infrastructure and Systems Management</b></p> <p>Internal personnel or advisers review the design, acquisition, development, implementation, configuration, and management of:</p> <ul style="list-style-type: none"> <li>• Infrastructure,</li> <li>• Systems,</li> <li>• Applications,</li> <li>• Web sites, and</li> <li>• Procedures,</li> </ul> <p>and changes thereto for consistency with the entity's privacy policies and procedures and address any inconsistencies.</p>	<p>Procedures are in place to:</p> <ul style="list-style-type: none"> <li>• Govern the development, acquisition, implementation, and maintenance of information systems and the related technology used to collect, use, retain, disclose and destroy personal information.</li> <li>• Ensure that the entity's business continuity management processes are consistent with its privacy policies and procedures.</li> <li>• Classify the sensitivity of classes of data, and determine the classes of users who should have access to each class of data. Users are assigned user-access profiles based on their need for access and their functional responsibilities as they relate to personal information.</li> </ul>	(continued)

(continued)

Ref.	Management Criteria	Illustrations and Explanations of Criteria	Additional Considerations
		<ul style="list-style-type: none"> <li>Assess planned changes to systems and procedures for their potential effect on privacy.</li> <li>Test changes to system components to minimize the risk of an adverse effect on the systems that process personal information. All test data are anonymized.</li> <li>Require the documentation and approval by the privacy officer, business unit manager and IT management before implementing the changes to systems and procedures that handle personal information, including those that may affect security. Emergency changes may be documented and approved on an after-the-fact basis.</li> </ul>	
		<p>The information technology (IT) department maintains a listing of all software and the respective level, version, and patches that have been applied. Procedures exist to provide that only authorized, tested, and documented changes are made to the system.</p> <p>Management reviews annually the assignment of personnel, budgets, and allocation of other resources to its <u>privacy program</u>.</p>	
1.2.5	<p><b>Supporting Resources</b></p> <p>Resources are provided by the entity to implement and support its privacy policies.</p>		

Ref.	Management Criteria	Illustrations and Explanations of Criteria	Additional Considerations
1.2.6	<p><b>Qualifications of Internal Personnel</b></p> <p>The entity establishes qualifications for personnel responsible for protecting the privacy and security of personal information and assigns such responsibilities only to those personnel who meet these qualifications and have received needed training.</p>	<p>The qualifications of internal personnel responsible for protecting the privacy and security of personal information are ensured by procedures such as:</p> <ul style="list-style-type: none"> <li>• Formal job descriptions (including responsibilities, educational and professional requirements, and organizational reporting for key privacy management positions)</li> <li>• Hiring procedures (including the comprehensive screening of credentials, background checks, and reference checking)</li> <li>• Training programs related to privacy and security matters</li> <li>• Performance appraisals (performed by supervisors, including assessments of professional development activities)</li> </ul>	(continued)

<i>Ref.</i>	<i>Management Criteria</i>	<i>Illustrations and Explanations of Criteria</i>	<i>Additional Considerations</i>
1.2.7	<p><b>Changes in Business and Regulatory Environments</b>            For each jurisdiction in which the entity operates, the effect on privacy of changes in the following factors is identified and addressed:</p> <ul style="list-style-type: none"> <li>• Business operations and processes</li> <li>• People</li> <li>• Technology</li> <li>• Legal</li> <li>• Contracts, including service-level agreements</li> </ul> <p>Privacy policies and procedures are updated for such changes.</p>	<p>The entity has an ongoing process in place to monitor, assess, and address the effect on privacy of changes in:</p> <ul style="list-style-type: none"> <li>• Business operations and processes</li> <li>• People assigned responsibility for privacy and security matters</li> <li>• Technology (prior to implementation)</li> <li>• Legal and regulatory environments</li> <li>• Contracts, including service-level agreements with third parties</li> </ul> <p>(Changes that alter the privacy and security related clauses in contracts are reviewed and approved by the privacy officer or corporate counsel before they are executed).</p>	

## Notice

Ref.	Notice Criteria	Illustrations and Explanations of Criteria	Additional Considerations
2.0	The entity provides notice about its privacy policies and procedures and identifies the purposes for which personal information is collected, used, retained, and disclosed.		
2.1	<b>Policies and Communications</b>		
2.1.0	<b>Privacy Policies</b> The entity's privacy policies address providing notice to individuals.		
2.1.1	<b>Communication to Individuals</b> Notice is provided to individuals regarding the following privacy policies: <ul style="list-style-type: none"><li>• Purpose for collecting personal information</li><li>• Choice and Consent (See 3.1.1)</li><li>• Collection (See 4.1.1)</li><li>• Use and Retention (See 5.1.1)</li><li>• Access (See 6.1.1)</li><li>• Onward Transfer and Disclosure (See 7.1.1)</li><li>• Security (See 8.1.1)</li><li>• Quality (See 9.1.1)</li><li>• Monitoring and Enforcement (See 10.1.1)</li></ul> If personal information is collected from sources other than the individual, such sources are described in the notice.	<p>The entity's privacy notice:</p> <ul style="list-style-type: none"><li>• Describes the purposes for which personal information is collected.</li><li>• Indicates that the purpose for collecting sensitive personal information is part of a legal requirement.</li><li>• May be provided in various ways (for example, in a face-to-face interview, a telephone interview, an application form or questionnaire, or electronically). Written notice is the preferred method.</li></ul>	<p>Notice also may describe situations in which personal information will be disclosed, such as:</p> <ul style="list-style-type: none"><li>• Certain processing for purposes of public security or defense</li><li>• Certain processing for purposes of public health or safety</li><li>• When allowed or required by law</li></ul> <p>The purpose described in the notice should be stated in such a manner that the individual can reasonably understand the purpose and how the personal information is to be used. Such purpose should be consistent with the business purpose of the entity and not overly broad.</p> <p>Consideration should be given to providing a summary level notice with links to more detailed sections of the <u>policy</u>.</p>

(continued)

Ref.	Notice Criteria	Illustrations and Explanations of Criteria	Additional Considerations
2.2 2.2.1	<p><b>Procedures and Controls</b></p> <p><b>Provision of Notice</b></p> <p>Notice is provided to the individual about the entity's privacy policies and procedures:</p> <ul style="list-style-type: none"> <li>• At or before the time personal information is collected, or as soon as practical thereafter.</li> <li>• At or before the entity changes its privacy policies and procedures, or as soon as practical thereafter.</li> <li>• Before personal information is used for new purposes not previously identified.</li> </ul>	<p>Privacy notice is:</p> <ul style="list-style-type: none"> <li>• Readily accessible and available when personal information is first collected from the individual.</li> <li>• Provided in a timely manner (that is, at or before the time personal information is collected, or as soon as practical thereafter) to enable individuals to decide whether or not to submit personal information to the entity.</li> <li>• Clearly dated to allow individuals to determine whether the notice has changed since the last time they read it or since the last time they submitted personal information to the entity.</li> </ul> <p>In addition, the entity:</p> <ul style="list-style-type: none"> <li>• Tracks previous iterations of the entity's privacy policies and procedures.</li> </ul>	<p>The use of "short notice" privacy statements is becoming more common. A short notice privacy statement is a separate page that succinctly highlights the scope, collection, use, choice, contact details, and other information relative to the information being collected in the particular business activity to which it is attached.</p> <p>See 3.2.2, "Consent for New Purposes and Uses."</p> <p>Some regulatory requirements indicate that a privacy notice is to be provided on a periodic basis, for example, annually in the Gramm-Leach-Bliley Act (GLBA).</p>

(continued)

(continued)

Ref.	Notice Criteria	Illustrations and Explanations of Criteria	Additional Considerations
2.2.2	<p><b>Entities and Activities Covered</b></p> <p>An objective description of the entities and activities covered by the privacy policies and procedures is included in the entity's privacy notice.</p>	<ul style="list-style-type: none"> <li>• Informs individuals of a change to a previously communicated privacy notice, for example, by posting the notification on the entity's Web site, by sending written notice via the mail, or by sending an e-mail.</li> <li>• Documents that changes to privacy policies and procedures were communicated to individuals.</li> </ul> <p>The privacy notice describes the particular entities, business segments, locations, and types of information covered, for example:</p> <ul style="list-style-type: none"> <li>• Operating jurisdictions (legal and political)</li> <li>• Business segments and affiliates</li> <li>• Lines of business</li> <li>• Types of third parties (for example, delivery companies and other types of service providers)</li> <li>• Types of information (for example, information about customers and potential customers)</li> <li>• Sources of information (for example, mail order or online)</li> </ul>	

<i>Ref.</i>	<i>Notice Criteria</i>	<i>Illustrations and Explanations of Criteria</i>	<i>Additional Considerations</i>
2.2.3	<p><b>Clear and Conspicuous</b></p> <p>The entity's privacy notice is conspicuous and uses clear language.</p>	<p>The entity informs individuals when they might assume that they are covered by the entity's privacy policies but in fact are no longer covered (for example linking to another Web site that is similar to the entity's, or using services on the entity's premises provided by third parties).</p> <p>The privacy notice is:</p> <ul style="list-style-type: none"> <li>• In plain and simple language.</li> <li>• Appropriately labeled, easy to see, and not in fine print.</li> <li>• Linked to or displayed on the Web site at points of data collection.</li> </ul>	<p>If multiple notices are used for different subsidiaries or segments of an entity, similar formats are encouraged to avoid consumer confusion and allow consumers to identify any differences.</p> <p>Some regulations, such as GLBA, may contain specific information that a disclosure must contain.</p> <p>Illustrative notices are often available for certain industries and types of collection, use, retention, and disclosure.</p>

## Choice and Consent

<i>Ref.</i>	<i>Choice and Consent Criteria</i>	<i>Illustrations and Explanations of Criteria</i>	<i>Additional Considerations</i>
3.0	The entity describes the choices available to the individual and obtains implicit or explicit consent with respect to the collection, use, and disclosure of personal information.		
3.1	<b>Policies and Communications</b>		
3.1.0	<b>Privacy Policies</b> The entity's privacy policies address the choices available to individuals and the consent to be obtained.		
3.1.1	<b>Communication to Individuals</b> Individuals are informed: <ul style="list-style-type: none"> <li>• About the choices available to them with respect to the collection, use, and disclosure of personal information.</li> <li>• That implicit or explicit consent is required to collect, use, and disclose personal information, unless a law or regulation specifically requires otherwise.</li> </ul>	<p>The entity's privacy notice describes, in a clear and concise manner:</p> <ul style="list-style-type: none"> <li>• The choices available to the individual regarding the collection, use, and disclosure of personal information.</li> <li>• The process an individual should follow to exercise these choices (for example, checking an "opt-out" box to decline receiving marketing materials).</li> <li>• The ability of and process for an individual to change contact preferences.</li> <li>• The consequences of failing to provide personal information required for a transaction or service.</li> </ul> <p>Individuals are advised that:</p> <ul style="list-style-type: none"> <li>• Personal information not essential to the purposes identified in the privacy notice need not be provided.</li> </ul>	<p>Some laws and regulations (such as Principle 11, Limits on the Disclosure of Personal Information, section 1 of the Australian Privacy Act of 1988) provide specific exemptions for the entity not to obtain the individual's consent. Examples of such situations include:</p> <ul style="list-style-type: none"> <li>• The recordkeeper believes on reasonable grounds that use of the information for that other purpose is necessary to prevent or lessen a serious and imminent threat to the life or health of the individual concerned or another person.</li> <li>• Use of the information for that other purpose is required or authorized by or under law.</li> </ul>

(continued)

Ref.	Choice and Consent Criteria	Illustrations and Explanations of Criteria	Additional Considerations
3.1.2	<p><b>Consequences of Denying or Withdrawing Consent</b></p> <p>When personal information is collected, individuals are informed of the consequences of refusing to provide personal information or of denying or withdrawing consent to use personal information for purposes identified in the notice.</p>	<ul style="list-style-type: none"> <li>• Preferences may be changed and consent may be withdrawn at a later time, subject to legal or contractual restrictions and reasonable notice. The type of consent required depends on the nature of the personal information and the method of collection (for example, an individual subscribing to a newsletter gives implied consent to receive communications from the entity). The entity informs individuals at the time of collection:</li> <li>• About the consequences of refusing to provide personal information (for example, transactions may not be processed).</li> <li>• About the consequences of denying or withdrawing consent (for example, opting out of receiving information about products and services may result in not being made aware of sales promotions).</li> <li>• About how they will or will not be affected by failing to provide more than the minimum required personal information (for example, services or products will still be provided).</li> </ul>	(continued)

Ref.	Choice and Consent Criteria	Illustrations and Explanations of Criteria	Additional Considerations
3.2 3.2.1	<b>Procedures and Controls Implicit or Explicit Consent</b> Implicit or explicit consent is obtained from the individual at or before the time personal information is collected or as soon as practical thereafter. The individual's preferences expressed in his or her consent are confirmed and implemented.	The entity:	<ul style="list-style-type: none"> <li>Obtains and documents an individual's consent in a timely manner (that is, at or before the time personal information is collected, or as soon as practical thereafter).</li> <li>Confirms an individual's preferences (in writing or electronically).</li> <li>Documents and manages changes to an individual's preferences.</li> <li>Ensures that an individual's preferences are implemented in a timely fashion.</li> <li>Addresses conflicts in the records about an individual's preferences by providing a process for users to notify and challenge a vendor's interpretation of their contact preferences.</li> <li>Ensures that the use of personal information, throughout the entity and by third parties, is in accordance with an individual's preferences.</li> </ul>

(continued)

Ref.	Choice and Consent Criteria	Illustrations and Explanations of Criteria	Additional Considerations
3.2.2	<p><b>Consent for New Purposes and Uses</b></p> <p>If information that was previously collected is to be used for purposes not previously identified in the privacy notice, the new purpose is documented, the individual is notified, and implicit or explicit consent is obtained prior to such new use or purpose.</p>	<p>When personal information is to be used for a purpose not previously specified, the entity:</p> <ul style="list-style-type: none"> <li>• Notifies the individual and documents the new purpose.</li> <li>• Obtains and documents consent or withdrawal of consent to use the personal information for the new purpose.</li> <li>• Ensures that personal information is being used in accordance with the new purpose or, if consent was withdrawn, not so used.</li> </ul>	<p>If policies are changed but do not constitute new purposes or uses, the organization may wish to consult with legal counsel.</p>
3.2.3	<p><b>Explicit Consent for Sensitive Information</b></p> <p>Explicit consent is obtained directly from the individual when sensitive personal information is collected, used, or disclosed, unless a law or regulation specifically requires otherwise.</p>	<p>The entity collects sensitive information only if the individual provides explicit consent. <i>Explicit consent</i> requires that the individual affirmatively agree, through some action, to the use or disclosure of the sensitive information. Explicit consent is obtained directly from the individual and documented, for example, by requiring the individual to check a box or sign a form. This is sometimes referred to as <u>opt in</u>.</p>	<p>The Personal Information Protection and Electronic Documents Act (PIPEDA), Schedule 1, clause 4.3.6, states that an organization should generally seek explicit consent when the information is likely to be considered sensitive.</p>

(continued)

Ref.	Choice and Consent Criteria	Illustrations and Explanations of Criteria	Additional Considerations
3.2.4	<p><b>Consent for Online Data Transfers to/From an Individual's Computer</b></p> <p>Consent is obtained before personal information is transferred to/from an individual's computer.</p>	<p>The entity requests customer permission to store, alter, or copy personal information (other than cookies) in the customer's computer.</p> <p>If the customer has indicated to the entity that it does not want cookies, the entity has controls to ensure that cookies are not stored on the customer's computer. Organizations will not download software that will transfer personal information without obtaining permission.</p>	<p>Most jurisdictions referenced to in Attachment B, "Comparison of International Privacy Concepts," prohibit the collection of sensitive data, unless specifically allowed. For example, in the European Union (EU) member state of Greece, Article 7 of Greece's "Law on the protection of individuals with regard to the processing of personal data" states, "The collection and processing of sensitive data is forbidden." However, a permit to collect and process sensitive data may be obtained.</p> <p>Some jurisdictions consider government-issued personal identifiers for example, Social Security numbers or Social Insurance numbers, to be sensitive information.</p> <p>Consideration should be given to software that is designed to mine or extract information from a computer and therefore may be used to extract personal information, e.g., spyware.</p>

Collection

Ref.	Collection Criteria	Illustrations and Explanations of Criteria	Additional Considerations
4.0	The entity collects personal information only for the purposes identified in the notice.		
4.1	<b>Policies and Communications</b>		
4.1.0	<b>Privacy Policies</b> The entity's privacy policies address the collection of personal information.		Some jurisdictions, such as some countries in Europe, require entities that collect personal information to register with their regulatory body.
4.1.1	<b>Communication to Individuals</b> Individuals are informed that personal information is collected only for the purposes identified in the notice.	The entity's privacy notice discloses the types of personal information collected and the methods used to collect personal information.	
4.1.2	<b>Types of Personal Information Collected and Methods of Collection</b> The types of personal information collected and the methods of collection, including the use of cookies or other tracking techniques, are documented and described in the privacy notice.	<p>Examples of the types of personal information collected are:</p> <ul style="list-style-type: none"><li>• Financial (for example, financial account information)</li><li>• Health (for example, information about physical or mental status or history)</li><li>• Demographic (for example, age, income range, social geo-codes).</li></ul> <p>Examples of methods of collecting and third-party sources of personal information are:</p> <ul style="list-style-type: none"><li>• Credit reporting agencies</li><li>• Over the telephone</li><li>• Via the Internet using forms, cookies, or <u>Web beacons</u></li></ul>	Some jurisdictions, such as those in the EU, require that individuals have the opportunity to decline the use of cookies.

(continued)

Ref.	Collection Criteria	Illustrations and Explanations of Criteria	Additional Considerations
4.2 4.2.1	<p><b>Procedures and Controls</b></p> <p><b>Collection Limited to Identified Purpose</b></p> <p>The collection of personal information is limited to that necessary for the purposes identified in the notice.</p>	<p>The entity's privacy notice discloses that it uses cookies and Web beacons and how they are used. The notice also describes the consequences if the cookie is refused.</p> <p>Systems and procedures are in place to:</p> <ul style="list-style-type: none"> <li>Specify the personal information essential for the purposes identified in the notice and differentiate it from optional personal information.</li> <li>Periodically review the entity's program or service needs for personal information (for example, once every five years or when there are changes to the program or service).</li> <li>Obtain explicit consent when sensitive personal information is collected (see 3.2.3, "Explicit Consent for Sensitive Information").</li> <li>Monitor that the collection of personal information is limited to that necessary for the purposes identified in the privacy notice and that all optional data is identified as such.</li> </ul>	

(continued)

<i>Ref.</i>	<i>Collection Criteria</i>	<i>Illustrations and Explanations of Criteria</i>	<i>Additional Considerations</i>
4.2.2	<p><b>Collection by Fair and Lawful Means</b> Methods of collecting personal information are reviewed by management, legal counsel, or both before they are implemented to confirm that personal information is obtained:</p> <ul style="list-style-type: none"> <li>Fairly, without intimidation or deception, and</li> <li>Lawfully, adhering to all relevant rules of law, whether derived from statute or common law, relating to the collection of personal information.</li> </ul>	<p>The entity's legal counsel reviews the methods of collection and any changes thereto.</p>	<p>It may be considered a deceptive practice:</p> <ul style="list-style-type: none"> <li>To use tools, such as cookies and Web beacons, on the entity's Web site to collect personal information without providing notice to the individual.</li> <li>To link information collected during an individual's visit to a Web site with personal information from other sources without providing notice to the individual.</li> <li>To use a third party to collect information in order to avoid providing notice to individuals.</li> </ul> <p>Entities should consider legal and regulatory requirements in jurisdictions other than the one in which they operate (for example, an entity in Canada collecting personal information about Europeans may be subject to certain European legal requirements). A review of complaints may help to identify whether there are unfair or unlawful practices.</p>

(continued)

Ref.	Collection Criteria	Illustrations and Explanations of Criteria	Additional Considerations
4.2.3	<p><b>Collection From Third Parties</b></p> <p>Management confirms that third parties from whom personal information is collected (that is, sources other than the individual) are reliable sources that collect information fairly and lawfully.</p>	<p>The entity:</p> <ul style="list-style-type: none"> <li>Performs due diligence before establishing a relationship with a third-party data provider.</li> <li>Reviews the privacy policies and collection methods of third parties before accepting personal information from third-party data sources.</li> </ul>	<p>Contracts include provisions requiring personal information to be collected fairly and lawfully and from reliable sources.</p> <p>If information collected from third parties is to be combined with information collected from the individual, consideration should be given to providing notice to such individuals.</p>

# Use and Retention

Ref.	Use and Retention Criteria	Illustrations and Explanations of Criteria	Additional Considerations
5.0	The entity limits the use of personal information to the purposes identified in the notice and for which the individual has provided implicit or explicit consent. The entity retains personal information for only as long as necessary to fulfill the stated purposes.		
5.1	Policies and Communications		
5.1.0	Privacy Policies		
	The entity's privacy policies address the use and retention of personal information.		
5.1.1	Communication to Individuals		
	Individuals are informed that personal information is:	The entity's privacy notice describes the uses of personal information, for example:
